

ORIGINAL 2

AMENDMENT TO

AGREEMENT BETWEEN STATE OF LOUISIANA
DEPARTMENT OF HEALTH AND HOSPITALS

Amendment #: 4

CFMS #: 708075

DOA #: 305-20056

DHH #: 057746

(Regional/ Program/
Facility)

Medical Vendor Administration

Bureau of Health Services Financing

AND

United Healthcare of Louisiana, Inc.

Contractor Name

Original Contract Amt \$68,031,170.00

Original Contract Begin Date 02-01-2012

Original Contract End Date 01-31-2015

AMENDMENT PROVISIONS

Change Contract From:

Maximum Amount: \$82,896,230.00

See Attachment A-4.

Change To:

Maximum Amount: 105,067,800

See Attachment A-4.

Justification:

The changes contained in Attachment A-4 are necessary for the continued operation of the Medicaid managed care program.

This Amendment Becomes Effective: 07-01-2014

This amendment contains or has attached hereto all revised terms and conditions agreed upon by contracting parties.

IN WITNESS THEREOF, this amendment is signed and entered into on the date indicated below.

Subject: Bayou Health – Shared Savings Model Benchmark Development for Contract Period
January 1, 2014 through June 30, 2014

Dear Ms. Johnson:

The Louisiana Department of Health and Hospitals (DHH) contracted with Mercer Government Human Services Consulting (Mercer) to develop benchmark costs for the purpose of measuring savings achieved by the Shared Savings plans under the Bayou Health Program. These benchmarks are to cover the period from January 1, 2014 through June 30, 2014.

Section 1902(a)(13)(C) of the Social Security Act as amended by the Affordable Care Act (ACA) of 2010, requires that state Medicaid programs increase payments to primary care providers in 2013 and 2014. Please note the unit cost differential due to the ACA Section 1202 Primary Care Service increase is not included in the benchmarks. This cost differential will be paid to the providers in accordance with the approved State Plan Amendment for the primary care physician (PCP) increase.

This letter presents an overview of the methodology used in Mercer's benchmark development process as approved by the Centers for Medicare & Medicaid Services (CMS) on October 17, 2012. This benchmark development process was based on Medicaid fee-for-service (FFS) medical claims and resulted in development of a single set of proposed benchmarks for each region and rate cell combination, which are attached to this letter.

Rate Methodology

Overview

Benchmark costs for the Shared Savings model were developed in an actuarially sound manner. Actuarially sound is defined in this letter as developed in accordance with generally accepted actuarial principles and practices. The benchmark rates are appropriate for the populations to be covered and the services to be furnished under this program.

One of the key considerations in the benchmark development was the base data. Mercer worked with DHH to obtain Medicaid FFS data from State Fiscal Year (SFY) 2011 and seven months of SFY 2012 (July 2011 – January 2012). Louisiana's SFY runs from July 1 through June 30 of the following year. Restrictions were applied to the enrollment and FFS claims data so that it matched the populations and benefit package defined in the Contract.

To develop benchmarks, adjustments were applied to the base data:

- Removal of enrollment and claims during periods of retroactive eligibility
- Completion factors to account for unpaid claims at the time of data submission
- Adjustment to reflect amounts paid outside of the Louisiana Medicaid Management Information System (MMIS), including but not limited to inpatient outlier claims, inpatient and outpatient cost reconciliations, and fraud and abuse recoupments
- Trend factors to forecast the expenditures and utilization to the appropriate contract period
- Prospective and historic program changes not reflected in the base data
- Prescription drug rebates
- Data smoothing

The Graduate Medical Education (GME) component of teaching hospital per diems was not removed from the cost basis so as to develop benchmarks appropriate for reconciling against Shared Savings program costs. Those costs will include the GME element of the per diems. Since the costs coordinated by the Shared Savings program will be paid using Medicaid FFS rates, the per diems paid will include exactly the same GME amounts as in the Louisiana Medicaid State Plan.

Using prescription drug costs net of rebates in both benchmark and actual costs guards against sharing too large of a savings, but does suggest that benchmarks be reviewed in the event of any material changes in the State's rebate structure or results.

Since DHH will not include costs over \$100,000 per year for any recipient in the reconciliation, an appropriate adjustment was made to the benchmark costs.

