Subject: Healthy Louisiana Physical Health Services – Full Risk-Bearing Managed Care Organization (MCO) Rate Range Development and Actuarial Certification update for the Period December 1, 2015 to December 31, 2015.

Dear Ms. Diez:

The Louisiana Department of Health (LDH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Healthy Louisiana (f/k/a Bayou Health) program for the period of December 1, 2015 to December 31, 2015. This certification includes a revision to rates effective during the period but paid on or after January 1, 2016. This revised certification letter replaces the certification letter issued on October 15, 2015 for the period of December 1, 2015 through January 31, 2016 and applies to the period of December 1, 2015 to December 31, 2015. For reference, the original capitation rate certification letter is included with this document in Appendix C.

This letter provides an overview of the analyses and methodology to support the revision and the resulting capitation rate ranges effective December 1, 2015 through December 31, 2015 for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process used Medicaid fee-for-service (FFS) medical and pharmacy claims, Healthy Louisiana Shared Savings claims experience, and Healthy Louisiana Prepaid encounter data. It resulted in the development of a range of actuarially sound rates for each rate cell. The capitation rate ranges are summarized in Appendix A and represent payment in full for the covered services.

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate, and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government mandated assessments, fees, and

Page 2 February 17, 2017 Ms. Pam Diez Louisiana Department of Health

taxes, and the cost of capital. Note: Please see pages 8-9 of the August 2005, Actuarial Certification of Rates for Medicaid Managed Care Programs, from the American Academy of Actuaries, http://www.actuary.org/pdf/practnotes/health_medicaid_05.pdf.

Rate Revision

As a result of Act 1, House Bill No. 35, effective January 1, 2016, the state of Louisiana increased the premium tax rate of 2.25% to 5.50% on health maintenance organizations which include all five of the Healthy Louisiana program MCOs. This tax is assessed according to the date of payment of capitation on or after January 1, 2016. Routine processing of eligibility leads to payments to the MCOs for retrospective changes prior to January 1, 2016, warranting revised capitation rates. The rates contained herein are only intended to be used by LDH for payments of rates effective during the certified rate period made after January 1, 2016. Certified rates effective and paid prior to January 1, 2016 are unaffected by this certification. The change to the premium tax rate resulted in a 3.50% increase to the final rate in all rate cells. The table below shows the impact by rate cell to the midpoint rates.

	[MM]	[A]	[B]	[C]	[D] = [B] + [C]

Certification of Final Rate Ranges

In preparing the rate ranges shown in Appendix A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by LDH and its fiscal agent. LDH, its fiscal agent, and the MCOs are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies the rates in Appendix A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the managed care contract. Rate estimates provided are based upon the information available at a point in time and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely range of variability from the estimate. The undersigned actuary is a member of the American Academy of Actuaries and meets its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. Actual Healthy Louisiana MCO costs will differ from these projections. Mercer has developed these rates on behalf of LDH to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c), and in accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Healthy Louisiana MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by Healthy Louisiana MCOs for any purpose. Mercer recommends that any Healthy Louisiana MCO considering contracting with LDH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with LDH.

This certification letter assumes the reader is familiar with the Healthy Louisiana program, Medicaid eligibility rules, and actuarial rate-setting techniques. It is intended for LDH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results.

October 15, 2015

Subject: Louisiana Bayou Health Physical Health Services – Full Risk-Bearing Managed Care Organization Rate Range Development and Actuarial Certification update for the Period December 1, 2015 through January 31, 2016

Dear Ms. Steele:

The Louisiana Department of Health and Hospitals (DHH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Bayou Health program for the period of December 1, 2015 through January 31, 2016. This certification update includes two technical revisions that are retrospectively effective February 1, 2015 and two programmatic changes that will be effective December 1, 2015. For reference, the original capitation rate certification letter for the period July 1, 2015 through January 31, 2016 is included with this document in Appendix E.

This letter provides an overview of the analyses and methodology to support the technical revisions, programmatic changes, and the resulting capitation rate ranges effective December 1, 2015 through January 31, 2016 for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process used Medicaid fee-for-service (FFS) medical and pharmacy claims, Bayou Health Shared Savings claims experience, and Bayou Health Prepaid encounter data. It resulted in the development of a range of actuarially sound rates for each rate cell. The capitation rate ranges are summarized in Appendix A and represent payment in full for the covered services. Appendix B shows the full rate development from the base data as shown in the data book released by the State, dated January 31, 2015 (after excluding LaHIPP claims and including the revised Maternity kick payment deliveries {Table 1-A and 1-B}), and applies all the rate setting adjustments as described in this letter.

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows,

Page 2 October 15, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate, and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government mandated assessments, fees, and taxes, and the cost of capital. Note: Please see pages 8-9 of the August 2005, Actuarial Certification of Rates for Medicaid Managed Care Programs, from the American Academy of Actuaries, http://www.actuary.org/pdf/practnotes/health_medicaid_05.pdf.

Technical Revisions

Following the implementation of the Bayou Health at-risk capitated program, effective February 1, 2015, Mercer became aware of two issues requiring a technical revision to the previously certified rates. These are the following:

- A misalignment in the Maternity kick payment delivery event count logic between the State's fiscal agent and what was included in rate development.
- A decision made by the First Circuit Court of Appeals altering the reimbursement to out-of-state border hospitals.

These issues and methodology of the technical revisions are described in detail in the following sections.

Technical Revision #1 (Maternity Kick Payment Delivery Event Count Logic)

Mercer worked with DHH and the State's fiscal agent (Molina) to revise and align the Maternity kick payment delivery event count logic underlying the rate development and the logic implemented by Molina for payment to the Bayou Health managed care organizations (MCOs). A full description of the Maternity kick payment logic can be found in Schedule Z of the Bayou Health MCO financial reporting requirements guideline.

The following describes all the changes made to the inpatient physical health services encounters delivery event count logic. All other logic remains unchanged:

- Included all available diagnoses codes on a claim to identify a delivery. Previously, only the primary diagnosis code was used to identify a delivery.
- Included inpatient hospital claims only (claim type = 01 and billing provider type = 60) to identify a delivery. Previously, outpatient claims and all billing provider types were considered to identify a delivery.
- Restricted the age of the enrolled mother to greater than or equal to 10 years of age to identify a delivery. Previously, all ages were considered to identify a delivery.

Page 3 October 15, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

- Diagnoses code range 640-669 where the 5th digit must be a 1 or 2. Previously, all codes in the range 650-669 were used to identify a delivery and no consideration was made for the 5th digit.
- Stillborn deliveries are identified using the following revenue codes: V271, V273-274, or V276-277. Previously, all V27 (V271-V279) were used to identify a stillborn delivery.

The following describes all the changes made to the professional encounters delivery logic, all other logic remains unchanged:

- Restricted to billing provider types 19, 20, and 90 to identify a delivery. Previously, all billing provider types were considered to identify a delivery.
- Restricted the age of the recipient to greater than or equal to 10 years of age to identify a
 delivery. Previously, all ages were considered to identify a delivery.

Additionally, after all encounters are identified, a single live-born delivery is identified for a given recipient within a 245-day period, plus or minus. Previously, a 120-day period, plus or minus, was used to identify a single delivery.

The revision to the Maternity kick payment delivery event count logic resulted in a reduction in deliveries of 1.98%, which increased the cost per delivery by 2.02%. Table 1-A shows the regional impact to the Maternity kick payment deliveries and cost per delivery. Table 1-B shows the regional impact to the Full Medicaid Pricing (FMP) cost per delivery.

Table 1-A: Regional impact to deliveries and cost per delivery due to the Maternity kick payment delivery event count logic change

Technical Revision #2 (Out-of-State Border Hospital Reimbursement)

A First Circuit Court of Appeals decision, Vicksburg, LLC v. State ex rel. Dep't of Health and Hospitals, 2010-1248 (La. App. 1st Cir. 3/25/11), 63 So.3d205, determined that a reimbursement methodology promulgated by DHH was unconstitutional in its application to River Region. River Region is a hospital located in Vicksburg, Mississippi, and administered inpatient health care services to Louisiana Medicaid patients. Consequently, DHH altered its reimbursement methodology to Mississippi out-of-state (Mississippi trade area) border hospitals from a per diem basis to a percentage of billed charges. These hospitals will now be reimbursed at 60% and 40% of billed charges for children and adults, respectively.

Mercer re-priced these out-of-state border hospital claims using the base claims experience (calendar year {CY} 2013) and determined the change to be immaterial to all rating categories with the exception of the Maternity kick payment. The South Central and North regions' Maternity kick payments were affected most with a 4.78% and 1.60% increase, respectively, as these are the regions bordering the Mississippi trade area. There was minimal to no impact to the Maternity kick payments of the Capital and Gulf regions. Table 2 shows the regional impact to the Maternity kick payments cost per delivery.

Page 5 October 15, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Table 2: Regional impact to cost per delivery due to the out-of-state border hospitals

South Central	\$7,726.08	\$74.27	\$39.06	\$245.44	\$8,084.84
North	\$7,840.78	\$33.82	\$17.10	\$83.91	\$7,975.61

Notes:

- 1: Target cost per delivery certified in the August 11, 2015 letter for the period July 1, 2015 through January 31, 2016.
- 2: Limited cost per delivery impact shown in Table 1-A.
- 3: FMP cost per delivery impact shown in Table 1-B.
- 4: Limited cost per delivery impact shown in Table 2.

