Policy Overview

Sleep Studies/Polysomnogram (PSG) procedures refer to continuous and simultaneous monitoring and recording observational physiological parameters of sleep for a period of at least six hours. Attended sleep studies are typically performed in a sleep laboratory or facility and attended by a technologist or qualified healthcare professional. Unattended sleep studies may be performed in the home.

The purpose of this policy is to define the appropriate place of service for sleep studies.

Application

1. Professional
2. Institutional Providers

Reimbursement

Louisiana Healthcare Connections code editing software will evaluate claim lines to determine if the place of service submitted for a sleep study is consistent with the definition of the sleep study procedure code billed. If the place of service is incorrect, the sleep study will be denied. For example, an attended sleep study billed in a location with place of service “home” would not be appropriate. Attended sleep studies are to be performed in a facility setting; therefore, a POS of home (12) would not be appropriate.
