Notes to Financial Statements

1. Summary of Significant Accounting Policies

A) Accounting Practices

DentaQuest USA Insurance Company, Inc. ("DQ USA" or the "Company") prepares its financial statements in conformity with the accounting practices prescribed or permitted by the State of Texas Department of Insurance. The State of Texas has adopted the National Association of Insurance Commissioners' statutory accounting practices ("NAIC SAP") as the basis of its statutory accounting practice. NAIC SAP is a comprehensive basis of accounting other than the accounting principles generally accepted in the United States of America ("GAAP"). Prescribed statutory accounting practices include a variety of publications of the NAIC, as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so subscribed. The Company has no permitted accounting practices which vary from prescribed accounting practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Texas is shown below:

	NET INCOME	SSAP #	F/S Page	F/S Line #	2018	2017
(1)	DQ USA Insurance Company, Inc. state basis (Page 4, Line 32, Column 2 & 3)	72	4	32	$ 8,657,597	$ 19,523,092
(2)	State Prescribed Practices that increase/(decrease) NAIC SAP:					
	e.g. Depreciation of fixed assets				-	-
(3)	State Permitted Practices that increase/(decrease) NAIC SAP:					
	e.g. Depreciation, home office property				-	-
(4)	NAIC SAP (1-2-3=4)	72	4	32	$ 8,657,597	$ 19,523,092
	SURPLUS					
(5)	DQ USA Insurance Company, Inc. state basis (Page 3, Line 33, Column 3 & 4)	72	3	33	$ 110,182,687	$ 117,506,222
(6)	State Prescribed Practices that increase/(decrease) NAIC SAP:					
	e.g. Goodwill, net					
	e.g. Fixed assets, net				-	-
(7)	State Permitted Practices that increase/(decrease) NAIC SAP:					
	e.g. Home office property				-	-
(8)	NAIC SAP (5-6-7=8)	72	3	33	$ 110,182,687	$ 117,506,222

B) Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

C) Accounting Policies

1) Short-term investments consist of liquid investments, with maturity dates of one year or less at the date of acquisition and are stated at amortized cost.

2) Values of bonds have been determined in accordance with methods and values adopted by the NAIC. Bonds are stated at amortized cost, including inflationary adjustments for inflation projected securities.

3) The Company does not currently hold common stock.

4) The Company does not currently hold preferred stock.

5) The Company does not issue mortgage loans on real estate.

6) The Company owns mortgage-backed securities (MBS) and collateralized mortgage obligations. The value of such securities has been determined in accordance with methods and values adopted by the NAIC.

7) Investments in the Company's sole subsidiary, DSM USA Insurance Company, Inc. ("DSM USA"), are carried using the statutory equity method as required by SSAP No. 97.

8) The Company does not have any investments in joint ventures, partnerships or limited liability companies.

9) The Company has no investments in derivatives.

10) The Company does not have a premium deficiency reserve.

11) Reserves for unpaid claims include incurred but not reported amounts, which are estimated using the Company's historical paid claim and accumulated statistical data, adjusted for current experience.

12) The Company did not change its capitalization policy in 2018.

13) The Company does not have a pharmaceutical rebate receivable.

D) Going Concern

The Company does not have any going concern items to disclose.

2. Accounting Changes and Corrections of Errors

The Company did not have any material accounting changes or corrections of errors for the years ended December 31, 2018 and 2017.

3. Business Combinations and Goodwill

1-4) None

4. Discontinued Operations

1-4) None

5. Investments

A) The Company does not have any Mortgage Loans, including Mezzanine Real Estate Loans.

B) The Company does not have any Debt Restructuring to disclose.

C) The Company does not have any Reverse Mortgages.

D)

1) Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from broker dealer survey values or internal estimates.

2) The Company does not have any loan-backed securities with a recognized other than temporary impairment.

3) The Company does not have any loan-backed securities with a recognized other than temporary impairment.

4) The Company does not have any loan-backed securities with a recognized other than temporary impairment.

5) The Company does not have any additional loan-backed securities with a recognized other than temporary impairment.

E) The Company does not have any repurchase agreements or securities lending transactions.

F) The Company does not have any repurchase agreements transactions accounted for as secured borrowing

G) The Company does not have any reverse repurchase agreements transactions accounted for as secured borrowing

H) The Company does not have any repurchase agreements transactions accounted for as a sale.

Notes to Financial Statements

I) The Company does not have any reverse repurchase agreements transactions accounted for as a sale.

J) The Company does not own any real estate.

K) The Company does not have any investments in low-income housing tax credits (LIHTC).

Federal income taxes incurred	6,493,266	10,700,059	(15,067,713)
Change in effective tax rate	-	(65,501)	-
Change in deferred income taxes	251,419	346,520	(95,101)
Total statutory income taxes	$ 6,744,685	$ 10,981,078	$ (15,162,814)

E)

Notes to Financial Statements

1) The Company does not have operating losses or tax credit carry forwards.

2) The amount of federal income taxes incurred and available for recoupment in the event of future net losses is $6,493,266 at December 31, 2018.

3) The Company does not have any protective tax deposits under section 6603 of the Internal Revenue Code.

F)

1) DentaQuest Group, Inc. (“DentaQuest”) files a consolidated tax return. The members of the DentaQuest federal consolidated income tax return consisted of: DentaQuest Group, Inc., Pacific Dental Network, Inc., California Dental Network, Inc., DentaQuest of Florida, Inc., DSM USA Insurance Company, Inc. and the Company.

2) DentaQuest allocates a share of the total taxes paid to the Company. The rate of federal tax for DentaQuest for 2018 and 2017 was 21%. The Company's tax sharing agreement with DentaQuest calls for the Company to pay taxes to its immediate parent company, DentaQuest, LLC (“DQ, LLC” or the “Parent”) apportioned based on its percentage of consolidated pretax income. For the years ended December 31, 2018 and 2017, Federal corporate income tax expenses amounted to approximately $6,493,266 and $10,700,059 respectively.

G) Not applicable to the Company.

10. Information Concerning Parent, Subsidiaries and Affiliates

A) The Company has entered into an agreement with DQ, LLC pursuant to which DQ, LLC provides various services to the Company such as information technology, facilities and equipment, human resources services, executive and managerial support, legal services, regulatory filing and compliance services, accounting services, cash management services, actuarial and underwriting services, sales and marketing services, enrollment services, claims processing services, billing and collection services, customer services, provider relations and credentialing services, and additional other services. DQ, LLC collects and pays monies related to the Company’s operations.

On August 18, 2011, the Company’s ultimate parent, Dental Service of Massachusetts, Inc. (“DSM”) entered into a Corporate Guarantee (the “Guarantee”) of the Managed Care Contract between the Company and HHSC. Pursuant to the HHSC Contract, which became operational on March 1, 2012 with an initial term through August 31, 2015, the Company now provides dental benefits on a capitated basis to approximately 1,900,000 participants in the Texas Medicaid and CHIP programs. Pursuant to the Guarantee, the DSM unconditionally guarantees DentaQuest USA’s performance of all of its obligations under the HHSC Contract.

DQ, LLC also collects and pays monies on behalf of the Company in relation to federal and state income taxes to DentaQuest, the upstream affiliate with whom the Company has a tax-sharing agreement.

DQ, LLC also collects and disburses monies on behalf of the Company from/to sibling affiliates.

The details of the Company’s tax sharing agreement with DentaQuest are disclosed in Note 9.

On October 11, 2016, the DSM formed Catalyst Institute, Inc. (“Catalyst”), a Massachusetts charitable corporation with no members and with a board of directors comprised of the same individuals serving on DSM’s board. As such, Catalyst was effectively a sister entity to the DSM. On January 11, 2017, Catalyst obtained its 501 (c) (4) exemption from the Internal Revenue Service. On January 1, 2018, Catalyst became the sole member of DSM. On June 6, 2018, as authorized by the Massachusetts Division of Insurance (“DOI”), the Company transferred ownership of DQG to its sole member, Catalyst. As such, Catalyst is now the ultimate parent company of DQ USA.

B) During the year ended December 31, 2018, the following transactions took place between the Company and DQ, LLC: Revenues collected were $323,316,139, claims paid were $286,851,705, salaries and general administrative costs were $68,754,904, federal and state income taxes were $7,114,875, and other amounts paid were $23,325. The amounts recorded

for income taxes are subsequently settled with DentaQuest, which subsequently settles the payment with the IRS and state governments.

During 2018, the Company paid $32,411,724 to DQ, LLC to settle amounts due.

C) There were no changes in the method of establishing the terms from that used in the preceding period.

D) For the years ended December 31, 2018 and 2017, the Company had a total payable to DQ, LLC of $9,209,396 and $7,824,054, respectively.

E) In 2007, DQ, LLC (formerly, co-borrower with DentaQuest Ventures, LLC ("DQV")) and DentaQuest Group, Inc. ("DQ Group") as "Parent Guarantor" entered into a Credit Agreement with a group of lenders providing for a $200 million revolving credit facility and, together with all of the subsidiaries of DQ Group, a Guarantee and Collateral Agreement (together with the Credit Agreement, the "Credit Facility"). Under the Guarantee and Collateral Agreement, substantially all of the assets of the Parent Guarantor, the Co-Borrowers and their subsidiaries were pledged as collateral against any borrowings under the Credit Facility. Upon closing of the Credit Facility, DQV borrowed $140,000,000 and purchased the equity interest of an outside investor for $110,000,000.

On June 23, 2011, DQ, LLC entered into an Amended and Restated Credit Agreement and an Amended and Restated Guarantee and Collateral Agreement with Bank of America, N.A. Under the terms of these amended and restated agreements, the amount of the facility was reduced to $150,000,000 and the Company was newly defined as an "Excluded Insurance Subsidiary." As such, the Company is no longer a guarantor of the obligations of DQ LLC and is no longer required to pledge its assets in support of the borrowers to the lenders. The stock of the Company remained pledged by DQ, LLC as security for its obligations pursuant to the Amended and Restated Guarantee and Collateral Agreement.

On June 24, 2014, DQ, LLC entered into a second Amended and Restated Credit Agreement with Bank of America, N.A. Under the terms of this agreement, the pledge of the stock of the Company by DQ, LLC was released and the Amended and Restated Guarantee and Collateral Agreement was terminated.

F) Expenses representing the Company's proportion of direct expenses funded by DQ, LLC are allocated to the Company using a blend of proportionate membership and level of services performed. Allocated expenses totaled approximately $68,754,904 and $68,130,999 for the years ended December 31, 2018 and December 31, 2017, respectively. The types of costs allocated during both years are described in the first paragraph of 10 B).

G) The Company is a wholly-owned subsidiary of DQ, LLC, a Delaware limited liability company. The ultimate for-profit parent of DQ, LLC is DentaQuest, incorporated under the laws of the state of Delaware, which has its principal place of business in Boston, Massachusetts. DentaQuest is a wholly-owned subsidiary of DSM, a not-for-profit corporation incorporated under Chapter 176E of the Massachusetts General Laws.

H) Not applicable to the Company.

I) Not applicable to the Company.

J) Not applicable to the Company.

K) Not applicable to the Company.

L) Not applicable to the Company.

M) Not applicable to the Company.

N) Not applicable to the Company.

11. Debt

A) The Company has no debt.

B) The Company has no FHLB (Federal Home Loan Bank) agreements.

Notes to Financial Statements

12. Retirement Plans

A-I) The Company had no retirement plans, deferred compensation, postemployment benefits, compensated absences or other postretirement benefit plans.

13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi- Reorganizations

1) The Company has 700,000 shares authorized of common stock, 700,000 shares issued and 700,000 shares outstanding, with par value of $2.86 per share.

2) The Company has no preferred stock outstanding.

3) Pursuant to Texas Insurance Code Section 403.001, the Company may not pay a dividend except from surplus profits arising from the business.

4) During 2018 the Company paid ordinary dividends in the amount of $19,500,000 to DQ, LLC.

5) Within the limitations of (3) above, there are no restrictions placed on the portion of Company profits that may be paid as ordinary dividends to stockholders.

6) Under the laws of the State of Texas, the Company is required to maintain a minimum surplus of $1,400,000. On May 14, 2010, the State of Texas, Commissioner of Insurance issued a consent order requiring the Company to make an initial additional deposit of approximately $7,100,000 million into a restricted account with the Comptroller of Public Accounts for the State of Texas to satisfy certain of its statutory obligations with regard to the pledge of assets. The funds in the restricted account were not subject to the asset pledge under the Credit Facility. As of December 31, 2011, additional deposits had been made to this restricted account and the carrying value of these restricted securities was $14,500,000 at December 31, 2011. On April 13, 2012, another consent order was issued releasing the Company from most of the requirements of the previous order. The Company was given permission to withdraw approximately $7.25 million of the approximately $13.1 million on special deposit at that date. On November 20, 2014 the Company made an additional deposit in the amount of $5,183,000 to replace securities on deposit which had matured. In 2018, the Company was able to redeem $7,250,000 of securities from the state of Texas. There is currently $5,183,000 on deposit with the State of Texas.

   The Company has four other restricted deposits. One deposit is with the State of Georgia Office of Commissioner of Insurance in the approximate amount of $100,000 in relation to the Company's extended license in the State of Georgia. Another deposit is maintained by the Commonwealth of Massachusetts, Department of State Treasurer in the approximate amount of $101,000 in relation to the Company's extended license in the Commonwealth of Massachusetts. On January 18, 2018, the Company made a third deposit in the amount of $438,000 in relation to the Company's extended license in the state of North Carolina. On January 19, 2018, the Company made a deposit in the amount of $243,000 in the state of Nevada in relation to extending the Company's license in the state.

7) Not applicable to the Company.

8) Not applicable to the Company.

9) Not applicable to the Company.

10) The portion of unassigned funds (surplus) represented or reduced by unrealized gains or loss is $14,268.

11) Not applicable to the Company.

12) Not applicable to the Company.

13) Not applicable to the Company.

14. Contingencies

A) The Company has no material contingent liabilities.

B) The Company has not been advised of any assessments.

C) The Company has no gain contingencies.

D) The Company has no extra contractual obligations or bad faith losses stemming from lawsuits.

E) At December 31, 2018, there were no legal actions currently pending involving the Company.

F) The company has no other contingencies.

15. Leases

A – B) Not applicable to the Company.

16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

For the years ended December 31, 2018 and 2017, the Company held cash in certain bank accounts in excess of the federally insured limit. The Company has not experienced any credit losses with respect to its cash equivalents and believes its credit risk to be negligible.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A) The Company did not sell or transfer any receivables reported as sales.

B) The Company did not sell or transfer any financial assets.

C) There were no wash sales.

18. Gain or Loss to the Reporting Entity from Uninsured A&H Plans and the Uninsured Portion of Partially Insured Plans

A – C) The Company had no uninsured accident and health plans or uninsured portions of partially insured plans.

19. Direct Premiums Written/Produced by Managing General Agents/Third Party Administrators

The Company had no direct premiums written or produced by a Managing General Agent or Third Party Administrator.

20. Fair Value Measurements

A)

1) The Company does not report at fair value in the statement of financial position.

2) The Company had no Level 3 investments as of December 31, 2018.

3) The Company had no transfers between levels during 2018.

4) Not applicable to the Company.

5) The Company had no derivative assets and liabilities at December 31, 2018.

B) None

C)

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	Level (3)
Bonds	$ 53,009,884	$ 54,056,501	$ 8,978,898	$ 45,077,603	$ -

D) Not applicable to the Company.

Notes to Financial Statements

E) Not applicable to the Company.

21. Other Items

A) The Company has no unusual or infrequent items to report.

B) The Company has no troubled debt restructuring.

C) Other Disclosures – none

D) The Company has not had any business interruption insurance recoveries.

E) The Company has not been involved in state transferable tax credits.

F) The Company has not had any subprime-mortgage-related risk exposure.

G) The Company has no retained asset accounts for beneficiaries.

H) The Company has no insurance-linked securities.

22. Events Subsequent

On January 1, 2018, the Company was subject to an annual fee under Section 9010 of the Federal Affordable Care Act (ACA). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2018, the Company had written health insurance subject to the ACA assessment, and expects to conduct health insurance business in 2019; however, the federal government has suspended the ACA assessment for 2019, so the Company estimates its portion of the annual health insurance industry fee to be $0.

		Current Year		Prior Year
A. Did the reporting entity write accident and health insurance premium that is subject to Section 9010 of the federal Affordable Care Act (YES/NO)?		Yes		
B. ACA fee assessment payable for the upcoming year	$	-	$	14,666,000
C. ACA fee assessment paid	$	19,660,266	$	-
D. Premium written subject to ACA	$	768,963,667	$	803,066,544
E. Total Adjusted Capital before surplus adjustment (Five-Year Historical Line 14)	$	110,182,687		
F. Total Adjusted Capital after surplus adjustment (Five-Year Historical Line 14 minus 22B above)	$	110,182,687		
G. Authorized Control Level (Five-Year Historical Line 15)	$	29,439,296		
H. Would reporting the ACA assessment as of December 31, 2017, have triggered an RBC action level (YES/NO)?		No		

23. Reinsurance

A) The Company has no ceded reinsurance.

B) The Company has no uncollectible reinsurance.

C) The Company has not commutated any reinsurance.

D) The Company has no ceded reinsurance.

Notes to Financial Statements

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

A) The Company estimates accrued retrospective premium adjustments for its HHSC dental insurance business based upon the loss ratio, net of operating expenses.

B) The Company records accrued retrospective premium as an adjustment to earned premium.

C) The amount of net premiums written by the Company at December 31, 2018 that are subject to retrospective rating features was $753 million, that represented 98% of the total net premiums written. No other net premiums written by the Company are subject to retrospective rating features.

D) Medical loss ratio rebates required pursuant to the Public Health Service Act.

The Company did not have any premium deficiency reserves.

31. Anticipated Salvage and Subrogation

There is no salvage and subrogation to disclose.

GENERAL INTERROGATORIES

PART 1 - COMMON INTERROGATORIES

GENERAL

1.1 Is the reporting entity a member of an Insurance Holding Company System consisting of two or more affiliated persons, one or more of which is an insurer? Yes[X] No[ ]
If yes, complete Schedule Y, Parts 1, 1A and 2.

1.2 If yes, did the reporting entity register and file with its domiciliary State Insurance Commissioner, Director or Superintendent or with such regulatory official of the state of domicile of the principal insurer in the Holding Company System, a registration statement providing disclosure substantially similar to the standards adopted by the National Association of Insurance Commissioners (NAIC) in its Model Insurance Holding Company System Regulatory Act and model regulations pertaining thereto, or is the reporting entity subject to standards and disclosure requirements substantially similar to those required by such Act and regulations? Yes[X] No[ ] N/A[ ]

1.3 State Regulating? Texas

1.4 Is the reporting entity publicly traded or a member of a publicly traded group? Yes[ ] No[X]

1.5 If the response to 1.4 is yes, provide the CIK (Central Index Key) code issued by the SEC for the entity/group.

2.1 Has any change been made during the year of this statement in the charter, by-laws, articles of incorporation, or deed of settlement of the reporting entity? Yes[ ] No[X]

2.2 If yes, date of change:

3.1 State as of what date the latest financial examination of the reporting entity was made or is being made. 12/31/2014

3.2 State the as of date that the latest financial examination report became available from either the state of domicile or the reporting entity. This date should be the date of the examined balance sheet and not the date the report was completed or released. 12/31/2014

3.3 State as of what date the latest financial examination report became available to other states or the public from either the state of domicile or the reporting entity. This is the release date or completion date of the examination report and not the date of the examination (balance sheet date). 06/07/2016

3.4 By what department or departments?
Texas Department of Insurance

3.5 Have all financial statement adjustments within the latest financial examination report been accounted for in a subsequent financial statement filed with departments? Yes[ ] No[ ] N/A[X]

3.6 Have all of the recommendations within the latest financial examination report been complied with? Yes[ ] No[ ] N/A[X]

4.1 During the period covered by this statement, did any agent, broker, sales representative, non-affiliated sales/service organization or any combination thereof under common control (other than salaried employees of the reporting entity) receive credit or commissions for or control a substantial part (more than 20 percent of any major line of business measured on direct premiums) of:
4.11 sales of new business? Yes[ ] No[X]
4.12 renewals? Yes[ ] No[X]

4.2 During the period covered by this statement, did any sales/service organization owned in whole or in part by the reporting entity or an affiliate, receive credit or commissions for or control a substantial part (more than 20 percent of any major line of business measured on direct premiums) of:
4.21 sales of new business? Yes[ ] No[X]
4.22 renewals? Yes[ ] No[X]

5.1 Has the reporting entity been a party to a merger or consolidation during the period covered by this statement? Yes[ ] No[X]
If yes, complete and file the merger history data file with the NAIC.

5.2 If yes, provide the name of the entity, NAIC company code, and state of domicile (use two letter state abbreviation) for any entity that has ceased to exist as a result of the merger or consolidation.

1 Name of Entity	2 NAIC Company Code	3 State of Domicile

6.1 Has the reporting entity had any Certificates of Authority, licenses or registrations (including corporate registration, if applicable) suspended or revoked by any governmental entity during the reporting period? Yes[ ] No[X]

6.2 If yes, give full information:

7.1 Does any foreign (non-United States) person or entity directly or indirectly control 10% or more of the reporting entity? Yes[ ] No[X]

7.2 If yes,
7.21 State the percentage of foreign control 0.000%
7.22 State the nationality(s) of the foreign person(s) or entity(s); or if the entity is a mutual or reciprocal, the nationality of its manager or attorney-in-fact and identify the type of entity(s) (e.g., individual, corporation, government, manager or attorney-in-fact).

1 Nationality	2 Type of Entity

8.1 Is the company a subsidiary of a bank holding company regulated by the Federal Reserve Board? Yes[ ] No[X]

8.2 If response to 8.1 is yes, please identify the name of the bank holding company.

8.3 Is the company affiliated with one or more banks, thrifts or securities firms? Yes[ ] No[X]

8.4 If response to 8.3 is yes, please provide the names and locations (city and state of the main office) of any affiliates regulated by a federal financial regulatory services agency [i.e. the Federal Reserve Board (FRB), the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC) and the Securities Exchange Commission (SEC) and identify the affiliate's primary federal regulator.

1 Affiliate Name	2 Location (City, State)	3 FRB	4 OCC	5 FDIC	6 SEC
		No	No	No	No

9. What is the name and address of the independent certified public accountant or accounting firm retained to conduct the annual audit?
Ernst & Young, LLP 200 Clarendon Street, Boston, MA 02116

10.1 Has the insurer been granted any exemptions to the prohibited non-audit services provided by the certified independent public accountant requirements as allowed in Section 7H of the Annual Financial Reporting Model Regulation (Model Audit Rule), or substantially similar state law or regulation? Yes[ ] No[X]

24.07 Does your securities lending program require 102% (domestic securities) and 105% (foreign securities) from the counterparty at the outset of the contract? Yes[ ] No[ ] N/A[X]
24.08 Does the reporting entity non-admit when the collateral received from the counterparty falls below 100%? Yes[ ] No[ ] N/A[X]

GENERAL INTERROGATORIES (Continued)

24.09 Does the reporting entity or the reporting entity's securities lending agent utilize the Master Securities Lending Agreement (MSLA) to conduct securities lending? Yes[ ] No[ ] N/A[X]

24.10 For the reporting entity's security lending program, state the amount of the following as of December 31 of the current year:

24.101 Total fair value of reinvested collateral assets reported on Schedule DL, Parts 1 and 2.	$ 0
24.102 Total book/adjusted carrying value of reinvested collateral assets reported on Schedule DL, Parts 1 and 2.	$ 0
24.103 Total payable for securities lending reported on the liability page.	$ 0

25.1 Were any of the stocks, bonds or other assets of the reporting entity owned at December 31 of the current year not exclusively under the control of the reporting entity, or has the reporting entity sold or transferred any assets subject to a put option contract that is currently in force? (Exclude securities subject to Interrogatory 21.1 and 24.03). Yes[X] No[ ]

25.2 If yes, state the amount thereof at December 31 of the current year:

25.21	Subject to repurchase agreements	$ 0
25.22	Subject to reverse repurchase agreements	$ 0
25.23	Subject to dollar repurchase agreements	$ 0
25.24	Subject to reverse dollar repurchase agreements	$ 0
25.25	Placed under option agreements	$ 0
25.26	Letter stock or securities restricted as to sale - excluding FHLB Capital Stock	$ 0
25.27	FHLB Capital Stock	$ 0
25.28	On deposit with states	$ 6,064,923
25.29	On deposit with other regulatory bodies	$ 0
25.30	Pledged as collateral - excluding collateral pledged to an FHLB	$ 0
25.31	Pledged as collateral to FHLB - including assets backing funding agreements	$ 0
25.32	Other	$ 0

25.3 For category (25.26) provide the following:

1 Nature of Restriction	2 Description	3 Amount

26.1 Does the reporting entity have any hedging transactions reported on Schedule DB? Yes[ ] No[X]

26.2 If yes, has a comprehensive description of the hedging program been made available to the domiciliary state? Yes[ ] No[ ] N/A[X]
If no, attach a description with this statement.

27.1 Were any preferred stocks or bonds owned as of December 31 of the current year mandatorily convertible into equity, or, at the option of the issuer, convertible into equity? Yes[ ] No[X]

27.2 If yes, state the amount thereof at December 31 of the current year. $ 0

28. Excluding items in Schedule E - Part 3 - Special Deposits, real estate, mortgage loans and investments held physically in the reporting entity's offices, vaults or safety deposit boxes, were all stocks, bonds and other securities, owned throughout the current year held pursuant to a custodial agreement with a qualified bank or trust company in accordance with Section I, III - General Examination Considerations, F. Outsourcing of Critical Functions, Custodial or Safekeeping Agreements of the NAIC Financial Condition Examiners Handbook? Yes[X] No[ ]

28.01 For agreements that comply with the requirements of the NAIC Financial Condition Examiners Handbook, complete the following:

1 Name of Custodian(s)	2 Custodian's Address
State Street Bank & Trust	801 Pennsylvania Avenue, Kansas City, MO, 64105

28.02 For all agreements that do not comply with the requirements of the NAIC Financial Condition Examiners Handbook, provide the name, location and a complete explanation:

1 Name(s)	2 Location(s)	3 Complete Explanation(s)

28.03 Have there been any changes, including name changes, in the custodian(s) identified in 28.01 during the current year? Yes[ ] No[X]

28.04 If yes, give full and complete information relating thereto:

1 Old Custodian	2 New Custodian	3 Date of Change	4 Reason

28.05 Investment management - Identify all investment advisors, investment managers, broker/dealers, including individuals that have the authority to make investment decisions on behalf of the reporting entity. For assets that are managed internally by employees of the reporting entity, note as such. [" that have access to the investment accounts"; " handle securities"]

1 Name of Firm or Individual	2 Affiliation
State Street Global Advisors	U
Conning Asset Management	U
Income Research Group & Management	U
Prime Buchholz & Associates	U
Gregory P. Winn	I

28.0597 For those firms/individuals listed in the table for Question 28.05, do any firms/individuals unaffiliated with the reporting entity (i.e. designated with a "U") manage more than 10% of the reporting entity's assets? Yes[X] No[ ]

28.0598 For firms/individuals unaffiliated with the reporting entity (i.e. designated with a "U") listed in the table for Question 28.05, does the total assets under management aggregate to more than 50% of the reporting entity's assets? Yes[ ] No[X]

28.06 For those firms or individuals listed in the table for 28.05 with an affiliation code of "A" (affiliated) or "U" (unaffiliated), provide the information for the table below.

GENERAL INTERROGATORIES (Continued)

1 Central Registration Depository Number	2 Name of Firm or Individual	3 Legal Entity Identifier (LEI)	4 Registered With	5 Investment Management Agreement (IMA) Filed
112861	State Street Global Advisors	571474TGEMMWANRLN572	SEC	
107423	Conning Asset Management		SEC	OS
104863	Income Research & Management		SEC	OS
106455	Prime Buchholz & Associates		SEC	OS

29.1 Does the reporting entity have any diversified mutual funds reported in Schedule D - Part 2 (diversified according to the Securities and Exchange Commission (SEC) in the Investment Company Act of 1940 [Section 5 (b)(1)])? Yes[ ] No[X]

29.2 If yes, complete the following schedule:

1 CUSIP #	2 Name of Mutual Fund	3 Book/Adjusted Carrying Value
29.2999 Total		

29.3 For each mutual fund listed in the table above, complete the following schedule:

1 Name of Mutual Fund (from above table)	2 Name of Significant Holding of the Mutual Fund	3 Amount of Mutual Fund's Book/Adjusted Carrying Value Attributable to the Holding	4 Date of Valuation

30. Provide the following information for all short-term and long-term bonds and all preferred stocks. Do not substitute amortized value or statement value for fair value.

		1 Statement (Admitted) Value	2 Fair Value	3 Excess of Statement over Fair Value (-), or Fair Value over Statement (+)
30.1	Bonds	54,056,501	53,009,884	(1,046,617)
30.2	Preferred stocks			
30.3	Totals	54,056,501	53,009,884	(1,046,617)

30.4 Describe the sources or methods utilized in determining the fair values:
The fair values are obtained from the custodian, State Street Bank & Trust, on a monthly basis

31.1 Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D? Yes[X] No[ ]

31.2 If the answer to 31.1 is yes, does the reporting entity have a copy of the broker's or custodian's pricing policy (hard copy or electronic copy) for all brokers or custodians used as a pricing source? Yes[X] No[ ] N/A[ ]

31.3 If the answer to 31.2 is no, describe the reporting entity's process for determining a reliable pricing source for purposes of disclosure of fair value for Schedule D:

32.1 Have all the filing requirements of the Purposes and Procedures Manual of the NAIC Investment Analysis Office been followed? Yes[X] No[ ]

32.2 If no, list exceptions:

33. By self-designation 5GI securities, the reporting entity is certifying the following elements for each self-designated 5GI security:
   a. Documentation necessary to permit a full credit analysis of the security does not exist or an NAIC CRP credit rating for an FE or PL security is not available.
   b. Issuer or obligor is current on all contracted interest and principal payments.
   c. The insurer has an actual expectation of ultimate payment of all contracted interest and principal.

Has the reporting-entity self-designated 5GI securities? Yes[ ] No[X]

34. By self-designating PLGI securities, the reporting entity is certifying the following elements of each self-designated PLGI security:
   a. The security was purchased prior to January 1, 2018.
   b. The reporting entity is holding capital commensurate with the NAIC Designation reported for the security
   c. The NAIC Designation was derived from the credit rating assigned by an NAIC CRP in its legal capacity as an NRSRO which is shown on a current private letter rating held by the insurer and available for examination by state insurance regulators.
   d. The reporting entity is not permitted to share this credit rating of the PL security with the SVO.

Has the reporting entity self-designated PLGI securities? Yes[ ] No[X]

OTHER

35.1 Amount of payments to Trade Associations, Service Organizations and Statistical or Rating Bureaus, if any? $ 0

35.2 List the name of the organization and the amount paid if any such payment represented 25% or more of the total payments to Trade Associations, Service Organizations and Statistical or Rating Bureaus during the period covered by this statement.

1 Name	2 Amount Paid

Schedule Y Part 2 Explanation:

SUPPLEMENTAL EXHIBITS AND SCHEDULES INTERROGATORIES

	Response
The following supplemental reports are required to be filed as part of your statement filing unless specifically waived by the domiciliary state. However, in the event that your domiciliary state waives the filing requirement, your response of WAIVED to the specific interrogatory will be accepted in lieu of filing a "NONE" report and a bar code will be printed below. If the supplement is required of your company but is not being filed for whatever reason, enter SEE EXPLANATION and provide an explanation following the interrogatory questions.	
MARCH FILING	
1. Will the Supplemental Compensation Exhibit be filed with the state of domicile by March 1?	Yes
2. Will an actuarial opinion be filed by March 1?	Yes
3. Will the confidential Risk-based Capital Report be filed with the NAIC by March 1?	Yes
4. Will the confidential Risk-based Capital Report be filed with the state of domicile, if required by March 1?	Yes
APRIL FILING	
5. Will Management's Discussion and Analysis be filed by April 1?	Yes
6. Will the Supplemental Investment Risks Interrogatories be filed by April 1?	Yes
7. Will the Accident and Health Policy Experience Exhibit be filed by April 1?	See Explanation
JUNE FILING	
8. Will an audited financial report be filed by June 1?	Yes
9. Will Accountants Letter of Qualifications be filed with the state of domicile and electronically with the NAIC by June 1?	Yes
AUGUST FILING	
10. Will the regulator-only (non-public) Communication of Internal Control Related Matters Noted in Audit be filed with the state of domicile and electronically with the NAIC (as a regulator-only non-public document) by August 1?	Yes
The following supplemental reports are required to be filed as part of your statement filing if your company is engaged in the type of business covered by the supplement. However, in the event that your company does not transact the type of business for which the special report must be filed, your response of NO to the specific interrogatory will be accepted in lieu of filing a "NONE" report and a bar code will be printed below. If the supplement is required of your company but it is not being filed for whatever reason enter SEE EXPLANATION and provide an explanation following the interrogatory questions.	
MARCH FILING	
11. Will the Medicare Supplement Insurance Experience Exhibit be filed with the state of domicile and the NAIC by March 1?	See Explanation
12. Will the Supplemental Life data due March 1 be filed with the state of domicile and the NAIC?	No
13. Will Schedule SIS (Stockholder Information Supplement) be filed with the state of domicile by March 1?	No
14. Will the actuarial opinion on participating and non-participating policies as required in Interrogatories 1 and 2 on Exhibit 5 to Life Supplement be filed with the state of domicile and electronically with the NAIC by March 1?	No
15. Will the actuarial opinion on non-guaranteed elements as required in Interrogatory 3 to Exhibit 5 to Life Supplement be filed with the state of domicile and electronically with the NAIC by March 1?	No
16. Will the Medicare Part D Coverage Supplement be filed with the state of domicile and the NAIC by March 1?	No
17. Will an approval from the reporting entity's state of domicile for relief related to the five-year rotation requirement for lead audit partner be file electronically with the NAIC by March 1?	No
18. Will an approval from the reporting entity's state of domicile for relief related to the one-year cooling off period for independent CPA be filed electronically with the NAIC by March 1?	No
19. Will an approval from the reporting entity's state of domicile for relief related to the Requirements for Audit Committees be filed electronically with the NAIC by March 1?	No
APRIL FILING	
20. Will the Long-Term Care Experience Reporting Forms be filed with the state of domicile and the NAIC by April 1?	No
21. Will the Supplemental Life data due April 1 be filed with the state of domicile and the NAIC?	No
22. Will the Supplemental Health Care Exhibit (Parts 1, 2 and 3) be filed with the state of domicile and the NAIC by April 1?	No
23. Will the regulator only (non-public) Supplemental Health Care Exhibit's Allocation Report be filed with the state of domicile and the NAIC by April 1?	No
24. Will the Life, Health & Annuity Guaranty Association Model Act Assessment Base Reconciliation Exhibit be filed with the state of domicile and the NAIC by April 1?	No
25. Will the Adjustments to the Life, Health & Annuity Guaranty Association Model Act Assessment Base Reconciliation Exhibit (if required) be filed with the state of domicile and the NAIC by April 1?	No
AUGUST FILING	
26. Will Management's Report of Internal Control Over Financial Reporting be filed with the state of domicile by August 1?	Yes

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on Cigna's current expectations and projections about future trends, events and uncertainties. These statements are not historical facts. Forward-looking statements may include, among others, statements concerning future financial or operating performance, including our ability to deliver affordable, personalized and innovative solutions for our customers and clients; future growth, business strategy, strategic or operational initiatives; economic, regulatory or competitive environments, particularly with respect to the pace and extent of change in these areas; financing or capital deployment plans and amounts available for future deployment; our prospects for growth in the coming years; the merger ("Merger") with Express Scripts Holding Company; and other statements regarding Cigna's future beliefs, expectations, plans, intentions, financial condition or performance. You may identify forward-looking statements by the use of words such as "believe," "expect," "plan," "intend," "anticipate," "estimate," "predict," "potential," "may," "should," "will" or other words or expressions of similar meaning, although not all forward-looking statements contain such terms.

Forward-looking statements are subject to risks and uncertainties, both known and unknown, that could cause actual results to differ materially from those expressed or implied in forward-looking statements. Such risks and uncertainties include, but are not limited to: our ability to achieve our financial, strategic and operational plans or initiatives; our ability to predict and manage medical and pharmacy costs and price effectively; our ability to adapt to changes or trends in an evolving and rapidly changing industry; our ability to effectively differentiate our products and services from those of our competitors and maintain or increase market share; our ability to develop and maintain good relationships with physicians, hospitals, other health care providers and pharmaceutical manufacturers; changes in drug pricing; the impact of modifications to our operations and processes; our ability to identify potential strategic acquisitions or transactions and realize the expected benefits (including anticipated synergies) of such transactions in full or within the anticipated time frame, including with respect to the Merger, as well as our ability to integrate operations, resources and systems; the substantial level of government regulation over our business and the potential effects of new laws or regulations or changes in existing laws or regulations; the outcome of litigation, regulatory audits, investigations, actions and/or guaranty fund assessments; uncertainties surrounding participation in government-sponsored programs such as Medicare; the effectiveness and security of our information technology and other business systems; the impact of our debt service obligations on the availability to funds for other business purposes; unfavorable industry, economic or political conditions, including foreign currency movements; acts of war, terrorism, natural disasters or pandemics; as well as more specific risks and uncertainties discussed in Part I, Item 1A—Risk Factors and Part II, Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations of this Form 10-K and as described from time to time in our future reports filed with the Securities and Exchange Commission (the "SEC").

You should not place undue reliance on forward-looking statements that speak only as of the date they are made, are not guarantees of future performance or results, and are subject to risks, uncertainties and assumptions that are difficult to predict or quantify. Cigna undertakes no obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as may be required by law.

PART I

ITEM 1. Business

Overview

Cigna Corporation, together with its subsidiaries (either individually or collectively referred to as "Cigna," the "Company," "we," "our" or "us") is a global health service organization.

Our revenues are derived principally from premiums on insured products, fees for products and services provided to self-insured plans, pharmacy sales, and investment income. In 2018, our revenues were $48.7 billion and shareholders' net income was $2.6 billion. As described more fully in Note 3 to the Consolidated Financial Statements on page 80 of this Annual Report on Form 10-K ("Form 10-K"), on March 8, 2018, we entered into a merger agreement with Express Scripts Holding Company ("Express Scripts"). The results of Express Scripts have been included in the Company's Consolidated Financial Statements from the date of acquisition. As of December 31, 2018, total assets were $153.2 billion and shareholders' equity was $41.0 billion.

Our combination with Express Scripts creates an enterprise uniquely capable of transforming health care. We now have broader and deeper capabilities, along with meaningful synergies, that accelerate our "Go" strategy to achieve our mission of improving the health, well-being and peace of mind of those we serve. Cigna's employees are champions of the people we serve and over the past decade, our focus has shifted to helping people thrive by offering solutions to prevent and better manage health challenges. When sickness or disability do occur, we support our customers' ability to have broad choices in how they best access high quality, affordable care. We maximize use of evidence-based care,

while delivering best-in-class quality of care for our customers with acute and chronic conditions through enhanced real time data across an expanded platform with industry-leading solutions to support care decisions.

Cigna offers a differentiated set of medical, pharmacy, behavioral, dental, disability, life and accident insurance and related products and services. By combining with Express Scripts, Cigna's expanded capabilities now include: 1) a broader portfolio of specialty services, some of which can be offered on a stand-alone basis; 2) integrated behavioral, medical and pharmacy management services; 3) leading specialty pharmacy expertise; and 4) advanced analytics that help us engage more meaningfully with individuals, plan sponsors we serve, and our provider partners. These capabilities accelerate Cigna's ability to drive improved cost affordability, quality of care and predictability.

Following entry into the merger agreement and throughout the pendency of the transaction, Cigna and Express Scripts designed integration plans to implement a new management and business reporting structure for the combined company upon closing. On December 20, 2018, Cigna completed the acquisition of Express Scripts. As a result, effective in the fourth quarter of 2018 our segments have changed to the following: 1) Integrated Medical, consisting of both a Commercial operating segment that includes our employer-sponsored medical coverage and a Government operating segment that includes Medicare offerings for seniors and individual insurance offerings to non-seniors both on and off the public health insurance exchanges; 2) Health Services, consisting primarily of Cigna's legacy home delivery pharmacy business and Express Scripts' pharmacy benefit management ("PBM") business beginning December 21, 2018; and 3) International Markets, that offers global supplemental benefits and global medical solutions. The remainder of our business is reported in Group Disability and Other, consisting of our group disability and life business together with our corporate owned life insurance ("COLI") business and run-off operations. See Note 1 to the Consolidated Financial Statements on page 72 of this Form 10-K for additional description of our segments. Among our segments, Cigna has four core growth platforms: Commercial, Government, Health Services and International Markets.

As individuals become increasingly involved in their health care purchasing decisions, Cigna continues to focus on delivering **affordable** and **personalized** products and services to customers through employer-based, government-sponsored, health plan client and individual coverage arrangements. In our Integrated Medical business, we collaborate with health care providers to accelerate the transition from volume-based, fee-for-service reimbursement arrangements to a value-based reimbursement model that delivers higher quality of care, lower costs and better health outcomes. We have worked toward achieving better health, affordability, localization and an improved patient experience through increased collaborative care and delivery arrangements with health care providers across the care delivery spectrum, including physician groups of all sizes, specialist groups and hospitals. We have also developed innovative tools and flexible provider arrangements that provide a truly personalized customer experience. These arrangements and tools are discussed in more detail in the "Integrated Medical" section of this Form 10-K that begins on page 3.

Our Health Services business puts medicine within reach for patients, and helps providers improve access to prescription drugs by making them more affordable. We improve patient outcomes and better manage the cost of the pharmacy benefit by:

- Delivering the best care available for those taking prescription medicines;
- Assessing drugs based on efficacy, value and price to assist clients in selecting the most cost-effective formulary;
- Offering cost-effective home delivery pharmacy and specialty services that result in cost savings for plan sponsors and better care for customers;
- Leveraging purchasing volume to deliver discounts to employers and other groups, resulting in leading prescription drug cost trend; and
- Promoting the use of generic and lower-cost brands.

We also work with key stakeholders across the health care system to improve health outcomes and patient satisfaction, increase efficiency in drug distribution and manage costs of the pharmacy benefit. We believe plan sponsors and participants can achieve the best health and financial outcomes when they use our comprehensive set of solutions to manage drug spend.

The ACA and Health Care Reform

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (collectively referred to throughout this Form 10-K as the "ACA" or "PPACA") continues to have a significant impact on our business operations. The future of the ACA is uncertain due to recent court decisions, congressional efforts to repeal and replace the ACA, various executive actions of the current administration, and repeal of the individual mandate as part of H.R.1, An Act to Provide for Reconciliation Pursuant to Titles II and V of the Concurrent Resolution on the Budget for Fiscal Year 2018 (referred to throughout this Form 10-K as the "Tax Cuts and Jobs Act" or "U.S. tax reform legislation"). The effects of the ACA, and efforts to repeal and replace it, are discussed throughout this Form 10-K where appropriate, including in the Integrated Medical business description, Regulation, Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), and the Notes to the Consolidated Financial Statements.

Other Information

The financial information included in this Form 10-K for the fiscal year ended December 31, 2018 is in conformity with accounting principles generally accepted in the United States of America ("GAAP") unless otherwise indicated. In the segment discussions that follow, we use the terms "adjusted revenues" and "pre-tax adjusted income from operations" to describe segment results. See the introduction to the MD&A on page 42 of this Form 10-K for definitions of those terms. Industry rankings and percentages set forth herein are for the year ended December 31, 2018 unless otherwise indicated. In addition, statements set forth in this document concerning our rank or position in an industry or particular line of business have been developed internally based on publicly available information unless otherwise noted.

Cigna Holding Company (formerly Cigna Corporation) was incorporated in Delaware in 1981. Halfmoon Parent, Inc. was incorporated in Delaware in March 2018. Halfmoon Parent, Inc. was renamed Cigna Corporation concurrently with the consummation of the combination with Express Scripts. Our annual, quarterly and current reports, proxy statements and other filings, and any amendments to these filings, are made available free of charge on our website (http://www.cigna.com, under the "Investors – Quarterly Reports and SEC Filings" captions) as soon as

reasonably practicable after we electronically file these materials with, or furnish them to, the Securities and Exchange Commission (the "SEC"). We use our website as a channel of distribution for material company information. Important information, including news releases, analyst presentations and financial information regarding Cigna is routinely posted on and accessible at http://www.cigna.com. See "Code of Ethics and Other Corporate Governance Disclosures" in Part III, Item 10 beginning on page 131 of this Form 10-K for additional information available on our website.

Integrated Medical

Integrated Medical consists of a Commercial operating segment that includes our employer-sponsored medical coverage and a Government operating segment that includes Medicare offerings for seniors and individual insurance offerings to non-seniors both on and off the public health insurance exchanges. In 2018, Integrated Medical reported adjusted revenues of $32.8 billion and pre-tax adjusted income from operations of $3.5 billion.

How We Win
• **Broad and deep portfolio of solutions** across Commercial and Government operating segments
• **Commitment** to highest quality health outcomes and customer experiences
• **Collaborative** physician engagement models emphasizing value over volume of services
• **Integrated benefit solutions** that deliver value for our customers, clients and partners
• **Technology and data analytics** powering actionable insights and affordable, personalized solutions
• **Talented and caring people** embracing change and putting customers at the center of all we do

We differentiate ourselves by providing innovative, personalized, and affordable health care benefit solutions based on the unique needs of the individuals and clients we serve. We increase value through our integrated approach and use of technology and data analytics to enhance patient engagement and health care outcomes, underscoring our strategic focus on delivering an industry-leading customer experience. We continue to strengthen our partnerships with providers as we accelerate our transition to a value-based reimbursement system.

We offer a mix of core health insurance products and services to employers, other groups and individuals along with specialty products and services designed to improve the quality of care, lower cost and help customers achieve better health outcomes. Many of these products are available on a standalone basis, but we believe they are most valuable when integrated with a Cigna-administered health plan. Our products are available through several distribution channels including brokers, direct sales, and public and private exchanges. Our three funding solutions (i.e., insured – experience-rated, insured – guaranteed cost, and administrative services only ("ASO") arrangements) enable us to customize the amount of risk taken by, and lower costs for, our customers and clients.

The following chart depicts a high level summary of our principal products and services in this segment as of year-end, with definitions on subsequent pages.

Principal Products & Services	*Major Brand(s)*	*Geography*	*Funding Solution(s)*	*Market Segment(s)*	*Primary Distribution Channel(s)*	*Primary Competitors*

Vision	Cigna Vision	Nationwide	GC, ER, ASO	Commercial, Individual	Brokers, Direct	National Insurers, Specialty Companies

Principal Products & Services

Commercial Medical

- ***Managed Care Plans*** These plans are offered through our insurance companies, HMOs and TPA companies. HMO, Network Open Access and Open Access Plus plans use meaningful cost-sharing incentives to encourage the use of "in-network" versus "out-of-network" health care providers. The national provider network for Managed Care Plans is somewhat smaller than the national network used with the preferred provider ("PPO") plan product line.
- ***PPO Plans*** feature a network with broader provider access than the Managed Care Plans.
- ***Consumer-Driven Products*** are typically paired with a high-deductible medical plan and offer customers a tax-advantaged way to pay for eligible health care expenses. These products, consisting of health savings accounts ("HSAs"), health reimbursement accounts ("HRAs") and flexible spending accounts ("FSAs"), encourage customers to play an active role in managing their health and health care costs. When integrated with a Cigna medical plan, we can deliver a seamless experience for our customers and clients. More than three million customers have one of these integrated product solutions.

Government Medical

- ***Individual and Family Plans*** feature an insurance policy coupled with a network of health care providers in a geographic area who have been selected with cost and quality in mind.
- ***Medicare Advantage Plans*** allow Medicare-eligible beneficiaries to receive health care benefits, including prescription drugs, through a managed care health plan such as our coordinated care plans. Our Medicare Advantage Plans are primarily HMO plans marketed to individuals. A significant portion of our Medicare Advantage customers receive medical care from our value-based models that focus on developing highly engaged physician networks, aligning payment incentives to improved health outcomes and using timely and transparent data sharing.
- ***Medicare Part D Plans*** provide a number of plan options, as well as service and information support, to Medicare and Medicaid eligible customers. Our plans offer the savings of Medicare combined with the flexibility to provide enhanced benefits and a drug list tailored to individuals' specific needs. Eligible beneficiaries benefit from broad network access and value-added services intended to promote wellness and affordability for our eligible beneficiaries.
- ***Medicaid Plans*** provide our low-income customers with the benefit of many of the coordinated care aspects of our Medicare Advantage programs. For customers eligible for both Medicare and Medicaid ("dual eligible") we receive revenue from both the state and the Center for Medicare and Medicaid Services ("CMS").
- ***Medicare Supplement Plans*** provide Medicare-eligible beneficiaries with federally standardized Medigap-style plans. Beneficiaries may select among the various plans with specific plan options to meet their unique needs and may visit, without the need for a referral, any health care professional or facility that accepts Medicare throughout the United States.

Specialty Solutions

- ***Stop-Loss*** insurance coverage is offered to self-insured clients whose group health plans are administered by Cigna. Stop-loss insurance provides reimbursement for claims in excess of a predetermined amount for individuals, the entire group, or both.
- ***Cost-Containment Programs*** are designed to contain the cost of covered health care services and supplies. These programs reduce out-of-network utilization and costs, protect members from balance billing, and educate customers regarding the availability of lower cost in-network services. In addition, under these programs, we negotiate discounts with out-of-network providers, review provider bills and recover overpayments. We charge fees for providing or arranging for these services. These programs may be administered by third-party vendors that have contracted with Cigna.
- ***Consumer Health Engagement*** services are offered to customers covered under plans administered by Cigna or by third-party administrators. These services consist of an array of medical management, disease management and wellness services. Our Medical Management programs include case, specialty and utilization management and a 24-hour nurse information line. Our Health Advocacy program services include early intervention in the treatment of chronic conditions and an array of health and wellness coaching. Additionally, we administer incentives programs designed to encourage customers to engage in health improvement activities.
- ***Pharmacy Management*** services and benefits can be combined with our medical offerings. The comprehensive suite of pharmacy management services available to clients and customers includes benefits management, specialty pharmacy services, clinical solutions, home delivery, and certain medical management services. Cigna's home delivery pharmacy operation along with the Express Scripts PBM, are reported in the Health Services segment and described further there.
- ***Behavioral Health*** services are offered to employers, government entities and other groups sponsoring health benefit plans. These services consist of behavioral health care case management, employee assistance programs ("EAP"), and work/life programs. We focus on integrating our programs and services with medical, pharmacy and disability programs to facilitate customized, holistic care.
- ***Dental*** solutions include dental health maintenance organization plans ("Dental HMO"), dental preferred provider organization ("Dental PPO") plans, exclusive dental provider organization plans, traditional dental indemnity plans and a dental discount program. Employers and other groups can purchase our products on either an insured or self-insured basis as standalone products or in conjunction with medical products. Additionally, individual customers can purchase insured Dental PPO plans as standalone products or in conjunction with individual medical policies.

- ***Vision*** offerings include flexible, cost-effective PPO coverage that includes a range of both in and out-of-network benefits for routine vision services offered in conjunction with our medical and dental product offerings. Our national vision care network includes private practice ophthalmologist and optometrist offices, as well as retail eye care centers.

Funding Solutions

- ***ASO.*** Plan sponsors (i.e., employers, unions and other groups) self-fund all claims, but may purchase stop-loss insurance to limit exposure. We collect fees from plan sponsors for providing access to our participating provider network and for other services and programs including: claims administration; behavioral health services; disease management; utilization management; cost containment; dental; and pharmacy benefit management. Approximately 86% of our commercial medical customers are in ASO arrangements.
- ***Experience-Rated Insurance.*** Premium rates are established at the beginning of a policy period and are typically based on prior claim experience of the policyholder. When claims and expenses are less than the premium charged (an "experience surplus" or "margin"), the policyholder may be credited for a portion of this experience surplus or margin. If claims and expenses exceed the premium charged (an "experience deficit"), we bear these costs. In certain cases, experience deficits incurred while the policy is in effect are accumulated and may be recovered through future policy year experience surpluses or margins. Approximately 6% of commercial medical customers are in experience-rated arrangements.
- ***Guaranteed Cost Insurance.*** Premium rates are established at the beginning of a policy period and, depending on group size, may be based in whole or in part on prior experience of the policyholder or on a pool of similar policyholders. We generally cannot subsequently adjust premiums to reflect actual claim experience until the next annual renewal. The policyholder does not participate, or share in, actual claim experience. We keep any experience surplus or margin if costs are less than the premium charged (subject to minimum medical loss ratio rebate requirements discussed below) and bear the risk for actual costs in excess of the premium charged. Approximately 8% of commercial medical customers are in guaranteed cost arrangements.

In most states, individual and group insurance premium rates must be approved by the applicable state regulatory agency (typically department of insurance) and state or federal laws may restrict or limit the use of rating methods. Premium rates for groups and individuals are subject to state review to determine whether they are adequate, not excessive and not unfairly discriminatory. In addition, the ACA subjects individual and small group policy rate increases above an identified threshold to review by the United States Department of Health and Human Services ("HHS") and requires payment of premium refunds on individual and group medical insurance products if minimum medical loss ratio ("MLR") requirements are not met. The MLR represents the percentage of premiums used to pay medical claims and expenses for activities that improve the quality of care. In our individual business, premiums may also be adjusted as a result of the government risk adjustment program that accounts for the relative health status of our customers. See the "Regulation" section of this Form 10-K for additional information about commercial MLR requirements and risk mitigation programs of the ACA.

Market Segments

- ***Commercial*** comprises employers from the National, Middle Market and Select market segments.
    - ***National.*** Multi-state employers with 5,000 or more U.S.-based, full-time employees. We offer primarily ASO funding solutions in this market segment.
    - ***Middle Market.*** Employers generally with 500 to 4,999 U.S.-based, full-time employees. This segment also includes single-site employers with more than 5,000 employees and Taft-Hartley plans and other groups. We offer ASO, experience-rated and guaranteed cost insured funding solutions in this market segment.
    - ***Select.*** Employers generally with 51-499 eligible employees. We usually offer ASO with stop loss insurance coverage and guaranteed cost insured funding solutions in this market segment.
- ***Individual.*** Consistent with the regulations for Individual ACA compliant plans, we offer these plans only on a guaranteed cost basis in this market segment.
- ***Government*** includes individuals who are Medicare-eligible beneficiaries, as well as employer group sponsored pre- and post-65 retirees. We also have dual-eligible members who receive both Medicare and Medicaid benefits.

Primary Distribution Channels

- ***Brokers.*** Sales representatives distribute our products and services to a broad group of insurance brokers and consultants across the United States.
- ***Direct.*** Cigna sales representatives distribute our products and services directly to employers, unions and other groups or individuals across the United States. Various products may also be sold directly to insurance companies, HMOs and third-party administrators. This may take the form of in-person contact, telephonic or group selling venues.
- ***Private Exchanges.*** We partner with select companies that have created private exchanges where individuals and organizations can acquire health insurance. We actively evaluate private exchange participation opportunities as they emerge in the market, and target our participation to those models that best align with our mission and value proposition.
- ***Public Exchanges.*** Many states have set up public health insurance exchanges for ACA compliant plans on which Cigna may offer individual policies.

Competition

The primary competitive factors affecting our business are quality and cost-effectiveness of service and provider networks; effectiveness of medical care management; products that meet the needs of employers and their employees; total cost management; technology; and effectiveness of marketing and sales. Financial strength, as indicated by ratings issued by nationally recognized rating agencies, is also a competitive factor. Our health advocacy capabilities, holistic approach to consumer engagement, breadth of product offerings, clinical care and medical management capabilities and array of product funding options are competitive advantages. We believe our focus on improving the health, well-being and peace of mind of the customers we serve will allow us to further differentiate ourselves from our competitors.

- ***National Insurers.*** UnitedHealth Group, Aetna (owned by CVS Health), Anthem and Humana compete with us in a variety of products and regions throughout the United States.
- ***Local Healthplans.*** Blue Cross Blue Shield plans, local affiliates of major insurance companies and hospitals, and regional stand-alone managed care and specialty companies compete with us in the states in which we offer managed care products. Additionally, plan sponsors may contract directly with providers.
- ***TPAs.*** Third-party administrators compete with us for ASO business.
- ***Start-ups.*** Recent market entrants Oscar, Bright Health and other health plans seek to disrupt competition primarily in the individual market, in part through technology. Alternative health service models, including consortiums, search for a new approach to obtaining health services.
- ***Dental Insurers.*** Various companies offering primarily dental insurance compete with us on these products.
- ***Specialty Companies.*** Specialty insurance or service companies that offer niche products and services compete with us.

Delivering the Health Care Promise

Cigna's Connected Care strategy engages customers in their health, collaborates with providers to help them improve their performance, and connects customers and providers through aligned health goals, incentives and actionable information to enable better decisions and outcomes. Cigna is committed to developing innovative solutions that span the health care delivery system and can be applied to different types of providers. Currently we have numerous collaborative arrangements with our participating health care providers that reach over 3.6 million customers and are actively developing new arrangements to support our Connected Care strategy.

- ***Accountable Care Program.*** We have over 240 collaborative care arrangements with primary care groups built on the patient-centered medical home and accountable care organization ("ACO") models. Our arrangements span more than 32 states and reach over 2.7 million customers. We are committed to increasing the number of groups over the next several years, with a goal of reaching 280 programs by the end of 2020.
- ***Hospital Quality Program.*** We have contracts with over 500 hospitals with reimbursements tied to quality metrics. We expect to grow this number to over 600 hospitals by the end of 2020.
- ***Specialist Programs.*** We have approximately 250 arrangements with specialist groups in value-based reimbursement arrangements. Our goal is to reach approximately 380 arrangements by the end of 2020. Programs include arrangements with several types of specialist groups around the country including orthopedics, obstetrics and gynecology, cardiology, gastroenterology, oncology, nephrology and neurology. Arrangements include care coordination and episodes of care reimbursements for meeting cost and quality goals.
- ***Independent Practice Associations.*** We have value-based physician engagement models in our Cigna-HealthSpring business that allow physician groups to share financial outcomes with us. The Cigna-HealthSpring clinical model also includes outreach to new and at-risk patients to ensure they are accessing their primary care physician.
- ***Participating Provider Network.*** We provide our customers with an extensive network of participating health care professionals, hospitals and other facilities, pharmacies and providers of health care services and supplies. In most instances, we contract with them directly; however, in some instances, we contract with third parties for access to their provider networks and care management services. In addition, we have entered into strategic alliances with several regional managed care organizations (e.g., Tufts Health Plan, HealthPartners, Inc., Health Alliance Plan and MVP Health Plan) to gain access to their provider networks and discounts.

Technology

Cigna Information Technology supports our ***Go Deeper, Go Local, Go Beyond*** strategy by focusing first and foremost on strong foundational technology services, delivery of a business aligned technology project portfolio and prioritized strategic innovation that creates solutions that differentiate us in the market. Our technology innovation continues to focus on three strategic areas: insights and analytics; digital health; and care delivery and management. Our technology strategy ultimately improves the customer experience, increases engagement and advances population health using data driven insights, utilizing artificial intelligence and machine learning to provide key areas of competitive advantage. Innovation is core to the way we do business and will be a critical factor to our success in the highly dynamic health care industry. Cigna's innovative technology solutions continue to improve affordability and increase personalization: for example the Cigna One Guide® program combines a state-of-the-art digital experience with a human concierge service, and the Cigna SureFit® network allows individual family members to choose their personal care networks consistent with their health needs and provider preferences.

Our business strategy is based upon providing customers with differentiated, easy-to-use, seamless and secure products and solutions that utilize insights from advanced analytics to meet their expectations. We anticipate needs and meet customers where they are, from predicting and preventing chronic diseases, to mining data to reduce payment and claims fraud, to using the data from wearable devices to optimize population health status. In 2018, Cigna advanced its strategic technology leadership position by expanding our digital portfolio with the integration of the Brighter acquisition. Brighter's digital platform for connecting patients with a dental provider, allowing them to review their experience, gain insights to costs and see a dentist's history demonstrates the leadership in the digital engagement of health care customers. We also began the roadmap of leveraging Express Scripts technology value creators. Each of these companies contributes to our business model and strengthens the Cigna portfolio. Further, Cigna will apply the Express Scripts technology toolkit to advance the 360 degree view of the patient through flexible, open and connected solutions. With the combined strengths and capabilities of Cigna and Express Scripts, we see greater opportunities to create novel, highly-tailored customer insights as we mine data and use sophisticated artificial intelligence and machine learning techniques to build better models that help us find solutions to complex questions and improve health care outcomes. We will continue to develop leading data driven solutions such as applying propriety algorithms and machine learning to predict customers that could overdose on prescription opioids.

Data Analytics

Cigna has transformed substantial investments in analytics talent, data infrastructure and machine learning capabilities over the past several years into a closed-loop, self-learning insights system that guides our decision-making and allows us to execute on our strategy. Our "Insights That Matter" analytics process helps our business leaders identify the questions that matter most to our customers and partners while our data science experts focus on answering those questions with innovative methodologies and transform our insights into targeted business actions. We apply advanced analytics across our business and will continue to invest in expanding and strengthening our capabilities to better anticipate, meet and exceed our customers' and partners' expectations.

Health Services

This segment consists of the Express Scripts PBM business beginning December 21, 2018 as well as Cigna's legacy home delivery operations that offer high quality, efficient, and cost-effective mail order, telephone, and on-line pharmaceutical fulfillment services. In 2018, Health Services reported adjusted revenues of $6.6 billion and pre-tax adjusted income from operations of $380 million, including 11 days of Express Scripts results.

How We Win
• **Identifying** products and offering solutions that focus on improving patient outcomes and assist in controlling costs • **Evaluating** medicines for efficacy, value and price to assist clients in selecting a cost-effective formulary • **Offering** home delivery and specialty services that save clients money and provide better care • **Leveraging** purchasing volume to deliver discounts • **Promoting** the use of generics and lower cost brands

The following chart depicts a high level summary of our principal products and services in this segment with definitions on subsequent pages.

Principal Products & Services	*Brands/ Subsidiaries*	*Key Customer(s)*	*Primary Competitors*
Clinical Solutions	RationalMed, ScreenRx, ExpressAlliance, Advanced Opioid Management	Clients, Customers	Independent PBMs, Managed Care PBMs
Value Programs	SafeGuardRx	Clients, Customers, Pharmacies	Independent PBMs, Managed Care PBMs
Specialized Pharmacy Care	Therapeutic Resource Center	Customers	Independent PBMs, Managed Care PBMs, Retail Pharmacies
Home Delivery Pharmacy Services	Tel-Drug, Express Scripts, Therapeutic Resource Centers	Customers	Independent PBMs, Managed Care PBMs, Retail Pharmacies
Specialty Pharmacy Services	Accredo, Freedom Fertility, Tel-Drug	Clients, Customers, Pharmacies	Independent PBMs, Managed Care PBMs, Retail Pharmacies
Retail Network Pharmacy Administration	Express Scripts	Clients, Customers	Independent PBMs, Managed Care PBMs
Benefit Design Consultation	Express Scripts	Clients	Independent PBMs, Managed Care PBMs, Third-Party Benefit Administrators
Drug Utilization Review	Express Scripts	Clients, Customers	Independent PBMs, Managed Care PBMs, Third-Party Benefit Administrators
Drug Formulary Management	Express Scripts	Clients	Independent PBMs, Managed Care PBMs
Drug Claim Adjudication	Express Scripts	Clients	Independent PBMs, Managed Care PBMs, Third-Party Benefit Administrators
Administration of Group Purchasing Organizations ("GPO")	Econdisc, ValoremRx	Clients, Pharmacies	Group Purchasing Organizations
Prescription Card	Inside Rx	Customers	Retail Pharmacies, Discount Programs

Principal Products & Services	*Brands/ Subsidiaries*	*Key Customer(s)*	*Primary Competitors*
Digital Consumer Health and Drug Information	Express Scripts	Customers	Independent PBMs, Managed Care PBMs, Retail Pharmacies
Provider Services	CuraScript Specialty Distribution	Healthcare Providers, Clinics, Hospitals	Specialty drug distributors
Medical Benefit Management Services	eviCore, CareContinuum	Health Plans, Commercial and Government Payors	Health Plans, Third-Party Benefits Administrators, Clinical Solutions and Health Care Data Analytics Companies

Principal Products & Services

Pharmacy Benefit Management Services. Our PBM services drive high quality, cost-effective pharmaceutical care through prescription drug utilization and cost management. We consult with clients to assist in selecting plan design features that balance their requirements for cost control with customer choice and convenience. We focus our solutions to enable better decisions in four important, interrelated areas: benefit choices, drug choices, pharmacy choices and health choices. As a result, we believe we deliver better outcomes, higher customer satisfaction and a more affordable prescription drug benefit. As of December 31, 2018, we operated four high-volume automated dispensing home delivery pharmacies, five non-dispensing prescription processing centers, five customer contact centers, seven specialty home delivery pharmacies, 20 specialty branch pharmacies and eight specialty nursing offices.

- ***Clinical Solutions.*** We offer innovative clinical programs to drive better health outcomes at a lower cost by identifying and addressing unsafe, ineffective and wasteful prescribing; dispensing and utilization of prescription drugs; and intervening with, or supporting interventions with, physicians, pharmacies and customers.
    - RationalMed® evaluates medical, pharmacy and laboratory data to detect critical customer health and safety risks that are addressed through timely notice to physicians, pharmacies, customers and case managers.
    - ScreenRx® uses proprietary predictive models to detect customers at risk for nonadherence and proactively address the problem through customized interventions for each individual customer.

- Express*Alliance*® offers customer care coordination services that enable customer-authorized health care professionals to share a common view of a customer's health record and coordinate customer outreach and counseling.
- Advanced Opioid Management℠ works comprehensively with customers, prescribers and pharmacies to minimize early exposure to opioids while helping prevent progression to overuse and abuse.

Other solutions include Total Performance Management, Concurrent Drug Utilization Review, Advanced Utilization Management, Medication Therapy Management, Digital Report Monitoring and Fraud, Waste and Abuse.

- ***Express Scripts SafeGuardRx®.*** We are the industry leader in offering a suite of solutions aimed at therapy classes that pose significant budgetary threats and clinical challenges to patients. Our solutions are designed to keep our clients ahead of the cost curve while providing customers the personalized care and access they need. These solutions are offered throughout our PBM services and include, but are not limited to: Pulmonary Care Value Program℠; Multiple Sclerosis Care Value Program℠; Inflammatory Conditions Care Value Program℠; Diabetes Care Value Program℠; Hepatitis Cure Value Program®; Cholesterol Care Value Program®; Oncology Care Value Program®; Market Events Protection Program®; and Inflation Protection Program℠. Innovative programs, such as Express Scripts SafeGuardRx, combine utilization management controls with formulary management, the specialized care model of our Therapeutic Resource Center® program (described below) and comprehensive guarantees, and help us to change the market in key specialty categories. Notably, our programs covering oncology and inflammatory conditions have introduced a value-based contracting approach, with payments now tied to a product's effectiveness.
- ***Specialized Pharmacy Care.*** At the center of Express Scripts' condition-specific approach to care are Therapeutic Resource Center services, which are pharmacy practices specializing in caring for customers with the most complex and costly chronic conditions including cardiovascular disease, diabetes, cancer, HIV, asthma, depression and other rare and specialty conditions. Our Therapeutic Resource Center services are designed to optimize the safe and appropriate dispensing of therapeutic agents, minimize waste, and improve clinical and financial outcomes. Through our Therapeutic Resource Center services, specialist pharmacists provide the expert, personalized care that customers increasingly demand.
- ***Home Delivery Pharmacy Services.*** In addition to the order processing that occurs at these home delivery pharmacies, we operate several non-dispensing prescription processing facilities and customer contact centers. Our pharmacies provide greater safety and accuracy than retail pharmacies, convenient access to maintenance medications, and better management of our clients' drug costs through operating efficiencies. We are directly involved with the prescriber and customer through our home delivery pharmacies, and our research shows that we achieve a higher level of generic substitutions, therapeutic interventions and better adherence than is achieved through retail pharmacy networks.
- ***Specialty Pharmacy Services.*** Specialty medications are used primarily for the treatment of complex diseases. These medications are broadly characterized to include those with frequent dosing adjustments, intensive clinical monitoring, the need for customer training, specialized product administration requirements and/or medications limited to certain specialty pharmacy networks by manufacturers. Through a combination of assets and capabilities, we provide an enhanced level of personalized care and therapy management for customers taking specialty medications, increased visibility and improved outcomes for payors, as well as custom programs for biopharmaceutical manufacturers.
  - Accredo Health Group ("Accredo") is focused on dispensing injectable, infused, oral or inhaled drugs that require a higher level of clinical service and support than traditional pharmacies typically offer.
  - Accredo achieves better outcomes for customers and reduces waste for clients through specialty trained clinicians, a nationwide footprint, a network of in-home nursing services, reimbursement and customer assistance programs, and biopharmaceutical services.
  - Our subsidiary Freedom Fertility is a leading specialty pharmacy focused on the needs of fertility customers and providers. Through Freedom Fertility, we provide insurance assistance, customer education, and support.
  - Our subsidiary Care Continuum provides medical benefit drug management services that enable greater oversight of our clients' specialty spend billed through the medical benefit designed to ultimately make specialty drugs more affordable and accessible.
- ***Retail Network Pharmacy Administration.*** We contract with retail pharmacies to provide prescription drugs to customers of the pharmacy benefit plans we manage. In the United States, Puerto Rico and the Virgin Islands, we negotiate with pharmacies to discount drug prices provided to customers and manage national and regional networks responsive to client preferences related to cost containment, convenience of access for customers and network performance. We also manage networks of pharmacies customized for or under direct contract with specific clients and have contracted with pharmacy provider networks to comply with CMS access requirements for the federal Medicare Part D Prescription Drug Program ("Medicare Part D"). All retail pharmacies in our network communicate with us online and in real-time to process prescription drug claims. When a plan member presents their identification card at a network pharmacy, the network pharmacist sends specific member, prescriber and prescription information in an industry-standard format through our systems, which process the claim and respond to the pharmacy with relevant information to process the prescription.
- ***Benefit Design Consultation.*** We consult with our clients on how best to structure and leverage the pharmacy benefit to meet plan objectives for affordable access to the prescription medications people need to stay healthy, and ensure the safe and effective use of those medications.
- ***Drug Utilization Review.*** When prescriptions are presented to our pharmacies or submitted for coverage, we review them electronically and systematically in real-time for safety and effectiveness. We then alert the dispensing pharmacy to detected issues. Issues not adequately addressed at the time of dispensing may also be communicated to the prescriber retrospectively.
- ***Drug Formulary Management.*** Formularies are lists of drugs with designations that may be used to determine drug coverage, customer out-of-pocket costs, and communicate plan preferences in competitive drug categories. Our formulary management services support clients

in establishing formularies that assist customers and physicians in choosing clinically appropriate, cost-effective drugs and prioritize access, safety and affordability. We administer specific formularies on behalf of our clients, including standard formularies developed and offered by Express Scripts and custom formularies in which we play a more limited role. Most of our clients select standard formularies, governed by our National Pharmacy & Therapeutics Committee (the "P&T Committee") that comprises a panel of independent physicians and pharmacists in active clinical practice representing a variety of specialties and practice settings, typically with major academic affiliations. In making formulary recommendations, the P&T Committee considers only the drug's safety and efficacy and not the cost of the drug, including any negotiated manufacturer discount or rebate arrangement. This process is designed to ensure the clinical recommendation is not affected by our financial arrangements. We fully comply with the P&T Committee's clinical recommendations regarding drugs that must be included or excluded from the formulary based on their assessment of safety and efficacy.

- ***Drug Claim Adjudication.*** We process drug claims for home delivery or retail networks through integration of retail network pharmacy administration, benefit design consultation, drug utilization review, drug formulary management and pharmacy fulfillment services. We administer payments to retail networks and bill benefits costs to our clients through our end-to-end adjudication services.
- ***Inside Rx.*** The Inside Rx program delivers broad and affordable access to medication for the uninsured and those navigating the changing health care landscape. Inside Rx partners with participating retail pharmacies and major pharmaceutical companies to provide discounts, via a discount card for customers who would otherwise pay full list price for prescription medications. This program works collaboratively across the pharmacy supply chain with a shared focus to ensure customers have affordable access to medication they need. Inside Rx also provides access to pet prescriptions via our home delivery pharmacy services.
- ***Administration of a Group Purchasing Organization.*** We operate a group purchasing organization ("GPO") that negotiates pricing for the purchase of pharmaceuticals from pharmaceutical manufacturers and suppliers. We also provide various administrative services to GPO participants including negotiation and management of the GPO purchasing contracts. Express Scripts' GPO is a member of the GPO of Walgreens Boots Alliance Development GmbH.
- ***Digital Consumer Health and Drug Information.*** We empower customer decision-making through online and mobile tools that help customers make informed drug, pharmacy and health choices. Information included on our website and mobile application are not part of this annual report.
- ***Provider Services.*** CuraScript Specialty Distribution ("CSD") is a specialty distributor of pharmaceuticals and medical supplies (including injectable and infusible pharmaceuticals and medications to treat specialty and rare or orphan diseases) directly to health care providers, clinics and hospitals in the United States for office or clinic administration. Through our CSD business, we provide distribution services primarily to office and clinic-based physicians who treat customers with chronic diseases and regularly order costly specialty pharmaceuticals. CSD provides competitive pricing on pharmaceuticals and medical supplies, operates three distribution centers, and ships most products overnight within the United States; CSD also provides distribution capabilities to Puerto Rico and Guam. CSD is a contracted supplier with most major group purchasing organizations and leverages our distribution platform to operate as a third-party logistics provider for several pharmaceutical companies.
- ***Medical Benefit Management Services.*** eviCore is a leading provider of integrated medical benefit management solutions that focus on driving adherence to evidence-based guidelines, improving the quality of customer outcomes and reducing the cost of care for our clients. eviCore manages medical benefits in categories including radiology, cardiology, musculoskeletal disorders, sleep disorders, post-acute care, genetic lab, specialty pharmacy and medical oncology. eviCore contracts with health plans and other commercial and governmental payors to promote the appropriate use of health care services and contracts. In certain instances, this occurs through capitated risk arrangements, where we assume the financial obligation for the cost of health care services provided to eligible customers covered by eviCore's health care management programs.

Customers

- ***Clients.*** We provide services to managed care organizations, health insurers, third-party administrators, employers, union-sponsored benefit plans, workers' compensation plans, government health programs, providers, clinics, hospitals and others.
- ***Customers.*** Prescription drugs are dispensed to customers of the clients we serve primarily through networks of retail pharmacies under non-exclusive contracts with us and through our home delivery fulfillment pharmacies, specialty drug fulfillment pharmacies and fertility fulfillment pharmacies.

Our key customers include the United States Department of Defense ("DoD") and Anthem. The DoD's TRICARE Pharmacy Program is the military health care program serving active-duty service customers, National Guard and Reserve customers, and retirees, as well as their dependents. Under our DoD contract, we provide online claims adjudication, home delivery services, specialty pharmacy clinical services, claims processing and contact center support and other services critical to managing pharmacy trend.

On January 30, 2019, Anthem exercised its right to early terminate their pharmacy benefit management services agreement with us, effective March 1, 2019. There is a twelve-month transition period ending March 1, 2020. It is expected that the transition of Anthem's customers will occur at various dates, as informed by Anthem's technology platform migration schedule. Over the next twelve months, we will focus on an effective transition of this relationship and related services over Anthem's accelerated timeline. For further discussion of our Anthem relationship, see the "Executive Summary — Key Transactions and Developments" section of our MD&A located in Part II, Item 7 of the Form 10-K.

Competition

The health care industry has undergone periods of substantial consolidation and may continue to consolidate in the future. We believe the primary competitive factors in the industry include the ability to: negotiate with retail pharmacies to ensure our home delivery pharmacy and retail pharmacy networks meet the needs of our clients and customers; negotiate discounts and rebates on prescription drugs with drug manufacturers; navigate the complexities of government-reimbursed business including Medicare, Medicaid and the Public Exchanges; manage cost and quality of specialty drugs; use the information we obtain about drug utilization patterns and consumer behavior to reduce costs for our clients and customers; and the level of service we provide.

- ***Independent PBMs.*** MedImpact and Navitus Health Solutions compete with us on a variety of products and in various regions throughout the United States.
- ***Managed Care PBMs.*** Aetna Inc. (owned by CVS Health Corporation), Humana, OptumRx (owned by UnitedHealth Group) and Prime Therapeutics (owned by a collection of Blue Cross / Blue Shield Plans) compete with us on a variety of products and in various regions throughout the United States.
- ***Retail Pharmacies.*** CVS Caremark (owned by CVS Health) and Envision Rx (owned by Rite Aid). Wal-Mart Stores, Inc. engages in certain activities competitive with PBMs.
- ***Third-Party Benefits Administrators.*** Third parties that specialize in claim adjudication and benefit administration, such as Argus, are direct competitors. With the emergence of alternative benefit models through Private Exchanges, the competitive landscape also includes brokers, health plans and consultants. Some of these competitors may have greater financial, marketing and technological resources than we do and new market entrants, including strategic alliances aimed at modifying the current health care delivery models or entering the prescription drug sector from another sector of the health care industry, may increase competitiveness as barriers to entry are relatively low.
- ***Clinical Solutions and Health Care Data Analytics Companies.*** Optum (owned by UnitedHealth Group), Anthem, Inc., Magellan Health, HealthHelp, Cotiviti, and Inovalon are among the companies that compete with us in this market.

Quality

- ***Sales and Account Management.*** Our sales and account management teams market and sell PBM solutions and are supported by client service representatives, clinical pharmacy managers and benefit analysis consultants. These teams work with clients to develop innovative strategies that put medicine within reach of customers while helping health benefit providers improve access to and affordability of prescription drugs.
- ***Supply Chain.*** Our supply chain contracting and strategy teams negotiate and manage pharmacy network contracts, pharmaceutical and wholesaler purchasing contracts, and manufacturer rebate contracts. As our clients continue to experience increased cost trends, our supply chain teams develop innovative solutions such as Express Scripts SafeGuardRx and narrow networks to combat these price increases. In addition, our Formulary Consulting team, consisting of pharmacists and financial analysts, provides services to our clients to support formulary decisions, benefit design consultation and utilization management programs.
- ***Clinical Support.*** Our staff of highly trained health care professionals provides clinical support for our PBM and medical benefit management services, including more specialized care for customers with select chronic and complex conditions. We operate condition-specific Therapeutic Resource Center facilities staffed with specialist pharmacists, nurses and other clinicians who provide personal and specialized customer care. Our clinical solutions staff of pharmacists and physicians provides clinical development and operational support for our PBM services. These health care professionals conduct a wide range of activities including identifying emerging medication-related safety issues and alerting physicians, clients, and customers (as appropriate); providing drug information services; managing formulary; and developing utilization management, safety (drug utilization review) and other clinical interventions.
- ***Research and Analytics.*** Our research and analytics team conducts timely, rigorous and objective research that supports evidence-based pharmacy benefit management and evaluates the clinical, economic and individual impact of pharmacy benefits. They also use predictive modeling, machine learning and other analytical tools to develop and improve our products and services. The team also produces the Express Scripts Drug Trend Report, which examines trends in pharmaceutical utilization and cost, the factors triggering those trends and new solutions our clients can implement to control their pharmacy spend while improving the health of their customers.

Technology

Our technology team supports the various management information systems essential to our operations including the pharmacy and medical benefit claims processing systems and specialty pharmacy systems, while seeking opportunities to optimize our technology solutions by consolidating and upgrading our technology platforms.

Uninterrupted point-of-sale electronic retail pharmacy claims processing is a significant operational requirement for our business. Claims in the United States are processed through systems managed and operated domestically by internal resources and an outsourced vendor. We believe we have substantial capacity for growth in our United States claims processing facilities.

We leverage outsourced vendor services to provide certain disaster recovery services for systems located at our data centers. For systems not covered by a third-party vendor arrangement, such as our specialty pharmacy data centers, our corporate disaster recovery organization manages internal recovery services.

Express Scripts is proud of its commitment to innovation in the field of health care. Express Scripts innovations improve patient outcomes while eliminating waste in the health care system. Express Scripts Holding Company and its affiliated companies (individually and/or collectively "Express Scripts") hold more than 170 United States patents. We use these patents to protect our proprietary technological advances.

Our technology platform allows us to safely, rapidly, and accurately adjudicate 1.4 billion adjusted prescriptions annually. Our technology helps retail pharmacies focus on patient care, and our real-time safety checks help avoid hundreds of thousands of medication errors annually. Technology is the backbone to all of our solutions – from our provider-focused advances that improve e-prescribing and electronic prior authorization – to our patient-friendly app and website interfaces, and our continued investments provide an easier, more efficient experience with all of our partners.

Our formulary strategy and our SafeGuardRx program are also rooted in technology that applies our deep pharmacy expertise and data insights more rapidly and comprehensively to drive better clinical and financial outcomes for clients and patients.

Our Health Services business owns and has registered certain trade and service marks with the United States Patent and Trademark Office, including but not limited to the following marks: EXPRESS SCRIPTS®, MEDCO®, ACCREDO®, CURASCRIPTSD®, EVICORE HEALTHCARE®, FREEDOM FERTILITY PHARMACY®, RATIONALMED®, SCREENRX®, EXPRESSALLIANCE®, THERAPEUTIC RESOURCE CENTER®, ADVANCED OPIOID MANAGEMENT℠, SAFEGUARDRX®, CHOLESTEROL CARE VALUE℠, HEPATITIS CURE VALUE℠, MARKET EVENTS PROTECTION℠, ONCOLOGY CARE VALUES℠, DIABETES CARE VALUE℠, INFLAMMATORY CONDITIONS CARE VALUE℠, INFLATION PROTECTION℠, PULMONARY CARE VALUE℠, MULTIPLE SCLEROSIS CARE VALUE℠, and INSIDE RX®.

We also hold a portfolio of patents and pending patent applications. We are not substantially dependent on any single patent or group of related patents.

Suppliers

We maintain an inventory of brand name and generic pharmaceuticals in our home delivery and specialty pharmacies. Our specialty pharmacies also carry biopharmaceutical products to meet the needs of our customers, including pharmaceuticals for the treatment of rare or chronic diseases; if a drug is not in our inventory, we can generally obtain it from a supplier within one business day.

We purchase pharmaceuticals either directly from manufacturers or through authorized wholesalers. Express Scripts uses one wholesaler more than others in the industry, but holds contracts with other wholesalers if needs for an alternate source arise and believes alternative supply is readily available should it be needed. Generic pharmaceuticals are generally purchased directly from manufacturers.

Industry Developments

See the "Industry Developments" section of the MD&A in this Form 10-K beginning on page 47 for discussion of key industry developments impacting this segment.

International Markets

Cigna's International Markets segment has operations in over 30 countries or jurisdictions providing a full range of comprehensive medical and supplemental health, life, and accident benefits to individuals and employers. Products and services include comprehensive health coverage, hospitalization, dental, critical illness, personal accident, term life, and variable universal life. In 2018, International Markets reported adjusted revenues of $5.4 billion and pre-tax adjusted income from operations of $735 million.

How We Win

- Broad range of health and protection related solutions to meet the needs of the growing middle class and globally mobile
- Leveraging deep consumer insights to drive product and service innovation
- Leading innovative, direct to consumer distribution capabilities
- Access to quality, affordable care through one of the **largest global provider networks**
- Locally licensed and **compliant** solutions managed by **strong, locally developed talent**

Demand for our products and services is underpinned by the growing global middle class, aging populations, increasing prevalence of chronic conditions, and rising global health care costs. Our focus on product and service innovation means we continue to deliver solutions that meet the evolving needs of individual and group customers. Our distribution channels and funding sources range by product, customer, and geography.

International Markets is well-positioned to address the growing demand for access to quality, affordable care and supplemental health and life protection that fill gaps in public and private care. We distinguish ourselves through differentiated direct-to-consumer distribution, customer insights, product innovation, a leading provider network, and compliant solutions. We identify and pursue attractive market opportunities to bring health and protection solutions and tailor those solutions to the market and customer needs. Over the past several years, we have

extended our product offerings and geographic reach. The chart below provides a high-level summary of our Principal Products and Services in this segment as of year-end, with definitions on subsequent pages.

Principal Products & Services	*Major Brand(s)*	*Geography*	*Funding Solution(s)*	*Key Customer(s)*	*Primary Distribution Channel(s)*	*Primary Competitors*
Global Health Care	Cigna Global Health Benefits Cigna Global IPMI	Worldwide	Experience-rated, Guaranteed Cost, ASO	Multinational Companies, Inter-governmental and Non-governmental Organizations Globally mobile individuals	Brokers, Agents, Direct-to-Consumer	Global insurers
Local Health Care	Cigna CignaTTK CignaCMB	United Kingdom, Spain, Hong Kong, India, China	Experience-rated, Guaranteed Cost, ASO	Employer Groups Individuals	Brokers, Agents, Direct-to-Consumer	Global insurers
Supplemental Health, Life, & Accident	Cigna LINA Korea CignaCMB CignaTTK CignaFinans	Asia Pacific, India, Turkey	Guaranteed Cost	Individuals	Affinity, Bancassurance, Brokers, Agents, Direct-to-Consumer	Global and local foreign insurers

Principal Products & Services

Global Health Care products and services include insurance and administrative services for medical, dental, pharmacy, vision, and life, accidental death and dismemberment, and disability risks. We are leading providers of products and services that meet the needs of multi-national employers, intergovernmental and non-governmental organizations and globally mobile individuals with a focus on keeping employees healthy and productive. The employer benefits products and services are offered through guaranteed cost, experience-rated, and administrative services only funding solutions, while individuals purchase guaranteed cost (insured) coverage. For definitions of funding solutions, see "Funding Solutions" in the "Integrated Medical" description of business section on page 6 of this Form 10-K.

Local Health Care products and services include medical, dental, pharmacy, and vision as well as life coverage. The customers of local health care businesses are employers and individuals located in specific countries where the products and services are purchased. These employer services can similarly be funded through a range of options and individuals purchase on a guaranteed cost basis.

Supplemental Health, Life and Accident Insurance products and services generally provide simple, affordable coverage of risks for the health and financial security of individuals. Supplemental health products provide specified payments for a variety of health risks and include personal accident, accidental death, critical illness, hospitalization, travel, dental, cancer and other dread disease coverages. We also offer customers term and variable universal life insurance and certain savings products in select markets.

Competition

We anticipate that the competitive environment will intensify as insurance and financial services providers more aggressively pursue expansion opportunities across geographies, particularly Asia. We believe competitive factors will include speed-to-market, customer insights, branding, product, distribution and service innovation, underwriting and pricing, efficient management of marketing and operating processes, commission levels paid to distribution partners, the quality of claims, network coverage and medical cost management, and talent acquisition and retention. Additionally, in most overseas markets, perception of commitment to the market and financial strength will likely be an important competitive factor.

Pricing and Reinsurance

Premium rates and fees for our global and local health care products reflect assumptions about future claims, expenses, customer demographics, investment returns, and profit margins. For products using networks of contracted health care professionals and facilities, premiums reflect assumptions about the impact of these contracts and utilization management on future claims. Most contracts permit rate changes at least annually.

The profitability of health care products is dependent upon the accuracy of projections for health care inflation (unit cost, location of delivery of care, currency of incurral and utilization), customer demographics, the adequacy of fees charged for administration and effective medical cost management.

Premium rates for our supplemental benefits products are based on assumptions about mortality, morbidity, customer acquisition and retention, customer demographics, expenses and capital requirements, as well as interest rates. Variable universal life insurance products fees consist of mortality, administrative, asset management and surrender charges assessed against the contract holder's fund balance. Mortality charges on variable universal life may be adjusted prospectively to reflect expected mortality experience. Most contracts permit premium rate changes at least annually.

A global approach to underwriting risk management allows each local business to underwrite and accept risk within specified limits. Retentions are centrally managed through cost effective use of external reinsurance to limit our liability on per life, per risk and per event (catastrophe) bases.

Industry Developments and Other Items Affecting International Markets

South Korea represents our single largest geographic market for International Markets. For information on this concentration of risk for the International Markets segment's business in South Korea. see "Other Items Affecting Results of International Markets" in the International Markets section of the MD&A beginning on page 59 of this Form 10-K.

Pressure on social health care systems, a rapidly aging population and increased wealth and education in developing insurance markets are leading to higher demand for health insurance and financial security products. In the supplemental health, life and accident business, direct marketing channels continue to grow and attract new competitors with industry consolidation among financial institutions and other affinity partners.

Data privacy regulation has tightened in all markets in the wake of data privacy news scandals, impacting affinity partner and customer attitudes toward direct marketing of insurance and other financial services.

Group Disability and Other

As explained further in the introduction to this Form 10-K, Group Disability and Other consists of our Group Disability and Life operating segment, along with COLI and certain run-off businesses reported together in Other Operations. In 2018, Group Disability and Other reported adjusted revenues of $5.1 billion and pre-tax adjusted income from operations of $529 million.

How We Win

- **Disability absence management model** that reduces overall costs to employers
- **Integration** of disability products **with medical and specialty offerings,** promoting health and wellness and optimizing employee productivity
- **Complementary portfolio** of group disability, life and accident offerings
- **Disciplined underwriting, pricing and investment strategies** supporting profitable long-term growth

Group Disability and Life

Our Group Disability and Life operating segment includes our commercial long- and short-term disability products, and our term life and universal life group insurance products. We also offer personal accident insurance and voluntary products and services. These products and services are distributed through brokers and direct sales and are available in fully-insured, experience-rated and ASO arrangements. The following chart depicts a high-level summary of our Principal Products and Services in this segment as of year-end, with definitions on subsequent pages.

Principal Products & Services	Payee	Premium Rates	Funding Solution(s)	Market Segment(s)	Primary Distribution Channel(s)	Primary Competitors
			Group Disability			
Long-term Disability	Employer, Employee	Preset, guaranteed	Experience-rated Insured, Guaranteed Cost Insured, ASO	Commercial	Brokers, Direct	National Insurers, Regional Insurers
Short-term Disability	Employer, Employee	Preset, guaranteed	Experience-rated Insured, Guaranteed Cost Insured, ASO	Commercial	Brokers, Direct	National Insurers, Regional Insurers
			Group Life			
Term Life	Employer, Employee	Preset, guaranteed	Experience-rated Insured, Guaranteed Cost Insured	Commercial	Brokers, Direct	National Insurers, Regional Insurers
Universal Life	Employee	Preset, guaranteed	Experience-rated Insured, Guaranteed Cost Insured	Commercial	Brokers, Direct	National Insurers, Regional Insurers
			Group Accident and Voluntary			
Personal Accident Insurance	Employer, Employee	Preset, guaranteed	Experience-rated Insured, Guaranteed Cost Insured	Commercial	Brokers, Direct	National Insurers, Regional Insurers
Voluntary Products and Services	Employee	Preset, guaranteed	Guaranteed Cost Insured	Commercial	Brokers, Direct	National Insurers, Regional Insurers

Principal Products & Services

Group Disability

- ***Group Long-term and Short-term Disability*** insurance products generally provide a fixed level of income to replace a portion of wages lost due to disability. As part of our group disability insurance products, we also assist employees in returning to work and employers with

resources to manage the cost of employee disability. We are an industry leader in helping employees return to work quickly, enabling higher productivity and lower cost for employers and a better quality of life for employees. While we offer this coverage in all three funding arrangements, most of our coverages are guaranteed cost.

- ***Leave Administration*** solutions help customers effectively manage workforce absence and provide coverage for paid leave. We integrate the administration of our disability insurance products with other disability benefit programs, behavioral programs, medical programs, social security advocacy and administration of the federal Family and Medical Leave Act ("FMLA"), State Leave laws and other leave-of-absence programs. We believe this integration supports greater efficiency and effectiveness in disability claims management, enhances productivity and reduces overall costs to employers. Integration also provides early insight into employees at risk for future disability claims. Coordinating the administration of these disability programs with programs offered by our medical business provides enhanced opportunities to influence outcomes, reduce the cost of both medical and disability events and improve the return-to-work rate.

Group Life Insurance

- ***Group Term Life*** insurance may be employer-paid basic life insurance, employee-paid supplemental life insurance or a combination thereof.
- ***Group Universal Life*** insurance is a voluntary life insurance product in which the owner may accumulate a cash value. The cash value earns interest at rates declared from time to time, subject to a minimum guaranteed contracted rate, and may be borrowed, withdrawn, or, within certain limits, used to fund future life insurance coverage.

Other Products and Services

- ***Personal Accident Insurance*** coverage consists primarily of accidental death and dismemberment and travel accident insurance to employers.
- ***Specialty Insurance Services*** consist of disability and life, accident and hospital indemnity products to professional or trade associations and financial institutions.
- ***Voluntary Products and Services*** include plans that provide employers with administrative solutions designed to provide a complete and simple way to manage their benefits program. These voluntary offerings include accidental injury insurance, critical illness coverage and hospital care coverage, and provide additional dollar payouts to employees for unexpected accidents, hospitalization or more serious illnesses.

Pricing and Reinsurance

Premiums charged for disability and term life insurance products are usually established in advance of the policy period, are generally guaranteed for one to three years, but selectively guaranteed for up to five years. Policies are generally subject to termination by the policyholder or by the insurance company annually. Premium rates reflect assumptions about future claims, expenses, credit risk, investment returns and profit margins. These assumptions may be based in whole or in part on prior experience of the account or on a pool of accounts, depending on the group size and the statistical credibility of the experience that varies by product.

Premiums for group universal life insurance products consist of mortality and administrative charges assessed against the policyholder's fund balance. Interest credited and mortality charges for group universal life may be adjusted prospectively to reflect expected interest and mortality experience. Mortality charges are subject to maximum guaranteed rates and interest credited on cash values is subject to minimum guaranteed rates as stated in the policy.

The premiums for these products are typically collected within the coverage year and then invested in assets that match the duration of the expected benefit payments that occur over many future years (primarily for disability benefits). With significant investments in longer-duration securities, net investment income is a critical element of profitability for this segment.

The effectiveness of return-to-work programs and morbidity levels will impact the profitability of disability insurance products. Our claim experience and industry data indicate a correlation between disability claim incidence levels and economic conditions, with submitted claims rising under adverse economic conditions, although the extent of this impact is unclear. For life insurance products, the degree to which future experience deviates from mortality and expense assumptions also affects profitability.

To reduce our exposure to large individual and catastrophic losses under group life, disability and accidental death policies, as well as our more recent accidental injury and critical illness policies, we purchase reinsurance from a diverse group of unaffiliated reinsurers. Our comprehensive reinsurance program consists of excess of loss treaties and catastrophe coverage designed to mitigate earnings volatility and provide surplus protection.

Market Segments

- ***Commercial.*** Commercial Market Segments are comprised of National, Middle Market and Select.
    - ***National.*** Multi-state employers with 5,000 or more U.S.-based, full-time employees.
    - ***Middle Market.*** Employers generally with 250 to 4,999 U.S.-based, full-time employees.
    - ***Select.*** Employers generally with up to 249 eligible employees.

Primary Distribution Channels

- ***Insurance Broker and Consultants.*** Sales representatives distribute our products and services to a broad group of insurance brokers and consultants across the United States.

- ***Direct.*** Sales representatives distribute our products and services directly to employers, unions and other groups or individuals across the United States. This may take the form of in-person contact, telephonic or group selling venues.

Competition

The principal competitive factors that affect the Group Disability and Life segment are underwriting and pricing, the quality and effectiveness of claims management, relative operating efficiency, investment and risk management, distribution methodologies and producer relations, the breadth and variety of products and services offered, the quality of customer service and, more importantly, the state of the tools and technology available for customers, clients, consultants and producers. For certain products with longer-term liabilities, such as group long-term disability insurance, the financial strength of the insurer, as indicated by ratings issued by nationally recognized rating agencies, is also a competitive factor.

- ***National Insurers.*** Unum, The Hartford, Prudential, Lincoln and MetLife compete with us on a variety of products and regions throughout the United States.

Industry Developments

Employers have expressed a growing interest in employee wellness, absence management and productivity, and recognize a strong link between employee health productivity and profitability. As this interest grows, we believe our healthy lifestyle and return-to-work programs and integrated family medical leave, disability and health care programs position us to deliver integrated solutions for employers and employees. Our strong disability management portfolio and fully integrated programs also provide tools for employers and employees to improve health status. Our focus on managing employees' total absence enables us to increase the number and effectiveness of interventions and minimize disabling events.

The group insurance market remains highly competitive as the rising cost of medical coverage has forced companies to re-evaluate their overall employee benefit spending, resulting in lower volumes of group disability and life insurance business and more competitive pricing. Demographic shifts have further driven demand for products and services that are sufficiently flexible to meet the evolving needs of employers and employees who want innovative, cost-effective insurance solutions, and employers continue to move towards greater employee participatory coverage and voluntary purchases. As the market becomes more retail-focused, our broad suite of voluntary offerings and continued focus on developing additional voluntary products and service capabilities positions us well to meet the needs of both employers and employees.

Over the past few years, there has been heightened review by state regulators of the claims handling practices within the disability and life insurance industry. This has resulted in an increase in coordinated, multi-state examinations that target specific market practices in addition to regularly recurring examinations of an insurer's overall operations conducted by an individual state's regulators. We have been subject to such an examination over the past several years. See Note 19D. to our Consolidated Financial Statements for additional information.

The lower level of interest rates in the United States over the last several years has constrained earnings growth in this segment due to lower yields on our fixed-income investments and higher benefit expenses resulting from the discounting of future claim payments at lower interest rates.

Other Operations

Other Operations includes the following:

Corporate-owned Life Insurance

The principal products of the COLI business are permanent insurance contracts sold to corporations to provide coverage on the lives of certain employees for the purpose of financing employer-paid future benefit obligations. Permanent life insurance provides coverage that, when adequately funded, does not expire after a term of years. The contracts are primarily non-participating universal life policies. Fees for universal life insurance products consist primarily of mortality and administrative charges assessed against the policyholder's fund balance. Interest credited and mortality charges for universal life and mortality charges on variable universal life may be adjusted prospectively to reflect expected interest and mortality experience. To reduce our exposure to large individual and catastrophe losses, we purchase reinsurance from unaffiliated reinsurers.

Run-off Settlement Annuity Business

Our settlement annuity business is a closed, run-off block of single premium annuity contracts. These contracts are primarily liability settlements with approximately 20% of the liabilities associated with guaranteed payments not contingent on survivorship. Non-guaranteed payments are contingent on the survival of one or more parties involved in the settlement.

Run-off Reinsurance

Our reinsurance operations are an inactive business in run-off.

In February 2013, we effectively exited the guaranteed minimum death benefit ("GMDB") and guaranteed minimum income benefit ("GMIB") business by reinsuring 100% of our future exposures, net of retrocessional arrangements in place at that time, up to a specified limit. For additional information regarding this reinsurance transaction and the arrangements that secure our reinsurance recoverables, see Note 8 to our Consolidated Financial Statements.

Individual Life Insurance and Annuity and Retirement Benefits Businesses

This business includes deferred gains recognized from the 1998 sale of the individual life insurance and annuity business and the 2004 sale of the retirement benefits business. For more information regarding the arrangements that secure our reinsurance recoverables for the retirement benefits business, see Note 8 to our Consolidated Financial Statements.

Certain International Run-off Businesses

Certain European, Middle Eastern and Canadian operations are in run-off and included in Other Operations.

Investment Management

General Accounts

Our investment operations provide investment management and related services for our corporate invested assets and the insurance-related invested assets in our General Account ("General Account Invested Assets"). We acquire or originate, directly or through intermediaries, a broad range of investments including private placement and public securities, commercial mortgage loans, real estate, mezzanine, private equity partnerships and short-term investments. Invested assets also include policy loans that are fully collateralized by insurance policy cash values. Invested assets are managed primarily by our subsidiaries and, to a lesser extent, external managers with whom our subsidiaries contract. Net investment income is included as a component of adjusted income from operations for each of our segments and Corporate. Realized investment gains (losses) are reported by segment but excluded from adjusted income from operations. For additional information about invested assets, see the "Investment Assets" section of the MD&A beginning on page 61 and Notes 9 and 10 of our Consolidated Financial Statements.

We manage our investment portfolios to reflect the underlying characteristics of related insurance and contractholder liabilities and capital requirements, as well as regulatory and tax considerations pertaining to those liabilities and state investment laws. Insurance and contractholder liabilities range from short duration health care products to longer term obligations associated with disability and life insurance products and the run-off settlement annuity business. Assets supporting these liabilities are managed in segregated investment portfolios to facilitate matching of asset durations and cash flows to those of corresponding liabilities. Investment strategy and results are affected by the amount and timing of cash available for investment, competition for investments, economic conditions, interest rates and asset allocation decisions. We routinely monitor and evaluate the status of our investments, obtaining and analyzing relevant investment-specific information and assessing current economic conditions, trends in capital markets and other factors such as industry sector, geographic and property-specific information.

Separate Accounts

Our subsidiaries or external advisors manage invested assets of Separate Accounts on behalf of contractholders, including the Cigna Pension Plan, variable universal life products sold through our corporate-owned life insurance business, and other disability and life products. These assets are legally segregated from our other businesses and are not included in General Account Invested Assets. Income, gains and losses generally accrue directly to the contractholders.

Investing in Innovation

In addition to the portfolio investments in our general and separate accounts discussed above that support our insurance operations, in 2018, we began targeted investing within the health care industry specifically. Our recently-formed Cigna Ventures unit has been allotted $250 million to invest in promising startups and growth-stage companies that create new growth possibilities in health care. These targeted investments bring improved care quality, affordability, choice and greater simplicity to customers, patients and clients by harnessing transformative ideas in: 1) insights and analytics; 2) digital health and retail; and 3) care delivery and management.

Regulation

The laws and regulations governing our business continue to increase each year and are subject to frequent change. We are regulated by federal, state and international regulatory agencies that generally have discretion to issue regulations and interpret and enforce laws and rules. These regulations can vary significantly from jurisdiction to jurisdiction, and the interpretation of existing laws and rules also may change periodically. Domestic and international governments continue to enact and consider various legislative and regulatory proposals that could materially impact the health care system.

Many aspects of our business are directly regulated by federal and state laws and administrative agencies, such as HHS, CMS, the Internal Revenue Service ("IRS"), the Departments of Labor ("DOL"), Treasury and Justice ("DOJ"), the Securities and Exchange Commission ("SEC"), state departments of insurance and state boards of pharmacy. Our business practices may also be shaped by judicial decisions.

In addition, aspects of our business are subject to indirect regulation. The self-funded benefit plans sponsored by our employer clients are regulated under federal law. These self-funded clients expect us to assure that our administration of their plans complies with the regulatory requirements applicable to them.

Our business operations and the books and records of our regulated businesses are routinely subject to examination at regular intervals by state insurance and HMO regulatory agencies, state boards of pharmacy, CMS, DOL, IRS and comparable international regulators to assess compliance with applicable laws and regulations. Our operations are also subject to non-routine examinations and investigations by various state and federal regulatory agencies, generally as the result of a complaint. In addition, we may be implicated in investigations of our clients whose group benefit plans we administer on their behalf. As a result, we routinely receive subpoenas and other demands or requests for information from various state insurance and HMO regulatory agencies, state attorneys general, the Office of Inspector General ("OIG"), the DOJ, the DOL and other state, federal and international authorities. We may also be called upon to provide information by members of the U.S. Congress, including testifying before congressional committees and subcommittees regarding certain of our business practices. If Cigna is determined to have failed to comply with applicable laws or regulations, these examinations, investigations, reviews, subpoenas and demands may:

- result in fines, penalties, injunctions, consent orders or loss of licensure;
- require changes in business practices;
- damage relationships with the agencies that regulate us and affect our ability to secure regulatory approvals necessary for the operation of our business; or
- damage our brand and reputation.

Our international subsidiaries are subject to regulations in international jurisdictions where foreign insurers may face more rigorous regulations than their domestic competitors.

The laws and regulations governing our business, as well as the related interpretations, are subject to frequent change and can be inconsistent or in conflict with each other. For a discussion of the risks related to our compliance with these laws and regulations see the Risk Factors section located in Part 1, Item 1A of the Form 10-K. Management continues to be actively engaged with regulators and policymakers with respect to legislation and rule-making. See the "Executive Overview – Health Care Industry Developments and Other Matters Affecting our Integrated Medical and Health Services Segments" section of our MD&A located in Part II, Item 7 of the Form 10-K for a discussion of the anticipated impact of certain recent industry developments.

Patient Protection and the Affordable Care Act (ACA)

The Patient Protection and Affordable Care Act (ACA) mandated broad changes affecting many aspects of the health care system. The ACA affects many aspects of health care, including insured and self-insured health benefit plans and pharmacy benefit managers. Our business model is impacted by the ACA, including our relationships with current and future producers and health care providers, products, service providers and technologies. Key provisions of the ACA include the imposition of a non-tax deductible health insurance industry fee and other assessments on health insurers, the creation of health insurance exchanges for individuals and small group employers to purchase insurance coverage and minimum loss ratios for our commercial and Medicare Part D business. Other provisions of the ACA in effect include reduced Medicare Advantage premium rates, the requirement to cover preventive services with no enrollee cost-sharing, banning the use of lifetime and annual limits on the dollar amount of essential health benefits, increasing restrictions on rescinding coverage, extending coverage of dependents up to age 26, enforcement mechanisms and rules related to healthcare fraud and abuse enforcement activities and certain pharmacy benefit transparency requirements. The employer mandate requires employers with 50 or more full-time employees to offer affordable health insurance that provides minimum value (each as defined under the ACA) to full-time employees and their dependents, including children up to age 26, or be subject to penalties based on employer size. The ACA also changed certain tax laws to effectively limit tax deductions for certain employee compensation paid by health insurers.

Since its adoption, there have been several attempts to repeal or limit the utility of the ACA. The current administration has issued several executive orders and approved legislative changes that affect the ACA, the impacts of which are not yet fully known. Among other things, these actions restricted agencies from taking certain actions that would impose a fiscal burden on any state, individual, provider, insurer, recipient of health care services, purchaser of health insurance or maker of medical devices, products or medications; and stopped payment of cost-sharing reduction subsidies to insurers. In December 2017, U.S. tax reform legislation was signed into law that, among other things, reduced the "individual mandate" penalty for individuals without health insurance to zero dollars, effective January 1, 2019. As a result of this change, a federal district court has ruled that the "individual mandate" is unconstitutional thereby leaving in doubt whether the entire ACA is unconstitutional until there is a final judicial determination on appeal.

Additionally, in 2017, the current administration issued an executive order asking the DOL to revise the Employee Retirement Income Security Act of 1974, as amended ("ERISA") regulations to make it easier for employers, particularly small employers, to associate for the purpose of sponsoring large group health plans and thereby avoid the ACA's small group market reform (e.g., community-rating and mandated coverage of essential health benefits) that impaired the affordability of providing health coverage to their employees. In the spring of 2018, the DOL issued final rules that revised the definition of "employer" in the ERISA rules to make it easier for employers, including self-employed individuals, to form bona fide employer groups, all of whose employees would be counted in determining whether they were small or large groups for purposes of the ACA. While the regulation of these groupings by state insurance departments is not affected by the DOL's final association health plan rules, the final rules have resulted in an increase in interest among employers, associations, producers and benefit consultants in forming new groupings for purposes of offering insured or self-funded group health plans.

Medicare and Medicaid Regulations

Through our subsidiaries, we offer individual and group Medicare Advantage, Medicare Pharmacy (Part D) and Medicare Supplement products. We also provide Medicare Part D-related products and services to other Medicare Part D sponsors, Medicare Advantage Prescription Drug Plans and other employers and clients offering Medicare Part D benefits to Medicare Part D eligible beneficiaries. As part of our Medicare Advantage and Medicare Part D business, we contract with CMS to provide services to Medicare beneficiaries. As a result, our ability to obtain payment (and the determination of the amount of such payments), market to, enroll and retain members and expand into new service areas is subject to compliance with CMS' numerous and complex regulations and requirements that are frequently modified and subject to

administrative discretion. Our Medicaid and dual-eligible products are regulated by CMS. State Medicaid agencies audit our performance to determine compliance with contracts and regulations.

CMS evaluates Medicare Advantage plans and Part D plans under its "Star Rating" system. The Star Rating system considers various measures adopted by CMS, including, for example, quality of care, preventative services, chronic illness management, coverage determinations and appeals and customer satisfaction. A plan's Star Rating affects its image in the market and plans that perform very well are able to market more effectively and for longer periods of time than other plans. Medicare Advantage plans' quality-bonus payments are determined by the Star Rating, with plans receiving a rating of four or more stars eligible for such payments. The Star Rating system is subject to change annually by CMS, which may make it more difficult to achieve four stars or greater.

CMS uses a risk-adjustment model which adjusts premiums paid to Medicare Advantage plans according to customers' health status. The risk-adjustment model generally pays more where a plan's membership has higher expected costs. Under this model, rates paid to Medicare Advantage plans are based on actuarially determined bids, which include a process whereby our prospective payments are based on our estimated cost of providing standard Medicare-covered benefits to an enrollee with a "national average risk profile." That baseline payment amount is adjusted to reflect the health status of our enrolled membership. Under the risk-adjustment methodology, Medicare Advantage plans must collect and submit the necessary diagnosis code information from hospital inpatient, hospital outpatient, and physician providers to CMS within prescribed deadlines. The CMS risk-adjustment model uses the diagnosis data to calculate the risk-adjusted premium payment to the plans, which CMS adjusts for coding pattern differences between the health plans and the government fee-for-service program.

On November 1, 2018, CMS released a proposed rule titled "Proposed Rule on Changes to MA and Part D Programs for CY 2020 and 2021" (the "MAPD Proposed Rule") that would revise its Risk Adjustment Data Validation ("RADV") methodology by, among other things, excluding an adjustment for underlying fee-for-service data errors (FFS Adjuster) and extrapolating RADV results at the contract level. On November 30, 2018, CMS released proposed rules titled "Modernizing Part D and Medicare Advantage to Lower Drug Prices and Reduce Out-of-Pocket Expenses" (the "Proposed Part D Rule") that focused on drug pricing, including a proposal to amend the definition of "negotiated price" in Part D to require Part D plans to apply pharmacy price concessions at the point of sale when calculating a Part D beneficiary's copayment. The Proposed MAPD Rule and the Proposed Part D Rule are subject to revision through the comment process.

In February 2019, CMS proposed rules to support the seamless and secure access, exchange and use of electronic health information. In the proposed rules, CMS proposes requirements that Medicaid, the Children's Health Insurance Program, Medicare Advantage plans and qualified health plans in the federally-facilitated exchanges provide enrollees with immediate electronic access to medical claims and other health information electronically by 2020. This proposed rule is subject to revision through a comment process.

Non-compliance with these laws and regulations may result in significant consequences, including fines and penalties, enrollment sanctions, exclusion from the Medicare and Medicaid programs, limitations on expansion, and criminal penalties.

False Claims Act and Anti-Kickback Laws

Our products and services are subject to numerous laws and regulations, including the federal False Claims Act (the "False Claims Act") and federal and state anti-kickback laws. Additionally, the federal government has made investigating and prosecuting health care fraud, waste and abuse a priority. Fraud, waste and abuse prohibitions encompass a wide range of activities, including kickbacks in return for customer referrals, billing for unnecessary medical services, upcoding and improper marketing. The regulations and contractual requirements in this area are complex, are frequently modified, and are subject to administrative discretion and judicial interpretation.

False Claims Act and Related Criminal Provisions. The False Claims Act imposes civil penalties for knowingly making or causing to be made false claims or false records or statements with respect to governmental programs, such as Medicare and Medicaid, to obtain reimbursement or for failure to return overpayments. Private individuals may bring qui tam or "whistleblower" suits against providers under the False Claims Act, which authorizes the payment of a portion of any recovery to the individual bringing suit. The ACA amended the federal anti-kickback laws to state any claim submitted to a federal or state healthcare program which violates the anti-kickback laws is also a false claim under the False Claims Act. The False Claims Act generally provides for the imposition of civil penalties and for treble damages, resulting in the possibility of substantial financial liabilities. Criminal statutes similar to the False Claims Act provide that if a corporation is convicted of presenting a claim or making a statement it knows to be false, fictitious or fraudulent to any federal agency, the corporation may be fined. Conviction under these statutes may also result in exclusion from participation in federal and state healthcare programs. Many states have also enacted laws similar to the False Claims Act, some of which may include criminal penalties, substantial fines and treble damages.

Anti-Kickback and Referral Laws. Subject to certain exceptions and "safe harbors," the federal anti-kickback statute generally prohibits, among other things, knowingly and willfully paying, receiving or offering any payment or other remuneration to induce a person to purchase, lease, order or arrange for items (including prescription drugs) or services reimbursable in whole or in part under Medicare, Medicaid or another federal healthcare program. Many states have similar laws, some of which apply similar anti-kickback prohibitions to items or services reimbursable by non-governmental payors. Sanctions for violating these federal and state anti-kickback laws may include criminal and civil fines and exclusion from participation in the federal and state healthcare programs.

Anti-kickback laws have been cited as a partial basis, along with state consumer protection laws described below, for investigations and multi-state settlements relating to financial incentives provided by drug manufacturers to pharmacies and/or payors in connection with "product conversion" or promotion programs. Other anti-kickback laws may be applicable to arrangements with pharmaceutical manufacturers, such as the Public Contracts Anti-Kickback Act, the ERISA Health Plan Anti-Kickback Statute, the federal "Stark Law" and various state anti-kickback restrictions.

In February 2019, HHS proposed changes to the federal anti-kickback safe harbor to exclude regulatory protection for rebates between drug manufacturers and Medicare Part D plans, Medicaid managed care organizations and pharmacy benefit managers in the context of these government programs. The proposed regulations in their current form apply solely to Medicare Part D and Medicaid programs, which include our Government business in the Integrated Medical segment. The proposed regulations also seek to create new safe harbor protections for fixed fee services arrangements between drug manufacturers and pharmacy benefit managers, as well as protections for discounts offered at

the point of sale. HHS has stated that it does not intend for the proposal to have an effect on existing protections for value-based arrangements between manufacturers and plan sponsors under Medicare Part D and Medicaid MCOs. While legislative and regulatory discussions on the other issues raised in the blueprint continue to be the subject of legislative and regulatory activity, they have yet to be implemented in any form.

Federal Civil Monetary Penalties Law. The federal civil monetary penalty statute provides for civil monetary penalties against any person who gives something of value to a Medicare or Medicaid program beneficiary which the person knows or should know is likely to influence the beneficiary's selection of a particular provider for Medicare or Medicaid items or services. Under this law, our wholly-owned home delivery pharmacies, specialty pharmacies and home health providers are restricted from offering certain items of value to influence a Medicare or Medicaid patient's use of services. The ACA also includes several civil monetary provisions, such as penalties for the failure to report and return a known overpayment and failure to grant timely access to the OIG under certain circumstances.

Federal and State Oversight of Government-Sponsored Health Care Programs

Participation in government-sponsored health care programs subjects us to a variety of federal and state laws and regulations and risks associated with audits conducted under these programs. These audits may occur years after the provision of services. Risks include potential fines and penalties, restrictions on our ability to participate or expand our presence in certain programs and restrictions on marketing our plans. For example, with respect to our Medicare Advantage business, CMS and the OIG perform audits to determine a health plan's compliance with federal regulations and contractual obligations, including program audits and compliance with proper coding practices (sometimes referred to as "Risk Adjustment Data Validation Audits" or "RADV audits").

Separately, the DOJ is currently conducting an industry review of the risk adjustment data submission practices and business processes, including review of medical charts, of Cigna and a number of other Medicare Advantage organizations under Medicare Parts C and D.

For our Medicare Part D business, compliance with fraud and abuse enforcement practices is monitored through Recovery Audit Contractor audits in which third-party contractors conduct post-payment reviews on a contingency fee basis to detect and correct improper payments.

Government Procurement Regulations

We have a contract with the DoD, which subjects us to all of the applicable Federal Acquisition Regulations ("FAR") and the DoD FAR Supplement, which govern federal government contracts. Further, there are other federal and state laws applicable to our DoD arrangement and our arrangements with other clients that may be subject to government procurement regulations. In addition, certain of our clients participate as contracting carriers in the Federal Employees Health Benefits Program administered by the Office of Personnel Management, which includes various pharmacy benefit management standards.

Employee Retirement Income Security Act

Our domestic subsidiaries sell most of their products and services to sponsors of employee benefit plans that are governed by ERISA. ERISA is a complex set of federal laws and regulations enforced by the IRS and the DOL, as well as the courts. ERISA regulates certain aspects of the relationship between us, the employers that maintain employee welfare benefit plans subject to ERISA and participants in such plans. Certain of our domestic subsidiaries are also subject to requirements imposed by ERISA affecting claim payment and appeals procedures for individual health insurance and insured and self-insured group health plans and for the insured dental, disability, life and accident plans we administer. Certain of our domestic subsidiaries also may contractually agree to comply with these requirements on behalf of the self-insured dental, disability, life and accident plans they administer. We believe the conduct of our pharmacy benefit management business is not generally subject to the fiduciary obligations of ERISA. However, there can be no assurances that the DOL may not assert that pharmacy benefit managers are fiduciaries. From time to time, states have considered legislation to declare a pharmacy benefit manager or medical benefit manager a fiduciary with respect to its clients.

Plans subject to ERISA can also be subject to state laws and the legal question of whether and to what extent ERISA preempts a state law will continue to be subject to court interpretation.

Privacy, Security and Data Standards Regulations

Many of our activities involve the receipt or use of confidential health and other personal information. In addition, we use aggregated and de-identified data for our own research and analysis purposes and, in some cases, provide access to such data to pharmaceutical manufacturers and third-party data aggregators.

The federal Health Insurance Portability and Accountability Act of 1996 and its implementing regulations ("HIPAA") impose minimum standards on health insurers, pharmacy benefit managers, HMOs, health plans, health care providers and clearinghouses for the privacy and security of protected health information. HIPAA also established rules that standardize the format and content of certain electronic transactions, including, but not limited to, eligibility and claims.

The Health Information Technology for Economic and Clinical Health Act ("HITECH") imposes additional contracting requirements for covered entities, the extension of privacy and security provisions to business associates, the requirement to provide notification to various parties in the event of a data breach of protected health information, and enhanced financial penalties for HIPAA violations, including potential criminal penalties for individuals. In the conduct of our business, depending on the circumstances, we may act as either a covered entity or a business associate.

The federal Gramm-Leach-Bliley Act generally places restrictions on the disclosure of non-public information to non-affiliated third parties, and requires financial institutions, including insurers, to provide customers with notice regarding how their non-public personal information is used, including an opportunity to "opt out" of certain disclosures. State departments of insurance and certain federal agencies adopted implementing regulations as required by federal law.

A number of states have adopted data security laws and regulations regulating data security and requiring security breach notification that may apply to us in certain circumstances and are increasingly focused on protecting individuals from identity theft. Neither HIPAA nor the Gramm-Leach-Bliley privacy regulations preempt more stringent state laws and regulations. In addition, international laws, rules and regulations governing the use and disclosure of personal information are generally more stringent than in the United States, and they vary from jurisdiction to jurisdiction.

The Cybersecurity Information Sharing Act of 2015 ("CISA") encourages organizations to share cyber threat indicators with the federal government and, among other things, directs HHS to develop a set of voluntary cybersecurity best practices for organizations in the health care industry. States have also begun to issue regulations specifically related to cybersecurity. In October 2017, the National Association of Insurance Commissioners ("NAIC"), an organization of state insurance regulators, adopted the Insurance Data Security Model Law that creates rules for insurers and other covered entities addressing data security, investigation and notification of breaches. This includes maintaining an information security program based on ongoing risk assessment, overseeing third-party service providers, investigating data breaches and notifying regulators of a cybersecurity event. As the model law is intended to serve as model legislation only, states will need to enact legislation for the model law to become mandatory and enforceable. We will continue to monitor states' activity regarding cybersecurity regulation.

The European Union's General Data Protection Regulation ("GDPR"), which became enforceable in May 2018, introduced a number of new obligations regarding the handling of personal data of European customers. GDPR provides certain individual privacy rights to certain persons whose data we may store and provides for greater penalties for non-compliance than previous European data protection laws. In addition, many countries outside of Europe where we conduct business are considering data protection laws and regulations that include requirements modeled after those in the GDPR.

Consumer Protection Laws

We engage in direct-to-consumer activities and are increasingly offering mobile and web-based solutions to our customers. We are therefore subject to federal and state regulations applicable to electronic communications and other consumer protection laws and regulations, such as the Telephone Consumer Protection Act and the CAN-SPAM Act. In particular, the Federal Trade Commission is increasingly exercising its enforcement authority in the areas of consumer privacy and data security, with a focus on web-based, mobile data and "big data." Federal consumer protection laws may also apply in some instances to privacy and security practices related to personally identifiable information.

Most states have consumer protection laws that have been the basis for investigations and multi-state settlements relating to financial incentives provided by drug manufacturers to retail pharmacies in connection with product conversion programs. Such statutes have also been cited as the basis for claims or investigations by state attorneys general relative to privacy and data security.

Office of Foreign Assets Control Sanctions and Anti-Money Laundering

We are also subject to regulation by the Office of Foreign Assets Control of the Department of the Treasury that administers and enforces economic and trade sanctions against targeted foreign countries and regimes based on U.S. foreign policy and national security goals.

Certain of our products are subject to the Department of the Treasury anti-money laundering regulations under the Bank Secrecy Act.

In addition, we may be subject to similar regulations in non-U.S. jurisdictions in which we operate.

Corporate Practice of Medicine and Other Laws

Many states in which our subsidiaries operate limit the practice of medicine to licensed individuals or professional organizations comprised of licensed individuals, and business corporations generally may not exercise control over the medical decisions of physicians. Statutes and regulations relating to the practice of medicine, fee-splitting between physicians and referral sources, and similar issues vary widely from state to state. Under management agreements between certain of our subsidiaries and affiliated physician-owned professional groups, these groups retain sole responsibility for all medical decisions, as well as for hiring and managing physicians and other licensed health care providers, developing operating policies and procedures, implementing professional standards and controls, and maintaining malpractice insurance. We believe that our health services operations comply with applicable state statutes regarding corporate practice of medicine, fee-splitting, and similar issues. However, any enforcement actions by governmental officials alleging non-compliance with these statutes could subject us to penalties or restructuring or reorganization of our business.

Network Access Legislation

A majority of states now have some form of legislation affecting our ability, or our clients' ability, to limit access to a pharmacy provider network or remove a provider from a network. Such legislation may require us or our clients to admit any retail pharmacy or provider willing to meet the plan's terms and conditions for network participation ("any willing provider" legislation) or may direct that a provider may not be removed from a network except in compliance with certain procedures ("due process" legislation).

Certain states have enacted legislation prohibiting certain pharmacy benefit management clients from imposing additional co-payments, deductibles, limitations on benefits, or other conditions ("Conditions") on covered individuals utilizing a retail pharmacy when the same Conditions are not otherwise imposed on covered individuals utilizing home delivery pharmacies. However, the legislation requires the retail pharmacy to agree to the same reimbursement amounts and terms and conditions as are imposed on the home delivery pharmacies. An increase in the number of prescriptions filled at retail pharmacies may have a negative impact on the number of prescriptions filled through home delivery. We anticipate additional states will consider similar legislation.

Legislation Affecting Plan Design

Some states have enacted legislation that prohibits managed care plan sponsors from implementing certain restrictive benefit plan design features, and many states have introduced legislation to regulate various aspects of managed care plans, including provisions relating to the

pharmacy benefit. For example, some states, under so-called "freedom of choice" legislation, provide members of the plan may not be required to use network providers, but must instead be provided with benefits even if they choose to use non-network providers. Some states have also enacted legislation, which, as described above, can negatively impact the use of cost-saving network configurations for plan sponsors. Other states have enacted legislation purporting to prohibit health plans from offering members financial incentives for use of home delivery pharmacies. Medicare and some states have issued guidance and regulations which limit our ability to fill or refill prescriptions electronically submitted by a physician to our home delivery pharmacy without first obtaining consent from the patient. Such restrictions generate additional costs and limit our ability to maximize efficiencies which could otherwise be gained through the electronic prescription and automatic refill processes. Legislation has been introduced in some states to prohibit or restrict therapeutic intervention, or to require coverage of all Food and Drug Administration approved drugs. Other states mandate coverage of certain benefits or conditions, and require health plan coverage of specific drugs if deemed medically necessary by the prescribing physician. States are also standardizing the process for, and restricting the use of, utilization management rules and shortening the time frames within which prescription drug prior authorization determinations must be made. Even where states do not regulate pharmacy benefit or utilization management companies directly, these laws will apply to many of our clients, including managed care organizations and health insurers.

Pharmacy Benefit Management and Drug Pricing Regulation

Our pharmacy benefit management services are subject to numerous laws and regulations. These laws and regulations govern, and proposed legislation and regulations may govern, critical practices, including disclosure, receipt and retention of rebates and other payments received from pharmaceutical manufacturers; the receipt and retention of transmission fees from contracted pharmacies; use of, administration of, and/or changes to drug formularies, maximum allowable cost list pricing, and/or clinical programs; disclosure of data to third parties; drug utilization management practices; the level of duty a pharmacy benefit manager owes its clients or customers; configuration of pharmacy networks; the operations of our subsidiary pharmacies; disclosure of negotiated provider reimbursement rates; disclosure of negotiated drug rebates, calculation of customer cost share for prescription drug claims; disclosure of fees associated with administrative service agreements and patient care programs that are attributable to customers' drug utilization; and registration or licensing of pharmacy benefit managers. Some states have adopted so-called "most favored nation" legislation which provides that a pharmacy participating in the state Medicaid program must give the state the best price the pharmacy makes available to any third-party plan.

Prescription drug pricing and the role of pharmacy benefit managers have been a focus of the current administration. In May 2018, the current administration announced a blueprint, titled "American Patients First," which considers a series of drug pricing proposals including, among other things, removal of the anti-kickback safe harbor protection for rebates between drug manufacturers and insurers and pharmacy benefit managers and improvements to pricing transparency. In October 2018, Congress enacted laws that prohibited pharmacy benefit managers and insurers from restricting pharmacies from providing drug pricing information to a plan enrollee when there is a difference between the cost of the drug under insurance and the cost of the drug when purchased without insurance. See also, "False Claims Act and Anti-Kickback Laws" for a discussion of HHS' proposed rule changes to the federal anti-kickback safe harbor to exclude regulatory protection for rebates between drug manufacturers and Medicare Part D plans, Medicaid managed care organizations and pharmacy benefit managers in the context of these government programs.

Some states have enacted statutes regulating the use of maximum allowable cost ("MAC") pricing. These statutes, referred to as "MAC Transparency Laws," generally require pharmacy benefit managers to disclose specific information related to MAC pricing to pharmacies and provide certain appeal rights for pharmacies. MAC Transparency Laws also restrict the application of MAC and may require operational changes to maintain compliance with the law. Some states have also enacted laws regulating pharmacy pricing and protecting the profitability of pharmacies for dispensing certain MAC-priced drugs. Some states have enacted laws requiring that the customer cost share for a prescription drug claim not exceed certain price points, such as the pharmacy's usual and customary charge or its contracted reimbursement for the drug.

In March 2018, the NAIC adopted changes to the Health Carrier Prescription Drug Benefit Management Model Act. The changes address issues relating to (i) transparency, accuracy and disclosure regarding prescription drug formularies and formulary changes during a policy year; (ii) accessibility of prescription drug benefits using a variety of pharmacy options; and (iii) tiered prescription drug formularies and discriminatory benefit design. While the actions of the NAIC do not have the force of law, they may influence states to adopt laws based on the model legislation.

The federal Medicaid rebate program requires participating drug manufacturers to provide rebates on all drugs reimbursed through state Medicaid programs, including through Medicaid managed care organizations. Manufacturers of brand name products must provide a rebate equivalent to the greater of (a) 23.1% of the average manufacturer price ("AMP") paid by retail community pharmacies or by wholesalers for certain drugs distributed to retail community pharmacies, or (b) the difference between AMP and the "best price" available to essentially any customer other than the Medicaid program and certain other government programs, with certain exceptions. We negotiate rebates with drug manufacturers and, in certain circumstances, sell services to drug manufacturers. Investigations are being and have been conducted by certain governmental entities which call into question whether a drug's "best price" was properly calculated and reported with respect to rebates paid by the manufacturers to the Medicaid programs. We are not responsible for such calculations, reports or payments.

Pharmacy Regulation

Our home delivery and specialty pharmacies are licensed to do business as a pharmacy in the states in which they are located. Most of the states into which we deliver pharmaceuticals have laws that require out-of-state home delivery pharmacies to register with, or be licensed by, the board of pharmacy or a similar regulatory body in the state. These states generally permit the pharmacy to follow the laws of the state in which the home delivery service is located, although some states require compliance with certain laws in that state as it impacts or relates to drugs distributed or dispensed into those states.

Our various pharmacy facilities also maintain certain Medicare and state Medicaid provider numbers as pharmacies providing services under these programs. Participation in these programs requires our pharmacies to comply with the applicable Medicare and Medicaid provider rules and regulations, and exposes the pharmacies to various changes the federal and state governments may impose regarding reimbursement methodologies and amounts to be paid to participating providers under these programs. In addition, several of our pharmacy facilities are

participating providers under Medicare Part D and, as a condition to becoming a participating provider under Medicare Part D, the pharmacies are required to adhere to certain requirements applicable to Medicare Part D.

Other statutes and regulations affect our home delivery and specialty pharmacy operations, including the federal and state anti-kickback laws and the federal civil monetary penalty law described above. Federal and state statutes and regulations govern the labeling, packaging, advertising, adulteration and security of prescription drugs and the dispensing of controlled substances. The Federal Trade Commission requires mail order sellers of goods generally to engage in truthful advertising, to stock a reasonable supply of the product to be sold, to fill mail orders within thirty days and to provide clients with refunds when appropriate. The United States Postal Service also has significant statutory authority to restrict the delivery of drugs and medicines through the mail.

Financial Reporting, Internal Control and Corporate Governance

Regulators closely monitor the financial condition of licensed insurance companies and HMOs. States regulate the form and content of statutory financial statements, the type and concentration of permitted investments, and corporate governance over financial reporting. Our insurance and HMO subsidiaries are required to file periodic financial reports and schedules with regulators in most of the jurisdictions in which they do business as well as annual financial statements audited by independent registered public accounting firms. Certain insurance and HMO subsidiaries are required to file an annual report of internal control over financial reporting with most jurisdictions in which they do business. Insurance and HMO subsidiaries' operations and accounts are subject to examination by such agencies. Many states have expanded regulations relating to corporate governance and internal control activities of insurance and HMO subsidiaries as a result of model regulations adopted by the NAIC with elements similar to corporate governance and risk oversight disclosure requirements under federal securities laws.

Guaranty Associations, Indemnity Funds, Risk Pools and Administrative Funds

Most states and certain non-U.S. jurisdictions require insurance companies to support guaranty associations or indemnity funds that are established to pay claims on behalf of insolvent insurance companies. Some states have similar laws relating to HMOs and other payors, such as consumer operated and oriented plans (co-ops) established under the ACA. In the United States, these associations levy assessments on member insurers licensed in a particular state to pay such claims. Certain states require HMOs to participate in guaranty funds, special risk pools and administrative funds. For additional information about guaranty funds and other assessments, see Note 19 to our Consolidated Financial Statements.

Certain states continue to require health insurers and HMOs to participate in assigned risk plans, joint underwriting authorities, pools or other residual market mechanisms to cover risks not acceptable under normal underwriting standards, although some states have eliminated these requirements as a result of the ACA.

Solvency and Capital Requirements

Many states have adopted some form of the NAIC model solvency-related laws and risk-based capital rules ("RBC rules") for life and health insurance companies. The RBC rules recommend a minimum level of capital depending on the types and quality of investments held, the types of business written and the types of liabilities incurred. If the ratio of the insurer's adjusted surplus to its risk-based capital falls below statutorily required minimums, the insurer could be subject to regulatory actions ranging from increased scrutiny to conservatorship.

In addition, various non-U.S. jurisdictions prescribe minimum surplus requirements that are based upon solvency, liquidity and reserve coverage measures. Our HMOs and life and health insurance subsidiaries, as well as non-U.S. insurance subsidiaries, are compliant with applicable RBC and non-U.S. surplus rules.

The Risk Management and Own Risk and Solvency Assessment Model Act ("ORSA"), adopted by the NAIC, provides requirements and principles for maintaining a group solvency assessment and a risk management framework and reflects a broader approach to U.S. insurance regulation. ORSA includes a requirement to file an annual ORSA Summary Report in the lead state of domicile. To date, an overwhelming majority of the states have adopted the same or similar versions of ORSA. We file our ORSA report annually as required.

Holding Company Laws

Our domestic insurance companies and certain of our HMOs are subject to state laws regulating subsidiaries of insurance holding companies. Under such laws, certain dividends, distributions and other transactions between an insurance company or an HMO subsidiary and its affiliates may require notification to, or approval by, one or more state insurance commissioners. In addition, the holding company acts of states in which our subsidiaries are domiciled restrict the ability of any person to obtain control of an insurance company or HMO subsidiary without prior regulatory approval.

Marketing, Advertising and Products

In most states, our insurance companies and HMO subsidiaries are required to certify compliance with applicable advertising regulations on an annual basis. Our insurance companies and HMO subsidiaries are also required by most states to file and secure regulatory approval of products prior to the marketing, advertising, and sale of such products.

Licensing and Registration Requirements

Certain subsidiaries contract to provide claim administration, utilization management and other related services for the administration of self-insured benefit plans. These subsidiaries may be subject to state third-party administration and other licensing requirements and regulation, as well as third-party accreditation requirements.

We have received full accreditation for Utilization Review Accreditation Commission Pharmacy Benefit Management version 2.2 Standards, which includes quality standards for drug utilization management, and select subsidiaries have received full accreditation for Utilization

Review Accreditation Commission for Health Utilization Management version 7.2, which includes quality standards for medical utilization management.

Certain states have adopted pharmacy benefit management registration and/or disclosure laws. In addition to registration laws, some states have adopted legislation mandating disclosure of various aspects of our financial practices, including those concerning pharmaceutical company revenue, as well as prescribing processes for prescription switching programs and client and provider audit terms.

Our international subsidiaries are often required to be licensed when entering new markets or starting new operations in certain jurisdictions. The licensure requirements for these subsidiaries vary by country and are subject to change.

International Regulations

Our operations outside the United States expose us to laws of multiple jurisdictions and the rules and regulations of various governing bodies and regulators, including those related to financial and other disclosures, corporate governance, privacy, data protection, data mining, data transfer, intellectual property, labor and employment, consumer protection, direct-to-consumer communications activities, tax, anti-corruption and anti-money laundering. Foreign laws and rules may include requirements that are different from, or more stringent than, similar requirements in the United States.

Our operations in countries outside the United States:

- are subject to local regulations of the jurisdictions where we operate;
- in some cases, are subject to regulations in the jurisdictions where customers reside; and
- in all cases, are subject to the Foreign Corrupt Practices Act (“FCPA”).

In particular, in South Korea where we are selling insurance products directly to individual customers, regulators are focused on protecting the rights of individual customers by enforcing “Treating Customers Fairly” concepts. This regulatory focus results in rigorous data localization requirements, network separation obligations, and system monitoring restrictions, as well as obligations to closely monitor marketing communications and sales scripts. Anti-money laundering requirements in South Korea and other Asian countries where we do business also impose obligations to collect certain information about each customer at time of sale and to risk rank each customer to determine possible future money laundering risk.

The FCPA prohibits offering, promising, providing or authorizing others to give anything of value to a foreign government official or employee to obtain or retain business or otherwise secure a business advantage. Outside of the United States, we may interact with government officials in several different capacities: as regulators of our insurance business; as clients or partners who are state-owned or partially state-owned; as health care professionals who are employed by the government; as hospitals that are state-owned; and as officials issuing permits in connection with real estate transactions. Violations of the FCPA and other anti-corruption laws may result in severe criminal and civil sanctions as well as other penalties, and the SEC and DOJ have increased their enforcement activities with respect to FCPA. The UK Bribery Act of 2010 applies to all companies with a nexus to the United Kingdom. Under this act, any voluntary disclosures of FCPA violations may be shared with United Kingdom authorities, thus potentially exposing companies to liability and potential penalties in multiple jurisdictions.

Miscellaneous

Premiums and fees from CMS represented 16% of our total consolidated revenues for the year ended December 31, 2018 under a number of contracts. We are not dependent on business from one or a few customers. Other than CMS, no one customer accounted for 10% or more of our consolidated revenues in 2018. We are not dependent on business from one or a few brokers or agents. In addition, our insurance businesses are generally not committed to accept a fixed portion of the business submitted by independent brokers and agents, and generally all such business is subject to approval and acceptance.

We had approximately 73,800 employees as of December 31, 2018.

ITEM 1A. Risk Factors

As a large global health service company operating in a complex industry, we encounter a variety of risks and uncertainties that could have a material adverse effect on our business, liquidity, results of operations, financial condition or the trading price of our securities. You should carefully consider each of the risks and uncertainties discussed below, together with other information contained in this Annual Report on Form 10-K, including Management's Discussion and Analysis of Results of Operations and Financial Condition. These risks and uncertainties are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect us. The following risk factors have been organized by category for ease of use; however many of the risks may have impacts in more than one category. These categories, therefore, should be viewed as a starting point for understanding the significant risks facing us and not as a limitation on the potential impact of the matters discussed. Risk factors are not necessarily listed in order of importance.

Strategic and Operational Risks

Future performance of our business will depend on our ability to execute our strategic and operational initiatives effectively.

The future performance of our business will depend in large part on our ability to effectively implement and execute our strategic and operational initiatives. Successfully executing on these initiatives depends on a number of factors, including our ability to:

- differentiate our products and services from those of our competitors;
- develop and introduce new and innovative products or programs, particularly in response to government regulation and the increased focus on consumer-directed products;
- grow our commercial product portfolio;
- identify and introduce the proper mix or integration of products that will be accepted by the marketplace;
- identify products and solutions that focus on improving patient outcomes and assist in controlling costs;
- evaluate drugs for efficacy, value and price to assist clients in selecting a cost-effective formulary;
- offer cost-effective home delivery pharmacy and specialty services;
- leverage purchase volume to deliver discounts to health benefit providers;
- attract and retain sufficient numbers of qualified employees;
- attract, develop and maintain collaborative relationships with a sufficient number of qualified partners;
- attract new and maintain existing customer and client relationships;
- transition health care providers from volume-based fee-for-service arrangements to a value-based system;
- improve medical cost competitiveness in our targeted markets;
- manage our medical, pharmacy, administrative, and other operating costs effectively; and
- contract with pharmaceutical manufacturers and pharmacy providers on favorable terms.

For our strategic initiatives to succeed, we must effectively integrate our operations, including with Express Scripts and other acquired businesses, actively work to ensure consistency throughout the organization, and promote a global mind-set along with a focus on individual customers and clients. If we fail to do so, our business may be unable to grow as planned, or the result of expansion may be unsatisfactory. We will be unable to rapidly respond to competitive, economic and regulatory changes if we do not make important strategic and operational decisions quickly, define our appetite for risk specifically, implement new governance, managerial and organizational processes smoothly and communicate roles and responsibilities clearly. If these initiatives fail or are not executed on effectively, our consolidated financial position and results of operations could be negatively affected.

We operate in a highly competitive, evolving and rapidly changing industry and our failure to adapt could negatively impact our business.

The health service industry continues to be dynamic and rapidly evolving. Any significant shifts in the structure of the industry could alter industry dynamics and adversely affect our ability to attract or retain clients. Industry shifts could result (and have resulted) from, among other things:

- a large intra- or inter-industry merger or industry consolidation;
- strategic alliances;
- new or alternative business models;
- continuing consolidation among physicians, hospitals and other health care providers, as well as changes in the organizational structures chosen by physicians, hospitals and health care providers;
- new market entrants, including those not traditionally in the health service industry;
- the ability of larger employers and clients to contract directly with providers;

- technological changes and rapid shifts in the use of technology, such as telemedicine;
- the impact or consequences of legislation or regulatory changes;
- changes in the United States Postal Service or the consolidation of shipping carriers;
- increased drug acquisition cost or unexpected changes to drug pricing trend;
- change in the generic drug market or the failure of new generic drugs to come to market;
- a general decrease in drug utilization; or
- a general increase in utilization under risk-based contracts in the medical benefit management market.

Our failure to anticipate or appropriately adapt to changes in the industry could negatively impact our competitive position and adversely affect our business and results of operations.

Our failure to compete effectively to differentiate our products and services from those of our competitors and maintain or increase market share could materially adversely affect our results of operations, financial position and cash flows.

We operate in a highly competitive environment and an industry subject to significant market pressures brought about by customer and client needs, legislative and regulatory developments and other market factors. In particular markets, our competitors may have greater, better or more established capabilities, resources, market share, reputation or business relationships, or lower profit margin or financial return expectations. Our clients are well informed and organized and can easily move between our competitors and us. Our Express Scripts client contracts generally have three-year terms. As described in greater detail in the description of our business in Item 1 above (see page 11 of this Form 10-K), one of our key clients in the Health Services segment is the United States Department of Defense. If one or more of our large clients either terminates or does not renew a contract for any reason, including as a result of being acquired, or if the provisions of a contract with a large client are modified, renewed or otherwise changed with terms less favorable to us, our results of operations could be adversely affected and we could experience a negative reaction in the investment community resulting in decreases in the trading price of our securities or other adverse effects.

Our success depends, in part, on our ability to compete effectively in our markets, set prices appropriately in highly competitive markets to keep or increase our market share, increase customers as planned, differentiate our business offerings by innovating and delivering products and services that provide enhanced value to our customers, provide quality and satisfactory levels of service, and retain accounts with favorable medical cost experience or more profitable products versus retaining or increasing our customer base in accounts with unfavorable medical cost experience or less profitable products.

We must remain competitive to attract new customers, retain existing customers, and further integrate additional product and service offerings. To succeed in this highly competitive marketplace, it is imperative we maintain a strong reputation. The negative reputational impact of a significant event, including a failure to execute on customer or client contracts or strategic or operational initiatives, or failure to innovate and deliver products and services that demonstrate greater value to our customers, could affect our ability to grow and retain profitable arrangements, which could have a material adverse effect on our business and results of operations.

We face price competition and other pressures that could compress our margins or result in premiums that are insufficient to cover the cost of services delivered to our customers.

While we compete on the basis of many service and quality-related factors, we expect that price will continue to be a significant basis of competition. Our client contracts are subject to negotiation as clients seek to contain their costs, including by reducing benefits offered. Increasingly, our clients seek to negotiate performance guarantees that require us to pay penalties if the guaranteed performance standard is not met. Clients can easily move between our competitors and us. Our clients are well-informed and typically have knowledgeable consultants that seek competing bids from our competitors before contract renewal. In addition, as brokers and benefit consultants seek to enhance their revenue streams, they look to take on services that we typically provide. Each of these events could negatively impact our financial results.

