LA HAP stands for Louisiana Health Access Program, which is the AIDS Drug Assistance Program (ADAP) for the state of Louisiana. LA HAP is a federally funded program that provides access to medications for uninsured individuals and assistance with premiums and cost shares for insured individuals for the purpose of ensuring that clients access health care and achieve viral suppression. Please visit www.lahap.org for more information regarding the program.

LA HAP publishes quarterly factsheets for the entire state and each public health region. All LA HAP factsheets for the second quarter of 2017 are complied in this document.

ENROLLMENT SUMMARY

During the quarter, 3,708 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=149) were first time enrollees.

There were 149 clients who disenrolled from the program.

A total of 75 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 27 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The majority of clients live in the New Orleans and Baton Rouge regions, 39% (n=1,437) clients and 24% (n=900) clients respectively.

Medicaid expansion has decreased the number of enrolled clients. In the second quarter of 2016 there were 6,897 clients enrolled, a decrease of 46% when compared to the current quarter.

CLINICAL OUTCOMES SUMMARY

A total of 94% (n=3,482) clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-six percent (n=3,176) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 87% of insured clients were virally suppressed compared to only 78% of uninsured clients.

Medicaid expansion impacted the percentage of clients who are virally suppressed as clients with worse outcomes were transitioned onto Medicaid. Viral suppression for LA HAP clients increased from 81% in the second quarter of 2016 to 86% for the current quarter.

UTILIZATION SUMMARY

LA HAP assisted with 39,643 claims including 28,041 (71%) drug claims, 2,941 (7%) copays, 844 (2%) deductibles and 7,698 (19%) premiums. Of these, 37,673 (95%) were for insured claims and 1,970 (5%) were for uninsured claims.

There were an average of 12.9 claims per person.

There were 2,718 clients who utilized health insurance assistance and 414 clients who utilized uninsured assistance.

Medicaid expansion has decreased the number of claims LA HAP assists with. There was a 10% decrease this quarter when compared to the same quarter in 2016 (43,936 compared to 39,643).

ENROLLMENT SUMMARY

During the quarter, 1,437 clients from the New Orleans Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=63) were first time enrollees.

There were 106 clients who disenrolled from the program. The majority 76% (n=81) did not recertify, and another 20% (n=21) were eligible for Medicaid.

A total of 21 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 3 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The largest number of clients enrolled in LA HAP reside in the New Orleans Region.

UTILIZATION SUMMARY

LA HAP assisted with 15,208 claims including 10,478 (69%) drug claims, 1,202 (8%) copays, 243 (2%) deductibles and 3,285 (22%) premiums. Of these, 14,446 (95%) were for insured claims and 762 (5%) were for uninsured claims.

There were an average of 12.9 claims per person.

There were 1,041 clients who utilized health insurance assistance and 167 clients who utilized uninsured assistance.

Thirty-eight percent of all LA HAP claims were for clients from the New Orleans Region.

CLINICAL OUTCOMES SUMMARY

A total of 93% (n=1,337) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-seven percent (n=1,243) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The New Orleans Region has the second highest percentage of clients virally suppressed.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 87% of insured clients were virally suppressed compared to 83% of uninsured clients.

Only 71% of transgender clients achieved viral suppression compared to 86% of male clients despite having similar in care percentages.

ENROLLMENT SUMMARY

During the quarter, 900 clients from the Baton Rouge Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=25) were first time enrollees.

There were 58 clients who disenrolled from the program. The majority 72% (n=42) did not recertify, and another 24% (n=14) were eligible for Medicaid.

A total of 22 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 9 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The second largest number of clients enrolled in LA HAP reside in the Baton Rouge Region.

ENROLLED CLIENTS BY PARISH

UNITLIZATION SUMMARY

LA HAP assisted with 9,940 claims including 7,299 (73%) drug claims, 484 (5%) copays, 204 (2%) deductibles and 1,953 (20%) premiums. Of these, 9,547 (96%) were for insured claims and 393 (4%) were for uninsured claims.

There were an average of 13.5 claims per person.

There were 667 clients who utilized health insurance assistance and 82 clients who utilized uninsured assistance.

