ADVISORY FOR DEVIL'S SWAMP/BAYOU BATON ROUGE

In response to follow up sampling and analysis of finfish and crawfish, the Louisiana Department of Health & Hospitals (DHH), Department of Environmental Quality (DEQ), and Department of Wildlife & Fisheries (DWF) are updating the advisory for the Devil's Swamp/Bayou Baton Rouge Area (E. Baton Rouge Parish). The area of concern is bounded on the north by Hall Buck Marine Road, on the east by the bluffs and the Baton Rouge Barge Harbor and on the south and west by the Mississippi River.

DHH, DEQ and DWF advise the following:

• **DO NOT EAT FISH OR CRAWFISH FROM THIS AREA**

This update is based on limited sampling data from 2012-2013. Largemouth bass, channel catfish, crappie and bluegill samples from Devil's Swamp Lake and crawfish from swampy areas outside of the Lake were tested for hexachlorobenzene (HCB), hexachlorobutadiene (HCBd), polychlorinated biphenyls (PCBs), arsenic, lead and mercury. Unacceptable levels of PCBs and mercury were found in some species of finfish. Unacceptable levels of PCBs were also found in crawfish hepatopancreas (fat). This advisory supersedes a previous advisory issued for this area on 7/9/1993.

Due to historic water and sediment contamination that may continue to impact these water bodies, the agencies continue to advise the public not to swim nor participate in other primary water contact sports in the area of concern.

This advisory is issued as a precaution. Any further sampling data from this area will be evaluated to determine the need for modifications to the current recommendations. For more information regarding this advisory, contact the Department of Health and Hospitals at 1-888-293-7020. If you have questions or concerns about your health, please consult a physician.