The resulting benchmarks were expressed as per member per month (PMPM) amounts by rate cell. Risk adjustment will be applied to the resulting targets in a manner comparable to that used for the Prepaid program rates, which considers the total covered population (Shared Savings, Prepaid, and FFS enrollees, where applicable). This accounts for health risk differences between the various Shared Savings plans and between the Shared Savings program as a whole and the Prepaid and FFS programs (where applicable). This will allow for any selection for or against each of the programs.

Base Data Development

Mercer was provided with Medicaid FFS enrollment and claims data from SFY 2011 and the first seven months of SFY 2012, with runout through February 2013. Mercer was also provided with supplemental data files containing information on outlier claims paid outside of the MMIS system, fraud and abuse recoupments, prescription drug rebates, and inpatient and outpatient hospital cost settlements. These payments/recoupments outside of the MMIS system (in some instances based on estimates) have been applied to the MMIS FFS claims data, as appropriate, so that the relevant cost for the population eligible for enrollment in the Shared Savings program is replicated.

Mercer reviewed the data for consistency and reasonableness and determined that the data appears appropriate for the purpose of setting benchmarks for the Shared Savings program.

As discussed with DHH, Mercer relied on the experience of the children's portion of the Family and Children category to generate the LaCHIP Affordable Plan (LAP) benchmark as their benefit package and morbidity is expected to be similar.

Enrollment Data

The enrollment file supplied by DHH's fiscal agent provided all enrollment records for each member for each month. Therefore, if a member's eligibility status was retroactively changed, both the old and the new records were present. Most often, this occurred because a recipient was retroactively categorized as Supplemental Security Income (SSI) from Family and Children. In this case, the enrollment file would have included both the SSI enrollment record and the Family and Children record for the same month. Mercer worked with DHH to develop a hierarchy to determine the appropriate enrollment record to use – typically the SSI record.

Claims Data

Mercer used SFY 2011 and seven months of SFY 2012 FFS data as the data source for the development of benchmark costs. The FFS data reflect the actual medical expenses to DHH of providing health care coverage for the Shared Savings program eligible population. The expenses are net of third-party liability and subrogation. Mercer reviewed the FFS data to ensure they appeared reasonable and appropriate, but did not audit the data. Specifically, Mercer reviewed the following:

- Completeness and consistency of incurred claims over time
 - Consistency between FFS claims data and DHH published reports
 - Consistency between payments outside of the MMIS claims and DHH published reports
 - Data properly restricted to those services and populations to be covered under the Shared Savings program
-

Adjustments were made to the FFS data to reflect the complete cost of an actuarially equivalent population for the Shared Savings program contract. The most significant adjustments are listed below. In each case, the adjustment was applied at the rate cell level.

Outlier Claims for Children under Six Years – DHH makes payments, to a maximum of \$10 million annually, for outlier claims. Outlier claims are those inpatient admissions where the cost of the claim exceeds \$150,000 and the patient is under six years of age. Adding outlier claims with a cap of \$10 million per year to the base data resulted in an increase to cost of 0.4% in SFY 2011 and 0.4% in SFY 2012.

Incurred-but-not-Reported (IBNR) Claims Adjustments – Mercer estimated and adjusted for the remaining liability associated with IBNR claims for SFY 2011 and SFY 2012. The overall adjustments for SFY 2011 and SFY 2012, using paid claims data through February 2013, were 0.0% and 0.0%, respectively.

Fraud and Abuse Recoupments – Adjustments were made for recoupments due to fraud and abuse recoveries. These adjustments were -0.2% in SFY 2011 and 0.0% in SFY 2012.

GME – Hospital per diem rates used to make payments for care coordinated by the Shared Savings program include the same GME elements as under the State Plan. Therefore, no adjustment was needed.

Pharmacy Rebates – Adjustments were made to reflect pharmacy rebates. Based on historical experience, Mercer assumed that 44.8% of drug costs would be returned to the program in the form of rebates. This is equivalent to 12.3% of the total pharmacy and non-pharmacy claims cost in SFY 2011 and 12.7% in SFY 2012.

Inpatient, Outpatient Hospital Cost Settlements, and Supplemental Payments to High Medicaid Community Hospitals – Louisiana State University (LSU) State hospitals and other hospitals receive settlements based on cost reports. Certain "High Medicaid Community Hospitals" also receive supplemental payments that are provided for in the State Plan. Mercer applied adjustments of -0.3% in SFY 2011 and -0.2% in SFY 2012, to capture the impact of cost settlements and supplemental payments made outside of the MMIS.