Further, federal and state regulatory agencies may restrict our ability to implement changes in premium rates. Fiscal or other concerns related to the government-sponsored programs in which we participate, such as Medicare, may cause decreasing reimbursement rates, delays in premium payments or insufficient increases in reimbursement rates. Any limitation on our ability to maintain or increase our premium or reimbursement levels, or a significant loss of customers or clients resulting from our need to increase or maintain premium or reimbursement levels, could adversely affect our business, cash flows, financial condition and results of operations.

Premiums in the Integrated Medical segment are generally set for one-year periods and are priced well in advance of the date on which the contract commences or renews. Our revenue on Medicare policies is based on bids submitted mid-year in the year before the contract year. Although we base the premiums we charge and our Medicare bids on our estimate of future health care costs over the contract period, actual costs may exceed what we estimate in setting premiums. Our health care costs also are affected by external events that we cannot forecast or project and over which we have little or no control, as well as changes in customers' health care utilization patterns and provider billing practices. Our profitability depends, in part, on our ability to accurately predict, price for and effectively manage future health care costs. Relatively small differences between predicted and actual medical costs or utilization rates as a percentage of revenue can result in significant changes in our financial results.

Strong competition within the pharmacy benefit business has also generated greater demand for lower product and service pricing, increased revenue sharing and enhanced product and service offerings. These competitive factors have historically applied pressure on our operating margins and caused many companies, including us, to reduce the prices charged for products and services while sharing with clients a greater portion of the formulary fees and related rebates received from pharmaceutical manufacturers. Our inability to maintain positive trends, or

failure to identify and implement new ways to mitigate pricing pressures, could negatively impact our ability to attract or retain clients or sell additional services, which could negatively impact our margins and have a material adverse effect on our business and results of operations.

The reserves we hold for expected medical claims are based on estimates that involve an extensive degree of judgment and are inherently variable. If actual claims exceed our estimates, our operating results could be materially adversely affected, and our ability to take timely corrective actions to contain future costs may be limited.

We maintain and record medical claims reserves on our balance sheet for estimated future payments. Our estimates of health care costs payable are based on a number of factors, including historical claim experience, but this estimation process requires extensive judgment. Considerable variability is inherent in such estimates, and the accuracy of the estimates is highly sensitive to changes in medical claims submission and processing patterns and/or procedures, changes in customer base and product mix, changes in the utilization of medical and/or other covered services, changes in medical cost trends, changes in our medical management practices and the introduction of new benefits and products. If we are not able to accurately and promptly anticipate and detect medical cost trends, our ability to take timely corrective actions to limit future costs and reflect our current benefit cost experience in our pricing process may be limited. Because establishing these reserves is an inherently uncertain process involving estimates of future losses, there can be no certainty that ultimate losses will not exceed existing medical claims reserves.

If we fail to develop and maintain satisfactory relationships with physicians, hospitals and other health service providers, our business and results of operations may be adversely affected.

We contract with physicians, hospitals and other health service providers and facilities to provide health services to our customers. Our results of operations are substantially dependent on our ability to contract for these services at competitive prices. In any particular market, physicians, hospitals and health service providers may enter into exclusive arrangements with competitors or simply refuse to contract with us, demand higher payments or take other actions that could result in higher medical costs or less desirable products or services for our customers. In some markets, certain providers, particularly hospitals, physician/hospital organizations and multi-specialty physician groups, may have significant or controlling market positions that could result in a diminished bargaining position for us. If providers refuse to contract with us, use their market position to negotiate more favorable contracts or place us at a competitive disadvantage, our ability to market products or to be profitable in those areas could be materially and adversely affected. Establishing collaborative arrangements with physician groups, specialist groups, independent practice associations, hospitals and health care delivery systems is key to our strategic focus to transition from volume-based fee-for-service arrangements to a value-based health care system. If such collaborative arrangements do not result in the lower medical costs that we project or if we fail to attract health care providers to such arrangements, or are less successful at implementing such arrangements than our competitors, our attractiveness to customers may be reduced and our ability to profitably grow our business may be adversely affected.

Our ability to develop and maintain satisfactory relationships with providers may also be negatively impacted by other factors not associated with us, such as changes in Medicare and/or Medicaid reimbursement levels, increasing pressure on revenue and other pressures on health care providers and increasing consolidation activity among hospitals, physician groups and providers. Continuing consolidation among physicians, hospitals and other providers, the emergence of accountable care organizations, vertical integration of providers and other entities, changes in the organizational structures chosen by physicians, hospitals and providers and new market entrants, including those not traditionally in the health care industry, may affect the way providers interact with us and may change the competitive landscape in which we operate. In some instances, these organizations may compete directly with us, potentially affecting the way we price our products and services or cause us to incur increased costs if we change our operations to be more competitive.

Out-of-network providers are not limited by any agreement with us in the amounts they bill. While benefit plans place limits on the amount of charges that will be considered for reimbursement, out-of-network providers have become increasingly sophisticated and aggressive and such limitations can be difficult to enforce. As a result, the outcome of disputes where we do not have a provider contract may cause us to pay higher medical or other benefit costs than we projected.

If we lose our relationship with one or more key pharmaceutical manufacturers, or if the payments made or discounts provided by pharmaceutical manufacturers decline, our business and results of operations could be adversely affected.

We maintain contractual relationships with numerous pharmaceutical manufacturers, which provide us with, among other things:

- discounts for drugs we purchase to be dispensed from our home delivery and specialty pharmacies;
- discounts, in the form of rebates, for drug utilization;
- fees for administering rebate programs, including invoicing, allocating and collecting rebates;
- fees for services provided to pharmaceutical manufacturers by our specialty pharmacies; and
- access to limited distribution specialty pharmaceuticals by our specialty pharmacies.

Our contracts with pharmaceutical manufacturers are typically non-exclusive and terminable on relatively short notice by either party. The consolidation of pharmaceutical manufacturers, the termination or material alteration of our contractual relationships, or our failure to renew such contracts on favorable terms could have a material adverse effect on our business and results of operations. In addition, arrangements between payors and pharmaceutical manufacturers have been the subject of debate in federal and state legislatures and various other public and governmental forums. Adoption of new laws, rules or regulations or changes in, or new interpretations of, existing laws, rules or regulations, relating to any of these programs could materially adversely affect our business and results of operations.

If significant changes occur within the pharmacy provider marketplace, or if other issues arise with respect to our pharmacy networks, including the loss of or adverse change in our relationship with one or more key pharmacy providers, our business and financial results could be impaired.

More than 68,000 retail pharmacies, which represent over 99% of all United States retail pharmacies, participated in one or more of our networks as of December 31, 2018. The ten largest retail pharmacy chains represent approximately 61% of the total number of stores in our largest network. In certain geographic areas of the United States, our networks may be comprised of higher concentrations of one or more large pharmacy chains. Contracts with retail pharmacies are generally non-exclusive and are terminable on relatively short notice by either party. If one or more of the larger pharmacy chains terminates its relationship with us, or is able to renegotiate terms substantially less favorable to us, our customers' access to retail pharmacies and/or our business could be materially adversely affected. The entry of one or more additional large pharmacy chains into the pharmacy benefit management business, the consolidation of existing pharmacy chains or increased leverage or market share by the largest pharmacy providers could increase the likelihood of negative changes in our relationship with such pharmacies. Changes in the overall composition of our pharmacy networks, or reduced pharmacy access under our networks, could have a negative impact on our claims volume and/or our competitiveness in the marketplace, which could cause us to fall short of certain guarantees in our contracts with clients or otherwise impair our business or results of operations.

Changes in drug pricing or industry pricing benchmarks could materially impact our financial performance.

Contracts in the prescription drug industry, including our contracts with retail pharmacy networks and our pharmacy and specialty pharmacy clients, generally use "average wholesale price" or "AWP," which is published by a third party, as a benchmark to establish pricing for prescription drugs. If AWP is no longer published by third parties, we adopt other pricing benchmarks for establishing prices within the industry or future changes in drug prices substantially deviate from our expectations, the short- or long-term impacts may have a material adverse effect on our business and results of operations.

As a global company, we face political, legal, operational, regulatory, economic and other risks that present challenges and could negatively affect our multinational operations and/or our long-term growth.

As a global company, our business is increasingly exposed to risks inherent in foreign operations. These risks can vary substantially by market, and include political, legal, operational, regulatory, economic and other risks, including government intervention that we do not face in our U.S. operations. The global nature of our business and operations may present challenges including, but not limited to, those arising from:

- geopolitical business conditions and demands, including the June 2016 referendum in the United Kingdom to leave the European Union;
- regulation that may discriminate against U.S. companies, favor nationalization or expropriate assets;
- price controls or other pricing issues and exchange controls; restrictions that prevent us from transferring funds out of the countries in which we operate; foreign currency exchange rates and fluctuations and restrictions on converting currencies from foreign operations into other currencies; uncertainty with respect to the interpretation of tax positions;
- reliance on local employees and interpretations of labor laws in foreign jurisdictions;
- managing our partner relationships in countries outside of the United States;
- providing data protection on a global basis and sufficient levels of technical support in different locations;
- the global trend for companies to enact local data residency requirements;
- acts of war, terrorism, natural disasters or pandemics in locations where we operate; and
- general economic and political conditions.

These factors may increase in significance as we continue to expand globally and operating in new foreign markets may require considerable management time before operations generate any significant revenues and earnings. Any one of these challenges could negatively affect our operations or long-term growth. For example, due to the concentration of our international business in South Korea, the International Markets segment is exposed to potential losses resulting from economic and regulatory changes in that country and the geopolitical climate in the Korean Peninsula, as well as foreign currency movements affecting the South Korean currency, that could have a significant impact on the segment's results and our consolidated financial results.

International operations also require us to devote significant resources to implement controls and systems in new markets to comply with, and to ensure that our vendors and partners comply with, U.S. and foreign laws prohibiting bribery, corruption and money laundering, in addition to other regulations regarding, among other things, our products, direct-to-consumer communications, customer privacy, data protection and data residency. Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or employees, restrictions or outright prohibitions on the conduct of our business and significant reputational harm. Our success depends, in part, on our ability to anticipate these risks and manage these challenges. Our failure to comply with laws and regulations governing our conduct outside the United States or to establish constructive relations with non-U.S. regulators could have a material adverse effect on our business, results of operations, financial condition, liquidity and long-term growth.

We are dependent on the success of our relationships with third parties for various services and functions.

To improve operating costs, productivity and efficiencies, we contract with third parties for the provision of specific services. Our operations may be adversely affected if a third party fails to satisfy its obligations to us, if the arrangement is terminated in whole or in part or if there is a

contractual dispute between us and the third party. Even though contracts are intended to provide certain protections, we have limited control over the actions of third parties. For example, noncompliance with any privacy or security laws and regulations, any security breach involving one of our third-party vendors or a dispute between us and a third-party vendor related to our arrangement could have a material adverse effect on our business, results of operations, financial condition, liquidity and reputation.

Outsourcing also may require us to change our existing operations, adopt new processes for managing these service providers and/or redistribute responsibilities to realize the potential productivity and operational efficiencies. If there are delays or difficulties in changing business processes or our third-party vendors do not perform as expected, we may not realize, or not realize on a timely basis, the anticipated economic and other benefits of these relationships. This could result in substantial costs or regulatory compliance issues, divert management's attention from other strategic activities, negatively affect employee morale or create other operational or financial problems for us. Terminating or transitioning in whole or in part arrangements with key vendors could result in additional costs or penalties, risks of operational delays or potential errors and control issues during the termination or transition phase. We may not be able to find an alternative vendor in a timely manner or on acceptable terms. If there is an interruption in business or loss of access to data resulting from a security breach, termination or transition in services, we may not be able to meet the demands of our customers and, in turn, our business and results of operations could be adversely impacted.

A significant disruption in service within our operations or among our key suppliers or other third parties could materially adversely affect our business and results of operations.

Our business is highly dependent upon our ability to perform, in an efficient and uninterrupted fashion, necessary business functions, such as claims processing and payment, internet support and customer call centers, data centers and corporate facilities, processing new and renewal business, maintaining appropriate shipment and storage conditions for prescriptions (such as temperature and protection from contamination) and mail order processing. In some instances, our ability to provide services or products (including processing and dispensing prescriptions) depends on the availability of services and products provided by suppliers, pharmaceutical manufacturers, vendors or shipping carriers. Any failure or disruption of our performance of, or our ability to perform, key business functions, including through unavailability or cyber-attack of our information technology systems or those of third parties, could cause slower response times, decreased levels of service satisfaction and harm to our reputation. In addition, because our information technology and other systems interface with and depend on third-party systems, we could experience service denials if demand for such service exceeds capacity or a third-party system fails or experiences an interruption. Our failure to implement adequate business continuity and disaster recovery strategies could significantly reduce our ability to provide products and services to our customers and clients, which could have material adverse effects on our business and results of operations.

Acquisitions, including our acquisition of Express Scripts, joint ventures and other transactions involve risks and we may not realize the expected benefits because of integration difficulties, underperformance relative to our expectations and other challenges.

As part of our growth strategy, we regularly consider and enter into strategic transactions, including mergers, acquisitions, joint ventures, licensing arrangements and other relationships (collectively referred to as "strategic transactions"). Our ability to achieve the anticipated benefits of these strategic transactions is subject to numerous uncertainties and risks, including our ability to integrate operations, resources and systems, including data security systems, in an efficient and effective manner.

The success of the Express Scripts acquisition will depend, in part, on our ability to successfully combine the businesses of Cigna and Express Scripts and realize the anticipated benefits, including synergies, cost savings, innovation and operational efficiencies, from the combination. This integration is a complex, costly and time-consuming process, which may divert management's attention from ongoing business concerns.

Key risks of the Express Scripts integration include, but are not limited to, retaining existing clients and attracting new clients on profitable terms; maintaining employee morale and retaining key management and other employees; integrating two unique corporate cultures; consolidating corporate and administrative infrastructures and realizing operational synergies; integrating information technology, communications programs, financial procedures and operations, and other systems, procedures and policies; coordinating geographically separate organizations; managing tax costs or inefficiencies associated with integrating the operations of the combined company; and necessary modifications to internal financial control standards.

Integration activities may result in additional and unforeseen expenses, and the anticipated benefits of integration, including with respect to Express Scripts, may not be fully realized or may take longer to realize than expected. Delays or issues encountered in the integration process could have a material adverse effect on the revenues, expenses, operating results and financial condition of the combined company.

Strategic transactions could result in increased costs, including facilities and systems consolidation costs and costs to retain key employees, decreases in expected revenues, earnings or cash flows, and goodwill or other intangible asset impairment charges. Additional unanticipated costs may be incurred in the integration of Express Scripts' businesses. Although we expect that the elimination of duplicative costs, as well as the realization of other efficiencies related to the integration of those businesses, should allow us to more than offset incremental transaction and merger-related costs over time, this net benefit may not be achieved in the near term, or at all. In addition, the trading price of our securities may decline if, among other things, we are unable to achieve the expected growth in earnings, if our operational cost savings estimates are not realized, or the transaction costs related to the acquisition and integration are greater than expected. The trading price also may decline if we do not achieve the perceived benefits of the acquisition as rapidly or to the extent anticipated by financial or industry analysts.

Further, we may finance strategic transactions by issuing common stock for some or all of the purchase price that could dilute the ownership interests of our shareholders, or by incurring additional debt that could impact our ability to access capital in the future.

In addition, effective internal controls are necessary to provide reliable and accurate financial reports and to mitigate the risk of fraud. The integration of businesses, including Express Scripts, is likely to cause increasing complexity in our systems and internal controls and make them more difficult to manage. Any difficulties in assimilating businesses into our control system could cause us to fail to meet our financial reporting

obligations. Ineffective internal controls could also cause investors to lose confidence in our reported financial information that could negatively impact the trading price of our securities and our access to capital.

Our business depends on our ability to effectively invest in, implement improvements to and properly maintain the uninterrupted operation and data integrity of our information technology and other business systems.

Our business is highly dependent on maintaining effective information systems as well as the integrity and timeliness of the data we use to serve our customers and health care professionals and to operate our business. If our data were found to be inaccurate or unreliable due to fraud or other error, or if we, or any of the third-party service providers we engage, were to fail to maintain information systems and data integrity effectively, we could experience operational disruptions that may impact our clients, customers and health care professionals and hinder our ability to provide services and products, establish appropriate pricing for products and services, retain and attract clients and customers, establish reserves and report financial results timely and accurately and maintain regulatory compliance, among other things.

Our information technology strategy and execution are critical to our continued success. We must continue to invest in long-term solutions that will enable us to anticipate customer needs and expectations, enhance the customer experience, act as a differentiator in the market and protect against cybersecurity risks and threats. Our success is dependent, in large part, on maintaining the effectiveness of existing technology systems and continuing to deliver and enhance technology systems that support our business processes in a cost-efficient and resource-efficient manner. Increasing regulatory and legislative changes will place additional demands on our information technology infrastructure that could have a direct impact on resources available for other projects tied to our strategic initiatives. In addition, recent trends toward greater consumer engagement in health care require new and enhanced technologies, including more sophisticated applications for mobile devices. Connectivity among technologies is becoming increasingly important. We must also develop new systems to meet current market standards and keep pace with continuing changes in information processing technology, evolving industry and regulatory standards and customer needs. Failure to do so may present compliance challenges and impede our ability to deliver services in a competitive manner. Further, because system development projects are long-term in nature, they may be more costly than expected to complete and may not deliver the expected benefits upon completion. Our failure to effectively invest in, implement improvements to and properly maintain the uninterrupted operation and data integrity of our information technology and other business systems could adversely affect our results of operations, financial position and cash flow.

As a large health service company, we are subject to cyber-attacks or other privacy or data security incidents. If we are unable to prevent or contain the effects of any such attacks, we may suffer exposure to substantial liability, reputational harm, loss of revenue or other damages.

Our business depends on our clients' and customers' willingness to entrust us with their health-related and other sensitive personal information. Computer systems may be vulnerable to physical break-ins, computer viruses or malware, programming errors, attacks by third parties or similar disruptive problems. We have been, and will likely continue to be, the target of computer viruses or other malicious codes, unauthorized access, cyber-attacks or other computer-related penetrations. There have been, and will likely continue to be, large scale cyber-attacks within the health service industry. As we increase the amount of personal information that we store and share digitally, our exposure to data security and related cybersecurity risks increases, including the risk of undetected attacks, damage, loss or unauthorized access or misappropriation of proprietary or personal information, and the cost of attempting to protect against these risks also increases. If disruptions or breaches are not detected quickly, their effect could be compounded. We have implemented security technologies, processes and procedures to protect consumer identity and provide employee awareness training around phishing, malware and other cyber risks; however, there are no assurances that such measures will be effective against all types of breaches.

Cyber-security threats are rapidly evolving and those threats and the means for obtaining access to our proprietary systems are becoming increasingly sophisticated. Cyber-attacks can originate from a wide variety of sources including third parties, such as external service providers, and the techniques used change frequently or are often not recognized until after they have been launched. Those parties may also attempt to fraudulently induce employees, customers or other users of our systems to disclose sensitive information in order to gain access to our data or that of our customers. In addition, while we have certain standards for all vendors that provide us services, our vendors, and in turn, their own service providers, may become subject to the same types of security breaches. Finally, our offices may be vulnerable to security incidents or security attacks, acts of vandalism or theft, misplaced or lost data, human error or similar events that could negatively affect our systems and our customers' and clients' data.

The costs to eliminate or address security threats and vulnerabilities before or after a cyber-incident could be significant. Our remediation efforts may not be successful and could result in interruptions, delays, or cessation of service and loss of existing or potential customers.

In addition, breaches of our security measures and the unauthorized dissemination of sensitive personal information or proprietary information or confidential information about us, our customers or other third-parties could expose our customers' private information and our customers to the risk of financial or medical identity theft. Unauthorized dissemination of confidential and proprietary information about our business and strategy also could negatively affect the achievement of our strategic initiatives. Such events could cause us to breach our contractual confidentiality obligations and violate applicable laws. These events would negatively affect our ability to compete, others' trust in us, our reputation, customer base and revenues and expose us to mandatory disclosure (including to the media), litigation and other enforcement proceedings, material fines, penalties and/or remediation costs, and compensatory, special, punitive and statutory damages, consent orders and other adverse actions, any of which could adversely affect our business, results of operations, financial condition or liquidity.

In managing medical practices and operating onsite clinics and other types of medical facilities, we may be subject to additional liability that could result in significant time and expense.

In addition to contracting with physicians and other health care providers for services, we employ physicians, nurses and other health care professionals at onsite low acuity and primary care practices and infusion clinics that we manage and operate for our customers, as well as certain clinics for our employees. We also provide in-home care through health care professionals that we employ, as well as, through third-party contractors. As such, we are subject to liability for negligent acts, omissions, or injuries occurring at one of these clinics or caused by one of our employees. The defense of any actions may result in significant expenses that could have a material adverse effect on our business, results of operations, financial condition, liquidity and reputation.

Legal and Compliance Risks

Our business is subject to substantial government regulation, as well as new laws or regulations or changes in existing laws or regulations that could have a material adverse effect on our business, results of operations, financial condition and liquidity.

Our business is regulated at the federal, state, local and international levels. The laws and rules governing our business and related interpretations are increasing in number and complexity, are subject to frequent change and can be inconsistent or in conflict with each other.

Noncompliance with applicable regulations by us or our third-party vendors could have material adverse effects on our business, results of operations, financial condition, liquidity and reputation.

We must identify, assess and respond to new trends in the legislative and regulatory environment, as well as comply with the various existing regulations applicable to our business. From time to time, certain legislative and/or regulatory proposals are made which seek to manage the health care industry, including managing prescription drug cost, regulating drug distribution and managing health records. The trading price of our securities may react to the announcement of such proposals. We are unable to predict whether any such policies or proposals will be enacted, or the specific terms thereof. Certain of these policies or proposals could, if enacted, adversely impact our business and results of operations.

Existing or future laws, rules, regulatory interpretations or judgments could force us to change how we conduct our business, affect the products and services we offer, restrict revenue and enrollment growth, increase our costs, including operating, health care technology and administrative costs, and require enhancements to our compliance infrastructure and internal controls environment. We are required to obtain and maintain insurance and other regulatory approvals to market many of our products, increase prices for certain regulated products and consummate some of our acquisitions and dispositions. Delays in obtaining or failure to obtain or maintain these approvals could reduce our revenue or increase our costs. Existing or future laws and rules could also require or lead us to take other actions such as changing our business practices, and could increase our liability.

Further, failure to effectively implement or adjust our strategic and operational initiatives, such as by reducing operating costs, adjusting premium pricing or benefit design or transforming our business model in response to regulatory changes may have a material adverse effect on our results of operations, financial condition and cash flows, including, but not limited to, our ability to maintain the value of our goodwill and other intangible assets.

For more information on regulations to which we are subject, see "Business – Regulation" in Part I, Item 1 of this Form 10-K.

There are various risks associated with participating in government-sponsored programs, such as Medicare, including dependence upon government funding, compliance with government contracts and increased regulatory oversight.

Through our Government business, we contract with CMS and various state governmental agencies to provide managed health care services including Medicare Advantage plans and Medicare-approved prescription drug plans. If we fail to comply with CMS's contractual requirements, including data submission, enrollment and marketing, provider network adequacy, provider directory accuracy, quality measures, claims payment, continuity of care and call center performance, we may be subject to administrative actions, fines or other penalties that could impact our profitability.

Revenues from Medicare programs are dependent, in whole or in part, upon annual funding from the federal government through CMS and/or applicable state or local governments. Funding for these programs is dependent on many factors outside our control including general economic conditions, continuing government efforts to contain health care costs and budgetary constraints at the federal or applicable state or local level and general political issues and priorities. These entities generally have the right to not renew or cancel their contracts with us on short notice without cause or if funds are not available. Unanticipated changes in funding, such as the application of sequestration by the federal or state governments or the failure to provide for continued appropriations or regular ongoing scheduled payments to us, could substantially reduce our revenues and profitability.

The Medicare program has been the subject of regulatory reform initiatives. The premium rates paid to Medicare Advantage plans and Medicare Part D plans are established by contract, although the rates differ depending on a combination of factors, many of which are outside our control. The Star Rating system is subject to change annually by CMS, which may make it more difficult to achieve four stars or greater. A plan's Star Rating affects its image in the market and plans that perform well are able to market more effectively and for longer periods of time than other plans. Our Medicare Advantage plans' and Medicare Part D plans' operating results, premium revenue and benefit offerings are likely to continue to be significantly determined by their Star Ratings. A portion of each Medicare Advantage plan's reimbursement is tied to the plan's Star Rating, with those plans receiving a rating of four or more stars eligible for quality-based bonus payments. There can be no assurances that we will be successful in maintaining or improving our Star Ratings in future years. In addition, audits of our performance for past or future periods may result in downgrades to our Star Ratings. Accordingly, our plans may not be eligible for full level quality bonuses,

which could adversely affect the benefits such plans can offer, reduce membership and/or impact our financial performance. See Part II, Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Information – Health Care Industry Developments and Other Matters Affecting our Global Health Care Segment for additional information on our Star Ratings.

On November 1, 2018, CMS released a proposed rule that would revise its Risk Adjustment Data Validation methodology by, among other things, excluding an adjustment for underlying fee-for-service data errors and extrapolating RADV results at the contract level. If adopted in its current form, the rule could have a detrimental impact to all Medicare Advantage insurers and affect the ability of plans to deliver high quality health care for the population served. While it is uncertain that CMS will issue the rule as proposed, if adopted, it could have a material impact on the Company's future results of operations.

Our participation in health insurance exchanges for individuals and small employers involves uncertainties associated with mix and volume of business and could adversely affect our results of operations, financial position and cash flows. The executive order signed in October 2017 that halted payment of the cost sharing reduction subsidies has created additional uncertainty regarding the future of public health insurance exchanges. Risk adjustment balances are subject to audit and adjustment by CMS.

Any failure to comply with various state and federal health care laws and regulations, including those directed at preventing fraud and abuse in government funded programs, could result in investigations or litigation, such as actions under the federal False Claims Act and similar whistleblower statutes under state laws. This could subject us to damage awards, fines, penalties or other enforcement actions, restrictions on our ability to market or enroll new customers, limits on expansion, restrictions or exclusions from programs or other agreements with federal or state governmental agencies, which could adversely impact our business, cash flows, financial condition, results of operations and reputation.

We face risks related to litigation, regulatory audits and investigations.

We are routinely involved in numerous claims, lawsuits, regulatory audits, investigations and other legal matters arising, for the most part, in the ordinary course of business, including that of administering and insuring employee benefit programs. These legal matters could include benefit claims, breach of contract actions, tort claims, claims arising from consumer protection laws, false claims act laws, claims disputes under federal or state laws and disputes regarding reinsurance arrangements, employment and employment discrimination-related suits, antitrust claims, employee benefit claims, wage and hour claims, tax, privacy, intellectual property and whistleblower claims, shareholder suits and other securities law claims and real estate disputes. In addition, we have incurred and likely will continue to incur liability for practices and claims related to our health care business, such as marketing misconduct, failure to timely or appropriately pay for or provide health care, provider network structure, poor outcomes for care delivered or arranged, provider disputes including disputes over compensation or contractual provisions, ERISA claims, allegations related to calculations of cost sharing and claims related to our administration of self-funded business. There are currently, and may be in the future, attempts to bring class action lawsuits against the company and other companies in our industry; individual plaintiffs also may bring multiple claims regarding the same subject matter against us and other companies in our industry.

Court decisions and legislative activity may increase our exposure for any of these types of claims. In some cases, substantial non-economic or punitive damages may be sought. We seek to procure insurance coverage to cover some of these potential liabilities. However, certain potential liabilities may not be covered by insurance, insurers may dispute coverage or the amount of insurance may be insufficient to cover the entire damages awarded. In addition, certain types of damages, such as punitive damages, may not be covered by insurance, and insurance coverage for all or certain forms of liability may become unavailable or prohibitively expensive in the future. It is possible that the resolution of current or future legal matters and claims could result in changes to our industry and business practices, losses material to our results of operations, financial condition and liquidity or damage to our reputation.

We are frequently the subject of regulatory market conduct and other reviews, audits and investigations by state insurance and health and welfare and pharmacy departments, attorneys general, CMS and the OIG and comparable authorities in foreign jurisdictions. With respect to our Medicare Advantage and Medicare Part D businesses, CMS and OIG perform audits to determine a health plan's compliance with federal regulations and contractual obligations, including compliance with proper coding practices and fraud and abuse enforcement practices through audits designed to detect and correct improper payments. The Department of Justice is conducting an industry review of the risk adjustment data submission practices and business processes, including review of medical charts, of Cigna and a number of other Medicare Advantage organizations under Medicare Parts C and D. There also continues to be heightened review by federal and state regulators of business and reporting practices within the health service, disability and life insurance industries, including with respect to claims payment and related escheat practices, and increased scrutiny by other state and federal governmental agencies (such as state attorneys general) empowered to bring criminal actions in circumstances that could have previously given rise only to civil or administrative proceedings.

In addition, various governmental agencies have conducted investigations and audits into certain pharmacy benefit management practices. Many of these investigations and audits have resulted in other companies agreeing to civil penalties, including the payment of money and corporate integrity agreements. We cannot predict what effect, if any, such governmental investigations and audits may ultimately have on us or on the industry in general. However, we may experience government scrutiny and audit activity which may result in the payment or offset of prior reimbursements from the government.

Regulatory audits or reviews or actions by other governmental agencies could result in changes to our business practices, retroactive adjustments to certain premiums, significant fines, penalties, civil liabilities, criminal liabilities or other sanctions, including restrictions on our ability to market certain products or engage in business-related activities, that could have a material adverse effect on our business, results of operation, financial condition and liquidity. In addition, disclosure of an adverse investigation or audit or the imposition of fines or other sanctions could negatively affect our reputation in certain markets and make it more difficult for us to sell our products and services.

A description of material pending legal actions and other legal and regulatory matters is included in Note 19 to our Consolidated Financial Statements included in this Form 10-K. The outcome of litigation and other legal or regulatory matters is always uncertain.

If we fail to comply with applicable privacy, security and data laws, regulations and standards, our business and reputation could be materially and adversely affected.

Most of our activities involve the receipt, use, storage or transmission of a substantial amount of individuals' protected health information and personally identifiable information. We also use aggregated and anonymized data for research and analysis purposes, and in some cases, provide access to such data to pharmaceutical manufacturers and third-party data aggregators and analysts. The collection, maintenance, protection, use, transmission, disclosure and disposal of sensitive personal information are regulated at the federal, state, international and industry levels and requirements are imposed on us by contracts with clients. In some cases, such laws, rules, regulations and contractual requirements also apply to our vendors and require us to obtain written assurances of their compliance with such requirements or may hold us liable for any violations by our vendors. We are also subject to various other consumer protection laws that regulate our communications with customers. Certain of our businesses are also subject to the Payment Card Industry Data Security Standard, which is designed to protect credit card account data as mandated by payment card industry entities. International laws, rules and regulations governing the use and disclosure of such information, such as the GDPR, are generally more stringent than in the United States, and they vary across jurisdictions.

These laws, rules, and contractual requirements are subject to change. Compliance with new privacy, security and data laws, regulations and requirements may result in increased operating costs, and may constrain or require us to alter our business model or operations. For example, the HITECH amendments to HIPAA may further restrict our ability to collect, disclose and use sensitive personal information and may impose additional compliance requirements on our business.

HIPAA requires covered entities to comply with the HIPAA privacy, security and breach rules. In addition, business associates must comply with the HIPAA security and breach requirements. While we provide for appropriate protections through our contracts with our third-party service providers and in certain cases assess their security controls, we have limited oversight or control over their actions and practices. Several of our businesses act as business associates to their covered entity customers and, as a result, collect, use, disclose and maintain sensitive personal information in order to provide services to these customers. HHS has continued its audit program to assess HIPAA compliance efforts by covered entities and has expanded it to include business associates. In addition, HHS has increased its enforcement efforts. These efforts can result in enforcement actions that are the result of investigations brought on by the notification to HHS of a breach. An audit resulting in findings or allegations of noncompliance or the implementation of an enforcement action could have an adverse effect on our results of operations, financial position, cash flows and reputation.

Effective prevention, detection and control systems are critical to maintain regulatory compliance and prevent fraud and failure of these systems could adversely affect us.

Federal and state governments have made investigating and prosecuting health care and other insurance fraud and abuse a priority. Fraud and abuse prohibitions encompass a wide range of activities including kickbacks for referral of customers, billing for unnecessary medical services, improper marketing and violations of patient privacy rights. The regulations and contractual requirements applicable to us are complex and subject to change. In addition, ongoing vigorous law enforcement, a highly technical regulatory scheme and the Dodd-Frank Act legislation and related regulations enhance regulators' enforcement powers and whistleblower incentives and protections. Our compliance efforts in this area will continue to require significant resources. Failure of our prevention, detection or control systems related to regulatory compliance or the failure of employees to comply with our internal policies including data systems security or unethical conduct by managers and employees, could adversely affect our reputation and also expose us to litigation and other proceedings, fines and penalties.

In addition, provider or customer fraud that is not prevented or detected could impact our medical costs or those of our self-insured clients. Further, during an economic downturn, we may experience increased fraudulent claims volume that may lead to additional costs due to an increase in disputed claims and litigation.

Economic Risks

Significant stock market or interest rate declines could result in additional unfunded pension obligations resulting in the need for additional plan funding by us and increased pension expenses.

We currently have unfunded obligations in our frozen pension plans. A significant decline in the value of the plans' equity and fixed income investments or unfavorable changes in applicable laws or regulations could materially increase our expenses and change the timing and amount of required plan funding. This could reduce the cash available to us, including our subsidiaries. We are also exposed to interest rate and equity risk associated with our pension and other post-retirement obligations. Sustained declines in interest rates could have an adverse impact on the funded status of our pension plans and our reinvestment yield on new investments. See Note 13 to our Consolidated Financial Statements for more information on our obligations under the pension plans.

Significant changes in market interest rates affect the value of our financial instruments that promise a fixed return or benefit and the value of particular assets and liabilities.

As an insurer, we have substantial investment assets that support insurance and contractholder deposit liabilities. Generally low levels of interest rates on investments, such as those experienced in U.S. and foreign financial markets during recent years, have negatively impacted our level of investment income earned in recent periods.

A substantial portion of our investment assets are in fixed interest-yielding debt securities of varying maturities, fixed redeemable preferred securities and commercial mortgage loans. The value of these investment assets can fluctuate significantly with changes in market conditions. A rise in interest rates would likely reduce the value of our investment portfolio and increase interest expense if we were to access our available lines of credit.

A downgrade in the financial strength ratings of our insurance subsidiaries could adversely affect new sales and retention of current business, and a downgrade in our debt ratings would increase the cost of borrowed funds and could negatively affect our ability to access capital.

Financial strength, claims paying ability and debt ratings by recognized rating organizations are each important factors in establishing the competitive position of insurance and health benefits companies. Ratings information by nationally recognized ratings agencies is broadly disseminated and generally used throughout the industry. We believe that the claims paying ability and financial strength ratings of our principal insurance subsidiaries are important factors in marketing our products to certain customers. Our debt ratings impact both the cost and availability of future borrowings and, accordingly, our cost of capital. Each of the rating agencies reviews ratings periodically and there can be no assurance that current ratings will be maintained in the future. A downgrade of any of these ratings in the future could make it more difficult to either market our products successfully or raise capital to support business growth within our insurance subsidiaries.

Global market, economic and geopolitical conditions may cause fluctuations in equity market prices, interest rates and credit spreads that could impact our ability to raise or deploy capital and affect our overall liquidity.

If the equity and credit markets experience extreme volatility and disruption, there could be downward pressure on stock prices and restricted access to capital for certain issuers without regard to those issuers' underlying financial strength. Extreme disruption in the credit markets could adversely impact our access to, and cost of, capital in the future.

In the event of adverse economic and industry conditions, we may be required to dedicate a greater percentage of our cash flow from operations to the payment of principal and interest on our debt, thereby reducing the funds we have available for other purposes, such as investments and other expenditures in ongoing businesses, acquisitions, dividends and stock repurchases. In these circumstances, our ability to execute our strategy may be limited, our flexibility in planning for or reacting to changes in business and market conditions may be reduced, or our access to capital markets may be limited such that additional capital may not be available or may be available only on unfavorable terms.

In connection with the combination with Express Scripts, we have considerably higher levels of indebtedness than Cigna and Express Scripts previously carried, which will result in higher relative debt service costs and less cash flow from operations available to fund growth, stock repurchases and other corporate purposes during our deleveraging process.

The long-term indebtedness of Cigna was approximately $39.5 billion as of December 31, 2018. This level of indebtedness:

- requires us to dedicate a greater percentage of our cash flow from operations to debt payments, thereby reducing the availability of cash flow to fund capital expenditures, pursue other acquisitions or investments in new technologies, make stock repurchases, pay dividends and for general corporate purposes;
- increases our vulnerability to general adverse economic conditions, including increases in interest rates for our borrowings that bear interest at variable rates and are in a greater amount than floating rate assets held, or if such indebtedness is refinanced at a time when interest rates are higher; and
- limits our flexibility in planning for, or reacting to, changes in or challenges relating to our business and industry.

The covenants to which we have agreed in connection with the financing, and our indebtedness and higher debt-to-equity ratio in comparison to that of Cigna or Express Scripts on a recent historical basis, may have the effect, among other things, of restricting our financial and operating flexibility to respond to changing business and economic conditions, creating competitive disadvantages compared to other competitors with lower debt levels during the deleveraging process.

Unfavorable developments in economic conditions may adversely affect our business, results of operations and financial condition.

Many factors, including geopolitical issues, future economic downturns, availability and cost of credit and other capital and consumer spending can negatively impact the U.S. and global economies. Our results of operations could be materially and adversely affected by the impact of unfavorable economic conditions on our customers (both employers and individuals), health care providers, pharmacy manufacturers, pharmacy providers and third-party vendors. For example:

- Employers may take action to reduce their operating costs by modifying, delaying or canceling plans to purchase our products or making changes in the mix of products purchased that are unfavorable to us.
- Higher unemployment rates and workforce reductions could result in lower enrollment in our employer-based plans (including an increase in the number of employees who opt out of employer-based plans) or our individual plans.
- Because of unfavorable economic conditions or the ACA, employers may stop offering health care coverage to employees or elect to offer this coverage on a voluntary, employee-funded basis as a means to reduce their operating costs.
- Our historical disability claim experience and industry data indicate that submitted disability claims rise under adverse economic conditions.
- If clients are not successful in generating sufficient funds or are precluded from securing financing, they may not be able to pay, or may delay payment of, accounts receivable that are owed to us.
- Our clients or potential clients may force us to compete more vigorously on factors such as price and service to retain or obtain their business.

- Our clients may be acquired, consolidated, or otherwise fail to successfully maintain or grow their business or workforce which could reduce the number of customers we serve or otherwise result in lower than anticipated utilization of our services.
- A prolonged unfavorable economic environment could adversely impact the financial position of hospitals and other health care providers, potentially increasing our medical costs as these providers attempt to maintain revenue levels in their efforts to adjust to their own economic challenges.
- Our third-party vendors could significantly and quickly increase their prices or reduce their output to reduce their operating costs. Our business depends on our ability to perform necessary business functions in an efficient and uninterrupted fashion.

These factors could lead to a decrease in our customer base, revenues or margins and/or an increase in our operating costs.

In addition, during a prolonged unfavorable economic environment, state and federal budgets could be materially and adversely affected, resulting in reduced or delayed reimbursements or payments in state and federal government programs such as Medicare and Social Security or under contracts with government entities. These state and federal budgetary pressures also could cause the government to impose new or a higher level of taxes or assessments on us, such as premium taxes on insurance companies and HMOs and surcharges or fees on select fee-for-service and capitated medical claims. Although we could attempt to mitigate or cover our exposure from such increased costs through, among other things, increases in premiums, there can be no assurance that we will be able to mitigate or cover all of such costs, which may have a material adverse effect on our business, results of operations, financial condition and liquidity.

We are subject to the credit risk of our reinsurers.

We enter into reinsurance arrangements with other insurance companies, primarily to limit losses from large exposures or to permit recovery of a portion of direct losses. We also may enter into reinsurance arrangements in connection with acquisition or divestiture transactions when the underwriting company is not being acquired or sold.

Under all reinsurance arrangements, reinsurers assume insured losses, subject to certain limitations or exceptions that may include a loss limit. These arrangements also subject us to various obligations, representations and warranties with the reinsurers. Reinsurance does not relieve us of liability as the originating insurer. We remain liable to the underlying policyholders if a reinsurer defaults on obligations under the reinsurance arrangement. Although we regularly evaluate the financial condition of reinsurers to minimize exposure to significant losses from reinsurer insolvencies, reinsurers may become financially unsound. If a reinsurer fails to meet its obligations under the reinsurance contract or if the liabilities exceed any applicable loss limit, we will be forced to cover the claims on the reinsured policies.

The collectability of amounts due from reinsurers is subject to uncertainty arising from a number of factors, including whether the insured losses meet the qualifying conditions of the reinsurance contract, whether reinsurers or their affiliates have the financial capacity and willingness to make payments under the terms of the reinsurance contract and the magnitude and type of collateral supporting our reinsurance recoverable, such as holding sufficient qualifying assets in trusts or letters of credit issued. Although a portion of our reinsurance exposures are secured, the inability to collect a material recovery from a reinsurer could have a material adverse effect on our results of operations, financial condition and liquidity.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Our global real estate portfolio consists of approximately 13.3 million square feet of owned and leased properties. Our domestic portfolio has approximately 11.3 million square feet in 43 states, the District of Columbia, Puerto Rico and the U.S. Virgin Islands. Our international properties contain approximately 2.0 million square feet located throughout the following countries: Australia, Belgium, Canada, China, Hong Kong, India, Indonesia, Kenya, Kuwait, Lebanon, Malaysia, New Zealand, Oman, Singapore, South Korea, Spain, Switzerland, Taiwan, Thailand, Turkey, United Arab Emirates, and the United Kingdom.

Our principal domestic office locations include the Wilde Building located at 900 Cottage Grove Road in Bloomfield, Connecticut (our corporate headquarters), Two Liberty Place located at 1601 Chestnut Street in Philadelphia, Pennsylvania, and Express Scripts' corporate offices located at and around One Express Way in St. Louis, Missouri. The Wilde Building measures approximately 893,000 square feet and is owned. Express Scripts' campus measures approximately 1.2 million square feet of leased space and Two Liberty Place measures approximately 322,000 square feet and is leased space.

The home delivery pharmacy operations of Express Scripts consist of five non-dispensing order processing pharmacies, five patient contact centers and four high-volume automated mail order dispensing pharmacies located throughout the United States. Express Scripts' mail order dispensing pharmacies are located in Arizona, Indiana, Missouri and New Jersey. Express Scripts also has seven specialty home delivery pharmacies and 20 specialty branch pharmacies.

We believe our properties are adequate and suitable for our business as presently conducted. The foregoing does not include information on investment properties.

ITEM 3. Legal Proceedings

The information contained under "Litigation Matters" and "Regulatory Matters" in Note 19 to our Financial Statements beginning on page 115 of this Form 10-K, is incorporated herein by reference.

EXECUTIVE OFFICERS OF THE REGISTRANT

All officers are elected to serve for a one-year term or until their successors are elected. Principal occupations and employment during the past five years are listed below.

LISA R. BACUS, 54, Executive Vice President and Chief Marketing Officer of Cigna beginning May 2013 and Chief Customer Officer beginning February 2017; Executive Vice President and Chief Marketer at American Family Insurance from February 2008 until May 2013.

MARK L. BOXER, 59, Executive Vice President and Chief Information Officer of Cigna beginning April 2011; Deputy Chief Information Officer, Xerox Corporation; and Group President, Government Health Care, for Xerox Corporation/Affiliated Computer Services from March 2009 until April 2011.

DAVID M. CORDANI, 53, Chief Executive Officer of Cigna beginning December 2009; Director since October 2009; President beginning June 2008; and Chief Operating Officer from June 2008 until December 2009.

BRIAN C. EVANKO, 42, President, Government Business beginning November 2017; President, U.S. Individual Business from August 2013 to November 2017; Business Financial Officer, Cigna Global Individual, Health, Life and Accident from September 2012 to August 2013; Chief Actuary, Cigna Global Individual, Health, Life and Accident from December 2008 to September 2012.

NICOLE S. JONES, 48, Executive Vice President and General Counsel of Cigna beginning June 2011; Senior Vice President and General Counsel of Lincoln Financial Group from May 2010 until June 2011; Vice President and Deputy General Counsel of Cigna from April 2008 until May 2010; and Corporate Secretary of Cigna from September 2006 until April 2010.

MATTHEW G. MANDERS, 57, President, Strategy and Solutions beginning November 2018; President, Government & Individual Programs and Group Insurance from February 2017 through November 2017; President, U.S. Markets from June 2014 until February 2017; President, Regional and Operations from November 2011 until June 2014; President, U.S. Service, Clinical and Specialty from January 2010 until November 2011; and President, Cigna HealthCare, Total Health, Productivity, Network & Middle Market from June 2009 until January 2010.

STEVEN B. MILLER, 61, Executive Vice President and Chief Clinical Officer beginning December 2018; Senior Vice President and Chief Medical Officer of Express Scripts from October 2007 through December 2018.

JOHN M. MURABITO, 60, Executive Vice President, Human Resources and Services of Cigna beginning August 2003.

ERIC P. PALMER, 42, Executive Vice President and Chief Financial Officer beginning June 2017; Deputy Chief Financial Officer from February 2017 until June 2017; Senior Vice President, Chief Business Financial Officer from November 2015 to February 2017; Vice President, Business Financial Officer, Health Care from April 2012 to November 2015; and Vice President, Business Financial Officer, U.S. Commercial Markets from June 2010 to April 2012.

JASON D. SADLER, 50, President, International Markets beginning June 2014; President, Global Individual Health, Life and Accident from July 2010 until June 2014; and Managing Director Insurance Business Hong Kong, HSBC Insurance Asia Limited from January 2007 until July 2010.

MICHAEL W. TRIPLETT, 57, President, U.S. Markets beginning February 2017; Regional Segment Lead from June 2009 to February 2017.

TIMOTHY C. WENTWORTH, 58, President, Health Services beginning December 2018; Chief Executive Officer of Express Scripts from May 2016 until December 2018; President from February 2014 through December 2018; and Senior Vice President and President, Sales and Account Management from April 2012 until February 2014.

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The information under the caption "Quarterly Financial Data – Stock and Dividend Data" appears on page 129 of this Form 10-K. As of December 31, 2018, the number of shareholders of record was 38,262. Cigna's common stock is listed with, and trades on, the New York Stock Exchange under the symbol "CI".

Issuer Purchases of Equity Securities

The following table provides information about Cigna's share repurchase activity for the quarter ended December 31, 2018:

Period	Total # of shares purchased [1]	Average price paid per share	Total # of shares purchased as part of publicly announced program [2]	Approximate dollar value of shares that may yet be purchased as part of publicly announced program [3]
October 1-31, 2018	408	$ 213.81	—	$ 2,723,207,261
November 1-30, 2018	2,399	$ 217.59	—	$ 2,723,207,261
December 1-31, 2018	568,958	$ 183.94	288,644	$ 946,464,758
Total	571,765	$ 183.04	288,644	N/A

(1) Represents shares tendered by employees under the Company's equity compensation plans as follows: 1) payment of taxes on vesting of restricted stock and strategic performance shares and 2) payment of the exercise price and taxes for certain stock options exercised. Employees tendered 408 shares in October, 2,399 shares in November and 280,314 shares in December 2018.

(2) Additionally, the Company maintains a share repurchase program, authorized by the Board of Directors. Under this program, the Company may repurchase shares from time to time, depending on market conditions and alternate uses of capital. The timing and actual number of shares repurchased will depend on a variety of factors, including price, general business and market conditions and alternate uses of capital. The share repurchase program may be effected through Rule 10b5-1 plans, open market purchases or privately negotiated transactions, each in compliance with Rule 10b-18 under the Securities Exchange Act of 1934, as amended. The program may be suspended or discontinued at any time. In 2018, the Company repurchased approximately 1.6 million shares for $330 million. On December 20, 2018, in connection with the merger with Express Scripts, the remaining authority of approximately $2.7 billion expired. The Board re-authorized $1 billion of share repurchase at that time. Remaining authorization under the program was approximately $950 million as of December 31, 2018. From January 1, 2019 through February 27, 2019, the Company repurchased 1.9 million shares for approximately $356 million, leaving the remaining repurchase authority at $590 million as of February 27, 2019.

(3) Approximate dollar value of shares is as of the last date of the applicable month.

Five Year Cumulative Total Shareholder Return*
December 31, 2013 – December 31, 2018

	12/31/2013	12/31/2014	12/31/2015	12/31/2016	12/31/2017	12/31/2018
Cigna	$ 100	$ 118	$ 167	$ 153	$ 232	$ 217
S&P 500	$ 100	$ 114	$ 115	$ 129	$ 157	$ 150
S&P Managed Health Care, Life & Health Ins. Indexes**	$ 100	$ 126	$ 146	$ 176	$ 245	$ 260

* *Assumes that the value of the investment in Cigna common stock and each index was $100 on December 31, 2013 and that all dividends were reinvested.*

** *Weighted average of S&P Managed Health Care (75%) and Life and Health Insurance (25%) Indexes.*

ITEM 6. Selected Financial Data

The selected financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the Consolidated Financial Statements and accompanying notes included elsewhere herein.

Highlights

(Dollars in millions, except per share amounts)	2018	2017	2016	2015	2014

Long-term debt	**$ 39,523**	$ 5,199	$ 4,756	$ 5,020	$ 4,979
Total liabilities	**$ 112,154**	$ 47,999	$ 45,605	$ 45,005	$ 45,021
Shareholders' equity	**$ 41,028**	$ 13,711	$ 13,699	$ 12,011	$ 10,750

(1) Effective January 1, 2018, the Company adopted Accounting Standards Update 2014-09 and related amendments that provided updated guidance on revenue recognition. This new guidance was adopted retrospectively and, accordingly, prior year amounts have been adjusted. See Note 2 to the Consolidated Financial Statements for additional information.

(2) Effective December 31, 2018, as a result of the acquisition of Express Scripts (see Note 3 to the Consolidated Financial Statements), the Company adopted Article 5 of Regulation S-X issued by the Securities and Exchange Commission. As a result, realized investment results are no longer included in revenues. Prior year revenues have been adjusted to conform to the new presentation.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to provide information to assist you in better understanding and evaluating our financial condition and results of operations. We encourage you to read this MD&A in conjunction with our Consolidated Financial Statements included in Part II, Item 8 of this Annual Report on Form 10-K ("Form 10-K") and the "Risk Factors" contained in Part I, Item 1A of this Form 10-K.

Unless otherwise indicated, financial information in the MD&A is presented in accordance with accounting principles generally accepted in the United States of America ("GAAP"). See Note 2 to our Consolidated Financial Statements for additional information regarding the Company's significant accounting policies. In some of our financial tables in this MD&A, we present either percentage changes or "N/M" when those changes are so large as to become not meaningful. Changes in percentages are expressed in basis points ("bps").

In this MD&A, our consolidated measures "adjusted income from operations," earnings per share on that same basis, and "adjusted revenues" are not determined in accordance with GAAP and should not be viewed as substitutes for the most directly comparable GAAP measures "shareholders' net income," "earnings per share" and "total revenues." As discussed in Note 21, we also use pre-tax adjusted income from operations and adjusted revenues to measure the results of our segments.

We use adjusted income from operations as our principal financial measure of operating performance because management believes it best reflects the underlying results of our business operations and permits analysis of trends in underlying revenue, expenses and profitability. We define adjusted income from operations as shareholders' net income (or income before taxes for the segment metric) excluding realized investment gains and losses, amortization of acquired intangible assets, results of Anthem, Inc. and Coventry Health Care Inc. ("Coventry") (collectively, the "transitioning clients") (see the "Key Transactions and Developments" section of the MD&A for further discussion of transitioning clients) and special items. Beginning in 2018, Cigna's share of certain realized investment results of its joint ventures reported using the equity method of accounting are also excluded. Income or expense amounts excluded from adjusted income from operations because they are not indicative of underlying performance or the responsibility of operating segment management include:

- *Realized investment gains (losses), including changes in market values of certain financial instruments between balance sheet dates, as well as gains and losses associated with invested asset sales.*
- *Amortization of acquired intangible assets, because these relate to costs incurred for acquisitions.*
- *Results of transitioning clients, because those results are not indicative of ongoing results.*
- *Special items, if any, that management believes are not representative of the underlying results of operations due to the nature or size of these matters. See Note 21 to the Consolidated Financial Statements for descriptions of special items.*

Adjusted revenues is defined as total revenues excluding the following adjustments: revenue contributions from transitioning clients, special items and, beginning in 2018, Cigna's share of certain realized investment results of its joint ventures reported using the equity method of accounting.

Executive Overview

Cigna Corporation, together with its subsidiaries (either individually or collectively referred to as "Cigna," the "Company," "we," "our" or "us") is a global health service organization dedicated to a mission of helping those we serve improve their health, well-being and peace of mind. Our evolved strategy in support of our mission is ***Go Deeper, Go Local, Go Beyond*** using a differentiated set of medical, pharmacy, dental, disability, life and accident insurance and related products and services offered by our subsidiaries. For further information on our business and strategy, see Item 1, "Business" in this Form 10-K.

As described more fully in Note 3 to our Consolidated Financial Statements, on March 8, 2018, we entered into a merger agreement with Express Scripts Holding Company ("Express Scripts"). Following entry into the merger agreement and throughout the pendency of the transaction, Cigna and Express Scripts designed integration plans to implement a new management and business reporting structure for the combined company upon closing. On December 20, 2018, we completed the acquisition of Express Scripts and, our segments have changed effective in the fourth quarter of 2018. See Note 1 to our Consolidated Financial Statements for a description of our segments. Prior year financial information has been restated to reflect this new segment presentation. Additionally, as described further in Note 2 to the

Consolidated Financial Statements, we adopted Article 5 of Regulation S-X issued by the Securities and Exchange Commission effective December 31, 2018. Results of 2018 include 11 days of Express Scripts activity beginning December 21.

Financial Summary

Summarized below are certain key measures of our performance for the years ended December 31:

	For the Years Ended December 31,			Increase (Decrease)	Increase (Decrease)
(Dollars in millions, except per share amounts)	**2018**	**2017**	**2016**	**2018 vs. 2017**	**2017 vs. 2016**
Revenues					
Adjusted revenues by segment					
Integrated Medical	**$ 32,791**	$ 29,035	$ 27,395	13%	6%
Health Services	**6,606**	4,241	4,066	56	4

Earnings and Revenue Commentary

Shareholders' net income increased in 2018 compared with 2017, primarily driven by a lower effective tax rate. Income before income taxes was essentially flat, reflecting higher adjusted income from operations, largely offset by reduced realized investment results and higher special item charges due to transaction costs associated with the Express Scripts acquisition. In 2017, the increase in shareholders' net income as compared to 2016 was due to higher adjusted income from operations, with special item charges for debt extinguishment costs and charges resulting from U.S. Tax reform partially offsetting the increase.

Adjusted income from operations increased in 2018 compared with 2017, primarily due to earnings growth across all of our segments, including contributions from the acquired Express Scripts business and the lower effective tax rate in 2018. In 2017, the increase in adjusted income from operations compared with 2016 was due to earnings growth across all of our segments.

Medical customers increased in both 2018 and 2017, compared with each prior year primarily resulting from growth in the Commercial and Government segments. See the Integrated Medical segment section for additional discussion.

Revenues increased in both 2018 and 2017, primarily due to business growth in the Integrated Medical and International Markets segments. In 2018, revenues from the acquired Express Scripts business of $2.6 billion also contributed to the increase. Detailed revenue items are discussed further below.

- ***Premiums*** increased in 2018 compared with 2017, primarily reflecting customer growth in Integrated Medical including contributions from specialty products as well as growth in International Markets. Also contributing to the increase were higher premium rates in our Integrated Medical segment driven by: 1) underlying medical trend; 2) suspension of the government's cost share reduction subsidies; and 3) resumption of the health insurance industry tax. The increase in 2017 compared with 2016 primarily resulted from customer growth in the Commercial segment and in International Markets, partially offset by decreases in Government segment premiums due to Medicare disenrollment.
- ***Pharmacy revenues*** increased in 2018 compared with 2017 primarily resulting from contributions from the acquired Express Scripts business. See the Health Services section of this MD&A for further discussion of pharmacy revenues and costs.
- ***Fees and other revenues***. The increases in both 2018 and 2017 compared with each prior year were primarily attributable to growth in our specialty businesses and an increased customer base for our administrative services only ("ASO") business. In 2018, contributions from the acquired Express Scripts business also contributed to the increase.
- ***Net investment income*** was higher in 2018 compared with 2017, reflecting growth in average assets and higher yields, largely driven by increased partnership income. Net investment income in 2018 also included $123 million earned from proceeds on the debt issued in September 2018 that is reported as a special item. Those debt proceeds were used to finance the Express Scripts acquisition on December 20, 2018. In 2017, net investment income increased compared with 2016, driven by growth in average invested assets, partially offset by lower yields.

Commentary on Other Components of Consolidated Results of Operations

- ***Medical costs and other benefit expenses*** increased in both 2018 and 2017, compared with the prior year, reflecting customer growth in Integrated Medical and International Markets, as well as medical cost inflation in Integrated Medical.
- ***Selling, general and administrative expenses*** increased in 2018 compared with 2017, driven by higher transaction-related costs associated with the acquisition of Express Scripts, resumption of the health insurance industry tax and volume-based expenses reflecting business growth. In 2017, the increase in selling, general and administrative expenses compared with 2016 reflected a long-term care guaranty fund assessment and higher volume-based expenses reflecting business growth. These increases were offset by suspension of the health insurance industry tax in 2017 and a reduction in costs related to our Center for Medicare and Medicaid Services ("CMS") audit response.
- ***Amortization of acquired intangible assets*** increased in 2018 compared with 2017, primarily reflecting the impact of the acquired Express Scripts business. The decrease in 2017 compared with 2016 was driven by the expected continuing decline in amortization from our 2012 acquisition of HealthSpring, Inc.
- ***Interest expense and other*** increased significantly in 2018 compared with 2017, primarily due to $227 million of interest incurred on debt issued in the third quarter of 2018 prior to the acquisition of Express Scripts. This amount is included in the overall special item for transaction-related costs, net of $123 million of investment income earned on the debt proceeds through the closing date of the transaction.
- ***Realized investment results*** declined significantly in 2018 compared with 2017, resulting from lower gains on sales of alternative, partnership and fixed maturity investments as well as mark-to-market losses on equity securities reported in net income as required by Accounting Standards Update 2016-01, Recognition and Measurement of Financial Assets and Liabilities, beginning in 2018 (see Note 2 to our Consolidated Financial Statements). In 2017, realized investment results increased compared with 2016, primarily due to higher gains on sales of alternative and real estate investments, as well as lower impairment losses.
- ***The consolidated effective tax rate*** decreased in 2018 compared with 2017, primarily due to a lower U.S. tax rate in 2018, partially offset by resumption of the non-deductible health insurance industry tax and the absence of the incremental tax benefit recognized in the second quarter of 2017 for certain transaction costs associated with the terminated merger with Anthem. In 2017, the effective tax rate was flat compared with 2016. The unfavorable impact of additional tax expense associated with the U.S. tax reform legislation enacted in 2017 was offset by favorable effects of a suspension of the health insurance industry tax in 2017 and an incremental tax benefit from previously non-deductible transaction-related costs. See Note 18 to our Consolidated Financial Statements for additional information.

Key Transactions and Developments

Acquisition of Express Scripts

As discussed in more detail in Note 3 to the Consolidated Financial Statements, Cigna acquired Express Scripts on December 20, 2018 in a cash and stock transaction valued at $52.8 billion. See the "Liquidity" section of this MD&A for further discussion of the financing of this transaction.

We incurred a significant amount of costs related to this acquisition, both before and after closing. These costs are being reported in "transaction-related costs" as a special item and excluded from adjusted income from operations. The results of Express Scripts are included in Cigna's consolidated financial information from the date of the acquisition.

On January 30, 2019, Anthem exercised its early termination right and terminated the pharmacy benefit management services agreement with us, effective March 1, 2019. There is a twelve-month transition period ending March 1, 2020. It is expected that the transition of Anthem's customers will occur at various dates, as informed by Anthem's technology platform migration schedule. Over the next twelve months, we will focus on an effective transition of this relationship and related services over Anthem's accelerated timeline. We exclude the results of Express Scripts' contract with Anthem (and also Coventry) from our non-GAAP reporting metric "adjusted income from operations." We refer to this adjustment as "transitioning clients."

U.S. Tax Reform Legislation

Major U.S. tax reform legislation was signed into law on December 22, 2017. The legislation reduced the corporate income tax rate from 35% to 21% effective January 1, 2018, among other things. See Note 18 to our Consolidated Financial Statements for further discussion of the impacts of this legislation on our results of operations.

Health Care Industry Developments and Other Matters Affecting Our Integrated Medical and Health Services Segments

The "Regulation" section of this Form 10-K provides a detailed description of The Patient Protection and Affordable Care Act provisions and other legislative initiatives that impact our health care business, including regulations issued by CMS and the Departments of the Treasury and Health and Human Services ("HHS"). The table presented below provides an update of the impact of these items and other matters affecting our Integrated Medical and Health Services segments as of December 31, 2018.

Item	Description
Medicare Advantage	***Medicare Star Quality Ratings ("Star Ratings"):*** Medicare Advantage ("MA") plans must have a Star Rating of four Stars or greater to qualify for bonus payments. Approximately 60% of our Medicare Advantage customers were in a four Star or greater plan for bonus payments received in 2018. We expect this percentage to increase to 72% for bonus payments to be received in 2019 and to 76% in 2020. ***MA Rates:*** Final MA reimbursement rates for 2019 were published by CMS in April 2018. Preliminary MA reimbursement rates for 2020 were published by CMS in February 2019. We do not expect the new rates to have a material impact on our consolidated results of operations in 2019 and 2020. ***Risk Adjustment Validation ("RADV") Audits:*** As discussed in the "Regulation" and "Risk Factors" sections of this Form 10-K, our MA business is subject to reviews, including RADV audits. In 2012, CMS released a payment methodology that provided for sample audit error rates to be extrapolated to the entire MA contract after comparing audit results to a similar audit of Medicare Fee for Service (the "FFS Adjuster"), including any errors in the Medicare FFS data. This comparison is necessary to determine the true economic impact of the audit, if any, because the government uses the Medicare FFS data to determine adjustments to MA payment rates for various health conditions to establish actuarial equivalency in payment rates as required by the Medicare statute. In the fourth quarter of 2018, CMS issued a proposed rule that included, among other things, extrapolation of the error rate related to audit findings without applying the FFS Adjuster. This rule is discussed further in the Regulation section of this Form 10-K on page 20. If adopted in its current form, the rule could have a detrimental impact to all Medicare Advantage insurers and affect the ability of plans to deliver high quality health care for the population served. While it is uncertain that CMS will issue the rule as proposed, if they did, it could have a material impact on the Company's future results of operations.
Health Care Reform Act Tax	***Health Insurance Industry Tax:*** Federal legislation imposed a moratorium on the health insurance industry tax for 2017 and 2019. The industry tax was assessed in 2018 and, under current law, will be imposed in 2020. The industry tax for Cigna in 2018 was $370 million ($205 million for Commercial and $165 million for Government). For our Commercial business, the tax was reflected in our 2018 premium rates and did not have a material effect on shareholders' net income in 2018. For our Medicare business, the earnings impact in 2018 resulting from this renewed tax was somewhat offset with benefit and pricing changes. Because this tax is not deductible for federal income tax purposes, it negatively impacted our effective tax rate in 2018.
Public Health Exchanges	***Market Participation:*** For 2018, we offered individual coverage on six public health insurance exchanges in the following states: Colorado, Illinois, Missouri, North Carolina, Tennessee and Virginia. For 2019, we expanded our individual coverage to Arizona while continuing to offer coverage on all of the other six exchanges as in 2018. ***Cost Sharing Reduction Subsidies:*** The Patient Protection and the Affordable Care Act ("ACA") provides for cost sharing reductions that offset the amount that qualifying customers pay for deductibles, copayments and coinsurance. The federal government provided funding for the cost sharing reduction subsidies to the qualifying customer's insurer until October 2017 when these payments were stopped. The attorneys general of 18 states and the District of Columbia sued the current administration, seeking to require the administration to continue paying these subsidies. In October 2017, the court denied the attorney generals' request for an injunction, allowing the government to stop paying the cost sharing reduction subsidies to insurers during the pendency of the matter. In July 2018, the court granted a motion by the states to dismiss the lawsuit without prejudice, meaning the states may refile a lawsuit at a later time. Certain insurers have sued the federal government for failure to pay cost sharing reduction subsidies as well, and a judge in two of those actions has ruled in favor of the insurers. We will continue to monitor developments. Our premium rates for the 2018 and 2019 plan years reflect the government's decision to cease paying these subsidies.
Prescription Drug Pricing	As discussed in the Regulation section on page 20 of this Form 10-K, prescription drug pricing and the role of pharmacy benefit managers have been a focus of the current administration. In February 2019, the HHS proposed changes to the federal anti-kickback safe harbor to exclude regulatory protection for rebates between drug manufacturers and Medicare Part D plans, Medicaid managed care organizations and pharmacy benefit managers in the context of these government programs. The proposed regulations in their current form apply solely to Medicare Part D and Medicaid programs that include our Government business in the Integrated Medical segment. The proposed regulations also seek to create new safe harbor protections for fixed fee services arrangements between drug manufacturers and pharmacy benefit managers, as well as protections for discounts offered at the point of sale. These proposed regulations, if adopted as written, could affect current industry practices. We do not expect them to have a material effect on our business or results of operations. This area continues to be the subject of legislative and regulatory activity.

Risk Mitigation Programs

In 2016, we recorded an allowance for the balance of our risk corridor receivable based on court decisions and the large program deficit. During 2018, the U.S. Federal Circuit court ruled that health insurers are not entitled to receive amounts due under the risk corridor program that have been withheld by Congress. The plaintiffs have petitioned the U.S. Supreme Court to review this unfavorable decision. As of December 31, 2018, we continue to carry this allowance of $109 million based on the current status of court decisions.

Risk adjustment balances are subject to audit and adjustment by CMS following each program year. In February 2018, a federal judge issued a decision invalidating the use of statewide average premium for risk adjustment purposes. In response, in July 2018, CMS issued a final rule clarifying the 2017 program methodology and addressing issues raised in the ruling by the federal judge. This rule clears the way for CMS to resume risk adjustment collections and payments for the 2017 program year. Despite this final rule, resolution of the legal matter remains uncertain. As of December 31, 2018, our financial statements reflect the risk adjustment balances for the 2018 and 2017 plan years under the rules currently in effect for the program.

The following table presents our balances associated with the risk adjustment program as of December 31, 2018 and 2017.

	Net Receivable (Payable) Balance As of December 31,	
(In millions)	**2018**	**2017**
Risk Adjustment		
Receivables [1]	**$ 32**	$ 69
Payables [2]	**(187)**	(250)
Total risk adjustment balance	**$ (155)**	$ (181)

(1) Receivables, net of allowances, are reported in accounts receivable in the Consolidated Balance Sheets.

(2) Payables are reported in accrued expenses and other liabilities (current) in the Consolidated Balance Sheets.

After-tax charges for the risk adjustment program were $116 million in 2018 and $105 million in 2017, compared with after-tax benefits of $25 million in 2016.

Liquidity And Capital Resources

Financial Summary *(In millions)*	**2018**	**2017**	**2016**
Short-term investments	**$ 316**	$ 199	$ 691
Cash and cash equivalents	**$ 3,855**	$ 2,972	$ 3,185
Short-term debt	**$ 2,955**	$ 240	$ 276
Long-term debt	**$ 39,523**	$ 5,199	$ 4,756
Shareholders' equity	**$ 41,028**	$ 13,711	$ 13,699

Liquidity

We maintain liquidity at two levels: the subsidiary level and the parent company level.

Liquidity requirements at the subsidiary level generally consist of:

- medical costs, pharmacy and other benefit payments;
- expense requirements, primarily for employee compensation and benefits, information technology and facilities costs; and
- income taxes.

Our subsidiaries normally meet their operating requirements by:

- maintaining appropriate levels of cash, cash equivalents and short-term investments;
- using cash flows from operating activities;
- matching investment durations to those estimated for the related insurance and contractholder liabilities;
- selling investments; and
- borrowing from affiliates, subject to applicable regulatory limits.

Liquidity requirements at the parent company level generally consist of:

- debt service and dividend payments to shareholders;
- lending to subsidiaries as needed; and
- pension plan funding.

The parent company normally meets its liquidity requirements by:

- maintaining appropriate levels of cash and various types of marketable investments;
- collecting dividends from its subsidiaries;
- using proceeds from issuance of debt and common stock; and
- borrowing from its subsidiaries, subject to applicable regulatory limits.

Dividends from our insurance, Health Maintenance Organization ("HMO") and foreign subsidiaries are subject to regulatory restrictions. See Note 17 to the Consolidated Financial Statements for additional discussion of these restrictions. Because most of Express Scripts' subsidiaries are not subject to regulatory restrictions on paying dividends, acquiring Express Scripts provides significantly increased financial flexibility to Cigna.

Cash flows for the years ended December 31, were as follows:

(In millions)	2018	2017	2016
Net cash provided by operating activities	**$ 3,770**	$ 4,086	$ 4,026
Net cash (used in) investing activities:			
Cash used to acquire Express Scripts, net of cash acquired	**(24,062)**	–	–
Other acquisitions	**(393)**	(209)	(4)
Net investment (purchases)	**(1,383)**	(1,023)	(2,008)
Purchases of property and equipment and other	**(540)**	(471)	(562)
Net investing activities	**(26,378)**	(1,703)	(2,574)
Net cash provided by (used in) financing activities			
Debt proceeds used to finance Express Scripts acquisition	**22,856**	–	–
Other debt transactions, net	**1,356**	98	(148)
Stock repurchase	**(342)**	(2,725)	(139)
Other, net	**(355)**	(24)	62
Net financing activities	**23,515**	(2,651)	(225)
Foreign currency effect on cash	**(24)**	55	(10)
Change in cash and cash equivalents	**$ 883**	$ (213)	$ 1,217

Operating activities

Cash flows from operating activities consist principally of cash receipts and disbursements for premiums, fees, pharmacy revenues and costs, investment income, taxes, benefit costs and other expenses.

Cash flows from operating activities decreased in 2018 compared with 2017 primarily driven by the timing of settlement of pharmacy payables, partially offset by higher net income.

Cash flows from operating activities increased slightly in 2017 compared with 2016 primarily driven by higher net income, partially offset by lower receipts from Medicare Part D and Medicare Advantage programs and a voluntary pension contribution of $150 million in 2017.

Investing and Financing activities

Our most significant investing and financing activities of 2018 related to acquiring Express Scripts. See Note 3 to the Consolidated Financial Statements for additional information on the acquisition. Cigna financed a portion of the acquisition in cash, primarily with debt financing as shown above and described more fully in Note 5 to the Consolidated Financial Statements, with the remaining required cash coming from cash on hand. In 2018, Cigna also acquired OnePath Life for approximately $480 million, largely with cash held in our foreign operations.

Net investment purchases increased in 2018 compared with 2017, largely due to reinvesting our cash flows into fixed income investments. The decrease in net investment purchases in 2017 compared with 2016 primarily reflects higher cash used for share repurchases in 2017.

Stock repurchases declined in 2018 compared with 2017 as Cigna suspended stock repurchase activity to provide liquidity for the Express Scripts acquisition. Stock repurchase activity was significantly higher in 2017 than 2016, as stock repurchase activity was suspended for much of 2016 during the pendency of the Anthem transaction.

We maintain a share repurchase program authorized by our Board of Directors. Under this program, we may repurchase shares from time to time, depending on market conditions and alternate uses of capital. The timing and actual number of shares repurchased will depend on a variety of factors, including price, general business and market conditions and alternate uses of capital. The share repurchase program may be effected through open market purchases or privately negotiated transactions in compliance with Rule 10b-18 under the Securities Exchange Act of 1934, as amended, including through Rule 10b5-1 trading plans. The program may be suspended or discontinued at any time.

In 2018, we repurchased 1.6 million shares for approximately $330 million. From January 1, 2019 through February 27, 2019 we repurchased 1.9 million shares for approximately $356 million. The remaining share repurchase authority as of February 27, 2019 was $590 million. We repurchased 15.7 million shares for $2.8 billion in 2017 and 0.8 million shares for $110 million in 2016.

Capital Resources

Our capital resources (primarily cash flows from operating activities and proceeds from the issuance of debt and equity securities) provide protection for policyholders, furnish the financial strength to underwrite insurance risks and facilitate continued business growth.

Our acquisition of Express Scripts increased our debt and shareholders' equity in 2018 as follows:

- ***Stock.*** Express Scripts shareholders received 0.2434 of a share of common stock of Cigna for every one share of Express Scripts. Cigna issued 137.6 million additional shares to Express Scripts shareholders.
- ***Debt.*** See Note 5 to the Consolidated Financial Statements for further description of the debt issued to finance the acquisition.
- ***Assumption of Express Scripts Senior Notes.*** See Note 5 to the Consolidated Financial Statements for further description of the notes assumed in the acquisition of Express Scripts.

At December 31, 2018, our debt-to-capitalization ratio was 50.9%. We expect to deleverage to the upper 30s within 18 to 24 months by using cash flows from operating activities.

Cigna entered into a new Revolving Credit Agreement and Term Loan Credit Agreement in financing the Express Scripts acquisition. A select number of subsidiaries guarantee Cigna obligations under the Revolving Credit Agreement and the Term Loan Credit Agreement. See Note 5 to the Consolidated Financial Statements for further information on these guarantees, as well as information on our Revolving Credit Agreement and the Term Loan Credit Agreement. Cigna had $22 million of letters of credit outstanding as of December 31, 2018.

Management, guided by regulatory requirements and rating agency capital guidelines, determines the amount of capital resources that we maintain. Management allocates resources to new long-term business commitments when returns, considering the risks, look promising and when the resources available to support existing business are adequate.

We prioritize our use of capital resources to:

- provide the capital necessary to support growth and maintain or improve the financial strength ratings of subsidiaries and to fund pension obligations;
- consider acquisitions that are strategically and economically advantageous; and
- return capital to investors primarily through share repurchases.

We continue to maintain a capital management strategy to retain overseas a significant portion of the earnings from our foreign operations. These undistributed earnings are deployed outside of the United States predominantly in support of the liquidity and regulatory capital requirements of our foreign operations as well as to support growth initiatives overseas. This strategy does not materially limit our ability to meet our liquidity and capital needs in the United States.

Liquidity and Capital Resources Outlook

At December 31, 2018, there was approximately $4.2 billion in cash and short-term investments, $1.2 billion of which was held by the parent or subsidiaries with no regulatory or other restrictions on transferring cash to the parent via dividend or loan. In 2019, we expect to generate an additional $6.2 billion of capital available for deployment, including $2.1 billion of dividends that our regulated insurance companies may pay without prior regulatory approval. The parent company's cash obligations in 2019 are expected to approximate $3.2 billion primarily for repayment of debt, interest and anticipated dividends. We expect to re-issue the $1.5 billion commercial paper borrowing upon its maturity.

We expect to have sufficient liquidity to meet the obligations discussed above, based on the cash currently available to the parent and current projections for subsidiary dividends and cash flows from the newly acquired Express Scripts operations. In addition, we actively monitor our debt obligations and engage in issuance or redemption activities as needed in accordance with our capital management strategy.

Our cash projections may not be realized and the demand for funds could exceed available cash if our ongoing businesses experience unexpected shortfalls in earnings, or we experience material adverse effects from one or more risks or uncertainties described more fully in the Risk Factors section of this Form 10-K. In those cases, we expect to have the flexibility to satisfy liquidity needs through a variety of measures, including intercompany borrowings. The parent company can borrow an additional $650 million from its insurance subsidiaries without additional state approval. We have additional liquidity available through short-term commercial paper borrowing capacity and the $3.25 billion revolving credit agreement discussed in Note 5 to the Consolidated Financial Statements.

As of December 31, 2018, our unfunded pension liability was $590 million, reflecting a decrease of $98 million from December 31, 2017, primarily attributable to an increase in discount rates of approximately 75 basis points. Contributions required in 2019 under the Pension Protection Act of 2006 are immaterial. See Note 13 to our Consolidated Financial Statements for additional information regarding our pension plans.

Though we believe we have adequate sources of liquidity, significant disruption or volatility in the capital and credit markets could affect our ability to access those markets for additional borrowings or increase costs associated with borrowing funds.

Guarantees and Contractual Obligations

We are contingently liable for various contractual obligations entered into in the ordinary course of business. See the "Liquidity and Capital Resources" section of this MD&A beginning on page 48 for additional background on how we manage our liquidity requirements related to these obligations. The maturities of our primary contractual cash obligations as of December 31, 2018 are estimated to be as follows:

(In millions, on an undiscounted basis)	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
On-Balance Sheet					
Insurance liabilities					
Contractholder deposit funds	$ 7,133	$ 619	$ 741	$ 641	$ 5,132
Future policy benefits	11,517	709	1,224	1,153	8,431
Unpaid claims and claim expenses	8,851	4,967	1,119	719	2,046
Long-term debt	53,968	1,543	11,905	9,396	31,124
Other long-term liabilities	636	137	95	81	323
Off-Balance Sheet					
Purchase obligations	2,295	858	1,012	338	87
Operating leases	861	199	330	200	132
Total	$ 85,261	$ 9,032	$ 16,426	$ 12,528	$ 47,275

On balance sheet:

- ***Insurance liabilities.*** Excluded from the table above are $4 billion of insurance liabilities ($3 billion in contractholder deposit funds; $1 billion in future policy benefits) associated with the sold retirement benefits and individual life insurance and annuity businesses, as well as the reinsured workers' compensation, personal accident and supplemental benefits businesses as their related net cash flows are not expected to impact our cash flows. Excluding these amounts, the sum of the obligations presented above exceeds the corresponding insurance and contractholder liabilities of $22 billion recorded on the balance sheet because some of the recorded insurance liabilities reflect discounting for interest and the recorded contractholder liabilities exclude future interest crediting, charges and fees. The timing and amount of actual future cash flows may differ from those presented above.
    - ***Contractholder deposit funds:*** see Note 7 to our Consolidated Financial Statements for our accounting policy for this liability. Expected future cash flows presented above also include estimated future interest crediting on current fund balances based on current investment yields less the estimated cost of insurance charges and mortality and administrative fees for universal life policies.
    - ***Future policy benefits and unpaid claims and claim expenses:*** see Note 7 to our Consolidated Financial Statements for our accounting policies for these liabilities. Expected future cash flows for these liabilities presented in the table above are undiscounted. The expected future cash flows for guaranteed minimum death benefit ("GMDB," reported in future policy benefits) do not consider any of the related reinsurance arrangements.
- ***Long-term debt*** includes scheduled interest payments. Capital leases are included in long-term debt and primarily represent obligations for information technology network storage, servers and equipment.
- ***Other non-current liabilities*** include estimated payments for guaranteed minimum income benefit ("GMIB") contracts (without considering any related reinsurance arrangements), pension and other postretirement and postemployment benefit obligations, supplemental and deferred compensation plans, interest rate and foreign currency swap contracts, and reinsurance liabilities. Estimated payments of $78 million for deferred compensation, non-qualified and international pension plans and other postretirement and postemployment benefit plans are expected to be paid in less than one year and are included in the table above. We expect to make immaterial contributions to the qualified domestic pension plans during 2019 and they are reflected in the above table. We expect to make payments subsequent to 2019 for these obligations; however, subsequent payments have been excluded from the table as their timing is based on plan assumptions that may materially differ from actual activities. See Note 13 to our Consolidated Financial Statements for further information on pension and other postretirement benefit obligations.

The liability for uncertain tax positions that could result in future payments was $928 million as of December 31, 2018. This amount has been excluded from the table above because we are not able to provide a reasonably reliable estimate of the timing of such future tax payments. See Note 18 for additional information on uncertain tax positions.

Off-Balance Sheet:

- ***Purchase obligations.*** As of December 31, 2018, purchase obligations consisted of estimated payments required under contractual arrangements for future services and investment commitments as follows:

(In millions)	
Fixed maturities	**$ 106**
Commercial mortgage loans	**54**
Limited liability entities (other long-term investments)	**1,472**
Total investment commitments	**1,632**
Future service commitments	**663**
Total purchase obligations	**$ 2,295**

See Note 9 to our Consolidated Financial Statements for additional information.

Our estimated future service commitments primarily represent contracts for certain outsourced business processes and information technology maintenance and support. We generally have the ability to terminate these agreements, but do not anticipate doing so at this time. Purchase obligations exclude contracts that are cancelable without penalty and those that do not contractually require minimum levels of goods or services to be purchased.

- ***Operating leases.*** For additional information, see Note 16 to our Consolidated Financial Statements.

Guarantees

We are contingently liable for various financial and other guarantees provided in the ordinary course of business. See Note 19 to our Consolidated Financial Statements for additional information on guarantees.

Critical Accounting Estimates

The preparation of Consolidated Financial Statements in accordance with GAAP requires management to make estimates and assumptions that affect reported amounts and related disclosures in the Consolidated Financial Statements. Management considers an accounting estimate to be critical if:

- it requires assumptions to be made that were uncertain at the time the estimate was made; and
- changes in the estimate or different estimates that could have been selected could have a material effect on our consolidated results of operations or financial condition.

Management has discussed how critical accounting estimates are developed and selected with the Audit Committee of our Board of Directors and the Audit Committee has reviewed the disclosures presented below.

In addition to the estimates presented in the following table, there are other accounting estimates used in preparing our Consolidated Financial Statements, including estimates of liabilities for future policy benefits, as well as estimates with respect to postemployment and postretirement benefits other than pensions, certain compensation accruals, and income taxes.

Management believes the current assumptions used to estimate amounts reflected in our Consolidated Financial Statements are appropriate. However, if actual experience differs from the assumptions used in estimating amounts reflected in our Consolidated Financial Statements, the resulting changes could have a material adverse effect on our consolidated results of operations and, in certain situations, could have a material adverse effect on our liquidity and financial condition. The table below presents the adverse impacts of certain possible changes in assumptions. The effect of assumption changes in the opposite direction would be a positive impact to our consolidated results of operations, liquidity or financial condition, except for assessing impairment of goodwill and fixed maturities carried at a fair value below cost. The tax rate used to calculate the after-tax impact of assumption changes is based on the new corporate income tax rate discussed in the "Key Developments" section of this MD&A.

See Note 2 to our Consolidated Financial Statements for further information on significant accounting policies.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Goodwill and other intangible assets	
Goodwill represents the excess of the cost of businesses acquired over the fair value of their net assets at the acquisition date. Intangible assets primarily reflect the value of customer relationships and other intangibles acquired in business combinations. Fair values of reporting units are estimated using models and assumptions that we believe a hypothetical market participant would use to determine a current transaction price. The significant assumptions and estimates used in determining fair value include the discount rate and future cash flows. A discount rate is used, corresponding with each reporting unit's weighted average cost of capital, consistent with that used for investment decisions considering the specific and detailed operating plans and strategies within each reporting unit. Projections of future cash flows are consistent with our annual planning process for revenues, claims, operating expenses, taxes, capital levels and long-term growth rates. In addition to these assumptions, we consider market data to evaluate the fair value of each reporting unit. The fair value of intangibles and the amortization method were determined using an income approach that relies on projected future cash flows including key assumptions for the customer attrition and discount rates. Management revises amortization periods if it believes there has been a change in the length of time that an intangible asset will continue to have value. We completed our normal annual evaluations for impairment of goodwill and intangible assets during the third quarter of 2018. The evaluations indicated that the fair value estimates of our reporting units exceed their carrying values by adequate margins and no impairment was required. As a result of the changes in our reportable segments, we reallocated existing goodwill to reporting units based on their relative fair values and updated our evaluations for impairment of goodwill. These evaluations indicated that the fair value estimates of our reporting units continue to exceed their carrying values by adequate margins and no impairments were required. During the fourth quarter of 2018, goodwill and intangible assets increased by $38.4 billion as a result of the acquiring Express Scripts and OnePath Life. Our Government operating segment contracts with CMS and various state governmental agencies to provide managed health care services, including Medicare Advantage plans and Medicare-approved prescription drug plans. Estimated future cash flows for this reporting unit's business incorporate the potential effects of Medicare Advantage reimbursement rates for 2019 and beyond as discussed in the "Executive Overview" section of this MD&A. Revenues from the Medicare programs are dependent, in whole or in part, upon annual funding from the federal government through CMS. Funding for these programs is dependent on many factors including general economic conditions, continuing government efforts to contain health care costs and budgetary constraints at the federal level and general political issues and priorities. Goodwill and other intangibles as of December 31 were as follows (in millions): • **2018 – Goodwill $44,505; Other intangible assets $39,003** • 2017 – Goodwill $6,164; Other intangible assets $345 See Note 15 to our Consolidated Financial Statements for additional discussion of our goodwill and other intangible assets.	If we do not achieve our earnings objectives or our cost of capital rises significantly, the assumptions and estimates underlying these impairment evaluations could be adversely affected and result in future impairment charges that would negatively impact our operating results. Except for the recent acquisitions of Express Scripts and OnePath Life, where fair value equals carrying value, based on our most recent evaluations, the fair value estimates of our reporting units exceed their carrying values by adequate margins. Future changes in the funding for our Medicare programs by the federal government could materially reduce revenues and profitability in our Government reporting unit and have a significant impact on its fair value.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Income taxes – uncertain tax positions	
We evaluate tax positions to determine whether their benefits are more likely than not to be sustained on audit based on their technical merits. If not, we establish a liability for unrecognized tax benefits. These amounts have increased significantly in 2018 as a result of acquiring Express Scripts. The acquired amounts primarily relate to federal and state uncertain positions of the value and timing of deductions and uncertain positions of attributing taxable income to states. Balances that are included in other non-current liabilities on the Consolidated Balance Sheets are as follows: • **2018 – $928 million** • 2017 – $35 million See Note 18 to our Consolidated Financial Statements for additional discussion around uncertain tax positions.	The factors that could impact our estimates of uncertain tax positions include the likelihood of being sustained upon audit based on the technical merits of the tax position and related assumed interest and penalties. If our positions are upheld upon audit, our net income would increase.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Pharmaceutical Manufacturer Receivables	
We bill pharmaceutical manufacturers based on management's interpretation of the contractual terms and estimate contractual allowances at the time a claim is processed for uncertainty in the amount we are entitled to collect. We determine these contractual allowances by reviewing each manufacturer's payment experience and specific known items that potentially could be adjusted under contract terms. We may also record allowances for doubtful accounts based on a variety of factors including the length of time the receivables are past due, the financial health of the manufacturer and our past experience. In determining the fair value of Express Scripts' accounts receivable at the acquisition date, the historical allowances were eliminated. Prospectively, we expect these allowances to become significant to the consolidated financial statements. See Note 2 to our Consolidated Financial Statements for assumptions and methods used to estimate receivables and the related allowances.	Actual contractual allowances could differ from our estimates due to disputes regarding contractual terms, changes in the business environment as well as factors and risks associated with specific customers. Our estimates of the allowance for doubtful accounts could be impacted by changes in economic and market conditions as well as changes to our customers' financial condition.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Unpaid claims and claim expenses – Integrated Medical	
Unpaid claims and claim expenses include both reported claims and estimates for losses incurred but not yet reported. Unpaid claims and claim expenses in Integrated Medical are primarily impacted by assumptions related to completion factors and medical cost trend. Changes in either assumption from actual results could impact the unpaid claims balance as noted below. A large number of factors may cause the medical cost trend to vary from the Company's estimates, including: changes in medical management practices, changes in the level and mix of benefits offered and services utilized, and changes in medical practices. Completion factors may be affected if actual claims submission rates from providers differ from estimates (that can be influenced by a number of factors, including provider mix, and electronic versus manual submissions), or if changes to the Company's internal claims processing patterns occur. Unpaid claims and claim expenses for the Integrated Medical segment as of December 31 were as follows (in millions): • **2018 – gross $2,697; net $2,433** • 2017 – gross $2,420; net $2,158 These liabilities are presented above both gross and net of reinsurance and other recoverables. See Note 7 to our Consolidated Financial Statements for additional information regarding assumptions and methods used to estimate this liability.	Based on studies of our claim experience, it is reasonably possible that a 100 basis point change in the medical cost trend and a 50 basis point change in completion factors could occur in the near term. A 100 basis point increase in the medical cost trend rate would increase this liability by approximately $35 million, resulting in a decrease in net income of approximately $30 million after-tax, and a 50 basis point decrease in completion factors would increase this liability by approximately $80 million, resulting in a decrease in net income of approximately $65 million after-tax.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Unpaid claims and claim expenses – long-term disability reserves	
The liability for long-term disability reserves is the present value of estimated future benefits payments over the expected disability period and includes estimates for both reported claims and for claims incurred but not yet reported. Key assumptions in the calculation of long-term disability reserves include the discount rate and claim resolution rates, both of which are reviewed annually and updated when experience or future expectations would indicate a necessary change. The discount rate is the interest rate used to discount the projected future benefit payments to their present value. The discount rate assumption is based on the projected investment yield of the assets supporting the reserves. Claim resolution rate assumptions involve many factors including claimant demographics, the type of contractual benefit provided and the time since initially becoming disabled. The Company uses its own historical experience to develop its claim resolution rates. Long-term disability reserves as of December 31 were as follows (in millions): • **2018 – gross $4,069; net $3,975** • 2017 – gross $3,884; net $3,790 These liabilities are presented above both gross and net of reinsurance recoverables. See Note 7C. to our Consolidated Financial Statements for additional information regarding assumptions and methods used to estimate this liability.	Based on recent and historical resolution rate patterns and changes in investment portfolio yields, it is reasonably possible that a five percent change in claim resolution rates and a 25 basis point change in the discount rate could occur. A five percent decrease in the claim resolution rate would increase long-term disability reserves by approximately $90 million and decrease net income by approximately $70 million after-tax. A 25 basis point decrease in the discount rate would increase long-term disability reserves by approximately $45 million and decrease net income by approximately $35 million after-tax.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Valuation of fixed maturity investments	
Most fixed maturities are classified as available for sale and are carried at fair value with changes in fair value recorded in accumulated other comprehensive income (loss) within shareholders' equity. Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. Determining fair value for a financial instrument requires management judgment. The degree of judgment involved generally correlates to the level of pricing readily observable in the markets. Financial instruments with quoted prices in active markets or with market observable inputs to determine fair value, such as public securities, generally require less judgment. Conversely, private placements including more complex securities that are traded infrequently are typically measured using pricing models that require more judgment as to the inputs and assumptions used to estimate fair value. There may be a number of alternative inputs to select based on an understanding of the issuer, the structure of the security and overall market conditions. In addition, these factors are inherently variable in nature as they change frequently in response to market conditions. Approximately two-thirds of our fixed maturities are public securities, and one-third are private placement securities. Typically, the most significant input in the measurement of fair value is the market interest rate used to discount the estimated future cash flows of the instrument. Such market rates are derived by calculating the appropriate spreads over comparable U.S. Treasury securities, based on the credit quality, industry and structure of the asset. See Notes 9A. and 10 to our Consolidated Financial Statements for a discussion of our fair value measurements, the procedures performed by management to determine that the amounts represent appropriate estimates and our accounting policy regarding unrealized appreciation on fixed maturities.	If the interest rates used to calculate fair value increased by 100 basis points, the fair value of the total fixed maturity portfolio of $23 billion would decrease by approximately $1.5 billion, resulting in an after-tax decrease to shareholders' equity of approximately $0.9 billion.

Balance Sheet Caption / Nature of Critical Accounting Estimate	Effect if Different Assumptions Used
Assessment of "other-than-temporary" impairments on fixed maturities	
Certain fixed maturities with a fair value below amortized cost are carried at fair value with changes in fair value recorded in accumulated other comprehensive income. For these investments, we have determined that the decline in fair value below its amortized cost is temporary. To make this determination, we evaluated the expected recovery in value and our intent to sell or the likelihood of a required sale of the fixed maturity prior to an expected recovery. In making this evaluation, we considered a number of general and specific factors including the regulatory, economic and market environments, length of time and severity of the decline, and the financial health and specific near term prospects of the issuer. The after-tax amounts as of December 31 in accumulated other comprehensive income for fixed maturities in an unrealized loss position were as follows (in millions): • **2018 – ($370)** • 2017 – ($80) See Note 9 to our Consolidated Financial Statements for additional discussion of our review of declines in fair value, including information regarding our accounting policies for fixed maturities.	If we subsequently determine that the excess of amortized cost over fair value is other-than-temporary for any or all of these fixed maturities, the amount recorded in accumulated other comprehensive income would be reclassified to shareholders' net income as an impairment loss.

Segment Reporting

The following section of this MD&A discusses the results of each of our segments. As a result of the Express Scripts acquisition, during the fourth quarter of 2018, we changed our segment reporting to reflect the new management and business reporting structure of the combined company. Prior year financial information has been restated to conform to the new segment presentation. See Note 1 to our Consolidated Financial Statements for a description of our segments.

In segment discussions, we present adjusted revenues and "pre-tax adjusted income from operations," defined as income before taxes excluding realized investment gains (losses), amortization of acquired intangible assets, results of transitioning clients and special items. Ratios presented in this segment discussion exclude the same items as adjusted income from operations. See Note 21 to our Consolidated Financial Statements for additional discussion of these metrics and a reconciliation of income before income taxes to pre-tax adjusted income from operations.

In these segment discussions, we also present "pre-tax adjusted margin," defined as adjusted income from operations before taxes divided by adjusted revenues.

See the MD&A Executive Overview beginning on page 42 for summarized financial results of each of our reporting segments.

Integrated Medical Segment

The Integrated Medical segment includes the businesses previously reported in "Global Health Care" except as follows: 1) international health care products are now reported in the International Markets segment; 2) mail order pharmacy business is now reported in the Health Services segment; and 3) Medicare supplement business previously reported in "Global Supplemental Benefits" is now reported in Integrated Medical.

The business section of this Form 10-K (see the "Integrated Medical" section beginning on page 3) describes the various products and funding solutions offered by this segment, including the various revenue sources. As described in the introduction to Segment Reporting above, performance of the Integrated Medical segment is measured using pre-tax adjusted income from operations. Key factors affecting profitability for this segment include:

- customer growth;
- revenues from integrated specialty products, including pharmacy services, sold to clients and customers across all funding solutions;
- percentage of Medicare Advantage customers in plans eligible for quality bonus payments;
- benefit expenses as a percentage of premiums (medical care ratio or "MCR") for our insured commercial and government businesses; and
- selling, general and administrative expense as a percentage of adjusted revenues (expense ratio).

We adopted new accounting guidance for revenue recognition effective January 1, 2018. Prior year revenues along with adjusted margin and both the medical care and expense ratios for the Integrated Medical segment have been retrospectively adjusted to conform to this new basis of accounting. See Note 2 to the Consolidated Financial Statements for additional information.

Results of Operations

Financial Summary

(In millions)	For the Years Ended December 31, 2018	2017	2016	Change Favorable (Unfavorable) 2018 vs. 2017		Change Favorable (Unfavorable) 2017 vs. 2016	
Adjusted revenues	**$ 32,791**	$ 29,035	$ 27,395	**$ 3,756**	13%	$ 1,640	6%
Pre-tax adjusted income from operations	**$ 3,502**	$ 2,922	$ 2,592	**$ 580**	20%	$ 330	13%
Adjusted pre-tax margin	**10.7%**	10.1%	9.5%	**60bps**		60bps	
Medical care ratio	**78.9%**	81.0%	80.9%	**210bps**		(10)bps	
Expense ratio	**24.7%**	24.1%	24.8%	**(60)bps**		70bps	

(Dollars in millions, customers in thousands)	As of December 31, 2018	2017	2016	Increase (Decrease) 2018 vs. 2017		Increase (Decrease) 2017 vs. 2016	
Unpaid claims and claim expenses – Integrated Medical	**$ 2,697**	$ 2,420	$ 2,261	**$ 277**	11%	$ 159	7%
Integrated Medical Customers							
Commercial risk	**1,911**	1,792	1,561	**119**	7%	231	15%
Government	**1,407**	1,235	1,015	**172**	14%	220	22%
Total risk	**3,318**	3,027	2,576	**291**	10%	451	18%
Service	**12,071**	11,801	11,394	**270**	2%	407	4%
Total	**15,389**	14,828	13,970	**561**	4%	858	6%

2018 versus 2017

Adjusted revenues increased, primarily due to customer growth in our Commercial and Government segments including contributions from specialty products. Also contributing to the increase were higher premium rates across our businesses reflecting: 1) underlying medical cost trend; 2) the government's suspension of cost share reduction subsidies; and 3) resumption of the health insurance industry tax.

Pre-tax adjusted income from operations increased, reflecting improved margins in our Individual business and strong ongoing performance in our Commercial business, including increased contributions from specialty products.

Medical care ratio. The medical care ratio decreased, reflecting the pricing impact of resumption of the health insurance industry tax and improvement from our Individual business.

Expense ratio. The expense ratio increased, reflecting resumption of the health insurance industry tax and ongoing investments in growth and innovation, partially offset by higher revenues.

2017 versus 2016

Adjusted revenues increased, primarily due to customer growth in our Commercial risk and Individual businesses, partially offset by lower customer enrollment in our Medicare Advantage business.

Pre-tax adjusted income from operations increased, reflecting higher earnings in both our Commercial and Government operating segments. The increase in the Commercial segment reflects customer growth including increased contributions from our specialty products. The Government segment's earnings growth reflects lower operating expenses related to the moratorium of the health insurance industry tax in 2017 and our 2016 CMS audit response as well as favorable claims experience in our Individual business, partially offset by lower customer enrollment in our Medicare Advantage business. Pre-tax adjusted income from operations included favorable prior year reserve development of $148 million for 2017; prior year reserve development in 2016 was not material.

Medical care ratio. The medical care ratio remained fairly consistent, reflecting the 2017 moratorium on the health insurance industry tax offset by improved performance in our Government segment businesses and favorable prior year reserve development.

Expense ratio. The expense ratio decreased, reflecting suspension of the health insurance industry tax in 2017 and lower costs related to our 2016 CMS audit response.

Other Items Affecting Integrated Medical Results

Unpaid Claims and Claim Expenses

Unpaid claims and claim expenses were higher as of December 31, 2018 compared with 2017 and were higher as of December 31, 2017 compared with 2016, primarily due to customer growth and medical cost trend. See Note 7 to our Consolidated Financial Statements for additional information.

Medical Customers

A medical customer is defined as a person meeting any one of the following criteria:

- is covered under a medical insurance policy, managed care arrangement or service agreement issued by us;
- has access to our provider network for covered services under their medical plan; or
- has medical claims that are administered by us.

Medical customers now include the Medicare Supplement business. For the Integrated Medical segment, medical customers excludes international health care customers.

Our medical customer base was higher at December 31, 2018 compared to December 31, 2017, primarily reflecting growth across our targeted Commercial markets as well as our Government segment businesses. Our medical customer base increased as of December 31, 2017 compared with 2016, reflecting growth across our Commercial and Government segments. The Government segment growth was primarily driven by our Medicare Supplement and Individual businesses, partially offset by declines in our Medicare Advantage business.

Health Services Segment

We established the Health Services segment to include the pharmacy benefit management ("PBM") and health services operations of Express Scripts effective with the acquisition, as well as Cigna's legacy mail order pharmacy business. As described in the introduction to Segment Reporting on page 56, performance of the Health Services Segment is measured using pre-tax adjusted income from operations.

The key factors that impact Health Services revenues and costs of revenues are volume, mix and price. These key factors are discussed further below. See Note 2 for additional information on revenue and cost recognition policies for this segment.

- As our clients' claim volumes increase or decrease, our resulting revenues and cost of revenues correspondingly increase or decrease. Our gross profit could also increase or decrease as a result of changes in purchasing discounts.
- The mix of claims generally considers the type of drug and distribution method used for dispensing and fulfilling. As our mix of drugs changes, our resulting pharmacy revenues and cost of revenues correspondingly may increase or decrease. The primary driver of fluctuations within our mix of claims is the generic fill rate. Generally, higher generic fill rates reduce revenues, as generic drugs are typically priced lower than the branded drugs they replace. However, as ingredient cost paid to pharmacies on generic drugs is incrementally lower than the price charged to our clients, higher generic fill rates generally have a favorable impact on our gross profit. The home delivery generic fill rate is currently lower than the network generic fill rate as fewer generic substitutions are available among maintenance medications (such as therapies for chronic conditions) commonly dispensed from home delivery pharmacies as compared to acute medications that are primarily dispensed by pharmacies in our retail networks.
- Our contract pricing is impacted by our ability to negotiate contracts for pharmacy network, pharmaceutical and wholesaler purchasing, and manufacturer rebates. We are able to reduce the rate of drug price increases and, in some cases, lower our clients' prescription drug spend through our integrated set of solutions, including sharing of significant amounts of pharmaceutical manufacturer rebates with our clients. We refer to this as "management of the supply chain." Inflation also impacts our pricing because most of our contracts provide that we bill clients and pay pharmacies based on a generally recognized price index for pharmaceuticals. Therefore, the rate of inflation for prescription drugs and our efforts to manage this inflation for our clients can affect our revenues and cost of revenues.

In this MD&A, we present revenues, gross profit and pre-tax adjusted income from operations "excluding transitioning clients" in addition to those metrics including transitioning clients. See the "Key Transactions and Developments" section on page 46 of this MD&A for further discussion of transitioning clients and why we present this information.

Results of Operations

Financial Summary

	For the Years Ended December 31,			Change Favorable (Unfavorable)		Change Favorable (Unfavorable)	
(In millions)	**2018**	**2017**	**2016**	**2018 vs. 2017**		**2017 vs. 2016**	
Total revenues	**$ 7,065**	$ 4,241	$ 4,066	**$ 2,824**	67%	$ 175	4%
Less: revenue contributions from transitioning clients	**(459)**	-	-	**(459)**	N/M	-	N/M
Adjusted revenues	**$ 6,606**	$ 4,241	$ 4,066	**$ 2,365**	56	$ 175	4
Gross profit	**$ 604**	$ 371	$ 344	**$ 233**	63	$ 27	8
Gross profit excluding transitioning clients	**$ 531**	$ 371	$ 344	**$ 160**	43	$ 27	8
Pre-tax adjusted income from operations	**$ 380**	$ 288	$ 268	**$ 92**	32%	$ 20	7%
Pre-tax adjusted margin	**5.8%**	6.8%	6.6%	**(100)bps**		20bps	

2018 versus 2017

Adjusted revenues increased, primarily due to the acquisition of Express Scripts. Excluding the acquired business, revenues increased slightly, reflecting increased utilization of specialty medications and higher prices.

Pre-tax adjusted income from operations before taxes increased, due to the acquisition of Express Scripts. Excluding the acquired business, adjusted income from operations increased, reflecting volume growth due to increased specialty utilization and net savings related to management of supply chain.

2017 versus 2016

Adjusted revenues increased, reflecting increased Commercial customers, specialty medication prices and utilization (e.g., certain injectables), offset by lower oral medication volumes and Medicare customers.

Pre-tax adjusted income from operations before taxes increased, due to Commercial customer growth including increased margin contributions from specialty medications.

International Markets Segment

As described in the business section of this Form 10-K, the International Markets segment includes supplemental health, life and accident business previously reported in the "Global Supplemental Benefits" segment, except for Medicare Supplement business that is now reported in the Integrated Medical segment and certain international businesses in run-off that are now reported in Group Disability and Other. International health care products previously reported in the "Global Health Care" segment are now reported in International Markets.

As described in the introduction to Segment Reporting on page 56, performance of the International Markets segment is measured using pre-tax adjusted income from operations. Key factors affecting pre-tax adjusted income from operations for this segment are:

- premium growth, including new business and customer retention;
- benefit expenses as a percentage of premiums (loss ratio);
- selling, general and administrative expense and acquisition expense as a percentage of revenues (expense ratio and acquisition cost ratio); and
- the impact of foreign currency movements.

Results of Operations

Financial Summary

	For the Years Ended December 31,			Change Favorable (Unfavorable)		Change Favorable (Unfavorable)	
(In millions)	**2018**	**2017**	**2016**	**2018 vs. 2017**		**2017 vs. 2016**	
Adjusted revenues	**$ 5,366**	$ 4,901	$ 4,537	**$ 465**	9%	$ 364	8%
Pre-tax adjusted income from operations	**$ 735**	$ 654	$ 538	**$ 81**	12%	$ 116	22%
Pre-tax adjusted margin	**13.7%**	13.3%	11.9%	**40bps**		140bps	
Loss ratio	**57.4%**	57.5%	60.0%	**(10)bps**		250bps	
Acquisition cost ratio	**13.1%**	12.8%	12.9%	**30bps**		10bps	
Expense ratio (excluding acquisition costs)	**18.9%**	19.7%	19.1%	**(80)bps**		(60)bps	

2018 versus 2017

Adjusted revenues increased primarily due to business growth mainly in South Korea, Middle East, Hong Kong and Europe.

Pre-tax adjusted income from operations increased primarily due to business growth, largely in South Korea, and a lower expense ratio, partially offset by a less favorable acquisition cost ratio.

The segment's ***loss ratio*** decreased slightly, reflecting favorable claims experience in South Korea and Europe, largely offset by unfavorable claims experience in North America and other Asian markets.

The ***acquisition cost ratio*** increased due to higher amortization primarily in Korea and Taiwan.

The decrease in the ***expense ratio*** (excluding acquisition costs) was primarily driven by lower value added tax and disciplined expense management.

2017 versus 2016

Adjusted revenues were higher primarily due to business growth mainly in South Korea and the Middle East.

Pre-tax adjusted income from operations increased primarily due to business growth, largely in South Korea, and lower loss ratios, partially offset by higher expense ratios.

The segment's ***loss ratio*** decreased, reflecting favorable claims in South Korea and Europe.

The ***acquisition cost ratio*** decreased slightly due to lower spending in certain markets.

The increase in the ***expense ratio*** (excluding acquisition costs) was primarily driven by strategic investment in the Middle East and higher value added tax, partially offset by strong expense management.

Other Items Affecting International Markets Results

South Korea is the single largest geographic market for our International Markets segment. South Korea generated 40% of the segment's revenues and 68% of the segment's pre-tax adjusted income from operations in 2018. In 2018, our International Markets segment operations in South Korea represented 5% of our consolidated revenues and 11% of consolidated pre-tax adjusted income from operations.

Group Disability and Other

Group Disability and Other includes the results of the business previously reported in the "Group Disability and Life" segment and "Other Operations" comprising the corporate-owned life insurance ("COLI") business along with run-off of the following businesses: 1) reinsurance; 2) settlement annuity; and 3) the sold individual life insurance and annuity and retirement benefits businesses. In addition, certain international run-off business previously reported in the "Global Supplemental Benefits" segment is now reported in Group Disability and Other.

As described in the introduction of Segment Reporting on page 56, performance of Group Disability and Other is measured using pre-tax adjusted income from operations. Key factors affecting pre-tax adjusted income from operations are:

- premium growth, including new business and customer retention;
- net investment income;
- benefit expenses as a percentage of premiums (loss ratio); and
- selling, general and administrative expense as a percentage of revenues excluding net investment income (expense ratio).

Results of Operations

Financial Summary

	For the Years Ended December 31,			Change Favorable (Unfavorable)		Change Favorable (Unfavorable)	
(In millions)	**2018**	**2017**	**2016**	**2018 vs. 2017**		**2017 vs. 2016**	
Adjusted revenues	**$ 5,061**	$ 5,075	$ 5,108	**$ (14)**	-%	$ (33)	(1)%
Pre-tax adjusted income from operations	**$ 529**	$ 517	$ 275	**$ 12**	2%	$ 242	88%
Pre-tax adjusted margin	**10.5%**	10.2%	5.4%	**30bps**		480bps	

2018 versus 2017

Adjusted revenues decreased slightly, due to the continued run-off of international business and lower life premiums, mostly offset by moderate growth in the group disability business and higher investment income.

Pre-tax adjusted income from operations increased, reflecting improved results in the life business and run-off operations, partially offset by unfavorable disability claims experience.

2017 versus 2016

Adjusted revenues were relatively flat, with higher investment income driven by higher asset levels offset by cancelations in non-core specialty and association products.

Pre-tax adjusted income from operations increased, reflecting significantly improved claim experience in the group disability and life segment.

Corporate

Corporate reflects amounts not allocated to operating segments, including net interest expense (defined as interest on corporate debt less net investment income on investments not supporting segment and other operations), certain litigation matters, compensation cost for stock options, expense associated with our frozen pension plans, charitable contributions, severance, certain overhead and project costs and intersegment eliminations for products and services sold between segments.

Financial Summary

	For the Years Ended December 31,			Change Favorable (Unfavorable)		Change Favorable (Unfavorable)	
(In millions)	2018	2017	2016	2018 vs. 2017		2017 vs. 2016	
Pre-tax adjusted loss from operations	**$ (403)**	$ (375)	$ (362)	**$ (28)**	(7)%	$ (13)	(4)%

2018 versus 2017

Pre-tax adjusted loss from operations was higher, primarily due to higher interest expense.

2017 versus 2016

Pre-tax adjusted loss from operations was higher, primarily due to higher charitable contributions and operating expenses, partially offset by higher net investment income.

Investment Assets

The following table presents our invested asset portfolio, excluding separate account assets, as of December 31, 2018 and 2017. Additional information regarding our investment assets and related accounting policies is included in Notes 2, 9, 10, 11, and 12 to our Consolidated Financial Statements.

(In millions)	2018	2017
Fixed maturities	**$ 22,928**	$ 23,138
Equity securities	**548**	588
Commercial mortgage loans	**1,858**	1,761
Policy loans	**1,423**	1,415
Other long-term investments	**1,901**	1,518
Short-term investments	**316**	199
Total	**$ 28,974**	$ 28,619

Fixed Maturities

Investments in fixed maturities include publicly traded and privately placed debt securities, mortgage and other asset-backed securities and preferred stocks redeemable by the investor. These investments are classified as available for sale and are carried at fair value on our balance sheet. Additional information regarding valuation methodologies, key inputs and controls is included in Note 10 to our Consolidated Financial Statements. More detailed information about fixed maturities by type of issuer and maturity dates is included in Note 9 to our Consolidated Financial Statements.

The following table reflects our fixed maturity portfolio by type of issuer as of December 31, 2018 and 2017.

(In millions)	2018	2017
Federal government and agency	**$ 710**	$ 779
State and local government	**985**	1,287

Corporate	**18,361**	18,088
Mortgage and other asset-backed	**510**	497
Total	**$ 22,928**	$ 23,138

The fixed maturity portfolio decreased during 2018, reflecting decreased valuations due to increases in market yields and weakening foreign currencies, partially offset by increased investment in fixed maturities. As of December 31, 2018, $20.6 billion, or 90% of the fixed maturities in our investment portfolio were investment grade (Baa and above, or equivalent), and the remaining $2.3 billion were below investment grade. The majority of the bonds that are below investment grade are rated at the higher end of the non-investment grade spectrum. These quality characteristics have not materially changed from the prior year and are consistent with our investment strategy. Fixed maturity investments are diversified by issuer, geography, and industry as appropriate.

Foreign government obligations are concentrated in Asia, primarily South Korea, consistent with our risk management practice and local regulatory requirements of our international business operations. Corporate fixed maturities include private placement assets of $6 billion.

These investments are generally less marketable than publicly-traded bonds; however yields on these investments tend to be higher than yields on publicly-traded bonds with comparable credit risk. We perform a credit analysis of each issuer, and require financial and other covenants that allow us to monitor issuers for deteriorating financial strength and pursue remedial actions, if warranted.

In addition to amounts classified in fixed maturities on our Consolidated Balance Sheets, we participate in an insurance joint venture in China in which we have a 50% ownership interest. We account for this joint venture on the equity basis of accounting and report it in other assets. This entity had an investment portfolio of approximately $6.3 billion supporting this business that is primarily invested in Chinese corporate and government fixed maturities. There were no investments with a material unrealized loss as of December 31, 2018.

Commercial Mortgage Loans

Our commercial mortgage loans are fixed rate loans, diversified by property type, location and borrower. Loans are secured by high quality commercial properties and are generally made at less than 70% of the property's value at origination of the loan. Property value, debt service coverage, quality, building tenancy and stability of cash flows are all important financial underwriting considerations. We hold no direct residential mortgage loans and do not originate or service securitized mortgage loans.

Commercial real estate capital markets remain very active for well-leased, quality commercial real estate located in strong institutional investment markets. The vast majority of properties securing the mortgages in our mortgage loan portfolio possess these characteristics.

As of December 31, 2018, the $1.9 billion commercial mortgage loan portfolio consisted of approximately 66 loans that are all in good standing. Given the quality and diversity of the underlying real estate, positive debt service coverage and significant borrower cash investment generally ranging between 30 and 40%, we remain confident that borrowers will continue to perform as expected under their contract terms.

Other Long-term Investments

Other long-term investments of $1.9 billion included investments in securities limited partnerships and real estate limited partnerships as well as direct investments in real estate joint ventures. These entities typically invest in mezzanine debt or equity of privately held companies (securities partnerships) and equity real estate. Given our subordinate position in the capital structure of these underlying entities, we assume a higher level of risk for higher expected returns. To mitigate risk, these investments are diversified across approximately 135 separate partnerships, and approximately 70 general partners who manage one or more of these partnerships. Also, the underlying investments are diversified by industry sector or property type, and geographic region. No single partnership investment exceeded 4% of our securities and real estate partnership portfolio.

Problem and Potential Problem Investments

"Problem" bonds and commercial mortgage loans are either delinquent by 60 days or more or have been restructured as to terms, including concessions by us for modification of interest rate, principal payment or maturity date. "Potential problem" bonds and commercial mortgage loans are considered current (no payment is more than 59 days past due), but management believes they have certain characteristics that increase the likelihood that they may become problems.

There were no significant problem or potential problem investments at December 31, 2018 and 2017.

Investment Outlook

Despite the continued strength of the U.S. economy, concerns related to trade and tariffs and rising interest rates contributed to a return of financial market volatility and public equity market declines in 2018. We continue to closely monitor global macroeconomic conditions and trends, including the uncertainty caused by the United Kingdom's decision to exit the European Union, and their potential impact to our investment portfolio. Certain sectors, such as retail, energy and natural gas have been volatile and we expect that to continue. Future realized and unrealized investment results will be driven largely by market conditions that exist when a transaction occurs or at the reporting date. These future conditions are not reasonably predictable; however, we believe that the vast majority of our investments will continue to perform under their contractual terms. Based on our strategy to match the duration of invested assets to the duration of insurance and contractholder liabilities, we expect to hold a significant portion of these assets for the long term. Although future impairment losses resulting from interest rate movements and credit deterioration due to both investment-specific and the global economic uncertainties discussed above remain possible, we do not expect these losses to have a material adverse effect on our financial condition or liquidity.

Market Risk

Financial Instruments

Our assets and liabilities include financial instruments subject to the risk of potential losses from adverse changes in market rates and prices. Consistent with disclosure requirements, the following items have been excluded from this consideration of market risk for financial instruments:

- changes in the fair values of insurance-related assets and liabilities because their primary risks are insurance rather than market risk;
- changes in the fair values of investments recorded using the equity method of accounting and liabilities for pension and other postretirement and postemployment benefit plans (and related assets); and
- changes in the fair values of other significant assets and liabilities such as goodwill, deferred policy acquisition costs, taxes, and various accrued liabilities. Because they are not financial instruments, their primary risks are other than market risk.

Excluding these items, our primary market risk exposures from financial instruments are:

- ***Interest-rate risk*** on fixed-rate, medium-term instruments. Changes in market interest rates affect the value of instruments that promise a fixed return.
- ***Foreign currency exchange rate risk*** of the U.S. dollar primarily to the South Korean won, Euro, New Zealand dollar, Chinese yuan renminbi, and Taiwan dollar. An unfavorable change in exchange rates reduces the carrying value of net assets denominated in foreign currencies.

Our Management of Market Risks

We predominantly rely on three techniques to manage our exposure to market risk:

- ***Investment/liability matching.*** We generally select investment assets with characteristics (such as duration, yield, currency and liquidity) that correspond to the underlying characteristics of our related insurance and contractholder liabilities so that we can match the investments to our obligations. Shorter-term investments generally support shorter-term life and health liabilities. Medium-term, fixed-rate investments support interest-sensitive and health liabilities. Longer-term investments generally support products with longer pay out periods such as annuities and long-term disability liabilities.
- ***Use of local currencies for foreign operations.*** We generally conduct our international business through foreign operating entities that maintain assets and liabilities in local currencies. This technique limits exchange rate risk to our net assets.
- ***Use of derivatives.*** We use derivative financial instruments to minimize certain market risks.

See Note 9 to our Consolidated Financial Statements for additional information about derivative financial instruments.

Effect of Market Fluctuations

Assuming a 100 basis point increase in interest rates and 10% strengthening in the U.S. dollar to foreign currencies, the effect of hypothetical changes in market rates or prices on the fair value of certain financial instruments, subject to the exclusions noted above (particularly insurance liabilities), would have been as follows as of December 31:

	Loss in fair value	
Market scenario for certain non-insurance financial instruments (in billions)	**2018**	**2017**
100 basis point increase in interest rates (excluding long-term debt)	**$ 1.6**	$ 1.6
10% strengthening in U.S. dollar to foreign currencies	**$ 0.4**	$ 0.5

The effect of a hypothetical increase in interest rates, primarily on fixed maturities and commercial mortgage loans, was determined by estimating the present value of future cash flows using various models, primarily duration modeling. The impact of a hypothetical increase to interest rates at December 31, 2018 is consistent with the impact at December 31, 2017, which has been restated to exclude long-term debt, as discussed below.

In the event of a hypothetical 100 basis point increase in interest rates, the fair value of the Company's long-term debt would decrease approximately $2.4 billion at December 31, 2018 and $0.5 billion at December 31, 2017. The impact at December 31, 2018 was greater than that at December 31, 2017 due to additional long-term debt issued in acquiring Express Scripts. Changes in the fair value of our long-term debt do not impact our financial position or operating results. See Note 5 to our Consolidated Financial Statements for additional information about the Company's debt.

The effect of a hypothetical strengthening of the U.S. dollar relative to the foreign currencies of certain financial instruments held by us was estimated to be 10% of the U.S. dollar equivalent fair value. Our foreign operations hold investment assets, such as fixed maturities, cash, and cash equivalents, that are generally invested in the currency of the related liabilities. The effect of a hypothetical 10% strengthening in the U.S. dollar to foreign currencies at December 31, 2018 is consistent with that at December 31, 2017.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

The information contained under the caption "Market Risk" in the MD&A section of this Form 10-K is incorporated by reference.

ITEM 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Board of Directors
and Shareholders of Cigna Corporation

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Cigna Corporation and its subsidiaries (the "Company") as of December 31, 2018 and 2017, and the related consolidated statements of income, comprehensive income, changes in total equity and cash flows for each of the three years in the period ended December 31, 2018, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018 based on criteria established in *Internal Control – Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As described in Management's Annual Report on Internal Control over Financial Reporting, management has excluded Express Scripts Holding Company ("legacy Express Scripts") from its assessment of internal control over financial reporting as of December 31, 2018 because it was acquired by the Company in a purchase business combination during 2018. We have also excluded legacy Express Scripts from our audit of internal control over financial reporting. Legacy Express Scripts is a wholly-owned subsidiary whose total assets and total revenues excluded from management's assessment and our audit of internal control over financial reporting represent 10% and 5%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2018.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Note 1 Description of Business

Cigna Corporation, together with its subsidiaries (either individually or collectively referred to as "Cigna," the "Company," "we," "our" or "us" is a global health service organization dedicated to a mission of helping those we serve improve their health, well-being and peace of mind. Our evolved strategy in support of our mission is ***Go Deeper, Go Local, Go Beyond*** using a differentiated set of medical, pharmacy, dental, disability, life and accident insurance and related products and services offered by our subsidiaries.

The majority of these products are offered through employers and other groups such as governmental and non-governmental organizations, unions and associations. Cigna also offers commercial health and dental insurance, Medicare and Medicaid products and health, life and accident insurance coverages to individuals in the United States and selected international markets. In addition to these ongoing operations, Cigna also has certain run-off operations.

As described more fully in Note 3, on March 8, 2018, the Company entered into a merger agreement with Express Scripts Holding Company ("Express Scripts"). Following entry into the merger agreement and throughout the pendency of the transaction, Cigna and Express Scripts designed integration plans to implement a new management and business reporting structure for the combined company immediately upon closing. On December 20, 2018, Cigna completed the acquisition of Express Scripts. As a result, our segments have changed as described below, effective in the fourth quarter of 2018. Financial data for all prior periods presented was restated to reflect this new segment presentation.

Integrated Medical offers a variety of medical solutions to employers and individuals.

- The ***Commercial*** operating segment serves employers (also referred to as "clients") and their employees (also referred to as "customers") and other groups. This segment provides deeply integrated medical and specialty offerings including medical, pharmacy, dental, behavioral health and vision, health advocacy programs and other products and services to insured and self-insured clients.
- The ***Government*** operating segment offers Medicare Advantage, Medicare Supplement, and Medicare Part D plans to Medicare-eligible beneficiaries as well as Medicaid plans. This operating segment also offers health insurance coverage to individual customers both on and off the public exchanges. This segment includes the acquired Express Scripts' Medicare Part D business.

Health Services includes pharmacy benefits management ("PBM"), pharmacy home delivery, and certain medical management services. This segment includes Express Scripts' business from the date of acquisition with the exception of Express Scripts' Medicare Part D business that is reported in the Government operating segment.

International Markets includes supplemental health, life and accident insurance products and health care coverage in our international markets as well as health care benefits to globally mobile employees of multinational organizations.

The remainder of our business operations are reported in ***Group Disability and Other,*** consisting of the following:

- ***Group Disability and Life*** provides group long-term and short-term disability, group life, accident, voluntary and specialty insurance products and related services.
- ***Corporate-Owned Life Insurance ("COLI")*** offers permanent insurance contracts sold to corporations to provide coverage on the lives of certain employees for the purpose of financing employer-paid future benefit obligations.
- ***Run-off businesses:***
    - ***Reinsurance:*** predominantly comprised of guaranteed minimum death benefit ("GMDB") and guaranteed minimum income benefit ("GMIB") business effectively exited through reinsurance with Berkshire Hathaway Life Insurance Company of Nebraska ("Berkshire") in 2013.
    - ***Settlement Annuity*** business in run-off.
    - ***Individual Life Insurance and Annuity and Retirement Benefits Businesses:*** deferred gains from the sales of these businesses.
    - ***Certain international run-off businesses***

Corporate reflects amounts not allocated to operating segments, including interest expense, net investment income on investments not supporting segment and other operations, interest on uncertain tax positions, certain litigation matters, compensation cost for stock options and related excess tax benefits, expense associated with our frozen pension plans, severance, certain overhead and project costs and intersegment eliminations for products and services sold between segments.

Note 2 Summary of Significant Accounting Policies

Basis of Presentation

The Consolidated Financial Statements include the accounts of Cigna Corporation and its consolidated subsidiaries. Intercompany transactions and accounts have been eliminated in consolidation. These Consolidated Financial Statements were prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The Company adopted Article 5 of Regulation S-X issued by the Securities and Exchange Commission effective December 31, 2018 in conjunction with the acquisition of Express Scripts. As a result, the Company now presents current assets and liabilities on its balance sheet. The Company reclassified realized investment gains (losses) from revenue and now reports them below income from operations with interest expense in our Consolidated Statements of Income, in conformity with Article 5. Prior years' information was reclassified to conform to this new presentation.

Amounts recorded in the Consolidated Financial Statements necessarily reflect management's estimates and assumptions about medical costs, investment valuation, interest rates and other factors. Significant estimates are discussed throughout these Notes; however, actual results could differ from those estimates. The impact of a change in estimate is generally included in earnings in the period of adjustment. Certain reclassifications have been made to prior year amounts to conform to the current presentation.

Variable interest entities. See Note 11 for a discussion of variable interest entities.

Recent Accounting Guidance

Accounting Standard and Adoption Date	Requirements and Effects of Adopting New Guidance
GUIDANCE ADOPTED JANUARY 1, 2018	
Revenue from Contracts with Customers (Accounting Standards Update ("ASU") 2014-09 and related amendments)	Requires: • Revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services • Additional revenue-related disclosures Effects of adoption: • Applies to the Company's service and pharmacy contracts with customers • Adopted through full retrospective restatement • Cumulative-effect adjustment of $24 million after-tax was recorded, reducing the December 31, 2015 balance of retained earnings. This adjustment established a contract liability for service fee revenue billed that must be deferred and allocated to services performed after a customer contract terminates. Subsequent changes in the contract liability and the related impact to net income and per share amounts since adoption were immaterial. • Immaterial reclassifications were made to prior periods in the Consolidated Statements of Income to conform to the current presentation. The ASU and related interpretive guidance provide clarification on topics including whether all or a part of a contract is within its scope, and the definition of a customer. Companies are required to identify and evaluate distinct performance obligations within their contracts. These clarifications resulted in reclassifications within the Integrated Medical segment affecting premiums, fees and other revenues, benefit expenses, and selling, general and administrative expenses and had no impact on revenue recognition patterns or net income. Expedients and exemptions elected: • Incremental costs of obtaining service and pharmacy contracts for short-term arrangements are expensed as incurred. • The Company does not disclose information about the aggregate amount of transaction price allocated to remaining performance obligations as its contracts are either short-term, or the remaining transaction price consists of variable consideration that relates specifically to wholly unsatisfied future periods of service. See the discussion of the Company's accounting policies for fees and pharmacy revenues beginning on page 79.
Recognition and Measurement of Financial Assets and Financial Liabilities (ASU 2016-01)	Requires: • Entities to measure equity investments at fair value in net income if they are neither consolidated nor accounted for under the equity method Effects of adoption: • Certain limited partnership interests previously carried at cost of approximately $200 million were increased to fair value of approximately $275 million on January 1, 2018. Subsequent changes in fair value are reported in net investment income. • Changes in fair value for equity securities having a readily determinable fair value that were previously reported in accumulated other comprehensive income ("AOCI") are now reported in net realized investment gains (losses). • Cumulative-effect adjustment of $62 million after-tax was recorded, increasing the opening balance of retained earnings in 2018. • See Notes 9 and 10 for updated disclosures about equity securities.

Accounting Standard and Adoption date	Requirements and Effects of Adopting New Guidance
GUIDANCE ADOPTED JANUARY 1, 2018	
Targeted Improvements to Accounting for Hedging Activities (ASU 2017-12) **Early adopted as of January 1, 2018**	Guidance: • Relaxes eligibility requirements for financial and nonfinancial hedging strategies for hedge accounting and changes how companies assess effectiveness • Amends presentation and disclosure requirements to improve transparency about the uses and results of hedging programs Effects of adoption: • An immaterial amount of retained earnings was reclassified to AOCI, decreasing the opening balance in 2018, for a portion of the hedging instruments that was previously excluded from the assessment of hedge effectiveness for fair value hedges. • See Note 9 for the Company's disclosures about derivatives.
Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income (ASU 2018-02) **Early adopted as of January 1, 2018**	Guidance: • Allows companies to reclassify the tax effects stranded in AOCI to retained earnings as a result of H.R.1, An Act to Provide for Reconciliation Pursuant to Titles II and V of the Concurrent Resolution on the Budget for Fiscal Year 2018 (referred to throughout this Form 10-K as "U.S. tax reform" or "U.S. tax reform legislation") • Requires additional disclosures of the Company's accounting policy for releasing income tax effects from AOCI • Allows companies to apply the guidance retrospectively or in the period of adoption Effects of adoption: AOCI of $229 million was reclassified to retained earnings, increasing the opening balance in 2018. See Note 12 for additional information including accounting policy disclosures.

In addition to these standards, the Company adopted the following guidance in first quarter 2018 with no material impact to our financial statements: Intra-Entity Transfers of Assets Other than Inventory (ASU 2016-16), Clarifying the Definition of a Business (ASU 2017-01), Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost (ASU 2017-07), Statement of Cash Flows: Restricted Cash (ASU 2016-18), Gains and Losses from the Derecognition of Nonfinancial Assets (ASU 2017-05), and Stock Compensation Scope of Modification Accounting (ASU 2017-09).

Accounting Guidance Not Yet Adopted

Accounting Standard and Effective Date	Requirements and Expected Effects of New Guidance Not Yet Adopted
Leases (ASU 2016-02 and related amendments) **Required as of January 1, 2019**	Requires: • Balance sheet recognition of assets and liabilities arising from leases, including leases embedded in other contracts • Additional disclosures of the amount, timing and uncertainty of cash flows from leases • Modified retrospective approach for leases in effect as of and after the date of adoption with a cumulative-effect adjustment recorded in retained earnings Expected effects: • The Company will adopt this ASU in the first quarter of 2019 on a modified retrospective basis and will not restate comparative periods. While we are still finalizing our adoption procedures, we estimate the primary impact to our Consolidated Balance Sheet will be an increase to assets and liabilities of approximately $700 million for the right-of-use asset and corresponding lease liability related to existing operating leases. We do not expect the impact to retained earnings to be material. • The Company elected the optional practical expedient to retain the current classification of leases, and therefore, we do not expect a material impact to the Consolidated Statements of Income or Cash Flows. • The Company has implemented a new lease system and developed requisite changes to internal controls over financial reporting. • The Company is continuing to work to develop required disclosures. • The Company adopted this new guidance as of the effective date and will not present comparative periods in the financial statements, as recently allowed.

Accounting Standard and Effective Date	Requirements and Expected Effects of New Guidance Not Yet Adopted
Measurement of Credit Losses on Financial Instruments (ASU 2016-13) **Required as of January 1, 2020, with early adoption permitted as of January 1, 2019**	Requires: • A new approach using expected credit losses to estimate and recognize credit losses for certain financial instruments such as mortgage loans, reinsurance recoverables and other receivables when such instruments are first originated or acquired. • Changes in the criteria for impairment of available-for-sale debt securities • Adoption using a modified retrospective approach with a cumulative-effect adjustment recorded in retained earnings Expected effects: • The Company is continuing to evaluate this new standard and its effects on our financial statements and disclosures. We expect to adopt the standard as of January 1, 2020. • An additional allowance for future expected credit losses for certain financial instruments may be required at adoption.
Simplifying the Test for Goodwill Impairment (ASU 2017-04) **Required as of January 1, 2020, with early adoption permitted as of January 1, 2017**	Guidance: • Simplifies the accounting for goodwill impairment by eliminating the need to determine the fair value of individual assets and liabilities of a reporting unit to measure a goodwill impairment • Redefines the amount of goodwill impairment to equal the amount by which a reporting unit's carrying value exceeds its fair value, limited to the total amount of goodwill of the reporting unit • Requires prospective adoption Expected effects: • The Company is evaluating this new standard and its expected timing of adoption.

Targeted Improvements to the Accounting for Long-Duration Contracts (ASU 2018-12)
 	
Required as of January 1, 2021
	Requires (for insurance entities that issue long-duration contracts):
	• Cash flow assumptions used to measure the liability for future policy benefits for traditional and limited-pay contract to be reconsidered at least annually with any changes reflected in net income.
	• Discount rate assumptions to be reviewed quarterly (based on an upper-medium grade (low credit risk) fixed-income instrument yield that maximizes the use of observable market inputs) with any changes reflected in other comprehensive income.
	• Deferred policy acquisition costs to be amortized on a constant-level basis over the expected term of the related contract.
	• Fair value measurement of all market risk benefits.
	• Additional disclosures, including liability rollforwards and information about significant inputs, judgments, assumptions and methods used in measurement.
	• Transition methods at adoption vary:
	  • Changes to the liability for future policy benefits will use a modified retrospective approach (applied to all contracts on the basis of their carrying amounts as of the beginning of the earliest period presented), with an option to elect a full retrospective transition under certain criteria.
	  • Deferred policy acquisition costs are to be transitioned consistent with the method applied to the liability for future policyholder benefits.
	  • Market risk benefits are required to transition using retrospective application.
	Expected effects:
	• The Company is evaluating the impact of this newly-issued guidance, but it is expected to have a significant impact on our processes, controls, systems and financial results. The new guidance will apply to insurance products predominantly sold in the International Markets segment and Group Disability and Other.

Significant Accounting Policies

The Company's accounting policies are described either in this Note or in the applicable Notes to the Consolidated Financial Statements as indicated in the table below.

A. Cash and Cash Equivalents

Cash and cash equivalents are carried at cost that approximates fair value. Cash equivalents consist of short-term investments with maturities of three months or less from the time of purchase. The Company reclassifies cash overdraft positions to liabilities when the legal right of offset does not exist.

B. Accounts Receivable, Net

The following amounts are included within accounts receivable, net:

(In millions)	2018	2017
Insurance customer receivables	**$ 1,888**	$ 1,818
Noninsurance customer receivables	**4,988**	441
Pharmaceutical manufacturers receivable [1]	**3,321**	645
Other receivables	**276**	251
Total accounts receivable, net	**$ 10,473**	$ 3,155

(1) Includes $406 million at December 31, 2018 and $336 million at December 31, 2017 of receivables under noninsurance customer contracts.

These accounts receivable balances primarily include amounts due from clients, third-party payors, customers and pharmaceutical manufacturers. Receivables totaling $1.2 billion related to the acquired Express Scripts business are unbilled as of December 31, 2018 and are typically billed to PBM clients within 30 days based on contractual billing schedules. Unbilled receivables for medical benefit management

services represent amounts due from clients at contracted rates, and are billed when settlement provisions for capitated risk contracts are met, at least annually.

The receivables balances above are reported net of allowances for doubtful accounts of $217 million as of December 31, 2018 and $210 million as of December 31, 2017. The allowances are based on the current status of each customer's receivable balance as well as current economic and market conditions and a variety of other factors including the length of time the receivables are past due, the financial health of customers and our past experience. Receivables are written off against allowances only when such amounts are determined to be not recoverable and all collection attempts have failed. We regularly review the adequacy of these allowances based on a variety of factors, including age of the outstanding receivable and collection history. When circumstances related to specific collection patterns change, estimates of the recoverability of receivables are adjusted.

Express Scripts' receivables were recorded at their estimated fair values at the acquisition date. These fair values considered estimated discounts and claims adjustments issued to customers in the form of client credits, and amounts from third-party payors and pharmaceutical manufacturers that are not considered realizable based on contract terms and historical payment experience.

C. Inventories

Inventories consist of prescription drugs and medical supplies and are stated at the lower of first-in-first-out cost or net realizable value.

D. Reinsurance Recoverables

Reinsurance recoverables represent amounts due from reinsurers for both paid and unpaid claims of the Company's insurance businesses. Most reinsurance recoverables are classified as non-current assets. The current portion of reinsurance recoverables is reported in other current assets and consists primarily of recoverables on paid claims expected to be settled within one year. Reinsurance recoverables are presented net of allowances for uncollectible reinsurance that were immaterial as of December 31, 2018 and 2017.

E. Deferred Policy Acquisition Costs

Costs eligible for deferral include incremental, direct costs of acquiring new or renewal insurance and investment contracts and other costs directly related to successful contract acquisition. Examples of deferrable costs include commissions, sales compensation and benefits, policy issuance and underwriting costs and premium taxes. The Company records acquisition costs differently depending on the product line. Acquisition costs for:

- ***Supplemental health, life and accident insurance products*** (primarily individual products) that comprise the majority of the Company's deferred policy acquisition costs and ***group health and accident insurance products*** are deferred and amortized, generally in proportion to the ratio of periodic revenue to the estimated total revenues over the contract periods.
- ***Universal life products*** are deferred and amortized in proportion to the present value of total estimated gross profits over the expected lives of the contracts.
- ***Other products*** are expensed as incurred.

Deferred policy acquisition costs also include the value of business acquired ("VOBA") for certain acquisitions with material long-duration insurance contracts. The Company recorded amortization of deferred policy acquisition costs of $406 million in 2018, $322 million in 2017 and $292 million in 2016 primarily in selling, general and administrative expenses.

Each year, deferred policy acquisition costs are tested for recoverability. For universal life and other individual products, management estimates the present value of future revenues less expected payments. For group health and accident insurance products, management estimates the sum of unearned premiums and anticipated net investment income less future expected claims and related costs. If management's estimates of these sums are less than the deferred costs, the Company reduces deferred policy acquisition costs and records an additional expense.

F. Other Assets (Current and Non-Current)

Other current assets consist primarily of prepaid expenses, accrued investment income and the current portion of reinsurance recoverables. Other non-current assets consist primarily of GMIB assets and various other insurance-related assets. See Note 8 for the Company's accounting policy for GMIB assets. Additionally, other non-current assets include the carrying value of our equity-method investments in joint ventures in China, India, the U.S. and other foreign jurisdictions.

G. Redeemable Noncontrolling Interests

Products and services are offered in Turkey and India through joint venture entities. The Company is the principal equity holder and primary beneficiary of the Turkey joint venture and accordingly, this entity is consolidated. In 2017, Cigna modified the agreement governing its joint venture in India due to changes in the local regulatory environment that require control by a local partner. As a result of the changes in the joint venture agreement, the Company determined that it is no longer the primary beneficiary of the joint venture and, effective with the third quarter of 2017, no longer consolidates its results.

Redeemable noncontrolling interests on our Consolidated Balance Sheets represent the Turkey joint venture partner's preferred and common stock interests in the entity as of December 31, 2018 and 2017. Our joint venture partner may choose to require the Company to purchase their redeemable noncontrolling interests. We also have the right to require our joint venture partner to sell their redeemable noncontrolling

interests to us. The redeemable noncontrolling interests were recorded at fair value as of the dates of purchase. When the estimated redemption value for a redeemable noncontrolling interest exceeds its carrying value, an adjustment to increase the redeemable noncontrolling interest is recorded with an offsetting reduction to additional paid-in capital. When an adjustment is made to the carrying value of the redeemable noncontrolling interest, the calculation of shareholders' net income per share will be adjusted if the redemption value exceeds the greater of the carrying value or fair value.

H. Accrued Expenses and Other Current and Non-Current Liabilities

Accrued expenses (current) includes financial and performance guarantee liabilities under pharmacy contracts (see section L), management compensation, and various insurance-related liabilities, including experience-rated refunds, reinsurance contracts and the risk adjustment and minimum medical loss ratio rebate accruals under The Patient Protection and Affordable Care Act. Other non-current liabilities include obligations for pension, other postretirement and postemployment benefits (see Note 13), GMIB contract liabilities (see Note 8) and self-insured exposures not expected to be settled within one year. Legal costs to defend the Company's litigation and arbitration matters are expensed when incurred in cases where the Company cannot reasonably estimate the ultimate cost to defend. If the Company can reasonably estimate the cost to defend, a liability for these costs is accrued when the claim is reported.

I. Translation of Foreign Currencies

The Company generally conducts its international business through foreign operating entities that maintain assets and liabilities in local currencies that are generally their functional currencies. The Company uses exchange rates as of the balance sheet date to translate assets and liabilities into U.S. dollars. Translation gains or losses on functional currencies, net of applicable taxes, are recorded in accumulated other comprehensive income (loss). The Company uses average monthly exchange rates during the year to translate revenues and expenses into U.S. dollars.

J. Premiums and Related Expenses

Premiums for group life, accident and health insurance and managed care coverages are recognized as revenue on a pro rata basis over the contract period. Benefits and expenses are recognized when incurred and, for our Integrated Medical insured business, are presented net of pharmaceutical manufacturer rebates. For experience-rated contracts, premium revenue includes an adjustment for experience-rated refunds based on contract terms and calculated using the customer's experience (including estimates of incurred but not reported claims).

Premium revenue also includes an adjustment to reflect the estimated effect of rebates due to customers under the commercial minimum medical loss ratio provisions of the ACA. These rebates are settled in the year following the policy year.

Premiums received for the Company's Medicare Advantage plans and Medicare Part D products from the Centers for Medicare and Medicaid Services ("CMS") and customers are recognized as revenue ratably over the contract period. CMS provides risk-adjusted premium payments for Medicare Advantage Plans and Medicare Part D products based on the demographics and wellness of customers. The Company recognizes periodic changes to risk-adjusted premiums as revenue when the amounts are determinable and collection is reasonably assured. Additionally, Medicare Part D premiums include payments from CMS for risk sharing adjustments. The risk sharing adjustments are estimated quarterly based on claim experience by comparing actual incurred drug benefit costs to estimated costs submitted in original contracts. These adjustments may result in more or less revenue from CMS. Final revenue adjustments are determined and settled with CMS in the year following the contract year. Premium revenue also includes an adjustment to reflect the estimated effect of rebates due to CMS under the Medicare Advantage and Medicare Part D minimum medical loss ratio provisions of the ACA.

The ACA prescribed three programs to mitigate the risk for participating health insurance companies selling coverage on the public exchanges: risk adjustment, reinsurance and risk corridor. The reinsurance and risk corridor programs expired at the end of 2016, while the permanent risk adjustment program continues.

The risk adjustment program reallocates funds from insurers with lower risk populations to insurers with higher risk populations based on the relative risk scores of participants in non-grandfathered plans in the individual and small group markets, both on and off the exchanges. We estimate our receivable or payable based on the risk of our members compared to the risk of other members in the same state and market, considering data obtained from industry studies and the United States Department of Health and Human Services ("HHS"). Receivables or payables are recorded as adjustments to premium revenue based on our year-to-date experience when the amounts are reasonably estimable and collection is reasonably assured. Final revenue adjustments are determined by HHS in the year following the policy year.

Premiums for individual life, accident and supplemental health insurance and annuity products, excluding universal life and investment-related products, are recognized as revenue when due. Benefits and expenses are matched with premiums.

Revenue for universal life products is recognized as follows:

- Investment income on assets supporting universal life products is recognized in net investment income as earned.
- Charges for mortality, administration and policy surrender are recognized in premiums as earned. Administrative fees are considered earned when services are provided.

Benefits and expenses for universal life products consist of benefit claims in excess of policyholder account balances and income earned by policyholders. Expenses are recognized when claims are incurred, and income is credited to policyholders in accordance with contract provisions.

The unrecognized portion of premiums received is recorded as unearned premiums included in insurance and contractholder liabilities (see Note 7 for further information).

K. Fees and Related Expenses

The majority of the Company's service fees are derived from administrative services only ("ASO") arrangements that allow corporate clients to self-fund claims and assume the risk of medical or other benefit costs. Most of the Company's ASO arrangements are for medical and specialty services, including pharmacy benefits. Generally, the Company's ASO arrangements are short-term. Contract modifications typically occur on renewal and are prospective in nature.

In return for fees from these clients, the Company provides or makes available various services supporting benefit management and claims administration. In addition, services offered through our Integrated Medical segment include access to the Company's participating provider networks, disease management, utilization management, and cost containment services.

In general, the Company considers these services to be a combined performance obligation to provide cost effective administration of plan benefits over the contract period. Fees are billed, due and recognized monthly at contracted rates based on current membership or utilization. This recognition pattern aligns with the benefits from services provided to clients. These revenues are reported in fees and other revenues in the Consolidated Statements of Income.