Programmatic Changes

Effective December 1, 2015, DHH will implement two program changes to Bayou Health:

- The termination of the Louisiana's Health Insurance Premium Payment (LaHIPP) program.
- The mandatory enrollment of populations who were previously allowed to voluntarily opt-out of Bayou Health.

Page 6 October 15, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

The details of the methodology used to quantify and reflect the impact of the aforementioned program changes are described in the following sections.

Programmatic Change #1 (LaHIPP Program)

Effective December 1, 2015, DHH will terminate the LaHIPP program. This program pays for some or all of the health insurance premiums for an enrollee if they have insurance available through someone in the family and are enrolled in Medicaid. The program also covers out of pocket expenses incurred by the enrollee (Medicaid is the secondary payer).

LaHIPP is not a category of eligibility and enrollees in this program were eligible under the other categories of aid (COA) in Bayou Health. LaHIPP membership and claims experience were removed from the base claims experience (CY 2013) for purposes of developing the capitation rate range. Appendix C shows the statewide impact by COA from removing LaHIPP enrollees from the base claims experience. The LaHIPP claims are explicitly provided in the data book dated January 31, 2015.

Programmatic Change #2 (Voluntary Opt-Out Populations)

Effective December 1, 2015, populations currently allowed to voluntarily opt-out of Bayou Health will become mandatorily enrolled. These populations are defined in section 3.1 of the contract as the following:

- Children under 19 years of age who are:
 - Eligible for Supplemental Security Income (SSI) under title XVI of the Social Security Act:
 - Eligible under Section 1902(e)(3) of the Social Security Act;
 - In foster care or other out-of-home placement;
 - Receiving foster care or adoption assistance;
 - Receiving services through a family-centered, community-based, coordinated care system that receives grant funds under Section 501(a)(1)(D) of title V of the Social Security Act, and is defined by the DHH in terms of either program participation or special health care needs; or
 - Enrolled in Family Opportunity Act Medicaid Buy-In Program
- Native Americans who are members of federally recognized tribes, except when the MCO is:
 - The Indian Health Service; or
 - An Indian health program or urban Indian program operated by a tribe or tribal organization under a contract, grant, cooperative agreements or compact with the Indian Health Service.

Page 7 October 15, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Mercer used logic provided by DHH to identify SSI and foster care children who have opted-out of Bayou Health; however, there was no clearly defined logic available to Mercer to identify Native Americans. Thus, for base claims experience, Mercer utilized the residual CY 2013 FFS claims incurred by FFS populations who met the criteria for inclusion into Bayou Health and were not identified as a voluntary opt-in population (home- and community-based services {HCBS} Waiver and Chisholm Class Members), as defined in section 3.2 of the contract.

After identifying the appropriate voluntary opt-out populations' CY 2013 FFS membership and claims experience, Mercer created an adjustment to be applied in the rate development to account for the voluntary opt-out experience. When reviewing the opt-out experience to create this adjustment, Mercer accounted for the same rating adjustments as the Shared Savings/FFS population in the capitation rates effective February 1, 2015. These adjustments include:

- Incurred but not reported (IBNR)
- Fee adjustments
- Retroactive eligibility
- Fraud and abuse recoupments
- ACT 312 and pharmacy rebates
- Pediatric Day Health Care adjustments
- Specialized behavioral health mixed services protocol
- Affordable Care Act (ACA) Primary Care Providers (PCP) enhanced payments
- Trend

As the opt-out population has not been previously covered by the Bayou Health program, additional considerations had to be taken for the trend duration for the opt-out experience. The population covered under Bayou Health effective February 1, 2015 has a trending midpoint of August 1, 2015. The rating period for the voluntary opt-out population is December 1, 2015 through January 31, 2015 and therefore has a trending midpoint of January 1, 2015. Mercer accounted for the five month difference in trending midpoint for the opt-out population.

Additionally, Mercer used specific managed care contracting adjustments for the voluntary opt-out population. Considering the short rating period for the voluntary opt-outs, Mercer did not apply contracting adjustments for utilization but did apply a 1.0% to 3.0% increase for unit cost.

The overall adjustment for the inclusion of the voluntary opt-out populations can be found in Appendix D.

Certification of Rate Ranges

In preparing the rate ranges shown in Appendix A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by DHH and its fiscal agent. DHH, its fiscal agent, and the Prepaid plans are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In our opinion they are appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies that the rates in Appendix A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the managed care contract. Rate estimates provided are based upon the information available at a point in time and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely range of variability from the estimate. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. Actual Bayou Health MCO costs will differ from these projections. Mercer has developed these rates on behalf of DHH to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c), and in accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Bayou Health MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by Bayou Health MCOs for any purpose. Mercer recommends that any Bayou Health MCO considering contracting with DHH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with DHH.

This certification letter assumes the reader is familiar with the Bayou Health program, Medicaid eligibility rules, and actuarial rate-setting techniques. It is intended for DHH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results.

Appendix B: Development of Rate Ranges for December 1, 2015 through January 31, 2016

Rate Development Description

The below portrays the details of the rate development based on the combined Prepaid, Shared Savings, and Legacy Medicaid/FFS (Chisholm and HCBS) data. The rate development exhibit takes the base data that was provided in Attachment 1 of the data book issued on January 31, 2015, (after excluding LaHIPP claims and including the revised Maternity kick payment deliveries {Table 1-A}), and applies the various rate-setting adjustments. The columns in the exhibit are as follows:

Base Data – The base data in these columns includes IBNR.

Member Month (MMs) – MMs for the CY 2013 period.

Per Member Per Month (PMPM) – Computed as the total paid amount divided by the total MMs. Statewide PMPMs were used where appropriate, as indicated in the rate certification letter.

Base Data Adjustments:

Annual Trend – (Low & High) – Annualized trend that is equivalent to the trend factor applied to the base data.

Trend Factor – (Low & High) – Trend factor that is equivalent to the compounded annualized trend applied to the base data.

Base Period Adj. – Overall base period adjustment applied to both the low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

Base Period	Adjustments
Prepaid	Shared/FFS
	Fraud and Abuse Adjustment (statewide adj.)
Fee Schedule Adjustment (hospital specific adj.)	Fee Schedule Adjustment (hospital specific adj.)
ACT 312 Adjustment (statewide adj.)	ACT 312 Adjustment (statewide adj.)
	Rx Rebate Adjustment (statewide adj.)
ACA PCP Adjustment (category of service level	ACA PCP Adjustment (category of service level
adj.)	adj.)
LBHP Adjustment (category of service level adj.)	LBHP Adjustment (category of service level adj.)
Retro-activity Adjustment (rate cell level adj.)	Retro-activity Adjustment (rate cell level adj.)
NEMT Adjustment (rate cell level adj.)	

Page 14 October 15, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Managed Care Adj. Factor – (Low & High) – Low and high managed care savings factors applied to the corresponding low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

Managed Care Adjustments

	· · · · · · · · · · · · · · · · · · ·
Prepaid	Shared/FFS
Managed Care Savings*	Managed Care Savings*
	/// GDR

^{*} Managed care savings adjustments were applied to previously unmanaged populations utilizing Legacy Medicaid/FFS claims (HCBS and Chisholm), as well as newly added services.

Voluntary Opt-Out Adj. Factor – **(Low & High)** – Low and high factors applied to the corresponding low and high PMPMs for mandating the voluntary opt-out populations. **Out-of-State Adj. Factor** – Factor applied to account for the out-of-state border hospitals reimbursement change. Applies to both Low and High PMPMs.

Outlier Add-on (PMPM) – PMPM added to account for outlier payments. Applies to both Low and High PMPMs.

Claims PMPM – (Low) – Calculated as: N = [B *E * (1+G)*H*J*L] + M.

Claims PMPM – (High) – Calculated as: O = [B * F * (1+G)*I*K*L] + M.

Fixed Admin Load – (Low & High) – A PMPM adjustment added to the corresponding Low and High PMPMs.

Variable Admin Load – (Low & High) – A percentage adjustment applied to the corresponding Low and High PMPMs.

Profit @ 2% – Provision in these rates has been made for a 2% risk margin.

Premium Tax @ **2.25%** – Provision in these rates has been made for Louisiana's 2.25% premium tax.

PMPM After Admin – (Low) – Calculated as: V = (N * (1 + Q) + P)/(1 - T - U).

PMPM After Admin – (High) – Calculated as: W = (O * (1 + S) + R)/(1 - T - U).

Full Medicaid Pricing (FMP) Add-On – FMP component of the rate.

Premium tax on FMP – Provision in the FMP component of the rates has been made for Louisiana's 2.25% premium tax.

Final Loaded Rates – (Low) – Calculated as: Z = V + X + Y.

Final Loaded Rates – (High) – Calculated as: AA = W + X + Y.