Retroactive Eligibility – Individuals will not enroll with a Shared Savings program until they are Medicaid eligible. Even after receiving Medicaid eligibility, it may take 30 days to enroll in Bayou Health. Therefore, enrollment and claims incurred during the retroactive period and those during the first month of Medicaid eligibility have been removed from our calculations. Infants are an exception because they will be covered under the mother's plan from the date of birth.

Non-covered Populations – In general, the Shared Savings program includes individuals classified as SSI, Family and Children, Foster Children, Breast and Cervical Cancer, and LAP. The following individuals are excluded from participation in the Shared Savings program:

- Medicare dually eligible individuals
- Home- and community-based services (HCBS) waiver recipients
- Chisholm class members
- Individuals receiving Medicaid hospice services
- Individuals residing in long-term care facilities (nursing home, intermediate care facility/developmentally disabled {ICF/DD})
- Individuals receiving services for three months or less (medically needy spend-down)
- Undocumented immigrants eligible for emergency services only
- Enrollees receiving single service (family planning only)

Non-covered Services – The Shared Savings program benchmarks are based on services covered under the provider agreement. The following services have been excluded in the determination of the benchmarks:

- Services provided through DHH's Early-steps Program
 - Dental services
 - ICF/DD services
 - Hospice
 - Personal care services (early periodic screening diagnostic treatment (EPSDT) and long-term personal care services)
 - Nursing facility services
 - School-based individualized education plan services provided by a school district and billed through the intermediate school district, or school-based services funded with certified public expenditures including school nurses
 - HCBS waiver services
 - Federally qualified health center (FQHC) services with specified primary behavioral health diagnosis codes
 - Hospital inpatient and outpatient, including emergency room, services with specified primary behavioral health diagnosis codes
 - Hospital inpatient acute detoxification services
 - Targeted case management services
 - Durable medical equipment (DME)
 - Orthotics and prosthetics
 - Non-emergency transportation, including post-stabilization hospital-to-hospital transportation
 - Specialized behavioral health drugs
-

Client Participation Amounts – Costs associated with "spend-down" and post-eligibility treatment of income are not included in the base data.

Third-party Liability – Recoveries associated with third-party liability and subrogation have been removed from claims.

Disproportionate Share Hospital (DSH) Payments – DSH payments are made outside of the MMIS system. These payments are not included in the benchmarks and therefore no adjustment is required.

Co-payments – Co-payments are only applicable to prescription drugs. Since co-payments will remain in place unchanged, no adjustment is necessary.

PMPM Category Groupings

Benchmarks are developed using PMPM amounts that vary by the major categories of eligibility. Furthermore, where appropriate, the PMPMs within a particular category of eligibility are subdivided into different age and gender bands to reflect differences in risk due to age and gender. In addition, due to the high cost associated with pregnancies, DHH will include a maternity cost allowance in the benchmark for each delivery that takes place (kick allowance). The following is a list of the different PMPM cells for each eligibility category including the maternity kick allowance.

SSI	
0 – 2 Months, Male and Female	14 – 18 Years, Male and Female
3 – 11 Months, Male and Female	19 – 44 Years, Male and Female
1 – 5 Years, Male and Female	45+ Years, Male and Female
6 – 13 Years, Male and Female	
Family and Children	
0 – 2 Months, Male and Female	14 – 18 Years, Female
3 – 11 Months, Male and Female	19 – 44 Years, Male
1 – 5 Years, Male and Female	19 – 44 Years, Female
6 – 13 Years, Male and Female	45+ Years, Male
14 – 18 Years, Male	45+ Years, Female
Foster Care Children, All Ages	Breast and Cervical Cancer, All Ages
LAP, All Ages	Maternity Kickpayment

Trend Development

Trend is an estimate of the change in the overall cost of providing health care benefits over a period of time. A trend factor is necessary to estimate the expenses of providing health care

services in a future period. Mercer reviewed a variety of sources to develop the trend assumptions. These sources included, but were not limited to:

- Health care economic indices such as Consumer Price Index for the South-Atlantic region
- Mercer's regression analysis applied to trends exhibited in the FFS claims data
- Trends in other state Medicaid programs for similar populations
- Judgment regarding economic outlook balancing a variety of sources

Mercer developed individual trends for each category of eligibility and service category. Mercer's target trend can be found in the following table.