For most ASO arrangements, the Company is required to perform services for a limited period after a client cancels. If these services will not be separately billed to the client as they are performed, the Company estimates and defers a portion of compensation attributable to this service obligation received in advance. Deferred revenue is recorded as a contract liability and recognized when the related services are performed. The balance was immaterial as of December 31, 2018 and 2017.

The Company may also provide performance guarantees that provide potential refunds to clients if certain service standards, clinical outcomes or financial metrics are not met. If these standards, outcomes and metrics are not met, the Company may be financially at risk up to a stated percentage of the contracted fee or a stated dollar amount. The Company defers revenue by recording a liability for estimated payouts associated with these guarantees within accrued expenses and other liabilities (current). The amount of revenue deferred is estimated for each type of guarantee, using either a most likely amount or expected value method depending upon the nature of the guarantee and the information available to estimate refunds. Estimates are refined each reporting period as additional information on the Company's performance becomes available, and upon final reconciliation and settlement at the end of the guarantee period. Amounts accrued and paid for performance guarantees during the reporting periods were not material.

Rebates from pharmaceutical manufacturers resulting from ASO client utilization at retail pharmacies, net of amounts payable to ASO clients, are compensation for pharmacy services and recorded in fees and other revenues. Rebates generally represent a per-script amount from the manufacturer and are determined based on scripts filled during the reporting period.

Expenses associated with administrative programs and services are recognized in selling, general and administrative expenses as incurred.

The Company also earns fees by providing integrated medical benefit management solutions that drive cost reductions and improve quality outcomes. These solutions were part of the business acquired from Express Scripts. Clients are primarily sponsors of health benefit plans and fees may be stated as a per-member-per-month fee or as a per-claim fee. The Company considers the services to be a single performance obligation to stand ready to provide utilization management services over the contract period (generally three years). In certain arrangements, the Company assumes the financial obligation for third-party provider costs for medical services provided to the health plan's members. Fees are recorded gross in revenues because the Company is acting as a principal in arranging for and controlling the services provided by third-party network providers. Contractual fees vary based on enrollment and provider costs and are estimated, billed, due and recognized monthly. Direct costs associated with these programs are included in pharmacy and service costs.

Certain medical benefit management contracts require the Company to share the results of medical cost experience that differs from specified targets. This variable consideration is estimated at contract inception and adjusted through the contract period. The estimated profits and costs are recognized net in revenues.

L. Pharmacy Revenues and Costs

Pharmacy Revenues. Pharmacy revenues include revenue from the acquired Express Scripts business and the Company's legacy mail order pharmacy business. Pharmacy revenues are recognized when control of the promised goods or services is transferred to clients, in an amount that reflects the consideration the Company expects to receive for those goods or services.

The Express Scripts business provides or makes available various services supporting benefit management and claims administration and is generally obligated to provide prescription drugs to clients' members through multiple distribution methods including retail networks, home delivery and specialty pharmacies. These goods and services are integrated into a single performance obligation to process claims, dispense prescription drugs, and provide other services over the contract period (generally three years). The Company has elected the practical expedient to account for shipping and handling as a fulfillment activity. This performance obligation is satisfied as the business stands ready to fulfill its obligation.

Fees are billed, due and recognized at contract rates either on a periodic basis or as services are provided (such as, based on volume of claims processed). This recognition pattern aligns with the benefits from services provided.

Revenues for dispensing prescription drugs through retail pharmacies consist of the prescription price (ingredient cost and dispensing fee) contracted with clients, including the member co-payment, and any associated fees for services because we act as principal in these arrangements. When a prescription is presented to a retail network pharmacy, we are solely responsible for member eligibility, drug utilization review, drug-to-drug interaction review, any required clinical intervention, plan provision information, payment to the pharmacy and client billing. These revenues are recognized based on the full prescription price when the pharmacy claim is processed and approved for payment. We also provide benefit design and formulary consultation services to clients, and negotiate separate contractual relationships with clients and network pharmacies. These factors indicate that we have control over these transactions until the prescription is dispensed.

Home delivery and specialty pharmacy revenues are due and recognized as each prescription is shipped, net of reserves for discounts and contractual allowances estimated based on historical experience. Any differences between estimates and actual collections are reflected in operations when payments are received. Historically, adjustments to original estimates and returns have not been material.

We may also provide certain financial and performance guarantees, including a minimum level of discounts a client may receive, generic utilization rates and various service levels. Clients may be entitled to receive performance penalties if we fail to meet guarantees. Actual performance is compared to the guarantee for each measure throughout the period and the Company defers revenue for any estimated payouts within accrued expenses and other liabilities (current). These estimates are adjusted at the end of the guarantee period. Historically, adjustments to original estimates have not been material. The balance was $895 million as of December 31, 2018 and immaterial as of December 31, 2017.

The acquired Express Scripts business and Cigna's legacy home delivery business administer a program through which we receive rebates and administrative fees from pharmaceutical manufacturers. If these rebates and administrative fees are provided in conjunction with claims processing and home delivery services provided to clients, the amount payable to clients is recorded as a reduction of pharmacy revenues. These amounts are based on expected sharing percentages in contractual arrangements. These estimated payables are adjusted when amounts are collected from pharmaceutical manufacturers. Historically, these adjustments have not been material. If pharmacy rebates and administrative fees are provided in a contract that does not include claims processing, the performance obligation is to arrange for the customer to receive these rebates. In these cases, rebates and administrative fees are recorded as pharmacy revenue, net of contractual amounts payable to the client.

Other pharmacy service revenues are earned by distributing specialty pharmaceuticals and medical supplies to providers, clinics and hospitals and services to specialty pharmacy manufacturers. These revenues are recognized as prescriptions and supplies are shipped and services provided.

Pharmacy costs. Pharmacy costs include the cost of prescriptions sold and for the acquired Express Scripts business, network pharmacy claim costs and co-payments. Also included are direct costs of dispensing prescriptions including supplies, shipping and handling. Home delivery costs are recognized when the drug is shipped and retail network costs are recognized when the drug is dispensed. Pharmacy rebates and administrative fees received for providing claims processing and home delivery services are recorded as a reduction of pharmacy costs. Rebates are recognized as prescriptions are shipped or dispensed. For periods following completion of the merger with Express Scripts, the Company records a pharmacy and service costs payable for certain retail network claims based on our performance throughout the period against the contractual pricing guarantee with each pharmacy network.

Note 3 Mergers, Acquisitions and Dispositions

A. Acquisition of Express Scripts

On December 20, 2018, Cigna acquired Express Scripts through a series of mergers (collectively, the "Merger"). Cigna Holding Company (formerly named Cigna Corporation and referred to as "Old Cigna") and Express Scripts each merged with and into a wholly-owned subsidiary of Cigna. As a result of these transactions, Cigna became the parent of the combined company.

Old Cigna shareholders received one share of Cigna common stock in exchange for each share of Old Cigna common stock held immediately prior to the Merger. Express Scripts shareholders received (1) 0.2434 of a share of Cigna common stock and (2) cash of $48.75, without interest, subject to applicable withholding taxes (the "Merger Consideration"), in exchange for each share of Express Scripts common stock held immediately prior to the Merger. Cash consideration was funded primarily through a combination of cash available and debt financing discussed further in Note 5. After completion of the Merger, shares of Cigna common stock were listed for trading on the New York Stock Exchange.

The acquired Express Scripts business accelerates Cigna's ***Go Deeper, Go Local, Go Beyond*** strategy by greatly increasing the Company's ability to put medicine within reach of customers and also helping to make it more affordable. We can improve patient outcomes and help control the cost of the drug benefit by: 1) identifying products and offering solutions that improve patient outcomes and assist in controlling costs; 2) evaluating drugs for efficacy, value and price to select a cost-effective formulary; 3) offering cost-effective home delivery pharmacy and specialty services that produce cost savings for plan sponsors and better care for members; 4) leveraging purchasing volume to provide discounts to health benefit providers; and 5) promoting generic and lower-cost brands.

Merger consideration: The estimated merger consideration of $52.8 billion was calculated as follows:

(Dollars and shares in millions, except per share amounts)		
Cash consideration		
Express Scripts common stock outstanding		**564.3**
Cash consideration per share	**$**	**48.75**
Cash consideration paid to Express Scripts common stockholders	**$**	**27,510**
Cash paid in lieu of fractional shares	**$**	**4**
Cash consideration paid to Express Scripts performance share holders	**$**	**65**
Total cash consideration	**$**	**27,579**
Stock consideration		
Express Scripts common stock outstanding		**564.3**
Per share exchange ratio		**0.2434**
Shares of Cigna issued to Express Scripts common stockholders		**137.3**
Shares of Cigna issued to Express Scripts performance share holders and other equity holders		**0.3**
Shares of Cigna issued to Express Scripts shareholders		**137.6**
Closing price of Cigna common stock on December 20, 2018	**$**	**179.80**
Total stock consideration	**$**	**24,745**
Noncontrolling interest	**$**	**7**
Fair value of other share-based compensation awards	**$**	**479**
Total merger consideration	**$**	**52,810**

Fair value of share-based compensation award. Express Scripts employees' awards of options and restricted stock units of Express Scripts stock were rolled over to Cigna stock options and restricted stock units on the date of the acquisition. Each holder of an Express Scripts stock option or restricted stock unit received 0.4802 of a Cigna stock option or restricted stock award. The Cigna stock option exercise price was determined by using this same conversion ratio. Vesting periods and the remaining life of the options remained consistent with the original Express Scripts awards.

The Company valued the restricted stock units at Cigna's stock price and stock options using a Black-Scholes pricing model as of the acquisition date. The assumptions used were generally consistent with those disclosed in Note 14, except the expected life of these options averaged 4.3 years and the exercise price did not equal the market value at the date of grant.

The fair value of these options and restricted stock unit awards was included in the purchase price to the extent that services had been provided prior to the acquisition based on the grant date of the original Express Scripts award and vesting period. The remaining fair value not included in the purchase price will be recorded as compensation expense in future periods over the remaining vesting periods. Most of the expense is expected to be recognized in 2019 and 2020.

Purchase price allocation: In accordance with GAAP, the total purchase price has been allocated to the tangible and intangible net assets acquired based on management's preliminary estimates of their fair values and may change as additional information becomes available over the next several months. Most of the goodwill ($33.7 billion) is assigned to the Health Services segment, with the remainder to the Integrated Medical segment and is not deductible for federal income tax purposes. The following table summarizes the estimated fair values of assets acquired and liabilities assumed at the closing date.

(In millions)		
Cash and cash equivalents	**$**	**3,517**
Receivables		**7,802**
Inventory		**2,483**
Other current assets		**600**
Property and equipment		**2,973**
Goodwill		**38,361**
Other identifiable intangible assets		**38,725**
Other assets acquired, non-current		**314**
Total assets acquired		**94,775**
Other current liabilities		**18,616**
Long-term debt, including current portion		**12,816**
Deferred income tax liabilities		**9,511**
Other liabilities, non-current assumed		**1,022**
Total liabilities acquired		**41,965**
Total	**$**	**52,810**

A portion of the purchase price has been allocated to intangible assets that are presented and discussed below.

(In millions)	Estimated Fair Value	Estimated Useful Life in Years	Amortization Method
Customer relationships	**$ 30,210**	**14 - 29**	**Cash flow trended**
Internal-use software [1]	**2,443**	**3 - 7**	**Straight Line**
Trade name – Express Scripts	**8,400**	**N/A**	**Indefinite**
Trade name – Other	**115**	**10**	**Straight Line**
Total	**$ 41,168**		

(1) Reported in property and equipment.

The fair value of the customer relationships and the amortization period and method were determined using an income approach that relies heavily on projected future net cash flows including key assumptions for customer attrition, margins, and discount rates. The estimated useful life reflects the time period and pattern that Cigna expects to receive the benefits of the related cash flows.

The results of Express Scripts have been included in the Company's Consolidated Financial Statements from the date of the acquisition. Revenues of Express Scripts included in the Company's results for 2018 approximated $2.6 billion and Express Scripts' results of operations were immaterial to Cigna's net income.

Unaudited pro forma information. The following table presents selected unaudited pro forma information for the Company assuming the acquisition of Express Scripts had occurred on January 1, 2017. The primary adjustments reflected in the pro forma results relate to the interest expense on the debt issued to fund the Merger, the amortization of the acquired intangible assets and the presentation of transaction related costs. Transaction related costs incurred by the Company and Express Scripts in 2018 have been presented as if they had been incurred on January 1, 2017. The pro forma information does not purport to represent what the Company's actual results would have been if the acquisition had occurred as of the date indicated or what such results would be for any future periods.

	Unaudited	
	Year Ended December 31,	
(In millions, except per share amounts)	2018	2017
Total revenues	**$ 149,544**	$ 143,288
Shareholders' net income	**$ 5,632**	$ 4,435

Pro forma shareholders' net income for the year ended December 3l, 2017 includes $1.2 billion in transaction-related costs incurred in connection with the acquisition.

B. Acquisition of OnePath Life NZ Limited ("OnePath Life")

On November 30, 2018, the Company acquired OnePath Life for NZ$700 million (approximately $480 million at closing) using internal cash resources. OnePath Life is one of the largest life insurance companies in New Zealand. This acquisition will support diversifying distribution capabilities and product offerings in the New Zealand market. It will also enable better service delivery to clients and customers. The purchase price has been allocated to the tangible and intangible net assets acquired based on management's preliminary estimates of their fair value and may change as additional information becomes available over the next several months. Goodwill has been assigned to the International Markets segment as of December 31, 2018 and is not tax deductible.

The results of this business have been included in the Company's Consolidated Financial Statements from the date of acquisition and were not material. In addition, the pro forma effects on total revenues and net income assuming the acquisition had occurred January 1, 2017 were not material to the Company for the years ended December 31, 2018 and 2017.

C. Transaction-related Costs

The Company has incurred costs detailed in the table below in the acquisition of Express Scripts, the terminated merger with Anthem, Inc. ("Anthem") and other transactions. These costs consisted primarily of fees for legal, advisory and other professional services, amortization of the Bridge Facility fees in 2018 and interest expense on debt issued to fund the Express Scripts merger through the closing date, net of investment income earned on the debt proceeds. A portion of the costs, primarily legal and advisory fees, related to the completed Express Scripts acquisition are not deductible for federal income tax purposes.

	2018		2017		2016	
(In millions)	Before-tax	After-tax	Before-tax	After-tax	Before-tax	After-tax

Charitable contributions	**200**	**158**	–	–	–	–
Legal and advisory fees	**204**	**185**	36	23	96	95
Bridge facility fees	**140**	**111**	–	–	–	–
All other transaction-related costs	**204**	**133**	90	69	70	52
Tax (benefit) – previously non-deductible costs	**–**	**–**	–	(59)	–	–
Transaction-related costs, net	**$ 852**	**$ 669**	$ 126	$ 33	$166	$147

Note 4 Earnings Per Share ("EPS")

Accounting policy. The Company computes basic earnings per share using the weighted-average number of unrestricted common and deferred shares outstanding. Diluted earnings per share also includes the dilutive effect of outstanding employee stock options and restricted stock using the treasury stock method and the effect of strategic performance shares.

Basic and diluted earnings per share were computed as follows:

(Shares in thousands, dollars in millions, except per share amounts)	2018 Basic	2018 Effect of Dilution	2018 Diluted	2017 Basic	2017 Effect of Dilution	2017 Diluted	2016 Basic	2016 Effect of Dilution	2016 Diluted
Shareholders' net income	**$ 2,637**	**$ –**	**$ 2,637**	$ 2,237	$ –	$ 2,237	$ 1,867	$ –	$ 1,867
Shares									
Weighted average	**246,652**	**–**	**246,652**	250,892	–	250,892	255,360	–	255,360
Common stock equivalents		**3,573**	**3,573**		4,180	4,180		4,287	4,287
Total shares	**246,652**	**3,573**	**250,225**	250,892	4,180	255,072	255,360	4,287	259,647
EPS	**$ 10.69**	**$ (0.15)**	**$ 10.54**	$ 8.92	$ (0.15)	$ 8.77	$ 7.31	$ (0.12)	$ 7.19

The following outstanding employee stock options were not included in the computation of diluted earnings per share because their effect was anti-dilutive.

(In millions)	2018	2017	2016
Anti-dilutive options	**0.9**	0.9	2.3

Note 5 Debt

The outstanding amounts of debt and capital leases for the years ended December 31 were as follows:

(In millions)	Issuer	2018	2017
Short-term debt			
Current maturities: $1,000 million, 2.25% Senior Notes	Express Scripts	**$ 995**	$ –
Current maturities: $337 million, 7.25% Senior Notes	ESI	**343**	–

Other, including capital leases	Other	**32**	9
Total long-term debt		**$ 39,523**	$ 5,199

Notes issued to fund the Express Scripts acquisition. As presented in the table above, the Company issued private placement Notes with registration rights in the third quarter of 2018 to finance the Express Scripts acquisition. Total proceeds were approximately $20.0 billion. Interest on this debt is generally paid semi-annually except for quarterly interest payments on the floating rate notes.

Term Loan Credit Agreement. Cigna borrowed $3.0 billion under its Term Loan Credit Agreement (the "Term Loan Credit Agreement") to finance the Merger and to pay fees and expenses of the Merger. The Term Loan Credit Agreement is diversified among 26 banks and contains customary covenants and restrictions, including a financial covenant that Cigna's leverage ratio may not exceed 60%. There is no remaining amount available for borrowing under this agreement.

Bridge Facility. In March 2018, Cigna entered into a commitment letter (the "Commitment Letter") with Morgan Stanley Senior Funding, Inc., The Bank of Tokyo-Mitsubishi UFJ, Ltd and 21 additional banks, to provide a $26.7 billion, 364-day senior unsecured bridge facility (the "Bridge Facility") in connection with the Merger. The Company incurred approximately $140 million in fees in 2018 for the Bridge Facility that expired upon the close of the Merger.

Revolving Credit Agreement. Cigna has a Revolving Credit and Letter of Credit Agreement (the "Revolving Credit Agreement") that matures on April 6, 2023 and is diversified among 23 banks.

Cigna can borrow up to $3.25 billion for general corporate purposes, with up to $500 million available for issuance of letters of credit, decreased by $22 million of letters of credit under the Revolving Credit Agreement as of December 31, 2018. The Revolving Credit Agreement also includes an option to increase the facility amount up to $500 million and an option to extend the termination date for additional one year periods, subject to consent of the banks.

The Revolving Credit Agreement contains customary covenants and restrictions, including a financial covenant that the Company's leverage ratio may not exceed 60%.

Cigna is the borrower under the Revolving Credit Agreement and the Term Loan Credit Agreement and certain subsidiaries of Cigna may be required to guarantee these obligations under certain circumstances.

Commercial Paper. Old Cigna issued $1.5 billion under the commercial paper program to finance the Merger.

Assumption of Express Scripts Debt. The Company assumed debt obligations of Express Scripts, ESI and Medco as described in the table above in the acquisition under substantially unchanged terms.

The Company was in compliance with its debt covenants as of December 31, 2018.

Other debt financing transactions. In the third quarter of 2017, Old Cigna entered into the following debt transactions:

- On September 14, 2017, Old Cigna issued $1.6 billion long-term debt and the proceeds were used to pay for the cash tender offer described below. Old Cigna also used the proceeds for general corporate purposes, including the repayment of its Notes that matured in 2018.
- Old Cigna completed a cash tender offer to purchase $1.0 billion of aggregate principal amount of certain of its outstanding debt securities in the third quarter of 2017 and recorded a pre-tax loss of $321 million ($209 million after-tax), primarily for premiums paid.

Old Cigna repaid $131 million and $250 million of long-term notes that matured during the first quarter of 2018 and 2017 respectively.

Maturities of outstanding long-term debt and capital leases are as follows:

	Scheduled Maturities	
(In millions)	Long-term Debt [1]	Capital Leases
2019	**$ 1,337**	$ 17
2020	**$ 4,700**	$ 14
2021	**$ 7,378**	$ 4
2022	**$ 2,250**	$ 4
2023	**$ 4,917**	$ 4
Maturities after 2023	**$ 20,582**	$ 7

(1) Long-term debt maturity amounts exclude capital leases.

Interest expense on long-term and short-term debt was $507 million in 2018, $243 million in 2017, and $251 million in 2016, excluding losses on the early extinguishment of debt.

Note 6 Common and Preferred Stock

As more fully described in Note 3, Cigna acquired Express Scripts on December 20, 2018. Old Cigna shareholders exchanged each of their shares for a share of Cigna common stock and shareholders of Express Scripts received 0.2434 of a share of Cigna (and $48.75 in cash) for each share of Express Scripts. Following the Merger, Old Cigna was de-listed and shares of Cigna were listed on the New York Stock Exchange for trading.

Cigna (and, prior to the Merger, Old Cigna) has a total of 25 million shares of $1 par value preferred stock authorized for issuance. No shares of preferred stock were outstanding at December 31, 2018, 2017 or 2016.

The following table presents the share activity of Old Cigna and Cigna for the years ended December 31, 2018, 2017 and 2016.

(Shares in thousands)	2018	2017	2016
Common: Par value $0.25; 600,000 shares authorized – Old Cigna			
Outstanding – January 1,	**243,967**	256,869	256,544

Note 7 Insurance and Contractholder Liabilities

A. Account Balances – Insurance and Contractholder Liabilities

As of December 31, 2018 and 2017, the Company's insurance and contractholder liabilities comprised the following:

	December 31, 2018			December 31, 2017		
(In millions)	Current	Non-current	Total	Current	Non-current	Total
Contractholder deposit funds	**$ 641**	**$ 7,365**	**$ 8,006**	$ 713	$ 7,483	$ 8,196
Future policy benefits	**740**	**8,981**	**9,721**	706	9,334	10,040
Unpaid claims and claim expenses						
Integrated Medical	**2,678**	**19**	**2,697**	2,401	19	2,420
Other segments	**2,394**	**3,230**	**5,624**	2,178	3,289	5,467
Unearned premiums	**348**	**379**	**727**	319	405	724
Total insurance and contractholder liabilities	**$ 6,801**	**$ 19,974**	**$ 26,775**	$ 6,317	$ 20,530	$ 26,847

Insurance and contractholder liabilities expected to be paid within one year are classified as current.

Accounting Policy – Contractholder Deposit Funds: Liabilities for contractholder deposit funds primarily include deposits received from customers for investment-related and universal life products and investment earnings on their fund balances. These liabilities are adjusted to reflect administrative charges and, for universal life fund balances, mortality charges. In addition, this caption includes: 1) premium stabilization reserves under group insurance contracts representing experience refunds left with the Company to pay future premiums; 2) deposit administration funds used to fund non-pension retiree insurance programs; 3) retained asset accounts; and 4) annuities or supplementary contracts without significant life contingencies. Interest credited on these funds is accrued ratably over the contract period.

Accounting Policy – Future Policy Benefits: Future policy benefits represent the present value of estimated future obligations under long-term life and supplemental health insurance policies and annuity products currently in force. These obligations are estimated using actuarial methods and consist primarily of reserves for annuity contracts, life insurance benefits, GMDB contracts (see Note 8 for additional information) and certain health, life and accident insurance products of our International Markets segment.

Obligations for annuities represent specified periodic benefits to be paid to an individual or groups of individuals over their remaining lives. Obligations for life insurance policies and GMDB contracts represent benefits expected to be paid to policyholders, net of future premiums expected to be received. Management estimates these obligations based on assumptions as to premiums, interest rates, mortality or morbidity, future claim adjudication expenses and surrenders, allowing for adverse deviation as appropriate. Mortality, morbidity and surrender assumptions are based on the Company's own experience and published actuarial tables. Interest rate assumptions are based on management's judgment considering the Company's experience and future expectations, and range from 1% to 9%. Obligations for the run-off settlement annuity business include adjustments for realized and unrealized investment returns consistent with GAAP when a premium deficiency exists.

B. Unpaid Claims and Claim Expenses – Integrated Medical

This liability reflects estimates of the ultimate cost of claims that have been incurred but not reported, including expected development on reported claims, those that have been reported but not yet paid (reported claims in process), and other medical care expenses and services payable that are primarily comprised of accruals for incentives and other amounts payable to health care professionals and facilities. This liability no longer includes amounts from the international health care business now reported in International Markets following our change in segment reporting in 2018. Prior year rollforwards have been updated to reflect this segment change.

Accounting policy. The Company uses actuarial principles and assumptions that are consistently applied each reporting period and recognizes the actuarial best estimate of the ultimate liability along with a margin for adverse deviation. This approach is consistent with actuarial standards of practice that the liabilities be adequate under moderately adverse conditions.

The Company compares key assumptions used to establish the medical costs payable to actual experience for each reporting period. The unpaid claims liability is adjusted through current period shareholders' net income when actual experience differs from these assumptions. Additionally, the Company evaluates expected future developments and emerging trends that may impact key assumptions. The process used to determine this liability requires the Company to make critical accounting estimates that involve considerable judgment, reflecting the variability inherent in forecasting future claim payments. These estimates are highly sensitive to changes in the Company's key assumptions, specifically completion factors and medical cost trends.

The liability is primarily calculated using "completion factors" developed by comparing the claim incurral date to the date claims were paid. Completion factors are impacted by several key items including changes in: 1) electronic (auto-adjudication) versus manual claim processing; 2) provider claims submission rates; 3) membership; and 4) the mix of products. The Company uses historical completion factors combined with an analysis of current trends and operational factors to develop current estimates of completion factors. The Company estimates the liability for claims incurred in each month by applying the current estimates of completion factors to the current paid claims data. This approach implicitly assumes that historical completion rates will be a useful indicator for the current period.

The Company relies more heavily on medical cost trend analysis that reflects expected claim payment patterns and other relevant operational considerations for more recent months. Medical cost trend is primarily impacted by medical service utilization and unit costs that are affected by changes in the level and mix of medical benefits offered, including inpatient, outpatient and pharmacy, the impact of copays and deductibles, changes in provider practices and changes in consumer demographics and consumption behavior.

This liability predominately consists of incurred but not reported amounts and reported claims in process including expected development on reported claims. The total of incurred but not reported liabilities plus expected development on reported claims, including reported claims in process, was $2.5 billion at December 31, 2018 and $2.3 billion at December 31, 2017. The remaining balance in both periods reflects amounts due for physician incentives and other medical care expenses and services payable.

Activity in the unpaid claims liability for the Integrated Medical segment for the years ended December 31 was as follows:

(In millions)	2018	2017	2016
Balance at January 1,	**$ 2,420**	$ 2,261	$ 2,105
Less: Reinsurance and other amounts recoverable	**262**	273	237

Incurred costs related to:			
Current year	**21,331**	19,334	18,085
Prior years	**(173)**	(227)	(70)
Total incurred	**21,158**	19,107	18,015
Paid costs related to:			
Current year	**18,978**	17,179	16,142
Prior years	**1,945**	1,758	1,753
Total paid	**20,923**	18,937	17,895
Balance at December 31, net	**2,433**	2,158	1,988
Add: Reinsurance and other amounts recoverable	**264**	262	273
Balance at December 31,	**$ 2,697**	$ 2,420	$ 2,261

Reinsurance and other amounts recoverable reflect amounts due from reinsurers and policyholders to cover incurred but not reported and pending claims for certain business where the Company administers the plan benefits but the right of offset does not exist. See Note 8 for additional information on reinsurance.

Variances in incurred costs related to prior years' unpaid claims and claims expenses that resulted from the differences between actual experience and the Company's key assumptions were as follows for the years ended December 31:

	2018		2017	
($ in millions)	$	% [1]	$	% [2]
Actual completion factors	**$ 92**	**0.5%**	$ 87	0.6%
Medical cost trend	**72**	**0.4**	131	0.7
Other	**9**	**—**	9	—
Total favorable variance	**$ 173**	**0.9%**	$ 227	1.3%

(1) Percentage of current year incurred costs as reported for 2017.

(2) Percentage of current year incurred costs as reported for 2016.

Incurred costs related to prior years in the table above, although adjusted through shareholders' net income, do not directly correspond to an increase or decrease to shareholders' net income. The primary reason for this difference is that decreases to prior year incurred costs pertaining to the portion of the liability established for moderately adverse conditions are not considered as impacting shareholders' net income if they are offset by increases in the current year provision for moderately adverse conditions.

Prior year development increased shareholders' net income by $77 million ($97 million before tax) for the year ended December 31, 2018, compared with $96 million ($148 million before tax) in 2017. Favorable prior year development implies primarily lower than expected utilization of medical services while unfavorable prior year development implies higher than expected utilization of medical services. Prior year development amounts close to zero imply utilization of medical services that are consistent with expectations.

The following table depicts the incurred and paid claims development as of December 31, 2018 (net of reinsurance), claims frequency metrics and incurred but not reported liabilities reported in the Integrated Medical segment. The information about incurred and paid claims development for the year ended December 31, 2017 is presented as supplementary information and is unaudited.

	Incurred Costs			
Incurral Year (in millions)	2017 (Unaudited)	2018	Unpaid Claims & Claim Expenses	Claims Frequency
2017	$ 18,692	**$ 18,528**	$ 22	2.6 million
2018		**20,458**	$ 2,266	2.9 million
Cumulative incurred costs plus acquired for the periods presented		**$ 38,986**		

	Cumulative Costs Paid	
Incurral Year	2017 (Unaudited)	2018
2017	$ 16,628	**$ 18,506**
2018		**18,192**
Cumulative paid costs for the periods presented		**$ 36,698**
Outstanding liabilities for the periods presented, net of reinsurance		**$ 2,288**
Other long-duration liabilities not included in development table above		**145**
Net unpaid claims and claims expenses — Integrated Medical		**2,433**
Reinsurance and other amounts recoverable		**264**
Unpaid claims and claim expenses — Integrated Medical		**$ 2,697**

More than 95% of health claims for an accident year are paid within one year of their incurred date.

There is no single or common claim frequency metric used in the health care industry. The Company believes a relevant metric for its health insurance business is the number of customers for whom an insured medical claim was paid. Customers for whom no insured medical claim was paid are excluded from the calculation. Claims that did not result in a liability are not included in the frequency metric.

C. Unpaid Claims and Claim Expenses – International Markets and Group Disability and Other

This liability now includes amounts from international health care following our change in segment reporting in 2018. Prior year rollforwards have been updated to reflect this segment change.

Accounting policy. Liabilities for unpaid claims and claim expenses are established by book of business within the Company's International Markets segment and Group Disability and Other. Liabilities for unpaid claims and claim expenses within the group disability and life business consist of the following primary products: long-term and short-term disability, life insurance, and accident coverages. Unpaid claims and claim expenses consist of (1) case or claims reserves for reported claims that are unpaid as of the balance sheet date; (2) incurred but not reported reserves for claims when the insured event has occurred but has not been reported to the Company; and (3) loss adjustment expense reserves for the expected costs of settling these claims. The Company consistently estimates incurred but not yet reported losses using actuarial principles and assumptions based on historical and projected claim incidence patterns, claim size and the expected payment period. The Company recognizes the actuarial best estimate of the ultimate liability within a level of confidence, consistent with actuarial standards of practice that the liabilities be adequate under moderately adverse conditions. The Company immediately records an adjustment in medical costs and other benefit expenses when estimates of these liabilities change.

The majority of the Company's liability for disability claims consists of the present value of estimated future benefit payments, including expected development, for each reported claim that is currently receiving benefit payments, or pending a decision on eligibility for benefits, over the expected disability period. The Company projects the expected disability period by using historical resolution rates combined with an analysis of current trends and operational factors to develop current estimates of resolution rates. Expected claim resolution rates may vary based upon the Company's experience for the anticipated disability period, the covered benefit period, the cause of disability, the benefit design and the claimant's age, gender and income level. The gross monthly benefit is reduced (offset) by disability income received under other benefit programs, most commonly Social Security Disability Income, workers' compensation, statutory disability or other group benefit plans. The Company estimates the probability and amount of future offset awards and lapses based on the Company's experience for certain offsets not yet finalized.

The Company also establishes a liability for the expected present value of future benefit payments for known claims that have recently been resolved but may reopen in the future, based on Company experience. Prior to a claim becoming known, the Company establishes a liability for incurred but not reported claims, using standard actuarial techniques and calculations based on completion factors and loss ratio assumptions using the Company's experience combined with an analysis of current trends and operational factors. Completion factors are impacted by several key items including changes in claim inventory levels, claim payment patterns, changes in business volume and other factors. Loss ratio assumptions are developed using historical Company experience, adjusted prospectively for expected changes in the underlying business including rate actions, persistency and inforce growth.

Liability balance details. The liability details for unpaid claims and claim expenses as of December 31 are as follows:

(In millions)	2018	2017
Group Disability and Other		
Group Disability and Life	**$ 4,674**	$ 4,491
Other Operations	**192**	193
Total Group Disability and Other	**4,866**	4,684
International Markets	**758**	783
Unpaid claims and claim expenses Group Disability and Other and International Markets	**$ 5,624**	$ 5,467

The Company discounts certain liabilities, predominantly long-term disability, because benefits payments are made over extended periods. Discount rate assumptions for these liabilities are based on projected investment returns for the supporting asset portfolios. Details of the Company's unpaid claim discounted liability balances as of December 31 were as follows:

(In billions)	2018	2017
Discounted liabilities	**$ 4.2**	$ 4.0
Aggregate amount of discount	**$ 1.1**	$ 1.0
Range of discount rates	**4.2% - 5.2%**	4.5% - 5.2%

Interest is accreted and recognized in medical costs and other benefit expenses in the Consolidated Statements of Income.

Activity in the Company's liabilities for unpaid claims and claim expenses, excluding Other Operations, are presented in the following table. Liabilities associated with Other Operations are excluded because they pertain to obligations for long-duration insurance contracts or, if short-duration, the liabilities have been fully reinsured.

(In millions)	2018	2017	2016

Add: Reinsurance	**156**	140	123
Balance at December 31,	**$ 5,432**	$ 5,274	$ 4,997

Reinsurance in the previous table reflects amounts due from reinsurers related to unpaid claims liabilities. The Company's insurance subsidiaries enter into agreements with other companies primarily to limit losses from large exposures and to permit recovery of a portion of incurred losses. See Note 8 for additional information on reinsurance.

The majority of the liability for unpaid claims and claim expenses is related to disability claims with long-tailed payouts. Interest earned on assets backing these liabilities is an integral part of pricing and reserving. Therefore, interest accreted on prior year balances is shown as a separate component of prior year incurred claims. This interest is calculated by applying the average discount rate used in determining the liability balance to the average liability balance over the period. The remaining prior year incurred claims amount primarily reflects updates to the Company's liability estimates and variances between actual experience during the period relative to the assumptions and expectations reflected in determining the liability. Assumptions reflect the Company's expectations over the life of the book of business and will vary from actual experience in any period, both favorably and unfavorably, with variation in resolution rates being the most significant driver for the long-term disability business. Favorable prior year incurred claims reported in 2018 largely reflect favorable loss ratio experience for long-term disability and life relative to expectations. Favorable prior year incurred claims reported in 2017 largely reflect improved resolution rate experience for long-term disability relative to expectations. Prior year incurred claims reported in 2016 included the impact of changes made to our disability claims management process and a period of elevated life claims.

Long-term disability development tables. The table below presents information about incurred and paid claims development as of December 31, 2018 (net of reinsurance), total incurred but not reported liabilities, and cumulative claims frequency for the Company's long-term disability book of business. The information about incurred and paid claims development for the years ended 2012 through 2017 is presented as supplementary information and is unaudited. As permitted under GAAP, the Company presented development table information beginning in 2012 because obtaining information beyond this period was impracticable as historical data was not maintained in such detail.

(In millions, except for claims frequency)

	Incurred Claims (undiscounted)							Incurred But Not	
	Unaudited

2017						110	**396**
2018							**116**
Cumulative paid claims for the periods presented							**$ 3,948**
All outstanding liabilities for the periods presented, net of reinsurance							**$ 3,939**
All outstanding liabilities prior to 2012, net of reinsurance							**921**
Impact of discounting							**(885)**
Liability for long-term disability unpaid claims and claim expenses, net of reinsurance							**$ 3,975**

The claims frequency metric used for the Company's long-term disability line of business represents the number of unique claim events for which benefits have been approved and payments made. Claim events are identified using a unique claimant identifier and incurral date. Thus, if an individual has multiple claims for different disabling events (and therefore different incurral dates), each will be determined to be a unique claim event. However, if an individual receives multiple benefits under more than one policy (for example for supplemental disability benefits such as pension contribution benefits or survivor benefits), the Company treats this as a single claim occurrence because they related to the same claim event. Claims frequency metrics for the most recent year are expected to be low reflecting the long-term disability product features including waiting and elimination periods that result in delayed eligibility for contract benefits. Claims that did not result in a liability are not included in the frequency metric.

The following is supplementary and unaudited information about average historical claims payout patterns for the long-term disability business for the years presented in the development table as of December 31, 2018. The average annual percentage payout of incurred claims, net of reinsurance, is approximately 9% in year one, 24% in year two, 16% in year three, 9% in year four, 7% in year five, 6% in year six and 5% in year seven.

The following table reconciles the long-term disability net incurred and paid claims development table to the liability for unpaid claims and claim expenses in the Company's Consolidated Balance Sheets as of December 31, 2018.

(In millions)	
Net outstanding liabilities — Group Disability and Life businesses	
Long-term disability liabilities, net of reinsurance	**$ 3,975**
Other short-duration insurance books of business, net of reinsurance	**594**
Liabilities for unpaid claims and claim expenses, net of reinsurance	**4,569**
Reinsurance recoverable on unpaid claims — Group Disability and Life businesses	
Long-term disability	**94**
Other short-duration insurance books of business	**11**
Total reinsurance recoverable on unpaid claims	**105**
Total liability for unpaid claims and claim expenses — Group Disability and Life businesses	**4,674**
International Markets segment	**758**
Other Operations	**192**
Unpaid claims and claim expenses — Group Disability and Other and International Markets	**$ 5,624**

The other short-duration insurance books of business, net of reinsurance, primarily include liabilities for life, accident and short-term disability insurance products. Liabilities for these products are typically complete within one year. Claim development on these liabilities is largely driven by completion factors and loss ratio assumptions.

Note 8 Reinsurance

The Company's insurance subsidiaries enter into agreements with other insurance companies to assume and cede reinsurance. Reinsurance is ceded primarily in acquisition and disposition transactions when the underwriting company is not being acquired. Reinsurance is also used to limit losses from large exposures and to permit recovery of a portion of direct or assumed losses. Reinsurance does not relieve the originating insurer of liability. Therefore, reinsured liabilities must continue to be reported along with the related reinsurance recoverables. The Company regularly evaluates the financial condition of its reinsurers and monitors concentrations of its credit risk.

A. Reinsurance Recoverables

The majority of the Company's reinsurance recoverables resulted from acquisition and disposition transactions in which the underwriting company was not acquired. Components of the Company's reinsurance recoverables are presented in the following table. Included in the table below is $297 million as of December 31, 2018 and $282 million as of December 31, 2017 of current reinsurance recoverables that are reported in other current assets.

(Dollars in millions) **Line of Business**	**Reinsurer(s)**	**December 31, 2018**	**December 31, 2017**	**Collateral and Other Terms at December 31, 2018**
Ongoing Operations				
Integrated Medical, International Markets, Group Disability, COLI	Various	**$ 464**	$ 454	Balances range from less than $1 million up to $70 million. Over 70% of the balance is from companies rated as investment grade by Standard & Poor's.
Total recoverables related to ongoing operations		**464**	454	
Acquisition, disposition or runoff activities				
Individual Life and Annuity (sold in 1998)	Lincoln National Life and Lincoln Life & Annuity of New York	**3,312**	3,436	Both companies' ratings were well above the level that would trigger a contractual obligation to fully secure the outstanding balance.
GMDB (effectively exited in 2013)	Berkshire	**893**	928	100% secured by assets in a trust.
Retirement Benefits Business (sold in 2004)	Prudential Retirement Insurance and Annuity	**787**	850	100% secured by assets in a trust.
Supplemental Benefits Business (2012 acquisition)	Great American Life	**261**	283	100% secured by assets in a trust.
Other	Various	**87**	95	100% secured by assets in a trust or other deposits.
Total recoverables related to acquisition, disposition or runoff activities		**5,340**	5,592	
Total reinsurance recoverables		**$ 5,804**	$ 6,046	

The Company bears the risk of loss if its reinsurers and retrocessionaires do not meet or are unable to meet their reinsurance obligations to the Company. The Company reviews its reinsurance arrangements and establishes reserves against the recoverables if recovery is not considered probable.

B. Effects of Reinsurance

The following table presents direct, assumed and ceded premiums for both short-duration and long-duration insurance contracts. It also presents reinsurance recoveries that have been netted against benefit expenses in the Company's Consolidated Statements of Income.

(In millions)	2018	2017	2016
Premiums			
Short-duration contracts			
Direct	**$ 32,148**	$ 28,838	$ 27,694
Assumed	**77**	199	247
Ceded	**(182)**	(150)	(229)
Total short-duration contract premiums	**32,043**	28,887	27,712
Long-duration contracts			
Direct	**4,268**	3,748	3,259
Assumed	**116**	130	137
Ceded			
Individual life insurance and annuity business sold	**(133)**	(143)	(153)
Other	**(181)**	(131)	(131)
Total long-duration contract premiums	**4,070**	3,604	3,112
Total premiums	**$ 36,113**	$ 32,491	$ 30,824
Reinsurance recoveries			
Individual life insurance and annuity business sold	**$ 249**	$ 259	$ 279
Other	**203**	66	261
Total reinsurance recoveries	**$ 452**	$ 325	$ 540

The effects of reinsurance on written premiums for short-duration contracts were not materially different from the recognized premium amounts shown in the table above.

C. Effective Exit of GMDB and GMIB Business

The Company entered into an agreement with Berkshire to effectively exit the GMDB and GMIB business via a reinsurance transaction in 2013. Berkshire reinsured 100% of the Company's future claim payments in this business, net of other reinsurance arrangements existing at that time. The reinsurance agreement is subject to an overall limit with approximately $3.4 billion remaining at December 31, 2018.

GMDB is accounted for as reinsurance and GMIB assets and liabilities are reported as derivatives at fair value as discussed below. GMIB assets are reported in other current assets and other assets, and GMIB liabilities are reported in accrued expenses and other liabilities and other non-current liabilities.

GMDB

The GMDB exposure arises under annuities written by ceding companies that guarantee the benefit received at death. The Company's exposure arises when the guaranteed minimum death benefit exceeds the fair value of the related mutual fund investments at the time of a contractholder's death.

Accounting policy. The Company estimates the gross liability and reinsurance recoverable with an internal model based on the Company's experience and future expectations over an extended period, consistent with the long-term nature of this product. As a result of the reinsurance transaction, reserve increases have a corresponding increase in the recorded reinsurance recoverable, provided the increased recoverable remains within the overall Berkshire limit (including the GMIB asset presented below).

The following table presents the account value, net amount at risk and average attained age of underlying contractholders for guarantees assumed by the Company in the event of death. The net amount at risk is the amount that the Company would have to pay if all contractholders died as of the specified date. Unless the Berkshire reinsurance limit is exceeded, the Company should be reimbursed in full for these payments.

(Dollars in millions, excludes impact of reinsurance ceded)	2018	2017
Account value	**$ 8,402**	$ 10,109
Net amount at risk	**$ 2,466**	$ 2,112
Average attained age of contractholders (weighted by exposure)	**74**	75
Number of contractholders	**220,000**	245,000

GMIB

The Company reinsured contracts with issuers of GMIB products. The Company's exposure represents the excess of a contractually guaranteed amount over the level of variable annuity account values. Payment by the Company depends on the actual account value in the underlying mutual funds and the level of interest rates when the contractholders elect to receive minimum income payments that must occur within 30 days of a policy anniversary after the appropriate waiting period. The Company has purchased retrocessional coverage ("GMIB assets"), including retrocessional coverage from Berkshire, for these contracts.

Accounting policy. The Company reports GMIB liabilities and assets as derivatives at fair value because cash flows of these liabilities and assets are affected by equity markets and interest rates, but are without significant life insurance risk and are settled in lump sum payments. The Company receives and pays fees periodically based on either contractholders' account values or deposits increased at a contractual rate. The Company will also pay and receive cash depending on changes in account values and interest rates when contractholders first elect to receive minimum income payments. Cash flows on these contracts are reported in operating activities.

Assumptions used in fair value measurement. GMIB assets and liabilities are established using capital market assumptions and assumptions related to future annuitant behavior (including mortality, lapse, and annuity election rates). The Company classifies GMIB assets and liabilities in Level 3 in the fair value hierarchy described in Note 10 because assumptions related to future annuitant behavior are largely unobservable.

The only assumption expected to impact future shareholders' net income is non-performance risk. The non-performance risk adjustment reflects a market participant's view of nonpayment risk by adding an additional spread to the discount rate in the calculation of both (a) the GMIB liabilities to be paid by the Company, and (b) the GMIB assets to be paid by the reinsurers, after considering collateral.

The Company regularly evaluates each of the assumptions used in establishing these assets and liabilities. Significant decreases in assumed lapse rates or spreads used to calculate non-performance risk of the Company, or significant increases in assumed annuity election rates or spreads used to calculate the non-performance risk of the reinsurers, would result in higher fair value measurements. A change in one of these assumptions is not necessarily accompanied by a change in another assumption.

GMIB liabilities totaling $706 million as of December 31, 2018 and $762 million as of December 31, 2017 were reported in accrued expenses and other liabilities and other non-current liabilities. There were three reinsurers covering 100% of the GMIB exposures as of December 31, 2018 and 2017 as follows:

(In millions) Line of Business	Reinsurer	December 31, 2018	December 31, 2017	Collateral and Other Terms at December 31, 2018
GMIB	Berkshire	**$ 341**	$ 359	100% were secured by assets in a trust.
	Sun Life Assurance Company of Canada	**208**	221	
	Liberty Re (Bermuda) Ltd.	**184**	197	86% were secured by assets in a trust.
Total GMIB recoverables reported in other current assets and other assets		**$ 733**	$ 777	

Amounts included in shareholders net income for GMIB assets and liabilities were not material in 2018, 2017 and 2016.

Note 9 Investments, Investment Income and Gains and Losses

Cigna's investment portfolio consists of a broad range of investments including fixed maturities, equity securities, commercial mortgage loans, policy loans, other long-term investments, short-term investments, and derivative financial instruments. The sections below provide more detail regarding our accounting policies, investment balances, net investment income and realized investment gains and losses. See Note 10 for information about valuation of the Company's investment portfolio. Fixed maturities, commercial mortgage loans, derivative financial instruments, and short-term investments with contractual maturities during the next 12 months are classified on the balance sheet as current investments, unless they are held as statutory deposits or restricted for other purposes, where they are classified in long-term investments. Equity securities classified as current include exchange traded funds that are used in our cash management process. All other investments are classified in long-term investments. The following table summarizes the Company's investments by category and current or long-term classification.

	December 31, 2018			December 31, 2017		
(In millions)	Current	Long-term	Total	Current	Long-term	Total
Fixed Maturities	**$ 1,320**	**$ 21,608**	**$ 22,928**	$ 1,516	$ 21,622	$ 23,138
Equity securities	**377**	**171**	**548**	406	182	588
Commercial mortgage loans	**32**	**1,826**	**1,858**	15	1,746	1,761
Policy loans	**–**	**1,423**	**1,423**	–	1,415	1,415
Other long-term investments	**–**	**1,901**	**1,901**	–	1,518	1,518
Short-term investments	**316**	**–**	**316**	199	–	199
Total	**$ 2,045**	**$ 26,929**	**$ 28,974**	$ 2,136	$ 26,483	$ 28,619

A. Investment Portfolio

Fixed Maturities

Accounting policy. Fixed maturities (including bonds, mortgage and other asset-backed securities and preferred stocks redeemable by the investor) are classified as available for sale and are carried at fair value with changes in fair value recorded in accumulated other comprehensive income (loss) within shareholders' equity. Net unrealized appreciation on investments supporting the Company's run-off settlement annuity business is reported in future policy benefit liabilities rather than accumulated other comprehensive income (loss).

The Company records impairment losses in net income for fixed maturities with fair value below amortized cost that meet either of the following conditions:

- If the Company intends to sell or determines that it is more likely than not to be required to sell these fixed maturities before their fair values recover, an impairment loss is recognized for the excess of the amortized cost over fair value.

- If the net present value of projected future cash flows of a fixed maturity (based on qualitative and quantitative factors, including the probability of default, and the estimated timing and amount of recovery) is below the amortized cost basis, that difference is recognized as an impairment loss. For mortgage and asset-backed securities, estimated future cash flows are also based on assumptions about the collateral attributes including prepayment speeds, default rates and changes in value.

Debt securities are classified as either current or long-term investments based on their contractual maturities. The amortized cost and fair value by contractual maturity periods for fixed maturities were as follows at December 31, 2018:

(In millions)	Amortized Cost	Fair Value
Due in one year or less	$ 1,323	$ 1,327
Due after one year through five years	6,452	6,522
Due after five years through ten years	10,205	9,992
Due after ten years	4,064	4,577
Mortgage and other asset-backed securities	506	510
Total	$ 22,550	$ 22,928

Actual maturities of these securities could differ from their contractual maturities used in the table above. This could occur because issuers may have the right to call or prepay obligations, with or without penalties.

Gross unrealized appreciation (depreciation) on fixed maturities by type of issuer is shown below.

(In millions)	Amortized Cost	Unrealized Appreciation	Unrealized Depreciation	Fair Value
December 31, 2018				
Federal government and agency	$ 507	$ 204	$ (1)	$ 710
State and local government	920	66	(1)	985
Foreign government	2,214	155	(7)	2,362
Corporate	18,403	411	(453)	18,361
Mortgage and other asset-backed	506	16	(12)	510
Total	$ 22,550	$ 852	$ (474)	$ 22,928
Investments supporting liabilities of the Company's run-off settlement annuity business (included in total above) [1]	$ 2,264	$ 479	$ (40)	$ 2,703
December 31, 2017				
Federal government and agency	$ 541	$ 239	$ (1)	$ 779
State and local government	1,196	93	(2)	1,287
Foreign government	2,360	142	(15)	2,487
Corporate	17,301	868	(81)	18,088
Mortgage and other asset-backed	469	29	(1)	497
Total	$ 21,867	$ 1,371	$ (100)	$ 23,138
Investments supporting liabilities of the Company's run-off settlement annuity business (included in total above) [1]	$ 2,200	$ 681	$ (2)	$ 2,879

(1) Net unrealized appreciation for these investments is excluded from accumulated other comprehensive income.

The Company had commitments to purchase $106 million of fixed maturities as of December 31, 2018, all of which bear interest at a fixed market rate.

Review of declines in fair value. Management reviews fixed maturities with a decline in fair value from cost for impairment based on criteria that include:

- length of time and severity of decline;
- financial health and specific near term prospects of the issuer;
- changes in the regulatory, economic or general market environment of the issuer's industry or geographic region; and
- the Company's intent to sell or the likelihood of a required sale prior to recovery.

Management believes the unrealized depreciation below to be temporary based on this review, and therefore has not impaired these amounts. The table below summarizes fixed maturities with a decline in fair value from amortized cost by the length of time these securities have been in an unrealized loss position.

	December 31, 2018				December 31, 2017			
(Dollars in millions)	Fair Value	Amortized Cost	Unrealized Depreciation	Number of Issues	Fair Value	Amortized Cost	Unrealized Depreciation	Number of Issues
One year or less								
Investment grade	**$ 7,127**	**$ 7,367**	**$ (240)**	**1,324**	$ 3,272	$ 3,309	$ (37)	797
Below investment grade	**$ 1,185**	**$ 1,240**	**$ (55)**	**1,190**	$ 543	$ 553	$ (10)	643
More than one year								
Investment grade	**$ 3,023**	**$ 3,181**	**$ (158)**	**784**	$ 1,503	$ 1,549	$ (46)	373
Below investment grade	**$ 249**	**$ 270**	**$ (21)**	**245**	$ 155	$ 162	$ (7)	42

Equity Securities

Accounting policy. Upon adopting ASU 2016-01 beginning in 2018, changes in the fair values of equity securities that have a readily determinable fair value (primarily exchange-traded funds) are reported in net realized investment gains (losses). As of December 31, 2018, the fair values of these securities were $415 million and cost was $433 million. Also beginning in 2018, private equity securities of $89 million as of December 31, 2018 without a readily determinable fair value are carried at cost minus impairment, if any, plus or minus changes resulting from observable price changes. The amount of impairments or value changes resulting from observable price changes was not material.

Equity securities also include hybrid investments consisting of preferred stock with call features that are carried at fair value with changes in fair value reported in net realized investment gains (losses) and dividends reported in net investment income. As of December 31, 2018, fair values of these securities were $44 million and cost was $58 million, compared with fair value of $49 million and cost of $61 million as of December 31, 2017.

Commercial Mortgage Loans

Mortgage loans held by the Company are made exclusively to commercial borrowers and are diversified by property type, location and borrower. Loans are generally issued at a fixed rate of interest and are secured by high quality, primarily completed and substantially leased operating properties.

Accounting policy. Commercial mortgage loans are carried at unpaid principal balances or, if impaired, the lower of unpaid principal or fair value of the underlying real estate. See the "Impaired commercial mortgage loans" section below for the Company's accounting policy for impaired commercial mortgage loans. Commercial mortgage loans are classified as either current or long-term investments based on their contractual maturities.

As of December 31, 2018, approximately 93% of the Company's commercial mortgage loan portfolio is scheduled to mature in 2022 or thereafter.

Actual maturities could differ from contractual maturities for several reasons: borrowers may have the right to prepay obligations with or without prepayment penalties; the maturity date may be extended; and loans may be refinanced.

Credit quality. The Company regularly evaluates and monitors credit risk, beginning with the initial underwriting of a mortgage loan and continuing throughout the investment holding period. Mortgage origination professionals employ an internal credit quality rating system designed to evaluate the relative risk of the transaction at origination that is then updated each year as part of the annual portfolio loan review. The Company evaluates and monitors credit quality on a consistent and ongoing basis, classifying each loan as a loan in good standing, potential problem loan or problem loan.

Quality ratings are based on our evaluation of a number of key inputs related to the loan, including real estate market-related factors such as rental rates and vacancies, and property-specific inputs such as growth rate assumptions and lease rollover statistics. However, the two most significant contributors to the credit quality rating are the debt service coverage and loan-to-value ratios. The debt service coverage ratio measures the amount of property cash flow available to meet annual interest and principal payments on debt, with a ratio below 1.0 indicating that there is not enough cash flow to cover the required loan payments. The loan-to-value ratio, commonly expressed as a percentage, compares the amount of the loan to the fair value of the underlying property collateralizing the loan.

The following table summarizes the credit risk profile of the Company's commercial mortgage loan portfolio based on loan-to-value and debt service coverage ratios as of December 31, 2018 and 2017:

	2018			2017		
(Dollars in millions) **Loan-to-Value Ratio**	Carrying Value	Average Debt Service Coverage Ratio	Average Loan-to-Value Ratio	Carrying Value	Average Debt Service Coverage Ratio	Average Loan-to-Value Ratio
Below 60%	**$ 1,132**	**2.14**		$ 1,109	2.03	
60% to 79%	**650**	**1.93**		652	2.24	
80% to 100%	**76**	**1.49**		—	—	
Total	**$ 1,858**	**2.04**	**58%**	$ 1,761	2.11	57%

The Company's annual in-depth review of its commercial mortgage loan investments is the primary mechanism for identifying emerging risks in the portfolio. The most recent review was completed by the Company's investment professionals in the second quarter of 2018 and included an analysis of each underlying property's most recent annual financial statements, rent rolls, operating plans, budgets, a physical inspection of the property and other pertinent factors. Based on historical results, current leases, lease expirations and rental conditions in each market, the Company estimated the current year and future stabilized property income and fair value for each loan.

The Company re-evaluates a loan's credit quality between annual reviews if new property information is received or an event such as delinquency or a borrower's request for restructure causes management to believe that the Company's estimate of financial performance, fair value or the risk profile of the underlying property has been impacted.

Impaired commercial mortgage loans. A commercial mortgage loan is considered impaired when it is probable that the Company will not collect all amounts due per the terms of the promissory note. Impaired loans are carried at the lower of the unpaid principal balance or fair value of the underlying collateral. Interest income on impaired mortgage loans is only recognized when a payment is received.

There were no impaired commercial mortgage loans as of December 31, 2018 and 2017.

Policy Loans

Accounting policy. Policy loans, primarily associated with our corporate owned life insurance business, are carried at unpaid principal balances plus accumulated interest, the total of which approximates fair value. These loans are collateralized by life insurance policy cash values and therefore have minimal exposure to credit loss. Interest rates are reset annually based on a rolling average of benchmark interest rates.

Other Long-Term Investments

Accounting policy. Other long-term investments include investments in unconsolidated entities. These entities include certain limited partnerships and limited liability companies holding real estate, securities or loans. These investments are carried at cost plus the Company's ownership percentage of reported income or loss, based on the financial statements of the underlying investments that are generally reported at fair value. Income from these investments is reported on a one quarter lag due to the timing of when financial information is received from the general partner or manager of the investments.

Other long-term investments also include investment real estate carried at depreciated cost less any impairment write-downs to fair value when cash flows indicate that the carrying value may not be recoverable. Depreciation is generally recorded using the straight-line method based on the estimated useful life of each asset. Investment real estate as of December 31, 2018 and 2017 is expected to be held longer than one year and includes real estate acquired through the foreclosure of commercial mortgage loans.

Additionally, other long-term investments includes foreign currency swaps carried at fair value. See discussion below for information on the Company's accounting policies for these derivative financial instruments.

Other long-term investments and related commitments are diversified by issuer, property type and geographic regions. The following table provides unfunded commitment and carrying value information for these investments. The Company expects to disburse approximately 26% of the committed amounts in 2019.

	Carrying value as of December 31,		Unfunded Commitments as of
(In millions)	**2018**	**2017**	**December 31, 2018**
Real estate investments	**$ 679**	$ 591	**$ 376**
Securities partnerships	**1,045**	863	**1,063**
Other	**177**	64	**33**
Total	**$ 1,901**	$ 1,518	**$ 1,472**

Short-Term Investments and Cash Equivalents

Accounting policy. Security investments with maturities of greater than three months to one year from time of purchase are classified as short-term, available for sale and carried at fair value that approximates cost. Cash equivalents consist of short-term investments with maturities of three months or less from the time of purchase and are carried at cost that approximates fair value.

Short-term investments and cash equivalents included the following types of issuers:

(In millions)	December 31, 2018	December 31, 2017
Corporate securities	**$ 581**	$ 1,143
Federal government securities	**$ 82**	$ 604
Foreign government securities	**$ 238**	$ 159
Money market funds	**$ 1,174**	$ 12

Derivative Financial Instruments

The Company uses derivative financial instruments to manage the characteristics of investment assets (such as duration, yield, currency and liquidity) to meet the varying demands of the related insurance and contract holder liabilities. The Company also uses derivative financial instruments to hedge the risk of changes in the net assets of certain of its foreign subsidiaries due to changes in foreign currency exchange rates. The Company has written and purchased GMIB reinsurance contracts in its run-off reinsurance business that are accounted for as freestanding derivatives and discussed further in Note 8. Derivatives in the Company's separate accounts are excluded from the following discussion because associated gains and losses generally accrue directly to separate account policyholders.

Derivative instruments used by the Company typically include foreign currency swap contracts and foreign currency forward contracts. Foreign currency swap contracts periodically exchange cash flows between two currencies for principal and interest. Foreign currency forward contracts require the Company to purchase a foreign currency in exchange for the functional currency of its operating unit at a future date, generally within three months from the contracts' trade dates.

The Company manages the credit risk of these derivative instruments by diversifying its portfolio among approved dealers of high credit quality, and through routine monitoring of credit risk exposures. Certain of the Company's over-the-counter derivative instruments require either the Company or the counterparty to post collateral or demand immediate payment depending on the amount of the net liability position of the derivative instrument and predefined financial strength or credit rating thresholds. These collateral posting requirements vary by counterparty and amounts posted were not significant as of December 31, 2018 or 2017.

Accounting policy. Derivatives are recorded on our balance sheet at fair value and are classified as current or non-current according to their contractual maturities. Further information on our policies for determining fair value are discussed in Note 10. Derivative cash flows are generally reported in operating activities. The Company applies hedge accounting when derivatives are designated, qualified and highly effective as hedges. Under hedge accounting, the changes in fair value of the derivative and the hedged risk are generally recognized together and offset each other when reported in shareholders' net income. Various qualitative or quantitative methods appropriate for each hedge are used to formally assess and document hedge effectiveness at inception and each period throughout the life of a hedge.

- *Fair value hedges of the foreign exchange-related changes in fair values of certain fixed maturity foreign-denominated bonds:* Swap fair values are reported in long-term investments or other non-current liabilities. Changes in fair values attributable to foreign exchange risk of the swap contracts and the hedged bonds are reported in other realized investment gains and losses. The portion of the swap contracts' changes in fair value excluded from the assessment of hedge effectiveness is recorded in accumulated other comprehensive income and recognized in net investment income as swap coupon payments are accrued, offsetting the foreign denominated coupons received on the designated bonds.
- *Net investment hedges of certain foreign subsidiaries that conduct their business principally in Euros:* The fair values of the swap contracts are reported in other assets or other non-current liabilities. The changes in fair values of these instruments are reported in other comprehensive income, specifically in translation of foreign currencies. The portion of the change in swap fair values relating to foreign exchange spot rates will be recognized in earnings upon deconsolidation of the hedged foreign subsidiaries. The remaining changes in swap fair value are excluded from the effectiveness assessment and recognized in selling, general and administrative expenses as swap coupon payments are accrued. The notional value of hedging instruments matches the hedged amount of subsidiary net assets.
- *Economic hedges for derivatives not designated as accounting hedges:* Fair values of derivative instruments are reported in current investments or accrued expenses and other liabilities. The changes in fair values are reported in net realized investment gains and losses.

Gross fair values of our derivative financial instruments are presented in Note 10. As of December 31, 2018 and 2017, the effects of derivative instruments on the Consolidated Financial Statements were not material, including gains or losses reclassified from accumulated other comprehensive income into shareholders' net income, as well as amounts excluded from the assessment of hedge effectiveness. The following table summarizes the types and notional quantity of derivative instruments held by the Company.

(In millions)		Notional Value as of December 31,	
Type of Instrument	**Purpose**	**2018**	**2017**
Foreign currency swap contracts	*Fair value hedge:* To hedge the foreign exchange-related changes in fair values of certain fixed maturity foreign-denominated bonds. The notional value of these derivatives matches the amortized cost of the hedged bonds.	**$ 525**	$ 318
Foreign currency swap contracts	*Net investment hedge:* To reduce the risk of changes in net assets due to changes in foreign currency spot exchange rates for certain foreign subsidiaries that conduct their business principally in Euros. The notional value of hedging instruments matches the hedged amount of subsidiary net assets.	**$ 439**	$ —
Foreign currency forward contracts	*Economic hedge:* To hedge the foreign exchange related changes in fair values of a U.S. dollar-denominated fixed maturity bond portfolio to reflect the local currency for the Company's foreign subsidiary in South Korea. The notional value of hedging instruments generally aligns with the fair value of the hedged bond portfolio.	**$ 309**	$ 255

Concentration of Risk

The Company did not have a concentration of investments in a single issuer or borrower exceeding 10% of shareholders' equity as of December 31, 2018 and 2017.

B. Net Investment Income

Accounting policy. When interest and principal payments on investments are current, the Company recognizes interest income when it is earned. The Company recognizes interest income on a cash basis when interest payments are delinquent based on contractual terms or when certain terms (interest rate or maturity date) of the investment have been restructured. For unconsolidated entities that are included in Other long-term investments, investment income is generally recognized according to the Company's share of the reported income or loss on the underlying investments. Investment income attributed to the Company's separate accounts is excluded from our earnings because associated gains and losses generally accrue directly to separate account policyholders.

The components of pre-tax net investment income for the years ended December 31 were as follows:

(In millions)	2018	2017	2016
Fixed maturities	**$ 1,009**	$ 946	$ 899
Equity securities	**28**	14	4
Commercial mortgage loans	**78**	81	91
Policy loans	**70**	69	72
Other long-term investments	**156**	124	98
Short-term investments and cash	**194**	42	26
Total investment income	**1,535**	1,276	1,190
Less investment expenses	**55**	50	43
Net investment income	**$ 1,480**	$ 1,226	$ 1,147

Real estate investments and securities partnerships with a carrying value of $150 million at December 31, 2018 and $191 million at December 31, 2017 were non-income producing during the preceding twelve months.

C. Realized Investment Gains And Losses

Accounting policy. Realized investment gains and losses are based on specifically identified assets and results from sales, investment asset write-downs, changes in the fair values of certain derivatives and equity securities and changes in valuation reserves on commercial mortgage loans.

The following realized gains and losses on investments for the years ended December 31 exclude amounts required to adjust future policy benefits for the run-off settlement annuity business, as well as realized gains and losses attributed to the Company's separate accounts because those gains and losses generally accrue directly to separate account policyholders.

(In millions)	2018	2017	2016
Net realized investment (losses) gains, excluding investment asset write-downs	**$ (34)**	$ 268	$ 227
Write-downs on debt securities	**(43)**	(26)	(35)
Write-downs on other invested assets	**(4)**	(5)	(23)
Net realized investment (losses) gains, before income taxes	**$ (81)**	$ 237	$ 169

Net realized investment losses, excluding investment asset write-downs in 2018 represent primarily mark to market losses on equity securities and derivatives and net losses on sales of fixed maturities, partially offset by net gains on sales of real estate properties held in joint ventures. Net realized investment gains, excluding asset write-downs in 2017 and 2016 represented primarily gains on sales of real estate properties held in joint ventures and gains on sales of fixed maturities and equity securities. Realized losses on equity securities still held at December 31, 2018 were $33 million in 2018.

The following table presents sales information for available-for-sale securities (fixed maturities for the year ended in 2018, and fixed maturities and equity securities for the years ended in 2017 and 2016). Gross gains on sales and gross losses on sales exclude amounts required to adjust future policy benefits for the run-off settlement annuity business.

(In millions)	2018	2017	2016
Proceeds from sales	**$ 2,625**	$ 2,012	$ 1,544
Gross gains on sales	**$ 28**	$ 103	$ 83
Gross losses on sales	**$ (47)**	$ (18)	$ (7)

Note 10 Fair Value Measurements

The Company carries certain financial instruments at fair value in the financial statements including fixed maturities, certain equity securities, short-term investments and derivatives. Other financial instruments are measured at fair value only under certain conditions, such as when impaired.

Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. A liability's fair value is defined as the amount that would be paid to transfer the liability to a market participant, not the amount that would be paid to settle the liability with the creditor.

The Company's financial assets and liabilities carried at fair value have been classified based upon a hierarchy defined by GAAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's

classification is based on the lowest level of input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument's fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The Company estimates fair values using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available, and other market information that a market participant may use to estimate fair value. The internal pricing methods are performed by the Company's investment professionals and generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality, as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, fair value is estimated using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgment that becomes significant with increasingly complex instruments or pricing models.

The Company is responsible for determining fair value, as well as for assigning the appropriate level within the fair value hierarchy, based on the significance of unobservable inputs. The Company reviews methodologies, processes and controls of third-party pricing services and compares prices on a test basis to those obtained from other external pricing sources or internal estimates. The Company performs ongoing analyses of both prices received from third-party pricing services and those developed internally to determine that they represent appropriate estimates of fair value. The controls executed by the Company include evaluating changes in prices and monitoring for potentially stale valuations. The Company also performs sample testing of sales values to confirm the accuracy of prior fair value estimates. The minimal exceptions identified during these processes indicate that adjustments to prices are infrequent and do not significantly impact valuations. Annually, we conduct an on-site visit of the most significant pricing service to review their processes, methodologies and controls. This on-site review includes a walk-through of inputs for a sample of securities held across various asset types to validate the documented pricing process.

A. Financial Assets and Financial Liabilities Carried at Fair Value

The following table provides information as of December 31, 2018 and 2017 about the Company's financial assets and liabilities carried at fair value. Separate account assets that are also recorded at fair value on the Company's Consolidated Balance Sheets are reported separately in the Separate Accounts section as gains and losses related to these assets generally accrue directly to policyholders.

	Quoted Prices in Active Markets for Identical Assets (Level 1)		Significant Other Observable Inputs (Level 2)		Significant Unobservable Inputs (Level 3)		Total	
As of December 31, *(In millions)*	**2018**	**2017**	**2018**	**2017**	**2018**	**2017**	**2018**	**2017**

Financial liabilities at fair value								
Derivative liabilities	**$ —**	$ —	**$ 10**	$ 25	**$ —**	$ —	**$ 10**	$ 25

(1) Certain private equity securities are no longer carried at fair value under the policy election of ASU 2016-01 (Recognition and Measurement of Financial Assets and Financial Liabilities) beginning in 2018. Such private equity securities of $70 million were included in the Level 3 amount as of December 31, 2017. See Note 9 for additional information on this accounting policy change.

(2) Certain real estate funds are carried at fair value (previously carried at cost) based on the Company's ownership share of the equity of the investee (Net Asset Value ("NAV")) as a practical expedient including changes in the fair value of its underlying investments upon adopting ASU 2016-01 beginning in 2018. The funds have a quarterly redemption frequency, 45-90 day redemption notice period and $57 million in unfunded commitments as of December 31, 2018. See Note 9 for additional information on this accounting change. Prior years are designated as not applicable ("N/A") in this table.

Level 1 Financial Assets

Inputs for instruments classified in Level 1 include unadjusted quoted prices for identical assets in active markets accessible at the measurement date. Active markets provide pricing data for trades occurring at least weekly and include exchanges and dealer markets.

Assets in Level 1 include actively-traded U.S. government bonds and exchange-listed equity securities. A relatively small portion of the Company's investment assets are classified in this category given the narrow definition of Level 1 and the Company's investment asset strategy to maximize investment returns.

Level 2 Financial Assets and Financial Liabilities

Inputs for instruments classified in Level 2 include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are market observable or can be corroborated by market data for the term of the instrument. Such other inputs include market interest rates and volatilities, spreads and yield curves. An instrument is classified in Level 2 if the Company determines that unobservable inputs are insignificant.

Fixed maturities and equity securities. Approximately 96% of the Company's investments in fixed maturities and equity securities are classified in Level 2 including most public and private corporate debt and hybrid equity securities, federal agency and municipal bonds, non-government mortgage-backed securities and preferred stocks. Third-party pricing services and internal methods often use recent trades of securities with similar features and characteristics because many fixed maturities do not trade daily. Pricing models are used to determine these prices when recent trades are not available. These models calculate fair values by discounting future cash flows at estimated market interest rates. Such market rates are derived by calculating the appropriate spreads over comparable U.S. Treasury securities, based on the credit quality, industry and structure of the asset. Typical inputs and assumptions to pricing models include, but are not limited to, a combination of benchmark yields, reported trades, issuer spreads, liquidity, benchmark securities, bids, offers, reference data, and industry and economic events. For mortgage-backed securities, inputs and assumptions may also include characteristics of the issuer, collateral attributes, prepayment speeds and credit rating.

Nearly all of these instruments are valued using recent trades or pricing models. Less than 1% of the fair value of investments classified in Level 2 represents foreign bonds that are valued using a single unadjusted market-observable input derived by averaging multiple broker-dealer quotes, consistent with local market practice.

Short-term investments are carried at fair value which approximates cost. The Company compares market prices for these securities to recorded amounts on a regular basis to validate that current carrying amounts approximate exit prices. The short-term nature of the investments and corroboration of the reported amounts over the holding period support their classification in Level 2.

Derivative assets and liabilities classified in Level 2 represent over-the-counter instruments such as foreign currency forward and swap contracts. Fair values for these instruments are determined using market observable inputs including forward currency and interest rate curves and widely published market observable indices. Credit risk related to the counterparty and the Company is considered when estimating the fair values of these derivatives. However, the Company is largely protected by collateral arrangements with counterparties and determined that no adjustment for credit risk was required as of December 31, 2018 or 2017. The nature and use of these derivative financial instruments are described in Note 9.

Level 3 Financial Assets and Financial Liabilities

Certain inputs for instruments classified in Level 3 are unobservable (supported by little or no market activity) and significant to their resulting fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The Company classifies certain newly issued, privately-placed, complex or illiquid securities in Level 3. Approximately 2% of fixed maturities and equity securities are priced using significant unobservable inputs and classified in this category.

Fair values of mortgage and other asset-backed securities as well as corporate and government fixed maturities are primarily determined using pricing models that incorporate the specific characteristics of each asset and related assumptions including the investment type and structure, credit quality, industry and maturity date in comparison to current market indices, spreads and liquidity of assets with similar characteristics. Inputs and assumptions for pricing may also include collateral attributes and prepayment speeds for mortgage and other asset-backed securities. Recent trades in the subject security or similar securities are assessed when available, and the Company may also review published research in its evaluation, as well as the issuer's financial statements.

Quantitative Information about Unobservable Inputs

The following table summarizes the fair value and significant unobservable inputs used in pricing the following fixed maturities that were developed directly by the Company as of December 31, 2018 and 2017. The range and weighted average basis point amounts ("bps") for liquidity and credit spreads (adjustment to discount rates) reflect the Company's best estimates of the unobservable adjustments a market participant would make to calculate these fair values.

Mortgage and other asset-backed securities. The significant unobservable inputs used to value the following mortgage and other asset-backed securities are liquidity and weighting of credit spreads. An adjustment for liquidity is made as of the measurement date that considers current market conditions, issuer circumstances and complexity of the security structure when there is limited trading activity for the security. An adjustment to weight credit spreads is needed to value a more complex bond structure with multiple underlying collateral and no standard market valuation technique. The weighting of credit spreads is primarily based on the underlying collateral's characteristics and their proportional cash flows supporting the bond obligations.

Corporate and government fixed maturities. The significant unobservable input used to value the following corporate and government fixed maturities is an adjustment for liquidity. An adjustment is needed to reflect current market conditions and issuer circumstances when there is limited trading activity for the security.

	Fair Value			Unobservable Adjustment Range (Weighted Average)	
As of December 31, *(Fair value in millions)*	**2018**	**2017**	**Unobservable Input**	**2018**	**2017**
Fixed maturities					
Mortgage and other asset-backed securities	**$ 138**	$ 154	**Liquidity**	**60 – 340 (70) bps**	60 – 370 (90) bps
			Weighting of credit spreads	**190 – 340 (260) bps**	180 – 290 (230) bps
Corporate and government fixed maturities	**229**	446	**Liquidity**	**50 – 930 (230) bps**	70 – 1,650 (300) bps
Securities not priced by the Company [1]	**11**	29			
Total Level 3 fixed maturities	**$ 378**	$ 629			

(1) The fair values for these securities use single, unadjusted non-binding broker quotes not developed directly by the Company.

Significant increases in liquidity or credit spreads would result in lower fair value measurements while decreases in these inputs would result in higher fair value measurements. The unobservable inputs are generally not interrelated and a change in the assumption used for one unobservable input is not accompanied by a change in the other unobservable input.

Changes in Level 3 Financial Assets and Financial Liabilities Carried at Fair Value

The following table summarizes the changes in financial assets and financial liabilities classified in Level 3 for the years ended December 31, 2018 and 2017. Gains and losses reported in this table may include net changes in fair value that are attributable to both observable and unobservable inputs.

	Fixed Maturities & Equity Securities	
(In millions)	**2018**	**2017**
Balance at January 1,	**$ 732**	$ 776
Total gains (losses) included in shareholders' net income	**(22)**	25
Losses included in other comprehensive income	**(8)**	(11)
Gains (losses) required to adjust future policy benefits for settlement annuities [1]	**(8)**	7
Purchases, sales, settlements		
Purchases	**22**	133
Sales	**(11)**	(95)
Settlements	**(70)**	(74)
Total purchases, sales and settlements	**(59)**	(36)
Transfers into/(out of) Level 3		
Transfers into Level 3	**44**	275
Transfers out of Level 3 [2]	**(269)**	(304)
Total transfers into/(out of) Level 3	**(225)**	(29)
Balance at December 31,	**$ 410**	$ 732
Total gains (losses) included in shareholders' net income attributable to instruments held at the reporting date	**$ (9)**	$ (9)

(1) Amounts do not accrue to shareholders.

(2) Beginning in 2018, certain private equity securities are no longer carried at fair value under the policy election of ASU 2016-01 (Recognition and Measurement of Financial Assets and Financial Liabilities). Private equity securities of $70 million as of December 31, 2017 are included in the 2018 Transfers out of Level 3 amount.

Total gains and losses included in shareholders' net income in the table above are reflected in the Consolidated Statements of Income as realized investment gains (losses) and net investment income.

Gains and losses included in other comprehensive income in the tables above are reflected in net unrealized appreciation (depreciation) on securities in the Consolidated Statements of Comprehensive Income.

Transfers into or out of the Level 3 category occur when unobservable inputs, such as the Company's best estimate of what a market participant would use to determine a current transaction price, become more or less significant to the fair value measurement. Transfers between Level 2 and Level 3 during 2018 and 2017 primarily reflected changes in liquidity and credit risk estimates for certain private placement issuers across several sectors. As noted above, transfers out of Level 3 during 2018 also include $70 million of private equity securities that are no longer carried at fair value.

Separate Accounts

Accounting policy. Separate account assets and liabilities are contractholder funds maintained in accounts with specific investment objectives. The assets of these accounts are legally segregated and are not subject to claims that arise out of any of the Company's other businesses. These separate account assets are carried at fair value with equal amounts recorded for related separate account liabilities. The investment income and fair value gains and losses of these accounts generally accrue directly to the contractholders and, together with their deposits and withdrawals, are excluded from the Company's Consolidated Statements of Income and Cash Flows. Fees and charges earned for

mortality risks, asset management or administrative services are reported in either premiums or fees and other revenues. Investments that are measured using the practical expedient of NAV are excluded from the fair value hierarchy.

Fair values of separate account assets at December 31 were as follows:

	Quoted Prices in Active Markets for Identical Assets (Level 1)		Significant Other Observable Inputs (Level 2)		Significant Unobservable Inputs (Level 3)		Total	
(In millions)	2018	2017	2018	2017	2018	2017	2018	2017
Guaranteed separate accounts (See Note 19)	**$ 187**	$ 215	**$ 267**	$ 308	**$ —**	$ —	**$ 454**	$ 523
Non-guaranteed separate accounts [1]	**1,204**	1,536	**5,216**	5,298	**233**	292	**6,653**	7,126
Subtotal	**$ 1,391**	$ 1,751	**$ 5,483**	$ 5,606	**$ 233**	$ 292	**7,107**	7,649
Non-guaranteed separate accounts priced at NAV as a practical expedient [1]							**732**	774
Total separate account assets							**$ 7,839**	$ 8,423

(1) Non-guaranteed separate accounts included $3.8 billion as of December 31, 2018 and $3.9 billion as of December 31, 2017 in assets supporting the Company's pension plans, including $0.2 billion classified in Level 3 as of December 31, 2018 and $0.3 billion classified in Level 3 as of December 31, 2017.

Separate account assets in Level 1 primarily include exchange-listed equity securities. Level 2 assets primarily include:

- corporate and structured bonds valued using recent trades of similar securities or pricing models that discount future cash flows at estimated market interest rates as described above; and
- actively-traded institutional and retail mutual fund investments.

Separate account assets classified in Level 3 primarily support Cigna's pension plans, and include commercial mortgage loans as well as certain newly issued, privately-placed, complex, or illiquid securities that are priced using methods discussed above. Activity, including transfers into and out of Level 3, was not material for 2018 or 2017.

Separate account investments in securities partnerships, real estate, and hedge funds are generally valued based on the separate account's ownership share of the equity of the investee (NAV as a practical expedient), including changes in the fair values of its underlying investments. Substantially all of these assets support the Cigna Pension Plans. The following table provides additional information on these investments.

	Fair Value as of		Unfunded Commitments as of		
(In millions)	December 31, 2018	December 31, 2017	December 31, 2018	Redemption Frequency (if currently eligible)	Redemption Notice Period
Securities partnerships	**$ 477**	$ 458	**$ 308**	Not applicable	Not applicable
Real estate funds	**237**	239	**—**	Quarterly	30-90 days
Hedge funds	**18**	77	**—**	Up to annually, varying by fund	30-90 days
Total	**$ 732**	$ 774	**$ 308**		

B. Assets and Liabilities Measured at Fair Value under Certain Conditions

Some financial assets and liabilities are not carried at fair value each reporting period, but may be measured using fair value only under certain conditions, such as investments when they become impaired including investment real estate and commercial mortgage loans, and certain equity securities with no readily determinable fair value. Recorded values for these asset types representing less than 1% of total investments, were written down to their fair values, resulting in immaterial realized investment losses in 2018 and 2017.

C. Fair Value Disclosures for Financial Instruments Not Carried at Fair Value

The following table includes the Company's financial instruments not recorded at fair value that are subject to fair value disclosure requirements at December 31, 2018 and 2017. In addition to universal life products and capital leases, financial instruments that are carried in the Company's Consolidated Financial Statements at amounts that approximate fair value are excluded from the following table.

	Classification in Fair Value Hierarchy	December 31, 2018		December 31, 2017	
(In millions)		Fair Value	Carrying Value	Fair Value	Carrying Value
Commercial mortgage loans	Level 3	**$ 1,832**	**$ 1,858**	$ 1,766	$ 1,761
Long-term debt, including current maturities, excluding capital leases	Level 2	**$ 40,819**	**$ 40,829**	$ 5,730	$ 5,321

Fair values of off-balance sheet financial instruments were not material as of December 31, 2018 and 2017.

Note 11 Variable Interest Entities

When the Company becomes involved with a variable interest entity, as well as when there is a change in the Company's involvement with an entity, the Company must determine if it is the primary beneficiary and must consolidate the entity. The Company would be considered the primary beneficiary if it has the power to direct the entity's most significant economic activities or has the right to receive benefits or obligation to absorb losses that could be significant to the entity. The Company evaluates the following criteria:

- the structure and purpose of the entity;
- the risks and rewards created by and shared through the entity; and
- the Company's ability to direct its activities, receive its benefits and absorb its losses relative to the other parties involved with the entity including its sponsors, equity holders, guarantors, creditors and servicers.

The Company determined it was not a primary beneficiary in any material variable interest entities as of December 31, 2018 and 2017. The Company's involvement in variable interest entities where it is not the primary beneficiary is described below.

Securities limited partnerships and real estate limited partnerships. The Company owns interests in securities limited partnerships and real estate limited partnerships that are defined as variable interest entities. These partnerships invest in the equity or mezzanine debt of privately held companies and real estate properties. General partners unaffiliated with the Company control decisions that most significantly impact the partnership's operations and the limited partners do not have substantive kick-out or participating rights. The Company's maximum exposure to these entities of $2.9 billion across approximately 130 limited partnerships as of December 31, 2018 includes $1.5 billion reported in long-term investments and commitments to contribute an additional $1.4 billion. The Company's non-controlling interest in each of these limited partnerships is generally less than 10% of the partnership ownership interests.

Other asset-backed and corporate securities. In the normal course of its investing activities, the Company also makes passive investments in certain asset-backed and corporate securities that are issued by variable interest entities whose sponsors or issuers are unaffiliated with the Company. The Company receives fixed-rate cash flows from these investments and the maximum potential exposure to loss is limited to the carrying amount of $0.6 billion as of December 31, 2018 that is reported in fixed maturities. The Company's combined ownership interests are insignificant relative to the total principal amounts issued by these entities.

The Company is also involved in real estate joint ventures, independent physician associations ("IPAs") and a joint venture in India that are variable interest entities. The carrying values and maximum exposures associated with these arrangements are immaterial.

The Company has not provided, and does not intend to provide, financial support to any of the above entities that it is not contractually required to provide. The Company performs ongoing qualitative analyses of its involvement with these variable interest entities to determine if consolidation is required.

Note 12 Accumulated Other Comprehensive Income (Loss) ("AOCI")

AOCI includes the Company's share from entities accounted for using the equity method. AOCI excludes amounts required to adjust future policy benefits for the run-off settlement annuity business and a portion of deferred acquisition costs associated with the corporate-owned life insurance business. Generally, tax effects in AOCI are established at the currently enacted tax rate and reclassified to net income in the same period that the related pre-tax AOCI reclassifications are recognized. As discussed in Note 2, the Company early adopted ASU 2018-02 effective January 1, 2018 and $229 million of stranded tax effects resulting from U.S. tax reform legislation enacted in 2017 were reclassified from AOCI to retained earnings. Changes in the components of accumulated other comprehensive income (loss) were as follows:

(In millions)	2018	2017	2016
Securities and Derivatives			
Beginning balance	**$ 328**	$ 365	$ 425
Reclassification adjustment to retained earnings related to U.S. tax reform legislation [1]	**65**	–	–
Reclassification adjustment to retained earnings related to new financial instruments guidance [1]	**(4)**	–	–
Reclassification adjustment from retained earnings related to new hedging guidance [1]	**(6)**	–	–
Adjusted beginning balance	**383**	365	425
(Depreciation) appreciation on securities and derivatives	**(512)**	34	(48)
Tax benefit (expense)	**100**	(19)	6
Net (depreciation) appreciation on securities and derivatives	**(412)**	15	(42)
Reclassification adjustment for losses (gains) included in shareholders' net income (net realized investment losses (gains))	**60**	(81)	(29)
Reclassification adjustment for losses included in shareholders' net income (selling, general and administrative expenses)	**–**	1	1
Tax (expense) benefit	**(13)**	28	10
Net losses (gains) reclassified from AOCI to net income	**47**	(52)	(18)
Other comprehensive (loss), net of tax	**(365)**	(37)	(60)
Ending balance	**$ 18**	$ 328	$ 365
Translation of foreign currencies			
Beginning balance	**$ (65)**	$ (369)	$ (274)
Reclassification adjustment to retained earnings related to U.S. tax reform legislation [1]	**(4)**	–	–
Adjusted beginning balance	**(69)**	(369)	(274)
Translation of foreign currencies	**(152)**	309	(95)
Tax (expense)	**–**	(5)	–
Net translation of foreign currencies	**(152)**	304	(95)
Ending balance	**$ (221)**	$ (65)	$ (369)
Postretirement benefits liability			
Beginning balance	**$ (1,345)**	$ (1,378)	$ (1,401)
Reclassification adjustment to retained earnings related to U.S. tax reform legislation [1]	**(290)**	–	–
Adjusted beginning balance	**(1,635)**	(1,378)	(1,401)
Reclassification adjustment for amortization of net losses from past experience and prior service costs (selling, general and administrative expenses)	**69**	64	64
Reclassification adjustment for settlement (selling, general and administrative expenses)	**–**	7	–
Tax (expense)	**(15)**	(24)	(22)
Net adjustments reclassified from AOCI to net income	**54**	47	42
Valuation update	**93**	(22)	(29)
Tax (expense) benefit	**(20)**	8	10
Net change due to valuation update	**73**	(14)	(19)
Other comprehensive income, net of tax	**127**	33	23
Ending balance	**$ (1,508)**	$ (1,345)	$ (1,378)

(1) See Note 2 for further information about adjustments resulting from the Company's adoption of new accounting standards in 2018.

Note 13 Pension and Other Postretirement Benefit Plans

A. About our Plans

Pension plans. We froze future benefit accruals for the Company's principal domestic defined benefit pension plans in 2009. The Company also has foreign pension and other postretirement benefit plans that are immaterial to our results of operations, liquidity and financial position. Additionally, in connection with the acquisition of Express Scripts on December 20, 2018, the Company assumed a frozen cash balance retirement plan, the results of which are immaterial to our results of operations, liquidity and financial position.

Other postretirement benefit plans. The Company's postretirement medical plan was frozen in 2013. The Company also offers certain postretirement life insurance benefits through various plans.

Accounting policy. The Company measures the assets and liabilities of its domestic pension and other postretirement benefit plans as of December 31. Benefit obligations are measured at the present value of estimated future payments based on actuarial assumptions. Changes in these assumptions are called net unrecognized actuarial gains (losses) because the Company uses the "corridor" method to account for changes in the benefit obligation when actual results differ from those assumed, or when assumptions change. Under the corridor method, net unrecognized actuarial gains (losses) are initially recorded in accumulated other comprehensive income. When the unrecognized gain (loss) exceeds 10% of the benefit obligation, that excess is amortized to expense over the expected remaining lives of plan participants. The net plan expense is reported in interest expense and other in the Consolidated Statements of Income.

For balance sheet purposes, we measure plan assets at fair value. When the actual return differs from the expected return, those differences are reflected in the net unrealized actuarial gain (loss) discussed above. However, to measure pension benefit costs, we use a "market-related" asset valuation that differs from the actual fair value for domestic pension plan assets invested in non-fixed income investments. The "market-related" value recognizes the difference between actual and expected long-term returns in the portfolio over five years, a method that reduces the short-term impact of market fluctuations on pension costs. The market-related asset value was approximately $4.0 billion, compared with a fair value of approximately $4.2 billion at December 31, 2018.

B. Funded Status and Amounts Included in Accumulated Other Comprehensive Income

The following table summarizes the projected benefit obligations and assets related to our domestic and international pension and other postretirement benefit plans as of, and for the years ended, December 31:

	Pension Benefits		Other Postretirement Benefits	
(In millions)	**2018**	**2017**	**2018**	**2017**
Change in benefit obligation				
Benefit obligation, January 1	**$ 4,969**	$ 4,888	**$ 258**	$ 277
Service cost	**3**	3	**–**	–
Interest cost	**169**	186	**8**	9
Assumed in acquisition	**137**	–	**–**	–
Partial litigation settlement-attorneys' fees	**32**	–	**–**	–
(Gain) loss from past experience	**(235)** [1]	181 [2]	**(31)**	1
Benefits paid from plan assets	**(314)**	(277)	**–**	(3)
Benefits paid – other	**(20)**	(12)	**(25)**	(26)
Benefit obligation, December 31	**4,741**	4,969	**210**	258
Change in plan assets				
Fair value of plan assets, January 1	**4,281**	3,977	**2**	5
Assumed in acquisition	**96**	–	**–**	–
Actual return on plan assets	**85**	418	**–**	–
Benefits paid	**(314)**	(277)	**(2)**	(3)
Contributions	**3**	163	**–**	–
Fair value of plan assets, December 31	**4,151**	4,281	**–**	2
Funded status	**$ (590)**	$ (688)	**$ (210)**	$ (256)
Liability in Consolidated Balance Sheets				
Accrued expenses and other liabilities	**$ (30)**	$ (25)	**$ (23)**	$ (27)
Other non-current liabilities	**$ (560)**	$ (663)	**$ (187)**	$ (229)

(1) Gain reflects an increase in the discount rate and a favorable change in the mortality assumption.

(2) Loss reflects a decrease in the discount rate, partially offset by a favorable change in the mortality assumption.

We fund our qualified pension plans at least at the minimum amount required by the Employee Retirement Income Security Act of 1974 and the Pension Protection Act of 2006. For 2019, contributions to the qualified pension plans are expected to be immaterial. Future years' contributions will ultimately be based on a wide range of factors including but not limited to asset returns, discount rates and funding targets. Non-qualified pension and other postretirement benefit plans are generally funded on a pay-as-you-go basis as there are no plan assets for these plans.

Benefit payments. The following benefit payments are expected to be paid in:

(In millions)	Pension Benefits	Other Postretirement Benefits
2019	**$ 324**	**$ 25**
2020	**$ 311**	**$ 23**
2021	**$ 313**	**$ 22**
2022	**$ 316**	**$ 20**
2023	**$ 318**	**$ 19**
2024-2028	**$ 1,549**	**$ 72**

Amounts reflected in the pension and other postretirement benefit liabilities shown above that have not yet been reported in net income and therefore are included in accumulated other comprehensive loss consisted of the following as of December 31:

	Pension Benefits		Other Postretirement Benefits	
(In millions)	**2018**	**2017**	**2018**	**2017**
Unrecognized net gains (losses)	**$ (1,980)**	$ (2,113)	**$ 32**	$ –
Unrecognized prior service cost	**(6)**	(6)	**44**	46
Postretirement benefits liability adjustment	**$ (1,986)**	$ (2,119)	**$ 76**	$ 46

C. Cost of Our Plans

Net pension and other postretirement benefits cost was as follows for the years ended December 31:

	Pension Benefits			Other Postretirement Benefits		
(In millions)	**2018**	**2017**	**2016**	**2018**	**2017**	**2016**
Service cost	**$ 3**	$ 3	$ 2	**$ –**	$ –	$ –
Interest cost	**169**	186	199	**8**	9	11
Expected long-term return on plan assets	**(257)**	(260)	(249)	**–**	–	–
Partial litigation settlement – attorneys' fees	**32**	–	–	**–**	–	–
Amortization of:						
Net loss from past experience	**70**	66	65	**1**	1	1
Prior service cost	**–**	–	1	**(2)**	(3)	(3)
Settlement loss	**–**	7	–	**–**	–	–
Net plan cost	**$ 17**	$ 2	$ 18	**$ 7**	$ 7	$ 9

As further discussed in Note 19, Old Cigna and the Cigna Pension Plan are defendants in a class action lawsuit related to the Plan's conversion of certain employees from an annuity to a cash balance benefit in 1997. In the fourth quarter of 2018, the Court ordered the Plan to pay $32 million representing the attorney fee portion of the settlement. This payment was recognized as an expense in 2018. An offsetting expense credit of $32 million was also recorded to reduce the litigation reserve held, resulting in no impact to net income in 2018 related to this matter. In 2019, barring any new order from the Court, it is expected that: 1) class participants will be notified of their increased benefits; 2) the plan will be amended; and 3) benefits will begin to be paid. However, the exact timing and amount of these actions remain uncertain. The Company's remaining litigation reserve is adequate to cover the expected benefits due to class participants.

D. Assumptions Used for Pension and Other Postretirement Benefit Plans

Management determined the present value of the projected benefit obligation and the accumulated other postretirement benefit obligation and related benefit costs based on the following weighted average assumptions as of and for the years ended December 31:

	2018	**2017**
Discount rate:		
Pension benefit obligation	**4.23%**	3.51%
Other postretirement benefit obligation	**4.09%**	3.37%
Pension benefit cost	**3.51%**	3.95%
Other postretirement benefit cost	**3.37%**	3.70%
Expected long-term return on plan assets:		
Pension benefit cost	**7.00%**	7.25%
Other postretirement benefit cost	**5.00%**	5.00%
Mortality table for pension and postretirement benefit obligations	**RP 2014 with MP 2018 projection scale**	RP 2014 with MP 2017 projection scale

The Company used the Society of Actuaries mortality table RP2014 and the updated improvement scales published in 2017 and 2018 to value its benefit obligations because the Company's mortality experience closely matched these tables based on internal studies. The updated improvement scales published in 2017 and 2018 both indicated that mortality improvement is expected to be lower than was originally projected when the study was first published in 2014, resulting in decreases to the benefit obligations in both years.

The Company sets discount rates by applying actual annualized yields for high quality bonds at various durations to the expected cash flows of the pension and other postretirement benefits liabilities. A discount rate curve is constructed using an array of bonds in various industries throughout the domestic market, but only selects those for the curve that have an above average return at each duration. Management believes that this curve is representative of the yields that the Company is able to achieve through its plan asset investment strategy.

Expected long-term rates of return on plan assets were developed considering actual long-term historical returns, expected long-term market conditions, plan asset mix and management's investment strategy that continues a significant allocation to domestic and foreign equity securities as well as securities partnerships, real estate and hedge funds. Expected long-term market conditions take into consideration certain key macroeconomic trends including expected domestic and foreign GDP growth, employment levels and inflation.

E. Pension Plan Assets

As of December 31, 2018, pension assets included $3.8 billion invested in the separate accounts of Connecticut General Life Insurance Company and Life Insurance Company of North America, subsidiaries of the Company, as well as an additional $265 million invested directly in funds offered by the buyer of the retirement benefits business, and $116 million invested by others.

The fair values of pension assets by category are as follows as of December 31, 2018 and 2017.

(In millions)	2018	2017
Fixed maturities:		
Federal government and agency	**$ –**	$ 1
Corporate	**1,446**	1,124
Asset-backed	**32**	22
Fund investments	**768**	884
Total fixed maturities	**2,246**	2,031
Equity securities:		
Domestic	**506**	689
International, including funds and pooled separate accounts [1]	**360**	476
Total equity securities	**866**	1,165
Securities partnerships	**477**	457
Real estate funds, including pooled separate accounts [1]	**250**	300
Commercial mortgage loans	**110**	140
Hedge funds	**36**	73
Guaranteed deposit account contract	**107**	63
Cash equivalents and other current assets, net	**59**	52
Total pension assets at fair value	**$ 4,151**	$ 4,281

(1) A pooled separate account has several participating benefit plans and each owns a share of the total pool of investments.

The Company's current target investment allocation percentages (55% fixed income, 25% public equity securities and 20% in other investments, including private equity (securities partnerships) and real estate, are developed by management as guidelines, although the fair values of each asset category are expected to vary as a result of changes in market conditions. The Company would expect to further reduce the allocation to equity securities and other investments and increase the allocation to fixed income investments as funding levels improve.

See Note 10 for further details regarding how fair value is determined, including the level within the fair value hierarchy and the procedures we use to validate fair value measurements. The Company classifies substantially all fixed maturities in Level 2 for pension plan assets. These assets are valued using recent trades of similar securities or are fund investments priced using their daily net asset value that is the exit price. A substantial portion of domestic equity securities within pension assets are classified as Level 1, while international equity funds within pension assets are predominantly classified in Level 2 using daily net asset value.

Securities partnerships, real estate and hedge funds are valued using NAV as a practical expedient and are excluded from the fair value hierarchy. See Note 10 for additional disclosures related to these assets invested in the separate accounts of the Company's subsidiaries. Certain securities as described in Note 10, as well as commercial mortgage loans and guaranteed deposit account contracts, are classified in Level 3 because unobservable inputs used in their valuation are significant.

F. 401(k) Plans

The Company sponsors a 401(k) plan in which the Company matches a portion of employees' pre-tax contributions. Participants in the plan may invest in various funds that invest in the Company's common stock, several diversified stock funds, a bond fund or a fixed-income fund.

The Company may elect to increase its matching contributions if the Company's annual performance meets certain targets. The Company's annual expense for these plans was as follows:

(In millions)	2018	2017	2016
Expense	**$ 196**	$ 122	$ 113

Note 14 Employee Incentive Plans

A. About Our Plans

The People Resources Committee (the "Committee") of the Board of Directors awards stock options, restricted stock, restricted stock units, deferred stock and strategic performance shares ("SPS") to certain employees. The Committee has issued common stock instead of cash compensation. Prior to the acquisition of Express Scripts, the Company issued shares from Treasury stock for these awards. Following the acquisition, original issues shares were used.

Awards of Express Scripts options and restricted stock units were rolled over to Cigna stock options and restricted stock units in connection with the Express Scripts acquisition on December 20, 2018 as explained further in Note 3. Information in this footnote includes the effect of the Express Scripts rollover awards unless otherwise indicated.

The Company records compensation expense for stock and option awards over their vesting periods primarily based on the estimated fair value at the grant date. Fair value is determined differently for each type of award as discussed below.

Shares of common stock available for award at December 31 were as follows:

(In millions)	2018	2017	2016
Common shares available for award	**25.7**	14.0	6.8

B. Stock Options

Accounting policy. The Company awards options to purchase Cigna common stock at the market price of the stock on the grant date except for rollover option awards issued to Express Scripts employees in connection with the acquisition (see Note 3). Options vest over periods ranging from one to three years and expire no later than 10 years from grant date. Fair value is estimated using the Black-Scholes option-pricing model by applying the assumptions presented below. That fair value is reduced by options expected to be forfeited during the vesting period. The Company estimates forfeitures at the grant date based on our experience and adjusts the expense to reflect actual forfeitures over the vesting period. The fair value of options, net of forfeitures, is recognized in selling, general and administrative expenses on a straight line basis over the vesting period.

Black-Scholes option-pricing model assumptions and the resulting fair value of options are presented in the following table. The average fair value of options, and the expected option life exclude the rollover options granted to Express Scripts employees in connection with the acquisition. See Note 3 for further information.

	2018	2017	2016
Dividend yield	**0.0%**	0.0%	0.0%
Expected volatility	**35.0%**	35.0%	35.0%
Risk-free interest rate	**2.5%**	1.8%	1.2%
Expected option life	**4.4 years**	4.3 years	4.3 years
Weighted average fair value of options	**$ 64.18**	$ 46.38	$ 42.01

The expected volatility reflects the past daily stock price volatility of Cigna stock. The Company does not consider volatility implied in the market prices of traded options to be a good indicator of future volatility because remaining traded options will expire within one year. The risk-free interest rate is derived using the four-year U.S. Treasury bond yield rate as of the award date for the primary annual grant. Expected option life reflects the Company's historical experience.

The following table shows the status of, and changes in, common stock options during the last three years.

	2018		2017		2016	
(Options in thousands)	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Outstanding – January 1	**6,156**	**$ 100.79**	7,097	$ 82.01	6,433	$ 68.86
Granted	**7,080**	**$ 143.62**	1,230	$ 149.17	1,336	$ 139.20
Exercised	**(771)**	**$ 88.35**	(2,072)	$ 63.41	(577)	$ 62.09
Expired or canceled	**(95)**	**$ 165.04**	(99)	$ 138.41	(95)	$ 117.18
Outstanding – December 31	**12,370**	**$ 125.46**	6,156	$ 100.79	7,097	$ 82.01
Options exercisable at year-end	**9,446**	**$ 114.22**	3,894	$ 77.36	4,409	$ 58.36

Compensation expense of $61 million related to unvested stock options at December 31, 2018 will be recognized over the next two years (weighted average period).

The table below summarizes information for stock options exercised during the last three years:

(In millions)	2018	2017	2016
Intrinsic value of options exercised	**$ 86**	$ 218	$ 41
Cash received for options exercised	**$ 68**	$ 131	$ 36
Tax benefit from options exercised	**$ 8**	$ 41	$ 11

The following table summarizes information for outstanding common stock options at December 31, 2018:

	Options Outstanding	Options Exercisable
Number (in thousands)	**12,370**	**9,446**
Total intrinsic value (in millions)	**$ 804**	**$ 715**
Weighted average exercise price	**$ 125.46**	**$ 114.22**
Weighted average remaining contractual life	**5.4 years**	**4.5 years**

C. Restricted Stock

The Company awards restricted stock to the Company's employees with vesting periods ranging from three to five years. Recipients of restricted stock awards accumulate dividends during the vesting period, but forfeit their awards and accumulated dividends if their employment terminates before the vesting date.

Accounting policy. Fair value of restricted stock awards is equal to the market price of Cigna's common stock on the date of grant. This fair value is reduced by awards that are expected to forfeit. At the grant date, the Company estimates forfeitures based on experience and adjusts the expense to reflect actual forfeitures over the vesting period. This fair value, net of forfeitures, is recognized in selling, general and administrative expenses over the vesting period on a straight-line basis.

The following table shows the status of, and changes in, restricted stock awards during the last three years.

	2018		2017		2016	
(Awards in thousands)	Grants/Units	Weighted Average Fair Value at Award Date	Grants/Units	Weighted Average Fair Value at Award Date	Grants/Units	Weighted Average Fair Value at Award Date
Outstanding – January 1	**1,295**	**$ 126.44**	1,309	$ 97.78	1,642	$ 72.58
Awarded	**1,451**	**$ 183.29**	451	$ 155.21	315	$ 138.61
Vested	**(560)**	**$ 112.53**	(409)	$ 67.09	(591)	$ 50.01
Forfeited	**(48)**	**$ 150.84**	(56)	$ 121.74	(57)	$ 92.51
Outstanding – December 31	**2,138**	**$ 168.12**	1,295	$ 126.44	1,309	$ 97.78

The fair value of vested restricted stock at the vesting date for the years ended December 31 was as follows:

(In millions)	2018	2017	2016
Fair value of vested restricted stock	**$ 107**	$ 62	$ 82

Approximately 10,400 employees held 2.1 million restricted stock awards at the end of 2018 with $174 million of related compensation expense to be recognized over the next two years (weighted average period).

D. Strategic Performance Shares ("SPS")

The Company awards SPSs to executives and certain other key employees generally with a performance period of three years. Half of these shares are subject to a market condition (total shareholder return relative to industry peer companies) and half are subject to a performance condition (cumulative adjusted net income). These targets are set by the Committee. Holders of these awards receive shares of Cigna common stock at the end of the performance period ranging anywhere from 0 to 200% of the original awards.

Accounting policy. Compensation expense for SPSs is recorded over the performance period. Fair value is determined at the grant date for "market condition" SPSs using a Monte Carlo simulation model and not subsequently adjusted regardless of the final outcome. Expense is initially accrued for "performance condition" SPSs based on the most likely outcome, but evaluated for adjustment each period for updates in the expected outcome. Expense is adjusted to the actual outcome (number of shares awarded times the share price at the grant date) at the end of the performance period. The Company estimates forfeitures at the grant date based on experience and adjusts the expense to reflect actual forfeitures over the vesting period.

The following table shows the status of, and changes in, SPSs during the last three years:

	2018		2017		2016	
(Awards in thousands)	Shares	Weighted Average Fair Value at Award Date	Shares	Weighted Average Fair Value at Award Date	Shares	Weighted Average Fair Value at Award Date
Outstanding – January 1	**778**	**$ 136.57**	942	$ 109.14	1,188	$ 81.68
Awarded	**221**	**$ 197.51**	275	$ 150.06	286	$ 139.05
Vested	**(269)**	**$ 121.57**	(386)	$ 78.91	(494)	$ 60.15
Forfeited	**(23)**	**$ 158.16**	(53)	$ 138.19	(38)	$ 112.70
Outstanding – December 31	**707**	**$ 160.74**	778	$ 136.57	942	$ 109.14

The fair value of vested SPSs at the vesting date for the years ended December 31 was as follows:

	2018		2017		2016	
(Shares in thousands; $ in millions)	Shares	Fair Value	Shares	Fair Value	Shares	Fair Value
Shares of Cigna common stock distributed upon SPS vesting	**380**	**$ 73**	476	$ 70	768	$ 109

Approximately 1,500 employees held 707,000 SPSs at the end of 2018 and $51 million of related compensation expense is expected to be recognized over the next two years. The amount of expense for "performance condition" SPSs may vary based on actual performance in 2019 and 2020.

E. One-Time Employee Stock Award

The Company granted most employees a one-time stock award in 2017 of five shares that immediately vested. Approximately 205,000 shares were issued in connection with this program at a price of $162.96, resulting in a pre-tax cost of $33 million.

F. Compensation Cost and Tax Effects of Share-based Compensation

The Company records tax benefits in shareholders' net income during the vesting period based on the amount of expense being recognized. The difference between tax benefits based on the expense and the actual tax benefit realized are also recorded in net income when stock options are exercised, or when restricted stock and SPSs vest.

(In millions)	2018	2017	2016
Total compensation cost for shared-based awards	**$ 180**	$ 178	$ 128
Tax benefits recognized	**$ 36**	$ 79	$ 57

Note 15 Goodwill, Other Intangibles and Property and Equipment

A. Goodwill

Accounting policy. Goodwill represents the excess of the cost of businesses acquired over the fair value of their net assets. The resulting goodwill is assigned to those reporting units expected to realize cash flows from the acquisition, allocated to reporting units based on relative fair values, primarily reported in the Health Services segment ($33.7 billion), the Integrated Medical segment ($10.5 billion) and, to a lesser extent, the International Markets segment ($0.3 billion)

The Company evaluates goodwill for impairment at least annually during the third quarter at the reporting unit level and writes it down through shareholders' net income if impaired. Fair value of a reporting unit is generally estimated based on either market data or a discounted cash flow analysis using assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. The significant assumptions and estimates used in determining fair value include the discount rate and future cash flows. A discount rate is selected to correspond with each reporting unit's weighted average cost of capital, consistent with that used for investment decisions considering the specific and detailed operating plans and strategies within that reporting unit. Projections of future cash flows for each reporting unit are consistent with our annual planning process for revenues, claims, operating expenses, taxes, capital levels and long-term growth rates.

Goodwill activity. Goodwill activity during 2018 and 2017 was as follows:

(In millions)	2018	2017
Balance at January 1,	**$ 6,164**	$ 5,980
Goodwill acquired, net	**38,371**	154
Impact of foreign currency translation	**(30)**	30
Balance at December 31,	**$ 44,505**	$ 6,164

The significant increase in goodwill during 2018 reflects the Company's acquisition of Express Scripts as further discussed in Note 3.

B. Other Intangibles

Accounting policy. The Company's other intangible assets include purchased customer and producer relationships, provider networks and trademarks. The fair value of purchased customer relationships and the amortization method were determined as of the dates of purchase using an income approach that relies on projected future net cash flows including key assumptions for customer attrition and discount rates. The Company amortizes other intangibles on an accelerated or straight-line basis over periods from one to 39 years. Management revises amortization periods if it believes there has been a change in the length of time that an intangible asset will continue to have value. Costs incurred to renew or extend the terms of these intangible assets are generally expensed as incurred.

Components of other assets, including other intangibles. Other intangible assets were comprised of the following at December 31:

(In millions)	Cost	Accumulated Amortization	Net Carrying Value
2018			
Customer relationships	**$ 31,451**	**1,213**	**30,238**
Trade Name – Express Scripts	**8,400**	**–**	**8,400**
Other	**560**	**195**	**365**
Other intangible assets	**40,411**	**1,408**	**39,003**
Value of business acquired (reported in deferred policy acquisition costs)	**665**	**102**	**563**
Total	**$ 41,076**	**1,510**	**39,566**
2017			
Customer relationships	$ 1,280	1,056	224
Other	291	170	121
Other intangible assets	1,571	1,226	345
Value of business acquired (reported in deferred policy acquisition costs)	232	86	146
Total	$ 1,803	1,312	491

The significant increase reflects the intangible assets acquired from Express Scripts as discussed further in Note 3.

C. Property and Equipment

Accounting policy. Property and equipment is carried at cost less accumulated depreciation. Cost includes interest, real estate taxes and other costs incurred during construction when applicable. Internal-use software that is acquired, developed or modified solely to meet the Company's internal needs, with no plan to market externally, is also included in this category. Costs directly related to acquiring, developing or modifying internal-use software are capitalized.

The Company calculates depreciation and amortization principally using the straight-line method generally based on the estimated useful life of each asset as follows: buildings and improvements, 10 to 40 years; purchased software, three to five years; internally developed software, three to seven years; and furniture and equipment (including computer equipment), three to 10 years. Improvements to leased facilities are depreciated over the lesser of the remaining lease term or the estimated life of the improvement. The Company considers events and circumstances that would indicate the carrying value of property, equipment or capitalized software might not be recoverable. An impairment charge is recorded if the Company determines the carrying value of any of these assets is not recoverable. The Company also reviews and shortens the estimated useful lives of these assets, if necessary.

Components of property and equipment. Property and equipment was comprised of the following as of December 31:

(In millions)	Cost	Accumulated Amortization	Net Carrying Value
2018			
Internal-use software	**$ 5,694**	**$ 2,415**	**$ 3,279**
Other property and equipment			
Assets recorded under capital leases [1]	**56**	**4**	**52**
Other property and equipment not recorded under capital leases	**2,208**	**977**	**1,231**
Total other property and equipment	**2,264**	**981**	**1,283**
Total property and equipment	**$ 7,958**	**$ 3,396**	**$ 4,562**
2017			
Internal-use software	$ 2,991	$ 2,184	$ 807
Other property and equipment			
Assets recorded under capital leases [1]	49	31	18
Other property and equipment not recorded under capital leases	1,573	835	738
Total other property and equipment	1,622	866	756
Total property and equipment	$ 4,613	$ 3,050	$ 1,563

(1) Current capital lease agreements are for equipment and generally have a term of 48 months with the equipment expected to be returned to the lessor at termination.

Components of depreciation and amortization. Depreciation and amortization was comprised of the following for the years ended December 31:

(In millions)	2018	2017	2016
Internal-use software	**$ 323**	$ 298	$ 303
Other property and equipment [1]	**146**	153	158
Value of business acquired (reported in deferred policy acquisition costs)	**16**	18	20
Other intangibles	**210**	97	129
Total depreciation and amortization	**$ 695**	$ 566	$ 610

(1) Other property and equipment includes amortization on assets recorded under capital leases of $9 million in 2018, $14 million in 2017 and $20 million in 2016.

The Company estimates annual pre-tax amortization for intangible assets, including internal-use software, over the next five calendar years to be as follows:

(In millions)	Pre-tax Amortization
2019	**$ 3,169**
2020	**$ 2,164**
2021	**$ 2,062**
2022	**$ 1,844**
2023	**$ 1,777**

Note 16 Leases and Rentals

Description of operating leases. The Company's operating leases are primarily for office space and certain computer and other equipment. Some of these leases include renewal options and other incentives that are amortized over the life of the lease. Leases active in 2018 had terms ranging from one month to 18 years.

Rental expense and payments. For the years ended December 31, net rental expenses for operating leases were approximately:

(In millions)	2018	2017	2016
Net rental expense for operating leases	**$ 162**	$ 162	$ 151

Future net minimum rental payments under non-cancelable operating leases were approximately $860 million as of December 31, 2018, payable as follows:

(In millions)	Operating Lease Payments
2019	**$ 199**
2020	**$ 182**
2021	**$ 148**
2022	**$ 116**
2023	**$ 84**
2024 and thereafter	**$ 132**

The Company also has capital lease arrangements. See Note 15 and Note 5 for further information on assets recorded under capital leases and our related obligations.

Note 17 Shareholders' Equity and Dividend Restrictions

State insurance departments and foreign jurisdictions that regulate certain of the Company's subsidiaries prescribe accounting practices (differing in some respects from GAAP) to determine statutory net income and surplus. The Company's life, accident and health insurance and Health Maintenance Organization ("HMO") subsidiaries are regulated by such statutory requirements. Regulatory changes in the jurisdiction of one of our foreign insurance affiliates caused a significant increase in surplus in 2017, primarily from beginning to include deferred policy acquisition costs as an admitted asset. The statutory net income of the Company's life, accident and health insurance and HMO subsidiaries for the years ended, and their statutory surplus as of December 31, were as follows:

(In billions)	2018	2017	2016
Net income	**$ 3.4**	$ 2.5	$ 2.0
Surplus	**$ 12.2**	$ 10.4	$ 8.5

The Company's HMO and life, accident and health insurance subsidiaries are also subject to minimum statutory surplus requirements and may be required to maintain investments on deposit with state departments of insurance or other regulatory bodies. Additionally, these subsidiaries may be subject to regulatory restrictions on the amount of annual dividends or other distributions (such as loans or cash advances) that

insurance companies may extend to their parent companies without prior approval. As of December 31, 2018, these amounts, including restricted GAAP net assets of the Company's subsidiaries, were as follows:

(In billions)	2018
Minimum statutory surplus required by regulators	**$ 3.9**
Investments on deposit with regulatory bodies	**$ 0.6**
Maximum dividend distributions permitted in 2019 without regulatory approval	**$ 2.1**
Maximum loans to the parent company permitted without regulatory approval	**$ 1.3**
Restricted GAAP net assets of Cigna Corporation's subsidiaries	**$ 15.5**

Permitted practices used by the Company's insurance subsidiaries in 2018 that differed from prescribed regulatory accounting had an immaterial impact on statutory net income and surplus.

Note 18 Income Taxes

Accounting policy. Deferred income taxes are reflected in the balance sheet for differences between the financial and income tax reporting bases of the underlying assets and liabilities, and established based upon enacted tax rates and laws. Deferred income tax assets are recognized when available evidence indicates that realization is more likely than not, and to the extent this standard is not met a valuation allowance is established. The deferred income tax provision generally represents the net change in deferred income tax assets and liabilities during the reporting period excluding adjustments to accumulated other comprehensive income or amounts recorded in connection with a business combination. The current income tax provision generally represents estimated amounts due on income tax returns for the year reported to various jurisdictions plus the effect of any uncertain tax positions. The Company recognizes a liability for uncertain tax positions if management believes the probability that the positions will be sustained is less than 50 percent.

Income taxes attributable to the Company's foreign operations are generally provided using the respective foreign jurisdictions' tax rate.

The Company's foreign operations continue to retain a significant portion of their earnings overseas. These undistributed earnings are deployed outside of the United States in support of the liquidity and capital needs of our foreign operations as well as to support growth initiatives overseas. The Company generally does not intend to repatriate these earnings.

A. Income Tax Expense

The federal corporate income tax rate declined to 21% effective January 1, 2018 because of U.S. tax reform legislation enacted in late 2017. As a result, the Company's U.S. income tax expense and effective tax rate were notably lower in 2018. Prior year consolidated tax expense included a $232 million charge due to U.S. tax reform, driven by revaluation of deferred tax balances and the deemed repatriation tax on accumulated foreign earnings. The Company has continued to evaluate the provisional tax reform adjustments first recorded in 2017. The one-year measurement period under SEC requirements has expired with only minor adjustments to the initial amounts recorded.

The components of income taxes for the years ended December 31 were as follows:

(In millions)	2018	2017	2016
Current taxes			
U.S. income taxes	**$ 804**	$ 974	$ 935
Foreign income taxes	**185**	122	95
State income taxes	**47**	36	32
Total current taxes	**1,036**	1,132	1,062
Deferred taxes (benefits)			
U.S. income taxes (benefits)	**(75)**	204	69
Foreign income taxes	**8**	39	9
State income tax (benefits)	**(34)**	(1)	(4)
Total deferred taxes (benefits)	**(101)**	242	74
Total income taxes	**$ 935**	$ 1,374	$ 1,136

Total income taxes for the years ended December 31 were different from the amount computed using the nominal federal income tax rate for the following reasons:

	2018		2017		2016	
(In millions)	**$**	**%**	**$**	**%**	**$**	**%**
Tax expense at nominal rate	**$ 752**	**21.0%**	$ 1,262	35.0%	$ 1,043	35.0%
Effect of U.S. tax reform legislation	**(4)**	**(0.1)**	232	6.4	–	0.0
Effect of foreign earnings	**74**	**2.1**	(70)	(1.9)	(57)	(1.9)
Health insurance industry tax	**78**	**2.2**	–	0.0	108	3.6
State income tax (net of federal income tax benefit)	**10**	**0.3**	23	0.6	18	0.6
Other	**25**	**0.6**	(73)	(2.0)	24	0.8
Total income taxes	**$ 935**	**26.1%**	$ 1,374	38.1%	$ 1,136	38.1%

Consolidated pre-tax income from the Company's foreign operations was approximately 15% of the Company's pre-tax income in 2018. The comparable amount in prior years was 14% in 2017 and 11% in 2016. South Korean operations produced a majority of the Company's foreign pre-tax earnings.

The effective tax rate for 2018 of 26.1% was considerably lower than the 38.1% rate for 2017. The decline was due to the reduction in the U.S. tax rate, and was partially offset by reinstatement of the non-deductible health insurance industry tax. The health insurance industry tax will again be suspended for 2019.

The Company continues to retain a significant portion of its foreign earnings overseas, where they are generally subject to a higher tax rate than that imposed in the U.S. Additional deferred tax liabilities of approximately $135 million for foreign withholding taxes would have been recorded if these earnings were intended to be remitted. A portion of these withholding taxes may be eligible for credit against the Company's U.S. tax liability.

B. Deferred Income Taxes

Deferred income tax assets and liabilities as of December 31 were as follows:

(In millions)	2018	2017
Deferred tax assets		
Employee and retiree benefit plans	**$ 411**	$ 279
Other insurance and contractholder liabilities	**402**	358
Loss carryforwards	**255**	105
Other accrued liabilities	**340**	101
Other	**205**	91
Deferred tax assets before valuation allowance	**1,613**	934
Valuation allowance for deferred tax assets	**(199)**	(72)
Deferred tax assets, net of valuation allowance	**1,414**	862
Deferred tax liabilities		
Depreciation and amortization	**838**	176
Acquisition-related basis differences	**9,792**	320
Policy acquisition expenses	**211**	190
Unrealized appreciation on investments and foreign currency translation	**(29)**	102
Other	**55**	35
Total deferred tax liabilities	**10,867**	823
Net deferred income tax (liabilities) assets	**$ (9,453)**	$ 39

The net deferred tax balance changed significantly due to the Company's acquisition of Express Scripts, primarily representing deferred tax liabilities on the intangible assets recognized in purchase accounting. No deferred tax liability has been recognized for goodwill that is nondeductible for tax purposes. Also certain prior year balances have been reclassified to align with our presentation as of December 31, 2018.

Management believes that future results will generally be sufficient to realize the Company's gross deferred tax assets. The Company establishes a valuation allowance when it determines that it is not at least more likely than not the asset will be recognized. The Company has recognized deferred tax assets related to federal, state and foreign losses, a portion of which have been offset by a valuation allowance. There are multiple expiration dates associated with these losses, though a significant portion expires in 2021.

C. Uncertain Tax Positions

A reconciliation of unrecognized tax benefits for the years ended December 31 was as follows:

(In millions)	2018	2017	2016
Balance at January 1,	**$ 35**	$ 31	$ 31
Increase due to prior year positions	**40**	–	–
Increase due to business combinations	**860**	–	–
Increase due to current year positions	**6**	7	10
Reduction related to settlements with taxing authorities	**(1)**	(1)	(2)
Reduction related to lapse of applicable statute of limitations	**(12)**	(2)	(8)
Balance at December 31,	**$ 928**	$ 35	$ 31

The liability for uncertain tax positions has increased significantly due to the Company's acquisition of Express Scripts, the majority of which would impact shareholder's net income, if recognized. It is reasonably possible that the liability for uncertain tax positions could decline over the intervening twelve months.

The Company classifies net interest expense on uncertain tax positions as a component of income tax expense, but excludes this amount from the disclosed liability for uncertain tax positions. The liability for net interest expense was not material as of December 31, 2018 or 2017.

D. Other Tax Matters

The statute of limitations for Cigna's consolidated income tax returns through 2014 has closed, and there are no pending examinations. The Company has filed an amended 2014 consolidated tax return and the claim is subject to Internal Revenue Service ("IRS") review. The IRS has examined Express Scripts' tax returns for 2010 through 2012, for which there is a significant disputed tax matter, and is currently examining returns for 2013 through 2015. The Company conducts business in a number of state and foreign jurisdictions, and may be engaged in multiple audit proceedings at any given time. Generally, no further state or foreign audit activity is expected for tax years prior to 2011 for Cigna's entities and 2006 for Express Scripts' entities.

Note 19 Contingencies and Other Matters

The Company, through its subsidiaries, is contingently liable for various guarantees provided in the ordinary course of business.

A. Financial Guarantees: Retiree and Life Insurance Benefits

The Company guarantees that separate account assets will be sufficient to pay certain life insurance or retiree benefits. For the majority of these benefits, the sponsoring employers are primarily responsible for ensuring that assets are sufficient to pay these benefits and are required to maintain assets that exceed a certain percentage of benefit obligations. If employers fail to do so, the Company or an affiliate of the buyer of the retirement benefits business (Prudential Retirement Insurance and Annuity Company or "Prudential") has the right to redirect the management of the related assets to provide for benefit payments. As of December 31, 2018, employers maintained assets that exceeded the benefit obligations under these arrangements of approximately $455 million. Approximately 11% of these are reinsured by Prudential. The remaining guarantees are provided by the Company with minimal reinsurance from third parties. The Company establishes an additional liability if management believes that the Company will be required to make payment under the guarantees; there were no additional liabilities required for these guarantees, net of reinsurance, as of December 31, 2018. Separate account assets supporting these guarantees are classified in Levels 1 and 2 of the GAAP fair value hierarchy (see Note 10).

The Company does not expect that these financial guarantees will have a material effect on the Company's consolidated results of operations, liquidity or financial condition.

B. Certain Other Guarantees

The Company had indemnification obligations as of December 31, 2018 in connection with acquisition and disposition transactions. These indemnification obligations are triggered by the breach of representations or covenants provided by the Company, such as representations for the presentation of financial statements, the filing of tax returns, compliance with law or the identification of outstanding litigation. These obligations are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential amount due is subject to contractual limitations based on a percentage of the transaction purchase price, while in other cases limitations are not specified or applicable. The Company does not believe that it is possible to determine the maximum potential amount due under these obligations because not all amounts due under these indemnification obligations are subject to limitation. There were no liabilities for these indemnification obligations as of December 31, 2018.

C. Guaranty Fund Assessments

The Company operates in a regulatory environment that may require its participation in assessments under state insurance guaranty association laws. The Company's exposure to assessments for certain obligations of insolvent insurance companies to policyholders and claimants is based on its share of business written in the relevant jurisdictions.

In first quarter 2017, the Commonwealth Court of Pennsylvania entered an order of liquidation of Penn Treaty Network America Insurance Company, together with its subsidiary American Network Insurance Company (collectively "Penn Treaty," a long-term care insurance carrier), triggering guaranty fund coverage and a charge of approximately $130 million before-tax ($85 million after-tax). As of December 31, 2018, the recorded liability for this assessment was approximately $42 million. Updates to the amount of the Penn Treaty assessment were not material in 2018. A portion of this assessment is expected to be offset in the future by premium tax credits that will be recognized in the period received.

D. Legal and Regulatory Matters

The Company is routinely involved in numerous claims, lawsuits, regulatory inquiries and audits, government investigations, including under the federal False Claims Act and state false claims acts initiated by a government investigating body or by a qui tam relator's filing of a complaint under court seal, and other legal matters arising, for the most part, in the ordinary course of managing a global health services business. Additionally, the Company has received and is cooperating with subpoenas or similar processes from various governmental agencies requesting information, all arising in the normal course of its business. Except for the specific matters noted below, the Company believes that the legal actions, regulatory matters, proceedings and investigations currently pending against it should not have a material adverse effect on the Company's results of operations, financial condition or liquidity based upon our current knowledge and taking into consideration current accruals. This includes certain matters previously discussed in Express Scripts' annual and quarterly reports that are no longer disclosed because they are not considered material legal proceedings for the combined company. Disputed tax matters arising from audits by the IRS or other state and foreign jurisdictions, including those resulting in litigation, are accounted for under GAAP guidance for uncertain tax positions. Further information on income tax matters can be found in Note 18.

Pending litigation and legal or regulatory matters that the Company has identified with a reasonably possible material loss are described below. When litigation and regulatory matters present loss contingencies that are both probable and estimable, the Company accrues the estimated loss by a charge to shareholders' net income. The estimated loss is the Company's best estimate of the probable loss at the time or an amount within a range of estimated losses reflecting the most likely outcome or the minimum amount of the range (if no amount is better than any other estimated amount in the range.) For material pending litigation and legal or regulatory matters discussed below, the Company provides disclosure in the aggregate of accruals and range of loss, or a statement that such information cannot be estimated. In light of the uncertainties involved in these matters, there is no assurance that their ultimate resolution will not exceed the amounts currently accrued by the Company. The Company has accrued approximately $190 million ($150 million after-tax) as of December 31, 2018 for the matters discussed below under "Litigation Matters" as well as litigation related to certain of the Company's claim operating practices and disputes around reimbursement rates to providers. Due to numerous uncertain factors presented in these cases, it is not possible to estimate an aggregate range of loss (if any) for these matters at this time. In light of the uncertainties involved in these matters, there is no assurance that their ultimate resolution will not exceed the amounts currently accrued by the Company. An adverse outcome in one or more of these matters could be material to the Company's results of operations, financial condition or liquidity for any particular period.

Litigation Matters

Amara cash balance pension plan litigation. In December 2001, Janice Amara filed a class action lawsuit in the U.S. District Court for the District of Connecticut against Cigna Corporation and the Cigna Pension Plan (the "Plan") on behalf of herself and other similarly situated Plan participants affected by the 1998 conversion to a cash balance formula. The plaintiffs allege various violations of the Employee Retirement Income Security Act of 1974 ("ERISA"), including that the Plan's cash balance formula discriminates against older employees; that the conversion resulted in a wear-away period (when the pre-conversion accrued benefit exceeded the post-conversion benefit); and that the Plan communications contained inaccurate or inadequate disclosures about these conditions.

In 2008, the District Court (1) affirmed the Company's right to convert to a cash balance plan prospectively beginning in 1998; (2) found for plaintiffs on the disclosure claim only; and (3) required the Company to pay pre-1998 benefits under the pre-conversion traditional annuity formula and post-1997 benefits under the post-conversion cash balance formula. From 2008 through 2015, this case has undergone a series of court proceedings that resulted in the original District Court order being largely upheld. In 2015, the Company submitted to the District Court its proposed method for calculating the additional pension benefits due to class members and plaintiffs responded in August 2015.

Since then, there has been continued litigation regarding the calculation of benefits, attorneys' fees, and the administration of the remedy payments. On November 29, 2018, the Court ordered the Pension Plan to pay attorneys' and incentive fees of $32 million, and that the Plan must pay any past due lump sums and back benefits within 90 days of the Order. These payments were made as ordered in December 2018. Barring any new Order by the Court impacting the timing, the Company expects to amend the Plan and commence remedy benefit payments in 2019. Once these events occur, the Plan will reflect the additional remedy benefits ordered by the Court as an increase to the pension liability (see Note 13) and the Company will reduce the remaining litigation reserve accordingly. Management believes that the Company's remaining reserve is adequate as of December 31, 2018.

Litigation related to the Merger. Following announcement of the Company's Merger Agreement with Express Scripts as discussed in Note 3, putative class action complaints (collectively the "complaints") have been filed against Express Scripts and the Express Scripts board of directors. Certain of these complaints also include Cigna, Old Cigna, Cigna Merger Sub and Express Scripts Merger Sub as defendants. The complaints alleged that the registration statement filed in connection with the Merger (and certain amendments thereto) omitted material information in violation of Sections 14(a) and 20(a) of the Exchange Act, rendering the registration statement false and misleading. The parties entered into a settlement agreement in November 2018 and notices of voluntary dismissal have been filed.

Cigna Litigation with Anthem. In February 2017, the Company delivered a notice to Anthem terminating the 2015 merger agreement, and notifying Anthem that it must pay the Company the $1.85 billion reverse termination fee pursuant to the terms of the merger agreement. Also in February 2017, the Company filed suit against Anthem in the Delaware Court of Chancery (the "Chancery Court") seeking declaratory judgments that the Company's termination of the merger agreement was valid and that Anthem was not permitted to extend the termination date. The complaint also sought payment of the reverse termination fee and additional damages in an amount exceeding $13 billion, including the lost premium value to the Company's shareholders caused by Anthem's willful breaches of the merger agreement.

On February 15, 2017, the Chancery Court granted Anthem's motion for a temporary restraining order and temporarily enjoined the Company from terminating the merger agreement. In May 2017, the Chancery Court denied Anthem's motion for a preliminary injunction to enjoin Cigna from terminating the merger agreement but stayed its ruling pending Anthem's determination as to whether to seek an appeal. Anthem subsequently notified Cigna and the Chancery Court that it did not intend to appeal the Chancery Court's decision. As a result, the merger agreement was terminated.

The litigation between the parties remains pending. Trial commenced on February 25, 2019 and we await the outcome. We believe in the merits of our claims and dispute Anthem's claims, and we intend to vigorously defend ourselves and pursue our claims. The outcomes of lawsuits are inherently unpredictable, and we may be unsuccessful in the ongoing litigation or any future claims or litigation.

Express Scripts Litigation with Anthem. In March 2016, Anthem filed a lawsuit in the United States District Court for the Southern District of New York alleging various breach of contract claims against Express Scripts relating to the parties' rights and obligations under the periodic pricing review section of the pharmacy benefit management agreement between the parties, including allegations that Express Scripts failed to negotiate new pricing concessions in good faith, as well as various alleged service issues. Anthem requests the court enter declaratory judgment that Express Scripts is required to provide Anthem competitive benchmark pricing, that Anthem can terminate the agreement, and that Express Scripts is required to provide Anthem with post-termination services at competitive benchmark pricing for one year following any termination by Anthem. Anthem claims it is entitled to $13.0 billion in additional pricing concessions over the remaining term of the agreement as well as $1.8 billion for one year following any contract termination by Anthem, and $150 million in damages for service issues ("Anthem's Allegations"). On April 19, 2016, in response to Anthem's complaint, Express Scripts filed its answer denying Anthem's Allegations in their entirety and asserting affirmative defenses and counterclaims against Anthem. The court subsequently granted Anthem's motion to dismiss

two of six counts of Express Scripts' amended counterclaims. The current scheduling order runs through the completion of summary judgment briefing in December 2019. There is no tentative trial date.

Regulatory Matters

Civil Investigative Demand. The U.S. Department of Justice ("DOJ") is conducting an industry review of Medicare Advantage organizations' risk adjustment practices under Medicare Parts C and D, including medical chart reviews and health exams. The Company is currently responding to information requests (civil investigative demands) received from the DOJ (U.S. Attorney's Offices for the Eastern District of Pennsylvania and the Southern District of New York). We will continue to cooperate with the DOJ's investigation.

Disability claims regulatory matter. During the second quarter of 2013, the Company finalized an agreement with the Departments of Insurance for Maine, Massachusetts, Pennsylvania, Connecticut and California (together, the "monitoring states") related to the Company's long-term disability claims handling practices. The agreement requires primarily: (1) enhanced procedures related to documentation and disposition and (2) a two-year monitoring period followed by a re-examination that began in the second quarter of 2016. Management believes the Company has addressed the requirements of the agreement. If the monitoring states find material non-compliance with the agreement upon re-examination, the Company may be subject to additional costs and penalties or requests to change its business practices that could negatively impact future earnings for this business.

Note 20 Condensed Consolidating Financial Information

Effective with the Merger that closed on December 20, 2018 (see Note 3 for further information) the senior notes issued by Cigna, Old Cigna, Express Scripts, Inc. ("ESI"), Medco Health Solutions, Inc. ("Medco"), and Express Scripts became jointly and severally and fully and unconditionally (subject to certain customary release provisions, including sale, exchange, transfer or liquidation of the guarantor subsidiary) guaranteed by Cigna, Old Cigna, ESI, Medco and Express Scripts, as applicable. Details of these debt obligations are presented in Note 5. The following condensed consolidating financial information has been prepared in accordance with the requirements as prescribed by the SEC in Regulation S-X. The condensed consolidating financial information presented below is not indicative of what the financial position, results of operations or cash flows would have been had each of the entities operated as an independent company during the periods for various reasons, including, but not limited to, intercompany transactions and integration of systems.

The condensed consolidating financial information is presented separately for:

(i) Cigna (the Parent Company), guarantor, the issuer of additional guaranteed obligations;

(ii) Old Cigna (former Parent Company for the fiscal years ended 2017 and 2016), guarantor, the issuer of additional guaranteed obligations;

(iii) Express Scripts, guarantor, the issuer of additional guaranteed obligations;

(iv) ESI, guarantor, the issuer of additional guaranteed obligations;

(v) Medco, guarantor, the issuer of additional guaranteed obligations;

(vi) Non-guarantor subsidiaries, on a combined basis;

(vii) Consolidating entries and eliminations representing adjustments to (a) eliminate intercompany transactions between or among Cigna, Old Cigna, Express Scripts, ESI, Medco and the non-guarantor subsidiaries, (b) eliminate the investments in our subsidiaries and (c) record consolidating entries; and

(viii) Cigna and subsidiaries on a consolidated basis.

Note 21 Segment Information

See Note 1 for a description of our segments. Effective with the fourth quarter of 2018, the Company uses adjusted income from operations on a before-tax basis as its principal financial measure of segment operating performance. Prior year segment information has been adjusted to reflect this change and a description of our basis for reporting segment operating results is outlined below. Intersegment transactions primarily reflect home delivery pharmacy sales to insured customers of the Integrated Medical segment. These transactions are eliminated in consolidation.

The Company uses "pre-tax adjusted income from operations" as its principal financial measure of segment operating performance because management believes it best reflects the underlying results of business operations and permits analysis of trends in underlying revenue, expenses and profitability. Pre-tax adjusted income from operations is defined as income before taxes excluding realized investment results, amortization of acquired intangible assets, results of transitioning clients and special items. Income or expense amounts that are excluded from adjusted income from operations because they are not indicative of underlying performance or the responsibility of operating segment management include:

- Realized investment gains (losses), including changes in market values of certain financial instruments between balance sheet dates, as well as gains and losses associated with invested asset sales
- Amortization of acquired intangible assets, because these relate to costs incurred for acquisitions
- Results of transitioning clients, because those results are not indicative of ongoing results
- Special items, if any, that management believes are not representative of the underlying results of operations due to the nature or size of these matters. Further context about these items is provided in the footnotes listed in the table below.

The following table presents the special items recorded by the Company for the years ended December 31, 2018, 2017 and 2016.

(In millions)

Description of Special Item Charges (Benefits) and Financial Statement Line Item(s)	After-tax	Before-tax
Year ended December 31, 2018

Total revenues from external customers	**$ 47,170**	$ 40,580	$ 38,691

Foreign and U.S. revenues from external customers for the three years ended December 31 are shown below. The Company's foreign revenues are generated by its foreign operating entities. In the periods shown, no foreign country contributed more than 5% of consolidated revenues from external customers.

(In millions)	2018	2017	2016
United States	**$ 42,773**	$ 36,555	$ 35,011
South Korea	**2,093**	1,892	1,666
All other foreign countries	**2,304**	2,133	2,014
Total	**$ 47,170**	$ 40,580	$ 38,691

Revenues from CMS were 16% of consolidated revenues in 2018 and 2017, compared with 19% in 2016. These amounts were reported in the Integrated Medical segment.

Quarterly Financial Data *(unaudited)*

The following unaudited quarterly financial data is presented on a consolidated basis for each of the years ended December 31, 2018 and December 31, 2017. Quarterly financial results necessarily rely heavily on estimates. This and certain other factors, such as the seasonal nature of portions of the insurance business, suggest the need to exercise caution in drawing specific conclusions from quarterly consolidated results.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

ITEM 9A. Controls and Procedures

A. Disclosure Controls and Procedures

Based on an evaluation of the effectiveness of Cigna's disclosure controls and procedures conducted under the supervision and with the participation of Cigna's management, Cigna's Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, Cigna's disclosure controls and procedures are effective to ensure that information required to be disclosed by Cigna in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms.

B. Internal Control Over Financial Reporting

Management's Annual Report on Internal Control over Financial Reporting

Management of Cigna Corporation is responsible for establishing and maintaining adequate internal controls over financial reporting. The Company's internal controls were designed to provide reasonable assurance to the Company's management and Board of Directors that the Company's consolidated published financial statements for external purposes were prepared in accordance with accounting principles generally accepted in the United States. The Company's internal control over financial reporting includes those policies and procedures that:

(i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets and liabilities of the Company;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorization of management and directors of the Company; and

(iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Management assessed the effectiveness of the Company's internal controls over financial reporting as of December 31, 2018. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control-Integrated Framework (2013).* Based on management's assessment and the criteria set forth by COSO, it was determined that the Company's internal controls over financial reporting are effective as of December 31, 2018.

Management's assessment of the effectiveness of internal controls over financial reporting excludes Express Scripts, which was acquired on December 20, 2018 (See Note 3 in the accompanying consolidated financial statements for additional information).

Express Scripts' total assets (excluding goodwill and intangible assets recorded in connection with the acquisition) and total revenues excluded from our assessment of internal control over financial reporting represent approximately 10% and 5%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2018.

The Company's independent registered public accounting firm, PricewaterhouseCoopers LLP, has audited the effectiveness of the Company's internal control over financial reporting, as stated in their report located on page 65 in this Form 10-K.

Change in Internal Control over Financial Reporting

As of December 31, 2018, management is in the process of evaluating and integrating the internal controls of the acquired Express Scripts business into the Company's existing operations. Other than the controls enhanced or implemented to integrate the Express Scripts business, there has been no change in Cigna's internal controls over financial reporting during the year ended December 31, 2018 that has materially affected, or is reasonably likely to affect, Cigna's internal controls over financial reporting.

ITEM 9B. Other Information

None.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance

A. Directors of the Registrant

The information under the captions "Corporate Governance Matters – Process for Director Elections," " – Board of Directors' Nominees" and " – Board Meetings and Committees" (as it relates to Audit Committee disclosure) in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

B. Executive Officers of the Registrant

See PART I – "Executive Officers of the Registrant" on page 38 in this Form 10-K.

C. Code of Ethics and Other Corporate Governance Disclosures

The information under the caption "Corporate Governance Matters – Codes of Ethics" in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

D. Section 16(a) Beneficial Ownership Reporting Compliance

The information under the caption "Ownership of Cigna Common Stock – Section 16(a) Beneficial Ownership Reporting Compliance" in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

ITEM 11. Executive Compensation

The information under the captions "Corporate Governance Matters – Non-Employee Director Compensation," "Compensation Matters – Compensation Discussion and Analysis," " – Report of the People Resources Committee" and " – Executive Compensation Tables" in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table presents information regarding Cigna's equity compensation plans as of December 31, 2018:

Plan Category	(a) [1] Securities To Be Issued Upon Exercise Of Outstanding Options, Warrants And Rights	(b) [2] Weighted Average Exercise Price Per Share Of Outstanding Options, Warrants And Rights	(c) [3] Securities Remaining Available For Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected In Column (a))
Equity Compensation Plans Approved by Security Holders	**15,099,184**	**$ 125.46**	**28,891,766**
Equity Compensation Plans Not Approved by Security Holders	**-**	**-**	**-**
Total	**15,099,184**	**$ 125.46**	**28,891,766**

(1) Includes, in addition to outstanding stock options:
(i) 103,322 restricted stock units, 111,315 deferred shares, and 1,401,071 strategic performance shares that are reported at the maximum 200% payout rate granted under the Cigna Long-Term Incentive Plan, the Corporation Stock Plan, and the Cigna Corporation Director Equity Plan;
(ii) 140,744 shares of common stock underlying stock option awards granted under the HealthSpring, Inc. Amended and Restated 2006 Equity Incentive Plan which was approved by HealthSpring, Inc.'s shareholders before Cigna's acquisition of HealthSpring, Inc. in January 2012; and
(iii) 897,338 shares of common stock underlying stock option awards and 1,013,890 restricted stock units granted under the Express Scripts Holding Company 2016 Long-Term Incentive Plan, 8,758 deferred shares granted under the Express Scripts, Inc. Executive Deferred Compensation Plan of 2005, 2,877,922 shares of common stock underlying stock option awards and 63,904 restricted stock units granted under the Express Scripts, Inc. 2011 Long-Term Incentive Plan, 2,249,731 shares of common stock underlying stock option awards and 26,238 restricted stock units granted under the Medco Health Solutions, Inc. 2002 Stock Incentive Plan, and 119,948 shares of common stock underlying stock option awards granted under the Accredo Health, Incorporated 2002 Long-Term Incentive Plan, which were all approved by the applicable company's shareholders before Cigna's acquisition of Express Scripts in December 2018.

(2) The weighted-average exercise price is based only on outstanding stock options. The outstanding stock options assumed due to Cigna's acquisition of HealthSpring, Inc. have a weighted-average exercise price of $22.45. The outstanding stock options assumed due to Cigna's acquisition of Express Scripts, in aggregate, have a weighted-average exercise price of $135.57. Excluding the assumed options from these acquisitions results in a weighted-average exercise price of $117.64.