Appendix E: Bayou Health Rate Certification Effective July 1, 2015 through January 31, 2016

MERCER MAKE TOMORROW, TODAY

Jaredd Simons, ASA, MAAA Senior Associate Actuary

Government Human Services Consulting 3560 Lenox Road, Suite 2400 Atlanta, GA 30326 +1 404 442 3358 www.mercer-government.mercer.com

Ms. Jen Steele Medicaid Deputy Director Louisiana Department of Health and Hospitals Bureau of Health Services Financing 628 North 4th Street Baton Rouge, LA 70821

August 11, 2015

Subject: Louisiana Bayou Health Program – Full Risk-Bearing Managed Care Organization Rate Development and Actuarial Certification for the Period July 1, 2015 through January 31, 2016

Dear Ms. Steele:

The Louisiana Department of Health and Hospitals (DHH) has contracted with Mercer Government Human Services Consulting (Mercer) to develop actuarially sound capitation rate ranges for the State of Louisiana's Bayou Health program for the period of July 1, 2015 through January 31, 2016. This certification includes the addition of Full Medicaid Pricing (FMP) for ambulance and hospital-based physician services, and replaces the capitation rate ranges certified in the January 31, 2015 letter for the period February 1, 2015 through January 31, 2016.

The Bayou Health program began February 1, 2012, and operated under two separate managed care paradigms for the first three years of the program. The Bayou Health Prepaid program operated under an at-risk capitated arrangement, and the Shared Savings program was an enhanced Primary Care Case Management (ePCCM) program. Effective February 1, 2015, Bayou Health will begin operating as an at-risk capitated program only.

This letter presents an overview of the methodology used in Mercer's managed care rate development for the purpose of satisfying the requirements of the Centers for Medicare & Medicaid Services (CMS). This rate development process used Medicaid fee-for-service (FFS) medical and pharmacy claims, Bayou Health Shared Savings claims experience, and Bayou Health Prepaid encounter data. It resulted in the development of a range of actuarially sound rates for each rate cell. The capitation rate ranges are summarized in Appendix A and represent payment in full for the covered services and CMS Consultation guide is included in Appendix N.

Page 2 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Medicaid benefit plan premium rates are "actuarially sound" if, for business in the state for which the certification is being prepared and for the period covered by the certification, projected premiums, including expected reinsurance and governmental stop-loss cash flows, governmental risk adjustment cash flows, and investment income, provide for all reasonable, appropriate and attainable costs, including health benefits, health benefit settlement expenses, marketing and administrative expenses, any government mandated assessments, fees, and taxes, and the cost of capital. Note: Please see pages 8-9 of the August 2005, Actuarial Certification of Rates for Medicaid Managed Care Programs, from the American Academy of Actuaries, http://www.actuary.org/pdf/practnotes/health_medicaid_05.pdf.

Rate Methodology

Overview

Capitation rate ranges for the Bayou Health program were developed in accordance with rate-setting guidelines established by CMS. For rate range development for the Bayou Health managed care organizations (MCOs), Mercer used calendar year 2013 (CY13) Medicaid FFS medical and pharmacy claims, Bayou Health Shared Savings claims experience, and Bayou Health Prepaid encounter data. Restrictions were applied to the enrollment and claims data so that it was appropriate for the populations and benefit package defined in the contract.

Mercer reviewed the data provided by DHH and the Prepaid and Shared Savings plans for consistency and reasonableness and determined that the data are appropriate for the purpose of setting capitation rates for the MCO program. The data certification shown in Appendix L has been provided by DHH, and its purpose is to certify the accuracy, completeness, and consistency of the base data.

Adjustments were made to the selected base data to match the covered populations and Bayou Health benefit packages for rating year 2015 (RY15). Additional adjustments were then applied to the base data to incorporate:

- Prospective and historic (retrospective) program changes not reflected (or not fully reflected) in the base data.
- Provision for incurred-but-not-reported (IBNR) claims.
- Financial adjustments to encounter data for under-reporting.
- Trend factors to forecast the expenditures and utilization to the contract period.
- Changes in benefits covered by managed care.
- Addition of new populations to the Bayou Health program.
- Opportunities for managed care efficiencies.
- Administration and underwriting profit/risk/contingency loading.

Page 3
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

In addition to these adjustments, DHH takes two additional steps in the matching of payment to risk:

- Application of maternity supplemental (kick) payments.
- Application of risk-adjusted regional rates.

The resulting rate ranges for each individual rate cell were net of Graduate Medical Education (GME) payments to teaching hospitals provided in the Louisiana Medicaid State Plan. Appendix M shows the full rate development from the base data as shown in the data book released by the State, dated January 31, 2015, and applies all the rate setting adjustments as described in this letter.

Bayou Health Populations Covered Populations

In general, the Bayou Health program includes individuals classified as Supplemental Security Income (SSI), Family & Children, Breast and Cervical Cancer (BCC), and LaCHIP Affordable Plan (LAP) as mandatory or voluntary opt-out populations. Voluntary opt-in populations include Home- and Community-Based Services (HCBS) waiver participants and Chisholm Class Members (CCM).

Chisholm Class Members

Effective February 1, 2015, members of Louisiana's Chisholm class will be permitted to participate in Bayou Health on a voluntary opt-in basis. Previously, membership in the Chisholm class would make a recipient ineligible for Bayou Health.

Chisholm refers to a class action lawsuit (*Chisholm v. Hood*) filed in 1997. CCMs are defined as all current and future recipients of Medicaid in the State of Louisiana, under age 21, who are now or will in the future be placed on the Office of Citizens with Developmental Disabilities' Request for Services Registry.

LaHIPP Population

Effective February 1, 2015, Bayou Health will include individuals covered by the Louisiana's Health Insurance Premium Payment (LaHIPP) Program. This program pays for some or all of the health insurance premiums for an enrollee if they have insurance available through someone in the family and are enrolled in Medicaid. The program also covers out of pocket expenses incurred by the enrollee (Medicaid is the secondary payer).

Page 4
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

Premiums will continue to be paid by DHH, but out of pocket expenses incurred by the enrollee will be the responsibility of the MCO. LaHIPP is not a category of eligibility. Enrollees in this program are eligible under the other categories of aid (COA) and their experiences are included in the applicable COA and Rate Cell combination for purposes of developing the capitation rate range.

Excluded Populations

The following individuals are excluded from participation in the Bayou Health program:

- Medicare-Medicaid Dual Eligible Beneficiaries.
- Qualified Medicare Beneficiaries (QMB) (only where State only pays Medicare premiums).
- Specified Low-income Medicare Beneficiaries (SLMB) (where State only pays Medicare premiums).
- Medically Needy Spend-Down Individuals.
- Individuals residing in Long-term Care Facilities (Nursing Home, Intermediate Care Facility/Developmentally Disabled (ICF/DD)).
- Individuals enrolled in the Program for All-inclusive Care for the Elderly (PACE).
- Individuals only eligible for Family Planning services.
- Individuals enrolled in the Greater New Orleans Community Health Connection (GNOCHC)
 Demonstration waiver.

Appendix B encompasses a comprehensive list of Bayou Health's covered and excluded populations.

Rate Category Groupings

Rates will vary by the major categories of eligibility. Furthermore, where appropriate, the rates within a particular category of eligibility are subdivided into different age bands to reflect differences in risk due to age. In addition, due to the high cost associated with pregnancies, DHH will pay a maternity kick payment to the MCOs for each delivery that takes place. Table 1 shows a list of the different rate cells for each eligibility category including the maternity kick payments.

Table 1: Rate Category Groupings

COA Description	Rate Cell Description
SSI	Newborns, 0-2 Months of Age
	Newborns, 3-11 Months of Age
	Child, 1-18 Years of Age
	Adult, 19+ Years of Age

Bayou Health Services

Covered Services

Appendix C lists the services that the Bayou Health MCOs must provide. The MCOs also have the ability to develop creative and innovative solutions to care for their members (i.e., provide other cost-effective alternative services) as long as the contractually-required Medicaid services are covered. Costs of alternative services are expected to be funded through savings on the contractually-required services for which these services are a cost-effective substitute.

New Services

Effective February 1, 2015, DHH has decided to incorporate services covered historically by FFS in the Bayou Health program. The following services were previously excluded from the Bayou Health program and now are included:

- Hospice services.
- Personal care services for ages 0-20.
- Non-Emergent Medical Transportation (NEMT) services (non-covered services).

Hospice and Personal Care services claims are all captured in Legacy Medicaid/FFS claims. Therefore, the impact of Hospice and Personal Care services can be calculated by referencing Attachment 1 of the Bayou Health Data Book released by the State, dated January 31, 2015.

Additionally, NEMT will be the responsibility of the Bayou Health MCO, even if the recipient is being transported to a Medicaid-covered service that is not a Bayou Health-covered service. Previously, Prepaid enrollee NEMT to Bayou Health excluded services would have been FFS. Mercer has created an adjustment for the Prepaid NEMT Encounters to account for this addition and the impact can be found in Appendix D. This additional service cannot be distinguished for Shared Savings/FFS claims because all NEMT services for these populations were covered under FFS. The impact of the additional services are fully captured for the Shared Savings and FFS populations in the NEMT experience on Attachment 1 of the Bayou Health Data Book released by the State, dated January 31, 2015.

Behavioral Health Mixed Services Protocol

In the Request for Proposals (RFP) issued by the State for the Bayou Health program to be effective February 1, 2015, Behavioral Health services are divided into two levels: basic and specialized. Basic Behavioral Health services will be the responsibility of Bayou Health MCOs. Basic services include:

General hospital inpatient services, including acute detoxification.

Page 7 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

- General hospital emergency room (ER) services, including acute detoxification.
- Federally Qualified Health Center (FQHC)/Rural Health Center (RHC) encounters that do not include any service by a specialized behavioral health professional.
- Professional services, excluding services provided by specialized behavioral health professionals.

