2.2.1 Table of Contents

Aetna supports Louisiana's state health assessment priority of promoting healthy lifestyles across all of Louisiana's diverse parishes. During the 2018 open enrollment period, Aetna promoted our Ted E. Bear, M.D. Kids Club on transit buses in cities around the state. Ted E. Bear, M.D. Kids Club promotes healthy lifestyles and physical activity to children. They have the opportunity to meet Ted E. Bear, M.D. at festivals, fairs, and health and wellness events throughout the state.

2.2.2 Cover Letter

Each year, Aetna chooses schools in underserved communities to support throughout the school year. In the spring we help to restock the school supplies that many teachers are replacing with their own money for their classroom. Not only do we bring the basics such as crayons, markers, and pencils, but we help to replace other much-needed supplies like copy paper, tissue, hand sanitizers, and cleaning supplies. In 2018, we served Donaldsonville Elementary School, providing essential items to over 300 students.

RE: Aetna Better Health,® Inc. dba Aetna Better Health of Louisiana
Response to RFP 3000011953, Louisiana Medicaid Managed Care Organizations
Due April 29, 2019

Dear Ms. Bravo:

Aetna Better Health of Louisiana is pleased to present its response to the Louisiana Department of Health (LDH)'s Request for Proposal (RFP) for Louisiana Medicaid Managed Care Organizations.

We consider it a privilege to serve Healthy Louisiana and its most vulnerable citizens. As a current partner of LDH, we have provided Medicaid services in Louisiana since 2015. Our staff members live and work in the communities we serve, giving us an understanding of the State's people, providers, and health care landscape.

Pursuant to the requirements of Section 2.2.2 of the RFP, we submit the following:

2.2.2.1 Location of administrative office with full time personnel;

2400 Veterans Memorial Boulevard, Suite 200,
Kenner, Louisiana 70062.

1000 Perkins Rowe, 5th Floor
Baton Rouge, Louisiana 70812

2.2.2.2 Name and address of corporate principal office registered with the Louisiana Secretary of State, email address, website URL, and telephone number;

Corporate principal office registered with the Louisiana Secretary of State:	2400 Veterans Memorial Boulevard, Suite 200 Kenner, Louisiana 70062.
Email address:	AetnaBetterHealth-LA-Compliance@AETNA.com
Website URL:	www.aetnabetterhealth.com/louisiana
Telephone number:	(855) 242-0802.

2.2.2.3 Name and address for the purpose of issuing checks and/or drafts;

Aetna Better Health of Louisiana
2400 Veterans Memorial Blvd., Suite 200
Kenner, Louisiana 70062

2.2.2.4 Any other name(s) under which the Proposer does, or has done within the last ten (10) years, business;

In the past ten years, Aetna Better Health, Inc., has done business under the dba Aetna Better Health® of Louisiana. It may also have done business under the name Aetna Better Health.

2.2.2.5 Ownership status (whether the bidding organization is publicly traded or privately held). If privately held, a statement listing name(s) and address(es) of principal owners who hold five percent (5%) interest or more in the organization;

Aetna Better Health of Louisiana is not publicly traded. It is a privately held company; a subsidiary of a publicly traded company, CVS Health Corporation. The names and addresses of the principal owners that hold a five percent (5%) interest or more in Aetna Better Health of Louisiana are as follows:

Aetna Better Health of Louisiana is 100% owned by:
Aetna Health Holdings, LLC
151 Farmington Avenue
Hartford, Connecticut 06156

2.2.2.6 The type of legal entity (for example, corporation (profit or not for profit), limited partnership, general partnership, or trust), and the state where the entity is organized, including any parent organization;

Aetna Better Health of Louisiana is a for-profit corporation incorporated in Louisiana. Its direct parent is Aetna Health Holdings, LLC, which is incorporated in Delaware. Its ultimate parent is CVS Health Corporation, which is incorporated in Delaware.

2.2.2.7 If out-of-state Proposer, name and address of local representative; if none, so state;

Aetna Better Health of Louisiana is an in-state proposer.

2.2.2.8 If any of the planned personnel is a current Louisiana state employee, or was employed by the State of Louisiana within the past two (2) years, provide a listing to include the employee name, state agency, and termination date, if applicable;

Former Louisiana State Employee	State Agency	Termination Date
Ausbon, ShanDreka	Louisiana Department of Children & Family Services	September 28, 2018
Votaw, Molly	Louisiana Department of Health, Office of Public Health, HIV/STD Program	March 27, 2019

2.2.2.9 Proposer's state and federal tax identification numbers, LaGov vendor number, and Louisiana Department of Revenue number, if available;

State and federal tax identification number: 80-0629718
LaGov vendor number: 310173193
LDR number: 800629718

2.2.2.10 A graphical summary of whether Proposer meets mandatory and preferred qualifications to propose, as identified in Sections 2.9.1, 2.10.2.1.2, and 2.10.2.5.1;

Requirement		Aetna Meets Mandatory and Preferred Requirements
2.9.1.1	**Meet the federal definition of an MCO, as defined in 42 C.F.R. §438.2;**	✓
2.9.1.2	**Have the capacity and willingness to perform all functions in this RFP and in the Model Contract;**	✓

Requirement		Aetna Meets Mandatory and Preferred Requirements
2.9.1.3	Not be an excluded individual or entity as described in 42 C.F.R. §438.808	✓
2.9.1.4	Have a license or certificate of authority issued by the Louisiana Department of Insurance (LDI) to operate as a Medicaid risk bearing "prepaid entity" pursuant to La. R.S. 22:1016 and submit with the proposal response;	✓
2.9.1.5	Comply with all Louisiana Department of Insurance applicable standards. Information can be found at LDI's website: www.ldi.louisiana.gov. The MCO must meet solvency standards as specified in 42 C.F.R. §438.116 and Title 22 of the Louisiana Revised Statutes;	✓
2.9.1.6	Have a minimum of five (5) years of experience as an MCO for a Medicaid managed care program prior to the deadline for receipt of proposals;	✓[1]
2.9.1.7	Have, within the last thirty-six (36) months, been engaged in a contract or awarded a new contract as a Medicaid MCO in a state with a Medicaid population equal to or greater than that of Louisiana;	✓[2]
2.9.1.8	Have its principal place of business be located inside the continental United States; and	✓
2.9.1.9	Have not had a contract terminated, withdrawn in lieu of termination, or not renewed for non-performance or poor performance within the past ten (10) years.	✓
2.10.2.1.2.1	Have a minimum of seven (7) years of experience in providing health care services for a Medicaid managed care program prior to the deadline for receipt of proposals; and	✓[3]
2.10.2.1.2.2	Have, within the last twelve (12) months, been engaged in a contract or awarded a new contract as a Medicaid MCO in a state with a Medicaid population equal to or greater than that of Louisiana.	✓[4]
2.10.2.5.1	The Proposer should provide a copy of its certificate of accreditation by the National Committee for Quality Assurance (NCQA) for each of its Medicaid managed care contracts. If the Proposer is not accredited in Louisiana, the Proposer should provide a specific timeline outlining the Proposer's plan to achieve full accreditation in Louisiana as soon as possible after the execution of a contract. It is preferred, though not mandatory, that Proposers be accredited by NCQA as a Medicaid managed care organization in Louisiana or in another state prior to the deadline for receipt of proposals.	✓

[1] With over 30 years of experience, Aetna's Medicaid organization exceeds the minimum required five years of experience delivering innovative, quality, and efficient services to complex Medicaid populations. Aetna Better Health of Louisiana has proudly served Louisiana's most vulnerable populations since 2015.

[2] As discussed more fully in our proposal, within the last 36 months, affiliates of Aetna Better Health of Louisiana have been engaged in Medicaid contracts in states with Medicaid populations equal to or greater than that of Louisiana.

[3] With over 30 years of experience, the Aetna Medicaid organization far exceeds the minimum of seven years of experience in providing services for a Medicaid managed care program prior to the deadline for receipt of proposals. Aetna Better Health of Louisiana has proudly served Louisiana's most vulnerable populations since 2015.

[4] As discussed more fully in our proposal, within the last 12 months, affiliates of Aetna Better Health of Louisiana have been engaged in Medicaid contracts in states with Medicaid populations equal to or greater than that of Louisiana

2.2.2.11 A brief statement of the Proposer's involvement in litigation related to the delivery of Medicaid benefits in the last ten (10) years;

Aetna Better Health of Louisiana has been involved in only three litigation matters related to the delivery of Medicaid benefits in the past ten years. Two of those cases involve members' claims for benefits. The third case, which involves a dispute between a provider and its successor-in-interest, names Aetna Better Health of Louisiana as a defendant for purposes of notification to pay the successor and not the provider.

2.2.2.12 A brief statement of the Proposer ever having had (1) a contract terminated or not renewed for non-performance or poor performance and/or (2) a contract terminated on a voluntary basis prior to the contract end date. The Proposer must provide the name and contact information of the lead program manager of the contracting entity;

Aetna Better Health of Louisiana has not had, within the last ten years, a Medicaid managed care contract terminated or not renewed for non-performance or poor performance and/or terminated on a voluntary basis prior to the contract end date.

2.2.2.13 The stipulation that the proposal is valid for a period of at least ninety (90) calendar days from the date of submission; and

Aetna Better Health of Louisiana stipulates that its proposal is valid for a period of at least ninety calendar days from the date of submission.

2.2.2.14 A positive statement of compliance with the contract terms defined in the Model Contract.

Aetna Better Health of Louisiana will comply with the contract terms defined in the Model Contract.

We are excited to continue our collaboration with LDH, meeting program objectives—now and into the future—with the provision of services and supports, technology, community relationships, and other resources necessary to achieve a coordinated system of care focused on improving quality, access, and efficiencies for Bayou Health members.

Sincerely,

Randy J. Hyun

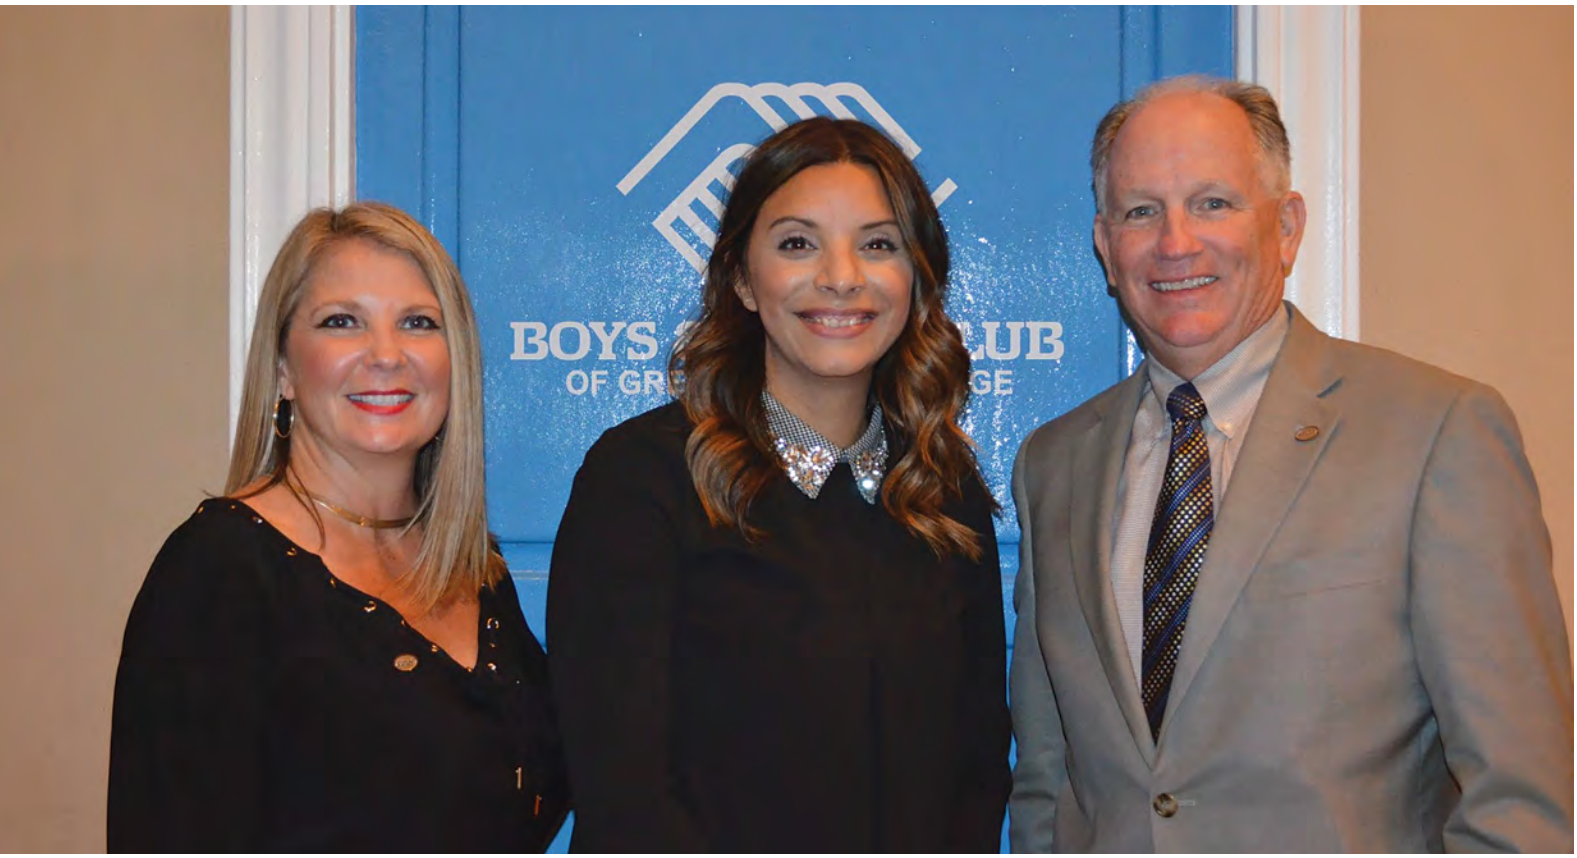
2.9 Business Proposal Requirements



As an avid supporter of healthy lifestyle afterschool activities for children of all ages, Aetna partners with the Boys & Girls Clubs of America to celebrate and recognize all of the hard work the Clubs do throughout the school year. Aetna CEO Rick Born is a board member of the Baton Rouge Boys & Girls Club and supports several programs for school-aged youth focused on academics, health, and character.

2.9.1 Mandatory Qualifications

Aetna employees help the members of our community with housing needs, through the health plan's collaboration with Habitat for Humanity.

2.9.1 Mandatory Qualifications

Aetna Better Health, Inc. dba Aetna Better Health of Louisiana (Aetna)[1] demonstrates that it meets the mandatory requirements as follows:

- Aetna **meets the federal definition of managed care organization (MCO)** as defined in **42 C.F.R. §438.2(2)**, in that Aetna is a private entity that meets the advance directives requirements, provides covered services to our enrollment as accessible as those provided to other Medicaid enrollees within Louisiana, and meets the solvency standards of **§438.116**, as stated below.
- As shown throughout our proposal, Aetna has the **capacity and willingness to perform** all functions in the **RFP** and in the **Model Contract**, having served Healthy Louisiana enrollees since 2015, met the capacity, and performed all functions required by that RFP and the current contract.
- We certify that Aetna is **not an excluded entity—**it is not excluded, debarred, suspended, or prohibited from contracting with the federal government or receiving federal funds, either directly or indirectly as described in **42 C.F.R. §438.808(b)**.
- Aetna has a **certificate of authority** issued by the Louisiana Department of Insurance (LDI) to operate as a Medicaid risk-bearing "prepaid entity" pursuant to **La. R.S. 22:1016**. A copy of the certificate of authority is attached as **Attachment A**.
- Aetna **complies with all LDI applicable standards** and meets solvency standards as specified in **42 C.F.R. §438.116** and **Title 22** of the **Louisiana Revised Statutes**. Aetna Better Health has an active license and certificate of authority issued by the LDI, which regulates the MCO with respect to licensure and financial solvency, pursuant to **La. R.S. 22:1016**. Our plan exceeds the minimum standard of financial health for an MCO because our assets exceed requirements:
  - As noted in the Minimum Capital and Surplus section of Aetna Better Health of Louisiana's financial statements provided in our response to **Section 2.9.5 of the RFP**, at December 31, 2017 and 2016[2], Aetna Better Health of Louisiana's capital and surplus exceeded the requirement of established and maintained capital and surplus in the amount of $3 million.
  - At December 31, 2017 and 2016, Aetna Better Health of Louisiana had capital and surplus that exceeded the highest threshold specified by the National Association of Insurance Commissioners (NAIC) and the State for risk-based capital (RBC). At December 31, 2018, our unaudited financial statements indicate that we still exceed the NAIC and State RBC requirements.
- With over 30 years of experience, Aetna's Medicaid organization **exceeds the minimum required five years of experience** delivering innovative, quality, and efficient services to complex Medicaid populations. Aetna has proudly served Louisiana's most vulnerable populations since 2015.
- Within the last 36 months, affiliates of Aetna Better Health of Louisiana have been **engaged in Medicaid managed care contracts** in the following states with Medicaid populations equal to or greater than that of Louisiana[3]: LA (1.4M), AZ (1.7M), CA (11.8M), FL (4.2M), IL (2.8M), MI (2.3M), NJ (1.7M), NY (6.5M), OH (2.7M), PA (2.9M), and TX (4.8M)[4].
- Aetna Better Health of Louisiana's **principal office is located inside the continental United States** at 2400 Veterans Memorial Boulevard, Suite 200, Kenner, Louisiana 70062.

---

[1] For simplicity throughout this proposal, we will use "Aetna" to refer to the Proposer, its indirect parent Aetna Inc. and/or any Aetna Inc. subsidiary that conducts Medicaid/CHIP business or participates in any other line of business discussed in this proposal. Where clarity dictates differentiating between Aetna entities, we will refer to the entity by name, which will include using Aetna Better Health of Louisiana to refer to the Proposer and Aetna Inc. to refer to one of Aetna Better Health of Louisiana's indirect parents.

[2] Aetna Better Health of Louisiana's 2018 audited financial statements will not be available until 6/1/19.

[3] December 2018 Medicaid & CHIP Enrollment Data Highlights: accessed March 25, 2019; https://www.medicaid.gov/medicaid/program-information/medicaid-and-chip-enrollment-data/report-highlights/index.html.

[4] Aetna's contract engagement in Arizona is through an administrative services contract (ASC) to provide administrative services to an unaffiliated health plan that holds risk-bearing contracts with applicable agencies. Our Texas experience includes both an ASC and risk-bearing contracts that an affiliated health plan holds directly with the state agency.

2.9.2 Conflict of Interests

Ted E. Bear, M.D. and local chef Jay Ducote promote healthy eating and cooking lessons utilizing fresh ingredients to create healthier versions of Louisiana classic dishes.

2.9.2 Conflict of Interests

Aetna Better Health, Inc. dba Aetna Better Health of Louisiana (Aetna Better Health of Louisiana) submits this signed certification attesting to the following:

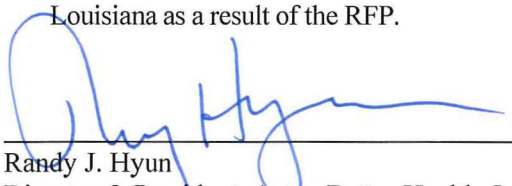
1. Neither it nor any of its proposed subcontractors has any interest that will conflict, as determined by the Louisiana Department of Health (LDH), in any manner or degree with the performance of services required under this RFP.
2. Neither it nor any of its proposed material subcontractors have any financial, legal, contractual, or other business interest in LDH's Enrollment Broker Contractor, or in such vendor's subcontractors, if any.
3. Neither it nor any of its proposed subcontractors, including their affiliates, partners, parent(s), subsidiaries and related organizations, if any, have any financial, legal, contractual, or other business interests that may affect or impact performance under the Contract.

   Notwithstanding the above, we note that given CVS Health Corporation's (CVS) recent acquisition of Aetna Inc., Aetna Better Health of Louisiana is now an affiliate of PCS Health L.L.C. (Caremark), a CVS subsidiary which may provide pharmacy benefit management services in Louisiana for Aetna Better Health of Louisiana and its competitors. This relationship does not pose any actual or potential conflict of interest given that the business relationship between Caremark and Aetna Better Health of Louisiana will be conducted at arm's-length and given the safeguards the combined Aetna and CVS organizations have implemented to ensure appropriate separation of the two organizations.

   Integrity is a core value of the combined Aetna-CVS enterprise. Where an Aetna Medicaid organization health plan engages affiliates to perform services in support of its operations, it does so pursuant to a formal, arm's-length contract either directly with the health plan or downstream with an affiliate of the health plan. All such contracts are submitted to the appropriate regulators for review and approval, as applicable. That will be the case here, as well.

   We also separate and restrict communication and information exchange across our many business units and affiliates by implementing firewalls to prevent the sharing of member data and competitive information. In addition, we fully comply with the requirements of the Health Information Portability and Accountability Act (HIPAA) to ensure privacy of protected health information, and every employee is required to complete annual training on these requirements. Finally, our mandatory corporate integrity training contains a specific module on the identification of potential conflicts of interest and actions employees are required to take if faced with a potential conflict situation, including reporting potential conflicts to the Compliance department.

   These policies will prevent any actual conflict of interest and maintain fairness, independence, and objectivity.
4. There is no other information that may be relevant to the Proposer's or any material subcontractor's financial, legal, contractual, or other business interests as they relate to the RFP and any Contract awarded to Aetna Better Health of Louisiana as a result of the RFP.
5. Aetna Better Health of Louisiana agrees to submit any additional information requested by LDH that in LDH's judgment may be relevant to Aetna Better Health of Louisiana's financial, legal, contractual, or other business interests as they relate to the RFP and any Contract awarded to Aetna Better Health of Louisiana as a result of the RFP.



April 18, 2019

Randy J. Hyun — Date
Director & President, Aetna Better Health, Inc. dba Aetna Better Health of Louisiana
Chief Executive Officer, Aetna Medicaid

2.9.3 Moral or Religious Objections

Following the state's priorities to address obesity and unhealthy eating through the elimination of food deserts, Aetna provides the resources for the creation of community gardens and offers healthy eating options in local schools, community centers, and places of worship. We celebrate the collaboration and coordination to create community gardens in public spaces in low-income neighborhoods.

2.9.3 Moral or Religious Objections

Aetna attests that we have no moral or religious objections to providing any managed care organization covered services described in the **Model Contract, Part 2, Services**.

2.9.4 Material Subcontractors

Aetna employees volunteer with Habitat for Humanity to help the members of our community with housing needs.

2.9.4 Material Subcontractors

Aetna Better Health of Louisiana will use material subcontractors to provide certain functions that relate to the delivery or payment of managed care organization (MCO) covered services under the Contract, and identify them in **Table 2.9.4-1**.

Table 2.9.4-1: Material Subcontractors Performing Delivery or Payment of MCO Covered Services

Subcontractor Name[1]	Program Area or Function	Address	Telephone Number
Aetna Medicaid Administrators LLC, an affiliated subcontractor	Enrollment processing, claims payment, internal audit, executive oversight, information systems, actuarial, procurement, insurance, risk management, and pharmacy prior authorization	4500 E. Cotton Center Blvd; Bldg. 1; Phoenix, AZ 85040	(602) 659-1100
Aetna Health Management, LLC, an affiliated subcontractor	After-hours call center services for physical and behavioral health, credentialing for certain types of network providers, Health Information line (Nurse line) services	151 Farmington Ave.; Hartford, CT 06156	(860) 273-0123
Caremark Health, L.L.C. (Caremark PCS), an affiliated subcontractor	Pharmacy benefit management services such as pharmacy claims adjudication; retail, mail order and specialty pharmacy network management; and safety monitoring programs	9501 E. Shea Blvd.; Scottsdale, AZ 85260	(480) 391-4600
DentaQuest USA Insurance Company, Inc.	Early and periodic screening, diagnostic, and treatment (EPSDT) dental benefit administration[2]	465 Medford Street; Boston, MA 02129-1454	(800) 417-7140
eviCore healthcare MSI, LLC	Radiology management services	400 Buckwalter Pl. Blvd.; Bluffton, SC 29910	(800) 918-8924
Firstsource Transaction Services, LLC	Overflow claims management	1661 Lyndon Farm Court; Louisville, Kentucky 40223	(502) 499-0855
LogistiCare Solutions, LLC	Non-emergency medical transportation	1275 Peachtree Street, 6th Floor; Atlanta, GA 30309	(404) 888-5800
Superior Vision Benefit Management, Inc.	Vision benefit management, including provider network, claims, and enrollee services	939 Elkridge Landing Road, Suite 200; Baltimore, MD 21090	(443) 422-4744

Certification Regarding Use of Material Subcontractors

Aetna Better Health, Inc. dba Aetna Better Health of Louisiana (Aetna Better Health of Louisiana) submits this signed Proposer's Certification attesting that it:

1. Acknowledges it will not be relieved of any legal obligations under any Contract resulting from this RFP as a result of any contracts with subcontractors, that it shall be fully responsible for the subcontractor's performance, and that all partnership agreements, subcontracts, and other agreements or arrangements for reimbursement will be in writing and will contain terms consistent with all terms and conditions of the Contract; and
2. Acknowledges that proposals to use subcontractors shall not cause any additional administrative burden on LDH as a result of the use of multiple entities.

April 18, 2019

Randy J. Hyun — Date
Director & President, Aetna Better Health, Inc. dba Aetna Better Health of Louisiana
Chief Executive Officer, Aetna Medicaid

[1] We provided Appendix F, Material Subcontractor Response Template, for certain entities proposed to perform value added services in compliance with **Section 2.10.2.3**. Because such entities will not provide services relating "to the delivery or payment of MCO covered services," they are outside the scope of **Section 2.9.4** and are not listed here..

[2] As reflected in **RFP Section 2.10.2.3** and **Appendix F**, DentaQuest will also perform value-added adult dental benefit administration.

2.9.5 Financial Condition

Aetna and March of Dimes support healthy babies throughout Louisiana.

2.9.5 Financial Condition

The Aetna Medicaid organization, our parent organization, and material subcontractors are in sound financial condition. In the unlikely event that any significant financial problems are identified in the future, they will be addressed with appropriate corrective measures. Aetna Better Health of Louisiana (Aetna[1]) submits copies of its audited financial statements for each of the last three years[2], as well as that of our ultimate parent organization, CVS Health Corporation (CVS Health), and any material subcontractors[3], as **Attachment B**.

CVS Health acquired Aetna Inc. on November 28, 2018. Attached are CVS Health's 2018 audited financial statements, which include financial information for Aetna Inc. and its subsidiaries, including the Proposer, Aetna Better Health of Louisiana. Also attached are CVS Health's audited financials for 2016 and 2017, which represent the company's financials prior to the acquisition of Aetna Inc. and its subsidiaries. To support our commitment to full transparency and to ensure that LDH has all financial documentation that may be relevant to confirming the fiscal soundness of our business, we have provided audited Aetna Inc. financial statements for 2016 and 2017, as Aetna Inc. was the ultimate parent for Aetna Better Health of Louisiana for those reporting years, as shown in **Table 2.9.5-1.**

Table 2.9.5-1: Audited Financial Statements Related to Proposer

Entity	Relationship to Proposer	Year	Item
Aetna Better Health of Louisiana	Proposer	2015	Audited financials
Aetna Better Health of Louisiana	Proposer	2016	Audited financials
Aetna Better Health of Louisiana	Proposer	2017	Audited financials
CVS Health	Ultimate parent, post-acquisition	2016	Audited financials
CVS Health	Ultimate parent, post-acquisition	2017	Audited financials
CVS Health	Ultimate parent, post-acquisition	2018	Audited financials
Aetna Inc.	Ultimate parent, pre-acquisition	2016	Audited financials
Aetna Inc.	Ultimate parent, pre-acquisition	2017	Audited financials

In addition, we present a certificate from the Louisiana Department of Revenue attesting that Aetna is not in default of any obligation under Louisiana tax laws as **Attachment B**.

[1] For simplicity throughout this proposal, we will use "Aetna" to refer to the Proposer, its indirect parent Aetna Inc. and/or any Aetna Inc. subsidiary that conducts Medicaid/CHIP business or participates in any other line of business discussed in this proposal. Where clarity dictates differentiating between Aetna entities, we will refer to the entity by name, which will include using Aetna Better Health of Louisiana to refer to the Proposer and Aetna Inc. to refer to one of Aetna Better Health of Louisiana's indirect parents. On November 28, 2018, CVS Health Corporation acquired Aetna Inc. and its subsidiaries, including Aetna Better Health of Louisiana. Throughout the proposal, we will refer to our new ultimate parent as CVS Health Corporation or CVS Health and to the CVS Health subsidiary that is expected to provide pharmacy benefits management services for any contract awarded as a result of this RFP as CaremarkPCS Health, L.L.C. or CaremarkPCS.

[2] Aetna Better Health of Louisiana's 2018 audited financial statements will not be available until June 1, 2019, so we provide audited financial statements for the last three years that are currently available—2015, 2016, and 2017. We will submit the statements for 2018 when they are available.

[3] **Section 2.10.2.3** requires bidders to provide Appendix F, Material Subcontractor Response Template, for entities proposed to perform value added services, which we did. However, we do not understand the Model Contract definition of Material Subcontract, which we applied in responding to **Section 2.9.5.1.1**, to include value added services. Therefore, we have not provided audited financial statements for entities we proposed to provide value added services in **Section 2.10.2.3**. If LDH would like audited financial statements from these entities, we will provide that information upon request.

2.9.6 Required Forms and Certifications

Each year, Aetna chooses schools in underserved communities to support throughout the school year. In the spring we help to restock the school supplies that many teachers are replacing with their own money for their classroom. Not only do we bring the basics such as crayons, markers, and pencils, but we help to replace other much-needed supplies like copy paper, tissue, hand sanitizers, and cleaning supplies. In 2018, we served Donaldsonville Elementary School, providing essential items to over 300 students.

2.9.6 Required Forms and Certifications

Aetna Better Health of Louisiana is registered as a vendor with the Louisiana Procurement and Contract Network. We understand and comply with all State and federal laws requiring full disclosure of ownership, management, and control of Medicaid managed care organizations.

We provide the following:

- A **Proposal Compliance Matrix (Appendix C)**
- An original **Certification Statement (Appendix D)**
- The **Medicaid Ownership and Disclosure Form (Appendix E)**

2.9.6.2 Appendix D: Certification Statement

Louisiana | Transforming Health Care | **Aetna**

Appendix D: Certification Statement

The undersigned hereby acknowledges she/he has read and understands all requirements and specifications of the Louisiana Medicaid Managed Care Organizations Request for Proposals (RFP), including attachments and appendices.

OFFICIAL CONTACT: The State requests that the Proposer designate one person to receive all documents and the method in which the documents are best delivered. Identify the Contact name and fill in the information below:

PROPOSER	Aetna Better Health, Inc. dba Aetna Better Health of Louisiana
VENDOR NUMBER	310173193
DATE	4/18/2019
LDR NUMBER	800629718
OFFICIAL CONTACT NAME	Richard C. Born
EMAIL ADDRESS	BornR@aetna.com*
FAX NUMBER	504-667-4730
PHONE NUMBER	504-667-4580
STREET ADDRESS	2400 Veterans Memorial Boulevard, Suite 200
CITY, STATE, ZIP	Kenner, Louisiana 70062

*Best method of document delivery

Proposer certifies that the above information is true and grants permission to the Department to contact the above named person or otherwise verify the information I have provided.

By its submission of this proposal and authorized signature below, Proposer certifies that:

1. The information contained in its response to this RFP is accurate.
2. Proposer complies with each of the mandatory requirements listed in the RFP and will meet or exceed the business and technical requirements specified therein.
3. Proposer accepts the procedures, evaluation criteria, mandatory contract terms and conditions, and all other administrative requirements set forth in this RFP.
4. Proposer's response is valid for at least one hundred and twenty (120) days from the date of Proposer’s signature below.
5. Proposer understands that if selected as the successful Proposer, he/she will have twenty (20) calendar days from the date of delivery of initial contract in which to complete contract negotiations, if any, and execute the final contract document. The Department has the option to waive this deadline if actions or inactions by the Department cause the delay.

6. Proposer certifies by signing and submitting a proposal for $25,000 or more, that their company, any subcontractors, or principals are not suspended or debarred by the General Services Administration (GSA) in accordance with the requirements in 2 C.F.R. §200 Subpart F. (A list of parties who have been suspended or debarred can be viewed via the internet at https://www.sam.gov.)
7. Proposer understands that, if selected as a contractor, the Louisiana Department of Revenue must determine that it is current in the filing of all applicable tax returns and reports and in payment of all taxes, interest, penalties, and fees owed to the State and collected by the LDR. Proposer shall comply with R.S. 39:1624(A)(10) by providing its seven-digit LDR account number in order for tax payment compliance status to be verified.
8. Proposer further acknowledges its understanding that issuance of a tax clearance certificate by LDR is a necessary precondition to the approval of any contract by the Office of State Procurement. The contracting agency reserves the right to withdraw its consent to any contract without penalty and proceed with alternate arrangements, should a prospective contractor fail to resolve any identified outstanding tax compliance discrepancies with the LDR within seven (7) days of such notification.
9. Proposer certifies and agrees that the following information is correct: In preparing its response, the Proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. Proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. The State reserves the right to reject the response of the proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.

2.9.6.3 Appendix E: Medicaid Ownership and Disclosure Form

Louisiana | Transforming Health Care | **Aetna**

Appendix E
Revised 03/2018

Instructions for Louisiana Medicaid Ownership Disclosure Information Entity/Business

This is a multi-page form. Please review the instructions in their entirety before completing the form. ***Every field on the Disclosure of Ownership Form must be completed, and every question must be answered. Failure to complete the form in its entirety will result in a rejection.***

Refer to the web sites listed on the previous pages for information regarding full disclosure of ownership, social security number requirements, and the Louisiana Medicaid Assistance Program Integrity Law (MAPIL).

Note: Enter your Provider Name at the top of each page in the space provided.

Section I – Disclosing Entity/Business Provider Information

Louisiana Medicaid Provider Number – Enter your seven (7) digit Medicaid provider number, if known. If this application is for a new Medicaid provider number, leave this field blank.
Taxpayer ID Number – Enter the nine (9) digit Tax ID number for this provider.
National Provider Identifier (NPI) – Enter your ten (10) digit National Provider Identifier (NPI). This number can be obtained by going to https://nppes.cms.hhs.gov
This enrollment packet is for a – Check the appropriate box from among New Enrollment, Update to Current Enrollment, Re-Validation, Re-Enrollment or Change of Ownership (CHOW). If CHOW, provide the date of the CHOW and the current Louisiana Medicaid Provider number in the spaces provided.
Provider Type – Enter the Louisiana Medicaid Provider Type for this Entity/Business.
Primary Telephone Number(s) of Disclosing Entity/Business - Enter the area code and telephone number(s) at the street address of this Entity/Business.
Doing Business As (DBA) Name – Enter the DBA Name in the space labeled "Doing Business As (DBA) Name." If a license is required, the name entered must match the operating name on the Entity/Business license.
Legal Name of Disclosing Entity/Business – Enter the legal name of the Entity/Business in the space labeled "Legal Name of Entity/Business."
Primary Disclosing Entity/Business Street Address, City, State, Zip - Enter the physical business street address of the Entity/Business requesting enrollment. Enter the city, state and zip code of the physical business street address.
Primary Disclosing Entity/Business Mailing Address/PO Box, City, State, Zip – Enter the mailing address or PO Box of the Entity/Business requesting enrollment. Enter the city, state and zip code of the mailing address.
Additional Post Office Boxes Not Identified Above – Enter any additional Post Office Boxes for the Entity/Business that are stand-alone or not associated with any business location.
Disclosing Entity/Business Telephone Number to Request Medical Records – Enter the area code and telephone number(s) that the Entity/Business uses to answer requests for medical records.
Disclosing Entity/Business Primary Fax Number – Enter the area code and fax number(s) of this Entity/Business.
Email Address of Entity/Business contact person - Enter the email address of the contact person who should receive official LDH notices.
Entity/Business Website – Enter the web address of the Entity/Business website if applicable.

A. **Is there a Corporate Office location for the disclosing Entity/Business?** Check the appropriate box.
DBA Name of Corporate Office – If the Entity/Business does have a corporate office location, enter the DBA Name of that office.
Corporate Office contact information – Enter the street address, mailing address/PO Box, additional PO boxes, phone number, fax number and email address for the corporate office.

B. **Does the disclosing Entity/Business have any business locations in addition to the primary location listed above (i.e. satellite, branch or regional locations) related to Louisiana healthcare services?** Check the appropriate box. If yes, provide the number of locations in the box to the left and complete the section(s) below. Lists are not acceptable.
DBA Name of Additional Location – Enter the DBA name of the additional practice location.
Medicaid Provider # - Enter the Medicaid Provider number of the additional practice, if applicable.
Additional Location contact information – Enter the mailing address/PO Box, street address, additional PO boxes, phone number, fax number and email address for the additional location office. Continue identifying additional locations and the contact information in the spaces provided. If needed, please attach additional sheets if there are more than three additional locations.

C. **Identify how this disclosing Entity/Business is registered with the Internal Revenue Service – Select only 1 of the categories.** Multiple selections may result in a rejection for clarification.
Privately owned or Non-profit Providers Only – Identify the type of Entity/Business as it is registered with the Internal Revenue Service (IRS). Check only one box from among Sole Proprietorship, Partnership/Limited Liability Partnership, Corporation, Limited Liability Corporation (LLC), or Non-profit. Answer any questions associated with the type of Entity/Business in the space(s) provided. Optional: May add comments in the space provided. Continue to Section II.
OR
Louisiana Government Providers Only – Identify the type of Entity/Business if Louisiana government owned. Select only one from among City and/or Parish; Department of Children and Family Services (DCFS), Office of Behavioral Health (OBH), Office of Public Health (OPH), Office of Aging and Adult Services (OAAS), Office for Citizens with Developmental Disabilities (OCDD), Villa, Other LDH agency, Local Education Agency (LEA), Louisiana State University (LSU), or Other State-owned entity. Check the appropriate box and complete the applicable fields.

D. **Is this disclosing Entity/Business publicly traded?** A publicly traded company is one which is traded on the open market, also called publicly held or public company. Check the appropriate box.

E. **Has this disclosing Entity/Business used or previously been known by any name other than the Legal name or the Doing Business As (DBA) name documented in this application?** Check the appropriate box. If yes, list all names and Tax IDs in the spaces provided. Attach additional pages if needed.

Section II – Entity/Business Criminal Conviction Disclosure and Additional Information

A. **Has this Entity/Business (since its existence) AND any entity/business affiliated with the same Tax ID number AND any past or current owners, agents, managing employees or persons with a controlling interest have had or currently have any involvement or participation with (since the inception of those programs) as follows:** Check the appropriate yes or no box for each statement. Every item needs to have either a yes or no check. Do not leave any blanks. If yes for any question, 1) provide a written statement including the details on all occurrences and 2) attach all official legal documents, including any reinstatements.

Section III – Enrollment In Healthcare Programs

A. **Is the disclosing Entity/Business and the disclosing Entity/Business Tax ID listed in Section I currently enrolled in a Federal/State Funded healthcare program?** Check the appropriate box. If yes, identify the applicable plan(s) [Louisiana Medicaid, Medicare Part A, Medicare Part B, Medicare Part C, Medicare Part D (for pharmacies only), CHAMPUS, **and/or** Other Government Funded Program]. In each instance, provide the Doing Business As (DBA) Name, the Tax ID number, the Plan Numbers for Enrollments, and the location (state) of Enrollments. Attach additional sheets as needed.

SECTION IV – PREPARER INFORMATION – INDIVIDUAL COMPLETING DISCLOSURE OF OWNERSHIP INFORMATION

List the full name (including maiden name and hyphenated last name if applicable), social security number, date of birth, and job title. Check one box to identify whether the person completing the form is staff, owner, third party/independent agent, or other. If you check other, please specify by writing the relationship in the space provided. List the Entity/Business address, Entity/Business telephone number, and the Entity/Business email address of the person completing this form. Finally, enter any additional Entity/Business telephone number(s) and Entity/Business email address(es).

SECTION V – OWNERSHIP INFORMATION

Medicaid requires that an Entity/Business fully disclose **ALL** persons and entities that have an ownership interest (either separately or in combination) of 5% or more of this Entity/Business. A separate form, Section V(b), is required for each owner, therefore, please make the necessary copies as a list of owners will not be accepted. Incomplete applications will be rejected.

When reporting a name, use the individual's FULL LEGAL NAME, i.e. *John R. Smith*, not *J.R. Smith* or *Johnny Smith*; or Jenny Rae Jones-Smith, not J.R. Jones-Smith or Jenny Jones-Smith.

Owners are individuals and/or organizations having direct, indirect, or controlling ownership interest in this disclosing Entity/Business.

- Direct ownership is defined as the possession of stock, equity in capital, or any interest in the profits of this disclosing Entity/Business.
- Indirect ownership is defined as an ownership interest in an Entity/Business that has direct or indirect ownership in this disclosing Entity/Business.
- Controlling interest is defined as having operational direction or management or the ability and authorization:
    - To amend or change the corporate identity.
    - To nominate or name members of the board, directors, or trustees
    - To amend or change the bylaws, constitution, or other operating or management direction
    - To control the sale of any or all of the assets or property upon dissolution of the Entity/Business.
    - To dissolve or transfer this disclosing Entity/Business to new ownership or control.
    - Et cetera.

Owners may also be individuals associated with the Entity/Business:

- Whose personal assets are used to satisfy the Entity/Business creditors.
- Who join together to carry on an Entity/Business and expect to share in the profits and losses of the Entity/Business.
- Who report their share of profits and losses of the Entity/Business on their own personal tax returns.
- Who own corporate stock.
- Who are policy makers.
- Who have veto powers.
- Who have voting power.
- Who have any other responsibilities similar to the ones described above.

Ownership might be implied by titles like the following:

- Founder
- Incorporator
- Member
- Owner
- Shareholder

These lists are not all-inclusive, and other titles that imply or assume similar powers or responsibilities may apply.

SECTION V(a) – INFORMATION ON ALL OWNERS

NEW FORMAT! Please read these directions in detail.

A. **Individuals & Entities/Businesses with Direct Ownership** –List all individual owners or entities/businesses that have any direct stake/shareholding/ownership/ or controlling interest of 5% or greater in the disclosing Entity/Business. Add additional pages if needed.
NOTE: Section V(b) must be completed for each individual listed. Item B and Section V(c) must be completed for each entity/business listed.

B. **Individuals and Entities/Businesses with an Indirect Ownership Stake of 5% or more in the disclosing Entity/Business –**
First column: List all Entity/Business/Organizations identified in item A that have direct ownership in the disclosing Entity/Business in the first column. The disclosing Entity/Business cannot list itself as an owner.
Second column: Name all owners of the entity/business listed in the first column.
Third column: Indicate the percent of ownership each owner has in the entity/business in the first column.
Fourth column: Indicate the percent ownership each owner has in the disclosing Entity/Business. This percent of indirect ownership in the disclosing Entity/Business is determined by multiplying the percentages of ownership in e

ach entity. For example, if individual A owns 10% percent of the stock in a corporation which owns 80% of the stock in the disclosing entity, A's interest equates to an 8% indirect ownership interest in the disclosing entity and must be reported. Conversely, if individual B owns 80% of the stock of a corporation which owns 5% of the stock of the disclosing entity, B's interest equates to a 4% indirect ownership interest in the disclosing entity and need not be reported.
Add additional pages if needed.
NOTE: Section V(c) must be completed for each Entity/Business listed and Section V(b) must be completed for each individual listed.

SECTION V(b) – INFORMATION ON INDIVIDUAL OWNER

An entire Section V(b) (consisting of two pages) must be completed for **each and every individual owner named in Section V(a)**, whether the individual owns a direct or indirect stake in the disclosing Entity/Business. A list of all owners will not be accepted. **Make a copy of the blank form for each owner you report before you fill it out the first time.** For example, if you have five owners, you need to submit five completed Section V(b) forms.

A. **Individual Owner Information** – Enter the First Name, Middle Name, Maiden Name, Last Name and Hyphenated Last Name (if applicable) in the spaces provided. Enter the Title/Job Position within this Entity/Business, the percentage of ownership of the Entity/Business, the Social Security Number (required), date of birth, current mailing address and physical address, telephone number and email address of the owner in the spaces provided.

B. **Has the owner named above ever used or been known by any other name including married, maiden, hyphenated, or alias?** – Read the question carefully and check the appropriate box. If yes, enter the name(s) in the spaces provided. Attach additional pages if needed.

C. **Is this owner a U.S. citizen?** Check the appropriate box. If no, provide the Alien Verification number.

D. **Does this owner reside outside the State of Louisiana?** – Check the appropriate box. If yes, has this owner been issued any Medicaid or Medicare provider numbers by the domicile state? Check the appropriate box. If yes, enter the Domicile State name, the Medicaid Provider Number, and the Medicare Provider Number in the spaces provided. Attach additional pages if needed.

E. **Is this owner related to any other individual owners, agents, managing employees, or subcontractor business owners associated with the disclosing Entity/Business?** Check the appropriate box. If yes, list all individuals and how they are related (e.g. spouse, parent, child, sibling) in the spaces provided. Attach additional pages if needed.

F. **Does the individual owner have a business transaction with any subcontractor(s) for services amounting to $25,000 or more?** Check the appropriate box. If yes, provide the Subcontractor Business Name, Owner, Address and Phone Number for each subcontractor.

G. **Does the individual owner have direct or indirect ownership or controlling interest of 5% or greater in any other Entity/Business participating in a Federal/State funded healthcare program?** Check the appropriate box. If yes, identify the applicable plan(s) [Louisiana Medicaid, Medicare Part A, Medicare Part B, Medicare Part C, Medicare Part D (for pharmacies only), CHAMPUS, **and/or** Other Government Funded Program]. In each instance, provide the Doing Business As (DBA) Name, the Tax ID number, the Plan Numbers for Enrollments, and the location (state) of Enrollments. Attach additional sheets as needed.

H. **Has the individual owner named above (ever)** – Read the questions carefully and check the appropriate yes or no boxes. Every item needs to have either a yes or no check. Do not leave any blanks. If yes to any question, 1) provide a written statement providing the details on all occurrences and 2) attach all official legal documents regarding the occurrence, including any reinstatements.

SECTION V(c) – INFORMATION ON THE ENTITY/BUSINESS OWNER OF DISCLOSING ENTITY/BUSINESS

A. **Entity/Business Owner Information** – Enter the Entity/Business Name, the DBA Name, the Tax ID Number, the current street address of the primary location, the mailing address, any additional Post Office Boxes not previously identified, telephone number, fax number, email address of the contact person and website of the Entity/Business in the spaces provided.

B. **Are there any business locations in addition to the location listed above?** Check the appropriate box. If yes, provide the number of locations in the box to the left and complete the section(s) below for each additional location. Enter the DBA Name of the additional location, the Tax ID Number, the current street address of the additional location, the mailing address, any additional Post Office Boxes not previously identified, telephone number, fax number, email address of the contact person and website of the Entity/Business in the spaces provided. Attach additional pages if needed.

C. **Has the Entity/Business owner used or previously been known by any name other than the legal name or the Doing Business As (DBA) name?** Check the appropriate box. If yes, list all names and Tax IDs below. Attach additional pages if needed.

D. **Does the Entity/Business owner have a business transaction with any subcontractor(s) for services amounting to $25,000 or more?** Check the appropriate box. If yes, provide the Subcontractor Business Name, Owner, Address and Phone Number for each subcontractor.

E. **Is this Entity/Business and Tax ID listed in the Section I currently enrolled in a Federal/State funded healthcare program?** If yes, provide the Doing Business As (DBA) Name, the Tax ID number, the Plan Numbers for Enrollments, and the location (state) of Enrollments.

F. **Has this Entity/Business (since its existence) AND any Entity/Business affiliated with the same Tax ID number AND any past or current owners, agents, managing employees or persons with a controlling interest have had or currently have any involvement or participation with, since the inception of those programs, as follows:** Check the appropriate yes or no box for each statement. Every item needs to have either a yes or no check. Do not leave any blanks. If yes for any question, provide a written statement including the details on all occurrences. Attach all official legal documents, including any reinstatements.

SECTION VI – INFORMATION ON EACH INDIVIDUAL OR AGENT WHO IS PART OF MANAGEMENT

Under Federal Regulations, a provider must disclose to the Medicaid agency, prior to enrolling, the name and address of each person who is a managing employee of the provider (General Manager, Business Manager, Administrator or other individual who exercises operational or managerial control or conducts day to day operations of the agency) as well as the name and address of any person who is an agent of the provider, which is any person with authority to obligate or act on behalf of the disclosing entity. See Federal Regulations 42 CFR § 455.106(a)(1)(2) at http://www.access.gpo.gov/nara/cfr/waisidx_01/42cfr455_01.html.

A separate VI(b) form is required for each agent or managing employee, therefore, please make the necessary copies as a list of all managing employees and/or agent names will not be accepted. Incomplete applications will be rejected.

When reporting a name, use the individual's FULL LEGAL NAME, i.e. *John R. Smith*, not *J.R. Smith* or *Johnny Smith*; or Jenny Rae Jones-Smith, not J.R. Jones-Smith or Jenny Jones-Smith.

Managing employee is defined as a general manger, business manager, administrator, director, or other individual who exercises operational or manager control over, or who directly or indirectly conducts the day-to-day operations of an institution, organization or agency.

Agent is defined as any person who has been delegated the authority to obligate or act on behalf of a provider.

Members of management, or agents, may hold job titles similar to the ones shown below:

- Administrator
- Board of directors
- Board of trustees
- Chairman or chairperson
- Chief Business Officer (CBO)
- Chief Executive Officer (CEO)
- Chief Financial Officer (CFO)
- Chief Operating Officer (COO)
- Director
- Managing employee/agent
- Officer
- Trustee

Members of management, or agents, are non-owners who are part of a chain of command within a company and may perform tasks similar to the ones shown below:

- Analyze performance
- Develop directional policy
- Direct and control management activities
- Manage risk
- Oversee operations
- Participate in the election and/or removal of officers and employees
- Supervise

These lists are not all-inclusive, and other titles that imply or assume similar powers or responsibilities may apply.

SECTION VI(a) – INFORMATION ON ALL MANAGING EMPLOYEES/AGENTS

In the first table, enter the names of each agent, member or officer who is a part of management for the disclosing Entity/Business. In the second table, enter the names of each managing employee for the disclosing Entity/Business. Select the appropriate box to indicate if the individual is also an owner. If so, list their percentage of ownership. Add additional pages if needed.

NOTE: Section VI(b) must be completed for each individual listed unless individual has already been reported in Section V.

SECTION VI(b) – INFORMATION ON EACH INDIVIDUAL OR AGENT WHO IS PART OF MANAGEMENT

Make a photocopy of Section VI(b) for each managing employee/agent you report.

A. **AGENT– or – MANAGING EMPLOYEE –** Check a box to specify whether the person is a Managing employee or an Agent. Enter the managing employee/agent's First Name, Middle Name, Maiden Name, Last Name, and Hyphenated Last Name (if applicable), Title/ Job Position, Social Security Number, Date of Birth, current mailing address, current physical address, telephone number and email address in the spaces provided.

B. **Has the agent or managing employee named above ever used or been known by any other name including married, maiden, hyphenated, or alias? –** Check the appropriate box. If yes, enter the name(s) in the spaces provided. Attach additional pages if needed.

C. **Is this agent or managing employee a U.S. citizen?** Check the appropriate box. If no, provide Alien Verification number.

D. **Is this agent or managing employee related to any other individual owners, agents, managing employees, or subcontractor business owners associated with this Entity/Business?** Check the appropriate box. If yes, list all individuals and how they are related in the spaces provided. Attach additional pages if needed.

E. **Has the agent or managing employee named above (ever) –** Read the questions carefully and check the appropriate yes or no boxes. Every item needs to have either a yes or no check. Do not leave any blanks. If yes to any question, 1) provide a written statement providing the details on all occurrences and 2) attach all official legal documents regarding the occurrence, including any reinstatements.

F. **Does this agent or managing employee have ownership or controlling interest in any other Entity/Business participating in a Federal/State Funded healthcare program?** Check the appropriate box. If yes, identify the applicable plan(s) [Louisiana Medicaid, Medicare Part A, Medicare Part B, Medicare Part C, Medicare Part D (for pharmacies only), CHAMPUS, **and/or** Other Government Funded Program]. In each instance, provide the Doing Business As (DBA) Name, the Tax ID number, the Plan Numbers for Enrollments, and the location (state) of Enrollments. Attach additional sheets as needed.

SECTION VII – AUTHORIZED REPRESENTATIVES

List the individuals who are authorized to sign into legal, binding documents on behalf of this provider, such as direct deposit forms and/or changes to the disclosure of ownership forms. Every person listed here must be either an owner or a managing employee as disclosed in the Disclosure of Ownership forms. Check one box for each person to indicate whether the individual is an owner, a managing employee, or other (specify the title in the space provided).

Printed Name of Authorized Representative – print the name of the authorized representative who can enter into a binding agreement with Louisiana Medicaid.
Title/Position of Authorized Representative – indicate the Authorized Representative's relationship to the entity or business (e.g., owner, administrator, agent, managing employee, billing manager, etc.).
Signature of Authorized Representative – the authorized representative must sign the form. Signatures must be original and in blue ink (stamped signatures and initials are not accepted). Only an authorized representative may sign this form. This authorized representative must be someone designated to enter into a legal and binding contract with Louisiana Medicaid. This person must be someone currently listed on the Disclosure of Ownership as either an owner or manager. Any other signature will be grounds for rejecting this form.
Date of Signature – enter the date this agreement was signed.

Carefully review all sections of the Disclosure of Ownership. Requires original signature of the authorized representative (no stamps or initials) and the date. Please sign in colored ink (not black).

Reference Material for Louisiana Medicaid Ownership Disclosure Information For an Entity/Business

Louisiana Medicaid follows the regulations as outlined in The Code of Federal Regulations (CFR).

The information being requested on this Louisiana Medicaid **Disclosure of Ownership form** can be found in Title 42 (Public Health), Part 455 (Program Integrity: Medicaid), Subpart B (Disclosure of Information by Providers) in the CFR at the following web address: http://url.ie/ywri

MAPIL Louisiana R.S., Title 46:437.1-14. http://url.ie/yw45

Louisiana Register, Vol. 29, No. 4, April 20, 2003: http://url.ie/yw46

Louisiana Update January/February 2009: http://url.ie/yw47

Notice Regarding Disclosure of Social Security Numbers

Louisiana Medicaid policy, including Louisiana's Medical Assistance Programs Integrity Law (MAPIL Louisiana R.S., Title 46, Chapter 3, Part V1-A) and Administrative Rules, (Louisiana Register, Vol. 29, No. 4, April 20, 2003), as well as Louisiana Provider Update January/February 2009 (available at www.lamedicaid.com) requires potential Medicaid providers, including Officers, Trustees, Partners and Boards of Directors, furnish social security numbers. (Links are available below.) A Social Security number is also required for any person listed on the Disclosure of Ownership Form.

Provider Name: Aetna Better Health of Louisiana

NEW FORMAT! PLEASE REFER TO THE INSTRUCTIONS FOR DETAILED EXPLANTIONS!

Make a photocopy of this page if more space is needed to list owners in items A and B

SECTION V(a) – INFORMATION ON ALL OWNERS

A. Individuals & Entities/Businesses with Direct Ownership

List all individual owners or entities/businesses that have any direct stake/shareholding/ownership/or controlling interest of 5% or greater in the disclosing Entity/Business.

*Fill out Section V(b) for each **Individual**. Fill out both item B and Section V(c) for each **Entity/Business** listed below.*

Individuals or Entities/Businesses with ownership	% of ownership
1. Aetna Health Holdings, LLC	100% (Direct)
2. Aetna Inc.	100% (Indirect)
3. CVS Pharmacy, Inc.	100% (Indirect)
4. CVS Health Corporation	100% (Indirect)
5.	
6.	
7.	
8.	
9.	
10.	

B. Individuals and Entities/Businesses with an Indirect Ownership Stake of 5% or more in the disclosing Entity/Business

List all Entity/Business/Organizations identified in item A that have direct ownership in the disclosing Entity/Business. Identify the owners of that Entity/Business and their % of ownership below.* The disclosing Entity/Business cannot be listed as an owner.

*Fill out Section V(b) for each **Individual** and Section V(c) for each **Entity/Business** listed below.*

Entity/Business/Organization with a direct ownership interest listed in item A	Owners of the Entity/Business identified on the left.	% of ownership in Entity/Business identified on the left	% of ownership in the disclosing Entity/Business
1. Aetna Health Holdings, LLC	a. Aetna Inc.	100%	100%
	b.		
	c.		
	d.		
2. Aetna Inc.	a. CVS Pharmacy, Inc.	100%	0%
	b.		
	c.		
	d.		
3. CVS Pharmacy, Inc.	a. CVS Health Corporation	100%	0%
	b.		
	c.		
	d.		
4. CVS Health Corporation	a. See Exhibit 1		
	b.		
	c.		
	d.		
5.	a.		
	b.		
	c.		
	d.		

*The amount of indirect ownership interest is determined by multiplying the percentages of ownership in each entity. For example, if individual A owns 10% percent of the stock in a corporation which owns 80% of the stock in the disclosing entity, A's interest equates to an 8% indirect ownership interest in the disclosing entity and must be reported. Conversely, if individual B owns 80% of the stock of a corporation which owns 5% of the stock of the disclosing entity, B's interest equates to a 4% indirect ownership interest in the disclosing entity and need not be reported.

Provider Name: Aetna Better Health of Louisiana

Make a photocopy and complete Section V(b) for each individual owner named in Section V(a)

SECTION V(b) – INFORMATION ON INDIVIDUAL OWNER

A. INDIVIDUAL OWNER INFORMATION

First Name	Middle Name	Maiden Name	Last Name	-	Hyphenated Last Name (if applicable)
NONE					

Title/Job Position within the disclosing Entity/Business	% ownership	Social Security Number (required) - -	Date of Birth

Healthcare NPI (if applicable)

SECTION VIII – PROVIDER SIGNATURE

With my signature below, I attest:

1. That the provider has disclosed all necessary information;
2. That I am the authorized representative of this entity/business and, as such, have the authority to enter into a provider agreement with the Louisiana Medicaid Program;
3. That the provider has reviewed the information on this entity/business Disclosure form and attest that it is true, accurate and complete;
4. That the provider understands that knowingly and willfully failing to fully and accurately disclose the information requested may result in the denial of any request to participate in Louisiana's Medicaid Program, or where the entity/business already participates, a termination of the provider agreement or contract with the State Agency or the Secretary, as appropriate;
5. That the provider understands that a denial or termination of the provider agreement or contract with the State Agency or the Secretary will prohibit me from any participation in Louisiana's Medicaid Program;
6. That the provider understands that whoever knowingly and willfully makes or causes to be made any false statement or fraudulent representation on any form submitted to the State Agency or the Secretary may be prosecuted under applicable Federal or state laws;
7. That the provider understands it is their responsibility to ensure that all information is continuously kept up to date on the Louisiana Medicaid Provider File;
8. That the provider understands that the failure to maintain current and correct information may result in payments being delayed or closure of this Medicaid provider number;
9. That the provider understands if this number is closed due to inaccurate information or inactivity, they will have to complete a new Provider Enrollment Packet in its entirety for consideration to reactivate this provider number;
10. The provider understands that under Federal Regulations, a provider or disclosing entity must disclose to the Medicaid agency, prior to enrolling, the name and address of each person, entity or business with an ownership or control interest in the disclosing entity. *(See Federal Regulations 42 CFR § 455.104(b)(1).* A provider or disclosing entity must also disclose to the Medicaid agency, prior to enrolling, whether any person, entity or business with an ownership or control interest in the disclosing entity are related to another as spouse, parent, child, or sibling. *(See Federal Regulations 42 CFR § 455.104(b)(2).* Furthermore, there must be disclosure of the name of any other disclosing entity in which a person with an ownership or controlling interest in the provider/ disclosing entity also has an ownership or control interest.
11. That the provider understands that as part of the Louisiana Medicaid enrollment/re-enrollment process, pursuant to Louisiana Medicaid Rules and Regulations, they must provide Social Security numbers for each of the following persons:
    - All Individuals with Direct or Indirect Ownership or Control Interest of 5% or more;
    - All Individuals acting as Board of Director;
    - All Individual Corporate Officers, Directors, Partners, or Shareholders;
    - All Individual Managing Employees or Agents who exercise operational or managerial control or who directly or indirectly manage the conduct of day to day operations.
12. I attest that I am a United States citizen or have legal status and work privilege in the US.
13. The provider understands that it is their responsibility to ensure that all managing employees, employees, agents, affiliates or subcontractors are U.S. Citizens or have legal status and work privilege in the U.S.
14. The provider understands that it is their responsibility to ensure that it is disclosed on this form if any Owner, Board Member, Corporate Officer, Partner, Board of Director, Shareholder, Managing employee, Employee, Agent or Affiliate, have ever:
    - been denied enrollment from Medicare, Medicaid or any other Federally funded healthcare Program;
    - been suspended or excluded from Medicare, Medicaid or any other Federally funded healthcare Program;
    - been terminated from participation from Medicare, Medicaid or any other Federally funded healthcare Program;
    - been employed by a corporation, business or professional association that is now or has ever been suspended or excluded from Medicare, Medicaid or any other Federally funded healthcare Program in any state; or
    - been convicted of any crimes.
15. The provider understands that pursuant to 42 CFR § 455.104(a)(1) and 42 CFR § 455.105(a)(1)(2), they are required to provide certain data pertaining to subcontractors within 35 calendar days of the date of the request.
16. The provider understands that they shall report any of the above conditions to the Louisiana Department of Health (LDH). Once enrolled, the provider understands that upon discovery of any of the above conditions, it is their responsibility to report immediately in writing to LDH, Program Integrity Section, P.O. Box 91030, Baton Rouge, LA 70821-9030.
17. I understand if I answered "Yes" to questions regarding being convicted of a felony or any criminal offense, or if I have ever had any disciplinary action taken against my professional license (board actions, board consent order, restriction, suspension, revocation or voluntary surrender to avoid disciplinary action), or if I have ever been denied enrollment or been excluded, terminated from participation, suspended, or voluntarily withdrawn to avoid disciplinary action from any Federally funded healthcare program, I am required to submit this information and the requested documentation.
18. The provider understands that they are being placed on notice of Louisiana state law, R.S. 14:126.3.1 entitled "Unauthorized participation in medical assistance programs." The provider understands that this criminal statute means that if any owners, managing employees, employees, agents, affiliates, or subcontractors, are excluded now or become excluded in the future or have been terminated from participation in the Medicare, Medicaid, or any other Federal or State Funded Healthcare Program, it is a crime to "participate" in any medical assistance program. The provider also understands that "participation" includes providing any services which will be billed, directly or indirectly, to Medicare, Medicaid, or any other Federal or State Funded Healthcare Program, and "participation" also includes to seek or to be employed, directly or by contract, or have an ownership interest in any individual or entity that provides such services which will be billed to these programs. The provider also understands that this crime can be punishable as a felony for up to five (5) years imprisonment with or without hard labor, as well as a maximum fine of $20,000.00. I also understand that any claims for payment with a date of service during a period of exclusion will be subject to recoupment in addition to other fines, penalties, or restitution resulting from the criminal prosecution (LA R.S. 14.126.3.1).