(3) Includes 239,222 shares of common stock available as of the close of business December 31, 2018 for future issuance under the Cigna Corporation Director Equity Plan, 25,838,360 shares of common stock available as of the close of business on December 31, 2018 for future issuance under the Cigna Long-Term Incentive Plan, which includes 13,120,666 shares of common stock available assumed from the Express Scripts, Inc. 2016 Long-Term Incentive Plan, and 2,814,184 shares of common stock available as of the close of business December 31, 2018 for future issuance under the Express Scripts, Inc. Executive Deferred Compensation Plan of 2005. Because no further grants may be made under the HealthSpring, Inc. Amended and Restated 2006 Equity Incentive Plan, the Express Scripts, Inc. 2016 Long-Term Incentive Plan, the Express Scripts, Inc. 2011 Long-Term Incentive Plan, the Medco Health Solutions, Inc. 2002 Stock Incentive Plan, and the Accredo Health, Incorporated 2002 Long-Term Incentive Plan, shares available for issuance under these plans are not included.

The information under the captions "Ownership of Cigna Common Stock – Stock Held by Directors, Nominees and Executive Officers" and "Ownership of Cigna Common Stock – Stock Held by Certain Beneficial Owners" in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

ITEM 13. Certain Relationships and Related Transactions, and Director Independence

The information under the captions "Corporate Governance Matters – Director Independence" and " – Certain Transactions" in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

ITEM 14. Principal Accountant Fees and Services

The information under the captions "Audit Matters – Policy for the Pre-Approval of Audit and Non-Audit Services" and " – Fees to Independent Registered Public Accounting Firm" in Cigna's definitive proxy statement related to the 2019 annual meeting of shareholders is incorporated by reference.

PART IV

ITEM 15. Exhibits and Financial Statement Schedules

(a) (1) The following Financial Statements appear on pages 65 through 129:

Report of Independent Registered Public Accounting Firm.

Consolidated Statements of Income for the years ended December 31, 2018, 2017 and 2016.

Consolidated Statements of Comprehensive Income for the years ended December 31, 2018, 2017 and 2016.

Consolidated Balance Sheets as of December 31, 2018 and 2017.

Consolidated Statements of Changes in Total Equity for the years ended December 31, 2018, 2017 and 2016.

Consolidated Statements of Cash Flows for the years ended December 31, 2018, 2017 and 2016.

Notes to the Consolidated Financial Statements.

(2) The financial statement schedules are listed in the Index to Financial Statement Schedules on page FS-1.

(b) The exhibits listed in the accompanying "Index to Exhibits" in this Item 15 are filed or incorporated by reference as part of this Annual Report on Form 10-K.

Index to Exhibits

INDEX TO FINANCIAL STATEMENT SCHEDULES

Schedules other than those listed above are omitted because they are not required or are not applicable, or the required information is shown in the financial statements or notes thereto.

Report of Independent Registered Public Accounting Firm on Financial Statement Schedules

To the Board of Directors and Shareholders of Cigna Corporation

Our audits of the consolidated financial statements referred to in our report dated February 28, 2019 (which report and consolidated financial statements are included under Item 8 in this Annual Report on Form 10-K) also included an audit of the financial statement schedules listed in Item 15(a)(2) of this Form 10-K. In our opinion, these financial statement schedules present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

* *As described in Note 3, on December 20, 2018, through the "Merger," Old Cigna merged into a wholly-owned subsidiary of Cigna, and Cigna became the Registrant. Refer to Note 20 for Condensed Consolidated Financial Statements of Cigna and Old Cigna.*

Cigna Corporation and Subsidiaries
Schedule I – Condensed Financial Information of Cigna Corporation (Registrant)

Notes to Condensed Financial Statements

The accompanying condensed financial statements should be read in conjunction with the Consolidated Financial Statements and the accompanying notes thereto contained in this Annual Report on Form 10-K ("Form 10-K").

Note 1 – For purposes of these condensed financial statements, Cigna Corporation's (the "Company") wholly-owned and majority-owned subsidiaries are recorded using the equity basis of accounting.

Note 2 – See Note 5 – Debt included in Part II, Item 8 of this Form 10-K for a description of the short-term and long-term debt obligations of Cigna Corporation and its subsidiaries. Maturity of the Company's long-term debt is as follows:

(In millions)		
2019	$	—
2020	$	2,750
2021	$	5,250
2022	$	—
2023	$	3,800
Maturities after 2023	$	11,200

Note 3 – Intercompany liabilities of the Company consist primarily of payables to Old Cigna of $4.3 billion as of December 31, 2018. Intercompany liabilities of Old Cigna consisted primarily of payables to Cigna Holdings, Inc. of $2.8 billion as of December 31, 2017. Interest was accrued at an average monthly rate of 2.33% for 2018 and 1.47% for 2017.

Note 4 – The Company had guarantees of approximately $19.6 billion as of December 31, 2018. These guarantees are related to outstanding debt of certain wholly-owned subsidiaries as described in Note 5 and Note 20. In 2018, no payments have been made on these guarantees.

Cigna Corporation and Subsidiaries
Schedule II – Valuation and Qualifying Accounts and Reserves

EXHIBIT 23 Consent of Independent Registered Public Accounting Firm

We hereby consent to the incorporation by reference in the Registration Statements on Form S-8 (Nos. 333-228930 and 333-228931) of Cigna Corporation of our reports dated February 28, 2019 relating to the financial statements and financial statement schedules and the effectiveness of internal control over financial reporting, which appear in this Form 10-K.

/s/ PricewaterhouseCoopers LLP
Hartford, Connecticut
February 28, 2019

EXHIBIT 31.1 Certification

I, DAVID M. CORDANI, certify that:

1. I have reviewed this Annual Report on Form 10-K of Cigna Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Independent Auditors' Report

To the Members of Firstsource Solutions Limited

Report on the standalone financial statements

We have audited the accompanying standalone financial statements of Firstsource Transaction Services LLC ("the Company"), which comprise the balance sheet as at 31 March 2016, the statement of profit and loss, the cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the standalone financial statements").

Management's responsibility for the standalone financial statements

These financial statements are prepared to comply with the requirements of Sec 136 of the Companies Act, 2013 and are the responsibility of the management. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone financial statements based on our audit. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made there under. We conducted our audit in accordance with the Standards to comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

Independent Auditors' Report *(Continued)*

Auditor's Responsibility (Continued)

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2016 and its profit and its cash flows for the year ended on that date.

Firstsource Transaction Services LLC

Notes to the accounts
for the year ended at 31 March 2016

1 Background

Firstsource Transaction Services LLC ('the Company') was incorporated under the laws of the State of Delaware on 26 May 2011. The Company provides contact centre and transaction processing services for customers in the financial services, telecommunications and healthcare industry. The Company is a wholly owned subsidiary of MedAssist Holding, Inc. who holds the voting rights in the Company.

2 Significant accounting policies

2.1 Basis of preparation

The financial statements of the Company have been prepared under the historical cost convention, on accrual basis of accounting principles generally accepted in India. The Balance Sheet and Statement of Profit and Loss of the Company has been drawn up in the country of its incorporation (United States of America) in the terms of United State Dollars ('USD'). However, for the purpose of compliance with the requirements of Section 129 (3) of the Companies Act 2013,amounts in these financial statements have been translated into Indian rupees at the closing rate on 31 March 2016 which is 1 USD = Rs 66.255 (31st Mar 2015 which was 1 USD = Rs. 62.5). No representation is made that USD amounts have been, could have been or could be converted into Indian rupees at such a rate.

2.2 Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles ('GAAP') in India requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent liabilities on the date of the financial statements. Management believes that the estimates made in the preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

2.3 Revenue recognition

Revenue from contact centre and transaction processing services comprises from both time/unit price and fixed fee based service contracts. Revenue from time/ unit price based contracts is recognized on completion of the related services and is billed in accordance with the contractual terms specified in the respective customer contracts. Revenue from fixed fee based service contracts is recognized on achievement of performance milestones specified in the customer contracts.

Unbilled receivables represent costs incurred and revenues recognized on contracts to be billed in subsequent periods as per the terms of the contract.

Interest income is recognized using the time proportion method, based on the underlying interest rates.

2 Significant accounting policies *(Continued)*

2.4 Fixed assets and depreciation

Fixed assets are stated at cost less accumulated depreciation. Cost includes freight, duties, taxes and incidental expenses related to acquisition and installation of the fixed assets. Depreciation on fixed assets is provided, using the straight line basis, pro rata to the period of use based on management's best estimate of useful lives of the assets (which are shorter than those prescribed under the Companies Act, 1956) as summarized below:

Asset	Useful life (in years)
Intangible	
Software*	2 - 4
Tangible	
Leasehold improvements*	5 or Lease term which ever is shorter
Computers*	2 - 4
Furniture & Fixtures*	2 - 5
Networks/Service Equipments*	2 - 5
Vehicles*	2 - 5
Office Equipments*	2 - 5

*For these class of assets, based on internal assessment and independent technical evaluation carried out by external values, the management believes that the useful lives as given above best represent the period over which management expects to use these assets. Hence the useful lives for these assets is different from the useful lives as prescribed under Part C of Schedule II to the Companies Act, 2013

Software purchased together with the related hardware is capitalized and depreciated at the rates applicable to related assets.

2.5 Impairment of assets

a) Financial assets

The Group assesses at each balance sheet date whether there is any objective evidence that a financial asset or group of financial assets is impaired. If any such indication exists, the Group estimates the amount of impairment loss. The amount of loss for short-term receivables is measured as the difference between the assets carrying amount and undiscounted amount of future cash flows. Reduction, if any, is recognized in the statement of profit and loss account. If at the balance sheet date there is any indication that a previously assessed impairment loss no longer exists, the recognized impairment loss is reversed, subject to maximum of initial carrying amount of the short-term receivable.

b) Non-financial assets

The Group assesses at each balance sheet date whether there is any indication that a non financial asset including goodwill may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss account. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of depreciated historical cost.

2 Significant accounting policies *(Continued)*

2.6 Foreign currency transactions

Transactions in foreign currency are recorded at the exchange rate prevailing on the date of the transaction. Net exchange gain or loss resulting in respect of foreign exchange transactions settled during the period is, recognized in the statement of profit and loss. Foreign currency denominated assets and liabilities other than fixed assets at year end are translated at the year end exchange rates and the resulting net gain or loss is recognized in the statement of profit and loss. Non Monetary assets are carried at historical cost.

2.7 Taxation

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income-tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year). The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future. The tax liability is computed on a consolidated basis and hence the tax liabilities for the company have been included in the financial statements of the parent company i.e. Firstsource Group USA, Inc.

2.8 Provisions and Contingencies

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each Balance Sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

2.9 Leases

Operating lease

Lease rentals in respect of assets acquired under operating lease are charged off to the statement of profit and loss account as incurred.

2.10 Investments

Investments are classified into non-current investments and current investments. Investments which are intended to be held for one year or more are classified as non-current investments and investments which are intended to be held for less than one year are classified as current investments.

2. Significant accounting policies (Continued)

2.10 Investments (Continued)

Non-current investments are carried at cost less other than any temporary diminution in value, determined separately for each investment.

Current investments are carried at lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investment. In case of investments in mutual funds, the net asset value of units declared by the mutual funds is considered as the fair value

2.11 Employee benefits

Defined Contribution Plans

The Companies having a savings and investment plan under section 401 (K) of the internal revenue code of the United States of America. This is a Defined Contribution plan. Contribution made under the plan are charged to the statement of Profit and loss in the period in which that accure. Other retirement benefits are accrued based on the amounts payable as per local regulations.

Contributions payable to the social security, medicare and other employee related contributions as required under the State of New york are charged to the statement of profit and loss.

Other long term employee benefits

Compensated absences

Provision for compensated absences cost has been made based on eligible vacation balances at balance sheet date.

Where employees of the Company are entitled to compensated absences, the employees can carry-forward a portion of the unutilized accrued compensated absence and utilise it in future periods or receive cash compensation at termination of employment for the unutilised accrued compensated absence. The Company records an obligation for compensated absences in the period in which the employee renders the services that increase this entitlement.

The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated as at the balance sheet date.

2.11 *Earnings per share*

The basic earnings per equity share are computed by dividing the net profit or loss for the period attributable to the equity shareholders for the period by the weighted average number of equity shares outstanding during the period. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share, and also the weighted average number of equity shares which may be issued on the conversion of all dilutive potential shares, unless the results would be anti-dilutive.

18. Leases

Operating Lease

The Company has taken office facilities under non-cancelable operating leases. The Company intends to renew such leases in the normal course of its business. Rental expenses under non-cancelable operating leases aggregating to Rs.64,697,700 equivalent to USD 976,495 (31 March 2015: Rs.89,761,015 equivalent to USD 1,354,781) have been debited to the profit and loss account.

The future minimum lease payments in respect of non-cancelable operating leases are as follows:

	Amount in Rupees		Amount in USD	
	2016	2015	**2016**	2015
Amount due within one year from the balance sheet date	**36,867,043**	95,137,277	**556,442**	1,435,926
Amount due in the period between one year and five years	**10,726,649**	117,781,116	**161,899**	1,777,694
	47,593,692	212,918,393	**718,341**	3,213,620

Rental expenses under cancelable operating leases aggregating to Rs.155,036,076 equivalent to USD 2,33,9991 (31 March 2015: Rs. 6,795,480 equivalent to USD 102,566) have been debited to the profit and loss account.

19. Transfer pricing

The Company's management is of the opinion that its international transactions with related parties are at arms length and that the Company is in compliance with the transfer pricing legislation. Accordingly, the company's management believes that the transfer pricing legislation will not have any impact on the financial statements for the year ended 31 March 2016, particularly on the amount of tax expense and that of the provision for taxation.

20. Capital commitments

The Company has capital commitments of Rs.90,369,368 in USD 1,363,963 (31 March 2015: Rs. 3,636,935 in USD 54,893) as at the balance sheet date.

Notes to the accounts
as at 31 March 2016

23. EPS

As the company is incorporated under the laws of the State of Delaware, USA . As per Country's laws, company is having voting control & there is no share capital. Earning per share is not calculated in the absence of share capital.

24. Contingent liabilities

The Company has no contingent liabilities as at the balance sheet date Nil (31 March 2015: Nil).

25. Related Party Transactions

Details of related parties including summary of transactions entered into during the year ended 31 March 2016 are summarized below:

Ultimate Holding Company	• Firstsource Solutions Ltd
Holding Company	• MedAssist Holding, LLC
Parties with substantial interests	
	• Firstsource Group USA Inc.
	• Firstsource Advantage LLC
	• Firstsource Solution UK Limited

Independent Auditor's Report

To the Members of Firstsource Solutions Ltd.

Report on the standalone financial statements

We have audited the accompanying standalone financial statements of Firstsource Transactions Services LLC ("the Company"), which comprise the balance sheet as at 31 March 2017, the statement of profit and loss (including other comprehensive income), the statement of cash flows and the statement of changes in equity for the year then ended and a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the standalone financial statements").

Management's responsibility for the standalone financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Act, read with relevant rules issued there under. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these standalone financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the standalone financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the standalone financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error. In making those risk assessments,

Shelesh Singhvi & Co. Chartered Accountants Mumbai

Independent Auditors' Report *(Continued)*

Auditor's responsibility *(Continued)*

the auditor considers internal financial control relevant to the Company's preparation of the standalone financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Board of Directors, as well as evaluating the overall presentation of the standalone financial statements.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including the Ind AS, of the financial position of the Company as at 31 March 2017 and its financial performance including other comprehensive income, its cash flows and the changes in equity for the year then ended.

1 Company overview

Firstsource Transaction Services LLC ('the Company') was incorporated under the laws of the State of Delaware on 26 May 2011. The Company provides contact centre and transaction processing services for customers in the financial services, telecommunications and healthcare industry. The Company is a wholly owned subsidiary of MedAssist Holding, Inc. who holds the voting rights in the Company.

2 Significant accounting policies

2.1 *Basis of Preparation and Statement of compliance with IND AS*

The Company has adopted all the Ind AS standards and the adoption was carried out in accordance with Ind AS 101 - First time adoption of Indian Accounting Standards. The transition was carried out from Indian Accounting Principles generally accepted in India as prescribed under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014 (IGAAP), which was the previous GAAP. Reconciliations and description of the effects of the transition have been summarized in Note 3.

In accordance with the notification dated February 16, 2015, issued by the Ministry of Corporate Affairs, the Ultimate Holding Company has adopted Indian Accounting Standards(IND AS) notified under Sec 133 read with Rule 4A of the Company (Indian Accounting Standards) Rules, 2015 and the relevant provisions of the Companies Act, 2013 (Collectively, IND AS), with effect from April 1, 2016 and is required to prepare its financial statements in accordance with Ind AS for the year ended March 31, 2017. Accordingly as per the requirements of Section 129(3) of the Act, these financial statements of the Company has been prepared in the same form and manner as that of its Ultimate Holding Company.

The financial statements the Company have been prepared under the historical cost convention, on accrual basis of accounting principles generally accepted in India. The Balance Sheet and Statement of profit and loss of the Company has been drawn up in the country of its incorporation (United States of America) in the terms of United States Dollar ('USD').

2.2 *Use of estimates*

The preparation of the financial statements in conformity with Ind AS requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities on the date of the financial statements and the reported amount of income and expenses for the period. Management believes that the estimates made in the preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates. Any revisions to accounting estimates are recognised prospectively in current and future periods. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed.

2.3.1 *Critical accounting estimates*

Property, plant and equipment

The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The useful lives and residual values of the Company's assets are determined by management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

2.4 *Revenue recognition*

Revenue from contact centre and transaction processing services comprises from both time/unit price and fixed fee based service contracts. Revenue from time/unit price based contracts is recognised on completion of the related service and is billed in accordance with contractual terms specified in the respective customer contracts.
Customer contracts. Revenue from fixed fee based service contracts is recognized on achievement of performance milestones specified in the customer contracts.

Unbilled receivables represent costs incurred and revenues recognized on contracts to be billed in subsequent periods as per the terms of the contract.

Dividend income is recognized when the right to receive dividend is established.

Interest income is recognized using the time proportion method, based on the underlying interest rates.

2 Significant accounting policies *(continued)*

2.5 Property, plant and equipment

Asset category	Useful life (in years)
Tangible assets	
Leasehold improvements	Lease term or 5 years, whichever is shorter
Computers*	2 – 4
Service equipment*	2 – 5
Furniture and fixtures*	2 – 5
Office equipment*	2 – 5
Vehicles	2 – 5
Intangible assets	
Software*	2 – 4

* For these class of assets, based on internal assessment and independent technical evaluation carried out by external valuers, the management believes that the useful lives as given above best represent the period over which management expects to use these assets. Hence the useful lives for these assets is different from the useful lives as prescribed under Part C of Schedule II to the Companies Act, 2013.

Depreciation methods, useful lives and residual values are reviewed periodically at the end of each financial year.
The Company has elected to apply fair value method on transition for Leasehold improvements as permitted under Ind AS 16 - Property, plant and equipments.

2.6 Impairment

a. Financial assets

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit and loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

b. Non-financial assets

i Intangible assets and property, plant and equipment

Intangible assets and property, plant and equipment are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the CGU to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the statement of profit and loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

2.7 Foreign Currency transactions

Transactions in foreign currency are recorded at the exchange rate prevailing on the date of the transaction. Net exchange gain or loss resulting in respect of foreign exchange transactions settled during the period is, recognized in the statement of profit and loss. Foreign currency denominated assets and liabilities other than fixed assets at year end are translated at the year end exchange rates and the resulting net gain or loss is recognized in the statement of profit and loss. Non Monetary assets are carried at historical cost.

2 Significant accounting policies *(continued)*

2.8 Taxation

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income-tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year). The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future. The tax liability (Income tax and deferred tax) is computed on a consolidated basis and hence the tax liabilities for the company have been included in the financial statements of the parent company fe Firstsource Group USA, Inc.

2.9 Employee benefits

Defined contribution plans

The Companies having a savings and investment plan under section 401 (K) of the internal revenue code of the United States of America. This is a Defined Contribution plan. Contribution made under the plan are charged to the statement of Profit and loss in the period in which that accure. Other retirement benefits are accrued based on the amounts payable as per local regulations.

Contributions payable to the social security, medicare and other employee related contributions as required under the State of New york are charged to the statement of profit and loss.

Other long-term employee benefits

Compensated absences

Provision for compensated absences cost has been made based on eligible vacation balances at balance sheet date.

Where employees of the Company are entitled to compensated absences, the employees can carry-forward a portion of the unutilized accrued compensated absence and utilise it in future periods or receive cash compensation at termination of employment for the unutilised accrued compensated absence. The Company records an obligation for compensated absences in the period in which the employee renders the services that increase this entitlement.

2.10 Leases

Finance leave

Assets acquired on finance leases, including assets acquired under sale and lease back transactions, have been recognised as an asset and a liability at the inception of the lease and have been recorded at an amount equal to the lower of the fair value of the leased asset or the present value of the future minimum lease payments. Such leased assets are depreciated over the lease term or its estimated useful life, whichever is shorter. Further, the instalments of minimum lease payments have been apportioned between finance charge / expense and principal repayment. Assets given on finance lease are shown as amounts recoverable from the lessee. The rentals received on such leases are apportioned between the finance income and principal amount using the implicit rate of return.

The finance charge / (income) is recognised as income, and principal received is reduced from the amount receivable. All initial direct costs incurred are included in the cost of the asset.

Operating lease

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating lease. Operating lease payments are recognised on a straight line basis over the lease term, unless the increase is on account of inflation, in the statement of profit and loss.

2 Significant accounting policies *(continued)*

2.11 Earnings per equity share

The basic earnings per equity share is computed by dividing the net profit or loss for the period attributable to the equity shareholders by the weighted average number of equity shares outstanding during the reporting period. The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share, and also the weighted average number of equity shares which may be issued on the conversion of all dilutive potential shares, unless the results would be anti-dilutive.

2.12 Provisions and contingencies

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

2.13 Financial instruments

2.13.1 Initial recognition

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

a) Non-derivative financial instruments

i) Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

2.13.2 Classification and subsequent measurement

i) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

ii) Financial assets at fair value through other comprehensive income ('FVOCI')

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.The Company has made an irrevocable election to present in other comprehensive income subsequent changes in the fair value of equity investments not held for trading.

iii) Financial assets at fair value through profit and loss ('FVTPL')

Financial assets are measured at fair value through profit and loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit and loss are immediately recognised in statement of profit and loss.

2 **Significant accounting policies** *(continued)*

2.13 Financial instruments (continued)

2.13.2 Classification and subsequent measurement (continued)

iv) Financial liabilities

Financial liabilities are measured at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amount approximate fair value to short-term maturity of these instruments

v) Equity instruments

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments are recognised by the Company at the proceeds received net of direct issue cost.

b) Share capital

Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options are recognized as a deduction from equity, net of any tax effects.

De-recognition of financial instruments

The Company de-recognises a financial asset when the contractual rights to the cash flows from the financial assets expire or it transfers the financial assets and such transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of financial liability) is de-recognised from the Company's balance sheet when obligation specified in the contract is discharged or cancelled or expired.

Fair value of financial instrument

In determining the fair value of its financial instrument, the Company uses the methods and assumptions based on market conditions and risk existing at each reporting date. Methods of assessing fair value result in general approximation of value, and such value may never actually be realized. For all other financial instruments, the carrying amounts approximate the fair value due to short maturity of those instruments.

2.14 Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

2.15 Onerous contracts

Provisions for onerous contracts are recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at lower of the expected cost of terminating the contract and the expected net cost of fulfilling the contract.

3) First-time adoption of Ind AS

These financial statements of Firstsource Transaction Services LLC for the year ended 31 March 2017 have been prepared in accordance with Ind AS. For the purposes of transition to Ind AS, the Company has followed the guidance prescribed in Ind AS 101 - First Time adoption of Indian Accounting Standard, with 1 April 2015 as the transition date and IGAAP as the previous GAAP.

The transition to Ind AS has resulted in changes in the presentation of the financial statements, disclosures in the notes thereto and accounting policies and principles. The accounting policies set out in note 2 have been applied in preparing the financial statements for the year ended 31 March 2017 and the comparative information. An explanation of how the transition from IGAAP to Ind AS has affected the Company's balance sheet and statement of profit and loss is set out in Notes 3.1 and 3.2.

3.1) Reconciliation of equity as previously reported under IGAAP to Ind AS

Total	730,131	-	-	730,131	730,131

19) **Financial instruments** *(continued)*

II. Financial risk management:

The Company operates in the US and there is no major transactions outside the US, so there is no major market risk for the Company.

b) **Credit Risk**

Credit risk refers to the risk of default on its obligation by the counterparty resulting in a financial loss. The maximum exposure to the credit risk at the reporting date is primarily from trade receivables amounting to USD 10,339,400, USD 12,138,398 and USD 12,344,920 as of 31 March 2017, 31 March 2016 and 1 April 2015 respectively and unbilled revenue amounting to USD 483,685, USD 72,539 and USD 60,994 as of 31 March 2017, 31 March 2016 and 1 April 2015, respectively. Trade receivables and unbilled revenue are typically unsecured and are derived from revenue earned from customers primarily located in the United States. Credit risk has always been managed by the Company by continuously monitoring the credit worthiness of customers to which the Company grants credit terms in the normal course of business.

c) **Liquidity Risk**

Liquidity risk is the risk that the company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to manage liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

The table below provides details regarding the contractual maturities of significant financial liabilities as of 31 March 2017, 31 March 2016 and 1 April 2015:

	31 March 2017		31 March 2016		01 April 2015	
	Less than 1 Year	More than 1 year	Less than 1 Year	More than 1 year	Less than 1 Year	More than 1 year
Trade payables	690,101	-	645,750	-	725,197	-
Other borrowings	2,215	-	5,585	1,718	6,637	4,934
Book credit in bank account	261,655	-	-	-		-

20) **Leases**

Operating lease

The Company is obligated under Cancellable operating leases for office space and office equipment which are renewable on a periodic basis at the option of both the lessor and lessee. Expenses under cancellable operating leases for the year ended 31 March 2017 aggregated to USD 2,606,761 (31 March 2016: USD 1,897,139).Expenses under non-cancellable operating leases for the year ended 31 March 2017 is Nil.

21) Related party transactions

22) Segment reporting

As per Ind AS 108 - Operating Segment, if a financial report contains both consolidated financial statements of a parent that is within the scope of this Ind AS as well as the parent's separate financial statements, segment information is required only in the consolidated financial statements. Accordingly, information required to be presented under Ind AS 108 - Operating Segment has been given in the consolidated financial statements of the Ultimate Holding Company.

23) Capital and other commitments and contingent liabilities

The Company has capital commitments of USD 49,425 (31 March 2016: USD 1,363,963) as at the balance sheet date. Their are no contingent liabilities as at the balance sheet date.

24) Long-term contracts

The Company has a process whereby periodically all long-term contracts (including derivative contracts) are assessed for material foreseeable losses. At the period end, the Company has reviewed and ensured that adequate provision as required under any law / Accounting Standards for material foreseeable losses on such long term contracts (including derivative contracts) has been made in the books of account.

25) Subsequent events

The Board of directors at its meeting held on 5 May 2017 approved the financial statements of the company for the year ended 31 March 2017. The company evaluated subsequent events from the balance sheet date through 5 May 2017 and determined there are no material items to report.

As per our report of even date attached.

Firstsource Transaction Services LLC

Notes to the financial statements
for the year ended 31 March 2018
(Currency: In US Dollar)

1 Company overview

Firstsource Transaction Services LLC ('the Company') was incorporated under the laws of the State of Delaware on 26 May 2011. The Company provides contact centre and transaction processing services for customers in the financial services, telecommunications and healthcare industry. The Company is a wholly owned subsidiary of MedAssist Holding, Inc. who holds the voting rights in the Company.

Basis of Preparation and Statement of Compliance

The special purpose financial statements are prepared in accordance with Indian Accounting Standards (Ind AS), under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values and the provisions of the Companies Act, 2013 (the 'Act') (to the extend notified). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016 (the 'Rules').

These special purpose financial statements have been prepared for the limited purpose of facilitating the preparation of the consolidated financial statements of Firstsource Solutions Limited, the Holding Company, as at and for the year ended March 31, 2018 in accordance with Generally Accepted Accounting Principles in India ('Indian GAAP') and to assist the Holding Company Firstsource Solutions Limited to comply with the requirements of section 129(3) of the Act.

These special purpose financial statements were approved by the Board of Directors of Firstsource Solutions Limited the Holding Company, and authorised for issue on 7 May 2018.

2 Significant accounting policies

2.1 Use of estimates

The preparation of the financial statements in conformity with Ind AS requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities on the date of the financial statements and the reported amount of income and expenses for the period. Management believes that the estimates made in the preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates. Any revisions to accounting estimates are recognised prospectively in current and future periods. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed in Note 2.1.1.

2.1.1 Critical accounting estimates

Income taxes

The Company's major tax jurisdiction is United States of America. Significant judgments are involved in determining the provision for income taxes, including amount expected to be paid / recovered for uncertain tax positions. Also refer to Note 2.5.

Property, plant and equipment and Intangible assets

The charge in respect of periodic depreciation/amortisation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The useful lives and residual values of the Company's assets are determined by management at the time the asset is acquired and reviewed periodically, including at each financial year end. The lives are based on historical experience with similar assets as well as anticipation of future events, which may impact their life, such as changes in technology.

2 Significant accounting policies *(continued)*

2.2 Revenue recognition

Revenue from contact centre and transaction processing services comprises from both time / unit price and fixed fee based service contracts. Revenue from time / unit price based contracts is recognised as services are rendered and is billed in accordance with the contractual terms specified in the customer contracts. Revenue from fixed fee based service contracts is recognised on achievement of performance milestones specified in the customer contracts. Unbilled receivables represent costs incurred and revenues recognised on contracts to be billed in subsequent periods as per the terms of the contract.

Dividend income is recognised when the right to receive dividend is established.

For all instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses.

2.3 Property, plant and equipment and Intangible assets

Property, plant and equipment and Intangible are stated at cost less accumulated depreciation / amortisation and impairment, if any. Cost includes freight, duties, taxes and incidental expenses related to acquisition and installation of the property, plant and equipment. Depreciation on Property, plant and equipment and intangible assets is provided pro-rata to the period of use based on management's best estimate of useful lives of the assets as summarized below:

Asset category	**Useful life (in years)**
Tangible assets	
Leasehold improvements	Lease term or 5 years, whichever is shorter
Service equipment*	2 – 5
Computers*	2 – 4
Vehicles	2 – 5
Office equipment*	2 – 5
Furniture and fixtures*	2 – 5
Intangible assets	
Software*	2 – 4

* For these class of assets, based on internal assessment and independent technical evaluation carried out by external valuers, the management believes that the useful lives as given above best represent the period over which management expects to use these assets. Hence the useful lives for these assets is different from the useful lives as prescribed under Part C of Schedule II to the Companies Act, 2013.

Depreciation and amortisation methods, useful lives and residual values are reviewed periodically at the end of each financial year.

Borrowing costs are interest and other costs (including exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred by the Company in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of those property, plant and equipment which necessarily take a substantial period of time to get ready for their intended use are capitalised. Other borrowing costs are recognised as an expense in the period in which they are incurred.

2.4 Impairment

a. Financial assets

The Company recognises loss allowances using the expected credit loss ('ECL') model for the financial assets which are not fair valued through profit and loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL.For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

2 Significant accounting policies *(continued)*

b. Non-financial assets

i Property, plant and equipment and Intangible assets

Property, plant and equipment and Intangible assets are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognised for the asset in prior years.

***2.5* Income taxes**

Current income taxes
Income-tax expense comprises current tax (i.e. amount of tax for the year determined in accordance with the income-tax law) and deferred tax charge or credit (reflecting the tax effects of timing differences between accounting income and taxable income for the year). The deferred tax charge or credit and the corresponding deferred tax liabilities or assets are recongised using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available aganist which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be recongised.

The income tax liability and deferred tax asset and liability is computed on combined basis for all subsidiaries of First Source Solutions Limited operating in the United States of America.

The Income tax liability and Deferred Tax Asset and Liability are computed on a combined basis and a combined tax return is filed for all subsidiaries of Firstsource Solutions Limited operating in the United States of America and the charge, the asset and the liability is accounted on a combined basis by Firstsource Group USA, Inc. (parent company in the United States of America) in its financial statements. Deferred Tax Asset and Liability and Income tax charge accounted in these Special Purpose Financial Statements relate only to the pre-acquisition period and adjustments thereof.

2 Significant accounting policies *(continued)*

2.6 Foreign Currency transactions

Functional currency

The functional currency of the Company is the US Dollar (USD).

Transactions and translations
Foreign currency denominated monetary assets and liabilities are translated into the relevant functional currency at exchange rates in effect at the balance sheet date. The gains or losses resulting from such translations are included in net profit in the statement of profit and loss. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at fair value are translated at the exchange rate prevalent at the date when the fair value was determined. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

Gains or losses realised upon settlement of foreign currency transactions are included in determining net profit for the period in which the transaction is settled. Revenue, expense and cash flow items denominated in foreign currencies are translated into the relevant functional currencies using the exchange rate in effect on the date of the transaction.

2.7 Employee benefits

Defined contribution plans

The Companies having a savings and investment plan under section 401 (k) of the internal revenue code of the United States of America. This is a Defined Contribution plan. Contributions made under the plan are charged to the Statement of profit and loss in the period in which they accrue. The Company has no further obligation to the plan beyond its monthly contributions. Other retirement benefits, including social security and medicare are accrued based on the amounts payable as per local regulations.

Compensated absences

Provision for compensated absences cost has been made based on eligible vacation balances at balance sheet date.

Employees of the Company are entitled to compensated absences, the employees can carry-forward a portion of the unutilised accrued compensated absence and utilise it in future periods or receive cash compensation at termination of employment for the unutilised accrued compensated absence. The Company records an obligation for compensated absences in the period in which the employee renders the services that increase this entitlement.
The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the balance sheet date.

2.8 Leases

Finance lease

Assets acquired on finance leases, including assets acquired under sale and lease back transactions, have been recognised as an asset and a liability at the inception of the lease and have been recorded at an amount equal to the lower of the fair value of the leased asset or the present value of the future minimum lease payments. Such leased assets are depreciated over the lease term or its estimated useful life, whichever is shorter. Further, the instalments of minimum lease payments have been apportioned between finance charge / expense and principal repayment. Assets given on finance lease are shown as amounts recoverable from the lessee. The rentals received on such leases are apportioned between the finance income and principal amount using the implicit rate of return.

The finance charge / (income) is recognised as income, and principal received is reduced from the amount receivable. All initial direct costs incurred are included in the cost of the asset.

Operating lease

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating lease. Operating lease payments are recognised on a straight line basis over the lease term, unless the increase is on account of inflation, in the statement of profit and loss.

2 Significant accounting policies *(continued)*

2.9 Provisions and contingencies

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

Contingent assets are not recognised in the financial statements. However, contingent assets are assessed continually and if it is virtually certain that an economic benefit will arise, the asset and related income are recognised in the period in which the change occurs.

2.10 Financial instruments

2.10.1 Initial recognition

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

a) Non-derivative financial instruments

i) Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

2.10.2 Classification and subsequent measurement

i) Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

ii) Financial assets at fair value through other comprehensive income ('FVOCI')

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.The Company has made an irrevocable election to present in other comprehensive income subsequent changes in the fair value of equity investments not held for trading.

iii) Financial assets at fair value through profit and loss ('FVTPL')

Financial assets are measured at fair value through profit and loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit and loss are immediately recognised in the statement of profit and loss.

2 Significant accounting policies *(continued)*

2.10 Financial instruments (continued)

2.10.2 Classification and subsequent measurement (continued)

iv) Financial liabilities

Financial liabilities are measured at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amount approximate fair value to short-term maturity of these instruments

v) Equity instruments

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities.
Equity instruments are recognised by the Company at the proceeds received net of direct issue cost.

b) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares and share options are recognized as a deduction from equity, net of any tax effects.

2.10.3 De-recognition of financial instruments

The Company de-recognises a financial asset when the contractual rights to the cash flows from the financial assets expire or it transfers the financial assets and such transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of financial liability) is de-recognised from the Company's balance sheet when obligation specified in the contract is discharged or cancelled or expired.

2.10.4 Fair value of financial instrument

In determining the fair value of its financial instrument, the Company uses the methods and assumptions based on market conditions and risk existing at each reporting date. Methods of assessing fair value result in general approximation of value, and such value may never actually be realised. For all other financial instruments, the carrying amounts approximate the fair value due to short maturity of those instruments.

2.11 Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the year is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

2.12 Onerous contracts

Provisions for onerous contracts are recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. The provision is measured at lower of the expected cost of terminating the contract and the expected net cost of fulfilling the contract.

2.13 Recent accounting pronouncements

Ind AS 21 Foreign currency transactions and advance consideration:

On 28 March 2018, MCA has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency. This amendment will come into force from 1 April 2018. The Company has evaluated the effect of this on the financial statements and the impact is not material.

Ind AS 115 Revenue from Contract with Customers:

On 28 March 2018, Ministry of Corporate Affairs has notified the Ind AS115, Revenue from Contract with Customers. The core principle of the new standard is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The effective date for adoption of Ind AS 115 is financial periods beginning on or after 1 April 2018. The effect on adoption of Ind AS 115 on the financial statements is expected to be insignificant.

Total	**3,781,115**	-	-	**3,781,115**	**3,781,115**

The carrying value and fair value of financial instruments by categories as of 31 March 2017 were as follows:

	Amortized cost	FVTPL	FVOCI	Total carrying amount	Total fair value
Financial assets					
Trade receivables	10,339,400	-	-	10,339,400	10,339,400
Other financial assets	14,266,568	-	-	14,266,568	14,266,568
Total	24,605,968	-	-	24,605,968	24,605,968
Financial liabilities					
Borrowings	2,215	-	-	2,215	2,215
Other financial liability	284,809	-	-	284,809	284,809
Trade payables	2,965,084	-	-	2,965,084	2,965,084
Total	3,252,108	-	-	3,252,108	3,252,108

Fair value hierachy for the above stated financial assets and liabilities is using measurement principles at Level 3 as at 31 March 2018 and 31 March 2017.

II. Financial risk management:

a) Market risk

The Company operates in the US and there are no major transactions outside the US. So there is no market risk for the Company.

b) Credit risk

Credit risk refers to the risk of default on its obligation by the counterparty resulting in a financial loss. The maximum exposure to the credit risk at the reporting date is primarily from trade receivables amounting to USD 13,492,980 as at 31 March 2018 (31 March 2017 : USD 10,339,400) and unbilled revenue amounting to USD 1,353,745 as at 31 March 2018 (31 March 2017 : USD 483,685). Trade receivables and unbilled revenue are typically unsecured and are derived from revenue earned from customers primarily located in the United States, United Kingdom and other locations. Credit risk has always been managed by the Company by continuously monitoring the credit worthiness of customers to which the Company grants credit terms in the normal course of business.

c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to manage liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

The table below provides details regarding the contractual maturities of significant financial liabilities as of 31 March 2018 and 31 March 2017:

	31 March 2018		31 March 2017	
	Less than 1 Year	**More than 1 year**	Less than 1 Year	More than 1 year
Trade payables	**3,421,391**	-	2,965,084	-
Other borrowings	-	-	2,215	-
Book credit in bank account	**336,570**	-	261,655	-
Creditors for capital goods	**23,154**	-	23,154	-

18) Leases

Operating lease

The Company is obligated under non-cancellable operating leases for office space and office equipment which are renewable on a periodic basis at the option of both the lessor and lessee. Expenses under non-cancellable operating leases for the year ended 31 March 2018 aggregated to USD 564,511 (31 March 2017: USD 266,305).

The future minimum lease payments in respect of non-cancellable operating leases are as follows:

	As at 31 March 2018	As at 31 March 2017
Amount due within one year from the balance sheet date	**578,622**	564,511
Amount due in the period between one year and five years	**1,509,360**	2,087,982
Amount due in the period beyond five years	**-**	-
	2,087,982	2,652,493

The Company is also obligated under cancellable operating leases for office space and office equipment which are renewable on a periodic basis at the option of both the lessor and lessee. Expenses under cancellable operating leases for the year ended 31 March 2018 aggregated to USD 1,921,657 (31 March 2017: USD 2,606,761).

20) Segment reporting

As per Ind AS 108 - Operating Segment, if a financial report contains both consolidated financial statements of a parent that is within the scope of this Ind AS as well as the parent's separate financial statements, segment information is required only in the consolidated financial statements. Accordingly, information required to be presented under Ind AS 108 - Operating Segment has been given in the consolidated financial statements of the Holding Company.

21) Capital and other commitments and contingent liabilities

The Company has capital commitments of USD 610,227 (31 March 2017: USD 49,425) as at the balance sheet date and there are no contingent liabilities as at the balance sheet date (31 March 2017 Nil).

22) Long-term contracts

The Company has a process whereby periodically all long-term contracts are assessed for material foreseeable losses. At the year end, the Company has reviewed and ensured that adequate provision as required under any law / accounting standards for material foreseeable losses on such long term contracts has been made in the books of account.

23) Subsequent events

The Company evaluated subsequent events from the balance sheet date through 13 July 2018 and determined there are no material items to report.

As per our report of even date attached.

As of March 5, 2018, there were outstanding 12,866,551 shares (excluding treasury shares of 4,656,738) of the registrant's Common Stock, $0.001 par value per share.

DOCUMENTS INCORPORA TED BY REFERENCE

All or a portion of Items 10 through 14 in Part III of this Annual Report on Form 10-K are incorporated by reference to our definitive proxy statement on Schedule 14A for our 2018 stockholder meeting; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

TABLE OF CONTENTS

PART IV

Part I

In this Annual Report on Form 10-K, the words the "Company", the "registrant", "we", "our", "us", "Providence" and similar terms refer to The Providence Service Corporation and, except as otherwise specified herein, to our subsidiaries. When such terms are used in reference to the Company's common stock, $0.001 par value per share (the "Common Stock), and the Series A Convertible Preferred Stock, $0.001 par value per share (the "Preferred Stock"), they refer specifically to The Providence Service Corporation.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains certain statements that may be deemed "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), including statements related to the Company's strategies or expectations about revenues, liabilities, results of operations, cash flows, ability to fund operations, profitability, ability to meet financial covenants, contracts or market opportunities. The Company may also make forward-looking statements in other reports filed with the Securities and Exchange Commission (the "SEC"), in materials delivered to stockholders and in press releases. In addition, the Company's representatives may from time to time make oral forward-looking statements. In certain cases, you may identify forward looking-statements by words such as "may", "will", "should", "could", "expect", "plan", "project", "intend", "anticipate", "believe", "seek", "estimate", "predict", "potential", "target", "forecast", "likely", the negative of such terms or comparable terminology. In addition, statements that are not historical statements of fact should also be considered forward-looking statements. These forward-looking statements are based on the Company's current expectations, assumptions, estimates and projections about its business and industry, and involve risks, uncertainties and other factors that may cause actual events to be materially different from those expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to, the risks described under Item 1A in Part I of this Annual Report on Form 10-K.

You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statement was made. The Company is under no obligation to (and expressly disclaims any such obligation to) update any of the information in any forward-looking statement if such forward-looking statement later turns out to be inaccurate, whether as a result of new information, future events or otherwise.

Item 1. Business.

Background

The Providence Service Corporation owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which we hold interests comprise the following segments:

- Non-Emergency Transportation Services ("NET Services") – Nationwide manager of non-emergency medical transportation ("NET") programs for state governments and managed care organizations.
- Workforce Development Services ("WD Services") – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in CCHN Group Holdings, Inc. and its subsidiaries ("Matrix"), a nationwide provider of in-home care optimization and management solutions, including comprehensive health assessments ("CHAs"), to members of managed care organizations, accounted for as an equity method investment. On February 16, 2018, Matrix acquired HealthFair, expanding its service offerings to include mobile health assessments, advanced diagnostic testing, and additional care optimization services.

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company. We are actively monitoring these activities as they relate to our capital allocation and acquisition strategy to ensure alignment with Providence's overall strategic objectives and its goal of enhancing shareholder value.

The Company is a Delaware corporation formed in 1996 and headquartered in Stamford, Connecticut.

Business Strategies

Our businesses are operated on a decentralized basis and do not share any integrated functions such as sales, marketing, purchasing, human resources, accounting, finance or legal. They pursue strategies reflective of their respective industries and operating models. Our segments' core competencies include developing and managing large provider networks, tailoring healthcare and workforce development service offerings to the unique needs of diverse communities and populations, and implementing technology-enabled delivery models to achieve superior outcomes in low cost settings. We pursue both organic and inorganic growth through entry into adjacent markets and complementary service lines, particularly with offerings that may leverage the advantages inherent in our large-scale, technology-enabled, networks. In particular, as it relates to inorganic growth, we are actively evaluating the optimal industry sectors, such as the non-emergency medical transportation industry and others in which businesses complementary to our NET Services business operate, around which to focus our merger and acquisition activity. This ongoing evaluation takes into consideration and balances a number of factors, including the strategic goals, competitive landscape, and growth opportunities of our current segments, in an attempt to direct our capital towards those areas of our business most likely to drive long-term value creation and generate the highest levels of return for our shareholders. We also may enter into strategic partnerships or dispose of businesses, as demonstrated by the Matrix Transaction (defined below) and the Human Services Sale (defined below), based on a variety of factors, including availability of alternative opportunities to deploy capital or otherwise maximize shareholder value as well as other strategic considerations. The outcome of our active evaluation of the optimal industry sectors around which to focus our merger and acquisition activity as well as the potential future entry into strategic partnerships or potential disposition of businesses may impact the extent and manner in which we deploy resources across Providence, including strategic and administrative resources between Corporate and Other and our operating segments.

Discontinued Operations

On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a controlling equity interest in Matrix, with Providence retaining a noncontrolling equity interest (the "Matrix Transaction"). Matrix's financial results prior to October 19, 2016 are presented as a discontinued operation. In addition, on November 1, 2015, the Company completed its sale of the Human Services Segment (the "Human Services Sale"), which is accounted for as a discontinued operation for all periods presented.

Description of Our Segments

The Company operates in two principal business segments, NET Services and WD Services. In addition, Providence holds a noncontrolling interest in Matrix, which is a reportable segment for financial reporting purposes (the "Matrix Investment"). Financial information about segments and geographic areas, including revenues, operating income (loss), and long-lived assets of each segment, is included in Note 21, Segments, to our consolidated financial statements and is incorporated herein by reference. See Item 1A, Risk Factors, for a discussion of risks related to our operations and investments.

NET Services

Services offered. NET Services provides non-emergency transportation solutions to clients in 38 states and the District of Columbia. As of December 31, 2017, approximately 23.6 million individuals were eligible to receive our transportation services, and during 2017, NET Services managed 66.8 million trips. For 2017, 2016 and 2015, NET Services accounted for 81.2%, 78.2% and 73.3%, respectively, of Providence's consolidated service revenue, net.

NET Services primarily contracts with state Medicaid programs and managed care organizations ("MCOs" and collectively "NET customers") for the coordination of their members' ("NET end-users") non-emergency transportation needs. NET end-users are typically Medicaid or Medicare eligible members, whose limited mobility or financial resources hinders their ability to access necessary healthcare and social services. We believe our transportation services enable access to care that not only improves the quality of life and health of the populations we serve, but also enables many of the individuals we serve to pursue independent living in their homes rather than in more expensive institutional care settings.

NET Services program delivery is dependent upon a highly-integrated technology platform and business process as well as the management of a multifaceted network of subcontracted transportation providers. Our technology platform is purpose-built for the unique needs of our industry and is highly scalable, capable of supporting substantial growth in our clients' current and future membership base. In addition, our technology platform efficiently provides a broad interconnectivity among NET end-users, NET customers, and our network of transportation providers. We believe this technological capability and our industry experience uniquely position us as a future focal point in the evolving healthcare industry to introduce valuable population insights. In 2016 and 2017, we introduced service offerings and new technological features for NET end-users to improve service levels, lower costs and build the foundation for additional data analytics capabilities.

To fulfill the transportation needs of NET end-users, we apply our proprietary technology platform to an extensive network of approximately 5,100 transportation resources. This includes our in-network roster of fully contracted transportation providers who operate sedans, wheelchair equipped vehicles, multi-passenger vans and ambulances. Our system also utilizes partnerships with on-demand transportation network companies, mass transit entities, mileage reimbursement programs, taxis and county-based emergency medical service providers. To promote safety, quality, and compliance, our in-network transportation providers undergo an in-depth credentialing and education process. Our proprietary technology platform is designed to connect with our external partners' application program interfaces to improve on-time and on-demand performance, provide real time information and analytics (including live vehicle location data), minimize cancellations and better allow for the scale required to provide an effective, nationwide service.

Our transportation management services also include fraud, waste, and abuse and utilization review programs designed to monitor that our transportation services are provided in compliance with Medicaid program rules and remediate issues that are identified. Compliance controls include ongoing monitoring, auditing and remediation efforts, such as validating NET end-user eligibility for the requested date of service and employing a series of gatekeeping questions to check that the treatment type is covered and the appropriate mode of transportation is assigned. We also conduct post-trip confirmations of attendance directly with the healthcare providers for certain repetitive trips and we employ field monitors to inspect transportation provider vehicles and observe some transports in real time. Our claims validation process generally limits payment to trips that are properly documented, have been authorized in advance, and are billed at the pre-trip estimated amount.

In 2016, NET Services launched a strategic initiative to enhance client and member satisfaction and drive greater operational efficiencies. This initiative focuses on developing and deploying new processes and technologies needed to: progress towards an industry-leading call center and reservation scheduling platform; improve member communication, accessibility, and satisfaction; optimize the utilization of our extensive network of transportation providers; and build the foundation for additional analytical capabilities. Implementations under this strategic initiative that were completed in 2017 include new workforce management tools aimed at streamlining our call center operations and decreasing payroll costs, tools and models to better monitor transportation provider performance and capacity availability, and rate setting protocols aimed at lowering transportation costs and improving service quality. The full implementation of the initiative is expected to be substantially completed by the end of 2018.

Revenue and customers. In 2017, contracts with state Medicaid agencies and MCOs represented 55.9% and 44.1%, respectively, of NET Services' revenue. NET Services derived 13.8%, 13.1% and 15.0% of its revenue from a single state Medicaid agency for the years ended December 31, 2017, 2016 and 2015, respectively. The next four largest NET Services customers in the aggregate comprised 22.3%, 22.6% and 24.2% of NET Services' revenue for the years ended December 31, 2017, 2016 and 2015, respectively.

Contracts with state Medicaid agencies are typically for three to five years with multiple renewal options. Contracts with MCOs continue until terminated by either party upon reasonable notice (as determined in accordance with the contract), and allow for regular price adjustments based upon utilization and transportation cost. As of December 31, 2017, 30.8% of NET Services revenue was generated under state Medicaid contracts that are subject to renewal within the next 12 months. In 2017, NET Services renewed contracts representing 29.5% of its revenue in such year, including its contract with the New Jersey Department of Human Services, Division of Medical Assistance and Health Services, to provide non-emergency medical transportation management services to Medicaid-eligible New Jersey residents.

77.9% of NET Services' revenue in 2017 was generated under capitated contracts where we assume the responsibility of meeting the covered healthcare related transportation requirements of a specific population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. Under certain capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after each reconciliation period, based on a reconciliation of actual utilization and cost compared to the prepayment made. 22.1% of NET Services' revenue was generated under other types of fee arrangements, including administrative services only, fee for service ("FFS"), cost plus and flat fee contracts, under which fees are generated based upon billing rates for specific services or defined membership populations.

Seasonality. While revenue is generally fixed, primarily as a result of the capitated nature of the majority of our contracts, service expense varies based on the utilization of our services. The quarterly operating income and cash flows of NET Services normally fluctuate as a result of seasonal variations in the business, principally due to lower transportation demand during the winter season and higher demand during the summer season.

Competition. We compete with a variety of national organizations that provide similar healthcare and social services related transportation, such as Medical Transportation Management, Southeastrans, Veyo, and American Medical Response, as

well as local and regional providers. Most local competitors seek to win contracts for specific counties or small geographic territories whereas we and other larger competitors seek to win contracts for an entire state or large regional area. We compete based upon a number of factors, including our nationwide network, technical expertise, experience, service capability, service quality, and price.

Business development. Our sales and marketing strategy relies on a concentrated business development effort, with centralized marketing programs. Due to the critical nature of our services, our customers rely upon our past delivery performance record, network development and management expertise, technical expertise and capability, and specialized knowledge. A significant portion of our revenue is generated from long-term, repeat customers. Our long-term strategy is to improve our position as the preferred provider of transportation, complementary network-based services and data analytics offerings to a broad array of healthcare payers. Key elements of our long-term strategy include continued investment in our technologies, enabling us to both lower costs and improve service delivery. We also consider acquisitions of businesses that serve our market or leverage our nationwide infrastructure.

WD Services

Services offered. WD Services is a global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs. For 2017, 2016 and 2015, WD Services accounted for 18.8%, 21.8% and 26.7%, respectively, of Providence's consolidated revenue.

WD Services' end user client base ("WD end-users") is broad and includes the disabled, recently and long-term unemployed and individuals seeking new skills, as well as individuals that are coping with medical illnesses, are newly graduated from educational institutions, or are being released from incarceration.

As of December 31, 2017, WD Services operated in 10 countries outside of the U.S. These countries included the United Kingdom ("UK"), France, Saudi Arabia, South Korea, Canada, Germany, Australia, Switzerland and Singapore. WD Services also holds a noncontrolling interest in a joint venture in Spain.

In order to build upon its leadership position in the UK employment services industry, enhance client satisfaction and drive greater operational efficiencies, WD Services implemented the Ingeus Futures program, which was substantially completed in 2017. This program included organizational restructuring, the development and deployment of new processes and technologies, and increased business development resources. Each aspect of the program was aimed at improving operational efficiencies and client services as well as developing the internal capabilities necessary to ensure long-term profitable growth in the employment, training and healthcare industries.

Revenue, customers and clients. The majority of WD Services' revenue is generated through the provision of employability, legal offender rehabilitation and training programs to national government entities seeking to reduce unemployment or recidivism rates. For the years ended December 31, 2017, 2016 and 2015, 61.4%, 68.3% and 75.5%, respectively, of WD Services' revenue was derived from operations in the UK, with 38.6%, 31.7% and 24.5%, respectively, derived from operations outside the UK. Additionally, during the years ended December 31, 2017, 2016 and 2015, respectively, 19.6%, 28.9% and 40.0% of WD Services' revenue was derived from a contract with the UK government's Department of Work and Pensions for employability services and 27.1%, 25.9% and 28.2% of WD Services' revenue was derived from a contract with the UK government's Ministry of Justice (the "MOJ"), for legal offender rehabilitation services. Revenue under the UK employability services contract is decreasing as expected, as referrals ended under this program in March 31, 2017. In late 2017, WD Services was awarded three new employability contracts and one sub-contract under the new Work and Health Programme in the UK, allowing Ingeus to continue to maintain its position as a leader in the UK workforce development market, although overall this program has a smaller scale than the legacy employability services contract. During 2017, there was negligible revenue under the new Work and Health Programme.

The revenue earned by WD Services under its contracts is often derived through a combination of different revenue channels including, but not limited to, fees contingent upon: (1) the volume of WD end-users referred to and/or admitted into a specific program, (2) the achievement of defined outcomes for specific individuals, such as a job placement or continued employment and (3) the achievement of defined outcomes for a population of individuals over a specific time period, such as aggregate employment or recidivism rates. The relative contributions of different revenue channels under a specific contract can fluctuate meaningfully over the life of a contract and thus contribute to significant earnings volatility. Revenue recognition related to our National Citizen Services ("NCS") youth programs can be particularly volatile due to the timing of services provided, which typically occur in the second and third quarters of each year. WD Services also earns revenue under fixed FFS arrangements, based

upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. Volume levels are typically not guaranteed under contracts.

The nature of the services offered by WD Services often relies on our ability to improve a certain set of outcomes at a reduced cost versus previously utilized in-sourced delivery models. As a result, as we commence new contracts using transformational delivery models, we are often required to invest significant upfront capital for information technology, human resources, facilities and other onboarding costs, such as consultants and redundancy payments. The level of upfront funding required is dependent upon the size and nature of the contract. Although significant upfront funding may be required, revenues are often payable only as services are delivered and, in some cases, only after incentive measures have been achieved over a multi-year period. As a result of these two factors, there can be significant variability in our earnings from quarter-to-quarter and year-to-year. In addition, under the majority of WD Services' contracts, the Company relies on its customers, which include government agencies, to provide referrals, for which the Company can provide services and earn revenue. The timing and magnitude of referrals can fluctuate significantly, leading to volatility in revenue. The Company also relies on certain customers to periodically provide information regarding the achievement of service delivery targets, which information could result in reductions in future payments if targets are not met. As a result, we often measure a contracts success over the entire term of the contract and believe the financial results of WD Services are best viewed from a multi-year perspective.

The MOJ is currently reviewing its program for outsourcing probationary services, which includes its contracts with our subsidiary Reducing Reoffending Partnership ("RRP"), which is in our WD Services segment. The review includes an investigation regarding sustainability of the economic terms of such contracts, as well as data relating to reoffending statistics and other factors that could impact contractual performance measures. The potential impact of this review on RRP's agreement with the MOJ, including with respect to any potential payments to the MOJ that may be required, cannot be determined at this time because the review is ongoing. See also "Risk Factors—Risks Related to our Business—If we fail to satisfy our contractual obligations, we could be liable for damages and financial penalties, which may place existing pledged performance and payment bonds at risk as well as harm our ability to keep our existing contracts or obtain new contracts and future bonds."

Seasonality. While there has been period-to-period variability in WD Services' earnings due to the factors discussed above and also set forth in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Revenues and Expenses – WD Services", there has not been a material seasonal effect on WD Services' results of operations.

Competition. In the UK, U.S., Saudi Arabia and Singapore the workforce development market is served by large, often multi-national, corporations, along with national and regional for-profit and non-profit entities. In Canada, France, Germany, South Korea, Spain and Switzerland, our competition is primarily companies specific to the geography, nationally or regionally, and both privately owned for-profit and non-profit entities. In the UK, the offender rehabilitation market is served by large corporations, often working with charitable sector providers. In general our larger competitors internationally include Maximus, Interserve, Sodexo, The Reed Group and Working Links.

The market for services to governments is competitive and subject to change and pricing pressure, particularly during the bidding for new contracts and contract renewals. However, due to the critical nature of our offerings and the WD end-users we serve, market entry can be difficult for new entrants or those without prior established track-records. Other barriers to entry include operational service complexity and significant upfront investments. This can include establishment of complex IT systems which often must interface with government systems, significant monitoring and reporting obligations, delivery from sites across wide geographies, and management and development of supply chains.

Business development. Our business development activities are performed both locally and centrally from WD Services' London headquarters. Through local and global networks and relationships, we become aware of new opportunities for which we develop bids through competitive processes. The nature of the competitive processes varies from highly competitive to being one of a few providers, or the sole provider, to bid on a contract. We pursue only those contracts that meet certain investment criteria, including risk-weighted return on capital thresholds, and involve the provision of services where we believe our experience will allow us to deliver differentiated and improved outcomes for our clients.

Matrix Investment

Providence's Matrix Investment is comprised of our interest in Matrix. Since the completion of the Matrix Transaction, the Company has had a noncontrolling equity interest in Matrix. The Company and an affiliate of Frazier Health Partners (the "Frazier Subscriber"), which holds the controlling equity interest in Matrix, are party to the Second Amended and Restated Limited Liability Company Agreement (the "Operating Agreement") of Mercury Parent, LLC, the company through which the parties hold their equity interests in Matrix. The Operating Agreement sets forth certain terms and conditions regarding the ownership by the Company and Frazier Subscriber of interests in Mercury Parent and their indirect ownership of common stock of Matrix, and

provides for, among other things, certain liquidity and governance rights and other obligations and rights, in each case, on the terms and conditions contained therein.

At December 31, 2017, the Company owned a 46.6% noncontrolling interest in Matrix. Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in our Health Assessment Services ("HA Services") segment. The Company's proportionate share of Matrix's net assets and financial results for the period following the closing of the Matrix Transaction are presented under the equity method. The assets, liabilities and financial results of Matrix for the period prior to the closing of the Matrix Transaction are presented within discontinued operations. For additional information regarding the Matrix Transaction, see Note 20, Discontinued Operations, to our consolidated financial statements.

Services offered. Matrix provides in-home care optimization and care management solutions, which include CHAs. As of December 31, 2017, Matrix utilized a national network of over 5,800 clinical providers, including 1,700 nurse practitioners ("NPs"), located across 50 states, to provide its services primarily to members of Medicare Advantage ("MA") health plans.

Matrix recently expanded its provider network and service offerings through a series of acquisitions. In December 2017, Matrix grew its clinical provider network through its acquisition of LP Health Services, a provider of quality and wellness visits on behalf of Medicaid/Duals managed care plans across the U.S., for a purchase price of $3.8 million. LP Health Services' revenue for the year ended December 31, 2017 was approximately $6 million.

In February 2018, Matrix completed its acquisition of HealthFair, a leading operator of mobile clinics which offer preventative health assessment and advanced diagnostic testing services, including laboratory, ultrasound, EKG and mammography testing, for a purchase price of $160 million plus an earnout payment contingent on HealthFair's 2018 performance. With the addition of HealthFair, Matrix's network increased to more than 6,000 community-based providers across all 50 states, including over 1,700 NPs. We believe the combination of the two organizations will provide health plan members with more convenient access to important care management and preventative health services. As a result of the rollover of certain equity interests of HealthFair, Providence's equity ownership in Matrix was 43.6% as of February 16, 2018. HealthFair's revenue for the year ended December 31, 2017 was approximately $45 million.

Matrix primarily generates revenue from CHAs, which obtain a health plan members' information related to health status, social, environmental and medical risks and help the MA plans improve the accuracy of such information. Matrix's services typically commence with a member analysis that utilizes client data, such as medical claims data, to maximize its ability to improve client and member outcomes as a result of the assessment process. Through Matrix's contact centers, which include approximately 160 colleagues, Matrix pursues additional data collection and schedules assessments. Matrix's NPs then conduct a CHA, which is comprised of a physical examination and other diagnostic services, in the member's home. Matrix also operates a care management offering which provides additional data analytics and chronic care management services.

Matrix's services are dependent upon its technology platform which integrates the clinical provider network, operations infrastructure, call centers and clients. Matrix's platform is designed for the unique needs of its industry, is highly scalable and can support substantial growth. We believe Matrix's network and platform positions Matrix as a future focal point in the evolving healthcare industry in the introduction of both additional population insights and care management services. With data provided by its health plan clients, Matrix utilizes analytics to determine which members it can most effectively lower costs and improve outcomes through face-to-face engagements with clinicians. Each program is customized and is served by a comprehensive team of case managers, nurse practitioners, registered nurses, and trained call center colleagues.

Revenue, customers and clients. As of December 31, 2017, Matrix's customers included 48 health plans, including for-profit multi-state health plans and non-profit health plans that operate in only one state or several counties within one state. For the year ended December 31, 2017, Matrix's top five customers accounted for 72.2% of its revenue, as its largest customer accounted for 30.9% of its revenue and its second largest customer account for 26.8% of its revenue. Matrix enters into annual or multi-annual contracts with its customers under which it is paid on a per assessment basis.

Seasonality. The Company attempts to perform CHAs evenly throughout the year to efficiently utilize NP capacity, although the timing of performance is driven by client demand.

Competition. We believe that Matrix and CenseoHealth, which announced in December 2017 a combination with Advance Health, a smaller competitor, are the largest independent providers of CHAs to the health plan market. There are many smaller competitors, such as EMSI Healthcare Services, MedXM, which was acquired by Quest Diagnostics on February 1, 2018, and Inovalon. In addition, some health plans in-source CHA services. Matrix's chronic care management competitors include Landmark Healthcare, PopHealthcare and Optum.

Employees

As of December 31, 2017, there were approximately 7,100 employees across Providence and our subsidiaries. Of such employees, approximately 3,800 work in NET Services and approximately 3,300 work in WD Services. In addition, 30 employees primarily conduct corporate activities.

None of our U.S. employees are members of a union. We have nearly 1,950 and 330 full-time employees in the UK and France, respectively. Certain of our UK employees are members of the NAPO and Unison unions and certain of our employees in France are members of the Confederation Generale du Travail and have collective bargaining rights. In other countries employees may be members of a trade union but these trade unions are not formally recognized by us. Participation in unions is confidential under European employment laws. We believe we have good relationships with our employees, both unionized and non-unionized, in the U.S. and internationally.

Regulatory Environment

NET Services and Matrix Investment

Overview

Our NET Services and Matrix Investment segments (the "U.S. Healthcare Segments") are subject to numerous U.S. federal, state and local laws, regulations and agency guidance (collectively, "Laws"). These Laws significantly affect the way in which these segments operate various aspects of their businesses. Our U.S. Healthcare Segments must also comply with state and local licensing requirements, state and federal requirements for participation in Medicare and Medicaid, requirements for contracting with MA plans, and contractual requirements imposed upon them by the federal, state and local agencies and third-party commercial customers to which they provide services. Failure to follow the rules and requirements of these programs can significantly affect our U.S. Healthcare Segments' ability to be paid for the services they provide and be authorized to provide services on an ongoing basis.

The Medicare and Medicaid programs are governed by significant and complex Laws. Both Medicare and Medicaid are financed, at least in part, with federal funds. Therefore, any direct or indirect recipients of those funds are subject to federal fraud, waste and abuse Laws. In addition, there are federal privacy and security Laws that govern the healthcare industry. State Laws primarily pertain to the licensure of certain categories of healthcare professionals and providers and the state's interest in regulating the quality of healthcare in the state, regardless of the source of payment, but may also include state Laws pertaining to fraud, waste and abuse, privacy and security Laws, and the state's regulation of its Medicaid program. Federal and state regulatory laws that may affect our U.S. Healthcare Segments' businesses, include, but are not limited to the following:

- false and other improper claims or false statements Laws pertaining to reimbursement;
- the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") and its privacy, security, breach notification and enforcement and code set regulations and guidance, along with evolving state Laws protecting patient privacy and requiring notifications of unauthorized access to, or use of, patient medical information;
- civil monetary penalties Law;
- anti-kickback Laws;
- the Stark Law and other self-referral, financial inducement, fee splitting, and patient brokering Laws;
- CMS regulations pertaining to Medicare as well as CMS releases applicable to the operation of MA plans, such as reimbursement rates, risk adjustment and data collection methodologies, adjustments to quality management measurements and other relevant factors; and
- state licensure laws.

A violation of certain of these Laws could result in civil and criminal damages and penalties, the refund of monies paid by government or private payers, our U.S. Healthcare Segments' exclusion from participation in federal healthcare payer programs, or the loss of our segments' license to conduct business within a particular state's boundaries.

Federal Law

Federal healthcare Laws apply in any case in which our U.S. Healthcare Segments are providing an item or service that is reimbursable or provide information to such segments' customers that results in reimbursement by a federal healthcare payer program to such segments or to them. The principal federal Laws that affect our U.S. Healthcare Segments' businesses include those that prohibit the filing of false or improper claims or other data with federal healthcare payer programs and those that prohibit unlawful inducements for the referral of business reimbursable under federal healthcare payer programs.

False and Other Improper Claims

Under the federal False Claims Act (31 U.S.C. §§ 3729-3733) and similar state Laws, the government may impose civil liability on our U.S. Healthcare Segments if they knowingly submit a false claim to the government or cause another to submit a false claim to the government, or knowingly make a false record or statement intended to get a false claim paid by the government. The False Claims Act defines a claim as a demand for money or property made directly to the government or to a contractor, grantee, or other recipient if the money is to be spent on the government's behalf or if the government will reimburse the contractor or grantee. Liability can be incurred for submitting (or causing another to submit) false claims with actual knowledge or for submitting false claims with reckless disregard or deliberate ignorance. Liability can also be incurred for knowingly making or using a false record or statement to receive payment from the federal government or for knowingly and improperly avoiding or decreasing an obligation to pay or transmit money or property to the government. Consequently, a provider need not take an affirmative action to conceal or avoid an obligation to the government, but the mere retention of an overpayment from the government could lead to potential liability under the False Claims Act.

Many states also have similar false claims statutes. In addition, healthcare fraud is a priority of the U.S. Department of Justice, the Department of Health and Human Services ("DHHS"), its program integrity contractors and its Office of Inspector General, the Federal Bureau of Investigation and state Attorneys General. These agencies have devoted a significant amount of resources to investigating healthcare fraud.

If our U.S. Healthcare Segments are ever found to have violated the False Claims Act, they could be required to make significant payments to the government (including damages and penalties in addition to the return of reimbursements previously collected) and could be excluded from participating in federal healthcare programs or providing services to entities which contract with those programs. Although our U.S. Healthcare Segments monitor their billing practices for compliance with applicable laws, such laws are very complex, and they might not be able to detect all errors or interpret such laws in a manner consistent with a court or an agency's interpretation. While the criminal statutes generally are reserved for instances evidencing fraudulent intent, the civil and administrative penalty statutes are being applied by the federal government in an increasingly broad range of circumstances. Examples of the types of activities giving rise to liability for filing false claims include billing for services not rendered, misrepresenting services rendered (i.e., miscoding), applications for duplicate reimbursement and providing false information that results in reimbursement or impacts reimbursement amounts. Additionally, the federal government takes the position that a pattern of claiming reimbursement for unnecessary services violates these statutes if the claimant should have known that the services were unnecessary. The federal government also takes the position that claiming reimbursement for services that are substandard is a violation of these statutes if the claimant should have known that the care was substandard. Criminal penalties also are available even in the case of claims filed with private insurers if the federal government shows that the claims constitute mail fraud or wire fraud or violate any of the federal criminal healthcare fraud statutes.

State Medicaid agencies and state Attorneys General also have authority to seek criminal or civil sanctions for fraud and abuse violations. In addition, private insurers may bring actions under state false claim laws. In certain circumstances, federal and state laws authorize private whistleblowers to bring false claim or "qui tam" suits on behalf of the government against providers and reward the whistleblower with a portion of any final recovery. In addition, the federal government has engaged a number of private audit organizations to assist it in tracking and recovering claims for healthcare services that may have been improperly submitted.

Governmental investigations and whistleblower "qui tam" suits against healthcare companies have increased significantly in recent years, and have resulted in substantial penalties and fines and exclusions of persons and entities from participating in government healthcare programs. For more information on the risks related to a failure to comply with applicable government coding and billing rules, see "Risk Factors—Regulatory Risks—Our segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results."

Health Information Practices

Under HIPAA, DHHS issued rules to define and implement standards for the electronic transactions and code sets for the submission of transactions such as claims, and privacy and security of individually identifiable health information in whatever manner it is maintained.

The Final Rule on Enforcement of the HIPAA Administrative Simplification provisions, including the transaction standards, the security standards and the privacy rule, published by DHHS addresses, among other issues, DHHS's policies for determining violations and calculating civil monetary penalties, how DHHS will address the statutory limitations on the imposition of civil monetary penalties, and various procedural issues. The rule extends enforcement provisions currently applicable to the

healthcare privacy regulations to other HIPAA standards, including security, transactions and the appropriate use of service code sets.

The Health Information Technology for Economic and Clinical Health Act ("HITECH"), enacted as part of the American Recovery and Reinvestment Act of 2009, extends certain of HIPAA's obligations to parties providing services to healthcare entities covered by HIPAA known as "business associates," imposes new notice of privacy breach reporting obligations, extends enforcement powers to state attorney generals and amends the HIPAA privacy and security laws to strengthen the civil and criminal enforcement of HIPAA. HITECH establishes four categories of violations that reflect increasing levels of culpability, four corresponding tiers of penalty amounts that significantly increase the minimum penalty amount for each violation, and a maximum penalty amount of $1.5 million for all violations of an identical provision. With the additional HIPAA enforcement power under HITECH, the Office of Civil Rights of the Department of Health and Human Services and states are increasing their investigations and enforcement of HIPAA compliance. Our U.S. Healthcare Segments have taken steps to ensure compliance with HIPAA and we are monitoring compliance on an ongoing basis.

Additionally, the HITECH Final Rule imposes various requirements on covered entities and business associates, and expands the definition of "business associates" to cover contractors of business associates. Even when our U.S. Healthcare Segments are not operating as covered entities, they may be deemed to be "business associates" for HIPAA rule purposes of such covered entities. Our U.S. Healthcare Segments monitor their compliance obligations under HIPAA as modified by HITECH, and implement operational and systems changes, associate training and education, conduct risk assessments and allocate resources as needed. Any noncompliance with HIPPA requirements could expose such segments to the criminal and increased civil penalties provided under HITECH and require them to incur significant costs in order to seek to comply with its requirements or to remediate potential issues that may arise.

Federal and State Anti-Kickback Laws

Federal law commonly known as the "Anti-Kickback Statute" prohibits the knowing and willful offer, solicitation, payment or receipt of anything of value (direct or indirect, overt or covert, in cash or in kind) which is intended to induce: the referral of an individual for a service for which payment may be made by Medicare, Medicaid or certain other federal healthcare programs; or the ordering, purchasing, leasing, or arranging for, or recommending the purchase, lease or order of, any service or item for which payment may be made by Medicare, Medicaid or certain other federal healthcare programs.

Interpretations of the Anti-Kickback Statute have been very broad and under current Law, courts and federal regulatory authorities have stated that the Anti-Kickback Statute is violated if even one purpose (as opposed to the sole or primary purpose) of the arrangement is to induce referrals. Even bona fide investment interests in a healthcare provider may be questioned under the Anti-Kickback Statute if the government concludes that the opportunity to invest was offered as an inducement for referrals.

This act is subject to numerous statutory and regulatory "safe harbors." Compliance with the requirements of a safe harbor offers defenses against Anti-Kickback Statute allegations. Failure of an arrangement to satisfy all of the requirements of a particular safe harbor does not mean that the arrangement is unlawful. However, it may mean that such an arrangement will be subject to scrutiny by the regulatory authorities.

Many states, including some where our U.S. Healthcare Segments do business, have adopted anti-kickback laws that are similar to the federal Anti-Kickback Statute. Some of these state laws are very closely patterned on the federal Anti-Kickback Statute; others, however, are broader and reach reimbursement by private payers. If our U.S. Healthcare Segments' activities were deemed to be inconsistent with state anti-kickback or illegal remuneration laws, they could face civil and criminal penalties or be barred from such activities, any of which could harm such segments' businesses.

If our U.S. Healthcare Segments' arrangements are found to violate the Anti-Kickback Statute or applicable state laws, these segments, along with their clients would be subject to civil and criminal penalties, and these segments' arrangements would not be legally enforceable, which could materially and adversely affect their business. For more information on the risks related to failure to comply with applicable anti-bribery and anti-corruption regulations, see "Risk Factors—Regulatory Risks—Our segments' business could be subject to civil penalties and loss of business if we fail to comply with applicable bribery, corruption and other regulations governing business with governments."

Federal and State Self-Referral Prohibitions

Our U.S. Healthcare Segments may be subject to federal and state statutes banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship. Section 1877 of the Social Security Act, also known as the "Stark Law", prohibits physicians from making a "referral" for "designated health services" for

Medicare (and in many cases Medicaid) patients from entities or facilities in which such physicians directly or indirectly hold a "financial relationship".

A financial relationship can take the form of a direct or indirect ownership, investment or compensation arrangement. A referral includes the request by a physician for, or ordering of, or the certifying or recertifying the need for, any designated health services.

Certain services that our U.S. Healthcare Segments provide may be identified as "designated health services" for purposes of the Stark Law. Such segments cannot provide assurance that future regulatory changes will not result in other services they provide becoming subject to the Stark Law's ownership, investment or compensation prohibitions in the future.

Many states, including some states where our U.S. Healthcare Segments do business, have adopted similar or broader prohibitions against payments that are intended to induce referrals of clients. Moreover, many states where such segments operate have laws similar to the Stark Law prohibiting physician self-referrals. While our U.S. Healthcare Segments believe that they are operating in compliance with the Stark Law, there can be no guarantee that violations will not occur.

Healthcare Reform

On March 23, 2010, the President of the United States signed into law comprehensive health reform through the Patient Protection and Affordable Care Act (Pub. L. 11-148) ("PPACA"). On March 30, 2010, the President signed a reconciliation budget bill that included amendments to the PPACA (Pub. L. 11-152). These laws in combination form the "ACA" referred to herein. The changes to various aspects of the healthcare system in the ACA were far-reaching and included, among many others, substantial adjustments to Medicare reimbursement, establishment of individual mandates for healthcare coverage, extension of coverage to certain populations, expansion of Medicaid, restrictions on physician-owned hospitals, and increased efficiency and oversight provisions.

Some of the provisions of the ACA took effect immediately, while others will take effect later or will be phased in over time, ranging from a few months following approval to ten years. Due to the complexity of the ACA, it is likely that additional legislation will be considered and enacted. The ACA requires the promulgation of regulations that will likely have significant effects on the healthcare industry and third-party payers. Thus, the healthcare industry and our operations may be subjected to significant new statutory and regulatory requirements and contractual terms and conditions, and consequently to structural and operational changes and challenges.

The ACA also implemented significant changes to healthcare fraud and abuse laws that intensify the risks and consequences of enforcement actions. These included expansion of the False Claims Act by: (a) narrowing the public disclosure bar; and (b) explicitly stating that violations of the Anti-Kickback Statute trigger false claims liability. In addition, the ACA lessened the intent requirements under the Anti-Kickback Statute to provide that a person may violate the statute without knowledge or specific intent. The ACA also provided new funding and expanded powers to investigate fraud, including through expansion of the Medicare Recovery Audit Contractor ("RAC") program to Medicare Parts C and D and Medicaid and authorizing the suspension of Medicare and Medicaid payments to a provider of services pending an investigation of a credible allegation of fraud. Finally, the legislation created enhanced penalties for noncompliance, including increased criminal penalties and expansion of administrative penalties under Medicare and Medicaid. Collectively, such changes could have a material adverse impact on our U.S. Healthcare Segments' operations.

On January 20, 2017, the President of the United States issued an executive order that directed federal agencies to take steps to ensure the government's implementation of the ACA minimizes the burden on impacted parties (such as individuals and states). The underlying intent of the executive order was to take the first steps to repeal and replace the ACA. The executive order specifically instructed agencies to "waive, defer, grant exemptions from, or delay implementation of provisions" that place a "fiscal burden on any State" or that impose a "cost, fee, tax, penalty, or regulatory burden" on stakeholders including patients, providers, and insurers. The order stated that any changes should be made only to the extent "permitted by law" and should comply with the law governing administrative rule-making. The executive order did not, however, provide specifics on next steps or provisions that would be reexamined nor was it clear how the executive branch would be reconciled with Republican congressional efforts to repeal and replace the ACA or what portions of the ACA may continue in any replacement legislation. There are multiple pending legislative proposals to amend the ACA which, among other effects, could repeal all or parts of the ACA without replacing its extension of coverage to expansion populations. In addition, there are pending legislative proposals to materially restructure Medicaid and other government health care programs.

In 2017, legislation was proposed in the U.S. Congress, but did not advance out of committee and was not passed, which would reduce or eliminate certain non-emergency medical transportation services provided by NET Services as a required Medicaid

benefit. A similar proposal was made in 2018 by the President of the United States in a federal budget proposal. If additional privatization initiatives are not proposed or enacted, or if previously enacted privatization initiatives are challenged, repealed or invalidated, there could be a material adverse impact on our segments' operating results.

Surveys and Audits

Our U.S. Healthcare Segments' programs are subject to periodic surveys by government authorities or their contractors to ensure compliance with various requirements. Regulators conducting periodic surveys often provide reports containing statements of deficiencies for alleged failures to comply with various regulatory requirements. In most cases, if a deficiency finding is made by a reviewing agency, our segments will work with the reviewing agency to agree upon the steps to be taken to bring our program into compliance with applicable regulatory requirements. In some cases, however, an agency may take a number of adverse actions against a program, including:

- the imposition of fines or penalties or the recoupment of amounts paid;
- temporary suspension of admission of new clients to our program's service;
- in extreme circumstances, exclusion from participation in Medicaid, Medicare or other programs;
- revocation of our license; or
- contract termination.

While our U.S. Healthcare Segments believe that our programs are in compliance with Medicare, Medicaid and other program certification requirements and state licensure requirements, failure to comply with these requirements could have a material adverse impact on such segments' businesses and their ability to enter into contracts with other agencies to provide services.

Billing/claims Reviews and Audits

Agencies and other third-party commercial payers periodically conduct pre-payment or post-payment medical reviews or other audits of our U.S. Healthcare Segments' claims or other audits in conjunction with their obligations to comply with the requirements of Medicare or Medicaid. In order to conduct these reviews, payers request documentation from our U.S. Healthcare Segments and then review that documentation to determine compliance with applicable rules and regulations, including the eligibility of clients to receive benefits, the appropriateness of the care provided to those clients, and the documentation of that care. Any determination that such segments have not complied with applicable rules and regulations could result in adjustment of payments or the incurrence of fines and penalties, or in situations of significant compliance failures review or non-renewal of related contracts.

Corporate Practice of Medicine and Fee Splitting

Some states in which our U.S. Healthcare Segments operate prohibit general business entities, such as these segments, from "practicing medicine," which definition varies from state to state and can include employing physicians, as well as engaging in fee-splitting arrangements with these healthcare providers. Among other things, our U.S. Healthcare Segments currently contract with and employ NPs to perform CHAs. We believe that such segments have structured their operations appropriately; however, they could be alleged or found to be in violation of some or all of these laws. If a state determines that some portion of our U.S. Healthcare Segments' businesses violate these laws, it may seek to have such segments discontinue or restructure those portions of their operations or subject them to increased costs, penalties, fines, certain license requirements or other measures. Any determination that such segments have acted improperly in this regard may result in liability to them. In addition, agreements between the corporation and the professional may be considered void and unenforceable.

Professional Licensure and Other Requirements

Many of our U.S. Healthcare Segments' employees are subject to federal and state laws and regulations governing the ethics and practice of their professions. For example, our mid-level practitioners (e.g., NPs) are subject to state laws requiring physician supervision and state laws governing mid-level scope of practice. As the use of mid-level practitioners by physicians increases, state governing boards are implementing more robust regulations governing mid-levels and their scope of practice under physician supervision. Our U.S. Healthcare Segments' ability to provide mid-level practitioner services may be restricted by the enactment of new state laws governing mid-level scope of practice and by state agency interpretations and enforcement of such existing laws. In addition, services rendered by mid-level practitioners may not be reimbursed by payors at the same rates as payors may reimburse physicians for the same services. Lastly, professionals who are eligible to participate in Medicare and Medicaid as individual providers must not have been excluded from participation in government programs at any time. Our U.S. Healthcare Segments' ability to provide services depends upon the ability of their personnel to meet individual licensure and other requirements and maintain such licensure in good standing.

WD Services

Overview

As a provider of workforce development services in the U.S. and 10 countries outside the U.S., WD Services is subject to numerous national and local laws and regulations. These laws and regulations significantly affect the way in which we operate various aspects of our business. WD Services has implemented compliance policies to help assure our compliance with these laws and regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services or the manner in which we conduct our business.

WD Services' revenue is primarily derived from contracts that are funded by national governments that are seeking to reduce the overall unemployment rate or improve job placement success for targeted cohorts, and to reduce the recidivism rate. Further, the revenue we receive from these contracts is typically tied to milestones that are largely uncontrolled by us. Such milestones include the job placement success of clients, duration and tenure of clients in jobs once they are placed, and various other market and industry factors including the overall unemployment rate. For more information on the risks related to failure to satisfy our contractual obligations, see "Risk Factors—Risks Related to Our Business—If we fail to satisfy our contractual obligations, we could be liable for damages and financial penalties, which may place existing pledged performance and payment bonds at risk as well as harm our ability to keep our existing contracts or obtain new contracts and future bonds."

Data Security and Protection

WD Services is also subject to the European Union's and other countries' data security and protection laws and regulations. These laws and regulations impose broad obligations on the organizations that collect such data, as well as confer broad rights on individuals about whom such data is collected. There are amendments which will come into effect in 2018 with respect to European data privacy legislation which will significantly increase the fines for any breaches. In addition to their power to impose fines, information privacy regulators in Europe have significant powers to require organizations that breach regulations to put in place measures to ensure that such breaches do not occur again, and require businesses to stop processing personal information until the required measures are in place. For more information on the risks related to a failure to comply with privacy and security regulations, see "Risk Factors—Regulatory Risks—Our segments are subject to regulations relating to privacy and security of patient and service user information. Failure to comply with privacy and security regulations could result in a material adverse impact on our segments' operating results."

The data security and protection laws and regulations may also restrict the flow of information, including information about employees or service users, from WD Services to Providence in the U.S. In certain instances, informed consent to the data transfer must be given by the affected employee or service user. Compliance with such laws and regulations is costly and requires our segment management to expend substantial time and resources which could negatively impact our segments' results of operations. Compliance may also make it more difficult for the Company to gather data necessary to ensure the appropriate operation of its internal controls or to detect corruption, resulting in the need for additional controls or increasing the Company's costs to maintain appropriate controls.

Anti-Bribery and Corruption

WD Services' international operations are subject to various U.S. and foreign statutes that prohibit bribery and corruption, including the U.S. Foreign Corrupt Practices Act and the UK's Bribery Act. These statutes generally require organizations to prohibit bribery by or for the organization and demand the implementation of systems to counter bribery, including risk management, training and guidance and the maintenance of adequate record-keeping and internal accounting practices. The statutes also, among other things, prevent the provision of anything of value to government officials for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. In addition, many countries in which we operate have antitrust or competition regulations which, among other things, prohibit collusive tendering or bid-rigging behavior. For more information on the risks related to a failure to comply with applicable anti-bribery and anti-corruption regulations, see "Risk Factors—Regulatory Risks—Our segments' business could be subject to civil penalties and loss of business if we fail to comply with applicable bribery, corruption and other regulations governing business with governments."

Licensing

In many of the locations where WD Services operates, it is required by local laws to obtain and maintain licenses. The applicable state and local licensing requirements govern the services our segments provide, the credentials of staff, record keeping, treatment planning, client monitoring and supervision of staff. The failure to maintain these licenses or the loss of a license could

have a material adverse impact on WD Services businesses and could prevent them from providing services to clients in a given jurisdiction.

Surveys and audits

WD Services' contracts permit clients to review its compliance or performance, as well as its records, at the client's discretion. In most cases, if a deficiency is found by a reviewing agency, WD Services' will work with the reviewing agency to agree upon the steps to be taken to bring our program into compliance with applicable regulatory requirements. In the case of any deficiency, however, a client may take a number of adverse actions against WD Services, including: (i) termination or modification of existing contracts, (ii) prevention of receipt of new contracts or extension of existing contracts or (iii) reduction of fees paid under existing contract.

Billing Requirements

In WD Services, particularly in Europe, our contracts are subject to stringent claims and invoice processing regimes which vary depending on the customer and nature of the payment mechanism. Under European procurement legislation which has been implemented in each EU member state, any conviction for fraud can result in a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. For more information on the risks related to a failure to comply with applicable government coding and billing rules, see "Risk Factors—Regulatory Risks—Our segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results."

Brexit

On June 23, 2016, the UK held a referendum in which eligible persons voted in favor of a proposal that the UK leave the EU, also known as "Brexit". The result of the referendum increased political and economic uncertainty in the UK for the foreseeable future, in particular during any period where the terms of any UK exit from the EU are negotiated. In turn, Brexit could cause disruptions to and create uncertainty surrounding our business, including affecting our relationships with our existing and future payers and employees, which could have an adverse effect on our financial results, operations and prospects, including being adversely affected in ways that cannot be anticipated at present. For more information on the risks related to the UK's exit from the European Union, see "Risk Factors—Regulatory Risks—Our business could be adversely affected by the referendum on the UK's exit from the European Union."

Additional Information

The Company's website at www.prscholdings.com provides access to its periodic reports, certain corporate governance documents, press releases, interim shareholder reports and links to its subsidiaries' websites. The Company makes available to the public on its website its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after it electronically files such material with, or furnishes such material to, the SEC. Copies are also available, without charge, upon request to The Providence Service Corporation, 700 Canal Street, Third Floor, Stamford, CT 06902, (203) 307-2800, Attention: Corporate Secretary. The information contained on our website is not part of, and is not incorporated by reference in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 1A. Risk Factors.

You should consider and read carefully all of the risks and uncertainties described below, as well as other information included in this Annual Report on Form 10-K, including our consolidated financial statements and related notes. The risks described below are not the only ones facing us. The occurrence of any of the following risks or additional risks and uncertainties not presently known to us or that we currently believe to be immaterial could materially and adversely affect our business, financial condition and results of operations. This Annual Report on Form 10-K also contains forward-looking statements and estimates that involve risks and uncertainties. Our actual results could differ materially from those anticipated in any forward-looking statements as a result of specific factors, including the risks and uncertainties described below.

Risks Related to Our Business

There can be no assurance that our contracts will survive until the end of their stated terms, or that upon their expiration will be renewed or extended on satisfactory terms, if at all. Disruptions to, the early expiration of or the failure to renew our contracts could have a material adverse impact on our financial condition and results of operations.

Our NET Services contracts, and certain WD Services contracts, are subject to frequent renewal. For example, many of the state Medicaid contracts held by NET Services, which represented 55.9% of NET Services revenue for the year ended December 31, 2017, have terms ranging from three to five years and are typically subject to a competitive bidding process near the end of the term. NET Services also contracts with MCOs, which represented 44.1% of NET Services revenue for the year ended December 31, 2017. MCO contracts typically continue until terminated by either party upon reasonable notice (as determined in accordance with the contract). We cannot anticipate if, when or to what extent we will be successful in renewing our state government contracts or retaining our MCO contracts. During 2017, we experienced a decline in operating income as a percentage of revenue due to the nonrenewal of certain state contracts. In addition, with respect to many of our contracts, the payer may terminate the contract without cause, at will and without penalty to the payer, either immediately or upon the expiration of a short notice period in the event that, among other reasons, government appropriations supporting the programs serviced by the contract are reduced or eliminated or the payer deems our performance under the contract to be unsatisfactory.

We cannot anticipate if, when or to what extent a payer might terminate its contract with us prior to its expiration, or fail to renew or extend a contract with us. If we are unable to retain or renew our contracts, or replace lost contracts, on satisfactory terms our financial conditions and results of operations could be materially adversely affected. While we pursue new contract awards and also undertake efficiency measures, there can be no assurance that such measures will fully offset the impact of contracts that are not renewed or are cancelled on our operating income and results of operations.

We obtain a significant portion of our business through responses to government requests for proposals and we may not be awarded contracts through this process in the future, or contracts we are awarded may not be profitable.

We obtain, and will continue to seek to obtain, a significant portion of our business from national, state, and local government entities. To obtain business from government entities, we are often required to respond to requests for proposals ("RFPs"). To propose effectively, we must accurately estimate our cost structure for servicing a proposed contract, the time required to establish operations and the terms of the proposals submitted by competitors. We must also assemble and submit a large volume of information within rigid and often short timetables. Our ability to respond successfully to RFPs will greatly impact our business. If we misinterpret bid requirements as to performance criteria or do not accurately estimate performance costs in a binding bid for an RFP, we will seek to correct such mistakes in the final contract. However, there can be no assurance that we will be able to modify the proposed contract and we may be required to perform under a contract that is not profitable.

WD Services' ability to win contracts to administer and manage programs traditionally administered by government employees is also dependent on the impact of government unions. Many WD Services government employees belong to labor unions with considerable financial resources and lobbying networks. Union opposition could result in our losing government contracts, being precluded from providing services under government contracts, or maintaining or renewing existing contracts. If we could not renew certain contracts or obtain new contracts due to opposition political actions, it could have a material adverse impact on our operating results.

If we fail to satisfy our contractual obligations, we could be liable for damages and financial penalties, which may place existing pledged performance and payment bonds at risk as well as harm our ability to keep our existing contracts or obtain new contracts and future bonds.

Our failure to comply with our contractual obligations could, in addition to providing grounds for immediate termination of the contract for cause, negatively impact our financial performance and damage our reputation, which, in turn, could have a

material adverse effect on our ability to maintain current contracts or obtain new contracts. The termination of a contract for cause could, for instance, subject us to liabilities for excess costs incurred by a payer in obtaining similar services from another source. In addition, our contracts require us to indemnify payers for our failure to meet standards of care, and some of them contain liquidated damages provisions and financial penalties that we must pay if we breach these contracts.

Our failure to meet contractual obligations could also result in substantial actual and consequential financial damages. For example, on January 25, 2018, the MOJ released a report on reoffending statistics for certain offenders who entered probation services during the period October 2015 to March 2016. The report provides statistics for all providers of probation services, including our subsidiary RRP, which is in our WD Services segment. This information is the second data set that is utilized to determine performance payments under the various providers' transforming rehabilitation contracts with the MOJ, as the actual rates of recidivism are compared to benchmark rates established by the MOJ. Performance payments and penalties are linked to two separate measures of recidivism - the binary measure and the frequency measure. The binary measure defines the percentage of offenders within a cohort, formed quarterly, who reoffend in the following 12 months. The frequency measure defines the average number of offenses committed by reoffenders within the same 12-month measurement period. The performance for the frequency measure for most providers has been below the benchmarks established by the MOJ. As a result, RRP could be required to make payments to the MOJ and the amounts of such payments could be material. The amount of potential payments to the MOJ, if any, under RRP's contracts with the MOJ cannot be estimated at this time, as the MOJ is reviewing the data to understand the underlying reasons for the increase in certain rates of recidivism and other factors that could impact the contractual measure.

Any acquisition or integration that we undertake could disrupt our business, not generate anticipated results, dilute stockholder value or have a material adverse impact on our operating results.

We endeavor to ensure our acquisition strategy and alignment of resources serves to enhance shareholder value, which could result in changes to our strategy or to the way in which we deploy resources across Providence. We have made, and anticipate that we will continue to make, acquisitions. The Company typically incurs costs related to acquisitions and integrations, including third-party costs, whether or not the acquisition or integration is completed, which can have a material adverse impact on our operating results. The success of an acquisition depends in part on our ability to integrate an acquired company into our business operations. Integration of any acquired companies will place significant demands on our management, systems, internal controls and financial and physical resources. This could require us to incur significant expense for, among other things, hiring additional qualified personnel, retaining professionals to assist in developing the appropriate control systems and expanding our information technology infrastructure. The nature of our business is such that qualified management personnel can be difficult to find. Our inability to manage growth effectively could have a material adverse effect on our financial results.

There can be no assurance that the companies acquired will generate income or incur expenses at the historical or projected levels on which we based our acquisition decisions, that we will be able to maintain or renew the acquired companies' contracts, that we will be able to realize operating and economic efficiencies upon integration of acquired companies or that the acquisitions will not adversely affect our results of operations or financial condition.

We continually review opportunities to acquire other businesses that would complement our current services, expand our markets or otherwise offer prospects for growth. In connection with our acquisition strategy, we could issue stock that would dilute existing stockholders' percentage ownership, or we could incur or assume substantial debt or contingent liabilities. Acquisitions involve numerous risks, including, but not limited to, the following:

- challenges and unanticipated costs assimilating the acquired operations;
- known and unknown legal or financial liabilities associated with an acquisition;
- diversion of management's attention from our core businesses;
- adverse effects on existing business relationships with customers;
- entering markets in which we have limited or no experience;
- potential loss of key employees of purchased organizations;
- incurrence of excessive leverage in financing an acquisition;
- failure to maintain and renew contracts and other revenue streams of the acquired business;
- costs associated with litigation or other claims arising in connection with the acquired company;
- unanticipated operating, accounting or management difficulties in connection with an acquisition; and
- dilution to our earnings per share.

We cannot assure you that we will be successful in overcoming problems encountered in connection with any acquisition or integration and our inability to do so could disrupt our operations and adversely affect our business. Our failure to address these risks or other problems encountered in connection with past or future acquisitions and investments could cause us to fail

to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities and harm our business generally.

We may be unable to realize the benefits of any strategic initiatives that are adopted by the Company.

From time to time we may launch strategic initiatives in order to enhance shareholder value. For example, in 2017, NET Services pursued a strategic initiative to enhance member satisfaction and drive greater operational efficiencies. The implementation of the initiative is expected to be substantially completed by the end of 2018. Also in 2017, in order to build upon its leadership position in the UK employment services industry, enhance client satisfaction and drive greater operational efficiencies, WD Services substantially completed the Ingeus Futures program. In addition, we are actively evaluating the optimal industry sectors, such as the non-emergency medical transportation industry and others in which businesses complementary to our NET Services business operate, around which to focus our go-forward merger and acquisition activity, in an attempt to direct our capital towards those areas most likely to drive long-term value creation and generate the highest levels of return for our shareholders. The outcome of this active evaluation may impact the extent and manner in which we deploy resources across Providence, including strategic and administrative resources between Corporate and Other and our operating segments. There can be no assurance as to whether any strategic initiatives will be adopted as a result of this evaluation, and the outcome of any current or future strategic initiatives is uncertain.

Our investments in any joint ventures and unconsolidated entities could be adversely affected by our lack of sole decision-making authority, our reliance on our joint venture partners' financial condition, any disputes that may arise between us and our joint venture partners and our exposure to potential losses from the actions of our joint venture partners.

We currently hold a noncontrolling interest in Matrix, which constitutes 24.0% of our consolidated assets. We do not have unilateral power to direct the activities that most significantly impact such business' economic performance. Our future growth may depend, in part, on future similar arrangements, any of which could be material to our financial condition and results of operations. These arrangements involve risks not present with respect to our wholly-owned subsidiaries, which may negatively impact our financial condition and results of operations or make the arrangements less successful than anticipated, including the following:

- we may be unable to take actions that we believe are appropriate but are opposed by our joint venture partners under arrangements that require us to cede or share decision-making authority over major decisions affecting the ownership or operation of the joint venture and any property owned by the joint venture, such as the sale or financing of the business or the making of additional capital contributions for the benefit of the business;
- our joint venture partners may take actions that we oppose;
- we may be unable to sell or transfer our interest in a joint venture to a third party if we fail to obtain the prior consent of our joint venture partners;
- our joint venture partners may become bankrupt or fail to fund their share of required capital contributions, which could adversely impact the joint venture or increase our financial commitment to the joint venture;
- our joint venture partners may have business interests or goals with respect to a business that conflict with our business interests and goals, including with respect to the timing, terms and strategies for investment, which could increase the likelihood of disputes regarding the ownership, management or disposition of the business;
- disagreements with our joint venture partners could result in litigation or arbitration that increases our expenses, distracts our officers and directors, and disrupts the day-to-day operations of the business, including the delay of important decisions until the dispute is resolved; and
- we may suffer losses as a result of actions taken by our joint venture partners with respect to our joint venture investments.

We derive a significant amount of our revenues from a few payers, which puts our financial condition and results of operations at risk. Any changes in the funding, financial viability or our relationships with these payers could have a material adverse impact on our financial condition and results of operations.

We generate a significant amount of the revenues in our segments from a few payers under a small number of contracts. For example, for the years ended December 31, 2017, 2016 and 2015, we generated 46.7%, 47.9% and 54.6%, respectively, of our consolidated revenue from ten payers. Additionally, five payers related to NET Services represented, in the aggregate, 36.1%, 35.6% and 39.2%, respectively, of NET Services revenue for the years ended December 31, 2017, 2016 and 2015. A single payer related to WD Services represented 27.1%, 28.9% and 40.0% of our WD Services revenue for the years ended December 31, 2017, 2016 and 2015, respectively. Additionally, a single payer related to Matrix represented 30.9%, 27.8% and 31.1% of Matrix revenue for the years ended December 31, 2017, 2016 and 2015, respectively. The loss of, reduction in amounts generated by, or changes in methods or regulations governing payments for our services under these contracts could have a material adverse impact on our

revenue and results of operations. In addition, any consolidation of any of our private payers could increase the impact that any such risks would have on our revenue and results of operations.

If we fail to estimate accurately the cost of performing certain contracts, we may experience reduced or negative margins.

During 2017, 2016 and 2015, 77.9%, 78.3% and 83.6% of our NET Services revenue, respectively, was generated under capitated contracts with the remainder generated through FFS and flat fee contracts. WD Services also provides services under FFS and flat fee contracts. Under most of NET Services' capitated contracts, we assume the responsibility of managing the needs of a specific geographic population by contracting out transportation services to local transportation companies on a per ride or per mile basis. We use "pricing models" to determine applicable contract rates, which take into account factors such as estimated utilization, state specific data, previous experience in the state or with similar services, the medically covered programs outlined in the contract, identified populations to be serviced, estimated volume, estimated transportation provider rates and availability of mass transit. The amount of the fixed per-member, monthly fee is determined in the bidding process, but is predicated on actual historical transportation data for the subject geographic region as provided by the payer, actuarial work performed in-house as well as by third party actuarial firms and actuarial analysis provided by the payer. If the utilization of our services is more than we estimated, the contract may be less profitable than anticipated, or may not be profitable at all. Under our FFS contracts, we receive fees based on our interactions with government-sponsored clients. To earn a profit on these contracts, we must accurately estimate costs incurred in providing services. Our risk relating to these contracts is that our client population is not large enough to cover our fixed costs, such as rent and overhead. Our FFS contracts are not reimbursed on a cost basis and therefore, if we fail to estimate our costs accurately, we may experience reduced margins or losses on these contracts. Revenue under certain contracts may be adjusted prospectively if client volumes are below expectations. If the Company is unable to adjust its costs accordingly, our profitability may be negatively impacted. In addition, certain contracts with state Medicaid agencies are renewable at the state's option without an adjustment to pricing terms. If such renewed contracts require us to incur higher costs, including inflation or regulatory changes, than originally anticipated, our results of operations and financial condition may be adversely affected.

In WD Services, we often provide services to a client based on a unit price for delivery of a service or achievement of a defined outcome. If we fail to estimate costs accurately, we may have minimal ability to change the unit price to ensure profitability. While we may be able to alter our cost structure to reflect lower than anticipated volumes and other changes in service needs, there are certain fixed costs which are difficult to alter while still ensuring we can meet our contractual obligations. Further, many contracts require us to undertake significant onboarding projects, including making redundancies and changes to properties and IT. If we fail to anticipate the cost of these change programs, we may be unable to recover startup costs throughout the life of the contract. During the fourth quarter of 2016, WD Services recorded asset impairment charges of $19.6 million, which related, in part, to lower revenue and unanticipated costs for a recent contract. If WD Services continues to experience lower than expected volumes and unfavorable service mix shifts, it could result in additional impairment charges. For more information on the risks related to impairment of goodwill, see "Risk Factors—Risks Related to Our Business—Our reported financial results could suffer if there is an impairment of long-lived assets."

We may incur costs before receiving related revenues, which could impact our liquidity.

When we are awarded a contract to provide services, we may incur expenses before we receive any contract payments. These expenses include leasing office space, purchasing office equipment, instituting information technology systems, development of supply chains, hiring personnel and releasing certain personnel. As a result, in certain contracts where the government does not fund program start-up costs, we may be required to make significant investments before receiving any related contract payments or payments sufficient to cover start-up costs. For example, WD Services incurred start-up costs in 2017 related to the UK's Work and Health Programme, and in 2016 related to the offender rehabilitation program in the UK and start-up costs in France. In addition, payments due to us from payers may be delayed due to billing cycles or as a result of failures to approve government budgets in a timely manner, which may adversely affect our liquidity. Moreover, any resulting mismatch in expenses and revenue, especially under FFS arrangements, could be exacerbated if we fail either to invoice the payer correctly or to collect our fee in a timely manner. Such amounts may exceed our available cash, and any resulting liquidity shortages may require additional financing, which may not be available on satisfactory terms, or at all. This could have a material adverse impact on our ongoing operations and our financial position.

Our business is subject to risks of litigation.

The services we provide are subject to lawsuits and claims. A substantial award payable by the Company could have a material adverse impact on our operations and cash flows, and could adversely impact our ability to continue to purchase appropriate liability insurance. We can be subject to claims for negligence or intentional misconduct (in addition to professional liability type claims) by an employee or a third party we engage to assist with the provision of services, including but not limited to claims arising out of accidents involving vehicle collisions, workforce development placements or CHAs and various claims that could

result from employees or contracted third parties driving to or from interactions with clients or while providing direct client services. We can be subject to employee-related claims such as wrongful discharge, discrimination or a violation of equal employment laws and permitting issues. While we attempt to insure against for these types of claims, damages exceeding our insurance limits or outside our insurance coverage, such as a claim for fraud, certain wage and hour violations or punitive damages, could adversely affect our cash flow and financial condition.

We face risks related to attracting and retaining qualified employees and labor relations.

Our success depends to a significant degree on our ability to identify, attract, develop, motivate and retain highly qualified and experienced professionals who possess the skills and experience necessary to deliver high-quality services to our clients, with the continued contributions of our senior management being especially critical to our success. Our objective of providing the highest quality of service to our clients is a significant consideration when we evaluate the education, experience and qualifications of potential candidates for employment as direct care and administrative staff. A portion of our staff are professionals with requisite educational backgrounds and professional certifications. These employees are in great demand and are likely to remain a limited resource for the foreseeable future.

Our ability to attract and retain employees with the requisite experience and skills depends on several factors including, but not limited to, our ability to offer competitive wages, benefits and professional growth opportunities. While we have established programs to attract new employees and provide incentives to retain existing employees, particularly our senior management, we cannot assure you that we will be able to attract new employees or retain the services of our senior management or any other key employees in the future. In particular, we are currently seeking to fill several key management positions in our NET Services business, and we expect to continue to need to attract key employees to support the growth of our businesses. Some of the companies with which we compete for experienced personnel may have greater financial, technical, political and marketing resources, name recognition and a larger number of clients and payers than we do, which may prove more attractive to employment candidates. The inability to attract and retain experienced personnel could have a material adverse effect on our business.

The performance of each of our business segments also depends on the talents and efforts of our highly skilled information technology professionals. For example, technological improvement is a key component of the strategic initiative at NET Services to enhance member satisfaction and drive greater operational efficiencies and as NET Services expands our transportation network capacity beyond its traditional transportation provider network, increases on-time and on-demand performance, provides real time analytics and minimizes cancellations. Competition for skilled intellectual technology professionals can be intense. Our success depends on our ability to recruit, retain and motivate these individuals.

Effective succession planning is also important to our future success. If we fail to ensure the effective transfer of senior management knowledge and smooth transitions involving senior management, including the appointment of a new chief executive officer for the Company (as our chief executive officer terminated his role during the fourth quarter of 2017) and the transition of several key management positions, including the chief technology officer, in our NET Service business, our ability to execute short and long-term strategic, financial and operating goals, as well as our business, financial condition and results of operations generally, could be adversely affected.

In addition, our businesses rely on maintaining strong relationships with our employees and avoiding labor disputes. Certain of our UK employees are members of the NAPO and Unison unions and certain of our employees in France are members of the Confederation Generale du Travail. Unionized employees in both countries have collective bargaining rights. Participation in unions is confidential under European employment laws. While we believe we have good relationships with our employees, both unionized and non-unionized, in the U.S. and internationally, including the unions that represent some of our employees, a work stoppage due to our failure to renegotiate union contracts or for other reasons could have a significant negative effect on us. In addition, should additional portions of our workforce be subject to collective bargaining agreements, this could result in increased costs of doing business as we may be subject to mandatory, binding arbitration of labor scheduling, costs and standards and we may therefore have reduced operating flexibility.

We may have difficulty successfully completing divestitures or exiting businesses.

As demonstrated in 2017 with the sale of our interests in Mission Providence Pty Ltd to Konekt Limited, in 2016 with the Matrix Transaction and in 2015 with the Human Services Sale, we may dispose of all or a portion of our investments or exit businesses based on a variety of factors, including availability of alternative opportunities to deploy capital or otherwise maximize shareholder value as well as other strategic considerations. A divestiture or business termination could result in difficulties in the separation of operations, services, products and personnel, the diversion of management's attention, the disruption of our business and the potential loss of key employees and customers. A divestiture or business termination may be subject to the satisfaction of pre-closing conditions as well as to obtaining necessary regulatory and government approvals, which, if not satisfied or obtained,

may prevent us from completing the disposition or business termination, whether or not the disposition or business termination has been publicly announced. A divestiture or business termination may also involve continued financial involvement in the divested assets and businesses, such as indemnities or other financial obligations, including continuing obligations to employees, in which the performance of the divested assets or businesses could impact our results of operations. From time to time the Company guarantees the contractual payment or performance obligations of its segments. An inability to obtain waiver or termination of such guarantees may prevent us from completing a disposition or business termination, or may result in continued financial involvement in divested assets and businesses. Further, such divestitures may result in proceeds to us in an amount less than we expect or less than our assessment of the value of those assets. Any sale of our assets could result in a loss on divestiture. Any of the foregoing could adversely affect our financial condition and results of operations.

The indemnification provisions of acquisition and disposition agreements by which we have acquired or sold companies may result in liabilities.

We rely heavily on the representations and warranties and related indemnities provided to us by the sellers of acquired companies, including as they relate to creation, ownership and rights in intellectual property and compliance with laws and contractual requirements. However, the liability of the former owners is limited under the relevant acquisition agreements, and certain sellers may be unable to meet their indemnification responsibilities. Similarly, the purchasers of our divested operations may from time to time agree to indemnify us for operations of such businesses after the closing. We cannot be assured that any of these indemnification provisions will fully protect us, and as a result we may face unexpected liabilities that adversely affect our consolidated results of operations, financial condition and cash flows.

In addition, we have provided certain indemnifications in connection with the Human Services Sale in 2015 and the Matrix Transaction in 2016. To the extent we choose to divest other operations of our businesses in the future, we expect to provide certain indemnifications in connection with these divestitures. We may face liabilities in connection with these current or future indemnification obligations that may adversely affect our consolidated results of operation, financial condition and cash flows. We have entered into a settlement with Molina Healthcare Inc. (“Molina”), the purchaser of our former Human Services segment, regarding the settlement of certain potential indemnification claims. As of December 31, 2017, the accrual is $15.0 million with respect to an estimate of loss for such potential indemnification claims. Litigation is inherently uncertain, and the losses incurred in the event that the legal proceedings related to such claims were to result in unfavorable outcomes could have a material adverse effect on the Company’s business and financial performance. For more information on these potential indemnification obligations, see Note 18, Commitments and Contingencies, to our consolidated financial statements.

Our success depends on our ability to compete effectively in the marketplace.

We compete for clients and for contracts with a variety of organizations that offer similar services. Many organizations of varying sizes compete with us, including local not-for-profit organizations and community-based organizations, larger companies, organizations that currently provide or may begin to provide similar NET management services (including transportation network companies like Uber and Lyft), and large multi-national corporations that currently provide or may begin to provide workforce development services and CHA providers. Some of these companies may have greater financial, technical, political, marketing, name recognition and other resources and a larger number of clients or payers than we do. In addition, some of these companies offer more services than we do. To remain competitive, we must provide superior services and performance on a cost-effective basis to our customers.

The market in which we operate is influenced by technological developments that affect cost-efficiency and quality of services, and the needs of our customers change and evolve regularly. Accordingly, our success depends on our ability to develop services that address these changing needs and to provide technology needed to deliver these services on a cost-effective basis. Our competitors may better utilize technology to change the way services in our industry are designed and delivered and they may be able to provide our customers with different or greater capabilities than we can provide, including better contract terms, technical qualifications, price and availability of qualified professional personnel. In addition, new or disruptive technologies and methodologies by our competitors may make our services uncompetitive.

In conjunction with our initiatives to improve cost-efficiency, we incur substantial costs to develop technology, which may not ultimately serve our business purposes or lower costs. For example, in 2016, WD Services incurred a write-off of in-process technology of $3.1 million related to our legal offender rehabilitation services, as it was determined the system would not meet our business needs. As of December 31, 2017, NET Services has incurred $11.9 million of development in progress costs related to its LCAD NextGen technology system, which is a critical component of its initiative to progress towards an industry-leading call center and reservation scheduling platform, improve member communication, accessibility, and satisfaction, optimize the utilization of our extensive network of transportation providers and build the foundation for additional analytical capabilities.

The system has not been placed into service, and a review of the project is ongoing. In addition, we made a cost-method investment of $3.0 million during 2017, in Circulation, a technology-based transportation services provider.

We have experienced, and expect to continue to experience, competition from new entrants into the markets in which we operate. Increased competition may result in pricing pressures, loss of or failure to gain market share or loss of or failure to gain clients or payers, any of which could have a material adverse effect on our operating results. Our business may also be adversely affected by the consolidation of competitors, which may result in increased pricing pressure or negotiating leverage with payers, or by the provision of our services by payers or clients directly, including through the acquisition of competitors.

We may be adversely impacted by inadequacies in, or security breaches of, our information technology systems.

Our information technology systems are critically important to our operations and we must implement and maintain appropriate and sufficient infrastructure and systems to support growth and business processes. We provide services to individuals, including services that require us to maintain sensitive and personal client information, including information relating to their health, social security numbers and other identifying data. Therefore, our information technology systems store client information protected by numerous federal, state and foreign regulations. We also rely on our information technology systems (some of which are outsourced to third parties) to manage the data, communications and business processes for all other functions, including our marketing, sales, logistics, customer service, accounting and administrative functions. Further, our systems include interfaces to third-party stakeholders, often connected via the Internet. In addition, certain of our services or information related to our services are carried out or hosted within our customers' IT systems, and any failure or weaknesses in their IT systems may negatively impact our ability to deliver the services, for which we may not receive relief from contractual performance obligations or compensation for services provided. As a result of the data we maintain and third-party access, we are subject to increasing cybersecurity risks. The nature of our business, where services are often performed outside a secured location, adds additional risk.

If we do not allocate and effectively manage the resources necessary to build, sustain and protect an appropriate technology infrastructure, our business or financial results could be negatively impacted. Furthermore, computer hackers and data thieves are increasingly sophisticated and operate large scale and complex automated attacks and our information technology systems may be vulnerable to material security breaches (including the access to or acquisition of customer, employee or other confidential data), cyber-based attacks or other material system failures. Because the techniques used to obtain unauthorized access or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to implement adequate preventative measures sufficient to prevent a breach of our systems and protect sensitive data. Any breach of our data security could result in an unauthorized release or transfer of customer or employee information, or the loss of valuable business data or cause a disruption in our business. A failure to prevent, detect and respond in a timely manner to a major breach of our data security or to other cybersecurity threats could result in system disruption, business continuity issues or compromised data integrity. These events or any other failure to safeguard personal data could give rise to unwanted media attention, damage our reputation, damage our customer relationships and result in lost sales, fines or lawsuits. We may also be required to expend significant capital and other resources to protect against or respond to or alleviate problems caused by a security breach. If we are unable to prevent material failures, our operations may be impacted, and we may suffer other negative consequences such as reputational damage, litigation, remediation costs, a requirement not to operate our business until defects are remedied or penalties under various data privacy laws and regulations, any of which could detrimentally affect our business, financial condition and results of operations.

Failure to protect our client's privacy and confidential information could lead to legal liability, adversely affect our reputation and have a material adverse effect on our business, financial condition and results of operations.

We retain confidential information in our computer systems, including personal information about our customers, such as names, addresses, phone numbers, email addresses, identification numbers and payment account information. Malicious cyber attacks to gain access to personal information affect many companies across various industries, including ours. Pursuant to federal and state laws, various government agencies have established rules protecting the privacy and security of personal information. In addition, most states have enacted laws, which vary significantly from jurisdiction to jurisdiction, to safeguard the privacy and security of personal information. An increasing number of states require that customers be notified if a security breach results in the inappropriate disclosure of personally identifiable customer information. Any compromise of the security of our systems that results in the disclosure of personally identifiable customer or employee information or inadvertent disclosure of any clients' personal information could damage our reputation, deter people from using our services, expose us to litigation, increase regulatory scrutiny and require us to incur significant technical, legal and other expenses. In addition, data breaches impacting other companies, such as our vendors, may allow cybercriminals to obtain personally identifiable information about our customers. Cybercriminals may then use this information to, among other things, attempt to gain unauthorized access to our customers' accounts, which could have a material adverse effect on our reputation, business, results of operations or financial condition.

Failure to maintain or to develop further reliable, efficient and secure information technology systems would be disruptive to our operations and diminish our ability to compete and grow our business successfully.

We are highly dependent on efficient and uninterrupted performance of our information technology and business systems. These systems quote, process and service our business, and perform financial functions necessary for pricing and service delivery. These systems must also be able to undergo periodic modifications and improvements without interruptions or untimely delays in service. Additionally, our ability to integrate our systems with those of our clients is critical to our success. Our information systems rely on the commitment of significant financial and managerial resources to maintain and enhance existing systems as well as develop and create new systems to keep pace with continuing changes in information processing technology or evolving industry and regulatory requirements. However, we still rely on manual processes and procedures, including accounting, reporting and consolidation processes that may result in errors and may not scale proportionately with our business growth.

A failure or delay to achieve improvements in our information technology platforms could interrupt certain processes or degrade business operations and could place us at a competitive disadvantage. If we are unable to implement appropriate systems, procedures and controls, we may not be able to successfully offer our services and grow our business and account for transactions in an appropriate and timely manner, which could have an adverse effect on our business, financial condition and results of operations.

There are risks associated with our international operations that are different from the risks associated with our operations in the U.S., and our exposure to the risks of a global market could hinder our ability to maintain and expand international operations.

We have operation centers in Australia, Canada, France, Germany, Saudi Arabia, Singapore, South Korea, Switzerland, the UK and the U.S. and a noncontrolling interest in a joint venture in Spain. In implementing our international strategy, we may face barriers to entry and competition from local companies and other companies that already have established global businesses, as well as the risks generally associated with conducting business internationally. The success and profitability of international operations are subject to numerous risks and uncertainties, many of which are outside of our control, such as:

- political or economic instability;
- changes in governmental regulation or taxation;
- currency exchange fluctuations;
- difficulties and costs of staffing and managing operations in certain foreign countries, including potential pension and social plan liabilities;
- work stoppages or other changes in labor conditions; and
- taxes and other restrictions on repatriating foreign profits back to the U.S.

In addition, changes in policies or laws of the U.S. or foreign governments resulting in, among other changes, higher taxation, tariffs or similar protectionist laws could reduce the anticipated benefits of international operations and could have a material adverse effect on our results of operations and financial condition. We have currency exposure arising from both sales and purchases denominated in foreign currencies, including intercompany transactions outside the U.S., and we currently do not conduct hedging activities. The value of the U.S. dollar against other foreign currencies has seen significant volatility recently. Our financial condition and results of operations are reported in multiple currencies, and are then translated into U.S. dollars at the applicable exchange rate for inclusion in our consolidated financial statements. Appreciation of the U.S. dollar against these other currencies will have a negative impact on our reported net revenue and operating income while depreciation of the U.S. dollar against such currencies will have a positive effect on reported net revenue and operating income. We cannot predict with precision the effect of future exchange-rate fluctuations on our business and operating results, and significant rate fluctuations could have a material adverse effect on our results of operations and financial condition.

Our results of operations will continue to fluctuate due to seasonality.

NET Services operating results and operating cash flows normally fluctuate as a result of seasonal variations in our business. Due to higher demand in the summer months and lower demand in the winter months, coupled with a primarily fixed revenue stream based on a per-member, per-month payment structure, NET Services normally experiences lower operating margins during the summer season and higher operating margins during the winter season. WD Services typically does not experience seasonal fluctuations in operating results. However, volatility in revenue and earnings is common in the case of WD Services due to the timing of commencement and expiration of certain major contracts as well as fluctuations in referrals provided by its customers.

Our reported financial results could suffer if there is an impairment of long-lived assets.

Goodwill may be impaired if the estimated fair value of one or more of our reporting units is less than the carrying value of the respective reporting unit. As a result of our growth, in part through acquisitions, goodwill and other intangible assets represent a significant portion of our assets. We perform an analysis on our goodwill balances to test for impairment on an annual basis. Interim impairment tests may also be required in advance of our annual impairment test if events occur or circumstances change that would more likely than not reduce the fair value, including goodwill, of one or more of our reporting units below the reporting unit's carrying value. Such circumstances could include but are not limited to: (1) loss of significant contracts, (2) a significant adverse change in legal factors or in the climate of our business, (3) unanticipated competition, (4) an adverse action or assessment by a regulator or (5) a significant decline in our stock price. In the fourth quarter of 2016, we recorded asset impairment charges of $19.6 million related to WD Services and an asset impairment of $1.4 million for Corporate and Other related to the sale of a building, as discussed below in Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates". As of December 31, 2017, the carrying value of goodwill, intangibles and property and equipment, net is $121.7 million, $43.9 million and $50.4 million, respectively. In addition, property and equipment as of December 31, 2017 includes $13.4 million of construction and development in progress, primarily related to NET Services' LCAD NextGen technology system, as discussed above. We continue to monitor the carrying value of these long-lived assets. Any future impairment charges could have a material adverse impact on our results of operations and financial position.

Our use of a reinsurance program and insurance programs to cover certain claims for losses suffered and costs or expenses incurred could negatively impact our business.

We reinsured a substantial portion of our automobile, general liability, professional liability and workers' compensation insurance policies through May 15, 2017. Upon renewal of the policies, we made the decision to no longer reinsure these risks, although we continue to resolve claims under the historical policy years. Through February 15, 2011, one of our subsidiaries also insured certain general liability, automobile liability, and automobile physical damage coverage for independent third-party transportation providers. In the event that actual reinsured losses increase unexpectedly and substantially exceed actuarially determined estimated reinsured losses under the program, the aggregate of such losses could materially increase our liability and adversely affect our financial condition, liquidity, cash flows and results of operations.

In addition, under our current insurance policies, we are subject to deductibles, and thus retain exposure within these limits. In the event that actual losses within our deductible limits increase unexpectedly and substantially exceed our expected losses, the aggregate of such losses could materially increase our liability and adversely affect our financial condition, liquidity, cash flows and results of operations.

As the availability to us of certain traditional insurance coverage diminishes or increases in cost, we will continue to evaluate the levels and types of insurance coverage we include in our reinsurance and self-insurance programs, as well as the deductible limits within our traditional insurance programs. Any increase to these reinsurance and self-insurance programs or increases in deductible limits increases our risk exposure and therefore increases the risk of a possible material adverse effect on our financial condition, liquidity, cash flows and results of operations.

Inaccurate, misleading or negative media coverage could damage our reputation and harm our ability to maintain or procure contracts.

There is sometimes media coverage regarding services that we or our competitors provide or contracts that we or our competitors are a party to. Inaccurate, misleading or negative media coverage about us could harm our reputation and, accordingly, our ability to maintain our existing contracts or procure new contracts. In addition, negative media coverage could influence government officials to slow the pace of privatizing or retendering government services.

Regulatory Risks

Our U.S. Healthcare Segments conduct business in a heavily regulated healthcare industry. Compliance with existing Laws is costly, and changes in Laws or violations of Laws may result in increased costs or sanctions that could reduce our segments' revenue and profitability.

The U.S. healthcare industry is subject to extensive federal and state Laws relating to, among other things:

- professional licensure;
- conduct of operations;
- addition of facilities, equipment and services, including certificates of need;
- coding and billing related to our services; and
- payment for services.

Both federal and state government agencies have increased coordinated civil and criminal enforcement efforts related to the healthcare industry. Regulations related to the healthcare industry are extremely complex and, in many instances, the industry does not have the benefit of significant regulatory or judicial interpretation of those laws. The Patient Protection and Affordable Care Act, as well as the anticipated attempts to repeal all or portions of those laws by the President and Congress, has also introduced some degree of regulatory uncertainty as the industry does not know how the changes it introduced or changes to it will affect many aspects of the industry. Medicare and Medicaid anti-fraud and abuse laws prohibit certain business practices and relationships related to items and services reimbursable under Medicare, Medicaid and other governmental healthcare programs, including the payment or receipt of remuneration to induce or arrange for referral of patients or recommendation for the provision of items or services covered by Medicare or Medicaid or any other federal or state healthcare program. Federal and state Laws prohibit the submission of false or fraudulent claims, including claims to obtain reimbursement under Medicare and Medicaid. Our U.S. Healthcare Segments have implemented compliance policies to help assure their compliance with these regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations of impropriety or illegality or could require such segments to make changes in their facilities, equipment, personnel, services or the manner in which they conduct our business.

Changes in budgetary priorities of the government entities that fund the services our segments provide could result in our segments' loss of contracts or a decrease in amounts payable to them under their contracts.

Our segments' revenue is largely derived from contracts that are directly or indirectly paid or funded by government agencies. All of these contracts are subject to legislative appropriations and state or national budget approval. The availability of funding under NET Services' contracts with state governments is dependent in part upon federal funding to states. Changes in Medicaid methodology may further reduce the availability of federal funds to states in which our U.S. Healthcare Segments provide services. The President of the United States and Congress have proposed various changes to the Medicaid program, including considering converting the Medicaid program to a block grant format or capping the federal contribution to state Medicaid programs to a fixed amount per beneficiary. The Centers for Medicare and Medicaid Services ("CMS") has the ability to grant waivers to states relative to the parameters of their Medicaid programs. Such changes, individually or in the aggregate could have a material adverse effect on our U.S. Healthcare Segments operations.

Among the alternative Medicaid funding approaches that states have explored are provider assessments as tools for leveraging increased Medicaid federal matching funds. Provider assessment plans generate additional federal matching funds to the states for Medicaid reimbursement purposes, and implementation of a provider assessment plan requires approval by CMS in order to qualify for federal matching funds. These plans usually take the form of a bed tax or a quality assessment fee, which were historically required to be imposed uniformly across classes of providers within the state, except that such taxes only applied to Medicaid health plans.

Changes to provider assessment opportunities, the Medicaid programs in states in which our U.S. Healthcare Segments operate or in the structure of the federal government's support for those programs can impact the amount of funds available in the programs our U.S. Healthcare Segments support. Such segments cannot make any assurances that these Medicaid changes will not negatively affect the funding under their contracts. As funding under U.S. Healthcare Segments' contracts is dependent in part upon federal funding, such funding changes could have a significant effect upon such segments' businesses.

Currently, many of the U.S. states and overseas countries in which our segments operate are facing budgetary shortfalls or changes in budgetary priorities. While many of these states are dealing with budgetary concerns by shifting costs from institutional care to home and community based care such as we provide, there is no assurance that this trend will continue.

Likewise, in many of the overseas countries addressed by WD Services, particularly the UK, a continued focus following the global financial crisis on austerity measures to reduce national and local budget deficits could lead to further spending cuts or changes to welfare arrangements. This may make availability of funding for outsourcing of such services more difficult to obtain from relevant government departments, which may lead to more challenging terms and conditions, including pressure on prices or volumes of services provided.

In the UK, the low unemployment rate has led to a change in the government prioritizing employability services, and a consequent reduction in scale of the Work and Health Programme, the successor program to the Work Programme. While we have the ability to alter a portion of our cost structure to reflect the decreasing volume of these contracts during their term, there may be significant redundancy costs and management time additionally invested to reflect these changes, particularly if programs are discontinued.

Consequently, a significant decline in government expenditures, shift of expenditures or funding away from programs that call for the types of services that we provide, or change in government contracting or funding policies could cause payers to terminate their contracts with our segments or reduce their expenditures under those contracts, either of which could have a negative impact on our segments' operating results.

Our segments are subject to regulations relating to privacy and security of patient and service user information. Failure to comply with privacy and security regulations could result in a material adverse impact on our segments' operating results.

There are numerous federal and state regulations addressing patient information privacy and security concerns. In particular, the federal regulations issued under HIPAA contain provisions that:

- protect individual privacy by limiting the uses and disclosures of patient information;
- require the implementation of security safeguards to ensure the confidentiality, integrity and availability of individually identifiable health information in electronic form; and
- prescribe specific transaction formats and data code sets for certain electronic healthcare transactions.

Compliance with state and federal laws and regulations is costly and requires our segment management to expend substantial time and resources which could negatively impact our segments' results of operations. Further, the HIPAA regulations and state privacy laws expose our segments to increased regulatory risk, as the penalties associated with a failure to comply or with information security breaches, even if unintentional, could have a material adverse effect on our segments' results of operations.

Our WD Services segment has operations in many countries in Europe, and internationally, and these operations have access to significant amounts of sensitive personal information about individuals. In Europe, these operations are subject to European and national data privacy legislation which imposes significant obligations on data processors and controllers with respect to such personal information. Similar regimes exist in other WD Service jurisdictions such as Australia, Canada and South Korea. Some countries, such as Spain, France and Germany, have particularly strong privacy laws which impose even greater obligations on people handling personal information. Data protection and privacy law within the EU is changing effective May 25, 2018, from which date the EU General Data Protection Regulation ("GDPR") must be complied with. Amongst other changes the GDPR brings about an increase in the potential fines for certain breaches of the GDPR, of up to the higher of 4% of an undertaking's global turnover or €20,000,000. In addition to fining powers, data protection authorities in Europe have significant powers to require organizations that breach regulations to put in place measures to ensure that such breaches do not occur again, and require businesses to stop processing personal information until the required measures are in place. Such orders could significantly impact our business given that we are required to handle personal information as part of our service delivery model. The GDPR and other similar laws and regulations, as well as any associated inquiries or investigations or any other government actions, may be costly to comply with, result in negative publicity, increase our operating costs, require significant management time and attention, and subject us to remedies that may harm our business, including fines or demands or orders that we modify or cease existing business practices.

Our segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results.

If our segments fail to comply with federal and state documentation, coding and billing rules, our segments could be subject to criminal or civil penalties, loss of licenses and exclusion from the Medicare and Medicaid programs, which could have a material adverse impact on our segments' operating results. In billing for our segments' services to third-party payers, our segments must follow complex documentation, coding and billing rules. These rules are based on federal and state laws, rules and regulations, various government pronouncements, and industry practice. In the U.S., failure to follow these rules could result in

potential criminal or civil liability under the federal False Claims Act, under which extensive financial penalties can be imposed or under various state statutes which prohibit the submission of false claims for services covered. Compliance failure could further result in criminal liability under various federal and state criminal or civil statutes. Our segments may be subject to audits conducted by our clients or their proxies that may result in recoupment of funds. In addition, our segments' clients may be subject to certain audits that may result in recoupment of funds from our clients that may, in turn, implicate our segments' services. Our segments' businesses could be adversely affected in the event such an audit results in negative findings and recoupment from or penalties to their customers.

Our segment contracts are subject to stringent claims and invoice processing regimes which vary depending on the customer and nature of the payment mechanism. Government entities in the U.S. may take the position that if a transport cannot be matched to a healthcare event, or is conducted inconsistently with contractual, regulatory or even policy requirements, payment for such transport may be recouped by such customer. Under European procurement legislation which has been implemented in each EU member state, any conviction for fraud can result in a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. This could significantly affect our business given that most of our customers in Europe are governmental organizations. Any such breaches or deficiencies in paperwork associated with billing may also be subject to contractual clawback regimes and penalties, which can be enforced many years after the revenue has been paid by the relevant authority.

While our segments carefully and regularly review their documentation, coding and billing practices, the rules are frequently vague and confusing and they cannot assure that governmental investigators, private insurers or private whistleblowers will not challenge their practices. Such a challenge could result in a material adverse effect on our segments' financial position and results of operations.

Our segments' business could be subject to civil penalties and loss of business if we fail to comply with applicable bribery, corruption and other regulations governing business with governments.

Our U.S. Healthcare Segments are subject to the federal Anti-Kickback Statute, which prohibits the offer, payment, solicitation or receipt of any form of remuneration in return for referring, ordering, leasing, purchasing or arranging for or recommending the ordering, purchasing or leasing of items or services payable by a federally funded healthcare program. Any of our U.S. Healthcare Segments' financial relationships with healthcare providers will be potentially implicated by this statute to the extent Medicare or Medicaid referrals are implicated. Violations of the Anti-Kickback Statute could result in substantial civil or criminal penalties, including criminal fines of up to $25,000 per violation, imprisonment of up to five years, civil penalties under the Civil Monetary Penalties Law of up to $50,000 per violation, plus three times the remuneration involved, civil penalties under the False Claims Act of up to $11,000 for each claim submitted, plus three times the amounts paid for such claims and exclusion from participation in the Medicaid and Medicare programs. Any such penalties could have a significant negative effect on our U.S. Healthcare Segments' operations. Furthermore, the exclusion, if applied to such segments, could result in significant reductions in our revenues, which could materially and adversely affect such segments' businesses, financial condition and results of their operations. In addition, many states have adopted laws similar to the federal Anti-Kickback Statute with similar penalties.

As an international business whose customers are largely in the public sector, the WD Services segment generally wins work through public tender processes. Various statutes, such as the UK's Bribery Act and the Foreign Corrupt Practices Act in the U.S., generally require organizations to prohibit bribery by or for the organization and demand the implementation of systems to counter bribery, including risk management, training and guidance and the maintenance of adequate record-keeping and internal accounting practices. These statutes also, among other things, prohibit us from providing anything of value to foreign officials for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. In addition, many countries in which we operate have antitrust or competition regulations which, among other things, prohibit collusive tendering or bid-rigging behavior. Policies and procedures we implement to prevent bribery, corruption and anti-competitive conduct may not effectively prevent us from violating these regulations in every transaction in which we may engage, and such a violation could adversely affect our reputation, business, financial condition and results of operations. Any breach of bribery, corruption and collusive tendering laws could also expose our operations in Europe to a ban from participating in public procurement tenders for up to 5 years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority.

In WD Services, we conduct business in several countries, each with its own system of regulation. Compliance with existing regulations is costly, and changes in regulations or violations of regulations may result in increased costs or sanctions that could reduce our revenue and profitability.

As of December 31, 2017, our WD Services segment operated in the U.S and 10 countries outside the U.S. Each of these countries has its own national and municipal laws and regulations, and some countries such as Australia, Germany and Switzerland,

have both federal and state regulations. In the UK, certain law making powers are being devolved to Scotland, Wales and Northern Ireland. These laws can differ significantly from country to country. In addition, in Europe, countries (including the UK) are subject to European Union ("EU") laws and rules. We have implemented compliance policies to help assure our compliance with these laws and regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services or the manner in which we conduct our business.

Our segments' businesses could be adversely affected by future legislative changes that hinder or reverse the privatization of non-emergency transportation services or workforce development services.

The market for certain of our segments' services depends largely on government sponsored programs. These programs can be modified or amended at any time. Moreover, part of our growth strategy includes aggressively pursuing opportunities created by government initiatives to privatize the delivery of non-emergency transportation services and workforce development services. However, there are opponents to the privatization of these services and, as a result, future privatization is uncertain. In the UK, opposition to the government's outsourcing of the services provided by WD Services to private companies may increase in light of recent events in the UK, including the liquidation of the UK government contractor Carillion plc. In 2017, legislation was proposed in the U.S. Congress, but not passed, which would reduce or eliminate certain non-emergency medical transportation services provided by NET Services as a required Medicaid benefit. If additional privatization initiatives are not proposed or enacted, or if previously enacted privatization initiatives are challenged, repealed or invalidated, there could be a material adverse impact on our segments' operating results.

Our business could be adversely affected by the referendum on the UK's exit from the European Union.

On June 23, 2016, the UK held a referendum in which eligible persons voted in favor of a proposal that the UK leave the EU, also known as "Brexit". The result of the referendum increases political and economic uncertainty in the UK for the foreseeable future, in particular during any period where the terms of any UK exit from the EU are negotiated. In turn, Brexit could cause disruptions to and create uncertainty surrounding our business, including affecting our relationships with our existing and future payers and employees, which could have an adverse effect on our financial results, operations and prospects, including being adversely affected in ways that cannot be anticipated at present. The impact of Brexit on our business is not yet clear, and will depend on any agreements the UK makes to retain access to EU markets. Such agreements could potentially disrupt and/or destabilize the markets we serve and the tax jurisdictions in which we operate and adversely change tax benefits or liabilities in these or other jurisdictions. The terms of any UK exit from the EU could generate restriction on the movement of capital and the mobility of personnel. Depending on the outcome of negotiations between the UK and the European Union regarding the terms of Brexit (which will be negotiated over a period which may extend at least until March 2019), we may decide to alter the group's European operations to respond to new business, legal, regulatory, tax and trade environments that may result. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the UK determines which EU laws to replace, modify or replicate.

Following the referendum, there was significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against foreign currencies in which we conduct business. The strengthening of the U.S. dollar relative to the British pound and other currencies may adversely affect our results of operations as we translate sales and other results denominated in foreign currency into U.S. dollars for our financial statements. During periods of a strengthening dollar, our reported international sales and earnings could be reduced because foreign currencies may translate into fewer U.S. dollars. For the year ended December 31, 2017, revenue denominated in British pound represented 11.6% of our revenue.

Brexit may also create global economic uncertainty, which may cause our payers to closely monitor their costs and reduce their spending budget on our services. Additionally, changes in governmental personnel may impact our current relationships with our payers. Any of these effects and the uncertainties of Brexit, among others, could materially adversely affect our business, business opportunities, results of operations, financial condition, future growth and cash flows.

Changes to the regulatory landscape applicable to Matrix could have a material adverse effect on our results of operations and financial condition.

The CHA services industry is primarily regulated by federal and state healthcare Laws and the requirements of participation and reimbursement of the MA Program established by CMS. From time to time, CMS considers changes to regulatory guidelines with respect to prospective CHAs or the risk adjusted payment system applicable to Matrix's Medicare Advantage plan customers. CMS could adopt new requirements or guidelines that may, for example, increase the costs associated with CHAs, limit the opportunities and settings available to administer CHAs, or otherwise change the risk adjusted payment system in a way that would

adversely impact our business. Further, changes in or adoption of new state laws governing the scope of practice of mid-level practitioners, or more restrictive interpretations of such laws, may restrict Matrix's ability to provide services using nurse practitioners. Any such implementation of additional regulations on the CHA industry by CMS or other regulatory bodies or further regulation of mid-level practitioners could have a material adverse impact on Matrix's revenues and margins, which could have a material adverse impact on our consolidated results of operations.

If our U.S. Healthcare Segments fail to comply with physician self-referral laws, to the extent applicable to our operations, they could experience a significant loss of reimbursement revenue.

Our U.S. Healthcare Segments may be subject to federal and state statutes and regulations banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship and billing for services provided pursuant to such referrals if any occur. Violation of these federal and state laws and regulations, to the extent applicable to our U.S. Healthcare Segments' operations, may result in prohibition of payment for services rendered, loss of licenses, fines, criminal penalties and exclusion from Medicaid and Medicare programs. To the extent such segments do maintain such financial relationships with physicians, they rely on certain exceptions to self-referral laws that they believe will be applicable to such arrangements. Any failure to comply with such exceptions could result in the penalties discussed above.

As government contractors, our segments are subject to an increased risk of litigation and other legal actions and liabilities.

As government contractors, our segments are subject to an increased risk of investigation, criminal prosecution, civil fraud, whistleblower lawsuits and other legal actions and liabilities that are not as frequently experienced by companies that do not provide government sponsored services. Companies providing government sponsored services can also become involved in public inquiries which can lead to negative media speculation or potential cancellation or termination of contracts. In WD Services in Europe, European procurement regulations in force in each European Union member state require public procurement authorities to impose a ban from participating in public procurement tenders for up to five years, or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority, where companies are found guilty of fraud or certain other criminal offenses. Authorities can also exercise their discretion to blacklist companies for up to two years where they believe they have been involved in acts of gross misconduct or until the organization in question has put in place "self clean" measures to the satisfaction of the procuring authority. The occurrence of any of these actions, regardless of the outcome, could disrupt our operations and result in increased costs, and could limit our ability to obtain additional contracts in other jurisdictions. Further, government tenders in the U.S., the European Union and other countries can be subject to challenge where the procurer has not followed the correct processes, or where they seek to make material amendments to contracts after award. Consequently, it can be very difficult to convince government customers to amend their contracts, even where circumstances have changed significantly, because they are concerned that if challenged they may have to re-procure the entire service. This can pose significant risks in terms of cost management and profitability.

Our segments' businesses are subject to licensing regulations and other regulatory provisions, including provisions governing surveys and audits. Changes to, or violations of, these regulations could negatively impact our segments' revenues.

In many of the locations where our segments operate, they are required by local laws (both U.S. and foreign) to obtain and maintain licenses. The applicable state and local licensing requirements govern the services our segments provide, the credentials of staff, record keeping, treatment planning, client monitoring and supervision of staff. The failure to maintain these licenses or the loss of a license could have a material adverse impact on our segments' businesses and could prevent them from providing services to clients in a given jurisdiction. Our segments' contracts are subject to surveys or audit by their payers or their clients. Our segments are also subject to regulations that restrict their ability to contract directly with a government agency in certain situations. Such restrictions could affect our segments' ability to contract with certain payers and clients, and could have a material adverse impact on our segments' results of operations.

Our segments' contracts are subject to audit and modification by the payers with whom our segments contract, at their sole discretion.

Our segments' businesses depend on their ability to successfully perform under various government funded contracts. Under the terms of these contracts, payers, government agencies or their proxy contractors can review our segments' compliance or performance, as well as our segments' records and general business practices at any time, and may, in their discretion:

- suspend or prevent our segments from receiving new contracts or extending existing contracts because of violations or suspected violations of procurement laws or regulations;
- terminate or modify our segments' existing contracts;
- reduce the amount our segments are paid under our existing contracts; or
- audit and object to our segments' contract related fees.

Any increase in the number or scope of audits could increase our segments' expenses, and the audit process may disrupt the day-to-day operations of our segments' businesses and distract their management. If payers have significant audit findings, or if they make material modifications to our segments' contracts, it could have a material adverse impact on our segments' results of operations.

Contract profitability may decline due to actions by governmental agencies or penalties that are based on government generated statistical information that may not be known to us in advance.

WD Services' operating costs and profitability may be significantly impacted by actions required by a government agency, such as the availability of information systems maintained by the government to streamline enrollment into our service programs. Government generated performance statistics, such as the MOJ reoffending report, may not be known to us prior to its release by the government agencies. WD Services may be subject to penalties that are based on such government generated statistics, and we could be required to make material payments, the amounts of which we may not be able to estimate and which could have an adverse effect on our financial condition and results of operations.

In addition, certain contracts may require that we hire former government employees, in relation to offering our service programs, or develop new information technology systems which would serve to replace legacy systems operated by the government. Lastly, revenue under certain contracts may be adjusted prospectively if client volumes are below expectations or client profiles change materially, which may also lead to cost or productivity changes. If the Company is unable to adjust its costs accordingly, profitability is negatively impacted.

Our estimated income taxes could be materially different from income taxes that we ultimately pay.

We are subject to income taxation in both the U.S. and 10 foreign countries, including specific states or provinces where we operate. Our overall effective income tax rate is a function of applicable local tax rates and the geographic mix of our income from continuing operations before taxes, which is itself impacted by currency movements. Consequently, the isolated or combined effects of unfavorable movements in tax rates, geographic mix, or foreign exchange rates could reduce our after-tax income.