Specialized Behavioral Health services will be identified primarily based on provider type. Any service provided by behavioral health specialists, as well as behavioral health facilities are considered Specialized Behavioral Health. Appendix E summarizes the adjustment that was applied to each Basic Behavioral Health service category.

Behavioral health pharmacy costs will remain the responsibility of the Bayou Health plans, regardless of the prescribing doctor's specialty. Therefore, no adjustment to pharmacy costs are required.

Excluded Services

Bayou Health MCOs are not responsible for providing acute care services and other Medicaid services not identified in Appendix C, including the following services:

- Applied Behavioral Analysis.
- Dental services with the exception of Early and Periodic Screening & Diagnostic Treatment (EPSDT) varnishes provided in a primary care setting.
- ICF/DD services.
- Personal Care services for those ages 21 and older.
- Nursing Facility services.
- School-based Individualized Education Plan services provided by a school district and billed through the intermediate school district, or school-based services funded with certified public expenditures including school nurses.
- HCBS waiver services.
- Specialized Behavioral Health.
- Targeted Case Management services.
- Services provided through DHH's Early-Steps Program.

Data Adjustments

IBNR Claims

Completion factors were developed to incorporate consideration for any outstanding claims liability. The paid through date for the IBNR factor development is February 28, 2014 (2 months of runout).

Page 8
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

To establish the completion factors for the Shared Savings/Legacy Medicaid FFS data, claims were grouped into three COA and seven main completion service categories. All remaining service categories were grouped into the other service category. Completion category mapping is provided in Appendix C. Note that the BCC and CCM populations utilized SSI completion factors and the LAP population utilized Family & Children completion factors, as these populations are expected to exhibit similar completion patterns. Appendix F-1 summarizes the completion factors adjustment that was applied to the Shared Savings/Legacy Medicaid FFS data.

Encounter claim completion factors, developed separately for each Prepaid plan, were compared to completion factors provided by the Prepaid plan actuaries and summarized by completion category of service. Appendix F-2 summarizes the completion factors adjustment that was applied to the Prepaid encounter data. Mercer determined that Prepaid encounter claims categorized as "Prescribed Drugs" for all populations and "Other" for the Family & Children and LAP populations only, is deemed to be complete, thus a 0% IBNR adjustment is applied. All other IBNR adjustments shown as 0.0% in Appendices F-1 and F-2 are due to rounding.

Under-Reporting

Under-reporting adjustments were developed by comparing encounter data from the Medicaid management information system (MMIS) to financial information provided by the Prepaid plans. This adjustment was computed and applied on a plan basis resulting in an overall adjustment of 3.6%. Note this adjustment does not apply to the Shared Savings claims nor Legacy Medicaid/FFS data. This adjustment is included in the data book released by the State, dated January 31, 2015.

Third-Party Liabilities

All claims are reported net of third party liability, therefore no adjustment is required.

Fraud and Abuse Recoveries

DHH provided data related to fraud and abuse recoveries on the Shared Savings and Legacy FFS. The total adjustment applied was -0.1%. Prepaid plans included fraud and abuse recoveries in their financial reports. These recoveries were included in the development of the under-reporting adjustment.

Co-Payments

Co-pays are only applicable to prescription drugs. Pharmacy claims are reported net of any co-payments so no additional adjustment is necessary.

Page 9
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

Disproportionate Share Hospital Payments

Disproportionate share hospital (DSH) payments are made outside of the MMIS system and have not been included in the capitation rates.

Fee Schedule Adjustments Fee Changes

These capitation rates reflect changes made by DHH to the fee schedules used in the FFS program. The first of these changes, effective February 1, 2013, was a 1% cut in fees paid to non-rural, non-state hospitals. This 1% cut also applied to physician services, except for procedure codes affected by Section 1202 of the Affordable Care Act (ACA), when performed by a physician eligible for the enhanced payment rate. Fee changes also include estimation of cost settlements and reflect the most up to date cost settlement percentages for each facility. For most non-rural facilities, the cost settlement percentage is 66.46%; however, some facilities are settled at different amounts. Rural facilities are cost settled at 110%. The Fee Schedule adjustments for Prepaid and Shared Savings/FFS are different primarily because the Shared Savings adjustment includes the impact of removing GME costs. A detailed breakdown of the fee changes by fee type (Inpatient, Outpatient, and Physician) is provided in Tables 3 through 7.

Table 3: Total Inpatient Fee Change Impact

Program	Historical Cost	Adjusted Cost	Difference	% Change
FFS/Shared	\$241,618,333	\$231,450,795	\$(10,167,538)	-4.2%
Encounter	\$242,871,303	\$245,575,202	\$2,703,899	1.1%
Total:	\$484,489,636	\$477,025,997	\$(7,463,639)	-1.5%

Table 4: Total Outpatient Fee Change Impact

FFS/Shared	\$1,220,146,833	\$1,211,025,166	\$ (9,121,667)	-0.7%
Encounter	\$1,140,782,252	\$1,158,788,184	\$18,005,932	1.6%
Total:	\$2,360,929,085	\$2,369,813,350	\$8,884,266	0.4%

Hospital Privatization

During 2013, nine state hospitals were affected by privatization, with seven privatizing and two closing. They are listed below:

Privatizing

- E.A. Conway
- Huey P. Long
- Leonard J. Chabert
- LSU Shreveport
- Medical Center of LA New Orleans
- University Medical Center Lafayette
- Washington St. Tammany Regional Medical Center

Closing

- W.O. Moss Regional Medical Center
- Earl K. Long

As a result of this privatization, they are no longer paid for services based on the state hospital fee schedule, but rather on the non-state, non-rural fee schedule. Similarly, reimbursement for

Page 11
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

cost-based services for these hospitals is now based on the 66.46% cost settlement percentage for non-state, non-rural hospitals, rather than the 90% cost-settlement percentage applicable to state hospitals. The utilization in the facilities that are closing was assumed to be absorbed by other facilities in the regions and claims were adjusted accordingly.

For Shared Savings/FFS inpatient hospital claims, the inpatient settlements received as a state hospital were removed from the rate calculation since they are not paid to non-state hospitals. The claims were then re-priced using the July 1, 2014 per diems provided by DHH. For the two hospitals that are closing, W.O. Moss Regional Medical Center and Earl K. Long, DHH provided Mercer guidance on which hospitals were expected to absorb their utilization. W.O. Moss Regional Medical Center will be absorbed by Lake Charles Memorial and Earl K. Long will be absorbed by Our Lady of the Lake. For Encounter claims, the ratio between historical per diems and current per diems were used for claims re-pricing.

For outpatient hospital claims, the historical claims were adjusted for differences between the state hospital fee schedule and the general hospital fee schedule. Outpatient cost-based services were re-priced based on cost-to-charge ratios (CCRs) provided by DHH, which reflect costs associated with the Prepaid plans claims. The overall claims dollar impact of this adjustment is shown in Tables 8 and 9.

Table 8: Inpatient Impact of LSU Hospital Privatization*

Program	Historical Cost	Adjusted Cost	Difference	% Change
FFS/Shared	\$15,196,381	\$13,793,540	\$ (1,402,840)	-9.2%
Encounter	\$22,826,670	\$23,165,474	\$338,804	1.5%
Total:	\$38,023,050	\$36,959,014	\$(1,064,036)	-2.8%

^{*} Change in FFS/Shared includes removal of GME costs.

Table 9: Outpatient Impact of LSU Hospital Privatization

Program	Historical Cost	Adjusted Cost	Difference	% Change
FFS/Shared	\$12,910,923	\$10,663,597	\$ (2,247,325)	-17.4%
Encounter	\$25,564,646	\$23,390,499	\$ (2,174,147)	-8.5%
Total:	\$38,475,568	\$34,054,096	\$ (4,421,472)	-11.5%

Table 10 summarizes the overall fee schedule adjustment by COA that was applied to the Prepaid encounter and Shared Savings/FFS claims data.

Full Medicaid Pricing

Beginning in April 2014, DHH implemented a series of program changes to ensure consistent pricing in the Medicaid program for hospital services, including inpatient hospital, outpatient hospital, hospital-based physician, and ambulance services. This change required the use of FMP in the calculation of per member per month (PMPM) payments to MCOs. DHH expects that this rate increase will lead to increased payments to those providers contracting with the MCOs to maintain and increase access to inpatient hospital, outpatient hospital, hospital-based physician, and ambulance services to the enrolled Medicaid populations. Mercer and the State reviewed the aggregate funding levels for these services between the base period and the contract period and determined that an addition to the historical data was necessary in order to ensure the capitation rate ranges reflect adequate statewide pricing levels. Separate adjustments were made to each of the four services to capture the full impact of statewide funding.

FMP adjustments were implemented for inpatient and outpatient services effective April 2014. Physician and ambulance FMP adjustments are effective July 2015.

