

Reimbursement policy update: Genetic Tests: Once per Lifetime

Louisiana | Healthy Blue | Medicaid Managed Care

(Policy G-23002, effective [90 days from comms])

Beginning with dates of service on or after [90 days from comms], Healthy Blue will update the Related Coding section of the Genetic Tests: Once per Lifetime reimbursement policy to include additional codes.

These codes identify procedures that are limited to once per lifetime and are listed in the Genetic Sequencing: Once per Lifetime Procedures document contained in the Related Coding section of the policy.

This policy change impacts provider billing and/or reimbursement. It does not impact member care or services. Providers are not to balance bill members based on this policy change.

For additional information, please review the Genetic Tests: Once per Lifetime reimbursement policy at <https://provider.healthybluelo.com>.