Our annual tax rate is based on our income and the tax laws in the various jurisdictions in which we operate. Significant judgment and estimation is required in determining our annual income tax expense and in evaluating our tax positions and related matters. In the ordinary course of our business, there are many transactions and calculations for which the ultimate tax determinations are uncertain or otherwise subject to interpretation. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related disputes could be materially different from our historical income tax provisions and accruals. In addition, we make judgments regarding the applicability of tax treaties and the appropriate application of transfer pricing regulations. In the event one taxing jurisdiction disagrees with another taxing jurisdiction with respect to the amount or applicability of a particular type of tax, or the amount or availability of a particular type of tax refund or credit, we could experience temporary or permanent double taxation and increased professional fees to resolve such taxation matters. Our determination of our income tax liability is always subject to review by applicable tax authorities, and we have been audited by various jurisdictions in prior years. Although we believe our income tax estimates and related determinations are reasonable and appropriate, relevant taxing authorities may disagree. The ultimate outcome of any such audits and reviews could be materially different from the estimates and determinations reflected in our historical income tax provisions and accruals. Any adverse outcome of any such audit or review could have an adverse effect on our financial condition and the results of our operations.

The Tax Cuts and Jobs Act ("Tax Reform Act"), which was signed into law on December 22, 2017, significantly affected U.S. income tax law by changing how the U.S. imposes income tax on multinational corporations. We have recorded in our consolidated financial statements provisional amounts based on our current estimates of the effects of the Tax Reform Act in

accordance with our current understanding of the Tax Reform Act and currently available guidance. For additional information regarding the Tax Reform Act and the provisional tax amounts recorded in our consolidated financial statements, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies". The final amounts may be significantly affected by regulations and interpretive guidance expected to be issued by the tax authorities, clarifications of the accounting treatment of various items, our additional analysis, and our refinement of our estimates of the effects of the Tax Reform Act and, therefore, such final amounts may be materially different than our current provisional amounts, which could materially affect our tax obligations and effective tax rate.

Risks Related to Our Indebtedness

Restrictive covenants in our Credit Agreement may limit our current and future operations, particularly our ability to respond to changes in our business or to pursue our business strategies.

The terms contained in the agreements that govern certain of our indebtedness, including our Amended and Restated Credit and Guaranty Agreement (as amended, supplemented, or modified, the "Credit Agreement"), and the agreements that govern any future indebtedness of ours, may include a number of restrictive covenants that impose significant operating and financial restrictions, including restrictions on our ability to take actions that we believe may be in our best interest. These agreements, among other things, limit our ability to:

- incur additional debt;
- provide guarantees in respect of obligations of other persons;
- issue redeemable stock and preferred stock;
- pay dividends or distributions or redeem or repurchase capital stock;
- make loans, investments and capital expenditures;
- enter into transactions with affiliates;
- create or incur liens;
- make distributions from our subsidiaries;
- sell assets and capital stock of our subsidiaries;
- make acquisitions; and
- consolidate or merge with or into, or sell substantially all of our assets to, another person.

A breach of the covenants or restrictions could result in a default under the applicable agreements that govern our indebtedness. Such default may preclude us from drawing from our senior secured credit facility (the "Credit Facility") or allow the creditors to accelerate the related debt and may result in the acceleration of any other debt that we may incur to which a cross acceleration or cross-default provision applies. In the event our lenders accelerate the repayment of our borrowings, we cannot assure that we and our subsidiaries would have sufficient assets to repay such indebtedness.

Loss of available financing or an inability to renew, repay or refinance our debt could have an adverse effect on our financial condition and results of operations.

At December 31, 2017, our available credit under the Credit Facility was $188.9 million. The Credit Facility matures on August 2, 2018. If our cash on hand is insufficient, or we are unable to generate sufficient cash flows in the future, to cover our cash flow and liquidity needs and service our debt, we may be required to seek additional sources of funds, including refinancing all or a portion of our existing or future debt, incurring additional debt to maintain sufficient cash flow to fund our ongoing operating needs, pay interest and fund anticipated expenditures. There can be no assurance that any refinancing will be possible or that any additional financing could be obtained on acceptable terms. If we are unable to obtain additional financing, we may (i) be unable to satisfy our obligations under our outstanding indebtedness, (ii) be unable to pursue future business opportunities or fund acquisitions, (iii) find it more difficult to fund future operating costs, tax payments or general corporate expenditures and (iv) become vulnerable to adverse general economic, capital markets and industry conditions. Any of these circumstances could have a material adverse effect on our financial position, liquidity and results of operations.

We may incur substantial additional indebtedness in the future, which could impair our financial condition.

We may incur substantial additional indebtedness in the future to fund activities including but not limited to share repurchases, acquisitions, cash dividends and business expansion. Any existing and future indebtedness increases the risk that we may be unable to generate cash sufficient to pay amounts due in respect of such indebtedness. Future substantial indebtedness could have other important consequences on our business. For example, it could:

- make it more difficult for us to satisfy our obligations;
- make it more difficult to renew or enter into new contracts with existing and potential future clients;
- limit our ability to borrow additional amounts to fund working capital, capital expenditures, debt service requirements, execution of our business strategy or acquisitions and other purposes;
- require us to dedicate a substantial portion of our cash flow from operations to pay principal and interest on our debt, which would reduce the funds available to us for other purposes;
- restrict our ability to dispose of assets and use the proceeds from any such dispositions;
- restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due;
- make us more vulnerable to adverse changes in general economic, industry and competitive conditions, as well as in government regulation and to our business;
- expose us to risks inherent in interest rate fluctuations because some of our borrowings are at variable rates of interest, which could result in higher interest expenses in the event of increases in interest rates; and
- make it more difficult to satisfy our financial obligations.

Our ability to satisfy and manage our debt obligations depends on our ability to generate cash flow and on overall financial market conditions. To some extent, this is subject to prevailing economic and competitive conditions and to certain financial, business and other factors, many of which are beyond our control. Our business may not generate sufficient cash flow from operations to permit us to pay principal, premium, if any, or interest on our debt obligations. If we are unable to generate sufficient cash flow from operations to service our debt obligations and meet our other cash needs, we may be forced to reduce or delay capital expenditures, sell or curtail assets or operations, seek additional capital, or seek to restructure or refinance our indebtedness. If we must sell or curtail our assets or operations, it may negatively affect our ability to generate revenue.

Risks Related to Our Capital Stock

Our annual operating results and stock price may be volatile or may decline significantly regardless of our operating performance.

Our annual operating results and the market price for our Common Stock may fluctuate significantly in response to a number of factors, many of which we cannot control, including:

- changes in rates or coverage for services by payers;
- changes in Medicaid, Medicare or other U.S. federal or state rules, regulations, policies or applicable foreign regulations, policies and technical guidance, including UK health, employment and criminal justice legislation and guidance, Saudi Arabian licensing and Saudization rules, as well as other foreign laws applicable to our business;
- price and volume fluctuations in the overall stock market;
- market conditions or trends in our industry or the economy as a whole;
- increased competition in any of our segments, including through insourcing of services by our clients and new entrants to the market;
- other events or factors, including those resulting from war, incidents of terrorism, natural disasters or responses to these events;
- changes in tax law; and
- changes in accounting principles.

In addition, the stock markets, and in particular the NASDAQ Global Select Market, have experienced considerable price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. In the past, stockholders have instituted securities class action litigation following periods of market volatility. If we become involved in securities litigation, we could incur substantial costs, and our resources and the attention of management could be diverted from our business.

The Company depends on its subsidiaries for cash to fund all of its operations and expenses, including to make future dividend payments, if any.

Our operations are conducted entirely through our subsidiaries and our ability to generate cash to fund all of our operations and expenses, to pay dividends or to meet any debt service obligations is highly dependent on the earnings and the receipt of funds from our subsidiaries via dividends or intercompany loans. We do not currently expect to declare or pay dividends on our Common Stock for the foreseeable future; however, to the extent that we determine in the future to pay dividends on our Common Stock, none of our subsidiaries will be obligated to make funds available to us for the payment of dividends. Further, the agreement governing our Credit Agreement significantly restricts the ability of our subsidiaries to pay dividends, make loans or otherwise transfer assets to us. In addition, Delaware law may impose requirements that may restrict our ability to pay dividends to holders of our Common Stock.

If securities or industry analysts do not publish research or publish misleading or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our Common Stock will depend in part on the research and reports that securities or industry analysts publish about us or our business. If one or more analysts downgrade our stock or publish misleading or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price or trading volume to decline.

Future sales of shares by existing stockholders could cause our stock price to decline.

Sales of substantial amounts of our Common Stock in the public market, or the perception that these sales could occur, could cause the market price of our Common Stock to decline. As of March 5, 2018, we had 12,866,551 outstanding shares of Common Stock which are freely transferable without restriction or further registration under the Securities Act of 1933, as amended (the "Securities Act"), unless held by or purchased by our "affiliates" as that term is defined in Rule 144 under the Securities Act. Shares of our Common Stock held by or purchased by our affiliates are restricted securities within the meaning of Rule 144 under the Securities Act, but will be eligible for resale subject to applicable volume, means of sale, holding period and other limitations of Rule 144 under the Securities Act.

As of March 5, 2018, shares of our convertible preferred stock were convertible into 2,014,042 shares of Common Stock, all of which are subject to registration rights. In addition, as of March 5, 2018, 1,653,755 shares of Common Stock are beneficially owned by entities for which Coliseum Capital Management acts as investment adviser.

In August 2016, we filed a registration statement under the Securities Act to register additional shares of Common Stock to be issued under our equity compensation plans and, as a result, all shares of Common Stock acquired upon exercise of stock options granted under our plans will also be freely tradable under the Securities Act, unless purchased by our affiliates. As of December 31, 2017, there were stock options outstanding to purchase a total of 606,695 shares of our Common Stock and there were 111,157 shares of our Common Stock subject to restricted stock awards. In addition, 1,938,666 shares of our Common Stock are reserved for future issuances under the plan.

The terms of our Preferred Stock contain restrictive covenants that may impair our ability to conduct business and we may not be able to maintain compliance with the obligations under our outstanding Preferred Stock which could have a material adverse effect on our future results of operations and our stock price.

On February 11, 2015 and March 12, 2015, we issued $65.5 million and $15.8 million, respectively, of Preferred Stock. The terms of the Preferred Stock require us to pay mandatory quarterly dividends, either in cash or through an increase in the stated principal value of such stock. Our ability to satisfy and manage our obligations under our outstanding Preferred Stock depends, in part, on our ability to generate cash flow and on overall financial market conditions. Additionally, the terms of our Preferred Stock contain operating and financial covenants that limit management's discretion with respect to certain business matters. Among other things, these covenants, subject to certain limitations and exceptions, restrict our ability to incur additional debt, sell or otherwise dispose of our assets, make acquisitions, and merge or consolidate with other entities. As a result of these covenants and restrictions, we may be limited in how we conduct our business, which could have a material adverse effect on our future results of operations and our stock price.

Future offerings of debt or equity securities that would rank senior to our Common Stock, may adversely affect the market price of our Common Stock.

If, in the future, we decide to issue debt or equity securities that rank senior to our Common Stock, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our Common Stock and may result in dilution to owners of our Common Stock. We and, indirectly, our stockholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, holders of our Common Stock will bear the risk of our future offerings reducing the market price of our Common Stock and diluting the value of their stock holdings in us.

Fulfilling our obligations incident to being a public company, including with respect to the requirements of and related rules under the Sarbanes-Oxley Act of 2002, is expensive and time-consuming, and any delays or difficulties in satisfying these obligations could have a material adverse effect on our future results of operations and our stock price.

We are subject to the reporting and corporate governance requirements, under the listing standards of the NASDAQ Global Select Market ("NASDAQ") and the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), that apply to issuers of listed equity, which impose certain significant compliance costs and obligations upon us. Being a publicly listed company requires a significant commitment of additional resources and management oversight resulting in increased operating costs. These requirements also place additional demands on our finance and accounting staff and on our financial accounting and information systems. Other expenses associated with being a public company include increases in auditing, accounting and legal fees and expenses, investor relations expenses, increased directors' fees and director and officer liability insurance costs, registrar and transfer agent fees and listing fees, as well as other expenses. As a public company, we are required, among other things, to define and expand the roles and the duties of our Board of Directors ("Board") and its committees and institute more comprehensive compliance and investor relations functions.

If we fail to maintain effective internal control over financial reporting in the future, the accuracy and timing of our financial reporting may be adversely affected. Preparing our consolidated financial statements involves a number of complex manual and automated processes, which are dependent upon individual data input or review and require significant management judgment. One or more of these elements may result in errors that may not be detected and could result in a material misstatement of our consolidated financial statements. If a material misstatement occurs in the future, we may fail to meet our future reporting obligations. For example, we may fail to file periodic reports in a timely manner or may need to restate our financial results, either of which may cause the price of our common stock to decline. In addition, our WD Services business is subject to the European Union's and other countries' data security and protection laws and regulations, which may make it more difficult for the Company to maintain the records and internal accounting practices necessary to ensure the appropriate operation of our internal controls or to detect corruption or increasing the Company's costs to maintain appropriate controls.

If the accounting estimates we make, and the assumptions on which we rely, in preparing our financial statements prove inaccurate, our actual results may be adversely affected.

Our financial statements have been prepared in accordance with accounting principles generally accepted in the United States, or GAAP. The preparation of these financial statements requires us to make estimates and judgments about, among other things, taxes, revenue recognition, contingent obligations, NET Services transportation expense, recoverability of long-lived assets and doubtful accounts. In addition, our foreign operations report their results pursuant to International Financial Reporting Standards, or IFRS, or local accounting standards, which requires judgment to convert into GAAP. Lastly, the implementation of ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which is effective for the Company beginning January 1, 2018, requires a significant level of judgment and estimation, especially in regards to contingent or success-based payments, such as those prevalent at WD Services. These estimates and judgments affect the reported amounts of our assets, liabilities, revenue and expenses, the amounts of charges accrued by us, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. If our estimates or the assumptions underlying them are not correct, we may need to accrue additional charges or reduce the value of assets that could adversely affect our results of operations, leading to a loss in investor confidence in our ability to manage our business and our stock price could decline.

Anti-takeover provisions in our second amended and restated certificate of incorporation and amended and restated by-laws could discourage, delay or prevent a change of control of our company and may affect the trading price of our Common Stock.

Our second amended and restated certificate of incorporation and amended and restated bylaws include a number of provisions that may be deemed to have anti-takeover effects, which include when and by whom special meetings of our stockholders may be called, and may discourage, delay or prevent a change in our management or control over us that stockholders may consider favorable. Such provisions may prevent our stockholders from receiving the benefit from any premium to the market price of our Common Stock offered by a bidder in a takeover context. Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our Common Stock if the provisions are viewed as discouraging takeover attempts in the future. Our second amended and restated certificate of incorporation and amended and restated by-laws may also make it difficult for stockholders to replace or remove our management. These provisions may facilitate management entrenchment that may delay, deter, render more difficult or prevent a change in our control, which may not be in the best interests of our stockholders.

We do not expect to pay dividends on our Common Stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our Common Stock.

We currently do not expect to declare and pay dividends on our Common Stock for the foreseeable future. We currently intend to invest our future earnings, if any, to fund our growth, to develop our business, for working capital needs and for general corporate purposes. Therefore, you are not likely to receive any dividends on your Common Stock for the foreseeable future and the success of an investment in shares of our Common Stock will depend upon any future appreciation in their value. There is no guarantee that shares of our Common Stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Our principal executive office is located in Stamford, Connecticut, and we lease additional office space in Tucson, Arizona. As of March 2, 2018, NET Services leases space in approximately 40 locations, WD Services leases space in approximately 220 locations, and Matrix leases space in five locations. The lease terms vary and we believe are generally at market rates. We believe that our properties are adequate for our current business needs, and believe that we can obtain adequate space, if needed, to meet our foreseeable business needs.

Item 3. Legal Proceedings.

On June 15, 2015, a putative stockholder class action derivative complaint was filed in the Court of Chancery of the State of Delaware (the "Court"), captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL (the "Haverhill Litigation"). The complaint named Richard A. Kerley, Kristi L. Meints, Warren S. Rustand, Christopher Shackelton (the "Individual Defendants") and Coliseum Capital Management, LLC ("Coliseum Capital Management") as defendants, and the Company as a nominal defendant. The complaint purported to allege that the dividend rate increase term originally in the Company's outstanding Preferred Stock was an impermissibly coercive measure that impaired the voting rights of the Company's stockholders in connection with the vote on the removal of certain voting and conversion caps previously applicable to the Preferred Stock (the "Caps"), and that the Individual Defendants breached their fiduciary duties by approving the dividend rate increase term and attempting to coerce the stockholder vote relating to the Company's Preferred Stock, and by failing to disclose all material information necessary to allow the Company's stockholders to cast an informed vote on the Caps. The complaint also purported to allege derivative claims alleging that the Individual Defendants breached their fiduciary duties to the Company by entering into the subordinated note and standby agreement with Coliseum Capital Management, and granting Coliseum Capital Management certain stock options. The complaint further alleged that Coliseum Capital Management aided and abetted the Individual Defendants in breaching their fiduciary duties. The complaint sought, among other things, an injunction prohibiting the stockholder vote relating to the dividend rate increase, corporate governance reforms, unspecified damages and other relief.

On August 31, 2015, after arms' length negotiations, the parties reached an agreement in principle and executed a Memorandum of Understanding ("MOU") providing for the settlement of claims concerning the dividend rate increase term and stockholder vote and related disclosure. The MOU stated that the Defendants had entered into the partial settlement of the litigation solely to eliminate the distraction, burden, expense, and potential delay of further litigation involving claims that have been settled. Pursuant to the partial settlement, the Company agreed to supplement the disclosures in its definitive proxy statement on Schedule

14A (the "2015 Proxy Statement"), Coliseum Capital Management and certain of its affiliates and the Company entered into an amendment to that certain Series A Preferred Stock Exchange Agreement, by and among Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P., Blackwell Partners, LLC, and The Providence Service Corporation dated as of February 11, 2015 described in the 2015 Proxy Statement, and the Board agreed to adopt a policy related to the Board's determination each quarter as to whether the Company should pay cash dividends or allow dividends to be paid in the form of PIK dividends on the Preferred Stock, as further described in the supplemental proxy disclosures. On September 2, 2015, Providence issued supplemental disclosures through a supplement to the 2015 Proxy Statement. On September 16, 2015, Providence stockholders approved the removal of the Caps. The Company provided notice of the proposed partial settlement to Providence's stockholders by December 11, 2015. At a hearing on February 9, 2016, the court denied approval of the settlement. The Court indicated that plaintiff's counsel could petition the Court for a mootness fee, and that defendants would have the opportunity to oppose any such application.

On January 12, 2016, the plaintiff filed a verified amended class action and derivative complaint (the "first amended complaint"). In addition to the defendants named in the earlier complaint, the first amended complaint named David Shackelton, Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC, Coliseum Capital Co-Invest, L.P. (collectively, and together with Coliseum Capital Management, LLC, "Coliseum") and RBC Capital Markets, LLC ("RBC Capital Markets") as additional defendants. The first amended complaint purported to allege direct and derivative claims for breach of fiduciary duty against some or all of the Individual Defendants and David Shackelton (collectively, the "Amended Individual Defendants") regarding the approval of the subordinated note, the rights offering, the standby agreement with Coliseum Capital Management, and the grant to Coliseum Capital Management of certain stock options. The first amended complaint also purported to allege an additional derivative claim for unjust enrichment against Coliseum and further alleged that Coliseum and RBC Capital Markets aided and abetted the Amended Individual Defendants in breaching their fiduciary duties. The first amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, unspecified damages and other relief.

On May 6, 2016, the plaintiff filed a verified second amended class action and derivative complaint (the "second amended complaint"). In addition to the defendants named in the earlier complaint, the second amended complaint named Paul Hastings LLP ("Paul Hastings") and Bank of America, N.A. ("BofA") as additional defendants. In addition to previously asserted claims, the second amended complaint purported to assert direct and derivative claims for breach of fiduciary duties against Coliseum Capital Management, in its capacity as the controlling stockholder of the Company, in connection with the subordinated note, the Company's rights offering of Preferred Stock and the standby purchase agreement with Coliseum Capital Management (the "Financing Transactions"). The second amended complaint also alleged that Paul Hastings breached their fiduciary duties as counsel to the Company in connection with the Financing Transactions and that BofA and Paul Hastings aided and abetted certain of the Amended Individual Defendants in breaching their fiduciary duties in connection with the Financing Transactions. The second amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, disgorgement of fees paid to RBC Capital Markets, Paul Hastings and BofA for work relating to the Financing Transactions, unspecified damages and other relief.

On May 20, 2016, the Court granted a six-month stay of the proceeding (which was subsequently extended) to allow a special litigation committee, created by the Board, sufficient time to investigate, review and evaluate the facts, circumstances and claims asserted in or relating to this action and determine the Company's response thereto. On January 20, 2017, the special litigation committee advised the Court that the parties to the litigation and the special litigation committee had reached an agreement in principle to settle all of the claims in the litigation. The parties then entered into a proposed settlement agreement which was submitted to the Court for approval. On September 28, 2017, the Court approved the proposed settlement agreement among the parties that provided for a settlement amount of $10 million less plaintiff's legal fees and expenses (the "Settlement Amount"), with 75% of the Settlement Amount to be paid to the Company and 25% of the Settlement Amount to be paid to holders of the Company's Common Stock other than certain excluded parties. On November 16, 2017, the Company, as a nominal defendant, received a payment of $5.4 million from the Settlement Amount.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

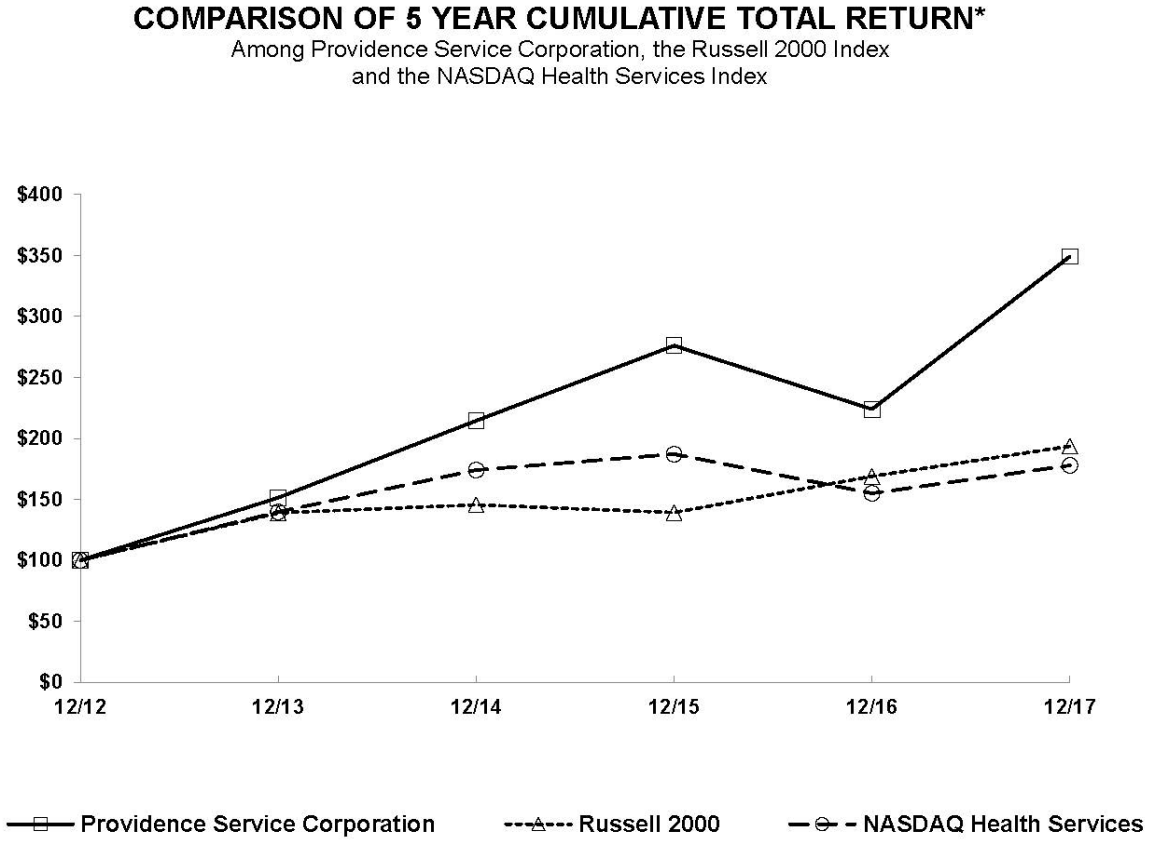
Market for our Common Stock

Our Common Stock, our only class of common equity, has been quoted on NASDAQ under the symbol "PRSC" since August 19, 2003. Prior to that time there was no public market for our Common Stock. As of March 5, 2018, there were 22 holders of record of our Common Stock. The following table sets forth the high and low sales prices per share of our Common Stock for the period indicated, as reported on NASDAQ Global Select Market:

	High	Low
2017		
Fourth Quarter	$ 60.59	$ 53.84
Third Quarter	$ 54.99	$ 49.77
Second Quarter	$ 47.47	$ 43.73
First Quarter	$ 41.80	$ 37.65
2016		
Fourth Quarter	$ 49.97	$ 34.89
Third Quarter	$ 50.30	$ 43.01
Second Quarter	$ 53.38	$ 43.77
First Quarter	$ 55.28	$ 42.03

Stock Performance Graph

The following graph shows a comparison of the cumulative total return for our Common Stock, NASDAQ Health Services Index and Russell 2000 Index assuming an investment of $100 in each on December 31, 2012.



*$100 invested on 12/31/12 in stock or index, including reinvestment of dividends.
Fiscal year ending December 31.

Dividends

We have not paid any cash dividends on our Common Stock and currently do not expect to pay dividends on our Common Stock. In addition, our ability to pay dividends on our Common Stock is limited by the terms of our Credit Agreement and our Preferred Stock. The payment of future cash dividends, if any, will be reviewed periodically by the Board and will depend upon, among other things, our financial condition, funds from operations, the level of our capital and development expenditures, any restrictions imposed by present or future debt or equity instruments, and changes in federal tax policies, if any.

Issuer Purchases of Equity Securities

Period	Total Number of Shares of Common Stock Purchased (1)	Average Price Paid per Share	Total Number of Shares of Common Stock Purchased as Part of Publicly Announced Program (2)	Maximum Dollar Value of Shares of Common Stock that May Yet Be Purchased Under Program (2) (in thousands)
Fourth quarter:				
October 1, 2017 to October 31, 2017	—	$ —	—	$ 69,640
November 1, 2017 to November 30, 2017	247	$ 56.74	—	$ 69,640
December 1, 2017 to December 31, 2017	181,714	$ 58.27	180,270	$ 59,137
Total	181,961	$ 58.26	180,270	

(1) Includes (i) shares that were acquired from employees in connection with the settlement of income tax and related benefit withholding obligations arising from vesting in restricted stock awards; and (ii) the repurchase of shares under the repurchase program authorized by the Board on November 2, 2017. For more information on these repurchases, see Note 11, Stockholders' Equity, to our consolidated financial statements.

(2) On October 26, 2016, our Board authorized a new repurchase program, under which the Company may repurchase up to $100.0 million in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. Through October 26, 2017, a total of 770,808 shares were purchased through this plan for $30.4 million, excluding commission payments.

On November 2, 2017, our Board approved the extension of the Company's prior stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at the discretion of the Company's officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements. As of December 31, 2017, a total of 180,270 shares were purchased through the extended plan approved on November 2, 2017, for $10.5 million, excluding commission payments. For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and capital resources".

Equity Compensation Plan Information

The following table provides certain information as of December 31, 2017 with respect to our equity based compensation plans.

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	(b) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders (1)	606,695	$ 48.70	1,938,666
Equity compensation plans not approved by security holders	—	—	—
Total	606,695	48.70	1,938,666

(1) The number of shares shown in column (b) represents the number of shares available for issuance pursuant to stock options and other stock-based awards that could be granted in the future under the Company's 2006 Long-Term Incentive Plan, as amended (the "2006 Plan").

Item 6. Selected Financial Data.

We have derived the following selected financial data from the consolidated financial statements and related notes. The information set forth below is not necessarily indicative of future results. This information should be read in conjunction with our consolidated financial statements and the related notes, and Item 7. “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, all of which are included elsewhere in this Annual Report on Form 10-K.

Significant transactions which occurred during the periods presented include the acquisition of Ingeus effective May 30, 2014, which primarily comprises our WD Services segment, the investment in Mission Providence, a joint venture in Australia, which commenced operations in 2014 but was sold on September 29, 2017, and our equity interest in Matrix effective October 19, 2016. Matrix, which was originally acquired on October 23, 2014, comprised our HA Services segment through October 19, 2016. The operations of HA Services and Human Services, which was sold effective November 1, 2015, have been presented as discontinued operations for all periods presented.

Total stockholders' equity	336,017	297,675	290,132	221,414	150,637

(1) Other income for the year ended December 31, 2017 includes the receipt of the Haverhill Litigation settlement of $5.4 million, see Item 3. Legal Proceedings for further information on the settlement.

(2) Gain on sale of equity investment of $12.4 million relates to the sale of the Company's equity interest in Mission Providence in 2017. The investment in Mission Providence was part of the WD Services segment.

(3) Discontinued operations, net of tax, for the years ended December 31, 2017 and 2016 include losses of $6.0 million and $5.6 million, respectively, related to potential indemnification claims for our historical Human Services segment.

(4) The year ended December 31, 2017 includes a net tax benefit of $16.0 million related to the enactment of the Tax Reform Act during the fourth quarter of 2017 due to the re-measurement of deferred tax liabilities by Providence as a result of the reduction in the U.S. corporate tax rate. Providence realized a benefit of $19.4 million, partially offset by $3.4 million of increased tax expense resulting from additional equity in net gain of Matrix, due to Matrix's re-measurement of its deferred tax liabilities. In addition, the tax provision was adversely impacted by tax expense of $3.6 million related to the Company's 2015 Holding Company LTI Program (the "HoldCo LTIP"), for which expense was incurred for financial reporting purposes, but no shares were issued due to the market condition of the award not being satisfied and thus no tax deduction was realized.

(5) On October 19, 2016, we completed the Matrix Transaction. Included in discontinued operations, net of tax, for 2016 is a gain on the transaction, net of tax, totaling $109.4 million. In conjunction with the completion of this transaction, we fully repaid the amounts outstanding on our term loans and Credit Facility in 2016.

(6) During the fourth quarter of 2016, WD Services recorded long-lived asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK.

(7) On November 1, 2015, we completed the sale of our Human Services segment. Included in discontinued operations, net of tax, for 2015 is a gain on the sale of the Human Services segment, net of tax, totaling $100.3 million.

(8) The Company incurred $20.9 million of accelerated expense in 2015 related to restricted shares and cash placed into escrow at the time of the Ingeus acquisition. The shares and cash were placed into escrow concurrent with the payments of the acquisition consideration paid in 2014 for Ingeus; however, because two sellers of Ingeus remained employees post acquisition, the value of the shares and cash was recognized as compensation expense over the escrow term. Acceleration was triggered in 2015 when the two sellers separated from the Company. In addition, in 2015 and 2014, respectively, the Company incurred $5.9 million and $4.5 million of expense related to the separation of these two employees. Benefits of $2.0 million, $2.5 million and $16.1 million associated with the favorable resolution of acquisition contingencies and reductions in the fair value of Ingeus contingent consideration are included in general and administrative expenses for 2017, 2015 and 2014, respectively. 2017, 2016 and 2015 expenses also include $2.6 million, $8.5 million and $12.2 million, respectively, of WD Services' redundancy costs.

(9) Equity in net (gain) loss of investees primarily relates to our investment in Mission Providence during 2015, 2016 and 2017 and Matrix for the period of October 19, 2016 through December 31, 2017. Matrix became an equity investment upon the completion of the Matrix Transaction. For Mission Providence, we recorded net loss in investee of $1.4 million, $8.5 million and $11.0 million in 2017, 2016 and 2015, respectively. For Matrix, we recorded $13.4 million in equity in net gain of investee and $1.8 million in equity in net loss of investee related to our equity method investment in Matrix in 2017 and for the period of October 19, 2016 through December 31, 2016, respectively. The equity in net gain from Matrix for the year ended December 31, 2017 includes a benefit of $13.6 million related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. As a result of the increased equity income, Providence incurred higher tax expense of $3.4 million, which is reflected as a component of “Provision for income taxes” in the table above. The investment in Matrix at December 31, 2017 of $169.7 million is included in “Equity investments” in our consolidated balance sheet.

(10) 2014 includes $4.5 million of financing fees that were deferred and fully expensed within interest expense in the fourth quarter of 2014 in relation to bridge financing commitments and $3.0 million of third-party financing fees that are included in general and administrative expense.

(11) 2015 includes $2.4 million in Ingeus transaction-related expenses and 2014 includes $11.8 million in acquisition costs primarily related to the acquisitions of Ingeus and Matrix.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Item 6. "Selected Financial Data" and our consolidated financial statements and related notes included in Item 8. "Financial Statements and Supplementary Data" of this report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and other factors that may cause actual results to differ materially from those projected in any forward-looking statements, as discussed in "Disclosure Regarding Forward-Looking Statements". These risks and uncertainties include but are not limited to those set forth in Item 1A. "Risk Factors".

Overview of Our Business

Please refer to Item 1. "Business" of this Annual Report on Form 10-K for a discussion of our services and corporate strategy.

Providence owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which we hold interests comprise the following segments:

- NET Services – Nationwide manager of non-emergency medical transportation programs for state governments and managed care organizations.
- WD Services – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in Matrix, a nationwide provider of in-home care optimization and management solutions, including CHAs, to members of managed care organizations, accounted for as an equity method investment. On February 16, 2018, Matrix acquired HealthFair, expanding its service offerings to include mobile health assessments, advanced diagnostic testing, and additional care optimization services.

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company. We are actively monitoring these activities as they relate to our capital allocation and acquisition strategy to ensure alignment with Providence's overall strategic objectives and its goal of enhancing shareholder value.

Business Outlook and Trends

Our performance is affected by a number of trends that drive the demand for our services. In particular, the markets in which we operate are exposed to various trends such as healthcare industry and demographic dynamics in the U.S. and international government outsourcing and employment dynamics. Over the long term, we believe there are numerous factors that could affect growth within the industries in which we operate, including:

- an aging population, which will increase demand for healthcare services;
- a movement towards value-based versus fee for service care and budget pressure on governments, both of which may increase the use of private corporations to provide necessary and innovative services;
- increasing demand for in-home care provision, driven by cost pressures on traditional reimbursement models and technological advances enabling remote engagement;
- technological advancements, which may be utilized by us to improve service and lower costs, but also by others which may increase industry competitiveness;
- changes in UK government policy driven by opposition to the government's outsourcing of the services provided by WD Services to private companies, which opposition may increase in light of recent events in the UK, including the liquidation of the UK government contractor Carillion plc;
- the results of the referendum on the UK's exit from the European Union and related political and economic uncertainty in the UK; and
- proposals by the President of the United States and Congress to change the Medicaid program, including considering converting the Medicaid program to a block grant format or capping the federal contribution to state Medicaid programs

to a fixed amount per beneficiary, and CMS' grant of waivers to states relative to the parameters of their Medicaid programs. Enactment of adverse legislation, regulation or agency guidance, may reduce the demand for our services, our ability to conduct some or all of our business and/or reimbursement rates for services performed within our segments.

Historically, our segments have grown through organic expansion into new markets and service lines, organic expansion within existing markets and service lines, increases in the number of members served under contracts we have been awarded, the securing of new contracts, and acquisitions. With respect to acquisitions, we are actively evaluating the optimal industry sectors, such as the non-emergency medical transportation industry and others in which businesses complementary to our NET Services business operate, around which to focus our merger and acquisition activity. This ongoing evaluation takes into consideration and balances a number of factors, including the strategic goals, competitive landscape, and growth opportunities of our current segments, in an attempt to direct our capital towards those areas most likely to drive long-term value creation and generate the highest levels of return for our shareholders. In addition, as evidenced by the 2016 Matrix Transaction, we may also enter into strategic partnerships if we feel this provides the best opportunity to maximize shareholder value. The pursuit of our strategy may also result in the disposition of current businesses, as demonstrated in 2017 with our sale of our equity investment in Mission Providence and in 2015 with the sale of our Human Services segment. In making these determinations, we base our decisions on a variety of factors, including the availability of alternative opportunities to deploy capital, maximize shareholder value or other strategic considerations. The outcome of our active evaluation of the optimal industry sectors around which to focus our merger and acquisition activity as well as the potential future entry into strategic partnerships or potential disposition of businesses may impact the extent and manner in which we deploy resources across Providence, including strategic and administrative resources between Corporate and Other and our operating segments, and we may incur incremental costs in pursuing these efforts.

Revenues and Expenses

NET Services

NET Services primarily contracts with state Medicaid agencies and managed care organizations for the coordination of their members' non-emergency transportation needs. Most contracts are capitated, which means we are paid on a per-member, per-month basis for each eligible member. For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we negotiate rates and remit payment to the transportation providers. However, for certain contracts, we assume no risk for the transportation network, credentialing and/or payments to these providers. For these contracts, we only provide administrative management services to support the customers efforts to serve its clients.

WD Services

WD Services primarily provides workforce development and offender rehabilitation services on a global basis that include employment preparation and placement, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs. Populations served by WD Services are broad and include the disabled, recently and long-term unemployed and individuals seeking new skills, as well as individuals that are coping with medical illnesses, are newly graduated from educational institutions, or are being released from incarceration. We contract primarily with national and regional government entities that seek to reduce the unemployment and recidivism rates.

The revenue earned by WD Services under its contracts is often derived through a combination of different revenue channels including, but not limited to, fees contingent upon: (1) the volume of WD end-users referred to or admitted into a specific program, (2) the achievement of defined outcomes for specific individuals, such as a job placement or continued employment, and (3) the achievement of defined outcomes for a population of individuals over a specific time period, such as aggregate employment or recidivism rates. The relative contributions of different revenue channels under a specific contract can fluctuate meaningfully over the life of a contract and thus contribute to significant earnings volatility. Revenue recognition related to our NCS youth programs can be particularly volatile due to the timing of services provided, which typically occur in the second and third quarters of each year. WD Services also earns revenue under fixed FFS arrangements, based upon contractual rates established at the outset of the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes. Volume levels are typically not guaranteed under contracts. We bill according to contractual terms, typically after proof of services have been demonstrated, although certain contracts allow for ratable billings based upon expected levels of services, and require reconciliation at the conclusion of the contract year.

As described above, when WD Services enters into new markets and service lines, it often experiences significant costs, which are expensed as incurred, whereas revenue may not be realized until a later date. As a result, WD Services experiences significant variability in its financial results and we therefore believe the results of WD Services are best viewed over a multi-year period.

Classification of Operating Expenses

Our "Service expense" line item includes the majority of the operating expenses of NET Services and WD Services as well as our captive insurance company, with the exception of certain costs which are classified as "General and administrative expense". Service expense also excludes asset impairment charges and depreciation and amortization expenses. In the discussion below, we present the breakdown of service expense by the following major categories: purchased services, payroll and related costs, other operating expenses and stock-based compensation. Purchased services includes the amounts we pay to third-party service providers and are typically dependent upon service volume. Payroll and related costs include all personnel costs of our segments. Other operating expenses include general overhead costs, excluding facilities and related charges, of our segments. Stock-based compensation represents the stock-based compensation expense associated with stock grants to employees of our segments as well as the expense related to restricted stock placed into escrow at the time of the Ingeus acquisition.

Our "General and administrative expense" primarily includes the operating expenses of our corporate office, excluding depreciation and amortization, as well as facilities and related charges of our segments and contingent consideration and acquisition related adjustments, as applicable.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are important in the preparation of our consolidated financial statements because they require that we use judgment and estimates in applying those policies. We prepare our consolidated financial statements and accompanying notes in accordance with GAAP. Preparation of the consolidated financial statements and accompanying notes requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements as well as revenue and expenses during the periods reported. We base our estimates on historical experience, where applicable, and other assumptions that we believe are reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions.

There are certain critical estimates that we believe require significant judgment in the preparation of our consolidated financial statements. We consider an accounting estimate to be critical if:

- it requires us to make an assumption because information was not available at the time or it included matters that were highly uncertain at the time the estimate is made; and
- changes in the estimate or different estimates that could have been selected may have had a material impact on our financial condition or results of operations.

For more information on each of these policies, see Note 2, Significant Accounting Policies and Recent Accounting Pronouncements, to our consolidated financial statements. We discuss information about the nature and rationale for our critical accounting estimates below.

Transportation Accrual

We accrue the cost of transportation expense within NET Services based on request for services and the amount we expect to be billed by transportation providers, as we generally only pay transportation providers for completed trips based upon documentation submitted after services have been provided. The transportation accrual requires significant judgment, as the accrual is based upon contractual rates and mileage estimates, as well as an estimated rate for unknown cancellations, as members may have requested transportation but not notified us of cancellation. Based upon historical experience and contract terms, we estimate the amount of expense incurred for invoices which have not yet been submitted as of period end. Actual expense could be greater or less than the amounts estimated due to changes in member or transportation provider behavior.

Business Combinations

We assign the value of the consideration transferred to acquire a business to the tangible assets and identifiable intangible assets acquired and liabilities assumed on the basis of their fair values at the date of acquisition. Any excess purchase price paid over the fair value of the net tangible and intangible assets acquired is allocated to goodwill. When determining the fair values of assets acquired and liabilities assumed, management makes significant estimates and assumptions, especially with respect to intangible assets. Critical estimates in valuing certain intangible assets include but are not limited to future expected cash flows from customer relationships and trade names, and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable. As a result, actual results may differ significantly from estimates.

Recoverability of Goodwill and Definite-Lived Intangible Assets

Goodwill. In accordance with ASC 350, Intangibles-Goodwill and Other, we review goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. We perform the annual goodwill impairment test for all reporting units as of October 1.

First, we perform qualitative assessments for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value amount, we then perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value.

We adopted ASU No. 2017-04, Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment ("ASU 2017-04") effective April 1, 2017. ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. Instead, if we deem it necessary to perform the quantitative goodwill impairment test in an annual or interim period, we recognize an impairment charge equal to the excess, if any, of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Long-Lived Assets Including Intangibles. In accordance with ASC 360, Property, Plant, and Equipment, we review the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, we assess the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, we estimate the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, we record an impairment loss equal to the excess of the carrying value over the estimated fair value.

The use of different estimates or assumptions in determining the fair value of our goodwill and intangible assets may result in different values for those assets, which could result in an impairment or, in the period in which an impairment is recognized, could result in a materially different impairment charge.

During the fourth quarter of 2016, the Company reviewed WD Services for impairment, as there were several negative factors impacting the segment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with their carrying amounts and recorded an asset impairment charge of $10.0 million to property and equipment and $4.4 million to definite-lived customer relationship intangible assets, which is recorded in "Asset impairment charge" on the Company's consolidated statement of operations for the year ended December 31, 2016. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management's forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an impairment charge of $5.2 million, which is included in "Asset impairment charge" on the Company's consolidated statement of operations for the year ended December 31, 2016. No impairment charges were incurred during the year ended December 31, 2017.

Income Taxes

We record income taxes under the liability method. Deferred tax assets and liabilities reflect our estimation of the future tax consequences of temporary differences between the carrying amounts of assets and liabilities for book and tax purposes. We determine deferred income taxes based on the differences in accounting methods and timing between financial statement and income tax reporting. Accordingly, we determine the deferred tax asset or liability for each temporary difference based on the enacted tax rates expected to be in effect when we realize the underlying items of income and expense. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available to us for tax reporting purposes, as well as other relevant factors. We may establish a valuation allowance to reduce deferred tax assets to the amount we believe is more likely than not to be realized. Due to inherent complexities arising from the nature of our businesses, future changes in income tax law, tax sharing agreements or variances between our actual and anticipated operating results, we make certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

We record liabilities to address uncertain tax positions we have taken in previously filed tax returns or that we expect to take in a future tax return. The determination for required liabilities is based upon an analysis of each individual tax position, taking into consideration whether it is more likely than not that our tax position, based on technical merits, will be sustained upon examination. For those positions for which we conclude it is more likely than not it will be sustained, we recognize the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. The difference between the amount recognized and the total tax position is recorded as a liability. The ultimate resolution of these tax positions may be greater or less than the liabilities recorded.

On December 22, 2017, the Tax Reform Act was enacted, which significantly changes U.S. tax law by, among other things, lowering corporate income tax rates, implementing a territorial tax system and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries. The Tax Reform Act permanently reduces the U.S. corporate income tax rate from a maximum of 35% to a flat 21% rate, effective January 1, 2018. The Tax Reform Act also provides for a one-time deemed repatriation of post-1986 undistributed foreign subsidiary earnings and profits through the year ended December 31, 2017.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 (“SAB 118”) to address the application of GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. We have recognized the provisional tax impacts related to deemed repatriated earnings and the benefit for the revaluation of deferred tax assets and liabilities, and included these amounts in our consolidated financial statements for the year ended December 31, 2017. The final impact may differ from these provisional amounts, possibly materially, due to, among other things, additional analysis, changes in interpretations and assumptions we made, additional regulatory guidance that may be issued, and actions we may take as a result of the Tax Reform Act. In accordance with SAB 118, the financial reporting impact of the Tax Reform Act will be completed no later than the fourth quarter of 2018.

Reinsurance and Self-Insurance Liabilities

We historically reinsured a substantial portion of our automobile, general and professional liability and workers’ compensation costs under reinsurance programs through our wholly-owned subsidiary, Social Services Providers Captive Insurance Company (“SPCIC”), a licensed captive insurance company domiciled in the State of Arizona. In conjunction with the policy renewals on May 16, 2017, SPCIC did not renew the expiring policies. However, SPCIC continues to resolve claims under the historical policy years. In addition, under the current policies, the Company retains liability up to the policy deductibles. In addition, we maintain self-funded health insurance programs for U.S. based employees with a stop-loss umbrella policy with a third party insurer to limit the maximum potential liability for individual claims and for a maximum potential claim liability based on member enrollment. We utilize independent actuarial reports to determine the expected losses and in order to record the appropriate entries associated with our historical reinsurance programs, our retained exposure for the deductibles under our current policies, and self-funded health insurance programs. We regularly analyze our reserves for incurred but not reported claims, and for reported but not paid claims related to our reinsurance and self-funded insurance programs. We believe our reserves are adequate. However, significant judgment is involved in assessing these reserves such as evaluating historical paid claims, average lag times between the claims’ incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are recorded once a probable amount is known.

Revenue Recognition

NET Services

Capitated contracts. The majority of NET Services revenue is generated under capitated contracts with customers where we assume the responsibility of meeting the covered transportation requirements of a specific geographic population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. In some capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after each reconciliation period, based on a reconciliation of actual utilization and cost compared to the prepayment made.

FFS contracts. Revenues earned under FFS contracts are based upon contractually established billing rates. Revenues are recognized when the service is provided based upon contractual amounts.

Flat fee contracts. Revenues earned under flat fee contracts are recognized ratably over the covered service period based upon contractually established rates which do not fluctuate with any changes in the membership population who are eligible to receive the transportation services.

For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we remit payment to the transportation providers; however, for certain contracts, we only provide administrative management services to support the customers efforts to serve its clients. The amount of revenue recognized is based upon the management fee earned.

WD Services

WD Services revenues are primarily generated from providing workforce development and offender rehabilitation services which include employment preparation and placement, apprenticeship and training, and certain health related services to clients on behalf of governmental and private entities. While the specific terms vary by contract and country, we primarily receive four types of revenue streams under contracts with government entities: referral/attachment fees, job placement and job outcome fees, sustainment fees and incentive fees. Referral/attachment fees are typically upfront payments that are payable when a client is referred by the contracting government entity or that client enters the program. Job placement fees are typically payable when a client is employed. Job outcome fees are typically payable when a client attains and holds employment for a specified minimum period of time. Sustainment fees are typically payable when clients maintain a job outcome past specified employment tenure milestones. Incentive fees are generally based upon a calculation that includes a variety of factors and inputs, such as average sustainment rates and client referral rates. Incentive fees vary greatly by contract.

Referral/attachment fee revenue is recognized ratably over the period of service, based upon an estimated period of time general services will be provided (i.e., the person is placed in a job or reaches the maximum time period for the program). The estimated period of time for which services will be rendered is based upon historical data. Job placement, job outcome and sustainment fee revenue is recognized when certain milestones are achieved, and amounts become billable. Incentive fee revenue is generally recognized when fixed and determinable, frequently at the end of the cumulative calculation period, unless contractual terms allow for earned payments on a fixed or ratable basis.

Revenue is also earned under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes.

If the rate is adjusted but the Company is unable to adjust its costs accordingly, or if the volume or types of referrals are lower than estimated, our profitability may be negatively impacted. Volume levels are typically not guaranteed under contracts.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as "Deferred revenue" until the services are rendered.

Stock Based Compensation

Our primary forms of employee stock-based compensation are stock option awards and restricted stock awards, including certain awards which vest based upon performance conditions. We measure the value of stock option awards on the date of grant at fair value using the appropriate valuation techniques, including the Black-Scholes and Monte Carlo option-pricing models. We

recognize the fair value as stock-based compensation expense on a straight-line basis over the requisite service period, which is typically the vesting period. The pricing models require various highly judgmental assumptions including volatility and expected option term. If any of the assumptions used in the models change significantly, stock-based compensation expense may differ materially in the future from that recorded in the current period.

As a result of the adoption of Accounting Standards Update ("ASU") No. 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting ("ASU 2016-09"), effective January 1, 2017, we no longer record stock-based compensation expense net of estimated forfeitures and the tax effects of awards are treated as discrete items in the period in which tax windfalls or shortfalls occur. The adoption also impacted the presentation of cash flows and the computation of earnings per share.

The adoption of ASU 2016-09 will subject our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes based upon the fair value of the award at the grant date. See additional discussion included in Note 2, Significant Accounting Policies and Recent Accounting Pronouncements, to our consolidated financial statements.

Restructuring, Redundancy and Related Reorganization Costs

We have engaged in employee headcount optimization actions within WD Services which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction. We accrue for severance and other employee separation costs under these actions when it is probable that a liability has been incurred and the amount is reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable under existing plans for the number of employees impacted, but the final determination of the actual employees to be terminated is subject to a customary consultation process. The estimate of costs that will ultimately be paid requires significant judgment and to the extent that actual results or updated results differ from our current estimates, such amounts will be recorded as a cumulative adjustment in the period such amounts are determined.

Results of operations

Segment reporting. Our operations are organized and reviewed by management along our segment lines. We operate in two principal business segments: NET Services and WD Services. Our investment in Matrix is also a reportable segment referred to as the "Matrix Investment". Segment results are based on how our chief operating decision maker manages our business, makes operating decisions and evaluates operating performance. The operating results of the two principal business segments include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by our corporate division on behalf of the segment, which primarily relate to insurance and stock-based compensation allocations. Indirect expenses, including unallocated corporate functions and expenses, such as executive, finance, accounting, human resources, information technology and legal, as well as the results of our captive insurance company (the "Captive") and elimination entries recorded in consolidation are reflected in "Corporate and Other".

Discontinued operations. Effective October 19, 2016, we completed the Matrix Transaction resulting in our ownership of a noncontrolling interest in our historical HA Services segment. The HA Services segment results of operations for the periods through October 19, 2016 are separately discussed in the "Discontinued operations, net of tax" section set forth below. For periods subsequent to the transaction, the results of the Matrix Investment are separately discussed in the "Equity in net loss of investees" section set forth below. Additionally, effective November 1, 2015, we completed the sale of our Human Services segment. The Human Services segment results of operations are separately discussed in the "Discontinued operations, net of tax" section set forth below.

Year ended December 31, 2017 compared to year ended December 31, 2016

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of income for 2017 and 2016 (in thousands):

	Year ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,623,882	100.0 %	1,578,245	100.0 %
Operating expenses:				
Service expense	1,489,044	91.7 %	1,452,110	92.0 %
General and administrative expense	72,336	4.5 %	69,911	4.4 %
Asset impairment charge	—	— %	21,003	1.3 %
Depreciation and amortization	26,469	1.6 %	26,604	1.7 %
Total operating expenses	1,587,849	97.8 %	1,569,628	99.5 %
Operating income	36,033	2.2 %	8,617	0.5 %
Non-operating expense:				
Interest expense, net	1,278	0.1 %	1,583	0.1 %
Other income	(5,363)	(0.3)%	—	— %
Equity in net (gain) loss of investees	(12,054)	(0.7)%	10,287	0.7 %
Gain on sale of equity investment	(12,377)	(0.8)%	—	— %
Loss (gain) on foreign currency transactions	345	— %	(1,375)	(0.1)%
Income (loss) from continuing operations before income taxes	64,204	4.0 %	(1,878)	(0.1)%
Provision for income taxes	4,401	0.3 %	17,036	1.1 %
Income (loss) from continuing operations	59,803	3.7 %	(18,914)	(1.2)%
Discontinued operations, net of tax	(5,983)	(0.4)%	108,760	6.9 %
Net income	53,820	3.3 %	89,846	5.7 %
Net (gain) loss attributable to noncontrolling interest	(451)	— %	2,082	0.1 %
Net income attributable to Providence	53,369	3.3 %	91,928	5.8 %

Service revenue, net. Consolidated service revenue, net for 2017 increased $45.6 million, or 2.9%, compared to 2016. Revenue for 2017 compared to 2016 includes an increase in revenue of NET Services of $84.5 million, which was partially offset by a decrease in revenue of WD Services of $38.7 million. Excluding the effects of changes in currency exchange rates, consolidated service revenue increased 3.4% in 2017 compared to 2016.

Total operating expenses. Consolidated operating expenses for 2017 increased $18.2 million, or 1.2%, compared to 2016. Operating expenses for 2017 compared to 2016 included an increase in expenses attributable to NET Services of $95.8 million and Corporate and Other of $2.5 million. Partially offsetting these expense increases was a decrease in WD Services' operating expenses of $80.2 million. 2016 operating expenses include asset impairment charges of $19.6 million at WD Services and $1.4 million at Corporate and Other.

Operating income. Consolidated operating income for 2017 increased $27.4 million compared to 2016 due to a decrease in the operating loss of WD Services in 2017 of $41.4 million, as compared to 2016. This change was partially offset by a decrease in operating income of NET Services in 2017 as compared to 2016 of $11.3 million and an increase in the operating loss for Corporate and Other of $2.7 million in 2017 as compared to 2016.

Interest expense, net. Consolidated interest expense, net for 2017 decreased $0.3 million, or 19.3%, compared to 2016, and remained consistent as a percentage of revenue.

Other income. Other income in 2017 of $5.4 million represents the settlement received from the Haverhill Litigation, see Item 3. Legal Proceedings for further information on the settlement.

Equity in net (gain) loss of investees. Our equity in net (gain) loss of investees for 2017 of $12.1 million includes an equity in net loss for Mission Providence of $1.4 million through the sale date on September 29, 2017, and an equity in net gain for Matrix of $13.4 million. Our equity in net loss of investees for 2016 of $10.3 million includes an equity in net loss for Mission Providence of $8.5 million and Matrix of $1.8 million. We began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction, and we record our ownership percentage of Matrix's profit or loss in net loss or gain of investees. Included in Matrix's 2017 full standalone net income of $26.7 million (which is not consolidated with Providence's) are depreciation and amortization of $33.5 million, interest expense of $14.8 million, transaction bonuses and other transaction related costs of $3.5 million, equity compensation of $2.6 million, management fees paid to Matrix's shareholders of $2.3 million, merger and acquisition diligence related costs of $0.7 million and income tax benefit of $29.6 million. Matrix's significant income tax benefit in 2017 primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. Included in Matrix's 2016 full standalone net loss of $4.2 million (which is not consolidated with Providence's) are depreciation and amortization of $6.4 million, interest expense of $2.9 million, transaction bonuses and other transaction related costs of $6.4 million, equity compensation of $0.4 million, management fees paid to Matrix's shareholders of $0.4 million and income tax benefit of $2.8 million.

Gain on sale of equity investment. The gain on sale of equity investment of $12.4 million relates to the sale of the Company's equity interest in Mission Providence in 2017. The investment in Mission Providence was part of the WD Services segment. The sale of Mission Providence is not included as a discontinued operation as the disposition did not represent a strategic shift that has a major effect on our operations and financial results.

Loss (gain) on foreign currency transactions. The foreign currency loss of $0.3 million and gain of $1.4 million for 2017 and 2016, respectively, were primarily due to translation adjustments of our foreign subsidiaries.

Provision for income taxes. Our effective tax rate from continuing operations for 2017 was 6.9%. The effective tax rate was lower than the U.S. federal statutory rate of 35% primarily due to the impact of the Tax Reform Act. The tax provision includes a benefit of $16.0 million related to the enactment of the Tax Reform Act during the fourth quarter of 2017, consisting of a net tax benefit of $19.4 million from the re-measurement of deferred tax liabilities from the lower U.S. corporate tax rate, partially offset by additional tax expense of $3.4 million due to an increase in our equity in net gain of Matrix as a result of Matrix's re-measurement of deferred tax liabilities. In addition, the Company incurred tax expense of $3.6 million related to the HoldCo LTIP, for which expense was recorded for financial reporting purposes based upon fair value of the award at the grant date, but no shares will be issued due to the market condition of the award not being satisfied. This tax expense was the result of the adoption of ASU 2016-09, which subjects our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes.

During 2016, we recognized an income tax provision despite having a loss from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit could not be recognized, and non-deductible expenses, the Company recognized taxable income for this year upon which the income tax provision for financial reporting is calculated.

Discontinued operations, net of tax. Discontinued operations, net of tax, includes the activity of our former Human Services segment and our former HA Services segment, composed entirely of our 100% ownership in Matrix until the completion of the Matrix Transaction on October 19, 2016. For 2017, discontinued operations, net of tax for our Human Services segment was a loss of $6.0 million, which primarily related to the accrual of a contingent liability of $9.0 million related to the settlement of indemnification claims and associated legal costs of $0.7 million, partially offset by a related tax benefit. Discontinued operations, net of tax for our Human Services segment was a loss of $5.6 million in 2016, which included an accrual of $6.0 million with respect to potential indemnification claims, legal costs of $1.1 million related to these potential claims and transaction related expenses of $0.8 million, partially offset by a related tax benefit. Discontinued operations, net of tax for our HA Services segment was income of $114.3 million for 2016, which included a gain on disposition, net of tax, of $109.4 million. See Note 20, Discontinued Operations, to our consolidated financial statements for additional information.

Net (income) loss attributable to noncontrolling interests. Net (income) loss attributable to noncontrolling interests primarily relates to a minority interest held by a third-party operating partner in our company servicing the offender rehabilitation contract in our WD Services segment.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,318,220	100.0%	1,233,720	100.0%
Service expense	1,227,426	93.1%	1,132,857	91.8%
General and administrative expense	11,779	0.9%	11,406	0.9%
Depreciation and amortization	13,275	1.0%	12,375	1.0%
Operating income	65,740	5.0%	77,082	6.2%

Service revenue, net. Service revenue, net for NET Services in 2017 increased $84.5 million, or 6.8%, compared to 2016. The increase was related to net increased revenue from existing contracts, including successfully renewed contracts, of $82.5 million, due to the net impact of membership and rate changes. Included within net rate changes are the positive impacts of final agreements on rate adjustments related to existing contracts that experienced increased utilization in 2017 as well as the release of previously accrued revenue hold-backs based on certain contract performance requirements on a significant contract. Additionally, the impact of new contracts, including new managed care organization contracts in Florida and New York, contributed $93.8 million of revenue for 2017. These increases were partially offset by the $91.8 million impact on revenue of contracts we no longer serve, including a contract with the state of New York.

Service expense. Service expense is comprised of the following for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	1,009,518	76.6%	927,321	75.2%
Payroll and related costs	165,666	12.6%	162,000	13.1%
Other operating expenses	51,720	3.9%	42,478	3.4%
Stock-based compensation	522	—%	1,058	0.1%
Total service expense	1,227,426	93.1%	1,132,857	91.8%

Service expense for 2017 increased $94.6 million, or 8.3%, compared to 2016. The increase in service expense was primarily attributable to the impact of new managed care organization contracts in California, Florida and New York. Purchased services as a percentage of revenue increased from 75.2% in 2016 to 76.6% in 2017 primarily attributable to an increase in utilization across multiple contracts. The higher utilization was in part driven by increased Medicaid reimbursement in New Jersey for certain medical services, increasing the demand for transportation services, and increased utilization across multiple managed care contracts in California. Additionally, due to milder winter weather conditions during the first quarter of 2017, we experienced above expected utilization; however, we experienced lower utilization for contracts in the third quarter of 2017 due in part to the impact of Hurricane Irma. The increase in purchased services as a percentage of revenue caused by increased utilization was partially offset by the successful implementation of initiatives aimed at lowering transportation costs on a per trip and per mile basis as well as the release of a reserve based upon the finalization of a contract amendment with a state customer.

Payroll and related costs as a percentage of revenue decreased from 13.1% in 2016 to 12.6% in 2017 due to efficiencies gained from multiple process improvement initiatives, including those aimed at lowering payroll expense across our reservation

and operation center networks, as well as a decrease in chief executive officer compensation expense due to the transition of the chief executive officer position during 2017. Other operating expenses increased for 2017 as compared to 2016 primarily attributable to an incremental $4.1 million of value enhancement and related costs incurred for external resources used in the design and implementation of NET Services member experience and value enhancement initiatives in 2017, as well as increased software and hardware maintenance costs associated with increased use of information technology.

General and administrative expense. General and administrative expenses in 2017 increased $0.4 million, or 3.3%, as compared to 2016, due to increased facility costs resulting from the overall growth of our operations. As a percentage of revenue, general and administrative expense remained constant at 0.9%.

Depreciation and amortization expense. Depreciation and amortization expenses increased $0.9 million primarily due to the addition of long-lived assets relating to information technology projects. As a percentage of revenue, depreciation and amortization remained constant at 1.0%. At December 31, 2017, NET Services has $11.9 million of construction and development in progress related to its LCAD NextGen technology system, which is expected to be placed into service in 2018.

WD Services

WD Services financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	305,662	100.0%	344,403	100.0 %
Service expense	265,417	86.8%	320,147	93.0 %
General and administrative expense	25,438	8.3%	30,300	8.8 %
Asset impairment charge	—	—%	19,588	5.7 %
Depreciation and amortization	12,851	4.2%	13,824	4.0 %
Operating income (loss)	1,956	0.6%	(39,456)	(11.5)%

Service revenue, net. Service revenue, net in 2017 decreased $38.7 million, or 11.2%, compared to 2016. Excluding the effects of changes in currency exchange rates, service revenue decreased 8.9% in 2017 compared to 2016, which was primarily related to the anticipated decline of referrals under the segment's Work Programme contracts in the UK, as well as decreased revenue under our offender rehabilitation program. While WD Services has successfully secured contracts under the UK's new Work and Health Programme, the successor program to the Work Programme, with a combined total value of approximately $195 million over 5 years, revenues under these new contracts were negligible in 2017 and did not offset declines in revenue experienced under the Work Programme contracts. These decreases were partially offset by increases across various employability contracts outside the UK, including in Australia, France, Germany and the U.S., as well as increased revenue from our health services contract in the UK. 2017 includes the impact of $5.2 million of revenue recognized under the offender rehabilitation program related to the finalization of a contractual adjustment for the contract year ended March 31, 2017, whereas 2016 includes $5.4 million of revenue recognized under the offender rehabilitation program related to the finalization of a contractual adjustment for the prior contract years ended March 31, 2015 and 2016.

Service expense. Service expense is comprised of the following for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Payroll and related costs	177,195	58.0%	210,293	61.1 %
Purchased services	49,491	16.2%	65,363	19.0 %
Other operating expenses	38,675	12.7%	44,502	12.9 %
Stock-based compensation	56	—%	(11)	— %
Total service expense	265,417	86.8%	320,147	93.0 %

Service expense in 2017 decreased $54.7 million, or 17.1%, compared to 2016. Payroll and related costs decreased primarily as a result of declining referrals under the segment's primary employability program in the UK as well as redundancy plans that better aligned headcount with service delivery volumes, resulting in a decrease of payroll and related costs as a percentage of revenue. Payroll and related costs include $2.6 million and $8.5 million in 2017 and 2016, respectively, of termination benefits related to redundancy plans. Purchased services decreased in 2017 compared to 2016 primarily as a result of a decline in client referrals under our primary employability program in the UK, which resulted in a decline in the use of outsourced services. Other operating expenses decreased in 2017 compared to 2016 primarily as a result of a decline in consulting related costs and information technology maintenance costs.

General and administrative expense. General and administrative expense in 2017 decreased $4.9 million compared to 2016. The decrease was due to office closures associated with the restructuring of the UK operations, as well as lower rent for certain offices. Additionally, $2.0 million of the decrease related to the impact of acquisition related contingencies that were favorably resolved in 2017, resulting in a benefit to general and administrative expense.

Asset impairment charge. During the fourth quarter of 2016, WD Services recorded asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK. No impairment charges were incurred in 2017.

Depreciation and amortization expense. Depreciation and amortization expense for 2017 decreased $1.0 million compared to 2016, primarily due to the asset impairment charges incurred during the fourth quarter of 2016, which decreased the value of our intangible assets and certain property and equipment.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the Providence corporate level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,	
	2017	2016
	$	$
Service revenue, net	—	122
Service expense (a)	(3,799)	(894)
General and administrative expense	35,119	28,205
Asset impairment charge	—	1,415
Depreciation and amortization	343	405
Operating loss	(31,663)	(29,009)

(a) Negative amounts are present for this line item due to changes in estimate for claims incurred but not reported, as well as elimination entries that are included in Corporate and Other. Certain offsetting amounts are reflected in the financial results of our operating segments.

Operating loss. Corporate and Other operating loss in 2017 increased by $2.7 million, or 9.1%, as compared to 2016 primarily due to an increase in cash settled stock-based compensation expense of $3.6 million, primarily as a result of an increase in the Company's stock price in 2017 as compared to a decrease in 2016, an increase in share settled stock-based compensation expense of $2.7 million, primarily related to an increase in expense for the HoldCo LTIP despite this program expiring with no shares due to any employees, expense for stock options issued to a former chief executive officer upon separation from the Company, and a benefit recorded in 2016 for performance based units, with no corresponding benefit in 2017, as well as an increase of $3.8 million of professional costs due to activities associated with our increased focus on strategic initiatives. This increase was partially offset by a reduction in insurance loss reserves of $3.5 million in 2017, versus $2.5 million in 2016, due to favorable claims history of our Captive reinsurance programs, as well as decreased costs of the Captive operations due to no longer writing new policies as of May 2017, which is included in "Service expense", decreased accounting, legal and professional fees included in "General and administrative expense", and decreased asset impairment charges, as $1.4 million was recorded in 2016 in relation to the sale of a building.

General and administrative expense includes stock-based compensation for the HoldCo LTIP of $4.7 million and $3.3 million for 2017 and 2016, respectively. No shares will be distributed under the HoldCo LTIP as the volume weighted average of Providence's stock price over the 90-day trading period ended on December 31, 2017 was less than $56.79. As such, as of December 31, 2017, we accelerated all remaining unrecognized compensation expense for the Holdco LTIP as there was no further requisite service period associated with the award resulting in an acceleration of expense of $1.1 million. General and administrative expense also includes $0.4 million and $1.6 million for 2017 and 2016, respectively, related to a shareholder lawsuit.

Costs associated with the resignation of Mr. Lindstrom during the year ended December 31, 2017 include cash compensation related items of $0.9 million, stock-based compensation of $0.7 million, and other costs of $0.2 million. These costs are recorded as part of "General and administrative expense".

Year ended December 31, 2016 compared to year ended December 31, 2015

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of income for 2016 and 2015 (in thousands):

	Year ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,578,245	100.0 %	1,478,010	100.0 %
Operating expenses:				
Service expense	1,452,110	92.0 %	1,381,154	93.4 %
General and administrative expense	69,911	4.4 %	70,986	4.8 %
Asset impairment charge	21,003	1.3 %	—	— %
Depreciation and amortization	26,604	1.7 %	23,998	1.6 %
Total operating expenses	1,569,628	99.5 %	1,476,138	99.9 %
Operating income	8,617	0.5 %	1,872	0.1 %
Non-operating expense:				
Interest expense, net	1,583	0.1 %	1,853	0.1 %
Equity in net loss of investees	10,287	0.7 %	10,970	0.7 %
Gain on foreign currency transactions	(1,375)	(0.1)%	(857)	(0.1)%
Income (loss) from continuing operations before income taxes	(1,878)	(0.1)%	(10,094)	(0.7)%
Provision for income taxes	17,036	1.1 %	14,583	1.0 %
Income (loss) from continuing operations	(18,914)	(1.2)%	(24,677)	(1.7)%
Discontinued operations, net of tax	108,760	6.9 %	107,871	7.3 %
Net income	89,846	5.7 %	83,194	5.6 %
Net loss attributable to noncontrolling interest	2,082	0.1 %	502	— %
Net income attributable to Providence	91,928	5.8 %	83,696	5.7 %

Service revenue, net. Consolidated service revenue, net for 2016 increased $100.2 million, or 6.8%, compared to 2015. Revenue for 2016 compared to 2015 included an increase in revenue of NET Services of $150.7 million, which was partially offset by a decrease in revenue of WD Services of $50.7 million. Excluding the effects of changes in currency exchange rates, consolidated service revenue increased 8.8% in 2016 compared to 2015.

Total operating expenses. Consolidated operating expenses for 2016 increased $93.5 million, or 6.3%, compared to 2015. Operating expenses for 2016 compared to 2015 included an increase in expenses attributable to NET Services of $144.8 million and Corporate and Other of $2.2 million. Partially offsetting these expense increases was a decrease in WD Services' operating expenses of $53.6 million. Operating expenses included asset impairment charges of $19.6 million at WD Services and $1.4 million at Corporate and Other during 2016, while no such charges were incurred in 2015.

Operating income. Consolidated operating income for 2016 increased $6.7 million compared to 2015 due to an increase in operating income of NET Services in 2016 as compared to 2015 of $5.9 million and a decrease in the operating loss of WD Services in 2016 as compared to 2015 of $2.9 million, although WD Services' new offender rehabilitation program incurred an operating loss in 2016 as compared to operating income in 2015. In addition, France continued to experience a significant operating loss in 2016, consistent with 2015. These changes were partially offset by an increase in the operating loss for Corporate and Other of $2.0 million, driven primarily by the asset impairment charge of $1.4 million in 2016.

Interest expense, net. Consolidated interest expense, net for 2016 decreased $0.3 million, or 14.6%, compared to 2015. The decrease is primarily related to the repayment of the related party note during 2015, which was partially offset by higher commitment fees on our Credit Facility for 2016 as compared to 2015.

Equity in net loss of investees. Equity in net loss of investees primarily relates to our investments in Mission Providence and Matrix. Mission Providence, which is part of WD Services, began providing services in July 2015. We record 75% of Mission Providence's profit or loss in equity in net loss of investees. We began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction. Our equity in net loss of investees related to WD Services and Matrix totaled $8.5 million and $1.8 million, respectively, for 2016. Included in Matrix's results (which are not consolidated with Providence's) is interest expense of $2.9 million and transaction related expenses of $6.0 million, which includes $4.0 million of transaction incentive compensation payable to the Matrix management team.

Gain on foreign currency transactions. The foreign currency gains of $1.4 million and $0.9 million for 2016 and 2015, respectively, were primarily due to translation adjustments of our foreign subsidiaries.

Provision for income taxes. We recognized an income tax provision for 2016 and 2015 despite having losses from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit currently cannot be recognized, and non-deductible expenses such as amortization of deferred consideration related to the Ingeus acquisition, the Company recognized taxable income for these years upon which the income tax provision for financial reporting is calculated.

Discontinued operations, net of tax. Discontinued operations, net of tax, includes the activity of our former Human Services segment and our former HA Services segment, composed entirely of our 100% equity interest in Matrix until the completion of the Matrix Transaction on October 19, 2016. Discontinued operations, net of tax for our Human Services segment was a loss of $5.6 million in 2016 and income of $101.8 million in 2015, respectively. 2016 Human Services results include an accrual of $6.0 million with respect to potential indemnification claims, legal costs of $1.1 million related to these potential claims and transaction related expenses of $0.8 million. 2015 Human Services segment results include a gain on disposition, net of tax, of $100.3 million. Discontinued operations, net of tax for our HA Services segment was income of $114.3 million and $6.1 million for 2016 and 2015, respectively. 2016 HA Services segment results include a gain on disposition, net of tax, of $109.4 million. See Note 20, Discontinued Operations, to our consolidated financial statements for additional information.

Net loss attributable to noncontrolling interest. Net loss attributable to noncontrolling interests primarily relates to the minority interest associated with our company servicing the offender rehabilitation contract in our WD Services segment. As this contract is currently experiencing losses, as further discussed below, we have a net loss attributable to noncontrolling interests.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,233,720	100.0%	1,083,015	100.0%
Service expense	1,132,857	91.8%	991,659	91.6%
General and administrative expense	11,406	0.9%	10,704	1.0%
Depreciation and amortization	12,375	1.0%	9,429	0.9%
Operating income	77,082	6.2%	71,223	6.6%

Service revenue, net. Service revenue, net for NET Services in 2016 increased $150.7 million, or 13.9%, compared to 2015. The increase related to the impact of new contracts which contributed $76.4 million of revenue in 2016, including contracts in California and Florida, and an increase in revenue associated with existing contracts of $119.8 million due to the net impact of membership and rate changes, partially offset by the loss of certain contracts that resulted in a decrease in revenue of $45.5 million.

Service expense. Service expense is comprised of the following for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	927,321	75.2%	814,632	75.2%
Payroll and related costs	162,000	13.1%	141,669	13.1%
Other operating expenses	42,478	3.4%	34,634	3.2%
Stock-based compensation	1,058	0.1%	724	0.1%
Total service expense	1,132,857	91.8%	991,659	91.6%

Service expense for 2016 increased $141.2 million, or 14.2%, compared to 2015. The increase in service expense was primarily attributable to an increase in purchased transportation services due primarily to higher transportation volume. Purchased services as a percentage of revenue remained constant at 75.2%. Additionally, our payroll and related costs increased for 2016 as compared to 2015 primarily due to the hiring of employees to support new contracts and increased call volume associated with increased utilization, as well as an increase of $1.2 million in expense for the long-term incentive plan for management put into place in the fourth quarter of 2015 and separation related charges for NET Services' former chief executive officer during 2016 of $0.8 million. Our other operating expenses also increased for 2016 as compared to 2015. The increase was primarily attributable to increased bad debt expense, including $2.1 million of expense related to one specific customer, and costs incurred for external resources used in the design and implementation of NET Services member experience and value enhancement initiatives of $2.0 million. Stock-based compensation increased $0.3 million in 2016 as compared to 2015 primarily due to the expense associated with new stock-based compensation awards granted in 2016 that vested in January 2017.

General and administrative expense. General and administrative expenses in 2016 increased $0.7 million, or 6.6%, as compared to 2015, due to increased facility costs resulting from the overall growth of our operations. As a percentage of revenue, general and administrative expense decreased slightly from 1.0% for 2015 to 0.9% for 2016.

Depreciation and amortization expense. Depreciation and amortization expenses increased $2.9 million primarily due to the addition of long-lived assets in our call centers. As a percentage of revenue, depreciation and amortization increased slightly from 0.9% for 2015 to 1.0% for 2016.

WD Services

WD Services financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	344,403	100.0 %	395,059	100.0 %
Service expense	320,147	93.0 %	393,803	99.7 %
General and administrative expense	30,300	8.8 %	29,846	7.6 %
Asset impairment charge	19,588	5.7 %	—	— %
Depreciation and amortization	13,824	4.0 %	13,776	3.5 %
Operating income (loss)	(39,456)	(11.5)%	(42,366)	(10.7)%

Service revenue, net. Service revenue, net in 2016 decreased $50.7 million, or 12.8%, compared to 2015. Excluding the effects of changes in currency exchange rates, service revenue decreased 5.1% in 2016 compared to 2015, which was primarily related to revenue declines associated with declining referrals and an altered pricing structure under the segment's primary employability

program in the UK and a revised bidding strategy in certain markets. Implemented in late 2015, the overhauled bidding process emphasized the pursuit of only those contracts that meet certain investment criteria, including risk-weighted return

on capital thresholds, and involve the provision of services where we believe our experience will allow us to deliver differentiated and improved outcomes for our clients. As a result of this enhanced criteria and a challenging UK outsourcing industry, new contracts have been more infrequent and smaller in nature. The decrease was partially offset by two new contracts in France that began in 2015 and growth of NCS youth programs in 2016. WD Services additionally recognized revenue of $5.4 million for 2016 under its offender rehabilitation program related to the finalization of a contractual adjustment for contract years ended March 31, 2015 and 2016, which partially offset the decline in revenue under this contract for 2016.

Service expense. Service expense is comprised of the following for 2016 and 2015 (in thousands):

	Year Ended December 31,			
	2016		2015	
	$	Percentage of Revenue	$	Percentage of Revenue
Payroll and related costs	210,293	61.1 %	249,130	63.1%
Purchased services	65,363	19.0 %	78,498	19.9%
Other operating expenses	44,502	12.9 %	45,418	11.5%
Stock-based compensation	(11)	— %	20,757	5.3%
Total service expense	320,147	93.0 %	393,803	99.7%

Service expense in 2016 decreased $73.7 million, or 18.7%, compared to 2015. Payroll and related costs decreased primarily as a result of the redundancy plans implemented in the fourth quarter of 2015 that were designed to better align headcount with service delivery volumes as well as declining referrals under the segment's primary employability program in the UK. Partially offsetting these decreases was increased payroll and related costs associated with a significant new offender rehabilitation program that began in 2015 and higher payroll expenses in France associated with new programs implemented in 2015 and 2016. As referenced above, both the segment's new offender rehabilitation program and operations in France had significant operating losses in 2016. In addition, $8.5 million in termination benefits related to three redundancy plans contributed to losses in 2016. Purchased services decreased in 2016 compared to 2015 primarily as a result of a decline in client referrals under our primary employability program in the UK which required less use of outsourced services. Stock-based compensation decreased $20.8 million in 2016 as compared to 2015 primarily due to expenses totaling $16.1 million related to the settlement of outstanding awards in the fourth quarter of 2015 in relation to the separation of two executives, who were also sellers of Ingeus to Providence, as further described in Note 13, Stock-Based Compensation and Similar Arrangements, to our consolidated financial statements.

General and administrative expense. General and administrative expense in 2016 increased $0.5 million compared to 2015. $2.5 million of the increase relates to the impact of the reduction in the fair value of contingent consideration that was recorded in 2015. Offsetting this increase were decreased facility costs of $2.0 million primarily due to the closure of numerous sites in the UK, partially offset by the opening of new sites in France during 2016.

Asset impairment charge. During the fourth quarter of 2016, WD Services recorded asset impairment charges of $10.0 million, $4.4 million and $5.2 million to its property and equipment, intangible assets and goodwill, respectively, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the UK impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; and the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK. No impairment charges were incurred in 2015.

Depreciation and amortization expense. Depreciation and amortization expense for 2016 was flat compared to 2015.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the Providence corporate level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2016 and 2015 (in thousands):

	Year Ended December 31,	
	2016	2015
	$	$
Service revenue, net (a)	122	(64)
Service expense (a)	(894)	(4,308)
General and administrative expense	28,205	30,436
Asset impairment charge	1,415	—
Depreciation and amortization	405	793
Operating loss	(29,009)	(26,985)

(a) Negative amounts are present for this line item due to elimination entries that are included in Corporate and Other. Offsetting amounts are reflected in the financial results of our operating segments.

Operating loss. Corporate and Other operating loss in 2016 increased by $2.0 million, or 7.5%, as compared to 2015 primarily due to a $4.5 million decrease in benefits associated with favorable claims experiences on our reinsurance and self-insured programs, an asset impairment charge of $1.4 million in 2016 and a $0.4 million net increase in compensation related expenses. The $0.4 million net increase in compensation expenses in 2016 was primarily due to an increase in short-term incentives and $1.0 million of compensation related to the sale of the Company's Human Services segment in 2015. Also included in 2016 were $1.6 million of expenses related to a shareholder lawsuit, an increase of $0.8 million from 2015. These increases in expense were partially offset by a decrease in various professional fees of $4.0 million. The Company anticipates continued reductions in multiple Corporate and Other expense categories in 2017.

Seasonality

Our quarterly operating results and operating cash flows normally fluctuate due in part to seasonal factors, uneven demand for services and the timing of new contracts, which impact the amount of revenues earned and expenses incurred. NET Services experiences fluctuations in demand during the summer and winter seasons. Due to higher demand in the summer months, lower demand during the winter months, and a primarily fixed revenue stream based on a per-member, per-month payment structure, NET Services normally experiences lower operating margins during the summer season and higher operating margins during the winter. WD Services is impacted by both the timing of commencement and expiration of major contracts. Under many of WD Services' contracts, we invest significant sums of money in personnel, leased office space, purchased or developed technology, and other costs, and generally incur these costs prior to commencing services and receiving payments. This results in significant variability in financial performance and cash flows between quarters and for comparative periods. It is expected that future contracts will be structured in a similar fashion. However, the Company does not expect a large variability in financial performance upon the commencement of WD Service's newly secured Work and Health Programme contracts as the upfront implementation investments needed for these contracts are expected to be significantly less than those associated with other large contract commencements undertaken in the past, such as the offender rehabilitation program in 2016. In addition, under the majority of WD Services' contracts, the Company relies on its customers, which include government agencies, to provide referrals, for which the Company can provide services and earn revenue. The timing and magnitude of referrals can fluctuate significantly, leading to volatility in revenue.

Liquidity and capital resources

Short-term capital requirements consist primarily of recurring operating expenses and new contract start-up costs, including workforce restructuring costs. We expect to meet any cash requirements through available cash on hand, cash generated from our operating segments, and borrowing capacity under our Credit Facility (as defined below).

Cash flow from operating activities was our primary source of cash during 2017, and included $5.4 million received from the settlement of the Haverhill Litigation. Additionally, 2017 included $15.6 million in proceeds from the sale of our equity investment in Mission Providence which is included in cash provided by investing activities. Our balance of cash and cash equivalents was $95.3 million and $72.3 million at December 31, 2017 and 2016, respectively, including $40.1 million and $21.4 million held in foreign countries, respectively. The December 31, 2017 foreign cash balance includes the proceeds from the sale of Mission Providence of $15.6 million. Such cash held in foreign countries is generally used to fund foreign operations, although it may also be used to repay intercompany indebtedness existing between Providence and its foreign subsidiaries. As of March 5, 2018, the Company transferred $13.9 million from its foreign operations to its domestic operations since December 31, 2017.

We had restricted cash of $6.3 million and $14.1 million at December 31, 2017 and 2016, respectively, primarily related to contractual obligations and activities of our captive insurance subsidiary. Given expiring policies under our captive insurance subsidiary were not renewed upon expiration in May 2017, we expect our restricted cash balances to decline over time. These restricted cash amounts are not included in our balance of cash and cash equivalents. At both December 31, 2017 and 2016, we had no amounts outstanding under our credit facility.

We may, from time to time, access capital markets to raise equity or debt financing for various business reasons, including acquisitions. We may also raise debt financing to fund future repurchases of our Common Stock. The timing, term, size, and pricing of any such financing will depend on investor interest and market conditions, and there can be no assurance that we will be able to obtain any such financing. Our current credit facility expires on August 2, 2018. On November 2, 2017, the Company's Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Through December 31, 2017, the Company repurchased 180,270 shares, for $10.5 million, and $59.1 million was available under the plan to repurchase shares. During the period January 1, 2018 to March 5, 2018, the Company repurchased an additional 527,825 shares for $33.3 million, and $25.8 million was available under the plan to repurchase shares.

The cash flow statement for all periods presented includes both continuing and discontinued operations. Discontinued operations includes the activity of our Human Services and HA Services segments. The loss from discontinued operations totaled $6.0 million for the year ended December 31, 2017, while income from discontinued operations totaled $108.8 million and $107.9 million for the years ended December 31, 2016 and 2015, respectively. For 2017, the loss from discontinued operations primarily related to the accrual of a contingent liability of $9.0 million related to the future settlement of indemnification claims associated with our former Human Services segment, partially offset by a related tax benefit. The significant income from discontinued operations during the years ended December 31, 2016 and 2015 related to the gains on sale of our HA Services segment and Human Services segment, respectively. Significant non-cash items of our discontinued operations in 2016 and 2015 included $3.7 million and $5.7 million of depreciation expense, respectively, $17.5 million and $28.6 million of amortization expense, respectively, and $52.3 million and negative $5.0 million of deferred taxes, respectively. Our discontinued operations also purchased property and equipment totaling $9.2 million and $10.3 million during 2016 and 2015.

2017 cash flows compared to 2016

Operating activities. Cash provided by operating activities was $55.0 million for 2017, an increase of $13.3 million compared with 2016. 2017 and 2016 cash flow from operations was driven by net income of $53.8 million and $89.8 million, respectively, non-cash adjustments to reconcile net income to net cash provided by operating activities of negative $11.1 million and negative $32.9 million, respectively, and changes in working capital of $12.3 million and negative $15.2 million, respectively.

The change in non-cash adjustments to reconcile net income to net cash provided by operating activities was due primarily to the impact of:

- the disposition of HA Services, resulting in decreased gain on sale of business, depreciation, amortization and deferred taxes in 2017 as compared to 2016;
- the asset impairment charge incurred in 2016 of $21.0 million;
- the impact on deferred taxes as a result of the Tax Reform Act passed in 2017;
- the gain on sale of Mission Providence of $12.4 million in 2017; and
- the impact of the change in equity in net (gain) loss of investees, which was a gain of $12.1 million in 2017 as compared to a loss of $10.3 million in 2016.

The change in working capital was primarily driven by the following:

- Accounts receivable generated a cash inflow in 2017 of $5.7 million as compared to an outflow of $19.3 million in 2016. The increase in cash inflow of $25.0 million was primarily attributable to NET Services due to the timing of collections as well as an outflow of $3.1 million of HA Services in 2016. These changes were partially offset by cash outflows in 2017 related to an increase in WD Services' receivables in Germany, Saudi Arabia, South Korea and the UK.
- Prepaid expenses and other generated a cash inflow of $15.5 million in 2017, as compared to a cash outflow of $4.1 million in 2016. The increase in cash inflow of $19.5 million was primarily attributable to a decrease in other receivables related to amounts receivable from insurance carriers in respect to certain claims paid by the Company, but reimbursable from the respective insurance carrier, decreased receivables related to our captive insurance company insurance policy rewrite, decreased prepaid value added taxes in the UK, decreased prepayments in WD Services in relation to certain contracts and changes in income tax payments.
- Accounts payable and accrued expenses generated a cash outflow of $9.1 million in 2017, as compared to a cash inflow of $33.4 million in 2016. The decrease in cash inflow of $42.4 million is due primarily to the impact of NET Services accrued contract payments of $21.5 million, as well as the disposition of HA Services, which generated a cash inflow of $10.6 million in 2016. Partially offsetting these impacts is the impact of the increase in the accrued settlement related to our former Human Services segment of $9.0 million during 2017 as compared to an increase of $6.0 million in 2016.
- Accrued transportation costs of NET Services generated a cash inflow of $11.2 million in 2017, as compared to a cash inflow of $8.7 million in 2016. The increase in cash inflow of $2.6 million is due primarily to the timing of payments to NET Services transportation providers and increased volume.
- Income taxes payable on sale of business for 2016 includes a cash outflow of $30.2 million related to the sale of our Human Services segment.

Investing activities. Net cash provided by investing activities of $0.8 million in 2017 decreased by $323.1 million as compared to 2016. The decrease was primarily attributable to $371.6 million of proceeds on the Matrix Transaction recorded in 2016, which was partially offset by the impact of $15.6 million in proceeds from the sale of our equity investment in Mission Providence in 2017. Additionally in 2017, we made a cost method investment in Circulation, a technology-based service provider, for $3.0 million. There was also a decrease in funding of our equity investment in Mission Providence of $13.7 million and a decrease in the purchase of property and equipment of $21.3 million. 2016 included purchases of property and equipment of $9.2 million by our discontinued operations.

Financing activities. Net cash used in financing activities of $33.8 million in 2017 decreased $343.0 million as compared to 2016. During 2016, there was a net repayment of debt of $305.0 million, primarily related to the repayment of debt upon the completion of the Matrix Transaction. Additionally, during 2017, we repurchased $41.0 million less of our Common Stock than in 2016. In addition, there was a decrease in proceeds from Common Stock issued pursuant to stock option exercises of $2.2 million.

2016 cash flows compared to 2015

Operating activities. Cash provided by operating activities was $41.8 million for 2016, an increase of $25.7 million compared with 2015. 2016 and 2015 cash flow from operations was driven by net income of $89.8 million and $83.2 million, respectively, non-cash adjustments to reconcile net income to net cash provided by operating activities of negative $32.9 million and negative $1.2 million, respectively, and changes in working capital of negative $15.2 million and negative $65.9 million, respectively. The change in adjustments to reconcile net income to net cash provided by operating activities was due primarily to the impact of the disposition of HA Services in 2016 and Human Services in 2015, as well as, significant stock-based compensation in 2015 and an asset impairment charge in 2016. The change in working capital is primarily driven by the following:

- Accounts receivable generated a cash outflow for 2016 of $19.3 million as compared to an outflow of $86.6 million for 2015. The decrease in cash outflow of $67.3 million was primarily attributable to timing of significant receivable collections of NET Services, increases in WD Services accounts receivable in 2015 related to additional revenue contracts in place during 2015 as compared to 2014, and a cash outflow related to Human Services in 2015.
- Accounts payable and accrued expenses generated a cash inflow of $33.4 million in 2016, as compared to a cash outflow of $21.9 million in 2015. The increase in cash flow of $55.3 million was primarily attributable to our Human Services segment activity included in 2015, but not in 2016, due to the sale effective November 1, 2015, as well as a decreased change in accrued compensation between periods.
- Deferred revenue generated a cash outflow of $4.0 million in 2016, as compared to a cash inflow of $19.0 million in 2015. The significant cash inflow in 2015 primarily related to WD Services in association with cash received in advance of services being rendered for two large contracts.

- Income taxes payable on sale of business for 2016 includes a cash outflow of $30.2 million related to the sale of our Human Services segment.

Investing activities. Net cash provided by investing activities of $323.9 million in 2016 increased by $180.6 million as compared to 2015. The increase was primarily attributable to $371.6 million of proceeds on the Matrix Transaction recorded in 2016, which was partially offset by the impact of $199.9 million in proceeds from the sale of our Human Services segment in 2015. There was also an increase in the purchase of property and equipment of $6.1 million from 2015 to 2016.

Financing activities. Net cash used in financing activities of $376.8 million in 2016 increased $142.7 million as compared to 2015. During 2016, there was a net repayment of debt of $305.0 million, primarily related to the repayment of debt upon the completion of the Matrix Transaction, compared to a net repayment of debt of $271.1 million in 2015 upon the sale of our Human Services segment. Additionally, during 2016, we repurchased $33.5 million more of our Common Stock than in 2015. 2015 includes $80.7 million received from the issuance of preferred stock as well as a contingent consideration payment of $7.5 million associated with our purchase of Ingeus UK Holdings Limited and its wholly and partly-owned subsidiaries and associates.

Obligations and commitments

Current Credit Facility

The Credit Agreement provides for a revolving credit facility of $200.0 million, $25.0 million of which is available for letters of credit. As of December 31, 2017 we had no borrowings outstanding under the Credit Facility and seven letters of credit in the aggregate amount of $11.1 million outstanding. At December 31, 2017, our available credit under the Credit Facility was $188.9 million. The Credit Facility matures on August 2, 2018.

Under the Credit Agreement, we have an option to request an increase in the amount of the revolving credit facility and/or the term loan facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75.0 million with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. We may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility.

We may prepay any outstanding principal under the Credit Facility in whole or in part, at any time without premium or penalty, subject to reimbursement of the lenders' breakage and redeployment costs in connection with prepayments of London Interbank Offered Rate, or LIBOR, loans. The unutilized portion of the commitments under the Credit Facility may be irrevocably reduced or terminated by us at any time without penalty.

Interest on the outstanding principal amount of any loans accrues, at our election, at a per annum rate equal to LIBOR, plus an applicable margin or the base rate plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on our consolidated leverage ratio as defined in the Credit Agreement. Interest on any loans is payable quarterly in arrears. In addition, we are obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on our consolidated leverage ratio.

The Credit Facility also requires us (subject to certain exceptions as set forth in the Amended and Restated Credit Agreement) to prepay the outstanding loans in an aggregate amount equal to 100% of the net cash proceeds received from certain asset dispositions, debt issuances, insurance and casualty awards and other extraordinary receipts.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on our ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, repurchase shares, sell assets, and merge and consolidate. We are subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants. The Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter. We were in compliance with all covenants as of December 31, 2017.

Our obligations under the Credit Facility are guaranteed by all of our present and future domestic subsidiaries, excluding certain domestic subsidiaries, which includes our insurance captive. Our obligations under, and each guarantor's obligations under its

guaranty of, the Credit Facility are secured by a first priority lien on substantially all of our respective assets, other than our

equity investment in Matrix, including a pledge of 100% of the issued and outstanding stock of our domestic subsidiaries, excluding our insurance captive, and 65% of the issued and outstanding stock of our first tier foreign subsidiaries.

Credit Facility Background

On August 2, 2013, we entered into the Credit Agreement with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, SunTrust Bank, as syndication agent, Merrill Lynch, Pierce, Fenner & Smith Incorporated and SunTrust Robinson Humphrey, Inc., as joint lead arrangers and joint book managers and other lenders party thereto. The Credit Agreement provided us with a senior secured credit facility, in aggregate principal amount of $225.0 million, comprised of a $60.0 million term loan facility and a $165.0 million revolving credit facility. The Credit Facility includes sublimits for swingline loans and letters of credit in amounts of up to $10.0 million and $25.0 million, respectively. On August 2, 2013, we borrowed the entire amount available under the term loan facility and $16.0 million under our revolving credit facility and used the proceeds thereof to refinance certain of our existing indebtedness.

On May 28, 2014, we entered into the first amendment to the Credit Agreement (the "First Amendment"). The First Amendment provided for, among other things, an increase in the aggregate amount of the Credit Facility from $165.0 million to $240.0 million and other modifications in connection with the consummation of the acquisition of Ingeus.

On October 23, 2014, we entered into the Second Amendment to the Credit Agreement (the "Second Amendment") to (i) add a new term loan tranche in aggregate principal amount of up to $250.0 million to partly finance the acquisition of Matrix and make certain other modifications in connection with the consummation of the acquisition of Matrix and (ii) add an excess cash flow mandatory prepayment provision.

On September 3, 2015, we entered into the Third Amendment to the Credit Agreement (the "Third Amendment"). Pursuant to the Third Amendment, the lenders under the Credit Agreement consented to Providence's sale of the Human Services segment and certain other amendments to the terms of the Credit Agreement to reflect such consents.

On August 28, 2016, we entered into the Fourth Amendment and Consent (the "Fourth Amendment") to the Credit Agreement. In accordance with the Fourth Amendment, which provided for the lenders' consent to the Matrix Transaction, a portion of the net cash proceeds received by the Company in connection with the Matrix Transaction were applied to the prepayment of outstanding term loans and revolving loans. Additionally, effective following the repayment of the outstanding term loans in full on October 20, 2016, the Fourth Amendment further (i) reduced the aggregate revolving commitments under the Credit Agreement to $200.0 million, (ii) amended the consolidated net leverage ratio covenant such that the Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and (iii) replaced the existing consolidated fixed charge coverage ratio covenant with a covenant that the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter.

Rights Offering

We completed a rights offering on February 5, 2015, allowing all of the Company's existing common stockholders the non-transferrable right to purchase their pro rata share of $65.5 million of Preferred Stock at a price equal to $100.00 per share (the "Rights Offering"). The Preferred Stock was convertible into shares of our Common Stock at a conversion price equal to $39.88, which was the closing price of our Common Stock on the NASDAQ Global Select Market on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC (collectively, the "Standby Purchasers") and the Company, the remaining 524,116 shares of the Company's Preferred Stock was purchased by the Standby Purchasers at the $100.00 per share subscription price. The Standby Purchasers beneficially owned approximately 94% of our outstanding Preferred Stock after giving effect to the Rights Offering and the Standby Purchase Agreement. The Company received $65.5 million in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement, which it used to repay the related party unsecured subordinated bridge note that was outstanding as of December 31, 2014.

Additionally, on March 12, 2015, the Standby Purchasers exercised their right to purchase an additional 150,000 shares of the Company's convertible preferred stock at a $105 per share subscription price.

We may pay a noncumulative cash dividend on each share of convertible preferred stock, when, as and if declared by a committee of our Board, at the rate of 5.5% per annum on the liquidation preference then in effect. Following the issue date of the convertible preferred stock, on or before the third business day immediately preceding each fiscal quarter, we determine our

intention whether or not to pay a cash dividend with respect to that ensuing quarter and give notice of our intention to each holder of convertible preferred stock as soon as practicable thereafter.

In the event we do not declare and pay a cash dividend, the liquidation preference will be increased to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to such then applicable liquidation preference multiplied by 8.5% per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and, if declared, will begin to accrue on the first day of the applicable dividend period. Payment in kind ("PIK") dividends, if applicable, will accrue and be cumulative on the same schedule as set forth above for cash dividends and will also be compounded at the applicable annual rate on each applicable subsequent dividend date. PIK dividends are paid upon the occurrence of a liquidation event, conversion or redemption in accordance with the terms of the convertible preferred stock. Cash dividends were declared each quarter for the years ended December 31, 2017 and 2016 and totaled $4.4 million each year.

Reinsurance and Self-Funded Insurance Programs

Reinsurance

We historically reinsured a substantial portion of our automobile, general and professional liability and workers' compensation costs under reinsurance programs primarily through our wholly-owned captive insurance subsidiary, Social Services Providers Captive Insurance Company, or SPCIC. As of May 16, 2017, SPCIC did not renew the expiring reinsurance policies. SPCIC will continue to resolve claims under the historical policy years.

At December 31, 2017, the cumulative reserve for expected losses since inception of these historical automobile, general and professional liability and workers' compensation reinsurance programs was $1.1 million, $0.7 million and $5.0 million, respectively. Based on an independent actuarial report, our expected losses related to workers' compensation, automobile and general and professional liability in excess of our liability under our associated historical reinsurance programs at December 31, 2017 was $5.7 million. We recorded a corresponding receivable from third-party insurers and liability at December 31, 2017 for these expected losses, which would be paid by third-party insurers to the extent losses are incurred.

Further, we had restricted cash of $6.3 million and $14.1 million at December 31, 2017 and December 31, 2016, respectively, which was primarily restricted to secure the reinsured claims losses under the historical automobile, general and professional liability and workers' compensation reinsurance programs.

Health Insurance

We offer our NET Services, U.S. based WD Services, and corporate employees an option to participate in self-funded health insurance programs. Additionally, we historically offered this option to our HA Services and Human Services segments' employees. During the year ended December 31, 2017, health claims were self-funded with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims generally to $275,000 per person, subject to an aggregating stop-loss limit of $400,000. In addition, the program has a total stop-loss limit for total claims, in order to limit our exposure to catastrophic claims.

Health insurance claims are paid as they are submitted to the plan administrator. We maintain accruals for claims that have been incurred but not yet reported to the plan administrator, and therefore, have not been paid. The incurred but not reported reserve is based on an established cap and current payment trends of health insurance claims. The liability for the self-funded health plan of $2.2 million and $3.0 million as of December 31, 2017 and 2016, respectively, was recorded in "Reinsurance liability and related reserve" in our consolidated balance sheets.

We charge our employees a portion of the costs of our self-funded group health insurance programs. We determine this charge at the beginning of each plan year based upon historical and projected medical utilization data. Any difference between our projections and our actual experience is borne by us, up to the stop-loss limit. We estimate potential obligations for liabilities under this program to reserve what we believe to be a sufficient amount to cover liabilities based on our past experience. Any significant increase in the number of claims or costs associated with claims made under this program above what we reserve could have a material adverse effect on our financial results.

Contractual cash obligations.

The following is a summary of our future contractual cash obligations as of December 31, 2017:

	At December 31, 2017				
Contractual cash obligations (000's)	Total	Less than 1 Year	1-3 Years	3-5 Years	After 5 Years
Capital Leases	$ 2,984	$ 2,400	$ 584	$ —	$ —
Interest (1)	467	467	—	—	—
Purchased services commitments (2)	8,448	2,966	5,482	—	—
Guarantees (3)	43,287	42,768	519	—	—
Letters of credit (3)	11,074	11,074	—	—	—
Operating Leases (4)	62,092	20,875	23,114	14,164	3,939
Total	$ 128,352	$ 80,550	$ 29,699	$ 14,164	$ 3,939

(1) Future interest payments have been calculated at the current rates as of December 31, 2017.

(2) Our purchase obligations represent the minimum obligations we have under agreements with certain of our vendors. These minimum obligations are less than our projected use for those periods. Payments may be more than the minimum obligations based on actual use.

(3) Guarantees and letters of credit ("LOCs") are commitments that represent funding responsibilities that may require our performance in the event of third-party demands or contingent events. Guarantees include surety bonds we provide to certain customers to protect against potential non-delivery of our non-emergency transportation services. Of the outstanding balance of our stand-by LOCs, $11.1 million directly reduces the amount available to us from our Credit Facility. The surety bonds and LOC amounts in the above table represent the amount of commitment expiration per period.

(4) The operating leases are for office space and related office equipment. We account for these leases on a monthly basis. Certain leases contain periodic rent escalation adjustments and renewal options.

Other than the items described above, we do not have any off-balance sheet arrangements as of December 31, 2017.

Stock repurchase programs

On November 4, 2015, our Board authorized us to engage in a repurchase program to repurchase up to $70.0 million in aggregate value of our Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $63.0 million, excluding commission payments.

On October 26, 2016, our Board authorized us to engage in a repurchase program to repurchase up to $100.0 million in aggregate value of our Common Stock during the twelve-month period following October 26, 2016. As of October 26, 2017, we spent $30.4 million, excluding commission payments, to purchase 770,808 shares of our Common Stock under this plan.

On November 2, 2017, the Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. As of December 31, 2017, 180,270 shares were purchased under this plan for $10.5 million, excluding commission payments, after it was extended on November 2, 2017. In addition, during the period January 1, 2018 to March 5, 2018, the Company repurchased an additional 527,825 shares for $33.3 million, and $25.8 million was available under the plan to repurchase shares.

Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at the discretion of our officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements.

Off-balance sheet arrangements

As of December 31, 2017 and 2016, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

New Accounting Pronouncements

The new accounting pronouncements that impact our business are included in Note 2, Significant Accounting Policies and Recent Accounting Pronouncements, to our consolidated financial statements and are incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Foreign currency risk

As of December 31, 2017, we conducted business in 10 countries outside the U.S. As such, our cash flows and earnings are subject to fluctuations from changes in foreign currency exchange rates. We do not currently hedge against the possible impact of currency fluctuations. For 2017, we generated $288.5 million of our net operating revenues from operations outside the U.S.

A 10% reduction in the foreign currency exchange rate from British Pounds to U.S. dollars would have a $18.8 million negative impact on consolidated revenue, and a negligible impact on net income. A 10% reduction in other foreign currency exchange rates would not have a significant impact on our financial results.

We assess the significance of foreign currency risk on a periodic basis and may implement strategies to manage such risk as we deem appropriate.

Item 8. Financial Statements and Supplementary Data.

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting for the registrant, as such term is defined in Rule 13a-15(f) of the Exchange Act. We designed our internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. The Company conducts periodic evaluations of its internal controls to enhance, where necessary, its procedures and controls.

The Company, under the supervision and with the participation of its management, including its principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2017, based on the criteria set forth in the Internal Control–Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, the Company concluded that its internal control over financial reporting was effective as of December 31, 2017.

KPMG LLP, an independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued an audit report on the effectiveness of the Company's internal control over financial reporting which is presented in Part II, Item 8 of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

To the stockholders and board of directors
The Providence Service Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of The Providence Service Corporation and subsidiaries (the "Company") as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes and financial statement schedule II (collectively, the "consolidated financial statements"). In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 9, 2018 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

We did not audit the financial statements of Mercury Parent, LLC, (a 46.6 percent owned investee company) as of and for the year ended December 31, 2017. The Company's investment in Mercury Parent, LLC at December 31, 2017 was $169.7 million, and its equity in net gain of Mercury Parent, LLC was $13.4 million for the year ended December 31, 2017. The financial statements of Mercury Parent, LLC were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Mercury Parent, LLC, is based solely on the report of the other auditors.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits and the report of the other auditors provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2008.

Stamford, Connecticut
March 9, 2018

Report of Independent Registered Public Accounting Firm

To the stockholders and board of directors
The Providence Service Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited The Providence Service Corporation and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of the Company as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes and financial statement schedule II (collectively, the "consolidated financial statements"), and our report dated March 9, 2018 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Providence Service Corporation
Notes to Consolidated Financial Statements
December 31, 2017
(in thousands except share and per share data)

1. Organization and Basis of Presentation

Description of Business

The Providence Service Corporation ("we", the "Company" or "Providence") owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which the Company holds interests comprise the following segments:

- Non-Emergency Transportation Services ("NET Services") – Nationwide manager of non-emergency medical transportation ("NET") programs for state governments and managed care organizations.
- Workforce Development Services ("WD Services") – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in CCHN Group Holdings, Inc. and its subsidiaries ("Matrix"), a nationwide provider of in-home care optimization and management solutions, including comprehensive health assessments ("CHAs"), to members of managed care organizations, accounted for as an equity method investment. On February 16, 2018, Matrix acquired HealthFair, expanding its service offerings to include mobile health assessments, advanced diagnostic testing, and additional care optimization services.

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company.

Discontinued Operations

During the periods presented, the Company completed the following transactions, which resulted in the presentation of the operations as Discontinued Operations. On November 1, 2015, the Company completed the sale of its Human Services segment. In addition to the results through the sale date, the Company has recorded additional expenses related to legal proceedings as described in Note 18, Commitment and Contingencies, related to an indemnified legal matter. On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a 53.2% equity interest in Matrix with Providence retaining a 46.8% equity interest (the "Matrix Transaction"). Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in the Company's Health Assessment Services ("HA Services") segment.

Basis of Presentation

The Company follows accounting standards set by the Financial Accounting Standards Board ("FASB"). The FASB establishes accounting principles generally accepted in the United States ("GAAP"). Rules and interpretive releases of the Securities and Exchange Commission ("SEC") under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. References to GAAP issued by the FASB in these footnotes are to the FASB Accounting Standards Codification ("ASC"), which serves as a single source of authoritative non-SEC accounting and reporting standards to be applied by non-governmental entities. All amounts are presented in U.S. dollars, unless otherwise noted.

The Company holds investments that are accounted for using the equity method. The Company does not control the decision-making process or business management practices of these affiliates. While the Company has access to certain information and performs certain procedures to review the reasonableness of information, the Company relies on management of these affiliates to provide accurate financial information prepared in accordance with GAAP. The Company receives audit reports relating to such financial information from the significant affiliates' independent auditors on an annual basis. The Company is not aware of any errors in or possible misstatements of the financial information provided by its equity affiliates that would have a material effect on the Company's consolidated financial statements.

Reclassifications

The Company has reclassified certain amounts relating to its prior period results to conform to its current period presentation. See Note 2, Significant Accounting Policies and Recent Accounting Pronouncements, for additional information on other reclassifications.

2. Significant Accounting Policies and Recent Accounting Pronouncements

Principles of Consolidation

The accompanying consolidated financial statements include The Providence Service Corporation, its wholly-owned subsidiaries, and entities it controls, or in which it has a variable interest and is the primary beneficiary of expected cash profits or losses. The Company records its investments in entities that it does not control, but over which it has the ability to exercise significant influence, using the equity method. The Company has eliminated significant intercompany transactions and accounts.

Accounting Estimates

The Company uses estimates and assumptions in the preparation of the consolidated financial statements in accordance with GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the Company's consolidated financial statements. These estimates and assumptions also affect the reported amount of net income or loss during any period. The Company's actual financial results could differ significantly from these estimates. The significant estimates underlying the Company's consolidated financial statements include revenue recognition; allowance for doubtful accounts; accrued transportation costs; accrued restructuring; income taxes; recoverability of current and long-lived assets, including equity method investments; intangible assets and goodwill; loss contingencies; accounting for business combinations, including amounts assigned to definite and indefinite lived intangibles and contingent consideration; loss reserves for reinsurance and self-funded insurance programs; and stock-based compensation.

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances and highly liquid investments with an initial maturity of three months or less. Investments in cash equivalents are carried at cost, which approximates fair value. The Company places its temporary cash investments with high credit quality financial institutions. At times, such investments may be in excess of the federally insured limits.

At December 31, 2017 and 2016, $40,127 and $21,411, respectively, of cash was held in foreign countries. Such cash is generally used to fund foreign operations, although it may be used also to repay intercompany indebtedness or similar arrangements. As of December 31, 2017, cash held in foreign countries included approximately $15,593 of proceeds from the sale of the Company's joint venture Mission Providence Pty Ltd ("Mission Providence").

Restricted Cash

At December 31, 2017 and 2016, the Company had $6,296 and $14,130, respectively, of restricted cash:

	December 31,	
	2017	2016
Collateral for letters of credit - Reinsured claims losses	$ —	$ 2,265
Escrow/Trust - Reinsured claims losses	6,296	11,865
Restricted cash for reinsured claims losses	6,296	14,130
Less current portion	1,091	3,192
Restricted cash, less current portion	$ 5,205	$ 10,938

Of the restricted cash amount at December 31, 2017 and 2016:

- $0 and $2,265, respectively, served as collateral for irrevocable standby letters of credit to secure any reinsured claims losses under the Company's reinsurance program;

- the remaining $6,296 and $11,865, respectively, is primarily related to restricted cash held in trusts for reinsurance claims losses under the Company's historical workers' compensation, general and professional liability and auto liability reinsurance programs, as well as amounts restricted for withdrawal under our self-insured medical and benefits plans.

Accounts Receivable and Allowance for Doubtful Accounts

The Company records accounts receivable amounts at the contractual amount, less an allowance for doubtful accounts. The Company maintains an allowance for doubtful accounts at an amount it estimates to be sufficient to cover the risk that an account will not be collected. The Company regularly evaluates its accounts receivable, especially receivables that are past due, and reassesses its allowance for doubtful accounts based on identified customer collection issues. In circumstances where the Company is aware of a customer's inability to meet its financial obligation, the Company records a specific allowance for doubtful accounts to reduce its net recognized receivable to an amount the Company reasonably expects to collect. The Company also provides a general allowance, based upon historical experience. Under certain contracts of NET Services, final payment is based on a reconciliation of actual utilization and cost, and the final reconciliation may require a considerable period of time. As of December 31, 2017 and 2016, accounts receivable under these reconciliation contracts totaled $42,054 and $45,287, respectively. In addition, certain government entities which WD Services serves remit payment substantially beyond the payment terms. The Company monitors these amounts due to the aging of receivables, but generally believes the balances are collectible. However, factors within those government entities could change and there can be no assurance that such changes would not result in an inability to collect the receivables.

The Company's provision for doubtful accounts expense from continuing operations for the years ended December 31, 2017, 2016 and 2015 was $1,372, $2,892 and $1,369, respectively.

Property and Equipment

Property and equipment are stated at historical cost, net of accumulated depreciation, or at fair value if the assets were initially recorded as the result of a business combination or if the asset was remeasured due to an impairment. Depreciation is calculated using the straight-line method over the estimated useful life of the asset. Maintenance and repairs are expensed as incurred. Gains and losses resulting from the disposition of an asset are reflected in operating expense.

Recoverability of Goodwill

In accordance with ASC 350, Intangibles-Goodwill and Other, the Company reviews goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. We perform the annual goodwill impairment test for all reporting units as of October 1.

First, we perform qualitative assessments for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value amount, then we perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value.

We adopted ASU No. 2017-04, Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment ("ASU 2017-04") effective April 1, 2017. ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. Instead, if we deem it necessary to perform the quantitative goodwill impairment test in an annual or interim period, we recognize an impairment charge equal to the excess, if any, of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

The Company estimates the fair value of the Company's reporting units using either an income approach, a market valuation approach, a transaction valuation approach or a blended approach. The income approach produces an estimated fair value of a reporting unit based on the present value of the cash flows the Company expects the reporting unit to generate in the future. Estimates included in the discounted cash flow model include the discount rate, which the Company determines based on adjusting an industry-wide weighted-average cost of capital for size, geography, and company specific risk factors, long-term rates of growth and profitability of the Company's business, working capital effects and planned capital expenditures. The market approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to comparable publicly traded entities in similar lines of business. The transaction valuation approach produces an estimated fair value of a reporting unit

based on a comparison of the reporting unit to publicly available transactional data involving both publicly traded and private entities in similar lines of business. The Company's significant estimates in both the market and transaction approach include the selected similar companies with comparable business factors such as size, growth, profitability, risk and return on investment and the multiples the Company applies to revenue and earnings before interest, taxes, depreciation and amortization ("EBITDA") to estimate the fair value of the reporting unit.

As discussed in Note 6, Goodwill and Intangibles, the Company determined that goodwill was impaired for the WD Services segment during the year ended December 31, 2016, and the Company recorded an asset impairment charge related to its goodwill of $5,224. The Company did not record any impairment charges for the year ended December 31, 2017. The Company recorded $1,593 of impairment charges related to its Human Services segment during the year ended December 31, 2015, which is included in "Discontinued operations, net of tax" in the consolidated statements of income.

Recoverability of Intangible Assets Subject to Amortization and Other Long-Lived Assets

Intangible assets subject to amortization and other long-lived assets are carried at cost and are amortized or depreciated on a straight-line basis over their estimated useful lives of 5 to 15 years. In accordance with ASC 360, Property, Plant, and Equipment, the Company reviews the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, the Company assesses the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, the Company estimates the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, the Company records an impairment loss equal to the excess of the carrying value over the estimated fair value. As discussed in Note 6, Goodwill and Intangibles, the Company determined that the WD Services segment's intangible assets and property and equipment were impaired during the year ended December 31, 2016, and the Company recorded asset impairment charges of $9,983 and $4,381 to property and equipment and customer relationship intangible assets, respectively. The Company did not record any impairment charges for the years ended December 31, 2017 and 2015.

Accrued Transportation Costs

Eligible members of our customers schedule transportation through the Company's central reservation system. NET Services generally contracts with third-party providers to provide the transportation. The cost of transportation is recorded in the month the services are rendered, based upon contractual rates and mileage estimates. Transportation providers provide invoices once the trip is completed. Any trips that have not been invoiced require an accrual, based upon the expected cost as well as an estimate for cancellations, as the Company is generally only obligated to pay the transportation provider for completed trips. These estimates are based upon the historical trend associated with each contract's population and the transportation provider network servicing the program. There may be differences between actual invoiced amounts and estimated costs, and any resulting adjustments are included in expense. Accrued transportation costs were $83,588 and $72,356 at December 31, 2017 and 2016, respectively.

Deferred Financing Costs and Debt Discounts

The Company capitalizes direct expenses incurred in connection with its credit facilities and other borrowings, and amortizes such expenses over the life of the respective credit facility or other borrowings. Fees charged by lenders on the revolving facility and all fees charged by third parties are recorded as deferred financing costs and fees charged by lenders on term loans are recorded as a debt discount. Deferred financing costs, net of amortization, totaling $388 and $1,070 as of December 31, 2017 and 2016, respectively, are included in "Prepaid expenses and other" and "Other assets", respectively, on the consolidated balance sheet as there were no borrowings outstanding under the Company's credit facility.

Revenue Recognition

The Company recognizes revenue when it is earned and realizable based on the following criteria: persuasive evidence that an arrangement exists, services have been rendered, the price is fixed or determinable and collectability is reasonably assured.

NET Services

Capitated contracts. The majority of NET Services revenue is generated under capitated contracts with customers where the Company assumes the responsibility of meeting the covered transportation requirements of a specific geographic population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. In some capitated contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after each reconciliation period, based on a reconciliation of actual utilization and cost compared to the prepayment made.

Fee for service contracts. Revenues earned under fee for service ("FFS") contracts are based upon contractually established billing rates. Revenues are recognized when the service is provided based upon contractual amounts.

Flat fee contracts. Revenues earned under flat fee contracts are recognized ratably over the covered service period based upon contractually established fees which do not fluctuate with any changes in the membership population who are eligible to receive the transportation services.

For most contracts, the Company arranges for transportation of members through its network of independent transportation providers, whereby it remits payment to the transportation providers. However, for certain contracts, the Company only provides administrative management services to support the customers' efforts to serve its clients, and the amount of revenue recognized is based upon the management fee earned.

WD Services

WD Services revenues are primarily generated from providing workforce development and offender rehabilitation services, both of which include employment preparation and placement, apprenticeship and training, youth community service programs and certain health related services to clients on behalf of governmental and private entities. While the specific terms vary by contract and country, the Company often receives four types of revenue streams under contracts with government entities: referral/attachment fees, job placement/job outcome fees, sustainment fees and incentive fees. Referral/attachment fees are typically upfront payments that are payable when a client is referred by the contracting government entity or that client enters the program. Job placement fees are typically payable when a client is employed. Job outcome fees are typically payable when a client attains and holds employment for a specified minimum period of time. Sustainment fees are typically payable when clients maintain a job outcome past specified employment tenure milestones. Incentive fees are generally based upon a calculation that includes a variety of factors and inputs, such as average sustainment rates and client referral rates. Incentive fees vary greatly by contract.

Referral/attachment fee revenue is recognized ratably over the period of service, based upon an estimated period of time general services will be provided (i.e. the person is placed in a job or reaches the maximum time period for the program). The estimated period of time services will be rendered is based upon historical data. Job placement, job outcome and sustainment fee revenue is recognized when certain milestones are achieved, and amounts become billable. Incentive fee revenue is generally recognized when fixed and determinable, frequently at the end of the cumulative calculation period, unless contractual terms allow for earned payments on a fixed or ratable basis.

Revenue is also earned under fixed FFS arrangements, based upon contractual rates established at the outset of the contract or the applicable contract year, although the rate may be prospectively adjusted during the contract year based upon actual volumes.

If the rate is adjusted but the Company is unable to adjust its costs accordingly, or if the volume or types of referrals are lower than estimated, our profitability may be negatively impacted. Volume levels are typically not guaranteed under contracts.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as "Deferred revenue" until the services are rendered.

Stock-Based Compensation

The Company follows the fair value recognition provisions of ASC Topic 718 – Compensation – Stock Compensation ("ASC 718"), which requires companies to measure and recognize compensation expense for all share based payments at fair value.

- The Company calculates the fair value of stock options using the Black-Scholes option-pricing formula. The fair value of non-vested restricted stock grants is determined based on the closing market price of the Company's Common Stock on the date of grant. Stock-based compensation expense charged against income for stock options and stock grants is based on the grant-date fair value. Forfeitures are recorded as they occur. The expense for stock-based compensation awards is amortized on a straight-line basis over the requisite service period, which is typically the vesting period.

- The Company records restricted stock units ("RSUs") that may be settled by the holder in cash, rather than shares, as a liability and remeasures these liabilities at fair value at the end of each reporting period. Upon settlement of these awards, the total compensation expense recorded over the vesting period of the awards will equal the settlement amount, which is based on the Company's stock price on the settlement date.

- Performance-based RSUs vest upon achievement of certain company specific performance conditions. On the date of grant, the Company determines the fair value of the performance-based award using the fair value of the Company's Common Stock at that time and it assesses whether it is probable that the performance targets will be achieved. If assessed as probable, the Company records compensation expense for these awards over the requisite service period. At each reporting period, the Company reassesses the probability of achieving the performance targets and the performance period required to meet those targets. The estimation of whether the performance targets will be achieved and of the performance period required to achieve the targets requires judgment, and to the extent actual results or updated estimates differ from the Company's current estimates, the cumulative effect on current and prior periods of those changes will be recorded in the period estimates are revised, or the change in estimate will be applied prospectively depending on whether the change affects the estimate of total compensation cost to be recognized or merely affects the period over which compensation cost is to be recognized. The ultimate number of shares issued and the related compensation expense recognized will be based on a comparison of the final performance metrics to the specified targets.

- The Company calculates the fair value of market-based stock awards, including the Company's 2015 Holding Company LTI Program (the "HoldCo LTIP") awards, using the Monte-Carlo simulation valuation model. Forfeitures are recorded as they occur. Compensation expense for market-based awards is recognized over the requisite service period regardless of whether the market conditions are expected to be achieved.

Income Taxes

Deferred income taxes are determined by the liability method in accordance with ASC Topic 740 - Income Taxes. Under this method, deferred tax assets and liabilities are determined based on differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and are measured using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. The Company considers many factors when assessing the likelihood of future realization of deferred tax assets, including recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available for tax reporting purposes, as well as other relevant factors. The Company establishes a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. Due to inherent complexities arising from the nature of the Company's businesses, future changes in income tax law or variances between the Company's actual and anticipated operating results, the Company makes certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

The Company has recorded a valuation allowance which includes amounts for net operating losses and tax credit carryforwards, as more fully described in Note 17, Income Taxes, for which the Company has concluded that it is more likely than not that these net operating loss and tax credit carryforwards will not be realized in the ordinary course of operations.

The Company recognizes interest and penalties related to income taxes as a component of income tax expense.

The Company accounts for uncertain tax positions based on a two-step process of evaluating recognition and measurement criteria. The first step assesses whether the tax position is more likely than not to be sustained upon examination by the tax authority, including resolution of any appeals or litigation, based on the technical merits of the position. If the tax position meets the more likely than not criteria, the portion of the tax benefit greater than 50% likely to be realized upon settlement with the tax authority is recognized in the consolidated financial statements.

On December 22, 2017, the U.S. bill commonly referred to as the Tax Cuts and Jobs Act ("Tax Reform Act") was enacted as more fully described in Note 17, Income Taxes.

Foreign Currency Translation

Local currencies generally are considered the functional currencies outside the U.S. Assets and liabilities for operations in local-currency environments are translated at month-end exchange rates of the period reported. Income and expense items are translated at the average exchange rate for each applicable month. Cumulative translation adjustments are recorded as a component of accumulated other comprehensive loss, net of tax, in stockholders' equity within the consolidated balance sheets.

Loss Reserves for Certain Reinsurance and Self-Funded Insurance Programs

The Company historically reinsured a substantial portion of its automobile, general and professional liability and workers' compensation costs under reinsurance programs primarily through the Company's wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona. As of May 16, 2017, SPCIC did not renew the expiring reinsurance policies. SPCIC will continue to resolve claims under the historical policy years.

The Company utilizes a report prepared by an independent actuary to estimate the gross expected losses related to historical automobile, general and professional and workers' compensation liability reinsurance policies, including the estimated losses in excess of SPCIC's insurance limits, which would be reimbursed to SPCIC to the extent such losses were incurred. As of December 31, 2017 and 2016, the Company had reserves of $6,699 and $11,240, respectively, for the automobile, general and professional liability and workers' compensation reinsurance policies, net of expected receivables for losses in excess of SPCIC's historical insurance limits. The gross reserve as of December 31, 2017 and 2016 of $12,448 and $16,505, respectively, is classified as "Reinsurance liability reserves" and "Other long-term liabilities" in the consolidated balance sheets. The estimated amount to be reimbursed to SPCIC as of December 31, 2017 and 2016 was $5,749 and $5,265, respectively, and is classified as "Other receivables" and "Other assets" in the consolidated balance sheets.

The Company also maintains a self-funded health insurance program with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims generally to $275 per person, subject to an aggregating stop-loss limit of $400. In addition, the program has a total stop-loss limit for total claims, in order to limit the Company's exposure to catastrophic claims. With respect to this program, the Company considers historical and projected medical utilization data when estimating its health insurance program liability and related expense. As of December 31, 2017 and 2016, the Company had $2,229 and $3,022, respectively, in reserve for its self-funded health insurance programs. The reserves are classified as "Reinsurance and related liability reserves" in the consolidated balance sheets.

The Company utilizes analysis prepared by third-party administrators and independent actuaries based on historical claims information with respect to the general and professional liability coverage, workers' compensation coverage, automobile liability, automobile physical damage, and health insurance coverage to determine the amount of required reserves.

The Company regularly analyzes its reserves for incurred but not reported claims, and for reported but not paid claims related to its reinsurance and self-funded insurance programs. The Company believes its reserves are adequate. However, significant judgment is involved in assessing these reserves, such as assessing historical paid claims, average lag times between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are included in expense once a probable amount is known.

Restructuring, Redundancy and Related Reorganization Costs

The Company has engaged in employee headcount optimization actions within the WD Services segment which require management to estimate the timing and amount of severance and other employee separation costs for workforce reduction. The Company accrues for severance and other employee separation costs under these actions when it is probable that benefits will be paid and the amount is reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable under existing plans, and are included in accrued expenses to the extent they have not been paid.

Noncontrolling Interests

Noncontrolling interests represent the noncontrolling holders' percentage share of income or losses from a subsidiary in which the Company holds a majority, but less than 100%, ownership interest and the results of which are consolidated and included in the Company's consolidated financial statements. The Company has a 90% ownership in The Reducing Reoffending Partnership Limited, which commenced operations in 2015.

Discontinued Operations

In determining whether a group of assets disposed (or to be disposed) of should be presented as a discontinued operation, the Company makes a determination of whether the criteria for held-for-sale classification is met and whether the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. If these determinations can be made affirmatively, the results of operations of the group of assets being disposed of (as well as any gain or loss on the disposal transaction) are aggregated for separate presentation apart from continuing operating results of the Company in the consolidated financial statements. See Note 20, Discontinued Operations, for a summary of discontinued operations.

Earnings Per Share

The Company computes basic earnings per share by taking net income attributable to the Company available to common stockholders divided by the weighted average number of common shares outstanding during the period, including restricted stock and stock held in escrow if such shares are participating securities. Diluted earnings per share includes the potential dilution that may occur from stock-based awards and other stock-based commitments using the treasury stock or the as-if converted methods, as applicable. For additional information on how the Company computes earnings per share, see Note 14, Earnings Per Share.

Fair Value of Financial Instruments

The Company discloses the fair value of its financial instruments based on the fair value hierarchy using the following three categories:

Level 1 – Quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date.

Level 2 – Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company may be required to pay additional consideration in relation to certain acquisitions based on the achievement of certain earnings targets. Acquisition-related contingent consideration is initially measured and recorded at fair value as an element of consideration paid in connection with an acquisition with subsequent adjustments recognized in "General and administrative expense" in the consolidated statements of income. The Company determines the fair value of acquisition-related contingent consideration, and any subsequent changes in fair value using a discounted probability-weighted approach. This approach takes into consideration Level 3 unobservable inputs including probability assessments of expected future cash flows over the period in which the obligation is expected to be settled and applies a discount factor that captures the uncertainties associated with the obligation. Changes in these unobservable inputs could significantly impact the fair value of the obligation recorded in the accompanying consolidated balance sheets and operating expenses in the consolidated statements of income.

The carrying amounts of cash and cash equivalents, restricted cash, accounts receivable and accounts payable approximate their fair value because of the relatively short-term maturity of these instruments.

Recent Accounting Pronouncements

The Company adopted the following accounting pronouncements during the year ended December 31, 2017:

In November 2015, the FASB issued Accounting Standards Update ("ASU") No. 2015-17, Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes ("ASU 2015-17"), which changes how deferred taxes are classified on organizations' balance sheets. The ASU eliminates the current requirement for organizations to present deferred tax liabilities and assets as current and noncurrent in a classified balance sheet. Instead, organizations will be required to classify all deferred tax assets and liabilities as noncurrent. The amendments apply to all organizations that present a classified balance sheet. For public companies, the amendments are effective for financial statements issued for annual periods beginning after December 16, 2016, and interim periods within those annual periods. The Company adopted ASU 2015-17 retrospectively on January 1, 2017, which resulted in the reclassification of the December 31, 2016 deferred tax assets-current balance of $6,825 and non-current deferred tax assets of $2,493 to long-term deferred tax liabilities in the amount of $9,318.

In March 2016, the FASB issued ASU No. 2016-07, Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting ("ASU 2016-07"). ASU 2016-07 eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. ASU 2016-07 instead specifies that the investor should add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and apply the equity method of accounting as of the date the investment became qualified for equity method accounting. ASU 2016-07 is effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016 and should be applied prospectively. The Company adopted ASU 2016-07 on January 1, 2017. The adoption of ASU 2016-07 had no impact on the Company's financial statements or disclosures.

In March 2016, the FASB issued ASU No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting ("ASU 2016-09"). ASU 2016-09 is intended to improve the accounting for employee share-based payments and affect all organizations that issue share-based payment awards to their employees. Several aspects of the accounting for share-based payment award transactions are simplified, including income tax consequences, classification of awards as either equity or liabilities and classification in the statement of cash flows. For public companies, the amendments are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. The Company adopted ASU 2016-09 on January 1, 2017, and elected to recognize forfeitures as they occur. As a result, the Company recorded a cumulative effect adjustment of $850 to retained earnings as of January 1, 2017. Upon adoption, all excess tax benefits and tax deficiencies related to employee share-based payments are recognized through income tax expense prospectively.

The Company excluded the related tax benefits when applying the treasury stock method for computing diluted shares outstanding on a prospective basis resulting in a decrease in diluted weighted average shares outstanding of 4,642 shares for the year ended December 31, 2017.

The adoption of ASU 2016-09 subjects our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes based upon the fair value of the award at the grant date. For the year ended December 31, 2017, the Company recorded excess tax deficiencies, net, of $3,604 as an increase to the provision for income taxes. This deficiency primarily related to the Company's Holdco LTIP. As further explained in Note 12, Stock-Based Compensation and Similar Arrangements, no shares were distributed under the Company's HoldCo LTIP as the volume weighted average of Providence's stock price over the 90-day trading period ended on December 31, 2017 did not exceed $56.79. As this market condition was not satisfied, a related tax deficiency was recognized during the year ended December 31, 2017 of $3,590.

The Company elected to apply the change in classification of cash flows resulting from excess tax benefits or deficiencies on a retrospective basis. This resulted in an increase in cash flows provided by operating activities of $282, offset by an increase of $282 in cash flows used in financing activities in the consolidated statement of cash flows for the year ended December 31, 2016, and an increase in cash flows provided by operating activities of $2,857, offset by an increase of $2,857 in cash flows used in financing activities in the consolidated statement of cash flows for the year ended December 31, 2015. Additionally, ASU 2016-09 requires that employee taxes paid when an employer withholds shares for tax-withholding purposes be reported as financing activities in the consolidated statements of cash flows, which is how the Company has historically classified these amounts.

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business ("ASU 2017-01"). ASU 2017-01 clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. ASU 2017-01 is effective for annual periods beginning after December 15, 2017, including interim periods within those periods. The Company adopted ASU 2017-01 on April 1, 2017. The adoption of ASU 2017-01 had no impact on the Company's financial statements or disclosures.

In January 2017, the FASB issued ASU No. 2017-03, Accounting Changes and Error Corrections (Topic 250) and Investments - Equity Method and Joint Ventures (Topic 323) ("ASU 2017-03"). ASU 2017-03 expands required qualitative disclosures when registrants cannot reasonably estimate the impact that adoption of an ASU will have on the financial statements. Such qualitative disclosures would include a comparison of the registrant's new accounting policies, if determined, to current accounting policies, a description of the status of the registrant's process to implement the new standard and a description of the significant implementation matters yet to be addressed by the registrant. The Company implemented ASU 2016-15 in its consolidated financial statements for the year ended December 31, 2017 resulting in enhanced qualitative disclosures regarding future adoption of new ASUs.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment ("ASU 2017-04"). ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. As a result, under ASU 2017-04, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the impairment loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. This guidance is effective prospectively for fiscal years beginning after December 15, 2019. Early adoption is permitted for interim or annual goodwill impairment tests performed after January 1, 2017. The Company adopted ASU 2017-04 on April 1, 2017. The adoption of ASU 2017-04 had no impact on the Company's financial statements or disclosures.

Recent accounting pronouncements that were not yet adopted by the Company through December 31, 2017 are as follows:

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606) ("ASU 2014-09"). ASU 2014-09 introduced FASB Accounting Standards Codification Topic 606 ("ASC 606"), which will replace most currently applicable existing revenue recognition guidance and is intended to improve and converge with international standards the financial reporting requirements for revenue from contracts with customers. The core principle of ASC 606 is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. ASC 606 also requires additional disclosures about the nature, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. ASU 2014-09 allows for adoption either on a full retrospective basis to each prior reporting period presented or on a modified retrospective basis with the cumulative effect of initially applying the new guidance recognized at the date of initial application, which is effective for the Company on January 1, 2018.

The Company has substantially completed its adoption plan, under which it performed conceptual and detailed contract reviews to determine the impact of ASC 606 on its financial statements, internal controls and operational processes. The guidance in ASC 606 on the following topics was critical to the Company's analysis:

- the effect of specified clauses on the term of many of the Company's contracts with customers;
- the nature of the promises in many of the Company's contracts with customers to perform integrated services over a period of time;
- whether and how much variable consideration to include when determining the transaction prices for its contracts with customers;
- whether any of the Company's customer contracts require performance over a series of distinct service periods and the impact on determining and allocating the transaction price; and
- the manner in which the Company will measure its progress towards fully satisfying its performance obligations, including a determination of whether the Company may be able to use certain practical expedients.

The impact of adoption on revenue for each segment is as follows:

NET Services – For non-emergency transportation solutions, the Company will primarily use the right-to-invoice practical expedient to account for revenue when the Company has a right to consideration from a customer in an amount that corresponds directly with the value of the entity's performance completed to date. This is consistent with the Company's current revenue recognition policy. The only impact identified for NET Services is the presentation of one contract on a net basis which is currently accounted for on a gross basis, as the Company does not control the service, as defined under the new standard.

WD Services – WD Services has a number of contracts which include variable consideration, whereby it earns revenues if certain contractually defined outcomes occur in the future. When the related performance obligations are satisfied over time, the Company will recognize revenue in the proportion that the outcome has been earned based on services provided. The amount of revenue is based upon the Company's estimate of the final amount of outcome fees to be earned. The Company will evaluate probability using either the expected value method or the most likely amount method, as appropriate. At each reporting period, the Company will update its estimate of outcome fees, based upon actual results as well as refined estimates of future results, and will record an adjustment to revenue, based upon services performed to date. Under the new standard, the Company may recognize revenues for outcome fees earlier under the new standard, as revenue is currently recognized upon the final resolution of the contingency, i.e. the outcome is able to be invoiced. However, under certain contracts the Company receives up-front fees, which may be recognized over a longer period under the new standard as compared to current guidance. As of adoption, such impacts are not material to the consolidated financial statements.

The new standard will require the Company to recognize contract assets and liabilities on its balance sheet as appropriate. Additionally, the Company will be required to make additional disclosures about the nature of its contracts and the related performance obligations.

The Company is in its final stages of quantifying the financial impacts of the new guidance based on the contracts that exist at the date of adoption, as well as evaluating presentation of our revenues and required enhancements to disclosures. We have implemented both process and information systems changes to identify and assess contracts that are impacted by the new revenue recognition criteria and accumulate data to satisfy new disclosure requirements. As discussed above, we expect the new standard will have an immaterial impact on our consolidated financial statements, other than increased disclosures, upon adoption. Changes to revenue recognition as a result of applying the new standard will largely arise from outcome fees as described above, as well as the timing of revenue recognition for up-front fees. The Company will use the modified retrospective adoption method, and plans to adopt the standard on January 1, 2018.

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) ("ASU 2016-02"). ASU 2016-02 introduced FASB Accounting Standards Codification Topic 842 ("ASC 842"), which will replace ASC 840, Leases. Under ASC 842, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.

ASU 2016-02 is effective for publicly held entities for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. Lessees must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach does not require transition accounting for leases that expired before the earliest comparative period presented. Lessees may not apply a full retrospective transition approach. The Company has not entered into significant lease agreements in which it is the lessor; however, the Company does have lease agreements in which it is the lessee. The Company is assessing the impact of applying ASC 842 to its lease agreements. It is in the process of developing an adoption plan, assembling a cross-functional project team and assessing the impacts of applying ASC 842 to the Company's financial statements, information systems and internal controls. The assessment of applying ASU 2016-02 is ongoing and, therefore, the Company has not yet determined whether the impacts will be material to the Company's consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments – Credit Losses (Topic 326) ("ASU 2016-13"). The amendments in ASU 2016-13 will supersede or clarify much of the existing guidance for reporting credit losses for assets held at amortized cost basis and available for sale debt securities. The amendments in ASU 2016-13 affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. ASU 2016-13 is effective for financial statements issued for fiscal years beginning after December 15, 2019, with early adoption permitted for fiscal years beginning after December 15, 2018. The Company has not evaluated the impact of ASU 2016-13 on its consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments ("ASU 2016-15"). ASU 2016-15 provides guidance for eight targeted changes with respect to how cash receipts and cash payments are classified in the statements of cash flows, with the objective of reducing diversity in practice. ASU 2016-15 is effective for financial statements issued for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company will adopt ASU 2016-15 on January 1, 2018. The adoption is not expected to have a significant impact on the Company's consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash ("ASU 2016-18"). ASU 2016-18 requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for public entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period; however, any adjustments must be reflected as of the beginning of the fiscal year that includes that interim period. ASU 2016-18 must be adopted retrospectively. The Company will adopt ASU 2016-15 on January 1, 2018. The adoption will impact the Company's consolidated statements of cash flow as the Company has restricted cash totaling $6,296 at December 31, 2017. Additionally, the Company will be required to make additional disclosures detailing the balance sheet line items that are included in the sum of cash, cash equivalents and restricted cash in the consolidated statements of cash flow.

In May 2017, the FASB issued ASU No. 2017-09, Compensation–Stock Compensation (Topic 718): Scope of Modification Accounting ("ASU 2017-09"). ASU 2017-09 provides guidance about which changes to the terms of a share-based payment award

should be accounted for as a modification. A change to an award should be accounted for as a modification unless the fair value of the modified award is the same as the original award, the vesting conditions do not change, and the classification as an equity or liability instrument does not change. This guidance is effective for fiscal years beginning after December 15, 2017. Early adoption is permitted. The Company will adopt ASU 2016-15 on January 1, 2018. The adoption of ASU 2017-09 is not expected to have a material impact on the Company's consolidated financial statements.

3. Equity Investment

Matrix

Prior to the closing of the Matrix Transaction on October 19, 2016, the financial results of Matrix were included in the Company's HA Services segment. Subsequent to the closing of the Matrix Transaction, the Company owned a 46.8% noncontrolling interest in Matrix. As of December 31, 2017, the Company owned a 46.6% noncontrolling interest in Matrix. Pursuant to a Shareholder's Agreement, affiliates of Frazier Healthcare Partners hold rights necessary to control the fundamental operations of Matrix. The Company accounts for this investment in Matrix under the equity method of accounting and the Company's share of Matrix's income or losses are recorded as "Equity in net (gain) loss of investees" in the accompanying consolidated statements of income.

The carrying amount of the assets included in the Company's consolidated balance sheet and the maximum loss exposure related to the Company's interest in Matrix as of December 31, 2017 and 2016 totaled $169,699 and $157,202, respectively.

Summary financial information for Matrix on a standalone basis is as follows:

	December 31,	
	2017	2016
Current assets	$ 37,563	$ 28,589
Long-term assets	597,613	614,841
Current liabilities	27,718	25,791
Long-term liabilities	240,513	281,348

	Twelve months ended December 31, 2017	October 19, 2016 through December 31, 2016
Revenue	$ 227,872	$ 41,635
Operating income (loss)	11,870	(4,079)
Net income (loss)	26,665	(4,200)

Included in Matrix's standalone net income of $26,665 for the year ended December 31, 2017 is depreciation and amortization of $33,512, transaction related expenses of $3,537, which includes $2,679 of transaction incentive compensation, equity compensation of $2,639, management fees paid to Matrix's shareholders of $2,331, merger and acquisition due diligence related costs of $685, interest expense of $14,818 and an income tax benefit of $29,613. The income tax benefit primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. Included in Matrix's standalone net loss of $4,200 for the year ended December 31, 2016 is depreciation and amortization of $6,356, transaction related expenses of $6,367, which includes $4,033 of transaction incentive compensation, equity compensation of $407, management fees paid to Matrix's shareholders of $396, interest expense of $2,949 and an income tax benefit of $2,828.

See Note 20, Discontinued Operations, for Matrix's January 1, 2016 through October 19, 2016 results of operations, as well as the results of operations for the year ended December 31, 2015.

Mission Providence

The Company entered into a joint venture agreement in November 2014 with Mission Australia ACN ("Mission Australia") to form Mission Providence. Mission Providence delivers employment preparation and placement services in Australia. The

Company had a 60% ownership interest in Mission Providence, and had rights to 75% of Mission Providence's distributions of cash or profit surplus twice per calendar year. The Company accounted for this investment under the equity method of accounting and the Company's share of Mission Providence's income or losses was recorded as "Equity in net (gain) loss of investees" in the accompanying consolidated statements of income. Cash contributions made to Mission Providence in exchange for its equity interests are included in the consolidated statements of cash flows as "Purchase of equity investments".

On September 29, 2017, the Company and Mission Australia completed the sale of 100% of the stock of Mission Providence pursuant to a share sale agreement. Upon the sale of Mission Providence, the Company received AUD 20,184, or $15,823 of proceeds, for its equity interest, net of transaction fees. Subsequently, a working capital adjustment was finalized in December 2017 resulting in the return of $229 of the proceeds. The related gain on sale of Mission Providence totaling $12,377 is recorded as "Gain on sale of equity investment" in the accompanying consolidated statements of income. The carrying amount of the assets included in the Company's consolidated balance sheet related to the Company's interest in Mission Providence was $4,021 at December 31, 2016.

Summary financial information for Mission Providence on a standalone basis is as follows:

	December 31, 2016
Current assets	$ 4,640
Long-term assets	10,473
Current liabilities	12,844
Long-term liabilities	1,655

	Nine months ended September 30, 2017	Twelve months ended December 31, 2016
Revenue	$ 30,125	$ 36,546
Operating loss	(1,765)	(9,664)
Net loss	(1,934)	(8,843)

4. Prepaid Expenses and Other

Prepaid expenses and other were comprised of the following:

	December 31,	
	2017	2016
Prepaid income taxes	$ 1,106	$ 1,467
Escrow funds	10,000	10,000
Prepaid insurance	2,121	3,153
Prepaid taxes and licenses	906	3,570
Note receivable	3,224	3,130
Prepaid rent	2,268	2,013
Deposits held for leased premises and bonds	2,849	2,609
Other	12,769	11,953
Total prepaid expenses and other	$ 35,243	$ 37,895

Escrow funds represent amounts related to indemnification claims from the sale of the Human Services segment, which was completed on November 1, 2015. The Company has accrued $15,000 as a contingent liability for the settlement of potential indemnification claims, which is included in "Accrued expenses" in the consolidated balance sheet as of December 31, 2017. The escrow funds will be used to satisfy a portion of this settlement. See Note 18, Commitments and Contingencies, for further information.