Target FFS Trend

Category of Aid (COA) Description	Category of Service (COS) Description	Utilization	Unit Cost	RMPM Trend
SSI	Inpatient Hospital	1.0%	0.6%	1.6%
SSI	Outpatient Hospital	4.9%	3.3%	8.3%
SSI	PCP	4.2%	0.6%	4.8%

Category of Aid (COA) Description	Category of Service (COS) Description	Utilization	Unit Cost	PMPM Trend
Breast and Cervical Cancer	Clinic	4.2%	0.6%	4.8%
Breast and Cervical Cancer	Family Planning	4.2%	0.6%	4.8%
Breast and Cervical Cancer	Other	2.3%	0.6%	2.9%
Breast and Cervical Cancer	Prescribed Drugs	1.1%	4.0%	5.2%
Breast and Cervical Cancer	Emergency Room	4.9%	3.3%	8.3%
Breast and Cervical Cancer	Basic Behavioral Health	4.2%	0.6%	4.8%
Maternity Kickpayment	Maternity Kickpayment	0.0%	0.0%	0.0%

The overall annualized PMPM trend assumption for the Shared Savings program is 3.7%.

Programmatic Changes/Rate Issues

Programmatic change adjustments recognize the impact of benefit or eligibility changes that took place during or after the base year. Mercer applied programmatic change adjustments to incorporate factors not fully reflected in the base data. These adjustments were mutually exclusive and made only once in the benchmark setting process.

Changes to Inpatient Hospital Reimbursement – Several changes have been made to hospital per diem rates. Effective for dates of service on or after February 1, 2013, the inpatient per diem rates as of August 1, 2012, are reduced by 1.0% for children's and private hospitals. Rural and state hospitals are excluded from the rate reductions effective February 1, 2013. In addition, certain LSU hospitals have adjusted inpatient per diems during 2013 due to privatization, which are reflected in the revised rates. Privatized LSU hospitals will no longer receive cost settlements for inpatient services.

Changes to the Laboratory/Radiology Fee Schedule – Effective for dates of service on or after July 1, 2012, the reimbursement rate for laboratory services were reduced by 3.7% of the fee amounts on file as of January 1, 2012.

Outpatient Hospital Fee Schedule Changes

Children's Specialty Hospitals – Effective for dates of service on or after February 1, 2013, the reimbursement paid to children's specialty hospitals for clinical diagnostic laboratory, rehabilitation

services, and outpatient hospital facility fees for office/outpatient visits is reduced by 1.0% of the fee schedule on file as of August 1, 2012.

From February 3, 2010 through July 31, 2010, these hospitals were cost settled at 92.15% of allowable cost. From August 1, 2010 through December 31, 2010, these hospitals were cost settled at 87.91% of allowable cost. From January 1, 2011 through July 31, 2012, these hospitals were cost settled at 86.15% of allowable cost. From August 1, 2012 through January 31, 2013, these hospitals' cost settlements were to be reduced by 3.7% of allowable cost as calculated through the cost report settlement process, resulting in reimbursement of 82.96% of allowable cost.

Non-state and Non-rural Hospitals – Most recently, effective for dates of service on or after February 1, 2013, the reimbursement paid to non-rural, non-state hospitals for outpatient clinical diagnostic laboratory services, surgeries, rehabilitation services, and hospital facility fees for office/outpatient visits is reduced by 1.0% of the fee schedule on file as of August 1, 2012. Final reimbursement going forward is 66.46% of allowable cost.

From February 3, 2010 through July 31, 2010, these hospitals were cost settled at 74.56% of allowable cost. From August 1, 2010 through December 31, 2010, these hospitals were cost settled at 71.13% of allowable cost. From January 1, 2011 through July 31, 2012, these hospitals were cost settled at 69.71% of allowable cost. From August 1, 2012 through January 31, 2013, these hospitals' cost settlements were reduced by 3.7% of allowable cost as calculated through the cost report process, making reimbursement 67.13% of allowable cost.

State Hospitals – Effective for dates of service on or after August 1, 2012, the reimbursement paid to state hospitals for outpatient clinical diagnostic laboratory services, surgeries, rehabilitation services, and hospital facility fees for office/outpatient visits is reduced by 10.0% of the fee schedule on file as of July 31, 2012. State hospitals are excluded from the rate reductions effective February 1, 2013.