Aetna Better Health of Louisiana

Louisiana Medicaid Ownership Disclosure Information

EXHIBIT 1

Section II. Aetna Better Health, Inc. d/b/a Aetna Better Health of Louisiana is involved in the following healthcare court cases:

Aetna Better Health of Louisiana is currently involved in only one open or pending health care case. That case, captioned Laguna Commercial Capital, LLC v. Wish Health Services, LLC; Keimyereia Lewis-Jones; Louisiana Healthcare Connections, Inc.; Aetna Better Health, Inc. d/b/a Aetna Better Health of Louisiana; AmeriHealth Caritas Louisiana, Inc.; Community Care Health Plan of Louisiana, Inc. d/b/a Healthy Blue; and UnitedHealthCare of Louisiana, Inc. d/b/a UnitedHealthcare Community, U.S. District Court for the Eastern District of Louisiana, No. 2:19-cv-01522-MVL-KWR, involves a dispute between a provider and their successor-in-interest. Aetna Better Health of Louisiana is named as a defendant for purposes of notification to pay the successor and not the provider.

Section V(a)(B) 4. CVS Health Corporation - CVS Health Corporation is a publicly traded company, listed on the New York Stock Exchange and registered with the Securities Exchange Commission ("SEC"). As a publicly traded company, CVS Health does not track the identity of individual shareholders, but relies on disclosures of beneficial ownership of CVS Health stock which the SEC requires investors to file on Schedules 13D and 13G and related amendments. From time to time, certain institutional investors have filed Schedules 13D and 13G with the SEC, indicating beneficial ownership of 5% or more of CVS Health's common stock. In such filings, the beneficial owner certifies that their shares were acquired in the ordinary course of business and were not acquired for the purpose of changing or influencing the control of CVS Health. Further information on beneficial ownership can be provided upon request.

CVS Health Corporation and its subsidiaries (including CVS Pharmacy, Inc.) operate over 10,000 retail pharmacy, LTC pharmacy, mail service pharmacy, specialty pharmacy, PDP, infusion provider and clinical provider locations. Addresses for such additional business locations can be provided upon request.

Section V(c)F

Aetna Inc. responded yes to: *Been denied enrollment, suspended or terminated from participation, excluded or voluntarily withdrawn to avoid disciplinary action from Medicare, Medicaid or other healthcare program(s) in any State or U.S. Territory*?

RESPONSE:

On April 21, 2010, the Centers for Medicare & Medicaid Services (CMS) imposed intermediate sanctions on Aetna, which consisted of the suspension of all enrollment and marketing activities with respect to Aetna's Medicare Advantage and Standalone Prescription Drug Plan contracts. The sanctions were a result of Aetna improperly administrating a transition from an open formulary to a closed formulary for its Part D Medicare members. In late May 2011, CMS provided Aetna with a limited waiver to allow existing employer groups to enroll prospective members into an Aetna employer group Medicare Advantage and Standalone Prescription Drug Plan. On June 13, 2011, CMS removed Aetna from Intermediate Sanctions so that Aetna could begin all enrollment and marketing activities; however, CMS excluded Aetna from receiving LIS-auto enrollments. Based on Aetna's progress and performance during the 2012 LIS Readiness Audit, CMS determined that Aetna demonstrated sufficient improvement to merit lifting the LIS auto-enrollment and reassignment exclusion. The exclusion was lifted in September 2012 and Aetna has been eligible for LIS auto-enrollment since that time.

CVS Pharmacy, Inc. responded yes to: *Has any disciplinary action been taken against any healthcare license or certification held in any State or U.S. Territory, including disciplinary action, nolo contendere, probation, board consent order, suspension, revocation, voluntary surrender of a license or certification?*

RESPONSE:

While there have been no disciplinary actions taken against any healthcare licenses held by CVS Pharmacy Inc. in Louisiana, CVS Pharmacy Inc. holds a number of healthcare licenses and certifications in certain other states. Those licenses and certifications are not currently suspended or terminated by any licensing agency. As with other large pharmacy providers, certain CVS pharmacies and distribution centers operated by CVS Pharmacy, Inc. have citations, correction notices, board orders, or other findings arising from routine inspections, investigations or other examinations by Boards of Pharmacy or other licensing agencies. More detailed information on such findings outside of Louisiana is available upon request.

Aetna Health Holdings, LLC and Aetna Inc., CVS Pharmacy, Inc., CVS Health Corporation responded yes to: *Currently have any open or pending healthcare court cases?*

RESPONSE for Aetna Health Holdings, LLC:

Yes. In the ordinary course of business, Aetna Health Holdings, LLC and its affiliated entities are, or may be, subject to current or pending litigation and other healthcare court cases. Additional reference to material historical legal or administrative actions can be found in Aetna's annual and quarterly reports, available on the company's web site at: www.aetna.com. Ongoing references to Aetna Health Holdings, LLC's legal or administrative actions will be contained in Aetna's annual and quarterly reports or other required filings. More detailed information on such findings is available upon request.

RESPONSE for Aetna Inc.:

**Direction provided by LDH is to provide Aetna Better Health of Louisiana's subcontractors rather than those of any its owners.*

2.10 Technical Proposal Requirements

Louisiana's breast cancer mortality rate is statistically significantly higher than the rest of the country. Aetna has promised to bring solutions to our communities and members by providing resources including access to screenings and treatment, meeting our members where they live, work, and worship. Through grant funding, the Louisiana Breast & Cervical Health Program will extend its mobile screenings units to underinsured, lower-income women in Louisiana.

2.10.1 Executive Summary

Pancreatic cancer was the 10th-most commonly diagnosed cancer in Louisiana. Aetna's support of the Purple Stride Louisiana Walk in 2018 was an opportunity to show our commitment to helping with the fight of chronic illness and disease in our communities.

2.10.1 Executive Summary

A Greater Shared Vision and System of Support

In late 2018, Aetna Inc. was acquired by CVS Health Corporation (CVS Health), the nation's premier health innovations company. CVS Health's goal is helping people on their path to better health and well-being, and it mirrors our own goals. For example, CVS Health's pioneering approach to total health is illustrated by its bold move to no longer sell tobacco products in its retail stores, and through such commitments, the strengths of our individual organizations are surpassed only by the strength we have as a unified company. Therefore, moving forward, Aetna Inc. will be able to advance and achieve better health and better care at a lower cost, take advantage of more real-time data and proactive population health care strategies, and tap into broad national networks and unique provider relationships. It also means a potential innovative expansion of our CVS MinuteClinic access in certain regions in Louisiana.

> *"There is absolutely no partnership between most of the MCOs and the providers, and it is tearing apart practices in rural communities. Aetna Better Health has been an exception to this by using a systematic approach to provider relations."*
>
> **—Alec Jeansonne, CEO**
> **Collective Healthcare Solutions**

As part of this CVS Health family, Aetna Better Health of Louisiana (Aetna) will bring these strengths to all our Medicaid enrollees, the Louisiana Department of Health (LDH), our providers, and our stakeholders and community-based agencies. Currently serving more than 120,000 enrollees, we are well prepared to ramp up services and benefits to include the total 375,000-plus anticipated enrollees through this new contract. We are committed to being transparent with our operations and programs while growing and improving our Medicaid managed care delivery system. Grounded in the Triple Aim, we strive to improve the health of populations (better health), enhance the experience of care of enrollees (better care), and effectively manage Louisiana's Medicaid per capita care costs (lower costs). CVS Health and Aetna are community-based and locally focused on enabling a more effective holistic treatment approach for every enrollee and better use of Louisiana's finite Medicaid dollars. **Together, we will continue to listen, to learn, and to take action to improve the lives of those we serve.**

Effective Solutions to LDH's Goals and Objectives

As an organization and as Louisianans serving Louisianans, **we remain passionate and inspired as we pledge to maintain our organizational mission to work with LDH while supporting its contract goals** and offering effective solutions to the following:

- Advancing evidence-based practices, high-value care, and service excellence
- Supporting innovation and continuous quality improvement
- Ensuring enrollees have ready access to care
- Improving enrollee health and decreasing fragmentation
- Increasing integration across providers and care settings
- Utilizing a population health approach that maximizes enrollee health and well-being
- Reducing complexity and administrative burden
- Aligning financial incentives
- Improving care quality through data and collaboration
- Minimizing wasteful spending, abuse, and fraud

> *"Aetna is a leader in closing the access gap and helping Louisiana reduce barriers to mental and substance use treatment."*
>
> **—Charles Edwards, CEO**
> **One TeleMed**

Our Overarching Differentiators Offer Something Extra

Louisiana exudes a ***lagniappe* culture.** It is part of us, our traditions, and the places in which we live. Aetna strives to reciprocate that something extra through what we believe are differentiators that only we can offer. Our differentiators include the following programs and successes.

Broad Collaboration on Value-based Payments

Eighty-five percent of our contracted PCPs serve seventy-six percent of the enrollees contracted under a value-based payment arrangement.

We have an extensive value-based payment arrangements program in support of the Triple Aim. The "2017 Healthy Louisiana Value-based Report" showed our value-based payment (VBP) spend at 34 percent of provider payments compared to the statewide Medicaid health plan weighted average of just 16 percent. Not resting on past accomplishments, **in 2018 Aetna further increased the percent of provider payments tied to VBP to 51 percent**. Currently, 76 percent of Aetna enrollees in Louisiana are served by a value-based primary care provider (PCP) and 85 percent of Aetna PCPs are participating in a VBP program. In addition, our value-based providers have lowered the total cost of care for their population. In 2017, our Louisiana shared-savings VBP arrangements provider partners, representing 15 percent of the total plan's enrollment, experienced an overall 33 percent lower per member per month (PMPM) cost of care than the overall health plan's enrollment. These same provider partners' high-risk enrollees, representing 22 percent of the total plan's high-risk enrollees, experienced a 12 percent lower PMPM cost of care than the overall health plan's high-risk enrollees.

Quality—Better Care, Better Health, Lower Cost

Our substantial improvement trajectory surpassed all other plans within Louisiana on the Healthcare Effectiveness Data and Information Set (HEDIS), State performance, Adult Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey, and Child with Chronic Condition (CCC) CAHPS survey measures, including meeting the 75th percentile for the following:

- Antidepressant medication management acute phase
- Antidepressant medication management continuation phase
- Chlamydia screening in women aged 16 to 24 years
- Adult CAHPS Survey: how well doctors communicate
- CCC CAHPS Survey: how well doctors communicate and rating of personal doctor

We were the number one-ranked health plan in Louisiana for 2018 HEDIS measures for the following:

- Well-child visits in the first 15 months of life
- Appropriate testing for children with pharyngitis
- Appropriate treatment for children with upper respiratory infection
- Diabetes screening for people with schizophrenia or bipolar disorder

Provider Network

Aetna far exceeds the State's provider network access standards for adult PCPs in rural and urban parishes. The current standard is 90 percent, and to date we have 98 percent coverage across Louisiana. Additionally, 90 percent of our PCP network has open and accessible panels for new enrollees. **Our 2019 year-to-date provider post-call survey satisfaction rate is 94.7 percent. Additionally, 9 out of 10 provider calls are resolved at first contact.** In addition, Aetna has contracts with over 23,000 providers, which includes over 5,000 primary care providers, 18,000 specialty physicians, 4,900 behavioral health specialists, and 251 behavioral health and physical health hospitals across the state. Our network for the Medicaid program also includes 100% of the federally qualified health centers and rural health clinics across Louisiana.

Population Health Programs Maximize Enrollee Health

Our new breast cancer community health worker program is a population health intervention that addresses the identified disparity for African-American women. Our community health workers (CHWs) collaborate with the Louisiana Breast and Cervical Health Program to provide breast screening education and linkages to resources for screenings. They work closely with community- and faith-based organizations, such as Louisiana Baptists and Congregational Health Services, to bring prevention, education, and linkages to screenings for enrollees and the population at-large in the communities where they reside. Our CHWs serve as an integral member of the enrollee's multi-disciplinary care team (MDCT) and work to address enrollees' individual needs, such as access to transportation and access to preventive and early intervention activities. We also are developing the capability to measure other outcomes, including self-management and lifestyle changes.

Addressing High Emergency Department Utilization through Diversion Coordinators

We employ emergency department (ED) coordinators who work under the umbrella of our Care Management team. These coordinators establish relationships with hospital staff throughout the state, engage enrollees with high ED utilization, and provide outreach to at-risk enrollees. They also attend collaborative provider meetings, discuss the needs of the enrollees that need extra support during Aetna integrated rounds, and engage enrollees through face-to-face and telephonic outreach.

Aetna successfully controls appropriate ED and inpatient utilization year-over-year. We have achieved the following in 2018 vs. 2017:

- 4.98% decrease in ED visits/1000
- 4.3% decrease in PMPM for inpatient admissions
- 7.1% decrease in physical health admissions/1000
- 11.1% decrease in behavioral health admissions/1000
- 10.5% decrease in physical health readmissions/100
- 36.2% decrease in behavioral health readmissions/1000

Integrative Care Coordinates Behavioral Health and Physical Health Needs

Individualized care planning focuses on coordination and integration between physical and behavioral health services provided in the enrollee's community. When an enrollee receives services requiring a plan of care from LDH, such as home- and community-based services or services through the Office of Public Health, case managers collaborate and coordinate among the agencies. Enrollees with behavioral health needs may also receive referral to telepsychiatry as needed; coordination with an Assertive Community Treatment (ACT) team prior to discharge from an inpatient facility, if eligible for ACT services; and biweekly rounds that address enrollees with high utilization rates. We also ensure connection to specialized substance use disorder treatment. Since its launch in 2017, Aetna's Enterprise Wide Opioid Taskforce has supported the advancement of Aetna's clinical strategy to combat the opioid overdose crisis. Fueled by cross-functional collaborations and insights, Aetna's opioid initiatives have yielded meaningful results. In the first year since announcing our five-year enterprise goals, **we have seen a nearly 30 percent increase in the rate of medication-assisted treatment or other evidence-based treatments used by enrollees with opioid use disorder, among other significant improvements**.

Adoption of Elli to Meet New Enrollees' Needs

As one of the first adopters of Elli in Louisiana, we recognize the value it will bring to our plan and to LDH. We will gain access to four years of claims data collected from fee-for-service Medicaid and Medicaid managed care organizations across the state. The data will be available to us on day one of an individual's enrollment. The data provides additional risk stratification that we will consider in concert with our predictive modeling risk stratification results. We will leverage Elli, in particular, when we enroll an individual with previous Medicaid history, enabling us to immediately engage the enrollee in appropriate tier of care management and streamline the Health Needs Assessment process.

Fraud, Waste, and Abuse Savings, Recoveries, and Tools

To maintain strict oversight on fraud, waste, and abuse (FWA) to protect the State's Medicaid dollars and to aid in FWA savings and recoveries, we use verified, time-tested policies and procedures to outline all the steps we take from fraud, waste, and abuse identification to pre- and post-recovery efforts. This safeguards us, our providers, and our subcontractors, and it helps us proactively manage and analyze prompt reporting of all overpayments identified or recovered, specifying the overpayments due to potential fraud to the State. **Total FWA/program integrity savings for 2018 were $26,237,246.** Also, **Healthcare Fraud Shield** is our new lead-generation tool for 2019—**a platform that comes equipped with approximately 600 business rules and algorithms based on the latest fraud schemes** maintained and updated quarterly to identify FWA. Healthcare Fraud Shield assigns a risk score for each provider or enrollee and uses application screens to show all leads/billing activity for follow-up. Healthcare Fraud Shield contains provider, enrollee, and alert dashboards that show the top potential FWA providers/enrollees, top scoring specialties, score analysis, and top changes in provider risk scores.

Proactively Addressing High Utilization

We proactively address challenges associated with high utilization and increasing medical trends. For example, our focus on high-risk pregnancy and babies admitted to a neonatal intensive care unit (NICU) is essential as prevention and early intervention can dramatically reduce the number of children exposed to trauma. In alignment with LDH, we coordinate a systematic approach to decreasing health risks and costs associated with babies admitted to the NICU. Our approach, which includes intensive care management, discharge navigation, collaboration with system partners, and a targeted enrollee education campaign, has resulted in increased health outcomes and cost savings—**we saved $3,386,923 in 2017, a 19 percent increase from 2016**. In addition, we reduced the average length of stay in the NICU from 18.4 days in 2017 to 13.2 days in 2018, and bed days/1000 from 78.1 in 2017 to 67.7 in 2018.

Engaging Enrollees in Managed Care

We value and support an enrollee's choice in how they engage with us and have specifically designed our care management model—an enhanced, regionally based multi-disciplinary care team model—to better engage enrollees and families in care management services and improve health outcomes. We organize Care Management teams that are local to the enrollees they support, promoting improved specialty knowledge of services and providers in the area. We cross-train our behavioral health and physical health case managers to act as a single point of contact for the enrollee, and to work with other enrollees of the MDCT.

Successful Engagement Efforts

In 2018, we achieved the following:

- A 94% success rate with enrollee engagement in care management services for Quarter 4
- Increased field visits by 35%
- Increased volume of outreach by 65.5% from 2016 to 2018

Access to Crucial Residential Treatment

To increase access to crucial services, we do not require prior authorization for the lower intensity level of residential substance use treatment or Multisystemic Therapy, though we track and trend for potential over-utilization. We authorize services that are not part of the Medicaid benefit structure to ensure continuity of care, treatment at the appropriate level, and better health outcomes for our enrollees. In particular, the low intensity level of care is crucial to supporting an enrollee's recovery in the community and their ability to be self-sufficient; it provides a bridge between higher-cost, more intensive care, and community living. Enrollees also receive support with employment and housing at this level of care, which are significant social determinants of health in a person's recovery from substance abuse.

Enrollee Phone App to Aid in Claims Notification

We are in the process of creating our claims notification phone app. We will be providing claim notifications and other pop-up information in our enrollee mobile application to catch inappropriate claim

billing after payment. This will allow the enrollee to either confirm or deny that the claim was theirs. We will provide easy-to-follow instructions when a member believes the claim was fraudulently submitted.

MinuteClinic Access

We are prepared, upon award and in collaboration with the State, to expand MinuteClinic access in at least one existing CVS store and as many as three existing CVS stores. We will assess the regions of the state where there are a high number of potentially preventable emergency room visits, feasibility of Clinic placement and overall timing, and staging for the new clinic(s).

Highly Experienced Key Personnel and Local Leadership

We are a highly experienced, dedicated, and successful team with extensive local, program-specific knowledge. Our chief executive officer, Rick Born, has 30 years of health care experience (with the last three years spent leading Aetna Better Health of Louisiana). He has full profit and loss accountability with direct leadership of operations, medical management, behavioral health, quality, compliance, program integrity, and community development. **Mr. Born has created cost-effective, efficient operations and strong external relationships, and has managed membership growth of over 25 percent.** Other key staff highlights include the following:

- Our chief operating officer oversees all operational health plan functions, including enrollee services, information technology, provider contracting, provider servicing, and grievances and appeals
- Our chief financial officer successfully manages our financial operations and LDH reporting
- Our chief medical officer (having most recently served as our medical director) has **implemented Aetna NICU/obstetrics/gynecology best practices and fully integrated daily rounds with behavioral health and physical health**
- Our behavioral health medical director is certified in both psychiatry and addiction medicine and oversees the integration of our behavioral health and physical health programs

Conclusion

Aetna Better Health of Louisiana understands LDH's vision for the contract and is committed to achieving the vision through improving the health of populations (better health), enhancing the experience of care of enrollees (better care), and effectively managing Medicaid care costs (lower costs). Enrollees and their families are at the center of everything we do and are an extension of who we are as a health plan. We are well positioned for continued success through our relationship with LDH and look forward to an uninterrupted partnership serving our neighbors and friends—together we will continue to listen, to learn, and to take action. **We work for the community and will be from the community.**

2.10.2 Organizational Experience

Aetna believes in building communities where all children are healthy and ready to learn. Our support of Kingsley House allows the organization to provide more early childhood education, preparing youth to succeed at all levels of school.

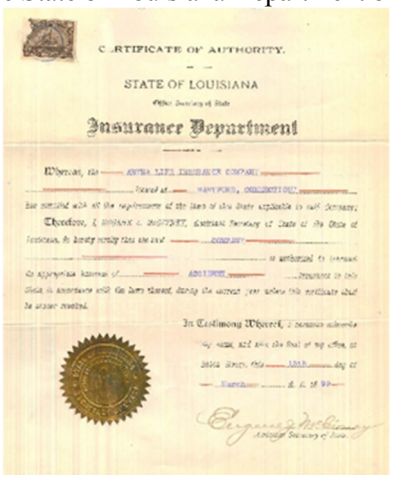
2.10.2.1 Proposer Experience

Louisiana | Transforming Health Care | **Aetna**

2.10.2.1 Proposer Experience

Aetna Better Health of Louisiana has been **a true partner to the State since 2015**. We are committed to being transparent in our operations and programs while expanding our Medicaid managed care delivery system to improve the health of populations (better health), enhance the experience of care of enrollees (better care), and effectively manage Medicaid per capita care costs (lower costs). We focus on administrative simplification for our providers while improving access for enrollees. For example, we engage with providers to create additional reimbursement through value-based payment (VBP) arrangements, as evidenced by having 51 percent of our provider payments and 76 percent of our enrollment tied to one. In addition, continuing our tradition of continual growth, innovation, and increasing access to care, we are prepared, upon award and in collaboration with the State, to **expand MinuteClinic access in at least one existing CVS store and as many as three existing CVS stores**. We will assess the regions of the state where there are a high number of potentially preventable emergency room visits, feasibility of Clinic placement and overall timing, and staging for the new clinic(s).

Organizational History and Experience (2.10.2.1.1): For over 160 years, Aetna has been a mainstay in the lives of Americans, serving a comprehensive array of insurance needs. Aetna is proud of its deep roots and longstanding history of service in Louisiana dating to 1899—two years before the birth of Louis Armstrong—when affiliate Aetna Life Insurance Company was granted a license from the State of Louisiana Department of Insurance, as depicted in **Figure 2.10.2.1-1.** Being one of the first insurance companies in the nation to offer health insurance gives Aetna unparalleled experience and the time-tested ability to adapt to complex changes. A recent example of this is our merger with CVS Health Corporation (CVS Health). This strategic partnership exponentially expands our ability to effect positive change in local communities and across the health care system. Like CVS Health, Aetna is community-based and locally focused, engaging enrollees with the care they need when and where they need it. By bringing together the experience and expertise of Aetna and CVS Health, we are building a uniquely powerful platform that will open a new front door to health care, reshape the enrollee experience, and lead to healthier communities.



CERTIFICATE OF AUTHORITY.

STATE OF LOUISIANA

Insurance Department

Figure 2.10.2.1-1: 1899 COA
Aetna Life Insurance Company began serving Louisianans over 120 years ago.

The Aetna Medicaid organization currently serves nearly 2 million Medicaid enrollees through our administration of Medicaid managed care plans in 16 states, 11 of which with overall enrollment in the past 12 months roughly equal to or greater than that [1] of Louisiana (1.4M): Arizona (1.7M)[2], California (11.8M), Florida (4.2M), Illinois (2.8M), Kansas, Kentucky, Maryland, Michigan (2.3M), New Jersey (1.7M), New York (6.5M), Ohio (2.6M), Pennsylvania (2.9M), Texas (4.3M), Virginia, and West Virginia. The Aetna organization has over 30 years of experience delivering innovative, quality, and efficient services to complex Medicaid populations, far exceeding the preferred qualification of 7 years of experience (RFP **Section 2.10.2.1.2.1** and **Section 2.10.2.1.2.2**). In addition, our Florida, Virginia, and Kansas plans were recently awarded new contracts that expand our Medicaid footprint. **Table 2.10.2.1-1** depicts the volume of Medicaid managed care enrollment in Louisiana compared to other Aetna footprint states.

[1] December 2018 Medicaid & CHIP Enrollment Data Highlights: accessed March 25, 2019; https://www.medicaid.gov/medicaid/program-information/medicaid-and-chip-enrollment-data/report-highlights/index.html.
[2] Aetna's contract engagement in Arizona is through an administrative services contract (ASC) to provide administrative services to an unaffiliated health plan that holds risk-bearing contracts with applicable agencies. Our Texas experience includes both an ASC and risk-bearing contracts that an affiliated health plan holds directly with the State agency.

The Aetna organization is honored and privileged to currently provide Louisianans integrated, managed care for over 250,000 Louisiana Medicaid, Medicare, Medicare Part D, and commercial enrollees. Through the years, we have been proud to provide a variety of insurance products for Louisianans as part of our commitment to quality, ready access, and innovation to maximize enrollee health, reduce health disparities to advance health equity for all enrollees, and address social determinants of health within a flexible, value-based approach. Our VBP arrangements with many of the largest systems in Louisiana, such as Willis-Knighton Health System and Baton Rouge General, supports innovation and reduces costs while improving enrollees' access to quality care. **We work for the community and will be from the community.** Our key personnel are all based in Louisiana and currently serve approximately 120,000 Medicaid enrollees. Our staff is 100 percent dedicated to the local plan and to the people of the State of Louisiana, a commitment that will continue into the new contract.

Aetna's mission is to build a healthier world by assisting enrollees on their path to better health, better care, and lower costs, and Medicaid managed care is an integral part of that mission. We demonstrate this through collaboration with key stakeholders as we work to achieve the following organizational goals:

- **Be local:** We engage our enrollees with the care they need where they need it. Our locally based care managers have achieved a 51 percent increase in enrollees engaged in care management.
- **Make it simple:** We collaborate with key stakeholders to offer administrative simplification solutions, one example being bringing the managed care organizations together to simplify the treatment record review process.
- **Improve health:** We help people achieve better health at a lower cost by aligning financial incentives and building shared capacity to improve quality through data and collaboration.
- **Lead the change:** We challenge the status quo with new technologies, value-based payment models, and collaborations.
- **Attract and inspire:** We unlock the power of our people to transform health care. Our staff has the freedom to develop initiatives and innovations to achieve LDH's goals.
- **Optimize performance and service:** We ensure our people, processes, and technology enables our strategy. Using verified, time-tested methods, we achieved over $26 million in total Louisiana program integrity savings in 2018.

Table 2.10.2.1-1: Volume of Medicaid Managed Care Enrollment

State	# of Years	Aggregate Enrollment[3]
Arizona	17	416,337[4]
Texas	>13	275,774[5]
Kentucky	8	224,908
Pennsylvania	26	218,670
Louisiana	**4**	**119,494**
West Virginia	23	119,125
Kansas	<1	107,621
Florida	26	102,046
Virginia	23	93,408
New Jersey	4	51,438
Michigan	15	45,032
Ohio	5	25,015
Maryland	16	15,384
California	1	11,061
Illinois	8	7,247
New York	7	6,948

Aetna is and has been part of the fabric of the Healthy Louisiana program for the past four years, daily demonstrating our commitment to enrollees, providers, and LDH. We are deeply invested in Louisiana's local communities and will continue working to improve the lives and health of Louisianans upon award.

[3] Membership is as of December 31, 2018, for all states except Kansas, which began operations in January 2019.
[4] In Arizona, an Aetna-affiliated entity performs administrative functions for an unaffiliated health plan, Mercy Care, and is not the risk-bearing entity holding the contracts between the State agency and Mercy Care.
[5] The Texas membership number includes membership for our affiliate, Aetna Better Health of Texas (88,109), and for Parkland Community Health Plan (187,665), an unaffiliated health plan for which an Aetna-affiliated entity performs administrative functions but is not the risk-bearing entity holding the contract with the State agency.

2.10.2.2 Staff Experience and Organizational Structure

Louisiana | Transforming Health Care | **Aetna**

2.10.2.2 Staff Experience and Organizational Structure

Aetna understands, acknowledges, and will comply with all of the requirements of the **RFP** and the **Model Contract**.

Aetna Better Health of Louisiana's Key Personnel and Required Staff (2.10.2.2)

Our experienced personnel support LDH's goal of achieving the Triple Aim—better health, better care, and lower costs—by providing support services for the traditional benefits and services in addition to social determinants of health. We have a clearly defined staffing model designed to fulfill all of LDH's requirements and to adjust to LDH's changing needs. Our staffing plan is a continuous, integrated, and scalable model. It is built on the principle of Louisianans serving Louisianans, managed by local health plan leaders to ensure quality staffing for a growing enrollment or any new contract requirements.

Aetna Better Health of Louisiana's minimum wage is $16 an hour.

The cornerstone of our staffing plan is highly experienced leadership with extensive local, program-specific knowledge. With 30 years of health care experience, the last three of which leading Aetna Better Health of Louisiana, Chief Executive Officer Rick Born plays a key role in identifying and hiring key personnel. He is supported by Aetna's highly experienced, qualified, talented leadership team and our Implementation Talent Acquisition team. To support the growth envisioned in this contract, we are committed to attracting additional professional staff with significant managed care experience with Medicaid populations. Mr. Born and his leadership team will seek local candidates who are experienced and familiar with the local Medicaid health care delivery system and culture in Louisiana and have all the Louisiana licensures and certifications required by law and the Model Contract.

Our key personnel are all based in Louisiana and they currently serve approximately 120,000 enrollees. Our staff is 100 percent dedicated to the local plan and to the State of Louisiana, a commitment that will continue into the new contract. Initially, our staffing plan assumes a total enrollment of approximately 375,000 enrollees. Under this scenario, by the contract start date, we expect to have 421 **staff members** to support that enrollment. Based on the national Aetna Medicaid organization's experience managing programs of similar scope and scale across 16 states, it is our practice to hire and train additional staff, refine processes, provide backup resources, and institute other changes to meet States' requirements should there be an unexpected increase or decrease in volume.

Aetna Better Health of Louisiana anticipates hiring approximately 250 additional local staff.

Process for Identifying Key Personnel

To identify key personnel, Aetna uses proven methodologies. We recruit local Louisiana health care experts who know Louisiana Medicaid whenever possible and hire experienced professionals who meet our qualifications and requirements. We use hiring tools and techniques that define the position by the knowledge, education, skills, and competencies candidates should possess. Our hiring process includes the following steps:

1. Capitalizing on our extensive relationships throughout Louisiana
2. Using local and national talent acquisition staff
3. Using detailed job descriptions to define and communicate our job expectations, required knowledge, skills, and competencies and to assist us further in the targeted selection of qualified candidates
4. Posting of position availability on both internal and external job sites
5. Reviewing candidate applications by our hiring team
6. Conducting interviews of candidates by our Human Resources team and plan leadership
7. Seeking approval from LDH for key position hires

Once hired, new employees participate in a structured orientation both to Aetna and to the Heathy Louisiana program.

Diversity

We are keenly aware of the value that geographic, racial, and cultural diversity brings to our business. Our reputation as an employer of choice enables us to attract the best-qualified candidates and it has earned us recognition from a variety of organizations including the United States Business Leadership Network and the American Association of People with Disabilities. We were included for the 11th time since 2001 on DiversityInc's annual list of the Top 50 Companies for Diversity.

Aetna is a Recognized Employer of Choice

- Human Rights Campaign Foundation Corporate Equality Index: 100% rating
- United States Business Leadership Network Best Place to Work
- American Association of People with Disabilities Disability Equality Index: 100% Rating
- *DiversityInc*'s Top 50 Companies for Diversity
- National Association of Female Executives Top 60 Companies for Executive Women
- Military Friendly® Silver Status
- Black EOE Journal named Aetna to its 2018 Best of the Best lists: Top Employer and Top LGBTQ-Friendly Employer
- Latina Style 50 list for 2018: Recognizes the best companies for Latinas to work in the U.S.

Individuals Appointed to Key Personnel/Leadership Roles (2.10.2.2.1/ 2.10.2.2.2.1)

Aetna's key personnel steer our health plan and actively engage and collaborate with enrollees, program stakeholders, subcontractors, LDH, legislators, and providers across the state. We have built a team that seamlessly supports administrative simplification. The following positions are identified as key personnel by LDH, are located within Louisiana, and are dedicated 100 percent to our local plan and its enrollees. For each of the key personnel listed in **Table 2.10.2.2-1,** we have included their name, role, and a brief description of their responsibilities within our governance and operating structure. Their resumes are located at the end of this section.

Functional Operations/Material Subcontractors Organizational Chart (2.10.2.2.2.2)

Figure 2.10.2.2-1 illustrates our functional operating structure; our key teams that oversee the long-term goals and objectives and day-to-day activities under our current contract. Our material subcontractors listed include CaremarkPCS Health, L.L.C., DentaQuest USA Insurance Company, Inc.; LogistiCare Solutions, LLC; and Superior Vision Benefit Management, Inc. All of these subcontractors will report into our operations function except for CaremarkPCS Health, L.L.C., which will report into our pharmacy function.

Key Team Roles, Full-time Equivalents (2.10.2.2.2.3 and 2.10.2.2.2.4)

Table 2.10.2.2-2 illustrates our key teams, their roles, activities, communication with leadership, major qualifications, competencies, and lead highlights, in addition to briefly describing the team's role, operating activities for which it is accountable, and how it reports to and informs decisions by leadership. All committees listed report into our **Quality Management Oversight Committee/Quality Assessment Performance Improvement Committee (QAPI),** which is chaired by our chief medical officer with cross-functional organizational representation and involvement from providers and LDH. The committee provides executive oversight of the QAPI program and makes recommendations to the board of directors about QM and performance improvement activities.

Table 2.10.2.2-1: Aetna Key Personnel that Support the Health Plan

Key Personnel	Role	Brief Description : Governance Function and Operating Structure
Rick Born, MBA, CMCE	Chief Executive Officer (CEO)	• Leads and manages the entire plan with full profit and loss accountability; has direct leadership of the chief operating, financial, and medical officers; medical management, quality, contract compliance, program integrity, business continuity planning and emergency coordinator, and community development; responsibilities include managing and developing these nine direct reports; serves as the primary contact for LDH regarding all issues; and coordinates with other additional staff required on a daily basis to fulfill the requirements of the contract • This position reports directly to the board of directors.
Mark Grippi	Chief Operating Officer (COO)	• Oversees all health plan operations and is accountable for functions and results as well as day-to-day operations of multiple levels of staff and multiple functions within the health plan; maintains direct leadership of enrollee services, provider physical and behavioral services, provider claims education, information technology, grievance system, and reporting and oversight of shared services of claims and encounters, and enrollment; is the primary point of contact if the CEO is unavailable to meet with LDH or other stakeholders; additionally, offers extensive experience in LTSS and value-based payments • This position reports to the CEO.
Madelyn Meyn, MD (interim)	Chief Medical Officer (CMO)	• Develops, implements, and oversees clinical policies and procedures, including, but not limited to, service authorization, grievance and appeal review, discharge planning, and utilization management; coordinates with the behavioral health (BH) medical director to integrate the administration and management of behavioral and physical health services; leads the QAPI Committee, including QM/UM Committee • This position reports to the CEO.
[redacted]	[redacted]	• Shares the management of BH services with the behavioral health coordinator; leads all major clinical and quality management components of the BH services for Aetna Better Health of Louisiana; coordinates with the medical director to integrate the administration and management of BH and physical health services • This position reports to the CMO, who reports to the CEO.
David Nicosia, MBA	Chief Financial Officer (CFO)	• Manages the day-to-day financial staff to meet the performance requirements of our current contract; responsible for financial results and reporting and serves as the primary point of contact for all health plan financial issues • This position reports to the CEO.
[redacted]	[redacted]	• Works with health plan leadership and multidisciplinary clinical and operational teams to develop strategies for innovative and quality-focused pharmacy (medical) services; collaborates with medical management teams on plan performance measures; leads pharmacy quality and performance improvement programs in accordance with State Medicaid contract, federal requirements, and plan accreditation standards; assists with policy reviews; acts as a liaison to the State of Louisiana Department of Health Pharmacy team to ensure Aetna meets contractual requirements; and guides the implementation of laws and amendments pertaining to pharmacy • This position reports to the CMO, which reports to the CEO.
[redacted]	[redacted]	• Maintains a highly effective plan compliance program including all policy tracking processes while chairing both the Plan Compliance Committee and the Policy and Procedure Committee; facilitates the External Quality Reviews and serves as a critical resource to all operational areas • This position reports to the CEO.

Medical Management **FTEs: 227**	• **Role**: responsible for prior authorization, care management (integrated physical and behavioral health services), population health, community health workers, health equity, disease management, and CSoC (children's system of care) BH services; develops and implements programs to improve enrollee health through strategies that include enrollee risk stratification and assembling enrollee cohorts using predictive modeling • **Major qualifications**: experience with health care delivery systems/managed care, medical management operations, and utilization review and management practices, processes, and procedures, cultural sensitivity	• **Operating activities**: ensures the quality of relevant care while promoting appropriate use of medical services and plan resources; maintains utilization decisions affecting the enrollee health care in a fair, impartial, consistent manner; includes oversight and day-to-day contact with care management, utilization management, and behavioral health • **Reporting structure**: the CMO leads medical management and reports to administration • **Communication with leadership**: medical management leaders meet daily/weekly with CEO/other leadership and presents monthly updates to the Quality Management/Utilization Management Committee (QM/UM); also holds weekly meetings with all direct reports and other key functional staff • **Team lead description:** experience leading/applying all aspects of the medical interpretation of clinical policies and procedures, administering BH services and physical health services
Quality	• **Role**: monitors our health care delivery system and	• **Operating activities**: oversees the evaluation of all services provided and the results achieved as

Key Team/FTEs	Role and Qualifications	Operating Activities, Reporting Structure, Communication, Team Lead Description
FTEs: 30	verifies that we provide health care services that improve the health status/health outcomes of our enrollees; integrates interdepartmental monitoring processes and activities; focuses on improving the enrollee's biological, psychological, and social well-being, with an emphasis on quality of care and the non-clinical aspects of all services; incorporates continuous quality improvement concept; responsible for QAPI program • **Major qualifications:** experience with health plan delivery system/quality initiatives and process improvement; policy tracking processes; monitoring processes and activities	compared with accepted standards; and focuses on quality assurance and various attributes of health care, such as cost, place, accessibility, treatment, benefits, enrollee health, and social determinants • **Reporting structure**: reports to administration • **Communication with leadership**: quality leaders meet daily/weekly with CEO/other leadership and present monthly updates to the QM/UM Committee; holds weekly meetings with all direct reports and other key functional staff on issues/resolutions/innovations • **Team lead description:** experience integrating interdepartmental monitoring processes and activities focusing on enrollees' BH/physical well-being through quality and continuous improvement goals
Compliance **FTEs: 2**	• **Role**: responsible for overall compliance with the contract; reaches across the organization to encourage high business standards to advance enrollee, State/LDH, plan objectives and to benefit all customers, and to safeguard Aetna's reputation • **Major qualifications**: experience with health plan compliance program; policy tracking processes; knowledge of operational areas, proactively addressing and coordinating with government agencies	• **Operating activities**: establishes policies, processes, and procedures to maintain compliance excellence; maintains strategies that support proactive monitoring and tracking systems designed to prevent, detect, and correct conduct that violates the low or Aetna's value system; focuses include staffing and governance, effective training and education, risk identification and monitoring, and procedures for prompt reporting • **Reporting structure**: reports to the contract compliance officer who reports to administration • **Communication with leadership**: compliance leaders meet daily/weekly with CEO/other leadership and presents monthly updates to the Compliance Committee • **Team lead description**: experience supporting operations/cross-functional teams; monitors budgets/performance metrics; and focuses on compliance related to claims management, provider services, grievance and appeals, Special Investigations Unit, and long-term care
Pharmacy **FTEs: 2**	• **Role**: works with clinical and operational teams to develop strategies for innovative and quality focused pharmacy (medical) services while collaborating with medical management teams on plan performance measures; leads pharmacy quality and performance improvement programs in accordance with State Medicaid contract, federal requirements, and plan accreditation standards; acts as a liaison to LDH of Louisiana Department of Health Pharmacy team to ensure Aetna meets contractual requirements • **Major qualifications**: health care pharmacy utilization, formularies/prior authorization requirements, compliance with State and federal utilization, quality, and risk management regulations	• **Operating activities**: partners with LDH team to ensure Aetna meets contractual requirements and laws and amendments pertaining to pharmacy; develops/maintains internal drug utilization review (DUR) compliance; analyzes/validates reports; directs prescription benefit drug coverage consistent with State requirements; reviews/manages drug utilization practices and trends, and works on interdisciplinary teams to ensure clinically appropriate and fiscally responsible pharmacy services are delivered to improve enrollee health • **Reporting structure**: reports to medical management, which reports to the CMO, which reports to administration • **Communication with leadership**: pharmacy lead meets daily/weekly with CEO/other leadership; holds weekly meetings with all direct reports and other key functional staff on issues/pharmacy initiatives • **Major qualifications**: experience in health care system pharmacy utilization, formularies/prior authorization requirements, compliance with State and federal utilization, quality, and risk management regulations • **Team lead description:** directs prescription benefit drug coverage consistent with State requirements, reviews/monitors the plan's pharmacy goals, maintains internal processes for compliance and LDH DUR program

Key Team/FTEs	Role and Qualifications	Operating Activities, Reporting Structure, Communication, Team Lead Description
Program Integrity FTEs: 9	• **Role:** manages targeted collection and analysis of utilization data to identify potential fraud, waste, abuse (FWA) including enrollee/provider data management, service authorization, and claims administration to improve our program resources (including the home- and community-based services waiver) • **Major qualifications:** health care fraud detection, prevention, and investigation; leadership role, direct experience working in a relevant federal agency, knowledge of both criminal and civic laws related to the prosecution of suspected health care fraud	• **Operating activities**: accountable for ensuring the integrity of all payments made for health care enrollee services; focuses on fiscal responsibility to LDH to help ensure the thoughtful use of financial and other resources, through a coordinated process of education, reviews, audits, and appropriate corrective action plans • **Reporting structure**: reports to the program integrity officer who reports to administration • **Communication with leadership**: program integrity leaders meet daily/weekly with CEO/other leadership; holds weekly meetings with all direct reports and other key functional staff on issues/resolutions/innovations • **Team lead description:** experience monitoring potential fraud and abuse through data mining for enrollees, providers, and subcontractors; leading fraud investigators
Finance FTEs: 7	• **Role**: responsible for accounting systems and finance operations including financial reporting and audit activities; manages budgeting and forecasting cycles and general ledger accounting system, verifying that we meet all financial performance goals and reporting requirements • **Major qualifications**: financial management including strategic/business planning, accounting, and financial analysis, extensive experience in health care, managed care insurance, or financial services, competitor knowledge	• **Operating activities**: oversees operational, financial, and budgetary goals, the budget, and general ledger accounting system, and annual external audit of financial statements; confirms all contractual financial performance and reporting requirements and submits timely encounters; manages decision-making affecting financial reporting/accounting policy, on a Generally Accepted Accounting Principles (GAAP) and statutory basis; evaluates the accounting and reporting aspects (GAAP and statutory) of key business strategies; and collaborates with the corporate controller to execute short- and long-range strategic plans • **Reporting structure**: reports to the CFO, who reports to administration • **Communication with leadership**: finance leaders meet daily/weekly with CEO • **Team lead description:** experience preparing corporate/departmental financial statements/budgets/analyses and value-based contracting analyses
Business Continuity FTE: 1	• **Role**: manages plans for how we will continue serving our enrollees during natural disasters or other wide-spread service interruptions; emergency planning includes anticipating and thinking through our response to possible challenges; coordinates the health care continuity disaster response needs, recovery, and business functions in the event a disaster, power outage, or other scenario causing a significant disruption in service delivery or business operations • **Major qualifications:** prior role in managed health care facilities/emergency management; developing/implementing security awareness training programs, knowledge of business processes, systems development methodologies	• **Operating activities**: maintains the emergency management plan as part of business contingency plans, and validation methodology, providing recovery from unforeseen disruption to facilities, technology systems, or applications; maintains infrastructure/business processes for enrollee emergency contact/special health care data comprisable in an emergency; maintains plan for data backup and restoration, offsite storage of vital business/customer data (e.g., enrollee medical records), systems recovery through remote backup site, continuity of telephone operations, plan rehearsal, and testing results • **Reporting structure**: reports to administration • **Communication with leadership**: business continuity leaders meet daily/weekly with CEO/other leadership; holds weekly meetings with all direct reports and other key functional staff on issues/resolutions/innovations • **Team lead description:** experience coordinating continuity disaster response plans and implementing the various responses needed including natural disasters, power outages, and other service disruptions for enrollees and protecting their health care information

2.10.2.3 Material Subcontractors

Louisiana | Transforming Health Care | **Aetna**

2.10.2.3 Material Subcontractors

Aetna has a proven record of improving outcomes for our Louisiana enrollees by providing appropriate, coordinated care and services in a financially responsible manner. Aetna's commitment to providing the best and most comprehensive integrated care for enrollees sometimes involves delegating certain services or functions to other organizations that are expert specialists in their disciplines. In this event, we enter into a formal agreement assigning material subcontractors the authority to perform specialized functions or services on Aetna's behalf.

Material Subcontractors

Aetna undertakes subcontracts only when it adds value for our enrollees. We use well-qualified, experienced subcontractors to provide services in support of our Healthy Louisiana program—subcontractors with unique expertise and proven records of accomplishment relative to improving outcomes for our enrollees by providing appropriate, coordinated care and services in a financially responsible manner. Where we utilize a material subcontractor to provide services related to the delivery or payment of managed care organization covered services or a value-added benefit such as dental service, we provide a completed **Material Subcontractor Response Template**, including an executed or draft **Material Subcontractor Agreement**, in **Appendix F**.

All of our proposed material subcontractors have an established relationship with Aetna and currently demonstrate sustained quality performance serving Healthy Louisiana enrollees.

CaremarkPCS Health, L.L.C. (CaremarkPCS), an affiliated subcontractor, performs pharmacy benefit management (PBM) services which may include, but are not limited to, pharmacy claims adjudication with sophisticated and technologically advanced real-time systems; retail, mail order, and specialty pharmacy network management with robust audit and fraud investigation capabilities; and real-time and retrospective safety monitoring programs that identify members at risk for adverse outcomes. CaremarkPCS has provided PBM services since 1969 and has served Medicaid enrollees since 1988. Currently, CaremarkPCS works with 33 Medicaid health plans across the country representing over 21 million covered lives. CaremarkPCS' pharmacy help desk is available 24 hours a day, 7 days a week to assist our pharmacies in supporting our enrollees so they can obtain the medications they need for better health.

DentaQuest USA Insurance Company, Inc. (DentaQuest) administers Aetna's value-added adult dental services benefit because we know that good oral health can lead to improving enrollee health. Dental benefit administration is not one of Aetna's core competencies, so we leverage DentaQuest's expertise in this area to provide the best possible service to our enrollees. Because DentaQuest performs statewide fee-for-service children's dental services, subcontracting with them to administer the value-added adult dental services benefit helps to reduce complexity and administrative burden for providers and enrollees by offering a seamless transition from child to adult dental care.

LogistiCare Solutions, LLC provides non-emergency medical transportation services.

Superior Vision Benefit Management, Inc. performs comprehensive vision benefit management, including provider network, claims, and enrollee services. These activities will include provider contracting, credentialing, and relations; claims processing and payment; enrollee services support; continuous quality improvement program activities; and program reporting.

Subcontractor Oversight Activities

Prior to contracting with a material subcontractor, Aetna evaluates the prospective material subcontractor's ability to perform the activities to be subcontracted. We perform a pre-delegation review

audit to determine staff qualifications, clinical and administrative capabilities, integration capabilities, data transfer capabilities, operational readiness, and alignment with the Healthy Louisiana scope of work. Our quality management program includes formal, multilayered processes and comprehensive policies and procedures to monitor contract compliance, quality of care, services, and reporting provided under any subcontract. All aspects of the contract are evaluated through our Compliance Committee to ensure compliance with contractual requirements.

Aetna performs ongoing monitoring of subcontractor performance. We meet with material subcontractors on a periodic basis, depending on the subcontractor, and perform a comprehensive review annually in which we measure performance efforts that address past concerns identified by LDH. If any deficiencies or areas for improvement are identified, we require the material subcontractor to take corrective action. Aetna provides LDH with a copy of the annual review and any corrective action plans developed as a result.

National Oversight

At the national level, we have a centralized team of delegation oversight experts that manage the oversight process across the Aetna Medicaid organization lines of business to make certain that all of our delegated agreements are represented and that all requirements, such as State- and contract-required elements for each plan and delegate, are accounted for. This team includes members from our national Delegation Management, Quality Management, and Finance departments. The appropriate national Medical Management, Credentialing, Grievance and Appeals, and other teams conduct audits as directed by the Medicaid-specific Quality Management department. The audit team reports audit findings to Aetna's National Vendor Delegation Oversight Committee (DOC), National Medicaid DOC, and the local health plan DOC to identify opportunities for improvement and solutions that are disseminated across our health plans.

Local Oversight

The chief executive officer, chief medical officer, compliance officer, chief operations officer, director of clinical health services, director of quality management, and selected leadership staff from our Enrollee Services, Provider Services, Network Management, and Grievance and Appeals departments comprise the local-level DOC. These local, executive-level plan leaders and key leaders from functional areas meet with subcontractors on a periodic basis, depending upon the type of subcontractor, to monitor service delivery, troubleshoot problems, review and resolve member complaints, and most importantly, identify opportunities to collaborate on new or enhanced services for members. The DOC approves all delegates and delegation reports and monitors subcontractor performance at the plan level. Executive-level leaders monitor and report to Compliance the success of corrective action plans and handle escalated issues when the corrective actions are not producing satisfactory results.

In accordance with Aetna's culture of compliance, all team members understand they play a role in subcontractor oversight. Team members from Network Management, Provider Services, Operations, and Quality are trained to report subcontractor-related concerns to management. For example, our service coordinators are the front line in identifying potential problems or issues related to vendors and subcontractors. If an interaction with an enrollee related to subcontractor performance raises a red flag or suggests there is a problem, the service coordinator will escalate the issue to management. Issues can often be resolved without further escalation once they are referred to the appropriate department for remediation.

Financial Oversight

Aetna maintains financial oversight by assessing each material subcontractor's financial condition to determine its ability to maintain financial solvency. As part of our financial due diligence, we perform a financial review of all delegated entities at least annually to provide oversight of the contractor's

continuing compliance with and ability to meet Aetna standards. Our Finance team reviews audited and unaudited financial statements such as the subcontractor's balance sheet, income statement, statements of cash flow, and interim reports. The Finance team will provide an assessment of the results of operation, liquidity of current assets, and sufficiency of cash to pay claims payable and financial reserves. This detailed review assists us in determining the risk exposure to Aetna and provides a basis for calculating a letter of credit or insolvency reserve, if needed. The Finance team will make recommendations regarding increasing the frequency of additional reviews. Finally, the financial report is distributed to the various oversight committees.

Poor audit results, increases in enrollee complaints, indications that downstream providers are not being paid, news reports about a subcontractor's financial instability, or alerts from LDH can trigger heightened financial monitoring and oversight activities. We will implement a corrective action plan (CAP) to help the subcontractor become compliant. We will require improvement and resolution on a short timeline—typically 30 or 60 days. The DOC, Compliance department, and Joint Operating Committee will review financial results. If the CAP is not successful and the subcontractor's financial stability remains poor, or if we continue to receive complaints, we may terminate the contract based upon contractual provisions.

Appendix F: Material Subcontractor Response Template

Proposer (MCO) name:
Aetna Better Health, Inc. d/b/a Aetna Better Health of Louisiana (Aetna Better Health of Louisiana)
Material subcontractor name:
CaremarkPCS Health, L.L.C. (CaremarkPCS)
Description of the Proposer's role and material subcontractor's role:
Aetna Better Health of Louisiana will contract directly with the Louisiana Department of Health to deliver the services as outlined in RFP #3000011953. CaremarkPCS, an affiliated subcontractor, performs pharmacy benefit management services which may include but are not limited to pharmacy claims adjudication with sophisticated and technologically advanced real-time systems; retail, mail order and specialty pharmacy network management with robust audit and fraud investigation capabilities; and, real time and retrospective safety monitoring programs that identify members at risk for adverse outcomes.
Explanation of why the Proposer plans to subcontract this service and/or function:
Our commitment to providing the best and most comprehensive integrated care for enrollees sometimes involves delegating certain services or functions to other organizations who are expert specialists in their disciplines. In this event, material subcontractors enter into a formal agreement giving them the authority to perform specialized functions or services on our behalf. Aetna Better Health of Louisiana utilizes the services of CaremarkPCS because it is a trusted provider of PBM services, having served as the Aetna Medicaid organization's pharmacy material subcontractor since 2010. CVS Health Corporation (CVS Health), Aetna Better Health of Louisiana's ultimate parent, is Utilization Review Accreditation Commission-accredited in PBM, drug therapy management, mail service pharmacy, specialty pharmacy, and health call center; and National Committee for Quality Assurance-accredited in utilization management, case management, and disease management.

A description of the material subcontractor's organizational experience:

CaremarkPCS has provided PBM services since 1969 and has served Medicaid enrollees since 1988. Currently, CaremarkPCS works with 33 Medicaid health plans across the country representing over 21 million covered lives; CaremarkPCS's pharmacy help desk is available 24 hours a day, 7 days a week to assist their pharmacies in supporting enrollees so they can obtain the medications they need for better health.

CaremarkPCS: The PBM and mail service pharmacy segment of CVS Health provides a full range of PBM services. Pharmaceutical Card System (PCS), a predecessor of Caremark, was founded in 1969 in Scottsdale, Arizona, effectively launching the pharmacy benefit management industry.

CVS Specialty: The specialty pharmacy business of CVS Health (part of the PBM segment) includes our specialty pharmacy services for patients who require treatment for rare or complex conditions. CVS Health pioneered hemophilia home care and began supplying specialty medications in 1978, via predecessor Baxter Health Care Corporation.

MinuteClinic: The retail medical clinic business of CVS Health (part of the retail segment) is the leading retail medical clinic provider in the United States. The first QuickMedx centers (the predecessor to MinuteClinic) opened in the Minneapolis-St. Paul area in May 2000 as a more affordable alternative to emergency rooms and urgent care centers.

The processes the Proposer will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment:

Ongoing PBM oversight and collaboration between Aetna Better Health of Louisiana's pharmacy director, Aetna Medicaid Pharmacy Management, CVS Health Corporation, and the Department ensures that PBM services are administered by CaremarkPCS in the best interest of Healthy Louisiana enrollees; and in the amount, duration, and scope of benefits as defined in the contract and all applicable NCQA, URAC and other State and federal law regulatory requirements and standards. Additionally, Aetna Better Health of Louisiana draws on the experiences of affiliate plans regarding oversight of CaremarkPCS, and we can adjust our monitoring approach to address any performance problems identified in other states that may be applicable to Louisiana.

Prior to the effective date of new programs, the pharmacy director will confirm that all delegated pharmacy services are prepared for implementation in compliance with contractual and regulatory requirements. The pharmacy director and the chief medical officer (CMO), in collaboration with the National Medicaid Pharmacy Management department, will monitor the pharmacy services performed by CaremarkPCS through weekly operational meetings to review performance metrics including, but not limited to the following: paid and non-paid claims processing; DUR edits and program activities; encounter submission acceptance rates; pharmacy network performance and GeoAccess® reports; and pharmacy help desk activities.

As part of Aetna's Quality Management Committee structure, we will continue utilizing the Aetna Better Health of Louisiana Delegation Oversight Committee (DOC) chaired by the CMO. DOC members include the pharmacy director, compliance officer, and representation from all areas of the health plan including Operations, Medical Management, Care Management, and Quality Management. The DOC will meet on a quarterly basis to assess and evaluate key performance metrics, including, but not

limited to the following: cost performance and trends, prospective and retrospective drug utilization review (DUR) programs and impacts; specialty drug utilization and strategies; pharmacy network and pharmacy help desk service levels; and clinical pharmacy programs outcomes. When appropriate, CaremarkPCS representatives such as the strategic account executive, strategic account director, clinical advisor, specialty account executive, or analytic consultant will attend DOC meetings to discuss key initiatives that support innovation and a culture of continuous quality improvement in Louisiana.

Other processes Aetna Better Health of Louisiana will implement to monitor and evaluate the performance of CaremarkPCS to ensure that all contract requirements are met and to determine the return on investment include:

• **Third-Party Audits**: CaremarkPCS will undergo an annual third-party audit (the SAS-70) to evaluate controls relevant to the processing of claim and drug rebate transactions and to confirm that these controls are in place and operating effectively. The audit testing includes aspects of the information security, physical security, access to data files and programs, and development of and modification to information systems. Additionally, under the direction of the Aetna Medicaid Pharmacy Management department, a third-party vendor is contracted to complete an annual audit on functions delegated to CaremarkPCS that will evaluate the operational effectiveness of controls relevant to benefit and formulary setup, claims processing, and network pricing. The resulting annual reports for these audits will be provided to the Aetna National Medicaid Pharmacy Director, Aetna Better Health of Louisiana Pharmacy Director, and our Medical Director/CMO for review and next steps, which may include, but are not limited to, presentation at the DOC.

• **Encounter Submissions Edits:** Aetna Better Health of Louisiana's Encounter Management System will use edits and checkpoints to validate CaremarkPCS' pharmacy encounters for accuracy, completeness, and member eligibility. Encounters identified with errors will be returned to CaremarkPCS for correction. Aetna Medicaid Pharmacy Management, on behalf of Aetna Better Health of Louisiana, will submit encounters that pass our edits and controls to the State, as required by the contract. In 2018, the acceptance rate was 98.81 percent.

• **Reporting:** Aetna Better Health of Louisiana will require CaremarkPCS to meet all reporting requirements for its functional responsibilities listed in the contract, within the timeframes specified.

- **Quarterly Reports:** A set of important reports used in managing pharmacy services and providing PBM oversight is CaremarkPCS' comprehensive quarterly Rx Insights Costs and Trends Detail Report found within the Delegated Oversight quarterly report package. Information and metrics found within the quarterly report package include, but are not limited, to the following: claims statistics; key drug utilization and cost trends; top drugs and therapy classes; pharmacy audit statistics; point-of-service edits; and encounter statistics.
- **Daily, Weekly, and Monthly Reports:** Reports include CaremarkPCS performance reports for claims/encounter timeliness, completeness, and accuracy; reports on Pharmacy Help Desk activities; and other reports pertaining to performance such as complaint statistics, fraud reports, claims dashboard, and encounter aging.

If issues of non-compliance or emerging risks are identified, Aetna Better Health of Louisiana will take immediate action to correct the problem. Determined by the nature of the problem, remediation may include training, more frequent monitoring, corrective action plans, sanctions, notices to cure, or subcontractor termination. The pharmacy director will monitor corrective action plans and report

progress on them to the DOC and the Quality Management Oversight Committee for tracking to completion.

Our return on investment is not measured in terms of a mathematical calculation that yields a percent return, but rather in terms of our enrollees' access to the medical services and care they need to live healthier, more independent lives. The services that CaremarkPCS provides will allow Aetna Better Health of Louisiana to administer pharmacy services on a scale that we would not be able to achieve otherwise. Our robust quality management program helps to ensure that our Healthy Louisiana enrollees are receiving the highest quality care and services as they seek to achieve their health goals. This in turn enables Aetna Better Health of Louisiana to support the State in its objective to build a Medicaid managed care delivery system that improves the health of populations, enhances the experience of care for individuals, and effectively manages Medicaid per capita care costs.

Instructions: The Proposer should attach the executed or draft contract and indicate compliance with each of the following checklist items by completing the "Location" column.