5. Property and Equipment

Property and equipment consisted of the following:

	Estimated Useful Life (years)	December 31, 2017	December 31, 2016
Computer and telecom equipment	3 — 5	$ 35,915	$ 31,854
Software	3 — 5	32,989	26,883
Leasehold improvements	Shorter of 7 years or lease term	17,890	16,720
Furniture and fixtures	5 — 10	6,416	8,070
Automobiles	5	3,797	3,597
Construction and development in progress	N/A	13,384	5,831
		110,391	92,955
Less accumulated depreciation		60,014	46,735
Total property and equipment, net		$ 50,377	$ 46,220

Depreciation expense from continuing operations was $18,542, $18,038 and $14,488 for the years ended December 31, 2017, 2016 and 2015, respectively.

The Company sold the building and land that included holding company office space in Arizona effective December 31, 2016 resulting in an asset impairment charge of $1,415 for the year ended December 31, 2016. The Company recorded an asset impairment charge of $9,983 for the year ended December 31, 2016 related to its WD Services segment based on its review of the carrying value of long-lived assets. The impairment charges are reflected in “Asset impairment charge” in the consolidated statement of income for the year ended December 31, 2016. See Note 6, Goodwill and Intangibles, for further discussion of the impairment charges incurred related to the WD Services segment during 2016. Construction in progress as of December 31, 2017 is primarily comprised of NET Services, which has incurred substantial software development costs for its LCAD NextGen technology system. Such amounts are expected to be placed into service during 2018.

6. Goodwill and Intangibles

Impairment

The Company did not record any impairment charges for the year ended December 31, 2017. During the fourth quarter of 2016, the Company reviewed WD Services for impairment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the United Kingdom (“UK”) impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with the carrying amounts and recorded an asset impairment charge of $4,381 to definite-lived customer relationship intangible assets, which is recorded in “Asset impairment charge” on the Company’s consolidated statement of operations. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management’s forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an asset impairment charge of $5,224, which is included in “Asset impairment charge” on the Company’s consolidated statement of operations. The Company reviewed the carrying value of other long-lived assets and goodwill, and noted no indicators of impairment for NET Services or the Matrix Investment during the year ended December 31, 2016. The Company recorded $1,593 of impairment charges related to its Human Services segment during the year ended December 31, 2015, which is included in “Discontinued operations, net of tax” in the consolidated statements of income.

Goodwill

Changes in goodwill were as follows:

	NET Services	WD Services	Consolidated Total
Balances at December 31, 2015			
Goodwill	$ 191,215	$ 40,784	$ 231,999
Accumulated impairment losses	(96,000)	(6,041)	(102,041)
	95,215	34,743	129,958
Asset impairment charge	—	(5,224)	(5,224)
Foreign currency translation adjustment	—	(5,110)	(5,110)
Balances at December 31, 2016			
Goodwill	191,215	35,674	226,889
Accumulated impairment losses	(96,000)	(11,265)	(107,265)
	95,215	24,409	119,624
Foreign currency translation adjustment	—	2,044	2,044
Balances at December 31, 2017			
Goodwill	191,215	37,718	228,933
Accumulated impairment losses	(96,000)	(11,265)	(107,265)
	$ 95,215	$ 26,453	$ 121,668

The total amount of goodwill that was deductible for income tax purposes related to acquisitions as of December 31, 2017 and 2016 was $4,222.

Intangible Assets

Intangible assets are comprised of acquired customer relationships, trademarks and trade names, and developed technology. Intangible assets consisted of the following:

		December 31,			
		2017		2016	
	Estimated Useful Life (Yrs)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	15	$ 48,128	$ (33,136)	$ 48,020	$ (29,941)
Customer relationships	10	30,583	(11,871)	27,915	(8,147)
Trademarks and Trade Names	10	14,525	(5,205)	13,282	(3,431)
Developed technology	5	3,228	(2,313)	2,951	(1,525)
Total		$ 96,464	$ (52,525)	$ 92,168	$ (43,044)

The gross carrying amount as of December 31, 2017 and 2016 includes the asset impairment charge of $4,381 to definite-lived customer relationship intangible assets of WD Services recorded during the year ended December 31, 2016. The weighted-average amortization period at December 31, 2017 for intangibles was 12.3 years. No significant residual value is estimated for these intangible assets. Amortization expense from continuing operations was $7,927, $8,566 and $9,510 for the years ended December 31, 2017, 2016 and 2015, respectively.

The total amortization expense is estimated to be as follows for the next five years and thereafter as of December 31, 2017 based upon the applicable foreign exchange rates as of December 31, 2017:

Year	Amount
2018	$ 8,126
2019	7,749
2020	7,473
2021	7,387
2022	7,025
Thereafter	6,179
Total	$ 43,939

7. Accrued Expenses

Accrued expenses consisted of the following:

	December 31,	
	2017	2016
Accrued compensation and related	$ 33,653	$ 23,050
NET Services accrued contract payments	17,487	32,836
Accrued settlement	15,000	6,000
Income taxes payable	3,723	372
Other	33,975	40,123
Total accrued expenses	$ 103,838	$ 102,381

8. Restructuring, Redundancy and Related Reorganization Costs

WD Services has two active redundancy programs at December 31, 2017. During the year ended December 31, 2017, WD Services had four redundancy programs. Of these four redundancy plans, two were approved in 2015 and have been completed; a plan related to the termination of employees delivering services under an offender rehabilitation program ("Offender Rehabilitation Program") and a plan related to the termination of employees delivering services under the Company's employability and skills training programs and certain other employees in the United Kingdom ("UK Restructuring Program"). In addition, a redundancy plan related to the termination of employees as part of a value enhancement project ("Ingeus Futures' Program") to better align costs with revenue for certain contracts in the UK and to improve overall operating performance was approved in 2016 and a further redundancy program to align costs with revenue for offender rehabilitation services ("Delivery First Program") was approved in the fourth quarter of 2017. The Company recorded severance and related charges of $2,577 and $8,511 during the years ended December 31, 2017 and 2016, respectively, relating to the termination benefits for employee groups and specifically identified employees impacted by these plans. The severance charges incurred are recorded as "Service expense" in the accompanying consolidated statements of income.

The initial estimates of severance and related charges for the plans were based upon the employee groups impacted, average salary and benefits, and redundancy benefits pursuant to the existing policies. Additional charges above the initial estimates were incurred for the redundancy plans related to the actualization of termination benefits for specifically identified employees impacted under these plans, as well as an increase in the number of individuals impacted by these plans. The final identification of the employees impacted by each program is subject to customary consultation procedures. In addition, additional phases of value enhancement projects may be undertaken in the future, if costs and revenue are not aligned.

Summary of Severance and Related Charges

	January 1, 2017	Costs Incurred	Cash Payments	Foreign Exchange Rate Adjustments	December 31, 2017
Ingeus Futures' Program	$ 2,486	$ 1,223	$ (3,386)	$ 159	$ 482
Offender Rehabilitation Program	1,380	(40)	(1,357)	17	—
UK Restructuring Program	50	(53)	—	3	—
Delivery First Program	—	1,447	(184)	24	1,287
Total	$ 3,916	$ 2,577	$ (4,927)	$ 203	$ 1,769

	January 1, 2016	Costs Incurred	Cash Payments	Foreign Exchange Rate Adjustments	December 31, 2016
Ingeus Futures' Program	$ —	$ 2,515	$ —	$ (29)	$ 2,486
Offender Rehabilitation Program	6,538	4,865	(8,924)	(1,099)	1,380
UK Restructuring Program	2,059	1,131	(3,031)	(109)	50
Total	$ 8,597	$ 8,511	$ (11,955)	$ (1,237)	$ 3,916

The total of accrued severance and related costs of $1,769 and $3,916 are reflected in “Accrued expenses” in the consolidated balance sheets at December 31, 2017 and 2016, respectively. The amount accrued as of December 31, 2017 for the Ingeus Futures’ Program and Delivery First Program is expected to be settled principally during 2018.

9. Long-Term Obligations

The Company’s long-term obligations were as follows:

	December 31, 2017	December 31, 2016
$200,000 revolving loan, LIBOR plus 2.25% - 3.25% with interest payable at least once every three months through August 2018	$ —	$ —
Capital lease obligations	2,984	3,611
	2,984	3,611
Less current portion of capital lease obligations	2,400	1,721
Total long-term obligations, less current portion	$ 584	$ 1,890

Annual maturities of capital lease obligations as of December 31, 2017 are as follows:

Year	Amount
2018	$ 2,400
2019	504
2020	80
Total	$ 2,984

Credit Facility

The Company is a party to the amended and restated credit and guaranty agreement, dated as of August 2, 2013 (as amended, the "Credit Agreement"), with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, and the other lenders party thereto. The Credit Agreement provides the Company with a $200,000 revolving credit facility (the "Credit Facility"), including a sub-facility of $25,000 for letters of credit. As of December 31, 2017, the Company had no borrowings and seven letters of credit in the amount of $11,074 outstanding under the revolving credit facility. At December 31, 2017, the Company's available credit under the revolving credit facility was $188,926. Under the Credit Agreement, the Company has an option to request an increase in the amount of the revolving credit facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75,000 with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. The Company may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility. The Credit Facility matures on August 2, 2018.

Interest on the outstanding principal amount of loans accrues, at the Company's election, at a per annum rate equal to LIBOR, plus an applicable margin, or the base rate as defined in the agreement plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on the Company's consolidated leverage ratio as defined in the Credit Agreement. Interest on the loans is payable quarterly in arrears. In addition, the Company is obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on the Company's consolidated leverage ratio.

The Company's obligations under the Credit Facility are guaranteed by all of the Company's present and future domestic subsidiaries, excluding certain domestic subsidiaries which include the Company's insurance captive. The Company's obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of the Company's respective assets, including a pledge of 100% of the issued and outstanding stock of the Company's domestic subsidiaries, excluding the Company's insurance captive, and 65% of the issued and outstanding stock of the Company's first tier foreign subsidiaries.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on the Company's ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, sell assets, and merge and consolidate. The Company is subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants.

Capital Leases

NET Services has seven capital leases for information technology hardware and software with termination dates ranging from January 2018 through October 2020. The terms of the leases are between 12 and 36 months, with interest recorded at an incremental borrowing rate of 3.28%. At December 31, 2017, $6,045 represents equipment under capital leases and $1,642 represents accumulated depreciation recognized on this leased equipment.

10. Convertible Preferred Stock, Net

The Company completed a rights offering on February 5, 2015 (the "Rights Offering") providing all of the Company's existing common stock holders the non-transferrable right to purchase their pro rata share of $65,500 of convertible preferred stock at a price equal to $100.00 per share ("Preferred Stock"). The Preferred Stock is convertible into shares of Providence's Company's common stock, $0.001 par value per share ("Common Stock") at a conversion price equal to $39.88 per share, which was the closing price of the Company's Common Stock on the NASDAQ Global Select Market on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement (the "Standby Purchase Agreement") between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC (collectively, the "Standby Purchasers") and the Company, the remaining 524,116 shares of the Company's Preferred Stock were purchased by the Standby Purchasers at the $100.00 per share subscription price. The Company received $65,500 in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement. Additionally, on March 12, 2015, the Standby Purchasers exercised their right to purchase an additional 150,000 shares of the Company's Preferred Stock, at a purchase price of $105.00

per share or a total purchase price of $15,750, of the same series and having the same conversion price as the Preferred Stock sold in the Rights Offering.

The Company may pay a noncumulative cash dividend on each share of Preferred Stock, if and when declared by a committee of its Board of Directors ("Board"), at the rate of five and one-half percent (5.5%) per annum on the liquidation preference then in effect. On or before the third business day immediately preceding each fiscal quarter, the Company must determine its intention whether or not to pay a cash dividend with respect to that ensuing quarter and will give notice of its intention to each holder of Preferred Stock as soon as practicable thereafter.

In the event the Company does not declare and pay a cash dividend, the Company will declare a payment in kind ("PIK") dividend by increasing the liquidation preference of the convertible Preferred Stock to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to the liquidation preference then in effect multiplied by eight and one-half percent (8.5%) per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination. All holders of the Company's Preferred Stock are able to convert their Preferred Stock into shares of Common Stock at a rate of approximately 2.51 shares of Common Stock for each share of Preferred Stock. As of December 31, 2017, 1,800 shares of Preferred Stock have been converted to 4,510 shares of Common Stock.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and commenced on April 1, 2015, and, if declared, begin to accrue on the first day of the applicable dividend period. PIK dividends, if applicable, accrue cumulatively on the same schedule as set forth above for cash dividends and are also compounded at the applicable annual rate on each applicable subsequent dividend date. Cash dividends on redeemable convertible preferred stock totaling $4,418, or $5.50 per share, $4,419, or $5.50 per share, and $3,928, or $4.88 per share, were distributed to convertible preferred stockholders for the years ended December 31, 2017, 2016 and 2015, respectively.

The Preferred Stock is accounted for outside of stockholders' equity as it may be redeemed upon certain change in control events that are not solely in the control of the Company. Dividends are recorded in stockholders' equity and consist of the 5.5%/8.5% dividend. At the time of issuance of the Preferred Stock, the Company recorded a discount on Preferred Stock related to beneficial conversion features that arose due to the closing price of the Company's Common Stock being higher than the conversion price of the Preferred Stock on the commitment date. The amortization of this discount was recorded in stockholders' equity. The discount was fully amortized as of June 30, 2015.

The following table summarizes the Preferred Stock activity for the years ended December 31, 2017 and 2016:

	Dollar Value	Share Count
Balance at December 31, 2015	$ 77,576	803,518
Conversion to common stock	(12)	(120)
Allocation of issuance costs	1	—
Balance at December 31, 2016	$ 77,565	803,398
Conversion to common stock	(20)	(198)
Allocation of issuance costs	1	—
Balance at December 31, 2017	$ 77,546	803,200

As of December 31, 2017 and 2016, the outstanding shares of Preferred Stock were convertible into 2,014,042 and 2,014,538 shares of Common Stock, respectively.

11. Stockholders' Equity

At December 31, 2017 and 2016 there were 17,473,598 and 17,315,661 shares of the Company's Common Stock issued, respectively, including 4,126,132 and 3,478,676 treasury shares at December 31, 2017 and 2016, respectively.

Subject to the rights specifically granted to holders of any then outstanding shares of the Company's Preferred Stock, the Company's common stockholders are entitled to vote together as a class on all matters submitted to a vote of the Company's common stockholders, and are entitled to any dividends that may be declared by the Board. The Company's common stockholders do not have cumulative voting rights. Upon the Company's dissolution, liquidation or winding up, holders of the Company's Common Stock are entitled to share ratably in the Company's net assets after payment or provision for all liabilities and any

preferential liquidation rights of the Company's Preferred Stock then outstanding. The Company's common stockholders do not have preemptive rights to purchase shares of the Company's stock. The issued and outstanding shares of the Company's Common Stock are not subject to any redemption provisions and are not convertible into any other shares of the Company's capital stock. The rights, preferences and privileges of holders of the Company's Common Stock will be subject to those of the holders of any shares of the Company's Preferred Stock the Company may issue in the future.

The following table reflects the total number of shares of the Company's Common Stock reserved for future issuance as of December 31, 2017:

Shares of common stock reserved for:	
Exercise of stock options and restricted stock awards	681,608
Conversion of preferred stock to common stock	2,014,042
Issuance of Performance Restricted Stock Units	18,122
Total shares of common stock reserved for future issuance	2,713,772

Share Repurchases

On October 14, 2015, the Company entered into an agreement to repurchase 707,318 of its Common Stock held by former stockholders of Matrix for an aggregate purchase price of $29,000 (or $41.00 per share). The Company funded this purchase through a combination of borrowing on its Credit Facility and cash on hand. The purchase of these shares was completed on October 30, 2015.

On November 4, 2015, the Board authorized the Company to engage in a repurchase program to repurchase up to $70,000 in aggregate value of the Company's Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $62,981, excluding commission payments.

On October 26, 2016, the Board authorized a new repurchase program, under which the Company may repurchase up to $100,000 in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. Through October 26, 2017, a total of 770,808 shares were purchased through this plan for $30,360, excluding commission payments.

On November 2, 2017, the Board approved the extension of the Company's October 26, 2016 stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69,640 (the amount remaining from the $100,000 repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. As of December 31, 2017, 180,270 shares were purchased under this plan after it was extended on November 2, 2017 for $10,503, excluding commission payments.

During the years ended December 31, 2017, 2016 and 2015, the Company withheld 19,556, 2,736 and 15,961 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations arising from vesting of restricted stock awards. In addition, during the years ended December 31, 2017 and 2015, the Company withheld 5,665 and 5,718 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations and the exercise price upon the exercise of stock options. During the year ended December 31, 2015, the Company withheld 43,743 shares to cover the settlement of income tax and related benefit withholding obligations arising from shares held by employees that were released from escrow related to the Matrix acquisition, which shares are treated as treasury stock.

12. Stock-Based Compensation and Similar Arrangements

The Company provides stock-based compensation to employees, non-employee directors, consultants and advisors under the Company's 2006 Long-Term Incentive Plan ("2006 Plan"). The 2006 Plan allows the flexibility to grant or award stock options, stock appreciation rights, restricted stock, unrestricted stock, stock units including restricted stock units and performance awards to eligible persons.

The following table summarizes the activity under the 2006 Plan as of December 31, 2017:

	Number of shares of the Company's Common Stock authorized for issuance	Number of shares of the Company's Common Stock remaining for future grants	Number of shares of the Company's Common Stock subject to	
			Stock Options	Stock Grants
2006 Plan	5,400,000	1,938,666	606,695	111,157

The following table reflects the amount of stock-based compensation, for share settled awards issued to employees and non-employee directors, recorded in each financial statement line item for the years ended December 31, 2017, 2016 and 2015:

	Year Ended December 31,		
	2017	2016	2015
Service expense	$ 491	$ 830	$ 21,480
General and administrative expense	7,052	4,324	5,027
Equity in net (gain) loss of investees	76	18	—
Discontinued operations, net of tax	—	(18)	115
Total stock-based compensation	$ 7,619	$ 5,154	$ 26,622

Stock-based compensation included in service expense is related to the following segments:

	Year Ended December 31,		
	2017	2016	2015
NET Services	$ 434	$ 841	$ 724
WD Services (a)	57	(11)	20,756
Total stock-based compensation in service expense	$ 491	$ 830	$ 21,480

(a) WD Services includes $16,078 for the year ended December 31, 2015 related to the acceleration of awards pursuant to the separation agreements for two executives.

The amounts above exclude tax benefits of $2,885, $2,072 and $2,322 for the years ended December 31, 2017, 2016 and 2015, respectively.

Stock Options

During the year ended December 31, 2016, the Company did not grant any stock options. The fair value of each stock option awarded to employees is estimated on the date of grant using the Black-Scholes option-pricing formula based on the following assumptions for the years ended December 31, 2017 and 2015:

	Year Ended December 31,					
	2017			2015		
Expected dividend yield	0.0%			0.0%		
Expected stock price volatility	19.45%	—	42.95%	33.8%	—	46.14%
Risk-free interest rate	0.95%	—	2.23%	0.4%	—	1.35%
Expected life of options (years)	0.03	—	6.50	0.03	—	4.00

The risk-free interest rate was based on the U.S. Treasury security rate in effect as of the date of grant which corresponds to the expected life of the award. The expected stock price volatility was based on the Company's historical data. The expected

lives of options were based on the Company's historical data, a simplified method for plain vanilla options, or the Company's best estimate where appropriate.

During the fourth quarter of 2017, James Lindstrom resigned from the Company as Chief Executive Officer ("CEO") and board member of the Company. As a result of Mr. Lindstrom's resignation as CEO, a separation agreement was entered into between the Company and Mr. Lindstrom. As a result of this separation agreement, Mr. Lindstrom was granted 125,000 stock options with an exercise price of $61.33 per share that were immediately vested. The options are exercisable through December 31, 2018.

During the year ended December 31, 2017, the Company issued 91,400 shares of its Common Stock in connection with the exercise of employee stock options under the Company's 2006 Plan.

The following table summarizes the stock option activity for the year ended December 31, 2017:

	Year ended December 31, 2017			
	Number of Shares Under Option	Weighted-average Exercise Price	Weighted-average Remaining Contractual Term	Aggregate Intrinsic Value
Balance at beginning of period	355,598	$ 33.48		
Granted	371,775	57.08		
Exercised	(115,825)	29.77		
Forfeited/Cancelled	(854)	46.44		
Expired	(3,999)	24.59		
Outstanding at end of period	606,695	$ 48.70	2.62	$ 6,705
Vested or expected to vest at end of period	606,695	$ 48.70	2.62	$ 6,705
Exercisable at end of period	357,984	$ 44.65	2.10	$ 5,508

The weighted-average grant-date fair value for options granted, total intrinsic value and cash received by the Company related to options exercised during the years ended December 31, 2017, 2016 and 2015 were as follows:

	Year ended December 31,		
	2017	2016	2015
Weighted-average grant date fair value per share	$ 9.05	$ —	$ 8.77
Options exercised:			
Total intrinsic value	$ 2,010	$ 979	$ 6,659
Cash received	$ 1,921	$ 4,108	$ 4,894

Stock Option Modifications

During the fourth quarter of 2017, as a result of the separation agreement between the Company and Mr. Lindstrom, Mr. Lindstrom's outstanding stock options from his grants of 11,319 on August 6, 2015 and 9,798 on March 15, 2017 were modified to accelerate the vesting date of both awards to November 15, 2017 and allow exercise of the stock options until December 31, 2018. As a result of the modification to the terms of the original stock options granted to Mr. Lindstrom, the Company recognized an accelerated expense of $83 on the award for the year ended December 31, 2017.

During the second quarter of 2015, Warren Rustand terminated his role as CEO and board member of the Company, but remained employed as a Senior Advisor through the end of 2015. As a result of Mr. Rustand's termination as CEO, a separation agreement was entered into between the Company and Mr. Rustand. As a result of this separation agreement, Mr. Rustand's outstanding stock options from his grant of 200,000 stock options on September 11, 2014 were modified to accelerate the vesting date for the second tranche of options from June 30, 2015 to June 5, 2015, and the exercise period for all vested options of 133,332 was lengthened. In addition, the third tranche of options, consisting of 66,668 options, was cancelled. As a result of the modifications

to the terms of the original stock options granted to Mr. Rustand, the Company recognized additional stock-based compensation expense of $737 for the year ended December 31, 2015.

Restricted Stock Awards

During the year ended December 31, 2017, the Company granted 33,420 shares of restricted stock ("RSAs") to non-employee directors of its Board, executive officers and certain key employees. The awards primarily vest in three equal installments on the first, second and third anniversaries of the date of grant.

During the year ended December 31, 2017, the Company issued 36,623 shares of its Common Stock to non-employee directors, executive officers and key employees upon the vesting of certain RSAs granted in 2016, 2015 and 2014 under the Company's 2006 Plan. As of December 31, 2017 and 2016, 10,134 shares were vested but not released due to an additional holding period required by the grant agreement.

The following table summarizes the activity of the shares and weighted-average grant date fair value of the Company's unvested restricted Common Stock during the year ended December 31, 2017:

	Shares	Weighted-average grant date fair value
Non-vested at beginning of period	72,198	$ 44.44
Granted	33,420	$ 43.91
Vested	(36,623)	$ 43.42
Forfeited or cancelled	(4,216)	$ 47.17
Non-vested at end of period	64,779	$ 44.82

As of December 31, 2017, there was $4,331 of unrecognized compensation cost related to unvested share settled stock options and RSAs granted under the 2006 Plan. The cost is expected to be recognized over a weighted-average period of 1.2 years. The total fair value of stock options and RSAs vested was $3,550, $1,383 and $3,709 for the years ended December 31, 2017, 2016 and 2015, respectively.

Other Restricted Stock Award Grants

During the year ended December 31, 2014, the Board approved the grant of 596,915 RSAs to two individuals in connection with the Ingeus acquisition. The grants were made outside of the 2006 Plan, as they were related to the acquisition. However, since the term of the awards provided for vesting based on continued employment, the awards were accounted for as stock-based compensation. The shares necessary to settle these awards were placed in an escrow account in 2014, and were releasable from escrow in accordance with the vesting of the awards. Per the original terms of the agreements, the awards vested upon continued employment of the grantees, in four equal installments on the anniversary date of the grant. However, on October 15, 2015, the Company entered into agreements whereby the executives' employment was terminated by mutual agreement and vesting was no longer based upon continued employment. The Company recognized $16,078 in stock-based compensation expense at the time of the modification, which otherwise would have been recognized over the remainder of the vesting period. Additionally, the Company recognized accelerated deferred compensation expense of $4,714 related to these agreements during the year ended December 31, 2015. As of December 31, 2017, 149,228 underlying shares to settle the awards are held in the escrow account and will be released in 2018, although all expense was recognized as of December 31, 2015.

Restricted Stock Units

During the year ended December 31, 2016, the Company granted 5,930 restricted stock units to a key employee, related to the terms of a separation agreement, that vested on January 3, 2017. The units were settled through a cash payment of $304 during the year ended December 31, 2017. The award was liability classified, and the expense recorded was based upon the Company's closing stock price at the end of each reporting period and the completed requisite service period.

Performance Restricted Stock Units

The Company had 18,122 performance restricted stock units ("PRSUs") outstanding at December 31, 2017. These awards vest upon the Company or its segments meeting certain performance criteria over a set performance period as determined, and subject to adjustment, by the Company's Compensation Committee of the Board. 13,262 of the outstanding PRSUs at December 31, 2017 have a performance criteria tied to the Company's return on equity ("ROE"), with performance periods ending on December 31, 2017. The grantees will earn 33% of PRSUs granted if the ROE is 12% but less than 15%, and 100% of the PRSUs granted if the ROE is 15% or more. If ROE is less than 12%, no PRSUs will be earned. The Company has determined, subsequent to December 31, 2017, that none of these PRSUs, with a performance period ended December 31, 2017, will vest. 4,860 of the outstanding PRSUs at December 31, 2017 have a performance criteria tied to NET Services' EBITDA and the Company's EBITDA performance with performance periods ending on December 31, 2017. The Company expects all of these PRSUs, with a performance period ended December 31, 2017, to vest. Compensation expense (benefit) related to these awards totaled $19, ($270) and $613 for the years ended December 31, 2017, 2016 and 2015, respectively.

Cash Settled Awards

During the years ended December 31, 2017, 2016 and 2015, respectively, the Company issued 3,097, 3,360 and 4,000 stock equivalent units ("SEUs"), which settle in cash upon vesting, to Coliseum Capital Partners, L.P., in lieu of a grant to Christopher Shackelton, Chairman of the Board, for his service on the Board, which vest one-third upon each anniversary of the vesting date. The fair value of the SEUs is based on the closing stock price on the last day of the period and the completed requisite service period. The Company recorded $235, $287 and $588 of expense for SEUs during the years ended December 31, 2017, 2016 and 2015, respectively.

During the year ended December 31, 2014, the Company issued 200,000 stock option equivalent units ("SOEUs"), with an exercise price of $43.81 per share, which settle in cash, to Coliseum Capital Partners, L.P in lieu of a grant to Christopher Shackelton, for other services rendered. All 200,000 SOEUs were outstanding and exercisable at December 31, 2017. This award vested one-third upon grant, one-third on June 30, 2015 and one-third on June 30, 2016. No additional SOEUs were granted during the years ended December 31, 2017, 2016 and 2015. The Company recorded $2,146 and $1,888 of expense for SOEUs during the years ended December 31, 2017 and 2015, respectively, and a benefit of $1,517 during the year ended December 31, 2016. The expenses and benefit are included in "General and administrative expense" in the consolidated statements of income. The fair value of the SOEUs was estimated as of December 31, 2017, 2016 and 2015 using the Black-Scholes option-pricing formula and amortized over the option's graded vesting periods with the following assumptions:

	Year ended December 31,								
	2017			2016			2015		
Expected dividend yield	0.0%			0.0%			0.0%		
Expected stock price volatility	23.36%	—	32.09%	35.71%	—	41.82%	43.75%	—	45.3%
Risk-free interest rate	1.75%	—	1.95%	1.11%	—	1.64%	1.2%	—	1.70%
Expected life of options (in years)	0.75	—	2.75	1.0	—	3.00	2.75	—	4.75

As of December 31, 2017 and 2016, the Company had a short-term liability of $3,938 and $1,764, respectively, in "Accrued expenses" in the consolidated balance sheet related to unexercised vested and unvested cash settled share-based payment awards. The cash settled share-based compensation benefit in total excluded tax expense of $492 for the year ended December 31, 2016. The cash settled share-based compensation expense in total excluded a tax benefit of $908 and $990 for the years ended December 31, 2017 and 2015. The unrecognized compensation cost for SEUs is expected to be recognized over a weighted average period of 0.8 years; however, the total expense for both SEUs and SOEUs will continue to be adjusted until the awards are settled.

Holdco Long-Term Incentive Plan

On August 6, 2015 (the "Award Date"), the Compensation Committee of the Board adopted the HoldCo LTIP under the 2006 Plan. The Holdco LTIP was designed to provide long-term performance based awards to certain executive officers of Providence. Under the program, executives would receive shares of Providence Common Stock based on the shareholder value created in excess of an 8.0% compounded annual return between the Award Date and December 31, 2017 (the "Extraordinary Shareholder Value"). The Award Date value was calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price over the 90-day trading period ending on the Award Date. The Extraordinary Shareholder Value was calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price

over the 90-day trading period ending on December 31, 2017. A pool for use in the allocation of awards was created equal to 8.0% of the Extraordinary Shareholder Value.

Participants in the HoldCo LTIP would receive a percentage allocation of any such pool and, following determination of the size of the pool, would be entitled to a number of shares equal to their pro rata portion of the pool divided by the volume weighted average of the Company's per share price over the 90-day trading period ending on December 31, 2017. Of the shares allocated, 60% would be issued to the participant on or shortly following determination of the pool, 25% would vest and be issued on the one-year anniversary of such determination date, subject to continued employment, and the remaining 15% would be issued on the second anniversary of the determination date, subject to continued employment.

It was determined that no shares would be distributed under the Holdco LTIP as the calculation of the pool amount was zero. $4,738, $3,319 and $1,353 of expense is included in "General and administrative expense" in the consolidated statements of income for the years ended December 31, 2017, 2016 and 2015, respectively. As of December 31, 2017, the Company accelerated all remaining unrecognized compensation expense for the Holdco LTIP as there was no further requisite service period associated with the award, resulting in an acceleration of expense of $1,053.

These awards were equity classified and the fair value of the awards was calculated using a Monte-Carlo simulation valuation model. The fair value of the awards granted in 2016 and 2015 were estimated using the following assumptions:

	Year ended December 31,					
	2016			2015		
Forward interest rate	0.24%	—	2.71%	0.04%	—	2.90%
Expected Volatility		40.0%			45.0%	
Dividend Yield		—%			—%	
Fair Value of Total Pool		$12,870			$12,590	

13. Vertical Long-Term Incentive Plan

The Company established Long-Term Incentive Plans ("Vertical LTIPs") for the Company's operating segments, or verticals, during the fourth quarter of 2015. The Vertical LTIPs are consistent in their basic terms, but each were customized for specific aspects of the associated vertical. The awards pay in cash, however up to 50% of the award may be paid in unrestricted stock if the recipient elects this option when the Vertical LTIP offer letter is received. In addition, at the discretion of the Company, the recipients may be able to elect unrestricted stock in lieu of cash compensation at a later date. The Vertical LTIPs reward participants based on certain measures of free cash flow and EBITDA results adjusted as specified in the plan document. The awards vest in three installments: 60% of the award will pay out immediately following December 31, 2017, 25% one year following the performance period (i.e. December 31, 2018) and 15% two years following the performance period (i.e. December 31, 2019). Payout is subject to the participant remaining employed by the Company.

During 2017, the Company revised the structure of the NET Services long-term incentive plan. As a result, the Company finalized the amount payable under the plan at $2,956. The total value will be paid to the awarded participants per the terms of the original agreement and thus the remaining unamortized expense relating to this plan continues to be recognized over the remaining service period. As of December 31, 2017, unamortized compensation expense is $299. For the years ended December 31, 2017, 2016, and 2015, $816, $1,513 and $328 of expense, respectively, is included in "Service expense" in the consolidated statements of income related to this plan. At December 31, 2017, the liability for long-term incentive plans of the Company's operating segments of $2,657 is reflected in "Accrued expenses" and "Other long-term liabilities" in the consolidated balance sheet. At December 31, 2016, the liability for long-term incentive plans of the Company's operating segments of $1,841 is reflected in "Other long-term liabilities" in the consolidated balance sheet.

14. Earnings Per Share

The following table details the computation of basic and diluted earnings per share:

	Year ended December 31,		
	2017	2016	2015
Numerator:			
Net income attributable to Providence	$ 53,369	$ 91,928	$ 83,696
Less dividends on convertible preferred stock	(4,419)	(4,419)	(3,935)
Less accretion of convertible preferred stock discount	—	—	(1,071)
Less income allocated to participating securities	(7,085)	(13,135)	(10,691)
Net income available to common stockholders	$ 41,865	$ 74,374	$ 67,999
Continuing operations	$ 47,848	$ (21,251)	$ (29,181)
Discontinued operations	(5,983)	95,625	97,180
	$ 41,865	$ 74,374	$ 67,999
Denominator:			
Denominator for basic earnings per share -- weighted-average shares	13,602,140	14,666,896	15,960,905
Effect of dilutive securities:			
Common stock options	66,314	—	—
Performance-based restricted stock units	4,860	—	—
Denominator for diluted earnings per share -- adjusted weighted-average shares assumed conversion	13,673,314	14,666,896	15,960,905
Basic earnings (loss) per share:			
Continuing operations	$ 3.52	$ (1.45)	$ (1.83)
Discontinued operations	(0.44)	6.52	6.09
	$ 3.08	$ 5.07	$ 4.26
Diluted earnings (loss) per share:			
Continuing operations	$ 3.50	$ (1.45)	$ (1.83)
Discontinued operations	(0.44)	6.52	6.09
	$ 3.06	$ 5.07	$ 4.26

The accretion of Preferred Stock discount in the table above related to a beneficial conversion feature of the Company's Preferred Stock that was fully amortized as of June 30, 2015. Income allocated to participating securities is calculated by allocating a portion of net income attributable to Providence, less dividends on convertible stock, to the convertible preferred stockholders on a pro-rata as converted basis; however, the convertible preferred stockholders are not allocated losses.

The following weighted-average shares were not included in the computation of diluted earnings per share as the effect of their inclusion would have been anti-dilutive:

	Year ended December 31,		
	2017	2016	2015
Stock options to purchase common stock	362,392	22,638	173,925
Convertible preferred stock	803,323	803,442	700,241

15. Operating Leases

The Company has non-cancelable contractual obligations in the form of operating leases for office space, related office equipment and other facilities. The leases expire in various years and generally provide for renewal options. In the normal course of business, it is expected that these leases will be renewed or replaced by leases on other properties.

Certain operating leases provide for increases in future minimum annual rental payments based on defined increases in the Consumer Price Index, subject to certain minimum increases. Several of these lease agreements contain provisions for periods in which rent payments are reduced. The total amount of rental payments due over the lease term is being charged to rent expense on a straight-line basis over the term of the lease. The cumulative difference between rent expense recorded and the amount paid, for continuing operations, as of December 31, 2017 and 2016 was $3,957 and $3,253, respectively, and is included in “Accrued expenses” and “Other long-term liabilities” in the consolidated balance sheets.

Future minimum payments under non-cancelable operating leases for equipment and property with initial terms of one year or more consisted of the following at December 31, 2017:

	Operating Leases
2018	$ 20,875
2019	13,376
2020	9,738
2021	8,022
2022	6,142
Thereafter	3,939
Total future minimum lease payments	$ 62,092

Rent expense for continuing operations related to operating leases was $27,511, $29,316 and $31,191, for the years ended December 31, 2017, 2016 and 2015, respectively. Also, the lease agreements generally require the Company to pay executory costs such as real estate taxes, insurance, and repairs, which are recorded to expense as incurred.

16. Retirement Plan

The Company maintains a qualified defined contribution plan under Section 401(k) of the Internal Revenue Code of 1986, as amended, for all employees of its NET Services operating segment and corporate personnel. The Company, at its discretion, may make a matching contribution to the plan. Any matching contributions vest over 5 years. Unvested matching contributions are forfeitable upon employee termination. Employee contributions are fully vested and non-forfeitable. The Company’s contributions to the plan for continuing operations were $320, $248 and $221, for the years ended December 31, 2017, 2016 and 2015, respectively.

WD Services’ employees are entitled to benefits under certain retirement plans. The WD Services’ segment has separate plans in each country it operates. The plans receive fixed contributions from WD Services’ companies and the legal or constructive obligation is limited to these contributions, although the benefits the employees ultimately receive are determined by the plan administrators, which includes government entities and third-party administrators. The Company’s contributions to these plans were $8,219, $9,139 and $10,331 for the years ended December 31, 2017, 2016 and 2015, respectively.

The Company also maintains a Deferred Compensation Rabbi Trust Plan for highly compensated employees of NET Services. This plan was put in place to compensate for the inability of highly compensated employees to take full advantage of the Company’s 401(k) plan. Additional information is included in Note 18, Commitments and Contingencies.

17. Income Taxes

The following table summarizes our U.S. and foreign income (loss) from continuing operations before income taxes:

	Year Ended December 31,		
	2017	2016	2015
US	48,719	65,559	43,598
Foreign	15,485	(67,437)	(53,692)
Total	$ 64,204	$ (1,878)	$ (10,094)

The federal, state and foreign income tax provision is summarized as follows:

	Year Ended December 31,		
	2017	2016	2015
Federal:			
Current	$ 18,792	$ 21,202	$ 15,161
Deferred	(19,767)	(6,477)	(1,606)
	(975)	14,725	13,555
State:			
Current	3,975	4,580	2,644
Deferred	723	(938)	(38)
	4,698	3,642	2,606
Foreign:			
Current	1,197	266	523
Deferred	(519)	(1,597)	(2,101)
	678	(1,331)	(1,578)
Total provision for income taxes	$ 4,401	$ 17,036	$ 14,583

A reconciliation of the provision for income taxes with amounts determined by applying the statutory U.S. federal income tax rate to income (loss) from continuing operations before income taxes is as follows:

	Year Ended December 31,		
	2017	2016	2015
Federal statutory rates	35%	35 %	35 %
Federal income tax at statutory rates	$ 22,471	$ (657)	$ (3,533)
Revaluation of net deferred tax liabilities due to U.S. tax reform	(19,397)	—	—
U.S. tax reform impact on equity income of investee	(1,646)	—	—
Change in valuation allowance	2,299	9,480	3,574
Change in uncertain tax positions	7	73	(76)
State income taxes, net of federal benefit	3,203	2,396	1,785
Difference between federal statutory and foreign tax rate	(1,648)	9,427	4,642
Stock compensation	3,400	—	(184)
Meals and entertainment	100	96	81
Amortization of deferred consideration	—	—	9,444
Transaction costs	159	—	(447)
Contingent consideration liability reversal	—	—	(854)
Nontaxable income	(1,203)	—	(965)
Tax credits	(354)	(947)	(456)
Legal expense	(805)	522	284
Depreciation	—	—	649
Equity in net loss of investee	569	624	366
Sale of joint venture	(6,021)	—	—
Asset impairment	—	2,353	—
Foreign exchange	2,925	(7,001)	—
Other	342	670	273
Provision for income taxes	$ 4,401	$ 17,036	$ 14,583
Effective income tax rate	7%	(907)%	(144)%

The Company recognized an income tax provision for the years ended December 31, 2016 and December 31, 2015 despite having losses from continuing operations before income taxes. Because of foreign net operating losses (including equity investee losses) for which the future income tax benefit currently cannot be recognized, and non-deductible expenses such as amortization of deferred consideration related to the Ingeus acquisition, the Company recognized estimated taxable income for these years upon which the income tax provision for financial reporting is calculated.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

	December 31,	
	2017	2016
Deferred tax assets:		
Net operating loss carryforwards	$ 20,496	$ 17,742
Tax credit carryforwards	486	399
Accounts receivable allowance	1,134	1,341
Accrued items and reserves	14,371	18,669
Stock compensation	1,480	4,224
Deferred rent	572	915
Property and equipment depreciation	300	—
Other	173	180
	39,012	43,470
Deferred tax liabilities:		
Deferred financing costs	38	154
Prepaids	1,440	2,103
Property and equipment depreciation	—	1,238
Goodwill and intangibles amortization	5,809	9,568
Equity investment	42,113	59,244
Other	205	203
	49,605	72,510
Net deferred tax liabilities	(10,593)	(29,040)
Less valuation allowance	(26,402)	(27,423)
Net deferred tax liabilities	$ (36,995)	$ (56,463)
Net noncurrent deferred tax assets, net of valuation allowance of $26,402 and $27,423 for 2017 and 2016, respectively	4,632	1,510
Net noncurrent deferred tax liabilities, net of valuation allowance of $0 and $0 for 2017 and 2016, respectively	(41,627)	(57,973)
	$ (36,995)	$ (56,463)

At December 31, 2017, the Company had no federal or state net operating loss carryforwards. The Company had net operating loss carryforwards in the following countries which can be carried forward indefinitely:

Australia	$ 41,256
Canada	728
France	3,882
Saudi Arabia	82
UK	40,090

Realization of the Company's net operating loss carryforwards is dependent on generating sufficient taxable income. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets will be realized, to the extent they are not covered by a valuation allowance. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

The net change in the total valuation allowance for the year ended December 31, 2017 was negative $1,021, of which positive $2,299 related to current operations and negative $3,320 related to the adjustment of the beginning balance. The valuation

allowance includes $25,929 primarily for Australia, France and UK net operating loss carryforwards, and $473 for state tax credit carryforwards for which the Company has concluded that it is more likely than not that these net operating loss and tax credit carryforwards will not be realized in the ordinary course of operations. The Company will continue to assess the valuation allowance, and to the extent it is determined that the valuation allowance should be changed, an appropriate adjustment will be recorded.

U.S. Tax Reform

On December 22, 2017, the Tax Reform Act was enacted which institutes fundamental changes to the taxation of multinational corporations. The Tax Reform Act includes changes to the taxation of foreign earnings by implementing a dividend exemption system, expansion of the current anti-deferral rules, a minimum tax on low-taxed foreign earnings and new measures to deter base erosion. The Tax Reform Act also includes a permanent reduction in the corporate tax rate to 21%, repeal of the corporate alternative minimum tax, expensing of capital investment, and limitation of the deduction for interest expense. Furthermore, as part of the transition to the new tax system, a one-time transition tax is imposed on a U.S. shareholder's historical undistributed earnings and profits ("E&P") of foreign affiliates. Although the Tax Reform Act is generally effective January 1, 2018, GAAP requires recognition of the tax effects of new legislation during the reporting period that includes the enactment date, which was December 22, 2017.

As a result of the reduction in the U.S. corporate income tax rate, the Company revalued its ending net deferred tax liabilities as of December 31, 2017 and recognized a provisional tax benefit of $19,397. The Company has projected net accumulated deficits in foreign E&P; therefore, no provisional tax expense for deemed repatriation has been recognized. For any future foreign earnings, the Company will generally be free of additional U.S. tax consequences due to a dividends received deduction implemented as part of the move to a territorial tax system for foreign subsidiary earnings. The Company continues to assert indefinite reinvestment in outside basis differences. Determination of the amount of unrecognized deferred tax liability on outside basis differences is not practicable because of the complexity of laws and regulations, the varying tax treatment of alternative repatriation scenarios, and the variation due to multiple potential assumptions relating to the timing of any future repatriation.

The global intangible low taxed income ("GILTI") provisions of the Tax Reform Act require the Company to include in its U.S. income tax return foreign subsidiary earnings in excess of an allowable return on the foreign subsidiary's tangible assets. The Company may be subject to incremental U.S. tax on GILTI income beginning in 2018, and has elected to account for GILTI tax in the period in which it is incurred. Therefore, no deferred tax impacts of GILTI have been considered in the Company's consolidated financial statements for the year ended December 31, 2017.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") to address the application of GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. In accordance with the SAB 118 guidance, the Company has recognized the provisional tax impacts related to the benefit for the revaluation of deferred tax assets and liabilities in its consolidated financial statements for the year ended December 31, 2017. The final impact of the Tax Reform Act may differ from these provisional amounts, possibly materially, due to, among other things, issuance of additional regulatory guidance, changes in interpretations and assumptions the Company has made, and actions the Company may take as a result of the Tax Reform Act. In accordance with SAB 118, the financial reporting impact of the Tax Reform Act will be completed in the fourth quarter of 2018.

Unrecognized Tax Benefits

The Company expects no material amount of the unrecognized tax benefits to be recognized during the next twelve months. The Company recognizes interest and penalties as a component of income tax expense. During the years ended December 31, 2017, 2016 and 2015, the Company recognized approximately $65, $19 and $27, respectively, in interest and penalties. The Company had approximately $83 and $52 for the payment of penalties and interest accrued as of December 31, 2017 and 2016, respectively.

A reconciliation of the liability for unrecognized income tax benefits is as follows:

	December 31,		
	2017	2016	2015
Unrecognized tax benefits, beginning of year	$ 1,108	$ 271	$ 347
Balance upon acquisition/disposition	—	764	—
Increase (decrease) related to prior year positions	22	37	(47)
Increase related to current year tax positions	101	139	48
Statute of limitations expiration	(116)	(103)	(77)
Unrecognized tax benefits, end of year	$ 1,115	$ 1,108	$ 271

The Company is subject to taxation in the U.S. and various foreign and state jurisdictions. The statute of limitations is generally three years for the U.S., two to five years in foreign countries and between three and four years for the various states in which the Company operates. The Company is subject to the following material taxing jurisdictions: the U.S., UK, Australia, France, Saudi Arabia and Korea. The tax years that remain open for examination by the U.S. and various foreign countries and states principally include the years 2013 to 2017.

18. Commitments and Contingencies

Legal proceedings

On June 15, 2015, a putative stockholder class action derivative complaint was filed in the Court of Chancery of the State of Delaware (the "Court"), captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL (the "Haverhill Litigation"). The complaint named Richard A. Kerley, Kristi L. Meints, Warren S. Rustand, Christopher Shackelton (the "Individual Defendants") and Coliseum Capital Management, LLC ("Coliseum Capital Management") as defendants, and the Company as a nominal defendant. The complaint purported to allege that the dividend rate increase term originally in the Company's outstanding Preferred Stock was an impermissibly coercive measure that impaired the voting rights of the Company's stockholders in connection with the vote on the removal of certain voting and conversion caps previously applicable to the Preferred Stock (the "Caps"), and that the Individual Defendants breached their fiduciary duties by approving the dividend rate increase term and attempting to coerce the stockholder vote relating to the Company's Preferred Stock, and by failing to disclose all material information necessary to allow the Company's stockholders to cast an informed vote on the Caps. The complaint also purported to allege derivative claims alleging that the Individual Defendants breached their fiduciary duties to the Company by entering into the subordinated note and standby agreement with Coliseum Capital Management, and granting Coliseum Capital Management certain stock options. The complaint further alleged that Coliseum Capital Management aided and abetted the Individual Defendants in breaching their fiduciary duties. The complaint sought, among other things, an injunction prohibiting the stockholder vote relating to the dividend rate increase, corporate governance reforms, unspecified damages and other relief.

On August 31, 2015, after arms' length negotiations, the parties reached an agreement in principle and executed a Memorandum of Understanding ("MOU") providing for the settlement of claims concerning the dividend rate increase term and stockholder vote and related disclosure. The MOU stated that the Defendants had entered into the partial settlement of the litigation solely to eliminate the distraction, burden, expense, and potential delay of further litigation involving claims that have been settled. Pursuant to the partial settlement, the Company agreed to supplement the disclosures in its definitive proxy statement on Schedule 14A (the "2015 Proxy Statement"), Coliseum Capital Management and certain of its affiliates and the Company entered into an amendment to that certain Series A Preferred Stock Exchange Agreement, by and among Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P., Blackwell Partners, LLC, and The Providence Service Corporation dated as of February 11, 2015 described in the 2015 Proxy Statement, and the Board of the Company agreed to adopt a policy related to the Board's determination each quarter as to whether the Company should pay cash dividends or allow dividends to be paid in the form of PIK dividends on the Preferred Stock, as further described in the supplemental proxy disclosures. On September 2, 2015, Providence issued supplemental disclosures through a supplement to the 2015 Proxy Statement. On September 16, 2015, Providence stockholders approved the removal of the Caps. The Company provided notice of the proposed partial settlement to Providence's stockholders by December 11, 2015. At a hearing on February 9, 2016, the court denied approval of the settlement. The Court indicated that plaintiff's counsel could petition the Court for a mootness fee, and that defendants would have the opportunity to oppose any such application.

On January 12, 2016, the plaintiff filed a verified amended class action and derivative complaint (the "first amended complaint"). In addition to the defendants named in the earlier complaint, the first amended complaint named David Shackelton,

Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC, Coliseum Capital Co-Invest, L.P. (collectively, and together with Coliseum Capital Management, LLC, "Coliseum") and RBC Capital Markets, LLC ("RBC Capital Markets") as additional defendants. The first amended complaint purported to allege direct and derivative claims for breach of fiduciary duty against some or all of the Individual Defendants and David Shackelton (collectively, the "Amended Individual Defendants") regarding the approval of the subordinated note, the rights offering, the standby agreement with Coliseum Capital Management, and the grant to Coliseum Capital Management of certain stock options. The first amended complaint also purported to allege an additional derivative claim for unjust enrichment against Coliseum and further alleged that Coliseum and RBC Capital Markets aided and abetted the Amended Individual Defendants in breaching their fiduciary duties. The first amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, unspecified damages and other relief.

On May 6, 2016, the plaintiff filed a verified second amended class action and derivative complaint (the "second amended complaint"). In addition to the defendants named in the earlier complaint, the second amended complaint named Paul Hastings LLP ("Paul Hastings") and Bank of America, N.A. ("BofA") as additional defendants. In addition to previously asserted claims, the second amended complaint purported to assert direct and derivative claims for breach of fiduciary duties against Coliseum Capital Management, in its capacity as the controlling stockholder of the Company, in connection with the subordinated note, the Company's rights offering of Preferred Stock and the standby purchase agreement with Coliseum Capital Management (the "Financing Transactions"). The second amended complaint also alleged that Paul Hastings breached their fiduciary duties as counsel to the Company in connection with the Financing Transactions and that BofA and Paul Hastings aided and abetted certain of the Amended Individual Defendants in breaching their fiduciary duties in connection with the Financing Transactions. The second amended complaint sought, among other things, revision or rescission of the terms of the subordinated note and Preferred Stock, corporate governance reforms, disgorgement of fees paid to RBC Capital Markets, Paul Hastings and BofA for work relating to the Financing Transactions, unspecified damages and other relief.

On May 20, 2016, the Court granted a six-month stay of the proceeding (which was subsequently extended) to allow a special litigation committee, created by the Board, sufficient time to investigate, review and evaluate the facts, circumstances and claims asserted in or relating to this action and determine the Company's response thereto. On January 20, 2017, the special litigation committee advised the Court that the parties to the litigation and the special litigation committee had reached an agreement in principle to settle all of the claims in the litigation. The parties then entered into a proposed settlement agreement which was submitted to the Court for approval. On September 28, 2017, the Court approved the proposed settlement agreement among the parties that provided for a settlement amount of $10,000 less plaintiff's legal fees and expenses (the "Settlement Amount"), with 75% of the Settlement Amount to be paid to the Company and 25% of the Settlement Amount to be paid to holders of the Company's Common Stock other than certain excluded parties. In November 2017, the Company received a payment of $5,363 from the Settlement Amount, which is included in "Other income" in the consolidated statement of income for the year ended December 31, 2017.

In addition to the matter described above, in the ordinary course of business, the Company is a party to various lawsuits. Management does not expect these lawsuits to have a material impact on the liquidity, results of operations, or financial condition of Providence.

Indemnifications related to Haverhill Litigation

The Company indemnified the Standby Purchasers from and against any and all losses, claims, damages, expenses and liabilities relating to or arising out of (i) any breach of any representation, warranty, covenant or undertaking made by or on behalf of the Company in the Standby Purchase Agreement and (ii) the transactions contemplated by the Standby Purchase Agreement and the 14.0% Unsecured Subordinated Note in aggregate principal amount of $65,500, except to the extent that any such losses, claims, damages, expenses and liabilities are attributable to the gross negligence, willful misconduct or fraud of such Standby Purchaser.

The Company has also indemnified other third parties from and against any and all losses, claims, damages, expenses and liabilities arising out of or in connection with the Company's acquisition of CCHN Group Holdings, Inc. (operating under the tradename Matrix, and formerly included in our HA Services segment) in October 2014 and related financing commitments, except to the extent that any such losses, claims, damages, expenses and liabilities are found in a final, non-appealable judgment by a court of competent jurisdiction to have resulted from the gross negligence, bad faith or willful misconduct of such third parties, or a material breach of such third parties' obligations under the related agreements.

The Company recorded $318, $1,282 and $310 of such indemnified legal expenses related to the Haverhill Litigation during the years ended December 31, 2017, 2016 and 2015, respectively, which is included in "General and administrative expenses" in the consolidated statements of income. Of these amounts, $245, $757 and $310 for the years ended December 31, 2017, 2016

and 2015, respectively, were indemnified legal expenses of related parties. Other legal expenses of the Company related to the Haverhill Litigation are covered under the Company's insurance policies, subject to applicable deductibles and customary review of the expenses by the carrier. The Company recognized expense of $8, $210 and $500 for the years ended December 31, 2017, 2016 and 2015, respectively. While the carrier typically remits payment directly to the respective law firm, the Company accrues for the cost and records a corresponding receivable for the amount to be paid by the carrier. The Company has recognized an insurance receivable of $941 and $1,645 in "Other receivables" in the consolidated balance sheets at December 31, 2017 and 2016, respectively, with a corresponding liability amount recorded to "Accrued expenses".

Other Indemnifications

The Company has provided certain standard indemnifications in connection with the sale of the Human Services segment to Molina Healthcare Inc. ("Molina") effective November 1, 2015. All representations and warranties made by the Company in the Membership Interest Purchase Agreement (the "Purchase Agreement") to sell the Human Services segment ended on February 1, 2017. However, claims made prior to February 1, 2017 by the purchaser of the Human Services segment against these representations and warranties may survive until the claims are settled. In addition, certain representations, including tax representations, survive until the expiration of applicable statutes of limitation, and healthcare representations survive until the third anniversary of the closing date. The Company has received indications from the purchaser of the Human Services segment regarding potential indemnification claims. One potential indemnification claim relates to Rodriguez v. Providence Community Corrections (the "Rodriguez Litigation"), a complaint filed in the District Court for the Middle District of Tennessee, Nashville Division (the "Rodriquez Court"), against Providence Community Corrections, Inc. ("PCC"), an entity sold under the Purchase Agreement. On September 18, 2017, the plaintiffs in the Rodriguez Litigation filed an unopposed motion for preliminary approval of a proposed settlement, pursuant to which PCC would pay $14,000 to the plaintiffs and $350 to co-defendant Rutherford County, Tennessee. On October 5, 2017, the Rodriguez Court denied preliminary approval of the settlement and requested additional information. On October 18, 2017, the plaintiffs filed a second unopposed motion for approval of the proposed settlement. On January 2, 2018, the Rodriguez Court granted preliminary approval of the proposed settlement and authorized notice to class members.

On September 15, 2017, Molina and the Company entered into a memorandum of understanding; and on March 1, 2018, Molina and the Company entered into a settlement agreement, regarding a settlement of an indemnification claim by Molina with respect to the Rodriguez Litigation and other matters. As of December 31, 2017, the accrual is $15,000 with respect to an estimate of loss for potential indemnification claims. The Company expects to recover a portion of the settlement through insurance coverage, although this cannot be assured.

Litigation is inherently uncertain and the actual losses incurred in the event that the related legal proceedings were to result in unfavorable outcomes could have a material adverse effect on the Company's business and financial performance.

The Company has provided certain standard indemnifications in connection with its Matrix stock subscription transaction whereby Mercury Fortuna Buyer, LLC ("Subscriber"), Providence and Matrix entered into a stock subscription agreement (the "Subscription Agreement"), dated August 28, 2016. The representations and warranties made by the Company in the Subscription Agreement ended January 19, 2018; however, certain fundamental representations survive through the 36th month following the closing date. The covenants and agreements of the parties to be performed prior to the closing ended January 19, 2018, and all other covenants and agreements survive until the expiration of the applicable statute of limitations in the event of a breach, or for such lesser periods specified therein. The Company is not aware of any indemnification liabilities with respect to Matrix that require accrual at December 31, 2017.

Other Contingencies

On January 25, 2018, the UK Ministry of Justice (the "MOJ") released a report on reoffending statistics for certain offenders who entered probation services during the period October 2015 to March 2016. The report provides statistics for all providers of probation services, including our subsidiary RRP, which is in our WD Services segment. This information is the second data set that is utilized to determine performance payments under the various providers' transforming rehabilitation contracts with the MOJ, as the actual rates of recidivism are compared to benchmark rates established by the MOJ. Performance payments and penalties are linked to two separate measures of recidivism - the binary measure and the frequency measure. The binary measure defines the percentage of offenders within a cohort, formed quarterly, who reoffend in the following 12 months. The frequency measure defines the average number of offenses committed by reoffenders within the same 12-month measurement period. The performance for the frequency measure for most providers has been below the benchmarks established by the MOJ. As a result, RRP could be required to make payments to the MOJ and the amounts of such payments could be material. The amount of potential payments to the MOJ, if any, under RRP's contracts with the MOJ cannot be estimated at this time, as the MOJ is

reviewing the data to understand the underlying reasons for the increase in certain rates of recidivism and other factors that could impact the contractual measure.

Deferred Compensation Plan

The Company has one deferred compensation plan for management and highly compensated employees of NET Services as of December 31, 2017. The deferred compensation plan is unfunded, and benefits are paid from the general assets of the Company. The total of participant deferrals, which is reflected in "Other long-term liabilities" in the consolidated balance sheets, was $1,806 and $1,430 at December 31, 2017 and 2016, respectively.

19. Transactions with Related Parties

The Company incurred legal expenses under an indemnification agreement with the Standby Purchasers as further discussed in Note 18, Commitments and Contingencies. Preferred Stock dividends earned by the Standby Purchasers during the years ended December 31, 2017 and 2016 totaled $4,213 each year.

During the year ended December 31, 2017, the Company made a $566 loan to Mission Providence. The loan was also repaid during the year ended December 31, 2017.

20. Discontinued Operations

Effective October 19, 2016, the Company completed the Matrix Transaction. At the closing, (i) cash consideration of $180,614 was paid by the Subscriber to Matrix based upon an enterprise value of $537,500 and (ii) Matrix borrowed approximately $198,000 pursuant to a credit and guaranty agreement providing for term loans in an aggregate principal amount of $198,000 and revolving loan commitments in an aggregate principal amount not to exceed $10,000, which was not drawn at the closing. At the closing, Matrix distributed $381,163 to Providence, in full satisfaction of a promissory note and accumulated interest between Matrix and Providence. At the closing, Providence made a $5,663 capital contribution to Matrix, as described in the Subscription Agreement, as amended, based upon its pro-rata ownership of Matrix, to fund the near-term cash needs of Matrix. On the day that was fifteen days following the closing date, Providence was, to the extent payable pursuant to the terms of the Subscription Agreement, as amended, entitled to receive from Matrix, or required to pay to Matrix, subsequent working capital adjustment payments. Providence received an initial payment of $5,172 from Matrix in November 2016 which is net of the capital contribution of $5,663 described above, based upon the initial working capital calculation as described in the Subscription Agreement. Additionally, in February 2017, the Company received a $75 payment from Matrix representing the final working capital adjustment payment.

In accordance with ASC 205-20, Presentation of Financial Statements-Discontinued Operations, a component of an entity is reported in discontinued operations after meeting the criteria for held for sale classification if the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. The Company analyzed the quantitative and qualitative factors relevant to the Matrix stock subscription transaction resulting in the Company no longer owning a controlling interest in Matrix, and determined that those held for sale conditions for discontinued operations presentation were met during the third quarter of 2016. As such, the historical financial results of Matrix, the Company's historical HA Services segment, and the related income tax effects have been presented as discontinued operations for all periods presented in the accompanying consolidated financial statements through October 19, 2016.

The Company has continuing involvement with Matrix through its ownership of 46.6% of the equity interests in Matrix as of December 31, 2017, as well as through a management consulting agreement, not to exceed ten years. Prior to the Matrix Transaction, the Company owned 100% of the equity interest in Matrix. Subsequent to the Matrix Transaction, the Company accounts for its investment in Matrix under the equity method of accounting. The Company's share of Matrix's losses subsequent to the Matrix Transaction, which totaled $13,445 and $1,789, is recorded as "Equity in net (gain) loss of investees" in its consolidated statement of income for the years ended December 31, 2017 and 2016, respectively. Matrix's pretax loss for the year ended December 31, 2017 totaled $2,948 and includes $3,537 of transaction related expenses. Matrix's pretax loss for the period of October 19, 2016 through December 31, 2016 totaled $7,027 and includes $6,367 of transaction related expenses. There have been no cash inflows or outflows from or to Matrix subsequent to the closing of the Matrix Transaction, other than the working capital adjustments discussed above and management fees associated with its ongoing relationship with Matrix, of which $1,103 was received during the year ended December 31, 2017. $247 and $185 are included in "Other receivables" in the consolidated balance sheets at December 31, 2017 and 2016, respectively, related to management fees receivable.

On September 3, 2015, the Company entered into a Purchase Agreement, pursuant to which the Company agreed to sell all of the membership interests in Providence Human Services, LLC and Providence Community Services, LLC, comprising the

Company's Human Services segment, in exchange for cash proceeds of approximately $200,000 prior to adjustments for estimated working capital, certain seller transaction costs, debt assumed by the buyer, and a $20,099 cash payment received for the Providence Human Services cash and cash equivalents on hand at closing. The net proceeds were $230,703, although $10,000 is held in an indemnity escrow and recorded within "Prepaid expenses and other" in the consolidated balance sheet at December 31, 2017. Proceeds include a customary working capital adjustment of $13,246. During the years ended December 31, 2017 and 2016, the Company recorded additional expenses related to the Human Services segment, principally related to legal proceedings as described in Note 18, Commitment and Contingences, related to an indemnified legal matter.

Results of Operations

The following table summarizes the results of operations classified as discontinued operations, net of tax, for the years ended December 31, 2017, 2016 and 2015. The HA Services segment column in the table below for the year ended December 31, 2016 reflects the financial results for HA Services from January 1, 2016 through October 19, 2016.

	Year ended December 31, 2017		
	Human Services Segment	HA Services Segment	Total Discontinued Operations
Operating expenses:

Discontinued operations, net of tax	$ 101,800	$ 6,071	$ 107,871

Interest expense, net

The Company allocated interest expense, including amortization of deferred financing fees, to discontinued operations based on the portion of the debt that was required to be paid with the proceeds from the sale of the Human Services segment and the Matrix Transaction. The total allocated interest expense is included in “Interest expense, net” in the tables above. The total allocated interest expense for the years ended December 31, 2016 and 2015 is as follows:

	Year ended December 31,	
	2016	2015
Human Services Segment	$ —	$ 2,871
HA Services Segment	9,939	14,376
Total	$ 9,939	$ 17,247

Cash Flow Information

The following table presents depreciation, amortization, capital expenditures and significant operating noncash items of the discontinued operations for the years ended December 31, 2016 and 2015:

	For the year ended December 31, 2016		
	Human Services Segment	HA Services Segment	Total Discontinued Operations

Cash flows from discontinued investing activities:			
Purchase of property and equipment	$ 2,224	$ 8,079	$ 10,303

21. Segments

The Providence Service Corporation owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States and workforce development services internationally. The subsidiaries and other investments in which the Company holds interests comprise the following segments:

- NET Services – Nationwide manager of non-emergency medical transportation programs for state governments and managed care organizations.
- WD Services – Global provider of employment preparation and placement services, legal offender rehabilitation services, youth community service programs and certain health related services to eligible participants of government sponsored programs.
- Matrix Investment – Minority interest in Matrix, a nationwide provider of in-home care optimization and management solutions, including CHAs, to members of managed care organizations, accounted for as an equity method investment as a result of the Matrix Transaction on October 19, 2016, which is further discussed in Note 20, Discontinued Operations

In addition to its segments' operations, the Corporate and Other segment includes the Company's activities at its corporate office that include executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions, and the Company's captive insurance company.

Segment results are based on how the Company's chief operating decision maker ("CODM") manages the Company's business, makes operating decisions and evaluates operating performance. The operating results of the segments include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by Corporate on behalf of the segment. Indirect expenses, including unallocated corporate functions and expenses, such as executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company as well as elimination entries recorded in consolidation are reflected in Corporate and Other.

The following table sets forth certain financial information from continuing operations attributable to the Company's business segments for the years ended December 31, 2017, 2016 and 2015.

	Year Ended December 31, 2017				
	NET Services	WD Services	Matrix Investment	Corporate and Other	Total

Domestic service revenue, net, totaled 82.2%, 79.2% and 74.4% of service revenue, net for the years ended December 31, 2017, 2016 and 2015, respectively. Foreign service revenue, net, totaled 17.8%, 20.8% and 25.6% of service revenue, net for the years ended December 31, 2017, 2016 and 2015, respectively.

At December 31, 2017, $99,071 of the Company's net assets from continuing operations were located in countries outside of the U.S. At December 31, 2016, $76,579 of the Company's net assets from continuing operations were located in countries outside of the U.S.

Customer Information

11.2%, 10.2% and 11.0% of the Company's consolidated revenue was derived from one U.S. state Medicaid program for the years ended December 31, 2017, 2016 and 2015, respectively. 10.7% of the Company's consolidated revenue was derived from one UK governmental agency for the year ended December 31, 2015. In addition, substantially all of the Company's revenues are generated from domestic and foreign governmental agencies or entities that contract with governmental agencies.

22. Quarterly Results (Unaudited)

The quarterly consolidated financial statements presented below reflect HA Services and Human Services as discontinued operations for all periods presented.

	Quarter ended			
	March 31, 2017 (1)	June 30, 2017	September 30, 2017 (2)	December 31, 2017 (3)(4)(5)
Service revenue, net	$ 399,494	$ 407,983	$ 409,517	$ 406,888
Operating Income	6,788	5,999	6,309	16,937
Income from continuing operations, net of tax	1,915	3,858	14,964	39,066
Discontinued operations, net of tax	(5,866)	(117)	(16)	16
Net income (loss) attributable to Providence	(4,325)	3,915	14,853	38,926
Earnings (loss) per common share (10):				
Basic	$ (0.40)	$ 0.18	$ 0.88	$ 2.43
Diluted	$ (0.40)	$ 0.18	$ 0.88	$ 2.41

	Quarter ended			
	March 31, 2016	June 30, 2016	September 30, 2016 (6)	December 31, 2016 (7)(8)(9)
Service revenue, net	$ 382,036	$ 398,119	$ 412,271	$ 385,819

Earnings (loss) per common share (10):				
Basic	$ 0.07	$ 0.21	$ (0.05)	$ 4.92
Diluted	$ 0.07	$ 0.21	$ (0.05)	$ 4.92

(1) The Company recorded expenses, net of tax, of $5,866 in Discontinued operations, net of tax, in the quarter ending March 31, 2017 related to the Company's former Human Services segment, which are principally related to an ongoing legal matter.

(2) The Company recorded a gain on sale of equity investment of $12,606, net of tax, related to the sale of its equity interest in Mission Providence during the quarter ended September 30, 2017. During the quarter ended December 31, 2017, the Company recorded a reduction to the gain on sale of $229, related to the finalization of the working capital adjustment per the sale agreement.

(3) Operating income for the quarter ended December 31, 2017 increased as compared to the prior quarters in 2017 as a result of a decrease in service expense as a percentage of revenue for NET Services and WD Services. This was primarily a result of lower operating costs of both segments as well as certain NET Services contractual adjustments recorded in the fourth quarter of 2017.

(4) The quarter ended December 31, 2017 includes the receipt of the Haverhill Litigation settlement of $5,363.

(5) The quarter ended December 31, 2017 includes a net tax benefit of $16,017 related to the enactment of the Tax Reform Act during the fourth quarter of 2017, due to the re-measurement of deferred tax liabilities by Providence as a result of the reduction in the U.S. corporate tax rate. Providence realized a tax benefit of $19,397, partially offset by $3,379 of increased tax expense resulting from additional equity in net gain of Matrix, due to Matrix' re-

measurement of its deferred tax liabilities. The equity in net gain from Matrix for the quarter ended December 31, 2017 includes a tax benefit of $13,610 related to Matrix's re-measurement of deferred tax liabilities as a result of the Tax Reform Act.

(6) The Company recorded expenses, net of tax, of $5,035 in Discontinued operations, net of tax, in the quarter ended September 30, 2016 related to the Company's former Human Services segment, which are principally related to an ongoing legal matter.

(7) Service revenue, net for the quarter ending December 31, 2016 decreased from the quarter ended September 30, 2016 primarily due to decreased revenue associated with the WD Services' National Citizen Service summer youth programs, which are seasonal in nature. Additionally, the quarter ended September 30, 2016 included revenue of $5,367 under the WD Services' offender rehabilitation program related to the finalization of a contractual adjustment for the contract years ended March 31, 2015 and 2016.

(8) The Company recorded an asset impairment charge of $1,415 related to the building and land utilized by the holding company, which was sold effective December 30, 2016. Also, the Company recorded asset impairment charges in its WD Services segment of $9,983, $4,381 and $5,224 to its property and equipment, intangible assets and goodwill, respectively.

(9) The quarter ended December 31, 2016 includes gain on loss of controlling interest in Matrix, net of tax, of $109,403.

(10) Earnings per share is computed independently for each of the quarters presented. Therefore, the sum of quarterly earnings per share may not equal the total computed for the year.

23. Subsequent Events

On February 16, 2018, Matrix acquired HealthFair, a leading provider of mobile health assessment and advanced diagnostic testing services for a purchase price of $160,000 plus an earnout payment contingent upon HealthFair's 2018 financial performance. Additionally, Matrix entered into a financing transaction consisting of a $330,000 first lien term loan and a $20,000 revolving line of credit, of which none was drawn, and issued an aggregate of approximately 24,200,000 shares of its common units related to a seller roll-over contribution. As a result of the rollover of certain equity interests in HealthFair, Providence's equity ownership is 43.6% as of February 16, 2018.

On November 2, 2017, the Company's Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69,640 (the amount remaining from the $100,000 repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. During the period January 1, 2018 to March 5, 2018, the Company repurchased 527,825 shares for $33,330, and $25,807 was available under the plan to repurchase shares.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

The Company, under the supervision and with the participation of its management (including its principal executive officer and principal financial officer), evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act as of the end of the period covered by this Annual Report on Form 10-K (December 31, 2017). Based upon this evaluation, the Company's principal executive and financial officers have concluded that such disclosure controls and procedures were effective to provide reasonable assurance that (i) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management's report on internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Report of Independent Registered Public Accounting Firm

The attestation report of the registered public accounting firm on the Company's internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Changes in Internal Control Over Financial Reporting

The principal executive and financial officers also conducted an evaluation of whether any changes in the Company's internal control over financial reporting occurred during the quarter ended December 31, 2017 that have materially affected or which are reasonably likely to materially affect such control. Such officers have concluded that no such changes have occurred.

Item 9B. Other Information.

Effective March 12, 2018, Matthew Umscheid, our current Senior Vice President, Strategic Services, is being transferred to employment in such role at our LogistiCare business, pursuant to an offer letter dated March 6, 2018. In connection with this transfer, Mr. Umscheid is resigning as an officer of the Company. Under the terms of his offer letter with LogistiCare, Mr. Umscheid's annual base salary will remain at $350,000, his target annual bonus for 2018 will remain at 75% of his base salary, and there is no term of employment. In his new role, Mr. Umscheid will also be eligible to participate in other compensation and benefit programs made available to LogistiCare's senior executives, including a long-term incentive plan.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Code of Ethics

We have adopted a code of ethics that applies to our senior management, including our chief executive officer, chief financial officer, controller and persons performing similar functions, as well as our directors, officers and employees. This code of ethics is part of our broader Compliance and Ethics Plan and Code of Conduct, which is available free of charge in the Investor Relations section of our website at www.prscholdings.com. We intend to disclose any amendment to, or waiver from, a provision of the code of ethics that applies to our principal executive officer, principal financial officer or principal accounting officer on our website. The information contained on our website is not part of, and is not incorporated in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 11. Executive Compensation.

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 14. Principal Accounting Fees and Services.

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2018 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2018, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a)(1) Financial Statements

The following consolidated financial statements including footnotes are included in Item 8.

- Consolidated Balance Sheets at December 31, 2017 and 2016;
- Consolidated Statements of Income for the years ended December 31, 2017, 2016 and 2015;
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2017, 2016 and 2015;
- Consolidated Statements of Stockholders' Equity for the years ended December 31, 2017, 2016 and 2015; and
- Consolidated Statements of Cash Flows for the years ended December 31, 2017, 2016 and 2015.

(2) Financial Statement Schedules

Schedule II Valuation and Qualifying Accounts

	Balance at beginning of period	Additions: Charged to costs and expenses	Additions: Charged to other accounts	Deductions	Balance at end of period
Year Ended December 31, 2017:					
Allowance for doubtful accounts	$ 5,901	$ 815	$ (466) (1)	$ 488 (2)	$ 5,762
Year Ended December 31, 2016:					
Allowance for doubtful accounts	$ 4,380	$ 3,298	$ 1,058 (1)	$ 2,835 (2)	$ 5,901
Year Ended December 31, 2015:					
Allowance for doubtful accounts	$ 3,198	$ 1,928	$ 1,152 (1)	$ 1,898 (2)	$ 4,380

Notes:

Schedule above has been recast from prior year to exclude activity related to discontinued operations.

(1) Amounts primarily include the allowance for contractual adjustments related to our non-emergency transportation services operating segment that are recorded as adjustments to non-emergency transportation services revenue. Amount additionally includes impact from change in foreign currency rates.

(2) Write-offs, net of recoveries.

All other schedules are omitted because they are not applicable or the required information is shown in our financial statements or the related notes thereto.

(3) Exhibits

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K

(Mark One)

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2018

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to
Commission file number 001-34221

The Providence Service Corporation
(Exact name of registrant as specified in its charter)

Delaware	**86-0845127**
(State or other jurisdiction of incorporation or organization)	**(I.R.S. Employer Identification No.)**
700 Canal Street, Third Floor, Stamford, CT	**06902**
(Address of principal executive offices)	**(Zip code)**

Registrant's telephone number, including area code: (203) 307-2800

Securities registered pursuant to Section 12(b) of the Act:

Title of each Class	**Name of each exchange on which registered**
Common Stock, $0.001 par value per share	**The NASDAQ Global Select Market**

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. ☒ Yes ☐ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. ☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). ☒ Yes ☐ No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	☒	Accelerated filer	☐
Non-accelerated filer	☐ (Do not check if a smaller reporting company)	Smaller reporting company	☐
Emerging growth company	☐		

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ Yes ☒ No

The aggregate market value of the voting and non-voting common equity of the registrant held by non-affiliates based on the closing price for such common equity as reported on The NASDAQ Global Select Market on the last business day of the registrant's most recently completed second fiscal quarter (June 30, 2018) was $904.9 million.

As of February 22, 2019, there were outstanding 12,833,846 shares (excluding treasury shares of 4,973,552) of the registrant's Common Stock, $0.001 par value per share.

DOCUMENTS INCORPORATED BY REFERENCE

All or a portion of Items 10 through 14 in Part III of this Annual Report on Form 10-K are incorporated by reference to our definitive proxy statement on Schedule 14A for our 2019 stockholder meeting; provided that if such proxy statement is not filed on or before April 30, 2019, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

TABLE OF CONTENTS

PART IV

Part I

In this Annual Report on Form 10-K, the words the "Company", the "registrant", "we", "our", "us", "Providence" and similar terms refer to The Providence Service Corporation and, except as otherwise specified herein, to our subsidiaries. When such terms are used in reference to the Company's common stock, $0.001 par value per share (the "Common Stock"), and the Series A Convertible Preferred Stock, $0.001 par value per share (the "Preferred Stock"), they refer specifically to The Providence Service Corporation.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains certain statements that may be deemed "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), including statements related to the Company's strategies or expectations about revenues, liabilities, results of operations, cash flows, ability to fund operations, profitability, ability to meet financial covenants, contracts or market opportunities. The Company may also make forward-looking statements in other reports filed with the Securities and Exchange Commission (the "SEC"), in materials delivered to stockholders and in press releases. In addition, the Company's representatives may from time to time make oral forward-looking statements. In certain cases, you may identify forward looking-statements by words such as "may", "will", "should", "could", "expect", "plan", "project", "intend", "anticipate", "believe", "seek", "estimate", "predict", "potential", "target", "forecast", "likely", the negative of such terms or comparable terminology. In addition, statements that are not historical statements of fact should also be considered forward-looking statements. These forward-looking statements are based on the Company's current expectations, assumptions, estimates and projections about its business and industry, and involve risks, uncertainties and other factors that may cause actual events to be materially different from those expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to, the risks described under Item 1A in Part I of this Annual Report on Form 10-K.

You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statement was made. The Company is under no obligation to (and expressly disclaims any such obligation to) update any of the information in any forward-looking statement if such forward-looking statement later turns out to be inaccurate, whether as a result of new information, future events or otherwise.

Item 1. *Business.*

Overview

The Providence Service Corporation ("we", the "Company" or "Providence") owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States. The Company's NET Services segment, which primarily operates under the brands LogistiCare and Circulation, is the largest manager of non-emergency medical transportation ("NET") programs for state governments and managed care organizations ("MCOs") in the United States. On September 21, 2018, we completed the acquisition of Circulation, Inc. ("Circulation"), which offers a full suite of logistics solutions to manage NET programs across all areas of healthcare, powered by its HIPAA-compliant digital platform. Circulation's technology expands LogistiCare's capabilities to manage transportation benefits, integrating all transportation capabilities and emphasizing member convenience and satisfaction.

The Company's Matrix Investment segment consists of a minority investment in CCHN Group Holdings, Inc. and its subsidiaries ("Matrix"), a nationwide provider of home and mobile-based healthcare services for health plans in the United States, including comprehensive health assessments ("CHAs"), quality gap closure visits, "level of service" needs assessments, and post-acute and chronic care management, providing such services through a network of community-based clinicians, and a fleet of mobile health clinics with advanced diagnostics capabilities. On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a controlling equity interest in Matrix, with the Company retaining a non-controlling equity interest (the "Matrix Transaction"). Matrix's financial results prior to October 19, 2016 are presented as a discontinued operation.

The Company's Corporate and Other segment includes the Company's executive, accounting, finance, internal audit, tax, legal, public reporting, and corporate development functions, as well as the results of the Company's captive insurance company. On April 11, 2018, the Company announced an organizational consolidation plan to integrate substantially all activities and functions performed at the corporate holding company level into LogistiCare (the "Organizational Consolidation"). LogistiCare will retain its name and continue to be headquartered in Atlanta, GA, and the Company will continue to be named The Providence Service Corporation and be listed on The NASDAQ Global Select Market ("NASDAQ") under the ticker symbol "PRSC". The Organizational Consolidation process involves transferring all job responsibilities previously performed by employees of the

holding company to LogistiCare and closing the current corporate offices in Stamford, Connecticut and Tucson, Arizona. The Organizational Consolidation is expected to be complete by the end of the second quarter of 2019.

On December 21, 2018, we completed the sale of substantially all of the operating subsidiaries of our Workforce Development Services ("WD Services") segment to Advanced Personnel Management Global Pty Ltd of Australia ("APM") and APM UK Holdings Limited, an affiliate of APM, except for the segment's employment services operations in Saudi Arabia (the "WD Services Sale"). Our contractual counterparties in Saudi Arabia, including an entity owned by the Saudi Arabian government, assumed these operations beginning January 1, 2019.

On June 11, 2018, the Company entered into a Share Purchase Agreement to sell Ingeus France, which was part of our WD Services segment, for a de minimis amount. The sale was effective on July 17, 2018, after court approval. The financial results of WD Services prior to December 21, 2018 are presented as discontinued operations.

The Company is a Delaware corporation formed in 1996 and headquartered in Stamford, Connecticut.

Business Strategies

The Company's mission is to provide effective and quality NET services and logistics and to create shareholder value by pursuing and implementing six key strategies.

Centers of Excellence Operations Alignment

In January 2019, we reorganized the operational structure of our NET Services segment in order to centralize and reduce the layers in core functions that form the most significant elements of our cost base and drive performance for our clients and the members and patients they serve. Our operational structure now includes six Centers of Excellence ("COEs"): Transportation Network, Call Center Operations, Client Services, Technology, Growth and Process Improvement. We implemented this operational strategy to enhance the visibility, flexibility and control we have over our operations. The Transportation Network COE is focused on increases to capacity and improvements to quality and improvements designed to reduce cost and enhance the member experience. Within our Call Center Operations, activities such as contact center workflow standardization, cross skilling, and intensive operations management are aimed at improving employee productivity. We believe the new model for Client Services will bring a closer focus on local operations as well as holistic approaches to our customers and client retention. Our Technology COE will be coordinated and focused on the support of operations and the systematic roll out of the Circulation technology platform. Growth will continue to focus our sales, marketing and business development teams on the generation and delivery of new business. Finally, our Process Improvement COE will continue to support all of our other COE's in the pursuit of effective and efficient operations. We believe this new structure makes our scale more nimble and provides us with a competitive advantage.

Technology Transformation

On September 21, 2018, we completed the acquisition of Circulation to revolutionize our technology development capability, add to our executive team, extend our business model, and open new market opportunities. We believe that this technology allows us to reduce transportation as a barrier to care and that through the deployment of our new technology we are able to extend the size of the market that we can serve. In order to achieve our target synergies and enhance our operations, we plan to roll out Circulation's technology as our core workflow platform over the next 36 months. We have 21 operations centers that we expect to convert to the Circulation platform. Our plan is to convert several call centers in 2019, beginning in the second quarter, with a target to convert all sites by the end of 2021. Technology roll outs include a substantial amount of change management and will require careful risk mitigation policies to ensure smooth transitions. Our change management process is a core strength deeply embedded in our organization and will support a major change in the way we operate today, driving significant efficiencies and enhancing the member experience benefits to our clients.

Client and Member Satisfaction

Transportation related to care is one of the most impactful experiences contributing to our clients' members' and patients' satisfaction during their care encounter. At the core of our operational and technology strategies is a focus on driving client and member satisfaction. Our COEs' operational structure allows us to develop locally tailored network solutions with a higher level of visibility. Greater access to real time information, enabled through our technology, provides us the ability to shorten cycle times to identify and resolve client and member issues. We expect our clients to begin to realize benefits in the near term from our new organizational model and roll out of the Circulation technology platform.

Organic Growth

Across the healthcare market, we see an increasing understanding of the benefit of removing transportation as a barrier to care and a way to improve other determinants of health, such as access to food, shelter, socialization, and pharmacy. We believe that our scale, deep experience, operational strategy, and technology migration uniquely position us to address customer needs related to transportation of vulnerable populations. We approach sales, marketing and business development in a manner that is focused on driving market share in our core Medicaid market including states and MCOs, Medicare Advantage ("MA") plans, health systems and providers. Simultaneously, we target business development efforts with partners to enter new transportation markets, including the movement of home health providers, pharmacy delivery and beneficiaries of workers compensation. We expect there will be network effects as we serve more and more healthcare constituencies within a geography.

Inorganic Growth

We closely follow our core NET market and expansion markets mentioned above for tuck-in acquisition opportunities. We believe our experience, relationships in the industry, scale and executive team gives us the strongest position to be a consolidation platform in healthcare transportation. Our acquisition strategy may include an evaluation of new entrants, which may not be able to otherwise compete without the benefits of scale and experience, and closely-held businesses that may seek a new capital structure or sale to achieve liquidity for founders. With our balance sheet, strong team and track record, we believe we are a natural consolidator.

Smart Capital Allocation

The WD Services sale was a significant milestone in our strategy to focus our capital allocation priorities on the opportunities available to our NET Services segment. The NET Services segment has historically generated positive cash flows and our strong balance sheet provides us with optionality with respect to capital allocation and how we can best drive shareholder value. Our immediate focus in 2019 is to invest in our operations, including the roll-out of the Circulation technology to enhance client and member experience and drive operational efficiency. We will also continue to assess the opportunities for capital deployment in order to create value for shareholders, which may include dividends, share repurchases and/or acquisitions.

NET Services

Services offered. NET Services provides non-emergency transportation solutions to clients, including health systems, in 40 states and the District of Columbia. As of December 31, 2018, approximately 24.5 million individuals were eligible to receive our transportation services, and during 2018, NET Services managed approximately 52.6 million trips. NET Services accounts for all of our consolidated revenue from continuing operations going forward.

NET Services primarily contracts with state Medicaid programs and MCOs, including MA plans, (collectively "NET customers") for the coordination of their members' ("NET end-users") non-emergency transportation needs. NET end-users are typically Medicaid or Medicare eligible members, whose limited mobility or financial resources hinders their ability to access necessary healthcare and social services. We believe our transportation services enable access to care that not only improves the quality of life and health of the populations we serve, but also enables many of the individuals we serve to pursue independent living in their homes rather than in more expensive institutional care settings. In addition, studies have shown that missed medical appointments lessens patient compliance with clinical guidelines and leads to complications and expensive medical services. Through provider access to medical transportation, NET Services can save state Medicaid programs and MCOs significant amounts of money when used as part of a care management strategy for individuals with chronic illness. We believe we are uniquely positioned to partner with NET customers to provide these savings while improving the lives of the populations we serve.

NET Services program delivery is dependent upon a highly-integrated technology platform and business process as well as the management of a multifaceted network of subcontracted transportation providers. Our technology platform is purpose-built for the unique needs of our industry and is highly scalable, capable of supporting substantial growth in our clients' current and future membership base. In addition, our technology platform efficiently provides a broad interconnectivity among NET end-users, NET customers, and our network of transportation providers. We believe this technological capability and our industry experience uniquely position us as a future focal point in the evolving healthcare industry to introduce valuable population insights. In 2016 and 2017, we introduced service offerings and new technological features for NET end-users to improve service levels, lower costs and build the foundation for additional data analytics capabilities. In 2018, we acquired Circulation to provide additional technological improvements through their digital transportation platform. Circulation's technology allows for on-demand ride scheduling, eligibility assessment, benefits management, ride assignment and dispatch, real time ride tracking, network management and analytics.

To fulfill the transportation needs of NET end-users, we apply our proprietary technology platform to an extensive network of approximately 4,500 transportation resources. This includes our in-network roster of fully contracted transportation providers who operate sedans, wheelchair equipped vehicles, multi-passenger vans and ambulances. Our system also utilizes partnerships with on-demand transportation network companies, mass transit entities, mileage reimbursement programs, taxis and county-based emergency medical service providers. To promote safety, quality, and compliance, our in-network transportation providers undergo an in-depth credentialing and education process.

Our transportation management services also include fraud, waste, and abuse prevention and utilization review programs designed to monitor that our transportation services are provided in compliance with Medicaid and Medicare program rules and remediate issues that are identified. Compliance controls include ongoing monitoring, auditing and remediation efforts, such as validating NET end-user eligibility for the requested date of service and employing a series of gatekeeping questions to verify that the treatment type is covered and the appropriate mode of transportation is assigned. We also conduct post-trip confirmations of attendance directly with the healthcare providers for certain repetitive trips and we employ field monitors to inspect transportation provider vehicles and observe some transports in real time. Our claims validation process generally limits payment to trips that are properly documented, have been authorized in advance, and are billed at the pre-trip estimated amount. Our claims process is increasingly digital, which provides more protection to member protected health information and reduces the impact on the environment. Transportation providers are able to submit their bills and supporting documentation through a secured web portal directly to LogistiCare.

Revenue and customers. In 2018, contracts with state Medicaid agencies and MCOs represented 52.9% and 47.1%, respectively, of NET Services' revenue. NET Services derived 12.6%, 13.8% and 13.1% of its revenue from a single state Medicaid agency for the years ended December 31, 2018, 2017 and 2016, respectively. The next four largest NET Services customers in the aggregate comprised 21.4%, 22.3% and 22.6% of NET Services' revenue for the years ended December 31, 2018, 2017 and 2016, respectively.

Contracts with state Medicaid agencies are typically for three to five years with multiple renewal options. Contracts with MCOs continue until terminated by either party upon reasonable notice (as determined in accordance with the contract), and allow for regular price adjustments based upon utilization and transportation cost. As of December 31, 2018, 13.2% of NET Services revenue was generated under state Medicaid contracts that are subject to renewal within the next 12 months. In 2018, NET Services renewed contracts representing 32.4% of its revenue in such year.

79.2% of NET Services' revenue in 2018 was generated under capitated contracts where we assume the responsibility of meeting the covered healthcare related transportation requirements of a specific population based on per-member per-month fees for the number of members in the customer's program. Revenue is recognized based on the population served during the period. Under certain capitated contracts, known as reconciliation contracts, partial payment is received as a prepayment during the month service is provided. These partial payments may be due back to the customer, or additional payments may be due to the Company, after each reconciliation period, based on a reconciliation of actual utilization and cost compared to the prepayment made. 20.8% of NET Services' revenue was generated under other types of fee arrangements, including administrative services only, fee for service and cost plus (collectively "FFS") and flat fee contracts, under which fees are generated based upon billing rates for specific services or defined membership populations.

Seasonality. While revenue is generally fixed, primarily as a result of the capitated nature of the majority of our contracts, service expense varies based on the utilization of our services. The quarterly operating income and cash flows of NET Services normally fluctuate as a result of seasonal variations in the business, principally due to lower transportation demand during the winter season and higher demand during the summer season.

Competition. We compete with a variety of national organizations that provide similar healthcare and social services related transportation, such as Medical Transportation Management, Southeastrans, Veyo, and Access2Care, as well as local and regional providers. Most local competitors seek to win contracts for specific counties or small geographic territories whereas we and other larger competitors seek to win contracts for an entire state or large regional area. We compete based upon a number of factors, including our nationwide network, technical expertise, experience, service capability, service quality, and price.

Matrix Investment

Our Matrix Investment is comprised of our interest in Matrix. Since the completion of the Matrix Transaction, the Company has had a non-controlling equity interest in Matrix. The Company and an affiliate of Frazier Healthcare Partners (the "Frazier Subscriber"), which holds the controlling equity interest in Matrix, are party to the Second Amended and Restated Limited Liability Company Agreement (the "Operating Agreement") of Mercury Parent, LLC, the company through which the parties hold their equity interests in Matrix. The Operating Agreement sets forth certain terms and conditions regarding the ownership by the Company

and Frazier Subscriber of interests in Mercury Parent and their indirect ownership of common stock of Matrix, and provides for, among other things, certain liquidity and governance rights and other obligations and rights, in each case, on the terms and conditions contained therein.

At December 31, 2018, the Company owned a 43.6% non-controlling interest in Matrix. Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in our Health Assessment Services ("HA Services") segment. The Company's proportionate share of Matrix's net assets and financial results for the period following the closing of the Matrix Transaction are presented using the equity method. The assets, liabilities and financial results of Matrix for the period prior to the closing of the Matrix Transaction are presented within discontinued operations. For additional information regarding the Matrix Transaction, see Note 23, *Discontinued Operations,* to our consolidated financial statements.

Services offered. Matrix offers in-home care optimization services for members, including CHAs, through a national network of community-based clinicians and a fleet of mobile health clinics with advanced diagnostics capabilities. As of December 31, 2018, Matrix utilized a national network of approximately 3,500 clinical providers, including 1,800 nurse practitioners ("NPs"), located across 48 states, to provide its services primarily to members of Medicare Advantage ("MA") health plans.

Matrix expanded its provider network and service offerings through two acquisitions in 2017 and 2018. In December 2017, Matrix grew its clinical provider network through its acquisition of LP Health Services, a provider of quality and wellness visits on behalf of Medicaid/Duals managed care plans across the U.S., for a purchase price of $3.6 million. In February 2018, Matrix completed its acquisition of HealthFair, a leading operator of mobile clinics which offer preventative health assessment and advanced diagnostic testing services, including laboratory, ultrasound, EKG and mammography testing, for a purchase price of $155 million. Although to date the results of HealthFair have been below our expectations, we still believe the combination of the two organizations provides health plan members with more convenient access to important care management and preventative health services.

Matrix primarily generates revenue from CHAs, which obtain a health plan member's information related to health status, social, environmental and medical risks and help the MA plans improve the accuracy of such information. Matrix also operates a care management offering which provides additional data analytics and chronic care management services.

Matrix's services are dependent upon its technology platform which integrates the clinical provider network, operations infrastructure, call centers and clients. Matrix's platform is designed for the unique needs of its industry, is highly scalable and can support substantial growth. We believe Matrix's network and platform position Matrix as a future focal point in the evolving healthcare industry in the introduction of both additional population insights and care management services. With data provided by its health plan clients, Matrix utilizes analytics to determine which members it can most effectively lower costs and improve outcomes through face-to-face engagements with clinicians. Each program is customized and is served by a comprehensive team of case managers, nurse practitioners, registered nurses, and trained call center colleagues.

Revenue, customers and clients. As of December 31, 2018, Matrix's customers included 65 health plans, including for-profit multi-state health plans and non-profit health plans that operate in only one state or several counties within one state. For the year ended December 31, 2018, Matrix's top five customers accounted for 66.3% of its revenue, as its largest customer accounted for 31.5% of its revenue and its second largest customer accounted for 21.2% of its revenue. Matrix enters into annual or multi-annual contracts with its customers under which it is paid on a per assessment basis. However, volumes are not guaranteed under contracts and customers may choose to utilize other third party providers or in-source capabilities. A significant customer has indicated it intends to in-source certain services, which may result in a decrease in volume for Matrix.

Seasonality. Matrix attempts to perform CHAs evenly throughout the year to efficiently utilize NP capacity, although the timing of performance is driven by client demand.

Competition. We believe that Matrix and Signify Health are the largest independent providers of CHAs to the health plan market. There are many smaller competitors, such as EMSI Healthcare Services, MedXM, which was acquired by Quest Diagnostics on February 1, 2018, and Inovalon. In addition, some health plans in-source CHA services. Matrix's chronic care management competitors include Landmark Healthcare, PopHealthCare and Optum.

Employees

As of December 31, 2018, we had approximately 4,000 employees. None of our employees are members of a union. We believe we have good relationships with our employees.

Regulatory Environment

Overview

Our NET Services and Matrix Investment segments (the "Healthcare Segments") are subject to numerous U.S. federal, state and local laws, regulations and agency guidance (collectively, "Laws"). These Laws significantly affect the way in which these segments operate various aspects of their businesses. Our Healthcare Segments must also comply with state and local licensing requirements, state and federal requirements for participation in Medicare and Medicaid, requirements for contracting with MA plans, and contractual requirements imposed upon them by the federal, state and local agencies and third-party commercial customers to which they provide services. Failure to follow the rules and requirements of these programs can significantly affect our Healthcare Segments' ability to be paid for the services they provide and be authorized to provide services on an ongoing basis.

The Medicare and Medicaid programs are governed by significant and complex Laws. Both Medicare and Medicaid are financed, at least in part, with federal funds. Therefore, any direct or indirect recipients of those funds are subject to federal fraud, waste and abuse Laws. In addition, there are federal privacy and security Laws that govern the healthcare industry. State Laws primarily pertain to the licensure of certain categories of healthcare professionals and providers and the state's interest in regulating the quality of healthcare in the state, regardless of the source of payment, but may also include state Laws pertaining to fraud, waste and abuse, privacy and security Laws, and the state's regulation of its Medicaid program. Federal and state regulatory laws that may affect our Healthcare Segments' businesses, include, but are not limited to the following:

- false and other improper claims or false statements Laws pertaining to reimbursement;
- the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") and its privacy, security, breach notification and enforcement and code set regulations and guidance, along with evolving state Laws protecting patient privacy and requiring notifications of unauthorized access to, or use of, patient medical information;
- civil monetary penalties Law;
- anti-kickback Laws;
- the Stark Law and other self-referral, financial inducement, fee splitting, and patient brokering Laws;
- The Centers for Medicare and Medicaid Services ("CMS") regulations pertaining to Medicare as well as CMS releases applicable to the operation of MA plans, such as reimbursement rates, risk adjustment and data collection methodologies, adjustments to quality management measurements and other relevant factors; and
- state licensure laws.

A violation of certain of these Laws could result in civil and criminal damages and penalties, the refund of monies paid by government or private payors, our Healthcare Segments' exclusion from participation in federal healthcare payor programs, or the loss of our segments' license to conduct business within a particular state's boundaries.

Federal Law

Federal healthcare Laws apply in any case in which our Healthcare Segments are providing an item or service that is reimbursable or provide information to such segments' customers that results in reimbursement by a federal healthcare payor program to such segments or to them. The principal federal Laws that affect our Healthcare Segments' businesses include those that prohibit the filing of false or improper claims or other data with federal healthcare payor programs and those that prohibit unlawful inducements for the referral of business reimbursable under federal healthcare payor programs.

False and Other Improper Claims

Under the federal False Claims Act (31 U.S.C. §§ 3729-3733) and similar state Laws, the government may impose civil liability on our Healthcare Segments if they knowingly submit a false claim to the government or cause another to submit a false claim to the government, or knowingly make a false record or statement intended to get a false claim paid by the government. The False Claims Act defines a claim as a demand for money or property made directly to the government or to a contractor, grantee, or other recipient if the money is to be spent on the government's behalf or if the government will reimburse the contractor or grantee. Liability can be incurred for submitting (or causing another to submit) false claims with actual knowledge or for submitting false claims with reckless disregard or deliberate ignorance. Liability can also be incurred for knowingly making or using a false record or statement to receive payment from the federal government or for knowingly and improperly avoiding or decreasing an obligation to pay or transmit money or property to the government. Consequently, a provider need not take an affirmative action to conceal or avoid an obligation to the government, but the mere retention of an overpayment from the government could lead to potential liability under the False Claims Act.

Many states also have similar false claims statutes. In addition, healthcare fraud is a priority of the U.S. Department of Justice ("DOJ"), the Department of Health and Human Services ("DHHS"), its program integrity contractors and its Office of Inspector General, the Federal Bureau of Investigation and state Attorneys General. These agencies have devoted a significant amount of resources to investigating healthcare fraud.

If our Healthcare Segments are ever found to have violated the False Claims Act, they could be required to make significant payments to the government (including damages and penalties in addition to the return of reimbursements previously collected) and could be excluded from participating in federal healthcare programs or providing services to entities which contract with those programs. Although our Healthcare Segments monitor their billing practices for compliance with applicable laws, such laws are very complex, and they might not be able to detect all errors or interpret such laws in a manner consistent with a court or an agency's interpretation. While the criminal statutes generally are reserved for instances evidencing fraudulent intent, the civil and administrative penalty statutes are being applied by the federal government in an increasingly broad range of circumstances. Examples of the types of activities giving rise to liability for filing false claims include billing for services not rendered, misrepresenting services rendered (i.e., miscoding), applications for duplicate reimbursement and providing false information that results in reimbursement or impacts reimbursement amounts. Additionally, the federal government takes the position that a pattern of claiming reimbursement for unnecessary services violates these statutes if the claimant should have known that the services were unnecessary. The federal government also takes the position that claiming reimbursement for services that are substandard is a violation of these statutes if the claimant should have known that the care was substandard. Criminal penalties also are available even in the case of claims filed with private insurers if the federal government shows that the claims constitute mail fraud or wire fraud or violate any of the federal criminal healthcare fraud statutes.

State Medicaid agencies and state Attorneys General also have authority to seek criminal or civil sanctions for fraud and abuse violations. In addition, private insurers may bring actions under state false claim laws. In certain circumstances, federal and state laws authorize private whistleblowers to bring false claim or "qui tam" suits on behalf of the government against providers and reward the whistleblower with a portion of any final recovery. In addition, the federal government has engaged a number of private audit organizations to assist it in tracking and recovering claims for healthcare services that may have been improperly submitted.

Governmental investigations and whistleblower "qui tam" suits against healthcare companies have increased significantly in recent years, and have resulted in substantial penalties and fines and exclusions of persons and entities from participating in government healthcare programs. For more information on the risks related to a failure to comply with applicable government coding and billing rules, see "Risk Factors—Regulatory Risks—Our Healthcare Segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results."

Health Information Practices

Under HIPAA, DHHS issued rules to define and implement standards for the electronic transactions and code sets for the submission of transactions such as claims, and privacy and security of individually identifiable health information in whatever manner it is maintained.

The Final Rule on Enforcement of the HIPAA Administrative Simplification provisions, including the transaction standards, the security standards and the privacy rule, published by DHHS addresses, among other issues, DHHS's policies for determining violations and calculating civil monetary penalties, how DHHS will address the statutory limitations on the imposition of civil monetary penalties, and various procedural issues. The rule extends enforcement provisions currently applicable to the healthcare privacy regulations to other HIPAA standards, including security, transactions and the appropriate use of service code sets.

The Health Information Technology for Economic and Clinical Health Act ("HITECH"), enacted as part of the American Recovery and Reinvestment Act of 2009, extends certain of HIPAA's obligations to parties providing services to healthcare entities covered by HIPAA known as "business associates," imposes new notice of privacy breach reporting obligations, extends enforcement powers to state Attorneys General and amends the HIPAA privacy and security laws to strengthen the civil and criminal enforcement of HIPAA. HITECH establishes four categories of violations that reflect increasing levels of culpability, four corresponding tiers of penalty amounts that significantly increase the minimum penalty amount for each violation, and a maximum penalty amount of $1.5 million for all violations of an identical provision. With the additional HIPAA enforcement power under HITECH, the Office for Civil Rights of the DHHS and states are increasing their investigations and enforcement of HIPAA compliance. Our Healthcare Segments have taken steps to ensure compliance with HIPAA and we are monitoring compliance on an ongoing basis.

Additionally, the HITECH Final Rule imposes various requirements on covered entities and business associates, and expands the definition of "business associates" to cover contractors of business associates. Even when our Healthcare Segments are not operating as covered entities, they may be deemed to be "business associates" for HIPAA rule purposes of such covered entities. Our Healthcare Segments monitor their compliance obligations under HIPAA as modified by HITECH, and implement operational and systems changes, associate training and education, conduct risk assessments and allocate resources as needed. Any noncompliance with HIPAA requirements could expose such segments to the criminal and increased civil penalties provided under HITECH and require them to incur significant costs in order to seek to comply with its requirements or to remediate potential issues that may arise.

Federal and State Anti-Kickback Laws

Federal law commonly known as the "Anti-Kickback Statute" prohibits the knowing and willful offer, solicitation, payment or receipt of anything of value (direct or indirect, overt or covert, in cash or in kind) which is intended to induce: the referral of an individual for a service for which payment may be made by Medicare, Medicaid or certain other federal healthcare programs; or the ordering, purchasing, leasing, or arranging for, or recommending the purchase, lease or order of, any service or item for which payment may be made by Medicare, Medicaid or certain other federal healthcare programs.

Interpretations of the Anti-Kickback Statute have been very broad and under current Law, courts and federal regulatory authorities have stated that the Anti-Kickback Statute is violated if even one purpose (as opposed to the sole or primary purpose) of the arrangement is to induce referrals. Even bona fide investment interests in a healthcare provider may be questioned under the Anti-Kickback Statute if the government concludes that the opportunity to invest was offered as an inducement for referrals.

This act is subject to numerous statutory and regulatory "safe harbors." Compliance with the requirements of a safe harbor offers defenses against Anti-Kickback Statute allegations. Failure of an arrangement to satisfy all of the requirements of a particular safe harbor does not mean that the arrangement is unlawful. However, it may mean that such an arrangement will be subject to scrutiny by the regulatory authorities.

Many states, including some where our Healthcare Segments do business, have adopted anti-kickback laws that are similar to the federal Anti-Kickback Statute. Some of these state laws are very closely patterned on the federal Anti-Kickback Statute; others, however, are broader and reach reimbursement by private payors. If our Healthcare Segments' activities were deemed to be inconsistent with state anti-kickback or illegal remuneration laws, they could face civil and criminal penalties or be barred from such activities, any of which could harm such segments' businesses.

If our Healthcare Segments' arrangements are found to violate the Anti-Kickback Statute or applicable state laws, these segments, along with their clients would be subject to civil and criminal penalties, and these segments' arrangements would not be legally enforceable, which could materially and adversely affect their business. For more information on the risks related to failure to comply with applicable anti-bribery and anti-corruption regulations, see "Risk Factors—Regulatory Risks—Our segments' business could be subject to civil penalties and loss of business if we fail to comply with applicable bribery, corruption and other regulations governing business with governments."

Federal and State Self-Referral Prohibitions

Our Healthcare Segments may be subject to federal and state statutes banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship. Section 1877 of the Social Security Act, also known as the "Stark Law", prohibits physicians from making a "referral" for "designated health services" for Medicare (and in many cases Medicaid) patients from entities or facilities in which such physicians directly or indirectly hold a "financial relationship".

A financial relationship can take the form of a direct or indirect ownership, investment or compensation arrangement. A referral includes the request by a physician for, or ordering of, or the certifying or recertifying the need for, any designated health services.

Certain services that our Healthcare Segments provide may be identified as "designated health services" for purposes of the Stark Law. Such segments cannot provide assurance that future regulatory changes will not result in other services they provide becoming subject to the Stark Law's ownership, investment or compensation prohibitions in the future.

Many states, including some states where our Healthcare Segments do business, have adopted similar or broader prohibitions against payments that are intended to induce referrals of clients. Moreover, many states where such segments operate

have laws similar to the Stark Law prohibiting physician self-referrals. While our Healthcare Segments believe that they are operating in compliance with the Stark Law, there can be no guarantee that violations will not occur.

Healthcare Reform

On March 23, 2010, the President of the United States signed into law comprehensive health reform through the Patient Protection and Affordable Care Act (Pub. L. 11-148) ("PPACA"). On March 30, 2010, the President signed a reconciliation budget bill that included amendments to the PPACA (Pub. L. 11-152). These laws in combination form the "ACA" referred to herein. The changes to various aspects of the healthcare system in the ACA were far-reaching and included, among many others, substantial adjustments to Medicare reimbursement, establishment of individual mandates for healthcare coverage, extension of coverage to certain populations, expansion of Medicaid, restrictions on physician-owned hospitals, and increased efficiency and oversight provisions.

Some of the provisions of the ACA took effect immediately, while others will take effect later or will be phased in over time, ranging from a few months following approval to ten years. Due to the complexity of the ACA, it is likely that additional legislation will be considered and enacted. The ACA requires the promulgation of regulations that will likely have significant effects on the healthcare industry and third-party payors. Thus, the healthcare industry and our operations may be subjected to significant new statutory and regulatory requirements and contractual terms and conditions, and consequently to structural and operational changes and challenges.

The ACA also implemented significant changes to healthcare fraud and abuse laws that intensify the risks and consequences of enforcement actions. These included expansion of the False Claims Act by: (a) narrowing the public disclosure bar; and (b) explicitly stating that violations of the Anti-Kickback Statute trigger false claims liability. In addition, the ACA lessened the intent requirements under the Anti-Kickback Statute to provide that a person may violate the statute without knowledge or specific intent. The ACA also provided new funding and expanded powers to investigate fraud, including through expansion of the Medicare Recovery Audit Contractor ("RAC") program to Medicare Parts C and D and Medicaid and authorizing the suspension of Medicare and Medicaid payments to a provider of services pending an investigation of a credible allegation of fraud. Finally, the legislation created enhanced penalties for noncompliance, including increased criminal penalties and expansion of administrative penalties under Medicare and Medicaid. Collectively, such changes could have a material adverse impact on our Healthcare Segments' operations.

On January 20, 2017, the President of the United States issued an executive order that directed federal agencies to take steps to ensure the government's implementation of the ACA minimizes the burden on impacted parties (such as individuals and states). The underlying intent of the executive order was to take the first steps to repeal and replace the ACA. The executive order specifically instructed agencies to "waive, defer, grant exemptions from, or delay implementation of provisions" that place a "fiscal burden on any State" or that impose a "cost, fee, tax, penalty, or regulatory burden" on stakeholders including patients, providers, and insurers. The order stated that any changes should be made only to the extent "permitted by law" and should comply with the law governing administrative rule-making. The executive order did not, however, provide specifics on next steps or provisions that would be reexamined nor was it clear how the executive branch would be reconciled with Republican congressional efforts to repeal and replace the ACA or what portions of the ACA may continue in any replacement legislation. There are multiple pending legislative proposals to amend the ACA which, among other effects, could repeal all or parts of the ACA without replacing its extension of coverage to expansion populations. In addition, there are pending legislative proposals to materially restructure Medicaid and other government health care programs and there is litigation challenging, amongst other claims, the constitutionality of the ACA. Most recently, on December 14, 2018, a federal district court judge in Texas issued a widely anticipated opinion that struck down the entire ACA as unconstitutional. The judge ruled in favor of the plaintiffs by determining that the ACA's individual mandate is no longer a tax and is therefore an unconstitutional exercise of congressional authority. The judge also found that the individual mandate could not be severed from the rest of the ACA, rendering the entire ACA, not just the guaranteed issue and community rating provisions, unconstitutional. Sixteen states and the District of Columbia intervened as defendants in *Texas v. United States* to proffer a defense of the constitutionality of the ACA. The DOJ declined to defend the ACA on constitutional grounds. The intervenor defendant states have announced they will appeal the District Court's decision to the Fifth Circuit Court of Appeals. We are not able to predict the outcome of this matter nor are we able to predict the impact of a full or partial invalidation of the ACA.

In 2017, legislation was proposed in the U.S. Congress, but did not advance out of committee and was not passed, which would reduce or eliminate certain non-emergency medical transportation services provided by NET Services as a required Medicaid benefit. A similar proposal was made in 2018 by the President of the United States in a federal budget proposal. If additional privatization initiatives are not proposed or enacted, or if previously enacted privatization initiatives are challenged, repealed or invalidated, there could be a material adverse impact on our segments' operating results.

Surveys and Audits

Our Healthcare Segments' programs are subject to periodic surveys by government authorities or their contractors to ensure compliance with various requirements. Regulators conducting periodic surveys often provide reports containing statements of deficiencies for alleged failures to comply with various regulatory requirements. In most cases, if a deficiency finding is made by a reviewing agency, our segments will work with the reviewing agency to agree upon the steps to be taken to bring our program into compliance with applicable regulatory requirements. In some cases, however, an agency may take a number of adverse actions against a program, including:

- the imposition of fines or penalties or the recoupment of amounts paid;
- temporary suspension of admission of new clients to our program's service;
- in extreme circumstances, exclusion from participation in Medicaid, Medicare or other programs;
- revocation of our license; or
- contract termination.

While our Healthcare Segments believe that our programs are in compliance with Medicare, Medicaid and other program certification requirements and state licensure requirements, failure to comply with these requirements could have a material adverse impact on such segments' businesses and their ability to enter into contracts with other agencies to provide services.

Billing/claims Reviews and Audits

Agencies and other third-party commercial payors periodically conduct pre-payment or post-payment medical reviews or other audits of our Healthcare Segments' claims or other audits in conjunction with their obligations to comply with the requirements of Medicare or Medicaid. In order to conduct these reviews, payors request documentation from our Healthcare Segments and then review that documentation to determine compliance with applicable rules and regulations, including the eligibility of clients to receive benefits, the appropriateness of the care provided to those clients, and the documentation of that care. Any determination that such segments have not complied with applicable rules and regulations could result in adjustment of payments or the incurrence of fines and penalties, or in situations of significant compliance failures review or non-renewal of related contracts.

Corporate Practice of Medicine and Fee Splitting

Some states in which our Healthcare Segments operate prohibit general business entities, such as these segments, from "practicing medicine," which definition varies from state to state and can include employing physicians, as well as engaging in fee-splitting arrangements with these healthcare providers. Among other things, our Healthcare Segments currently contract with and employ NPs to perform CHAs. We believe that such segments have structured their operations appropriately; however, they could be alleged or found to be in violation of some or all of these laws. If a state determines that some portion of our Healthcare Segments' businesses violate these laws, it may seek to have such segments discontinue or restructure those portions of their operations or subject them to increased costs, penalties, fines, certain license requirements or other measures. Any determination that such segments have acted improperly in this regard may result in liability to them. In addition, agreements between the corporation and the professional may be considered void and unenforceable.

Professional Licensure and Other Requirements

Many of our Healthcare Segments' employees are subject to federal and state laws and regulations governing the ethics and practice of their professions. For example, our mid-level practitioners (e.g., NPs) are subject to state laws requiring physician supervision and state laws governing mid-level scope of practice. As physicians' use of mid-level practitioners increases, state governing boards are implementing more robust regulations governing mid-levels and their scope of practice under physician supervision. Our Healthcare Segments' ability to provide mid-level practitioner services may be restricted by the enactment of new state laws governing mid-level scope of practice and by state agency interpretations and enforcement of such existing laws. In addition, services rendered by mid-level practitioners may not be reimbursed by payors at the same rates as payors may reimburse physicians for the same services. Lastly, professionals who are eligible to participate in Medicare and Medicaid as individual providers must not have been excluded from participation in government programs at any time. Our Healthcare Segments' ability to provide services depends upon the ability of their personnel to meet individual licensure and other requirements and maintain such licensure in good standing.

Additional Information

The Company's website at www.prscholdings.com provides access to its periodic reports, certain corporate governance documents, press releases, interim shareholder reports and links to its subsidiaries' websites. The Company makes available to the public on its website its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after it electronically files such material with, or furnishes such material to, the SEC. Copies are also available, without charge, upon request to The Providence Service Corporation, 700 Canal Street, Third Floor, Stamford, CT 06902, (203) 307-2800, Attention: Corporate Secretary. The information contained on our website is not part of, and is not incorporated by reference in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 1A. ***Risk Factors.***

You should consider and read carefully all of the risks and uncertainties described below, as well as other information included in this Annual Report on Form 10-K, including our consolidated financial statements and related notes. The risks described below are not the only ones facing us. The occurrence of any of the following risks or additional risks and uncertainties not presently known to us or that we currently believe to be immaterial could materially and adversely affect our business, financial condition and results of operations. This Annual Report on Form 10-K also contains forward-looking statements and estimates that involve risks and uncertainties. Our actual results could differ materially from those anticipated in any forward-looking statements as a result of specific factors, including the risks and uncertainties described below.

Risks Related to Our Business

There can be no assurance that our contracts will survive until the end of their stated terms, or that upon their expiration will be renewed or extended on satisfactory terms, if at all. Disruptions to, the early expiration of or the failure to renew our contracts could have a material adverse impact on our financial condition and results of operations.

Our NET Services contracts are subject to frequent renewal. For example, many of our state Medicaid contracts, which represented 52.9% of NET Services revenue for the year ended December 31, 2018, have terms ranging from three to five years and are typically subject to a competitive bidding process near the end of the term. NET Services also contracts with MCOs, which represented 47.1% of NET Services revenue for the year ended December 31, 2018. MCO contracts typically continue until terminated by either party upon reasonable notice (as determined in accordance with the contract). We cannot anticipate if, when or to what extent we will be successful in renewing our state Medicaid contracts or retaining our MCO contracts. As of December 31, 2018, 13.2% of NET Services revenue was generated under state Medicaid contracts that are subject to renewal within the next 12 months. Renewed contracts represented 32.4% of our NET Services revenue for the year ended December 31, 2018.

In addition, with respect to many of our state contracts, the payor may terminate the contract without cause, or for convenience, at will and without penalty to the payor, either immediately or upon the expiration of a short notice period in the event that, among other reasons, government appropriations supporting the programs serviced by the contract are reduced or eliminated.

We cannot anticipate if, when or to what extent a payor might terminate its contract with us prior to its expiration, or fail to renew or extend a contract with us. If we are unable to retain or renew our contracts, or replace lost contracts, on satisfactory terms our financial conditions and results of operations could be materially adversely affected. While we pursue new contract awards and also undertake efficiency measures, there can be no assurance that such measures will fully offset the impact of contracts that are not renewed or are canceled on our operating income and results of operations.

We obtain a significant portion of our business through responses to government requests for proposals and we may not be awarded contracts through this process in the future, or contracts we are awarded may not be profitable.

We obtain, and will continue to seek to obtain, a significant portion of our business from state government entities, which generally entails responding to a government request for proposals ("RFP"). To propose effectively, we must accurately estimate our cost structure for servicing a proposed contract, the time required to establish operations and submit the most attractive proposal with respect to both technical and price specifications. We must also assemble and submit a large volume of information within rigid and often short timetables. Our ability to respond successfully to RFPs will greatly affect our business. If we misinterpret bid requirements as to performance criteria or do not accurately estimate performance costs in a binding bid for an RFP, we will seek to correct such mistakes in the final contract. However, there can be no assurance that we will be able to modify the proposed contract and we may be required to perform under a contract that is not profitable.

If we fail to satisfy our contractual obligations, we could be liable for damages and financial penalties, which may place existing pledged performance and payment bonds at risk as well as harm our ability to keep our existing contracts or obtain new contracts and future bonds.

Our failure to comply with our contractual obligations could, in addition to providing grounds for immediate termination of the contract for cause, negatively impact our financial performance and damage our reputation, which, in turn, could have a material adverse effect on our ability to maintain current contracts or obtain new contracts. The termination of a contract for cause could, for instance, subject us to liabilities for excess costs incurred by a payor in obtaining similar services from another source. In addition, our contracts require us to indemnify payors for our failure to meet standards of care, and some of them contain liquidated damages provisions and financial penalties that we must pay if we breach these contracts, which amounts could be material. For example, the service commitment under one of our contracts could subject us to penalties if we do not utilize the

minimum level of services specified in such agreement. The total future minimum commitment was $28.7 million as of December 31, 2018. To the extent our actual use is less than the minimum commitment for a specified period, we may be subject to significant expense, without the benefit of corresponding revenue.

Our failure to meet contractual obligations could also result in substantial actual and consequential financial damages.

Any acquisition or integration that we undertake could disrupt our business, not generate anticipated results, dilute stockholder value or have a material adverse impact on our operating results.

Our growth strategy involves the evaluation of potential entry into complementary markets and service lines through acquisition, particularly with opportunities that may leverage the advantages inherent in our large-scale technology-enabled operations and networks. We have made acquisitions and anticipate that we will continue to consider and pursue strategic acquisition opportunities the success of which depends in part on our ability to integrate an acquired company into our business operations. For example, we completed the acquisition of Circulation in September 2018 and will utilize Circulation's technology platform to service our legacy or new customers, which will result in a decrease in the usage of our existing technology. As a result of the technology evaluation, we decided to terminate the development of our legacy LCAD NextGen technology ("NextGen"), resulting in an impairment charge in the fourth quarter of 2018 of $13.5 million. While preliminary implementation is on track, the work to deploy the Circulation technology platform is ongoing, and subject to the scalability of Circulation's technology platform to process similar levels of transactions as LogistiCare. In addition, the digitization of claims processing on the Circulation platform may have unintended financial impacts related to claim costs and working capital. To the extent we are unable to successfully integrate the Circulation acquisition, our results of operations may be adversely affected and anticipated synergies may not be realized. Integration of any acquired companies will place significant demands on our management, systems, internal controls and financial and physical resources. This could require us to incur significant expense for, among other things, hiring additional qualified personnel, retaining professionals to assist in developing the appropriate control systems and expanding our information technology infrastructure. The nature of our business is such that qualified management personnel can be difficult to find. Our inability to manage growth effectively could have a material adverse effect on our financial results.

There can be no assurance that the companies acquired will generate income or incur expenses at the historical or projected levels on which we based our acquisition decisions, that we will be able to maintain or renew the acquired companies' contracts, that we will be able to realize operating and economic efficiencies upon integration of acquired companies or that the acquisitions will not adversely affect our results of operations or financial condition.

We expect to continually review opportunities to acquire other businesses that would complement our current services, expand our markets or otherwise offer prospects for growth. In connection with our acquisition strategy, we could issue stock that would dilute existing stockholders' percentage ownership, or we could incur or assume substantial debt or contingent liabilities. Acquisitions involve numerous risks, including, but not limited to, the following:

- challenges and unanticipated costs assimilating the acquired operations;
- known and unknown legal or financial liabilities associated with an acquisition;
- diversion of management's attention from our core businesses;
- adverse effects on existing business relationships with customers;
- entering markets in which we have limited or no experience;
- potential loss of key employees of purchased organizations;
- incurrence of excessive leverage in financing an acquisition;
- failure to maintain and renew contracts and other revenue streams of the acquired business;
- costs associated with litigation or other claims arising in connection with the acquired company;
- unanticipated operating, accounting or management difficulties in connection with an acquisition; and
- dilution to our earnings per share.

There can be no assurance that we will be successful in overcoming problems encountered in connection with any acquisition or integration and our inability to do so could disrupt our operations and adversely affect our business. Our failure to address these risks or other problems encountered in connection with past or future acquisitions and investments could cause us to fail to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities and harm our business generally.

We may be unable to realize the benefits of any strategic initiatives that are adopted by the Company.

From time to time we may launch strategic initiatives to enhance shareholder value. For example, on April 11, 2018, we announced our Organizational Consolidation, which is expected to be completed in the middle of 2019. While we expect the

Organizational Consolidation to generate annual savings upon completion, implementation of the process will negatively impact earnings. There can be no assurance that the Organizational Consolidation will be completed in a timely fashion or at all, or that it will generate the expected cost savings. In addition, part of the rationale for the acquisition of Circulation was the ability to utilize its technology platform to generate substantial cost savings. Such cost savings require the deployment of technology and substantial changes to existing business processes. There can be no assurance as to whether any other strategic initiatives will be adopted, and the outcome of any current or future strategic initiatives is uncertain, including the roll out of the Circulation technology platform across our LogistiCare business.

Our investments in any joint ventures and unconsolidated entities could be adversely affected by our lack of sole decision-making authority, our reliance on our joint venture partners' financial condition, any disputes that may arise between us and our joint venture partners and our exposure to potential losses from the actions of our joint venture partners.

We currently hold a non-controlling interest in Matrix, which constitutes 28.2% of our consolidated assets. We do not have unilateral power to direct the activities that most significantly impact such business' economic performance. Our future growth may depend, in part, on future similar arrangements, any of which could be material to our financial condition and results of operations. These arrangements involve risks not present with respect to our wholly-owned subsidiaries, which may negatively impact our financial condition and results of operations or make the arrangements less successful than anticipated, including the following:

- we may be unable to take actions that we believe are appropriate but are opposed by our joint venture partners under arrangements that require us to cede or share decision-making authority over major decisions affecting the ownership or operation of the joint venture and any property owned by the joint venture, such as the sale or financing of the business or the making of additional capital contributions for the benefit of the business;
- our joint venture partners may take actions that we oppose;
- we may be unable to sell or transfer our interest in a joint venture to a third party if we fail to obtain the prior consent of our joint venture partners;
- our joint venture partners may become bankrupt or fail to fund their share of required capital contributions, which could adversely impact the joint venture or increase our financial commitment to the joint venture;
- our joint venture partners may have business interests or goals with respect to a business that conflict with our business interests and goals, including with respect to the timing, terms and strategies for investment, which could increase the likelihood of disputes regarding the ownership, management or disposition of the business;
- disagreements with our joint venture partners could result in litigation or arbitration that increases our expenses, distracts our officers and directors, and disrupts the day-to-day operations of the business, including the delay of important decisions until the dispute is resolved; and
- we may suffer losses as a result of actions taken by our joint venture partners with respect to our joint venture investments.

We derive a significant amount of our revenues from a few payors, which puts our financial condition and results of operations at risk. Any changes in the funding, financial viability or our relationships with these payors could have a material adverse impact on our financial condition and results of operations.

We generate a significant amount of our revenue from a few payors under a small number of contracts. For example, for the years ended December 31, 2018, 2017 and 2016, we generated 51.4%, 52.4% and 51.7%, respectively, of our consolidated revenue from continuing operations from ten payors. Additionally, the top five payors represented, in the aggregate, 34.0%, 36.1% and 35.6%, respectively, of revenue from continuing operations for the years ended December 31, 2018, 2017 and 2016. Additionally, a single payor related to Matrix represented 31.5%, 30.9% and 27.8% of Matrix revenue for the years ended December 31, 2018, 2017 and 2016, respectively. The loss of, reduction in amounts generated by, or changes in methods or regulations governing payments for our services under these contracts could have a material adverse impact on our revenue and results of operations. In addition, any consolidation of any of our private payors could increase the impact that any such risks would have on our revenue and results of operations.

If we fail to estimate accurately the cost of performing certain contracts, we may experience reduced or negative margins.

During 2018, 2017 and 2016, 79.2%, 77.9% and 78.3% of our NET Services revenue, respectively, was generated under capitated contracts with the remainder generated through FFS and flat fee contracts. Under most of NET Services' capitated contracts, we assume the responsibility of managing the needs of a specific geographic population by contracting out transportation services to local transportation companies on a per ride or per mile basis. We use "pricing models" to determine applicable contract rates, which take into account factors such as estimated utilization, state specific data, previous experience in the state or with similar services, the medically covered programs outlined in the contract, identified populations to be serviced, estimated volume,

estimated transportation provider rates and availability of mass transit. The amount of the fixed per-member, monthly fee is determined in the bidding process, but is predicated on actual historical transportation data for the subject geographic region as provided by the payor, actuarial work performed in-house as well as by third party actuarial firms and actuarial analysis provided by the payor. If the utilization of our services is more than we estimated, the contract may be less profitable than anticipated, or may not be profitable at all. Under our FFS contracts, we receive fees based on our interactions with government-sponsored clients. To earn a profit on these contracts, we must accurately estimate costs incurred in providing services. Our risk relating to these contracts is that our client population is not large enough to cover our fixed costs, such as rent and overhead. Our FFS contracts are not reimbursed on a cost basis and therefore, if we fail to estimate our costs accurately, we may experience reduced margins or losses on these contracts. Revenue under certain contracts may be adjusted prospectively if client volumes are below expectations. If we are unable to adjust our costs accordingly, our profitability may be negatively affected. In addition, certain contracts with state Medicaid agencies are renewable or extended at the state's option without an adjustment to pricing terms. If such renewed contracts require us to incur higher costs, including inflation or regulatory changes, than originally anticipated, our results of operations and financial condition may be adversely affected.

We may incur costs before receiving related revenues, which affect our liquidity.

When we are awarded a contract to provide services, we may incur expenses before we receive any contract payments. These expenses include leasing office space, purchasing office equipment, instituting information technology systems, development of supply chains and hiring personnel. As a result, in certain contracts where the payor does not fund program start-up costs, we may be required to make significant investments before receiving any related contract payments or payments sufficient to cover start-up costs. In addition, payments due to us from payors may be delayed due to billing cycles, which may adversely affect our liquidity. Moreover, any resulting mismatch in expenses and revenue could be exacerbated if we fail either to invoice the payor correctly or to collect our fee in a timely manner. Such amounts may exceed our available cash, and any resulting liquidity shortages may require additional financing, which may not be available on satisfactory terms, or at all. This could have a material adverse impact on our ongoing operations and our financial position.

Our business is subject to risks of litigation.

The services we provide are subject to lawsuits and claims. A substantial award payable by us could have a material adverse impact on our operations and cash flows, and could adversely affect our ability to continue to purchase appropriate liability insurance. We can be subject to claims for negligence or intentional misconduct (in addition to professional liability type claims) by an employee or a third party we engage to assist with the provision of services, including but not limited to claims arising out of accidents involving vehicle collisions, CHAs performed by Matrix, and various claims that could result from employees or contracted third parties driving to or from interactions with clients or while providing direct client services. We can be subject to employee-related claims such as wrongful discharge, discrimination or a violation of equal employment laws and permitting issues. While we attempt to insure against these types of claims, damages exceeding our insurance limits or outside our insurance coverage, such as a claim for fraud, certain wage and hour violations or punitive damages, could adversely affect our cash flow and financial condition.

We face risks related to attracting and retaining qualified employees and labor relations.

Our success depends, to a significant degree, on our ability to identify, attract, develop, motivate and retain highly qualified and experienced professionals who possess the skills and experience necessary to deliver high-quality services to our clients, with the continued contributions of our senior management being especially critical to our success. Our objective of providing the highest quality of service to our clients is a significant consideration when we evaluate the education, experience and qualifications of potential candidates for employment as direct care and administrative staff. A portion of our staff is professionals with requisite educational backgrounds and professional certifications. These employees are in great demand and are likely to remain a limited resource for the foreseeable future.

Our ability to attract and retain employees with the requisite experience and skills depends on several factors including, but not limited to, our ability to offer competitive wages, benefits and professional growth opportunities. While we have established programs to attract new employees and provide incentives to retain existing employees, particularly our senior management, we cannot assure you that we will be able to attract new employees or retain the services of our senior management or any other key employees in the future. Some of the companies with which we compete for experienced personnel may have greater financial, technical, political and marketing resources, name recognition and a larger number of clients and payors than we do, which may prove more attractive to employment candidates. The inability to attract and retain experienced personnel could have a material adverse effect on our business.

The performance of our business also depends on the talents and efforts of our highly skilled information technology professionals. For example, realization of the synergies related to our recent acquisition of Circulation relies heavily on our ability to deploy Circulation's technology platform across LogistiCare's existing operations, and competition for skilled information technology professionals can be intense. Our success depends on our ability to recruit, retain and motivate these individuals.

Effective succession planning is also important to our future success. If we fail to ensure the effective transfer of senior management knowledge and smooth transitions involving senior management, including the appointment of a permanent chief executive officer for the Company and the transition of several key management positions, resulting from the Organizational Consolidation, our ability to execute short and long-term strategic, financial and operating goals, as well as our business, financial condition and results of operations generally, could be adversely affected.

We may have difficulty successfully completing divestitures or exiting businesses.

As demonstrated most recently with the WD Services sale in 2018 and various other transactions involving WD Services, as well as the sale of a controlling interest in Matrix in 2016, we may dispose of all or a portion of our investments or exit businesses based on a variety of factors, including availability of alternative opportunities to deploy capital or otherwise maximize shareholder value as well as other strategic considerations. A divestiture or business termination could result in difficulties in the separation of operations, services, products and personnel, the diversion of management's attention, the disruption of our business and the potential loss of key employees and customers. A divestiture or business termination may be subject to the satisfaction of pre-closing conditions as well as to obtaining necessary regulatory approvals, which, if not satisfied or obtained, may prevent us from completing the disposition or business termination, whether or not the disposition or business termination has been publicly announced. A divestiture or business termination may also involve continued financial involvement in the divested assets and businesses, such as indemnities or other financial obligations, including continuing obligations to employees, in which the performance of the divested assets or businesses could impact our results of operations. Further, such divestitures may result in proceeds to us in an amount less than we expect or less than our assessment of the value of those assets. Any sale of our assets could result in a loss on divestiture. Any of the foregoing could adversely affect our financial condition and results of operations.

The indemnification provisions of acquisition and disposition agreements by which we have acquired or sold companies may result in liabilities.

We rely heavily on the representations and warranties and related indemnities provided to us by the sellers of acquired companies, including as they relate to creation, ownership and rights in intellectual property and compliance with laws and contractual requirements. However, the liability of the former owners is limited under the relevant acquisition agreements, and certain sellers may be unable to meet their indemnification responsibilities. Similarly, the purchasers of our divested operations may from time to time agree to indemnify us for operations of such businesses after the closing. We cannot be assured that any of these indemnification provisions will fully protect us, and as a result we may face unexpected liabilities that adversely affect our consolidated results of operations, financial condition and cash flows.

In addition, we have provided certain indemnifications in connection with the WD Services sale in 2018, the Matrix Transaction in 2016 and the Human Services Sale in 2015. To the extent we choose to divest other operations of our businesses in the future, we expect to provide certain indemnifications in connection with these divestitures. We may face liabilities in connection with these current or future indemnification obligations that may adversely affect our consolidated results of operations, financial condition and cash flows.

Our success depends on our ability to compete effectively in the marketplace.

We compete for clients and for contracts with a variety of organizations that offer similar services. Many organizations of varying sizes compete with us, including local not-for-profit organizations and community-based organizations, larger companies, organizations that currently provide or may begin to provide similar NET management services (including transportation network companies such as Uber and Lyft) and CHA providers. Some of these companies may have greater financial, technical, political, marketing, name recognition and other resources and a larger number of clients or payors than we do. In addition, some of these companies offer more services than we do. To remain competitive, we must provide superior services and performance on a cost-effective basis to our customers.

The market in which we operate is influenced by technological developments that affect cost-efficiency and quality of services, and the needs of our customers change and evolve regularly. Accordingly, our success depends on our ability to develop services that address these changing needs and to provide technology needed to deliver these services on a cost-effective basis. Our competitors may better utilize technology to change the way services in our industry are designed and delivered and they may be able to provide our customers with different or greater capabilities than we can provide, including better contract terms, technical

qualifications, price and availability of qualified professional personnel. In addition, new or disruptive technologies and methodologies by our competitors may make our services uncompetitive.

In conjunction with our ongoing efforts to improve cost-efficiency and the customer experience, in September 2018, we completed our acquisition of Circulation. We incurred costs associated with such acquisition and will also incur costs to implement the Circulation technology across LogistiCare's existing operations, but there is no guarantee that this will ultimately serve our business purposes or result in lower costs.

We have experienced, and expect to continue to experience, competition from new entrants into the markets in which we operate. Increased competition may result in pricing pressures, loss of or failure to gain market share or loss of or failure to gain clients or payors, any of which could have a material adverse effect on our operating results. Our business may also be adversely affected by the consolidation of competitors, which may result in increased pricing pressure or negotiating leverage with payors, or by the provision of our services by payors or clients directly, including through the acquisition of competitors.

We may be adversely affected by inadequacies in, or security breaches of, our information technology systems.

Our information technology systems are critically important to our operations and we must implement and maintain appropriate and sufficient infrastructure and systems to support growth and business processes. We provide services to individuals, including services that require us to maintain sensitive and personal client information, including information relating to their health, identification numbers and other identifying data. Therefore, our information technology systems store client information protected by numerous federal, state and foreign regulations. We also rely on our information technology systems (some of which are outsourced to third parties) to manage the data, communications and business processes for all other functions, including our marketing, sales, logistics, customer service, accounting and administrative functions. Further, our systems include interfaces to third-party stakeholders, often connected via the Internet. In addition, certain of our services or information related to our services are carried out or hosted within our customers' IT systems, and any failure or weaknesses in their IT systems may negatively impact our ability to deliver the services, for which we may not receive relief from contractual performance obligations or compensation for services provided. As a result of the data we maintain and third-party access, we are subject to increasing cybersecurity risks. The nature of our business, where services are often performed outside a secured location, adds additional risk.

If we do not allocate and effectively manage the resources necessary to build, sustain and protect an appropriate technology infrastructure, our business or financial results could be negatively impacted. Furthermore, computer hackers and data thieves are increasingly sophisticated and operate large scale and complex automated attacks and our information technology systems may be vulnerable to material security breaches (including the access to or acquisition of customer, employee or other confidential data), cyber-based attacks or other material system failures. Because the techniques used to obtain unauthorized access or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to implement adequate preventative measures sufficient to prevent a breach of our systems and protect sensitive data. Any breach of our data security could result in an unauthorized release or transfer of customer or employee information, or the loss of valuable business data or cause a disruption in our business. A failure to prevent, detect and respond in a timely manner to a major breach of our data security or to other cybersecurity threats could result in system disruption, business continuity issues or compromised data integrity. These events or any other failure to safeguard personal data could give rise to unwanted media attention, damage our reputation, damage our customer relationships and result in lost sales, fines or lawsuits. We may also be required to expend significant capital and other resources to protect against or respond to or alleviate problems caused by a security breach. If we are unable to prevent material failures, our operations may be impacted, and we may suffer other negative consequences such as reputational damage, litigation, remediation costs, a requirement not to operate our business until defects are remedied or penalties under various data privacy laws and regulations, any of which could detrimentally affect our business, financial condition and results of operations.

Failure to protect our client's privacy and confidential information could lead to legal liability, adversely affect our reputation and have a material adverse effect on our business, financial condition and results of operations.

We retain confidential information in our computer systems, including personal information about our customers, such as names, addresses, phone numbers, email addresses, identification numbers and payment account information. Malicious cyber- attacks to gain access to personal information affect many companies across various industries, including ours. Pursuant to federal and state laws, various government agencies have established rules protecting the privacy and security of personal information. In addition, most states have enacted laws, which vary significantly from jurisdiction to jurisdiction, to safeguard the privacy and security of personal information. An increasing number of states require that customers be notified if a security breach results in the inappropriate disclosure of personally identifiable customer information. Any compromise of the security of our systems that results in the disclosure of personally identifiable customer or employee information or inadvertent disclosure of any clients' personal information could damage our reputation, deter people from using our services, expose us to litigation, increase regulatory

scrutiny and require us to incur significant technical, legal and other expenses. In addition, data breaches impacting other companies, such as our vendors, may allow cybercriminals to obtain personally identifiable information about our customers. Cybercriminals may then use this information to, among other things, attempt to gain unauthorized access to our customers' accounts, which could have a material adverse effect on our reputation, business and results of operations or financial condition.

Failure to maintain or to develop further reliable, efficient and secure information technology systems would be disruptive to our operations and diminish our ability to compete and grow our business successfully.

We are highly dependent on efficient and uninterrupted performance of our information technology and business systems. These systems quote, process and service our business, and perform financial functions necessary for pricing and service delivery. These systems must also be able to undergo periodic modifications and improvements without interruptions or untimely delays in service. Additionally, our ability to integrate our systems with those of our clients is critical to our success. Our information systems rely on the commitment of significant financial and managerial resources to maintain and enhance existing systems as well as develop and create new systems to keep pace with continuing changes in information processing technology or evolving industry and regulatory requirements. However, we still rely on manual processes and procedures, including accounting, reporting and consolidation processes that may result in errors and may not scale proportionately with our business growth.

A failure or delay to achieve improvements in our information technology platforms could interrupt certain processes or degrade business operations and could place us at a competitive disadvantage. If we are unable to implement appropriate systems, procedures and controls, we may not be able to successfully offer our services and grow our business and account for transactions in an appropriate and timely manner, which could have an adverse effect on our business, financial condition and results of operations.

Our results of operations will continue to fluctuate due to seasonality.

Our operating results and operating cash flows normally fluctuate as a result of seasonal variations in our business. Due to higher demand in the summer months and lower demand in the winter months, coupled with a primarily fixed revenue stream based on a per-member, per-month payment structure, we normally experience lower operating margins in the summer and higher operating margins in the winter.

Our reported financial results could suffer if there is an impairment of long-lived assets.

We are required under generally accepted accounting principles in the United States of America ("GAAP") to review the carrying value of long-lived assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or significant declines in the observable market value of an asset. Where the presence or occurrence of those events indicates that an asset may be impaired, we assess its recoverability by determining whether the carrying value of the asset exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset. If such testing indicates the carrying value of the asset is not recoverable, we estimate the fair value of the asset using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets is less than carrying value, we record an impairment loss equal to the excess of the carrying value over the estimated fair value. The use of different estimates or assumptions in determining the fair value of our intangible assets may result in different values for those assets, which could result in an impairment or, in the period in which an impairment is recognized, could result in a materially different impairment charge. For example, we recorded an asset impairment charge of $14.2 million in 2018 related to NextGen.

In addition, goodwill may be impaired if the estimated fair value of one or more of our reporting units is less than the carrying value of the respective reporting unit. As a result of our growth, in part through acquisitions, goodwill and other intangible assets represent a significant portion of our assets. For example, goodwill generated in relation to the acquisition of Circulation was $40.0 million. We perform an analysis on our goodwill balances to test for impairment on an annual basis. Interim impairment tests may also be required in advance of our annual impairment test if events occur or circumstances change that would more likely than not reduce the fair value, including goodwill, of one or more of our reporting units below the reporting unit's carrying value. Such circumstances could include but are not limited to: (1) loss of significant contracts, (2) a significant adverse change in legal factors or in the climate of our business, (3) unanticipated competition, (4) an adverse action or assessment by a regulator or (5) a significant decline in our stock price.

As of December 31, 2018, the carrying value of goodwill, intangibles and property and equipment, net was $135.2 million, $26.1 million and $23.0 million, respectively. We continue to monitor the carrying value of these long-lived assets. If future

conditions are different from management's estimates at the time of an acquisition or market conditions change subsequently, we may incur future charges for impairment of our goodwill or intangible assets, which could have a material adverse impact on our results of operations and financial position.

Our use of a reinsurance program and insurance programs to cover certain claims for losses suffered and costs or expenses incurred could negatively impact our business.

We reinsured a substantial portion of our automobile, general liability, professional liability and workers' compensation insurance policies through May 15, 2017. Upon renewal of the policies, we made the decision to no longer reinsure these risks, although we continue to resolve claims under the historical policy years. Through February 15, 2011, one of our subsidiaries also insured certain general liability, automobile liability, and automobile physical damage coverage for independent third-party transportation providers. In the event that actual reinsured losses increase unexpectedly and substantially exceed actuarially determined estimated reinsured losses under the program, the aggregate of such losses could materially increase our liability and adversely affect our financial condition, liquidity, cash flows and results of operations.

In addition, under our current insurance policies, we are subject to deductibles, and thus retain exposure within these limits. In the event that actual losses within our deductible limits increase unexpectedly and substantially exceed our expected losses, the aggregate of such losses could materially increase our liability and adversely affect our financial condition, liquidity, cash flows and results of operations.

As the availability to us of certain traditional insurance coverage diminishes or increases in cost, we will continue to evaluate the levels and types of insurance coverage we include in our reinsurance and self-insurance programs, as well as the deductible limits within our traditional insurance programs. Any increase to these reinsurance and self-insurance programs or increases in deductible limits increases our risk exposure and therefore increases the risk of a possible material adverse effect on our financial condition, liquidity, cash flows and results of operations.

Inaccurate, misleading or negative media coverage could damage our reputation and harm our ability to maintain or procure contracts.

There is sometimes media coverage regarding services that we or our competitors provide or contracts that we or our competitors are a party to. Inaccurate, misleading or negative media coverage about us could harm our reputation and, accordingly, our ability to maintain our existing contracts or procure new contracts.

Regulatory Risks

Our Healthcare Segments conduct business in a heavily regulated healthcare industry. Compliance with existing Laws is costly, and changes in Laws or violations of Laws may result in increased costs or sanctions that could reduce our segments' revenue and profitability.

The U.S. healthcare industry is subject to extensive federal and state Laws relating to, among other things:

- professional licensure;
- conduct of operations;
- addition of facilities, equipment and services, including certificates of need;
- coding and billing related to our services; and
- payment for services.

Both federal and state government agencies have increased coordinated civil and criminal enforcement efforts related to the healthcare industry. Regulations related to the healthcare industry are extremely complex and, in many instances, the industry does not have the benefit of significant regulatory or judicial interpretation of those laws. The Patient Protection and Affordable Care Act, as well as the anticipated attempts to repeal all or portions of those laws by the President and Congress, has also introduced some degree of regulatory uncertainty as the industry does not know how the changes it introduced or changes to it will affect many aspects of the industry. Medicare and Medicaid anti-fraud and abuse laws prohibit certain business practices and relationships related to items and services reimbursable under Medicare, Medicaid and other governmental healthcare programs, including the payment or receipt of remuneration to induce or arrange for referral of patients or recommendation for the provision of items or services covered by Medicare or Medicaid or any other federal or state healthcare program. Federal and state Laws prohibit the submission of false or fraudulent claims, including claims to obtain reimbursement under Medicare and Medicaid. Our Healthcare Segments have implemented compliance policies to help assure their compliance with these regulations as they become effective; however, different interpretations or enforcement of these laws and regulations in the future could subject our practices to allegations

of impropriety or illegality or could require such segments to make changes in their facilities, equipment, personnel, services or the manner in which they conduct our business.

