Early Childhood Risk

St. John	Overall Risk Ranking	Factors Ranked as "High Risk"	Factors Ranked as "Moderate Risk"
St. John	Moderate-High	Births to Single Mothers, Infant Mortality (2007-2009), Attending Pre-K, HS/EHS or HQ Child Care	Unemployment, Low Birth Weight (2009), Ages 0-5 Uninsured, Pre-Literacy Skills

The *Early Childhood Risk and Reach Report* (Fall 2012) includes 11 indicators impacting the well-being of children under age 5 by parish. These risk indicators relate to Economic, Health and Education Factors. An average score of "Low Risk" suggests that young children in that parish are more likely to be well-prepared and ready for school. A score of "High Risk" suggests that the young children are at risk for entering school already behind and remaining behind. The complete report can be found at www.partnersforhealthybabies.org

¹Rate per 1,000 female population in specified age range

²Low risk is defined as a pregnant woman who has full a term (37 up to 42 weeks), singleton, and vertex presentation baby

³Rate per 1,000 live births plus fetal deaths

⁴Rate per 1,000 live births

⁵Rate per 100,000 population in specified age range

*Non Hispanic

**Rates or percents with numerators greater than zero and less than 5 are not reported