Inpatient Hospital Services

For the Prepaid encounter and the Shared Savings/FFS data, inpatient service costs were increased by 65.1% and 59.9%, respectively. Mercer relied upon an analysis of Medicare diagnosis related group equivalent pricing of Medicaid services provided by DHH. For the Prepaid encounter, this analysis was done for the population served by the three Prepaid plans in aggregate. A separate analysis was done for the Shared Savings/FFS population. The

Page 13 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

analyses relied upon encounter and Shared Savings/FFS data incurred from July 2012 to June 2013 and compared the adjusted Medicare payments to the Medicaid payment on a per discharge basis at each hospital. The Medicare payments were adjusted to reflect the treatment of Medicaid patients and reflected the state fiscal year 2014 (SFY14) reimbursement schedule. The SFY13 Medicaid payments were adjusted to reflect fee changes effective in SFY14 and payments made outside of the claims system (outlier payments). Mercer applied the ratio between the two payments to the base data at a hospital-specific level.

Outpatient Hospital Services

For the Prepaid encounter and the Shared Savings/FFS data, outpatient service costs were increased by 52.7% and 56.3%, respectively. The outpatient increase was developed according to the State Plan using cost to charge ratios, which used reported costs and billed charges by hospital. The cost to charge ratios supplied by DHH were reported on hospital fiscal year bases, which varied by hospital from 2/28/2013 to 12/31/2013. The billed charges originated from the Prepaid encounter and the Shared Savings/FFS base data. Mercer applied the ratio between the base data and cost estimates at a hospital level to develop the outpatient component of the FMP.

Hospital-Based Physician Services

For Prepaid encounter and Shared Savings/FFS experience, hospital-based physician services meeting the State Plan's criteria for FMP were increased by 83.2% and 105.6%, respectively. Mercer performed an analysis of hospital-based physician services provided at participating facilities by participating physicians compared to the average commercial rates for the same services according to the State Plan methodology. The average commercial rates are maintained by DHH and updated periodically. For state-owned or operated entities, average commercial rate factors are updated annually. DHH provided state-owned conversion factors for calendar year 2015. For non-state owned or operated entities, the average commercial rate factors are indexed to Medicare rates and updated every 3 years. DHH provided the latest available non-state factors, which were last updated as recently as April 2013. The scheduled update of these factors is currently underway and expected to be completed by the end of calendar year 2015.

Ambulance Services

For Prepaid encounter and Shared Savings/FFS experience, ambulance services meeting the State Plan's criteria for FMP were increased by 49.2% and 44.4%, respectively. Mercer performed an analysis of ambulance services utilized by Medicaid enrollees according to the State Plan using Medicare fee schedules and average commercial rates as a percentage of Medicare. Ambulance providers were classified as either Large Urban Governmentals (LUG) or non-LUGs. LUGs have historically received 100% of the gap between average commercial rate

Page 14
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

and the Medicaid fee schedule while non-LUGs have historically received 17.35% of the gap. Mercer developed increases using these assumed funding levels. Average commercial rates as a percentage of Medicare were provided by DHH and were determined based on SFY12 claims. According to the State Plan, average commercial rates are updated every three years. The next update is anticipated to occur before the end of calendar year 2015.

ACA PCP

Under Section 1202 of the ACA, state Medicaid programs were required to increase payments to PCPs in 2013 and 2014. This requirement expires on December 31, 2014. As a result, 2013 Bayou Health encounter and FFS claims were adjusted to reflect the decrease in PCP payment rates between 2013 and 2015. The reduction, applied at the COA level is based on adjusting the provider fee schedule from the enhanced ACA rate to the Medicaid rate set by DHH. For the Prepaid Encounters, the enhanced payment data was under-reported at the time Mercer requested data as Prepaid health plans were still reprocessing some of the enhanced claims. Discussions were held with each of the existing Prepaid health plans to make sure that Mercer was identifying these claims appropriately. For detail on the adjustment applied to these claims, see Appendices G1-G2.

Table 11 summarizes the overall adjustment by COA that was applied to the Prepaid encounter and Shared Savings/FFS claims data.

Table 11: ACA PCP Adjustment

Prepaid Encounter ACA PCP Carve-Out

Program Changes

The following adjustments were developed for known program changes as of December 31, 2014.

Page 15
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

Act 312

Effective January 1, 2014, Act 312 requires that when medications are restricted for use by an MCO using a step therapy or fail first protocol, the prescribing physician shall be provided with, and have access to, a clear and convenient process to expeditiously request an override of such restrictions from the MCO. The MCO is required to grant the override under certain conditions. Mercer reviewed this new requirement and estimated the impact of this change to be an increase of approximately 3% of pharmacy costs.

EED

Beginning February 2015, facility and delivering physician costs for EEDs will not be covered under the Bayou Health program. MCOs receive an EED Kick Payment for deliveries that occur prior to 39 weeks for reasons that are not medically indicated in the Louisiana Electronic Event Registration System (LEERS) maintained by the Office of Public Health/Vital Records. Deliveries that occur prior to 39 weeks for reasons that are medically indicated in LEERS will receive the Maternity Kick Payment. Mercer identified the average facility and delivering physician costs included in the Maternity Kick Payment by region and removed those costs to create the EED Kick Payment. Table 12 shows the EED adjustment and reduction amount by region in the low and high scenarios. The resulting EED Kick Payment is equal to the Maternity Kick Payment plus the reduction amount in Table 12 and is shown in Appendix A.

Table 12: Early Elective Delivery Rate Reduction

Early Elective Delivery Rate Reduction						
Region Description	Reduction (%)	Reduction – Low Cost per Delivery	Reduction – High Cost per Delivery			
Gulf	34.3	\$(3,703.28)	\$(3,858.92)			
Capital	43.3	\$(2,832.60)	\$(2,951.64)			
South Central	41.2	\$(2,914.86)	\$(3,037.36)			
North	38.0	\$(3,164.81)	\$(3,297.82)			
Total	38.9	\$(3,167.07)	\$(3,300.16)			

Retro-Active Eligibility Adjustment

Beginning in February 2015 members granted retro-active eligibility will be capitated retro-actively, based on their eligibility for Bayou Health, for up to 12 months prior to enrollment in an MCO. The MCO selected by these members will then receive one capitation payment per month of retro-active enrollment, and will be liable for all claims incurred during this retro-active

Page 16
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

eligibility period. Mercer developed an adjustment factor to apply to the base data in the capitation rate development. Mercer did not apply any savings adjustments to the retro-active period claims in the development of these factors because the MCO will have no ability to manage utilization during the retro-active period.

The retro-active eligibility adjustment was developed as an increase to the capitation rates set for all members, meaning that the capitation payment is higher than otherwise required on non-retro-active member months (MMs). Retro-active enrollment in any given rate cell will generate the same capitation payment per month to the MCO as any other enrollee in that same rate cell. The factors were developed at a rate cell level on a statewide basis (i.e., all regions used the same factors). The calculation relied upon retro-active claims PMPM, unique enrollee counts, and the average duration to develop the expected increase to Bayou Health claims.

Mercer reviewed the average duration of enrollees who were retro-actively enrolled during 2013 using data from July 2012 to December 2013. From August 2012 to May 2013, DHH performed additional enrollment review processes, which caused the average duration of retro-active enrollment to increase significantly over normal levels. After May 2013, DHH returned to normal enrollment review processes and the average duration of enrollment decreased significantly. DHH confirmed that they do not foresee a need for implementing this additional review process in the future and expect the enrollment patterns to be consistent with those observed in the second half of 2013. Mercer relied upon July through December 2013 enrollment lags to develop an average durational assumption by COA and is shown in Appendix H-1.

In some rate cells, the retro-active claims PMPM was below the base data claims PMPM. This generated an adjustment factor less than 1.0. The decision was made to not use a factor less than 1.0 on any rate cell. These implied factors (calculated) and final factors (used) are supplied in Appendix H-2.

Table 13 summarizes the overall adjustment by rate cell for retro-active eligibility.

Rating Adjustments Trend

Trend is an estimate of the change in the overall cost of providing health care benefits over a finite period of time. A trend factor is necessary to estimate the cost of providing health care services in a future period. Mercer studied historical cost and utilization data for each of the three data sources incorporated in the capitation rates: Prepaid encounters, Shared Savings, and FFS. Trends were selected based on Louisiana experience, as well as national trend information.

Due to the relatively short history of managed care in Louisiana, as well as the bifurcated nature of the current Bayou Health program, Mercer's trend studies using Louisiana-specific data were limited in scope. Based on these studies, it was determined that the use of a single trend rate for all three data sources was best. In selecting these trends, there was reliance on national Medicaid trends as well as Louisiana-specific data.

Trends, delineated by utilization, unit cost, PMPM, and by population are shown in Appendices I1-I3.

_

¹ Revised from 0.7 to 0.4 due to a typographical error in the certification letter dated January 31, 2015.

Page 18

Louisiana Department of Health and Hospitals

PDHC Adjustments

The number of PDHC providers has grown throughout the State during 2014. In areas where centers have begun operation, there has been an increase in the total costs of enrollees whom utilize these services indicating that this population may have been historically under served by alternative services.

Due to the uneven distribution of PDHC providers in the State, each regional group has different proportions of members utilizing PDHC services. Mercer developed projected utilization per 1,000 MMs of PDHC-eligible members for each region based on the number of new facilities that will be operating during the rating period in that region. PDHC eligible members were simply defined as any enrollee in a child rate cell (SSI ages 0-18, Family & Children ages 0-18, LA CHIP, HCBS 0-19, and Chisholm). Any enrollees under the age of 21 are eligible for PDHC services, however, the data showed that virtually all users of this service were under the age of 19 and therefore no adjustment to the adult rate cells was warranted. Table 14 shows the summary of PDHC providers and estimated PDHC users by regions. To develop the estimated PDHC service cost, Mercer developed the PDHC cost per PDHC user per month. The estimation is based on the regional experience of PDHC providers during CY13. In the Gulf region, where there is little experience due to a lack of providers, an average statewide cost was used. The summary of estimated PDHC service cost per PDHC user per month and the estimated PDHC service cost due to the increased number of providers are shown in Table 15.