	Checklist Item	Location (Include Name of Document, Page Number, and Section Number/Letter)
1	Contain language that the subcontractor shall adhere to all requirements set forth for MCO subcontractors in the contract between LDH and the MCO and the MCO Manual, and either physically incorporate these documents as appendices to the subcontract or include language in the subcontract that the MCO shall furnish these documents to the subcontractor upon request.	RCA-EXHIBIT A Page 14 of 17 § 6.3
2	Include a signature page that contains an MCO and subcontractor name with titles that are typed or legibly written, subcontractor company name, and dated signature of all appropriate parties (applicable for executed contracts).	AMENDMENT TO PHARMACY BENEFIT MANAGEMENT SUBCONTRACT AGREEMENT (Louisiana Medicaid) Page 1
3	Specify the effective dates of the subcontract agreement.	AMENDMENT TO PHARMACY BENEFIT MANAGEMENT SUBCONTRACT AGREEMENT (Louisiana Medicaid) Page 1
4	Specify that the subcontract and its appendices contain all the terms and conditions agreed upon by the both parties.	RCA-EXHIBIT A Page 14 of 17 §6.6
5	Require that no modification or change of any provision of the subcontract shall be made unless such modification is incorporated and attached as a written amendment to the subcontract and signed by the parties.	RCA-EXHIBIT A Page 14 of 17 §6.4
6	Specify procedures and criteria for any alterations, variations, modifications, waivers, extensions of the subcontract termination date, or early termination of the subcontract and that such change shall only be valid when reduced to writing, duly signed and attached to the original of the subcontract.	RCA-EXHIBIT A Page 14 of 17 §6.4
7	Specify that the MCO and subcontractor recognize that in the event of termination of the contract between the MCO and LDH for any of the reasons described in the contract, the MCO shall immediately make available to LDH or its designated representative, in a usable form, any and all records, whether medical or financial, related to the MCO's and subcontractor's activities undertaken pursuant to the subcontract agreement. The provision of such records shall be at no expense to LDH.	RCA-EXHIBIT A Page 12 of 17 §4.15
8	Ensure the subcontractor shall not, without prior approval of the MCO, enter into any subcontract or other agreement for any of the work contemplated under the subcontract without approval of the MCO.	RCA-EXHIBIT A Page 16 of 17 §7.1
9	Require that if any requirement in the subcontract is determined by LDH to conflict with the contract between LDH and the MCO, such requirement shall be null and void and all other provisions shall remain in full force and effect.	RCA-EXHIBIT A Page 1 of 17 PARAGRAPH 3
10	Identify the population covered by the subcontract.	RCA-EXHIBIT A Page 3 of 17

		DEFINITION OF MEMBER
11	Specify that the services provided under the subcontract must be in accordance with the Louisiana Medicaid State Plan and require that the subcontractor provide these services to enrollees through the last day that the subcontract is in effect.	RCA-EXHIBIT A Page 14 of 17 §6.3
12	Require that the subcontractor be currently licensed and/or certified under applicable state and federal statutes and regulations and shall maintain throughout the term of the subcontract all necessary licenses, certifications, registrations and permits as are required to provide the health care services and/or other related activities delegated by the MCO.	RCA-EXHIBIT A Page 3 of 17 §2.1
13	Specify the amount, duration, and scope of benefits and services that are provided by the subcontractor.	RCA-EXHIBIT A Page 4 of 17 § 2.3
14	Provide that emergency services be coordinated without the requirement of prior authorization of any kind.	RCA-EXHIBIT A Page 1 DEF EMERGENCY SERVICES Page 5 of 17 § 2.8
15	Require that if the subcontractor performs laboratory services, the subcontractor must meet all applicable state requirements and 42 C.F.R. §493.1 and 493.3, and any other federal requirements.	RCA-EXHIBIT A Page 5 of 17 §2.9
16	Require that an adequate record system be maintained for recording services, charges, dates and all other commonly required information elements for services rendered to MCO enrollees pursuant to the subcontract (including but not limited to such records as are necessary for the evaluation of the quality, appropriateness, and timeliness of services performed under the contract between LDH and the MCO). MCO enrollees and their representatives shall be given access to and can request copies of the enrollees' medical records, to the extent and in the manner provided by La. R.S. 40:1165.1 and 45 C.F.R. §164.524 as amended and subject to reasonable charges.	RCA-EXHIBIT A Page 10 of 17 § 4.6
17	Include record retention requirements as specified in the contract between LDH and the MCO.	RCA-EXHIBIT A Page 10 of 17 §4.9

18	Shall make all program and financial records and service delivery sites open to CMS, the U.S. Office of the Inspector General (OIG), HHS, the State Auditor's Office, the Office of the Attorney General, Government Accountability Office (GAO), LDH, and/or any of their designees upon request, and shall provide them with timely and reasonable access and the right to examine and make copies, excerpts, or transcripts of all books, documents, papers, and records which are directly pertinent to a specific program for the purpose of making audits and examinations, contact and conduct private interviews with the subcontractor's clients, employees, and contractors, and do on-site reviews of all matters relating to service delivery as specified by the Contract. The rights of access in this provision are not limited to the required retention period, but shall last as long as records are retained. The subcontractor shall provide originals and/or copies (at no charge) of all records and information requested. Requests for information shall be compiled in the form and the language requested.	RCA-EXHIBIT A Page 11 of 17 §4.10
19	INTENTIONALLY LEFT BLANK	
20	Whether announced or unannounced, provide for the participation and cooperation in any internal and external quality assessment review, utilization management, and grievance procedures established by the MCO and/or LDH or its designee.	RCA-EXHIBIT A Page 11 of 17 §4.11
21	Specify that the subcontractor shall monitor and report the quality of services delivered under the subcontract and initiate a plan of correction where necessary to improve quality of care, in accordance with that level of care which is recognized as acceptable professional practice in the respective community in which the MCO /subcontractor practices and/or the standards established by LDH or its designee.	RCA-EXHIBIT A Page 11 of 17 §4.11
22	Require that the subcontractor comply with any corrective action plan initiated by the MCO and/or required by LDH.	RCA-EXHIBIT A Page 11 of 17 §4.11
23	Specify any monetary penalties, sanctions or reductions in payment that the MCO may assess on the subcontractor for specific failures to comply with subcontract and/or credentialing requirements. This shall include, but may not be limited to a subcontractor's failure or refusal to respond to the MCO's request for information, the request to provide medical records, credentialing information, etc.; at the MCO's discretion or a directive by LDH, the MCO shall impose at a minimum, financial consequences against the subcontractor as appropriate.	RCA-EXHIBIT A Page 12 of 17 §4.16
24	Provide for submission of all reports and clinical information to the MCO for reporting purposes required by LDH.	RCA-EXHIBIT A Page 11 of 17 §4.12
25	Require safeguarding of information about MCO enrollees according to applicable state and federal laws and regulations and as described in contract between LDH and the MCO.	RCA-EXHIBIT A Page 11 of 17 §4.13
26	Make full disclosure of the method and amount of compensation or other consideration to be received from the MCO.	AMENDMENT TO PHARMACY BENEFIT MANAGEMENT SUBCONTRACT AGREEMENT (Louisiana Medicaid)

		Louisiana Operating Term Addendum To Schedule P Page 6-15
27	Provide that the subcontractor comply with LDH's claims processing requirements as outlined in the RFP.	RCA-EXHIBIT A Page 7 of 17 § 3.3
28	Provide that the subcontractor adhere to LDH's timely filing guidelines as outlined in the RFP.	RCA-EXHIBIT A Page 7 of 17 §3.3
29	Provide that, if LDH or its subcontractors discover an error or a conflict with a previously adjudicated encounter claim, the subcontractor shall be required to adjust or void the encounter claim within fourteen (14) calendar days of notification by LDH or the MCO, or if circumstances exist that prevent the subcontractor from meeting this time frame, by a specified date approved by LDH.	RCA-EXHIBIT A Page 8 of 17 §3.7
30	Specify that the subcontractor shall accept the final payment made by the MCO as payment-in-full for covered services provided and shall not solicit or accept any surety or guarantee of payment from LDH or the member(s). Member shall include the patient, parent(s), guardian, spouse or any other legally or potentially legally, responsible person of the member being served.	RCA-EXHIBIT A Page 8 of 17 §3.6
31	Specify that at all times during the term of the subcontract, the subcontractor shall indemnify and hold LDH harmless from all claims, losses, or suits relating to activities undertaken pursuant to the contract between LDH and the MCO, unless the subcontractor is a state agency. For subcontractors that are not state agencies, the indemnification may be accomplished by incorporating such language from the contract between LDH and the MCO in its entirety in the subcontractor's agreement or by use of other language developed by the MCO and approved by LDH. For state agencies, the liability protection may be accomplished by incorporating language developed by the state agency and approved by LDH.	RCA-EXHIBIT A Page 14 of 17 § 6.8
32	Require the subcontractor to secure all necessary liability, malpractice, and workers' compensation insurance coverage as is necessary to adequately protect the MCO's enrollees and the MCO under the subcontract. The subcontractor shall provide such insurance coverage upon execution and at all times during the subcontract and shall furnish the MCO with written verification of the existence of such coverage.	RCA-EXHIBIT A Page 3 & 6 of 17 §2.1 & 2.13
33	Specify that the subcontractor agrees to recognize and abide by all state and federal laws, rules and regulations and guidelines applicable to the provision of services, and stipulate that Louisiana law, without regard to its conflict of laws provisions, will prevail if there is a conflict between the state law where the material subcontractor is based and Louisiana law.	RCA-EXHIBIT A Page 9 of 17 §4.1
34	Provide that the agreement incorporates by reference all applicable federal and state laws, rules or regulations, and revisions of such laws, rules, or regulations shall automatically be incorporated into the subcontract as they become effective.	RCA-EXHIBIT A Page 14 of 17 §6.4

35	Provide that the MCO and subcontractor shall be responsible for resolving any disputes that may arise between the two (2) parties, and that no dispute shall disrupt or interfere with the provisions of services to the MCO member.	RCA-EXHIBIT A Page 14 of 17 § 6.1
36	Include a conflict of interest clause as stated in the contract between LDH and the MCO.	RCA-EXHIBIT A Page 15 of 17 §6.9
37	Specify that the subcontractor must adhere to the Quality Assessment Performance Improvement (QAPI) and Utilization Management (UM) requirements as outlined the contract between LDH and the MCO. The QAPI and UM requirements shall be included as part of the subcontract between the MCO and the subcontractor.	RCA-EXHIBIT A Page 9 of 17 § 4.2
38	Provide that all subcontractors shall give MCO immediate notification in writing by certified mail of any litigation, investigation, complaint, claim or transaction that may reasonably be considered to have a material impact on the subcontractor's ability to perform the services included in its contract with the MCO.	RCA-EXHIBIT A Page 12 of 17 §4.14
39	Provide that in accordance with Title VI of the Civil Rights Act of 1964 (42 U.S.C. §2000d et. seq.) and its implementing regulation at 45 C.F.R. Part 80 (2001, as amended), the subcontractor must take adequate steps to ensure that persons with limited English skills receive free of charge the language assistance necessary to afford them meaningful and equal access to the benefits and services provided under the subcontract.	RCA-EXHIBIT A Page 12 of 17 § 4.17
40	Contain no provision which restricts a subcontractor from subcontracting with another MCO or other managed care entity.	RCA-EXHIBIT A Page 15 of 17 §6.11
41	Require that, when the MCO has entered into an alternative reimbursement arrangement with subcontractor, all encounter data must comply with the same standards of completeness and accuracy as required for proper adjudication of claims by the MCO.	RCA-EXHIBIT A Page 12 of 17 §4.19
42	Require that the services to be provided under this subcontract shall be performed entirely within the boundaries of the United States, which includes the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa. In addition, the subcontractor will not hire any individual to perform any services under this Contract if that individual is required to have a work visa approved by the U.S. Department of Homeland Security and such individual has not met this requirement.	RCA-EXHIBIT A Page 4 of 17 § 2.4

43	Contain the following language: The subcontractor and the subcontractor's providers assign to the State of Louisiana any and all rights or claims it currently has or may acquire under any state or federal antitrust laws and that are attributable to any product units purchased or reimbursed through any state program or payment mechanism, including but not limited to product units purchased or reimbursed under the Louisiana Medicaid managed care program. For purposes of this assignment clause, the "subcontractor" shall include any direct or indirect owner to whom the right or claim to be assigned actually belongs, including any and all parents, branches, departments or subsidiaries.	RCA-EXHIBIT A Page 15 of 17 § 6.12
44	Contain the following language: The subcontractor and the subcontractor's providers shall comply, within a reasonable time, with any information, records or data request from any healthcare oversight agency, including the Louisiana Office of the Attorney General, Medicaid Fraud Control Unit (MFCU), related to any services provided under Louisiana's Medical Assistance Programs. This requirement shall be inclusive of contracts or subcontracts with entities who manage or coordinate certain benefits for Medicaid beneficiaries on behalf of the MCO's but does not directly provide the service to Medicaid beneficiaries. When requested by the MFCU the production of the information, records or data requested by the MFCU shall be done at no cost to the MFCU, and the contractor, subcontractor or provider shall not require the MFCU to enter into any contract, agreement or memorandum of understanding to obtain the requested information, records or data. The MCO contractor, subcontractor and/or provider agrees that this contract creates for the healthcare oversight agency an enforceable right for which the healthcare oversight agency can petition the court in the event of non- compliance with an information, records or data request. Appendix F: Material Subcontractor Response Template

Proposer (MCO) name:
Aetna Better Health, Inc. d/b/a Aetna Better Health of Louisiana (Aetna Better Health of Louisiana)
Material subcontractor name:
DentaQuest USA Insurance Company, Inc.
Description of the Proposer's role and material subcontractor's role:
Aetna Better Health of Louisiana will contract directly with the Louisiana Department of Health to deliver the services as outlined in RFP #3000011953. DentaQuest's role is to administer our value-added adult dental services benefit, as well as the early and periodic screening, diagnostic, and treatment (EPSDT) dental benefit for children.
Explanation of why the Proposer plans to subcontract this service and/or function:
The Aetna Medicaid organization's commitment to providing the best and most comprehensive integrated care for enrollees sometimes involves delegating certain services or functions to other organizations who are expert specialists in their disciplines. In this event, material subcontractors enter into formal agreements giving them the authority to perform specialized functions or services on a health plan's behalf. We know that good oral health can lead to improving enrollee health. Aetna Better Health of Louisiana utilizes the services of DentaQuest because, as DentaQuest performs statewide fee-for-service children's dental services, subcontracting with them to administer the value-added adult dental services benefit helps to reduce complexity and administrative burden for providers and enrollees by offering a seamless transition from child to adult dental care.
A description of the material subcontractor's organizational experience:
Founded as a state-specific dental entity in 1966, DentaQuest since has expanded into the leading dental administrator in government programs with its focus on improving oral health through innovative solutions. DentaQuest is the largest administrator of government-sponsored dental and vision programs in the nation, with more than two decades of in-depth experience in the Medicaid/CHIP, Medicare Advantage, dual-eligible, and health exchange segments. As a dental benefits administrator, DentaQuest serves approximately 24 million members nationwide. Today, DentaQuest is the largest dental benefits administrator in the Medicaid space with more than 20 million members in Medicaid/CHIP programs in 30 states. DentaQuest USA Insurance Company, Inc. is a wholly-owned, indirect subsidiary of Dental Service of Massachusetts, Inc. (DSM), and a Massachusetts nonprofit dental service corporation. DSM is wholly-controlled by Catalyst Institute, Inc., a Massachusetts charitable corporation. DSM has insured and administered commercial dental benefits programs in Massachusetts since the 1960s. In 2001, DSM established a DentaQuest subsidiary through which it develops dental benefits businesses in other states. Today, the subsidiaries of DentaQuest Group, Inc. are engaged in the business of administering dental benefits programs for commercial group and individual markets, managed care organizations

that participate in government programs (Medicaid, CHIP and Medicare Advantage), and state agencies responsible for Medicaid and CHIP programs throughout the country. DentaQuest, LLC is the entity responsible for providing all administrative and managerial services to the DentaQuest enterprise.

The processes the Proposer will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment:

Although Aetna Better Health of Louisiana may delegate the authority to perform functions in support of the Healthy Louisiana program, we do not delegate accountability for the quality of care or services the contractor provides. Our Quality Assurance and Performance Improvement (QAPI) program has a comprehensive set of policies and procedures to manage the delegation of responsibility for any delegated program function. We understand all processes required for effective oversight of subcontractor performance, and we are successful at conducting these activities as part of our daily business. We have extensive experience with subcontractor oversight, with selecting subcontractors, and with ongoing monitoring of subcontractor performance. By leveraging this experience, we ensure the successful completion of all delegated functions under the Healthy Louisiana program.

The processes Aetna Better Health of Louisiana will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment include:

- Monitoring and evaluating delegated functions through semiannual reports
- Conducting pre-assessments prior to delegation, with annual desk audits or web conference reviews conducted with a random sampling of files thereafter
- Confirming that delegated functions/services are carried out consistently and in compliance with both Aetna's and other applicable accredited standards (i.e., NCQA and others as indicated) and the mutually agreed-upon delegation agreement
- Performing an annual file review audit, if applicable, to confirm compliance with Aetna and applicable standards
- Monitoring ongoing corrective actions to address identified deficiencies, promote progress, and take necessary action, if improvements do not occur
- Reviewing the delegated organization's program that oversees the delegated functions and its quality program to verify it is in alignment with Aetna's quality improvement processes
- Monitoring the subcontractor downstream provider agreements to ensure they comply with the regulatory requirements of the State contract

The Medical Management, Quality Management, Provider Services, and if applicable, Care Management, and Utilization Management departments are responsible for implementing the oversight process and maintaining monitoring activities, including monitoring the delegate's provisions to safeguard members' protected health information, as applicable.

Delegation oversight activities are formally monitored as a component of the QAPI program. Audit reports of delegated activities and CAPs, if applicable, are submitted to the appropriate oversight committee (e.g., QM/UM Committee, Delegation Subcommittee, National Vendor Delegate Oversight Committee) for review and approval and then to the Quality Management Oversight Committee. Should deficiencies be identified, we work with the delegated organization to set priorities and develop a corrective action plan (CAP). We retain the right to revoke the delegation agreement for

non-compliance or if CAPs are not sustained.

Our return on investment is not measured in terms of a mathematical calculation that yields a percent return, but rather in terms of our enrollees' access to the medical services and care they need to live healthier, more independent lives. Quality service to its members is at the root of DentaQuest's mission and history, which spans more than half a century. The services that DentaQuest provides will allow Aetna Better Health of Louisiana to administer dental services on a scale that we would not be able to achieve otherwise. Our robust quality management program helps to ensure that our Healthy Louisiana enrollees are receiving the highest quality care and services as they seek to achieve their health goals. This in turn enables Aetna Better Health of Louisiana to support the State in its objective to build a Medicaid managed care delivery system that improves the health of populations, enhances the experience of care for individuals, and effectively manages Medicaid per capita care costs.

Instructions: The Proposer should attach the executed or draft contract and indicate compliance with each of the following checklist items by completing the "Location" column.

	Checklist Item	Location (Include Name of Document, Page Number, and Section Number/Letter)
1	Contain language that the subcontractor shall adhere to all requirements set forth for MCO subcontractors in the contract between LDH and the MCO and the MCO Manual, and either physically incorporate these documents as appendices to the subcontract or include language in the subcontract that the MCO shall furnish these documents to the subcontractor upon request.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14 Section 6.3
2	Include a signature page that contains an MCO and subcontractor name with titles that are typed or legibly written, subcontractor company name, and dated signature of all appropriate parties (applicable for executed contracts).	Dentaquest LA Eff 020115 Executed Base Agreement Page 21
3	Specify the effective dates of the subcontract agreement.	Dentaquest LA Eff 020115 Executed Base Agreement Page 2, First paragraph
4	Specify that the subcontract and its appendices contain all the terms and conditions agreed upon by the both parties.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.6
5	Require that no modification or change of any provision of the subcontract shall be made unless such modification is incorporated and attached as a written amendment to the subcontract and signed by the parties.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.4
6	Specify procedures and criteria for any alterations, variations, modifications, waivers, extensions of the subcontract termination date, or early termination of the subcontract and that such change shall only be valid when reduced to writing, duly signed and attached to the original of the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.4
7	Specify that the MCO and subcontractor recognize that in the event of termination of the contract between the MCO and LDH for any of the reasons described in the contract, the MCO shall immediately make available to LDH or its designated representative, in a usable form, any and all records, whether medical or financial, related to the MCO's and subcontractor's activities undertaken pursuant to the subcontract agreement. The provision of such records shall be at no expense to LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.15
8	Ensure the subcontractor shall not, without prior approval of the MCO, enter into any subcontract or other agreement for any of the work contemplated under the subcontract without approval of the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 16, Section 7.1
9	Require that if any requirement in the subcontract is determined by LDH to conflict with the contract between LDH and the MCO, such requirement shall be null and void and all other provisions shall remain in full force and effect.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 1, Paragraph 3

		Page 15, Section 6.10
10	Identify the population covered by the subcontract.	Dentaquest LA Eff 020115 Executed Base Agreement Page 3, Section 1.11 Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 6, Section 2.17
11	Specify that the services provided under the subcontract must be in accordance with the Louisiana Medicaid State Plan and require that the subcontractor provide these services to enrollees through the last day that the subcontract is in effect.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.3
12	Require that the subcontractor be currently licensed and/or certified under applicable state and federal statutes and regulations and shall maintain throughout the term of the subcontract all necessary licenses, certifications, registrations and permits as are required to provide the health care services and/or other related activities delegated by the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 3-4, Section 2.1
13	Specify the amount, duration, and scope of benefits and services that are provided by the subcontractor.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.3
14	Provide that emergency services be coordinated without the requirement of prior authorization of any kind.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 5, Section 2.8
15	Require that if the subcontractor performs laboratory services, the subcontractor must meet all applicable state requirements and 42 C.F.R. §493.1 and 493.3, and any other federal requirements.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 5, Section 2.9
16	Require that an adequate record system be maintained for recording services, charges, dates and all other commonly required information elements for services rendered to MCO enrollees pursuant to the subcontract (including but not limited to such records as are necessary for the evaluation of the quality, appropriateness, and timeliness of services performed under the contract between LDH and the MCO). MCO enrollees and their representatives shall be given access to and can request copies of the enrollees' medical records, to the extent and in the manner provided by La. R.S. 40:1165.1 and 45 C.F.R. §164.524 as amended and subject to reasonable charges.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9-10, Section 4.6 Page 10-11, Section 4.9
17	Include record retention requirements as specified in the contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 10-11 Section 4.9

18	Shall make all program and financial records and service delivery sites open to CMS, the U.S. Office of the Inspector General (OIG), HHS, the State Auditor's Office, the Office of the Attorney General, Government Accountability Office (GAO), LDH, and/or any of their designees upon request, and shall provide them with timely and reasonable access and the right to examine and make copies, excerpts, or transcripts of all books, documents, papers, and records which are directly pertinent to a specific program for the purpose of making audits and examinations, contact and conduct private interviews with the subcontractor's clients, employees, and contractors, and do on-site reviews of all matters relating to service delivery as specified by the Contract. The rights of access in this provision are not limited to the required retention period, but shall last as long as records are retained. The subcontractor shall provide originals and/or copies (at no charge) of all records and information requested. Requests for information shall be compiled in the form and the language requested.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11 Section 4.10
19	INTENTIONALLY LEFT BLANK	
20	Whether announced or unannounced, provide for the participation and cooperation in any internal and external quality assessment review, utilization management, and grievance procedures established by the MCO and/or LDH or its designee.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.3 Page 11, Section 4.11
21	Specify that the subcontractor shall monitor and report the quality of services delivered under the subcontract and initiate a plan of correction where necessary to improve quality of care, in accordance with that level of care which is recognized as acceptable professional practice in the respective community in which the MCO /subcontractor practices and/or the standards established by LDH or its designee.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.11
22	Require that the subcontractor comply with any corrective action plan initiated by the MCO and/or required by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.11
23	Specify any monetary penalties, sanctions or reductions in payment that the MCO may assess on the subcontractor for specific failures to comply with subcontract and/or credentialing requirements. This shall include, but may not be limited to a subcontractor's failure or refusal to respond to the MCO's request for information, the request to provide medical records, credentialing information, etc.; at the MCO's discretion or a directive by LDH, the MCO shall impose at a minimum, financial consequences against the subcontractor as appropriate.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.16
24	Provide for submission of all reports and clinical information to the MCO for reporting purposes required by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.12
25	Require safeguarding of information about MCO enrollees according to applicable state and federal laws and regulations and as described in contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11-12, Section 4.13

26	Make full disclosure of the method and amount of compensation or other consideration to be received from the MCO.	Dentaquest LA Eff 020115 Executed Base Agreement Page 8, Section 4.1 Exhibit 1, Services and Compensation Schedule Page 23-24 Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.2
27	Provide that the subcontractor comply with LDH's claims processing requirements as outlined in the RFP.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.3
28	Provide that the subcontractor adhere to LDH's timely filing guidelines as outlined in the RFP.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.3
29	Provide that, if LDH or its subcontractors discover an error or a conflict with a previously adjudicated encounter claim, the subcontractor shall be required to adjust or void the encounter claim within fourteen (14) calendar days of notification by LDH or the MCO, or if circumstances exist that prevent the subcontractor from meeting this time frame, by a specified date approved by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 8, Section 3.7
30	Specify that the subcontractor shall accept the final payment made by the MCO as payment-in-full for covered services provided and shall not solicit or accept any surety or guarantee of payment from LDH or the member(s). Member shall include the patient, parent(s), guardian, spouse or any other legally or potentially legally, responsible person of the member being served.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 8, Section 3.6
31	Specify that at all times during the term of the subcontract, the subcontractor shall indemnify and hold LDH harmless from all claims, losses, or suits relating to activities undertaken pursuant to the contract between LDH and the MCO, unless the subcontractor is a state agency. For subcontractors that are not state agencies, the indemnification may be accomplished by incorporating such language from the contract between LDH and the MCO in its entirety in the subcontractor's agreement or by use of other language developed by the MCO and approved by LDH. For state agencies, the liability protection may be accomplished by incorporating language developed by the state agency and approved by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14-15, Section 6.8
32	Require the subcontractor to secure all necessary liability, malpractice, and workers' compensation insurance coverage as is necessary to adequately protect the MCO's enrollees and the MCO under the subcontract. The subcontractor shall provide such insurance coverage upon execution and at all times during the subcontract and shall furnish the MCO with written verification of the existence of such coverage.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 3, Section 2.1 Page 6, Section 2.13

33	Specify that the subcontractor agrees to recognize and abide by all state and federal laws, rules and regulations and guidelines applicable to the provision of services, and stipulate that Louisiana law, without regard to its conflict of laws provisions, will prevail if there is a conflict between the state law where the material subcontractor is based and Louisiana law.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.1
34	Provide that the agreement incorporates by reference all applicable federal and state laws, rules or regulations, and revisions of such laws, rules, or regulations shall automatically be incorporated into the subcontract as they become effective.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.1 Page 14, Section 6.4
35	Provide that the MCO and subcontractor shall be responsible for resolving any disputes that may arise between the two (2) parties, and that no dispute shall disrupt or interfere with the provisions of services to the MCO member.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.1
36	Include a conflict of interest clause as stated in the contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.9
37	Specify that the subcontractor must adhere to the Quality Assessment Performance Improvement (QAPI) and Utilization Management (UM) requirements as outlined the contract between LDH and the MCO. The QAPI and UM requirements shall be included as part of the subcontract between the MCO and the subcontractor.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.2
38	Provide that all subcontractors shall give MCO immediate notification in writing by certified mail of any litigation, investigation, complaint, claim or transaction that may reasonably be considered to have a material impact on the subcontractor's ability to perform the services included in its contract with the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.14
39	Provide that in accordance with Title VI of the Civil Rights Act of 1964 (42 U.S.C. §2000d et. seq.) and its implementing regulation at 45 C.F.R. Part 80 (2001, as amended), the subcontractor must take adequate steps to ensure that persons with limited English skills receive free of charge the language assistance necessary to afford them meaningful and equal access to the benefits and services provided under the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.17
40	Contain no provision which restricts a subcontractor from subcontracting with another MCO or other managed care entity.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.11
41	Require that, when the MCO has entered into an alternative reimbursement arrangement with subcontractor, all encounter data must comply with the same standards of completeness and accuracy as required for proper adjudication of claims by the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.4 Page 12, Section 4.19

42	Require that the services to be provided under this subcontract shall be performed entirely within the boundaries of the United States, which includes the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa. In addition, the subcontractor will not hire any individual to perform any services under this Contract if that individual is required to have a work visa approved by the U.S. Department of Homeland Security and such individual has not met this requirement.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.4
43	Contain the following language: The subcontractor and the subcontractor's providers assign to the State of Louisiana any and all rights or claims it currently has or may acquire under any state or federal antitrust laws and that are attributable to any product units purchased or reimbursed through any state program or payment mechanism, including but not limited to product units purchased or reimbursed under the Louisiana Medicaid managed care program. For purposes of this assignment clause, the "subcontractor" shall include any direct or indirect owner to whom the right or claim to be assigned actually belongs, including any and all parents, branches, departments or subsidiaries.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.12
44	Contain the following language: The subcontractor and the subcontractor's providers shall comply, within a reasonable time, with any information, records or data request from any healthcare oversight agency, including the Louisiana Office of the Attorney General, Medicaid Fraud Control Unit (MFCU), related to any services provided under Louisiana's Medical Assistance Programs. This requirement shall be inclusive of contracts or subcontracts with entities who manage or coordinate certain benefits for Medicaid beneficiaries on behalf of the MCO's but does not directly provide the service to Medicaid beneficiaries. When requested by the MFCU the production of the information, records or data requested by the MFCU shall be done at no cost to the MFCU, and the contractor, subcontractor or provider shall not require the MFCU to enter into any contract, agreement or memorandum of understanding to obtain the requested information, records or data. The MCO contractor, subcontractor and/or provider agrees that this contract creates for the healthcare oversight agency an enforceable right for which the healthcare oversight agency can petition the court in the event of non- compliance with an information, records or data request. Appendix F: Material Subcontractor Response Template

Proposer (MCO) name:
Aetna Better Health, Inc. d/b/a Aetna Better Health of Louisiana (Aetna Better Health of Louisiana)
Material subcontractor name:
LogistiCare Solutions, LLC (LogistiCare)
Description of the Proposer's role and material subcontractor's role:
Aetna Better Health of Louisiana will contract directly with the Louisiana Department of Health to deliver the services as outlined in RFP #3000011953. The role of LogistiCare is to provide non-emergency medical transportation services.
Explanation of why the Proposer plans to subcontract this service and/or function:
Our commitment to providing the best and most comprehensive integrated care for enrollees sometimes involves delegating certain services or functions to other organizations who are expert specialists in their disciplines. In this event, material subcontractors enter into a formal agreement giving them the authority to perform specialized functions or services on our behalf. Aetna Better Health of Louisiana utilizes the services of LogistiCare because it is a trusted provider of non-emergency transportation services for our enrollees.
A description of the material subcontractor's organizational experience:
LogistiCare is a wholly owned subsidiary of The Providence Service Corporation (NASDAQ: PRSC) and is the nation's largest provider of non-emergency medical transportation programs for state governments and managed care organizations. LogistiCare was founded in 1986 when it began developing data and technology solutions for ambulance vehicles. Seeing the challenges customers faced in controlling program costs as well as coordinating and monitoring transportation, in 1991 LogistiCare broadened its scope to include NEMT consulting and by 1996, NEMT became the company's primary focus. Since first working in Georgia and Connecticut more than 20 years ago, LogistiCare has grown its business significantly – delivering quality service to nearly 24 million eligible consumers nationwide and maintaining a contract retention rate of 97.5 percent. LogistiCare manages more than 230 customized NEMT programs in 49 states and the District of Columbia. In 2018, LogistiCare provided nearly 65 million trips across the United States.
The processes the Proposer will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment:
Although Aetna Better Health of Louisiana may delegate the authority to perform functions in support of the Healthy Louisiana program, we do not delegate accountability for the quality of care or services the contractor provides. Our Quality Assurance and Performance Improvement (QAPI) program has a comprehensive set of policies and procedures to manage the delegation of responsibility for any delegated program function. We understand all processes required for effective oversight of

subcontractor performance, and we are successful at conducting these activities as part of our daily business. We have extensive experience with subcontractor oversight, with selecting subcontractors, and with ongoing monitoring of subcontractor performance. By leveraging this experience, we ensure the successful completion of all delegated functions under the Healthy Louisiana program.

The processes Aetna Better Health of Louisiana will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment include:

- Monitoring and evaluating delegated functions through semiannual reports
- Conducting pre-assessments prior to delegation, with annual desk audits or web conference reviews conducted with a random sampling of files thereafter
- Confirming that delegated functions/services are carried out consistently and in compliance with both Aetna's and other applicable accredited standards (i.e., NCQA and others as indicated) and the mutually agreed-upon delegation agreement
- Performing an annual file review audit, if applicable, to confirm compliance with Aetna and applicable standards
- Monitoring ongoing corrective actions to address identified deficiencies, promote progress, and take necessary action, if improvements do not occur
- Reviewing the delegated organization's program that oversees the delegated functions and its quality program to verify it is in alignment with Aetna's quality improvement processes
- Monitoring the subcontractor downstream provider agreements to ensure they comply with the regulatory requirements of the State contract

The Medical Management, Quality Management, Provider Services, and if applicable, Care Management, and Utilization Management departments are responsible for implementing the oversight process and maintaining monitoring activities, including monitoring the delegate's provisions to safeguard members' protected health information, as applicable. Delegation oversight activities are formally monitored as a component of the QAPI program. Audit reports of delegated activities and CAPs, if applicable, are submitted to the appropriate oversight committee (e.g., QM/UM Committee, Delegation Subcommittee, National Vendor Delegate Oversight Committee) for review and approval and then to the Quality Management Oversight Committee. Should deficiencies be identified, Aetna works with the delegated organization to set priorities and develop a corrective action plan (CAP). We retain the right to revoke the delegation agreement for non-compliance or if CAPs are not sustained.

Our return on investment is not measured in terms of a mathematical calculation that yields a percent return, but rather in terms of our enrollees' access to the medical services and care they need to live healthier, more independent lives. The services that LogistiCare provides will allow Aetna Better Health of Louisiana to administer non-emergency transportation services on a scale that we would not be able to achieve otherwise, thereby increasing enrollees' access to care. Our robust quality management program helps to ensure that our Healthy Louisiana enrollees are receiving the highest quality care and services as they seek to achieve their health goals. This in turn enables Aetna Better Health of Louisiana to support the State in its objective to build a Medicaid managed care delivery system that improves the health of populations, enhances the experience of care for individuals, and effectively manages Medicaid per capita care costs.

Instructions: The Proposer should attach the executed or draft contract and indicate compliance with each of the following checklist items by completing the "Location" column.

	Checklist Item	Location (Include Name of Document, Page Number, and Section Number/Letter)
1	Contain language that the subcontractor shall adhere to all requirements set forth for MCO subcontractors in the contract between LDH and the MCO and the MCO Manual, and either physically incorporate these documents as appendices to the subcontract or include language in the subcontract that the MCO shall furnish these documents to the subcontractor upon request.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14 Section 6.3
2	Include a signature page that contains an MCO and subcontractor name with titles that are typed or legibly written, subcontractor company name, and dated signature of all appropriate parties (applicable for executed contracts).	Base Agreement Page 21 Signature Page
3	Specify the effective dates of the subcontract agreement.	Base Agreement Page 2 1st Paragraph; Line 2
4	Specify that the subcontract and its appendices contain all the terms and conditions agreed upon by the both parties.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.6
5	Require that no modification or change of any provision of the subcontract shall be made unless such modification is incorporated and attached as a written amendment to the subcontract and signed by the parties.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.4
6	Specify procedures and criteria for any alterations, variations, modifications, waivers, extensions of the subcontract termination date, or early termination of the subcontract and that such change shall only be valid when reduced to writing, duly signed and attached to the original of the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.4
7	Specify that the MCO and subcontractor recognize that in the event of termination of the contract between the MCO and LDH for any of the reasons described in the contract, the MCO shall immediately make available to LDH or its designated representative, in a usable form, any and all records, whether medical or financial, related to the MCO's and subcontractor's activities undertaken pursuant to the subcontract agreement. The provision of such records shall be at no expense to LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.15
8	Ensure the subcontractor shall not, without prior approval of the MCO, enter into any subcontract or other agreement for any of the work contemplated under the subcontract without approval of the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 16, Section 7.1
9	Require that if any requirement in the subcontract is determined by LDH to conflict with the contract between LDH and the MCO, such requirement shall be null and void and all other provisions shall remain in full force and effect.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 1, Paragraph 3

		Page 15, Section 6.10
10	Identify the population covered by the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 6, Section 2.17
11	Specify that the services provided under the subcontract must be in accordance with the Louisiana Medicaid State Plan and require that the subcontractor provide these services to enrollees through the last day that the subcontract is in effect.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.3
12	Require that the subcontractor be currently licensed and/or certified under applicable state and federal statutes and regulations and shall maintain throughout the term of the subcontract all necessary licenses, certifications, registrations and permits as are required to provide the health care services and/or other related activities delegated by the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 3-4, Section 2.1
13	Specify the amount, duration, and scope of benefits and services that are provided by the subcontractor.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.3
14	Provide that emergency services be coordinated without the requirement of prior authorization of any kind.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 5, Section 2.8
15	Require that if the subcontractor performs laboratory services, the subcontractor must meet all applicable state requirements and 42 C.F.R. §493.1 and 493.3, and any other federal requirements.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 5, Section 2.9
16	Require that an adequate record system be maintained for recording services, charges, dates and all other commonly required information elements for services rendered to MCO enrollees pursuant to the subcontract (including but not limited to such records as are necessary for the evaluation of the quality, appropriateness, and timeliness of services performed under the contract between LDH and the MCO). MCO enrollees and their representatives shall be given access to and can request copies of the enrollees' medical records, to the extent and in the manner provided by La. R.S. 40:1165.1 and 45 C.F.R. §164.524 as amended and subject to reasonable charges.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9-10, Section 4.6 Page 10-11, Section 4.9
17	Include record retention requirements as specified in the contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 10-11 Section 4.9

18	Shall make all program and financial records and service delivery sites open to CMS, the U.S. Office of the Inspector General (OIG), HHS, the State Auditor's Office, the Office of the Attorney General, Government Accountability Office (GAO), LDH, and/or any of their designees upon request, and shall provide them with timely and reasonable access and the right to examine and make copies, excerpts, or transcripts of all books, documents, papers, and records which are directly pertinent to a specific program for the purpose of making audits and examinations, contact and conduct private interviews with the subcontractor's clients, employees, and contractors, and do on-site reviews of all matters relating to service delivery as specified by the Contract. The rights of access in this provision are not limited to the required retention period, but shall last as long as records are retained. The subcontractor shall provide originals and/or copies (at no charge) of all records and information requested. Requests for information shall be compiled in the form and the language requested. 22	Require that the subcontractor comply with any corrective action plan initiated by the MCO and/or required by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.11
23	Specify any monetary penalties, sanctions or reductions in payment that the MCO may assess on the subcontractor for specific failures to comply with subcontract and/or credentialing requirements. This shall include, but may not be limited to a subcontractor's failure or refusal to respond to the MCO's request for information, the request to provide medical records, credentialing information, etc.; at the MCO's discretion or a directive by LDH, the MCO shall impose at a minimum, financial consequences against the subcontractor as appropriate.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.16
24	Provide for submission of all reports and clinical information to the MCO for reporting purposes required by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.12
25	Require safeguarding of information about MCO enrollees according to applicable state and federal laws and regulations and as described in contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11-12, Section 4.13

26	Make full disclosure of the method and amount of compensation or other consideration to be received from the MCO.	Base Agreement Services and Compensation Schedule; Page 23 Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.2
27	Provide that the subcontractor comply with LDH's claims processing requirements as outlined in the RFP.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.3
28	Provide that the subcontractor adhere to LDH's timely filing guidelines as outlined in the RFP.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.3
29	Provide that, if LDH or its subcontractors discover an error or a conflict with a previously adjudicated encounter claim, the subcontractor shall be required to adjust or void the encounter claim within fourteen (14) calendar days of notification by LDH or the MCO, or if circumstances exist that prevent the subcontractor from meeting this time frame, by a specified date approved by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 8,Section 3.7
30	Specify that the subcontractor shall accept the final payment made by the MCO as payment-in-full for covered services provided and shall not solicit or accept any surety or guarantee of payment from LDH or the member(s). Member shall include the patient, parent(s), guardian, spouse or any other legally or potentially legally, responsible person of the member being served.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 8, Section 3.6
31	Specify that at all times during the term of the subcontract, the subcontractor shall indemnify and hold LDH harmless from all claims, losses, or suits relating to activities undertaken pursuant to the contract between LDH and the MCO, unless the subcontractor is a state agency. For subcontractors that are not state agencies, the indemnification may be accomplished by incorporating such language from the contract between LDH and the MCO in its entirety in the subcontractor's agreement or by use of other language developed by the MCO and approved by LDH. For state agencies, the liability protection may be accomplished by incorporating language developed by the state agency and approved by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14-15, Section 6.8
32	Require the subcontractor to secure all necessary liability, malpractice, and workers' compensation insurance coverage as is necessary to adequately protect the MCO's enrollees and the MCO under the subcontract. The subcontractor shall provide such insurance coverage upon execution and at all times during the subcontract and shall furnish the MCO with written verification of the existence of such coverage.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 3, Section 2.1 Page 6, Section 2.13
33	Specify that the subcontractor agrees to recognize and abide by all state and federal laws, rules and regulations and guidelines applicable to the provision of services, and stipulate that Louisiana law, without regard to its conflict of laws provisions, will prevail if there is a conflict between the state law where the material subcontractor is based and Louisiana law.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.1

34	Provide that the agreement incorporates by reference all applicable federal and state laws, rules or regulations, and revisions of such laws, rules, or regulations shall automatically be incorporated into the subcontract as they become effective.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.1 Page 14, Section 6.4
35	Provide that the MCO and subcontractor shall be responsible for resolving any disputes that may arise between the two (2) parties, and that no dispute shall disrupt or interfere with the provisions of services to the MCO member.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.1
36	Include a conflict of interest clause as stated in the contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.9
37	Specify that the subcontractor must adhere to the Quality Assessment Performance Improvement (QAPI) and Utilization Management (UM) requirements as outlined the contract between LDH and the MCO. The QAPI and UM requirements shall be included as part of the subcontract between the MCO and the subcontractor.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.2
38	Provide that all subcontractors shall give MCO immediate notification in writing by certified mail of any litigation, investigation, complaint, claim or transaction that may reasonably be considered to have a material impact on the subcontractor's ability to perform the services included in its contract with the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.14
39	Provide that in accordance with Title VI of the Civil Rights Act of 1964 (42 U.S.C. §2000d et. seq.) and its implementing regulation at 45 C.F.R. Part 80 (2001, as amended), the subcontractor must take adequate steps to ensure that persons with limited English skills receive free of charge the language assistance necessary to afford them meaningful and equal access to the benefits and services provided under the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.17
40	Contain no provision which restricts a subcontractor from subcontracting with another MCO or other managed care entity.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.11
41	Require that, when the MCO has entered into an alternative reimbursement arrangement with subcontractor, all encounter data must comply with the same standards of completeness and accuracy as required for proper adjudication of claims by the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.4 Page 12, Section 4.19
42	Require that the services to be provided under this subcontract shall be performed entirely within the boundaries of the United States, which includes the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa. In addition, the subcontractor will not hire any individual to perform any services under this Contract if that individual is required to have a work visa approved by the U.S. Department of Homeland Security and such individual has not met this requirement.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.4

43	Contain the following language: The subcontractor and the subcontractor's providers assign to the State of Louisiana any and all rights or claims it currently has or may acquire under any state or federal antitrust laws and that are attributable to any product units purchased or reimbursed through any state program or payment mechanism, including but not limited to product units purchased or reimbursed under the Louisiana Medicaid managed care program. For purposes of this assignment clause, the "subcontractor" shall include any direct or indirect owner to whom the right or claim to be assigned actually belongs, including any and all parents, branches, departments or subsidiaries.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.12
44	Contain the following language: The subcontractor and the subcontractor's providers shall comply, within a reasonable time, with any information, records or data request from any healthcare oversight agency, including the Louisiana Office of the Attorney General, Medicaid Fraud Control Unit (MFCU), related to any services provided under Louisiana's Medical Assistance Programs. This requirement shall be inclusive of contracts or subcontracts with entities who manage or coordinate certain benefits for Medicaid beneficiaries on behalf of the MCO's but does not directly provide the service to Medicaid beneficiaries. When requested by the MFCU the production of the information, records or data requested by the MFCU shall be done at no cost to the MFCU, and the contractor, subcontractor or provider shall not require the MFCU to enter into any contract, agreement or memorandum of understanding to obtain the requested information, records or data. The MCO contractor, subcontractor and/or provider agrees that this contract creates for the healthcare oversight agency an enforceable right for which the healthcare oversight agency can petition the court in the event of non- compliance with an information, records or data request. Appendix F: Material Subcontractor Response Template

Proposer (MCO) name:
Aetna Better Health, Inc. d/b/a Aetna Better Health of Louisiana (Aetna Better Health of Louisiana)
Material subcontractor name:
Superior Vision Benefit Management, Inc. (Superior Vision)
Description of the Proposer's role and material subcontractor's role:
Aetna Better Health of Louisiana will contract directly with the Louisiana Department of Health to deliver the services as outlined in RFP #3000011953. The role of Superior Vision is to perform comprehensive vision management services, including all aspects of service delivery and the administrative support services to support vision benefits. These activities will include provider contracting, credentialing, and relations; claims processing and payment; member services support; continuous quality improvement program activities; and program reporting.
Explanation of why the Proposer plans to subcontract this service and/or function:
Our commitment to providing the best and most comprehensive integrated care for enrollees sometimes involves delegating certain services or functions to other organizations who are expert specialists in their disciplines. In this event, material subcontractors enter into formal agreements giving them the authority to perform specialized functions or services on our behalf. Aetna Better Health of Louisiana utilizes the services of Superior Vision because it has more than 25 years' experience managing vision benefits on behalf of both health plans (with an emphasis on government programs) and commercial group business. In Louisiana, Superior Vision has administered vision services for the Louisiana Medicaid and CHIP programs since inception in 2012. Currently, they provide comprehensive routine vision and medical eye care services to more than 300,000 Louisiana Medicaid and CHIP members.
A description of the material subcontractor's organizational experience:
In 1990, Block Vision began providing high-quality eye care and administrative services, with a focus on serving health plan clients. In December 2014, Block Vision merged with Superior Vision, a leading provider of vision plan coverage to commercial groups on a nationwide basis. This merger positioned the combined company as a national leader in both health plan and commercial vision benefits services. On December 1, 2017, Superior Vision's ownership completed its acquisition of Davis Vision, which had been previously announced on August 9, 2017. This new partnership leverages the expertise and services of each company and provides a larger suite of benefit offerings along with the broadest access in the industry to quality vision care. Together with affiliates, the combined companies currently manage vision benefits on behalf of over 33 million members nationwide. Since 1994, Superior Vision has delivered a full-spectrum of vision care services on behalf of government-sponsored health plans. Today, in partnership with 79 health plans, they administer a continuum of vision services ranging from routine to medical/surgical to more than 13 million

Medicaid, CHIP, and Medicare Advantage members. Superior Vision is the largest administrator of vision benefits for government-sponsored health plans in the nation.

This experience has led to the development of services designed to meet the unique needs of their clients and members including:

- Ensuring appropriate accommodations for members with special needs
- Delivering services in a culturally-competent manner
- Providing data management and program reporting, including compliance with applicable state-required and/or federally required performance standards and reporting templates
- Offering a comprehensive quality management program that complies with NCQA and applicable state and federal standards
- Monitoring and acting on fraud, waste and abuse as appropriate
- Delivering disease management and member outreach initiatives
- Providing customized account management with a focus on personalized customer service
- Managing services across the eye care spectrum, including a robust medical eye-care management program that:
    - o Allows members to receive uninterrupted care from a single provider when a medical eye condition is detected during a routine eye exam
    - o Benefits clients through lower program costs and the elimination of "leakage" between the routine vision and medical eye care delivery systems

Superior Vision's long-term experience managing services on behalf of Medicaid, CHIP, and Medicare Advantage programs makes them uniquely qualified to deliver outstanding service to the Louisiana Department of Health and to Healthy Louisiana enrollees.

The processes the Proposer will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment:

Although Aetna Better Health of Louisiana may delegate the authority to perform functions in support of the Healthy Louisiana program, we do not delegate accountability for the quality of care or services the contractor provides. Our Quality Assurance and Performance Improvement (QAPI) program has a comprehensive set of policies and procedures to manage the delegation of responsibility for any delegated program function. We understand all processes required for effective oversight of subcontractor performance, and we are successful at conducting these activities as part of our daily business. We have extensive experience with subcontractor oversight, with selecting subcontractors, and with ongoing monitoring of subcontractor performance. By leveraging this experience, we ensure the successful completion of all delegated functions under the Healthy Louisiana program.

The processes Aetna Better Health of Louisiana will implement to monitor and evaluate the performance of the material subcontractor to ensure that all contract requirements are met and to determine the return on investment include:

- Monitoring and evaluating delegated functions through semiannual reports
- Conducting pre-assessments prior to delegation, with annual desk audits or web conference reviews conducted with a random sampling of files thereafter
- Confirming that delegated functions/services are carried out consistently and in compliance with both Aetna's and other applicable accredited standards (i.e., NCQA and others as indicated) and the mutually agreed-upon delegation agreement

- Performing an annual file review audit, if applicable, to confirm compliance with Aetna and applicable standards
- Monitoring ongoing corrective actions to address identified deficiencies, promote progress, and take necessary action, if improvements do not occur
- Reviewing the delegated organization's program that oversees the delegated functions and its quality program to verify it is in alignment with Aetna's quality improvement processes
- Monitoring the subcontractor downstream provider agreements to ensure they comply with the regulatory requirements of the State contract

The Medical Management, Quality Management, Provider Services, and if applicable, Care Management, and Utilization Management departments are responsible for implementing the oversight process and maintaining monitoring activities, including monitoring the delegate's provisions to safeguard members' protected health information, as applicable.

Delegation oversight activities are formally monitored as a component of the QAPI program. Audit reports of delegated activities and CAPs, if applicable, are submitted to the appropriate oversight committee (e.g., QM/UM Committee, Delegation Subcommittee, National Vendor Delegate Oversight Committee) for review and approval and then to the Quality Management Oversight Committee. Should deficiencies be identified, we work with the delegated organization to set priorities and develop a corrective action plan (CAP). We retain the right to revoke the delegation agreement for non-compliance or if CAPs are not sustained.

Our return on investment is not measured in terms of a mathematical calculation that yields a percent return, but rather in terms of our enrollees' access to the medical services and care they need to live healthier, more independent lives. The services that Superior Vision provides will allow Aetna Better Health of Louisiana to administer vision services on a scale that we would not be able to achieve otherwise. Our robust quality management program helps to ensure that our Healthy Louisiana enrollees are receiving the highest quality care and services as they seek to achieve their health goals. This in turn enables Aetna Better Health of Louisiana to support the State in its objective to build a Medicaid managed care delivery system that improves the health of populations, enhances the experience of care for individuals, and effectively manages Medicaid per capita care costs.

Instructions: The Proposer should attach the executed or draft contract and indicate compliance with each of the following checklist items by completing the "Location" column.

	Checklist Item	Location (Include Name of Document, Page Number, and Section Number/Letter)
1	Contain language that the subcontractor shall adhere to all requirements set forth for MCO subcontractors in the contract between LDH and the MCO and the MCO Manual, and either physically incorporate these documents as appendices to the subcontract or include language in the subcontract that the MCO shall furnish these documents to the subcontractor upon request.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14 Section 6.3
2	Include a signature page that contains an MCO and subcontractor name with titles that are typed or legibly written, subcontractor company name, and dated signature of all appropriate parties (applicable for executed contracts).	Superior Vision LA Effective 020115 Executed Agreement Agreement Page 21
3	Specify the effective dates of the subcontract agreement.	Superior Vision LA Effective 020115 Executed Agreement Page 1, First Paragraph
4	Specify that the subcontract and its appendices contain all the terms and conditions agreed upon by the both parties.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.6
5	Require that no modification or change of any provision of the subcontract shall be made unless such modification is incorporated and attached as a written amendment to the subcontract and signed by the parties.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.4
6	Specify procedures and criteria for any alterations, variations, modifications, waivers, extensions of the subcontract termination date, or early termination of the subcontract and that such change shall only be valid when reduced to writing, duly signed and attached to the original of the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.4
7	Specify that the MCO and subcontractor recognize that in the event of termination of the contract between the MCO and LDH for any of the reasons described in the contract, the MCO shall immediately make available to LDH or its designated representative, in a usable form, any and all records, whether medical or financial, related to the MCO's and subcontractor's activities undertaken pursuant to the subcontract agreement. The provision of such records shall be at no expense to LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.15
8	Ensure the subcontractor shall not, without prior approval of the MCO, enter into any subcontract or other agreement for any of the work contemplated under the subcontract without approval of the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 16, Section 7.1
9	Require that if any requirement in the subcontract is determined by LDH to conflict with the contract between LDH and the MCO, such requirement shall be null and void and all other provisions shall remain in full force and effect.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum

		Page 1, Paragraph 3 Page 15, Section 6.10
10	Identify the population covered by the subcontract.	Superior Vision LA Effective 020115 Executed Agreement Page 3, Section 1.13 Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 6, Section 2.17
11	Specify that the services provided under the subcontract must be in accordance with the Louisiana Medicaid State Plan and require that the subcontractor provide these services to enrollees through the last day that the subcontract is in effect.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.3
12	Require that the subcontractor be currently licensed and/or certified under applicable state and federal statutes and regulations and shall maintain throughout the term of the subcontract all necessary licenses, certifications, registrations and permits as are required to provide the health care services and/or other related activities delegated by the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 3-4, Section 2.1
13	Specify the amount, duration, and scope of benefits and services that are provided by the subcontractor.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.3
14	Provide that emergency services be coordinated without the requirement of prior authorization of any kind.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 5, Section 2.8
15	Require that if the subcontractor performs laboratory services, the subcontractor must meet all applicable state requirements and 42 C.F.R. §493.1 and 493.3, and any other federal requirements.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 5, Section 2.9
16	Require that an adequate record system be maintained for recording services, charges, dates and all other commonly required information elements for services rendered to MCO enrollees pursuant to the subcontract (including but not limited to such records as are necessary for the evaluation of the quality, appropriateness, and timeliness of services performed under the contract between LDH and the MCO). MCO enrollees and their representatives shall be given access to and can request copies of the enrollees' medical records, to the extent and in the manner provided by La. R.S. 40:1165.1 and 45 C.F.R. §164.524 as amended and subject to reasonable charges.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9-10, Section 4.6 Page 10-11, Section 4.9
17	Include record retention requirements as specified in the contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 10-11 Section 4.9

18	Shall make all program and financial records and service delivery sites open to CMS, the U.S. Office of the Inspector General (OIG), HHS, the State Auditor's Office, the Office of the Attorney General, Government Accountability Office (GAO), LDH, and/or any of their designees upon request, and shall provide them with timely and reasonable access and the right to examine and make copies, excerpts, or transcripts of all books, documents, papers, and records which are directly pertinent to a specific program for the purpose of making audits and examinations, contact and conduct private interviews with the subcontractor's clients, employees, and contractors, and do on-site reviews of all matters relating to service delivery as specified by the Contract. The rights of access in this provision are not limited to the required retention period, but shall last as long as records are retained. The subcontractor shall provide originals and/or copies (at no charge) of all records and information requested. Requests for information shall be compiled in the form and the language requested.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11 Section 4.10
19	INTENTIONALLY LEFT BLANK	
20	Whether announced or unannounced, provide for the participation and cooperation in any internal and external quality assessment review, utilization management, and grievance procedures established by the MCO and/or LDH or its designee.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.3 Page 11, Section 4.11
21	Specify that the subcontractor shall monitor and report the quality of services delivered under the subcontract and initiate a plan of correction where necessary to improve quality of care, in accordance with that level of care which is recognized as acceptable professional practice in the respective community in which the MCO /subcontractor practices and/or the standards established by LDH or its designee.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.11
22	Require that the subcontractor comply with any corrective action plan initiated by the MCO and/or required by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.11
23	Specify any monetary penalties, sanctions or reductions in payment that the MCO may assess on the subcontractor for specific failures to comply with subcontract and/or credentialing requirements. This shall include, but may not be limited to a subcontractor's failure or refusal to respond to the MCO's request for information, the request to provide medical records, credentialing information, etc.; at the MCO's discretion or a directive by LDH, the MCO shall impose at a minimum, financial consequences against the subcontractor as appropriate.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.16
24	Provide for submission of all reports and clinical information to the MCO for reporting purposes required by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11, Section 4.12
25	Require safeguarding of information about MCO enrollees according to applicable state and federal laws and regulations and as described in contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 11-12, Section 4.13

26	Make full disclosure of the method and amount of compensation or other consideration to be received from the MCO.	Superior Vision LA Effective 020115 Executed Agreement Page 23 Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.2
27	Provide that the subcontractor comply with LDH's claims processing requirements as outlined in the RFP.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.3
28	Provide that the subcontractor adhere to LDH's timely filing guidelines as outlined in the RFP.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.3
29	Provide that, if LDH or its subcontractors discover an error or a conflict with a previously adjudicated encounter claim, the subcontractor shall be required to adjust or void the encounter claim within fourteen (14) calendar days of notification by LDH or the MCO, or if circumstances exist that prevent the subcontractor from meeting this time frame, by a specified date approved by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 8, Section 3.7
30	Specify that the subcontractor shall accept the final payment made by the MCO as payment-in-full for covered services provided and shall not solicit or accept any surety or guarantee of payment from LDH or the member(s). Member shall include the patient, parent(s), guardian, spouse or any other legally or potentially legally, responsible person of the member being served.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 8, Section 3.6
31	Specify that at all times during the term of the subcontract, the subcontractor shall indemnify and hold LDH harmless from all claims, losses, or suits relating to activities undertaken pursuant to the contract between LDH and the MCO, unless the subcontractor is a state agency. For subcontractors that are not state agencies, the indemnification may be accomplished by incorporating such language from the contract between LDH and the MCO in its entirety in the subcontractor's agreement or by use of other language developed by the MCO and approved by LDH. For state agencies, the liability protection may be accomplished by incorporating language developed by the state agency and approved by LDH.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14-15, Section 6.8
32	Require the subcontractor to secure all necessary liability, malpractice, and workers' compensation insurance coverage as is necessary to adequately protect the MCO's enrollees and the MCO under the subcontract. The subcontractor shall provide such insurance coverage upon execution and at all times during the subcontract and shall furnish the MCO with written verification of the existence of such coverage.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 3, Section 2.1 Page 6, Section 2.13
33	Specify that the subcontractor agrees to recognize and abide by all state and federal laws, rules and regulations and guidelines applicable to the provision of services, and stipulate that Louisiana law, without regard to its conflict of laws provisions, will prevail if there is a conflict between the state law where the material subcontractor is based and Louisiana law.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.1

34	Provide that the agreement incorporates by reference all applicable federal and state laws, rules or regulations, and revisions of such laws, rules, or regulations shall automatically be incorporated into the subcontract as they become effective.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.1 Page 14, Section 6.4
35	Provide that the MCO and subcontractor shall be responsible for resolving any disputes that may arise between the two (2) parties, and that no dispute shall disrupt or interfere with the provisions of services to the MCO member.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 14, Section 6.1
36	Include a conflict of interest clause as stated in the contract between LDH and the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.9
37	Specify that the subcontractor must adhere to the Quality Assessment Performance Improvement (QAPI) and Utilization Management (UM) requirements as outlined the contract between LDH and the MCO. The QAPI and UM requirements shall be included as part of the subcontract between the MCO and the subcontractor.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 9, Section 4.2
38	Provide that all subcontractors shall give MCO immediate notification in writing by certified mail of any litigation, investigation, complaint, claim or transaction that may reasonably be considered to have a material impact on the subcontractor's ability to perform the services included in its contract with the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.14
39	Provide that in accordance with Title VI of the Civil Rights Act of 1964 (42 U.S.C. §2000d et. seq.) and its implementing regulation at 45 C.F.R. Part 80 (2001, as amended), the subcontractor must take adequate steps to ensure that persons with limited English skills receive free of charge the language assistance necessary to afford them meaningful and equal access to the benefits and services provided under the subcontract.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 12, Section 4.17
40	Contain no provision which restricts a subcontractor from subcontracting with another MCO or other managed care entity.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.11
41	Require that, when the MCO has entered into an alternative reimbursement arrangement with subcontractor, all encounter data must comply with the same standards of completeness and accuracy as required for proper adjudication of claims by the MCO.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 7, Section 3.4 Page 12, Section 4.19
42	Require that the services to be provided under this subcontract shall be performed entirely within the boundaries of the United States, which includes the 50 states, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa. In addition, the subcontractor will not hire any individual to perform any services under this Contract if that individual is required to have a work visa approved by the U.S. Department of Homeland Security and such individual has not met this requirement.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 4, Section 2.4

43	Contain the following language: The subcontractor and the subcontractor's providers assign to the State of Louisiana any and all rights or claims it currently has or may acquire under any state or federal antitrust laws and that are attributable to any product units purchased or reimbursed through any state program or payment mechanism, including but not limited to product units purchased or reimbursed under the Louisiana Medicaid managed care program. For purposes of this assignment clause, the "subcontractor" shall include any direct or indirect owner to whom the right or claim to be assigned actually belongs, including any and all parents, branches, departments or subsidiaries.	Appendix A Louisiana Medicaid Regulatory Compliance Addendum Page 15, Section 6.12
44	Contain the following language: The subcontractor and the subcontractor's providers shall comply, within a reasonable time, with any information, records or data request from any healthcare oversight agency, including the Louisiana Office of the Attorney General, Medicaid Fraud Control Unit (MFCU), related to any services provided under Louisiana's Medical Assistance Programs. This requirement shall be inclusive of contracts or subcontracts with entities who manage or coordinate certain benefits for Medicaid beneficiaries on behalf of the MCO's but does not directly provide the service to Medicaid beneficiaries. When requested by the MFCU the production of the information, records or data requested by the MFCU shall be done at no cost to the MFCU, and the contractor, subcontractor or provider shall not require the MFCU to enter into any contract, agreement or memorandum of understanding to obtain the requested information, records or data. The MCO contractor, subcontractor and/or provider agrees that this contract creates for the healthcare oversight agency an enforceable right for which the healthcare oversight agency can petition the court in the event of non- compliance with an information, records or data request. 2.10.2.4 Proposal Reference Contact Information

Louisiana | Transforming Health Care | **Aetna**

2.10.2.4 Proposer Reference Contact Information

Aetna Better Health of Louisiana's vision for our relationship with LDH is to serve as a dependable, transparent, and trusted partner in creating solutions to key public health issues—collaborating with stakeholders to design effective policy and achieve the Healthy Louisiana program goals, especially the requirements of the contract.

