

Avēsis - AmeriHealth Caritas Louisiana Vision
STANDARD OPERATING PROCEDURE

Subject: Vision Utilization Management

Department: ALL

Current Effective Date: 1/1/2020

Purpose

The purpose of this Standard Operating Procedure (SOP) is to clearly document the process and rationale for adding prior authorizations and/or post reviews

Scope

This SOP applies to the rationale of how Avēsis determines which Category I and II CPT®, as well as which HCPCS codes, require prior authorization and/or post review in order to determine medical necessity.

Overall concept

The rationale to add prior authorizations and/or post reviews follow Avēsis Clinical Protocol Guidelines. We use our experience in trend analytics, best practices, clinical care and billing behaviors in all our Lines of Business for Comprehensive Eye Care.

Process

All CPT®/HCPCS codes are evaluated based on expected utilization to determine which codes are to be placed on prior authorization or post review. The decision to place a code on post review rather than prior authorization is based on the likelihood the service will be done upon initial presentation or the emergent nature of the procedure.

The codes that require prior authorization and/or post review are evaluated by our Chief Medical Officer, Chief Optometric Officer and Clinical Director, as well as our internal/external clinical advisors.