Table 14: Projected Number of PDHC Users

Projected Number of PDHC Users							
Region	Existing Number of Providers ²	Projected Number of Providers in Operation	Total PDHC Eligible MMs	Projected PDHC Users Per 1,000 MMs	Current Number of PDHC Users	Projected PDHC Users

North	\$4,557.50	770	\$3,507,473	\$1,099,006	\$1,578,008	152.6%			

Managed Care Adjustments

For those populations and services that had previously been excluded from Bayou Health, Mercer adjusted the capitation rates to reflect areas for managed care efficiency. Managed Care is able to generate savings by:

- Encouraging the use of preventive services so that acute conditions are not exacerbated to the point that requires a visit to the ER or hospitalization.
- Using alternatives to the ER for conditions that are non-emergent in nature.
- Increasing access and providing member education.
- Minimizing duplication of services.
- Hospital discharge planning to ensure a smooth transition from facility-based care to community resources and minimize readmissions.

Statewide managed care savings factors were applied to the HCBS and Chisholm class COAs. Additionally, durable medical equipment (DME) and NEMT costs for Shared Savings enrollees were adjusted as part of this rate setting, as these services were excluded from Bayou Health Shared Savings. Appendices J1-J2 summarizes the managed care savings adjustments that were applied to the Shared Savings/Legacy Medicaid FFS data.

³ Based on PDHC users' CY13 experience. Gulf region does not have enough experience and the projection is based on the average of the other three regions' projections.

Page 20 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Shared Savings Rx claims

Under the Bayou Health Shared Savings program, plans had limited ability to manage prescription drug costs. In order to use the Shared Savings experience to set capitated rates, adjustments were needed to account for generic dispense rate (GDR) differences between the Prepaid and Shared Savings experience. For the Prepaid program, GDR was approximately 84%, compared to approximately 77% for Shared Savings and FFS. Mercer assumed the change in GDR would be zero the first month the rates are in effect, increasing evenly over the next three months until an 84% GDR is achieved in May 2015. Per section 6.33 of the Bayou Health RFP, MCOs are required to allow members 60 days to transition medications after enrollment in the MCO. The extra 30 days is to allow time for the MCO to identify the member for such a transition. This adjustment is a downward adjustment to the Shared Savings claims data. Mercer's analyzed Shared Savings prescription drug experience and compared it to the spending on similar therapeutic classes of drugs in the Prepaid program. Mercer determined that achieving the same GDR levels would result in savings of 13%-16%. After adjusting for phase-in, the savings for rating year 2015 is 11%-13%. Tables 16 and 17 detail the savings breakdown by COA, both without and with the phase in period.

Table 16: GDR Savings Adjustment – Without Phase In Period

Annualized Savings from Improvement in GDR							
Category of Service Description	SSI Family & BCC LAP HCBS Total Children* Waiver* (FFS)						
	(%)	(%)	(%)	(%)	(%)	(%)	
Low Savings	4.2	21.2	0.0	29.9	6.7	13.3	
High Savings	7.2	24.2	2.1	32.9	9.7	16.3	

Table 17: GDR Savings Adjustment – With Phase-In Period

Savings from Improvement in GDR (w/Phase-in)							
Category of Service SSI Family & BCC LAP HCBS Description Children* Waiver (FFS)						Total	
	(%)	(%)	(%)	(%)	(%)	(%)

High Savings	6.0	20.2	1.8	27.4	8.1	13.6	

^{*} In the above two tables, the HCBS waiver aid category is inclusive of CCMs.

Page 21 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Rx Rebates

FFS and Shared Savings claims were reduced 1.5% for Rx rebates collected by the MCO. This factor was developed using Prepaid plans experience as reported in financial statements provided to DHH. Prepaid Encounters were taken as net of drug rebates, so no adjustment was necessary.

Outliers

As part of the State Plan, inpatient hospitals receive an additional payment for high-cost stays for children under six, called outliers. These payments are for inpatient stays with a total cost to the hospital in excess of \$150,000, where the cost is determined based on the hospital's Neonatal Intensive Care Unit (NICU) or Pediatric Intensive Care Unit (PICU)-specific cost-to-charge ratio (CCR). DHH makes payments to a maximum of \$10 million, annually. As payment of outlier liability is the responsibility of Bayou Health MCOs, this additional \$10 million was built into the rates based on the distribution by rate cell observed in SFY11 and SFY12. The most recent outlier information received was for SFY13 payments, which Mercer analyzed and determined the claims payment distribution to be an anomaly compared to SFY11 and SFY12 experience that was more consistently distributed. Thus, Mercer came to the decision that utilizing data from SFY11 and SFY12 would provide a more representative basis for the future claims distribution patterns. Outliers added an average cost of \$0.93 PMPM to the base data used in rate setting. Table 18 details the impact of outliers on the rates by rate cell.

Table 18: Outliers Adjustment

Outlier claims to be added into Bayou Health from \$10 million pool					
COA Description	Rate Cell Description	CY13 MMs	Outlier PMPM	Outliers Total Adjustment	
SSI	Newborn, 0-2 Months	915	\$945.10	\$864,764	
SSI	Newborn, 3-11 Months	6,651	\$63.79	\$424,266	
SSI	Child, 1-18 Years	403,901	\$2.39	\$965,701	
Family & Children	Newborn, 0-2 Months	157,724	\$46.33	\$7,307,552	
Family & Children	Newborn, 3-11 Months	383,886	\$0.21	\$82,083	
Family & Children	Child, 1-18 Years	7,542,938	\$0.05	\$355,635	
Total*		10,809,244	\$0.93	\$10,000,000	

^{*} Totals includes MMs for all populations in Bayou Health.

GME

Mercer removed GME amounts in the FFS and Shared Savings data to be consistent with DHH's intention to continue paying GME amounts directly to the teaching hospitals. The

Page 22 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

adjustment to remove GME from FFS and Shared Savings is part of the fee adjustment process for hospital claims. It is not explicitly calculated as a separate item. Mercer uses fee schedules that are net of GME in the fee adjustment process. Encounter data does not include GME payments and therefore no adjustment is required.

Data Smoothing

For certain rate cells, there were not enough MMs within each region to produce a statistically credible rate. For rate cells with less than 30,000 MMs per region, Mercer calculated a statewide capitation rate. Affected rate cells include:

- SSI newborns 0-1 years of age
- BCC, All Ages
- LAP, All Ages
- HCBS, All Ages
- CCM, All Ages

Voluntary Opt-In Adjustments

It is unclear at this time if there will be a material difference in the risk profile of the Opt-in population from the historical FFS population. Therefore, Mercer made no adjustments for selection risk in the development of the HCBS and CCM rates.

Non-Medical Expense Load

The actuarially sound capitation rate ranges developed include a provision for MCO administration and other non-medical expenses. Mercer reviewed historical Prepaid plan expense data and relied on its professional experience in working with numerous State Medicaid programs to develop the administrative load. The load for each rate cell was determined using a fixed and variable cost model. Under this model, a fixed administrative expense is attributed to each MM, which reflects program requirements, such as state-mandated staffing. Added to this is a variable administrative amount, based on claims volume. For pharmacy, 2% of claims cost was targeted, while 6.1% was targeted for medical. Maternity kick payment rate cells have only the variable medical administrative load. Previously, a percentage load was applied to all rate cells, with a smaller load being applied to maternity kick payments. This change results in retention loads that vary as a percentage by rate cell. See Appendix K for the percentage of premium allocated to total retention load in the rates. These percentages include all three components of retention: Administrative Costs, Margin, and Premium Tax. This methodology results in a higher allocation of administrative costs on the rate cells with higher utilization, which Mercer believes is more accurate in reflecting the drivers of plan administration requirements.

Page 23 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Mercer reviewed plan financial information provided by the Prepaid plans to develop administrative cost expectations. The development included allocations for increases in expenses including items such as additional case management due to claims volume and increases in staff compensation over time. The administrative development also included an expected increase in salary for the Behavioral Health Medical Director (\$200,000), Program Integrity Officer (\$100,000), and two Fraud and Abuse Investigators (\$65,000 each). Final Administrative cost expectation was \$21.78-\$23.34 PMPM.

Additionally, provision has been made in these rates for a 2% risk margin calculated before applying any adjustment for FMP. Final rates also include provision for Louisiana's 2.25% premium tax.

Risk Adjustment

Risk adjustment will be applied to the rates in Attachment A to reflect differences in health status of the members served in each MCO using the Adjusted Clinical Groups (ACG) model. The risk adjustment process does not increase nor decrease the overall cost of the program, but can change the distribution across the various Bayou Health MCOs according to the relative risk of their enrolled members.

Federal Health Insurer Fee

Section 9010 of the ACA established a health insurance provider fee (HIPF), which applies to certain for-profit/tax-paying health insurers. For-profit Medicaid health plans are not exempt from the HIPF, which will become a cost of doing business that is appropriate to recognize in actuarially sound capitation rates.