Changes in budgetary priorities of the government entities that fund the services our Healthcare Segments provide could result in our segments' loss of contracts or a decrease in amounts payable to them under their contracts.

Our Healthcare Segments' revenue is largely derived from contracts that are directly or indirectly paid or funded by government agencies. All of these contracts are subject to legislative appropriations and state or national budget approval, as well as changes to potential eligibility for services. The availability of funding under NET Services' contracts with state governments is dependent in part upon federal funding to states. Changes in Medicaid methodology may further reduce the availability of federal funds to states in which our Healthcare Segments provide services. The President of the United States and Congress have proposed various changes to the Medicaid program, including considering converting the Medicaid program to a block grant format or capping the federal contribution to state Medicaid programs to a fixed amount per beneficiary. CMS has invited states to submit requests for waivers to CMS that would allow states to reduce or eliminate the NET benefit for some populations. In response, several states have asked for and received temporary waivers of NET requirements for the Medicaid expansion or non-disabled adult population. In addition, in late 2018, DHHS published in the Unified Agenda its intention to revise the current regulations under which states are required to provide NET services for all Medicaid beneficiaries. The stated goal of this proposed rule is to provide states with greater flexibility as part of the administration's reform initiatives. It is possible that revised regulations could be issued in 2019 or 2020 making it optional for the states to provide NET services to certain populations. Such changes, individually or in the aggregate, could have a material adverse effect on our Healthcare Segments operations.

Among the alternative Medicaid funding approaches that states have explored are provider assessments as tools for leveraging increased Medicaid federal matching funds. Provider assessment plans generate additional federal matching funds to the states for Medicaid reimbursement purposes, and implementation of a provider assessment plan requires approval by CMS in order to qualify for federal matching funds. These plans usually take the form of a bed tax or a quality assessment fee, which were historically required to be imposed uniformly across classes of providers within the state, except that such taxes only applied to Medicaid health plans.

Changes to provider assessment opportunities, the Medicaid programs in states in which our Healthcare Segments operate or in the structure of the federal government's support for those programs can affect the amount of funds available in the programs our Healthcare Segments support. Because funding under our Healthcare Segments' contracts is dependent in part upon federal funding, such funding changes could have a significant effect upon such segments' businesses.

Currently, many of the U.S. states in which our segments operate are facing budgetary shortfalls or changes in budgetary priorities. While many of these states are dealing with budgetary concerns by shifting costs from institutional care to home and community based care such as we provide, there is no assurance that this trend will continue.

Consequently, a significant decline in government expenditures, shift of expenditures or funding away from programs that call for the types of services that we provide, or change in government contracting or funding policies could cause payors to terminate their contracts with our segments or reduce their expenditures under those contracts, either of which could have a negative impact on our segments' operating results.

Our Healthcare Segments are subject to regulations relating to privacy and security of patient and service user information. Failure to comply with privacy and security regulations could result in a material adverse impact on our segments' operating results.

There are numerous federal and state regulations addressing patient information privacy and security concerns. In particular, the federal regulations issued under HIPAA contain provisions that:

- protect individual privacy by limiting the uses and disclosures of patient information;
- require the implementation of security safeguards to ensure the confidentiality, integrity and availability of individually identifiable health information in electronic form; and
- prescribe specific transaction formats and data code sets for certain electronic healthcare transactions.

Compliance with state and federal laws and regulations is costly and requires our segment management to expend substantial time and resources which could negatively impact our segments' results of operations. Further, the HIPAA regulations and state privacy laws expose our segments to increased regulatory risk, as the penalties associated with a failure to comply or with information security breaches, even if unintentional, could have a material adverse effect on our segments' results of operations.

Our Healthcare Segments could be subject to actions for false claims or recoupment of funds pursuant to certain audits if they do not comply with government coding and billing rules, which could have a material adverse impact on our segments' operating results.

If our Healthcare Segments fail to comply with federal and state documentation, coding and billing rules, our segments could be subject to criminal or civil penalties, loss of licenses and exclusion from the Medicare and Medicaid programs, which could have a material adverse impact on our segments' operating results. In billing for our segments' services to third-party payors, our segments must follow complex documentation, coding and billing rules. These rules are based on federal and state laws, rules and regulations, various government pronouncements, and industry practice. Failure to follow these rules could result in potential criminal or civil liability under the federal False Claims Act, under which extensive financial penalties can be imposed or under various state statutes which prohibit the submission of false claims for services covered. Compliance failure could further result in criminal liability under various federal and state criminal or civil statutes. Our segments may be subject to audits conducted by our clients or their proxies that may result in recoupment of funds. In addition, our segments' clients may be subject to certain audits that may result in recoupment of funds from our clients that may, in turn, implicate our segments' services. Our segments' businesses could be adversely affected in the event such an audit results in negative findings and recoupment from or penalties to their customers.

Our Healthcare Segments' contracts are subject to stringent claims and invoice processing regimes which vary depending on the customer and nature of the payment mechanism. Government entities may take the position that if a transport cannot be matched to a healthcare event, or is conducted inconsistently with contractual, regulatory or even policy requirements, payment for such transport may be recouped by such customer.

While our Healthcare Segments carefully and regularly review their documentation, coding and billing practices, the rules are frequently vague and confusing and they cannot assure that governmental investigators, private insurers or private whistleblowers will not challenge their practices. Such a challenge could result in a material adverse effect on our Healthcare Segments' financial position and results of operations.

Our Healthcare Segments' business could be subject to civil penalties and loss of business if we fail to comply with applicable bribery, corruption and other regulations governing business with governments.

Our Healthcare Segments are subject to the federal Anti-Kickback Statute, which prohibits the offer, payment, solicitation or receipt of any form of remuneration in return for referring, ordering, leasing, purchasing or arranging for or recommending the ordering, purchasing or leasing of items or services payable by a federally funded healthcare program. Any of our Healthcare Segments' financial relationships with healthcare providers will be potentially implicated by this statute to the extent Medicare or Medicaid referrals are implicated. Violations of the Anti-Kickback Statute could result in substantial civil or criminal penalties, including criminal fines of up to $100,000 per violation, imprisonment of up to ten years, civil penalties under the Civil Monetary Penalties Law of up to $100,000 per violation, plus three times the remuneration involved, civil penalties under the False Claims Act of up to $22,363 for each claim submitted, plus three times the amounts paid for such claims and exclusion from participation in the Medicaid and Medicare programs. Any such penalties could have a significant negative effect on our Healthcare Segments' operations. Furthermore, the exclusion, if applied to such segments, could result in significant reductions in our revenues, which could materially and adversely affect such segments' businesses, financial condition and results of their operations. In addition, many states have adopted laws similar to the federal Anti-Kickback Statute with similar penalties.

Our Healthcare Segments' businesses could be adversely affected by future legislative changes that hinder or reverse the privatization of non-emergency transportation services.

The market for certain of our Healthcare Segments' services depends largely on government sponsored programs. These programs can be modified or amended at any time. Moreover, part of our growth strategy includes aggressively pursuing opportunities created by government initiatives to privatize the delivery of non-emergency transportation services. In 2017, legislation was proposed in the U.S. Congress, but not passed, which would reduce or eliminate certain non-emergency medical transportation services provided by NET Services as a required Medicaid benefit. If additional privatization initiatives are not proposed or enacted, or if previously enacted privatization initiatives are challenged, repealed or invalidated, there could be a material adverse impact on our Healthcare Segments' operating results.

Changes to the regulatory landscape applicable to Matrix could have a material adverse effect on our results of operations and financial condition.

The CHA services industry is primarily regulated by federal and state healthcare Laws and the requirements of participation and reimbursement of the MA Program established by CMS. From time to time, CMS considers changes to regulatory guidelines

with respect to prospective CHAs or the risk adjusted payment system applicable to Matrix's Medicare Advantage plan customers. CMS could adopt new requirements or guidelines that may, for example, increase the costs associated with CHAs, limit the opportunities and settings available to administer CHAs, or otherwise change the risk adjusted payment system in a way that would adversely impact our business. Further, changes in or adoption of new state laws governing the scope of practice of mid-level practitioners, or more restrictive interpretations of such laws, may restrict Matrix's ability to provide services using nurse practitioners. Any such implementation of additional regulations on the CHA industry by CMS or other regulatory bodies or further regulation of mid-level practitioners could have a material adverse impact on Matrix's revenues and margins, which could have a material adverse impact on our consolidated results of operations.

If our Healthcare Segments fail to comply with physician self-referral laws, to the extent applicable to our operations, they could experience a significant loss of reimbursement revenue.

Our Healthcare Segments may be subject to federal and state statutes and regulations banning payments for referrals of patients and referrals by physicians to healthcare providers with whom the physicians have a financial relationship and billing for services provided pursuant to such referrals if any occur. Violation of these federal and state laws and regulations, to the extent applicable to our Healthcare Segments' operations, may result in prohibition of payment for services rendered, loss of licenses, fines, criminal penalties and exclusion from Medicaid and Medicare programs. To the extent such segments do maintain such financial relationships with physicians, they rely on certain exceptions to self-referral laws that they believe will be applicable to such arrangements. Any failure to comply with such exceptions could result in the penalties discussed above.

As government contractors, our segments are subject to an increased risk of litigation and other legal actions and liabilities.

As government contractors, our segments are subject to an increased risk of investigation, criminal prosecution, civil fraud, whistleblower lawsuits and other legal actions and liabilities that are not as frequently experienced by companies that do not provide government sponsored services. Companies providing government sponsored services can also become involved in public inquiries which can lead to negative media speculation or potential cancellation or termination of contracts. Further, government contract awards are frequently challenged by the losing bidders leading to delays in contract start dates, rebids, or even loss of a previously awarded contract.

Our Healthcare Segments' businesses are subject to licensing regulations and other regulatory provisions, including provisions governing surveys and audits. Changes to, or violations of, these regulations could negatively impact our Healthcare Segments' revenues.

In many of the locations where our segments operate, they are required by local laws to obtain and maintain licenses. The applicable state and local licensing requirements govern the services our segments provide, the credentials of staff, record keeping, treatment planning, client monitoring and supervision of staff. The failure to maintain these licenses or the loss of a license could have a material adverse impact on our segments' businesses and could prevent them from providing services to clients in a given jurisdiction. Our Healthcare Segments' contracts are subject to surveys or audit by their payors or their clients. Our segments are also subject to regulations that restrict their ability to contract directly with a government agency in certain situations. Such restrictions could affect our segments' ability to contract with certain payors and clients, and could have a material adverse impact on our segments' results of operations.

Our Healthcare Segments' contracts are subject to audit and modification by the payors with whom our Healthcare Segments contract, at their sole discretion.

Our Healthcare Segments' businesses depend on their ability to successfully perform under various government funded contracts. Under the terms of these contracts, payors, government agencies or their proxy contractors can review our segments' compliance or performance, as well as our segments' records and general business practices at any time, and may, in their discretion:

- suspend or prevent our segments from receiving new contracts or extending existing contracts because of violations or suspected violations of procurement laws or regulations;
- terminate or modify our segments' existing contracts;
- reduce the amount our segments are paid under our existing contracts; or
- audit and object to our segments' contract related fees.

Any increase in the number or scope of audits could increase our segments' expenses, and the audit process may disrupt the day-to-day operations of our segments' businesses and distract their management. If payors have significant audit findings, or if they make material modifications to our segments' contracts, it could have a material adverse impact on our segments' results of operations.

Our estimated income taxes could be materially different from income taxes that we ultimately pay.

We are subject to income taxation in both the U.S. and, due to our ownership of international entities prior to the WD Services sale, 10 foreign countries, including specific states or provinces where we operate. Our total income tax provision is a function of applicable local tax rates and the geographic mix of our income from continuing and discontinued operations before taxes, which is itself impacted by currency movements. Consequently, the isolated or combined effects of unfavorable movements in tax rates, geographic mix, or foreign exchange rates could reduce our after-tax income.

Our total income tax provision is based on our income and the tax laws in the various jurisdictions in which we operate. Significant judgment and estimation is required in determining our annual income tax expense and in evaluating our tax positions and related matters. In the ordinary course of our business, there are many transactions and calculations for which the ultimate tax determinations are uncertain or otherwise subject to interpretation. In addition, we make judgments regarding the applicability of tax treaties and the appropriate application of transfer pricing regulations. In the event one taxing jurisdiction disagrees with another taxing jurisdiction with respect to the amount or applicability of a particular type of tax, or the amount or availability of a particular type of tax refund or credit, we could experience temporary or permanent double taxation and increased professional fees to resolve such taxation matters.

Our determination of our income tax liability is always subject to review by applicable tax authorities, and we have been audited by various jurisdictions in prior years. Although we believe our income tax estimates and related determinations are reasonable and appropriate, relevant taxing authorities may disagree. The ultimate outcome of any such audits and reviews could be materially different from the estimates and determinations reflected in our historical income tax provisions and accruals. Any adverse outcome of any such audit or review could have an adverse effect on our financial condition and the results of our operations.

Risks Related to Our Indebtedness

Restrictive covenants in our Credit Agreement may limit our current and future operations, particularly our ability to respond to changes in our business or to pursue our business strategies.

The terms contained in the agreements that govern certain of our indebtedness, including our Amended and Restated Credit and Guaranty Agreement (as amended, supplemented, or modified, the "Credit Agreement"), and the agreements that govern any future indebtedness of ours, may include a number of restrictive covenants that impose significant operating and financial restrictions, including restrictions on our ability to take actions that we believe may be in our best interest. These agreements, among other things, limit our ability to:

- incur additional debt;
- provide guarantees in respect of obligations of other persons;
- issue redeemable stock and preferred stock;
- pay dividends or distributions or redeem or repurchase capital stock;
- make loans, investments and capital expenditures;
- enter into transactions with affiliates;
- create or incur liens;
- make distributions from our subsidiaries;
- sell assets and capital stock of our subsidiaries;
- make acquisitions; and
- consolidate or merge with or into, or sell substantially all of our assets to, another person.

A breach of the covenants or restrictions could result in a default under the applicable agreements that govern our indebtedness. Such default may preclude us from drawing from our senior secured credit facility (the "Credit Facility") or allow the creditors to accelerate the related debt and may result in the acceleration of any other debt that we may incur to which a cross acceleration or cross-default provision applies. In the event our lenders accelerate the repayment of our borrowings, we cannot assure that we and our subsidiaries would have sufficient assets to repay such indebtedness.

Loss of available financing or an inability to renew, repay or refinance our debt could have an adverse effect on our financial condition and results of operations.

At December 31, 2018, our available credit under the Credit Facility was $187.7 million. If our cash on hand is insufficient, or we are unable to generate sufficient cash flows in the future, to cover our cash flow and liquidity needs and service our debt, we may be required to seek additional sources of funds, including refinancing all or a portion of our existing or future debt,

incurring additional debt to maintain sufficient cash flow to fund our ongoing operating needs, pay interest and fund anticipated expenditures. In addition, the Credit Facility matures on August 2, 2019. There can be no assurance that any refinancing will be possible or that any additional financing could be obtained on acceptable terms. If we are unable to obtain additional financing, we may (i) be unable to satisfy our obligations under our outstanding indebtedness, (ii) be unable to pursue future business opportunities or fund acquisitions, (iii) find it more difficult to fund future operating costs, tax payments or general corporate expenditures and (iv) become vulnerable to adverse general economic, capital markets and industry conditions. Any of these circumstances could have a material adverse effect on our financial position, liquidity and results of operations.

We may incur substantial additional indebtedness in the future, which could impair our financial condition.

We may incur substantial additional indebtedness in the future to fund activities including but not limited to share repurchases, acquisitions, cash dividends and business expansion. Any existing and future indebtedness increases the risk that we may be unable to generate cash sufficient to pay amounts due in respect of such indebtedness. Future substantial indebtedness could have other important consequences on our business. For example, it could:

- make it more difficult for us to satisfy our obligations;
- make it more difficult to renew or enter into new contracts with existing and potential future clients;
- limit our ability to borrow additional amounts to fund working capital, capital expenditures, debt service requirements, execution of our business strategy or acquisitions and other purposes;
- require us to dedicate a substantial portion of our cash flow from operations to pay principal and interest on our debt, which would reduce the funds available to us for other purposes;
- restrict our ability to dispose of assets and use the proceeds from any such dispositions;
- restrict our ability to raise debt or equity capital to be used to repay other indebtedness when it becomes due;
- make us more vulnerable to adverse changes in general economic, industry and competitive conditions, as well as in government regulation and to our business;
- expose us to risks inherent in interest rate fluctuations because some of our borrowings are at variable rates of interest, which could result in higher interest expense in the event of increases in interest rates; and
- make it more difficult to satisfy our financial obligations.

Our ability to satisfy and manage our debt obligations depends on our ability to generate cash flow and on overall financial market conditions. To some extent, this is subject to prevailing economic and competitive conditions and to certain financial, business and other factors, many of which are beyond our control. Our business may not generate sufficient cash flow from operations to permit us to pay principal, premium, if any, or interest on our debt obligations. If we are unable to generate sufficient cash flow from operations to service our debt obligations and meet our other cash needs, we may be forced to reduce or delay capital expenditures, sell or curtail assets or operations, seek additional capital, or seek to restructure or refinance our indebtedness. If we must sell or curtail our assets or operations, it may negatively affect our ability to generate revenue.

Risks Related to Our Capital Stock

Our annual operating results and stock price may be volatile or may decline significantly regardless of our operating performance.

Our annual operating results and the market price for our Common Stock may fluctuate significantly in response to a number of factors, many of which we cannot control, including:

- changes in rates or coverage for services by payors;
- changes in Medicaid, Medicare or other U.S. federal or state rules, regulations or policies;
- market conditions or trends in our industry or the economy as a whole;
- increased competition in any of our segments, including through insourcing of services by our clients and new entrants to the market;
- other events or factors, including those resulting from war, incidents of terrorism, natural disasters or responses to these events;
- changes in tax law; and
- changes in accounting principles.

In addition, the stock markets, and in particular, NASDAQ, have experienced considerable price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. In the past, stockholders have instituted securities class action litigation following periods of market volatility. If we become involved in securities litigation, we could incur substantial costs, and our resources and the attention of management could be diverted from our business.

The Company depends on its subsidiaries for cash to fund all of its operations and expenses, including to make future dividend payments, if any.

Our operations are conducted entirely through our subsidiaries and our ability to generate cash to fund all of our operations and expenses, to pay dividends or to meet any debt service obligations is highly dependent on the earnings and the receipt of funds from our subsidiaries via dividends or intercompany loans. We do not currently expect to declare or pay dividends on our Common Stock for the foreseeable future; however, to the extent that we determine in the future to pay dividends on our Common Stock, none of our subsidiaries will be obligated to make funds available to us for the payment of dividends. Further, the agreement governing our Credit Agreement significantly restricts the ability of our subsidiaries to pay dividends, make loans or otherwise transfer assets to us. In addition, Delaware law may impose requirements that may restrict our ability to pay dividends to holders of our Common Stock.

If securities or industry analysts do not publish research or publish misleading or unfavorable research about our business, our stock price and trading volume could decline.

The trading market for our Common Stock will depend in part on the research and reports that securities or industry analysts publish about us or our business. If one or more analysts downgrade our stock or publish misleading or unfavorable research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, demand for our stock could decrease, which could cause our stock price or trading volume to decline.

Future sales of shares by existing stockholders could cause our stock price to decline.

Sales of substantial amounts of our Common Stock in the public market, or the perception that these sales could occur, could cause the market price of our Common Stock to decline. As of February 22, 2019, we had 12,833,846 outstanding shares of Common Stock which are freely transferable without restriction or further registration under the Securities Act, unless held by or purchased by our "affiliates" as that term is defined in Rule 144 under the Securities Act. Shares of our Common Stock held by or purchased by our affiliates are restricted securities within the meaning of Rule 144 under the Securities Act, but will be eligible for resale subject to applicable volume, means of sale, holding period and other limitations of Rule 144 under the Securities Act.

As of December 31, 2018, shares of our Preferred Stock were convertible into 2,010,045 shares of Common Stock. On May 5, 2018, we filed a registration statement under the Securities Act relating to (i) 3,574,300 shares of Common Stock, consisting of 1,653,755 shares of Common Stock and 1,920,545 shares of Common Stock issuable upon the conversion of shares of Preferred Stock and (ii) 765,916 shares of Preferred Stock, for the sale by Coliseum Capital Co-Invest, L.P., Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P. and Blackwell Partners, LLC - Series A (collectively, the "Coliseum Stockholders") of such securities, which was declared effective on June 15, 2018.

In August 2016, we filed a registration statement under the Securities Act to register additional shares of Common Stock to be issued under our equity compensation plans and, as a result, all shares of Common Stock acquired upon exercise of stock options granted under our plans will also be freely tradable under the Securities Act, unless purchased by our affiliates. As of December 31, 2018, there were stock options outstanding to purchase a total of 908,588 shares of our Common Stock and there were 52,131 shares of our Common Stock subject to restricted stock awards. In addition, 1,356,820 shares of our Common Stock are reserved for future issuances under the plan.

The terms of our Preferred Stock contain restrictive covenants that may impair our ability to conduct business and we may not be able to maintain compliance with the obligations under our outstanding Preferred Stock which could have a material adverse effect on our future results of operations and our stock price.

On February 11, 2015 and March 12, 2015, we issued $65.5 million and $15.8 million, respectively, of Preferred Stock. The terms of the Preferred Stock require us to pay mandatory quarterly dividends, either in cash or through an increase in the stated principal value of such stock. Our ability to satisfy and manage our obligations under our outstanding Preferred Stock depends, in part, on our ability to generate cash flow and on overall financial market conditions. Additionally, the terms of our Preferred Stock contain operating and financial covenants that limit management's discretion with respect to certain business matters. Among other things, these covenants, subject to certain limitations and exceptions, restrict our ability to incur additional debt, sell or otherwise dispose of our assets, make acquisitions, and merge or consolidate with other entities. As a result of these covenants and restrictions, we may be limited in how we conduct our business, which could have a material adverse effect on our future results of operations and our stock price.

Future offerings of debt or equity securities that would rank senior to our Common Stock, may adversely affect the market price of our Common Stock.

If, in the future, we decide to issue debt or equity securities that rank senior to our Common Stock, it is likely that such securities will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our Common Stock and may result in dilution to owners of our Common Stock. We and, indirectly, our stockholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, holders of our Common Stock will bear the risk of our future offerings reducing the market price of our Common Stock and diluting the value of their stock holdings in us.

Fulfilling our obligations incident to being a public company, including with respect to the requirements of and related rules under the Sarbanes-Oxley Act of 2002, is expensive and time-consuming, and any delays or difficulties in satisfying these obligations could have a material adverse effect on our future results of operations and our stock price.

We are subject to the reporting and corporate governance requirements, under the listing standards of NASDAQ and the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), that apply to issuers of listed equity, which impose certain significant compliance costs and obligations upon us. Being a publicly listed company requires a significant commitment of additional resources and management oversight resulting in increased operating costs. These requirements also place additional demands on our finance and accounting staff and on our financial accounting and information systems. Other expenses associated with being a public company include increases in auditing, accounting and legal fees and expenses, investor relations expenses, increased directors' fees and director and officer liability insurance costs, registrar and transfer agent fees and listing fees, as well as other expenses. As a public company, we are required, among other things, to define and expand the roles and the duties of our Board of Directors ("Board") and its committees and institute more comprehensive compliance and investor relations functions.

If we fail to maintain effective internal control over financial reporting in the future, the accuracy and timing of our financial reporting may be adversely affected. Preparing our consolidated financial statements involves a number of complex manual and automated processes, which are dependent upon individual data input or review and require significant management judgment. One or more of these elements may result in errors that may not be detected and could result in a material misstatement of our consolidated financial statements. If a material misstatement occurs in the future, we may fail to meet our future reporting obligations. For example, we may fail to file periodic reports in a timely manner or may need to restate our financial results, either of which may cause the price of our Common Stock to decline.

If the accounting estimates we make, and the assumptions on which we rely, in preparing our financial statements prove inaccurate, our actual results may be adversely affected.

Our financial statements have been prepared in accordance with GAAP. The preparation of these financial statements requires us to make estimates and judgments about, among other things, taxes, revenue recognition, contingent obligations, NET Services transportation expense, recoverability of long-lived assets and doubtful accounts. In addition, the implementation of ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which was effective for the Company beginning January 1, 2018, required a significant level of judgment and estimation. These estimates and judgments affect the reported amounts of our assets, liabilities, revenue and expenses, the amounts of charges accrued by us, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. If our estimates or the assumptions underlying them are not correct, we may need to accrue additional charges or reduce the value of assets that could adversely affect our results of operations, leading to a loss in investor confidence in our ability to manage our business and our stock price could decline.

Anti-takeover provisions in our second amended and restated certificate of incorporation and amended and restated by-laws could discourage, delay or prevent a change of control of our company and may affect the trading price of our Common Stock.

Our second amended and restated certificate of incorporation and amended and restated bylaws include a number of provisions that may be deemed to have anti-takeover effects, including provisions governing when and by whom special meetings of our stockholders may be called, and provisions that may discourage, delay or prevent a change in our management or control over us that stockholders may consider favorable. In addition, in the event of certain change of control transactions, holders of Preferred Stock may be entitled under the governing certificate of designations to be paid both (i) the liquidation preference per share then in effect plus certain unpaid dividends and (ii) a pro rata portion of the transaction consideration on an as-converted

basis. As a result of these provisions, holders of our Common Stock may not receive the full benefit of any premium to the market price of our Common Stock offered by a bidder in a takeover context.

Even in the absence of a takeover attempt, the existence of these provisions may adversely affect the prevailing market price of our Common Stock if the provisions are viewed as discouraging takeover attempts in the future. Our second amended and restated certificate of incorporation and amended and restated by-laws may also make it difficult for stockholders to replace or remove our management. These provisions may facilitate management entrenchment that may delay, deter, render more difficult or prevent a change in our control, which may not be in the best interests of our stockholders.

We do not expect to pay dividends on our Common Stock and, consequently, your ability to achieve a return on your investment will depend on appreciation in the price of our Common Stock.

We currently do not expect to declare and pay dividends on our Common Stock for the foreseeable future. We currently intend to invest our future earnings, if any, to fund our growth, to develop our business, for working capital needs and for general corporate purposes. Therefore, you are not likely to receive any dividends on your Common Stock for the foreseeable future and the success of an investment in shares of our Common Stock will depend upon any future appreciation in their value. There is no guarantee that shares of our Common Stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

Item 1B. ***Unresolved Staff Comments.***

None.

Item 2. ***Properties.***

Our principal executive office is located in Stamford, Connecticut. As of February 22, 2019, we leased space in approximately 40 locations. The lease terms vary and we believe are generally at market rates. We believe that our properties are adequate for our current business needs, and believe that we can obtain adequate space, if needed, to meet our foreseeable business needs.

Item 3. ***Legal Proceedings.***

From time-to-time, we may become involved in legal proceedings arising in the ordinary course of our business. We cannot predict with certainty the potential for or outcome of any future litigation. Regardless of the outcome of any particular litigation and the merits of any particular claim, litigation can have a material adverse impact on our company due to, among other reasons, any injunctive relief granted which could inhibit our ability to operate our business, amounts paid as damages or in settlement of any such matter, diversion of management resources and defense costs.

On January 21, 2019, the United States District Court for the Southern District of Ohio unsealed a qui tam complaint, filed in December 2015, against Mobile Care Group, Inc., Mobile Care Group of Ohio, LLC, Mobile Care EMS & Transport, Inc. and LogistiCare Solutions, LLC ("LogistiCare") by the relators Brandee White, Laura Cunningham, and Jeffery Wisier (the "Relators") alleging violations of the federal False Claims Act by presenting claims for payment to government healthcare programs knowing that the prerequisites for such claims to be paid had not been met. The Relators seek to recover damages, fees and costs under the federal False Claims Act including treble damages, civil penalties and attorneys' fees. In addition, the Relators seek reinstatement to their jobs with the Mobile Care entities. None of the Relators was employed by LogistiCare. Prior to January 21, 2019, LogistiCare had no knowledge of the complaint. The federal government has declined to intervene against LogistiCare. The Company intends to defend the litigation vigorously and believes that the case will not have a material adverse effect on its business, financial condition or results of operations.

Item 4. ***Mine Safety Disclosures.***

Not applicable.

PART II

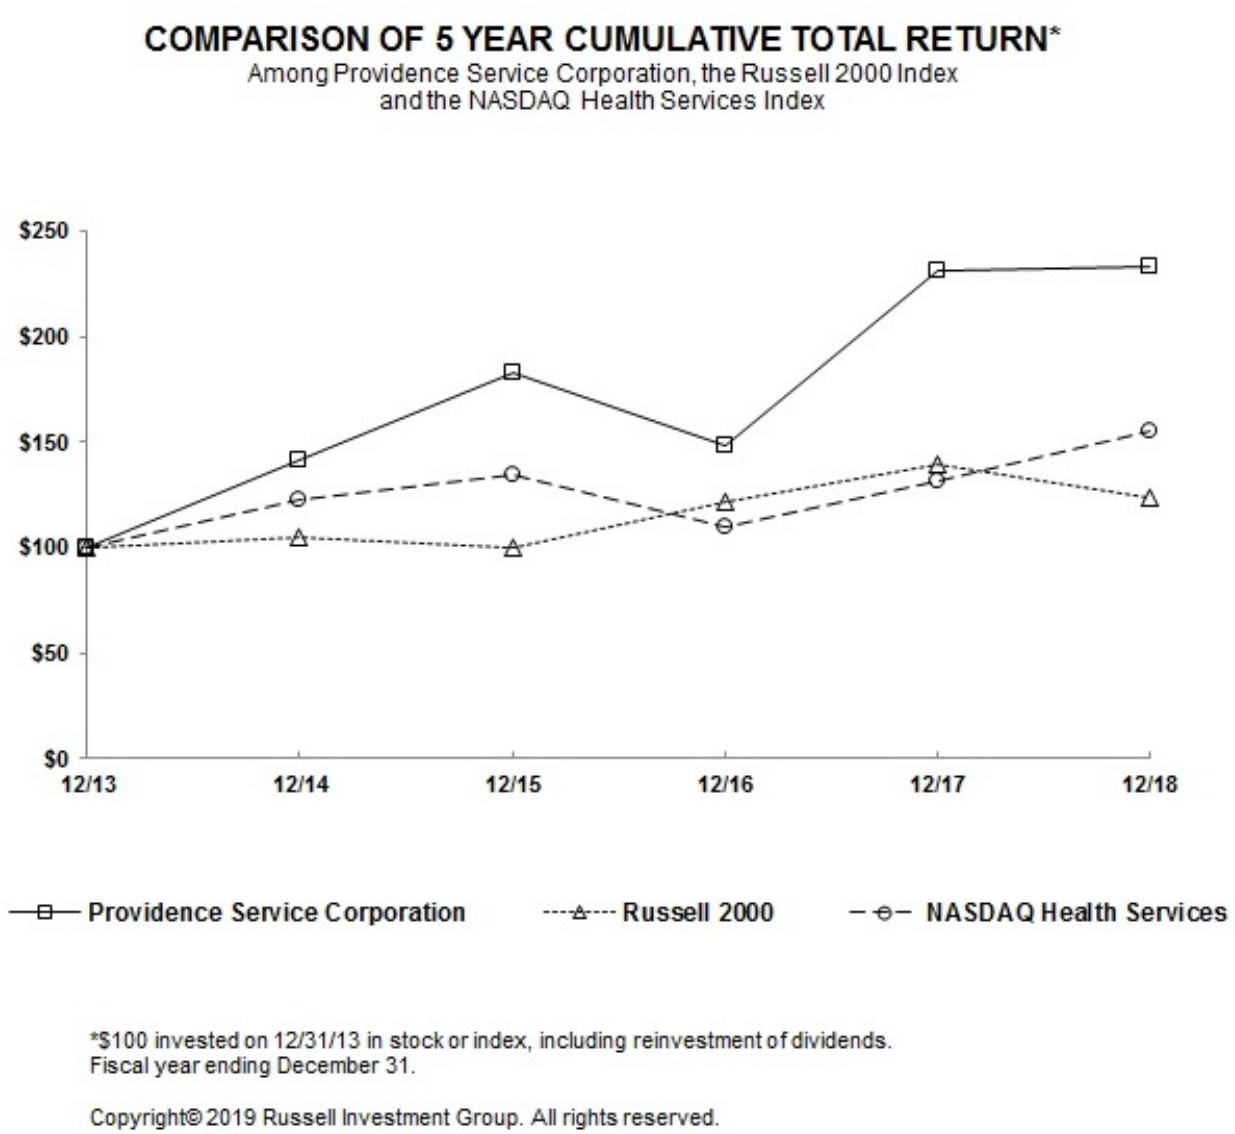
Item 5. ***Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

Market for our Common Stock

Our Common Stock, our only class of common equity, has been quoted on NASDAQ under the symbol "PRSC" since August 19, 2003. Prior to that time there was no public market for our Common Stock. As of February 22, 2019, there were 26 holders of record of our Common Stock.

Stock Performance Graph

The following graph shows a comparison of the cumulative total return for our Common Stock, NASDAQ Health Services Index and Russell 2000 Index assuming an investment of $100 in each on December 31, 2013.



Dividends

We have not paid any cash dividends on our Common Stock and currently do not expect to pay dividends on our Common Stock. In addition, our ability to pay dividends on our Common Stock is limited by the terms of our Credit Agreement and our Preferred Stock. The payment of future cash dividends, if any, will be reviewed periodically by the Board and will depend upon,

among other things, our financial condition, funds from operations, the level of our capital and development expenditures, any restrictions imposed by present or future debt or equity instruments, and changes in federal tax policies, if any.

Issuer Purchases of Equity Securities

Period	Total Number of Shares of Common Stock Purchased (1)	Average Price Paid per Share	Total Number of Shares of Common Stock Purchased as Part of Publicly Announced Program (2)	Maximum Dollar Value of Shares of Common Stock that May Yet Be Purchased Under Program (2) (in thousands)
Fourth quarter:				
October 1, 2018 to October 31, 2018	—	$ —	—	$ 81,177
November 1, 2018 to November 30, 2018	226	$ 67.66	—	$ 81,177
December 1, 2018 to December 31, 2018	968	$ 65.70	—	$ 81,177
Total	1,194	$ 66.07	—	

(1) Includes shares that were acquired from employees in connection with the settlement of income tax and related benefit withholding obligations arising from vesting in restricted stock awards.

(2) On October 26, 2016, our Board authorized a new repurchase program, under which the Company may repurchase up to $100.0 million in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. Through October 26, 2017, a total of 770,808 shares were purchased through this plan for $30.4 million, excluding commission payments.

On November 2, 2017, our Board approved the extension of the Company's prior stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Subsequently, on March 29, 2018, the Board authorized an increase in the amount available for stock repurchases under the Company's existing stock repurchase program by $77.8 million, and extended the existing stock repurchase program through June 30, 2019. Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at the discretion of the Company's officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements. As of December 31, 2018, a total of 1,018,989 shares were purchased through the extended plan approved on November 2, 2017, for $66.3 million, excluding commission payments. For additional information, see Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources".

Item 6. ***Selected Financial Data.***

We have derived the following selected financial data from the consolidated financial statements and related notes. The information set forth below is not necessarily indicative of future results. This information should be read in conjunction with our consolidated financial statements and the related notes, and Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations", all of which are included elsewhere in this Annual Report on Form 10-K.

Significant transactions which occurred during the periods presented include the acquisition of Ingeus effective May 30, 2014, which primarily comprised our WD Services segment; the investment in Mission Providence, a joint venture in Australia, which commenced operations in 2014 but was sold on September 29, 2017; our equity interest in Matrix effective October 19, 2016, which was originally acquired on October 23, 2014, comprised our HA Services segment through October 19, 2016; and the acquisition of Circulation effective September 21, 2018, which is included in our NET Services segment. The operations of HA Services, Human Services, which was sold effective November 1, 2015, and WD Services, which was sold effective December 21, 2018, have been presented as discontinued operations for all periods presented.

(1) General and administrative expense for the year ended December 31, 2018 includes $1.7 million in acquisition costs related to the acquisition of Circulation and $8.4 million in restructuring and related costs related to the Organizational Consolidation.

(2) In conjunction with the acquisition of Circulation and an analysis of the technology capabilities and scalability of the Circulation platform, we determined we would not continue the development of our NextGen technology. We also determined we would not place any of the developed NextGen technology into service, and recorded an asset impairment charge of $13.5 million related to our NET Services segment during the fourth quarter of 2018. In addition, we had previously recorded an impairment charge of $0.7 million during the second quarter of 2018 in relation to the decision to abandon specific development work intended to synchronize data across applications of the proprietary NextGen systems, based on the determination of an alternative method to accomplish this task.

(3) On September 21, 2018, we acquired all of the outstanding equity of Circulation. The purchase price was comprised of cash consideration of $45.1 million paid to Circulation's equity holders (including holders of vested Circulation stock options), other than Providence. Our initial investment in Circulation was $3.0 million. As a result of the transaction, the fair value of this pre-acquisition interest increased to $9.6 million, and thus we recognized a gain of $6.6 million.

(4) On December 21, 2018, we completed the sale of our WD Services segment. Included in (loss) income from discontinued operations, net of tax, for 2018 is a loss, net of tax, on the WD Services sale of $1.1 million. We additionally sold our Ingeus France operations, effective July 17, 2018 and recorded a loss on the sale of $0.7 million. We also incurred an impairment charge of $9.2 million for the adjustment of the carrying value of the assets and liabilities of Ingeus France to its estimated fair value when it was initially recorded as held for sale during 2018, which is included in (loss) income from discontinued operations, net of tax.

(5) Other income for the year ended December 31, 2017 includes the receipt of the Haverhill Litigation settlement of $5.4 million. See further information on the Haverhill Litigation in Note 20, *Commitments and Contingencies,* in the accompanying consolidated financial statements.

(6) (Loss) income from discontinued operations, net of tax, for the year ended December 31, 2017 includes a gain on sale of equity investment of $12.4 million related to the sale of the Company's equity interest in Mission Providence. The investment in Mission Providence was part of the WD Services segment.

(7) (Loss) income from discontinued operations, net of tax, for the years ended December 31, 2017 and 2016 include losses of $6.0 million and $5.6 million, respectively, related to potential indemnification claims for our historical Human Services segment.

(8) The year ended December 31, 2017 includes a net tax benefit of $15.9 million related to the enactment of the Tax Reform Act (as defined below) during the fourth quarter of 2017 due to the re-measurement of deferred tax liabilities by Providence as a result of the reduction in the U.S. corporate tax rate. Providence realized a benefit of $19.3 million, partially offset by $3.4 million of increased tax expense resulting from additional equity in net gain of Matrix, due to Matrix's re-measurement of its deferred tax liabilities. In addition, the tax provision was adversely impacted by tax expense of $3.6 million related to the Company's 2015 Holding Company LTI Program (the "HoldCo LTIP"), for which expense was incurred for financial

reporting purposes, but no shares were issued due to the market condition of the award not being satisfied and thus no tax deduction was realized.

(9) On October 19, 2016, we completed the Matrix Transaction. Included in (loss) income from discontinued operations, net of tax, for 2016 is a gain on the transaction, net of tax, totaling $109.4 million. In conjunction with the completion of this transaction, we fully repaid the amounts outstanding on our term loans and Credit Facility in 2016.

(10) On November 1, 2015, we completed the sale of our Human Services segment. Included in (loss) income from discontinued operations, net of tax, for 2015 is a gain on the sale of the Human Services segment, net of tax, totaling $100.3 million.

(11) Equity in net (gain) loss of investees relates to Matrix, which became an equity investment upon the completion of the Matrix Transaction. We recorded $6.2 million in equity in net loss of investees and $13.4 million in equity in net gain of investees in 2018 and 2017, respectively. We recorded $1.8 million in equity in net loss of investees for the period of October 19, 2016 through December 31, 2016. The equity in net gain from Matrix for the year ended December 31, 2017 includes a benefit of $13.6 million related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. As a result of the increased equity income, Providence incurred higher tax expense of $3.4 million, which is reflected as a component of “Provision for income taxes” in the table above. The investment in Matrix at December 31, 2018 of $161.5 million is included in “Equity investments” in our consolidated balance sheet.

(12) 2014 includes $4.5 million of financing fees that were deferred and fully expensed within interest expense in the fourth quarter of 2014 in relation to bridge financing commitments and $3.0 million of third-party financing fees that are included in general and administrative expense.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with Item 6. "Selected Financial Data" and our consolidated financial statements and related notes included in Item 8. "Financial Statements and Supplementary Data" of this report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and other factors that may cause actual results to differ materially from those projected in any forward-looking statements, as discussed in "Disclosure Regarding Forward-Looking Statements". These risks and uncertainties include but are not limited to those set forth in Item 1A. "Risk Factors".

Overview of Our Business

Please refer to *Item 1. "Business"* of this Annual Report on Form 10-K for a discussion of our services and corporate strategy.

We own subsidiaries and investments primarily engaged in the provision of healthcare services in the United States. Our NET Services segment, which primarily operates under the brands LogistiCare and Circulation, is the largest manager of NET programs for state governments and MCOs in the United States. On September 21, 2018, we completed the acquisition of Circulation, which offers a full suite of logistics solutions to manage NET programs across all areas of healthcare, powered by its HIPAA-compliant digital platform. Circulation's technology expands LogistiCare's capabilities to manage transportation benefits, integrating all transportation capabilities while proactively monitoring for fraud waste and abuse and emphasizing member convenience and satisfaction.

Our Matrix Investment segment consists of a minority investment in Matrix, a nationwide provider of home and mobile-based healthcare services for health plans in the United States, including CHAs, quality gap closure visits, "level of service" needs assessments, and post-acute and chronic care management, providing such services through a network of community-based clinicians and a fleet of mobile health clinics with advanced diagnostics capabilities.

Our Corporate and Other segment includes the Company's executive, accounting, finance, internal audit, tax, legal, public reporting, and corporate development functions, as well as the results of the Company's captive insurance company. On April 11, 2018, the Company announced the Organizational Consolidation. LogistiCare will retain its name and continue to be headquartered in Atlanta, GA, and the Company will continue to be named The Providence Service Corporation and be listed on NASDAQ under the ticker symbol "PRSC". The Organizational Consolidation is expected to be complete by the second quarter of 2019.

Business Outlook and Trends

Our performance is affected by a number of trends that drive the demand for our services. In particular, the markets in which we operate are exposed to various trends such as healthcare industry and demographic dynamics. Over the long term, we believe there are numerous factors that could affect growth within the industries in which we operate, including:

- an aging population, which will increase demand for healthcare services and transportation;
- a movement towards value-based versus fee for service care and budget pressure on governments, both of which may increase the use of private corporations to provide necessary and innovative services;
- increasing demand for in-home care provision, driven by cost pressures on traditional reimbursement models and technological advances enabling remote engagement;
- technological advancements, which may be utilized by us to improve service and lower costs, but also by others which may increase industry competitiveness; and
- proposals by the President of the United States and Congress to change the Medicaid program, including considering converting the Medicaid program to a block grant format or capping the federal contribution to state Medicaid programs to a fixed amount per beneficiary, and CMS' grant of waivers to states relative to the parameters of their Medicaid programs. Enactment of adverse legislation, regulation or agency guidance, or litigation challenges to ACA, state Medicaid programs, or other governmental programs may reduce the eligibility or demand for our services, our ability to conduct some or all of our business and/or reimbursement rates for services performed within our segments.

On December 21, 2018, the Company completed the WD Services Sale, except for the segment's employment services operations in Saudi Arabia. Our contractual counterparties in Saudi Arabia, including an entity owned by the Saudi Arabian government, assumed these operations beginning January 1, 2019. The total cash consideration from the sale was approximately $46.5 million, with the buyer retaining existing WD Services cash of $21.0 million. In addition to the purchase consideration, the

Company expects to be able to realize cash tax benefits of approximately $51.9 million as a result of the transaction, including approximately $34.3 million in tax refunds by the fourth quarter of 2019 in relation to its 2018 tax returns and loss carrybacks, which is inclusive of $0.6 million of tax that would have been otherwise due in the fourth quarter of 2018. The remaining cash tax benefit of $17.6 million is expected to be realized as an offset to tax payments over the following three years, based upon the Company's current estimate of taxable income. In addition, $1.1 million of benefits related to future capital loss is available, which amount was reserved as of December 31, 2018.

On September 21, 2018, the Company completed the acquisition of Circulation, which offers a full suite of logistics solutions to manage non-emergency transportation across all areas of healthcare, powered by its HIPAA-compliant digital platform. Circulation enables administration of transportation benefits, proactively monitors for fraud waste and abuse, and integrates all transportation capabilities, while emphasizing patient convenience and satisfaction. Circulation's proprietary platform simplifies ordering, improves reliability and efficiency, and reduces transportation spend. We believe the acquisition advances our central mission of reducing transportation as a barrier to healthcare, and will help deliver a differentiated user experience and provide a core technology and analytics platform that better positions us for growth. Following the acquisition and an analysis of the technology capabilities and scalability of the Circulation platform, we determined we will utilize the Circulation platform to service our legacy and new contracts, which resulted in an impairment charge of $13.5 million to NextGen. See further information on the impairment in Note 7, *Property and Equipment,* in the accompanying consolidated financial statements. Also, in connection with the acquisition of Circulation, the Company established a management incentive plan ("MIP"), whereby certain key employees of Circulation may be entitled to cash payments if certain financial measures are met based upon cumulative NET Services EBITDA; less the assumption of former Corporate and Other segment costs; less cumulative CAPEX ("MIP Financial Performance") for the performance period January 1, 2019 to December 31, 2021 as compared to the baseline, as determined by the Board. To the extent amounts are earned, the payout date is within 30 days following the finalization of the Company's audited financial statements for the fiscal year ending December 31, 2021. Payout is subject to the participant remaining employed by the Company through December 31, 2021. The amount that can be earned through the MIP ranges from $12.5 million to $237.5 million, based on a range of value of the MIP Financial Performance of $272.5 million to $395.5 million. As of December 31, 2018, the Company has accrued $1.4 million, reflected in "Other long-term liabilities" in the consolidated balance sheet, towards its estimate of the expected payout under the MIP.

On June 11, 2018, the Company entered into a Share Purchase Agreement to sell the shares of Ingeus France for a de minimis amount. The sale was effective on July 17, 2018, after court approval. As a result, an impairment charge of $9.2 million was recorded during the year ended December 31, 2018, and a loss, primarily related to the release of the effects of historic cumulative translation adjustments, of $0.7 million was recorded during the year ended December 31, 2018.

Revenues and Expenses

NET Services

NET Services primarily contracts with state Medicaid agencies and MCOs for the coordination of their members' non-emergency transportation needs. Most contracts are capitated, which means we are paid on a per-member, per-month basis for each eligible member. For most contracts, we arrange for transportation of members through our network of independent transportation providers, whereby we negotiate rates and remit payment to the transportation providers. However, for certain contracts, we assume no risk for the transportation network, credentialing and/or payments to these providers. For these contracts, we only provide administrative management services to support the customers' efforts to serve its clients.

Classification of Operating Expenses

Our "Service expense" line item includes the majority of the operating expenses of NET Services as well as our captive insurance company, with the exception of certain costs which are classified as "General and administrative expense". Service expense also excludes asset impairment charges and depreciation and amortization expenses. In the discussion below, we present the breakdown of service expense by the following major categories: purchased services, payroll and related costs, other operating expenses and stock-based compensation. Purchased services include the amounts we pay to third-party service providers and are typically dependent upon service volume. Payroll and related costs include all personnel costs of our segments. Other operating expenses include general overhead costs, excluding facilities and related charges, of our segments. Stock-based compensation represents the stock-based compensation expense associated with stock grants to employees of our segments.

Our "General and administrative expense" primarily includes the operating expenses of our corporate office, excluding depreciation and amortization, as well as acquisition related charges and facility related charges of NET Services.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that we believe are important in the preparation of our consolidated financial statements because they require that we use judgment and estimates in applying those policies. We prepare our consolidated financial statements and accompanying notes in accordance with GAAP. Preparation of the consolidated financial statements and accompanying notes requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements as well as revenue and expenses during the periods reported. We base our estimates on historical experience, where applicable, and other assumptions that we believe are reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions.

There are certain critical estimates that we believe require significant judgment in the preparation of our consolidated financial statements. We consider an accounting estimate to be critical if:

- it requires us to make an assumption because information was not available at the time or it included matters that were highly uncertain at the time the estimate is made; and
- changes in the estimate or different estimates that could have been selected may have had a material impact on our financial condition or results of operations.

For more information on each of these policies, see Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, to our consolidated financial statements. We discuss information about the nature and rationale for our critical accounting estimates below.

Accrued Transportation Costs

We accrue the cost of transportation expense within NET Services based on request for services and the amount we expect to be billed by transportation providers, as we generally only pay transportation providers for completed trips based upon documentation submitted after services have been provided. The transportation accrual requires significant judgment, as the accrual is based upon contractual rates and mileage estimates, as well as an estimated rate for unknown cancellations, as members may have requested transportation but not notified us of cancellation. Based upon historical experience and contract terms, we estimate the amount of expense incurred for invoices which have not yet been submitted as of period end. Actual expense could be greater or less than the amounts estimated due to changes in member or transportation provider behavior.

Business Combinations

We assign the value of the consideration transferred to acquire a business to the tangible assets and identifiable intangible assets acquired and liabilities assumed on the basis of their fair values at the date of acquisition. Any excess purchase price paid over the fair value of the net tangible and intangible assets acquired is allocated to goodwill. When determining the fair values of assets acquired and liabilities assumed, management makes significant estimates and assumptions, especially with respect to intangible assets. Critical estimates in valuing certain intangible assets include but are not limited to future expected cash flows from customer relationships, developed technology and trade names, and discount rates. Management's estimates of fair value are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable. As a result, actual results may differ significantly from estimates.

Recoverability of Goodwill and Definite-Lived Intangible Assets

Goodwill. In accordance with ASC 350, *Intangibles-Goodwill and Other*, we review goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. We perform the annual goodwill impairment test for all reporting units as of October 1.

First, we perform qualitative assessments for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value amount, we then perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value.

We adopted ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04") effective April 1, 2017. ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. Instead, if we deem it necessary to perform the quantitative goodwill impairment test in an annual or interim period, we recognize an impairment charge equal to the excess, if any, of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

Long-Lived Assets Including Intangibles. In accordance with ASC 360, *Property, Plant, and Equipment*, we review the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, we assess the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, we estimate the fair value of the asset or group of assets using appropriate valuation methodologies, which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, we record an impairment loss equal to the excess of the carrying value over the estimated fair value.

The use of different estimates or assumptions in determining the fair value of our goodwill and intangible assets may result in different values for those assets, which could result in an impairment or, in the period in which an impairment is recognized, could result in a materially different impairment charge.

Income Taxes

We record income taxes under the liability method. Deferred tax assets and liabilities reflect our estimation of the future tax consequences of temporary differences between the carrying amounts of assets and liabilities for book and tax purposes. We determine deferred income taxes based on the differences in accounting methods and timing between financial statement and income tax reporting. Accordingly, we determine the deferred tax asset or liability for each temporary difference based on the enacted tax rates expected to be in effect when we realize the underlying items of income and expense. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available to us for tax reporting purposes, as well as other relevant factors. We may establish a valuation allowance to reduce deferred tax assets to the amount we believe is more likely than not to be realized. Due to inherent complexities arising from the nature of our businesses, future changes in income tax law, tax sharing agreements or variances between our actual and anticipated operating results, we make certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

We record liabilities to address uncertain tax positions we have taken in previously filed tax returns or that we expect to take in a future tax return. The determination for required liabilities is based upon an analysis of each individual tax position, taking into consideration whether it is more likely than not that our tax position, based on technical merits, will be sustained upon examination. For those positions for which we conclude it is more likely than not it will be sustained, we recognize the largest amount of tax benefit that is greater than 50 percent likely of being realized upon ultimate settlement with the taxing authority. The difference between the amount recognized and the total tax position is recorded as a liability. The ultimate resolution of these tax positions may be greater or less than the liabilities recorded.

On December 22, 2017, the Tax Reform Act was enacted, which significantly changes U.S. tax law by, among other things, lowering corporate income tax rates, implementing a territorial tax system and imposing a repatriation tax on deemed repatriated earnings of foreign subsidiaries. The Tax Reform Act permanently reduces the U.S. corporate income tax rate from a maximum of 35% to a flat 21% rate, effective January 1, 2018. The Tax Reform Act also provides for a one-time deemed repatriation of post-1986 undistributed foreign subsidiary earnings and profits through the year ended December 31, 2017.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") to address the application of GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. We recognized the provisional tax impacts related to deemed repatriated earnings and the benefit for the revaluation of deferred tax assets and liabilities, and included these amounts in our consolidated financial statements for the year ended December 31, 2017. The financial

reporting impact of the Tax Reform Act was completed in the fourth quarter of 2018 and an additional benefit of $0.3 million was recorded.

Reinsurance and Self-Insurance Liabilities

We historically reinsured a substantial portion of our automobile, general and professional liability and workers' compensation costs under reinsurance programs through our wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona. In conjunction with the policy renewals on May 16, 2017, SPCIC did not renew the expiring policies. However, SPCIC continues to resolve claims under the historical policy years. In addition, under the current policies, the Company retains liability up to the policy deductibles. In addition, we maintain self-funded health insurance programs for employees with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims and for a maximum potential claim liability based on member enrollment. We utilize independent actuarial reports to determine the expected losses and in order to record the appropriate entries associated with our historical reinsurance programs, our retained exposure for the deductibles under our current policies, and self-funded health insurance programs. We regularly analyze our reserves for incurred but not reported claims, and for reported but not paid claims related to our reinsurance and self-funded insurance programs. We believe our reserves are adequate. However, significant judgment is involved in assessing these reserves such as evaluating historical paid claims, average lag times between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are recorded once a probable amount is known.

Revenue Recognition

NET Services provides non-emergency transportation services pursuant to contractual commitments over defined service delivery periods. For most contracts, NET Services arranges for transportation of members through its network of independent transportation providers, whereby it remits payment to the transportation providers. However, for certain contracts, NET Services only provides administrative management services to support the customers' efforts to serve its clients, and the amount of revenue recognized is based upon the management fee earned.

These contracts typically include single performance obligations under which NET Services stands ready to deliver management, fulfillment and record-keeping related to non-emergency transportation services. Transportation management services include, but are not limited to, fraud, waste, and abuse and utilization review programs as well as compliance controls. NET Services' performance obligations consist of a series of distinct services that are substantially the same and which are transferred to the customer in the same manner. In most cases, NET Services is the principal in its arrangements because it controls the services before transferring those services to the customer.

NET Services primarily uses the 'as invoiced' practical expedient to recognize revenue because it typically has the right to consideration from customers in an amount that corresponds directly with the value of its performance to date. This is consistent with NET Services' historical revenue recognition policy. NET Services recognizes revenue for some of its contracts that include variable consideration using a time-elapsed measure when the fees earned relate directly to services performed in the period. Because most contracts include termination for convenience clauses with required notice periods of less than one year, most NET Services contracts are deemed to be short-term in nature.

Some of NET Services' contracts include provisions whereby it must provide certain levels of service or face potential penalties or be required to refund fees paid by the customer. For those contracts, NET Services records a provision to reduce revenue to reflect the amount to which it expects it will ultimately be entitled.

Deferred Revenue

At times we may receive funding for certain services in advance of services being rendered. These amounts are reflected in the consolidated balance sheets as "Deferred revenue" until the services are rendered.

Stock-Based Compensation

Our primary forms of employee stock-based compensation are stock option awards and restricted stock awards, including certain awards which vest based upon performance conditions. We measure the value of stock option awards on the date of grant at fair value using the appropriate valuation techniques, including the Black-Scholes and Monte Carlo option-pricing models. We recognize the fair value as stock-based compensation expense on a straight-line basis over the requisite service period, which is typically the vesting period. The pricing models require various highly judgmental assumptions including volatility and expected option term. If any of the assumptions used in the models change significantly, stock-based compensation expense may differ materially in the future from that recorded in the current period. We do not record stock-based compensation expense net of

estimated forfeitures and the tax effects of awards are treated as discrete items in the period in which tax windfalls or shortfalls occur. See additional discussion included in Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, to our consolidated financial statements.

Our tax rate is subject to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes based upon the fair value of the award at the grant date.

Restructuring, Redundancy and Related Reorganization Costs

We accrue for severance and other employee separation costs when it is probable that benefits would be paid and the amounts are reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable and are included in accrued expenses to the extent they have not been paid.

Results of Operations

Segment reporting. Our operations are organized and reviewed by management along our segment lines. We operate in one principal business segment, NET Services. Our investment in Matrix is also a reportable segment referred to as the "Matrix Investment". Segment results are based on how our chief operating decision maker manages our business, makes operating decisions and evaluates operating performance. The operating results of our principal business segment include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by our corporate division on behalf of the segment, which primarily relate to insurance and stock-based compensation allocations. Indirect expenses, including unallocated corporate functions and expenses, such as executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company and elimination entries recorded in consolidation are reflected in "Corporate and Other".

Discontinued operations. During the periods presented, the Company completed the following transactions, which resulted in the presentation of the operations as Discontinued Operations.

- On November 1, 2015, the Company completed the sale of its Human Services segment. In addition to the results through the sale date, the Company has recorded additional expenses related to legal proceedings related to an indemnified legal matter.

- On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a 53.2% equity interest in Matrix with Providence retaining a 46.8% equity interest at the time of the transaction. Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in the Company's HA Services segment.

- On December 21, 2018, the Company completed the sale of substantially all of the operating subsidiaries of its WD Services segment to APM and APM UK Holdings Limited, an affiliate of APM, except for the segment's employment services operations in Saudi Arabia. The Company's contractual counterparties in Saudi Arabia, including an entity owned by the Saudi Arabian government, assumed these operations beginning January 1, 2019. Additionally, on June 11, 2018, the Company entered into a Share Purchase Agreement to sell Ingeus France for a de minimis amount. The sale was effective on July 17, 2018, after court approval.

Year ended December 31, 2018 compared to year ended December 31, 2017

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of operations for 2018 and 2017 (in thousands):

	Year ended December 31,			
	2018		2017	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,384,965	100.0 %	1,318,220	100.0 %
Operating expenses:				
Service expense	1,284,603	92.8 %	1,223,627	92.8 %
General and administrative expense	46,098	3.3 %	43,491	3.3 %
Asset impairment charge	14,175	1.0 %	—	— %
Depreciation and amortization	15,813	1.1 %	13,618	1.0 %
Total operating expenses	1,360,689	98.2 %	1,280,736	97.2 %
Operating income	24,276	1.8 %	37,484	2.8 %
Non-operating expense:				
Interest expense, net	1,783	0.1 %	1,204	0.1 %
Other income	—	— %	(5,363)	(0.4)%
Equity in net loss (gain) of investees	6,158	0.4 %	(13,445)	(1.0)%
Gain on remeasurement of cost method investment	(6,577)	(0.5)%	—	— %
Income from continuing operations before income taxes	22,912	1.7 %	55,088	4.2 %
Provision for income taxes	4,684	0.3 %	4,003	0.3 %
Income from continuing operations	18,228	1.3 %	51,085	3.9 %
(Loss) income from discontinued operations, net of tax	(37,053)	(2.7)%	2,735	0.2 %
Net (loss) income	(18,825)	(1.4)%	53,820	4.1 %
Net (income) loss from discontinued operations attributable to noncontrolling interest	(156)	— %	(451)	— %
Net (loss) income attributable to Providence	(18,981)	(1.4)%	53,369	4.0 %

Service revenue, net. Consolidated service revenue, net for 2018 increased $66.7 million, or 5.1%, compared to 2017 due to an increase in revenue of NET Services.

Total operating expenses. Consolidated operating expenses for 2018 increased $80.0 million, or 6.2%, compared to 2017. Operating expenses for 2018 compared to 2017 included an increase in expenses attributable to NET Services of $76.0 million and Corporate and Other of $4.0 million. NET Services' operating expenses include asset impairment charges of $14.2 million for 2018.

Operating income. Consolidated operating income for 2018 decreased $13.2 million compared to 2017 due to an increase in the operating loss for Corporate and Other of $4.0 million in 2018 as compared to 2017, and a decrease in operating income of NET Services in 2018 as compared to 2017 of $9.3 million.

Interest expense, net. Consolidated interest expense, net for 2018 increased $0.6 million, or 48.1%, compared to 2017, and remained consistent as a percentage of revenue. The increase was attributable to borrowings on the revolving line of credit during the second half of 2018 used to fund the Circulation acquisition, which were repaid as of December 31, 2018.

Other income. Other income in 2017 of $5.4 million represents the settlement received from the Haverhill Litigation.

Equity in net (gain) loss of investees. Our equity in net (gain) loss of investees for 2018 of $6.2 million represents equity in net loss for Matrix. Our equity in net gain of investees for 2017 of $13.4 million represents equity in net gain for Matrix. We began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction, and we record our ownership percentage of Matrix's profit or loss in net loss or gain of investees. Included in Matrix's 2018 full standalone net loss of $20.0 million (which is not consolidated with Providence's) are depreciation and amortization of $43.1 million, interest expense of $25.9 million, integration related costs of $6.5 million, equity compensation of $2.7 million, management fees paid to Matrix's shareholders of $4.9 million, merger and acquisition diligence related costs of $2.3 million and income tax benefit of $7.2 million. Included in Matrix's 2017 full standalone net income of $26.7 million (which is not consolidated with Providence's) are depreciation and amortization of $33.5 million, interest expense of $14.8 million, transaction bonuses and other transaction related costs of $3.5 million, equity compensation of $2.6 million, management fees paid to Matrix's shareholders of $2.3 million and income tax benefit of $29.6 million. Matrix's significant income tax benefit in 2017 primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act.

Gain on remeasurement of cost method investment. On September 21, 2018, we acquired all of the outstanding equity of Circulation. The purchase price was comprised of cash consideration of $45.1 million paid to Circulation's equity holders (including holders of vested Circulation stock options), other than Providence. Our initial investment in Circulation was $3.0 million. As a result of the transaction, the fair value of this pre-acquisition interest increased to $9.6 million, and thus we recognized a gain of $6.6 million.

Provision for income taxes. Our effective tax rate from continuing operations for 2018 was 20.4%. The effective tax rate was relatively consistent with the U.S. federal statutory rate of 21%, reflecting the benefit of stock option exercises and tax credits, partially offset by the impact of state income tax.

Our effective tax rate from continuing operations for 2017 was 7.3%. The effective tax rate was lower than the U.S. federal statutory rate of 35% primarily due to the impact of the Tax Reform Act. The tax provision includes a benefit of $15.9 million related to the enactment of the Tax Reform Act during the fourth quarter of 2017, consisting of a net tax benefit of $19.3 million from the re-measurement of deferred tax liabilities from the lower U.S. corporate tax rate, partially offset by additional tax expense of $3.4 million due to an increase in our equity in net gain of Matrix as a result of Matrix's re-measurement of deferred tax liabilities. In addition, the Company incurred tax expense of $3.6 million related to the HoldCo LTIP, for which expense was recorded for financial reporting purposes based upon fair value of the award at the grant date, but no shares were issued due to the market condition of the award not being satisfied. This tax expense was the result of the adoption of Accounting Standards Update No. 2016-09, *Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* ("ASU 2016-09"), which subjects our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes.

(Loss) income from discontinued operations, net of tax. (Loss) income from discontinued operations, net of tax, includes the activity of our former WD Services segment and our former Human Services segment. For 2018, the loss from discontinued operations, net of tax, for our former WD Services segment was of $37.0 million. Included in the loss was a loss on disposition, net of tax, of $1.8 million as well as an asset impairment charge of $9.2 million related to the sale of WD Services operations in France in the second quarter of 2018. For 2017, income from discontinued operations, net of tax for our WD Services segment was $8.7 million, which included a gain on sale of our equity interest in Mission Providence of $12.4 million.

For 2018, the loss from discontinued operations, net of tax for our Human Services segment was $0.1 million, which primarily reflects a reduction of the accrued settlement amount for indemnified legal matters, based on the final settlement agreement, offset by the related income tax impact. For 2017, the loss from discontinued operations, net of tax for our Human Services segment was $6.0 million, which primarily related to the accrual of a contingent liability of $9.0 million related to the settlement of indemnification claims and associated legal costs of $0.7 million, partially offset by a related tax benefit.

Net (income) loss from discontinued operations attributable to noncontrolling interests. Net (income) loss from discontinued operations attributable to noncontrolling interests primarily relates to a minority interest held by a third-party operating partner in our company servicing the offender rehabilitation contract in our historical WD Services segment.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2018 and 2017 (in thousands):

	Year Ended December 31,			
	2018		2017	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,384,965	100.0%	1,318,220	100.0%
Service expense	1,285,029	92.8%	1,227,426	93.1%
General and administrative expense	14,247	1.0%	11,779	0.9%
Asset impairment charge	14,175	1.0%	—	—%
Depreciation and amortization	15,026	1.1%	13,275	1.0%
Operating income	56,488	4.1%	65,740	5.0%

Service revenue, net. Service revenue, net for NET Services in 2018 increased $66.7 million, or 5.1%, compared to 2017. The increase was primarily related to the impact of new contracts, including managed care organization ("MCO") contracts in Illinois, Indiana, Oregon and New York and new state contracts in Texas and West Virginia, which contributed $112.8 million of revenue for 2018, as well as net increased revenue from existing contracts of $39.2 million, due to the net impact of membership and rate changes, including the impact of increased rates agreed after 2017 on certain contracts related to increased costs to serve the contracts, which was partially offset by the impact of a retroactive rate adjustment recorded in 2017 related to increased utilization activity under a significant contract. Revenue additionally increased $2.2 million due to revenue generated from Circulation in the fourth quarter of 2018. These increases were partially offset by the impact of contracts we no longer serve, including state contracts in New York and Connecticut, certain MCO contracts in Florida and Louisiana, and decreased membership in Virginia, which resulted in a decrease in revenue of $72.0 million. In addition, the adoption of ASC 606 resulted in a decrease in revenue of $15.5 million in 2018 as compared to revenue under the previous accounting standard, as one contract is now accounted for on a net basis.

Service expense. Service expense is comprised of the following for 2018 and 2017 (in thousands):

	Year Ended December 31,			
	2018		2017	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	1,055,278	76.2%	1,009,518	76.6%
Payroll and related costs	179,175	12.9%	165,666	12.6%
Other operating expenses	49,626	3.6%	51,720	3.9%
Stock-based compensation	950	0.1%	522	—%
Total service expense	1,285,029	92.8%	1,227,426	93.1%

Service expense for 2018 increased $57.6 million, or 4.7%, compared to 2017. The increase in service expense was primarily due to higher purchased services and payroll and related costs. Purchased services expense increased primarily as a result of new contracts, which was partially offset by the impact of terminated contracts. Purchased services as a percentage of revenue decreased from 76.6% in 2017 to 76.2% in 2018. This was due primarily to lower transportation costs on a per trip basis in certain geographies as a result of ongoing initiatives to better align the rates we pay to our transportation provider partners with local market conditions and the fees paid to us by our customers. Transportation costs on a per trip basis fluctuate from period to period.

Payroll and related costs as a percentage of revenue increased from 12.6% in 2017 to 12.9% in 2018 due to increased corporate staffing, temporary labor and increased health insurance expenses, as well as the impact from the acquisition of Circulation. Other operating expenses decreased for 2018 as compared to 2017 primarily attributable to a decrease in costs targeted at operational improvement from $6.3 million in 2017 to $2.8 million in 2018. This decrease was partially offset by increased software and hardware maintenance costs associated with new technology initiatives.

General and administrative expense. General and administrative expenses in 2018 increased $2.5 million, or 21.0%, as compared to 2017, primarily due to $1.7 million of transaction expenses related to the acquisition of Circulation in 2018, as well as increased facility costs resulting from the overall growth of our operations.

Asset impairment charge. Following the acquisition of Circulation and an analysis of the technology capabilities and scalability of the Circulation platform, we determined we would not continue the development of NextGen. We also determined we would not place any of the developed NextGen into service and recorded an asset impairment charge of $13.5 million related to our NET Services segment during the fourth quarter of 2018. We had previously recorded an impairment charge of $0.7 million during the second quarter of 2018 in relation to the decision to abandon specific development work intended to synchronize data across applications of the proprietary NextGen system, based on the determination of an alternative method to accomplish this task.

Depreciation and amortization expense. Depreciation and amortization expenses increased $1.8 million compared to 2017, primarily due to the addition of long-lived assets relating to information technology projects, as well as amortization expense related to the intangible assets acquired with the Circulation acquisition. As a percentage of revenue, depreciation and amortization increased to 1.1% for 2018 from 1.0% for 2017.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the Providence corporate level, our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2018 and 2017 (in thousands):

	Year Ended December 31,	
	2018	**2017**
	$	**$**
Service expense	(426)	(3,799)
General and administrative expense	31,851	31,712
Depreciation and amortization	787	343
Operating loss	(32,212)	(28,256)

Operating loss. Corporate and Other operating loss in 2018 increased by $4.0 million, or 14.0%, as compared to 2017. Included in "General and administrative expense" for 2018 are $8.4 million of expenses relating to the Organizational Consolidation, including retention, recruitment and accelerated stock-based compensation expenses. Additionally, included in "Depreciation and amortization" is $0.4 million of accelerated depreciation expense incurred in relation to the Organizational Consolidation. General and administrative expenses for 2018 also include an increase in legal and consulting costs over 2017. Included in both 2018 and 2017 is a reduction in insurance loss reserves in "Service expense" due to favorable claims history of our captive reinsurance program.

The operating loss included expense of less than $0.1 million and $2.4 million, respectively, of cash settled stock-based compensation for 2018 and 2017, primarily as a result of an increase in the Company's stock price in 2017 as compared to a decrease in 2018. The operating loss included $6.3 million and $7.1 million, respectively, of share settled stock-based compensation, excluding accelerated stock-based compensation expense related to the Organizational Consolidation, for 2018 and 2017. Share settled stock-based compensation expense for 2017 included stock-based compensation for the HoldCo LTIP of $4.7 million.

Costs associated with the resignation of James Lindstrom, a former Chief Executive Officer of the Company, during the year ended December 31, 2017 include cash compensation related items of $0.9 million, stock-based compensation of $0.7 million, and other costs of $0.2 million. These costs are recorded as part of "General and administrative expense".

Year ended December 31, 2017 compared to year ended December 31, 2016

The following table sets forth results of operations and the percentage of consolidated total revenues represented by items in our consolidated statements of operations for 2017 and 2016 (in thousands):

	Year ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,318,220	100.0 %	1,233,842	100.0%
Operating expenses:				
Service expense	1,223,627	92.8 %	1,131,963	91.7%
General and administrative expense	43,491	3.3 %	39,527	3.2%
Asset impairment charge	—	— %	1,415	0.1%

Total operating expenses	1,280,736	97.2 %	1,185,685	96.1%
Operating income	37,484	2.8 %	48,157	3.9%
Non-operating expense:				
Interest expense, net	1,204	0.1 %	1,515	0.1%
Other income	(5,363)	(0.4)%	—	—%
Equity in net (gain) loss of investees	(13,445)	(1.0)%	1,789	0.1%
Income from continuing operations before income taxes	55,088	4.2 %	44,853	3.6%
Provision for income taxes	4,003	0.3 %	17,972	1.5%
Income from continuing operations	51,085	3.9 %	26,881	2.2%
Income from discontinued operations, net of tax	2,735	0.2 %	62,965	5.1%
Net income	53,820	4.1 %	89,846	7.3%
Net (income) loss from discontinued operations attributable to noncontrolling interest	(451)	— %	2,082	0.2%
Net income attributable to Providence	53,369	4.0 %	91,928	7.5%

Service revenue, net. Consolidated service revenue, net for 2017 increased $84.4 million, or 6.8%, compared to 2016 due to an increase in revenue of NET Services.

Total operating expenses. Consolidated operating expenses for 2017 increased $95.1 million, or 8.0%, compared to 2016. Operating expenses for 2017 compared to 2016 included an increase in expenses attributable to NET Services of $95.8 million, which was partially offset by a decrease at Corporate and Other of $0.7 million. 2016 operating expenses include an asset impairment charge of $1.4 million at Corporate and Other.

Operating income. Consolidated operating income for 2017 decreased $10.7 million compared to 2016 due to a decrease in operating income of NET Services in 2017 as compared to 2016 of $11.3 million, which was partially offset by a decrease in the operating loss for Corporate and Other of $0.6 million in 2017 as compared to 2016.

Interest expense, net. Consolidated interest expense, net for 2017 decreased $0.3 million compared to 2016, and remained constant as a 0.1% of revenue.

Other income. Other income in 2017 of $5.4 million represents the settlement received from the Haverhill Litigation.

Equity in net (gain) loss of investees. Our equity in net (gain) loss of investees for 2017 includes equity in net gain for Matrix of $13.4 million. Our equity in net loss of investees for 2016 includes equity in net loss for Matrix of $1.8 million. We

began reporting Matrix as an equity investment effective October 19, 2016, upon the completion of the Matrix Transaction, and we record our ownership percentage of Matrix's profit or loss in net loss or gain of investees. Included in Matrix's 2017 full standalone net income of $26.7 million (which is not consolidated with Providence's) are depreciation and amortization of $33.5 million, interest expense of $14.8 million, transaction bonuses and other transaction related costs of $3.5 million, equity compensation of $2.6 million, management fees paid to Matrix's shareholders of $2.3 million, merger and acquisition diligence related costs of $0.7 million and income tax benefit of $29.6 million. Matrix's significant income tax benefit in 2017 primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act. Included in Matrix's 2016 full standalone net loss of $4.2 million (which is not consolidated with Providence's) are depreciation and amortization of $6.4 million, interest expense of $2.9 million, transaction bonuses and other transaction related costs of $6.4 million, equity compensation of $0.4 million, management fees paid to Matrix's shareholders of $0.4 million and income tax benefit of $2.8 million.

Provision for income taxes. Our effective tax rate from continuing operations for 2017 was 7.3%. The effective tax rate was lower than the U.S. federal statutory rate of 35% primarily due to the impact of the Tax Reform Act. The tax provision includes a benefit of $15.9 million related to the enactment of the Tax Reform Act during the fourth quarter of 2017, consisting of a net tax benefit of $19.3 million from the re-measurement of deferred tax liabilities from the lower U.S. corporate tax rate, partially offset by additional tax expense of $3.4 million due to an increase in our equity in net gain of Matrix as a result of Matrix's re-measurement of deferred tax liabilities. In addition, the Company incurred tax expense of $3.6 million related to the HoldCo LTIP, for which expense was recorded for financial reporting purposes based upon fair value of the award at the grant date, but no shares were issued due to the market condition of the award not being satisfied. This tax expense was the result of the adoption of ASU 2016-09, which subjects our tax rate to quarterly volatility from the effects of stock award exercises and vesting activities, including the adverse impact on our income tax provision for awards which result in a tax deduction less than the amount recorded for financial reporting purposes.

Our effective tax rate from continuing operations for 2016 was 40.1%. The effective tax rate was higher than the U.S. federal statutory rate of 35% primarily due to the impact of state taxes.

Income from discontinued operations, net of tax. Income from discontinued operations, net of tax, includes the activity of our former WD Services segment, Human Services segment and our former HA Services segment, composed entirely of our 100% ownership in Matrix until the completion of the Matrix Transaction on October 19, 2016. See Note 23, *Discontinued Operations,* to our consolidated financial statements for additional information.

For 2017, income from discontinued operations, net of tax for our WD Services segment was $8.7 million, which included a gain on sale of our equity interest in Mission Providence of $12.4 million. For 2016, the loss from discontinued operations, net of tax for our WD Services segment was $45.8 million, which included an asset impairment charge of $19.6 million.

For 2017, loss from discontinued operations, net of tax for our Human Services segment was $6.0 million, which primarily related to the accrual of a contingent liability of $9.0 million related to the settlement of indemnification claims and associated legal costs of $0.7 million, partially offset by a related tax benefit. For 2016, the loss from discontinued operations, net of tax for our Human Services segment was $5.6 million, which included an accrual of $6.0 million with respect to potential indemnification claims, legal costs of $1.1 million related to these potential claims and transaction related expenses of $0.8 million, partially offset by a related tax benefit.

Income from discontinued operations, net of tax for our HA Services segment was $114.3 million for 2016, which included a gain on disposition, net of tax, of $109.4 million.

Net (income) loss from discontinued operations attributable to noncontrolling interests. Net (income) loss from discontinued operations attributable to noncontrolling interests primarily relates to a minority interest held by a third-party operating partner in our company servicing the offender rehabilitation contract in our historical WD Services segment.

Segment Results. The following analysis includes discussion of each of our segments.

NET Services

NET Services financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Service revenue, net	1,318,220	100.0%	1,233,720	100.0%
Service expense	1,227,426	93.1%	1,132,857	91.8%
General and administrative expense	11,779	0.9%	11,406	0.9%
Depreciation and amortization	13,275	1.0%	12,375	1.0%
Operating income	65,740	5.0%	77,082	6.2%

Service revenue, net. Service revenue, net for NET Services in 2017 increased $84.5 million, or 6.8%, compared to 2016. The increase was related to net increased revenue from existing contracts, including successfully renewed contracts, of $82.5 million, due to the net impact of membership and rate changes. Included within net rate changes are the positive impacts of final agreements on rate adjustments related to existing contracts that experienced increased utilization in 2017 as well as the release of previously accrued revenue hold-backs based on certain contract performance requirements on a significant contract. Additionally, the impact of new contracts, including new MCO contracts in Florida and New York, contributed $93.8 million of revenue for 2017. These increases were partially offset by the $91.8 million impact on revenue of contracts we no longer serve, including a contract with the state of New York.

Service expense. Service expense is comprised of the following for 2017 and 2016 (in thousands):

	Year Ended December 31,			
	2017		2016	
	$	Percentage of Revenue	$	Percentage of Revenue
Purchased services	1,009,518	76.6%	927,321	75.2%
Payroll and related costs	165,666	12.6%	162,000	13.1%
Other operating expenses	51,720	3.9%	42,478	3.4%
Stock-based compensation	522	—%	1,058	0.1%
Total service expense	1,227,426	93.1%	1,132,857	91.8%

Service expense for 2017 increased $94.6 million, or 8.3%, compared to 2016. The increase in service expense was primarily attributable to the impact of new MCO contracts in California, Florida and New York. Purchased services as a percentage of revenue increased from 75.2% in 2016 to 76.6% in 2017 primarily attributable to an increase in utilization across multiple contracts. The higher utilization was in part driven by increased Medicaid reimbursement in New Jersey for certain medical services, increasing the demand for transportation services, and increased utilization across multiple MCOs in California. Additionally, due to milder winter weather conditions during the first quarter of 2017, we experienced above expected utilization; however, we experienced lower utilization for contracts in the third quarter of 2017 due in part to the impact of Hurricane Irma. The increase in purchased services as a percentage of revenue caused by increased utilization was partially offset by the successful implementation of initiatives aimed at lowering transportation costs on a per trip and per mile basis as well as the release of a reserve based upon the finalization of a contract amendment with a state customer.

Payroll and related costs as a percentage of revenue decreased from 13.1% in 2016 to 12.6% in 2017 due to efficiencies gained from multiple process improvement initiatives, including those aimed at lowering payroll expense across our reservation and operation center networks, as well as a decrease in chief executive officer compensation expense due to the transition of the chief executive officer position during 2017. Other operating expenses increased for 2017 as compared to 2016 primarily attributable to an incremental $4.1 million of value enhancement and related costs incurred for external resources used in the design and

implementation of NET Services member experience and value enhancement initiatives in 2017, as well as increased software and hardware maintenance costs associated with increased use of information technology.

General and administrative expense. General and administrative expense in 2017 increased $0.4 million, or 3.3%, as compared to 2016, due to increased facility costs resulting from the overall growth of our operations. As a percentage of revenue, general and administrative expense remained constant at 0.9%.

Depreciation and amortization expense. Depreciation and amortization expense increased $0.9 million primarily due to the addition of long-lived assets relating to information technology projects. As a percentage of revenue, depreciation and amortization remained constant at 1.0%.

Corporate and Other

Corporate and Other includes the headcount and professional service costs incurred at the holding company level, at our captive insurance company, and elimination entries to account for inter-segment transactions. Corporate and Other financial results are as follows for 2017 and 2016 (in thousands):

	Year Ended December 31,	
	2017	**2016**
	$	**$**
Service revenue, net	—	122
Service expense	(3,799)	(894)
General and administrative expense	31,712	28,121
Asset impairment charge	—	1,415
Depreciation and amortization	343	405
Operating loss	(28,256)	(28,925)

Operating loss. Corporate and Other operating loss in 2017 decreased by $0.6 million, or 2.3%, as compared to 2016 primarily due a reduction in insurance loss reserves of $3.5 million in 2017, versus $2.5 million in 2016, due to favorable claims history of our captive reinsurance programs, as well as decreased costs of the captive operations due to no longer writing new policies as of May 2017, which is included in “Service expense”, decreased accounting, legal and professional fees included in “General and administrative expense”, and decreased asset impairment charges, as $1.4 million was recorded in 2016 in relation to the sale of a building. These decreases were partially offset by an increase in cash settled stock-based compensation expense of $3.6 million, primarily as a result of an increase in the Company’s stock price in 2017 as compared to a decrease in 2016, an increase in share settled stock-based compensation expense of $2.7 million, primarily related to an increase in expense for the HoldCo LTIP despite this program expiring with no shares due to any employees, expense for stock options issued to a former chief executive officer upon separation from the Company, and a benefit recorded in 2016 for performance based units, with no corresponding benefit in 2017.

General and administrative expense includes stock-based compensation for the HoldCo LTIP of $4.7 million and $3.3 million for 2017 and 2016, respectively. No shares were distributed under the HoldCo LTIP as the volume weighted average of Providence’s stock price over the 90-day trading period ended on December 31, 2017 was less than $56.79. As such, as of December 31, 2017, we accelerated all remaining unrecognized compensation expense for the Holdco LTIP as there was no further requisite service period associated with the award resulting in an acceleration of expense of $1.1 million. General and administrative expense also includes $0.4 million and $1.6 million for 2017 and 2016, respectively, related to a shareholder lawsuit.

Costs associated with the resignation of James Lindstrom during the year ended December 31, 2017 include cash compensation related items of $0.9 million, stock-based compensation of $0.7 million, and other costs of $0.2 million. These costs are recorded as part of “General and administrative expense”.

Seasonality

Our quarterly operating results and operating cash flows normally fluctuate due in part to seasonal factors, uneven demand for services and the timing of new contracts, which impact the amount of revenues earned and expenses incurred. NET Services

experiences fluctuations in demand during the summer and winter. Due to higher demand in the summer months, lower demand during the winter months, and a primarily fixed revenue stream based on a per-member, per-month payment structure, NET Services normally experiences lower operating margins during the summer season and higher operating margins during the winter.

Liquidity and Capital Resources

Short-term capital requirements consist primarily of recurring operating expenses, new contract start-up costs and costs associated with our Organizational Consolidation and other strategic initiatives. We expect to meet our cash requirements through available cash on hand, cash generated from NET Services, and borrowing capacity under our Credit Facility (as defined below).

Cash flow from operating activities was $7.9 million in 2018. Additionally, 2018 included $12.8 million in proceeds from the sale of our WD Services segment and cash outflows of $43.7 million related to the acquisition of Circulation, which are included in cash used in investing activities, and $12.4 million of proceeds from stock option exercises and cash outflows of $56.1 million for repurchases of common stock for treasury, which are included in cash used in financing activities. Our balance of cash, cash equivalents and restricted cash was $12.4 million and $101.6 million at December 31, 2018 and 2017, respectively, which includes cash of discontinued operations.

We had restricted cash of $4.4 million and $6.3 million at December 31, 2018 and 2017, respectively, primarily related to contractual obligations and activities of our captive insurance subsidiary. Given expiring policies under our captive insurance subsidiary were not renewed upon expiration in May 2017, we expect our restricted cash balances to decline over time. These restricted cash amounts are not included in our balance of cash and cash equivalents, although they are included in the cash, cash equivalents and restricted cash balance on the accompanying consolidated statements of cash flows, as a result of the adoption of Accounting Standards Update No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash,* as of January 1, 2018. At both December 31, 2018 and 2017, we had no amounts outstanding under our Credit Facility.

We may, from time to time, access capital markets to raise equity or debt financing for various business reasons, including acquisitions. We may also raise debt financing to fund future repurchases of our Common Stock. The timing, term, size, and pricing of any such financing will depend on investor interest and market conditions, and there can be no assurance that we will be able to obtain any such financing. During the second quarter of 2018, we extended the term of our Credit Facility to expire in August 2019, as further discussed below. At the end of the third quarter of 2018, we borrowed funds on our revolving credit facility to acquire Circulation. As of December 31, 2018, these amounts were fully repaid.

On March 29, 2018, the Company's Board of Directors amended our ongoing stock repurchase program to add an additional $77.8 million of capacity and extend the expiration date of the program from December 31, 2018 to June 30, 2019. As of December 31, 2018, the Company had approximately $81.2 million of share repurchase availability. During the year ended December 31, 2018, the Company repurchased 838,719 shares for $55.8 million.

The accompanying consolidated cash flow statement for all periods presented includes both continuing and discontinued operations. Discontinued operations include the activity of our historical WD Services, Human Services and HA Services segments. The loss from discontinued operations totaled $37.1 million for the year ended December 31, 2018, while income from discontinued operations totaled $2.7 million and $63.0 million for the years ended December 31, 2017 and 2016, respectively. For 2018, the loss from discontinued operations primarily related to the operating loss of our historical WD Services segment, as well as the loss, net of tax, of $1.8 million incurred on the disposition of subsidiaries within this segment. The significant income from discontinued operations during the year ended December 31, 2016 related to the gain on sale of our HA Services segment. Significant non-cash items of our discontinued operations included the following:

	2018	2017	2016
Depreciation	$ 6,711	$ 7,825	$ 11,799
Amortization	5,153	5,026	23,145
Asset impairment charge	9,203	—	19,588
Deferred income taxes	345	(3,940)	45,700

2018 cash flows compared to 2017

Operating activities. Cash provided by operating activities was $7.9 million for 2018, a decrease of $47.1 million compared with 2017. 2018 and 2017 cash flows from operations were driven by net loss of $18.8 million and net income $53.8 million,

respectively, non-cash adjustments to reconcile net income to net cash provided by operating activities of $67.1 million and negative $11.1 million, respectively, and changes in working capital of negative $40.3 million and positive $12.3 million, respectively.

The change in non-cash adjustments to reconcile net income to net cash provided by operating activities was due primarily to the impact of:

- the asset impairment charge incurred in 2018 of $23.4 million, of which $9.2 million is included in discontinued operations related to the sale of WD Services operations in France;
- the impact on deferred taxes and income taxes receivable as a result of the sale of substantially all of the operating subsidiaries in the WD Services segment in 2018 and as a result of the Tax Reform Act passed in 2017;
- the pre-tax loss on sale of subsidiaries of $53.7 million in 2018, which includes a non-cash reclass of $30.0 million from currency translation adjustment;
- the gain on remeasurement of our cost method investment in Circulation of $6.6 million in 2018;
- the gain on sale of Mission Providence of $12.4 million in 2017; and
- the impact of the change in equity in net (gain) loss of investees, which was a loss of $6.1 million in 2018 as compared to a gain of $12.1 million in 2017.

The change in working capital was primarily driven by the following:

- Accounts receivable generated a cash outflow in 2018 of $31.0 million as compared to an inflow of $5.7 million in 2017. The increase in cash outflow of $36.7 million was primarily attributable to NET Services due to the timing of collections from a limited number of payers, which was partially offset by $13.1 million of additional cash inflow from discontinued operations.
- Accounts payable and accrued expenses generated a cash outflow of $21.8 million in 2018, as compared to a cash outflow of $9.1 million in 2017. The increase in cash outflow of $12.7 million is primarily the result of the settlement of indemnified legal claims in 2018, of which $9.0 million was accrued for during 2017, which was partially offset by an increase in cash inflow from discontinued operations of $7.8 million and the impact of changes in the NET Services accrued contract payable balance.
- Accrued transportation costs of NET Services generated a cash inflow of $1.3 million in 2018, as compared to a cash inflow of $11.2 million in 2017. The decrease in cash inflow of $9.9 million is due primarily to the timing of payments to NET Services transportation providers.

Investing activities. Net cash used in investing activities of $45.3 million in 2018 increased by $38.3 million as compared to 2017. The increase was primarily attributable to the purchase of Circulation resulting in cash used for acquisition, net of cash acquired, of $43.7 million, which was partially offset by $12.8 million of proceeds on the sale of WD Services. Additionally, 2017 includes the impact of $15.6 million in proceeds from the sale of our equity investment in Mission Providence. During 2018, we also collected a note receivable for $3.1 million. Additionally in 2017, we made a cost method investment in Circulation for $3.0 million. There was also a decrease in the purchase of property and equipment of $2.4 million. 2018 and 2017 included purchases of property and equipment of $6.7 million and $4.5 million, respectively, by our discontinued operations.

Financing activities. Net cash used in financing activities of $51.6 million in 2018 increased $17.8 million as compared to 2017. During 2018, we repurchased $26.7 million more of our Common Stock than in 2017. In addition, there was an increase in proceeds from Common Stock issued pursuant to stock option exercises of $10.5 million.

2017 cash flows compared to 2016

Operating activities. Cash provided by operating activities was $55.0 million for 2017, an increase of $13.3 million compared with 2016. 2017 and 2016 cash flows from operations were driven by net income of $53.8 million and $89.8 million, respectively, non-cash adjustments to reconcile net income to net cash provided by operating activities of negative $11.1 million and negative $32.9 million, respectively, and changes in working capital of $12.3 million and negative $15.2 million, respectively.

The change in non-cash adjustments to reconcile net income to net cash provided by operating activities was due primarily to the impact of:

- the disposition of HA Services in 2016, resulting in decreased gain on sale of business, depreciation, amortization and deferred taxes in 2017 as compared to 2016;
- the asset impairment charge incurred in 2016 of $21.0 million, which is included in discontinued operations;

- the impact on deferred taxes as a result of the Tax Reform Act passed in 2017;
- the gain on sale of Mission Providence of $12.4 million in 2017, which is included in discontinued operations; and
- the impact of the change in equity in net (gain) loss of investees, which was a gain of $12.1 million in 2017 as compared to a loss of $10.3 million in 2016.

The change in working capital was primarily driven by the following:

- Accounts receivable generated a cash inflow in 2017 of $5.7 million as compared to an outflow of $19.3 million in 2016. The increase in cash inflow of $25.0 million was primarily attributable to NET Services due to the timing of collections as well as an outflow of $3.1 million of HA Services in 2016. These changes were partially offset by cash outflows in 2017 related to an increase in WD Services' receivables in Germany, Saudi Arabia, South Korea and the UK.
- Prepaid expenses and other generated a cash inflow of $15.5 million in 2017, as compared to a cash outflow of $4.1 million in 2016. The increase in cash inflow of $19.5 million was primarily attributable to a decrease in other receivables related to amounts receivable from insurance carriers in respect to certain claims paid by the Company, but reimbursable from the respective insurance carrier, decreased receivables related to our captive insurance company insurance policy rewrite, decreased prepaid value added taxes in the UK, decreased prepayments in WD Services in relation to certain contracts and changes in income tax payments.
- Accounts payable and accrued expenses generated a cash outflow of $9.1 million in 2017, as compared to a cash inflow of $33.4 million in 2016. The decrease in cash inflow of $42.4 million is due primarily to the impact of NET Services accrued contract payments of $21.5 million, as well as the disposition of HA Services, which generated a cash inflow of $10.6 million in 2016. Partially offsetting these impacts is the impact of the increase in the accrued settlement related to our former Human Services segment of $9.0 million during 2017 as compared to an increase of $6.0 million in 2016.
- Accrued transportation costs of NET Services generated a cash inflow of $11.2 million in 2017, as compared to a cash inflow of $8.7 million in 2016. The increase in cash inflow of $2.6 million is due primarily to the timing of payments to NET Services transportation providers and increased volume.
- Income taxes payable on sale of business for 2016 includes a cash outflow of $30.2 million related to the sale of our Human Services segment.

Investing activities. Net cash used in investing activities totaled $7.0 million in 2017, compared to cash provided by investing activities of $318.0 million in 2016. The change was primarily attributable to $371.6 million of proceeds on the Matrix Transaction recorded in 2016, which was partially offset by the impact of $15.6 million in proceeds from the sale of our equity investment in Mission Providence in 2017. Additionally in 2017, we made a cost method investment in Circulation for $3.0 million. There was also a decrease in funding of our equity investment in Mission Providence of $13.7 million and a decrease in the purchase of property and equipment of $21.3 million. 2017 and 2016 included purchases of property and equipment of $4.5 million and $29.0 million, respectively, by our discontinued operations.

Financing activities. Net cash used in financing activities of $33.8 million in 2017 decreased $343.0 million as compared to 2016. During 2016, there was a net repayment of debt of $305.0 million, primarily related to the repayment of debt upon the completion of the Matrix Transaction. Additionally, during 2017, we repurchased $41.0 million less of our Common Stock than in 2016. In addition, there was a decrease in proceeds from Common Stock issued pursuant to stock option exercises of $2.2 million.

Obligations and commitments

Current Credit Facility

We are party to the amended and restated credit and guaranty agreement, dated as of August 2, 2013 (as amended, the "Credit Agreement"), with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, and the other lenders party thereto. The Credit Agreement provides us with a $200.0 million revolving credit facility (the "Credit Facility"), including a sub-facility of $25.0 million for letters of credit. As of December 31, 2018, we had no borrowings and ten letters of credit in the amount of $12.3 million outstanding. At December 31, 2018, our available credit under the revolving credit facility was $187.7 million.

Under the Credit Agreement, the Company has an option to request an increase in the amount of the revolving credit facility or in a term loan facility from time to time (on substantially the same terms as apply to the existing facility) in an aggregate amount of up to $75.0 million with either additional commitments from lenders under the Credit Agreement at such time or new commitments from financial institutions acceptable to the administrative agent in its reasonable discretion, so long

as no default or event of default exists at the time of any such increase. The Company may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility. The Credit Agreement has a maturity date of August 2, 2019. See also "Risk Factors-Risks Related to our Indebtedness-Loss of available financing or an inability to renew, repay or refinance our debt could have an adverse effect on our financial condition and results of operations."

We may prepay any outstanding principal under the Credit Facility in whole or in part, at any time without premium or penalty, subject to reimbursement of the lenders' breakage and redeployment costs in connection with prepayments of London Interbank Offered Rate, or LIBOR, loans. The unutilized portion of the commitments under the Credit Facility may be irrevocably reduced or terminated by us at any time without penalty.

Interest on the outstanding principal amount of any loans accrues, at our election, at a per annum rate equal to LIBOR, plus an applicable margin or the base rate plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on our consolidated leverage ratio as defined in the Credit Agreement. Interest on any loans is payable quarterly in arrears. In addition, we are obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on our consolidated leverage ratio.

The Credit Facility also requires us (subject to certain exceptions as set forth in the Amended and Restated Credit Agreement) to prepay the outstanding loans in an aggregate amount equal to 100% of the net cash proceeds received from certain asset dispositions, debt issuances, insurance and casualty awards and other extraordinary receipts.

Our obligations under the Credit Facility are guaranteed by all of our present and future domestic subsidiaries, excluding certain domestic subsidiaries, which includes our insurance captive. Our obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of our respective assets, other than our equity investment in Matrix, including a pledge of 100% of the issued and outstanding stock of our domestic subsidiaries, excluding our insurance captive.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on our ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, repurchase shares, sell assets, and merge and consolidate. We are subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants. The Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter. We were in compliance with all covenants as of December 31, 2018.

Credit Facility Background

On August 2, 2013, we entered into the Credit Agreement with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, SunTrust Bank, as syndication agent, Merrill Lynch, Pierce, Fenner & Smith Incorporated and SunTrust Robinson Humphrey, Inc., as joint lead arrangers and joint book managers and other lenders party thereto. The Credit Agreement provided us with a senior secured credit facility, in aggregate principal amount of $225.0 million, comprised of a $60.0 million term loan facility and a $165.0 million revolving credit facility. The Credit Facility includes sublimits for swingline loans and letters of credit in amounts of up to $10.0 million and $25.0 million, respectively. On August 2, 2013, we borrowed the entire amount available under the term loan facility and $16.0 million under our revolving credit facility and used the proceeds thereof to refinance certain of our existing indebtedness.

On May 28, 2014, we entered into the first amendment to the Credit Agreement (the "First Amendment"). The First Amendment provided for, among other things, an increase in the aggregate amount of the Credit Facility from $165.0 million to $240.0 million and other modifications in connection with the consummation of the acquisition of Ingeus.

On October 23, 2014, we entered into the Second Amendment to the Credit Agreement (the "Second Amendment") to (i) add a new term loan tranche in aggregate principal amount of up to $250.0 million to partly finance the acquisition of Matrix and make certain other modifications in connection with the consummation of the acquisition of Matrix and (ii) add an excess cash flow mandatory prepayment provision.

On September 3, 2015, we entered into the Third Amendment to the Credit Agreement (the "Third Amendment"). Pursuant to the Third Amendment, the lenders under the Credit Agreement consented to Providence's sale of the Human Services segment

and certain other amendments to the terms of the Credit Agreement to reflect such consents.

On August 28, 2016, we entered into the Fourth Amendment and Consent (the "Fourth Amendment") to the Credit Agreement. In accordance with the Fourth Amendment, which provided for the lenders' consent to the Matrix Transaction, a portion of the net cash proceeds received by the Company in connection with the Matrix Transaction was applied to the prepayment of outstanding term loans and revolving loans. Additionally, effective following the repayment of the outstanding term loans in full on October 20, 2016, the Fourth Amendment further (i) reduced the aggregate revolving commitments under the Credit Agreement to $200.0 million, (ii) amended the consolidated net leverage ratio covenant such that the Company's consolidated net leverage ratio may not be greater than 3.00:1.00 as of the end of any fiscal quarter and (iii) replaced the existing consolidated fixed charge coverage ratio covenant with a covenant that the Company's consolidated interest coverage ratio may not be less than 3.00:1.00 as of the end of any fiscal quarter.

On June 7, 2018, we entered into the Fifth Amendment to the Credit Agreement (the "Fifth Amendment") which (i) extended the maturity date of the Credit Agreement to August 2, 2019 and (ii) amended certain covenants under the Credit Agreement to provide for greater operational, financial and strategic flexibility, including the implementation of the Organizational Consolidation.

We may from time to time incur additional indebtedness, obtain additional financing or refinance existing indebtedness, subject to market conditions and our financial condition.

Rights Offering

We completed a rights offering on February 5, 2015, allowing all of the Company's existing common stockholders the non-transferrable right to purchase their pro rata share of $65.5 million of Preferred Stock at a price equal to $100.00 per share (the "Rights Offering"). The Preferred Stock was convertible into shares of our Common Stock at a conversion price equal to $39.88, which was the closing price of our Common Stock on NASDAQ on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement between the Coliseum Stockholders and the Company, the remaining 524,116 shares of the Company's Preferred Stock were purchased by the Coliseum Stockholders at the $100.00 per share subscription price. The Coliseum Stockholders beneficially owned approximately 94% of our outstanding Preferred Stock after giving effect to the Rights Offering and the Standby Purchase Agreement. The Company received $65.5 million in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement, which it used to repay the related party unsecured subordinated bridge note that was outstanding as of December 31, 2014.

Additionally, on March 12, 2015, the Coliseum Stockholders exercised their right to purchase an additional 150,000 shares of the Company's convertible preferred stock at a $105 per share subscription price.

We may pay a noncumulative cash dividend on each share of Preferred Stock, when, as and if declared by a committee of our Board, at the rate of 5.5% per annum on the liquidation preference then in effect. On or before the third business day immediately preceding each fiscal quarter, we determine our intention whether or not to pay a cash dividend with respect to that ensuing quarter and give notice of our intention to each holder of Preferred Stock as soon as practicable thereafter.

In the event we do not declare and pay a cash dividend, the liquidation preference will be increased to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to such then applicable liquidation preference multiplied by 8.5% per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and, if declared, will begin to accrue on the first day of the applicable dividend period. Payment in kind ("PIK") dividends, if applicable, will accrue and be cumulative on the same schedule as set forth above for cash dividends and will also be compounded at the applicable annual rate on each applicable subsequent dividend date. PIK dividends are paid upon the occurrence of a liquidation event, conversion or redemption in accordance with the terms of the Preferred Stock. Cash dividends were declared each quarter for the years ended December 31, 2018 and 2017 and totaled $4.4 million each year. For information on the treatment of Preferred Stock in the event of a certain change of control transactions, see "Risk Factors–Risks Related to Our Capital Stock–Anti-takeover provisions in our second amended and restated certificate of incorporation and amended and restated by-laws could discourage, delay or prevent a change of control of our company and may affect the trading price of our Common Stock."

Reinsurance and Self-Funded Insurance Programs

Reinsurance

We historically reinsured a substantial portion of our automobile, general and professional liability and workers' compensation costs under reinsurance programs primarily through our wholly-owned captive insurance subsidiary, Social Services Providers Captive Insurance Company, or SPCIC. As of May 16, 2017, SPCIC did not renew the expiring reinsurance policies. SPCIC will continue to resolve claims under the historical policy years.

At December 31, 2018, the cumulative reserve for expected losses since inception of these historical automobile, general and professional liability and workers' compensation reinsurance programs was $0.3 million, $0.8 million and $2.8 million, respectively. Based on an independent actuarial report, our expected losses related to workers' compensation, automobile and general and professional liability in excess of our liability under our associated historical reinsurance programs at December 31, 2018 was $6.6 million. We recorded a corresponding receivable from third-party insurers and liability at December 31, 2018 for these expected losses, which would be paid by third-party insurers to the extent losses are incurred.

Further, we had restricted cash of $4.4 million and $6.3 million at December 31, 2018 and December 31, 2017, respectively, which was primarily restricted to secure the reinsured claims losses under the historical automobile, general and professional liability and workers' compensation reinsurance programs.

Health Insurance

We offer our NET Services, U.S. based WD Services, and corporate employees an option to participate in self-funded health insurance programs. Additionally, we historically offered this option to our HA Services and Human Services segments' employees. During the year ended December 31, 2018, health claims were self-funded with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims generally to $300,000 per person, subject to an aggregating stop-loss limit of $400,000. In addition, the program has a total stop-loss limit for total claims, in order to limit our exposure to catastrophic claims.

Health insurance claims are paid as they are submitted to the plan administrator. We maintain accruals for claims that have been incurred but not yet reported to the plan administrator, and therefore, have not been paid. The incurred but not reported reserve is based on an established cap and current payment trends of health insurance claims. The liability for the self-funded health plan of $2.2 million as of December 31, 2018 and 2017, was recorded in "Reinsurance liability and related reserve" in our consolidated balance sheets.

We charge our employees a portion of the costs of our self-funded group health insurance programs. We determine this charge at the beginning of each plan year based upon historical and projected medical utilization data. Any difference between our projections and our actual experience is borne by us, up to the stop-loss limit. We estimate potential obligations for liabilities under this program to reserve what we believe to be a sufficient amount to cover liabilities based on our past experience. Any significant increase in the number of claims or costs associated with claims made under this program above what we reserve could have a material adverse effect on our financial results.

Contractual cash Obligations

The following is a summary of our future contractual cash obligations as of December 31, 2018:

	At December 31, 2018				
Contractual cash obligations (000's)	**Total**	**Less than 1 Year**	**1-3 Years**	**3-5 Years**	**After 5 Years**
Capital leases	$ 1,071	$ 718	$ 353	$ —	$ —
Interest (1)	445	445	—	—	—
Purchased services commitment (2)	35,231	13,805	21,419	7	—
Guarantees (3)	42,056	42,056	—	—	—
Letters of credit (3)	12,338	12,338	—	—	—
Operating leases (4)	27,039	8,825	11,046	5,568	1,600
Total	$ 118,180	$ 78,187	$ 32,818	$ 5,575	$ 1,600

(1) Future interest payments have been calculated at the current rates as of December 31, 2018.

(2) The purchased service commitment includes a commitment for transportation services. Our commitment amount represents the minimum obligation we have under this agreement. If the Company does not utilize the minimum level of services specified in the agreement, a penalty provision will apply. However, the minimum obligation is less than our projected use for these periods and payments may be more than the minimum obligation based on actual use.

(3) Guarantees and letters of credit ("LOCs") are commitments that represent funding responsibilities that may require our performance in the event of third-party demands or contingent events. Guarantees include surety bonds we provide to certain customers to protect against potential non-delivery of our non-emergency transportation services. Of the outstanding balance of our stand-by LOCs, $12.3 million directly reduces the amount available to us from our Credit Facility. The surety bonds and LOC amounts in the above table represent the amount of commitment expiration per period.

(4) The operating leases are for office space and related office equipment. We account for these leases on a monthly basis. Certain leases contain periodic rent escalation adjustments and renewal options.

Other than the items described above, we do not have any off-balance sheet arrangements as of December 31, 2018.

Stock repurchase programs

On November 4, 2015, our Board authorized us to engage in a repurchase program to repurchase up to $70.0 million in aggregate value of our Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $63.0 million, excluding commission payments.

On October 26, 2016, our Board authorized us to engage in a repurchase program to repurchase up to $100.0 million in aggregate value of our Common Stock during the twelve-month period following October 26, 2016. As of October 26, 2017, we spent $30.4 million, excluding commission payments, to purchase 770,808 shares of our Common Stock under this plan.

On November 2, 2017, the Board approved the extension of the Company's existing stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69.6 million (the amount remaining from the $100.0 million repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Subsequently, on March 29, 2018, the Board authorized an increase in the amount available for stock repurchases under the Company's existing stock repurchase program by $77.8 million, and extended the existing stock repurchase program through June 30, 2019. As of December 31, 2018, 1,018,989 shares were purchased under this plan for $66.3 million, excluding commission payments, after it was extended on November 2, 2017.

Purchases under the repurchase program may be made from time-to-time through a combination of open market repurchases (including Rule 10b5-1 plans), privately negotiated transactions, and accelerated share repurchase transactions, at the discretion of our officers, and as permitted by securities laws, covenants under existing bank agreements, and other legal requirements.

Off-balance sheet arrangements

As of December 31, 2018 and 2017, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

New Accounting Pronouncements

The new accounting pronouncements that impact our business are included in Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements,* to our consolidated financial statements and are incorporated herein by reference.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk.***

Interest rate risk

We have exposure to interest rate risk mainly related to our revolving credit facility, which has variable interest rates that may increase. We did not have any amounts outstanding on our revolving credit facility at December 31, 2018.

Item 8. ***Financial Statements and Supplementary Data.***

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Management's Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting for the registrant, as such term is defined in Rule 13a-15(f) of the Exchange Act. We designed our internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and presentation. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. The Company conducts periodic evaluations of its internal controls to enhance, where necessary, its procedures and controls.

We acquired Circulation, Inc. ("Circulation") on September 21, 2018, and we excluded from the assessment of effectiveness of our internal control over financial reporting as of December 31, 2018, Circulation's internal control over financial reporting associated with total assets of $6.1 million (which excludes acquired goodwill and intangible assets) and total revenues of $2.2 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2018.

We are currently integrating this acquisition into our internal control over financial reporting processes. In executing this integration, we are analyzing, evaluating and, where necessary, making changes in controls and procedures related to this acquisition, which we expect to be completed in fiscal year 2019. We have excluded this acquisition from our assessment of internal control over financial reporting as of December 31, 2018, as permitted by the guidance provided by the staff of the SEC. Other than the changes described above, there were no changes in our internal control over financial reporting during the fiscal quarter ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

The Company, under the supervision and with the participation of its management, including its principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018, based on the criteria set forth in the Internal Control–Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, the Company concluded that its internal control over financial reporting was effective as of December 31, 2018.

KPMG LLP, an independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued an audit report on the effectiveness of the Company's internal control over financial reporting which is presented in Part II, Item 8 of this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
The Providence Service Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of The Providence Service Corporation and subsidiaries (the "Company") as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2018, and the related notes and financial statement schedule II (collectively, the "consolidated financial statements"). In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 1, 2019 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

We did not audit the financial statements of Mercury Parent, LLC (43.6 percent owned investee company) as of and for the period ended December 31, 2018. The Company's investment in Mercury Parent, LLC as of December 31, 2018 was $161.5 million, and its equity in net loss of Mercury Parent, LLC was $6.2 million for the year ended December 31, 2018. The financial statements of Mercury Parent, LLC were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Mercury Parent, LLC, is based solely on the report of the other auditors.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company has changed its method of accounting for revenues and related costs in 2018 due to the adoption of Accounting Standards Codification Topic 606, Revenue from Contracts with Customers.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits and the report of the other auditors provide a reasonable basis for our opinion.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
The Providence Service Corporation:

Opinion on Internal Control Over Financial Reporting

We have audited The Providence Service Corporation and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2018, and the related notes and financial statement schedule II (collectively, the "consolidated financial statements"), and our report dated March 1, 2019 expressed an unqualified opinion on those consolidated financial statements.

The Company acquired Circulation, Inc. ("Circulation") during 2018, and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018, Circulation's internal control over financial reporting associated with total assets of $6.1 million (which excludes acquired goodwill and intangible assets) and total revenues of $2.2 million included in the consolidated financial statements of the Company as of and for the year ended December 31, 2018. Our audit of internal control over financial reporting of the Company also excluded an evaluation of the internal control over financial reporting of Circulation.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Providence Service Corporation
Notes to Consolidated Financial Statements
December 31, 2018
(in thousands except share and per share data)

1. Organization and Basis of Presentation

Description of Business

The Providence Service Corporation ("we", the "Company" or "Providence"), owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States. The Company's NET Services segment, which primarily operates under the brands LogistiCare and Circulation, since its acquisition in September 2018, is the largest manager of non-emergency medical transportation ("NET") programs for state governments and managed care organizations ("MCOs") in the United States ("U.S."). On September 21, 2018, we completed the acquisition of Circulation, Inc. ("Circulation"), which offers a full suite of logistics solutions to manage NET programs across all areas of healthcare, powered by its HIPAA-compliant digital platform. Circulation's technology expands LogistiCare's capabilities to manage transportation benefits, integrating all transportation capabilities while proactively monitoring for fraud, waste and abuse and emphasizing member convenience and satisfaction.

The Company's Matrix Investment segment consists of a minority investment in CCHN Group Holdings, Inc. and its subsidiaries ("Matrix"), a nationwide provider of home and mobile-based healthcare services for health plans in the U.S., including comprehensive health assessments ("CHAs"), quality gap closure visits, "level of service" needs assessments, and post-acute and chronic care management, providing such services through a network of community-based clinicians and a fleet of mobile health clinics with advanced diagnostics capabilities.

The Company's Corporate and Other segment includes the Company's executive, accounting, finance, internal audit, tax, legal, public reporting, and corporate development functions. On April 11, 2018, the Company announced an organizational consolidation plan to integrate substantially all activities and functions performed at the corporate holding company level into LogistiCare (the "Organizational Consolidation"). LogistiCare will retain its name and continue to be headquartered in Atlanta, GA, and the Company will continue to be named The Providence Service Corporation and be listed on NASDAQ Global Select Market ("NASDAQ") under the ticker symbol "PRSC". The Organizational Consolidation is expected to be complete by the second quarter of 2019. See Note 10, *Restructuring and Related Reorganization Costs,* for further information.

Discontinued Operations

During the periods presented, the Company completed the following transactions, which resulted in the presentation of the operations as Discontinued Operations.

- On December 21, 2018, the Company completed the sale of substantially all of the operating subsidiaries of its WD Services segment to Advanced Personnel Management Global Pty Ltd of Australia ("APM") and APM UK Holdings Limited, an affiliate of APM, with the exception of the segment's employment services operations in Saudi Arabia (the "WD Services Sale"). The Company's contractual counterparties in Saudi Arabia, including an entity owned by the Saudi Arabian government, assumed these operations beginning January 1, 2019. Additionally, on June 11, 2018, the Company entered into a Share Purchase Agreement to sell Ingeus France for a de minimis amount. The sale was effective on July 17, 2018, after court approval.

- On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a 53.2% equity interest in Matrix with Providence retaining a 46.8% equity interest (the "Matrix Transaction") at the time of the transaction. Prior to the closing of the Matrix Transaction, the financial results of Matrix were included in the Company's Health Assessment Services ("HA Services") segment.

- On November 1, 2015, the Company completed the sale of its *Human Service*s segment. In addition to the results through the sale date, the Company has recorded additional expenses related to legal proceedings as described in Note 20, *Commitment and Contingencies*, related to an indemnified legal matter.

Basis of Presentation

The Company follows accounting standards set by the Financial Accounting Standards Board ("FASB"). The FASB establishes accounting principles generally accepted in the United States ("GAAP"). Rules and interpretive releases of the Securities

and Exchange Commission ("SEC") under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. References to GAAP issued by the FASB in these footnotes are to the FASB *Accounting Standards Codification* ("ASC"), which serves as a single source of authoritative non-SEC accounting and reporting standards to be applied by non-governmental entities. All amounts are presented in U.S. dollars, unless otherwise noted.

The Company holds an investment in Matrix which is accounted for using the equity method. The Company does not control the decision-making process or business management practices of Matrix. While the Company has access to certain information and performs certain procedures to review the reasonableness of information, the Company relies on management of Matrix to provide accurate financial information prepared in accordance with GAAP. The Company receives audit reports relating to such financial information from Matrix's independent auditors on an annual basis. The Company is not aware of any errors in or possible misstatements of the financial information provided by Matrix that would have a material effect on the Company's consolidated financial statements.

Reclassifications

The Company has reclassified certain amounts relating to its prior period results to conform to its current period presentation. See Note 2, *Significant Accounting Policies and Recent Accounting Pronouncements*, for additional information on reclassifications.

2. Significant Accounting Policies and Recent Accounting Pronouncements

Principles of Consolidation

The accompanying consolidated financial statements include The Providence Service Corporation, its wholly-owned subsidiaries, and entities it controls, or in which it has a variable interest and is the primary beneficiary of expected cash profits or losses. The Company records its investments in entities that it does not control, but over which it has the ability to exercise significant influence, using the equity method. The Company has eliminated significant intercompany transactions and accounts.

Accounting Estimates

The Company uses estimates and assumptions in the preparation of the consolidated financial statements in accordance with GAAP. Those estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the Company's consolidated financial statements. These estimates and assumptions also affect the reported amount of net income or loss during any period. The Company's actual financial results could differ significantly from these estimates. The significant estimates underlying the Company's consolidated financial statements include revenue recognition; allowance for doubtful accounts; accrued transportation costs; accrued restructuring; income taxes; recoverability of current and long-lived assets, including equity method investments; intangible assets and goodwill; loss contingencies; accounting for business combinations, including amounts assigned to definite and indefinite lived intangibles and contingent consideration; loss reserves for reinsurance and self-funded insurance programs; and stock-based compensation.

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances and highly liquid investments with an initial maturity of three months or less. Investments in cash equivalents are carried at cost, which approximates fair value. The Company places its temporary cash investments with high credit quality financial institutions. At times, such investments may be in excess of the federally insured limits.

Accounts Receivable and Allowance for Doubtful Accounts

The Company records accounts receivable amounts at the contractual amount, less an allowance for doubtful accounts. The Company maintains an allowance for doubtful accounts at an amount it estimates to be sufficient to cover the risk that an account will not be collected. The Company regularly evaluates its accounts receivables, especially receivables that are past due, and reassesses its allowance for doubtful accounts based on identified customer collection issues. In circumstances where the Company is aware of a customer's inability to meet its financial obligation, the Company records a specific allowance for doubtful accounts to reduce its net recognized receivable to an amount the Company reasonably expects to collect. Under certain contracts of NET Services, final payment is based on a reconciliation of actual utilization and cost, and the final reconciliation may require a considerable period of time.

The Company's provision for doubtful accounts expense from continuing operations for the years ended December 31, 2018, 2017 and 2016 was $338, $1,347 and $2,892, respectively.

Property and Equipment

Property and equipment are stated at historical cost, net of accumulated depreciation, or at fair value if the assets were initially recorded as the result of a business combination or if the asset was remeasured due to an impairment. Depreciation is calculated using the straight-line method over the estimated useful life of the asset. Maintenance and repairs are expensed as incurred. Gains and losses resulting from the disposition of an asset are reflected in operating expense.

Recoverability of Goodwill

In accordance with ASC 350, *Intangibles-Goodwill and Other*, the Company reviews goodwill for impairment annually, or more frequently, if events and circumstances indicate that an asset may be impaired. Such circumstances could include, but are not limited to: (1) the loss or modification of significant contracts, (2) a significant adverse change in legal factors or in business climate, (3) unanticipated competition, (4) an adverse action or assessment by a regulator, or (5) a significant decline in the Company's stock price. We perform the annual goodwill impairment test for all reporting units as of October 1.

First, we perform qualitative assessments for each reporting unit to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If the qualitative assessment suggests that it is more likely than not that the fair value of a reporting unit is less than its carrying value amount, then we perform a quantitative assessment and compare the fair value of the reporting unit to its carrying value.

We adopted ASU No. 2017-04, *Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* ("ASU 2017-04") effective April 1, 2017. ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with its carrying amount as part of step two of the goodwill impairment test. Instead, if we deem it necessary to perform the quantitative goodwill impairment test in an annual or interim period, we recognize an impairment charge equal to the excess, if any, of a reporting unit's carrying amount over its fair value, not to exceed the total amount of goodwill allocated to the reporting unit.

The Company estimates the fair value of the Company's reporting units using either an income approach, a market valuation approach, a transaction valuation approach or a blended approach. The income approach produces an estimated fair value of a reporting unit based on the present value of the cash flows the Company expects the reporting unit to generate in the future. Estimates included in the discounted cash flow model include the discount rate, which the Company determines based on adjusting an industry-wide weighted-average cost of capital for size, geography, and company specific risk factors, long-term rates of growth and profitability of the Company's business, working capital effects and planned capital expenditures. The market approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to comparable publicly traded entities in similar lines of business. The transaction valuation approach produces an estimated fair value of a reporting unit based on a comparison of the reporting unit to publicly available transactional data involving both publicly traded and private entities in similar lines of business. The Company's significant estimates in both the market and transaction approach include the selected similar companies with comparable business factors such as size, growth, profitability, risk and return on investment and the multiples the Company applies to revenue and earnings before interest, taxes, depreciation and amortization ("EBITDA") to estimate the fair value of the reporting unit.

Recoverability of Intangible Assets Subject to Amortization and Other Long-Lived Assets

Intangible assets subject to amortization and other long-lived assets are carried at cost and are amortized or depreciated on a straight-line basis over their estimated useful lives of 3 to 15 years. In accordance with ASC 360, *Property, Plant, and Equipment*, the Company reviews the carrying value of long-lived assets or groups of assets to be used in operations whenever events or changes in circumstances indicate that the carrying amount of the assets may be impaired. Factors that may necessitate an impairment assessment include, among others, significant adverse changes in the extent or manner in which an asset or group of assets is used, significant adverse changes in legal factors or the business climate that could affect the value of an asset or group of assets or significant declines in the observable market value of an asset or group of assets. The presence or occurrence of those events indicates that an asset or group of assets may be impaired. In those cases, the Company assesses the recoverability of an asset or group of assets by determining whether the carrying value of the asset or group of assets exceeds the sum of the projected undiscounted cash flows expected to result from the use and eventual disposition of the assets over the remaining economic life of the asset or the primary asset in the group of assets. If such testing indicates the carrying value of the asset or group of assets is not recoverable, the Company estimates the fair value of the asset or group of assets using appropriate valuation methodologies,

which would typically include an estimate of discounted cash flows. If the fair value of those assets or groups of assets is less than carrying value, the Company records an impairment loss equal to the excess of the carrying value over the estimated fair value.

Accrued Transportation Costs

Eligible members of our customers schedule transportation through the Company's central reservation system. NET Services generally contracts with third-party providers to provide transportation. The cost of transportation is recorded in the month the services are rendered, based upon contractual rates and mileage estimates. Transportation providers provide invoices once the trip is completed. Any trips that have not been invoiced require an accrual, based upon the expected cost as well as an estimate for cancellations, as the Company is generally only obligated to pay the transportation provider for completed trips. These estimates are based upon the historical trend associated with each contract's population and the transportation provider network servicing the program. There may be differences between actual invoiced amounts and estimated costs, and any resulting adjustments are included in expense. Accrued transportation costs were $84,889 and $83,588 at December 31, 2018 and 2017, respectively.

Deferred Financing Costs and Debt Discounts

The Company capitalizes direct expenses incurred in connection with its credit facilities and other borrowings, and amortizes such expenses over the life of the respective credit facility or other borrowings. Fees charged by lenders on the revolving facility and all fees charged by third parties are recorded as deferred financing costs and fees charged by lenders on term loans are recorded as a debt discount. Deferred financing costs, net of amortization, totaling $268 and $388 as of December 31, 2018 and 2017, respectively, are included in "Prepaid expenses and other" on the consolidated balance sheets.

Revenue Recognition

The Company adopted ASU No. 2014-09, *Revenue from Contracts with Customers,* effective January 1, 2018 using the modified retrospective transition method for contracts that were not completed as of January 1, 2018. See *Recent Accounting Pronouncements* below for further information on the adoption.

The Company recognizes revenue as it transfers control of promised services to its customers. The Company generates all of its revenue from contracts with customers. The amount of revenue recognized reflects the consideration to which the Company expects to be entitled in exchange for these services. The Company satisfies substantially all of its performance obligations and recognizes revenue over time instead of at points in time. See further information in Note 3, *Revenue Recognition.*

Stock-Based Compensation

The Company follows the fair value recognition provisions of ASC Topic 718 – *Compensation – Stock Compensation* ("ASC 718"), which requires companies to measure and recognize compensation expense for all share-based payments at fair value.

- The Company calculates the fair value of stock options using the Black-Scholes option-pricing formula. The fair value of non-vested restricted stock grants is determined based on the closing market price of the Company's Common Stock on the date of grant. Stock-based compensation expense charged against income for stock options and stock grants is based on the grant-date fair value. Forfeitures are recorded as they occur. The expense for stock-based compensation awards is amortized on a straight-line basis over the requisite service period, which is typically the vesting period.

- The Company records restricted stock units ("RSUs") that may be settled by the holder in cash, rather than shares, as a liability and remeasures these liabilities at fair value at the end of each reporting period. Upon settlement of these awards, the total compensation expense recorded over the vesting period of the awards will equal the settlement amount, which is based on the Company's stock price on the settlement date.

- Performance-based RSUs vest upon achievement of certain company specific performance conditions. On the date of grant, the Company determines the fair value of the performance-based award using the fair value of the Company's Common Stock at that time and assesses whether it is probable that the performance targets will be achieved. If assessed as probable, the Company records compensation expense for these awards over the requisite service period. At each reporting period, the Company reassesses the probability of achieving the performance targets and the performance period required to meet those targets. The estimation of whether the performance targets will be achieved and of the performance period required to achieve the targets requires judgment, and to the extent actual results or updated estimates differ from the Company's current estimates, the cumulative effect

on current and prior periods of those changes will be recorded in the period estimates are revised, or the change in estimate will be applied prospectively depending on whether the change affects the estimate of total compensation cost to be recognized or merely affects the period over which compensation cost is to be recognized. The ultimate number of shares issued and the related compensation expense recognized will be based on a comparison of the final performance metrics to the specified targets.

- The Company calculates the fair value of market-based stock awards using the Monte-Carlo simulation valuation model. Forfeitures are recorded as they occur. Compensation expense for market-based awards is recognized over the requisite service period regardless of whether the market conditions are expected to be achieved.

Income Taxes

Deferred income taxes are determined by the liability method in accordance with ASC Topic 740 - *Income Taxes*. Under this method, deferred tax assets and liabilities are determined based on differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes and are measured using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. The Company considers many factors when assessing the likelihood of future realization of deferred tax assets, including recent earnings experience by jurisdiction, expectations of future taxable income, and the carryforward periods available for tax reporting purposes, as well as other relevant factors. The Company establishes a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. Due to inherent complexities arising from the nature of the Company's businesses, future changes in income tax law or variances between the Company's actual and anticipated operating results, the Company makes certain judgments and estimates. Therefore, actual income taxes could materially vary from these estimates.

The Company has recorded a valuation allowance which includes amounts for certain carryforwards and deferred tax assets, as more fully described in Note 19, *Income Taxes,* for which the Company has concluded that it is more likely than not that these carryforwards and deferred tax assets will not be realized in the ordinary course of operations.

The Company recognizes interest and penalties related to income taxes as a component of income tax expense.

The Company accounts for uncertain tax positions based on a two-step process of evaluating recognition and measurement criteria. The first step assesses whether the tax position is more likely than not to be sustained upon examination by the tax authority, including resolution of any appeals or litigation, based on the technical merits of the position. If the tax position meets the more likely than not criteria, the portion of the tax benefit greater than 50% likely to be realized upon settlement with the tax authority is recognized in the consolidated financial statements.

On December 22, 2017, the U.S. bill commonly referred to as the Tax Cuts and Jobs Act ("Tax Reform Act") was enacted as more fully described in Note 19, *Income Taxes*.

Loss Reserves for Certain Reinsurance and Self-Funded Insurance Programs

The Company historically reinsured a substantial portion of its automobile, general and professional liability and workers' compensation costs under reinsurance programs primarily through the Company's wholly-owned subsidiary, Social Services Providers Captive Insurance Company ("SPCIC"), a licensed captive insurance company domiciled in the State of Arizona. As of May 16, 2017, SPCIC did not renew the expiring reinsurance policies. SPCIC will continue to resolve claims under the historical policy years.

The Company utilizes a report prepared by an independent actuary to estimate the gross expected losses related to historical automobile, general and professional and workers' compensation liability reinsurance policies, including the estimated losses in excess of SPCIC's insurance limits, which would be reimbursed to SPCIC to the extent such losses were incurred. As of December 31, 2018 and 2017, the Company had reserves of $3,900 and $6,699, respectively, for the automobile, general and professional liability and workers' compensation reinsurance policies, net of expected receivables for losses in excess of SPCIC's historical insurance limits. The gross reserve as of December 31, 2018 and 2017 of $10,489 and $12,448, respectively, is classified as "Reinsurance liability reserves" and "Other long-term liabilities" in the consolidated balance sheets. The estimated amount to be reimbursed to SPCIC as of December 31, 2018 and 2017 was $6,589 and $5,749, respectively, and is classified as "Other receivables" and "Other assets" in the consolidated balance sheets.

The Company also maintains a self-funded health insurance program with a stop-loss umbrella policy with a third-party insurer to limit the maximum potential liability for individual claims generally to $300 per person, subject to an aggregating stop-loss limit of $400. In addition, the program has a total stop-loss limit for total claims, in order to limit the Company's exposure to

catastrophic claims. With respect to this program, the Company considers historical and projected medical utilization data when estimating its health insurance program liability and related expense. As of December 31, 2018 and 2017, the Company had $2,201 and $2,229, respectively, in reserve for its self-funded health insurance programs. The reserves are classified as "Reinsurance and related liability reserves" in the consolidated balance sheets.

The Company utilizes analysis prepared by third-party administrators and independent actuaries based on historical claims information with respect to the general and professional liability coverage, workers' compensation coverage, automobile liability, automobile physical damage, and health insurance coverage to determine the amount of required reserves.

The Company regularly analyzes its reserves for incurred but not reported claims, and for reported but not paid claims related to its reinsurance and self-funded insurance programs. The Company believes its reserves are adequate. However, significant judgment is involved in assessing these reserves, such as assessing historical paid claims, average lag times between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are included in expense once a probable amount is known.

Restructuring and Related Reorganization Costs

On April 11, 2018, the Company announced the Organizational Consolidation. The Company accrued for severance and other employee separation costs under this plan when it was probable that benefits would be paid and the amount was reasonably estimable. The amounts used in determining severance accruals are based on an estimate of the salaries and related benefit costs payable and are included in accrued expenses to the extent they have not been paid. See further information in Note 10, *Restructuring and Related Reorganization Costs*.

Discontinued Operations

In determining whether a group of assets disposed (or to be disposed) of should be presented as a discontinued operation, the Company makes a determination of whether the criteria for held-for-sale classification is met and whether the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. If these determinations can be made affirmatively, the results of operations of the group of assets being disposed of (as well as any gain or loss on the disposal transaction) are aggregated for separate presentation apart from continuing operating results of the Company in the consolidated financial statements. See Note 23, *Discontinued Operations,* for a summary of discontinued operations.

Earnings Per Share

The Company computes basic earnings per share by taking net income attributable to the Company available to common stockholders divided by the weighted average number of common shares outstanding during the period, including restricted stock and stock held in escrow if such shares are participating securities. Diluted earnings per share includes the potential dilution that may occur from stock-based awards and other stock-based commitments using the treasury stock or the as-if converted methods, as applicable. For additional information on how the Company computes earnings per share, see Note 16, *Earnings Per Share*.

Recent Accounting Pronouncements

The Company adopted the following accounting pronouncements during the year ended December 31, 2018:

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers* (Topic 606) ("ASU 2014-09"). ASU 2014-09 introduced FASB Accounting Standards Codification Topic 606 ("ASC 606"), which replaced historical revenue recognition guidance and is intended to improve and converge with international standards the financial reporting requirements for revenue from contracts with customers. The core principle of ASC 606 is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. ASC 606 also requires additional disclosures about the nature, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. ASU 2014-09 allows for adoption either on a full retrospective basis to each prior reporting period presented or on a modified retrospective basis with the cumulative effect of initially applying the new guidance recognized at the date of initial application. The Company adopted ASU 2014-09 effective January 1, 2018 using the modified retrospective transition method for contracts that were not completed as of January 1, 2018.

The Company recognized the cumulative effect of initially applying the new revenue standard as an adjustment to the opening balance of retained earnings. These impacts related to our WD Services segment, which has since met the criteria for classification as discontinued operations. Upon adoption of ASU 2014-09, the cumulative effect of the changes made to the Company's consolidated balance sheet as of January 1, 2018 were as follows:

	Balance at December 31, 2017	Adjustments due to ASU 2014-09	Balance at January 1, 2018
Assets			
Current assets of discontinued operations	$ 104,024	$ 11,182	$ 115,206
Liabilities			
Current liabilities of discontinued operations	61,643	5,442	67,085
Noncurrent liabilities of discontinued operations	7,565	30	7,595
Equity			
Retained earnings, net of tax	204,818	5,710	210,528

The impact of applying the new revenue recognition guidance on the Company's consolidated statement of operations for the year ended December 31, 2018 was as follows:

	Year ended December 31, 2018	
	As Reported	Pro forma as if the previous accounting guidance was in effect
Service revenue, net	$ 1,384,965	$ 1,400,453
Service expense	1,284,603	1,300,091
Operating income	24,276	24,276

There was no impact of applying the new revenue recognition guidance on the Company's consolidated balance sheet at December 31, 2018, as any assets and liabilities impacted by the guidance were sold in the WD Services Sale. The comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. See further information in Note 3, *Revenue Recognition*.

In August 2016, the FASB issued ASU No. 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments* ("ASU 2016-15"). ASU 2016-15 provides guidance for eight targeted changes with respect to how cash receipts and cash payments are classified in the statements of cash flows, with the objective of reducing diversity in practice. ASU 2016-15 is effective for financial statements issued for fiscal years beginning after December 15, 2017, with early adoption permitted. The Company adopted ASU 2016-15 on January 1, 2018. The adoption did not have a significant impact on the Company's consolidated financial statements.

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* ("ASU 2016-18"). ASU 2016-18 requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for public entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period; however, any adjustments must be reflected as of the beginning of the fiscal year that includes that interim period. ASU 2016-18 must be adopted retrospectively. The Company adopted ASU 2016-18 on January 1, 2018. As a result of the adoption of ASU 2016-18, the Company recast its consolidated statement of cash flows for the years ended December 31, 2017 and 2016. The recast resulted in an increase in cash used in investing activities of $7,834 for the year ended December 31, 2017. The recast resulted in a decrease in cash provided by investing activities of $5,926 for the year ended December 31, 2016. See additional information in Note 4, *Cash, Cash Equivalents and Restricted Cash.*

In May 2017, the FASB issued ASU No. 2017-09, *Compensation–Stock Compensation (Topic 718): Scope of Modification Accounting* ("ASU 2017-09"). ASU 2017-09 provides guidance about which changes to the terms of a share-based payment award should be accounted for as a modification. A change to an award should be accounted for as a modification unless the fair value of the

modified award is the same as the original award, the vesting conditions do not change, and the classification as an equity or liability instrument does not change. This guidance is effective for fiscal years beginning after December 15, 2017. Early

adoption is permitted. The Company adopted ASU 2017-09 on January 1, 2018. The adoption of ASU 2017-09 did not have a material impact on the Company's consolidated financial statements.

Recent accounting pronouncements that were not yet adopted by the Company through December 31, 2018 are as follows:

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* ("ASU 2016-02"). ASU 2016-02 introduced FASB Accounting Standards Codification Topic 842 ("ASC 842"), which will replace ASC 840, *Leases*. In July 2018, the FASB issued ASU No. 2018-10, *Codification Improvements to Topic 842 (Leases)* ("ASU 2018-10"), which provides narrow amendments to clarify how to apply certain aspects of the new lease standard. Additionally, in July 2018, the FASB issued ASU No. 2018-11, *Leases (Topic 842): Targeted Improvements* ("ASU 2018-11"). ASU 2018-11 provides a new transition method and a practical expedient for separating components of a contract.

ASC 842 is effective for publicly held entities for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. Lessees may apply a modified retrospective transition approach for leases existing at, or entered after, the beginning of the earliest comparative period presented in the financial statements, or lessees may initially apply the new lease standard at the adoption date and recognize a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption.

The Company has not entered into significant lease agreements in which it is the lessor; however, the Company does have lease agreements in which it is the lessee. Under ASC 842, lessees will be required to recognize a lease liability and right-of-use asset for all leases (with the exception of short-term leases) at the commencement date. The Company will apply the modified retrospective transition method and elect the transition option to use the effective date of January 1, 2019 as the date of initial application. The Company will recognize the cumulative effect of the transition adjustment as of the effective date and will not provide any new lease disclosures for periods before the effective date. With respect to the practical expedients, the Company will elect the package of practical expedients and the practical expedient not to separate lease and non-lease components. The Company will not apply the use of hindsight practical expedient. Based on the Company's current portfolio of leases, the Company expects $24,000 to $28,000 of additional leased assets and liabilities will be recognized on its consolidated balance sheet. The Company does not expect a material impact on the statement of operations.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments - Credit Losses (Topic 326)* ("ASU 2016-13"). The amendments in ASU 2016-13 will supersede or clarify much of the existing guidance for reporting credit losses for assets held at amortized cost basis and available for sale debt securities. The amendments in ASU 2016-13 affect loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. ASU 2016-13 is effective for financial statements issued for fiscal years beginning after December 15, 2019, with early adoption permitted for fiscal years beginning after December 15, 2018. The Company is currently evaluating the impact of ASU 2016-13 on its consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement* ("ASU 2018-13"). ASU 2018-13 removes certain disclosures, modifies certain disclosures and added additional disclosures. The standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. Certain disclosures in ASU 2018-13 would need to be applied on a retrospective basis and others on a prospective basis. The Company is currently evaluating the impact of ASU 2018-13 on its consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-15, *Intangibles-Goodwill and Other-Internal-Use Software: Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract* ("ASU 2018-15"), which will align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The standard is effective for fiscal years beginning after December 15, 2019, with early adoption permitted. The Company is currently evaluating the impact of ASU 2018-15 on its consolidated financial statements.

In August 2018, the SEC adopted the final rule under SEC Release No. 33-10532, Disclosure Update and Simplification, amending certain disclosure requirements that were redundant, duplicative, overlapping, outdated or superseded. In addition, the amendments expanded the disclosure requirements on the analysis of stockholders' equity for interim financial statements. Under the amendments, an analysis of changes in each caption of stockholders' equity presented in the balance sheet must be provided in a note or separate statement. The analysis should present a reconciliation of the beginning balance to the ending balance of each period for which a statement of comprehensive income is required to be filed. The final rule is effective on November 5, 2018. The Company will adopt this new rule beginning with its financial reporting for the quarter ending March 31, 2019. Upon adoption,

the Company will include its Consolidated Statements of Stockholders' Equity with each filing of a Quarterly Report on Form 10-Q.

3. Revenue Recognition

Under ASC 606, the Company recognizes revenue as it transfers control of promised services to its customers. The Company generates all of its revenue from contracts with customers. The amount of revenue recognized reflects the consideration to which the Company expects to be entitled in exchange for these services. The Company satisfies substantially all of its performance obligations and recognizes revenue over time instead of at points in time.

Disaggregation of Revenue

The following table summarizes disaggregated revenue from contracts with customers for the year ended December 31, 2018 by contract type for NET Services:

State Medicaid agency contracts	$	732,261
Managed care organization contracts		652,704
Total NET Services revenue, net	$	1,384,965

Capitated contracts	$	1,096,822
Non-capitated contracts		288,143
Total NET Services revenue, net	$	1,384,965

NET Services provides non-emergency transportation services pursuant to contractual commitments over defined service delivery periods. For most contracts, NET Services arranges for transportation of members through its network of independent transportation providers, whereby it remits payment to the transportation providers. However, for certain contracts, NET Services only provides administrative management services to support the customers' efforts to serve its clients, and the amount of revenue recognized is based upon the management fee earned.

These contracts typically include single performance obligations under which NET Services stands ready to deliver management, fulfillment and record-keeping related to non-emergency transportation services. Transportation management services include, but are not limited to, fraud, waste, and abuse and utilization review programs as well as compliance controls. NET Services' performance obligations consist of a series of distinct services that are substantially the same and which are transferred to the customer in the same manner. In most cases, NET Services is the principal in its arrangements because it controls the services before transferring those services to the customer.

NET Services primarily uses the 'as invoiced' practical expedient to recognize revenue because it typically has the right to consideration from customers in an amount that corresponds directly with the value of its performance to date. This is consistent with NET Services' historical revenue recognition policy. NET Services recognizes revenue for some of its contracts that include variable consideration using a time-elapsed measure when the fees earned relate directly to services performed in the period. Because most contracts include termination for convenience clauses with required notice periods of less than one year, most NET Services contracts are deemed to be short-term in nature.

Some of NET Services' contracts include provisions whereby it must provide certain levels of service or face potential penalties or be required to refund fees paid by the customer. For those contracts, NET Services records a provision to reduce revenue to reflect the amount to which it expects it will ultimately be entitled.

The only financial impact for NET Services of adopting ASU 2014-09 was the determination it is the agent under one of its contracts based on the new guidance, whereas it previously considered itself the principal in the arrangement. Consequently, NET Services now recognizes revenue under the specific contract on a net basis, which resulted in reduced revenue and service expense of $15,488 during the year ended December 31, 2018.

During the year ended December 31, 2018, NET Services recognized $5,685 from performance obligations satisfied in previous periods due to the resolution of contractual adjustments agreed with the customer.

Related Balance Sheet Accounts

Accounts receivable, net - The following table provides information about accounts receivable, net as of December 31, 2018 and 2017:

	December 31, 2018	December 31, 2017
Accounts receivable	$ 101,340	$ 73,416
NET Services' reconciliation contract receivable	48,270	42,054
Allowance for doubtful accounts	(1,854)	(5,262)
	$ 147,756	$ 110,208

NET Services accrued contract payments - Includes liabilities related to certain contracts of NET Services for which final payment is based on a reconciliation of actual utilization and cost, and the final reconciliation may require a considerable period of time. The balance is included in "Accrued expenses" in the consolidated balance sheets. The balance at December 31, 2018 and 2017 totaled $9,756 and $17,487, respectively.

Deferred revenue - Includes funds received for certain services in advance of services being rendered. The balance of current deferred revenue at December 31, 2018 and December 31, 2017 totaled $562 and $3,019, respectively. The balance of noncurrent deferred revenue was $963 at December 31, 2018, and is included in "Other long-term liabilities" on the consolidated balance sheet. The decrease in the total deferred revenue balance from December 31, 2017 to December 31, 2018 is primarily driven by cash payments received or due in advance of satisfying our performance obligations. During the year ended December 31, 2018, $3,019 of revenue deferred as of December 31, 2017 was recognized.

Practical Expedients, Exemptions and Other Matters

We do not incur significant sales commission expenses. Any amounts are expensed as incurred. These costs are recorded within service expense in the consolidated statements of operations.

The Company generally expects the period of time from when it transfers a promised service to a customer and when the customer pays for the service to be one year or less, and thus we do not have a significant financing component for our contracts with customers.

We do not disclose the value of unsatisfied performance obligations for (i) contracts with an original expected length of one year or less; (ii) contracts for which we recognize revenue at the amount to which we have the right to invoice for services performed; or (iii) contracts for which the variable consideration is allocated entirely to a wholly unsatisfied performance obligation or to a wholly unsatisfied promise to transfer a distinct good or service that forms part of a single performance obligation, and the terms of the variable consideration relate specifically to our efforts to transfer the distinct service or to a specific outcome from transferring the distinct service.

4. Cash, Cash Equivalents and Restricted Cash

The following table provides a reconciliation of cash, cash equivalents and restricted cash reported within the consolidated balance sheets to the amounts shown in the consolidated statements of cash flows:

	December 31,	
	2018	2017
Cash and cash equivalents	$ 5,678	$ 52,798
Restricted cash, current	1,482	1,091
Current assets of discontinued operations	2,321	42,512
Restricted cash, less current portion	2,886	5,205
Cash, cash equivalents and restricted cash	$ 12,367	$ 101,606

Restricted cash primarily relates to amounts held in trusts for reinsurance claims losses under the Company's captive insurance operation for historical workers' compensation, general and professional liability and auto liability reinsurance programs, as well as amounts restricted for withdrawal under our self-insured medical and benefits plans. Current assets of discontinued

operations principally reflects the cash position of WD Services operations in Saudi Arabia, which was not sold as part of the WD Services Sale. Such cash will be used to fund the shut-down costs of this operation as needed.

5. Equity Investment

Matrix

Prior to the closing of the Matrix Transaction on October 19, 2016, the financial results of Matrix were included in the Company's HA Services segment. Subsequent to the closing of the Matrix Transaction, the Company owned a 46.8% noncontrolling interest in Matrix. As of December 31, 2018, the Company owned a 43.6% noncontrolling interest in Matrix. Pursuant to a Shareholder's Agreement, affiliates of Frazier Healthcare Partners hold rights necessary to control the fundamental operations of Matrix. The Company accounts for this investment in Matrix under the equity method of accounting and the Company's share of Matrix's income or losses are recorded as "Equity in net loss (gain) of investees" in the accompanying consolidated statements of operations.