From time to time, an Aetna organization health plan may miss a contractual requirement and receive a notice of action, an important indicator of an opportunity for improvement. Our multidisciplinary approach to identifying, remediating, and monitoring compliance issues is companywide. We perform root-cause analysis and employ the Plan-Do-Study-Act method to address the underlying issues that lead to a notice of action. Results and recommendations are reported to Aetna organization leadership and translated into improved policies and procedures. Aetna is committed to a culture of continuous quality improvement. **We listen. We learn. We take action.**

As illustrated in **Table 2.10.2.4-1,** Aetna currently manages a number of managed care programs with diverse membership in sixteen states, all of which are included on the following pages. **None of the contracts listed have been subject to a compliance action terminating a contract for poor or non-performance.**

Table 2.10.2.4-1: Aetna's Aggregate Enrollment and Population Experience by State

In accordance with **RFP Section 2.10.2.4.1**, **Table 2.10.2.4-2** and **Table 2.10.2.4-3** provide the contact information (name, title, phone number, and email) for the lead state program manager in each state, including Louisiana, for which Aetna's Medicaid organization has managed a Medicaid managed care contract for comparable services within the past three (3) years. **Table 2.10.2.4-2** provides reference contact information for Aetna Better Health of Louisiana and affiliated Medicaid health plans, and **2.10.2.4-3** provides reference contact information for Medicaid health plans not affiliated with Aetna Better Health of Louisiana but managed by Aetna. In accordance with **RFP Section 2.10.2.4.2**, each such reference includes a brief description of the types and numbers of individuals served, Aetna's key responsibilities in connection with each state contract, and any compliance actions taken by the State or municipalities during the entire term of its contract, including, but not limited to, corrective action plans and monetary penalties[8].

Aetna Better Health of Louisiana and Other Affiliated Medicaid Health Plans

The Medicaid health plans listed in **Table 2.10.2.4-2** include Aetna Better Health of Louisiana and its affiliates that have held at-risk Medicaid managed care contracts for comparable services within the past three years. The health plans within this table have or had direct contractual relationships with the State agencies in their respective states. We list our Louisiana contracts first, followed by contracts listed alphabetically by state. We provide the membership numbers for the last month for which we have publicly available information (December 2018) unless otherwise indicated.

[7] The Texas membership number includes membership for our affiliate, Aetna Better Health of Texas (88,109), and for Parkland Community Health Plan (187,665), an unaffiliated health plan for which an Aetna-affiliated entity performs administrative functions but is not the risk-bearing entity holding the contract with the State agency.

[8] For active contracts, compliance actions are provided for the entire term of the current contract through April 8, 2019, and not for the entire period of the applicable health plan's tenure in each state. For contracts that are no longer active, we provided compliance actions for the last active contract term and not for the entire period of the health plan's tenure in each state. If LDH seeks additional information, we will provide it upon request.

Table 2.10.2.4-2: Proposer Reference Contact Information—Aetna Better Health of Louisiana and Affiliated Medicaid Health Plans

Health Plan Name	**Aetna Better Health, Inc. dba Aetna Better Health of Louisiana**

2.10.2.5 NCQA Accreditation

Louisiana | Transforming Health Care | **Aetna**

2.10.2.5 NCQA Accreditation

National Committee for Quality Assurance (NCQA) accreditation demonstrates a commitment to quality, outstanding clinical performance, and consumer experience. Eleven of the Aetna Medicaid organization's health plans are NCQA-accredited, three of which—Aetna Better Health® of Florida, Aetna Better Health of Kentucky, and Aetna Better Health of West Virginia—achieved an NCQA accreditation level of Commendable. Aetna Better Health of Louisiana received Interim accreditation in February 2017 and, during our first survey in August 2018, obtained Accredited status in August 2018 with results totaling 79.1663, less than 1 point below the Commendable level of 80.00. We are implementing quality-improvement measures to meet our objective of achieving Commendable status. Aetna provides a copy of our NCQA certificate of accreditation in **Attachment D.**

Aetna Better Health of Louisiana is committed to quality, ready access, and innovation to maximize enrollee health, advance health equity, and address social determinants of health within a flexible value-based approach. To achieve this, we make quality a health plan-wide focus. We use an integrated approach that involves every functional area to align organization objectives, interventions, monitoring plan, and metrics with our Quality Assurance and Performance Improvement (QAPI) program. The quality management (QM) program applies to all departments, staff, enrollees, and providers. We integrate QM and continuous quality improvement processes into all departments, with each department responsible for selected processes, functions, and monitoring activities. As part of our commitment to continuous quality improvement, all Aetna staff members must complete Lean Six Sigma white-belt certification, and we require all managers to obtain yellow-belt certification within one year of hire.

Aetna's QAPI program provides a framework for the planning, implementation, and monitoring of all processes that contribute to our commitment to providing integrated and high-value care. We evaluate the quality of our health care services using specific, objective performance and outcome measures from multiple data sources, including but not limited to the following:

- Healthcare Effectiveness Data and Information Set (HEDIS)
- LDH non-HEDIS performance measures
- Consumer Assessment of Healthcare Providers and Systems
- Behavioral health enrollee experience surveys
- Provider satisfaction surveys
- Availability and accessibility studies
- Provider directory usability studies
- Care management rates
- Utilization management rates
- Provider profile reports
- Enrollee and provider grievances and appeals
- Telephone enrollee services
- Medical record and treatment record audits

The data is continually monitored to identify opportunities where we can better serve Healthy Louisiana enrollees, stakeholders, and the community. In addition to cross-functional staff across Aetna Better Health of Louisiana, QM is also supported by a dedicated national QM team. This unit will support the Louisiana QM team by providing monthly quality metric reports, provider and enrollee gaps-in-care reports, year-over-year trajectory reports, HEDIS vendor oversight, accreditation support, and innovative enrollee/provider interventions. Our organization-wide continuous quality improvement efforts lead to improved enrollee and provider experiences; helps to advance evidence-based practices, high-value care, and service excellence; and supports innovation and a culture of continuous quality improvement in Louisiana.

Aetna's quality committees evaluate QM effectiveness monthly, quarterly, and annually. The scope, goals, objectives, structure, staffing, and responsibilities of the QAPI program are modified based on our analyses, and changes to LDH contract and accreditation standards. Aetna Better Health of Louisiana plan leadership, providers, enrollees and/or enrollee agency representative, community agencies, and multiple departments work together as a team to improve our organization's performance. Our innovative continuous quality improvement (CQI) approach encompasses an extensive array of activities and allows us to involve providers, enrollees, and the day-to-day operations team in our efforts. It also ensures year-over-year review of all standing or innovative QAPI program elements, and frequent modifications to the program in support of a Plan-Do-Study-Act (PDSA) framework. PDSA guides our approach to developing, testing, and implementing changes as part of Aetna performance improvement projects (PIPs) and QAPI programs.

Using the QAPI components Aetna maintains a robust quality program by doing the following:

- Maintaining a process to regularly evaluate the impact and effectiveness of the QAPI program through a committee structure that engages and solicits input from cross-functional Aetna teams, enrollees, community-based organizations, and active network providers
- Having a committee structure that supports Aetna's clinical and quality leadership engagement in public health issue discussions in the state, which will allow Aetna to leverage experience across different Medicaid states to collaborate successfully with LDH to support Healthy Louisiana goals
- Using data-driven, objective, and rigorous measurement to support an outcomes-based continuous quality improvement process
- Having a structure in place to identify and remove barriers by which to address unmet enrollee or provider needs and monitoring the effectiveness of improvement programs, including evaluation of enrollee and provider surveys
- Monitoring provider performance to support a network that demonstrates understanding and ability to address health needs of enrollees while supplying accessible, high-quality care and services and to support value-based payment programs to drive high-value care
- Promoting equity through reduction or elimination of health disparities and regularly stratifying and reporting upon health outcomes to develop interventions that improve quality disparities based on age, race, ethnicity, sex, primary language, geography, and key population groups

A detailed QAPI program allows us to systematically monitor, evaluate, and improve the quality, appropriateness, efficiency, and effectiveness of the care and services rendered to our enrollees. The Aetna Medicaid organization's extensive multistate Medicaid experience allows us to design an adaptable program that provides us the flexibility to address the unique needs and diverse regions and populations of Louisiana.

2.10.3 Enrollee Value-Added Benefits

Aetna believes in promoting healthier living through education in nutrition and preventive medicine. Keeping with our mission to promote healthier lifestyles, the Community Outreach team provides healthy options, like oranges and apples, at all our events throughout Louisiana communities.

2.10.3 Enrollee Value-Added Benefits

Aetna is proud to be a part of Louisiana's diverse health care community. We have supported our fellow Louisianans since 2015 by providing Medicaid services that address the specific needs of our communities. We work with providers who are focused on person-centered care, and we regularly participate in local health fairs as well as school and neighborhood center events. Our enrollees are much more than the population we serve—they are our neighbors.

Aetna is committed to offering all six optional value-added benefits to its enrollees as identified by LDH. We believe these value-added benefits are a critical component of the overall program, which will provide another path that leads to achieving the Triple Aim for our enrollees. We designed our enrollee value-added benefits to **address Louisiana's public health goals** as outlined in the Louisiana State Health Assessment and Improvement Plan, *Creating a Blueprint for our Future 2016–2020*, to **improve health outcomes**, **lower costs by reducing the need for more expensive care, and improve the lives of our enrollees.** Our experience both locally and nationally has taught us that the health and well-being of our enrollees are enhanced by their ability to access the services and supports not covered by Medicaid. We are committed to making sure our enrollees receive value-added benefits that support their overall health and quality of life while addressing the whole person.

Aetna is developing innovative enhancements to our enrollee mobile application and enrollee web portal in order to engage and educate enrollees about our value-added benefits. They will be able to see the value-added benefits for which they are eligible, as well as view information on the utilization of those benefits, and where applicable, request to receive the benefits or get more information. Enrollees can also receive assistance accessing these services through our Enrollee Services and Care Management staff.

To improve the quality and impact of these benefits, we are developing a new Aetna Better Benefit platform that allows our Oversight staff to track and monitor eligibility, engagement, effectiveness, and spend for all enrollee value-added benefits. This innovative and proprietary web-based tool will be available at contract implementation. It streamlines all oversight functions, including the following:

- Addressing health disparities by proactively monitoring under-utilization trends among key at-risk populations
- Preventing fraud, waste, and abuse through benefit design and utilization management
- Identifying opportunities to better promote and improve our value-added benefits to meet the needs of our enrollees
- Measuring benefit impact through enrollee satisfaction, and where applicable, health outcomes

Under the leadership of Aetna's chief operating officer, our dedicated Oversight staff will conduct monthly reviews of our value-added vendors and subcontractors to ensure performance, compliance with the terms and conditions of their contract, and compliance with the terms of the Healthy Louisiana contract. As part of this process, we will also conduct regular, ongoing audits, performance reviews, and financial monitoring. Corrective action plans will be put into place as needed to ensure ongoing compliance. All providers will continue to be credentialed through Aetna's credentialing process.

We Honor Our Commitments

Aetna Better Health of Louisiana's value-added benefit spend for the last full year of the Louisiana Medicaid current contract term was 257%. Our contract commitment was $2.15 per member per month (PMPM), and the 2018 calendar spend was $5.53 PMPM.

Dental Benefits for Adults

According to the 2018 Louisiana Department of Health Oral Health Workforce Assessment, **Louisiana remains below the national average in oral health indicators among adults, and there are significant oral health disparities throughout the state**[1]. For example, **black males in Louisiana face significantly higher rates of certain cancers, including oral cavity cancers, than the corresponding national population**[2]. Untreated dental disease can lead to serious health issues, including pain, infection, and tooth loss. Aetna remains committed to addressing this challenge for all of our enrollees by offering robust adult dental benefits. To better support those most impacted by these oral health disparities, we will monitor dental benefit utilization for various adult populations and proactively engage enrollees to help them access this benefit:

- **Population:** Enrollees 21 years of age and older who do not have other dental benefits may self-refer to network providers.
- **Scope:** Procedure codes D0120, D0274, D3230, D3240, D1206, D1208, D5110, D5120, D5130, D5140, D5211–D5214, D5221–D5226, D5282, and D5283; enrollees are eligible to receive up to $500 per year toward dental care (exams, bitewing X-rays, and cleanings limited to twice per year, as well as fillings, restorative services, and dentures). This value-added benefit is not an existing Louisiana Medicaid covered benefit.
- **Proposed copayments:** A copayment will not be required.
- **How the benefit will be provided:** DentaQuest is the subcontractor. Enrollees can call DentaQuest at (844) 234-9834, Monday through Friday, 8 a.m. to 5 p.m. A referral to see a network dental provider is not required. Enrollees can find dental providers in our online provider directory at www.aetnabetterhealth.com/louisiana or by calling Enrollee Services. Enrollees can find information on their remaining available benefits by contacting Enrollee Services, their care manager, or through the enrollee app or enrollee portal. Enrollees who schedule services that exceed their available benefits will be notified prior to their appointment.
- **Oversight:** We will utilize the Aetna Better Benefit platform to track and monitor eligibility, engagement, effectiveness, and spend of this benefit. Our dedicated Oversight staff will perform monthly reviews of DentaQuest to ensure performance, compliance with the terms and conditions of their contract, and compliance with the terms of the Healthy Louisiana contract.
- **PMPM:** The PMPM cost for dental benefits assuming an enrollment of 375,000 members is [redacted].

Evidence-based Non-pharmacologic Alternatives to Opioids

According to LDH, **more than 400 Louisianans died of an opioid overdose in 2017**[3]. With opioid addiction on the rise, providers are seeking effective alternative pain management options for their patients. To support these efforts, Aetna will offer coverage for evidence- based **acupuncture and chiropractic services**.

Chiropractic treatment is the most common non-surgical treatment for back pain. Research suggests that chiropractic services may also be helpful for headaches, neck pain, whiplash, and certain arm and leg conditions. Acupuncture reduces pain by increasing the release of endorphins, which block the messages of pain from being delivered to the brain.

[3] "Panel of Experts Makes Six Recommendations to Fight the Opioid Epidemic in Louisiana": accessed April 11, 2019; http://ldh.la.gov/index.cfm/newsroom/detail/4991

- **Population:** Enrollees 21 years of age and older who contact their care manager (if applicable), Enrollee Services, or visit the enrollee portal to access covered pain management services.
- **Scope:** Procedure codes 97810, 97811, 97813, 97814, and 98940–98943; enrollees 21 years of age and older can receive up to $150 in acupuncture services, and up to three chiropractic visits per year. This value-added benefit is not an existing Louisiana Medicaid covered benefit.
- **Proposed copayments:** A copayment will not be required.
- **How the benefit will be provided:** A subcontractor will not be utilized. A referral to see a network acupuncture or chiropractic provider is not required. Transportation for chiropractic and acupuncture services will be provided. Enrollees can find providers in our online provider directory at www.aetnabetterhealth.com/louisiana or by calling Enrollee Services. Enrollees can also find information on their remaining available benefits by contacting Enrollee Services or their care manager, or via the enrollee app or enrollee portal.
- **Oversight:** We will utilize the Aetna Better Benefit platform to track and monitor eligibility, engagement, effectiveness, and spend of this benefit. Our care managers will regularly contact enrollees receiving this benefit to measure the effectiveness of the services provided as non-pharmacological alternatives to opioids. All providers are credentialed through Aetna's credentialing process.
- **PMPM:** The PMPM cost for chronic pain management services assuming an enrollment of 375,000 members is [redacted].

Respite Care Model Targeting Homeless Population with Post-acute Medical Needs

An estimated 3,059 Louisianans experience homelessness on any given day[4].

According to the National Health Care for the Homeless Council, homeless persons are three to four times more likely to die prematurely than their housed counterparts are, largely because their conditions are exacerbated by life on the streets or in shelters. They are often discharged from hospitals with care instructions that are difficult to follow while living on the streets, and their lack of a stable home environment diminishes the effectiveness of their health care. To help address this important issue, Aetna has invested $14 million into affordable housing in Louisiana in the last five years. In addition to our history of investing in the development of affordable family units in Louisiana, Aetna has created an innovative partnership with the Salvation Army to target homeless enrollees with post-acute medical needs. We are offering a value-added benefit and respite care model designed to identify housing instability, provide respite care, and address post-acute medical needs for homeless enrollees. **Figure 2.10.3-1** illustrates how a homeless enrollee with post-acute medical needs will transition from a hospital setting to stable housing utilizing our respite care model:

Figure 2.10.3-1: Aetna's Respite Care Model for the Homeless Population with Post-acute Medical Needs

Our collaboration with the Salvation Army helps homeless enrollees safely transition from a medical facility to stable housing while providing services and programs to meet an enrollee's needs.

[4] "Louisiana Homelessness Statistics": accessed April 11, 2019; https://www.usich.gov/homelessness-statistics/la/

- **Population:** Enrollees 18 years of age and older who are referred through our care management and housing coordinator via post-acute medical discharge
- **Scope:** Procedure code G9006; this value-added benefit is not an existing Louisiana Medicaid covered benefit.
  - **Respite care and wraparound services:** The Salvation Army will provide short-term residential care with wraparound medical respite services (including post-acute medical services, counseling, nutrition, housing stabilization, and transitional care) to allow homeless enrollees the opportunity to live in a safe environment while accessing needed medical care. Our respite care model will build upon the Salvation Army's success and experience in providing these services to the homeless veteran community. In Alexandria, the Salvation Army has successfully demonstrated its ability to meet the medical, social, and housing needs of homeless veterans. The Salvation Army's Center of Hope in New Orleans has a contract with Tulane Medical Center to provide medical services to homeless veterans who are living in shelters and supportive housing locations. All medical services are provided at the Salvation Army location, unless the enrollee needs to be treated at a medical facility. The Salvation Army will transport the enrollee for medical services. Aetna's care manager and housing specialist will identify an enrollee's transitional needs and coordinate with the Salvation Army case manager. **Aetna will pay for up to 14 days of housing, respite, and wraparound services.** The enrollee will be given the opportunity to remain at the Salvation Army and utilize their housing programs and support services, or they can choose to work with the Aetna housing specialist to identify the next phase of housing security.
  - **Housing:** Our housing specialist will create a long-term transition plan for stable housing in coordination with the Salvation Army case manager based on the enrollee's desired location and required services. We will leverage all Salvation Army facilities across the state as part of the discharge plan. The Salvation Army has permanent supportive housing locations in Alexandria, Baton Rouge, Lafayette, Lake Charles, Monroe, New Orleans, and Shreveport.
- **Proposed copayments:** A copayment will not be required.
- **How the benefit will be provided:** The Salvation Army is the provider. Our housing specialist will work with our care managers, community health workers, hospital discharge planners, housing continuum of care providers, and other community agencies to identify Aetna enrollees in need of housing placement and post-acute medical services. Our housing specialist and care manager will also collaborate with the Salvation Army case manager and our enrollee to establish a transition plan to ensure placement and all necessary post-acute medical services and supports are provided.
- **Oversight:** Oversight will be provided by our care management coordinator. Additionally, we will evaluate the impact of these services on our enrollees' lives through monitoring inpatient readmission rates and other quality outcomes.
- **PMPM:** The PMPM cost for the respite care model assuming an enrollment of 375,000 members is [redacted].

Aetna Affordable Housing Investments in Louisiana

- $14 million invested in affordable housing in the last five years
- Thirty-nine communities in 27 cities
- 2,400 units

Aetna supported the Capital Area Alliance for the Homeless One Stop Homeless Services Center in 2018 with a $25,000 grant. We also work with Brotherhood, Inc., the Louisiana Coalition Offender Resources, and AcadianaCares, all of which provide services to support stable housing.

Aetna works to make homelessness rare, brief, and one-time.

Newborn Circumcision Benefits

The American Academy of Pediatrics formed a task force to review and update previously published data regarding circumcisions. According to the Academy, **the benefits of circumcision outweigh the risks**. Some of the most significant research found the following[5]:

- The protective effects of circumcision reduced the incidence of heterosexually transmitted HIV by 40 to 60 percent
- Cases of herpes simplex virus Type 2 were 28 to 34 percent lower in circumcised men
- There was a 30 to 40 percent reduction in risk of HPV infection
- Circumcised males had a much lower risk of urinary tract infections (UTIs) in their first year of life

One of the major reasons that circumcision is performed during the newborn period is because it provides protection against UTIs, as they are most likely to occur during the first year of life[6]. The likelihood of circumcision complications increase as children get older, from less than 1 percent during the newborn period to 1.1 to 9 percent in non-newborns[7]. Aetna provides this value-added benefit to our enrollees to prevent the potential for future infections, sexually transmitted diseases, and both penile and cervical cancers, as well as to lower the overall costs of care. We will continue to actively promote awareness of this benefit to our pregnant enrollees through our maternity benefits program:

- **Population:** Newborn males
- **Scope:** Procedure codes 54160 and 54161. The circumcision will be performed on newborn males. This value-added benefit is not an existing Louisiana Medicaid covered benefit.
- **Proposed copayments:** A copayment will not be required.
- **How the benefit will be provided:** A subcontractor will not be utilized. The circumcision will be performed prior to hospital discharge. If the procedure has to be performed later (for example, the newborn male is born premature), a prior authorization is required.
- **Oversight:** We will utilize the Aetna Better Benefit platform to track and monitor eligibility, engagement, effectiveness, and spend of this benefit. All providers must be approved through Aetna's provider credentialing process.
- **PMPM:** The PMPM cost for newborn circumcision benefits assuming an enrollment of 375,000 members is [redacted].

Tobacco Cessation Benefits, Not Including Medications

The prevalence of cigarette smoking among adults in Louisiana is nearly 22 percent, which far exceeds the national average of 17 percent[8]. Estimates indicate that health care costs in Louisiana directly caused by smoking amount to nearly **$2 billion annually**. Tobacco cessation is a difficult task for individuals to achieve on their own, and many individuals repeatedly fail without the benefit of support. We will work closely with and support the Well-Ahead Louisiana program to help Louisianans '*geaux* tobacco-free' by aligning with Well-Ahead's Goal Area 3: Promote Quitting among Adults and Young People.

In 2014, CVS Health became the first national pharmacy retailer to remove tobacco products from their CVS Pharmacy locations as part of their commitment to helping people on their path to better health. To further this commitment, CVS Health also proudly serves as the national presenting sponsor of the American Lung Association's LUNG FORCE initiative to bring women and their loved ones to stand together against lung cancer and increase lung health awareness. One of the American Lung Association's

[5] "Health Benefits Linked to Newborn Circumcision": accessed April 11, 2019; https://www.aappublications.org/content/33/9/1.2.full
[6] Ibid.

[8] "Patient Tobacco Use, Quit Attempts, and Perceptions of Healthcare Provider Practices in a Safety Net Healthcare System": accessed April 11, 2019; https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3776512/#i1524-5012-13-3-367-b04

strategic imperatives is to eliminate tobacco use and tobacco-related diseases. Lung cancer is the number-one cancer killer of women and men, and together, CVS Health and the American Lung Association have worked to raise awareness of this serious lung disease through LUNG FORCE. Aetna stands with both CVS Health and the American Lung Association to help promote a tobacco-free lifestyle for all Louisianans.

CVS Health's partnership with LUNG FORCE is part of Be The First, their five-year, $50 million commitment to helping deliver the first tobacco-free generation through comprehensive education, advocacy, tobacco control and healthy behavioral programming.

In order to maximize our enrollees' chance of success, Aetna will provide coverage for effective tobacco cessation coaching programs, such as Get Help/Quit Smoking and Start to Stop®:

- **Population:** Enrollees 18 years of age and older who smoke; enrollees under the age of 18 may enroll with written consent from their parent or legal guardian.
- **Scope:** Procedure codes 4000F, 4001F, 99406, 99407, and S9453. This value-added benefit is not an existing Louisiana Medicaid covered benefit.
- **Proposed copayments:** A copayment will not be required for either program.
- **How the benefit will be provided:**
  - **Get Help, Quit Smoking**. The Smoking Cessation Trust is the provider. Smoking Cessation Trust (the Trust) resources are available to those who live in Louisiana and who smoked a cigarette prior to September 1, 1988. Aetna will contract with the Trust to go **above and beyond** to cover these same services on a fee-for-service basis for enrollees who do not qualify under the Trust. This program will be offered to enrollees who are qualified. The following resources are available to program participants:
    - Office visits and counseling with smoking cessation service providers.
    - Unlimited toll-free calls to the program quit line, which is available 24/7.
    - Access to a quit coach who creates a personalized quit program for each participant.
    - Online smoking cessation information and tools, as well as printed educational/motivational materials.
  - **Start to Stop Program®:** MinuteClinic Diagnostic of Louisiana, L.L.C. is the provider. Enrollees 18 years of age and older are eligible this program, which offers face-to-face counseling with a nurse practitioner. The program includes the following:
    - A one-on-one consultation with a practitioner, including a nicotine-dependence assessment
    - An individualized smoking cessation plan and education based on the enrollee's needs and goals
    - Ongoing coaching and support in the enrollee's efforts to quit smoking
- **Oversight:** We will utilize the Aetna Better Benefit platform to track and monitor eligibility, engagement, effectiveness, and spend of this benefit. Program effectiveness will be evaluated by monitoring enrollee health outcomes and measuring before and after costs related to smoking.
- **PMPM:** The PMPM cost for tobacco cessation services assuming an enrollment of 375,000 members is [redacted]

Vision Benefits for Adults

Many Louisianans struggle to afford the corrective eyewear needed to help them excel in their daily lives. Improper or lack of corrective eyewear is a common and significant barrier that affects driving, classroom learning, job performance, and quality of life. For this reason, Aetna is committed to providing up to $100 annually toward the corrective eyewear our enrollees need:

- **Population:** Enrollees 21 years of age and older
- **Scope:** No procedure codes; enrollees will receive $100 annually toward eyewear (frames, lenses for glasses, and contact lenses). This value-added benefit is not an existing Louisiana Medicaid covered benefit.

- **Proposed copayments:** A copayment will not be required.
- **How the benefit will be provided:** Louisiana Vision Supplies, LLC is the provider. Referrals are not needed to see an in-network vision provider. Enrollees can find a vision provider in our provider directory online at www.aetnabetterhealth.com/louisiana, via the enrollee mobile app, or by calling Enrollee Services or Care Management. Enrollees can find information regarding their remaining available benefits by contacting Enrollee Services, their care manager, or via the enrollee app or enrollee portal.
- **Oversight:** We will utilize the Aetna Better Benefit platform to track and monitor eligibility, engagement, effectiveness, and spend of this benefit. Our dedicated Oversight staff will conduct monthly reviews of Louisiana Vision Supplies, LLC. to ensure performance, compliance with the terms and conditions of their contract, and compliance with the terms of the Healthy Louisiana contract. All providers must be approved through Aetna's provider credentialing process.
- **PMPM:** The PMPM cost for vision benefits assuming an enrollment of 375,000 members is [redacted].

Value Added Services Actuarial Certification

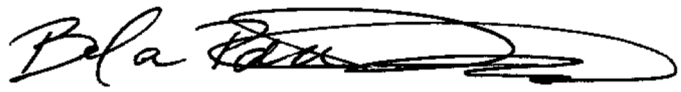
Actuarial Certification

I, Bela Patel Fernandez, am a Senior Director of Actuarial Services for the Aetna Medicaid organization and a member of the American Academy of Actuaries. I meet the qualification standards established by the American Academy of Actuaries.

In my opinion, the assumptions used to calculate the value-added services in this memorandum are reasonable and consistent with Aetna's expectations. These assumptions were determined by using my best judgment augmented with clinical information from the Centers for Disease Control and Prevention. The cost estimates for services were determined by using Aetna historical experience.

To the extent that Aetna's actual enrollment differs from the membership assumed in this calculation, annual expenditures may vary significantly from these estimates. Aetna guarantees an overall spend for value added services of [redacted] per member per month.



Bela Patel Fernandez
Senior Director, Actuarial Services
April 16, 2019

Statement of Commitment

The aforementioned benefits are tailored to the Louisiana population. Aetna commits to providing all of the value-added benefits proposed in this response for the entire 36-month term of the initial contract and for any extensions, if applicable.

2.10.4 Population Health

As an avid supporter of healthy lifestyle afterschool activities for children of all ages, Aetna partners with the Boys & Girls Clubs of America to celebrate and recognize all of the hard work the Clubs do throughout the school year. Aetna CEO Rick Born is a board member of the Baton Rouge Boys & Girls Club and supports several programs for school-aged youth focused on academics, health, and character.

2.10.4 Population Health

Aetna acknowledges, understands, and will comply with all of the requirements of **Section 2.6** of **Appendix B: Model Contract**.

Improving Population Health for Medicaid Populations (2.10.4.1)

Population health improvement is essential to our efforts to achieve the Triple Aim of better health, better care, and lower costs. With our experience serving Louisianans since 2015, Aetna understands the needs of the local population; we are deeply invested in Louisiana's local communities, and we have demonstrated success improving the lives and health of enrollees with complex physical and behavioral health needs. Drawing on the expertise of our national Health Care Equity team, Aetna brings clinical, financial, social, and operational data together to create actionable analytics that identify and address health disparities in at-risk populations. Our Population Health Strategic Plan outlines our approach, which aligns with the Louisiana Medicaid Managed Care Quality Strategy (as required in **Section 2.6.1.1** of the **Model Contract**) and with National Committee for Quality Assurance (NCQA) standards.

Aetna's population health program integrates staff from departments across the organization, including Medical Management (i.e., Care Management and Utilization Management), Behavioral Health, Quality Management, Pharmacy, and Community Outreach into a multidisciplinary team of subject matter experts. Our population health approach allows us to assess the health status and health needs of the entire population we serve in Louisiana and target subpopulations (e.g., African-American women at risk for breast cancer and specific parishes with high chronic disease burden). This approach incorporates adapting, implementing, and evaluating evidence-based interventions that are designed to improve the health of individuals, communities, and the population of the state as a whole, such as our Healthy Kids program focused on preventive care. We efficiently provide care for enrollees in our population health programs in a manner that is consistent with their culture, values, linguistic preferences, and health resource needs. For example, we refer enrollees to the Children's Coalition for Northeast Louisiana, which serves the Hispanic population in the region, for parental education and prenatal care linkages.

Our population health strategy is data-driven, evidence-based, and person-centered. Our programs emphasize assisting enrollees to navigate the health care system and to address their social needs. We recognize the unique needs of our enrollees and understand the community characteristics that contribute to our population health outcomes (e.g., availability and affordability of healthy food options; number and location of bus stops). Our current initiatives support Aetna enrollees as follows:

- **Healthy Kids** focuses on prevention, childhood immunization, and outpatient services and follows Early and Periodic Screening, Diagnostic and Treatment (EPSDT) recommendations published by Centers for Medicare & Medicaid Services (CMS) and NCQA Healthcare Effectiveness Data and Information Set (HEDIS) technical specifications for enrollees under age 21
- **Healthy Pregnancies and Babies** promotes prenatal and postpartum care, emphasizing screenings, evidence-based interventions, including initiation and engagement of alcohol and other drug abuse or dependence treatment, and collaboration with providers
- **Breast, Cervical, and Colorectal Cancer Screening** promotes health screenings and wellness visits
- **Flu Vaccination Program** incorporates educational activities to promote annual flu vaccination
- **Diabetes Management Program** supports self-management of chronic conditions, with specific emphasis on diabetes control for enrollees with schizophrenia and bipolar disorder
- **Reduction of Hospital Readmissions** uses discharge planning, medication reconciliation, and follow-up with the primary care provider (PCP) and/or specialist to reduce unnecessary readmissions
- **Antidepressant Medication Management** improves antidepressant medication adherence rates for those who lack access to behavioral health (BH) specialists

- **Reduction of Emergency Department Visits** reduces unnecessary emergency department (ED) utilization that leads to hospital stays of two days or more

Aetna has demonstrated our commitment to reducing disparities that advance health equity. Our Health Care Equity and Cultural Competency programs implement U.S. Department of Health and Human Services (DHHS) Office of Minority Health National Standards for Culturally and Linguistically Appropriate Services (CLAS) in Health and Health Care. They follow DHHS' *A Blueprint for Advancing and Sustaining CLAS Policy and Practice,* to inform the annual revision of our policies. Aetna has a team dedicated to predictive analytics to identify moderate- and high-risk populations prior to a crisis or increased utilization. We use our Health Care Equity, Demographic Distribution for ED Utilization, and Opioid dashboards to identify and stratify health outcomes by race/ethnicity, gender, geography, and other factors for the programs described herein. We use robust population data analytics and nationally recognized quality metrics to analyze data and determine root causes of poor health outcomes and disparities. The resulting analysis combined with our policies and evidence-based practices (EBPs) allows us to focus our activities for distinct enrollee subpopulations throughout the continuum of care.

Aetna Inc. has collaborated with the National Council on Behavioral Health to assess the impact of trauma on enrollees. Aetna has trained all staff on trauma-informed principles and practices, including motivational interviewing, and is working with providers in a yearlong collaborative to assess and develop standards for trauma-informed care (TIC) for our enrollees.

We have invested in dedicated staff to address health equity and cultural competency. This Louisiana-based staff includes a full-time health care equity (HCE) director who supports Aetna's population health efforts through collaboration with State and community agencies, developing relationships to provide effective community education and outreach, and analysis of Aetna and publicly available data to identify opportunities for population health interventions. The HCE director is a certified technical assistance provider for the Smarter Lunchrooms Movement and collaborates with the Well-Ahead Healthy Schools Training Krewe to support local schools' strategies to foster healthy food choices for Louisiana children. She conducts annual trainings with Aetna's community outreach coordinators on the health status of the Louisiana population, assisting them to plan events in communities of high need for specific health concerns, and serves as a resource for Aetna care managers to aid in the identification of resources to address enrollees' social determinant of health (SDOH) needs.

Our population health approach includes prevention and wellness programs that are tailored to our enrollees' medical, behavioral, and social determinant needs (e.g., housing, transportation, physical safety, and food insecurity). The goal of our approach is to improve health outcomes and reduce health disparities while serving as a responsible steward of State resources. We emphasize education and self-management, integrating care management and utilization management to close gaps in care. Enrollees' care management teams link them to community-based resources for their non-medical needs (e.g., peer support). Our breast cancer community health worker (CHW) program is one example of how our Population Health team addresses disparities in Louisiana. In 2017, Louisiana had the 28th-highest incidence and the second-highest mortality rate of breast cancer in the country. Breast cancer was the second-leading cause of cancer deaths in Louisiana and in the United States.[1] Additionally, African-American women have the highest death rate of all racial and ethnic groups and are 42 percent more likely to die of breast cancer than white women are.[2] Our breast cancer CHW program was expanded in

1 Louisiana State University, Louisiana Tumor Registry, "Louisiana Cancer Facts and Figures 2017": accessed March 28, 2019; https://sph.lsuhsc.edu/louisiana-tumor-registry/data-usestatistics/statistics/

[2] American Cancer Society, "Cancer Facts and figures for African Americans 2016-2018": accessed March 28, 2019; https://www.cancer.org/content/dam/cancer-org/research/cancer-facts-and-statistics/cancer-facts-and-figures-for-african-americans/cancer-facts-and-figures-for-african-americans-2016-2018.pdf

2019 to further target this identified disparity for African-American women. Our CHWs are collaborating with the Louisiana Breast and Cervical Health Program (LBCHP) to support education on breast cancer screenings and linkages to screening resources. They work closely with community and faith-based organizations, such as Louisiana Baptists and Congregational Health Services, to identify educational prevention opportunities and to offer linkages to health screenings for both Aetna enrollees and the community at-large. Our CHWs serve as an integral member of the enrollee's multidisciplinary care team (MCT). CHWs work to address enrollees' immediate needs, such as access to transportation and access to preventive and early intervention activities. Our current program identifies health outcomes using the HEDIS Breast Cancer Screening measure. We are developing the capability to measure other outcomes including changes in knowledge, self-management, and lifestyle, such as increased exercise and tobacco cessation. We look forward to collaborating with LDH to implement the Penn Center for Community Health Workers IMPaCT model.

Baseline Health Outcome Measures and Targets for Improvement (2.10.4.1.1)

Aetna's approach to identifying baseline health outcome measures and targets for health improvements is **data-driven, integrated, and focused on maximizing enrollee health**. Our multidisciplinary Population Health team conducts an annual review of our HEDIS, Consumer Assessment of Healthcare Providers and Systems (CAHPS), Agency for Healthcare Research, Health Resources and Services Administration, CMS Child and Adult Core Sets, and State-defined measures (as presented in **Attachment G** of the **Model Contract**). Aetna creates reports for a wide range of HEDIS measures (e.g., Breast Cancer Screening, Comprehensive Diabetes Care HgA1c testing, Adolescent Well Care, and Antidepressant Medical Management), identifying differences by race, ethnicity, gender, language, parish, and age. We supplement analysis of internal data with review of publicly available population and subpopulation health data from sources such as County Health Rankings and the LDH's Annual Health Report Card. Using the findings of this multifaceted analysis of data, Aetna identifies baseline health outcome measures for our enrollee population and subpopulations which align with the aims, goals, and objectives of the Louisiana Medicaid Managed Care Quality Strategy.

Aetna identifies targets for health improvement through our continuous quality improvement (CQI) process. We set targets for improvement using historical measures, benchmarks on national or State-defined quality metrics, and in accordance with LDH requirements. When health care inequities are identified, Aetna establishes targets for the subpopulations experiencing disparities based on the health outcome measures of the highest performing subgroup, and we set targets for improvement in health outcome measures for the population as whole. Each year, through a comprehensive, formative, and impact evaluation of our initiatives, the Population Health team determines whether identified populations have been served as intended and the degree to which targets for health improvement have been met. Thorough review of this evaluation by the Quality team leads to changes in our larger population health program. For example, through analysis of our population health initiatives focused on maternal health, we identified the need to incorporate interventions focused specifically on pregnant women with substance use disorders (SUD) and adjusted the program accordingly.

According to the American Diabetes Association, Louisiana has the fifth-highest rate of diabetes in the country, with over 450,000 individuals diagnosed with diabetes in the state.[3] Our Diabetes Management program is designed to improve health outcomes statewide by making sure enrollees with diabetes get needed services including retinal exams, blood pressure checks, and hemoglobin HgA1c monitoring, including using remote patient monitoring for enrollees who have difficulty leaving their home

[3] American Diabetes Association, "The Burden of Diabetes in Louisiana": accessed March 25, 2019; http://main.diabetes.org/dorg/PDFs/Advocacy/burden-of-diabetes/louisiana.pdf

environment for services. Our current program is focused on improvement for the entire population of Aetna enrollees with diabetes. We plan to increase efforts in specific regions and with specific subpopulations based on our dashboard data review described previously. Our national Health Care Equity team has developed a Diabetes Disparities Resource Workbook to assist care management teams in serving populations facing disparities in diabetes-related health outcomes. Locally, we supported the American Diabetes Association Camp PowerUp program for higher risk youth in Region 1 at the Sojourner Truth Neighborhood Center. We use HEDIS Comprehensive Diabetes Care metrics as health outcome measures to assess program results. Aetna identified our target for improvement on both metrics at two percentage points for HEDIS 2018 over HEDIS 2017 scores, in alignment with LDH requirements. Additionally, our Population Health team has identified food insecurity as an important SDOH for diabetic enrollees and is integrating a food-insecurity metric to our Diabetes Management Program in 2019.

Population Health Status and Identification of Subpopulations (2.10.4.1.2)

Our approach to measuring population health status and identification of subpopulations **is supported by Aetna's robust health information technology capabilities,** and it integrates a wide range of data sources, as illustrated by **Table 2.10.4-1**. Aetna's Population Health team integrates data from the sources described in this section to complete our annual, proprietary Population Assessment and Membership Profile. The Population Assessment and Membership Profile forms a comprehensive picture of the physical and behavioral health and social determinant needs of our membership, at the state and parish level. This process assists in the identification of population health gaps and opportunities, and informs the development of our Population Health Strategic Plan. Through multiple data sources we use to identify subpopulations, we collect self-reported demographic information from enrollees, including geographic location, age, ethnicity, race, gender identity, sexual orientation, religion, income source, primary language, marital status, and disability status.

Table 2.10.4-1: Data Sources to Analyze Factors Related to Health and Identify Subpopulations

Data Source	Description	Factors Analyzed	Subpopulations
Consolidated Outreach and Risk Evaluation (CORE™)	Aetna's proprietary predictive modeling algorithm used to risk-stratify enrollees	Utilization of the ED, inpatient admissions, and medical, BH, and pharmacy claims	Subpopulation of enrollees with high utilization or at high risk for ED visits or inpatient admission
HMS Elli	Monthly prospective and retrospective risk analyses, from the point of enrollment	Enrollee diagnoses, historical utilization, and SDOH data	Subpopulation of enrollees with high utilization or multiple chronic conditions
Enrollment Files	Self-reported demographic characteristics; assigned PCP, limited medical history, Medicaid eligibility categories	Complete demographic information	Subpopulations of enrollees with special health care needs (e.g., enrollees with serious mental illness)
Health Needs Assessment (HNA)	Self-reported health status; functional and social determinant needs	Social, familial, cultural, and physical environmental factors	High social need subpopulations, including housing, food insecurity, physical safety, and transportation
Enrollee Self-referrals	Self-reported demographic characteristics, health status, functional needs, and SDOH data collected for referrals to appropriate Aetna, Office of Public Health (OPH) programs, or community-based organizations (CBOs)	Complete demographic information; enrollee diagnoses	Subpopulations with barriers to accessing care with social service needs or with diagnoses qualifying for specific OPH programs; care management or community-based referrals

Data Source	Description	Factors Analyzed	Subpopulations
Provider Referrals and Z-Code Data	Provider-reported health status, functional needs, and SDOH data	Demographic factors, enrollee diagnoses, SDOH data	Subpopulations experiencing poor health outcomes, or with diagnoses qualifying for OPH programs, integrated care management (ICM), or CBO referrals
Cost and Utilization Reports	Details on utilization of services and per member per month costs	Enrollee diagnoses; trends in utilization of services and cost	Subpopulation of enrollees with high utilization or high costs (i.e., super-utilizers)
Health Care Equity Contact Assessment	Self-reported demographic characteristics, health status, and functional and social determinant needs	Complete demographic information and SDOH data	Subpopulations with social determinant needs (i.e., food insecurity, transportation, personal safety, and housing)

In addition to the Population Health Assessment and Membership Profile, Aetna collaborates with community stakeholders and LDH to identify key subpopulations. For example, our collaboration has identified subpopulations by disease incidence (e.g., neonatal syphilis), national crisis (e.g., the opioid epidemic), and natural disasters (e.g., flooding). Louisiana reported 59 cases of congenital syphilis in 2017—a rate of 93 cases per 100,000 live births. In addition, across the state, African-American women have disproportionately high rates of low birthweight (15.2 percent compared to 10.6 percent for the population) and preterm birth (15.6 percent compared to 12.3 percent for the population). Our Healthy Pregnancies and Babies program targets these adverse outcomes and uses a combination of HEDIS outcomes measures (e.g., timelines of postpartum care) and LDH-identified measures (e.g., 17P injections, syphilis testing rates) to evaluate the effectiveness of the program and set targets for health improvement. Outcomes from our Healthy Pregnancies and Healthy Babies program include the following:

- Syphilis testing: from to 27.3 percent in HEDIS year 2016 to 84.2 percent in HEDIS 2018
- 17P injections: from 9.8 percent in HEDIS 2016 to 19.01 percent in HEDIS 2018
- Timeliness of postpartum care: from 58.28 in HEDIS 2016 to 63.5 percent in HEDIS 2018

Key Determinants of Health Outcomes and Reducing Disparities (2.10.4.1.3)

From the point of enrollment, throughout the course of their care, we continuously evaluate the key determinants of health outcomes of our enrollees and their respective communities. Starting in 2019, as a first adopter of Elli in Louisiana, Aetna will gain access to four years' of claims data collected from all managed care organizations in the state. The data will be available to us on day one of an individual's enrollment and enables us to engage enrollees in the appropriate tier of care management immediately. Aetna also contacts all enrollees to attempt to complete the HNA within 30 calendar days of enrollment. The HNA addresses key SDOH, including food insecurity, housing, transportation needs, and personal safety (please refer to subsection **Approach to Collection of Social Determinant Data** below**)**.

Aetna uses multiple data elements and analyses to identify opportunities to address disparities. The data is integrated by the HCE director into our proprietary Population Assessment and Membership Profile. We use these to identify key determinants of health outcomes at the regional and parish level. This allows Aetna to define health service needs for its population and subpopulations, to identify barriers to accessing care, and to guide strategies to develop targeted interventions to reduce disparities including the following:

- Promoting the delivery of health care services that meet the needs of culturally and linguistically diverse minority subpopulations—Aetna has hired two certified translation and language interpreters on its Enrollee Services team to serve the needs of Spanish-speaking enrollees, who comprise 1.2 percent of our overall membership and 2.6 percent in Region 1

- Identifying opportunities for collaboration with CBOs and State programs based on evaluation of social and physical determinants of health data— our community outreach coordinators assist women to access Women, Infants, and Children and Supplemental Nutrition Assistance Program benefits
- Identifying hotspots for conditions and developing network solutions—Aetna contracts with CrescentCare to support the needs of enrollees living with HIV or AIDS in Region 1 (e.g., wraparound services including legal support, peer support, and case management)

Aetna developed a pharmacy-specific strategy to reduce access disparities. Aetna offers support to enrollees through the Community Pharmacy Enhanced Services Network (CPESN) comprised of community-based pharmacies that develop relationships with enrollees and support medication management, social determinant needs identification, and care management. Aetna's Pharmacy team has direct vendor oversight, acts as a liaison between the community pharmacy and Aetna ICM teams, and supports identification of enrollees for referral. The program focuses on identifying enrollees at risk for adverse medication and health outcomes due to non-adherence and gaps in care, and actions are implemented to create a care plan that is shared with the enrollee's care team. CPESN pharmacists support enrollees to manage chronic conditions. In North Carolina, which has a significant rural population, CPESN pharmacies increased medication adherence rates by 4 to 5 percent over a 3-year period compared to non-CPESN pharmacies. Specifically, CPESN pharmacies saw a 5.8 percent increase in adherence to diabetes medications. Pharmacies in the CPESN network identify enrollees at high risk of opioid misuse and provide enrollee-specific education about their individual risk factors, dispense naloxone, and provide education to the enrollee or caregiver(s) about how to administer medications.

Integrated and Comprehensive Approach to Population Health (2.10.4.1.4)

As part of our population health approach, we emphasize health promotion and disease prevention through our ICM model. Our approach is supported by innovative health information technology solutions and it establishes data-driven initiatives with providers, working toward value-based payment arrangements that support population health. SDOH are addressed through provider and enrollee engagement, via community outreach strategies, and are integrated into our value-added benefits.

Integration of care management and population health: Aetna collects and analyzes social risk data from a wide range of sources, including the HNA, HCE Contact Assessment, enrollee and provider referrals, Z-codes, and Elli, as described in **Table 2.10.4-1**, and attempts to collect SDOH data on all enrollees. Our HNA currently asks questions such as, "Have you been hungry in the last 6 months? Do you have difficulty affording food? Do you use all of your food stamps each month if you receive them? Has transportation prevented you from getting to a medical visit? Do you feel safe in your home?" We integrate this with CORE, our proprietary predictive modeling algorithm, to risk-stratify enrollees, identifying enrollees with increasing health risks and high needs. The goal is to engage enrollees with the right level of clinical and social support at the right time. We provide population health interventions to enrollees at three levels of risk based on their individual needs. The subpopulation of enrollees identified with high risks and high needs (social, behavioral, or medical) are referred to the intensive level care management. Subpopulations with higher levels of social needs, such as transportation, housing, food insecurity, and personal safety are also risk-stratified and referred to the intensive, supportive, or population health level of ICM based on their whole health needs. For enrollees in these two levels, an MCT assesses physical, behavioral, and SDOH needs upon initial assessment, upon annual reassessment, or more often if indicated by a transition of care, change in status or another triggering event. All other Aetna enrollees are stratified to the population health level of ICM, and they receive quarterly mailers with information about prevention and wellness, including information on smoking cessation and weight management.

Population health management platform and other information sharing support: In support of our population health approach, Aetna engages in value-based purchasing (VBP) contracts with Louisiana

providers, which provide incentives for improved quality of care and lower costs for our enrollees. In 2018, 76 percent of Aetna enrollees had a PCP in VBP relationships and 51 percent of our total claims spend occurred through VBP arrangements (please refer to **Section 2.10.12** for complete details on our VBP arrangements). Our goal is to achieve 60 percent of our provider payments through VBP in 2020, 70 percent by 2021, and 75 percent by 2022. Aetna collaborates with high-volume providers to develop, promote, and implement targeted, evidence-based interventions for subpopulations experiencing health disparities. We deploy staff members and population health specialists (PHSs) to work directly with providers to educate them on the adoption and use of our population health management platform, and with the design and analysis of clinical workflows. Specifically, PHSs support our VBP providers to collect and understand population health data of their membership, with the aim of closing gaps in care and improving HEDIS measures on targeted outcomes. We are deploying a Pay-for-Reporting program to incentivize providers to collect social determinant data for enrollees using Z-codes. Our PHSs have access to a comprehensive suite of technology to support our providers. This includes access to Aunt Bertha, our repository for social needs, telehealth, and remote patient monitoring technology.

Population Health Specialists: Supporting Access Health's Maternal Care Coordination Pilot

Aetna PHSs identified a need for federally qualified health centers in our network to have timely reports of births to assist providers with improving their provision of postpartum care to new mothers. The Population Health team collaborated with Access Health to use available data to identify women's postpartum care needs, close gaps in care, and improve quality outcomes on the HEDIS Timeliness of Postpartum Care metric. PHSs worked with the Quality Management team to extract weekly reports of new mothers served by Access Health from LDH's Louisiana Electronic Event Registration System. Beginning in April 2017, specialists provided weekly reports on new live births to Access Health's maternal care coordinator (MCC) to inform them of new deliveries and assist them in identifying women to engage in postpartum care. The MCC met weekly with specialists to review enrollees needing care, remove barriers to care, and assure every effort was made to provide postpartum care within the HEDIS guidelines. The initiative also served to increase providers' actionable knowledge of women's need for postpartum services in a 21- to 56-day window after delivery. As a result of this program, Access Health increased its HEDIS Timeliness of Postpartum Care metric from 47.76 percent in 2016 to 63.28 percent in 2017, an improvement of almost 33 percent. The final 2017 HEDIS score also achieved the State target of 63.12 percent.

Enrollee and provider engagement: Aetna incorporates feedback from enrollees and providers regarding their satisfaction with our services, programs, and benefits into our population health programming. Enrollees are invited to complete satisfaction surveys (e.g., CAHPS) and providers complete an annual Provider Satisfaction Survey. Enrollees and providers voice any concerns about their experience with Aetna through the Enrollee Advisory Committee, Provider Advisory Council, and Hospital Advisory Committee. Through our grievance and appeals process, Aetna also learns about concerns regarding our population health program from providers and enrollees. All of this feedback is addressed by the Quality Management Oversight Committee, which includes enrollee participation. The quality management director incorporates this feedback into the annual Quality Assessment Performance Improvement plan evaluation. When necessary, this feedback also leads to updates to Aetna policies and procedures and informs training requirements for Aetna employees. As an example, through the grievance and appeals process, we learned about the need to complete a single case agreement so an enrollee with diabetes could acquire his insulin pack through a provider in his local community.

Integration with community outreach: We integrate community-based health and wellness strategies with a strong focus on SDOH, creating health equity and supporting efforts to build communities that are more resilient into our population health approach. Aetna understands the unique needs of Louisiana's populations and subpopulations, and we leverage our relationships with CBOs to provide preventive services and peer support to enrollees and to address access to care issues due to social determinant needs.

We conducted 467 outreach events with over 200 community organizations, including 98 health and wellness fairs, 24 sponsored conferences, and 22 back-to-school events. For example, the Louisiana Healthy Communities Coalition in Region 9, a predominately-rural region, identified gaps in access to wellness services. Based on this input, Aetna opted to participate alongside the Bogalusa Strong collaborative partnership of community leaders, businesses, and social service organizations in its Business on the Block program. With the support of Aetna's Community Outreach team, the eighth annual Business on the Block event was the first year that the event included a health and wellness component. Aetna provided health screenings, offered flu shots, held yoga and line-dancing sessions, and set up an Aetna informational table, providing resources to over 1,000 potential and current enrollees.

Using value-added benefits for enrollees to address population health: Our enrollee value-added benefits are uniquely designed to address Louisiana's population health goals, as outlined in Creating a Blueprint for our Future. According to LDH, more than 400 Louisianans died of an opioid overdose in 2017. [4] With opioid addiction on the rise, providers are seeking effective alternative pain management options for their enrollees. To support these efforts, Aetna will offer coverage for acupuncture and chiropractic services.

Other Population Health Considerations (2.10.4.1.5)

Aetna's population approach incorporates our adoption of national opioid strategy, a commitment to providing trauma-informed care for enrollees, and our emphasis on building the capacity of local communities through strategic investment.

Aetna's national Medicaid opioid strategy: Aetna has developed a multifaceted, national strategy for combating the complex issue of inappropriate use of opioids, focused on prevention, intervention, and support. We are implementing this strategy in Louisiana, and 15 other states where we operate Medicaid plans. We bring our national expertise to our partnerships with local, state, and federal governments, as well as local stakeholder groups, such as first responders and public health agencies. Aetna emphasizes care coordination and continuity of care by reducing barriers that restrict access to SUD treatment, medication-assisted treatment, support programs, and non-pharmaceutical alternatives through our extensive provider network, use of telemedicine, remote patient monitoring, and our comprehensive Medicaid and value-added benefits package. We have created our Opioid dashboard, which uses pharmacy and medical claims data to trend key metrics to help us combat inappropriate use of opioids in Louisiana. Data from our Opioid dashboard shows our success in Louisiana; since January 2017, we have the following outcomes:

- Increased the rate of non-opioid treatment for chronic pain by 43.3 percent
- Decreased the rate of opioid prescriptions for enrollees with OUD by 42.9 percent
- Decreased the rate of a 7-day opioid prescription after an acute procedure by 71.5 percent

Aetna's transformation into a trauma-informed organization: According to the most recent report from Child Trends, 50 percent of children in Louisiana have experienced at least one adverse childhood event.[5] Aetna is undertaking a systemwide transformation initiative to develop a system that includes trauma-informed network capacity and addresses the impact of trauma, including adverse childhood experiences (ACEs), in our enrollee population. This transformation prepares all Aetna enrollee-facing staff to serve Louisianans who are particularly vulnerable because of ACEs and other experiences of trauma. Aetna subscribes to the following tenets as established by the National Institute for Trauma-Informed Care: We realize that trauma is common; we recognize how trauma affects individuals seeking care; we respond by implementing TIC best practices; and we resist causing additional trauma. In support

[4] "Panel of Experts Makes Six Recommendations to Fight the Opioid Epidemic in Louisiana": accessed March 16, 2019; http://ldh.la.gov/index.cfm/newsroom/detail/4991

[5] Sacks, Melissa, Murphey, David, and Moore, Christian, "Adverse Childhood Experiences: National and State-Level Prevalence": accessed March 28, 2019; https://www.childtrends.org/wp-content/uploads/2014/07/Brief-adverse-childhood-experiences_FINAL.pdf

of this initiative in Louisiana, over 128 of 136 (over 94 percent) Aetna employees have completed "The Urgency to Address Trauma" training and almost half have completed Taking a Deeper Dive training. By 2020, we anticipate that 100 percent of Aetna employees will have begun training in TIC.

Reducing Trauma for Foster Care Children

Each month, Louisiana serves more than 4,700 foster children, and more than half of these children are under the age of 5. In 2018, Aetna provided a $50,000 grant to Geaux 4 Kids, Inc. to support Project Geaux Bags. Geaux Bags is a project to help children in foster care in the first 24 hours of a new placement with a basic bag of right-sized necessities to make the first night in a new home or placement a little easier. Geaux Bags help to reduce the trauma children face being separated from their birth family or previous foster family. Aetna has targeted its donation to the expansion of the project to Region 5, where there is disproportionate need based on the number of children with Department of Child and Family Services involvement.

Strategic community investments: Aetna commits community investment dollars to programs that address physical health, behavioral health, prevention and wellness, housing, food insecurity, transportation, and personal safety needs of our enrollees and communities. Aetna's strategic community investments align with the five strategic priorities outlined in LDH's *Creating a Blueprint for our Future*. In 2018, $400,000 in community investment grants was made to 21 organizations throughout Louisiana, $300,000 from Aetna, and $100,000 from the Aetna Foundation.

Addressing Population Health in the First Year of the Contract (2.10.4.2)

Table 2.10.4-2 identifies Aetna's population health strategic goals for the first year of the contract, and presents activities, milestones (when applicable), and timeframes for each goal. Aetna will implement activities outlined in **Section 2.6** of the **Model Contract**, as required, and according to established timeframes. We will incorporate new activities outlined in the contract to our existing population health strategy as necessary (e.g., implementation of activities to prevent avoidable use of opioids and treat enrollees with opioid use disorder). Aetna will have a fully developed Population Health Strategy Plan document submitted to LDH by March 1, 2020 as per **Section 2.6.1.1** of the **Model Contract**.

Table 2.10.4-2: Aetna's Plans for Addressing Population Health in the First Year of the Contract

Goal	Activities/Milestone	Timeframe
Develop a Population Health Strategic Plan	Submittal and approval of a Population Health Strategic Plan, including baseline population health measures and targets for improvement, to align with LDH's selected population health priorities outlined in Section **2.6.1.1.1-2.6.1.1.11** of the **Model Contract**	By March 1, 2020
Conduct Population Assessment and Membership Profile	Review all population health data sources and complete the Aetna Population Assessment and Membership Profile templates	By March 31, 2020
Establish programs to address all LDH priority populations	Develop population health programs to address key health issues facing Louisianans (e.g., obesity, infant mortality, smoking cessation)	By December 31, 2020
Support LDH's public health initiatives and coordinate with existing public health programs	Conduct enrollee and provider education on programs; coordinate referrals with public agencies; participate in data sharing and complete data-related agreements	Ongoing throughout 2020
Increase capacity of existing VBP providers to collect SDOH data and refer enrollees to appropriate agencies	Identify gaps in VBP provider ability to collect SDOH data; educate all current VBP providers on our population health management platform and the collection of Z-codes; educate identified providers (at least 40) on the use of Aunt Bertha to identify resources for SDOH needs	Ongoing throughout 2020
Establish new VBP contracts with providers who serve relevant subpopulations	Network Management outreaches to at least 30 providers to explore the potential of developing VBP agreements; completion of at least 15 new VBP arrangements	Ongoing throughout 2020

Goal	Activities/Milestone	Timeframe
Evaluate Population Health Programs	Review all quantitative and qualitative population health data sources and complete process and impact evaluation of Aetna's population health programs	Ongoing throughout 2020
Expand collaboration and care management referrals to CBOs	Complete assessment of current collaborations and engage 10 new organizations to address key determinants of health outcomes, in particular agencies to address ACEs and interpersonal safety	Ongoing through 2020
Required reporting to LDH	Submit all required reports and updates as outlined in **Section 2.6** of the **Model Contract**	By the LDH-established date
Increase enrollee and provider awareness of OPH programs and CBO resources	Create informational materials about Aetna's collaborations with public health agencies and community-based resources; dissemination of materials to all enrollees and contracted providers	Ongoing through 2020
Advance use of EBPs across population health programs	Conduct literature reviews to identify best practices for population health interventions, and include enrollees of target populations to tailor EBPs to the local environment and culture	Ongoing through 2020
Expand awareness of CLAS standards	All staff receive training on CLAS standards	Ongoing through 2020
Provider, staff, and contractor training	All appropriate providers, staff, and designated contractor staff are trained to understand and collect SDOH data; staff are trained to document SDOH data in the electronic care management platform	Ongoing through 2020

Experience Utilizing and Approach to Collecting SDOH Data (2.10.4.3)

Aetna collects and utilizes data regarding SDOH to improve the health status of targeted populations. Aetna's approach to data collection and utilization fosters enrollee engagement in self-reporting their social determinant needs, involves Care Management and Enrollee Services staff, and includes PCPs and other providers. In 2018, Aetna began stratifying data across demographic characteristics to identify social determinant of health disparities in our population and subpopulations. For example, by aggregating HCE Contact Assessment data, we identified that 34 percent of enrollees need a dentist. We offer dental care as an enrollee value-added benefit (please refer to **Section 2.10.3** for complete details). We are continuously developing new ways to stratify social determinant data to identify disparities, and learn from best practices developed in Aetna health plans across the country.

Approach to Collection of Social Determinant Data

Aetna uses enrollee-level demographic and social risk data to target interventions to improve population health. Our approach to the collection of SDOH data includes collection of both individual-level self-report and claims data and internal and publicly available population-level data. We analyze this data annually, and it informs the development of our proprietary Regional Health Profiles, Population Assessment, and Membership Profile where specific reference to enrollee food, housing, transportation, and personal safety are addressed. In addition, our ED Utilization Dashboard identifies opportunities to reduce preventable ED visits that may be due to health inequities, such as a lack of access to preventive care or poor housing conditions. The specific strategies Aetna uses to collect SDOH data include the following:

HNA: Aetna contacts 100 percent of enrollees, using multiple outreach attempts, to complete the HNA within 30 days of enrollment. This allows for stratification into an appropriate level of service and enrollment in the care management program immediately, if the need is identified. A comprehensive assessment is completed for 100 percent of enrollees who responded that they have a physical, behavioral, or any social determinant need. The comprehensive assessment is completed annually or more often when required by a change in health status, transition of care, or a change in social need (e.g., new homelessness). Aetna looks forward to and will implement the LDH Health Needs Assessment Instrument (**Section 3.1.15** of the **Model Contract),** when it is available**.**

Health Care Equity Contact Assessment: The Health Care Equity Contact Assessment assists with documenting, tracking, and reporting on enrollees' social determinants needs, inclusive of housing, transportation, food insecurity, and personal safety, and identifies enrollees who may benefit from additional interventions and education to address them. The demographic characteristics included in the Health Care Equity Contact Assessment include race, ethnicity, gender, sexual orientation, and geographic location, among others. Staff on the enrollee's MCT conducts the Health Care Equity Contact Assessment for all enrollees engaged in care management, and documents self-reported SDOH data in our electronic care management system. The intent is for the captured SDOH data to be incorporated into the development of the individualized person-centered care plan. When they identify a social determinant need, they can use our technology, such as Aunt Bertha, connect with Aetna's housing specialists, or engage CBOs to identify resources to meet their needs. For example, almost 20 percent of our enrollees who completed the HCE Contact Assessment reported that they sometimes or often did not have enough food. Through Aunt Bertha, an enrollee in Shreveport facing food insecurity can locate a food pantry, such as Noel Neighborhood Ministries.