At the time of this certification, many aspects of the calculation and application of this fee are not yet determined and/or finalized. These fees will be calculated and become payable sometime during the third quarter of 2016. As these fees are not yet defined by insurer and by market place, no adjustment has been made in the rate range development for the Bayou Health program. An adjustment and revised certification will be considered when the fee amount and impacted entities applicable to this rate period are announced in 2016.

Certification of Final Rate Ranges

In preparing the rate ranges shown in Attachment A, Mercer has used and relied upon enrollment, FFS claims, encounter data, reimbursement level, benefit design, and other information supplied by DHH and its fiscal agent. DHH, its fiscal agent, and the Prepaid plans are responsible for the validity and completeness of the data supplied. We have reviewed the data and information for internal consistency and reasonableness, but we did not audit them. In

Page 24
August 11, 2015
Ms. Jen Steele
Louisiana Department of Health and Hospitals

our opinion they are appropriate for the intended purposes. If the data and information are incomplete or inaccurate, the values shown in this report may need to be revised accordingly.

Mercer certifies that the rates in Attachment A were developed in accordance with generally accepted actuarial practices and principles and are appropriate for the Medicaid covered populations and services under the managed care contract. Rate estimates provided are based upon the information available at a point in time and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely range of variability from the estimate. The undersigned actuaries are members of the American Academy of Actuaries and meet its qualification standards to certify to the actuarial soundness of Medicaid managed care capitation rates.

Rates and ranges developed by Mercer are actuarial projections of future contingent events. Actual Bayou Health MCO costs will differ from these projections. Mercer has developed these rates on behalf of DHH to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c), and in accordance with applicable law and regulations. Use of these rate ranges for any purpose beyond that stated may not be appropriate.

Bayou Health MCOs are advised that the use of these rate ranges may not be appropriate for their particular circumstance and Mercer disclaims any responsibility for the use of these rate ranges by Bayou Health MCOs for any purpose. Mercer recommends that any Bayou Health MCO considering contracting with DHH should analyze its own projected medical expense, administrative expense, and any other premium needs for comparison to these rate ranges before deciding whether to contract with DHH.

This certification letter assumes the reader is familiar with the Bayou Health Program, Medicaid eligibility rules, and actuarial rate-setting techniques. It is intended for DHH and CMS, and should not be relied upon by third parties. Other readers should seek the advice of actuaries or other qualified professionals competent in the area of actuarial rate projections to understand the technical nature of these results.

Appendix B: Bayou Health Eligibility Designation

COA/Eligibility Category Name	Mandatory	Voluntary Opt-In	Voluntary Opt-Out	Excluded
SSI (Aged, Blind and Disabled)				
Acute Care Hospitals (LOS > 30 days)	•			
BPL (Walker vs. Bayer)	•			
Disability Medicaid	•			
Disabled Adult Child	•			
Disabled Widow/Widower (DW/W)	•			
Early Widow/Widowers	•			
Family Opportunity Program*	•		•	
Former SSI*	•		•	
Medicaid Buy-In Working Disabled (Medicaid Purchase Plan)	•			
PICKLE	•			
Provisional Medicaid	•			
Section 4913 Children	•			
SGA Disabled W/W/DS	•			
SSI (Supplemental Security Income)*	•		•	
SSI Conversion	•			
Tuberculosis (TB)	•			
SSI (OCS Foster Care, IV-E OCS/OYD and OCS/OYD (XIX))				
Foster Care IV-E - Suspended SSI			•	
SSI (Supplemental Security Income)			•	
TANF (Families and Children, LIFC)				
CHAMP Child	•			
CHAMP Pregnant Woman (to 133% of FPIG)	•			
CHAMP Pregnant Woman Expansion (to 185%	•			

Page 30 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

COA/Eligibility Category Name	Mandatory	Voluntary Opt-In	Voluntary Opt-Out	Excluded
FPIG)				
Deemed Eligible	•			
ELE - Food Stamps (Express Lane Eligibility-Food Stamps)	•			
Grant Review	•			
LaCHIP Phase 1	•			
LaCHIP Phase 2	•			
LaCHIP Phase 3	•			
LaCHIP Phase IV: Non-Citizen Pregnant Women Expansion	•			
LIFC - Unemployed Parent / CHAMP	•			
LIFC Basic	•			
PAP - Prohibited AFDC Provisions	•			
Pregnant women with income greater than 118% of FPL and less than or equal to 133% of FPL	•			
Regular MNP (Medically Needy Program)	•			
Transitional Medicaid	•			
FCC (Families and Children)				
Former Foster Care children	•			
Youth Aging Out of Foster Care (Chaffee Option)	•			
FCC (OCS Foster Care, IV-E OCS/OYD and OCS/OYD (XIX))				
CHAMP Child			•	
CHAMP Pregnant Woman (to 133% of FPIG)			•	
IV-E Foster Care			•	
LaCHIP Phase 1			•	
OYD - V Category Child			•	
Regular Foster Care Child			•

Notes:

- * The above analysis does not include payments to members who paid out-of-pocket for services before being enrolled in Medicaid.
 - 1. Final retro-adjustment factor was set to a 1.0 factor for those instances where the observed retro-active factor resulted in a negative adjustment.
- 2. Retro-active period claims not credible as the LAP population entered into Bayou Health effective
- January 1, 2013. Assumes Family & Children experience for the LAP retro-adjustment factor. 3. HCBS waiver and Chisholm populations are new to the Bayou Health program and no retro-active claims experience is available to determine retro-active period adjustment factor.

VIA ELECTRONIC MAIL ONLY

August 27, 2014

Mr. Jaredd Simons, ASA, MAAA Senior Associate Mercer Government Human Services 3560 Lenox Road, Suite 2400 Atlanta, GA 30326

Subject: Capitation Rate Range Certification for the Bayou Health Prepaid Program – Implementation Year (February 1, 2015 – January 31, 2016)

Dear Jaredd:

I, Jen Steele, Medicaid Deputy Director and Chief Financial Officer, for the State of Louisiana's Department of Health and Hospitals (DHH), hereby affirm that the data prepared and submitted to Mercer Government Human Services Consulting (Mercer) for the purpose of certifying the February 1, 2015 – January 31, 2016 Prepaid rates were prepared under my direction, and to the best of my knowledge and belief, are accurate, complete, and consistent with the data used to develop the capitation rates. This data includes calendar year (CY) 2013 fee-for-service (FFS) data files, MCO submitted encounter data, and supplemental information on payments made outside of Louisiana's Medicaid Management Information Systems (MMIS).

Mercer relied on DHH and its fiscal agent for the collection and processing of the FFS data, encounter data, and other information used in setting these capitation rates. Mercer did not audit the data, but did assess the data for reasonableness as documented in the rate certification letter.

Jen Stub-Signature

Appendix M: Development of Final Rates for July 1, 2015 through January 31, 2016

Rate Development Description

The below portrays the detail of the rate development based on the combined Prepaid, Shared Savings, and Legacy Medicaid/FFS (Chisholm, HCBS, and LaHIPP) data. The rate development exhibit takes the base data that was provided in Attachment 1 of the data book issued on January 31, 2015, and applies the various rate setting adjustments. The columns in the exhibit are as follows:

Base Data - The base data in these columns includes IBNR.

MMs - MMs for the CY13 period.

PMPM – Computed as the total paid amount divided by the total MMs. Statewide PMPMs were used where appropriate, as indicated in the rate certification letter.

Base Data Adjustments:

Annual Trend - (Low & High) - Annualized trend that is equivalent to the trend factor applied to the base data.

Trend Factor - (Low & High) – Trend factor that is equivalent to the compounded annualized trend applied to the base data.

Base Period Adj. – Overall base period adjustment applied to both the low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

	Base Period Adjustments	
Prepaid	Shared/FFS	LaHIPP
	Fraud and Abuse Adjustment	Fraud and Abuse Adjustment
	(statewide adj.)	(statewide adj.)
Fee Schedule Adjustment	Fee Schedule Adjustment	Fee Schedule Adjustment
(hospital specific adj.)	(hospital specific adj.)	(hospital specific adj.)
ACT 312 Adjustment (statewide	ACT 312 Adjustment (statewide	ACT 312 Adjustment (statewide
adj.)	adj.)	adj.)
	Rx Rebate Adjustment (statewide	Rx Rebate Adjustment
	adj.)	(statewide adj.)
ACA PCP Adjustment (category of	ACA PCP Adjustment (category of	
service level adj.)	service level adj.)	
LBHP Adjustment (category of	LBHP Adjustment (category of	LBHP Adjustment (category of
service level adj.)	service level adj.)	service level adj.)

Ms. Jen Steele
Louisiana Department of Health and Hospitals

	Base Period Adjustments	
Prepaid	Shared/FFS	LaHIPP
Retro-activity Adjustment (rate cell level adj.)	Retro-activity Adjustment (rate cell level adj.)	Retro-activity Adjustment (rate cell level adj.)
NEMT Adjustment (rate cell level adj.)		

Managed Care Adj. Factor (Low & High) – Low and high managed care savings factors applied to the corresponding low and high PMPMs. A list of the data source-specific adjustments and the level of detail in which they were applied can be found in the table below:

	Managed Care Adj	ustments	
Prepaid	Shared/FFS		LaHIPP
Managed Care Savings*	Managed Care Savings*	None	
	GDR		

^{*} Managed care savings adjustments were applied to previously unmanaged populations utilizing Legacy Medicaid/FFS claims (HCBS and Chisholm), as well as newly added services.