Through July 31, 2012, state hospitals were cost settled at 100.0% of allowable cost for other outpatient services. From August 1, 2012 forward, these hospitals' cost settlements were to be reduced by 10.0% of allowable cost as calculated through the cost report settlement process, making final reimbursement 90.0% of allowable cost. During 2013, several of the LSU hospitals privatized. As a result, they will no longer cost settle at 90.0% of allowable costs, as state hospitals do, but rather at 66.46% consistent with other non-state, non-rural hospitals.

Physician Fee Schedule Changes – Effective February 1, 2013, the reimbursement for physician services was reduced by 1.0% of the rates in effect on August 1, 2012 for most services. Exceptions to this cut were made for those services affected by ACA Section 1202. Note that

these benchmarks do not reflect the higher fee schedule associated with ACA Section 1202, and the determination for this contract period will not reflect the higher fee schedule.

In addition, cesarean deliveries and consult codes are reimbursed at the vaginal delivery rate or evaluation and management rate, respectively.

Clinical Services/End Stage Renal Disease (ESRD) Facilities Non-Medicare Claims Reimbursement Rate Reduction – Effective for dates of service on or after July 1, 2012, the reimbursement to ESRD facilities was reduced by 3.7% of the rates on file as of January 1, 2011.

Emergency Medical Transportation – Effective on or after August 1, 2012, the reimbursement rates for emergency ambulance transportation services is reduced by 5.0% of the rate on file as of July 1, 2012. Emergency ambulance transportation services are excluded from the rate reductions effective February 1, 2013.

Pharmacy Fee Schedule Changes – Effective September 5, 2012, Louisiana Medicaid discontinued the previous ingredient cost reimbursement model based on Average Wholesale Price and moved to reimbursement based on lower of Average Acquisition Cost (AAC) or the usual and customary charge for all drugs. If there was not an assigned AAC, the lower of Wholesale Acquisition Cost (WAC) or the usual and customary charge for all drugs were used. As part of this change, the dispensing fee was increased from \$5.77 to \$10.13. Beginning November 1, 2012, Louisiana Medicaid implemented pharmacy reimbursement methodology changes as outlined below.

Single-source Reimbursement – If there is an assigned AAC, single-source drugs will reimburse at the lower of AAC plus 1.0%, plus a dispensing fee of \$10.51 or the usual and customary charge. If there is not an assigned AAC, single-source drugs will reimburse at the lower of the WAC plus a dispensing fee of \$10.51 or the usual and customary charge.

Multi-source Reimbursement – If there is an assigned AAC, multi-source drugs will reimburse at the lower of the AAC plus 10.0%, plus a dispensing fee of \$10.51, or the Federal Upper Limit (FUL) plus a dispensing fee of \$10.51, or the usual and customary charge. If there is not an assigned AAC, multi-source drugs will reimburse at the lower of WAC plus a dispensing fee of \$10.51, or the FUL plus a dispensing fee of \$10.51, or the usual and customary charge.

Specialty Drug Reimbursement – The defined specialty drug classes will reimburse at the lower of WAC plus 5.0%, plus a dispensing fee of \$10.51, or the usual and customary charge.

The compounded effect of all fee schedule changes by COA and COS can be found in the table below. Overall, the fee schedule changes since the base data period reduced cost by approximately 5.2% for SFY 2011 and 6.2% for SFY 2012.

Data Smoothing

As part of the benchmark development process, Mercer blended data from SFY 2011 and SFY 2012 to arrive at the overall claim cost. The goal of the blending process is to obtain a set of base data that has sufficient credibility and reasonableness to develop appropriate benchmarks. Mercer applied weights of 60.0% and 40.0% to the SFY 2011 and SFY 2012 data, respectively.

In addition to blending data from multiple years, Mercer also used statewide figures where particular PMPM cells within a region had small enrollment. The cost PMPM for a small cell is subject to large fluctuations from one year to the next, thus rendering it less effective at predicting

future cost. Using statewide figures results in greater data credibility and reduces the impact of random fluctuations exhibited by the data.

Some categories of eligibility such as the Foster Children, Breast and Cervical Cancer, and LAP populations are too small to have separate rate cells due to data credibility concerns. Therefore, statewide figures are used for these populations and the data has been combined across all age and sex cells in determining the benchmark cost.

Risk of Large Claims

To provide protection against the risk of catastrophic claims, the cost for any recipient that is over \$100,000 in any year will not be considered in reconciling cost savings for Shared Savings plans. The benchmarks have been reduced accordingly.