Social determinant of health data we collect at the **population level** primarily derives from Community Commons, State Health Improvement Plans, and Community Health Improvement Plans. Community Commons is an online resource that aggregates and reports on publicly available data from a wide range of sources (e.g., U.S. Census Bureau and American Community Survey, Centers for Disease Control and Prevention WONDER, 500 Cities, etc.). This data is aggregated into a Community Health Needs Assessment by parish, and highlights social determinant needs of communities, including transportation, housing, and food security, in addition to a range of other economic, cultural, and physical environmental factors. Aetna has collaborated with U.S. News & World Report to create a database that can identify risk in 10 areas of social determinants and can compare any two cities across the United States.

Addressing Gaps in Care and Health Literacy through our Healthy Kids Program

Aetna has experience using population health data to identify gaps in care that affect our membership. We identified gaps in preventive care for children and adolescents as a priority issue affecting our enrollees in Louisiana. A root cause analysis identified gaps in health literacy of parents as a social determinant affecting enrollees' ability to access pediatric preventive care. Our Healthy Kids program is designed to increase use of preventive and outpatient services and follows EPSDT recommendations published by CMS and NCQA HEDIS technical specifications for improving health outcomes for enrollees. Without preventive care or treatment, pediatric and adolescent populations are at greater risk for poor health outcomes, such as childhood obesity, diabetes, and exposure to communicable diseases.

The Healthy Kids program enhances enrollee knowledge by increasing access to easy-to-understand information related to the importance of wellness exams and immunizations. Information about our program is distributed by enrollee newsletter, website, flyers, and the enrollee handbook, and based on cultural or linguistic minority enrollee needs. Specific interventions include the following:

- Updating the Aetna website to include an activity calendar, interactive activities explaining when to get annual wellness checkups, developmental screenings, and immunizations, along with periodicity tables and immunization schedules based on the enrollee's stage of growth and development
- Sending enrollees newsletters, mailers, flyers, and text messages throughout the year, with a focus on the importance of getting annual wellness examinations and needed tests or screenings
- Making interactive phone calls to enrollees or their parent regarding the importance of annual wellness screenings, through which they are prompted to schedule an appointment with their PCP
- Providing information through Enrollee Services and Care Management about the benefits of our program during outreach calls, and assisting in the coordination of care with the enrollee's PCP

Children who attend well visits and dental visits, as well as receive shots, earn rewards through our **Healthy Milestones Incentive Program**. Aetna is developing evaluation tools to determine the return on investment for the activities described.

Aetna conducts an annual evaluation of the Healthy Kids program to assess overall effectiveness of our initiatives, including opportunities for CQI. The evaluation of the Healthy Kids program identified potential barriers enrollees face in participation and associated opportunities for improvement. For example, we identified that enrollees' PCP may not communicate to their parent or legal guardian the need for an annual wellness visit and/or immunizations. To address this barrier we are conducting provider education to encourage office managers to schedule well-child visit appointments in advance and to encourage providers to complete all preventive testing and screening during the annual wellness visit. In addition, our Quality Management department trends HEDIS measures, such as changes in disparities for subpopulations, to assess quality performance. **Table 2.10.4-3** demonstrates some of the outcomes of the Healthy Kids programs. In measurement year 2018, Aetna achieved the State Target Goals for each of the measures in **Table 2.10.4-2**, three of which were not met in the previous measurement year.

Table 2.10.4-3: Aetna Healthy Kids Program Outcomes

Measure	HEDIS 2016	HEDIS 2017	HEDIS 2018	State Target Goal
Adolescent Well Care	31.71%	42.82%	46.72%	40.69%
Well Child - 15 Month	N/A	53.94%	63.99%	62.06%
HPV for Female Adolescents	N/A	15.28%	30.17%	21.76%
Immunization Adolescents Combination 1	N/A	63.66%	80.05%	77.62%

The Healthy Kids approach provides a model for developing and implementing prevention and population health management programs to encourage improved health and wellness among enrollees (an LDH population health priority described in **Section 2.6.1.1** of the **Model Contract**). The process begins with data-driven identification of a gap in preventive care stratified by subpopulation and planning targeted interventions to impact quantifiable outcome measures. It incorporates assessing community resources and development of strategic collaborations with CBOs and other external stakeholders. This approach can be applied to multiple health priorities, as outlined in our Population Health Management Strategy.

Contracting with Community-based Organizations and OPH (2.10.4.4)

Aetna will collaborate with the LDH, OPH, and CBOs to align population health strategies, and address socioeconomic, environmental, and or policy domains. Aetna's approach to contracting with CBOs and OPH to expand population health improvement strategies is in alignment with our broader population health strategy and is based on an in-depth understanding of the medical, behavioral, and social determinant needs of our membership. We use data about the adequacy of our network-specific geographic areas to inform recruitment of providers of various types to meet enrollees' needs. We use publicly available data and leverage data tools (e.g., Community Commons) to identify food deserts and areas of high chronic disease burden to assist with selection of strategic community investments and collaborations with CBOs. We listen to the experiences and concerns of our enrollees and we respond to issues identified by LDH and other public agencies.

Locally, we have entered into collaborative agreements with multiple CBOs, including LBCHP. Our current agreements define data-sharing responsibilities and reporting requirements. We seek to continue to develop these agreements into formal contractual relationships in 2020 and beyond. In multiple Medicaid markets, including Ohio, Texas, and Virginia, we contract with CBOs to provide care coordination and care management, and wraparound services to address social determinant needs of our enrollees. Aetna contracts with local area agencies on aging, and supports them to develop their business models, health information technology capacity to exchange data, and overall capacity to provide services to our enrollees. Our contracts define payment arrangements, quality assurance and quality improvement targets, and roles and responsibilities for care coordination. Aetna will leverage this experience to develop its contracting with OPH and CBOs in Louisiana to further coordinate population health strategies.

2.10.4.5 Community Health Worker (CHW) Demonstration Project

Louisiana | Transforming Health Care | **Aetna**

2.10.4.5 Community Health Worker (CHW) [OPTIONAL]

Aetna understands, acknowledges, and will comply with all the requirements related to community health workers (CHWs) in **Section 2.6.3.2.3** of the **Model Contract**.

Piloting a Community Health Worker Demonstration Project (2.10.4.5)

Aetna is deeply invested in Louisiana's local communities, and we have demonstrated success improving the lives and health of enrollees with our current CHW program for enrollees with complex physical and behavioral health needs.

Aetna's Interest in this Opportunity (2.10.4.5.1)

Getting Enrollees Engaged in Care: CHW Success in Pennsylvania

In our Medicaid plan in Pennsylvania, Aetna's 35 CHWs were deployed to engage at least 500 enrollees in individualized care planning in 2017. The CHWs far exceeded their target, getting over 700 enrollees engaged.

Aetna is excited about the opportunity to expand its current CHW program and work with LDH to create a sustainable, scalable CHW program for all Louisiana Medicaid enrollees. Aetna understands the value of CHWs to improving enrollee health and includes them as key members of the Care Management team. Aetna has both employed and/or collaborated with CHWs in community-based organizations (CBOs) in Louisiana since 2015. In Arizona, in partnership with the Arizona Community Health Workers Association, our CHWs are teaming with our enrollees with serious mental illness and diabetes to address educational needs and diabetes health literacy. In Louisiana, our current CHW program is focused on Region 4 to evaluate and increase enrollees' access to breast cancer screenings and treatment. Acadiana Region 4 has the second-highest rate of breast cancer diagnosis combined for years 2017 and 2018. A large proportion of our enrollees in Region 4 are located in Lafayette Parish (36 percent), and 55 percent of those are women. Based on our internal data and communication with community stakeholders, we have the capacity to impact mammography screenings, education, and treatment options within identified communities within this parish.

Aetna values the role of our CHWs. We have seen the benefits of CHWs with some of our most complex populations. We believe it is critical to provide our enrollees a standardized, evidence-based CHW program that is fully integrated into the current system of care and that provides our enrollees with a trusted person that shares their sociodemographic characteristics. We affirm our interest in piloting the Penn Center for Community Health Workers' IMPaCT Louisiana model in a collaborative manner that is tailored to the needs of enrollees, offers services in their home communities, and that is sensitive to our enrollees' social, cultural, and linguistic needs.

Number and Location of Louisiana-based CHWs (2.10.4.5.2)

Aetna employs four, full-time community outreach coordinators (CHWs) who are fully trained, operate statewide, and work within our Breast Cancer Screening program.

Aetna's Current CHW Program in Louisiana: Aetna has implemented a combination of the Outreach and Enrollment Agent and Community Organizer and Capacity Builder Model adopted from the Rural Health Information toolkit to design the CHW Action Plan.[1] All Aetna CHWs participate in our comprehensive training program (a full description of the training program is provided in this section). Our overarching goals are as follows:

- Promoting population health by assisting individuals in their communities to adopt healthy behaviors
- Advocating for the health needs of individuals by assisting community residents in effectively communicating with health care providers or social service agencies

[1] Rural Health Information Hub, "Community Health Workers Toolkit": accessed March 28, 2019; https://www.ruralhealthinfo.org/toolkits/community-health-workers/2/models

- Acting as liaison or advocating and implementing programs that promote, maintain, and improve individual and overall community health
- Supporting enrollees with locally based CHWs who understand the community they serve to decrease fragmentation and increase integration across providers and care settings

In Louisiana, we hire CHWs as an integral part of our Care Management team and we collaborate with community-based CHWs to maximize the opportunities available to our enrollees. Aetna CHWs' multifaceted responsibilities and skills allow them to support enrollees' needs for medical and behavioral services and social determinants. They are trained to serve individuals in a person-centered, holistic manner, in alignment with the foundational principles of our population health approach, so that if a social need is identified our CHWs have access to the complete care team to help our enrollees. We currently have four full-time CHWs and collaborate with CBOs (e.g., Louisiana Community Health Outreach Network). Our CHWs assist enrollees to navigate the health care system and provide emotional and educational support and evidence-based home visitation. In Region 4, our CHWs contribute to our Breast Cancer Screening program, focusing on reducing the burden of late-stage breast cancer for women by increasing breast cancer screenings. CHWs are key to serving our enrollees. They provide education on the signs and symptoms of breast cancer, addressing social determinant barriers that limit access to preventive services, and link women to treatment resources. The Breast Cancer Screening program supports LDH's Taking Aim at Cancer in Louisiana initiative, which aims to increase early detection and impact breast cancer survival rates in the state.

Aetna CHWs serve individuals in a variety of settings. Our current model offers services to enrollees in community-based settings, meeting them where they are. By 2020, Aetna CHWs will be providing in-home services to enrollees needing CHW supports but lacking transportation. They will assist enrollees that may not understand the public bus system or may not understand the value of preventive health screenings. Our CHWs understand the challenges of the communities where they serve and help enrollees in need. For example, CHWs collaborate with Lafayette General Medical Center and Woman's Hospital Mammography Coach (a mobile health van) to increase awareness, offer resources, and provide breast cancer screenings in the faith-based community. Though our partnership with Congregational Health Services, which serves as an arm of Lafayette General Medical Center, our CHWs have direct access to 25 regional churches reaching over 2,500 enrollees of the Lafayette community.

An Aetna CHW in our Medicaid plan in Virginia assisted an enrollee with Parkinson's disease to transition home from a facility by linking him to community-based resources to adapt his home, and identifying both a durable medical equipment provider and a neurologist close to his home.

CHW training prepares our workers to assist enrollees in care transitions including discharge from a hospital or release from the criminal justice system. In these circumstances, CHWs help enrollees with navigating the health care system, assist with care coordination, and provide health education to increase enrollees' health literacy. We will expand our program statewide, and develop collaborations with community-based CHWs and organizations to address our enrollees' whole-person needs.

CHW to Member Ratio (2.10.4.5.3)

Aetna's current CHW to enrollee ratio for our breast cancer screening program in Lafayette Parish in Region 4 is 75 enrollees per community outreach coordinator (CHW). In implementing the IMPaCT Louisiana model as a pilot program, Aetna affirms its commitment to maintaining a ratio of no higher than 100 enrollees per 1 full-time CHW as stipulated in **Section 2.6.3.2.5** of the **Model Contract**.

Main Activities of CHWs (2.10.4.5.4)

Aetna community outreach coordinators schedule, plan, and participate in community outreach events organized to increase awareness of breast cancer screenings to Aetna enrollees, providers, and the community at large. As community organizers and capacity builders, we promote community action and garner support and resources from community organizations to implement new activities, such as

community health advisor pilot project with the Louisiana Breast and Cervical Health Program (LBCHP). CHWs also educate health care providers about community needs, bridging cultural gaps between providers and communities. The specific enrollee-facing activities of community outreach coordinators in the Breast Cancer Screening program include the following:

- Participating with care managers or other members of the enrollee's interdisciplinary care team to assist with breast cancer education to address any social or cultural barriers to screening, such as interpretation needs
- Assisting enrollees with applications to Women, Infants, and Children, Supplemental Nutrition Assistance Program, and other federal programs
- Supporting enrollees to schedule and attend appointments with providers
- Arranging non-emergency medical transportation to enhance appointment attendance and access to care
- Referring enrollees to needed community-based resources
- Performing social determinants screening, using the Health Needs Assessment (HNA) and Health Care Equity Contact Assessment (described in **Section 2.10.4**) to identify food insecurity, transportation, housing, and personal safety needs; using Aunt Bertha, an online social resource tool, to locate resources
- Documenting and tracking social needs directly into our electronic care management platform. CHWs can also track social services provided by Aunt Bertha and report any gaps to our System of Care team or our Care Management team
- Coordinating care, conducting preventive care education, and assisting with care transitions
- Assisting enrollees with technology solutions, including remote monitoring tools and telehealth, to improve ready access to care

Supervision of CHWs: Aetna has a structured supervision program as well as formal training for supervisors. Our supervisor-training program includes forms to document supervision, a supervision toolkit, and policies and procedures on providing effective supervision. Each CHW is required to report directly or indirectly to an Aetna-employed CHW clinical supervisor and meet weekly for supervision meetings. The CHW supervision process offers a key feedback loop that allows cultural information from enrollees served by CHWs to be communicated and infused back into our health plan practices, and provides an opportunity to solve for problems and address questions or challenges that arise in field-based settings. This structured supervision approach improves fidelity to a defined CHW model—Aetna CHWs will have the supervision necessary to implement the IMPaCT Model.

Supporting an Enrollee Experiencing Homelessness

In our Medicaid plan in Pennsylvania, Aetna has deployed CHWs to serve enrollees with special health care needs. For example, one of our CHWs is supporting an enrollee with multiple physical, behavioral, and social determinant needs. The enrollee is legally blind and deaf, they are recovering from a broken neck, and they have a history of alcohol and opioid addiction. The enrollee is also homeless, while trying to care for a 10-month-old infant. The enrollee reported to his CHW that he often went hungry, using his resources to buy formula for his child. The enrollee struggled to find work because he did not have the proper work boots or glasses he needed. Upon their first meeting, the CHW began by connecting the enrollee to a local food bank that provided him with food to last one month, and an appointment to return for more the following month. The CHW also provided the enrollee with a voucher to purchase the work boots he needed at Walmart and assisted him to get a new pair of glasses. The CHW linked the enrollee with a CBO to help cover half of his first month's rent in a new apartment. The enrollee is now employed, has his own housing, and is about to receive new hearing aids.

CHW Training (2.10.4.5.5)

All Aetna CHWs complete our intensive core competency training, which totals 133.85 instructional hours and occurs over a 90-day period. **Table 2.10.4.5-1** presents our comprehensive CHW training curriculum. Our training program prepares CHWs to perform the core competencies established by LDH and presented in **Section 2.6.3.2.6** of the **Model Contract**. We feel this standardized approach to core competencies assists in talent and performance management as well as development of programs that are scalable and sustainable. Aetna trains CHWs in stages based on what is most important to their work and progresses them through a training plan that builds skills over time and incorporates ongoing support and education. Notably, Aetna CHWs' training includes an introduction to trauma-informed care in support of Aetna's trauma-informed transformation, and emphasizes enrollee self-management to foster independence. Our CHWs come from enrollee communities and receive training in self-care. They are delivered in a manner that is fully accessible to and culturally responsive to our CHWs. Aetna CHWs complete a capstone project at the end of their core training to assess and validate understanding of learning objectives as well as their ability to re-create the documentation of processes and/or actions in our electronic care management platform. Each CHW has access to additional resources through the Aetna online Learning Performance Library, and receives training and competency testing to understand privacy and Healthcare Insurance Portability and Accountability Act (HIPAA) requirements.

- Advocacy and Multicultural Care

Making Sure CHWs are Trusted by the Communities They Serve (2.10.4.5.6)

To make sure our CHWs are trusted by the communities they serve, we intentionally hire individuals that have the background, experience, and local knowledge to carry out their multifaceted functions in specific local communities. Our CHWs come from the communities where our Aetna enrollees live and match the population they serve in racial/ethnic heritage, gender, and language and culture. Aetna CHWs attend annual trainings on cultural competency and participate in quarterly cultural conversations and annual trainings with the entire Aetna health plan staff. These educational opportunities help our CHWs be more effective for the population they are serving and sensitive to enrollees' values and experiences. Enrollees who are served by a CHW have the opportunity to provide feedback to Aetna via satisfaction surveys,

which allow the Population Health team to determine what additional steps can be taken to increase CHWs' ability to relate to the communities they serve.

Data Collection and Evaluation Related to Aetna's CHW Programs (2.10.4.5.7)

CHWs document encounters with enrollees, collecting data used to measure the effectiveness of the interventions and education provided to enrollees. For example, they collect health status and social determinant data in our internet-based Health Care Equity Contact Assessment via check box and drop-down enabled forms, using 4G-enabled tables or laptops with MiFi hotspots. By 2020, Aetna CHWs will be documenting HNA information directly into our electronic care management platform.

We believe that evaluation and continuous quality improvement are keys to successful scaling and sustainability of our CHW program. Aetna collects process and outcome data for its CHW program in the Medicaid plans where they are employed as a component of our population health approach. For example, in Louisiana we collect volume of telephonic contacts and face-to-face outreach; number of care plans that CHWs assist in developing; number of referrals CHWs make to providers and CBOs; and CHW caseload ratios. Our current program has begun to look at outcomes of health using Healthcare Effectiveness Data and Information Set data, including changes in outcomes in breast cancer screening. We are developing the capability to measure other outcomes of our CHW program, including changes in enrollee knowledge; enrollee self-management; and enrollee lifestyle changes (e.g., increased exercise, tobacco cessation, etc.). We commit to a future collaboration with the Center for Healthcare Value and Equity at LSU Health Sciences Center to design and implement an evaluation of the IMPaCT model using a randomly assigned comparison group.

Collaboration with the Louisiana Breast and Cervical Health Program

Aetna collaborates with LBCHP to improve access to timely breast and cervical cancer screening and diagnostic services for low-income, uninsured, and underserved women. Grant funding and ongoing assistance from our health care equity director, manager of marketing,, and Community Development and Community Outreach staff supports the development and piloting of a community health advisor (CHA) project. To assure equitable access for these early detection services, LBCHP attempts to reach the most medically underserved women throughout pilot parishes, utilizing effective, community-based, participatory approaches. These evidence-based approaches were adapted through partnerships with existing CHA programs in Louisiana, including the American Cancer Society and Cenla Medication Access Program, as well as national programs, such as the University of Alabama's REACH model. The outputs of the CHA pilot being tracked are as follows: the number of CHAs trained; the number of women educated about breast cancer; and the number of women referred for services.

Integrating CHWs with Providers (2.10.4.5.8)

Aetna understands how to use CHWs as part of our enrollees' care team to improve enrollee experience and reduce provider burden. They educate providers about enrollees' cultural needs and the local communities and environments where enrollees live. CHWs also assist providers with identifying and accessing resources necessary to meet enrollees' non-medical needs and addressing social determinants of health, such as food insecurity, personal safety, transportation, and housing. For example, CHWs may provide technical assistance for providers on how to use Aunt Bertha. CHWs act as members of the Provider Integration team, playing an important role in understanding provider needs, and may collaborate with our population health specialists to assist providers with understanding and using health and social determinant data about the enrollees they serve.

Contact Person and Lead Team Member (2.10.4.5.9)

Contact person: Rick Born, Chief Executive Officer, Aetna Better Health of Louisiana
Lead team member: Tina Griffith, Health Care Equity Director, Aetna Better Health of Louisiana

2.10.5 Care Management

Aetna staff members are Louisianans who are engaged in our communities. The Aetna Community Outreach team participates in events to bring educational and support resources directly to the community. At the 2018 Perkins Rowe Spooktacular, the Community Outreach team gave out treats, coloring sheets, and information about the benefits the plan has to offer.

2.10.5 Care Management

Aetna has participated in Louisiana's Medicaid managed care program since 2015, collaborating with enrollees and families throughout all nine regions of the state. We are deeply invested in Louisiana's local communities, and we have demonstrated success improving the lives and health of enrollees with complex physical and behavioral health needs. Our local work throughout Louisiana parishes supports LDH's goals: we advance evidence-based practices, high-value care, and service excellence; and we decrease fragmentation and increase integration across providers and care settings, particularly for enrollees with behavioral health and social determinants of health needs. Aetna understands, acknowledges, and will comply with all requirements of the **RFP** and the **Model Contract**.

Approach to Care Management (2.10.5.1)

To achieve our collective goals, Aetna offers locally based care management activities. Our care management program is congruent with Aetna's population health management strategy, recognizing that health is more than the optimal delivery of clinical care. The Care Management department, along with the Utilization Management (UM) department, reports to the Quality Management Oversight Committee. Together, these departments and committee work for equitable health care and services that are person-centered, accessible, holistic, and evidence-based. Our enterprise-wide System of Care model supports our local integrated care management approach. The System of Care strategy positively affects the enrollee's personal journey and ultimately their healthy days, using innovative approaches, which consider the whole person's needs. The System of Care model is a collection of integrated services grounded in trauma-informed care (TIC) and trauma-informed approaches, culturally and linguistically appropriate services, and recovery principles and guides our care management service delivery model. The following response offers Aetna's strategy to serve enrollees best though health needs assessment (HNA) completion, enrollee engagement, risk stratification, care planning, and coordinating with other organizations also providing care management.

Ensuring Success in Completing the HNA (2.10.5.1.1)

Our national experience includes 30 years of implementing a variety of service delivery models to support community-based care management. We offer our HNA in English, Spanish, and Vietnamese, and in multiple formats including in-person, web-based, print, and telephonically. We obtain enrollee consent before conducting the HNA and disclose to the enrollee how we will use the information gathered in the HNA. The HNA screens for unmet social determinants of health needs, including food security, housing/utilities challenges, transportation needs, and interpersonal safety concerns. **Figure 2.10.5-1** shows the social determinants of health needs screened by Aetna's HNA.

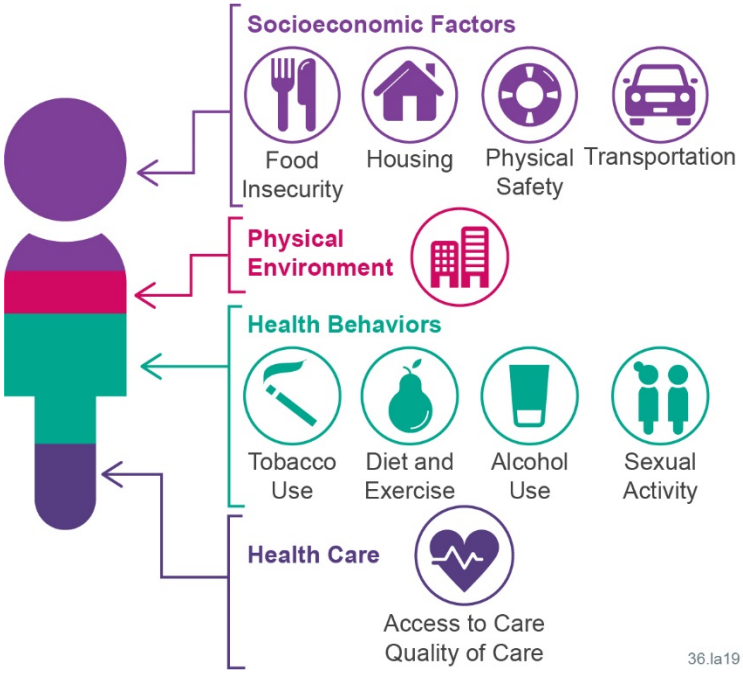

Figure 2.10.5-1: Social Determinants of Health
Aetna's HNA screens for social determinants of health needs.

Aetna agrees to use the common survey-based instrument, to be developed by LDH, as described in **Part 3: State Responsibilities**. With enrollee consent, we share all screening results with the assigned primary care provider (PCP) via the provider portal or LDH upon request. We also share HNA results with the enrollee via the enrollee portal. As described in the following response, the HNA is the first step to our care management identification and risk stratification, assessment, and individual care planning process.

Administering Screenings within Required Timelines and Results

Aetna's automated outbound HNA screening process is our first attempt to complete the HNA with the enrollee. With multiple entry points and enrollee contacts, we maximize opportunities to engage enrollees to complete screenings and conduct outreach to those missed through initial outbound screening attempts as described in the next section. Of those who complete the automated outbound screening and we identify for care management, 100 percent complete a comprehensive assessment.

Aetna contacts all enrollees to attempt to complete the screening within 30 calendar days of the enrollee's effective date of enrollment, exceeding the State requirement of 90 days and in accordance with **42 C.F.R. §438.208(b)**. We screen enrollees with special health care needs within 30 calendar days of the date of identification. In addition, Aetna's behavioral health providers conduct an assessment for eligibility based on level of care needed within 14 calendar days of referral by provider or a case manager, based on the enrollee's unique needs.

To maximize the number of enrollees completing the screening process, Aetna uses multiple telephonic and written engagement strategies as well as in-person navigation for those new enrollees discharged from an inpatient setting. Aetna makes five attempts to contact the enrollee by phone, each occurring on different days and different times to improve the probability of contact. After five attempts, Care Management staff sends a letter to the enrollee stating that the telephonic outreach attempts have been unsuccessful and invites the enrollee to contact Aetna to complete the screening. Care Management staff review the claims management system, including the call-tracking notes and enrollee records, to identify another means of reaching the enrollee. Case managers use medical, behavioral health, and pharmacy claims as well as admission, discharge, and transfer (ADT) data from the Louisiana Health Information Exchange (LaHIE) and Greater New Orleans (GNO) HIE to identify an acute inpatient admission. We also receive an exception report with enrollee contact information from CaremarkPCS Health, L.L.C., our pharmacy benefit manager, which helps us contact enrollees to complete the HNA. Staff also call the enrollee's pharmacy and review Aetna's national database to determine if a match exists.

Innovations in HNA Screening

Aetna reaches out to 100 percent of enrollees and utilizes multiple strategies to maximize the number of completed HNAs. Aetna has established several practices to increase HNA completion success with multiple points of access, including the following:

- **Face-to-face outreach:** Aetna case managers conduct face-to-face outreach for hard-to-reach enrollees. For example, Ready Responders, our community paramedic response team, recently identified an enrollee who was living in unsafe conditions and contacted Aetna's Care Management team. We had been previously unable to locate or contact the enrollee, but with Ready Responders' assistance, **the locally based case manager followed up with the enrollee face-to-face where the enrollee was living**. Together with the enrollee, we completed the HNA and a comprehensive assessment, and connected the enrollee with safe and stable housing.
- **Enrollee portal:** Enrollees may complete the HNA in the enrollee portal. Enrollee Services and Care Management staff are also available via our toll-free Enrollee Services line to aid with HNA completion if needed.
- **Population health management platform:** An alert through our population health management platform to the Enrollee Services representative will allow them to conduct a warm transfer of the call to Care Management staff for completion of the HNA.

- **Aetna mobile application:** Enrollees will be able to complete the HNA through our secure mobile application. The HNA data will feed directly into our population health management platform. This system provides the information technology to conduct care and service coordination from a single platform connecting external providers and multi-system stakeholders in near real time.
- **Integration with community health workers:** The HNA tool will be available for completion at Aetna community health events. Community health workers (CHWs) may support enrollees with form completion and connect the enrollee to resources that address social determinant of health needs.

Using HNA Data

The HNA process is one of the first ways Aetna begins to identify and engage enrollees in care management. This screening tool is especially useful in initially assessing enrollees who may have special health care needs. Once we identify an enrollee with special health care needs, we build a locally based multidisciplinary care team. The case manager, together with the enrollee, completes a comprehensive assessment to identify a course of treatment or regular care monitoring. We offer care management to all enrollees with special health care needs.

Identifying Individuals Who May Benefit from Care Management (2.10.5.1.2)

We work to understand enrollee preferences and goals, physical and behavioral health care needs, family and community supports, strengths, and any barriers impacting their ability to access appropriate care—all with the overarching objective of optimizing the enrollee's health and enabling them to maintain or achieve independence. Through a fully integrated, locally based model of care, Aetna systematically and intentionally considers the complex interactions of biological, psychological, and social factors in the delivery of health care. We identify enrollees for the appropriate level of care coordination and care management through predictive modeling, referrals, and other sources of valuable data, including the HNA. Aetna identifies and enrolls more individuals year after year. **Since 2016, we have achieved a 51 percent increase in enrollees engaged in care management**.

Aetna conducts clinical rounds with high-volume practices on a biweekly basis to coordinate care for high-risk enrollees and develop strategies to locate enrollees that may be hard to reach. Provider clinical rounds review outreach activities, identify changes in enrollee demographic information, and address any gaps in care.

Predictive Modeling

Aetna's Consolidated Outreach and Risk Evaluation (CORE™) predictive modeling tool analyzes physical, behavioral, and social determinants of health needs identified through claims, pharmacy, UM, and other data, including laboratory results, and is compliant with the requirements of the **Model Contract**. We supplement our analysis with referrals and HNA results, which helps us to stratify enrollees as Tier 3 (high risk), Tier 2 (medium risk), or Tier 1 (low risk) as described in this response.

Proprietary and evidence-based, CORE is a stratification tool that uses time-tested analytic methods honed for more than 10 years. CORE generates risk scores from internally developed algorithms based on Medicaid population data and our clinical and informatics expertise. Aetna uses several indicators other than diagnoses to identify and stratify enrollees, including CORE, the HNA, surveillance or referrals, concurrent review, and real-time utilization data. We run the model for our entire population monthly.

In addition, CORE uses pharmacy claims to identify risks related to non-adherence and other medication management issues that engagement in care management can influence. We derive approximately 40 percent of an enrollee's risk assessment from pharmacy utilization and claims. The risks identified include the following:

- The complexity and number of medications in an enrollee's drug therapy, which is a major driver of inpatient admission risk

- An enrollee's adherence to critical maintenance medications to treat conditions like asthma, diabetes, heart failure, or a behavioral health condition
- Potential overlapping therapy or drug contraindications that may impact enrollee safety
- Use of multiple pharmacies or prescribers to obtain controlled substances
- Higher enrollee costs compared to the overall population (using the Medicaid pharmacy risk adjustment methodology)

We further stratify enrollees into levels for care management and population health initiative engagement based on the information we gather from CORE and outreach activities that identify their biopsychosocial complexity and intensity of needs. Stratification is based on the enrollee's self-reported conditions and health care utilization, such as ED encounters, hospital utilization, or chronic conditions. The predictive modeling tool also identifies enrollees likely to have high utilization rates based on claims and diagnostic data. These tools determine the enrollee's potential risk level and predict that care management interventions can effectively improve the enrollee's outcome.

Predictive Model of CORE

CORE results are predictive in multiple dimensions:

- The emergency department (ED) model has a positive predictive value of 72.1 percent, meaning that 72.1 percent of the time, the predicted ED utilization occurs in the next 12 months
- Our inpatient modeling is exceptional, with a positive predictive value of 95.4 percent.

These factors, coupled with our UM and quality management surveillance strategies, enable us to assign enrollees to the most appropriate levels of care management.

Enhanced Predictive Modeling with Elli

Aetna is **leveraging our unique relationship with HMS, a leading health care technology company, to enhance our ability to analyze and use claims data through Elli**. Via artificial intelligence-based predictive models, Elli identifies healthy enrollees who are likely to develop chronic conditions. HMS' Elli identifies enrollees with high-risk factors before their utilization becomes high-cost. On average, Medicare and Medicaid populations see that the top 10 percent of the population make up to 45 percent to 55 percent of the costs. Elli uses predictive models to identify enrollees who are likely to have high-cost events due to disease progression and underlying social determinants of health.

As a first adopter of Elli in Louisiana, Aetna has access to four years of claims data collected from all managed care organizations across the state. The data will be available to us on day one of an individual's enrollment. The data analysis provides additional risk stratification that Aetna will consider in concert with our CORE predictive modeling risk stratification results. We leverage Elli, in particular, when we enroll a new individual, enabling us to engage the enrollee in the appropriate tier of care management immediately. Elli and Aetna's CORE are proven approaches to predict future cost and utilization. While these analytics are prescriptive, it is important to note a case manager always can use clinical judgment to tailor the care plan further based on information not available to either analytic platform.

Using Predictive Modeling to Support TIC

Aetna's Medicaid organization has launched a systemwide transformation initiative to address the impact of trauma among enrollees. We aim to interrupt the cycle of trauma and abuse using a custom-designed risk model identifying health plans' rising risk enrollees and creating population-based, innovative, early intervention outreach and trauma-informed practices. **Our TIC predictive model flags specific enrollees with high-risk factors who may benefit from trauma-informed approaches and practices.** The methodology works alongside the CORE predictive model. We are in the process of implementing a similar model targeting high-risk pregnant enrollees in Louisiana—we began this transformation journey by training all of our Louisiana staff on TIC. We are currently collecting high-risk, neonatal intensive care unit admission, and social determinants of health data, such as history of abuse, neglect or abandonment, involvement in the foster care system, and generational substance use. We will assign risk scores to predictive indicators leading to other traumatic health and/or socioeconomic factors for the mother and

child such as complex medical needs or substance abuse. By Quarter 3 of 2019, Aetna will initiate a provider development collaborative and training to serve our enrollees through trauma-informed practices. In addition to our predictive modeling processes, we identify enrollees who may benefit from care management from referrals from stakeholders, providers, and enrollees and their families.

Referrals

Aetna uses referrals to identify individuals that may benefit from care management services. These referral sources include the following:

- Enrollee self-referral
- Enrollee Services and Grievances staff referral and referrals resulting from historical data that we assess and trend at the enrollee level
- Providers, including primary care, behavioral health, and specialist providers
- State staff, including Medicaid, Office of Behavioral Health (OBH), Office of Aging and Adult Services, Office for Citizens with Developmental Disabilities (OCDD), Office of Public Health (OPH), and the Department of Children and Family Services (DCFS)
- UM, Quality Management, Enrollee Services, or other internal departments
- Enrollees newly eligible for home- and community-based services (HCBS) waiver services
- Health Information line (Nurse line)
- Social service organizations such as food banks and homeless shelters

Aetna works proactively with providers to encourage appropriate enrollee referral for potential engagement in care management. We include information on the referral process on our provider portal, in newsletters, and through provider education opportunities. We consider all referred enrollees for engagement in care management. In addition, we deploy population health specialists who work directly with providers to assist with our population health management platform system education, adoption, and use; the design and analysis of clinical workflows; and how to refer enrollees to care management. Once we receive a referral, a case manager who is part of the locally based care team completes a comprehensive assessment and an individualized care plan, together with the enrollee.

HNA Process

As described previously in the subsection titled **Using HNA Data** herein, Aetna use the HNA to identify enrollees who may benefit from care management services, including those with special health care needs.

Engaging Enrollees in Care Management (2.10.5.1.3)

Aetna values an enrollee's choice in how they engage with us and how they engage with care management services. We specifically designed our care management model—an enhanced locally based multidisciplinary team model—to better engage enrollees and families in care management services and improve health outcomes. We organize Care Management teams close to the enrollees they support, reducing travel time/costs for staff and promoting improved specialty knowledge of services and providers in the area.

Case managers are cross-trained in physical and behavioral health, act as a single point of contact for the enrollee, and work with other members of the multidisciplinary team (e.g., PCP, licensed clinical social workers [LCSWs], nurses, CHWs, pharmacists, and peer specialists) to engage the enrollee in services. **Aetna's integrated care management approach identifies our most biopsychosocially complex and vulnerable enrollees with whom we have an opportunity to make a significant difference.** We engage these enrollees in care management programs to remove or lessen barriers that limit their ability to manage their own health and well-being. We educate them about population health initiatives, enhance their engagement, and help them remain in the least restrictive and most integrated environment. We coordinate services based on their preferences, needs, safety, burden of illness, and availability of family

or other supports in a manner consistent with each person's personal and cultural values, beliefs, and preferences. We help individuals develop resiliency, move toward recovery, and reach their self-defined level of optimal functioning.

Through our experience, we recognize that certain enrollees will be particularly difficult to contact such as enrollees experiencing homelessness, persons in non-traditional family or residential settings, refugees, or young adults in a transition stage. Depending upon the need, the intensity of our contact efforts may vary based on enrollee information and clinical judgment. Any time we are unable to contact an enrollee, we may attempt to find them through any of the following means, as appropriate:

Our engagement efforts are successful. In 2018 we achieved the following:

- We achieved a 94**% success rate** with enrollee engagement in care management services for Quarter 4
- Our field visits **increased by 35%**
- Our volume of outreach has increased 65.5% from 2016 to 2018

- Publicly available sources such as telephone listings and online directories
- Pharmacies where an enrollee may have recently filled a prescription
- Our inpatient census tool and real-time pharmacy claims system
- Enrollee's PCP or other providers
- Emergency contacts, family, friends, property owners, or others we know to have previously been in contact with the enrollee
- Other State government agencies providing financial or service support to the enrollee
- Community-based organizations such as homeless shelters and food kitchens
- CHWs hired from within the enrollee's neighborhoods

Using Technology to Engage Enrollees

We use our best efforts to engage enrollees and close care gaps through live-person outreach to enrollees, interactive phone calls, text messaging, mailers, care management enrollee education, and web-based technology with enrollee-live access to their health care reports. We provide information to new enrollees on how to contact a case manager in the enrollee welcome packet, in the enrollee handbook, and on our website and enrollee portal. We also use reporting suites such as UM dashboards and gaps-in-care reports to identify and then engage enrollees in care management. Increasingly, technology enhances our ability to engage an enrollee in care management services. Other technology-based engagement strategies include the following:

- **Outbound texting programs:** We use a personalized mobile program that sends text messages to program enrollees on a variety of topics. These include care4life, text4kids, text4baby, text4health, and text2quit, which are no cost to the enrollee and link them to care management services.
- **Social media offerings:** In Louisiana, Aetna will offer engagement opportunities through social media platforms, such as Facebook. We want to collaborate with LDH and community-based providers on their social media offerings to offer yet another avenue for enrollee engagement.
- **Lifeline smartphone:** Aetna launched the Lifeline smartphone to link enrollees to improved phone services for better communication between the plan, their physician, and our Care Management team. The health plan now has new smartphone options for eligible enrollees. The smartphone options include a set amount of voice minutes and data and unlimited texting each month.
- **Wellpass text messaging:** Our educational text-messaging program consists of the Lifeline smartphone and targeted messages to remind enrollees to get tests and screenings done. It sends routine reminders to enrollees to support their health goals related to weight management diabetes, cervical cancer screening, opioid use, prenatal and postpartum care, well-child visits, breast cancer screening, flu shots, adult body mass index, controlling blood pressure, and chlamydia screening. We are in the process of developing an ED diversion campaign in Wellpass, which we anticipate will go live in the second quarter of 2019. **Our average rate of received messages for Wellpass is 76 percent.**

Once we receive a referral and engage the enrollee in care management services, Aetna uses all information available to identify the appropriate care management tier. The case manager conducts outreach to the enrollee, completes further assessments, and incorporates strategies based on the person's needs into the individualized care plan.

Identifying the Care Management Tier and Care Plan Development (2.10.5.1.4)

Initial stratification through CORE and Elli enables us to focus outreach to enrollees with the greatest health care needs and who may most benefit from care management services, thereby helping to ensure better health, better care, and lower costs. Other data sources we use include LDH enrollment files; ADT feeds; LaHIE and GNO HIE data; claims; lab results; HNA and care management assessment results; and publicly available community information. We run our CORE analysis monthly and perform daily reviews of prior authorization requests, census reports, and other information to determine changes in enrollee status. We use objective measures and criteria to stratify enrollees into three tiers and then use person-centered processes to develop an integrated, individualized care plan that addresses the unique needs of the enrollee.

Objective Measures and Criteria

Aetna develops, implements, and maintains criteria and protocols for determining which care management activities may benefit an enrollee. Our policies and procedures are compliant with **Section 2.7 of the Model Contract**. Aetna's systems support internal interdisciplinary activities and provide seamless solutions for the external stakeholders who support our enrollees. Our internal web-enabled care management system and our population health system provide the infrastructure for our care management activities, and it provides the flexibility necessary to integrate our data needs into the solution. Our systems connect the enrollee and their circle of supports with the entire community of the enrollee's preferred supports and allow us to assess the enrollee's care management level and service needs continually.

Using all information available, including data from CORE and Elli, Aetna stratifies enrollees into three levels; we finalize the level of care only after enrollee engagement and confirmation of needs. We may adjust the initial stratification based on the case manager's clinical judgement and information gained from the comprehensive assessment.

Tier 3: Intensive Care Management for High-risk Enrollees

Aetna provides enrollees engaged in intensive care management the most focused attention to support their clinical care and social determinants of health needs. These enrollees have the highest level of need and have complex medical and/or behavioral health conditions. We develop a plan of care in-person within 30 calendar days of identification. This process includes an assessment of the home environment and priority social determinants of health including housing, food insecurity, physical safety, and transportation. Case managers will meet with enrollees at least monthly, in person, in the enrollee's preferred setting. Case managers will update the plan of care monthly and conduct a formal in-person reassessment quarterly. **Table 2.10.5-1** describes Tier 3 criteria for enrollment and types of support Aetna offers.

Table 2.10.5-1: Tier 3 Criteria for Enrollment and Types of Support

Criteria for Enrollment	Types of Support
• Individuals with multiple complex chronic conditions, comorbidities, or co-occurring conditions • Individuals with three or more ED visits • Pregnant women with a history of substance use or who are currently using substances • Pregnant women current or historical high-risk pregnancy • Infants with neonatal abstinence syndrome	• Complex physical health, behavioral health, specialty, and durable medical equipment (DME) services • Evidence-based practices, including TIC, assertive community treatment (ACT), and medication-assisted treatment (MAT) • Opioid use or other co-occurring substance use disorder treatment and follow-up for naloxone

Criteria for Enrollment	Types of Support
• Children and adults with abuse and/or trauma histories with significant social determinant of health needs or with other complex diagnoses • Individuals in the Coordinated Re-Entry Program or incarcerated enrollees • Adults and adolescents who are homeless or have a history of residential instability (four or more residences over the past year) • Adults with serious mental illness and children with serious emotional disturbances • Transplant candidates • Individuals with HIV/AIDS, cancer, chronic renal failure, and other chronic complex conditions • Individuals in the Department of Justice (DOJ) Agreement Target Population and those transitioning from a nursing facility	training • CHW and peer specialist support • Readmission and ambulatory-sensitive admission and ED diversion • Chronic condition/disease management • Linkage to resources addressing social determinants of health • Gaps-in-care resolution • Treatment adherence support • Transitional care management • Pharmacy Medication Management Program • Pharmacy Supported Comorbid Condition Management Program

Aetna supports the State in creating an effective strategy to enhance the LDH case management program. We will work in partnership with the State to implement any approach outlined in *House Concurrent Resolution 65 of the 2018 Regular Legislative Session – Mandatory Case Management for High-Risk Enrollees* to enhance services for vulnerable enrollees and their families.

Tier 2: Care Management for Medium-risk Enrollees

Aetna offers enrollees Tier 2 support for their whole health needs. Enrollees in Tier 2 need a lower level of support that those enrollees in Tier 3, but still need significant care coordination and care management to manage chronic or complex medical and/or behavioral health conditions. Together with the enrollee, we complete the plan of care in person within 30 calendar days of identification. Case managers will meet with enrollees at least monthly and update the plan of care through a formal in-person reassessment quarterly. **Table 2.10.5-2** describes Tier 2 criteria for enrollment and types of support Aetna offers.

Table 2.10.5-2: Tier 2 Criteria for Enrollment and Types of Support

Criteria for Enrollment	Types of Support
• Individuals in the DOJ Agreement Target Population • Children under age 21 requiring foster care management • Individuals with ambulatory care sensitive conditions or a disease management condition (e.g., asthma, chronic heart failure, chronic obstructive pulmonary disease, diabetes, or depression) • Referrals from within the plan or a provider that indicates care coordination or service needs and/or readmission risks	• Evidence-based practices, including TIC, ACT, and MAT • CHW and peer specialist support • Chronic condition/disease management • Children under age 21 requiring foster care management • Naloxone training • Collaboration with care management agencies and community-based services for integrated care plan development • Collaboration with system stakeholders • Information-sharing between providers and system stakeholders • Transitional care management • Pharmacy Medication Management Program • Pharmacy Supported Comorbid Condition Management Program

Tier 1: Care Management for Low-risk Enrollees

We provide care management activities to low-risk enrollees and develop the care plan with the enrollee within 90 calendar days of identification. Tier 1 support includes an assessment of the home environment and priority social determinants of health. **Table 2.10.5-3** describes Tier 1 criteria for enrollment and types of support Aetna offers.

Table 2.10.5-3: Tier 1 Criteria for Enrollment and Types of Support

Criteria for Enrollment	Types of Support
• All enrollees with chronic conditions needing ongoing surveillance and support identified for care management and not enrolled in Tier 2 or Tier 3 • Enrollees able to self-manage condition(s) • Enrollee showing improvement who moved from Tier 2 to Tier 1	• Population health initiatives and educational material and communication • CHW support • Support with education, housing, transportation, and personal safety • Ongoing surveillance for status change • Wellness and prevention services • Semi-annual health information and reminders

Our integrated system of care uses **multidisciplinary locally based care management teams to meet all levels of care management needs of our enrollees**. Supported by Aetna's System of Care model, case managers form strategic relationships with key stakeholders (e.g., community providers, care transition networks, families, peer support services, CHWs) to address enrollee social determinants and to promote health care equity. These locally based teams are the start of the care planning process for the enrollee and are actively engaged in Transitional Care Management, described further in this response. Care Management teams are characterized by the following:

- Include case managers, CHWs, registered nurses, LCSWs, PCPs, pharmacists, peer specialists, and any other stakeholder that the enrollee identifies to effectively develop a plan of care
- Link seamlessly to a multidisciplinary team that is inclusive of professionals who have all the expertise needed to provide service coordination. Multidisciplinary teams include Aetna's employed behavioral health, substance use, UM, employment, and housing specialists.
- Serve individuals enrolled in specific waiver programs such as intellectual and/or developmental disabilities (I/DD), autism spectrum disorder, traumatic brain injury, or frail elderly and physically disabled
- Cover rural areas of the state; these teams include a mix of experts, but through our electronic service coordination support such as web-enabled tablets, we link to other experts no matter where they are located
- Include both face-to-face in-person and face-to-face virtual care coordination (through video conference) to increase engagement to enrollees in remote locations and foster the relationship between the enrollee, circle of support, and case manager
- Fully integrate the enrollee's circle of support and provide culturally relevant, person-centered, and trauma-informed physical and behavioral health services, supplementing but not supplanting natural supports
- Consider the enrollee's communication methods and functional status to support full engagement and participation by enrollees
- Are comprised of skilled staff who complete Mental Health First Aid, treatment planning philosophy, and TIC training

Aetna will support the Permanent Supportive Housing program through our locally based care teams and our housing specialist. The housing specialist will connect enrollees to appropriate housing resources. They will also work with the multidisciplinary care team to give guidance and close gaps in care for enrollees with housing instability.

In addition to ongoing care management services, Aetna offers a comprehensive Transitional Care Management program that supports an enrollee's ability to receive care in the least restrictive and most cost-effective environment.

Transitional Care Management

Transitioning from one setting to another can be unsettling and even frightening for vulnerable enrollees and their family members or caregivers. Aetna understands that effective transitions of care are paramount to maintaining and improving enrollees' quality of care, quality of outcomes, and most

importantly, quality of life. We work to promote a seamless transition of care with the aim of improving enrollees' health and recovery, effectively coordinating their care, and reducing future admissions.

We modeled our transitional care management program on the Coleman Model, pioneered by Eric Coleman, M.D., M.P.H., from the University of Colorado. Aetna uses the model's four pillars to promote high-quality transitional care management:

- **Medication self-management:** We educate the enrollee on medications and help the enrollee develop a medication management system.
- **Use of a dynamic enrollee-centered record:** Aetna works with enrollees to utilize the enrollee portal to facilitate communication and ensure continuity of care across providers and settings.
- **PCP and specialist follow-up:** Case managers support enrollees to schedule and complete follow-up visits with PCPs or specialists, and they educate enrollees on how to be an active participant in their care.
- **Knowledge of 'red flags':** We help enrollees to identify when their condition is worsening and educate them on how to seek the appropriate level of care.

Aetna successfully decreases ED and inpatient utilization year-over-year. We achieved the following in 2018 vs. 2017:

- **4.98% decrease in ED visits/1,000**
- **4.3% decrease in per member per month costs for inpatient admissions**
- **7.1% decrease in physical health admissions/1000 and a 11.1% decrease in behavioral health admissions/1,000**
- **10.5% decrease in physical health readmissions/100** and a **36.2% decrease in behavioral health readmissions/1,000**

Because enrollees are at significant risk when moving from one setting to another, effective care transitions are vital to decreasing potentially preventable events. **Our integrated care management model encompasses a strengths-based approach that empowers enrollees to achieve their optimal level of functioning**. Emphasizing continuity and coordination of care, Aetna collaborates with discharge planners at inpatient facilities to make sure each enrollee receives the highest level of service and oversight to address their unique clinical and care management needs. The enrollee, along with their family and circle of support, are the principal voices and decision-makers in the care process. We serve as their strongest advocates to coordinate care that incorporates evidence-based care and community services with a wraparound approach that addresses social determinants of health.

We routinely monitor metrics (e.g., number of face-to-face visits, adverse incidents, number of enrollees engaged in care management) to help make sure our transition of care program is impactful and to guarantee we have sufficient staff necessary to meet the specific needs of our enrollees in each of the nine regions of the state. Working in concert with our locally based multidisciplinary Care Management teams, Aetna assigns transition of care clinicians to specific hospitals and facilities to manage our enrollees' transitions from one setting to another. Discharge planning starts at the time of admission. Transition of care staff complete face-to-face visits with enrollees, which provides us with valuable access to the treating physicians and other hospital staff so that that we manage discharge orders and referrals as seamlessly as possible for our enrollee. Case managers serving enrollees in Tier 3 function as the transition case manager to provide continuity of care and maintain the single point of contact for the enrollee. We enhance this offering with support from telehealth, telemedicine, home telemonitoring services for at-risk enrollees, and post-discharge nurse visits. We will incent physical health and behavioral health providers to increase collaboration when the enrollee's care requires it.

Our care management strategy includes availability of all medical records through connection to LaHIE and GNO HIE. Aetna tracks ADT data and receives real-time notifications through LaHIE and GNO HIE. We are in the process of **contracting with the hospital-sponsored health information exchange, Louisiana Health Information Network-Encounter Notification Service, which will give us ADT feeds from most hospitals in the state**. Through these HIEs, the case manager can retrieve the enrollee's information, including primary care visits, unmet health-related resource needs, and medication and

pharmacy history to determine risk. This will enable our care providers to collaborate on creating a comprehensive, real-time data set to share across the provider continuum to promote achieving quality outcomes such as Healthcare Effectiveness Data and Information Set (HEDIS) scores and preventable readmission reduction.

Aetna case managers review all elements of the provided data and coordinate discharge activities with Aetna UM staff, which conducts concurrent reviews as enrollees' transition to new levels of care. The UM nurse coordinates with the case manager and housing specialist for all discharge needs so there is an efficient and safe discharge plan meeting the needs of the enrollee in the least restrictive setting, with all services ready for the enrollee immediately upon discharge. We provide transitional care management for enrollees to support transitions between institutional and community care settings, including transitions to/from inpatient hospitals, nursing facilities, psychiatric facilities, psychiatric residential treatment facilities (PRTFs), therapeutic group homes, permanent supportive housing, intermediate care facilities, residential substance use disorder settings, and transitions out of incarceration**. Table 2.10.5-4** highlights key components of our program.

Table 2.10.5-4: Care Transition Approaches for Facilities across the Continuum of Care

Facility	Approach
Rehabilitation services, PRTFs, and therapeutic group homes	Aetna's online referral platform allows rehabilitation providers the ability to make real-time referrals to Aetna transitional care management.
Skilled nursing facilities and residential settings	Aetna notifies skilled nursing facilities and other residential facilities when they have admitted an enrollee who is receiving transitional care management. Together, the facility care team and the dedicated local Aetna case manager identify and implement any additional needed coordination tasks.
Psychiatric hospitals	Aetna partners with Louisiana's psychiatric hospitals, which provide real-time discharge summary information to Aetna to allow for immediate transitional care management follow-up. Upon discharge, Aetna case managers connect enrollees to resources in their local community, including primary care, behavioral health, and non-medical resources.
Inpatient facilities	Transition from inpatient facilities is critical for enrollees to succeed. Aetna's case managers coordinate with discharge staff at the hospital to serve enrollees where they are—close to their homes and circle of support. Aetna will continue to coordinate with hospitals to allow for timely implementation of transitional care management.
Other transitions such as permanent supportive housing and transitions out of incarceration	Aetna's Care Management staff work closely with the housing specialist and other members of an enrollee's regional multidisciplinary team to coordinate care and implement transitional care management activities. Case managers connect with incarcerated enrollees before they are released to ensure connection to services upon release.

Pharmacy Support

Aetna has assembled a team of health professionals to manage and coordinate the transitional care of enrollees discharged from inpatient and outpatient facilities. This integrated team focuses on individual planning for each enrollee's return home and coordination of appropriate care and discharge follow-up. The care team includes a pharmacist, who conducts medication reconciliation for the enrollee. Medication reconciliation consists of comparing a list of medications used prior to admission compared to medications prescribed at discharge and resolving any conflicts in therapy. A clinical pharmacist participates in daily transitional care management rounds as appropriate. Enrollees have access to their case manager and the Aetna pharmacist for additional follow-up. In addition to the transitional care management services, our Medication Therapy Management (MTM) program tracks the enrollee's prescription claims data. Our MTM services mitigate adverse medical events, enrich enrollees understanding of medication use, and improve therapeutic outcomes by enhancing medication

adherence. In 2018, Aetna's MTM program, administered by CaremarkPCS, had a program comprehensive medication review (CMR) completion rate for 6,883 eligible enrollees of 23.6 percent (1,627 CMRs). Pharmacists completed 5,155 therapy interventions with prescribers and enrollees with a 70 percent success rate in changing therapy. We conduct medication reviews between the enrollee, the prescriber, and the pharmacist at their usual community pharmacy with interactive consultation to provide follow-up interventions as necessary.

Our Pharmacy Medication Management Program's clinical pharmacists analyze pharmacy data and program outcomes, coordinate the distribution of clinical drug information through education, and engage clinical staff and providers. The clinical pharmacist also supports multidisciplinary teams with care planning to improve enrollee access to the right medication at the right time.

Individuals in the DOJ Agreement Target Population

Aetna acknowledges, understands, and will comply with all care management requirements in **Section 2.7.7 and 2.7.8 of the Model Contract**. Enrollees identified for transition from a nursing facility to the community as part of the DOJ Agreement Target Population will receive transitional care management services prior to release from the nursing facility as part of their discharge planning process. Aetna supports the LDH transition team in the development of the transition plan required as part of the DOJ Agreement. These enrollees receive transitional care management services at the Tier 2 or Tier 3 level for a minimum of 12 months post-transition and receive face-to-face care management as identified in their individual plan of care.

Independent Evaluations for PASRR Level II

Aetna conducts Preadmission Screening and Resident Review (PASRR) Level II evaluations of enrollees upon referral from LDH. Referrals are based upon an independent evaluation to determine the need for nursing facility services and/or the need for specialized services to address mental health issues while the enrollee is in a nursing facility. Aetna complies with **42 C.F.R. Part 483, Subpart C** and uses the PASRR Level II standardized evaluation form provided by LDH. Aetna tracks enrollees in a nursing facility who went through the PASRR process, those identified with serious mental illness, and those receiving specialized services as per **42 C.F.R. §483.130** in the population health system. Aetna will continue to report quarterly to LDH the delivery of all PASRR specialized behavioral health services. Aetna collaborates with our provider, Merakey, to complete the PASRR within the mandated four-day timeframe.

Individual Plan of Care Planning Process

Our integrated system of care uses **multidisciplinary, locally based Care Management teams to meet all levels of care management needs for our enrollees**. These locally based teams are the start of the care planning process for the enrollee. Our processes are compliant with **Section 2.7.10 of the Model Contract**.

Trauma-informed Approach to Care Planning

The Aetna Medicaid organization is the first and only managed care organization to collaborate with the National Council for Behavioral Health to implement an enterprise-wide TIC initiative.

All Aetna case managers complete training in TIC, resiliency, and adverse childhood experiences (ACEs) in alignment with Louisiana's TIC Transformation. We understand the impact of the experience of trauma, the importance of creating a safe environment, and the steps necessary to help someone successfully develop coping skills. Aetna also addresses root causes that are frequently related to past trauma experiences, ACEs, and social determinants of health. We use the National Council for Behavioral Health's *Organizational Self-Assessment: Adoption of TIC Practice* to improve our policies, procedures, practices, and social and physical environment to reflect the core principles and values of a TIC organization. We understand the steps necessary and the tools needed to support enrollees locally by using trauma-informed practices, driving care to community-based organizations, and providing wraparound support. This trauma-informed foundation supports our overall plan of care planning process.

Using Assessments in Care Planning

Dedicated local case managers who reside in the region of their assigned enrollees conduct comprehensive assessments with the enrollee and caregiver and/or involved social services stakeholder. HNA results, predictive modeling, and referral information trigger need for completion of the comprehensive assessment. We conduct comprehensive assessments in a location and setting dictated by convenience for the enrollee, whether it is in the home, with the PCP, or another identified private location. Through the comprehensive assessment, case managers gain an understanding of the enrollee's health and conditions across all physical, behavioral, and cognitive systems. The comprehensive assessment is extensive in its evaluation of social determinants of health, trauma, access to and historical utilization of services, health behaviors (inclusive of substance use, physical activity, and nutrition), and medications. The assessment also includes discussion of social supports and caregiver resources. **Aetna's care management and care planning strategies are highly effective: Aetna ranked #1 compared to other health plans for the following HEDIS measures: Diabetes Screening for People with Schizophrenia or Bipolar Disorder and Well-child Visits in the First 15 Months of Life.**

We conduct additional assessments customized to a variety of populations, including age- and gender-specific preventive screening questions and assessments specific to disease or priority populations. For example, we assess pregnant women using internally developed and evidence-based validated tools to evaluate further conditions of the pregnancy, obstetrical history, family supports, and psychosocial issues, including the Edinburgh Postnatal Depression Scale. Children with special health care needs also receive specialized assessments, including the Survey for the Well-Being of Young Children. Additional assessments informing care planning include the UNCOPE and PHQ-9, as well as assessments of anxiety, pain, and weight management.

Enrollee-directed Care Planning

The dedicated locally based case manager develops the care plan with the enrollee, their PCP, and their multidisciplinary care team within 30 days of completion of the initial comprehensive assessment. All participants invited/permitted by the enrollee to the multi-disciplinary care team are collaborators with the enrollee in the development of the care plan. Therefore, the process is enrollee-driven and provider-informed. **Figure 2.10.5-2** illustrates how our care planning process meets enrollees' unique needs. In addition to primary physical health and behavioral health providers, members of the care team may include the housing specialist, employment specialists, transition specialists, nutritionists, CHWs, pharmacy representatives, dental providers, peer/family support specialists, school representatives, and pharmacists. Goals, objectives, and services identified during care planning address all factors that affect health to foster improved health outcomes. **The care planning process focuses on closing care gaps and ensuring continuity of care, particularly for enrollees with special health care needs, pregnant women, and enrollees needing or using DME.** We identify needed pharmacy services, specialist services, or resources addressing social determinants of health in compliance with **Section 2.8 of the Model Contract**.

Figure 2.10.5-2: Enrollee-directed Care Planning

Aetna's care planning process meets enrollees' unique needs.