Twenty-five percent of all LA HAP claims were for clients from the Baton Rouge Region.

CLINICAL OUTCOMES SUMMARY

A total of 97% (n=872) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-six percent (n=777) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in Baton Rouge is similar to the statewide percentage of 86%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 88% of insured clients were virally suppressed compared to 73% of uninsured clients.

*Clients defined as ‘In Care’ had at least one CD4 or Viral Load reported between July 1, 2016 and June 30, 2017
†Clients defined as ‘Virally Suppressed’ had at least one Viral Load reported between July 1, 2016 and June 30, 2017 with the most recent result <200 copies/mL.

ENROLLMENT SUMMARY

During the quarter, 188 clients from the Houma Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=7) were first time enrollees.

There were 13 clients who disenrolled from the program.

A total of 5 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 3 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Houma Region account for 5% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 2,032 claims including 1,225 (66%) drug claims, 237 (12%) copays, 50 (3%) deductibles and 410 (20%) premiums. Of these, 1,894 (93%) were for insured claims and 138 (7%) were for uninsured claims.

There were an average of 12.4 claims per person.

There were 145 clients who utilized health insurance assistance and 24 clients who utilized uninsured assistance.

Five percent of all LA HAP claims were for clients from the Houma Region.

CLINICAL OUTCOMES SUMMARY

A total of 92% (n=173) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-eight percent (n=166) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Houma Region has the highest percentage of clients virally suppressed in the state.

ENROLLMENT SUMMARY

During the quarter, 275 clients from the Lafayette Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=12) were first time enrollees.

There were 18 clients who disenrolled from the program.

A total of 9 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 2 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lafayette Region account for 7% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 3,359 claims including 2,550 (76%) drug claims, 190 (6%) copays, 104 (3%) deductibles and 515 (15%) premiums. Of these, 3,214 (96%) were for insured claims and 145 (4%) were for uninsured claims.

There were an average of 14.0 claims per person.

There were 209 clients who utilized health insurance assistance and 33 clients who utilized uninsured assistance.

Eight percent of all LA HAP claims were for clients from the Lafayette Region.

CLINICAL OUTCOMES SUMMARY

A total of 93% (n=255) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-six percent (n=235) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Lafayette Region is similar to the statewide percentage of 86%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 87% of insured clients were virally suppressed compared to 77% of uninsured clients.

Only 83% of black clients achieved viral suppression compared to 88% of white clients despite having similar in care percentages.

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

*Clients defined as ‘In Care’ had at least one CD4 or Viral Load reported between July 1, 2016 and June 30, 2017
†Clients defined as ‘Virally Suppressed’ had at least one Viral Load reported between July 1, 2016 and June 30, 2017 with the most recent result <200 copies/mL

LAHAP Region 4 Quarterly Report
20 of 40

LAHAP Region 4 Quarterly Report
ENROLLMENT SUMMARY

During the quarter, 147 clients from the Lake Charles Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 1% (n=2) were first time enrollees.

There were 16 clients who disenrolled from the program.

Only 1 client enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

No clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lake Charles Region account for 4% of LA HAP enrollees.

UTILIZATION SUMMARY

LA HAP assisted with 1,341 claims including 679 (51%) drug claims, 213 (16%) copays, 116 (9%) deductibles and 333 (25%) premiums. Of these, 2,980 (95%) were for insured claims and 146 (5%) were for uninsured claims.

There were an average of 11.2 claims per person.

There were 114 clients who utilized health insurance assistance and 6 clients who utilized uninsured assistance.

Three percent of all LA HAP claims were for clients from the Lake Charles Region.

CLINICAL OUTCOMES SUMMARY

A total of 93% (n=137) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-three percent (n=122) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Lake Charles region is less than the statewide percentage of 86%.

ENROLLMENT SUMMARY
During the quarter, 96 clients from the Alexandria Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=3) were first time enrollees.

There were 14 clients who disenrolled from the program.

Only 1 client enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

No clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Alexandria Region account for 3% of LA HAP enrollees.

UTILIZATION SUMMARY
LA HAP assisted with 930 claims including 684 (74%) drug claims, 43 (5%) copays, 22 (2%) deductibles and 181 (20%) premiums. Of these, 866 (93%) were for insured claims and 64 (7%) were for uninsured claims.