Risk Adjustment

Risk adjustment will be applied to the cost benchmarks in Attachment A to reflect differences in health status of the members served in each plan using the Adjusted Clinical Groups (ACG) model. The risk adjustment process does not increase or decrease the overall benchmark cost of the program, but can change the benchmark for the various health plans according to the relative risk of their enrolled members, and where the Shared Savings program as a whole enroll a more or less costly population than the parallel Prepaid program. Actuarially sound risk adjustment protocols have been developed for this purpose.

Benchmark Development Overview

To provide additional detail on the benchmark development, Mercer has also provided an overview of the adjustments applied to each rate cell in Attachment B. This exhibit presents the breakdown of the assumptions used to calculate the benchmark PMPMs.

In preparing the benchmark PMPMs shown in Attachment A, Mercer has used and relied upon enrollment, FFS claims, reimbursement level, benefit design, and other information supplied by DHH and its fiscal agent. DHH and its fiscal agent are responsible for the validity and completeness of the supplied data and information. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion, it is appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

The benchmarks are actuarial projections of future contingent events. Actual Bayou Health costs will differ from these projections. Mercer has developed these benchmarks on behalf of DHH to form a basis for calculating sharable savings under the Shared Savings program. Use of these benchmarks for any purpose beyond that stated may not be appropriate. Furthermore, adjustment should be considered in the event that FFS costs are observed to trend differently than expected

Page 17

Ms. Mary Johnson
Louisiana Department of Health and Hospitals

during the period leading up to Shared Savings program implementation such that the benchmarks may become, in retrospect, either excessive or overly difficult to achieve.

Bayou Health plans are advised that the use of these benchmarks may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of them by Bayou Health plans for any purpose. Mercer recommends that any Bayou Health plans considering contracting with DHH should carefully analyze its own projected medical expense before deciding whether to contract with DHH.

This letter assumes the reader is familiar with the Bayou Health program, Medicaid eligibility rules, and actuarial techniques. It is intended for DHH, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial projections to understand the technical nature of these results.

If you have any questions on any of the information provided, please feel free to call Jared Simons at +1 404 442 3358 or Brandon Odell at +1 404 442 3294.

Sincerely,

RE: Actuarial Certification of January 1, 2014 – December 31, 2014 Shared Benchmarks

Dear Sudha:

I, Mary Johnson, Bayou Health Project Director, for the Louisiana Department of Health and Hospitals (DHH), hereby affirm that the data prepared and submitted to Mercer Government Human Services Consulting (Mercer) for the purpose of certifying the January 1, 2014 – December 31, 2014 Shared benchmarks were prepared under my direction, and to the best of my knowledge and belief are accurate, complete, and consistent with the data used to develop the capitation rates. This data includes Fee For Service (FFS) data files and supplemental information on payments made outside of Louisiana's Medicaid Management Information System (MMIS).

Mercer relied on DHH for the collection and processing of the FFS data. Mercer did not audit the FFS data, but did assess the data for reasonableness as documented in the shared benchmark report.

Shared Savings Appendix H – Performance Measures

Louisiana Administrative Performance Measurement Set

Measure	Minimum Performance Standard
Percent of PCP Practices that provide verified 24/7 phone access with ability to speak with a PCP Practice clinician (MD, DO, NP, PA, RN, LPN) within 30 minutes of member contact.	≥95%
Percent of Expedited Service Authorization requests processed within 72 hours.	100%
Percent of Standard Service Authorization requests processed within business two days.	80%
Percent of calls to Health Plan's Member Services answered by a live person or directed to an automated call pickup system with IVR options within 30 seconds.	≥90%
Average hold time for calls to Members Services.	≤3.0 minutes
Percent of calls to Member Services that are abandoned.	≤5%
Percent of calls to Health Plan's Provider Services answered by a live person or directed to an automated call pickup system with IVR options within 30 seconds.	≥90%
Average hold time for calls to Provider Services.	≤3.0 minutes
Percent of calls to Provider Services that are abandoned.	≤5%
Percent of grievances received by the Health Plan (including grievances received via telephone) that are resolved within the timeframe of the contract.	≥95%
Percent of Member Requests for State Fair Hearings received during the previous 12 months that are reversed.	≤10%
Percent of all Clean Claims that are pre-processed and submitted to the Fiscal Intermediary (FI) within no more than four (4) business days.	≥99%
Denied claims returned to provider with reason code within 15 days of receipt of claims submission.	≥99%