Aetna supports the enrollee as the lead voice in the care planning process and the principles of self-determination and recovery. Case managers periodically review the list of participants permitted by the enrollee to participate to verify the ongoing invitation to remain on the team. Case managers trained in motivational interviewing, recovery, and resiliency, as well as TIC, actively engage the enrollee and the enrollee's family, advocates, caregivers, and/or legal guardians to support continued active involvement and feedback in the care planning process. **Our case managers also have specialized certifications in the Diabetes Education Empowerment Program (DEEP™) and HIV care management.**

The assessment and care planning process produces an individualized care plan, which includes an enrollee action plan and referrals to community-based organizations and other programs that can provide needed services. These services include tobacco cessation and problem gaming programs, Well-Ahead Louisiana, Louisiana's Tobacco Quitline, the Special Supplemental Nutrition Program for Women, Infants, and Children, and permanent supportive housing. We also refer enrollees to internal specialty care management programs like our hepatitis-C care management program and CaremarkPCS Health's Accordant Care. Accordant Care is an extension of our care management program that utilizes real-time pharmacy and medical claims data, electronic health records, and health plan and specialty pharmacy referrals to identify enrollees with complex conditions earlier and proactively provide support to better manage their whole condition. Accordant Care is an NCQA-accredited disease and care management program

The action plan includes the enrollee's own language with respect to their personal goals and self-management objectives. The enrollee and/or guardian must approve the care plan and will have ongoing real-time access to current care plans via the enrollee portal. Aetna's care plan meets health literacy guidelines and includes all elements outlined in **Section 2.7.10.5 of the Model Contract**. We store copies of the current and prior care plans in the population health system. Care plans are also accessible by care team members via the provider portal.

Ethan's Individualized Care Plan

Ethan, an 8-year-old enrollee living in East Baton Rouge Parish, has multiple medical diagnoses including a seizure disorder, autism spectrum disorder, mitochondrial disorder, feeding intolerance, gastrostomy tube dependence, and severe development and speech delays. Ethan's family of five lost their home, vehicles, all personal belongings, and medical equipment due to recent flooding. The enrollee's family is currently living with friends. The family has trouble managing their and Ethan's significant and complex needs, including a complex medication regimen; limited transportation; and supporting another medically complex sibling. Ethan's mother is also living with a disability and is very reluctant to engage with the case manager. Ethan's local case manager, Cassie, developed with the family an individualized care plan for Ethan. She worked to get Ethan and his sibling actively enrolled in care management services. Cassie met with the family to gather a list of immediate needs; found the family permanent housing; secured a wheelchair for Ethan with support of Aetna's UM team; connected the family to a Families Helping Families autism advocate to support the family with needs related to Ethan's diagnosis of autism; and connected the family to medication management support. Because Ethan's autism causes him to wander, and at his parent's request, Cassie worked with the East Baton Rouge Parish Sheriff's Office and Project Lifesaver to obtain a personal locator system for Ethan and secured a six-month sponsorship to pay for the device. As a result of these interventions and wraparound services, Ethan and his family are finding stability and increasing Ethan's independence and quality of life.

Care Plan Updates

Ongoing multidisciplinary team communications allow for continual review of progress toward care plan goals and objectives. Assessment for progress toward overcoming barriers, functional needs, meeting goals and compliance with the care plan, as well as identifying further needs occurs at a frequency based on the enrollee's care management tier. Aetna's population health management platform has a trigger to alert case managers when annual assessment and care plan updates are due. We also update care plans

when an enrollee's circumstances or needs change significantly; at the request of the enrollee, their legal guardian, or a member of the multidisciplinary care team; and when reassessment occurs.

Care Planning with Enrollees with Behavioral Health Needs

Individualized care planning focuses on coordination and integration between physical and behavioral health services provided in the enrollee's community. When an enrollee receives services requiring a plan of care from LDH, such as HCBS or services through OPH, case managers collaborate and coordinate among the agencies. Enrollees with behavioral health needs may also receive referrals to telepsychiatry as needed; coordination with an ACT team prior to discharge from an inpatient facility, if eligible for ACT services; and biweekly rounds that address enrollees with high utilization rates. We also ensure connection to specialized substance use disorder treatment. Since its launch in 2017, Aetna's Enterprise Wide Opioid Taskforce has supported the advancement of Aetna's clinical strategy to combat the opioid overdose crisis. Fueled by cross-functional collaborations and insights, Aetna's opioid initiatives have yielded meaningful results. In the first year since announcing our five-year enterprise goals, **we have seen nearly a 30 percent increase in the rate of MAT or other evidence-based treatments utilized by enrollees with opioid use disorder**.

Peer Support Services

Aetna collaborates with community-based organizations offering peer support services to enrollees with behavioral health needs. **This value-added service leverages peers' expertise to engage enrollees** in care management services through identifying goals, assisting with treatment planning, life skills coaching, resource referral, conducting recovery groups, and assisting with discharge planning. Aetna enrollees receive peer support services through ACT and permanent supportive housing program teams; HIV/AIDS Alliance for Region Two, Inc.; the Extra Mile of Monroe; Mental Health Association of Greater Baton Rouge; National Alliance on Mental Illness New Orleans; and the Metropolitan Human Services District.

Coordinating with Providers that also Provide Care Management (2.10.5.1.5)

Aetna is responsible for the coordination and continuity of care of health care services for all enrollees consistent with **42 C.F.R. §438.208**. We coordinate services with traditional and non-traditional providers and across all funding sources with a focus on eliminating duplication of services, improving continuity of care, and facilitating the coordination of benefits. We avoid duplication of services with federally qualified health centers through biweekly rounds. We coordinate with the OCDD for the behavioral health needs of the I/DD co-occurring population. For example, Aetna case managers work together through the multidisciplinary care team process to create a single individualized plan of care. Aetna defers to the other organization's case manager and sets in place wraparound supports to enhance the care plan. We confirm the enrollee has a single point of contact to decrease confusion and enhance continuity of care. In addition, we make sure of the following:

- Train Aetna case managers on the unique needs and services of individuals with I/DD
- Deploy population health specialists to assist organizations in preventing duplication of efforts
- Engage in formal council meetings, as invited, to facilitate ongoing coordination

Aetna also coordinates care for enrollees receiving services from other State agencies or organizations. We do not duplicate services; instead, we coordinate benefits and provide medically necessary wraparound supports. Agencies we regularly coordinate with include CrescentCare (a Ryan White provider), Urban League of Louisiana, Second Harvest Food Bank, and State systems such as DCFS, Office of Juvenile Justice, the Bureau of Family Health, and the OBH.

2.10.6 Case Scenarios

Aetna support's Louisiana's health priority of promoting healthy living. The Aetna Community Outreach team hosts regular cooking and nutrition classes in our communities. We were pleased to have local chef Jay Ducote help us learn how to make delicious and healthy traditional Louisiana cuisine alongside Ted E. Bear, M.D. During all of our cooking sessions participants have an opportunity to learn how to use ingredients they may already have in their pantry to create a healthy meal. They also leave with nutrition resources and recipe cards on how to make the dishes they were taught at the event.

2.10.6.1 Case 1

Louisiana | Transforming Health Care | **Aetna**

2.10.6 Case Scenarios

2.10.6.1 Case 1

Aetna will provide our enrollee in this scenario, Tracy, with comprehensive case management, ensuring our full understanding of her unique circumstances, connection to services to address her goals, provision of ongoing support, and leveraging of our infrastructure and resources to maximize her health.

Expanded View of Tracy's Circumstances

Tracy is a 38-year-old African-American single mother who lives in an apartment in Greensburg, located in St. Helena Parish. She works part time at the local library. She and her three young children (who live with her) enrolled with Aetna one week ago. They were previously enrolled with, and they received case management from, another managed care organization. Within three days of her transition to Aetna, we contacted Tracy by phone to conduct the welcome call and the initial Health Needs Assessment (HNA). During the initial HNA, Tracy responded positively to questions regarding having several chronic conditions and social determinants of health (SDOH), particularly related to transportation needs. As a result, we conducted a warm transfer to Linda, who conducted further care management triage. Linda is a seasoned care manager (CM) who has worked in St. Helena Parish for several years and is familiar with the services in the rural area of Greensburg. Linda is a registered nurse with extensive background in high-risk Maternal Child Care Management. Linda is also a certified diabetes peer educator and board-certified case manager with experience in delivering integrated case management to individuals with complex medical and comorbid mental health or substance use issues. She has participated in training on trauma-informed care (TIC), motivational interviewing, and Mental Health First Aid. Linda's qualifications and expertise will be a good fit to work with Tracy on her particular needs; therefore, she will be assigned as Tracy's CM.

During the care management triage call, Linda interpreted the HNA and asked Tracy follow-up questions. Linda also completed a specialized pain assessment tool with Tracy. Tracy is not currently pregnant, but she has a history of complicated pregnancies related to hypertensive disease and remains hypertensive postpartum. In addition, Tracy has been diagnosed with hepatitis-C and diabetes, and experiences chronic back pain. Findings from a previous magnetic resonance imaging resulted in the diagnosis of lumbar stenosis (M99.33). Tracy is not currently sexually active or in a relationship, and her children's father is deceased. She does attend annual Well Woman exams and regular dental checkups. Linda also reviewed Elli claims data, which contains several years of Tracy's history and is considered in risk stratification. Linda reviewed the records the former health plan provided during the transition process with Tracy and notes that Tracy's primary care provider (PCP), Dr. Hays, has been prescribing Norco-hydrocodone-acetaminophen (10/325 PO every 4-6 hours as needed) for 2 years (dosage increased to this level over that time). Dr. Hays reported this approach is no longer effective (citing her numerous emergency department [ED] visits) and is now recommending that she see an orthopedic doctor to assess the possible need for back surgery (Lumbar discectomy, foramenectomy, laminectomy).

The online Cares Network Indicators Report notes that the percentage of people diagnosed with diabetes in St. Helena Parish is 12.5%, higher than both the statewide percentage (11.21%) and the national percentage (9.28%).

In the introductory call, Linda and Tracy discussed opioids and the concern that Tracy may be opioid dependent, as evidenced by reports of prolonged opioid prescription use, escalating dosages that are no longer effective, and frequent visits to the ED for pain. Tracy's history of hepatitis-C (suggesting possible history of illegal drug use), several complicated pregnancies, diabetes, and hypertension add to the complexity of her treatment needs. Utilizing Aetna's proprietary risk

According to the Prescription Behavior Surveillance System, there were 115 opioid prescriptions (per 100 residents) for women in Louisiana in 2017.

stratification tool, Linda establishes a preliminary risk stratification based upon based on the results of the HNA, Elli claims data, information from Tracy's former plan and PCP, and her follow-up conversation with Tracy. She assigns Tracy to our most intensive level of case management (Tier 3). Linda asks Tracy to begin thinking about the main health care issues she will want to focus on, explained that she would lead Tracy's care team, and provided her with 24/7/365 phone numbers for the crisis hotline and Health Information line (Nurse line).

Ensuring Access to Services to Address Tracy's Primary Presenting Issue

Linda will initially engage Tracy in comprehensive assessment and care planning, followed by assisting in connecting her to services. **Figure 2.10.6.1-1** summarizes our approach with Tracy.

Comprehensive Assessment and Initial Individual Plan of Care

Linda and Tracy scheduled an in-home comprehensive assessment to occur in one week. Linda conducts the assessment to understand all biopsychosocial conditions relevant for Tracy's care and inquires about health care needs for her children. Linda assesses Tracy's access to and historical utilization of services, and any associated barriers to care. She asks Tracy about her pain, her medications, and her diet and exercise patterns. Linda asks what Tracy has tried for her pain and what, if anything, has worked. Tracy explains that things have been very tough lately and when she gets stressed, her pain meds are one of the few things that make her temporarily feel better and reduce the pain. Tracy told Linda she has tried acupuncture and was only able to get her and the kids there one time. Her transportation does not allow her to ride with the three kids and she does not have anyone to watch the children for two or three hours. She does not exercise but the kids keep her active. Tracy is not sure her diet is good for her diabetes, but says she eats whatever she makes for the kids.

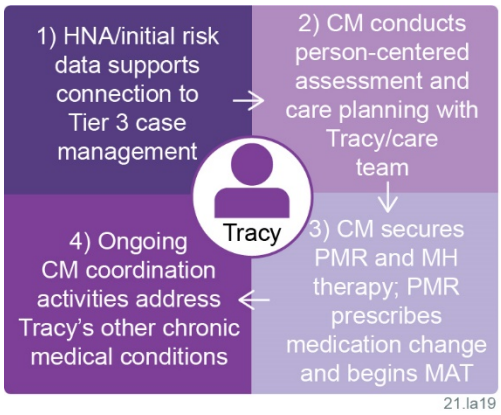

Figure 2.10.6.1-1: Approach to Assisting Tracy
Case management services will address Tracy's immediate and long-term goals.

Linda and Tracy examine why Tracy goes to the ED to address pain issues and discuss the frequency and efficacy of these visits. Linda inquires whether Tracy interfaces with a particular pharmacist at her local pharmacy, and what those interactions are like. She asks Tracy if her pain medicine is effective and if she is taking any other medications or herbal remedies (prescribed or over the counter) for pain. Tracy reports she is not taking any other pain medicine or herbal remedies, nor does she report use of benzodiazepines or muscle relaxers. Linda checks our prescription history website to verify this. Tracy reports her back pain sometimes affects her ability to engage in physical activities with her kids or function at work at the library. Tracy said that she does not always get relief and that when it feels better, she has to lift the kids, and then it starts hurting again. She mentions that when she has run out of her pain medicine before, she experienced withdrawal symptoms such as nausea and muscle cramps. Tracy is concerned about her back and worried that the next step seems to be surgery and she is not sure she can coordinate something like that. Linda assesses Tracy's historical use of elicit or prescribed substances and whether there is a family history of substance use disorders. Tracy acknowledges her hepatitis-C diagnosis was related to previous intravenous (IV) substance use in her late 20s and early 30s. She quit using on her own and she says she has been clean since age 34. Linda asks Tracy if she thinks she may be dependent on her pain medication in the same way she used to be dependent on IV drugs. Tracy says she is not sure, but admits this could be an issue. Dr. Hays prescribed her medications in conjunction with her agreement to a pain medicine contract.

As required by the **Louisiana Medicaid Managed Care Organization Model Contract**, Linda screens Tracy for problem gaming and tobacco usage, neither of which are an issue for her. Linda obtains information about Tracy's ability to manage her activities of daily living and instrumental activities of daily living. Throughout the assessment process, Linda utilizes motivational interviewing techniques to seek Tracy's perspective of her situation and to understand her values and what motivates her with respect to health behaviors. Linda interacts with Tracy through a trauma-informed lens with sensitivity to any traumatic experiences that play a role in Tracy's overall health. After building rapport, Linda asks Tracy if she has experienced physical or emotional trauma and evaluates Tracy and her children's physical safety in the home. She determines that Tracy is properly storing her medications, out of the children's reach. Linda still offers Tracy Aetna's Opioid Lockbox program. Linda talks with Tracy regarding other SDOH and socioeconomic factors and asks about any barriers with respect to her housing, access to transportation, and access to healthy foods. Tracy reports the nearest grocery store with fresh fruits and vegetables is 15 miles away. The assessment includes discussion of Tracy's social supports and caregiver resources and a review of available core benefits and other value-added benefits available to Tracy. Linda spends some time talking with Tracy regarding her children and State-supported services received such as Women, Infants, and Children (WIC) and Supplemental Nutrition Assistance Program (SNAP). Linda asks Tracy if any of her children have significant medical conditions or behavioral health issues to determine if they will need case management. Tracy reports her children are healthy and stable at this time and Linda talks with Tracy regarding scheduling their well-check appointments. Linda's person-centered approach effectively engages Tracy to discover her strengths, cultural background, and current coping and health improvement skills. Linda finds that Tracy is a loving mother. She has a group of positive friends from church and is being highly productive in her work at the library.

Following the initial in-home comprehensive assessment, Linda discusses Tracy's issues in rounds with her medical director and CM team. **Linda schedules a subsequent individual care planning session** to occur in two weeks with a multi-disciplinary care team (MDCT). Tracy asks that Linda include her friend, Karen, (whom she says is "like a sister") as well as her PCP, Dr. Hays, his medical assistant, and local independent pharmacist on the MDCT invitation. Linda mentions the types of services a community health worker (CHW) can provide and Tracy agrees that the local CHW should be invited to the meeting. Tracy, Linda, the local CHW, and Karen attend the MDCT meeting in person at Tracy's home. Dr. Hays, his medical assistant, and Tracy's pharmacist participate by phone. The care planning session is a collaborative process in which Linda does the following:

- Provides a summary of her comprehensive assessment findings to the team
- Empowers Tracy to identify and prioritize goals in her own words, to be documented in the care plan
- Collaborates with Tracy and the team to document Tracy's strengths and needs in the care plan
- Provides education regarding available covered services
- Elicits feedback from team members regarding potential benefits of various treatment options
- Supports Tracy's voice and choice as specific services/providers are included in the care plan

Tracy says she is fatigued by chronic pain and that ED visits are costly in terms of time and money for a sitter, interfere with her parenting, and do not result in long-term relief. **Tracy states her immediate goal is to experience less pain and to identify alternative solutions to address her pain other than going to the ED.** Dr. Hays reiterates the medication he has been prescribing for pain management is no longer effective, and believes an orthopedic doctor should evaluate Tracy for possible back surgery. Dr. Hays acknowledges that, aside from pain management medication and one acupuncture visit, no other treatment options have been attempted to address Tracy's back pain. Tracy previously declined epidural injections and they could not find a physical therapy (PT) provider in the area either. Tracy states she would like to look at other solutions besides surgery. Linda reports the Aetna case management team believes PT would be beneficial, but acknowledges there are no PT providers nearby. Dr. Hays, the pharmacist, and Linda also talk with Tracy about her apparent dependence on pain medicine and Tracy agrees to consider alternative means to address her pain and eliminate potential dependence on narcotics. They speak to Tracy about medication-assisted treatment (MAT) and the

opportunity to come off the pain meds and not feel badly as she had described. **Tracy discusses and considers the following treatment options with her MDCT**:

- Although pain specialist services are not a covered benefit, the team discusses incorporation of a physical medicine and rehabilitation specialist (PMR) to evaluate Tracy further for indicators of dependence and/or misuse of prescriptions and to suggest other options to control pain. The PMR can identify and recommend alternative non-narcotic prescription options for pain such as antidepressants or for antiepileptic drugs in lieu of narcotics and might be able to provide MAT to address opioid use disorder (OUD), if that diagnosis is made.
- PT for back pain (available in another parish, transportation could be provided)
- Other non-pharmacological value-added services such as chiropractic services or acupuncture for pain
- Mental health therapy to develop coping/meditation skills related to pain and to evaluate (and treat if indicated) for OUD (in collaboration with the PMR)
- Epidural or facet injections for pain

Tracy says that she wants to pursue follow up with a PMR and mental health therapy. Tracy's PCP, Dr. Hays, is in network with Aetna and he will remain Tracy's PCP. He will continue Tracy's current treatment of pain until PMR and mental health services begin. Dr. Hays reviews the State Prescription Monitoring program (PMP) to verify that he is the only prescriber of pain medications and other controlled substances for Tracy. Linda suggests that he prescribe Narcan for Tracy (consistent with Centers for Disease Control and Prevention recommendations) in case of an emergency. Linda will educate Tracy and her friend Karen regarding how this is used. Linda also asks that the PCP order random urine drug screens (UDS) to rule out the possibility that Tracy is taking other drugs that may be dangerous in combination with her narcotic pain medication, and to verify she is taking her prescribed medication. Linda tells Dr. Hays how to find Aetna's provider website, which includes a link to LDH's resources on OUD treatment. Linda will also refer Tracy to our member restriction program, which will limit her to using one pharmacy (of her choice) for one year. Tracy and the team agree that if she does not report marked reduction of back pain and improved daily functioning in two months as a result of PMR interventions and therapy, they will re-examine back surgery and/or other options. Tracy receives a copy of her care plan and the MDCT is reminded that this information is also accessible on the provider portal.

Securing Services Identified in the Plan of Care to Address Tracy's Primary Concern

Linda contacts a PMR who works in St. Helena Parish, who is trained in evaluation of OUD, and who is a certified provider of Suboxone induction and follow-up MAT care. The PMR's evaluation with Tracy is set to occur in four days at a convenient time for Tracy. The CHW arranges transportation for Tracy to attend this appointment. Linda also connects Tracy to a tele-mental health provider of counseling services, who schedules an initial session to occur in five days. This licensed mental health professional (LMHP) is trained in TIC and will address Tracy's pain experience and conduct further thorough assessment and treatment of mental health and opioid use/substance use. Linda verifies with Tracy that she has an internet connection and knows how to use the telehealth software to connect with the LMHP. As a result of further evaluation with Tracy, the PMR diagnoses her with OUD and suggests a multipronged approach to treatment of her pain and OUD. The PMR determines that Tracy would benefit from transitioning to a non-narcotic medication to address her pain. The PMR also recommends a home stretching/strengthening program. The PMR suggests MAT services for Tracy for OUD. The PMR takes time to explain these interventions, their benefits, and potential risks to Tracy before obtaining Tracy's consent. The PMR speaks with Tracy's PCP, Dr. Hays, as well before implementing these treatment changes, so that Dr. Hays' discontinuation of Tracy's Norco-hydrocodone-acetaminophen can be coordinated carefully with the PMR's new interventions. Following this coordination, the PMR prescribes Neurontin and Cymbalta for Tracy as a non-narcotic option to address her pain. The PMR also begins Suboxone induction with Tracy and will conduct biweekly (and later monthly) follow-up as she continues in MAT services. Tracy tells the PMR that once her pain reduces slightly, she would be interested in seeing a chiropractor. The PMR and LMHP will become part of Tracy's MDCT going forward. The PMR will follow

up with Tracy and the team at the next MDCT meeting regarding whether/when to begin chiropractic services and to ensure the care plan is updated with the new treatment interventions the PMR began. The PMR will follow up with the PCP and therapist on a monthly basis regarding ongoing UDS results and PMP monitoring.

Ongoing Support through Case Management Interventions and Other Activities

Tracy also has a history of complicated pregnancies and several chronic health conditions. Tracy told the MDCT she has difficulty with follow-through on treatment recommendations for hepatitis-C, hypertension, and diabetes related to her medication regimen and dietary decisions. The care plan also includes interventions to address these concerns and conditions as described in **Table 2.10.6.1-1**:

Table 2.10.6.1-1: Ongoing Support and Case Management to Address Tracy's Other Health Conditions

Condition or Concern	Identified Intervention
General	• Linda to conduct in-home visits to provide disease, family planning/maternal health, and sexual health education, support medication compliance, and counsel positive nutrition/exercise • CHW to review Aetna's online self-management and mobile app tools with Tracy • Linda to talk with Tracy regarding alternatives to handle acute pain as opposed to going to ED • Linda to facilitate ongoing reassessment and care plan update activities in accordance to Tier 3 requirements; Linda to conduct ongoing coordination of care in between team meetings with all members of the MDCT as clinically indicated with regard to Tracy's progress • Pharmacist to perform medication reconciliation and communication with MDCT regarding Prescription Drug Monitoring Program • CHW to verify Tracy is signed up for all benefits for which she may be eligible (SNAP, WIC, etc.); identify services for Tracy's children such as Early Head Start, daycare, or afterschool programs; support Tracy in identifying and removing any barriers to taking children to well-check visits
Diabetes and Hypertension	• Linda to evaluate need (and arrange if applicable) for durable medical equipment to actively treat Tracy's diabetes and hypertension; pharmacy can conduct blood pressure checks • Care Innovations to conduct remote patient monitoring and communicate key biometric data (blood sugars, blood pressure, hemoglobin A1C, weight, etc.) to members of Tracy's care team; CHW to help Tracy set up IPad to access biometric components • Linda to continually monitor Tracy's Healthcare Effectiveness Data and Information Set measures (such as ED utilization, comprehensive A1C hemoglobin , neuropathy, retinopathy screening, controlling blood pressure measure) and contacts PCP to close care gaps • If hemoglobin A1C is uncontrolled, PCP to connect Tracy to endocrinologist
Hepatitis C	• PCP to consult with hepatologist; if Tracy meets criteria, enroll her in Aetna's CM Adherence Program for hepatitis-C (focuses on completing the drug regimen, removing barriers to success)
Social Determinants of Health	• CHW to connect Tracy to the Well-Ahead Louisiana program to address health equity concerns related to access to healthy food and general education regarding diet and exercise • CHW to arrange transportation to services through Logisticare if indicated/needed

As we continue with Tracy on her journey to maximized health, Linda's priority is Tracy's and her family's health and well-being. As Tracy makes progress toward her goals, additional evaluation and care plan review may result in re-tiering to less intensive case management. Linda talks with Aetna's Network team about developing PT capacity in Greensburg.

Aetna Infrastructure and Other Resources to Support Tracy's Success

Our case management infrastructure supports enrollees with dedicated, local case managers and MDCTs that include members chosen by the enrollee as part of their circle of support. CMs conduct face-to-face MDCT team meetings and use telecommunication and online tools as needed. Aetna's Pharmacy team is experienced in supporting members with substance use disorder. Aetna has specialized networks to provide local, simple, personable relationships with pharmacists to assist with medication reconciliation and notes on prescription bag tags to remember primary visits.

2.10.6.2 Case 2

Louisiana | Transforming Health Care | **Aetna**

2.10.6 Case Scenarios

2.10.6.2 Case 2

Aetna will provide our enrollee in this scenario, Toby, with case management tailored for children with special health care needs including assessment, integrated care planning, ongoing case management to foster positive health outcomes, and infrastructure and other resources to deliver exceptional care.

Expanded View of Toby's Circumstances

Toby is an 11-year-old Caucasian male with special health care needs living in Shreveport. He has extensive history of childhood trauma including sexual and physical abuse perpetrated by his uncle, and his outpatient child psychiatrist has diagnosed him with post-traumatic stress disorder (PTSD). Although he is not a Chisholm Class Member, he is involved with the Office for Citizens with Developmental Disabilities (OCDD) related to mild autism spectrum disorder (ASD) but demonstrates low to normal intelligence and good language skills. He currently lives with his father, Mark, and his stepmother Allison, both of whom have been treated previously for anxiety and depression (now in remission). Toby is currently in the emergency department (ED) for the third time in a few weeks. Inpatient psychiatric hospitalization was recommended at the first of these ED visits following Toby's engagement in self-injurious behavior, but Toby was discharged home after spending several days waiting in the ED for a psychiatric bed in the community. In Toby's two most recent visits to the ED (and the current presentation), he and his parents continue to describe that Toby is experiencing extreme levels of anxiety every day, as well as nightmares and dissociative periods associated with memories of his traumatic history. He continues to attempt self-injurious behavior and he has attempted to induce vomiting. His parents feel overwhelmed and unable to help Toby maintain his safety at home. It is beginning to affect their own mental health as evidenced by their reports of increased anxiety and difficulty sleeping.

Toby's child psychiatrist referred him for Aetna case management in November 2018 for the purpose of enhanced care coordination. Based upon the most recent health needs assessment and predictive modeling information available at that time, Aetna connected him with Tier 2 case management, a level for medium-risk individuals. Since then, and up until present, his case manager has delivered case management services including updated assessments and treatment planning with Toby's multi-disciplinary care team (MDCT), according to LDH requirements for Tier 2 case management. His care manager (CM), David, a licensed professional counselor, was selected for Toby because of his training and experience in trauma-informed care (TIC), mental health first aid, motivational interviewing, and functional family therapy. David also has previous experience as a service line tech working under the direction of a board-certified behavioral health specialist at an Applied Behavioral Analysis (ABA) facility. David is now part of an Aetna regional case management team in Shreveport. He works in the community where Toby lives and has relationships with providers there.

Toby's two previous presentations at the ED occurred on weekends and ED staff was not aware that David was Toby's CM; therefore, they did not outreach him to coordinate care or discuss inpatient psychiatric services. When David noted the ED service on the admission, discharge, and transfer (ADT) feed the next business day following Toby's first ED visit, he telephoned Toby's parents three times over the next two days to attempt to schedule an in-home visit. He was not able to make contact with the family, but left voicemail messages and sent them a letter, offering assistance and requesting that they call him back. David left messages with Toby's teacher and ABA provider regarding the situation, explaining he was trying to reach the family. When Toby presented at the ED a second time David again attempted to contact Toby's parents, but again had to leave them a message. David went to Toby's home in the evening, but there was no answer at the door. He also called the hospital to ask that he, as Toby's CM, be contacted if he presents there again. David reviewed documentation from Toby's last MDCT meeting three-and-a-half weeks ago to refresh his memory regarding Toby's situation at the time. Toby and his

parents had reported Toby was having some difficulty managing his feelings of anxiety and the intrusive memories of his past trauma. However, he was not engaging in self-injurious behavior at the time, nor was he experiencing nightmares or dissociative episodes. He was not engaging in tobacco or substance use, nor was he sexually active or participating in problem gaming. He had been receiving community psychiatric support and treatment (CPST) and psychosocial rehabilitation services (PSR) for the last six months to help him develop coping skills related to his trauma and anxiety. Toby had completed a comprehensive diagnostic evaluation, which identified Toby's ASD diagnosis and noted behavioral deficits that affected Toby's interactions at home and in the community. As a result, he was connected with and began ABA services with Behavioral Specialists of Louisiana (BSL). David had coordinated care with school staff regarding school-based services identified in Toby's individualized education program (IEP). David had led case management activities with the agreed-to participants with Toby's parents, which includes Toby's pediatrician, Dr. Sparks, his child psychiatrist, CPST/PSR and ABA providers, OCDD support coordinator, and teacher. In the last MDCT meeting, the family and MDCT acknowledged that Toby was making some progress and would continue with the services indicated in his plan of care, with ongoing monitoring and planning around his safety and sense of security.

Ensuring Access to Services to Address Toby's Primary Presenting Issue

Toby's third visit to the ED occurs on a Tuesday and David is notified in near real time via ADT feeds. **Based on recent escalation of Toby's situation and third visit to the ED, he will now receive Tier 3 case management services (our most intensive level).** David will respond to Toby in the ED to conduct an assessment with Toby and his family and establish an interim plan of care to address Toby's current needs. **Figure 2.10.6.2-1** summarizes our approach with Toby.

Assessment and Plan of Care for Toby's Immediate Situation

David immediately contacts the ED to inform them he is Toby's CM and to coordinate for the Northwest Louisiana Human Services District mobile crisis team to meet with Toby and his parents at the ED. Additionally, David proceeds to the ED to meet with the family. Upon arrival at the ED, David speaks with the mobile crisis team, which has completed their evaluation of Toby. They report that this morning he began throwing things in his room, banging his head on the floor, and attempted to make himself vomit. His father intervened and he and his wife brought Toby to the ED, not only out of concern for the circumstances underlying the behavior, but also due to worry that he may have injured his head and might hurt himself further. The crisis team states that the parents have difficulty applying coping and parenting skills during the height of a crisis and do not appear equipped at present to maintain his safety at home. David inquires with the crisis team and ED medical staff as to whether, from a medical standpoint, Toby showed any signs or gave any reports of abuse. Since his medical history includes the self-induction of vomiting, David asks about lab results to determine if an electrolyte imbalance appears to be an issue. Hyponatremia (low sodium) can compound a psychiatric crisis by exacerbating mood changes, or it can be misdiagnosed as a psychiatric crisis. The crisis staff and ED medical staff do not report any signs of abuse that would require a call to Department of Children and Family Services (DCFS), nor does electrolyte imbalance appear to be a factor. The X-rays of Toby's head showed no signs of trauma and a CT is not ordered. Toby's urine drug screen (UDS) is negative. The ED physician declares that Toby is medically cleared but will need an evaluation for his psychiatric concerns. Based on Toby's recent

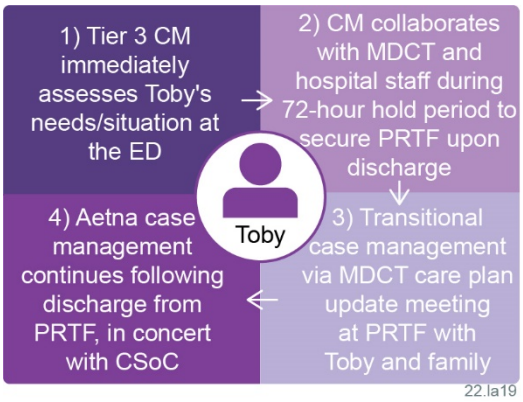

Figure 2.10.6.2-1: Approach to Assisting Toby
Toby's CM will support Toby as he transitions from the hospital, to PRTF, and to home.

escalating symptoms, unsafe behavior, and the fact that his parents are struggling to maintain his safety in the home, the ED physician does not believe Toby can be safely monitored and treated on an outpatient basis at this time. There is currently no inpatient psychiatric or Institutions for Mental Disease bed available. The ED physician completes a physician emergency certificate (PEC) to admit Toby for a 72-hour hold with a 1:1 monitor to ensure his immediate safety and further evaluation by a psychiatrist.

While waiting for Toby's transfer (under the PEC) to the hospital floor to occur, David meets with Toby and his family in the ED. David uses motivational interviewing strategies to conduct a brief assessment of the current situation. David's training and experience in TIC guide his approach as he investigates what led to Toby's escalating symptoms and resulting visits to the ED. His parents report that although Toby does not have any contact with his uncle, he saw him at a shopping mall in Shreveport two-and-a-half weeks ago. Toby and his parents attempted to avoid eye contact and evade him but Toby's uncle approached him and tried to give him a hug. Since then, Toby has been inconsistent with taking his medications, has begun to have nightmares, and has experienced dissociative periods. He has also reported several instances of severe nausea. Mark and Allison report the CPST and PSR services are not helping to address this spike in upsetting symptoms. David talks further with Toby, who states he feels scared, sad, angry, and out of control and is worried that he is making things harder on his parents. He reports he has been much more anxious. Toby says he has been trying to use the skills he learned with PSR, but it has not been working. David describes to Toby and his parents that while he is on the hospital floor on the PEC hold, the family will speak with a child psychiatrist who will conduct further evaluation. This psychiatrist will also be consulting with Toby's outpatient psychiatrist as well as with Toby's pediatrician, Dr. Sparks. David assures the family that he will remain the primary point of contact for the family and members of Toby's MDCT, as needed, to coordinate services recommended by the psychiatrists. David will provide updates to the family regarding the psychiatrists' recommendations and will resolve information gaps through bidirectional communication between the family and all providers. David confirms the family's agreement with the plan of care. David also asks that if, in the future, they bring Toby to the ED, they notify him immediately. He also states he is going to ask the medical social worker to note in Toby's record that David is his case manager and should be contacted if he arrives at the ED again in the future. Mark and Allison apologize for not returning David's calls over the last week.

Over the next 48 hours, David speaks to Toby's parents and hospital staff to see how Toby is doing. David also speaks with Dr. Sparks, Toby's teacher, and ABA provider to offer updates as to Toby's status. David also has also notified DCFS of Toby's recent interaction with his uncle. Over the past 48 hours while admitted under the PEC, Toby has begun taking his medications consistently and has not engaged in any self-injurious behavior. David consults with his internal Aetna medical director and communicates with the hospital's psychiatrist who evaluated Toby, as well as Toby's outpatient psychiatrist. The psychiatrists inform David that Toby has contracted for safety, his behaviors have de-escalated, and they are no longer concerned that he may be a danger to himself or others. The psychiatrists have determined that a psychiatric residential treatment facility (PRTF) is the appropriate next level of care for Toby. David discusses this option with the family, who agrees with this plan.

Securing Services Identified in the Plan of Care to Address Toby's Immediate Needs

David identifies the Louisiana Methodist Children's Home (LMCH) as a well-matched PRTF provider for Toby due to their specialization in TIC. LMCH also has marriage and family therapists that can facilitate family sessions while Toby is in their care. Additionally, there is some family housing onsite. LMCH is equipped to help de-escalate Toby's self-injurious behavior, should that occur. Toby will be able to continue his ABA services with BSL while in care with LMCH. LMCH and David will actively coordinate care with Toby's outpatient psychiatrist regarding medication changes (if applicable) while he is there. David coordinates with Toby's MDCT and the Aetna Utilization Management (UM) department to complete PRTF screening, referral, prior authorization, and Certification of Need requirements for

admission to PRTF. The UM team initially approves two weeks of PRTF and will conduct daily concurrent review to assess Toby's unique needs and whether continued stay addresses these. LMCH does have a bed available and accepts Toby. David ensures that LMCH has all relevant information regarding the events preceding Toby's admission and discusses with LMCH and Toby's family the initial goals of treatment at PRTF (maintaining Toby's safety and ensuring medication compliance) until a formal care plan update can occur. Toby's parents take him to the residential facility that evening for admission following the completion of his 72-hour PEC hold.

Providing Ongoing Support through Case Management Interventions

Following Toby's admission to the PRTF, David continues transitional case management (at Tier 3 level). **He contacts the approved/permitted members of Toby's MDCT to schedule a care plan update meeting, to occur onsite at the residential facility in two days.** Toby's CPST/PSR and ABA providers and the OCDD support coordinator participate with Toby, Toby's parents, PRTF staff, and David in-person for this meeting. Toby's outpatient child psychiatrist and a medical assistant from Dr. Sparks' office participate by phone. His special needs teacher from school was invited, but was unable to attend. David obtained her input prior to the meeting and will share the resulting care plan update details with her afterward.

During the care plan update meeting at the PRTF, David asks Toby and his parents to summarize the events leading up to his recent ED visits and subsequent admission to the PRTF. As David facilitates discussion, he is careful to seek input from Toby about his goals for greater stability and reduction of symptoms going forward. Likewise, David asks Toby's parents to share their perspective. His approach maintains a person-centered focus, factoring in the unique culture and values within Toby's family. All team participants aid in identifying Toby's strengths and interests, including his kind nature, ability to complete some chores, and his interest in art and drawing. His father and stepmother are supportive and loving but indicate they need extra education regarding how to help Toby when he is in a crisis. They explain that the CPST and PSR services were no longer helping Toby with his PTSD symptoms. At this time, David also evaluates whether there have been any changes in Toby's housing stability, access to healthy foods, transportation needs, and/or physical safety, or whether Toby is smoking or engaging in problem gaming. The family reports no problems in these areas at this time. Toby and his family say that once Toby returns home from the PRTF, they will need more support to help Toby with self-care and to address his trauma experience. **David explains transitional case management activities will continue while he is in the PRTF and that case management will continue at the Tier 3 level upon discharge from PRTF with enhanced services to better address PTSD symptoms.** The team collaborates with Toby and his parents to establish three goals to achieve while in the residential program:

- Toby wants to control his behavior when he is upset, instead of doing things that are harmful to him
- Toby wants three nights in a row of no nightmares
- Toby wants anxious episodes only three times a week as opposed to daily

Toby, his parents, and his team also identify the following post-discharge goals:

- Maintenance of or improvement upon goals established for residential treatment (above)
- Reduction of dissociative episodes, which Toby described as feeling "confused" or "not like me"
- Increase in Toby and his parents' ability to proactively intervene or prevent or crises and to access crisis service alternatives if needed in lieu of visiting the ED

During the care plan update meeting at the PRTF, David facilitates discussion around what types of services Toby will need to achieve his post-discharge goals. Toby and his family mentioned during the assessment that CPST/PSR is no longer helping Toby manage his symptoms, and they want to discontinue these services. David discusses that if these services are discontinued, it is important to identify effective alternatives to address Toby's PTSD symptoms, which leads to discussion about the benefits of a community health worker (CHW), Coordinated System of Care (CSoC) services, and the importance of continuing ABA services. David is careful to verify there is no duplication of services

given the many treatment team partners involved. David explains he is the point of contact for the family and is responsible for follow-through to ensure the care plan is implemented. **Table 2.10.6.2-1** describes interventions/services Toby and the MDCT documented in his updated care plan:

Table 2.10.6.2-1: Toby's Individual Plan of Care (Post-discharge from PRTF)

Responsible Party	Intervention/Service
David (CM)	Conduct in-home evaluation of environmental safety and social determinants of health
Toby/Family	Continue seeing outpatient child psychiatrist; continue ABA services for ASD with BSL
Toby's Pharmacist	Invite Toby's pharmacist to the MDCT; pharmacist to provide medication reconciliation and education regarding side effects; pharmacist to rule out duplications when medication is changed
David (CM)	Implement a crisis plan with Toby's family to identify potential crisis triggers; learn crisis de-escalation skills; educate regarding crisis service alternatives (crisis hotline); discuss how to help Toby feel safe and process feelings if he should run into his uncle again
David (CM)	Request a child and adolescent needs and strengths assessment and make referral to the CSoC 30 days prior to discharge; CSoC services to include youth/family peer support
CHW	Local CHW to join MDCT; CHW will help with appointment scheduling/reminders, attend office visits with Toby and his family (if requested), and teach Toby self-management skills;
David (CM)	Refer for oral health evaluation of potential damage caused from self-induced vomiting
David (CM)	Verify that school-based resources are in place (IEP, 504 plan, in-school supports,) and school staff to continue participation in MDCT; ensure that IEP calls for trauma therapy as a required component
David (CM)	Coordinate with Toby's pediatrician to ensure immunizations and Early and Periodic Screening, Diagnostic and Treatment (evaluations are completed, in alignment with Healthy Kids population health approach; UDS reassessment if/when warranted
David (CM)	Speak with Toby's parents regarding their health care services/benefits; coordinate with their service providers (with their permission) to ensure they are getting necessary mental health services/support
David (CM)	Foster Toby's interest in drawing/peer socialization via connection to Boys & Girls Clubs art program
David (CM)	Connect family to National Alliance on Mental Illness Northwest Louisiana branch

David follows up with the family at home the day after Toby's discharge from PRTF to see how the whole family is adjusting to his return and to confirm care plan recommendations are being implemented or were completed before Toby left the PRTF. **David explains that Toby has been accepted for CSoC services** and that going forward David will follow the lead of the CSoC facilitator as they take a more prominent role in care planning and case management. Rather than duplicating services for Toby, David's activities will complement those of the CSoC facilitator. When the family reports significant progress or achievement of Toby's goals, they will talk with the MDCT about whether to decrease the intensity of his case management tier level. David will conduct another formal reassessment in three months.

Aetna Infrastructure and Resources to Support Toby's Success

Building Bridges Initiative (BBI): Toby was admitted to LMCH, partly for its value in adhering to principles of the BBI, to which LMCH is a signatory. The BBI's mission is to identify and promote best practices with youth, their families, their communities, and residential treatment providers. Aetna has been involved with activities to develop BBI in Louisiana from the outset and presented BBI principles to LMCH staff at their site several years ago.

Aetna's Trauma-informed Organizational Transformation and Thrive Collaborative: Aetna has collaborated with the National Council for Behavioral Health to transform the way we deliver care. Aetna trains 100 percent of its staff in trauma-informed principles. Through our Thrive Collaborative, we work with Juvenile Justice, DCFS, and schools throughout Louisiana to support system partners in becoming trauma-informed. We also help send teachers to TIC training and educate parents on the topic.

2.10.6.3 Case 3

Louisiana | Transforming Health Care | **Aetna**

2.10.6 Case Scenarios

2.10.6.3 Case 3

Our enrollee in this scenario, Ray, will benefit from Aetna's more than 30 years of experience managing Medicaid services through case management, which ensures a thorough assessment of Ray, comprehensive care planning, and coordination across complex benefit structures.

Expanded View of Ray's Circumstances

Ray is a 65-year-old Caucasian male who lives in a nursing home in Jefferson Parish. He was admitted three months ago with a diagnosis of failure to thrive (R62.7) after his primary care provider (PCP) saw him and noted he had lost 25 percent of his body weight and appeared frail and weak. Ray has been diagnosed with schizoaffective disorder (bipolar sub-type), high blood pressure, and experiences chronic pain due to unspecified neuropathy. His pain and weakened state limit his ability to ambulate on his own. He also has difficulty performing tasks that include making meals, getting dressed, general housework, and using public transportation. The majority of his functional deficits are due to anxiety in performing tasks and/or not having proficiency in completing tasks independently. Additionally, Ray has difficulty following his prescribed medication regimen. He has also attempted suicide several times, resulting in multiple inpatient psychiatric hospitalizations, the most recent occurring a few months ago. He has frequently visited the emergency department (ED) to address both physical and behavioral health symptoms. A recent functional evaluation by the State deemed he no longer meets criteria for a nursing home. Unfortunately, Ray had been evicted from his apartment while at the nursing home. He would like to return there (or to another apartment) if possible. He is estranged from his family and he lacks a support system.

Ray is enrolled in Aetna's Dual-Eligible Special Needs Plan (D-SNP) with Aetna Medicare and has Specialized Behavioral Health benefits with Aetna Medicaid. Prior to his admission to the nursing home, Ray was assigned to a primary Aetna Medicaid organization case manager (CM), Jim, who works in Jefferson Parish. Jim is a licensed clinical social worker, trained in trauma-informed care, motivational interviewing, and mental health first aid. Jim coordinates Ray's benefits and care with Ray's Medicare case manager. As a previous member of a D-SNP care management team, Jim has several years' experience working with the older adult/geriatric population and has had specialized training in this area. Ray was placed in Tier 3 care management with Jim (secondary to his complex biopsychosocial health history) to support Ray's clinical care and social determinants of health needs.

Prior to Ray's admission to the nursing home, Jim collaborated with Ray's psychiatrist, who requested authorization for assertive community treatment (ACT) based on Ray's diagnosis of schizoaffective disorder (bipolar sub-type), which qualifies as a serious mental illness (SMI). Ray met criteria for ACT and was approved for services with the Jefferson Parish Human Services Authority. Jim explained to Ray at that time that while ACT services are delivered, he would remain the primary coordinator for his care. Jim provided Ray with his direct telephone number as well as the Aetna Behavioral Health After Hours call line for 24-hour crisis intervention coverage.

Ray meets the following Tier 3 case management criteria:

- Biopsychosocial complexity
- Individuals with 3 or more ED visits
- Adults with SMI
- Individuals in Department of Justice Agreement and those transitioning from a nursing home

Jim has received a call from Ray's LDH transition coordinator, who stated Ray no longer meets eligibility for the nursing home. Jim completes the Preadmission Screening and Resident Review (PASRR) Level II. The PASRR II evaluation concurs with the State's functional evaluation that the nursing home is no longer the least restrictive environment for Ray.

Ensuring Access to Services to Address Ray's Primary Presenting Issue

Transitional case management services are provided by Jim to complete an updated assessment and care plan to facilitate Ray's move into to the community. **Figure 2.10.6.3-1** summarizes the approach.

Comprehensive Assessment and Updating the Individual Plan of Care

Jim calls Ray to discuss his transition from the nursing home and ensure that Ray understands his options consistent with My Choice Louisiana, including care in a home- or community-based setting. Jim and Ray agree to schedule a care plan update meeting with Ray's multi-disciplinary care team (MDCT) to occur in two days at the nursing home. Jim confirms with Ray's PCP, Dr. Adams, that she or her representative is available to attend either in-person or by phone. Jim also invites nursing home staff, the D-SNP Medicare case manager, Ray's psychiatrist, the Aetna and ACT housing specialists, the ACT peer support specialist, and Ray's pharmacist to the meeting. Each has previously been approved by Ray as members of his MDCT. Jim explains to Ray the role a community health worker (CHW) can play in helping him navigate independent living and obtains Ray's permission to invite the local CHW to the MDCT meeting as well. Jim schedules extra time directly with Ray for approximately one hour prior to the care plan meeting, to conduct an updated comprehensive assessment with Ray. Jim reviews the documentation of Ray's last assessment and care plan before the meeting.

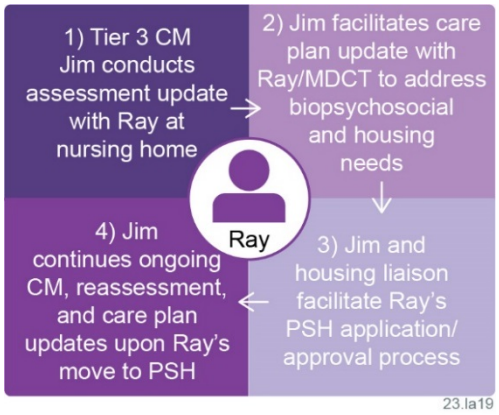

Figure 2.10.6.3-1: Approach to Assisting Ray
Ray's CM delivers transitional case management to address his discharge from nursing home and transition to the community.

On the day of the meeting, Jim uses a person-centered approach to conduct an **assessment update**, asking Ray to tell him how he has been feeling both from a physical and mental health standpoint.

On a positive note, Ray's weight has improved and it is now stabilized. Ray reports some ongoing pain related to his unspecified neuropathy. Ray rates this pain as a 3 on a scale of 1–10, 10 being the highest. He states that he feels "mostly alone," save for the support he receives from Jim, nursing home staff, and other members of his MDCT. Jim inquires further about Ray's sense of isolation and Ray voices concern that when he returns to the community, he does not have any friends with which to socialize. He has gotten used to the nursing home setting where he is able to participate in some social activities (such as Bingo and trivia game night) with other patients and interacts regularly with staff. He says sometimes he leads the games and this makes him feel useful. Ray is worried about losing these connections when he lives on his own. Ray says he does feel anxious most days and occasionally sad, but he does not have any thoughts (or plans) to attempt suicide at this time. Jim notes during the comprehensive assessment that Ray reports neither feeling lost nor seeing things, nor having trouble thinking or speaking. As part of this assessment update, Jim asks Ray about whether he engages in tobacco use, problem gaming, and alcohol and/or substance use, none of which are an issue for him.

Jim uses motivational interviewing techniques to help understand Ray's challenges. Jim asks Ray if he has been able to manage his personal hygiene and other activities of daily living (ADL) while in the nursing home. Ray tells Jim he can do these activities, but he feels anxious about the process. He sometimes needs reminders and help from nursing home staff to complete tasks such as dressing himself and taking his medication. Ray reports he is anxious that about not being able to care for himself outside the nursing home. Jim reviews with Ray all of his medications and informs Ray that some of his medications may be available through an injection to reduce the number of pills he has to take. Ray indicates this sounds like something that might help him. Jim informs Ray that this will be something to

discuss in the care-planning meeting with the MDCT. During this reassessment, Jim talks with Ray about factors to consider when he is living independently related to accessing healthy food in the community, as well as what transportation supports he might need. Jim also reassures him that his MDCT will help identify and obtain services to make the transition back into the community successful. Jim encourages Ray to recall the positive aspects of living in the community prior to his stay at the nursing home and asks what he liked about his previous apartment setting. Jim also talks with Ray about his strengths, which include knowing how to contact Jim when he needs help, and how to lead people, as Ray does during the Bingo and trivia games at the nursing home. Jim educates Ray regarding the goals of the care-planning meeting (which is set to occur after this reassessment conversation) and who will be there. They talk about how he can be assertive in stating his needs during that care plan meeting.

Following the reassessment time with Ray, Jim facilitates the MDCT care plan update meeting. Ray's PCP, psychiatrist, and pharmacist participate by phone. The nursing home staff, Aetna D-SNP case manager, Aetna and ACT housing specialists, local CHW, and ACT peer support specialist attend in-person at the nursing home. Jim summarizes what Ray has shared in their reassessment discussion regarding his status and concerns about the transition out of the nursing home. Jim asks Ray to elaborate in his own words with the team and empowers him to share what he wants to see happen with his care.

During the care plan update meeting, Ray clearly expresses his desire to return to his previous apartment, make some friends, take fewer pills, and reduce his anxiety. He is very concerned about his ability to walk even short distances due to pain. Jim and the MDCT develop his care plan prioritizing coordination for permanent supportive housing (PSH) and arrangement of tenancy supports. Dr. Adams, Ray's PCP, discusses management of his hypertension, pain associated with neuropathy, and age-appropriate preventive health services (pneumonia and flu vaccine, blood pressure monitoring). All agree that keeping Ray with his established ACT team upon discharge will provide continuity of care. Jim reviews core benefits and value-added services available. In addition to identifying the need to secure housing through the PSH program, Ray identifies (with support and input from the MDCT) the following goals:

- Decreased pain (from Level 3 to Level 1)
- Taking all medications as prescribed and maintaining a healthy weight
- Self-management of daily hygiene tasks and general housework tasks
- Improved mood; decreased sense of sadness, anxiety, and loneliness
- Making two new friends and identifying available social activities
- Learning how to use the bus system

As a result of this collaborative discussion, Jim and the team help Ray identify interventions he will need to address his pain and medication adherence. These can be conducted while Ray is still in the nursing home. Relevant services and interventions documented in the updated care plan include the following:

- Dr. Adams will connect Ray with a physical medicine and rehabilitation specialist (PMR) specialist who can further evaluate the source of Ray's neuropathy to develop a plan to address his pain and provide appropriate durable medical equipment (DME)—i.e., cane, walker, bedside commode, etc.
- Ray's psychiatrist, PCP, and pharmacist will talk with Ray regarding options for administering behavioral health medication injections to assist with adherence to medications
- Ray's pharmacist will conduct medication reconciliation activities that are consistent with his Medicare Part D plan and ensure pharmacy wrap drug coverage; dispensing devices and pill packs

Jim and Ray also document in the care plan the interventions/services to be implemented as he discharges to the community. The following interventions will address Ray's goals related to skills training, improved mood and decreased isolation and anxiety, increased social activities, and navigating the transportation system:

- Jim and the ACT team will develop a behavioral health crisis plan with Ray to include guidance regarding recognizing crisis triggers and symptoms, coping skills Ray finds effective, and the availability of his ACT team and/or crisis services to utilize if suicidal thoughts or plans return
- Ray's peer support specialist will help teach (and work with Ray to practice) anxiety management and coping skills, and how to use the local transportation system
- The CHW will provide skills training and development for Ray to teach him how to take care of personal hygiene, general housework, and other ADLs
- Jim will go with Ray to his first visit to the Jefferson Council on Aging (JCOA) senior center in his new neighborhood and will provide coaching and support as Ray gets oriented to the center and meets new people; they will look for opportunities for Ray to lead social events there, as permitted
- The ACT therapist and Ray's psychiatrist will meet with Ray to discuss his feelings of isolation and depression and to arrange for ongoing counseling sessions as needed
- The employment specialist on Ray's team will help him identify meaningful life activities/hobbies
- Jim and Ray will work on daily routine planning (i.e., bed times/meal planning) for independent living

At the end of the session, Ray indicates he is looking forward to implementing the agreed upon care plan.

Securing Access to PSH Services as Identified in the Updated Plan of Care

The need to secure PSH was identified as a critical priority for Ray during the MDCT meeting. With Ray's informed consent and approval, Jim works with Aetna's permanent supportive housing liaison to complete all steps (as described in the **Model Contract, section 2.7.15.2**) of Ray's application for PSH. Jim, Ray, and the PSH housing liaison work together to identify a housing option for Ray in Jefferson Parish that offers a safe environment with easy access to transportation services, a JCOA senior center, pharmacy, and grocery stores with healthy, fresh food. Jim attends Ray's PSH interview with the property owner to provide assistance and help minimize any anxiety Ray has about this step.

A PSH placement is secured with the new apartment complex and Jim notifies Ray that his housing application was approved. The apartment has been evaluated to ensure compliance with the Americans with Disabilities Act and to mitigate fall risk. Jim coordinates with the nursing home and apartment complex to schedule the move-in date in 30 days, at the time of Ray' discharge from the nursing home. Jim takes time to talk with Ray about the new apartment location and any concerns or worries he might have. Jim and the housing specialist ensure that all needed tenancy supports are scheduled to begin once he moves in. These include ongoing support from the housing specialist and in-home peer support services.

Ongoing Support through Additional Case Management Interventions

Jim, the CHW, and the housing specialist meet with Ray at his new apartment on his move-in date to ensure he is settled in and has his medication, DME, contact phone numbers, and food in the refrigerator. Ray expresses interest in the possibility of getting a dog to offer emotional support and companionship. Jim schedules a follow-up transitional case management meeting to occur later that week with Ray and the MDCT at his office. Ray has selected this location. Jim will arrange for non-emergency transportation provider LogistiCare Solutions to transport Ray to the meeting. This meeting will serve as an opportunity for the MDCT to check in with Ray regarding his new housing, how he is doing (from both physical and mental health standpoints), and to verify that all tenancy supports and intervention/services identified during the care plan update meeting at the nursing home have occurred or have been scheduled.

On a go-forward basis, Jim and the MDCT will provide (or coordinate for) the following additional services and supports to help Ray achieve and maintain his goals:

- Jim will coordinate with Ray's psychiatrist to provide documentation supporting the mental health need for an emotional support animal of Ray's choice
- Jim to share information with Ray regarding the CVS MinuteClinic in Metairie, as an alternative for him to address non-emergent acute illness and injury (as opposed to the ED)

- CHW will support Ray with education regarding making healthy lifestyle choices while on a limited budget; ensure follow-up on dental health services; assess need for sexual health education; CHW will ensure Ray has a pill counter for non-injection meds, and will educate Ray to help make sure this is filled correctly
- Connect Ray to Meals on Wheels and Supplemental Nutrition Assistance Program for food assistance
- Connect Ray to social activities programs geared to support individuals with SMI
- Assist Ray with completion of Office of Aging and Adult Services application for the Program for All Inclusive Care for the Elderly and long-term personal care services
- Jim to coordinate care (as needed between formal case management meetings) with Ray, his Medicare case manager, PCP, and PMR around treatment of Ray's medical conditions, to discuss the following:
  - Ray's adherence to medication regimen associated with physical health conditions and
  - whether resources such as home delivery of medications, occupational therapy, LifeAlert, and personal care services are needed are being considered
  - monitoring of maintenance of healthy weight
  - Medicare CM's scheduling of wellness appointments with Ray
- Connect Ray with the Wellpass text messaging program, which will send Ray targeted reminders about needed tests or screenings and information regarding appointments and general wellness, using phone provided by Aetna;
- Connect Ray with the local branch National Alliance on Mental Illness

Jim will facilitate transitional case management activities for a minimum of 12 months following Ray's discharge from the nursing home. Jim will sustain the person-centered focus of interventions with Ray and will continue to facilitate monthly (at minimum) MDCT meetings and service delivery in accordance to Tier 3 and transitional care management **Model Contract** requirements. Ray continues to meet with his therapist and psychiatrist to discuss his anxiety, depression, and loneliness. He has agreed to receiving injections of his antipsychotic medication. He is learning coping skills to address his anxiety and enjoys time at the senior center. Ray is actively following up with his PCP and PMR to address his pain and hypertension. Jim went with Ray to the Society for the Prevention of Cruelty to Animals to pick up his dog Gumbo. If/when Ray indicates he has made significant progress toward his goals, he will talk with his MDCT about transition to lower intensity of case management. He will continue to remain eligible for CHW services.

Aetna Infrastructure and Resources to Support Ray's Success

ACT services represent an intensive, evidence-based practice (EBP) for individuals with SMI. ACT fidelity monitoring is conducted semiannually for Aetna through an agreement with the Center for Evidence-Based Practices at Case Western Reserve University. Aetna receives their fidelity reports on over 20 ACT teams within our provider network, including results for multiple ACT teams located in Jefferson Parish. As a result, Ray has a choice of local providers for this EBP service.

Aetna is aware that some enrollees (like Ray in this case) frequently visit the ED. Aetna utilizes real-time ADT feeds to identify and intervene with individual enrollees when this occurs. As described in Ray's scenario, case managers respond by developing crisis plans, which target root causes of ED visits, and discuss alternative service options with members to help prevent avoidable ED visits. Services available to address avoidable ED visits might include utilization of CVS MinuteClinics, behavioral health crisis services, or telehealth services.

Ray, as a member of a unique D-SNP population, will benefit from Aetna's integrated model of case management, which promotes the seamless coordination of care across complex service delivery systems and lines of business. The provider and member portals store Ray's assessment and care plan information, which are accessible by permitted members of the MDCT. Additionally, Aetna case managers are skilled in coordinating and delivering services to address members' biopsychosocial factors in a manner that is person centered and fosters self-management.

2.10.7 Provider Network

Aetna recognizes that chronic illness such as diabetes has an enormous impact on Louisiana communities. Aetna participates in the Dragon Boat Festival each year in Monroe to promote health and physical activity, contributing to a healthier mind, body, and spirit.

2.10.7 Provider Network

Pursuant to the requirements of **RFP Section 2.10.7**, the Provider Network Listing Response Template and the Provider Network Capacity Response Template can be found in a folder titled **2.10.7 Provider Network** on the USB provided to the State.

The folder titled 2.10.7 Provider Network has been removed from the USB as it contains data identified as confidential information and has been redacted in its entirety.

2.10.8 Network Management

Following the state's priorities to address obesity and unhealthy eating through the elimination of food deserts, Aetna provides the resources for the creation of community gardens and offers healthy eating options in local schools, community centers, and places of worship. We celebrate the collaboration and coordination to create community gardens in public spaces in low-income neighborhoods.

2.10.8 Network Management

Aetna has participated in Louisiana's Medicaid managed care program since 2015. Our strong community relationships, integrated network analysis and recruitment processes, and high-touch model of network management assist us in ensuring a network sufficient to meet the needs of Louisiana residents. Through our network management strategies and processes, we continue to ensure timely access to culturally competent primary and specialty care services necessary to promote LDH's goals. Our provider network, which meets LDH's expectations and requirements, includes all provider types, including primary care providers (PCPs), pediatricians, community mental health centers, federally qualified health centers (FQHCs), rural health clinics (RHCs), obstetricians/gynecologists (OB/GYNs), behavioral health providers, specialists, hospitals, ancillary providers, and pharmacies that provide the highest quality of care to our enrollees. We acknowledge, understand, and will comply with all of the requirements of the **RFP**, the **Model Contract, and the MCO Manual**.

In support of our commitment to quality, ready access, and innovation to maximize enrollee health, advance health equity, and address social determinants of health within a flexible value-based approach, we have developed, and we continue to develop, a robust statewide provider network capable of meeting the health care needs of Louisiana Medicaid enrollees in an accessible, timely, and convenient manner.

Currently, Aetna has contracts with over 23,000 providers, including more than 5,000 primary care providers, 18,000 specialty physicians, 4,900 behavioral health specialists, 251 behavioral health and physical health hospitals, and 100 percent of the FQHCs and RHCs across the state. Network development efforts are ongoing as we work toward the goal of 100 percent adequacy. In cases where an enrollee's current provider is not contracted or when one does not exist, we will authorize services through single case agreements (SCAs) and provide transportation through the transition period to preserve continuity of care and access. **Table 2.10.8-1** demonstrates our network adequacy for the provider types referenced in this section.