There were an average of 11.6 claims per person.

There were 68 clients who utilized health insurance assistance and 12 clients who utilized uninsured assistance.

Two percent of LA HAP claims were for clients from the Alexandria Region.

CLINICAL OUTCOMES SUMMARY
A total of 95% (n=91) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-two percent (n=79) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Alexandria Region is less than the statewide percentage of 86%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 84% of insured clients were virally suppressed compared to only 75% of uninsured clients.

Only 78% of black clients achieved viral suppression compared to 91% of white clients despite having similar in care percentages.

ENROLLMENT SUMMARY

During the quarter, 270 clients from the Shreveport Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 5% (n=14) were first time enrollees.

There were 24 clients who disenrolled from the program.

A total of 7 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 5 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Shreveport Region account for 7% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 2,419 claims including 1,707 (71%) drug claims, 212 (9%) copays, 57 (2%) deductibles and 433 (18%) premiums. Of these, 2,193 (91%) were for insured claims and 226 (9%) were for uninsured claims.

There were an average of 10.6 claims per person.

There were 191 clients who utilized health insurance assistance and 42 clients who utilized uninsured assistance.

Six percent of all LA HAP claims were for clients from the Shreveport Region.

CLINICAL OUTCOMES SUMMARY

A total of 94% (n=254) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-two percent (n=220) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Shreveport Region had the lowest percentage of clients virally suppressed in the state.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 86% of insured clients were virally suppressed compared to 59% of uninsured clients.

Only 78% of black clients achieved viral suppression compared to 88% of white clients despite having similar in care percentages.

ENROLLMENT SUMMARY

During the quarter, 159 clients from the Monroe Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 7% (n=12) were first time enrollees.

There were 12 clients who disenrolled from the program.

A total of 5 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 2 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Monroe Region account for 4% of LA HAP enrollees.

UTILIZATION SUMMARY

LA HAP assisted with 1,664 claims including 1,330 (80%) drug claims, 42 (3%) copays, 12 (1%) deductibles and 280 (17%) premiums. Of these, 1,568 (94%) were for insured claims and 96 (6%) were for uninsured claims.

There were an average of 12.8 claims per person.

There were 112 clients who utilized health insurance assistance and 19 clients who utilized uninsured assistance.

Four percent of LA HAP claims were for clients from the Monroe Region.

CLINICAL OUTCOMES SUMMARY

A total of 89% (n=142) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-two percent (n=130) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Monroe Region had the second lowest percentage of clients virally suppressed in the state.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% of insured clients were virally suppressed compared to 68% of uninsured clients.

LAHAP Region 8 Quarterly Report
36 of 40
Louisiana Health Access Program  
Hammond/Slidell Region 9 Quarterly Report  
April 1, 2017 - June 30, 2017

ENROLLMENT SUMMARY

During the quarter, 236 clients from the Hammond/Slidell Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 5% (n=11) were first time enrollees.

There were 15 clients who disenrolled from the program.

Four clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 3 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Hammond/Slidell Region account for 6% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 2,750 claims including 1,979 (72%) drug claims, 318 (12%) copays, 36 (1%) deductibles and 417 (15%) premiums. Of these, 2,623 (95%) were for insured claims and 127 (5%) were for uninsured claims.

There were an average of 14.0 claims per person.

There were 171 clients who utilized health insurance assistance and 29 clients who utilized uninsured assistance.

Seven percent of all LA HAP claims were for clients from the Hammond/Slidell Region.

CLINICAL OUTCOMES SUMMARY

A total of 94% (n=221) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-six percent (n=204) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Hammond/Slidell Region is similar to the statewide percentage of 86%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 87% of insured clients were virally suppressed compared to 83% of uninsured clients.

CARE CONTINUUM FOR INSURED & UNINSURED CLIENTS

*Clients defined as ‘In Care’ had at least one CD4 or Viral Load reported between July 1, 2016 and June 30, 2017

†Clients defined as ‘Virally Suppressed’ had at least one Viral Load reported between July 1, 2016 and June 30, 2017 with the most recent result <200 copies/mL
