Table 1: Healthy Louisiana Incentive Measures and Measurement Year 2024 Targets

Identifier	Healthy Louisiana Incentive Measure	Target for Measurement Year 2024[1]
CIS $$	Childhood Immunization Status (Combo 3: DTaP, IPV, MMR, HiB, Hep B, VZV, and PCV)	**63.99** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
IMA $$	Immunizations for Adolescents(Combo 2: Meningococcal, Tdap, HPV)	**34.31** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
LRCD $$	Cesarean Rate for Low-Risk First Birth Women[2]	**23.59** Targets for non-HEDIS incentive-based measures will be equal to the best performance reported to LDH by any MCO for MY2022
COL $$	Colorectal Cancer Screening (COL-E)	**35.17** Targets for HEDIS incentive-based measures without an NCQA Quality Compass target will be equal to the best performance reported to LDH by any MCO for MY2022
CCS $$	Cervical Cancer Screening	**57.11** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
HIV $$	HIV Viral Load Suppression	**80.86** Targets for non-HEDIS incentive-based measures will be equal to the best performance reported to LDH by any MCO for MY2022
FUH $$	Follow-Up After Hospitalization for Mental Illness—Follow-Up Within 30 days After Discharge	**57.69** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
FUM $$	Follow-Up After Emergency Department Visit for Mental Illness—Follow-Up Within 30 Days of the ED Visit	**54.87** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
FUA $$	Follow-up After Emergency Department Visit for Substance Use—Follow-Up Within 30 Days of the ED Visit	**36.34** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
HBD $$	Glycemic Status Assessment for Patients with Diabetes[2]	**37.96** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year
CBP $$	Controlling High Blood Pressure	**61.31** NCQA Quality Compass 2023 (MY2022) Medicaid National 50th percentile (All LOBs [Excluding PPOs and EPOs]: Average) for the year prior to the measurement year

[1]Values shown represent achievement targets. Improvement targets are set at a 2.0 percentage point improvement from the previous year.

[2] A lower rate indicates better performance.

NCQA: National Committee for Quality Assurance; LOB: line of business; PPO: preferred provider organization; EPO: exclusive provider organization; HEDIS: Healthcare Effectiveness Data and Information Set; LDH: Louisiana Department of Health; MCO: managed care organization.