Aetna far exceeds LDH's provider network access standards for adult PCPs in rural and urban parishes. The current standard is 90%, and to date we have **98% coverage** across Louisiana. Additionally, **90% of our PCP network has open and accessible panels for new enrollees.**

Our network for the Medicaid program also includes 100 percent of FQHCs and RHCs providers for increased rural access to health services for enrollees. Aetna has offered contracts to Opioid Treatment Centers in Louisiana and will continue contracting efforts to ensure an adequate network.

Table 2.10.8-1: Aetna Provider Network Adequacy and Accessibility

Provider Type	Rural Accessibility %	Urban Accessibility %
Cardiologists	99.9%	99.9%
Dermatologists	92.2%	92.2%
Endocrinologists (Pediatric)	98.2%	98.2%
Endocrinologists (Adult)	97.5%	97.5%
Licensed mental health specialists (Pediatric) Access to 1	98.7%	96.5%
Licensed mental health specialists (Pediatric) Access to 2	96.5%	94.9%
Licensed mental health specialists (Adult) Access to 1	98.5%	96.6%
Licensed mental health specialists (Adult) Access to 2	96.2%	94.9%
Neurologists (Pediatric and Adult)	99.9%	99.9%
OB/GYNs (Adult)	95.8%	93.4%
Orthopedists (Pediatric)	99.9%	99.9%
Primary care providers (Pediatric) Access to 1	99.9%	96.3%

Provider Type	Rural Accessibility %	Urban Accessibility %
Primary care providers (Pediatric) Access to 2	99.9%	95.6%
Primary care providers (Adult) Access to 1	99.9%	96.1%
Primary care providers (Adult) Access to 2	99.9%	95.4%
Psychiatrists (Pediatric) Access to 1	98.7%	93.2%
Psychiatrists (Pediatric) Access to 2	96.5%	92.4%
Psychiatrists (Adult) Access to 1	98.6%	93.4%
Psychiatrists (Adult) Access to 2	96.4%	92.7%
Pulmonologists (Pediatric and Adult)	99.7%	99.7%

We are prepared, upon award and in collaboration with the State, to expand MinuteClinic access in at least one existing CVS store and as many as three existing CVS stores. We will assess the regions of the state where there are a high number of potentially preventable emergency room visits, feasibility of Clinic placement and overall timing, and staging for the new clinic(s).

Identification of Current Network Gaps (2.10.8.1)

To maintain network adequacy and identify gaps in network access or where gaps are likely to occur, Aetna conducts both enrollee density and network GeoAccess® analysis to determine areas within the state, parishes, and cities where network adequacy and provider accessibility can be enhanced. Aetna uses assessment and measurement programs as the primary means of determining network adequacy and our level of compliance with Louisiana access standards. These assessments analyze compliance with travel distance standards, appointment availability, after-hours access, open panel status, and cultural competency for key provider types.

If an enrollee cannot access a pharmacy, hospital, PCP, or other specialist, then the network is not adequate (useable) for that enrollee, regardless of whether our network technically meets LDH's definition of adequate. We monitor our network to make certain that every enrollee has access to services and supports the need to achieve their health ambitions. Our goal is to exceed LDH requirements by providing access and choice of providers to 100 percent of enrollees within the required time and distance standards. While the provider counts in this section reflect our current network, we continue to build network capacity to eliminate identified access challenges or deficiencies. Louisiana has known areas of provider shortages. Based on our analysis, we identified the access challenges presented in **Table 2.10.8-2.**

Table 2.10.8-2: Identified Access Challenges

Region	Identified Access Challenges
Region 1	Although this region is categorized as an urban parish, its geography is more like a rural parish. There is currently not a sufficient amount of providers in the parish to meet the urban time/distance standard. Similarly, Jefferson Parish includes parts of Grand Isle that contribute to exceeding the time/distance standard. This region's primary access challenges exist in Plaquemines Parish. The geography naturally lends itself to restrictive travel patterns. Coupled with a shortage of physicians and practitioners post-Hurricane Katrina and the BP oil spill, Medicaid enrollees face difficulty accessing quality care. Further, combined with the geography, the local culture has an isolationist nature whereby people living outside the region's more urban areas often will not come into town for care. We have opportunities to address these challenges by continuing to contract with all available local physicians/practitioners as well as provide additional enrollee education on telemedicine and remote patient monitoring (RPM) opportunities. Aetna's approach to ensuring access in this region includes providing mobile clinics during community events and enrollee education. Utilization data suggests that our enrollees' pattern of care is utilization in Orleans Parish, where we have a very strong network. Our non-emergency medical transportation (NEMT) value-added service will provide enrollees with enhanced transportation services to access services in neighboring parishes.

Region	Identified Access Challenges
Region 2	Although the total number of providers in Region 2 is stronger than other regions, enrollees face similar challenges related to access to care. Some of the key challenges for enrollees accessing care in Region 2 are providers not accepting Medicaid due to reimbursement rates, lack of transportation and housing, and a lack of health education for Medicaid enrollees. Recently, Aetna signed a letter of intent for a value-based payment (VBP) arrangement with Franciscan Missionaries of Our Lady Health System (FMOLHS) Accountable Care Organization (Health Leaders Network) that should expand access to care, especially in the area of psychiatry, across all specialties aligning our mutual goals to the Triple Aim. Practice patterns suggest that more common diagnoses such as attention-deficit/hyperactivity disorder, diabetes, and some OB/GYN services are being addressed by PCPs. We also have telemedicine access points in Region 2 to expand capacity.
Region 3	Within Region 3, the Aetna network is strong and consistently provides access to our enrollees. According to LDH's Louisiana State Health Assessment and Improvement Plan, there is an overall lack of education to enrollees regarding disease management and prevention. The use of community health workers in this parish to inform enrollees better will improve interest in self-care and provide connections to the appropriate qualified providers. We also identify a shortage of adult- and pediatric-licensed mental health specialists. To increase accessibility, we will work with PCPs, with consultation support from our behavioral health medical director to deliver services and expand access through telemedicine.
Region 4	Although there is an adequate network of providers in Region 4, similar challenges to Region 2 exist around reimbursement, which create barriers to access. There is a lack of education around behavioral health for both enrollees and the community at large. An opportunity exists to expand behavioral health services beyond our current network to ensure follow-up post-hospitalization and inpatient care through telemedicine, peer support, and value-based payment arrangements. In St. Martin Parish, there is a need to expand psychiatry. We will do so by utilizing psychiatrists in neighboring parishes, as well as telepsychiatry services through our contract with One TeleMed.
Region 5	Region 5 is deficient in specialty care for chronic disease management that is especially prevalent in the rural areas. We will continue to work with PCPs and appropriate specialties on chronic disease management programs with a focus on school-based health clinics and rural health clinics. We continue contracting efforts with all available dermatologists who see Medicaid enrollees in the region to close the current deficiency. PCPs do provide basic dermatology services; however, we will also identify services in neighboring parishes and support enrollees through expanded NEMT services to travel to neighboring regions. We will also continue to provide education regarding accessing telemedicine for dermatology services. Because of the breadth and reach of our national network, we will leverage our commercial/Medicare networks to improve dermatology access. For example, we have dermatologists in Beaumont, Texas, who can support these enrollees.
Region 6	The rural geography, poverty, and lack of providers will drive our network strategy in Region 6. Our commitment to working with local providers as they are available will help us address specific issues in central Louisiana such as lack of prenatal care, higher prevalence of chronic conditions, and a high prevalence of enrollees with behavioral health issues. As a rural region, connections and communication between providers are a challenge and opportunity for Aetna, along with our electronic care management platform, to resolve. While our primary care network is strong in this region, there is a deficiency in certain specialists that can be resolved by remote patient monitoring. PCPs currently treat many chronic conditions and provide diabetes management. We do have an adequate network for specialty services in neighboring regions that enrollees can access with our expanded NEMT benefit. Additionally, we are in the process of working with Rapides Regional Medical Center on a VBP arrangement to enhance specialty services to our enrollees.
Region 7	Outside of the urban centers of Region 7, there are access barriers for vulnerable populations such as those without transportation. Data suggests there is an overuse of emergency department (ED) services to access care versus PCPs. Through our collaboration with University Health and Willis-Knighton Physician Network, we will collaborate on enrollee education around accessing primary care and reducing language barriers between enrollees and providers. While we have a strong primary care network, we experience some issues with OB/GYN, allergy, dermatology, and behavioral health services. As noted in other regions, we will utilize providers in neighboring parishes, leverage our commercial/Medicare network in neighboring Texas and Arkansas, and utilize telemedicine services to meet enrollee needs. Additionally, we have a VBP arrangement with Willis-Knighton Health System, which ensures access for our enrollees in that health system.
Region 8	There are multiple barriers to ready access for enrollees in Region 8. As a rural region, enrollees face transportation challenges that exacerbate an overall lack of providers. There is an opportunity for Aetna to work to dispel stigmas

Region	Identified Access Challenges
	around behavioral health conditions as well as improve access to primary and specialty care in extremely rural areas like Tensas Parish. Although we contract with all available specialists who see Medicaid enrollees in the region, we still observe gaps in hematology, oncology, dermatology, endocrinology, and psychiatry. To ensure enrollees have access for acute needs, we contract with Riverland Medical Center, a critical access hospital. Additionally, we are exploring a contract with Merit Health, one of our commercial providers, in neighboring Vicksburg, Mississippi.
Region 9	Although the Aetna network is adequate in Region 9, including a strong primary care network, there are still challenges to enrollees around timely access to care. Continued focus will be placed on Region 9 to expand timely access to specialty care through value-based arrangements that will assist with coordination of care across the continuum of care for enrollees. Placement of community health workers in Region 9 will aid families in navigating the health care landscape as well as provide additional health and wellness education to enrollees. One identified network gap is access to psychiatry. To improve access, we will work with PCPs, with consultation support from our behavioral health medical director to deliver services, and expand access through telemedicine.

We review GeoAccess and provider data to determine the number and type of specialists, including behavioral health providers, in a geographic area in order to maintain an adequate number of providers to meet health care needs of our enrollees accessing the network. We look to continue to collaborate with associations, community organizations, hospitals, and academic organizations for new providers entering the area, or to develop relationships to meet specific needs, such as providing telehealth or community solutions to maintain and increase network accessibility, especially in rural markets or in geographic areas with limited access to scarce provider specialties.

"Aetna is a leader in closing the access gap and helping Louisiana reduce barriers to mental and substance use treatment."

—Charles Edwards
CEO, One TeleMed

Identifying and Meeting Future Needs

We continually assess our network's ability to meet future projections of enrollee needs using the following methods:

- Evaluate current population demographics and consider projected population demographic needs, anticipating cultural and health disparities as an integral part of our annual network monitoring plan and Quality Management/Utilization Management Committee meeting process
- Invite provider participation and input on future network needs through our Enrollee Advisory Committees, Provider Advisory Committee, and Quality Management Oversight Committee (QMOC)
- Invite participation and feedback in stakeholder meetings comprised of health care professionals, advocates, and enrollees to discuss issues, including network adequacy, provider complaints, and recruitment priorities for growing the network
- Obtain stakeholder feedback on network composition, operations, and quality improvement initiatives to make sure we meet the cultural needs of the community and assess any areas of concern
- Invite provider participation in a variety of educational forums and webinars to share ideas, questions, and concerns, as well as future network needs/projections
- Constantly seek feedback, suggestions, and innovative ideas from providers to help offer better access and increase enrollee convenience. This includes review of provider satisfaction results.
- Identify network needs: The Provider Services team is crucial in identifying network needs to ensure timely access for enrollees. Upon referral from the integrated care team or other community organizations, they conduct research and outreach to providers to mitigate any potential gaps in care.
- Utilize enrollee and provider referrals, which trigger recruitment activity
- Utilize quarterly and annual monitoring, which triggers recruitment action as we review GeoAccess reports

- Evaluate projected population needs against the current contracted provider network to identify any opportunities to recruit services and providers. Aetna maintains a recruitment database to help us track recruitment targets, and it shows our progress in obtaining signed agreements and applications. We offer providers an opportunity to sign an electronic contract using the Adobe e-signature capability to make it as convenient as possible for a provider to sign and return their document, decreasing turnaround time on a signed agreement from days to hours.

Our network is designed to meet all contract requirements, including access standards; appointment times; after-hours availability; type and number of facilities; and ancillary, specialty, behavioral health, and vision providers. We successfully manage our networks for high-quality, culturally diverse, credentialed, and physically accessible provider groups to increase access and choice.

Strategies to Increase Provider Capacity and Meet Needs in Gap Areas (2.10.8.2)

We use the following **global strategies** to address identified network deficiencies:

- **Leveraging existing providers:** Many of our existing Aetna commercial providers have practice locations in areas for which we may have a Medicaid deficiency. We leverage those commercial relationships to contract those practice locations.
- **Recruitment of out-of-network providers:** To proactively provide consistent access to services and avoid gaps in care, we recruit out-of-network providers with whom we have authorized care or executed an SCA. We assess use of out-of-network services on a monthly basis to verify that our network contains adequate numbers and types of providers and use this information to evaluate recruitment opportunities.
- **Recruitment of providers through stakeholder identification:** Enrollees, families, and advocates are highly successful in identifying potential providers in the community. Our Network team has successful strategies to recruit those providers into the managed Medicaid network, such as working with providers who have these enrollees in their established panels.
- **Expansion of access through telemedicine:** We utilize MDLIVE®, Teladoc, and One TeleMed to provide telemedicine services. These national contractors offer specific telemedicine services related to routine physical and behavioral health services, offering a web-based service enabling enrollees to access these services from the convenience of their communities, including wherever they live. It provides web-based, 24/7/365 access for enrollees to PCPs and behavioral health specialists. We are also adopting telepsychiatry solutions to grow access to these services. These capabilities improve timely access to behavioral health care, especially for those in the state for whom distances might present a challenge to access to care.
- **E-consult and telephonic consultation services to PCPs:** The primary care setting has become the gateway to behavioral health services, such as mental health and substance use. PCPs need support and resources to screen and treat persons with low acuity conditions. E-consult provides PCPs access to United States-licensed, board-certified specialists from major academic centers across the country via an electronic health record-linked portal, which increases overall capacity.

Aetna collaborates with One TeleMed (formerly Advance Telehealth) to provide telepsychiatry services for our enrollees and meet needs in gap areas. Enrollees can see a mental health provider from the privacy of their own home. Conditions for treatment include, but are not limited to, major depression, attention-deficit/hyperactivity disorder, and bipolar disorder.

In addition to the global strategies outlined in this section, we will employ these additional strategies to address the network gaps identified previously:

- Explore, as described previously, the expansion of CVS MinuteClinic access in rural parts of the state to address access issues and increase capacity by reducing low-acuity visits

- Leverage our current value-based payment arrangements and collaborations with large health systems to bring mobile clinics to areas of the state where there are no providers
- Expand the NEMT benefit as a value-added service to facilitate service access for enrollees in neighboring parishes when a service is not available in their community.
- Utilize RPM for select enrollees with chronic conditions such as diabetes, asthma, and high-risk pregnancies. Through RPM, we provide enrollees with an iPad and devices including glucometers, blood pressure cuffs, scales, and pulse oximeters, allowing our enrollees to communicate with their PCPs, specialists, and case managers in a near real-time manner. For example, RPM augments care provided to our enrollees with high-risk pregnancies by giving them access to non-stress test (i.e., fetal heart rate monitoring) equipment.
- Contract with Ready Responders to perform certain assessments of the enrollee in their home; this collaboration is designed to reduce ED utilization by providing in-home care management to frequent utilizers. It also works to reduce non-emergency ambulance transport by having trained emergency medical technicians stationed in the communities. This bridges the gap as it relates to transportation and other enrollee barriers.
- Contract with BehaveCare to provide care management services, home visits by physicians, and home-based interventions for both physical and behavioral health care; BehaveCare also performs in-home primary care and Early and Periodic Screening, Diagnosis and Treatment services.
- Continue to educate PCPs about the ability to utilize physician assistants and nurse practitioners to serve enrollees. The use of mid-level practitioners allows increased access and capacity to specialty care by having access to other provider types within the specialist's office.
- Pursue contracts with community organizations, such as churches and community outreach groups, through value-based payment models to help to close gaps in care and connect enrollees with services.
- Use our statewide transportation provider to roll out family transportation to reduce no-show rates, which increases service access and improves provider satisfaction
- Use event-based, community-focused clinics in rural parishes or areas with access issues for the aforementioned specialties, enabling our providers to treat enrollees' needs for dental, vision, and primary care
- Provide financial incentives to providers for the provision of after-hours care

In 2018, we paid out approximately **$400,000** in PCP-based incentives to providers in after-hour codes to increase accessibility and capacity.

Strategies to Monitor Compliance with Provider Network Standards (2.10.8.3)

Aetna actively monitors our provider network, including **all provider types**, for compliance with the provider network standards in **Attachment D to the Model Contract** to identify and mitigate network accessibility issues or provider noncompliance with policies and procedures that affect an enrollee's reasonable access to care delivery. We continually evaluate reports, including GeoAccess and network adequacy information, to determine where we need to increase the number and type of new providers to the network as well as appropriately prepare for anticipated network providers across the service area. GeoAccess reports are generated no less than monthly and they are reviewed by health plan and network leadership. Network staff will formulate a plan to close any identified gaps based on data or enrollee feedback. We use our provider data warehouse to create a suite of monitoring tools and reports to identify network gaps. The results of our monitoring efforts are reviewed by our Services Improvement Committee. The committee develops and monitors action plans to ensure identified gaps are addressed.

In the fourth quarter of 2018, our data indicated that we saw a spike in inpatient usage in Region 9 specific to the Hammond area. As a result, we identified an opportunity to contract with North Oaks Health System and physician group to address this capacity need.

- Reporting and monitoring:

  - **GeoAccess reports:** Monthly reports measure against LDH's access standard requirement for each ZIP code
  - **Network adequacy:** Review utilization data for prevalent conditions, SCAs, provider referral issues (availability of specialties), providers-gained-and-lost report, and unplanned network exits report to confirm sufficiency of the type and number of providers
  - **Operational dashboard that identifies enrollee ED utilization:** Continuous monitoring is performed using operational dashboards that measure and trend enrollee utilization including ED care. These dashboards allow us to identify opportunities to enhance our network by location, disease state, and enrollee type.
  - **Conducting network panel studies using open/closed panel report:** Assessing network access and availability needs
  - **Conducting provider directory audits:** Monthly audits confirm the accuracy of listings and make weekly updates to online directories with changes in demographics and panel status
  - **Conducting provider appointment availability (secret shopper) phone surveys:** Query providers on appointment availability, open scheduling, and after-hours care
  - **SCA data:** Analyze SCA trends to identify potential shortages of services or geographic gaps
- Enrollee feedback:
  - **Enrollee feedback:** Our call center monitors trend reports that are shared weekly with the Operations team to determine any network gaps or barriers.
  - **Grievances**: We review analysis and trending of enrollee grievances to identify potential availability or accessibility issues, perform root-cause analysis, and develop corrective action plans, if necessary. We receive committee findings and survey results on access, appointment availability and wait times, non-participating prior authorizations, and out-of-network requests.
  - **Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey**: We create action plans for opportunities presented in the CAHPS results.
- Provider outreach and support:
  - **Interdisciplinary team collaboration:** Identify any access or capacity concerns and addressing special needs
  - **Reviewing PCP-to-enrollee status:** Review ratios by provider type and region to confirm availability of an adequate number of PCPs
  - **Reviewing providers' panel status:** Review open panel status to confirm where new enrollees can be assigned and identify providers who have reached their capacity and/or referral limits

Our strategy for monitoring provider network compliance uses a holistic approach. It is imperative that the network not only achieve adequacy, but also be usable to our enrollees in as close to real time as possible. In order to achieve usability for our enrollees, we utilize the strategies detailed in this section as well as these supplemental strategies to monitor compliance with network standards for the provider types presented in **Table 2.10.8-3**.

Table 2.10.8-3: Supplemental Strategies for Monitoring Provider Compliance for Specific Provider Types

Specialty		Supplemental Strategies for Monitoring Provider Compliance
Cardiologists	←Applies to all→	Our provider integration program monitors providers' open and closed panels, and ensures that our online directory processes daily updates to maintain as up-to-date as possible to inform enrollees of access opportunities
Dermatologists		
Endocrinologists		Ongoing monitoring and reporting through surveys such as child and adult CAHPS, secret shopper calls, and when enrollees believe providers may not be compliant in appointment availability or Americans with Disabilities Act (ADA) standards
Licensed mental health specialists (pediatric and adult)		

Specialty		Supplemental Strategies for Monitoring Provider Compliance
Neurologists (pediatric and adult)		Continual analysis of provider survey results to head off any potential issues
OB/GYNs (adult)		
Orthopedists (pediatric)		Direct enrollee feedback given to health plan staff through Enrollee Services, Care Management, Grievance and Appeals, and community outreach workers
Primary care providers (pediatric and adult)		
Psychiatrists (pediatric and adult)		Pharmacy reporting that measures spike in prescriptions written of a certain type in a geographical area that may signal an increase in enrollee need. Measuring the need may trigger the addition of specialty providers to increase accessibility.
Pulmonologists (pediatric and adult)		

Our goal is to maintain a comprehensive network of facilities, clinics, physicians, and related support providers that demonstrate a pattern of practice that understands the varied health care needs of our Medicaid enrollees. A key network initiative is to configure our network of providers such that providers are in close proximity to where our enrollees live, work, and play. We engage with community resources and stakeholder groups to identify and respond to our enrollees' needs. If we determine a need to increase the provider network or emphasize certain provider specialties in a specific area, we proactively conduct contracting outreach to providers to mitigate a potential for network gaps or noncompliance with access and wait-time standards disrupting an enrollee's access to appropriate and timely health care services. In addition to offering standard provider contract efforts, we consider targeted rate increases or explore value-based arrangements to compensate providers fairly for quality outcomes. This is evidenced by the fact that 51 percent of our current payments are value-based arrangements.

Supporting Enrollees and Providers in Scheduling Appointments

Aetna uses our integrated system of care model to support enrollees and providers with improving the outcome of their health. In instances where enrollees are not able to make appointments with the appropriate provider, Aetna case managers and Enrollee Services representatives will step in, facilitate the request, and even make the appointment if necessary. In addition, if a provider is attempting to assist an enrollee with getting an appointment with another provider, Provider Services staff will assist in obtaining the appointment so that the enrollee can receive the care they need in a timely manner. We continuously explore new technology. An emerging technology Aetna is evaluating is the use of a chatbot. The chatbot will interpret the online chat request and assist with identifying a provider and obtaining the appointment.

Because of our intensive monitoring and outreach activities with providers to ensure compliance, we actively support our PCPs in the scheduling of appointments for cardiologists, dermatologists, endocrinologists, licensed mental health specialists, neurologists, OB/GYNs, orthopedists, psychiatrists, and pulmonologists. We also recognize that providers benefit from additional support, which includes call center support to identify and contact specialists accepting new enrollees, scheduling appointments, locally embedded provider services support, care management outreach, and field-based community health workers.

Strategies for Recruitment and Retention (2.10.8.4)

Our goal and strategy are to build a comprehensive region-specific, experienced, and high-quality network that offers provider selection, preserves existing community referral patterns, and ensures access to care for the underserved. When possible, Aetna is committed to using local providers; however, when local providers are not available, we will draw on our national expertise to deploy innovative alternative models as we did with telemedicine services. We will continue to use our comprehensive contracting methodology, VBP programs, technology/telehealth services, and an ongoing level of engagement and

diligence to continuously recruit providers and scale our provider network to meet the needs of our Louisianan enrollees. We also employ enhanced recruiting and retention methods based on our level of engagement with providers. **Figure 2.10.8-1** depicts our recruitment and retention strategies by provider type.

Aetna's Provider Services team is crucial in identifying needs to expand the network to increase timely availability for enrollees across all provider types. Upon notification of a provider need, we immediately initiate recruitment efforts. These notifications may be received from a variety of sources, such as referrals from the integrated care team/medical management or other community agencies. Once notified, the Network team conducts outreach to providers in that area or specialty.

Our strategy is to build the most effective, experienced, and highest-quality network that offers provider selection and meets the needs of enrollees, as evidenced by the current network in the regions where we currently operate. For example, in Region 4, even though Aetna has no gaps in our PCP network, we observed there was an opportunity to improve the usability of our network. We collaborated with St. Martin Hospital in Breaux Bridge to create a nurse practitioner clinic focused on Medicaid enrollees, and expanded services into this region's school-based clinics. We were able to provide enhanced fee-for-service reimbursement as well as shared savings opportunities through a customized value-based agreement to expand access for our enrollees and improve the usability of our network. This arrangement also had a positive impact on the use of ED services. In Independence (Region 9), we entered into a contract with Lallie Kemp Regional Medical Center to fill a network gap for acute care hospital services, and multi-specialty physicians.

Our model of provider engagement is designed in support of the philosophy that developing long-term relationships built on mutual trust improves provider retention. Aetna continually looks for innovative strategies to engage, satisfy, incentivize, and retain providers. We use performance improvement projects, educational initiatives, community forums, and pilot projects to help providers improve their practices, create better health outcomes for enrollees, and reduce administrative costs and burdens. Examples of strategies to retain providers include the following:

- Simplified contracting using streamlined agreements that are fully compliant with State requirements, and the ability to sign an electronic agreement using Adobe e-signature, making it convenient for a provider to return and sign their document within hours.
- Face-to-face engagement activities including one-on-one meetings with our Provider Services staff to help them understand their managed care contract, Aetna's policies and procedures, how to file claims, and receive electronic payments
- No requirement to submit paper or electronic referrals for services
- A dedicated Provider Services call center
- Technical assistance and training related to Medicaid managed care claims submissions and the technical interfaces providers will have with Aetna
- Online tools through the provider portal that make it easier for providers to interface with Aetna
- A committee structure that welcomes provider participation and feedback; examples of these committees include the following:
  - The **Provider Advisory Committee,** which will be comprised of enrollees and providers; they will meet **quarterly** to provide feedback. The committee provides expert council to the plan to improve access, provider satisfaction, and assistance with connecting with specialty providers. The committee is also responsible for reviewing satisfaction survey results and providing feedback and input on policies and programs. These findings are submitted to the QMOC for further review and integration into our existing programs/policies. Our Network team uses this information to identify potential areas of provider shortages.
  - **Hospital Advisory Committee,** which will consist of providers in the Aetna network that represent medical and behavioral health hospitals, clinics, health centers, and key advocacy

groups. The committee conducts **monthly** meetings to provide feedback on new quality improvement initiatives, provide invaluable insight into local population health concerns, and identify and assist Aetna in strategic planning, addressing issues and concerns, assessing plan initiatives and identifying needed areas of correction and improvements in operations.

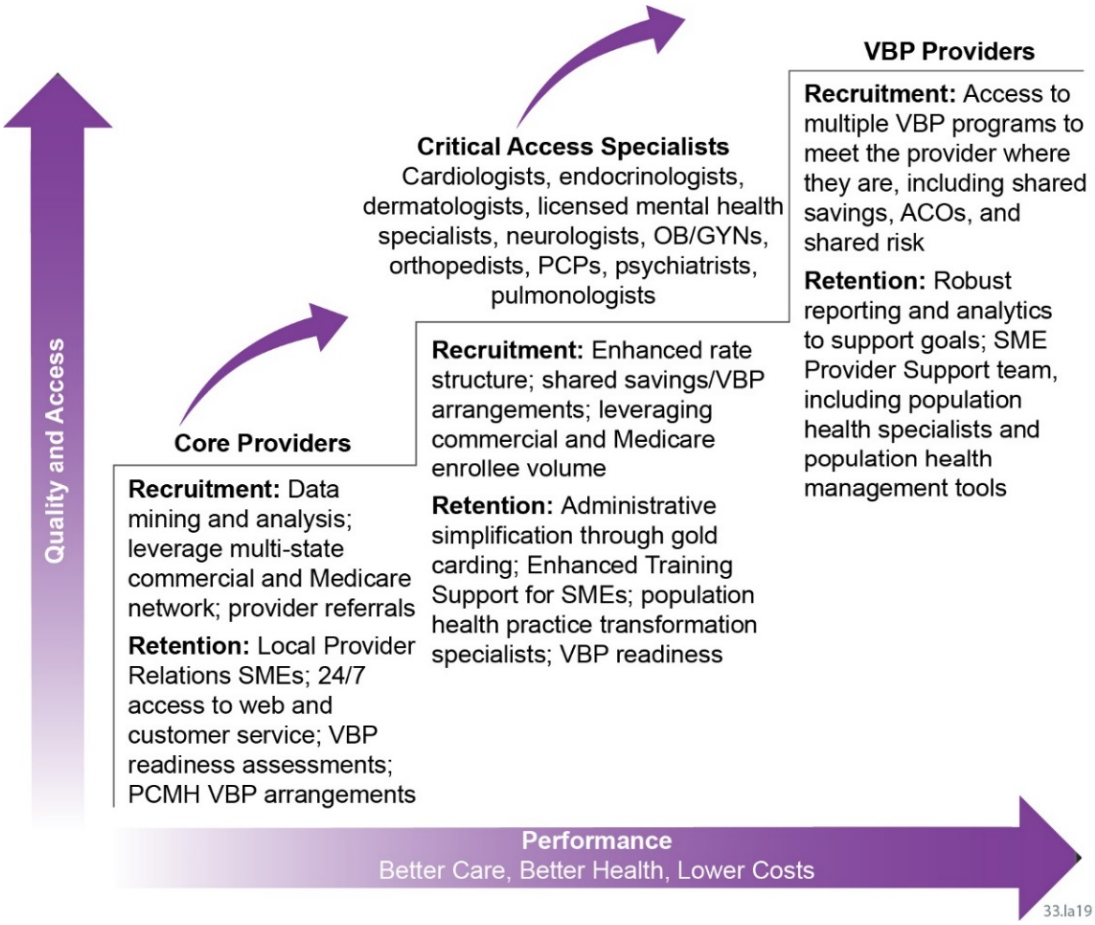

Figure 2.10.8-1: Recruitment and Retention Strategies by Provider Type

Aetna's provider recruitment and retention strategies are customized based on provider type.

Our **Provider Support** and **Value-Based Payment** activities, as further described in **Sections 2.10.9 and 2.10.12**, respectively, also support provider retention.

Quality and Performance Metrics to Determine Provider Success

Aetna remains committed to continuous quality improvement to fulfill LDH's Triple Aim of better health, better care, and improved cost. We monitor provider performance on an ongoing basis to make certain providers meet the required standards.

Many high-quality providers find value-based arrangements an attractive means through which to join a network. Through Aetna's value-based payment arrangements, we can incentivize cost, utilization, and quality improvement through a reduction in potentially preventable events (primary, specialty, and hospital-based) such as hospital readmissions, avoidable ED visits, avoidable inpatient visits, and preventable complications. Using quality and performance measures in the VBP contracts helps us to determine the provider's success, and together we make continuous progress toward LDH's goals for enrollee access to quality care.

As part of our recruitment and retention strategy, Aetna offers providers a variety of alternative payment arrangements through our Aetna Better Value program. To date, Aetna has entered into an alternative payment arrangement with several providers such as Willis-Knighton Physician Network in the northern area of the state, FMOLHS in central Louisiana, and Ochsner-LSU HSC Physician Group in New Orleans, to name a few. Our programs are customizable, allowing us to combine the most applicable components for a particular provider into a comprehensive and effective, innovative alternative payment model.

Other approaches we use include the following:

- Meeting with stakeholder focus groups to understand the availability and adequacy of care and perceived gaps in services: We provide flexibility and choice through our community-based provider collaborations, resulting in optimal, compassionate care to enrollees. Our health plan leadership will meet at least **quarterly** with enrollees, families, and providers in each region, which will enable us to identify unique needs and challenges.
- Providing trauma-informed care (TIC) training: Aetna Inc. has collaborated with the National Council on Behavioral Health to assess the impact of trauma on enrollees. Aetna has trained all staff on trauma-informed principles, motivational interviewing, and the impact of trauma, and is working with the provider network in a yearlong collaborative to assess and develop standards for trauma-informed care for enrollees.
- Identifying non-participating providers to improve accessibility: Our Provider Services team analyzes our commercial network to identify high-performing providers in addition to providers in existing groups that do not currently serve Medicaid enrollees. We actively recruit these identified providers to join our provider network.
- Using the integrated care model: Aetna uses a whole-person integrated care approach to solve for the fragmented physical and behavioral health and community support systems that, when coordinated for enrollees, leads to better health outcomes.

Strategies to Meet Enrollee Multilingual, Multicultural, and Disability Needs (2.10.8.5)

Cultural competency and health literacy are at the core of our service delivery. Aetna's health care equity director prepares a detailed Cultural Competency Plan (CCP) annually to ensure engagement of all health plan leaders and alignment with Culturally and Linguistically Appropriate Services (CLAS) standards and to ensure compliance. The CCP outlines the processes used to develop and maintain a culturally competent staff and provider network. This comprehensive plan includes strategies designed to assist our staff, providers, and subcontractors with integrating cultural and linguistic competence and health literacy into every aspect of our organization. Our CCP focuses on effective and equitable care and services by respecting and honoring each enrollee's cultural health beliefs, practices, preferred language, special needs, and socioeconomic background. Cultural competency is part of the fabric of our organization, and it should infuse every aspect of enrollee interaction and local, community-based care delivery.

To deliver quality health care services, it is necessary to understand the needs of our enrollees, particularly their cultural and linguistic needs. This understanding enables us to provide, through our provider partners, culturally competent services and to assess where disparities in health care outcomes exist. All our contracted providers, including behavioral health, receive cultural competency training at orientation and on an ongoing basis, including the following:

- Cultural competency and impacts on health care
- Provider obligations for delivering culturally competent care
- Tools and resources such as Aunt Bertha, an online repository of community services
- Social determinants of health and trauma-informed care

- Training staff on the need to understand and respect cultural differences and develop services that better meet the needs of minority populations and remove barriers to care
- Assisting enrollees with limited English proficiency
- Providing access to interpretive and American Sign Language services for Aetna enrollees
- Assessing feedback from enrollees about programs, quality initiatives, enrollee materials, and other education and outreach tools to meet their cultural and linguistic needs

We realize that a critical element to providing quality service involves developing and maintaining culturally appropriate services that address diverse cultural and ethnic backgrounds, disabilities, and regardless of gender, sexual orientation, or gender identity and provide for cultural competency and linguistic needs including the enrollee prevalent language(s) and sign language interpreters. Aetna utilizes the U.S. Department of Health and Human Services (DHHS) Office of Minority Health National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care and follows DHHS' *A Blueprint for Advancing and Sustaining CLAS Policy and Practice* to inform the annual revision of our policies.

Our most frequently utilized interpreter and translation services are for Spanish and Vietnamese. Aetna currently has two certified Spanish-speaking Enrollee Services staff to assist our Spanish-speaking enrollees. We arrange for providers and enrollees to access our translation line services when needed, as well as connecting enrollees to translation services through local organizations such as CrescentCare. Aetna offers a choice of providers for enrollees who can communicate in their preferred language. **Table 2.10.8-4** details the prevalent languages spoken by Aetna's enrollees with corresponding contracted provider counts.

Table 2.10.8-4: Prevalent Spoken languages of Aetna's Enrollees and Contracted Providers by Region

Region	English		Spanish		Vietnamese	
	Enrollees	Providers	Enrollees	Providers	Enrollees	Providers
Region 1	28,667	7,987	749	263	174	53
Region 2	14,013	4,393	169	86	44	14
Region 3	8,645	1,499	94	29	12	2
Region 4	14,375	2,660	105	46	48	8
Region 5	4,374	1,441	27	22	4	4
Region 6	7,186	1,497	36	18	8	1
Region 7	15,881	3,570	74	58	6	10
Region 8	8,203	1,870	17	27	3	3
Region 9	12,763	3,048	93	63	23	6

The largest ethnic groups in Aetna's current membership are white (non-Hispanic) and African American, followed by the Hispanic and Vietnamese populations. The Hispanic and Vietnamese populations contribute to the fabric that makes Louisiana unique, and bring their own values, beliefs, and perceptions, which must be considered when providing quality care. **Table 2.10.8-5** details the cultural traits of the Hispanic and Vietnamese populations that may affect the delivery of health care.

Table 2.10.8-5: Cultural Nuances Affecting Health Care

Population	Cultural Traits
	Community- and Family-oriented
Hispanic/Latino	• Hispanic/Latino cultures have a strong sense of obligation and loyalty to their family, extended family, and their community • Hispanics/Latinos rely on family members for advice and encouragement

Population	Cultural Traits
Vietnamese	• Vietnamese culture emphasizes community; as they often live in tight-knit groups, they are supportive of one another • Family plays an essential role for Vietnamese and is highly revered • Among the Vietnamese, family is not conclusive of the nuclear family, and is inclusive of extended relations such as daughters-in-laws and grandchildren
	Faith and Religion
Hispanic/Latino	• For Hispanic/Latino populations, faith and church are fundamental to family and community life, and provide a source of strength and hope • Faith and church are influential in providing hope during times of illness • A majority of the Hispanic/Latino population is Catholic • Health, sickness, and day-to-day life are impacted by spiritual and religious beliefs
Vietnamese	• The majority of Vietnamese in Louisiana are Catholic and Buddhist; includes some Baptists • Religion plays a significant role in uniting their communities and keeping their culture thriving
	Respect and Authority
Hispanic/Latino	• Hispanic/Latino populations tend to emphasize respecting authority. For many Hispanic/Latino populations, it is the norm for the father or the eldest family member to hold authority. The Hispanic/Latino population may also extend respect for other authority figures such as doctors.
Vietnamese	• Respect is an integral part of the Vietnamese as it is the basis of Confucius' teaching, which is strongly followed. It is expected that one show respect for parents and family members at home, and for seniors, teachers, and those with authority when outside of the home environment.
	Fatalism/*Personalismo*
Hispanic/Latino	• This population has a belief that one cannot alter their fate and outside forces impact life events, such as illness or disease • Hispanics/Latinos have the expectation that they will cultivate a personal relationship with their health care provider, which is referred to as *personalismo*
	Health
Hispanic/Latino	• Hispanics/Latinos may use a combination of folk (traditional healing practices) and Western medicine
Vietnamese	• Vietnamese may use a combination of folk (traditional healing practices) and Western medicine

For example, for **Hispanic enrollees**[1], we understand that health is a family affair and any health decisions are made as a family. Caregivers and family members are strong influencers along the health journey and take part in key decisions. Family responsibilities are a priority over health, and juggling responsibilities can get in the way of enrollees taking care of their own well-being. Health care providers (HCPs) are often viewed as authoritative and respected figures for Hispanics who highly respect their HCP and expect a formal yet warm and personal relationship with them. For **Vietnamese enrollees**[2], we understand that family is essential to this population and is highly revered. Family is inclusive of extended relations such as daughters-in-laws and grandchildren, and not just parents and their immediate children. In Vietnamese families, wives often make health care decisions for the family, and the common good of the family is considered when making decisions. Illness or sickness may be treated with traditional and Western medicine, and HCPs should be aware of sometimes incorporating traditional methods with Western methods, which may affect adherence to treatment.

Meeting Enrollee Linguistic and Cultural Needs

Our network will deliver care in a culturally competent manner based on the prevalence of languages (including American Sign Language) and conditions within ethnic groups. Many of our providers offer multilingual or bilingual staff to meet our enrollee needs as evidenced in the previous **Table 2.10.8-5.** We have developed relationships with key providers and organizations to provide services and support to our diverse membership. For example:

- We have a strong relationship with the Chitimacha Tribe and we are contracted with the RHC in Houma.
- We have a sound rapport with La Leche League, which has Hispanic-focused peer specialists that work directly with the Hispanic populations in all nine regions. We invite them to all maternal health events.
- We work directly with Vietnamese Initiatives in Economic Training (VIET) in their Head Start program, Keep Kids Active, and Family First Program. The Michoud area of New Orleans is a primarily Vietnamese community. We regularly host family days and health and wellness events, and directly work with providers in this area to meet with enrollees in their community.
- We cohost quarterly health and wellness fairs for the Jena Band of Choctaw Indians, bringing education resources and materials to tribal members on how to maintain a healthy and active lifestyle. We have invited yoga and Zumba instructors to teach lessons as well as provided healthy and nutritious lunches to tribal members.

To monitor and evaluate that our network is meeting cultural and linguistic needs, we obtain stakeholder feedback on network composition, operations, and quality improvement initiatives. We evaluate current population demographics and consider projected population demographic needs, anticipating cultural and health disparities as an integral part of our annual network monitoring plan and QMOC meeting process. Standards for competency, expertise, and cultural sensitivity are communicated through the provider manual, newsletters, during site visits, and in training documents. Aetna's provider directories indicate the provider's cultural and linguistic capabilities including languages spoken by provider or skilled medical interpreters at the practitioner's office, such as staff that speak in Spanish or American Sign Language, as well as gender, board certification, and accessibility for persons with disabilities. In addition, the provider directories identify whether the provider has completed cultural competency training.

Meeting Enrollee Disability Needs (Access, Accommodations, Equipment)

Aetna employs several methods to determine a provider's compliance with ADA standards for physical accessibility and reasonable accommodations including parking, exam and waiting rooms, and accessible equipment for Medicaid enrollees with physical or mental disabilities. We emphasize interest in identifying providers with key accessibility to care opportunities such as providing oversize exam tables, specialized staff assistance for enrollees with needed care requirements, or materials in braille to serve the varied health care needs of our enrollees. Through our national durable medical equipment (DME) contracts, we provide same-day or next-day delivery statewide for DME. We also contract with Hanger Prosthetics and Orthotics, Numotion, and Still Me to meet enrollees' disability needs.

Aetna assesses a provider's capability during onsite visits, through credentialing and re-credentialing processes, monitoring enrollee complaints, and gathering information used in our provider directory, such as physical accessibility and accommodations. These indicators are available across all provider types, including behavioral health, long-term care, home health, nursing care, and home- and community-based providers to help make sure the enrollee selects the right provider for the right service and in the right setting. We have a process in place where all potential findings related to patient quality of care are reported, investigated, and when necessary, corrective action plans and enforcements are put in place to address the concern.

Protocol for Terminating Network Providers for No Cause (2.10.8.6)

Aetna makes every effort to ensure that our relationships are strong enough with our providers to resolve issues as they may arise. We take every step to resolve deficiencies, complaints, grievances, and any other concerns to ensure that our enrollees have a solid and comprehensive network to rely upon. It is our practice to terminate

provider contracts for cause when we identify safety or significant quality concerns, or noncompliance with credentialing requirements. It is not our practice to terminate provider contracts arbitrarily for no cause. To date, Aetna has zero terminations for no cause. If Aetna desires to terminate a provider located in a health professional shortage area for no cause, we seek written approval from LDH prior to terminating the provider.

Even though we make every effort to avoid it, Aetna maintains policies and procedures regarding the termination of providers and provides delegated oversight of all network activities. Our process includes quickly identifying and reporting changes in the provider network to LDH prior to termination, including our plan to notify enrollees of the termination, our strategy to ensure timely access for enrollees, and our plan for ensuring there is no stoppage or interruption of services to enrollees. Additionally, Aetna will send LDH a file that identifies the enrollees affected by any termination and notify LDH's provider management contractor by close of business the next business day of a network provider's termination.

We monitor the provider network to confirm compliance with the previously stated requirements. The written notice to the provider includes the reason for Aetna's decision; the effective date of termination; the provider's right to appeal the decision; and how to request an appeal. The focus of our processes, monitoring, reporting, and communication is to make certain covered and medically imperative services are available to enrollees.

Notifying Enrollees of Provider Terminations to Minimize Negative Impact

Aetna's processes and policies make certain enrollees are notified in a timely manner and the enrollee has continued access to covered services in the event a provider is terminated. Our Provider Services team coordinates with Enrollee Services staff to start the process of enrollee notifications and maintain continual care for enrollees impacted by the termination of a provider. Aetna provides written notice to enrollees within 15 calendar days from the date a termination notice is sent to the PCP, or from the date Aetna receives notice from the PCP of non-participation in the network, and no less than 60 calendar days before the effective date of the termination to each enrollee who received their primary care from, or was seen on a regular basis by, the terminated provider within the past two years. We use similar care when terminating a specialist from our provider network by analyzing claims data to identify potential impacted enrollees.

Aetna allows an enrollee to continue an ongoing course of treatment with the provider/practitioner for up to 90 calendar days from the date of our enrollee Notification Provider Termination letter. Aetna's definition of 'ongoing course' is defined as an enrollee receiving treatment from a practitioner during the previous 12 months for a condition that requires follow-up care or additional treatment, or the services have been prior authorized, such as in the case of an enrollee who is pregnant and in her second or third trimester. Maternity services can continue with the provider/practitioner who is being terminated through the completion of the enrollee's postpartum care. Enrollee choice, including the ability to select a PCP, is our principal goal, especially when transitioning care. When a provider is terminated, enrollees receive information and assistance to make a PCP change. Aetna's Enrollee Services staff and Care Management team are available to assist enrollees in selecting a new PCP.

We will align any termination for no cause with the annual open enrollment period. If an enrollee is receiving an active course of treatment or care at the time, we terminate a provider's participation in the network, we arrange for the continuity of care through the current active treatment period with the same provider as long as there is not a quality of care or licensure issue, regardless of the provider's network status. The extension will continue until care has been fully transferred to a treating provider who has agreed to assume responsibility for the enrollee's care for the remainder of that episode and subsequent follow-up care. We realize the importance of communicating with enrollees quickly and with the appropriate supporting steps to facilitate continual care for those impacted by a provider termination; therefore, our timely and effective communication is critical.

2.10.9 Provider Support

Twenty-nine percent of Louisiana residents live in communities designated by the United States Department of Agriculture as having low access to grocery stores. Aetna provides resources for communities to use sustainable practices, grow healthy foods, provide education for healthy lifestyles, and empower communities. Aetna regularly participates in helping neighborhoods curate food hubs to address the barriers for accessing nutritious foods.

2.10.9 Provider Support

With a lasting presence and commitment to Louisiana, Aetna Better Health of Louisiana (Aetna) has been actively engaged with the provider community since 2015, currently holding contracts with over 23,000 providers. We have developed strategic relationships with providers, community agencies, and LDH partners in all nine regions of the state, serving Medicaid enrollees through our provider services model and bidirectional communication philosophy. Aetna currently serves over 120,000 Medicaid enrollees throughout the state, and we will continue to provide enrollees with services and solutions to improve their health. We will acknowledge, understand, and will comply with the requirements detailed in **Section 2.10 Provider Services and Support of the Model Contract.** For ease of reading this section, we use the term 'provider services' to refer to provider relations, field agents, and representatives, as referenced by the RFP.

Process for Determining Adequate Provider Services Staffing (2.10.9.1.1)

Aetna remains committed to providing locally directed Provider Services staff and health plan subject matter experts. This approach reflects the local, regional, and culturally diverse communities throughout Louisiana parishes. Aetna bases our Provider Services staffing and geographic placement by assessing the utilization of covered services, evaluating claims submitted by providers, identifying how providers serve enrollees, and finally, assessing claims denial rates and the reason for denials and subsequent claim appeals. We conduct our dynamic evaluation process frequently—no less than monthly—which allows us to reallocate and shift staffing resources as needed to support the provider network. We stratify providers by the complexity of their reimbursement model and enrollee case mix. For example, our value-based payment (VBP) providers may require more intensive support to achieve contractual goals than some of our fee-for-service practitioners do. We enhanced our staffing approach to allow for closer collaboration with VBP providers as our team guides them in achieving higher quality outcomes and, as necessary, we adjust our staffing accordingly. This continuous evaluation is keenly emphasized with our behavioral health providers who deliver specialized services that require dedicated Provider Services staff with relevant knowledge and experience. **Aetna's approach to determining appropriate staffing levels for provider education, outreach, and resolution support is flexible and will change based on the special health care needs of the enrollees served, geography, and the number and type of contracted providers needed to serve our enrollees.**

Strategies for Communicating Effectively with Our Providers (2.10.9.1.2)

Aetna values and promotes effective and timely two-way communication between our plan and our provider partners. Through this ongoing communication, we provide assistance, guidance, and expertise to develop and retain long-term relationships with providers. We understand that providers are our most valuable asset. Our emphasis is to empower each of them through education, assistance, and providing the resources needed to achieve quality enrollee engagement.

Aetna employs the following strategies, as also depicted in **Figure 2.10.9-1**, to communicate effectively with our providers starting from broad network-based to more specialized and customized communication:

- Face-to-face provider visits to provide education and technical assistance

Figure 2.10.9-1: Aetna Provider Communication Strategies

Aetna uses a wraparound philosophy with multiple strategies to communicate with our providers.

- Electronic communications including targeted emails, text messaging, fax, push notifications from the Aetna website, and soon, an Aetna provider mobile application. These communications are disseminated by provider type and specialty, as appropriate, and used to communicate updated information, policy changes, or other Aetna/LDH information.
- Regularly scheduled webinars and pre-recorded videos that are accessible to providers at all times through our website
- Local onsite trainings that soon will offer continuing education credits for behavioral health specialties led by licensed behavioral health professionals; these operational and clinical trainings will reflect topics that are derived from data analyses and provider feedback
- For our key provider groups, such as VBP providers, hospitals, federally qualified health centers/rural health clinics, and multispecialty groups, we conduct Joint Operating Committee meetings no less than monthly to allow for bidirectional communication and training on topics affecting both providers and Aetna in areas such as quality, care management, social determinants of health identification, and plan operations

Our 2019 YTD provider **post-call survey satisfaction rate is 94.7%.** Additionally, **9 out of 10 provider calls are resolved** at first contact.

A key component facilitating bidirectional communication is our Provider Services line, which operates as a seamless entity via knowledgeable and skilled staff trained on LDH requirements and health plan policies and procedures. Provider Services staff are empowered and equipped to manage inquiries and all concerns about the Aetna program, and strive for first-call resolution; however, if unable to resolve in the first call, our Provider Services team will research and establish a timeline for resolution within two business days. Inquiries are received by phone, fax, written correspondence, in person, or through other electronic means. Our Provider Services line is a toll-free telephone line available from 7 a.m. to 7 p.m. Central time, Monday through Friday. Non-routine prior authorization requests can be accessed 24/7/365 through our Enrollee Services line or our provider portal. Our Enrollee Services line will handle after-hours inquiries from providers seeking to verify enrollment for an enrollee in need of urgent or emergency services. Emergent provider issues can also be handled 24/7/365 through our rotating schedule of on-call local Provider Services liaisons. We administer an automated survey evaluating provider satisfaction and willingness to recommend Aetna to others. Callers complete this survey at the end of a call using their telephone keypad, or they can select the option to leave a voicemail.

Provider Training and Education Program

Our training and orientation program is designed to support our providers to meet LDH's Triple Aim of better health, better care, and lower costs while giving providers a comprehensive understanding of Aetna and LDH requirements to assist them in meeting enrollee needs. Our training program also provides the information and tools our provider partners need to serve our enrollees appropriately. We understand that many enrollees have special health care needs due to limited English proficiency, language, cultural and social barriers, as well as behavioral health, medical, and physical limitations that directly affect their receiving the appropriate health care service; therefore, specialized training that emphasizes enrollee accommodations to access care is our critical priority.

Our provider education program starts with a customized orientation program, which occurs within 30 days of the provider's effective date with the plan and includes ongoing training to communicate changes to our system and processes. On an ongoing basis, providers are presented a scorecard, which provides an operational snapshot of the provider's performance. This scorecard addresses performance metrics such as paid and pended claims, appeals by reason, and Healthcare Effectiveness Data and Information Set (HEDIS) quality measures including emergency department (ED) utilization. This feedback on performance improves care delivery as well as identifies opportunities for future training and technical assistance. Additional detail regarding our training program can be found later in this section.

Processes to Support Providers with High Claims Denial Rates (2.10.9.1.3)

Aetna's denial management program utilizes a focused strategy that proactively identifies, manages, monitors, and prevents inappropriate claims denials. We understand that denied claims represent unpaid services and delayed revenue to our providers. Aetna vigorously reviews claims denial metrics on timeliness, accuracy in claims processing with emphasis in areas such as missing information, duplicate claims for service, service already adjudicated, services not covered, and limits for timely filing. We analyze reports on these metrics and utilize operational dashboards to identify the providers who are likely to remit incomplete claims or experience high denial trends. These include specialty physician providers, home health providers, skilled nursing facilities, behavioral health providers, and specialty durable medical services and supplies. The denial management program prioritizes field-tested training, and best-practice tools and resources for our providers to assist in recognizing opportunities to understand and correct issues that cause claims to be denied. Through direct provider outreach, routine onsite servicing, educational webinars, and joint operating meetings, we ensure both understanding and adherence to LDH and Aetna policies that help practices effectively manage their claims with Aetna. For example, in 2018, we received extremely high claims denials from providers statewide who did not understand our policy requiring prior authorizations for all obstetrics ultrasounds. We collaborated with Woman's Hospital in Baton Rouge, which had difficulty meeting the requirement, to modify our policy. The policy modification helped reduce administrative burden for both the provider and Aetna while also creating process efficiencies. Our system was reconfigured and all impacted claims were reprocessed timely without the provider having to resubmit.

Evaluating and Resolving Provider Disputes in a Timely Manner (2.10.9.1.4)

Aetna classifies any expression of dissatisfaction as a grievance, and issues related to claim payments or denials as an appeal. Contracted and non-contracted health care providers may file appeals related to claim payments, denials, or grievances related to dissatisfaction with any of our staff, vendors, or enrollees. A dispute between a provider and Aetna does not disrupt or interfere with the provision of services to the enrollee.

All cases are documented in our grievances and appeals application, including those received through LDH. Each case is automatically assigned a tracking number/unique identifier that links together all components of the case. This tracking number is used to identify individual cases for processing and to monitor each case throughout the process. All information pertaining to provider grievances and appeals is maintained in accordance with State and Health Insurance Portability and Accountability Act requirements to protect enrollee privacy. We further maintain a policy that requires no punitive action occurs against providers filing a grievance or an appeal. Providers may file a grievance either verbally or in writing directly with Aetna at any time about our policies, procedures, or any aspect of our administrative functions. Providers must request an appeal in writing within 60 calendar days from the notice of action. Determinations are made within 30 calendar days of receipt.

We track, analyze, and define trends in our provider grievances and appeals to identify opportunities to educate providers and enhance our processes. We never delegate grievances or appeals processing to a subcontractor. Aetna retains responsibility for all grievance and appeal processing, investigations, and case resolutions/decisions. All provider grievances and appeals reviews are conducted in accordance with our policies and processes, which comply with LDH requirements.

Disputes Specific to Automatic Assignment Policy

Aetna is committed to collaborating with providers to ensure appropriate access for enrollees to primary care services and improving enrollee assignment that ensures costs are aligned with the appropriate provider. This is especially critical for providers aligned to a VBP contract as it affects shared savings and quality targets when enrollees are not attributed correctly. A provider can request or dispute an enrollee

assignment at any time. Aetna will conduct claims analysis within 30 days to determine if assignment was correct based on claims history. If a provider chooses to dispute any enrollee assignments, they can contact their assigned Provider Services liaison to initiate the dispute. To dispute successfully any reassignment to another provider, the provider must show documentation such as medical record or proof of billed claim for at least one date of service that the provider has seen the enrollee(s) within the claims analysis 12- to 18-month lookback period. A primary care provider (PCP) may request that an enrollee be reassigned to another provider based on either claims analysis or one of LDH's identified specific criteria. Providers have 15 business days to review changes made to their roster prior to any modification.

Improving Quality and Reducing Costs (2.10.9.2)

Eighty-five percent of our contracted PCPs serve seventy-six percent of the enrollees contracted under a value-based payment arrangement.

At Aetna, our goal is investing in relationships with enrollees, provider partners, employees, and community stakeholders to enhance the care provided to enrollees, lowering cost, and improving overall well-being. Aetna is here to support our providers to develop and execute successful strategies to produce better outcomes for our enrollees. A multidisciplinary team—made up of the case manager and Provider Services, Population Health, Quality, and Community Health staff—integrates with provider partners to drive quality outcomes, provide education, create additional access points for our enrollees, and provide a red-carpet experience for our providers. Together, innovative solutions are applied to the existing health care model to create positive outcomes for enrollees.

The Aetna provider integration program uses both provider and enrollee data to select provider partners that can achieve the Triple Aim initiatives for our enrollees. These partners will have access to the full breadth of Aetna's resources, allowing them to focus on enrollee care and driving outcomes. The objectives of the program are to make certain of the following:

- Integrate with and support provider partners to assist them in practice transformation to achieve the Triple Aim of health care with population health, operational, and clinical team support
- Support transition from a fragmented and episodic health care delivery system to an enrollee-centered and quality-focused system
- Make significant investments in improving enrollee health by collaborating with providers to assist with the data analysis, tools, and support needed to support their management of an enrollee's care
- Supply providers with tools, such as Aetna's electronic population health management platform, that promote enrollee access, shared decision-making, proactive health management, coordinated care delivery, adherence to evidence-based guidelines, improved quality outcomes with an emphasis on closing gaps in care, improved operational performance and decreased administrative burden for providers, real-time access to subject matter experts to support practice transformation, resources that focus on care coordination, individual enrollee care planning, enrollee outreach, and focused practice attention on opportunities to lower cost of care while improving quality outcomes

Supporting Primary Care Providers to Reform the Delivery System (2.10.9.2.1)

In Louisiana, we paid over **$2 million** in provider incentive payments in 2018.

When designing fee-for-service contracts or value-based payment strategies, we collaborate with providers to understand their needs and preferences better to develop solutions that enable transformation of the care delivery system. We believe the best opportunity for PCPs to succeed in delivery system transformation is through Aetna's primary care infrastructure and practice coaching. This is achieved by implementing strategies such as the Comprehensive Primary Care Plus (CPC+) model and population health. In support of these strategies, Aetna has invested in staff resources, process, technology, and value-based payment arrangements.

CPC+ Model: A national advanced primary care medical home model that strengthens primary care through regionally based multi-payer payment reform and care delivery transformation. Through technical assistance, population health data access, and reporting support, we help providers enhance services for enrollees living with multiple chronic diseases and higher needs. We accomplish this by advancing electronic health records, assistance in adherence to HEDIS measures, and reporting and analytics as examples to improve quality and utilization meeting cost targets. We are one of only three health plans participating in this initiative serving over 1,100 enrollees through three providers—Acadiana Family Medical Associates, Crescent City Physicians, and Lafayette Health Ventures.

Population Health: Aetna views our population health strategy as a true partnership with our provider network, especially our PCPs. We know that in order to obtain the collective vision of achieving the Triple Aim, we must be locally engaged and closer to our provider network—working in close collaboration with a clinically integrated approach that supports and enhances the provider/enrollee relationship. Our population health specialists, who are licensed clinicians, facilitate practice-level transformation. They are part of our team of subject matter experts from departments across the organization who understand the dynamics and challenges of helping enrollees navigate the health care system, whether in a small community clinic setting or through a large integrated delivery system.

The CPC+ and population health programs are supported by next-generation tools such as actionable analytics (including provider performance information), paired with experienced plan leaders, population health specialists, and Quality and Medical Management staff, and dedicated value-based and network experts. We continuously seek ways to innovate, inspire, and create improved opportunities for provider partnerships and rewards for quality care. We accomplish this through our relationships with national organizations, industry developments in the private and public sectors, and State transformation efforts.

Strategies to Support Behavioral Health and Other Specialties (2.10.9.2.2)

Aetna has an integrated system of care for quality physical health and behavioral health service delivery through a fully integrated managed health plan. Aetna's rich history throughout Louisiana has informed our understanding of LDH's physical and behavioral health populations and their very specific health care needs, which is why Aetna has a dedicated behavioral health director that practices efficacy as the core of our enrollee-centered service delivery focus. We also have dedicated behavioral health provider services liaisons with experience supporting behavioral health providers. At Aetna, we never delegate this important element of care delivery. Instead, we manage our network of behavioral health providers in conjunction with enrollee care management requirements here locally.

Our tactical intent in transforming the system of care in Louisiana is through incentive agreements, direct training, technical assistance, and development of information-sharing tools such as our electronic population health management platform. Aetna is furthering the following strategies to support delivery system reform for behavioral health providers:

- Providing direct support to new providers added to the network through expansion efforts, including non-traditional providers that support integration of behavioral health and physical health
- Developing integrated health homes with dedicated coaching resources to support behavioral health and specialty providers as they integrate care delivery
- Emphasizing behavioral health clinicians as key personnel on each integration team
- Deploying interdisciplinary care teams in which clinical team members collaborate with licensed clinical social workers, pharmacy, community health workers, and peer support specialists to meet the enrollee's needs

To best serve behavioral health providers, we have implemented alternative payment models (APMs) outside the acute care arena to achieve the Triple Aim of better health, better care, and lower costs.

Because of this, we are in current contract negotiations for APMs surrounding behavioral health and other specialties for per diems and geographical capitation models.

Strategies for Sharing Provider Performance Data (2.10.9.2.3)

To achieve the mutually stated goals of the contract, the health plan and its providers must be aligned. Aetna works collaboratively with providers to identify and implement appropriate metrics that best represent the needs of the enrollees in a given region to improve health outcomes, reduce costs, and improve satisfaction. Provider Services liaisons review utilization data in real time to identify training and educational needs and work one-on-one with providers to help improve enrollee outcomes. Utilization data is also used to assist in developing provider incentive programs such as our shared savings VBP arrangements.

Provider scorecards for both the individual provider and/or group are available to providers as well as reviewed during operational and Joint Operating Committees. The multi-page scorecard gives providers actionable data around enrollment, current enrollee gaps in care, claims payments, denials, and pended claims, ED utilization, and pharmacy utilization. The scorecard also provides the total number of grievances and appeals submitted by type and outcome. We benchmark providers in ED and pharmacy against all other Aetna providers to provide a comparison of how they perform versus the total network. **Figure 2.10.9-2** presents a sample page from a provider scorecard. All providers can access gaps-in-care reporting through either the provider portal or our electronic population health management platform to integrate that data into their practice. The electronic population health platform offers complete transparency, including the cost of care.