Outlier Add-on (PMPM) – PMPM added to account for outlier payments. Applies to both Low and High PMPMs.

Claims PMPM (Low) – Calculated as: K = [B *E * (1+G)*H] + J.

Claims PMPM (High) - Calculated as: L = [B * F * (1+G)*I] + J.

Fixed Admin Load (Low & High) – A PMPM adjustment added to the corresponding Low and High PMPMs.

Variable Admin Load (Low & High) – A percentage adjustment applied to the corresponding Low and High PMPMs.

Profit @ 2% – Provision in these rates has been made for a 2% risk margin.

Premium Tax @ **2.25%** – Provision in these rates has been made for Louisiana's 2.25% premium tax.

PMPM After Admin - Low - Calculated as: S = (K * (1 + N) + M)/(1 - Q - R).

PMPM After Admin - High - Calculated as: T = (L * (1 + P) + O)/(1 - Q - R).

Appendix N: 2015 Managed Care Rate Setting Consultation Guide

Section	I. July 1, 2015 – January 31, 2016 Medicaid	Documentation Reference
	ed Care Rates neral Information	
	A letter from the certifying actuary, who meets the qualification standards established by the American Academy of Actuaries and follows the practice standards established by the Actuarial Standards Board, that certifies that the final capitation rates or rate ranges meet the standards in 42 CFR §438.6(c).	Please refer to the certification letter dated August 11, 2015. All following page and exhibit references are specific to this certification.
B.	The final and certified capitation rates or the final and certified rate ranges for all rate cells and regions, as applicable.	Please refer to Appendix A for a summary of all rate ranges by rate cell and region.
C.	Brief descriptions of:	
	 The specific state Medicaid managed care programs covered by the certification. 	Please refer to page 1.
	ii. The rating periods covered by the certification.	Please refer to page 1.
	iii. The Medicaid populations covered through the managed care programs for which the certification applies.	A brief description can be found on pages 3-4. Appendix B encompasses a comprehensive list of Bayou Health's covered and excluded populations.
	iv. The services that are required to be provided by the managed care plans.	A brief description can be found on pages 6-7. Appendix C encompasses a comprehensive list of Bayou Health's covered services.
2. Dat	a	
A.	A description of the data used to develop capitation rates. This description should include:	
	 The types of data used, which may include (but is not limited to) claims data, encounter data, plan financial data, or other Medicaid program data. 	Please refer to page 2.
	ii. The age of all data used.	Please refer to page 2.
	iii. The sources of all data used.	Please refer to page 2.

Page 56 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Section	I. July 1, 2015 – January 31, 2016 Medicaid d Care Rates	Documentation Reference
manage	iv. To the extent that a significant portion of benefits are provided through subcapitated arrangements, a description of the data received from the subcapitated plans or providers.	N/A
	v. To the extent that claims or encounter data are not used or not available, an explanation of why that data was not used or was not available.	N/A
B.	Information related to the availability and the quality of the data used:	
	i. The steps taken by the actuary or by others (which may include but is not limited to the state Medicaid program or the managed care organizations) to validate or improve the quality and accuracy of the data.	Please refer to the base data adjustment section beginning on page 7.
	ii. Any concerns that the actuary has over the availability or quality of the data.	The data certification shown in Appendix L has been provided by DHH, and its purpose is to certify the accuracy, completeness, and consistency of the base data.
C.	Any information related to changes in data used when compared to the most recent rating period:	
	i. Any new data sources used by the actuary since the last certification and any data sources that the actuary has not continued to use since the last certification.	Bayou Health Shared Savings claims experience is used as a new data source. The Bayou Health Prepaid program operated under an at-risk capitated arrangement, and the Shared Savings program was an enhanced Primary Care Case Management (ePCCM) program. Effective February 1, 2015, Bayou Health will begin operating as an at risk capitated program only.
	ii. How the data sources used have changed since the last certification.	N/A
D.	Any plans or efforts to improve the data sources used for future certifications and any new data sources that are expected to be available and potentially used for future certifications.	N/A
E.	Any adjustments that are made to the data.	Please refer to the base data adjustment section beginning on page 7.

Page 57 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Section I. July 1, 2015 – January 31, 2016 Medicaid Managed Care Rates	Documentation Reference
3. Projected Benefit Costs	
A. Covered services and benefits	
 i. Any changes related to the benefits covered by the Medicaid managed care organizations since the last certification, including but not limited to: 	
 More or fewer state plan benefits covered by the Medicaid managed care organization. 	Please refer to the new services section on page 6.
 Requirements deemed necessary by the state to ensure access or proper delivery of covered services, for minimum or maximum levels of payment from managed care organizations to any providers or class of providers. 	N/A
c. Requirements or conditions of any applicable waivers.	N/A
ii. For each change related to benefits covered, the estimated impact of the change on amount of projected benefit costs and a description of the data, assumptions, and methodologies used to develop the adjustment.	Please refer to the covered services section beginning on page 6.
B. Projected benefit cost trends	
 The projected change in benefit costs from the historical period to the rating period, or trend, including but not limited to: 	
The methodologies used to develop projected benefit costs trends.	Please refer to the trend section beginning on page 17.
 Any data used or assumptions made in developing projected benefit cost trends. 	Please refer to the trend section beginning on page 17.
 c. Any applicable comparisons to historical benefit cost trends or other program benefit cost trends. 	Please refer to the trend section beginning on page 17.

Page 58 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Section I. July 1, 2015 – January 31, 2016 Medicaid Managed Care Rates	Documentation Reference
d. The different components of projected benefit cost trends, including but not limited to changes in price (such as provider reimbursement rates) and changes in utilization (such as the volume of services provided).	Please refer to Appendices I1-I3.
e. Any other material adjustments to projected benefit cost trends, and a description of the data, assumptions, and methodologies used to determine those adjustments.	N/A
f. To the extent there are any differences, projected benefit cost trends by:	
i. Service or category of service.	Please refer to Appendices I1-I3.
ii. Rate cell or Medicaid population.	Please refer to Appendices I1-I3.
C. Other adjustments to projected benefit costs:	
 i. Any other adjustments made to projected benefit costs excluding those described above, including but not limited to: 	
The impact of managed care on the utilization on the unit costs of health care services.	Please refer to the managed care adjustments section beginning on page 19 and Appendices J1-J2.
 b. Changes to projected benefit costs in the rating period outside of regular changes in utilization or unit cost of services. 	Please refer to the program changes section beginning on page 14.
 D. Final projected benefit costs by relevant level of detail (for example, by Medicaid population or by rate cell). 	Please refer to Appendix M.
4. Projected Non-benefit Costs	
E. Non-benefit costs including but not limited to:	Please refer to the non-medical expense load section beginning on page 22.
i. Administrative costs.	
ii. Care management or coordination costs.	
iii. Provisions for:	
a. Cost of capital.	
b. Risk margin.	
c. Contingency margin.	

Page 59 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

Section I. July 1, 2015 – January 31, 2016 Medicaid Managed Care Rates	Documentation Reference			
d. Underwriting gain.				
e. Profit margin.				
iv. Taxes, fees, and assessments.				
v. Any other material non-benefit costs.	N/A			
5. Rate Range Development				
A. Any assumptions for which values vary in order to develop rate ranges.	Please refer to the trend and managed care adjustments sections beginning on page 19, the Shared Savings Rx claims section beginning on page 20 and the non-medical expense load section on page 22.			
B. The values of each of the assumptions used to develop the minimum, the mid-point (as applicable), and the maximum of the rate ranges.	Please refer to sections related to trend assumptions, managed care adjustments, Shared Savings Rx adjustment, prospective program change adjustments, and non-medical expense load considerations.			
C. A description of the data, assumptions, and methodologies that were used to develop the values of the assumptions for the minimum, the mid-point (as applicable), and maximum of the rate ranges.	Please refer to sections related to trend assumptions, managed care adjustments, Shared Savings Rx adjustment, prospective program change adjustments, and non-medical expense load considerations.			
6. Risk and Contractual Provisions				
A. Risk adjustment processes.	Please see risk adjustment section on page 23.			
B. Risk sharing arrangements, such as risk corridor or large claims pool.	Please see outliers section on page 21.			
Medical loss ratio requirements, such as a minimum medical loss ratio requirement.	N/A			
D. Reinsurance requirements.	N/A			
E. Incentives or withhold amounts.	Please see federal health insurer fee section on page 23.			

Page 60 August 11, 2015 Ms. Jen Steele Louisiana Department of Health and Hospitals

	ion I. July 1, 2015 – January 31, 2016 Medicaid aged Care Rates	Documentation Reference
7.	Other Rate Development Considerations	
	A. All adjustments to the capitation rates, or to any portion of the capitation rates, should reflect reasonable, appropriate, and attainable costs in the actuary's opinion and must be included in the rate certification. CMS notes that adjustments that are performed at the end of the rate setting process without adequate justification might not be considered actuarially sound.	N/A
	B. The final contracted rates should either match the capitation rates or be within the rate ranges in the actuarial certification. This is required in total and by each rate cell.	N/A. Certification of the rate range.