The carrying amount of the assets included in the Company's consolidated balance sheets and the maximum loss exposure related to the Company's interest in Matrix as of December 31, 2018 and 2017 totaled $161,503 and $169,699, respectively.

Summary financial information for Matrix on a standalone basis is as follows:

	December 31,	
	2018	2017
Current assets	$ 61,565	$ 37,563
Long-term assets	719,450	597,613
Current liabilities	27,619	27,718
Long-term liabilities	373,159	240,513

	Year ended December 31, 2018	Year ended December 31, 2017	October 19, 2016 through December 31, 2016
Revenue	$ 282,067	$ 227,872	$ 41,635
Operating (loss) income	(1,186)	11,870	(4,079)
Net (loss) income	(19,962)	26,665	(4,200)

Included in Matrix's standalone net loss of $19,962 for the year ended December 31, 2018 are depreciation and amortization of $43,119, integration costs of $6,524, equity compensation of $2,698, management fees paid to Matrix's shareholders of $4,887, merger and acquisition due diligence related costs of $2,341, transaction related costs of $1,010, interest expense of $25,942, including debt transaction costs and the write-off of deferred financing fees of $3,748, and an income tax benefit of $7,166.

Included in Matrix's standalone net income of $26,665 for the year ended December 31, 2017 are depreciation and amortization of $33,512, transaction related expenses of $3,537, which includes $2,679 of transaction incentive compensation, equity compensation of $2,639, management fees paid to Matrix's shareholders of $2,331, acquisition related costs of $412, interest expense of $14,818 and an income tax benefit of $29,613. The income tax benefit primarily related to the re-measurement of deferred tax liabilities arising from a lower U.S. corporate tax rate as a result of the Tax Reform Act.

Included in Matrix's standalone net loss of $4,200 for the year ended December 31, 2016 are depreciation and amortization of $6,356, transaction related expenses of $6,367, which includes $4,033 of transaction incentive compensation, equity compensation of $407, management fees paid to Matrix's shareholders of $396, interest expense of $2,949 and an income tax benefit of $2,828.

See Note 23, *Discontinued Operations*, for Matrix's January 1, 2016 through October 19, 2016 results of operations.

6. Prepaid Expenses and Other

Prepaid expenses and other were comprised of the following:

	December 31,	
	2018	2017
Prepaid income taxes	$ 35,207	$ 254
Escrow funds	—	10,000
Prepaid insurance	1,308	1,765
Note receivable	—	3,224
Prepaid rent	828	722
Other	6,824	6,494
Total prepaid expenses and other	$ 44,167	$ 22,459

Escrow funds at December 31, 2017 represented amounts related to indemnification claims from the sale of the Human Services segment. The escrow funds were used during the year ended December 31, 2018 to satisfy a portion of the Company's settlement of indemnification claims. See Note 20, *Commitments and Contingencies*, for further information.

7. Property and Equipment

Property and equipment consisted of the following:

	Estimated Useful Life (years)			December 31,	
				2018	2017
Computer and telecom equipment	3	—	5	$ 29,883	$ 27,742
Software	3	—	5	24,318	22,256
Leasehold improvements	Shorter of 7 years or lease term			8,078	7,599
Furniture and fixtures	5	—	10	1,942	2,351
Automobiles	5			3,666	3,209
Construction and development in progress	N/A			299	12,579
				68,186	75,736
Less accumulated depreciation				45,221	38,064
Total property and equipment, net				$ 22,965	$ 37,672

Depreciation expense from continuing operations was $12,058, $10,717 and $9,900 for the years ended December 31, 2018, 2017 and 2016, respectively.

Following the acquisition of Circulation and an analysis of the technology capabilities and scalability of the Circulation platform, the Company determined it would not continue the development of the LCAD NextGen technology ("NextGen"). The Company also determined it would not place any of the developed NextGen technology into service, and recorded an asset impairment charge of $13,496 related to its NET Services segment during the fourth quarter of 2018. In addition, the Company had previously recorded an impairment of $679 during the second quarter of 2018 in relation to the decision to abandon specific development work intended to synchronize data across applications of the proprietary NextGen systems, based on the determination of an alternative method to accomplish this task. The total impairment charge of $14,175 is reflected in "Asset impairment charge" in the consolidated statement of operations for the year ended December 31, 2018. As of December 31, 2017, construction in progress was primarily comprised of the software development costs for NextGen.

8. Goodwill and Intangibles

Impairment

The Company did not record any goodwill or intangible asset impairment charges for continuing operations for the years ended December 31, 2018, 2017 and 2016.

Goodwill

There were no changes in goodwill from December 31, 2016 to December 31, 2017. Changes in goodwill were as follows for the period from December 31, 2017 to December 31, 2018:

	NET Services
Balances at December 31, 2017	
Goodwill	$ 191,215
Accumulated impairment losses	(96,000)
	95,215
Acquisition of Circulation	40,001
Balances at December 31, 2018	
Goodwill	231,216
Accumulated impairment losses	(96,000)
	$ 135,216

The total amount of goodwill from continuing operations that was deductible for income tax purposes related to acquisitions as of December 31, 2018 and 2017 was $29 for each year.

Intangible Assets

Intangible assets are comprised of acquired customer relationships, trademarks and trade names, and developed technology. Intangible assets consisted of the following:

		December 31,			
		2018		2017	
	Estimated Useful Life (Yrs)	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Customer relationships	15	$ 43,800	$ (32,515)	$ 43,800	$ (29,635)
Developed technology of Circulation	5	14,100	(705)	—	—
Customer relationships of Circulation	3	1,400	(117)	—	—
Trademarks and trade names of Circulation	3	200	(17)	—	—
Total		$ 59,500	$ (33,354)	$ 43,800	$ (29,635)

The weighted-average amortization period at December 31, 2018 for intangibles was 12.3 years. No significant residual value is estimated for these intangible assets. Amortization expense from continuing operations was $3,755, $2,901 and $2,881 for the years ended December 31, 2018, 2017 and 2016, respectively.

The Company acquired Circulation in September 2018, which resulted in the increase of intangible assets from December 31, 2017 to December 31, 2018. See additional discussion of the Circulation acquisition in Note 22, *Acquisitions*.

The total amortization expense is estimated to be as follows for the next five years as of December 31, 2018:

Year	Amount
2019	$ 6,234
2020	6,234
2021	6,101
2022	5,461
2023	2,116
Total	$ 26,146

9. Accrued Expenses

Accrued expenses consisted of the following:

	December 31,	
	2018	2017
Accrued compensation and related	$ 11,050	$ 18,816
NET Services accrued contract payments	9,756	17,487
Accrued settlement	—	15,000
Accrued cash settled stock-based compensation	3,719	3,938
Income taxes payable	—	1,959
Other	14,666	14,443
Total accrued expenses	$ 39,191	$ 71,643

The accrued settlement at December 31, 2017 represented amounts related to indemnification claims from the sale of the Human Services segment, which was completed on November 1, 2015. The settlement was finalized during the year ended December 31, 2018, which resulted in the payment of the accrued settlement amount, in which $10,000 was released from an escrow account and $4,475 was paid in cash. See Note 20, *Commitments and Contingencies*, for further information.

10. Restructuring and Related Reorganization Costs

Corporate and Other

On April 11, 2018, the Company announced the Organizational Consolidation, which involves transferring all job responsibilities previously performed by employees of the holding company to LogistiCare, and closing the current corporate offices in Stamford, Connecticut and Tucson, Arizona. The Company adopted an employee retention plan designed to incentivize current holding company level employees to remain employed with the Company during the transition. The employee retention plan became effective on April 9, 2018 and covers the holding company level employees and provides for certain payments and benefits to be provided to the employees if they remain employed with the Company through a retention date established for each individual, subject to a fully executed retention letter. The Organizational Consolidation is expected to be completed by the end of the second quarter of 2019.

As of December 31, 2018, the Company estimates that it will incur aggregate pre-tax restructuring charges of approximately $12,200 through June 30, 2019 in connection with the Organizational Consolidation discussed above. These charges include approximately $7,100 related to retention and personnel costs, $2,000 related to acceleration of stock-based compensation, $600 related to accelerated depreciation and $2,500 related to other costs, including lease termination and recruiting costs. A total of $8,797 restructuring and related costs has been incurred during the year ended December 31, 2018 related to the Organizational Consolidation. These costs include $5,098 of retention and personnel costs, $1,731 of accelerated stock-based compensation expense, $436 of accelerated depreciation and $1,532 of other costs, primarily related to recruiting and legal costs. These costs are recorded as “General and administrative expense” and “Depreciation and amortization” in the accompanying consolidated statements of operations. The Company’s estimate is subject to change, as it is based upon assumptions for the sublease of office space in Stamford, Connecticut and Tucson, Arizona, as well as other factors.

Summary of Liability for Corporate and Other Restructuring and Related Charges

	January 1, 2018	Costs Incurred	Cash Payments	December 31, 2018
Retention and personnel liability	$ —	$ 5,098	$ (3,142)	$ 1,956
Other liability	—	1,532	(1,134)	398
Total	$ —	$ 6,630	$ (4,276)	$ 2,354

The total restructuring liability at December 31, 2018 includes $2,124 classified as "Accrued expenses" and $230 classified as "Accounts payable" in the consolidated balance sheet.

11. Debt

The Company's debt was as follows:

	December 31, 2018	December 31, 2017
$200,000 revolving loan, LIBOR plus 2.25% - 3.25% with interest payable at least once every three months through August 2019	$ —	$ —
Capital lease obligations	1,071	2,984
	1,071	2,984
Less current portion of debt	718	2,400
Total debt, less current portion	$ 353	$ 584

Annual maturities of revolving loan and capital lease obligations as of December 31, 2018 are as follows:

Year	Amount
2019	$ 718
2020	308
2021	45
Total	$ 1,071

Credit Facility

The Company is a party to the amended and restated credit and guaranty agreement, dated as of August 2, 2013 (as amended, the "Credit Agreement"), with Bank of America, N.A., as administrative agent, swing line lender and letter of credit issuer, and the other lenders party thereto. The Credit Agreement provides the Company with a $200,000 revolving credit facility (the "Credit Facility"), including a sub-facility of $25,000 for letters of credit. On June 7, 2018, the Company and certain of its subsidiaries entered into the Fifth Amendment to the Amended and Restated Credit and Guaranty Agreement (the "Amendment"), amending the Amended and Restated Credit and Guaranty Agreement dated as of August 2, 2013 (as amended to date, the "Credit Agreement"), by and among the Company, the guarantors from time to time party thereto, the lenders from time to time party thereto and Bank of America, N.A. as administrative agent. The Amendment (i) extended the maturity date of the Credit Agreement to August 2, 2019 and (ii) amended certain covenants under the Credit Agreement to provide for greater operational, financial and strategic flexibility, including the implementation of the Company's Organizational Consolidation.

As of December 31, 2018, the Company had borrowings of $0 and ten letters of credit outstanding in the amount of $12,338 under the revolving credit facility. At December 31, 2018, the Company's available credit under the revolving credit facility was $187,662. Under the Credit Agreement, the Company has an option to request an increase in the amount of the revolving credit facility from time to time (on substantially the same terms as apply to the existing facilities) in an aggregate amount of up to $75,000 with either additional commitments from lenders under the Credit Agreement at such time or new commitments from

financial institutions acceptable to the administrative agent in its reasonable discretion, so long as no default or event of default exists at the time of any such increase. The Company may not be able to access additional funds under this increase option as no lender is obligated to participate in any such increase under the Credit Facility. The Credit Agreement has a maturity date of August 2, 2019.

Interest on the outstanding principal amount of loans accrues, at the Company's election, at a per annum rate equal to LIBOR, plus an applicable margin, or the base rate as defined in the agreement plus an applicable margin. The applicable margin ranges from 2.25% to 3.25% in the case of LIBOR loans and 1.25% to 2.25% in the case of the base rate loans, in each case, based on the Company's consolidated leverage ratio as defined in the Credit Agreement. Interest on the loans is payable quarterly in arrears. In addition, the Company is obligated to pay a quarterly commitment fee based on a percentage of the unused portion of each lender's commitment under the Credit Facility and quarterly letter of credit fees based on a percentage of the maximum amount available to be drawn under each outstanding letter of credit. The commitment fee and letter of credit fee range from 0.25% to 0.50% and 2.25% to 3.25%, respectively, in each case, based on the Company's consolidated leverage ratio.

The Company's obligations under the Credit Facility are guaranteed by all of the Company's present and future domestic subsidiaries, excluding certain domestic subsidiaries which include the Company's insurance captive and the Company's investment in Matrix. The Company's obligations under, and each guarantor's obligations under its guaranty of, the Credit Facility are secured by a first priority lien on substantially all of the Company's respective assets, including a pledge of 100% of the issued and outstanding stock of the Company's domestic subsidiaries, excluding the Company's insurance captive.

The Credit Agreement contains customary affirmative and negative covenants and events of default. The negative covenants include restrictions on the Company's ability to, among other things, incur additional indebtedness, create liens, make investments, give guarantees, pay dividends, sell assets, and merge and consolidate. The Company is subject to financial covenants, including consolidated net leverage and consolidated interest coverage covenants.

Capital Leases

We have capital leases for information technology hardware and software with termination dates ranging from January 2018 through October 2020. The terms of the leases are between 12 and 36 months, with interest recorded at an incremental borrowing rate of 3.28%. At December 31, 2018, $1,894 represents the hardware and software under capital leases and $673 represents the related accumulated depreciation.

12. Convertible Preferred Stock, Net

The Company completed a rights offering on February 5, 2015 (the "Rights Offering") providing all of the Company's existing common stockholders the non-transferrable right to purchase their pro rata share of $65,500 of convertible preferred stock at a price equal to $100.00 per share ("Preferred Stock"). The Preferred Stock is convertible into shares of Providence's common stock, $0.001 par value per share ("Common Stock") at a conversion price equal to $39.88 per share, which was the closing price of the Company's Common Stock on NASDAQ on October 22, 2014.

Stockholders exercised subscription rights to purchase 130,884 shares of the Company's Preferred Stock. Pursuant to the terms and conditions of the Standby Purchase Agreement (the "Standby Purchase Agreement") between Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Blackwell Partners, LLC - Series A and Coliseum Capital Co-Invest, L.P. (collectively, the "Coliseum Stockholders") and the Company, the remaining 524,116 shares of the Company's Preferred Stock were purchased by the Coliseum Stockholders at the $100.00 per share subscription price. The Company received $65,500 in aggregate gross proceeds from the consummation of the Rights Offering and Standby Purchase Agreement. Additionally, on March 12, 2015, the Coliseum Stockholders exercised their right to purchase an additional 150,000 shares of the Company's Preferred Stock, at a purchase price of $105.00 per share or a total purchase price of $15,750, of the same series and having the same conversion price as the Preferred Stock sold in the Rights Offering.

The Company may pay a noncumulative cash dividend on each share of Preferred Stock, if and when declared by a committee of its Board of Directors ("Board"), at the rate of five and one-half percent (5.5%) per annum on the liquidation preference then in effect. On or before the third business day immediately preceding each fiscal quarter, the Company must determine its intention whether or not to pay a cash dividend with respect to that ensuing quarter and will give notice of its intention to each holder of Preferred Stock as soon as practicable thereafter.

In the event the Company does not declare and pay a cash dividend, the Company will declare a payment-in-kind ("PIK") dividend by increasing the liquidation preference of the convertible Preferred Stock to an amount equal to the liquidation preference in effect at the start of the applicable dividend period, plus an amount equal to the liquidation preference then in effect multiplied

by eight and one-half percent (8.5%) per annum, computed on the basis of a 365-day year and the actual number of days elapsed from the start of the applicable dividend period to the applicable date of determination.

All holders of the Company's Preferred Stock are able to convert their Preferred Stock into shares of Common Stock at a rate of approximately 2.51 shares of Common Stock for each share of Preferred Stock. As of December 31, 2018, a total of 3,394 shares of Preferred Stock have been converted to 8,503 shares of Common Stock.

Cash dividends are payable quarterly in arrears on January 1, April 1, July 1 and October 1 of each year, and commenced on April 1, 2015, and, if declared, begin to accrue on the first day of the applicable dividend period. PIK dividends, if applicable, accrue cumulatively on the same schedule as set forth above for cash dividends and are also compounded at the applicable annual rate on each applicable subsequent dividend date. Cash dividends on redeemable convertible preferred stock totaling $4,413, or $5.50 per share, $4,418, or $5.50 per share, and $4,419, or $5.50 per share, were distributed to convertible preferred stockholders for the years ended December 31, 2018, 2017 and 2016, respectively.

The Preferred Stock is accounted for outside of stockholders' equity as it may be redeemed upon certain change in control events that are not solely in the control of the Company. Dividends are recorded in stockholders' equity and consist of the 5.5%/8.5% dividend. Certain other provisions apply in certain change in control events.

The following table summarizes the Preferred Stock activity for the years ended December 31, 2018 and 2017:

	Dollar Value	Share Count
Balance at December 31, 2016	$ 77,565	803,398
Conversion to common stock	(20)	(198)
Allocation of issuance costs	1	—
Balance at December 31, 2017	$ 77,546	803,200
Conversion to common stock	(161)	(1,594)
Allocation of issuance costs	7	—
Balance at December 31, 2018	$ 77,392	801,606

As of December 31, 2018 and 2017, the outstanding shares of Preferred Stock were convertible into 2,010,045 and 2,014,042 shares of Common Stock, respectively.

13. Stockholders' Equity

At December 31, 2018 and 2017 there were 17,784,769 and 17,473,598 shares of the Company's Common Stock issued, respectively, including 4,970,093 and 4,126,132 treasury shares at December 31, 2018 and 2017, respectively.

Subject to the rights specifically granted to holders of any then outstanding shares of the Company's Preferred Stock, the Company's common stockholders are entitled to vote together as a class on all matters submitted to a vote of the Company's common stockholders, and are entitled to any dividends that may be declared by the Board. The Company's common stockholders do not have cumulative voting rights. Upon the Company's dissolution, liquidation or winding up, holders of the Company's Common Stock are entitled to share ratably in the Company's net assets after payment or provision for all liabilities and any preferential liquidation rights of the Company's Preferred Stock then outstanding. The Company's common stockholders do not have preemptive rights to purchase shares of the Company's stock. The issued and outstanding shares of the Company's Common Stock are not subject to any redemption provisions and are not convertible into any other shares of the Company's capital stock. The rights, preferences and privileges of holders of the Company's Common Stock will be subject to those of the holders of any shares of the Company's Preferred Stock the Company may issue in the future.

The following table reflects the total number of shares of the Company's Common Stock reserved for future issuance as of December 31, 2018:

Shares of common stock reserved for:	
Exercise of stock options and restricted stock awards	960,719
Conversion of preferred stock to common stock	2,010,045
Total shares of common stock reserved for future issuance	2,970,764

Share Repurchases

On November 4, 2015, the Board authorized the Company to engage in a repurchase program to repurchase up to $70,000 in aggregate value of the Company's Common Stock during the twelve-month period following November 4, 2015. This plan terminated on November 3, 2016. A total of 1,360,249 shares were purchased through this plan for $62,981, excluding commission payments.

On October 26, 2016, the Board authorized a new repurchase program, under which the Company may repurchase up to $100,000 in aggregate value of the Company's Common Stock during the twelve-month period following October 26, 2016. Through October 26, 2017, a total of 770,808 shares were purchased through this plan for $30,360, excluding commission payments.

On November 2, 2017, the Board approved the extension of the Company's October 26, 2016 stock repurchase program, authorizing the Company to engage in a repurchase program to repurchase up to $69,640 (the amount remaining from the $100,000 repurchase amount authorized in 2016) in aggregate value of our Common Stock through December 31, 2018. Subsequently, on March 29, 2018, the Board authorized an increase in the amount available for stock repurchases under the Company's existing stock repurchase program by $77,800, and extended the existing stock repurchase program through June 30, 2019. As of December 31, 2018, 1,018,989 shares were purchased under this plan after it was extended on November 2, 2017 for $66,256, excluding commission payments.

During the years ended December 31, 2018, 2017 and 2016, the Company withheld 5,242, 19,556 and 2,736 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations arising from vesting of restricted stock awards. In addition, during the years ended December 31, 2018 and 2017, the Company withheld 12,676 and 5,665 shares, respectively, from employees to cover the settlement of income tax and related benefit withholding obligations and the exercise price upon the exercise of stock options.

14. Stock-Based Compensation and Similar Arrangements

The Company provides stock-based compensation to employees, non-employee directors, consultants and advisors under the Company's 2006 Long-Term Incentive Plan ("2006 Plan"). The 2006 Plan allows the flexibility to grant or award stock options, stock appreciation rights, restricted stock, unrestricted stock, stock units including restricted stock units and performance awards to eligible persons.

The following table summarizes the activity under the 2006 Plan as of December 31, 2018:

	Number of shares of the Company's Common Stock authorized for issuance	Number of shares of the Company's Common Stock remaining for future grants	Number of shares of the Company's Common Stock subject to	
			Stock Options	Stock Grants
2006 Plan	5,400,000	1,356,820	908,588	52,131

The following table reflects the amount of stock-based compensation, for share settled awards issued to employees and non-employee directors, recorded in each financial statement line item for the years ended December 31, 2018, 2017 and 2016:

	Year Ended December 31,		
	2018	2017	2016
Service expense	$ 950	$ 434	$ 841
General and administrative expense	8,037	7,052	4,324
Equity in net loss (gain) of investees	137	76	18
(Loss) income from discontinued operations, net of tax	6	57	(29)
Total stock-based compensation	$ 9,130	$ 7,619	$ 5,154

Stock-based compensation included in service expense is related to the NET Services segment, whereas the amount included in equity in net loss (gain) of investees is related to the Matrix Investment segment, as a member of Matrix management continues to hold Providence equity awards.

The amounts above exclude tax benefits of $1,888, $2,885 and $2,072 for the years ended December 31, 2018, 2017 and 2016, respectively.

Stock Options

During the year ended December 31, 2016, the Company did not grant any stock options. The fair value of each stock option awarded to employees is estimated on the date of grant using the Black-Scholes option-pricing formula based on the following assumptions for the years ended December 31, 2018 and 2017:

	Year Ended December 31,					
	2018			2017		
Expected dividend yield	0.0%			0.0%		
Expected stock price volatility	26.47%	—	39.83%	19.5%	—	42.95%
Risk-free interest rate	2.26%	—	2.91%	1.0%	—	2.23%
Expected life of options (years)	1.29	—	6.50	0.03	—	6.50

The risk-free interest rate was based on the U.S. Treasury security rate in effect as of the date of grant which corresponds to the expected life of the award. The expected stock price volatility was based on the Company's historical data. The expected lives of options were based on the Company's historical data, a simplified method for plain vanilla options, or the Company's best estimate where appropriate. The simplified method was used for plain vanilla options for which the Company did not have sufficient historical data to use in determining the expected life.

In connection with the Organizational Consolidation, on April 9, 2018, the Company entered into an agreement with R. Carter Pate for his continued employment as the Company's Interim CEO through June 30, 2019. The agreement also provided for a grant of unvested options to purchase up to 394,000 shares of the Company's common stock, at a price of $71.67 per share, which was the closing price of the Company's common stock on the grant date. The options are subject to vesting as follows: (i) 50% of the options will become vested if Mr. Pate remains employed by the Company through June 30, 2019 (the "Time-Vesting Options"), (ii) 25% of the options will become vested on March 31, 2019 if the Company has achieved its budget for its 2018 fiscal year, subject to certain adjustments, and Mr. Pate is then employed, and (iii) 25% of the options will become vested on March 31, 2019 subject to Mr. Pate's achievement of other performance metrics if Mr. Pate is then employed. In recognition of certain holding company employees' essential contributions to the success of the Company, and to encourage further alignment with the Company's long-term interests through the ownership of equity, Mr. Pate voluntarily set aside 98,500 of the options granted to him, representing 25% of his total award. The value of the awards of $1,273 was fully expensed in the three months ended June 30, 2018. The Compensation Committee of the Board granted cash bonuses to employees based upon their performance throughout the Organizational Consolidation process in December 2018 in relation to the options voluntarily set aside by Mr. Pate.
In accordance with the terms of the agreement and actual performance to budget, only half of the options related to the budget performance criteria in (ii) above will vest.

In addition, the Time-Vesting Options will become fully vested upon a "change in control" (as defined in the 2006 Plan) or a termination of Mr. Pate's employment by the Company without "cause" (as defined in the Company's 2015 Holding Company LTI Program) or for "good reason" (as defined in the Option Agreement). Once vested, the options will remain exercisable until April 8, 2021, unless terminated earlier due to a termination of Mr. Pate's employment for "cause".

Also, in connection with the Organizational Consolidation and his appointment as Interim CFO, on April 9, 2018, William Severance received an option to purchase 13,710 shares of common stock at a price of $71.67 per share, which was the closing price of the Company's common stock on the grant date. The options will become fully exercisable on May 10, 2019, subject to Mr. Severance's continued employment with the Company, and if not exercised will expire on December 31, 2020.

During the fourth quarter of 2017, James Lindstrom resigned from the Company as Chief Executive Officer ("CEO") and board member of the Company. As a result of Mr. Lindstrom's resignation as CEO, a separation agreement was entered into between the Company and Mr. Lindstrom. As a result of this separation agreement, Mr. Lindstrom was granted 125,000 stock options with an exercise price of $61.33 per share that were immediately vested. 75,000 of these options were exercised during the year ended December 31, 2018, the remaining options expired on December 31, 2018.

During the year ended December 31, 2018, the Company issued 266,293 shares of its Common Stock in connection with the exercise of employee stock options under the Company's 2006 Plan.

The following table summarizes the stock option activity for the year ended December 31, 2018:

	Year ended December 31, 2018			
	Number of Shares Under Option	Weighted-average Exercise Price	Weighted-average Remaining Contractual Term	Aggregate Intrinsic Value
Balance at beginning of period, January 1	606,695	$ 48.70		
Granted	750,993	66.73		
Exercised	(278,969)	44.82		
Forfeited/Canceled	(120,131)	68.81		
Expired	(50,000)	61.33		
Outstanding at end of period, December 31	908,588	$ 61.44	2.40	$ 4,348
Vested or expected to vest at end of period, December 31	871,651	$ 61.01	2.49	$ 4,348
Exercisable at end of period, December 31	263,897	$ 50.28	1.98	$ 2,570

The weighted-average grant date fair value for options granted, total intrinsic value and cash received by the Company related to options exercised during the years ended December 31, 2018, 2017 and 2016 were as follows:

	Year ended December 31,		
	2018	2017	2016
Weighted-average grant date fair value per share	$ 15.08	$ 9.05	$ —
Options exercised:			
Total intrinsic value	$ 6,805	$ 2,010	$ 979
Cash received	$ 12,413	$ 1,921	$ 4,108

Stock Option Modifications

As part of the Company's retention plan associated with the Organizational Consolidation, the Company provided that unvested stock-based awards to employees subject to the retention plan will vest in full upon their termination dates so long as those employees fulfill their service obligation to the Company under the retention plan. As such, the vesting terms of 11,035 stock options

were modified. Additionally, the exercise terms of the respective unvested stock options were modified to allow for exercise through December 31, 2020. As a result of the modifications, the Company revalued the awards as of April 9, 2018,

and is expensing the unrecognized stock-based compensation cost, based on the new fair value, through the termination date of each relevant employee. Additional expense incurred during the year ended December 31, 2018, as a result of the modification, totaled $168. See Note 10, *Restructuring and Related Reorganization Costs,* for additional information.

During the fourth quarter of 2017, as a result of the separation agreement between the Company and Mr. Lindstrom, Mr. Lindstrom's outstanding stock options from his grants of 11,319 on August 6, 2015 and 9,798 on March 15, 2017 were modified to accelerate the vesting date of both awards to November 15, 2017 and allow exercise of the stock options until December 31, 2018. As a result of the modification to the terms of the original stock options granted to Mr. Lindstrom, the Company recognized an accelerated expense of $83 on the award for the year ended December 31, 2017.

Restricted Stock Awards

During the year ended December 31, 2018, the Company granted 20,242 shares of restricted stock ("RSAs") to non-employee directors of its Board, executive officers and certain key employees. The awards primarily vest in three equal installments on the first, second and third anniversaries of the date of grant.

During the year ended December 31, 2018, the Company issued 27,894 shares of its Common Stock to non-employee directors, executive officers and key employees upon the vesting of certain RSAs granted in 2017, 2016 and 2015 under the Company's 2006 Plan.

The following table summarizes the activity of the shares and weighted-average grant date fair value of the Company's unvested restricted Common Stock during the year ended December 31, 2018:

	Shares	Weighted-average grant date fair value
Non-vested at beginning of period, January 1	64,779	$ 44.82
Granted	20,242	$ 66.07
Vested	(27,894)	$ 46.39
Forfeited or cancelled	(9,799)	$ 46.83
Non-vested at end of period, December 31	47,328	$ 52.56

As of December 31, 2018, there was $7,604 of unrecognized compensation cost related to unvested share settled stock options and RSAs granted under the 2006 Plan. The cost is expected to be recognized over a weighted-average period of 1.2 years. The total fair value of stock options and RSAs vested was $4,428, $3,550 and $1,383 for the years ended December 31, 2018, 2017 and 2016, respectively.

Restricted Stock Award Modifications

As part of the Company's retention plan associated with the Organizational Consolidation, the Company provided that unvested stock-based awards to employees subject to the retention plan will vest in full upon their termination dates so long as those employees fulfill their service obligation to the Company under the retention plan. As such, the vesting terms of 7,286 restricted stock awards were modified. As a result of the modifications, the Company revalued the awards as of April 9, 2018, and is expensing the unrecognized stock-based compensation cost, based on the new fair value, through the termination date of each relevant employee. Additional expense incurred during the year ended December 31, 2018, as a result of the modification, totaled $290. See Note 10, *Restructuring and Related Reorganization Costs,* for additional information.

Restricted Stock Units

During the year ended December 31, 2016, the Company granted 5,930 restricted stock units to a key employee, related to the terms of a separation agreement, that vested on January 3, 2017. The units were settled through a cash payment of $304 during the year ended December 31, 2017. The award was classified as a liability, and the expense recorded was based upon the Company's closing stock price at the end of each reporting period and the completed requisite service period.

Deferred Share Units

During the year ended December 31, 2018, the Company granted 4,803 deferred share units to a director that vested on June 8, 2018, but will not be released until March 3, 2019. The units were fully expensed during the year ended December 31, 2018 and had a grant date fair value of $75.51 per share.

Cash Settled Awards

During the years ended December 31, 2018, 2017 and 2016, respectively, the Company issued 2,017, 3,097 and 3,360 stock equivalent units ("SEUs"), which settle in cash upon vesting, to Coliseum Capital Partners, L.P., in lieu of a grant to Christopher Shackelton, Chairman of the Board, for his service on the Board, which vest one-third upon each anniversary of the vesting date. The fair value of the SEUs is based on the closing stock price on the last day of the period and the completed requisite service period. The Company recorded $209, $235 and $287 of expense for SEUs during the years ended December 31, 2018, 2017 and 2016, respectively.

During the year ended December 31, 2014, the Company issued 200,000 stock option equivalent units ("SOEUs"), with an exercise price of $43.81 per share, which settle in cash, to Coliseum Capital Partners, L.P in lieu of a grant to Christopher Shackelton, for other services rendered. All 200,000 SOEUs were outstanding and exercisable at December 31, 2018. This award vested one-third upon grant, one-third on June 30, 2015 and one-third on June 30, 2016. No additional SOEUs were granted during the years ended December 31, 2018, 2017 and 2016. The Company recorded benefits of $191 and $1,517 for SOEUs during the years ended December 31, 2018 and 2016, respectively, and expense of $2,146 during the year ended December 31, 2017. The benefits and expense are included in "General and administrative expense" in the consolidated statements of operations. The fair value of the SOEUs was estimated as of December 31, 2018, 2017 and 2016 using the Black-Scholes option-pricing formula and amortized over the option's graded vesting periods with the following assumptions:

	Year ended December 31,								
	2018			2017			2016		
Expected dividend yield	0.0%			0.0%			0.0%		
Expected stock price volatility	27.82%	—	30.59%	23.36%	—	32.09%	35.71%	—	41.8%
Risk-free interest rate	2.50%	—	2.61%	1.75%	—	1.95%	1.11%	—	1.64%
Expected life of options (in years)	0.75	—	1.75	0.75	—	2.75	1.00	—	3.00

As of December 31, 2018 and 2017, the Company had a short-term liability of $3,719 and $3,938, respectively, in "Accrued expenses" in the consolidated balance sheets related to unexercised vested and unvested cash settled share-based payment awards. The cash settled share-based compensation expense in total excluded a tax benefit of $908 for the year ended December 31, 2017. The cash settled share-based compensation benefit in total excluded a tax expense of $4 and $492 for the years ended December 31, 2018 and 2016. The unrecognized compensation cost for SEUs is expected to be recognized over a weighted average period of 0.7 years; however, the total expense for both SEUs and SOEUs will continue to be adjusted until the awards are settled.

Holdco Long-Term Incentive Plan

On August 6, 2015 (the "Award Date"), the Compensation Committee of the Board adopted the 2015 Holding Company LTI Program ("HoldCo LTIP") under the 2006 Plan. Under the program, executives would receive shares of Providence common stock based on the shareholder value created in excess of an 8.0% compounded annual return between the Award Date and December 31, 2017 (the "Extraordinary Shareholder Value"). The Award Date value was calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price over the 90-day trading period ending on the Award Date. The Extraordinary Shareholder Value was calculated on the basis of the Providence stock price equal to the volume weighted average of the common share price over the 90-day trading period ending on December 31, 2017. A pool for use in the allocation of awards was created equal to 8.0% of the Extraordinary Shareholder Value.

It was determined that no shares would be distributed under the Holdco LTIP as the calculation of the pool amount was zero. $4,738 and $3,319 of expense are included in "General and administrative expense" in the consolidated statements of operations for the years ended December 31, 2017 and 2016, respectively.

These awards were classified as equity and the fair value of the awards was calculated using a Monte-Carlo simulation valuation model. The fair value of the awards granted in 2016 were estimated using the following assumptions:

	Year ended December 31, 2016		
Forward interest rate	0.24%	—	2.71%
Expected Volatility		40.0%	
Dividend Yield		—%	
Fair Value of Total Pool		$12,870	

15. Long-Term Incentive Plans

The Company established Long-Term Incentive Plans ("LTIPs") for the Company's operating segments during the fourth quarter of 2015. The awards pay in cash, however up to 50% of the award may be paid in unrestricted stock if the recipient elects this option when the LTIP offer letter is received. In addition, at the discretion of the Company, the recipients may be able to elect unrestricted stock in lieu of cash compensation at a later date. The LTIPs reward participants based on certain measures of free cash flow and EBITDA results adjusted as specified in the plan document. The awards vest in three installments: 60% of the award will pay out immediately following December 31, 2017, 25% one year following the performance period (i.e. December 31, 2018) and 15% two years following the performance period (i.e. December 31, 2019). Payout is subject to the participant remaining employed by the Company.

During 2017, the Company revised the structure of the NET Services long-term incentive plan. As a result, the Company finalized the amount payable under the plan at $2,956. The total value will be paid to the awarded participants per the terms of the original agreement and thus the remaining unamortized expense relating to this plan continues to be recognized over the remaining service period. For the years ended December 31, 2018, 2017, and 2016, a benefit of $253, expense of $816 and expense of $1,513, respectively, is included in "Service expense" in the consolidated statements of operations related to this plan. At December 31, 2018 and 2017, the liability for long-term incentive plans of the Company's operating segments of $630 and $2,657, respectively, is reflected in "Accrued expenses" and "Other long-term liabilities" in the consolidated balance sheets.

The Board approved the LogistiCare 2017 Senior Executive LTI Plan (the "LogistiCare LTIP") for executive management and key employees of NET Services during the three months ending March 31, 2018. The LogistiCare LTIP pays in cash, however up to 50% of the award may be paid in unrestricted stock if the recipient elects this option prior to the award payment date. The LogistiCare LTIP rewards participants based on certain measures of free cash flow and EBITDA results adjusted as specified in the plan document. The awards have a performance period of January 1, 2017 through December 31, 2019, with a payout date within two and a half months of the performance period end date. Payout is subject to the participant remaining employed by the Company on the payment date. The maximum amount that can be earned through the LogistiCare LTIP is $7,000. As of December 31, 2018, 65.5% of the awards have been issued under the LogistiCare LTIP. No expense has been incurred for this plan during the year ended December 31, 2018, as we currently believe that it is not probable the defined measures will be met.

In connection with the acquisition of Circulation, the Company established a management incentive plan ("MIP") that is intended to motivate key employees of Circulation whereby they may be entitled to cash payments if certain financial measures are met based upon cumulative NET Services EBITDA; less the assumption of former Corporate and Other segment costs; less cumulative CAPEX ("MIP Financial Performance") for the performance period January 1, 2019 to December 31, 2021 as compared to the baseline, as determined by the Board. To the extent amounts are earned, the payout date is within 30 days following the finalization of the Company's audited financial statements for the fiscal year ending December 31, 2021. Payout is subject to the participant remaining employed by the Company through December 31, 2021. The amount that can be earned through the MIP ranges from $12,500 to $237,500 based on a range of value of the MIP Financial Performance of $272,500 to $395,500. As of December 31, 2018, the Company has accrued $1,441, reflected in "Other long-term liabilities" in the consolidated balance sheet, towards its estimate of the expected payout under the MIP.

16. Earnings Per Share

The following table details the computation of basic and diluted earnings per share:

	Year ended December 31,		
	2018	2017	2016
Numerator:			
Net (loss) income attributable to Providence	$ (18,981)	$ 53,369	$ 91,928
Less dividends on convertible preferred stock	(4,420)	(4,419)	(4,419)
Less income allocated to participating securities	(1,856)	(6,314)	(10,569)
Net (loss) income available to common stockholders	$ (25,257)	$ 42,636	$ 76,940
Continuing operations	$ 11,953	$ 40,647	$ 19,749
Discontinued operations	(37,210)	1,989	57,191
	$ (25,257)	$ 42,636	$ 76,940
Denominator:			
Denominator for basic earnings per share -- weighted-average shares	12,960,837	13,602,140	14,666,896
Effect of dilutive securities:			
Common stock options	72,410	66,314	105,837
Performance-based restricted stock units	—	4,860	6,665
Denominator for diluted earnings per share -- adjusted weighted-average shares assumed conversion	13,033,247	13,673,314	14,779,398
Basic earnings (loss) per share:			
Continuing operations	$ 0.92	$ 2.99	$ 1.35
Discontinued operations	(2.87)	0.15	3.90
	$ (1.95)	$ 3.14	$ 5.25
Diluted earnings (loss) per share:			
Continuing operations	$ 0.92	$ 2.97	$ 1.34
Discontinued operations	(2.86)	0.15	3.87
	$ (1.94)	$ 3.12	$ 5.21

Income allocated to participating securities is calculated by allocating a portion of net income attributable to Providence, less dividends on convertible stock, to the convertible preferred stockholders on a pro-rata as converted basis; however, the convertible preferred stockholders are not allocated losses.

The following weighted-average shares were not included in the computation of diluted earnings per share as the effect of their inclusion would have been anti-dilutive:

	Year ended December 31,		
	2018	2017	2016
Stock options to purchase common stock	560,547	362,392	22,638
Convertible preferred stock	802,489	803,323	803,442

17. Operating Leases and Service Commitment

Operating Leases

The Company has non-cancelable contractual obligations in the form of operating leases for office space, related office equipment and other facilities. The leases expire in various years and generally provide for renewal options. In the normal course of business, it is expected that these leases will be renewed or replaced by leases on other properties.

Certain operating leases provide for increases in future minimum annual rental payments based on defined increases in the Consumer Price Index, subject to certain minimum increases. Several of these lease agreements contain provisions for periods in which rent payments are reduced. The total amount of rental payments due over the lease term is being charged to rent expense on a straight-line basis over the term of the lease. The cumulative difference between rent expense recorded and the amount paid, for continuing operations, as of December 31, 2018 and 2017 was $2,115 and $2,209, respectively, and is included in "Accrued expenses" and "Other long-term liabilities" in the consolidated balance sheets.

Future minimum payments under non-cancelable operating leases for equipment and property with initial terms of one year or more consisted of the following at December 31, 2018:

	Operating Leases
2019	$ 8,825
2020	6,452
2021	4,594
2022	3,801
2023	1,767
Thereafter	1,600
Total future minimum lease payments	$ 27,039

Rent expense for continuing operations related to operating leases was $10,960, $10,250 and $9,624, for the years ended December 31, 2018, 2017 and 2016, respectively. Also, the lease agreements generally require the Company to pay executory costs such as real estate taxes, insurance, and repairs, which are recorded to expense as incurred.

Service Commitment

The Company has entered into a commitment related to transportation services. The commitment amount represents the minimum obligation the Company has under this agreement. If the Company does not utilize the minimum level of services specified in the agreement, a penalty provision will apply. However, the minimum obligation is less than the Company's projected use for these periods and payments may be more than the minimum obligation based on actual use.

Future minimum payments under this service commitment consisted of the following at December 31, 2018:

	Service Commitment
2019	$ 9,509
2020	19,208
Total future minimum payments	$ 28,717

18. Retirement Plan

The Company maintains a qualified defined contribution plan under Section 401(k) of the Internal Revenue Code of 1986, as amended, for all employees of its NET Services' operating segment and corporate personnel. The Company, at its discretion, may

make a matching contribution to the plan. Any matching contributions vest over 5 years. Unvested matching contributions are forfeitable upon employee termination. Employee contributions are fully vested and non-forfeitable. The Company's

contributions to the plan for continuing operations were $340, $304 and $232, for the years ended December 31, 2018, 2017 and 2016, respectively.

The Company also maintains a Deferred Compensation Rabbi Trust Plan for highly compensated employees of NET Services. This plan was put in place to compensate for the inability of highly compensated employees to take full advantage of the Company's 401(k) plan. Additional information is included in Note 20, *Commitments and Contingencies*.

19. Income Taxes

The federal and state tax provision is summarized as follows:

	Year Ended December 31,		
	2018	**2017**	**2016**
Federal income tax expense (benefit):			
Current	$ 3,462	$ 19,011	$ 20,963
Deferred	(1,157)	(19,762)	(6,545)
Total Federal income tax expense (benefit)	2,305	(751)	14,418
State income tax expense (benefit):			
Current	2,113	4,048	4,501
Deferred	266	706	(947)
Total State income tax expense (benefit)	2,379	4,754	3,554
Total provision for income taxes	$ 4,684	$ 4,003	$ 17,972

A reconciliation of the provision for income taxes with amounts determined by applying the statutory U.S. federal income tax rate to income from continuing operations before income taxes is as follows:

	Year Ended December 31,		
	2018	**2017**	**2016**
Federal statutory rates	21%	35%	35%
Federal income tax at statutory rates	$ 4,812	$ 19,281	$ 15,699
Revaluation of net deferred tax liabilities due to U.S. tax reform	(286)	(19,304)	—
U.S. tax reform impact on equity income of investees	—	(1,646)	—
Change in valuation allowance	36	177	296
Change in uncertain tax positions	108	7	73
State income taxes, net of federal benefit	1,843	3,157	2,399
Compensation expense	235	—	—
Stock compensation	76	3,400	—
Meals and entertainment	74	99	94
Transaction costs	263	159	—
Cost method investment re-measurement gain	(1,381)	—	—
Tax credits	(1,208)	(354)	(947)
Legal expense	—	(805)	522
Other	112	(168)	(164)
Provision for income taxes	$ 4,684	$ 4,003	$ 17,972
Effective income tax rate	20%	7%	40%

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities of continuing operations are as follows:

	December 31,	
	2018	2017
Deferred tax assets:		
Net operating loss carryforwards	$ 19,485	$ —
Capital loss carryforward	1,072	—
Tax credit carryforwards	840	486
Accounts receivable allowance	227	1,134
Accrued items and reserves	6,817	8,297
Stock compensation	1,480	1,480
Deferred rent	543	572
Deferred revenue	272	—
Other	773	172
	31,509	12,141
Deferred tax liabilities:		
Deferred financing costs	12	38
Prepaids	900	1,439
Property and equipment depreciation	3,492	3,329
Goodwill and intangibles amortization	6,944	3,678
Equity investment	40,577	42,113
Other	—	303
	51,925	50,900
Net deferred tax liabilities	(20,416)	(38,759)
Less valuation allowance	(2,633)	(473)
Net deferred tax liabilities	$ (23,049)	$ (39,232)
Net noncurrent deferred tax assets, net of valuation allowance of $0 for 2018 and 2017	$ 2,601	$ —
Net noncurrent deferred tax liabilities, net of valuation allowance of $2,633 and $473 for 2018 and 2017, respectively	(25,650)	(39,232)
	$ (23,049)	$ (39,232)

At December 31, 2018, the Company had approximately $86,865 of federal net operating loss carryforwards, including $3,055 which will expire primarily in 2037 and $83,810 which can be carried forward indefinitely. In addition, at December 31, 2018, the Company had approximately $26,936 of state net operating loss carryforwards which expire as follows:

2023	$ 2,021
Thereafter	24,915
Total state net operating loss carryforwards	$ 26,936

Approximately $8,600 of the U.S. and state net operating loss carryforwards relate to Circulation, Inc. pre-acquisition tax periods and are subject to change of ownership limitations on their use. These limitations are not expected to restrict the ultimate use of these loss carryforwards.

Realization of the Company's net operating loss carryforwards is dependent on generating sufficient taxable income. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets will be realized, to the extent they are not covered by a valuation allowance. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

The net change in the total valuation allowance for the year ended December 31, 2018 was $2,160, of which $36 related to current operations, $1,492 related to discontinued operations and $632 related to the balance from the Circulation acquisition. The valuation allowance of $2,633 includes $2,166 for state net operating loss, capital loss and tax credit carryforwards and $467 for stock compensation and accrued liability deferred tax assets for which the Company has concluded that it is more likely than not that these carryforwards and deferred tax assets will not be realized in the ordinary course of operations. The Company will continue to assess the valuation allowance, and to the extent it is determined that the valuation allowance should be changed, an appropriate adjustment will be recorded.

U.S. Tax Reform

On December 22, 2017, the Tax Reform Act was enacted which institutes fundamental changes to the taxation of multinational corporations. The Tax Reform Act includes changes to the taxation of foreign earnings by implementing a dividend exemption system, expansion of the current anti-deferral rules, a minimum tax on low-taxed foreign earnings and new measures to deter base erosion. The Tax Reform Act also includes a permanent reduction in the corporate tax rate to 21%, repeal of the corporate alternative minimum tax, expensing of capital investment, and limitation of the deduction for interest expense. Furthermore, as part of the transition to the new tax system, a one-time transition tax is imposed on a U.S. shareholder's historical undistributed earnings and profits ("E&P") of foreign affiliates. Although the Tax Reform Act is generally effective January 1, 2018, GAAP requires recognition of the tax effects of new legislation during the reporting period that includes the enactment date, which was December 22, 2017.

As a result of the reduction in the U.S. corporate income tax rate, the Company revalued its ending net deferred tax liabilities as of December 31, 2017 and recognized a provisional tax benefit of $20,950. The Company projected net accumulated deficits in foreign E&P; therefore, no provisional tax expense for deemed repatriation was recognized.

On December 22, 2017, the SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118") to address the application of GAAP in situations when a registrant does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Tax Reform Act. In accordance with the SAB 118 guidance, the Company has recognized the provisional tax impacts related to the benefit for the revaluation of deferred tax assets and liabilities in its consolidated financial statements for the year ended December 31, 2017. The financial reporting impact of the Tax Reform Act was completed in the fourth quarter of 2018 and an additional benefit of $286 was recorded.

Unrecognized Tax Benefits

The Company expects no material amount of the unrecognized tax benefits to be recognized during the next twelve months. The Company recognizes interest and penalties as a component of income tax expense. During the years ended December 31, 2018, 2017 and 2016, the Company recognized approximately $47, $65 and $19, respectively, in interest and penalties from continuing operations. The Company had approximately $109 and $83 for the payment of penalties and interest of continuing operations accrued as of December 31, 2018 and 2017, respectively.

A reconciliation of the liability for unrecognized income tax benefits for continuing operations is as follows:

	December 31,		
	2018	**2017**	**2016**
Unrecognized tax benefits, beginning of year	$ 1,115	$ 1,108	$ 271
Balance upon acquisition/disposition	—	—	764
Increase related to prior year positions	104	22	37
Increase related to current year tax positions	160	101	139
Statute of limitations expiration	(157)	(116)	(103)
Unrecognized tax benefits, end of year	$ 1,222	$ 1,115	$ 1,108

The Company is subject to taxation in the U.S. and various state jurisdictions. The statute of limitations is generally three years for the U.S. and between three and four years for the various states in which the Company operates. The tax years that remain open for examination by the U.S. and states principally include the years 2014 to 2017.

20. Commitments and Contingencies

Legal proceedings

In the ordinary course of business, the Company is a party to various lawsuits. Management does not expect these lawsuits to have a material impact on the liquidity, results of operations, or financial condition of the Company.

On January 21, 2019, the United States District Court for the Southern District of Ohio unsealed a qui tam complaint, filed in December 2015, against Mobile Care Group, Inc., Mobile Care Group of Ohio, LLC, Mobile Care EMS & Transport, Inc. and LogistiCare Solutions, LLC ("LogistiCare") by the relators Brandee White, Laura Cunningham, and Jeffery Wisier (the "Relators") alleging violations of the federal False Claims Act by presenting claims for payment to government healthcare programs knowing that the prerequisites for such claims to be paid had not been met. The Relators seek to recover damages, fees and costs under the federal False Claims Act including treble damages, civil penalties and attorneys' fees. In addition, the Relators seek reinstatement to their jobs with the Mobile Care entities. None of the Relators was employed by LogistiCare. Prior to January 21, 2019, LogistiCare had no knowledge of the complaint. The federal government has declined to intervene against LogistiCare. The Company intends to defend the litigation vigorously and believes that the case will not have a material adverse effect on its business, financial condition or results of operations.

Indemnifications related to Haverhill Litigation

The Company indemnified the Coliseum Stockholders from and against any and all losses, claims, damages, expenses and liabilities relating to or arising out of (i) any breach of any representation, warranty, covenant or undertaking made by or on behalf of the Company in the Standby Purchase Agreement and (ii) the transactions contemplated by the Standby Purchase Agreement and the 14.0% Unsecured Subordinated Note in aggregate principal amount of $65,500, except to the extent that any such losses, claims, damages, expenses and liabilities are attributable to the gross negligence, willful misconduct or fraud of such Coliseum Stockholder.

The Company has also indemnified other third parties from and against any and all losses, claims, damages, expenses and liabilities arising out of or in connection with the Company's acquisition of CCHN Group Holdings, Inc. (operating under the tradename Matrix, and formerly included in our HA Services segment) in October 2014 and related financing commitments, except to the extent that any such losses, claims, damages, expenses and liabilities are found in a final, non-appealable judgment by a court of competent jurisdiction to have resulted from the gross negligence, bad faith or willful misconduct of such third parties, or a material breach of such third parties' obligations under the related agreements.

In June 2015, a putative stockholder class action derivative complaint related to such rights offering and acquisition was filed in the Court of Chancery of the State of Delaware captioned Haverhill Retirement System v. Kerley et al., C.A. No. 11149-VCL (the "Haverhill Litigation"). In November 2017, the Company received a payment of $5,363 under the settlement agreement entered into by the parties to the Haverhill Litigation.

The Company recorded $318 and $1,282 of such indemnified legal expenses related to the Haverhill Litigation during the years ended December 31, 2017 and 2016, respectively, which is included in "General and administrative expenses" in the consolidated statements of operations. Of these amounts, $245 and $757 for the years ended December 31, 2017 and 2016, respectively, were indemnified legal expenses of related parties. Other legal expenses of the Company related to the Haverhill Litigation are covered under the Company's insurance policies, subject to applicable deductibles and customary review of the expenses by the carrier. The Company recognized a benefit of $226 for the year ended December 31, 2018, and expense of $8 and $210 for the years ended December 31, 2017 and 2016, respectively. While the carrier typically remits payment directly to the respective law firm, the Company accrues for the cost and records a corresponding receivable for the amount to be paid by the carrier. The Company recognized an insurance receivable of $941 in "Other receivables" in the consolidated balance sheet at December 31, 2017, with a corresponding liability amount recorded to "Accrued expenses".

Other Indemnifications

The Company provided certain standard indemnifications in connection with the sale of the Human Services segment to Molina Healthcare Inc. ("Molina") effective November 1, 2015. Certain representations made by the Company in the related Membership Interest Purchase Agreement (the "Purchase Agreement") including tax representations, survive until the expiration of applicable statutes of limitation. Molina and the Company entered into a settlement agreement regarding indemnification claims by Molina with respect to *Rodriguez v. Providence Community Corrections* (the "Rodriguez Litigation"), a complaint filed in the District Court for the Middle District of Tennessee, Nashville Division, against Providence Community Corrections, Inc. ("PCC"),

an entity sold under the Purchase Agreement. The Company expects to recover a portion of the settlement through insurance coverage, although this cannot be assured.

The Company has provided certain standard indemnifications in connection with its Matrix stock subscription transaction whereby Mercury Fortuna Buyer, LLC ("Subscriber"), Providence and Matrix entered into a stock subscription agreement (the "Subscription Agreement"), dated August 28, 2016. The representations and warranties made by the Company in the Subscription Agreement ended January 19, 2018; however, certain fundamental representations survive through the 36th month following the closing date. The covenants and agreements of the parties to be performed prior to the closing ended January 19, 2018, and all other covenants and agreements survive until the expiration of the applicable statute of limitations in the event of a breach, or for such lesser periods specified therein. The Company is not aware of any indemnification liabilities with respect to Matrix that require accrual at December 31, 2018.

The Company has provided certain standard indemnifications in connection with the sale of substantially all of its WD Services segment to APM, which closed on December 21, 2018. The non-title warranties made by the Company in the related Share Purchase Agreement survive for 18 months following the closing date, and the title-related warranties and tax warranties survive five years from the closing date. The Company is not aware of any indemnification liabilities with respect to the former WD Services segment that require accrual at December 31, 2018.

On May 9, 2018, the Company entered into a registration indemnification agreement with the Coliseum Stockholders, who as of December 31, 2018, collectively held approximately 9.6% of the Company's outstanding common stock and approximately 95.6% of the Company's outstanding Preferred Stock, pursuant to which the Company has agreed to indemnify the Coliseum Stockholders, and the Coliseum Stockholders have agreed to indemnify the Company, against certain matters relating to the registration of the Coliseum Stockholders' securities for resale under the Securities Act.

Deferred Compensation Plan

The Company has one deferred compensation plan for management and highly compensated employees of NET Services as of December 31, 2018. The deferred compensation plan is unfunded, and benefits are paid from the general assets of the Company. The total of participant deferrals, which is reflected in "Other long-term liabilities" in the consolidated balance sheets, was $1,982 and $1,806 at December 31, 2018 and 2017, respectively.

21. Transactions with Related Parties

The Company incurred legal expenses under an indemnification agreement with the Coliseum Stockholders as further discussed in Note 20, *Commitments and Contingencies*. Preferred stock dividends earned by the Coliseum Stockholders during the years ended December 31, 2018 and 2017 totaled $4,213 each year.

Effective June 15, 2018, the Company registered shares of the Company's common stock and Preferred Stock held by the Coliseum Stockholders for resale under the Securities Act and on May 9, 2018, in connection with such registration, the Company entered into a registration indemnification agreement with the Coliseum Stockholders as further discussed in Note 20, *Commitments and Contingencies*.

During the year ended December 31, 2017, the Company made a $566 loan to Mission Providence. The loan was also repaid during the year ended December 31, 2017.

22. Acquisitions

During 2017, the Company made an equity investment in Circulation, which was accounted for as a cost method investment. On September 21, 2018, the Company's subsidiary, LogistiCare, acquired all of the outstanding equity of Circulation, which offers a full suite of logistics solutions to manage non-emergency transportation across all areas of healthcare, powered by its HIPAA-compliant digital platform. Circulation enables administration of transportation benefits, proactively monitors for fraud, waste and abuse, and integrates all transportation capabilities (e.g. outsourced transportation, owned fleets, and other medical logistics services), while emphasizing patient convenience and satisfaction. Circulation's proprietary platform simplifies ordering, improves reliability and efficiency, and reduces transportation spend. The Company believes the acquisition advances LogistiCare's central mission of reducing transportation as a barrier to healthcare and will help deliver a differentiated user experience and provide a core technology and analytics platform that better positions LogistiCare for growth.

The purchase price was comprised of cash consideration of $45,123 paid to Circulation's equity holders (including holders of vested Circulation stock options), other than Providence. Per the terms of the Agreement and Plan of Merger (the "merger agreement"), dated as of September 14, 2018, by and among LogistiCare, the Company, Catapult Merger Sub, a wholly-owned subsidiary of LogistiCare ("Merger Sub"), Circulation and Fortis Advisors LLC, as the representative of Circulation's equity holders, Providence assumed certain unvested Circulation stock options under similar terms and conditions to the existing option awards previously issued by Circulation. The merger agreement also required $1,000 to be paid three years after the closing date of the transaction to each of the two co-founders of Circulation subject to their continued employment or provision of consulting services to LogistiCare. The value of the options assumed and co-founder hold back is accounted for as compensation, over the relevant vesting period, as such amounts are tied to future service conditions.

The Company's initial investment in Circulation was $3,000 in July 2017 to acquire a minority interest. As a result of the transactions pursuant to the merger agreement, the fair value of this pre-acquisition interest increased to $9,577, and thus the Company recognized a gain of $6,577. This gain is recorded as "Gain on remeasurement of cost method investment" on the Company's consolidated statement of operations for the year ended December 31, 2018. The Company determined the fair value of its pre-acquisition equity interest by multiplying the number of shares it held in Circulation pre-acquisition by the per-share consideration validated by reference to the total merger consideration agreed to with other unrelated equity holders in Circulation.

The Company incurred acquisition and related costs for this acquisition of $1,729 during the year ended December 31, 2018. These expenses are primarily included in general and administrative expenses of the NET Services segment in the consolidated statements of operations.

The purchase price of Circulation is calculated as follows:

Cash purchase of common stock	$	45,123
Providence's acquisition date fair value equity interest in Circulation		9,577
Total consideration	$	54,700

The table below presents Circulation's net assets at the date of acquisition based upon the final estimate of respective fair values:

Cash	$	1,302
Accounts receivable		996
Other assets		216
Property and equipment		49
Intangibles		15,700
Goodwill		40,001
Deferred taxes, net		(2,199)
Accounts payable and accrued liabilities		(1,244)
Deferred revenue		(69)
Other non-current liabilities		(52)
Total of assets acquired and liabilities assumed	$	54,700

The goodwill is allocated to the NET Services segment. None of the acquired goodwill is expected to be deductible for tax purposes.

The fair value of intangible assets is as follows:

	Type	Life	Value
Customer relationships	Amortizable	3 years	$ 1,400
Trademarks and trade names	Amortizable	3 years	200
Developed technology	Amortizable	5 years	14,100
			$ 15,700

The amounts of Circulation's revenue and net income included in the Company's consolidated statement of operations for the year ended December 31, 2018, and the unaudited pro forma revenue and net (loss) income attributable to Providence of the combined entity had the acquisition date been January 1, 2017, are:

	Year Ended December 31, 2018
Actual Circulation:	
Revenue	$ 2,205
Net loss	(2,108)

	Year Ended December 31,	
	2018	2017
Pro forma:		
Revenue	$ 1,388,203	$ 1,319,195
Net (loss) income attributable to Providence	(21,541)	49,097
Diluted (loss) earnings per share	$ (2.11)	$ 2.85

The pro forma information above for the year ended December 31, 2018 includes the elimination of acquisition related costs. Adjustments for all periods include expensing the incentive for two co-founders to be paid upon continuing employment, amortization expense based on the estimated fair value and useful lives of intangible assets and related tax effects. The pro forma financial information is not necessarily indicative of the results of operations that would have occurred had the transaction been affected on January 1, 2017.

23. Discontinued Operations

WD Services Segment

On December 21, 2018, the Company completed the sale of substantially all of the operating subsidiaries of its WD Services segment to APM and APM UK Holdings Limited, an affiliate of APM, except for the segment's employment services operations in Saudi Arabia. The Company's contractual counterparties in Saudi Arabia, including an entity owned by the Saudi Arabian government, assumed these operations beginning January 1, 2019.

The total cash consideration of the sale was $46,450, with the buyer retaining existing WD Services cash of $20,993. In addition to the purchase consideration, as a result of closing the transaction before the year end, the Company expects to realize cash tax benefits of approximately $51,861 from the transaction, including approximately $34,275 in tax refunds by the fourth quarter of 2019 in relation to its 2018 tax returns and loss carrybacks, which is inclusive of $646 of tax that would have been otherwise due in the fourth quarter of 2018. The remaining cash tax benefit of $17,586 is expected to be realized as an offset to tax payments over the following three years, based upon the Company's current estimate of taxable income. In addition, $1,072 of benefits related to capital loss carryforwards is available, which amount was reserved as of December 31, 2018.

On June 11, 2018, the Company entered into a Share Purchase Agreement to sell the shares of Ingeus France, its WD Services operation in France, for a de minimis amount. The sale was effective on July 17, 2018, after court approval.

On September 29, 2017, the Company and Mission Australia completed the sale of 100% of the stock of Mission Providence, a joint venture in the WD Services segment, pursuant to a share sale agreement. Upon the sale of Mission Providence, the Company received AUD 20,184, or $15,823 of proceeds, for its equity interest, net of transaction fees. Subsequently, a working capital adjustment was finalized in December 2017 resulting in the return of $229 of the proceeds. The related gain on sale of Mission Providence totaling $12,377 is recorded as "(Loss) income from discontinued operations, net of tax" in the accompanying consolidated statements of operations for the year ended December 31, 2017. Summary financial information for Mission Providence on a standalone basis for the nine months ended September 30, 2017 and the year ended December 31, 2016 is as follows:

	Nine months ended September 30, 2017	Year ended December 31, 2016
Revenue	$ 30,125	$ 36,546
Operating loss	(1,765)	(9,664)
Net loss	(1,934)	(8,843)

In accordance with ASC 205-20, *Presentation of Financial Statements-Discontinued Operations*, ("ASC 205-20") a component of an entity is reported in discontinued operations after meeting the criteria for held for sale classification if the disposition represents a strategic shift that has (or will have) a major effect on the entity's operations and financial results. The Company analyzed the quantitative and qualitative factors relevant to the disposition of the WD Services segment and determined that those held for sale conditions for discontinued operations presentation were met during the fourth quarter of 2018. As such, the historical financial results of the Company's historical WD Services segment, and the related income tax effects have been presented as discontinued operations for all periods presented in the accompanying consolidated financial statements.

HA Services Segment

Effective October 19, 2016, the Company completed the Matrix Transaction. At the closing, (i) cash consideration of $180,614 was paid by the Subscriber to Matrix based upon an enterprise value of $537,500 and (ii) Matrix borrowed approximately $198,000 pursuant to a credit and guaranty agreement providing for term loans in an aggregate principal amount of $198,000 and revolving loan commitments in an aggregate principal amount not to exceed $10,000, which was not drawn at the closing. At the closing, Matrix distributed $381,163 to Providence, in full satisfaction of a promissory note and accumulated interest between Matrix and Providence. At the closing, Providence made a $5,663 capital contribution to Matrix, as described in the Subscription Agreement, as amended, based upon its pro-rata ownership of Matrix, to fund the near-term cash needs of Matrix. On the day that was fifteen days following the closing date, Providence was, to the extent payable pursuant to the terms of the Subscription Agreement, as amended, entitled to receive from Matrix, or required to pay to Matrix, subsequent working capital adjustment payments. Providence received an initial payment of $5,172 from Matrix in November 2016 which is net of the capital contribution of $5,663 described above, based upon the initial working capital calculation as described in the Subscription Agreement. Additionally, in February 2017, the Company received a $75 payment from Matrix representing the final working capital adjustment payment.

In accordance with ASC 205-20, the Company analyzed the quantitative and qualitative factors relevant to the Matrix stock subscription transaction resulting in the Company no longer owning a controlling interest in Matrix, and determined that those held for sale conditions for discontinued operations presentation were met during the third quarter of 2016. As such, the historical financial results of Matrix, the Company's historical HA Services segment, and the related income tax effects have been presented as discontinued operations for all periods presented in the accompanying consolidated financial statements through October 19, 2016.

The Company has continuing involvement with Matrix through its ownership of 43.6% of the equity interests in Matrix as of December 31, 2018, as well as through a management consulting agreement, not to exceed ten years. Prior to the Matrix Transaction, the Company owned 100% of the equity interest in Matrix. Subsequent to the Matrix Transaction, the Company accounts for its investment in Matrix under the equity method of accounting. The Company's share of Matrix's gains and losses subsequent to the Matrix Transaction, which totaled a loss of $6,158, a gain of $13,445 and a loss of $1,789, is recorded as "Equity in net (gain) loss of investees" in its consolidated statement of operations for the years ended December 31, 2018, 2017 and 2016, respectively. Matrix's pretax loss for the year ended December 31, 2018 totaled $27,128. Matrix's pretax loss for the year ended December 31, 2017 totaled $2,948 and included $3,537 of transaction related expenses. Matrix's pretax loss for the period of

October 19, 2016 through December 31, 2016 totaled $7,027 and included $6,367 of transaction related expenses. There have been no cash inflows or outflows from or to Matrix subsequent to the closing of the Matrix Transaction, other than the working capital adjustments discussed above and management and advisory fees associated with its ongoing relationship with Matrix, of which $2,271 and $1,103 were received during the years ended December 31, 2018 and 2017, respectively. $259 and $247 are included in "Other receivables" in the consolidated balance sheets at December 31, 2018 and 2017, respectively, related to management fees receivable.

Human Services Segment

On September 3, 2015, the Company entered into a Purchase Agreement, pursuant to which the Company agreed to sell all of the membership interests in Providence Human Services, LLC and Providence Community Services, LLC, comprising the Company's Human Services segment. During the years ended December 31, 2018, 2017 and 2016, the Company recorded additional expenses and benefits related to the Human Services segment, principally related to legal proceedings as described in Note 20, *Commitment and Contingences*, related to an indemnified legal matter.

Results of Operations

The following table summarizes the results of operations classified as (loss) income from discontinued operations, net of tax, for the years ended December 31, 2018, 2017 and 2016. The HA Services segment column in the table below for the year ended December 31, 2016 reflects the financial results for HA Services from January 1, 2016 through October 19, 2016.

	Year ended December 31, 2018		
	Human Services Segment	**WD Services Segment**	**Total Discontinued Operations**
Service revenue, net	$ —	$ 264,553	$ 264,553
Operating expenses:			
Service expense	—	248,824	248,824
General and administrative expense	(495)	26,895	26,400
Asset impairment charge	—	9,203	9,203
Depreciation and amortization	—	11,864	11,864
Total operating expenses (benefits)	(495)	296,786	296,291
Operating income (loss)	495	(32,233)	(31,738)

Asset impairment charges

In connection with classifying the assets and liabilities of Ingeus France as held for sale during the three months ended June 30, 2018, the carrying value of the assets and liabilities was reduced to its estimated fair value less selling costs. As a result, an impairment charge of $9,203 was recorded during the year ended December 31, 2018 and is included in "Asset impairment charge" in the table above.

During the fourth quarter of 2016, the Company reviewed WD Services for impairment, primarily due to lower than expected volumes and unfavorable service mix shifts under a large contract in the United Kingdom ("UK") impacting future projections; additional clarity into the anticipated size and structure of the Work and Health Programme in the UK; the absence of additional details regarding the restructuring of the offender rehabilitation contract in the UK; and a change in senior management at WD Services during the fourth quarter. As a result, the Company performed a quantitative test comparing the fair value of the asset groupings comprising WD Services with the carrying amounts and recorded an asset impairment charge of $4,381 to definite-lived customer relationship intangible assets and an asset impairment charge of $9,983 to property and equipment, which are recorded in "Asset impairment charge" in the table above. In addition, the Company reviewed the carrying value of goodwill of WD Services, noting the carrying value exceeded the fair value. Therefore, the Company performed the second step of the impairment test, in which the fair value of the reporting unit is allocated to all of the assets and liabilities, on a fair value basis, with any excess representing the implied value of goodwill of the reporting unit. The fair value was determined using an income approach, which estimates the present value of future cash flows based on management's forecast of revenue growth rates and operating margins, working capital requirements and capital expenditures. Based on this analysis, the carrying value of goodwill of the WD Services reporting unit exceeded the implied fair value and the Company recorded an asset impairment charge of $5,224, which is included in "Asset impairment charge" on the Company's consolidated statement of operations.

Interest expense, net

The Company allocated interest expense, including amortization of deferred financing fees, to discontinued operations based on the portion of the debt that was required to be paid with the proceeds from the sale of the Matrix Transaction. The total allocated interest expense is included in "Interest expense, net" in the tables above. The total allocated interest expense for the year ended December 31, 2016 for the HA Services segment was $9,939.

Loss on disposition, net of tax

The total loss on disposition, net of tax, related to the sale of WD Services subsidiaries during the year ended December 31, 2018 is calculated as follows:

Total cash received, net of transaction costs and cash sold	$	12,780
Total WD Services net asset value as of transaction date, net of cash sold		(36,499)
Income tax benefit		51,861
Gain on sale before reclassification of currency translation, net of tax		28,142
Adjustment for reclassification of currency translation		(29,973)
Loss on disposition, net of tax	$	(1,831)

Assets and liabilities

The following table summarizes the carrying amounts of the major classes of assets and liabilities of discontinued operations in the consolidated balance sheets as of December 31, 2018 and 2017. Amounts as of December 31, 2018 represent the accounts of WD Services operations in Saudi Arabia, which were not sold as part of the WD Services Sale.

	December 31,	
	2018	**2017**
Cash and cash equivalents	$ 2,321	$ 42,512

Cash flows from discontinued investing activities:			
Purchase of property and equipment	$ 9,174	$ 19,810	$ 28,984

24. Segments

The Company owns subsidiaries and investments primarily engaged in the provision of healthcare services in the United States. The Company's *NET Services* segment, which primarily operates under the brands LogistiCare and Circulation, since its acquisition in September 2018, is the largest manager of NET programs for state governments and MCOs in the U.S. On September 21, 2018, we completed the acquisition of Circulation, which offers a full suite of logistics solutions to manage NET programs across all areas of healthcare, powered by its HIPAA-compliant digital platform. Circulation's technology expands LogistiCare's existing capabilities to manage transportation benefits, integrating all transportation capabilities while proactively monitoring for fraud, waste and abuse and emphasizing member convenience and satisfaction.

The Company's *Matrix Investment* segment consists of a minority investment in Matrix, a nationwide provider of home and mobile-based healthcare services for health plans in the U.S., including CHAs, quality gap closure visits, "level of service" needs assessments, and post-acute and chronic care management, providing such services through a network of community-based clinicians, and a fleet of mobile health clinics with advanced diagnostics capabilities. On October 19, 2016, affiliates of Frazier Healthcare Partners purchased a controlling equity interest in Matrix, with the Company retaining a non-controlling equity interest. Matrix's financial results prior to October 19, 2016 are presented as a discontinued operation.

The Company's *Corporate and Other* segment includes the Company's executive, accounting, finance, internal audit, tax, legal, public reporting and corporate development functions, as well as the results of the Company's captive insurance company. On April 11, 2018, the Company announced an Organizational Consolidation. See Note 10, *Restructuring and Related Reorganization Costs,* for further information.

Our segments are determined based on how the Company's chief operating decision maker ("CODM") manages the Company's business, makes operating decisions and evaluates operating performance. The operating results of the segments

include revenue and expenses incurred by the segment, as well as an allocation of direct expenses incurred by Corporate on behalf of the segment. Indirect expenses, including unallocated corporate functions and expenses, such as executive, accounting, finance, internal audit, tax, legal, public reporting, certain strategic and corporate development functions and the results of the Company's captive insurance company as well as elimination entries recorded in consolidation are reflected in Corporate and Other.

The following table sets forth certain financial information from continuing operations attributable to the Company's business segments for the years ended December 31, 2018, 2017 and 2016.

	Year Ended December 31, 2018

Customer Information

12.6%, 13.8% and 13.1% of the Company's consolidated revenue was derived from one U.S. state Medicaid program for the years ended December 31, 2018, 2017 and 2016, respectively. In addition, substantially all of the Company's revenues are generated from domestic governmental agencies or entities that contract with governmental agencies.

25. Quarterly Results (Unaudited)

The quarterly consolidated financial statements presented below reflect WD Services and Human Services as discontinued operations for all periods presented. Additionally, certain costs incurred by the Corporate and Other segment which directly related to the WD Services Sale are also included as discontinued operations.

	Quarter ended			
	March 31, 2018	June 30, 2018 (1) (2)	September 30, 2018 (3)	December 31, 2018 (4)
Service revenue, net	$ 336,696	$ 343,736	$ 343,771	$ 360,762
Operating income	12,103	3,431	9,435	(693)
Income from continuing operations, net of tax	7,423	1,964	10,295	(1,454)
(Loss) income from discontinued operations, net of tax	(1,697)	(13,366)	(2,964)	(19,026)
Net income (loss) attributable to Providence	5,430	(11,215)	7,154	(20,350)
Earnings (loss) per common share (10):				
Basic	$ 0.27	$ (0.96)	$ 0.37	$ (1.67)
Diluted	$ 0.26	$ (0.95)	$ 0.37	$ (1.67)

	Quarter ended			
	March 31, 2017 (5)	June 30, 2017	September 30, 2017 (6)	December 31, 2017(6)(7)(8)(9)
Service revenue, net	$ 324,033	$ 338,805	$ 324,824	$ 330,558
Operating income	4,707	11,333	7,271	14,173
Income from continuing operations, net of tax	2,046	7,658	3,374	38,008
(Loss) income from discontinued operations, net of tax	(5,997)	(3,917)	11,575	1,074
Net (loss) income attributable to Providence	(4,325)	3,915	14,853	38,926
(Loss) earnings per common share (10):				
Basic	$ (0.40)	$ 0.15	$ 0.88	$ 2.44
Diluted	$ (0.40)	$ 0.14	$ 0.88	$ 2.42

(1) Operating income in the quarter ending June 30, 2018 was negatively impacted by higher transportation costs on a per trip basis as NET Services saw a shift in service mix to higher cost modes of transportation and higher average mileage per trip.

(2) Due to the disposition of Ingeus France in July 2018, the carrying value of its assets and liabilities were reduced to their estimated fair value less selling costs during the quarter ending June 30, 2018. As a result, an impairment charge of $9,203 was recorded during the quarter ending June 30, 2018, which is included in (loss) income from discontinued operations, net of tax.

(3) During the quarter ending September 30, 2018, the Company acquired all of the outstanding equity of Circulation. The Company's initial investment in Circulation was $3,000. As a result of the transaction, the fair value of this pre-acquisition interest increased to $9,577, and thus the Company recognized a gain of $6,577.

(4) (Loss) income from discontinued operations, net of tax in the quarter ending December 31, 2018, includes a loss on the disposition of substantially all of the WD Services segment of $1,056, net of tax. This sale was completed on December 21, 2018.

(5) The Company recorded expenses, net of tax, of $5,866 in (loss) income from discontinued operations, net of tax, in the quarter ending March 31, 2017 related to the Company's former Human Services segment, which are principally related to a settled legal matter.

(6) The Company recorded a gain on sale of equity investment of $12,606, net of tax, related to the sale of its equity interest in Mission Providence during the quarter ended September 30, 2017, which is reflected in (loss) income from discontinued operations, net of tax. During the quarter ended December 31, 2017, the Company recorded a reduction to the gain on sale of $229, related to the finalization of the working capital adjustment per the sale agreement.

(7) Operating income for the quarter ended December 31, 2017 increased as compared to the prior quarters in 2017 as a result of a decrease in service expense as a percentage of revenue for NET Services. This was primarily a result of lower operating costs as well as certain NET Services contractual adjustments recorded in the fourth quarter of 2017.

(8) The quarter ended December 31, 2017 includes the receipt of the Haverhill Litigation settlement of $5,363.

(9) The quarter ended December 31, 2017 includes a net tax benefit of $15,925 related to the enactment of the Tax Reform Act during the fourth quarter of 2017, due to the re-measurement of deferred tax liabilities by Providence as a result of the reduction in the U.S. corporate tax rate. Providence realized a tax benefit of $19,304, partially offset by $3,379 of increased tax expense resulting from additional equity in net gain of Matrix, due to Matrix' re-measurement of its deferred tax liabilities. The equity in net gain from Matrix for the quarter ended December 31, 2017 includes a tax benefit of $13,610 related to Matrix's re-measurement of deferred tax liabilities as a result of the Tax Reform Act.

(10) Earnings per share is computed independently for each of the quarters presented. Therefore, the sum of quarterly earnings per share may not equal the total computed for the year.

Item 9. ***Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.***

None.

Item 9A. ***Controls and Procedures.***

Evaluation of Disclosure Controls and Procedures

The Company, under the supervision and with the participation of its management (including its principal executive officer and principal financial officer), evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act as of the end of the period covered by this Annual Report on Form 10-K (December 31, 2018). Based upon this evaluation, the Company's principal executive and financial officers have concluded that such disclosure controls and procedures were effective to provide reasonable assurance that (i) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management's report on internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

We acquired Circulation on September 21, 2018, as discussed in Note 22, *Acquisitions*, to the Consolidated Financial Statements. As permitted by the SEC staff's Frequently Asked Question 3 on Management's Report on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports (revised September 24, 2007), our management excluded from our assessment of internal control over financial reporting effectiveness as of December 31, 2018, Circulation's internal control over financial reporting associated with consolidated total assets of approximately 1.1%, and consolidated total revenues of approximately 0.2%, included in our Consolidated Financial Statements as of and for the year ended December 31, 2018. We will include Circulation in our assessment of the effectiveness of internal control over financial reporting starting in the third quarter of 2019.

Report of Independent Registered Public Accounting Firm

The attestation report of the registered public accounting firm on the Company's internal control over financial reporting is presented in Part II, Item 8, of this Annual Report and is hereby incorporated by reference.

Changes in Internal Control Over Financial Reporting

The principal executive and financial officers also conducted an evaluation of whether any changes in the Company's internal control over financial reporting occurred during the quarter ended December 31, 2018 that have materially affected or which are reasonably likely to materially affect such control. Such officers have concluded that no such changes have occurred.

Item 9B. ***Other Information.***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2019 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2019, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Code of Ethics

We have adopted a code of ethics that applies to our senior management, including our chief executive officer, chief financial officer, controller and persons performing similar functions, as well as our directors, officers and employees. This code of ethics is part of our broader Compliance and Ethics Plan and Code of Conduct, which is available free of charge in the Investor Relations section of our website at www.prscholdings.com. We intend to disclose any amendment to, or waiver from, a provision of the code of ethics that applies to our principal executive officer, principal financial officer or principal accounting officer on our website. The information contained on our website is not part of, and is not incorporated in, this Annual Report on Form 10-K or any other report we file with or furnish to the SEC.

Item 11. ***Executive Compensation.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2019 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2019, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2019 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2019, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2019 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2019, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

Item 14. ***Principal Accounting Fees and Services.***

This Item is incorporated by reference from our definitive proxy statement on Schedule 14A to be filed with the SEC and delivered to stockholders in connection with our 2019 annual meeting of stockholders; provided that if such proxy statement is not filed on or before April 30, 2019, such information will be included in an amendment to this Annual Report on Form 10-K filed on or before such date.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules.***

(a)(1) Financial Statements

The following consolidated financial statements including footnotes are included in Item 8.

- Consolidated Balance Sheets at December 31, 2018 and 2017;
- Consolidated Statements of Operations for the years ended December 31, 2018, 2017 and 2016;
- Consolidated Statements of Comprehensive Income for the years ended December 31, 2018, 2017 and 2016;
- Consolidated Statements of Stockholders' Equity for the years ended December 31, 2018, 2017 and 2016; and
- Consolidated Statements of Cash Flows for the years ended December 31, 2018, 2017 and 2016.

(2) Financial Statement Schedules

Notes:

Schedule above has been recast from prior year to exclude activity related to discontinued operations.

(1) Amounts primarily include the allowance for contractual adjustments related to our non-emergency transportation services operating segment that are recorded as adjustments to non-emergency transportation services revenue.

(2) Write-offs, net of recoveries.

All other schedules are omitted because they are not applicable or the required information is shown in our financial statements or the related notes thereto.

(3) Exhibits

Exhibit Number	Description
2.1	Share Sale Agreement, dated as of March 31, 2014, by and among The Providence Service Corporation, Pinnacle Australia Holdco Pty Ltd, Thérèse Virginia Rein, Gregory Kenneth Ashmead and GK Ashmead Holdings Pty Limited (as trustee of the GK Ashmead Nominees Trust) (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on April 1, 2014).
2.2	Australian Share Sale Agreement Side Deed, dated as of March 31, 2014, by and among The Providence Service Corporation, Pinnacle Australia Holdco Pty Ltd, Thérèse Virginia Rein, Gregory Kenneth Ashmead, GK Ashmead Holdings Pty Limited (as trustee of the GK Ashmead Nominees Trust) and Deloitte LLP (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on April 1, 2014).
2.3	Stock Subscription Agreement, dated as of August 28, 2016, by and among The Providence Service Corporation, CCHN Group Holdings, Inc. and Mercury Fortuna Buyer, LLC (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 31, 2016).
2.4	Amendment No. 1, dated as of October 19, 2016, to the Stock Subscription Agreement, dated August 28, 2016, by and among The Providence Service Corporation, CCHN Group Holdings, Inc. and Mercury Fortuna Buyer, LLC (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on October 25, 2016).
2.5	Agreement and Plan of Merger, dated as of September 14, 2018, among The Providence Service Corporation, LogistiCare Solutions, LLC, Catapult Merger Sub, Circulation, Inc. and Fortis Advisors LLC (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on September 17, 2018).
2.6	Share Purchase Agreement, dated November 7, 2018, among The Providence Service Corporation, Ingeus UK Holdings Limited, Advanced Personnel Management Group Pty Ltd, APM UK Holdings Limited and International APM Group Pty Limited (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended September 30, 2018 filed with the SEC on November 8, 2018).
3.1	Second Amended and Restated Certificate of Incorporation of The Providence Service Corporation, including Certificate of Designation of Series A Junior Participating Preferred Stock, as filed with the Secretary of State of Delaware on December 9, 2011 (Incorporated by reference from an exhibit to the registrant's annual report on Form 10-K for the year ended December 31, 2011 filed with the SEC on March 15, 2012).
3.2	Certificate of Amendment of the Certificate of Incorporation of The Providence Service Corporation, dated as of May 6, 2015 (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on May 7, 2015).
3.3	Amended and Restated Bylaws of The Providence Service Corporation, effective March 10, 2010 (Incorporated by reference from an exhibit to the registrant's annual report on Form 10-K for the year ended December 31, 2009 filed with the SEC on March 12, 2010).
4.1	Certificate of Designations of Series A Convertible Preferred Stock of The Providence Service Corporation, dated as of February 6, 2015 (Incorporated by reference from an exhibit to Amendment No. 1 to the registrant's annual report on Form 10-K/A for the year ended December 31, 2014 filed with the SEC on April 30, 2015).
10.1	Amended and Restated Credit and Guaranty Agreement, dated as of August 2, 2013, by and among The Providence Service Corporation and certain of its subsidiaries party thereto, Bank of America, N.A., SunTrust Bank, BMO Harris Bank, Merrill Lynch, Pierce, Fenner & Smith Incorporated and SunTrust Robinson

	Humphrey, Inc. and the lenders party thereto (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 5, 2013).
10.2	Amended and Restated Pledge Agreement, dated as of August 2, 2013, by and among The Providence Service Corporation, certain of its subsidiaries party thereto, and Bank of America, N.A., as administrative agent (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 5, 2013).
10.3	Amended and Restated Security Agreement, dated as of August 2, 2013, by and among The Providence Service Corporation, certain of its subsidiaries party thereto, and Bank of America, N.A., as administrative agent (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 5, 2013).

10.4	First Amendment to Amended and Restated Credit and Guaranty Agreement and Consent, dated as of May 28, 2014, by and among The Providence Service Corporation, the Guarantors named therein, the New Subsidiaries named therein, the Lenders and New Lender named therein and Bank of America, N.A., as administrative agent (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on June 3, 2014).
10.5	Second Amendment to the Amended and Restated Credit and Guaranty Agreement and Consent, dated as of October 23, 2014, by and among The Providence Service Corporation, certain of its subsidiaries party thereto, Bank of America, N.A., SunTrust Bank, Royal Bank of Canada, BMO Harris Bank, N.A., HSBC Bank USA, National Association, the other Lenders party thereto, Merrill Lynch, Pierce, Fenner & Smith Incorporated, SunTrust Robinson Humphrey, Inc., and RBC Capital Markets (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on October 24, 2014).
10.6	Third Amendment and Consent to the Amended and Restated Credit and Guaranty Agreement, dated as of September 3, 2015, by and among The Providence Service Corporation, certain of its subsidiaries party thereto, Bank of America, N.A., Sun Trust Bank, Royal Bank of Canada, BMO Harris Bank, N.A., HSBC Bank USA, National Association, the other lenders party thereto, Merrill Lynch Pierce, Fenner & Smith Incorporated, Sun Trust Robinson Humphrey, Inc. and RBC Capital Markets (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on September 8, 2015).
10.7	Fourth Amendment and Consent to the Amended and Restated Credit and Guaranty Agreement, dated as of August 28, 2016, by and among The Providence Service Corporation, the guarantors party thereto, the lenders party thereto and Bank of America, N.A., as Administrative Agent (Incorporated by reference to an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 31, 2016).
10.8	Employment Agreement, dated January 14, 2015, by and between The Providence Service Corporation and James Lindstrom (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on January 21, 2015).
10.9+	Employment Agreement, dated as of September 28, 2015, by and between The Providence Service Corporation and David Shackelton (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on November 20, 2015).
10.10+	Amended & Restated Employment Agreement, dated January 9, 2018, by and between The Providence Service Corporation and David Shackelton (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on January 16, 2018).
10.11+	Employment Agreement, dated April 4, 2016, between The Providence Service Corporation and Sophia Tawil (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended March 31, 2016 filed with the SEC on May 6, 2016).
10.12+	Amended & Restated Employment Agreement, dated January 9, 2018, by and between The Providence Service Corporation and Sophia Tawil (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on January 16, 2018).
10.13+	Employment Agreement, dated November 15, 2017, between The Providence Service Corporation and R. Carter Pate (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on November 15, 2017).
10.14+	Letter Agreement, dated January 10, 2018, by and between The Providence Service Corporation and William Severance (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on January 16, 2018).
10.15+	The Providence Service Corporation Non-Qualified Stock Option Agreement, dated April 9, 2018, between The

	Providence Service Corporation and R. Carter Pate (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on April 11, 2018).
10.16+	Amendment No. 1 to The Providence Service Corporation Non-Qualified Stock Option Agreement, dated May 1, 2018, between The Providence Service Corporation and R. Carter Pate (Incorporated by reference from an exhibit to the registrant's Registration Statement on Form S-1 filed with the SEC on May 9, 2018).
10.17+	Employment Agreement, dated August 18, 2018, by and among The Providence Service Corporation, LogistiCare Solutions, LLC and Kevin M. Dotts (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 22, 2018).
10.18+	The Providence Service Corporation 2006 Long-Term Incentive Plan, as amended and restated effective July 27, 2016 (Incorporated by reference from an appendix to the registrant's definitive proxy statement on Schedule 14A filed with the SEC on June 14, 2016).

10.19+	Form of Restricted Stock Agreements (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended March 31, 2011 filed with the SEC on May 6, 2011).
10.20+	Form of Stock Option Agreements (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended March 31, 2011 filed with the SEC on May 6, 2011).
10.21+	Form of Special Incentive Stock Option Award Agreement (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 11, 2015).
10.22+	Form of Matching Incentive Stock Option Award Agreement (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on August 11, 2015).
10.23	Amended and Restated Limited Liability Company Agreement of Mercury Parent, LLC, by and between Prometheus Holdco, LLC and Mercury Fortuna Buyer, LLC, dated as of October 19, 2016 (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on October 25, 2016).
10.24	Second Amended and Restated Limited Liability Company Agreement of Mercury Parent, LLC, by and between Prometheus Holdco, LLC and Mercury Fortuna Buyer, LLC, dated February 16, 2018 (Incorporated by reference from an exhibit to the registrant's annual report on Form 10-K for the year ended December 31, 2017 filed with the SEC on March 9, 2018).
10.25+	Form of Matching Stock Option Agreement (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended March 31, 2017 filed with the SEC on May 10, 2017).
10.26+	Form of Stock Option Agreement (Incorporated by reference from an exhibit to the registrant's annual report on Form 10-K for the year ended December 31, 2017 filed with the SEC on March 9, 2018).
10.27+	Letter agreement, dated September 21, 2015, between The Providence Service Corporation and Matthew Umscheid (Incorporated by reference from an exhibit to the registrant's annual report on Form 10-K for the year ended December 31, 2017 filed with the SEC on March 9, 2018).
10.28+	The Providence Service Corporation Employee Retention Plan (Incorporated by reference from an exhibit to the registrant's current report on Form 8-K filed with the SEC on April 11, 2018).
10.29	Registration Indemnification Agreement, dated May 9, 2018, between The Providence Service Corporation, Coliseum Capital Partners, L.P., Coliseum Capital Partners II, L.P., Coliseum Capital Co-Invest, L.P. and Blackwell Partners, LLC - Series A (Incorporated by reference from an exhibit to the registrant's Registration Statement on Form S-1 filed with the SEC on May 9, 2018).
10.30+	Form of Deferred Share Unit Agreement (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended June 30, 2018 filed with the SEC on August 8, 2018).
10.31+	Form of Amendment to Retention Letter under The Providence Service Corporation Employee Retention Plan (Incorporated by reference from an exhibit to the registrant's quarterly report on Form 10-Q for the quarter ended September 30, 2018 filed with the SEC on November 8, 2018).
21.1*	Subsidiaries of the Registrant.
23.1*	Consent of KPMG LLP.

abstract

Attention-deficit/hyperactivity disorder (ADHD) is the most common neurobehavioral disorder of childhood and can profoundly affect the academic achievement, well-being, and social interactions of children; the American Academy of Pediatrics first published clinical recommendations for the diagnosis and evaluation of ADHD in children in 2000; recommendations for treatment followed in 2001. *Pediatrics* 2011;128:1007–1022

Summary of key action statements:

1. The primary care clinician should initiate an evaluation for ADHD for any child 4 through 18 years of age who presents with academic or behavioral problems and symptoms of inattention, hyperactivity, or impulsivity (quality of evidence B/strong recommendation).
2. To make a diagnosis of ADHD, the primary care clinician should determine that *Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition* criteria have been met (including documentation of impairment in more than 1 major setting); information should be obtained primarily from reports from parents or guardians, teachers, and other school and mental health clinicians involved in the child's care. The primary care clinician should also rule out any alternative cause (quality of evidence B/strong recommendation).
3. In the evaluation of a child for ADHD, the primary care clinician should include assessment for other conditions that might coexist with ADHD, including emotional or behavioral (eg, anxiety, depressive, oppositional defiant, and conduct disorders), developmental (eg, learning and language disorders or other neurodevelopmental disorders), and physical (eg, tics, sleep apnea) conditions (quality of evidence B/strong recommendation).
4. The primary care clinician should recognize ADHD as a chronic condition and, therefore, consider children and adolescents with ADHD as children and youth with special health care needs. Management of children and youth with special health care needs should follow the principles of the chronic care model and the medical home (quality of evidence B/strong recommendation).

5. Recommendations for treatment of children and youth with ADHD vary depending on the patient's age:
   a. For *preschool-aged children (4–5 years of age)*, the primary care clinician should prescribe evidence-based parent- and/or teacher-administered behavior therapy as the first line of treatment (quality of evidence A/strong recommendation) and may prescribe methylphenidate if the behavior interventions do not provide significant improvement and there is moderate-to-severe continuing disturbance in the child's function. In areas where evidence-based behavioral treatments are not available, the clinician needs to weigh the risks of starting medication at an early age against the harm of delaying diagnosis and treatment (quality of evidence B/recommendation).
   b. For *elementary school–aged children (6–11 years of age)*, the primary care clinician should prescribe US Food and Drug Administration–approved medications for ADHD (quality of evidence A/strong recommendation) and/or evidence-based parent- and/or teacher-administered behavior therapy as treatment for ADHD, preferably both (quality of evidence B/strong recommendation). The evidence is particularly strong for stimulant medications and sufficient but less strong for atomoxetine, extended-release guanfacine, and extended-release clonidine (in that order) (quality of evidence A/strong recommendation). The school environment, program, or placement is a part of any treatment plan.
   c. For *adolescents (12–18 years of age)*, the primary care clinician should prescribe Food and Drug Administration–approved medications for ADHD with the assent of the adolescent (quality of evidence A/strong recommendation) and may prescribe behavior therapy as treatment for ADHD (quality of evidence C/recommendation), preferably both.
6. The primary care clinician should titrate doses of medication for ADHD to achieve maximum benefit with minimum adverse effects (quality of evidence B/strong recommendation).

INTRODUCTION

This document updates and replaces 2 previously published clinical guidelines from the American Academy of Pediatrics (AAP) on the diagnosis and treatment of attention-deficit/hyperactivity disorder (ADHD) in children: "Clinical Practice Guideline: Diagnosis and Evaluation of the Child With Attention-Deficit/Hyperactivity Disorder" (2000)[1] and "Clinical Practice Guideline: Treatment of the School-aged Child With Attention-Deficit/Hyperactivity Disorder" (2001).[2] Since these guidelines were published, new information and evidence regarding the diagnosis and treatment of ADHD has become available. Surveys conducted before and after the publication of the previous guidelines have also provided insight into pediatricians' attitudes and practices regarding ADHD. On the basis of an increased understanding regarding ADHD and the challenges it raises for children and families and as a source for clinicians seeking to diagnose and treat children, this guideline pays particular attention to a number of areas.

Expanded Age Range

The previous guidelines addressed diagnosis and treatment of ADHD in children 6 through 12 years of age. There is now emerging evidence to expand the age range of the recommendations to include preschool-aged children and adolescents. This guideline addresses the diagnosis and treatment of ADHD in children 4 through 18 years of age, and attention is brought to special circumstances or concerns in particular age groups when appropriate.

Expanded Scope

Behavioral interventions might help families of children with hyperactive/impulsive behaviors that do not meet full diagnostic criteria for ADHD. Guidance regarding the diagnosis of problem-level concerns in children based on the *Diagnostic and Statistical Manual for Primary Care* (DSM-PC), *Child and Adolescent Version*,[3] as well as suggestions for treatment and care of children and families with problem-level concerns, are provided here. The current DSM-PC was published in 1996 and, therefore, is not consistent with intervening changes to *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM). Although this version of the DSM-PC should not be used as a definitive source for diagnostic codes related to ADHD and comorbid conditions, it certainly may continue to be used as a resource for enriching the understanding of ADHD manifestations. The DSM-PC will be revised when both the DSM-V and ICD-10 are available for use.

A Process of Care for Diagnosis and Treatment

This guideline and process-of-care algorithm (see Supplemental Fig 2 and Supplemental Appendix) recognizes evaluation, diagnosis, and treatment as a continuous process and provides recommendations for both the guideline and the algorithm in this single publication. In addition to the formal recommendations for assessment, diagnosis, and treatment, this guideline

provides a single algorithm to guide the clinical process.

Integration With the Task Force on Mental Health

This guideline fits into the broader mission of the AAP Task Force on Mental Health and its efforts to provide a base from which primary care providers can develop alliances with families, work to prevent mental health conditions and identify them early, and collaborate with mental health clinicians.

The diagnosis and management of ADHD in children and youth has been particularly challenging for primary care clinicians because of the limited payment provided for what requires more time than most of the other conditions they typically address. The procedures recommended in this guideline necessitate spending more time with patients and families, developing a system of contacts with school and other personnel, and providing continuous, coordinated care, all of which is time demanding. In addition, relegating mental health conditions exclusively to mental health clinicians also is not a viable solution for many clinicians, because in many areas access to mental health clinicians to whom they can refer patients is limited. Access in many areas is also limited to psychologists when further assessment of cognitive issues is required and not available through the education system because of restrictions from third-party payers in paying for the evaluations on the basis of them being educational and not health related.

Cultural differences in the diagnosis and treatment of ADHD are an important issue, as they are for all pediatric conditions. Because the diagnosis and treatment of ADHD depends to a great extent on family and teacher perceptions, these issues might be even more prominent an issue for ADHD. Specific cultural issues are beyond the scope of this guideline but are important to consider.

METHODOLOGY

As with the 2 previously published clinical guidelines, the AAP collaborated with several organizations to develop a working subcommittee that represented a wide range of primary care and subspecialty groups. The subcommittee included primary care pediatricians, developmental-behavioral pediatricians, and representatives from the American Academy of Child and Adolescent Psychiatry, the Child Neurology Society, the Society for Pediatric Psychology, the National Association of School Psychologists, the Society for Developmental and Behavioral Pediatrics, the American Academy of Family Physicians, and Children and Adults With Attention-Deficit/Hyperactivity Disorder (CHADD), as well as an epidemiologist from the Centers for Disease Control and Prevention (CDC).

This group met over a 2-year period, during which it reviewed the changes in practice that have occurred and issues that have been identified since the previous guidelines were published. Delay in completing the process led to further conference calls and extended the years of literature reviewed in order to remain as current as possible. The AAP funded the development of this guideline; potential financial conflicts of the participants were identified and taken into consideration in the deliberations. The guideline will be reviewed and/or revised in 5 years unless new evidence emerges that warrants revision sooner.

The subcommittee developed a series of research questions to direct an extensive evidence-based review in partnership with the CDC and the University of Oklahoma Health Sciences Center. The diagnostic review was conducted by the CDC, and the evidence was evaluated in a combined effort of the AAP, CDC, and University of Oklahoma Health Sciences Center staff. The treatment-related evidence relied on a recent evidence review by the Agency for Healthcare Research and Quality and was supplemented by evidence identified through the CDC review.

The diagnostic issues were focused on 5 areas:

1. ADHD prevalence—specifically: (*a*) What percentage of the general US population aged 21 years or younger has ADHD? (*b*) What percentage of patients presenting at pediatricians' or family physicians' offices in the United States meet diagnostic criteria for ADHD?
2. Co-occurring mental disorders—of people with ADHD, what percentage has 1 or more of the following co-occurring conditions: sleep disorders, learning disabilities, depression, anxiety, conduct disorder, and oppositional defiant disorder?
3. What are the functional impairments of children and youth diagnosed with ADHD? Specifically, in what domains and to what degree do youth with ADHD demonstrate impairments in functional domains, including peer relations, academic performance, adaptive skills, and family functioning?
4. Do behavior rating scales remain the standard of care in assessing the diagnostic criteria for ADHD?
5. What is the prevalence of abnormal findings on selected medical screening tests commonly recommended as standard components of an evaluation of a child with suspected ADHD? How accurate are these tests in the diagnosis of ADHD compared with a reference standard (ie, what are the psychometric properties of these tests)?

The treatment issues were focused on 3 areas:

1. What new information is available

regarding the long-term efficacy and safety of medications approved by the US Food and Drug Administration (FDA) for the treatment of ADHD (stimulants and nonstimulants), and specifically, what information is available about the efficacy and safety of these medications in preschool-aged and adolescent patients?

2. What evidence is available about the long-term efficacy and safety of psychosocial interventions (behavioral modification) for the treatment of ADHD for children, and specifically, what information is available about the efficacy and safety of these interventions in preschool-aged and adolescent patients?
3. Are there any additional therapies that reach the level of consideration as evidence based?

Evidence-Review Process for Diagnosis

A multilevel, systematic approach was taken to identify the literature that built the evidence base for both diagnosis and treatment. To increase the likelihood that relevant articles were included in the final evidence base, the reviewers first conducted a scoping review of the literature by systematically searching literature using relevant key words and then summarized the primary findings of articles that met standard inclusion criteria. The reviewers then created evidence tables that were reviewed by content-area experts who were best able to identify articles that might have been missed through the scoping review. Articles that were missed were reviewed carefully to determine where the abstraction methodology failed, and adjustments to the search strategy were made as required (see technical report to be published). Finally, although published literature reviews did not contribute directly to the evidence base, the articles included in review articles were cross-referenced with the final evidence tables to ensure that all relevant articles were included in the final evidence tables.

For the scoping review, articles were abstracted in a stratified fashion from 3 article-retrieval systems that provided access to articles in the domains of medicine, psychology, and education: PubMed (www.ncbi.nlm.nih.gov/sites/entrez), PsycINFO (www.apa.org/pubs/databases/psycinfo/index.aspx), and ERIC (www.eric.ed.gov). English-language, peer-reviewed articles published between 1998 and 2009 were queried in the 3 search engines. Key words were selected with the intent of including all possible articles that might have been relevant to 1 or more of the questions of interest (see the technical report to be published). The primary abstraction included the following terms: "attention deficit hyperactivity disorder" or "attention deficit disorder" or "hyperkinesis" and "child." A second, independent abstraction was conducted to identify articles related to medical screening tests for ADHD. For this abstraction, the same search terms were used as in the previous procedure along with the additional condition term "behavioral problems" to allow for the inclusion of studies of youth that sought to diagnose ADHD by using medical screening tests. Abstractions were conducted in parallel fashion across each of the 3 databases; the results from each abstraction (complete reference, abstract, and key words) were exported and compiled into a common reference database using EndNote 10.0.[4] References were subsequently and systematically deduplicated by using the software's deduplication procedure. References for books, chapters, and theses were also deleted from the library. Once a deduplicated library was developed, the semifinal database of 8267 references was reviewed for inclusion on the basis of inclusion criteria listed in the technical report. Included articles were then pulled in their entirety, the inclusion criteria were reconfirmed, and then the study findings were summarized in evidence tables. The articles included in relevant review articles were revisited to ensure their inclusion in the final evidence base. The evidence tables were then presented to the committee for expert review.

Evidence-Review Process for Treatment

In addition to this systematic review, for treatment we used the review from the Agency for Healthcare Research and Quality (AHRQ) Effective Healthcare Program "Attention Deficit Hyperactivity Disorder: Effectiveness of Treatment in At-Risk Preschoolers; Long-term Effectiveness in All Ages; and Variability in Prevalence, Diagnosis, and Treatment."[5] This review addressed a number of key questions for the committee, including the efficacy of medications and behavioral interventions for preschoolers, children, and adolescents. Evidence identified through the systematic evidence review for diagnosis was also used as a secondary data source to supplement the evidence presented in the AHRQ report. The draft practice guidelines were developed by consensus of the committee regarding the evidence. It was decided to create 2 separate components. The guideline recommendations were based on clear characterization of the evidence. The second component is a practice-of-care algorithm (see Supplemental Fig 2) that provides considerably more detail about how to implement the guidelines but is, necessarily, based less on available evidence and more on consensus of the committee members. When data were lacking, particularly in the

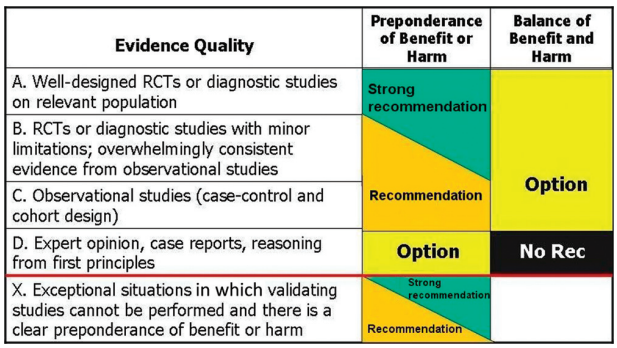

FIGURE 1

Integrating evidence-quality appraisal with an assessment of the anticipated balance between benefits and harms if a policy is conducted leads to designation of a policy as a strong recommendation, recommendation, option, or no recommendation. The evidence is discussed in more detail in a technical report that will follow in a later publication. RCT indicates randomized controlled trial; Rec, recommendation.

process-of-care algorithmic portion of the guidelines, a combination of evidence and expert consensus was used. Action statements labeled "strong recommendation" or "recommendation" were based on high- to moderate-quality scientific evidence and a preponderance of benefit over harm.[6] Option-level action statements were based on lesser-quality or limited data and expert consensus or high-quality evidence with a balance between benefits and harms. These clinical options are interventions that a reasonable health care provider might or might not wish to implement in his or her practice. The quality of evidence supporting each recommendation and the strength of each recommendation were assessed by the committee member most experienced in epidemiology and graded according to AAP policy (Fig 1).[6]

The guidelines and process-of-care algorithm underwent extensive peer review by committees, sections, councils, and task forces within the AAP; numerous outside organizations; and other individuals identified by the subcommittee. Liaisons to the subcommittee also were invited to distribute the draft to entities within their organizations. The resulting comments were compiled and reviewed by the chairperson, and relevant changes were incorporated into the draft, which was then reviewed by the full committee.

ABOUT THIS GUIDELINE

Key Action Statements

In light of the concerns highlighted previously and informed by the available evidence, the AAP has developed 6 action statements for the evaluation, diagnosis, and treatment of ADHD in children. These action statements provide for consistent and quality care for children and families with concerns about or symptoms that suggest attention disorders or problems.

Context

This guideline is intended to be integrated with the broader algorithms developed as part of the mission of the AAP Task Force on Mental Health.[7]

Implementation: A Process-of-Care Algorithm

The AAP recognizes the challenge of instituting practice changes and adopting new recommendations for care. To address the need, a process-of-care algorithm has been developed and has been used in the revision of the AAP ADHD toolkit.

Implementation: Preparing the Practice

Full implementation of the action statements described in this guideline and the process-of-care algorithm might require changes in office procedures and/or preparatory efforts to identify community resources. The section titled "Preparing the Practice" in the process-of-care algorithm and further information can be found in the supplement to the Task Force on Mental Health report.[7] It is important to document all aspects of the diagnostic and treatment procedures in the patients' records. Use of rating scales for the diagnosis of ADHD and assessment for comorbid conditions and as a method for monitoring treatment as described in the process algorithm (see Supplemental Fig 2), as well as information provided to parents such as management plans, can help facilitate a clinician's accurate documentation of his or her process.

Note

The AAP acknowledges that some primary care clinicians might not be confident of their ability to successfully diagnose and treat ADHD in a child because of the child's age, coexisting conditions, or other concerns. At any point at which a clinician feels that he or she is not adequately trained or is uncertain about making a diagnosis or continuing with treatment, a referral to a pediatric or mental health subspecialist should be made. If a diagnosis of ADHD or other condition is made by a subspecialist, the primary care clinician should develop a management strategy with the subspecialist that ensures that the child will continue to receive appropriate care consistent with a medical home model wherein the pediatrician part-

ners with parents so that both health and mental health needs are integrated.

KEY ACTION STATEMENTS FOR THE EVALUATION, DIAGNOSIS, TREATMENT, AND MONITORING OF ADHD IN CHILDREN AND ADOLESCENTS

Action statement 1: The primary care clinician should initiate an evaluation for ADHD for any child 4 through 18 years of age who presents with academic or behavioral problems and symptoms of inattention, hyperactivity, or impulsivity (quality of evidence B/strong recommendation).

Evidence Profile

- **Aggregate evidence quality:** B.
- **Benefits:** In a considerable number of children, ADHD goes undiagnosed. Primary care clinicians' systematic identification of children with these problems will likely decrease the rate of undiagnosed and untreated ADHD in children.
- **Harms/risks/costs:** Children in whom ADHD is inappropriately diagnosed might be labeled inappropriately, or another condition might be missed, and they might receive treatments that will not benefit them.
- **Benefits-harms assessment:** The high prevalence of ADHD and limited mental health resources require primary care pediatricians to play a significant role in the care of their patients with ADHD so that children with this condition receive the appropriate diagnosis and treatment. Treatments available have shown good evidence of efficacy, and lack of treatment results in a risk for impaired outcomes.
- **Value judgments:** The committee considered the requirements for establishing the diagnosis, the prevalence of ADHD, and the efficacy and adverse effects of treatment as well as the long-term outcomes.
- **Role of patient preferences:** Success with treatment depends on patient and family preference, which has to be taken into account.
- **Exclusions:** None.
- **Intentional vagueness:** The limits between what can be handled by a primary care clinician and what should be referred to a subspecialist because of the varying degrees of skills among primary care clinicians.
- **Strength: strong recommendation.**

The basis for this recommendation is essentially unchanged from that in the previous guideline. ADHD is the most common neurobehavioral disorder in children and occurs in approximately 8% of children and youth[8–10]; the number of children with this condition is far greater than can be managed by the mental health system. There is now increased evidence that appropriate diagnosis can be provided for preschool-aged children[11] (4–5 years of age) and for adolescents.[12]

Action statement 2: To make a diagnosis of ADHD, the primary care clinician should determine that *Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition* (DSM-IV-TR) criteria have been met (including documentation of impairment in more than 1 major setting), and information should be obtained primarily from reports from parents or guardians, teachers, and other school and mental health clinicians involved in the child's care. The primary care clinician should also rule out any alternative cause (quality of evidence B/strong recommendation).

Evidence Profile

- **Aggregate evidence quality:** B.
- **Benefits:** The use of DSM-IV criteria has lead to more uniform categorization of the condition across professional disciplines.
- **Harms/risks/costs:** The DSM-IV system does not specifically provide for developmental-level differences and might lead to some misdiagnoses.
- **Benefits-harms assessment:** The benefits far outweigh the harm.
- **Value judgments:** The committee took into consideration the importance of coordination between pediatric and mental health services.
- **Role of patient preferences:** Although there is some stigma associated with mental disorder diagnoses resulting in some families preferring other diagnoses, the need for better clarity in diagnoses was felt to outweigh this preference.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation.**

As with the findings in the previous guideline, the DSM-IV criteria continue to be the criteria best supported by evidence and consensus. Developed through several iterations by the American Psychiatric Association, the DSM-IV criteria were created through use of consensus and an expanding research foundation.[13] The DSM-IV system is used by professionals in psychiatry, psychology, health care systems, and primary care. Use of DSM-IV criteria, in addition to having the best evidence to date for criteria for ADHD, also affords the best method for communication across clinicians and is established with third-party payers. The criteria are under review for the development of the DSM-V, but these changes will not be available until at least 1 year after the publication of this current guideline. The diagnostic criteria have not changed since the previous guideline and are presented in Supplemental Table 2. An anticipated change in the DSM-V is increasing the age limit for when ADHD needs to have first presented from 7 to 12 years.[14]

Special Circumstances: Preschool-aged Children (4–5 Years Old)

There is evidence that the diagnostic criteria for ADHD can be applied to preschool-aged children; however, the subtypes detailed in the DSM-IV might not be valid for this population.[15–21] A review of the literature, including the multisite study of the efficacy of methylphenidate in preschool-aged children, revealed that the criteria could appropriately identify children with the condition.[11] However, there are added challenges in determining the presence of key symptoms. Preschool-aged children are not likely to have a separate observer if they do not attend a preschool or child care program, and even if they do attend, staff in those programs might be less qualified than certified teachers to provide accurate observations. Here, too, focused checklists can help physicians in the diagnostic evaluation, although only the Conners Comprehensive Behavior Rating Scales and the ADHD Rating Scale IV are DSM-IV–based scales that have been validated in preschool-aged children.[22]

When there are concerns about the availability or quality of nonparent observations of a child's behavior, physicians may recommend that parents complete a parent-training program before confirming an ADHD diagnosis for preschool-aged children and consider placement in a qualified preschool program if they have not done so already. Information can be obtained from parents and teachers through the use of validated DSM-IV–based ADHD rating scales. The parent-training program must include helping parents develop age-appropriate developmental expectations and specific management skills for problem behaviors. The clinician may obtain reports from the parenting class instructor about the parents' ability to manage their children, and if the children are in programs in which they are directly observed, instructors can report information about the core symptoms and function of the child directly. Qualified preschool programs include programs such as Head Start or other public prekindergarten programs. Preschool-aged children who display significant emotional or behavioral concerns might also qualify for Early Childhood Special Education services through their local school districts, and the evaluators for these programs and/or Early Childhood Special Education teachers might be excellent reporters of core symptoms.

Special Circumstances: Adolescents

Obtaining teacher reports for adolescents might be more challenging, because many adolescents will have multiple teachers. Likewise, parents might have less opportunity to observe their adolescent's behaviors than they had when their children were younger. Adolescents' reports of their own behaviors often differ from those of other observers, because they tend to minimize their own problematic behaviors.[23–25] Adolescents are less likely to exhibit overt hyperactive behavior. Despite the difficulties, clinicians need to try to obtain (with agreement from the adolescent) information from at least 2 teachers as well as information from other sources such as coaches, school guidance counselors, or leaders of community activities in which the adolescent participates. In addition, it is unusual for adolescents with behavioral/attention problems not to have been previously given a diagnosis of ADHD. Therefore, it is important to establish the younger manifestations of the condition that were missed and to strongly consider substance use, depression, and anxiety as alternative or co-occurring diagnoses. Adolescents with ADHD, especially when untreated, are at greater risk of substance abuse.[26] In addition, the risks of mood and anxiety disorders and risky sexual behaviors increase during adolescence.[12]

Special Circumstances: Inattention or Hyperactivity/Impulsivity (Problem Level)

Teachers, parents, and child health professionals typically encounter children with behaviors relating to activity level, impulsivity, and inattention who might not fully meet DSM-IV criteria. The DSM-PC[3] provides a guide to the more common behaviors seen in pediatrics. The manual describes common variations in behavior as well as more problematic behaviors at levels of less impairment than those specified in the DSM-IV.

The behavioral descriptions of the DSM-PC have not yet been tested in community studies to determine the prevalence or severity of developmental variations and problems in the areas of inattention, hyperactivity, or impulsivity. They do, however, provide guidance to clinicians regarding elements of treatment for children with problems with mild-to-moderate inattention, hyperactivity, or impulsivity. The DSM-PC also considers environmental influences on a child's behavior and provides information on differential diagnosis with a developmental perspective.

Action statement 3: In the evaluation of a child for ADHD, the primary care clinician should include assessment for other conditions that might coexist with ADHD, including emotional or behavioral (eg, anxiety, depressive, oppositional defiant, and conduct disorders), developmental (eg, learning and language disorders or other neurodevelopmental disorders), and physical (eg, tics, sleep apnea) conditions (quality of evidence B/strong recommendation).

Evidence Profile

- **Aggregate evidence quality:** B.
- **Benefits:** Identifying coexisting conditions is important for developing the most appropriate treatment plan.
- **Harms/risks/costs:** The major risk is misdiagnosing the conditions and providing inappropriate care.
- **Benefits-harms assessment:** There is a preponderance of benefit over harm.
- **Value judgments:** The committee members took into consideration the common occurrence of coexisting conditions and the importance of addressing them in making this recommendation.
- **Role of patient preferences:** None.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation.**

A variety of other behavioral, developmental, and physical conditions can coexist in children who are evaluated for ADHD. These conditions include, but are not limited to, learning problems, language disorder, disruptive behavior, anxiety, mood disorders, tic disorders, seizures, developmental coordination disorder, or sleep disorders.[23,24,27–38] In some cases, the presence of a coexisting condition will alter the treatment of ADHD. The primary care clinician might benefit from additional support and guidance or might need to refer a child with ADHD and coexisting conditions, such as severe mood or anxiety disorders, to subspecialists for assessment and management. The subspecialists could include child psychiatrists, developmental-behavioral pediatricians, neurodevelopmental disability physicians, child neurologists, or child or school psychologists.

Given the likelihood that another condition exists, primary care clinicians should conduct assessments that determine or at least identify the risk of coexisting conditions. Through its Task Force on Mental Health, the AAP has developed algorithms and a toolkit[39] for assessing and treating (or comanaging) the most common developmental disorders and mental health concerns in children. These resources might be useful in assessing children who are being evaluated for ADHD. Payment for evaluation and treatment must cover the fixed and variable costs of providing the services, as noted in the AAP policy statement "Scope of Health Care Benefits for Children From Birth Through Age 26.[40]

Special Circumstances: Adolescents

Clinicians should assess adolescent patients with newly diagnosed ADHD for symptoms and signs of substance abuse; when these signs and symptoms are found, evaluation and treatment for addiction should precede treatment for ADHD, if possible, or careful treatment for ADHD can begin if necessary.[25]

Action statement 4: The primary care clinician should recognize ADHD as a chronic condition and, therefore, consider children and adolescents with ADHD as children and youth with special health care needs. Management of children and youth with special health care needs should follow the principles of the chronic care model and the medical home (quality of evidence B/strong recommendation).

Evidence Profile

- **Aggregate evidence quality:** B.
- **Benefits:** The recommendation describes the coordinated services most appropriate for managing the condition.
- **Harms/risks/costs:** Providing the services might be more costly.
- **Benefits-harms assessment:** There is a preponderance of benefit over harm.
- **Value judgments:** The committee members considered the value of medical home services when deciding to make this recommendation.
- **Role of patient preferences:** Family preference in how these services are provided is an important consideration.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation.**

As in the previous guideline, this recommendation is based on the evidence that ADHD continues to cause symptoms and dysfunction in many children who have the condition over long periods of time, even into adulthood, and that the treatments available address symptoms and function but are usually not curative. Although the chronic illness model has not been specifically studied in children and youth with ADHD, it has been effective for other chronic conditions such as asthma,[23] and the medical home model has been accepted as the preferred standard of care.[41] The management process is also helped by encouraging strong family-school partnerships.[42]

Longitudinal studies have found that, frequently, treatments are not sustained despite the fact that long-term outcomes for children with ADHD indicate that they are at greater risk of significant problems if they discontinue treatment.[43] Because a number of parents of children with ADHD also have ADHD, extra support might be necessary to help those parents provide medication on a consistent basis and institute a consistent behavioral program. The medical home and chronic illness approach is provided in the process algorithm (Supplemental Fig 2). An important process in ongoing care is bidirectional communication with teachers and other school and mental health clinicians involved in the child's care as well as with parents and patients.

Special Circumstances: Inattention or Hyperactivity/Impulsivity (Problem Level)

Children with inattention or hyperactivity/impulsivity at the problem level (DSM-PC) and their families might also benefit from the same chronic illness and medical home principles.

Action statement 5: Recommendations for treatment of children and youth with ADHD vary depending on the patient's age.

Action statement 5a: For *preschool-aged children (4–5 years of age)*, the primary care clinician should prescribe evidence-based parent- and/or teacher-administered behavior therapy as the first line of treatment (quality of evidence A/strong recommendation) and may prescribe methylphenidate if the behavior interventions do not provide significant improvement and there is moderate-to-severe continuing disturbance in the child's function. In areas in which evidence-based behavioral treatments are not available, the clinician needs to weigh the risks of starting medication at an early age against the harm of delaying diagnosis and treatment (quality of evidence B/recommendation).

Evidence Profile

- **Aggregate evidence quality:** A for behavior; B for methylphenidate.
- **Benefits:** Both behavior therapy and methylphenidate have been demonstrated to reduce behaviors associated with ADHD and improve function.
- **Harms/risks/costs:** Both therapies increase the cost of care, and behavior therapy requires a higher level of family involvement, whereas methylphenidate has some potential adverse effects.
- **Benefits-harms assessment:** Given the risks of untreated ADHD, the benefits outweigh the risks.
- **Value judgments:** The committee members included the effects of untreated ADHD when deciding to make this recommendation.
- **Role of patient preferences:** Family preference is essential in determining the treatment plan.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation.**

Action statement 5b: For *elementary school-aged children (6–11 years of age)*, the primary care clinician should prescribe FDA-approved medications for ADHD (quality of evidence A/strong recommendation) and/or evidence-based parent- and/or teacher-administered behavior therapy as treatment for ADHD, preferably both (quality of evidence B/strong recommendation). The evidence is particularly strong for stimulant medications and sufficient but less strong for atomoxetine, extended-release guanfacine, and extended-release clonidine (in that order) (quality of evidence A/strong recommendation). The school environment, program, or placement is a part of any treatment plan.

Evidence Profile

- **Aggregate evidence quality:** A for treatment with FDA-approved medications; B for behavior therapy.
- **Benefits:** Both behavior therapy and FDA-approved medications have been demonstrated to reduce behaviors associated with ADHD and improve function.
- **Harms/risks/costs:** Both therapies increase the cost of care, and behavior therapy requires a higher level of family involvement, whereas FDA-approved medications have some potential adverse effects.
- **Benefits-harms assessment:** Given the risks of untreated ADHD, the benefits outweigh the risks.
- **Value judgments:** The committee members included the effects of untreated ADHD when deciding to make this recommendation.
- **Role of patient preferences:** Family preference, including patient preference, is essential in determining the treatment plan.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation.**

Action statement 5c: For *adolescents (12–18 years of age)*, the primary care clinician should prescribe FDA-approved medications for ADHD with the assent of the adolescent (quality of evidence A/strong recommendation) and may prescribe behavior therapy as treatment for ADHD (quality of evidence C/recommendation), preferably both.

Evidence Profile

- **Aggregate evidence quality:** A for medications; C for behavior therapy.
- **Benefits:** Both behavior therapy and FDA-approved medications have been demonstrated to reduce behaviors associated with ADHD and improve function.
- **Harms/risks/costs:** Both therapies increase the cost of care, and behavior therapy requires a higher level of family involvement, whereas FDA-approved medications have some potential adverse effects.
- **Benefits-harms assessment:** Given the risks of untreated ADHD, the benefits outweigh the risks.
- **Value judgments:** The committee members included the effects of untreated ADHD when deciding to make this recommendation.
- **Role of patient preferences:** Family preference, including patient preference, is essential in determining the treatment plan.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation/recommendation.**

Medication

Similar to the recommendations from the previous guideline, stimulant medications are highly effective for most children in reducing core symptoms of ADHD.[44] One selective norepinephrine-reuptake inhibitor (atomoxetine[45,46]) and 2 selective α_2-adrenergic agonists (extended-release guanfacine[47,48] and extended-release clonidine[49]) have also demonstrated efficacy in reducing core symptoms. Because norepinephrine-reuptake inhibitors and α_2-adrenergic agonists are newer, the evidence base that supports them—although adequate for FDA approval—is considerably smaller than that for stimulants. None of them have been approved for use in preschool-aged children. Compared with stimulant medications that have an effect size [effect size = (treatment mean − control mean)/control SD] of approximately 1.0,[50] the effects of the nonstimulants are slightly weaker; atomoxetine has an effect size of approximately 0.7, and extended-release guanfacine and extended-release clonidine also have effect sizes of approximately 0.7.

The accompanying process-of-care algorithm provides a list of the currently available FDA-approved medications for ADHD (Supplemental Table 3). Characteristics of each medication are provided to help guide the clinician's choice in prescribing medication.

As was identified in the previous guideline, the most common stimulant adverse effects are appetite loss, abdominal pain, headaches, and sleep disturbance. The results of the Multimodal Therapy of ADHD (MTA) study revealed a more persistent effect of stimulants on decreasing growth velocity than have most previous studies, particularly when children were on higher and more consistently administered doses. The effects diminished by the third year of treatment, but no compensatory rebound effects were found.[51] However, diminished growth was in the range of 1 to 2 cm. An uncommon additional significant adverse effect of stimulants is the occurrence of hallucinations and other psychotic symptoms.[52] Although concerns have been raised about the rare occurrence of sudden cardiac death among children using stimulant medications,[53] sudden death in children on stimulant medication is extremely rare, and evidence is conflicting as to whether stimulant medications increase the risk of sudden death.[54–56] It is important to expand the history to include specific cardiac symptoms, Wolf-Parkinson-White syndrome, sudden death in the family, hypertrophic cardiomyopathy, and long QT syndrome. Preschool-aged children might experience increased mood lability and dysphoria.[57] For the nonstimulant atomoxetine, the adverse effects include initial somnolence and gastrointestinal tract symptoms, particularly if the dosage is increased too rapidly; decrease in appetite; increase in suicidal thoughts (less common); and hepatitis (rare). For the nonstimulant α_2-adrenergic agonists extended-release guanfacine and extended-release clonidine, adverse effects include somnolence and dry mouth.

Only 2 medications have evidence to support their use as adjunctive therapy with stimulant medications sufficient to achieve FDA approval: extended-release guanfacine[26] and extended-release clonidine. Other medications have been used in combination off-label, but there is currently only anecdotal evidence for their safety or efficacy, so their use cannot be recommended at this time.

Special Circumstances: Preschool-aged Children

A number of special circumstances support the recommendation to initiate ADHD treatment in preschool-aged children (ages 4–5 years) with behavioral therapy alone first.[57] These circumstances include:

- The multisite study of methylphenidate[57] was limited to preschool-aged children who had moderate-to-severe dysfunction.
- The study also found that many children (ages 4–5 years) experience improvements in symptoms with behavior therapy alone, and the overall evidence for behavior therapy in preschool-aged children is strong.
- Behavioral programs for children 4 to 5 years of age typically run in the form of group parent-training programs and, although not always compensated by health insurance, have a lower cost. The process algorithm (see Supplemental pages s15-16) contains criteria for the clinician to use in assessing the quality of the behavioral therapy. In addition, programs such as Head Start and Children and Adults With Attention Deficit Hyperactivity Disorder (CHADD) (www.chadd.org) might provide some behavioral supports.

Many young children with ADHD might still require medication to achieve maximum improvement, and medication is not contraindicated for children 4 through 5 years of age. However, only 1 multisite study has carefully assessed medication use in preschool-aged children. Other considerations in the recommendation about treating children 4 to 5 years of age with stimulant medications include:

- The study was limited to preschool-aged children who had moderate-to-severe dysfunction.
- Research has found that a number of young children (4–5 years of age) experience improvements in symptoms with behavior therapy alone.
- There are concerns about the possi-

ble effects on growth during this rapid growth period of preschool-aged children.

- There has been limited information about and experience with the effects of stimulant medication in children between the ages of 4 and 5 years.

Here, the criteria for enrollment (and, therefore, medication use) included measures of severity that distinguished treated children from the larger group of preschool-aged children with ADHD. Thus, before initiating medications, the physician should assess the severity of the child's ADHD. Given current data, only those preschool-aged children with ADHD who have moderate-to-severe dysfunction should be considered for medication. Criteria for this level of severity, based on the multisite-study results,[57] are (1) symptoms that have persisted for at least 9 months, (2) dysfunction that is manifested in both the home and other settings such as preschool or child care, and (3) dysfunction that has not responded adequately to behavior therapy. The decision to consider initiating medication at this age depends in part on the clinician's assessment of the estimated developmental impairment, safety risks, or consequences for school or social participation that could ensue if medications are not initiated. It is often helpful to consult with a mental health specialist who has had specific experience with preschool-aged children if possible.

Dextroamphetamine is the only medication approved by the FDA for use in children younger than 6 years of age. This approval, however, was based on less stringent criteria in force when the medication was approved rather than on empirical evidence of its safety and efficacy in this age group. Most of the evidence for the safety and efficacy of treating preschool-aged children with stimulant medications has been from methylphenidate.[57] Methylphenidate evidence consists of 1 multisite study of 165 children and 10 other smaller single-site studies that included from 11 to 59 children (total of 269 children); 7 of the 10 single-site studies found significant efficacy. It must be noted that although there is moderate evidence that methylphenidate is safe and efficacious in preschool-aged children, its use in this age group remains off-label. Although the use of dextroamphetamine is on-label, the insufficient evidence for its safety and efficacy in this age group does not make it possible to recommend at this time.

If children do not experience adequate symptom improvement with behavior therapy, medication can be prescribed, as described previously. Evidence suggests that the rate of metabolizing stimulant medication is slower in children 4 through 5 years of age, so they should be given a lower dose to start, and the dose can be increased in smaller increments. Maximum doses have not been adequately studied.[57]

Special Circumstances: Adolescents

As noted previously, before beginning medication treatment for adolescents with newly diagnosed ADHD, clinicians should assess these patients for symptoms of substance abuse. When substance use is identified, assessment when off the abusive substances should precede treatment for ADHD (see the Task Force on Mental Health report[7]). Diversion of ADHD medication (use for other than its intended medical purposes) is also a special concern among adolescents[58]; clinicians should monitor symptoms and prescription-refill requests for signs of misuse or diversion of ADHD medication and consider prescribing medications with no abuse potential, such as atomoxetine (Strattera [Ely Lilly Co, Indianapolis, IN]) and extended-release guanfacine (Intuniv [Shire US Inc, Wayne, PA]) or extended-release clonidine (Kapvay [Shionogi Inc, Florham Park, NJ]) (which are not stimulants) or stimulant medications with less abuse potential, such as lisdexamfetamine (Vyvanse [Shire US Inc]), dermal methylphenidate (Daytrana [Noven Therapeutics, LLC, Miami, FL]), or OROS methylphenidate (Concerta [Janssen Pharmaceuticals, Inc, Titusville, NJ]). Because lisdexamfetamine is dextroamphetamine, which contains an additional lysine molecule, it is only activated after ingestion, when it is metabolized by erythrocyte cells to dexamphetamine. The other preparations make extraction of the stimulant medication more difficult.

Given the inherent risks of driving by adolescents with ADHD, special concern should be taken to provide medication coverage for symptom control while driving. Longer-acting or late-afternoon, short-acting medications might be helpful in this regard.[59]

Special Circumstances: Inattention or Hyperactivity/Impulsivity (Problem Level)

Medication is not appropriate for children whose symptoms do not meet DSM-IV criteria for diagnosis of ADHD, although behavior therapy does not require a specific diagnosis, and many of the efficacy studies have included children without specific mental behavioral disorders.

Behavior Therapy

Behavior therapy represents a broad set of specific interventions that have a common goal of modifying the physical and social environment to alter or change behavior. Behavior therapy usually is implemented by training parents in specific techniques that improve their abilities to modify and

TABLE 1 Evidence-Based Behavioral Treatments for ADHD

Intervention Type	Description	Typical Outcome(s)	Median Effect Size[a]
Behavioral parent training (BPT)	Behavior-modification principles provided to parents for implementation in home settings	Improved compliance with parental commands; improved parental understanding of behavioral principles; high levels of parental satisfaction with treatment	0.55
Behavioral classroom management	Behavior-modification principles provided to teachers for implementation in classroom settings	Improved attention to instruction; improved compliance with classroom rules; decreased disruptive behavior; improved work productivity	0.61
Behavioral peer interventions (BPI)[b]	Interventions focused on peer interactions/relationships; these are often group-based interventions provided weekly and include clinic-based social-skills training used either alone or concurrently with behavioral parent training and/or medication	Office-based interventions have produced minimal effects; interventions have been of questionable social validity; some studies of BPI combined with clinic-based BPT found positive effects on parent ratings of ADHD symptoms; no differences on social functioning or parent ratings of social behavior have been revealed	

[a] Effect size = (treatment median − control median)/control SD.
[b] The effect size for behavioral peer interventions is not reported, because the effect sizes for these studies represent outcomes associated with combined interventions. A lower effect size means that they have less of an effect. The effect sizes found are considered moderate.
Adapted from Pelham W, Fabiano GA. *J Clin Child Adolesc Psychol.* 2008;37(1):184–214.

shape their child's behavior and to improve the child's ability to regulate his or her own behavior. The training involves techniques to more effectively provide rewards when their child demonstrates the desired behavior (eg, positive reinforcement), learn what behaviors can be reduced or eliminated by using planned ignoring as an active strategy (or using praising and ignoring in combination), or provide appropriate consequences or punishments when their child fails to meet the goals (eg, punishment). There is a need to consistently apply rewards and consequences as tasks are achieved and then to gradually increase the expectations for each task as they are mastered to shape behaviors. Although behavior therapy shares a set of principles, individual programs introduce different techniques and strategies to achieve the same ends.

Table 1 lists the major behavioral intervention approaches that have been demonstrated to be evidence based for the management of ADHD in 3 different types of settings. The table is based on 22 studies, each completed between 1997 and 2006.

Evidence for the effectiveness of behavior therapy in children with ADHD is derived from a variety of studies[60–62] and an Agency for Healthcare Research and Quality review.[5] The diversity of interventions and outcome measures makes meta-analysis of the effects of behavior therapy alone or in association with medications challenging. The long-term positive effects of behavior therapy have yet to be determined. Ongoing adherence to a behavior program might be important; therefore, implementing a chronic care model for child health might contribute to the long-term effects.[63]

Study results have indicated positive effects of behavior therapy when combined with medications. Most studies that compared behavior therapy to stimulants found a much stronger effect on ADHD core symptoms from stimulants than from behavior therapy. The MTA study found that combined treatment (behavior therapy and stimulant medication) was not significantly more efficacious than treatment with medication alone for the core symptoms of ADHD after correction for multiple tests in the primary analysis.[64] However, a secondary analysis of a combined measure of parent and teacher ratings of ADHD symptoms revealed a significant advantage for the combination with a small effect size of $d = 0.26$.[65] However, the same study also found that the combined treatment compared with medication alone did offer greater improvements on academic and conduct measures when ADHD coexisted with anxiety and when children lived in low socioeconomic environments. In addition, parents and teachers of children who were receiving combined therapy were significantly more satisfied with the treatment plan. Finally, the combination of medication management and behavior therapy allowed for the use of lower dosages of stimulants, which possibly reduced the risk of adverse effects.[66]

School Programming and Supports

Behavior therapy programs coordinating efforts at school as well as home might enhance the effects. School programs can provide classroom adaptations, such as preferred seating, modified work assignments, and test modifications (to the location at which it is administered and time allotted for taking the test), as well as behavior plans as part of a 504 Rehabilitation Act Plan or special education Individualized Education Program (IEP) under the "other health impairment" designation as part of the Individuals With

Disability Education Act (IDEA).[67] It is helpful for clinicians to be aware of the eligibility criteria in their state and school district to advise families of their options. Youths documented to have ADHD can also get permission to take college-readiness tests in an untimed manner by following appropriate documentation guidelines.[68]

The effect of coexisting conditions on ADHD treatment is variable. In some cases, treatment of the ADHD resolves the coexisting condition. For example, treatment of ADHD might resolve oppositional defiant disorder or anxiety.[68] However, sometimes the co-occurring condition might require treatment that is in addition to the treatment for ADHD. Some coexisting conditions can be treated in the primary care setting, but others will require referral and comanagement with a subspecialist.

Action statement 6: Primary care clinicians should titrate doses of medication for ADHD to achieve maximum benefit with minimum adverse effects (quality of evidence B/strong recommendation).

Evidence Profile

- **Aggregate evidence quality:** B.
- **Benefits:** The optimal dose of medication is required to reduce core symptoms to or as close to the levels of children without ADHD.
- **Harms/risks/costs:** Higher levels of medication increase the chances of adverse effects.
- **Benefits-harms assessment:** The importance of adequately treating ADHD outweighs the risk of adverse effects.
- **Value judgments:** The committee members included the effects of untreated ADHD when deciding to make this recommendation.
- **Role of patient preferences:** The families' preferences and comfort need to be taken into consideration in developing a titration plan.
- **Exclusions:** None.
- **Intentional vagueness:** None.
- **Strength: strong recommendation.**

The findings from the MTA study suggested that more than 70% of children and youth with ADHD respond to one of the stimulant medications at an optimal dose when a systematic trial is used.[65] Children in the MTA who were treated in the community with care as usual from whomever they chose or to whom they had access received lower doses of stimulants with less frequent monitoring and had less optimal results.[65] Because stimulants might produce positive but suboptimal effects at a low dose in some children and youth, titration to maximum doses that control symptoms without adverse effects is recommended instead of titration strictly on a milligram-per-kilogram basis.

Education of parents is an important component in the chronic illness model to ensure their cooperation in efforts to reach appropriate titration (remembering that the parents themselves might be challenged significantly by ADHD).[69,70] The primary care clinician should alert parents and children that changing medication dose and occasionally changing a medication might be necessary for optimal medication management, that the process might require a few months to achieve optimal success, and that medication efficacy should be systematically monitored at regular intervals.

Because stimulant medication effects are seen immediately, trials of different doses of stimulants can be accomplished in a relatively short time period. Stimulant medications can be effectively titrated on a 3- to 7-day basis.[65]

It is important to note that by the 3-year follow-up of 14-month MTA interventions (optimal medications management, optimal behavioral management, the combination of the 2, or community treatment), all differences among the initial 4 groups were no longer present. After the initial 14-month intervention, the children no longer received the careful monthly monitoring provided by the study and went back to receiving care from their community providers. Their medications and doses varied, and a number of them were no longer taking medication. In children still on medication, the growth deceleration was only seen for the first 2 years and was in the range of 1 to 2 cm.

CONCLUSION

Evidence continues to be fairly clear with regard to the legitimacy of the diagnosis of ADHD and the appropriate diagnostic criteria and procedures required to establish a diagnosis, identify co-occurring conditions, and treat effectively with both behavioral and pharmacologic interventions. However, the steps required to sustain appropriate treatments and achieve successful long-term outcomes still remain a challenge. To provide more detailed information about how the recommendations of this guideline can be accomplished, a more detailed but less strongly evidence-based algorithm is provided as a companion article.

AREAS FOR FUTURE RESEARCH

Some specific research topics pertinent to the diagnosis and treatment of ADHD or developmental variations or problems in children and adolescents in primary care to be explored include:

- identification or development of reliable instruments suitable to use in primary care to assess the nature or degree of functional impairment in children/adolescents with ADHD and monitor improvement over time;
- study of medications and other therapies used clinically but not approved by the FDA for ADHD, such as

electroencephalographic biofeedback;

- determination of the optimal schedule for monitoring children/adolescents with ADHD, including factors for adjusting that schedule according to age, symptom severity, and progress reports;
- evaluation of the effectiveness of various school-based interventions;
- comparisons of medication use and effectiveness in different ages, including both harms and benefits;
- development of methods to involve parents and children/adolescents in their own care and improve adherence to both behavior and medication treatments;
- standardized and documented tools that will help primary care providers in identifying coexisting conditions;
- development and determination of effective electronic and Web-based systems to help gather information to diagnose and monitor children with ADHD;
- improved systems of communication with schools and mental health professionals, as well as other community agencies, to provide effective collaborative care;
- evidence for optimal monitoring by some aspects of severity, disability, or impairment; and
- long-term outcomes of children first identified with ADHD as preschool-aged children.

SUBCOMMITTEE ON ATTENTION DEFICIT HYPERACTIVITY DISORDER (OVERSIGHT BY THE STEERING COMMITTEE ON QUALITY IMPROVEMENT AND MANAGEMENT, 2005–2011)

WRITING COMMITTEE

Mark Wolraich, MD, Chair — *(periodic consultant to Shire, Eli Lilly, Shinogi, and Next Wave Pharmaceuticals)*

Lawrence Brown, MD — *(neurologist; AAP Section on Neurology; Child Neurology Society) (Safety Monitoring Board for Best Pharmaceuticals for Children Act for National Institutes of Health)*

Ronald T. Brown, PhD — *(child psychologist; Society for Pediatric Psychology) (no conflicts)*

George DuPaul, PhD — *(school psychologist; National Association of School Psychologists) (participated in clinical trial on Vyvanse effects on college students with ADHD, funded by Shire; published 2 books on ADHD and receives royalties)*

Marian Earls, MD — *(general pediatrician with QI expertise, developmental and behavioral pediatrician) (no conflicts)*

Heidi M. Feldman, MD, PhD — *(developmental and behavioral pediatrician; Society for Developmental and Behavioral Pediatricians) (no conflicts)*

Theodore G. Ganiats, MD — *(family physician; American Academy of Family Physicians) (no conflicts)*

Beth Kaplanek, RN, BSN — *(parent advocate, Children and Adults With Attention Deficit Hyperactivity Disorder [CHADD]) (no conflicts)*

Bruce Meyer, MD — *(general pediatrician) (no conflicts)*

James Perrin, MD — *(general pediatrician; AAP Mental Health Task Force, AAP Council on Children With Disabilities) (consultant to Pfizer not related to ADHD)*

Karen Pierce, MD — *(child psychiatrist; American Academy of Child and Adolescent Psychiatry) (no conflicts)*

Michael Reiff, MD — *(developmental and behavioral pediatrician; AAP Section on Developmental and Behavioral Pediatrics) (no conflicts)*

Martin T. Stein, MD — *(developmental and behavioral pediatrician; AAP Section on Developmental and Behavioral Pediatrics) (no conflicts)*

Susanna Visser, MS — *(epidemiologist) (no conflicts)*

CONSULTANT

Melissa Capers, MA, MFA — *(medical writer) (no conflicts)*

STAFF

Caryn Davidson, MA

ACKNOWLEDGMENTS

This guideline was developed with support from the Partnership for Policy Implementation (PPI) initiative. Physicians trained in medical informatics were involved with formatting the algorithm and helping to keep the key action statements actionable, decidable, and executable.

Quality Response Template

THIS PAGE INTENTIONALLY LEFT BLANK

HEDIS Response Template: Instructions

1. On the NCQA Star Ratings sheet, at the top, insert Proposer's name.
2. On the NCQA Star Ratings sheet, enter details for all of the Proposer's Medicaid managed care contracts, including the Overall, Consumer Satisfaction, Prevention, and Treatment sub-ratings from the NCQA Health Insurance Plan Ratings 2018-2019 Summary Report (Medicaid). The Proposer shall provide complete and accurate information in all fields, consistent with the NCQA Summary Report (Medicaid).
3. The Proposer should include the NCQA STAR rating information for all Medicaid managed care plans operating in Louisiana.
4. The Proposer should only include NCQA STAR rating information for Medicaid managed care programs operating outside of LA if the plan's NCQA accreditation is listed as a "YES" on the Medicaid summary report indicating that it has full, non-interim, NCQA Accreditation. The Proposer should NOT include Medicaid plans operating outside of LA: (1) with interim NCQA Accreditation or (2) for which NCQA STAR rating information was issued at the time of interim NCQA Accreditation.

HEDIS Response Template: Aetna Better Health of Louisiana

						2018-2019 NCQA Star Rating Summary (Medicaid)			
Number	State	Medicaid "HMO" Plan Name	Medicaid Enrollment in December 2018	Populations included (e.g., ABD, TANF, Expansion, LTSS)	Benefits provided (e.g., full benefits, behavioral health only, Medicare/Medicaid integrated)	Overall	Consumer Satisfaction	Prevention	Treatment
1	FL	Coventry Health Care of Florida, Inc. d/b/a Aetna Better Health of Florida	MMA - 45,286 Healthy Kids - 49,629 LTSS - 537	LTSS, Florida Healthy Kids (HK), Medicaid Managed Medical Assistance (MMA), Medikids	Rx, vision, behavioral health (BH) for MMA and HK. LTSS has no medical benefits	4.0	3.0	2.5	3.0
2	IL	Aetna Better Health of Illinois	Duals - 7,211	Medicare-Medicaid Plan (MMP) inclusive of LTSS.	Rx, dental, vision, BH	Partial Data Reported	Insufficent data	2.0	2.5
3	KY	Aetna Better Health of Kentucky	Medicaid - 191683	ACA, Duals, Foster Care, SSI Adult, SSI Child, TANF	Rx, dental, vision, BH	3.5	4.0	2.0	3.0