Figure 2.10.9-2: Sample Scorecard Page

Aetna's scorecard provides actionable data to providers.

Additionally, Aetna's provider performance profile report reflects the enrollee panel and costs of clinical services or health care status for the profile measurement and/or reporting period. Aetna utilizes profiles for various programs and initiatives. The provider performance profile report is comprised of data such as HEDIS measures, inpatient admissions, emergency department utilization trends, readmission rates,

detailed utilization data, costs per enrollee, predictive modeling data, provider-level detail on specific performance measures, and innovative performance programs.

Aetna's Provider Engagement Model (2.10.9.3)

> *"There is absolutely no partnership between most of the MCOs and the providers, and it is tearing apart practices in rural communities. Aetna Better Health has been an exception to this by using a systematic approach to provider relations."*
>
> **—Alec Jeansonne**
> **CEO, Collective Healthcare Solutions**

Aetna's passion for and dedication to serving Louisiana's Medicaid population translates into authentic and meaningful provider relationships that result in our ability to make a significant and positive difference in the lives of our enrollees. An integral part of improving enrollees' health outcomes is our strong provider relationships that begin at the top of our organization and extend to every staff member. Aetna has strengthened our model for engaging, educating, and supporting providers by using a deliberate and thoughtful approach to working with provider communities. This approach uses a technological, hands-on, and collaborative strategy to help make certain all types of providers fully understand their responsibilities in a managed care environment and the requirements under the contract. Additionally, our approach includes an overview of LDH's goals, information on where to seek assistance, access to the provider portal, how to bill for services or how to seek answers regarding claims, how to request prior authorizations, criteria for Medicaid eligibility, and our integrated care management model.

Staff Roles in Provider Engagement (Provider Services) (2.10.9.3.1)

Aetna has designated region-based provider services teams comprised of subject matter experts that are available to support and collaborate with provider partners to achieve successful outcomes and reach practice goals. Integrated teams from both the provider and Aetna create operational and clinical goals through a series of workgroups, co-sponsored events, education, and mutual accountability. A Joint Operating Committee comprised of the executive teams from both Aetna and the provider hold the workgroups accountable to the contract's stated goals while working collaboratively to improve care, improve health, and lower costs. **Table 2.10.9-1** describes the positions developed to support the program. The names of these staff members and contact information are available via Aetna's provider portal.

Table 2.10.9-1: Provider Services Positions that Support Providers

Position	Role
Provider Services Liaison	Single point of contact for provider organizations; functions as integration team project manager and the liaison between Aetna and the provider
Manager, Care Management (Physical and Behavioral)	Drive clinical performance by working with the provider to ensure that all enrollees attributed to the practice/facility that have been stratified as high or rising risk have access to care management services
Provider Data Analyst	Serves as the subject matter expert in support of value-based agreements and data audits to enhance provider outcomes
Operations Analyst	Provides operations support to the integration team to ensure that each provider partner's contract is executed and loaded correctly, claims are paid accurately and timely, and any concerns a provider may express are resolved timely
Population Health Specialist	Serves as a clinical subject matter expert on quality and care management activities, including, but not limited to, review and analysis of quality metrics, HEDIS scores, all regulatory body quality requirements, performance improvement, and recommendations related to clinical practice guidelines
Housing Specialist	Serves as a subject matter expert and shall be responsible for ensuring that enrollees transitioning from facility to community are connected to appropriate housing resources

Position	Role
Network Manager	Reviews and analyzes data to ensure our network meets adequacy requirements and meets the needs of our enrollees; conducts recruitment activities to address any identified gaps; negotiates provider contracts and rates. Coordinates closely with our VBP team

Presence and Role of Local Provider Field Representatives (Provider Services) (2.10.9.3.2)

Face-to-face contact is critical to developing strong relationships with providers. Provider Services liaisons are a critical component of our provider engagement model. They visit provider offices throughout the state to review the provider scorecard, provide education, answer questions, and resolve issues and concerns. Aetna has staff in each of the 9 regions who conduct no less than 15 onsite provider visits per week. We have developed and will continue to execute an interdisciplinary provider services collaborative approach to service our provider partners across the state. We hire staff based on their experience in the local marketplace as well as solid customer service and provider experience. Our comprehensive training curriculum for Provider Services staff includes a variety of topics, including contract requirements, program requirements, claims, billing, prior authorizations, grievances and appeals, fraud, waste, and abuse, how to handle provider concerns effectively and timely, and most importantly, cultural competency. Aetna's current 19 Provider Services staff members and 4 Population Health staff '**work for the community and will be from the community**.'

Mechanisms to Track Interactions with Providers (2.10.9.3.3)

To effectively monitor, manage, and maintain a provider network, it is necessary to track, trend, and analyze data obtained through provider interactions and contacts. We use a tool that tracks all provider interactions and serves as a workflow tool to ensure timely resolution. It provides a robust reporting suite allowing us to trend visits and provider complaints by type, location, or outcome. The tool also has accountability built into the system, ensuring that plan leadership is made aware when tasks are coming due or they are past due. This data provides valuable information about clinical and administrative performance gaps and opportunities for improvement. Provider contact that occurs by phone, web portal, webinars, educational seminars, or through provider collaborations, is tracked and documented in a formal manner and reviewed at least quarterly. Data collected through our tracking methods are reviewed through our Quality Management Committee structure for identification of trends and possible process improvement opportunities.

Collecting and Analyzing Utilization Data and Provider Feedback (2.10.9.3.4)

We use an operational dashboard report that enables us to review and analyze data, including utilization data. This comprehensive reporting system allows us to monitor plan and provider performance to the contract and apply real-time interventions based on data and analysis to ensure positive outcomes. We have the ability to drill down to the provider level and identify individualized training opportunities for specific providers when we see the prevalence of certain issues. Aetna also has dedicated staff members who monitor provider payment research requests. These requests are trended and patterns are addressed proactively through system audits. Our approach is to address the root cause of an inquiry, so that we proactively address the issue for all impacted providers. This holistic approach reduces provider complaints, phone calls, and claims issues. Through our weekly health plan operations meetings, we review utilization data, claims, appeals and grievance information, and provider feedback to determine systemwide or provider-specific training needs.

Metrics to Measure Overall Network Provider Satisfaction (2.10.9.3.5)

Aetna consistently scores in the **top three health plans** in overall provider satisfaction.

Provider satisfaction is dependent on a solid partnership between the health plan and the provider, so we work to ensure we proactively address providers' concerns and needs. Aetna uses a National Committee for Quality Assurance-certified survey vendor to conduct an annual provider satisfaction survey to assess how well we meet provider expectations and needs in Louisiana. We survey PCPs and specialists, including behavioral health providers, hospitals, and providers of ancillary services through this method. The results from the survey summarize satisfaction through ratings, composites, and attribution rates, and it assists with identifying the plan strengths and opportunities for improvement. We conducted our own provider satisfaction surveys in 2016, 2017, and 2018. In 2018, LDH also conducted an annual provider satisfaction survey. Metrics from each Aetna survey are provided in **Table 2.10.9-2** found in subsection **Aetna Provider Satisfaction Survey Results** herein; however, we focus on the following composite metrics and related questions as key indicators of overall provider satisfaction:

- Overall Satisfaction
- Finance Issues
- Utilization and Quality Management
- Network/Coordination of Care
- Health Plan Call Center Staff
- Provider Relations
- Recommend to Other Physicians Practices

In addition to the annual provider satisfaction survey, we monitor provider appeals and grievances and claim denial rates for trends and problem areas. We utilize this information to develop a plan of action to identify any performance opportunities. We also conduct annual provider seminars across the state for provider education and outreach. We perform post-seminar satisfaction surveys that generate data and analysis for the Quality Management Oversight Committee to establish a plan of action to improve our future survey results. By constantly evaluating the satisfaction level of our provider community, we target and identify providers we can work with more closely to strengthen our relationships.

Approach to and Frequency of Provider Training (2.10.9.3.6)

We structure our provider education programs so that our network providers and their staff receive comprehensive, ongoing education on LDH requirements as well as our clinical, operational, and transactional processes. Our training program meets the requirements outlined in **Section 2.10.4 Provider Training Requirements of the Model Contract**. Training for our providers begins with our initial contracting conversation and continues through orientation and, on an ongoing basis, through regularly scheduled site visits from our Provider Services liaisons and the Provider Integration team. Training materials are online, available upon request, and can be downloaded from either our secure web portal or main website. Aetna is also in the process of becoming a continuing education unit (CEU) provider to offer credits. We will offer CEU training videos to providers.

Orientation Training: Aetna conducts orientation and training for newly contracted providers within 30 days of their effective date with the plan. We are flexible and we will work to accommodate the availability of the provider within LDH requirements. Training includes, but is not limited to, the following topics:

- Contract requirements, along with any amendments
- Release of information forms
- Integrated care, including, but not limited to, appropriate utilization of basic behavioral health screens in the primary care setting and basic physical health screenings for the behavioral health special needs of the enrollees the provider serves

- Social determinants of health, such as poverty, trauma, and hunger
- Service coverage guidelines
- Prior authorization requirements
- Claims submission and processing (including payment timeframes and requirements)
- Dispute resolution process and timeframes; grievance and appeals process and timeframes
- How to access information through our website or provider portal
- Fraud, waste, and abuse
- Cultural competency
- Locally specific issues or concerns to assist providers in meeting enrollee needs
- Other items required under the contract's scope of services

During orientation, each provider is shown how to access the online provider manual that includes, but is not limited to, the following information:

- A description of Medicaid and the Louisiana Statewide Medicaid Managed Care program requirements
- How to obtain service-specific coverage requirements and medical necessity criteria
- How to obtain prior authorization and referral procedures, including the required forms
- Quality program requirements
- Claims submission protocols and standards and all information required to submit a clean claim
- Marketing activity requirements and prohibitions
- Provider complaint procedures, including how to contact the plan to file a complaint
- How to identify and report abuse, neglect, and exploitation of enrollees, including identifying victims of human trafficking
- Enrollee rights and responsibilities
- Enrollee grievance process and the right to request continuation of benefits while utilizing the grievance and appeal system

Ongoing Training: We recognize that the provider community is critical to our success, so we make provider engagement and collaboration a cornerstone of our processes. Depending upon the size of the provider practice and enrollee volume, our Provider Services liaisons meet with providers in their offices for regularly scheduled visits to answer questions, mitigate issues or problems, and educate providers. These visits are typically annually, but more often as requested by the provider or indicated based on provider performance. In addition to onsite visits, we offer technology-based solutions such as webinars, provider notices, and online tutorials in addition to phone contact with the Provider Services liaison. We conduct regional provider education forums to discuss recently issued amendments, regulations, or emergency notifications. We conduct ongoing training throughout the year on changes to our system and processes, such as recent enhancements. We publicize all trainings and educational opportunities through marketing materials, on our provider web portal, and through fax blast communications. For large provider groups and organizations, Provider Services liaisons conduct monthly or quarterly Joint Operating Committee meetings onsite to address any concerns, discuss quality metrics, and review new initiatives.

Provider Satisfaction (2.10.9.4)

As discussed previously, Aetna uses provider satisfaction surveys to monitor provider satisfaction levels. We conducted our own provider satisfaction surveys in 2016, 2017, and 2018. In 2018, LDH also conducted an annual provider satisfaction survey.

Aetna Provider Satisfaction Survey Results

Results of the Aetna surveys are provided in **Table 2.10.9-2: 2016, 2017, and 2018 Provider Satisfaction Survey Summary**. The surveys are designed to measure provider satisfaction related to call

center/medical services, provider services, utilization management, quality management, overall satisfaction, and loyalty among other data. Results of the survey are presented by summary rates and the composite scores are calculated by taking the average summary rates of the attributes specified in the section.

Table 2.10.9-2: Aetna 2016, 2017, and 2018 Provider Satisfaction Survey Summary

Composites and Key Questions	2018 Summary Rate	2017 Summary Rate	2016 Summary Rate	2017 SPH Analytics Medicaid Book of Business Benchmark
Overall Satisfaction	**68.4%**	**75.4%**	**66.4%**	**68.1%**

4F. The timeliness of feedback/reports from specialists in this health plan's provider network.	21.7%	23.6%	29.8%	27.8%
4C. The number of behavioral health clinicians in this health plan's provider network to whom I can refer my patients.	17.6%	N/A	N/A	27.9%
4D. The quality of behavioral health clinicians in this health plan's provider network to whom I can refer my patients.	21.2%	N/A	N/A	26.2%
4I. Timeliness of feedback/reports from behavioral health clinicians for patients in your care.	19.7%	N/A	N/A	22.9%
Health Plan Call Center Service Staff	**33.6%**	**34.6%**	**37.8%**	**38.6%**
5A. Ease of reaching health plan call center staff over the phone.	29.8%	33.8%	36.6%	35.6%
5B. Process of obtaining member information (eligibility, benefit coverage, co-pay amounts).	37.4%	35.3%	39.0%	41.7%
Provider Relations	**30.1%**	**33.2%**	**32.2%**	**36.5%**
6A. Do you have a Provider Relations representative from this health plan assigned to your practice?	50.6%	51.6%	53.0%	49.1%
6B. Provider Relations representative's ability to answer questions and resolve problems.	40.0%	43.5%	41.8%	46.5%
6C. Quality of provider orientation process.	25.8%	28.8%	23.9%	30.6%
6D. Quality of written communications, policy bulletins, and manuals.	24.5%	27.4%	30.8%	32.4%

LDH Provider Satisfaction Survey Results

A snapshot of the results of the LDH survey is as follows:

- **Overall Satisfaction:**
  - 86 percent of providers rated Aetna's provider contracting process with ratings of 'Good' or better, the highest rate across the five managed care organizations (MCOs).
  - Aetna rated the second highest with 76 percent providers indicating they would recommend the MCO to other providers.
- **Communication, Education, and Training:** Aetna providers reported the highest rates of satisfaction for three areas of education and training; 58 percent reported satisfaction with provider orientation, 59 percent reported satisfaction with the provider manual, and 53 percent reported satisfaction with access to State-mandated behavioral health training.

- **Claims Processes:** Aetna providers reported 38 percent satisfaction with the Aetna complaint system, which was in the top three of all MCOs.
- **Experience with No-Show Appointments:** When asked if they have an issue with enrollees not showing up for appointments, Aetna providers reported the lowest rate (67 percent) of issues with no-show appointments across all MCOs.
- **Experience with Provider Relations Representatives:** When asked about their experience with MCO Provider Relations representatives and whether they had an MCO Provider Relations representative assigned to their organization, 26 percent of Aetna providers reported not having a representative.
- **Experience with Utilization Management (UM):** 64 percent of Aetna provider respondents rated Aetna's Medical Record Review process positively.
- **Satisfaction with Utilization Management:**
  - Aetna providers reported the highest rate of satisfaction ('Very Satisfied' or 'Somewhat Satisfied') in regard to the efficiency of the UM process overall (49 percent).
  - Aetna reported the highest levels of satisfaction with the clinical appropriateness of UM decisions (43 percent).
- **Experience with MCO Call Center:** Aetna providers most often indicated the Aetna was better than the others in the state when asked about the helpfulness of staff in obtaining referrals (31 percent).

Based on analysis of the Aetna and LDH survey results, we identified the following aggregate areas where we have opportunities to improve to the SPH Analytics Medicaid Benchmark:

- Finance Issues
- Utilization and Quality Management
- Network/Coordination of Care
- Health Plan Call Center Staff
- Provider Relations

To address these opportunities for improvement, we have implemented the following interventions and conducted monitoring to measure improvement in provider satisfaction:

- **Finance Issues:** Developed more succinct operational policies to inform providers of our plan configuration and market rules; we published these on our website to inform providers of our policies to reduce denied claims and we provided education to our providers
- **Utilization and Quality Management**
  - Evaluated and streamlined our prior authorization processes
  - Implemented tools for providers to obtain prior authorizations through the provider portal
- **Network/Coordination of Care**
  - Expanded our provider network to improve capacity and accessibility
  - To address dissatisfaction regarding 'no-show' appointments, we gave a grant to a rural health clinic to conduct a study of Medicaid enrollees to understand no-show rates better. The findings indicated that non-emergency medical transportation (NEMT) was a major factor when moms with multiple children or families could not all travel together to appointments. Our solution was to develop a value-added NEMT program for maternity/mothers.
- **Health Plan Call Center Staff and Provider Relations**
  - We conducted a continuous quality improvement activity to redesign our Provider Services and Operations teams to meet the needs of our providers; we shifted our focus to be more field-based with education and communication while creating localized back-office support for each field-based Provider Services liaison—ensuring the provider's operational needs were met. To address the issue of communication, we have added a provider communications coordinator position.
  - Redesigned Provider Services and Contracting teams to align under one leader to provide a more unified experience to the provider

Because our integrated quality improvement programs are woven into all aspects of our operations, we use these surveys and follow up with listening sessions to assess our program and identify needed interventions. This performance evaluation of our integrated programs includes areas of focus, such as physical and behavioral health gaps in care; meeting HEDIS metrics, performance benchmarks, and Early and Periodic Screening, Diagnostic and Treatment; birth outcomes; and preventable events tied to treatment of both physical and behavioral health conditions. We design our communications following survey analysis to foster two-way interaction to demonstrate improvements, build strong partnerships, and implement feedback on our performance. We rely on carefully focused trainings and education with providers but also utilize onsite visits, weekly webinars, fax bulletins, provider portal updates, and dedicated Provider Services liaisons who offer a suite of self-service tools and supports to aid continuous provider improvements.

Aetna reviews all survey results and assesses what we can do better—not just to increase scores, but to improve provider satisfaction, processes, and procedures. Always seeking improvement in our ratings, we utilize this survey to develop more innovative solutions, educate and train providers, and further refine our processes to make it easier for providers to serve our enrollees. We garner feedback from providers to see what we can do to increase provider satisfaction. Our Provider Advisory Committee, which will be comprised of providers and enrollees, provides expert council to the plan to improve access, provider satisfaction, and assistance with connecting with specialty providers. The committee is responsible for reviewing satisfaction survey results and providing feedback and input on policies and programs.

2.10.10 Utilization Management

We are Louisiana. The Aetna Community Outreach team participates in events to bring educational and support resources directly to the community. This past Halloween, at the Perkins Rowe Spooktacular, the Community Outreach team handed out treats, coloring sheets, and information about the health benefits the plan has to offer.

2.10.10 Utilization Management

Aetna's utilization management (UM) program provides whole-person care for our enrollees in the most appropriate setting. We identify, evaluate, manage, and improve clinical care and services. Our unique national experience and local leadership demonstrate our ability to improve enrollees' lives while reducing complexity and administrative burden and serving as responsible stewards of State resources. Our UM program goals and objectives aim to improve enrollee health and positively affect unmet health care and social needs. Aetna acknowledges, understands, and will comply with all the requirements of the Managed Care Organization (**MCO) Manual and the Model Contract**. Please refer to **Figure 2.10.10-1** at the end of this response for Aetna's UM workflow from initial request to final disposition, including the workflow for expedited authorizations.

Meeting and Exceeding Service Authorization Requirements (2.10.10.1)

Our UM program description and written policies and procedures are compliant with the requirements outlined in **Section 2.12 of the Model Contract**, and include processes, guidelines, review criteria, turnaround timeframes, and qualifications of health plan staff involved in UM processes. The UM Committee provides oversight of the entire UM program and works to integrate the program with other Aetna departments, including Quality Management and Care Management. Our program is National Committee for Quality Assurance (NCQA) health plan-accredited in Louisiana. We complete service authorization requests timely and efficiently in compliance with established NCQA turnaround timeframes, the requirements indicated in **42 C.F.R. §438.210**, and any court-ordered requirements. Upon receipt of a service request, UM staff reviews the request, applies the hierarchy of appropriate medical necessity guidelines, and evaluates the individual enrollee's circumstances. UM staff first review respective enrollee information in our UM business application system and may outreach to the requesting provider or case manager to obtain additional information to support the request for services. A medical director is the only staff member within the UM team that can deny a service authorization request for medical necessity reasons.

Our Gold Card-tiered preferred provider performance incentive program eliminates prior authorization requirements, reduces administrative burden on providers, and leads to cost savings and high provider satisfaction.

Aetna works to streamline the service authorization process to reduce administrative burden. **We are reducing prior authorization requirements for high-performing practices on value-based payment arrangements as we do now in Kentucky and Florida.** Our Gold Card providers must show low denial rates and must exceed quality standards.

Standard Service Authorization (Prior Authorization)

Prior authorization enables us to monitor utilization of defined services and non-emergent procedures and hospitalizations before the enrollee receives the service. For services requiring prior authorization, we confirm services are the following:

- Requested for eligible enrollees and included in the covered benefits
- Provided at an appropriate level of care or place of service based on individual circumstances
- Determined to be appropriate, timely, and cost-effective
- Coordinated as necessary with Quality Management or Care Management and communicated to applicable operations areas or to the external contractor per contractual requirement
- Documented to facilitate timely reimbursement and accurate reporting

Aetna is compliant with all prior authorization requirements outlined in **Section 2.12.9 of the Model Contract**. We conduct over 80 percent of standard service authorization determinations within two business days of obtaining appropriate medical information. For mental health rehabilitation (MHR) services, we conduct over 80 percent of determinations within five calendar days of obtaining appropriate

medical information. We make all standard service authorization determinations no later than 14 calendar days following receipt of the request for service. We may extend decisions up to 14 additional calendar days if the enrollee or the provider requests the extension; or if there is clear need for additional information and the extension is in the enrollee's interest. **Table 2.10.10-1** demonstrates Aetna's ability to exceed service authorization timeframes.

Table 2.10.10-1: Aetna Meets or Exceeds Service Authorization Timeframes

Decision Type	Period	Expedited PA	Non-urgent PA	Urgent Concurrent Approval
Physical health	Q1 2019	100% within 72 hours	• 96% within 2 business days • 100% within 14 calendar days	• 98% within 1 business day • 100% within 2 business days
Behavioral health	Q1 2019	100% within 72 hours	• 99% within 2 business days • 100% within 14 calendar days	• 100% within 1 business day • 100% within 2 business days

Aetna has also enhanced the prior authorization process by implementing pharmacist review of medical drugs. The clinical pharmacist conducts prior authorization review for drugs utilized as a medical benefit. This improves timeliness of reviews and promotes a thorough and well-documented evidence-based approach to coverage decisions for complex specialty medications. Aetna continually evaluates prior authorization requirements by adjusting policies to accommodate evidence-based practices, providing educational material to providers, and by providing advance notification to providers and enrollees concerning changes in the preferred drug list, including drug alternatives.

If the standard service authorization timeframe could seriously jeopardize an enrollee's life, health, or ability to attain, maintain, or regain maximum function, we make an expedited authorization decision as quickly as clinically needed given the enrollee's health condition and provide notice no later than 72 hours after receipt of the request for service. In addition, we do not deny continuation of higher-level services (e.g., inpatient hospital) for failure to meet medical necessity unless we can provide the service through an in-network or out-of-network provider at a lower level of care.

Concurrent Review

Using applicable inpatient and observation stay guidelines, our concurrent review process examines the medical necessity of all acute and post-acute admissions and stays and appropriate use of inpatient medical resources for continuing services for hospitalized enrollees. Concurrent review activities also link the enrollee to needed care management services and identify occurrences of over- or under-utilization, physician practice patterns, and ways to improve health care outcomes and cost-effectiveness of services. **Discharge planning begins on day one of admission, utilizing the concept of root-cause discharge planning**. For example, if an enrollee stopped taking their medications, which led to increased symptoms and a hospitalization, the root cause is not that they did not take their medications. The root cause may be related to other reasons such as "the medications made me feel worse," "I could not afford the medications," or "I got evicted and ran out of medications." Root-cause discharge planning allows us to address enrollee needs effectively through integrated care practices. We conduct interdisciplinary rounds for all enrollees in acute or post-acute settings to make sure their transition is to the most appropriate setting within the continuum of care in a timely manner. We complete over 95 percent of concurrent review determinations within 1 business day and over 99.5 percent of concurrent review determinations within 2 business days of obtaining the appropriate medical information.

Post-authorization (Retrospective Review)

Reimbursement for services may be determined retrospectively (e.g., we receive notification of a hospitalization after the enrollee's discharge) for enrollees who receive retroactive Medicaid eligibility. We base our retrospective reviews solely on the medical information available to the attending physician

or ordering provider at the time the enrollee received health care services. We review retrospective determinations utilizing the same criteria as concurrent determinations for the same service.

Service Authorization Decisions

Our expert licensed clinicians review and approve medically necessary services under the supervision of medical directors. When a clinician is not able to approve or has a question, they engage Aetna medical directors for assistance. Medical directors conducting clinical reviews are available to discuss review determinations with attending physicians or other ordering providers via peer-to-peer consultations for any request that may result or has resulted in a denied authorization. Aetna makes written and telephonic notification available to the provider and we complete a Notice of Action (NOA) and send it to the enrollee for any decision made to deny, reduce, suspend, or terminate a service authorization request. Our UM program description and policies and procedures describe the information contained in the NOA, which includes a description of enrollees' rights and the process to file an appeal or request a State Fair Hearing. Our Enrollee Services line assists enrollees and their families to discuss any questions about care determinations, NOAs, and appeal processes. Aetna will comply with all noticing requirements and timeframes in the **Model Contract**.

Pharmacy

To support evidence-based use of medications, Aetna has established protocols and processes that ensure the appropriate and timely application of prior authorization criteria during the clinical review of preferred and non-preferred drugs. We develop and update criteria in alignment with nationally recognized treatment standards. Consulted sources for evidence-based medication use include Centers for Medicare & Medicaid Services (CMS)-recognized compendia, the U.S. Food and Drug Administration (FDA), American Psychiatric Association, American Diabetes Association, medical literature, and manufacturers. Medical practitioners support and conduct medical necessity reviews of preferred and non-preferred drugs requiring prior authorization or triggering other UM edits such as age restrictions, specialist requirements, quantity-level limits, and step therapy. The dedicated pharmacy director provides oversight of the pharmacy prior authorization function administered by our team of licensed pharmacists and certified pharmacy technicians according to Louisiana's criteria and requirements.

Aetna has implemented service capabilities and automated reviews of medication that allow a prescription to process at the point of sale without requiring the provider to submit a prior authorization request. We accomplish this through SmartPA edits for specific drugs, which consider the enrollee's pharmacy claim history, the medical diagnosis loaded from our medical claims system, and the prescriber's specialty type in the evaluation of prescribed medications at the point of sale. **SmartPA edits allow for automated determinations of coverage based on predefined pharmacy and medical parameters.** Aetna's Louisiana pharmacy director works with Aetna's Medicaid Pharmacy team to build SmartPA edits to meet the requirements of the Louisiana preferred drug list of covered drugs. SmartPA edits are in place for Louisiana in the following drug categories: ophthalmic agents, psychotherapeutic and neurological agents, antifungals, and anticonvulsants. In 2018, Pharmacy processed 4,255 smart edits, allowing faster access to medications for prescribers, pharmacists, and enrollees.

Promoting Efficiency and Enhancing Provider Experience

In 2018, Aetna's pharmacy prior authorization turnaround time compliance rate was greater than 99.7 percent for 22,000 requests received. To promote even greater efficiency and enhance the provider experience, our Pharmacy Prior Authorization department implemented electronic prior authorization (ePA) on June 1, 2018. With ePA, providers can transmit a prior authorization request electronically, thus eliminating the need for handwritten fax forms and/or phone calls. Providers submit pharmacy prior authorization requests via a secure web portal using Surescripts, an information technology company that supports e-prescriptions, and CoverMyMeds, a software company that automates the prior authorization process. The ePA tool also enables providers to check approval and denial statuses after submission.

Upon submission, ePA reviews the request against criteria and either approves for coverage or submits for further review from a pharmacist and/or medical director. By utilizing the ePA tool, providers see a decrease in their administrative burden while supporting continued compliance with LDH's preferred drug list and clinical criteria. Currently, **31 percent of all pharmacy prior authorization requests are submitted via ePA, resulting in a 55 percent decrease in faxed requests and a 58 percent decrease in inquiry calls**. Aetna actively works with providers to meet our internal goal of 50 percent of prior authorization requests submitted via ePA by July 1, 2019.

Aetna's Pharmacy department conducted a satisfaction survey of the top 20 Louisiana providers utilizing ePA. The survey revealed that 96% of respondents stated that ePA saved time, provided a faster response and decision, and that they would continue to utilize the service.

Aetna's Pharmacy Prior Authorization Call Center leverages CaremarkPCS' pharmacy prior authorization business application for processing prior authorization requests. CaremarkPCS is Aetna's pharmacy benefit manager. To support point-of-sale processing of prescriptions within minutes of an approval of the prior authorization request, the system loads the authorization into the claims adjudication system. We generate reports throughout the day to monitor inventory and to intervene if there are areas of concern that could negatively affect compliance with timeliness standards. To allow an enrollee access to appropriate medications during the prior authorization review process, the dispensing pharmacist can initiate an override for a 72-hour emergency supply when they cannot reach the prescribing provider.

Implementing Pharmacy Best Practices

To advance evidence-based practices and improve efficiency with coverage decisions, we implemented a clinical pharmacist review and support of prior authorization requests for medical drugs. The clinical pharmacist reviews medical drug (J-code) prior authorization requests using approved criteria and all clinical documentation provided by the requesting provider. If a request meets criteria, the clinical pharmacist issues an approval including duration and units. If the UM team approves all other requested services, we forward the case to the UM representative to complete the authorization and notification requirements. We refer recommendations for denial or further review of the case to the medical director.

In collaboration with the Integrated Care Management and UM teams, the chief medical officer, pharmacy director, and community providers, Aetna continually seeks opportunities to develop additional evidence-based initiatives that support improved enrollee outcomes and access to care. During 2018, Aetna pharmacy and medical staff collaborated with LDH and local providers to implement customized point-of-service safety edits for AIDS/HIV medications that improve enrollee care and monitor utilization. We also employ a dedicated behavioral health clinical specialist and a licensed registered nurse to lead discussions, provide training, and develop partnerships with providers to help impact and decrease the overuse and misuse of opioid medication utilization, including the safe disposal of unused medications.

Service Authorization System

Aetna uses integrated systems and interdepartmental processes to coordinate services for an enrollee. The UM business application system allows departments to share enrollee and provider information, coordinate procedures such as discharge planning, transition an enrollee from an institutional setting back into the community, authorize post-hospital services, and follow up on complex cases or emergency department (ED) care. Aetna's UM business application system also provides the authorization number and effective dates for authorization to participating providers and applicable non-participating providers. Aetna's UM business application system stores and reports the time and dates all service authorization requests received, decisions made regarding the service requests, clinical data to support the decision, and timeframes for notification of providers and enrollees of decisions.

Meeting and Exceeding Utilization Management Requirements (2.10.10.2)

Aetna uses nationally recognized, evidence-based criteria, which we apply based on the needs of individual enrollees and characteristics of the local delivery system. Our medical management clinical criteria policies and procedures define eligible criteria sources and the process for adoption, review, and approval of clinical criteria. To assure adherence to NCQA, LDH's clinical coverage policies, and Louisiana's definition of medical necessity, outlined in **Section 2.12.1.2** of the **Model Contract**, we review our existing policies and make updates as appropriate.

Applying UM Criteria (2.10.10.2.1)

We review and adopt criteria and update annually or as applicable based on revision of national or community-based clinical practice guidelines. The annual review process involves qualified, expert physical and behavioral health medical directors in developing, adopting, or reviewing criteria. We advise providers that criteria are available upon request in the NOA, provider manual, and provider newsletters. In addition, Aetna integrates into our systems and reviews annually a common hospital observation policy developed and maintained collectively by MCO personnel and LDH. We detail the established hierarchy of referenced criteria in **Table 2.10.10-2.**

Table 2.10.10-2: Aetna's Hierarchy of UM Criteria

Resource	Description
Regulatory Guidelines	Pharmacy prior authorization guidelines and LDH pharmacy prior authorization criteria; LDH home- and community-based services waiver; special populations receiving services such as Pediatric Day Health Centers (PDHC) and Applied Behavioral Analysis (ABA); proprietary guidelines when other guidelines are not available
MCG (formerly Milliman Care Guidelines)	National, evidence-based clinical guidelines, best practices, and care planning tools across the continuum of care to support clinical decision-making
Aetna Medicaid Pharmacy Guidelines	Aetna's proprietary pharmacy guidelines follow objective, credible sources, such as the Academy of Managed Care Pharmacy, the American Association of Pharmaceutical Science, and the American Association of Colleges of Pharmacy, best clinical treatment practices, and expert opinions. **On May 1, 2019, we will use the LDH preferred drug list and clinical criteria for coverage.**
Level-of-Care Utilization System	A level-of-care tool to help behavioral health clinicians determine the intensity needs of enrollees who receive behavioral services, including Mental Health Rehabilitation.
Child and Adolescent Service Intensity Instrument (CASII)	CASII is a standardized assessment tool that provides a determination of the appropriate level of service intensity needed by a child or adolescent and their family.
American Society of Addiction Medicine (ASAM)	Guidelines for placement, continued stay, and transfer/discharge of patients with substance use and co-occurring disorders
Aetna Clinical Policy Bulletins	Aetna's proprietary medical necessity guidelines follow objective and credible sources, such as scientific literature, guidelines, consensus statements, and expert opinions.
Aetna Clinical Policy Council	Team of clinical experts and health care providers responsible for the review of new and emerging technology; this council also provides consultation to Aetna's medical directors

Evidence-based Decision Support Tool

Clinical UM staff uses nationally recognized, evidence-based guidelines and clinical review guidelines to drive consistency in decision-making. Guidelines represent best practices, reflect national standards, support medical necessity determinations, and meet the needs of individual enrollees.

Formal medical committees and ad hoc work groups advise and guide the development and adoption of guidelines. Aetna develops clinical policy bulletins using peer-reviewed medical literature, technology assessments, structured evidence reviews, evidence-based consensus statements, expert opinions of health care providers, and evidence-based guidelines from nationally recognized professional health care

organizations and public health agencies. Aetna reviews clinical criteria policies annually or more frequently based on knowledge of relevant new medical literature, guidelines, and regulatory action notices.

Aetna's Clinical Policy Council Committee and external practicing clinicians with expertise in providing the types of services in the clinical criteria policies conduct a comprehensive review process of both new and revised policies. A recent example is revision to the criteria used in decision-making for enrollees with asthma. We revised the criteria to read that exhaled breath nitric oxide testing is medically necessary for evaluation of asthma and for monitoring response to long-term control therapy for enrollees aged 5 years and older. This test is a quick and simple way to determine if enrollees are exhibiting signs of ongoing allergic inflammation. **Aetna's change resulted in ready utilization of this tool by providers**.

In alignment with the **Model Contract**, we adopt clinical practice guidelines for the following behavioral health conditions: schizophrenia, attention-deficit/hyperactivity disorder, depression, generalized anxiety disorder, post-traumatic stress disorder, suicidal behavior, oppositional defiant disorder, bipolar disorder, and substance use disorders. Aetna will also coordinate the development of specialized behavioral health clinical practice guidelines with other LDH MCOs to avoid providers receiving conflicting practice guidelines from different MCOs.

Determining Appropriateness of Treatment and Site of Treatment

UM staff applies guidelines to determine appropriate levels of care and identify competent providers for co-occurring conditions. We use UM guidelines consistently as a guide, but enrollees who may need a higher level of care to avoid imminent relapse receive continued stay authorization to bridge to the next level of care. We consider each person's circumstances individually in concert with available resources.

To increase access to crucial services, Aetna does not require prior authorization for the ASAM 3.1 lower intensity level of residential substance use treatment or multisystemic therapy. We pay for certain (in-lieu-of) services that are not part of the Medicaid benefit structure to ensure continuity of care, treatment at the appropriate level, and better health outcomes for our enrollees. In particular, the ASAM 3.1 level of care is crucial to supporting an enrollee's recovery in the community and their ability to be self-sufficient. This level of care represents a bridge between higher-cost, more intensive care, and community living. Enrollees also receive support with employment and housing at this level of care, which are significant social determinants of health in a person's recovery from substance abuse. Authorizing and paying for services outside the Medicaid benefit package ensures continuity of care, treatment at the appropriate level, and better health outcomes for our enrollees.

Inter-rater Reliability Program

To promote consistency in decision-making, we employ licensed clinical professionals who receive comprehensive training upon hire and annually. Through our inter-rater reliability (IRR) program, we conduct quarterly quality chart review audits to assess consistency in decision-making related to applying medical necessity criteria. We administer IRR testing annually to all UM staff, including pharmacy technicians, pharmacists, and medical directors. Staff scoring below the 85 percent threshold complete additional training and retake the exam twice. If staff still does not meet the standard, we implement additional performance measures and corrective action plans. We also audit all denials daily to guarantee compliance with NCQA denial notification standards. **Table 2.10.10-3** shows our aggregate IRR scores for medical and behavioral health UM in 2018.

Table 2.10.10-3: Aetna's UM Staff Exceed IRR Benchmarks

UM Staff	Physical Health Average Score	Behavioral Health Average Score
Medical Director	98.45%	98.67%
Prior Authorization and Appeals	100%	98.75%

UM Staff	Physical Health Average Score	Behavioral Health Average Score
Concurrent Review and Appeals	96.56%	98.10%
Average	**98.59%**	**98.80%**

In 2018, pharmacy IRR scores exceeded the minimum compliance 85 percent threshold:

- Clinical pharmacists: 97.8 percent for 18 pharmacists
- Medical director: 95.0 percent for two medical directors
- Pharmacy technicians: 95.0 percent for 12 technicians

Monitoring and Addressing High ED Utilization (2.10.10.2.2.)

Aetna's proprietary risk tool, Consolidated Outreach and Risk Evaluation (CORE™), increases the opportunity to stratify enrollees, identify special populations as early as possible, and provide services that address high ED utilization. Proprietary and evidence-based, CORE is a stratification tool that uses time-tested analytic methods honed for more than 10 years. Aetna's inpatient and ED models, based on CORE, provide enrollee-specific scores indicating the likelihood that the enrollee will visit the ED or experience an inpatient admission in the next 12 months. We run the model for our entire population monthly. Care Management teams review the results to identify enrollee contact and intervention opportunities.

CORE predictive modeling identifies enrollees who are candidates for intensive and supportive care management and enrollees who are candidates for high- and low-risk chronic condition management. Our predictive modeling shows that our highest-risk enrollees have multiple physical health conditions—70 percent to 90 percent had comorbid behavioral health conditions. CORE generates scores from internally developed algorithms based on Medicaid population data and our clinical and informatics expertise. Inputs to the algorithms include enrollee demographics, along with medical, behavioral, and pharmacy claims data.

We know that complexity is more important than diagnosis when identifying enrollees who are at high risk. Enrollees with complex needs benefit from our integrated care management model (Tiers 2 and 3) designed to support whole-person health. The tool predicts the likelihood of integrated care management making an impact and ranks all plan enrollees from highest to lowest risk.

CORE's analysis is based on three risk metrics:

- **Predictive model general risk score:** We consider enrollees who are in the top 1 percent of the population based on highest general risk score as high risk.
- **Emergency department risk score:** We identify enrollees with an 80 percent or greater risk score as high risk of an ED visit during the next 12 months.
- **Inpatient admission risk score:** We identify enrollees with a 70 percent or greater risk score as high risk of a physical or behavioral inpatient admit during the next 12 months.

We produce our ED and inpatient risk scores using logistical regression models to predict the probability of an occurrence within the next 12 months. Indicators include prior year ED, inpatient, and specialist utilization, comorbidities, and pharmacy complexity. Specific behavioral health risk indicators include behavioral health admissions and readmissions, presence of serious emotional disturbance, poly-prescriber, and poly-pharmacy activity for behavioral health medications, and concurrent use of multiple medications from one behavioral health therapy class.

In addition, we monitor for high utilization through the following:

- **Admission, discharge, and transfer (ADT) feeds:** We currently receive ADT feeds from 71 percent of Louisiana's reporting hospitals (104 total) daily via connection from Louisiana's Health Information Exchange LaHIE, the Greater New Orleans (GNO) HIE. **We are in the process of**

executing a contract with the hospital-sponsored health information exchange, the Louisiana Health Information Network Encounter Notification Service (LHIN-ENS), which will give us ADT feeds from most every hospital in the state.

- **Elli:** Starting in 2019, Aetna will be able to leverage our unique relationship with HMS, a leading health care technology company, to enhance our ability to analyze and use claims data. As a first adopter of Elli in Louisiana, Aetna will gain access to four years of claims data collected from all MCOs across the state. The data will be available to us on day one of an individual's enrollment. The data analysis provides an additional risk stratification that Aetna will consider in concert with our CORE predictive modeling risk stratification results. We will leverage Elli, in particular, when we enroll a new individual, enabling us to engage the enrollee in appropriate tier of care management immediately.
- **Direct referrals from hospitals and providers:** We receive information and referrals directly from our hospital and provider partners through Care Management and UM staff.

Addressing High ED Utilization

Aetna coordinates a variety of strategies to reduce high ED utilization. These include the following:

- **ED diversion coordinators:** Aetna employs ED coordinators who work under the umbrella of the Care Management team. The ED coordinators establish relationships with hospital staff throughout the state, engage enrollees with high ED utilization, and provide telephonic outreach to at-risk enrollees. ED coordinators also attend collaborative provider meetings, discuss the needs of the enrollees that need extra support during Aetna integrated rounds, and engage enrollees through face-to-face and telephonic outreach.
- **Community health workers and peer support services:** Aetna's community health workers coordinate with community-based organizations to refer enrollees to appropriate services to resolve social needs that can worsen health or increase avoidable ED visits. Aetna connects enrollees to peer support services through assertive community treatment and permanent supportive housing program teams; the HIV/AIDS Alliance for Region Two, Inc.; the Extra Mile of Monroe; Mental Health Association of Greater Baton Rouge; National Alliance on Mental Illness New Orleans; and the Metropolitan Human Services District.
- **Ready Responders:** Ready Responders, our community paramedic program, offers an alternative to seeking ED services for non-urgent medical needs. Ready Responders provides mobile non-emergency medical care to Aetna enrollees through licensed nurses, community paramedics, and physicians.
- **Schumacher Clinical Partners:** Aetna has a letter of intent from Schumacher Clinical Partners to leverage their innovative post-acute care coordination services across the state. This program will address repeat ED visits, readmissions, and observation stays by coordinating and monitoring post-acute services for Aetna enrollees.
- **Health Information line:** Aetna enrollees have 24/7/365 access to our Health Information line (Nurse Line) and Behavioral Health Services hotline. Through these resources, enrollees receive recommendations, in the language of their preference, on their health care issues. Nurses who staff the Health Information line instruct enrollees on self-care options, refer them to their primary care providers (PCPs) for follow-up, or recommend a visit to urgent care, helping to prevent avoidable ED visits.

Aetna successfully decreases ED and inpatient utilization year-over-year. We achieved the following in 2018 vs. 2017:

- **4.98% decrease** in ED visits/1,000
- **4.3% decrease** in per member per month (PMPM) for inpatient admissions
- **7.1% decrease** in physical health admissions/1,000
- **11.1% decrease** in behavioral health admissions/1,000
- **10.5% decrease** in physical health readmissions/1,000
- **36.2% decrease** in behavioral health readmissions/1,000

- **Telemedicine:** As part of our comprehensive network offering, we support enrollees in their homes and communities by offering telemedicine services through our existing network in place with MDLIVE® for behavioral health services and Teladoc for physical health services. MDLIVE offers a web-based solution, enabling enrollees to access outpatient services from the convenience of their community.
- **CVS Health MinuteClinics:** Aetna is working to expand access to appropriate levels of care throughout the communities we serve via our urgent care network and CVS Health Minute Clinics. **We are prepared, upon award and in collaboration with the State, to expand MinuteClinic access in at least one existing CVS store and as many as three existing CVS stores. We will assess the regions of the state where there are a high number of potentially preventable emergency room visits for feasibility of Clinic placement, overall timing, and staging for the new clinic(s).** We already have six MinuteClinics across the state in Metairie, Baton Rouge (two locations), Slidell, Covington, and New Orleans.

In addition, **Aetna addresses high ED utilization through value-based purchasing**. Aetna has a value-based contract with St. Martin Hospital to address high utilization and medical trends. This acute hospital pay-for-quality program provides the hospital incentive payments if they can reduce the readmission and ED utilization rate of their population using their ED diversion clinic. In addition, our in-home ED diversion performance-based incentive program incents participating providers who provide in-home care and disease management services to enrollees who are frequent utilizers of the ED with the opportunity to earn an incentive payment. Providers earn the payment when their ambulatory ED rate per 1,000 enrollees is less than that population's historical ambulatory ED rate per 1,000 enrollees and is at-risk for having their fee-for-service rates decreased for not meeting the performance targets.

Conducting Preadmission Screening and Concurrent Reviews (2.10.10.2.3)

Aetna's UM clinicians conduct preadmission screening and concurrent review to ensure enrollees are getting the right level and type of care for their medical and behavioral health needs.

Pre-screening for Psychiatric Residential Treatment Facilities

When Aetna receives a referral for psychiatric residential treatment facility (PRTF) admission for an enrollee, we perform an initial screen that includes review of records and current clinical information to determine whether PRTF is an appropriate level of care, or if alternate community-based services could meet the needs of the enrollee. We complete this screen within 24 hours of receipt of the referral and make the proper determination. The purpose of the prior authorization and concurrent review function for PRTF include the following:

- Compliance with the requirements set forth at **42 C.F.R. §441 Subpart D**
- Review of the certificate of need (CON)
- Rule out other community-based options
- Ensure the team has knowledge of the ambulatory resources available to the youth

If approved, we will notify the enrollee and/or guardian if applicable and, with consent, the referring party requesting PRTF services. We provide written notification of the approval within 48 hours. We then generate a proper authorization for each PRTF, again within 48 hours of completion of the screen. Together, with the enrollee, the enrollee's guardian and referring party, and with support from the enrollee's integrated care management team, we locate a PRTF provider available and appropriate to meet the enrollee's needs.

When the initial screen results in a determination that the enrollee needs PRTF care, Aetna secures admission to an appropriate PRTF for the enrollee within the timeframe stated in the CON, and in compliance with access and availability standards for this level of care. Aetna will authorize out-of-state

placement if an in-state option is not available within the required timeframe. In the rare occasion Aetna denies the referral, we will immediately notify the enrollee and/or guardian, and with consent, the referring party requesting PRTF services; within 24 hours, we provide written notification of the denial. Our notification of denial includes information on alternative services to ensure health and safety, including information on providers of those services, referral to care management, and the right of the enrollee to appeal the denial and the process to do so. In addition, for youth pending release from a secure setting for whom a PRTF is being requested, we complete the screen prior to the youth's release if the youth may be relinked to Aetna following release.

To expedite the PRTF placement process, **Aetna maintains near real-time bed utilization/availability for network PRTFs** and out-of-network replacements through weekly communication with our dedicated UM reviewer assigned to PRTFs. This staff person is a child and adolescent specialist who monitors placement availability and works on behalf of enrollees and families.

Concurrent Review

Our UM staff conduct concurrent reviews, as described previously. Aetna completes service authorization and concurrent review for inpatient general hospitals, specialty psychiatric hospitals in Louisiana or out of the state, or state hospitals. A licensed mental health professional completes inpatient psychiatric hospital and concurrent utilization reviews for each enrollee referred for psychiatric admissions to general hospitals. We also work with State and community partners to provide needed UM services to enrollees. For example, we conduct UM functions for the coordinated system of care (CSoC) population in accordance with **Section 2.12.1.21 of the Model Contract**.

Complying with Mental Health Parity Requirements (2.10.10.2.4)

Aetna puts the enrollee and their unique behavioral and physical health needs at the center of all we do and works to increase health equity and parity. We integrate Mental Health Parity and Addiction Equity Act (MHPAEA) compliance into our UM program, from how we authorize services to how we evaluate and monitor compliance. Our program is fully compliant with all requirements outlined in **Section 2.3.11 of the Model Contract** and we ensure our material subcontractors are compliant as well. In addition to ongoing regular review of policies, Aetna employs the following strategies to assure parity compliance:

- We make sure any quantitative treatment limitations applied to mental health or substance use disorder benefits are no more restrictive than the predominant treatment limitations applied to substantially all medical/surgical benefits.
- We do not impose non-quantitative treatment limitations (NQTL) for behavioral health benefits in any classification unless any factors used in applying the NQTLs to behavioral health benefits in a classification are comparable to and applied no more stringently than factors used in applying the NQTLs for medical/surgical benefits in the classification.
- We make behavioral health medical necessity criteria available to any enrollee, potential enrollee, or contracting provider upon request.
- We use LDH's drug formulary.
- We communicate the reason for behavioral health denials to the enrollee.
- We conduct parity analysis on behalf of LDH for plans offering both medical/surgical and behavioral health services.
- We provide out-of-network coverage for behavioral health when available for medical services.
- Our utilization grids are mental health parity-compliant.

Our Aetna Medicaid UM Steering Committee evaluates and measures compliance by reviewing our list of services that require authorization at least annually. We apply evidence-based medical necessity criteria and conduct IRR studies for both physical health and behavioral health services at least annually. The chief medical officer oversees this process and reports results to the Quality Management Oversight Committee (QMOC). The QMOC annually reviews and approves policies on UM practices, pharmacy,

appeals, and peer reviews. **All Aetna staff, including non-clinical and non-UM staff, completed training in mental health first aid**, which teaches compassion and skills for supporting those with mental health conditions and substance use disorders. Furthermore, Aetna adheres to the requirements outlined in **MHPAEA 42 C.F.R. 438.3(e)(1)(ii) and 438.910(b)-(d)**.

Identifying and Mitigating Over-utilization (2.10.10.2.5)

Aetna's Quality Management, Provider Experience, and Special Investigations Unit (SIU) teams work with the UM team to identify, track, and address over-and under-utilization, and to identify solutions with the provider community. To identify and mitigate over-utilization, Aetna uses the following:

- **Provider profiling:** We profile our PCPs and specialized behavioral health providers (including substance use disorder treatment, mental health, and residential providers) and we analyze utilization data to identify utilization and/or quality of care issues.
- **UM performance dashboards:** We use nine UM dashboards, which provide data reports on readmissions, observations versus one- to two-day stays, ED utilization, neonatal intensive care unit (NICU) admission patterns, outpatient urine drug testing patterns, medical claims trends, authorization trends, outpatient utilization trends, and inpatient performance targets: .
- **Demographic distribution for ED utilization dashboard:** This dashboard allows users to review ED utilization data through a demographic and health equity lens. The dashboard sorts and filters enrollee ED utilization data to identify possible demographic-related disparities related to race, ethnicity, language, geography, or adverse incidents.
- **Pharmacy data analysis**: We conduct retrospective drug utilization reviews (RetroDUR) to detect pharmacy over-utilization.

Aetna applies RetroDUR to assess drug over- and under-utilization patterns to drive the development of interventions and/or educational activities. We implement or refine interventions to improve prescribing and utilization patterns and control costs further. Interventions include the following:

- Identifying prescribing patterns of specific practitioners that warrant outreach and/or education
- Referrals to the Administrative Lock-In Review Committee to evaluate identified enrollees' utilization to determine whether they are candidates for pharmacy/prescriber lock-in
- Referrals to the SIU and/or Office of the Inspector General for investigation
- Identification and referral of enrollees to care management for outreach and engagement

Aetna's Safety RetroDUR program identified 203 enrollees with drug safety concerns in 2018. Enrollees identified were engaged in care management or had their issue resolved by pharmacist communication with the prescriber. This effort resulted in cost savings of $52,726 ($18.15 PMPM) in 2018.

Historical Experience with UM of Comparable Populations (2.10.10.3)

Our unique 30 years of national Medicaid experience and dedicated local leadership demonstrate our ability to improve our enrollees' lives while reducing complexity and administrative burden and serving as responsible stewards of State resources. We have served Louisiana under the Medicaid Managed Care program since 2015. We detail our significant experience providing UM services to comparable populations in the next section.

Challenges Identified with High Utilization and Increasing Medical Trends (2.10.10.3.1)

Aetna proactively addresses challenges associated with high utilization and increasing medical trends. For example, our focus on high-risk pregnancy and babies admitted to a NICU is essential as prevention and early intervention can dramatically reduce the number of children exposed to trauma. Aetna, in alignment with LDH, coordinated a systematic approach to decreasing health risks and costs associated with babies admitted to the NICU. Our approach, which includes intensive care management, discharge navigation, collaboration with system partners, and a targeted enrollee education campaign, has resulted in increased health outcomes and cost savings—**we saved $3,386,923 in 2017, a 19 percent increase from 2016**. In

addition, we reduced the average length of stay in the NICU from 18.4 days in 2017 to 13.2 days in 2018, and bed days/1,000 from 78.1 in 2017 to 67.7 in 2018.

Aetna maintains a strong commitment to identifying increasing medical trends and high utilization. Identification of these trends may indicate fraud, waste, or abuse activity (FWA). We detect and prevent Medicaid program violations and possible FWA overpayments through data matching; trending; statistical analysis; monitoring service billing patterns and claims edits; and other data mining techniques.

Other medical trends Aetna addresses include addressing inappropriate use of PSR and CPST; inpatient psychiatric recidivism, which we address through increasing community supports and our comprehensive Transitional Care Management program; and increasing costs of certain treatments such as anti-viral medications and hepatitis-C treatments, which we manage through our pharmacy program. **From June 2018-December 2018, the community tenure for enrollees with high behavioral health utilization increased by 12% for adults and 27% for children.**

Initiatives Managing High Utilization (2.10.10.3.2)

Avoiding high utilization rates, potentially preventable events, ED visits, and hospital admissions begins with the enrollee's connection with the PCP and care management support. Aetna recognizes that 51 percent of the enrollees with potentially preventable events are considered healthy. Therefore, we educate enrollees on the appropriate use of ED services in all enrollee-facing departments and via their PCP.

Our enterprise-wide System of Care model supports our local care management model to reduce high utilization. The System of Care model is a collection of integrated services grounded in trauma-informed care and trauma-informed approaches, culturally and linguistically appropriate services, and recovery principles and guides our care management service delivery model. Aetna case managers educate enrollees and their caregivers on specific physical and behavioral health disorders and the appropriate use of emergency services, including when and how to contact their PCP, and the importance of preventive care. Aetna's program addressing high utilization is a collaborative endeavor between the UM, Care Management, and System of Care teams, focusing on individualized treatment planning based on root cause analysis. **Since implementation in the third quarter of 2018, we have seen a 26 percent decrease in admissions and a 37 percent decrease in length of stay for our enrollees with high behavioral health service utilization.**

In addition to the strategies we use to reduce ED utilization described previously, Aetna deploys multiple strategies to reduce high utilization of services including community-based solutions, technology-based solutions, and provider-based solutions.

Community-based Solutions:

- **Addressing social determinants of health and community-level interventions:** As part of our integrated care model, case managers address enrollees' whole-person needs to address barriers to achieving optimal health and to utilize community supports and services to close gaps in care. For example, our case managers use Aunt Bertha (an internet resource with search and referral functions to provide access to comprehensive, localized listings) to identify community supports. Aunt Bertha is also available to enrollees via our website.
- **Discharge planning:** We identify real-time hospital admissions and ED visits and begin analyzing the cause of the admission and discharge planning needs on day one. During an acute stay, the integrated care team examines medical, behavioral, social determinants, and health literacy indicators for readmission and begins to address the root cause of the primary admission.

Technology-based solutions:

- **Remote patient monitoring**: We offer remote patient monitoring (RPM) to enrollees with conditions such as asthma and high-risk pregnancies via a contract with Care Innovations®. RPM facilitates near-

real time data to maximize appropriate care strategies and empowers enrollees to manage their health proactively.

- **Wellpass (text messaging):** Wellpass is a technology that allows Aetna Care Management staff to communicate with enrollees through text message regarding their ED utilization and health needs.
- **ED reminder phone calls:** The interactive voice response system calls enrollees monthly to identify reasons for obtaining ED services, assess if they have a PCP or need help obtaining one, provide education about urgent care centers and when to use, and to further address any care needs they may have after discharge. During the call, the platform links the enrollee directly to Enrollee Services or Care Management, as needed.

Aetna's integrated care management of highest-risk enrollees achieved **$1,949,899 in cost savings** in 2017**.**

Our efforts to reduce NICU average length of stays through pediatrician education saved 37% over the baseline NICU expense in 2017.

Our enhanced network of urgent care centers and increased enrollee awareness of urgent cares reduced ED utilization on a PMPM basis by 3.7% across all lines of business in 2018.

Provider-based Solutions:

- **CVS Health MinuteClinics:** We are prepared, upon award and in collaboration with the State, to expand MinuteClinic access in at least one existing CVS store and as many as three existing CVS stores. We will assess the regions of the state where there are a high number of potentially preventable emergency room visits, feasibility of Clinic placement and overall timing, and staging for the new clinic(s).
  - **Collaboration:** Aetna works with our high-volume ED facilities and PCPs to support facility case managers to identify duplicated services and prioritize interventions.
  - **Hospital Readmission Reduction Program:** Clinical pharmacists perform medication reconciliation and review when enrollees return home after an inpatient stay.
  - **Urgent care network:** Aetna continues to expand access to urgent care centers to make sure enrollees have access to care in convenient settings in their community—a key factor in preventing avoidable ED visits. **We have increased our number of urgent care locations by 15% since 2016.**
  - **Alternative payment models:** Aetna's alternative payment models incentivize providers to offer after-hours care to our enrollees by paying enhanced rates, decreasing avoidable ED visits.

Since its launch in 2017, Aetna's Enterprise Wide Opioid Taskforce has supported the advancement of Aetna's clinical strategy to combat the opioid overdose crisis and the high utilization of services associated with the opioid crisis. In the first year since announcing our five-year enterprise goals, we have seen the following results:

- A **60 percent increase in the rate of treatment** with non-opioid in enrollees with chronic pain
- A **50 percent decrease in opioid prescriptions** written for seven or more days after an acute injury
- **A nearly 30 percent increase in the rate of medication-assisted treatment** or other evidence-based treatments utilized.

Initiatives Addressing Use of Low-value Care (2.10.10.3.3)

Aetna detects and addresses under-utilization of high-value services and over-utilization of low-value services, as guided by LDH's Quality Management Strategy. We will continue to work collaboratively with LDH to improve high-quality, evidence-based, cost-effective care for enrollees. For example, Aetna supports the following evidence-based practices for high-utilizing individuals with serious mental illness, and we work to identify and provide access to providers of these services and practices in Louisiana: assertive community treatment, targeted case management, psychiatric rehabilitation process model, and dialectical behavior therapy.

In alignment with LDH's Mental Health Reform, Aetna collaborates with LDH to address inappropriate utilization of low-value services. Aetna requires prior authorization for CPST and PSR to ensure proper utilization of these services. This supports efforts to eliminate FWA and directs service utilization to evidence-based strategies. **Despite a reduction in units authorized for CPST/PSR in the last 6 months of 2018, we have seen a decrease in behavioral health admits/1,000 and readmits/1,000.**

Initiatives Addressing Long-term Stays in the ED (2.10.10.3.4)

Aetna actively addresses the long-term stay of enrollees in EDs based on limited availability for necessary behavioral health services. Our strategies include the following:

- Working to develop additional crisis stabilization beds for children
- Conducting analysis of use of the ED for behavioral health services, including at a minimum, reason for ED visit, length of stay, inpatient admissions and/or referral to follow-up care, difficulty in accessing follow-up services, and developing recommendations for reducing long-term stays in the ED
- Educating enrollees and providers regarding appropriate utilization of the ED
- Educating ED staff on availability of community behavioral health resources
- Telemedicine through MDLIVE to increase enrollee access to psychiatrists

Aetna identifies resources in the community, supports those organizations to build capacity, and coordinates care to reduce ED stays and drive care to local providers. Aetna supports several pilot programs aimed at leveraging community-based supports to reduce ED stays. These programs include Compass Behavioral Health's rapid crisis stabilization program; Jefferson Parish Human Services Authority's crisis respite and connection to care management and community-based resources program; and Safe Haven's crisis intervention center in St. Tammany Parish.

Supporting Providers with High Prior Authorization Denial Rates (2.10.10.3.5)

Aetna provides quality care to our enrollees and diligently works to support providers and reduce administrative burden, while avoiding the risks associated with overuse, underuse, and misuse of health care. Our initial provider orientation offers training on UM processes and prior authorization. We offer ongoing support via our Provider Relations team and through the provider portal. Through our Provider Advisory Committee, we review providers who are outliers for denial rates for enhanced provider education regarding prior authorization policies and procedures. We identify providers in need of support through authorization data reviewed in our Quality Management/Utilization Management Committee.

Aetna creates efficient and effective processes for providers who request services. We support providers not accustomed to managed care practices, and **employ multiple strategies designed to minimize their administrative burden and enhance their experience**, including the following:

- Assuring providers can access crucial data on rising-risk enrollees and gaps in care
- Using the standard LDH unified prior authorization form
- Review of appeals related to denials; Aetna has a significantly lower appeal rate per 1,000 enrollees compared to all other MCOs in Louisiana.
- Streamlining processes using trends identified by UM, Quality, and Provider Relations
- Promoting the use of evidence-based clinical guidelines and care paths
- Conducting annual evaluation of practitioner performance and health care professional education that targets appropriate and cost-effective use of health care resources
- Conducting quarterly site visits to facilities to collaborate on reduction of denials

We encourage providers to use the web portal for direct authorizations, educate them about our prior authorization process, and instruct them to provide all the necessary clinical information to facilitate rapid authorization for the right services. The provider portal includes requirements for prior authorization, how to request a copy of medical necessity criteria, and how to access to the provider prior authorization tool. This application allows providers to verify that a service is a covered benefit and to determine whether it requires prior authorization.

Workflow

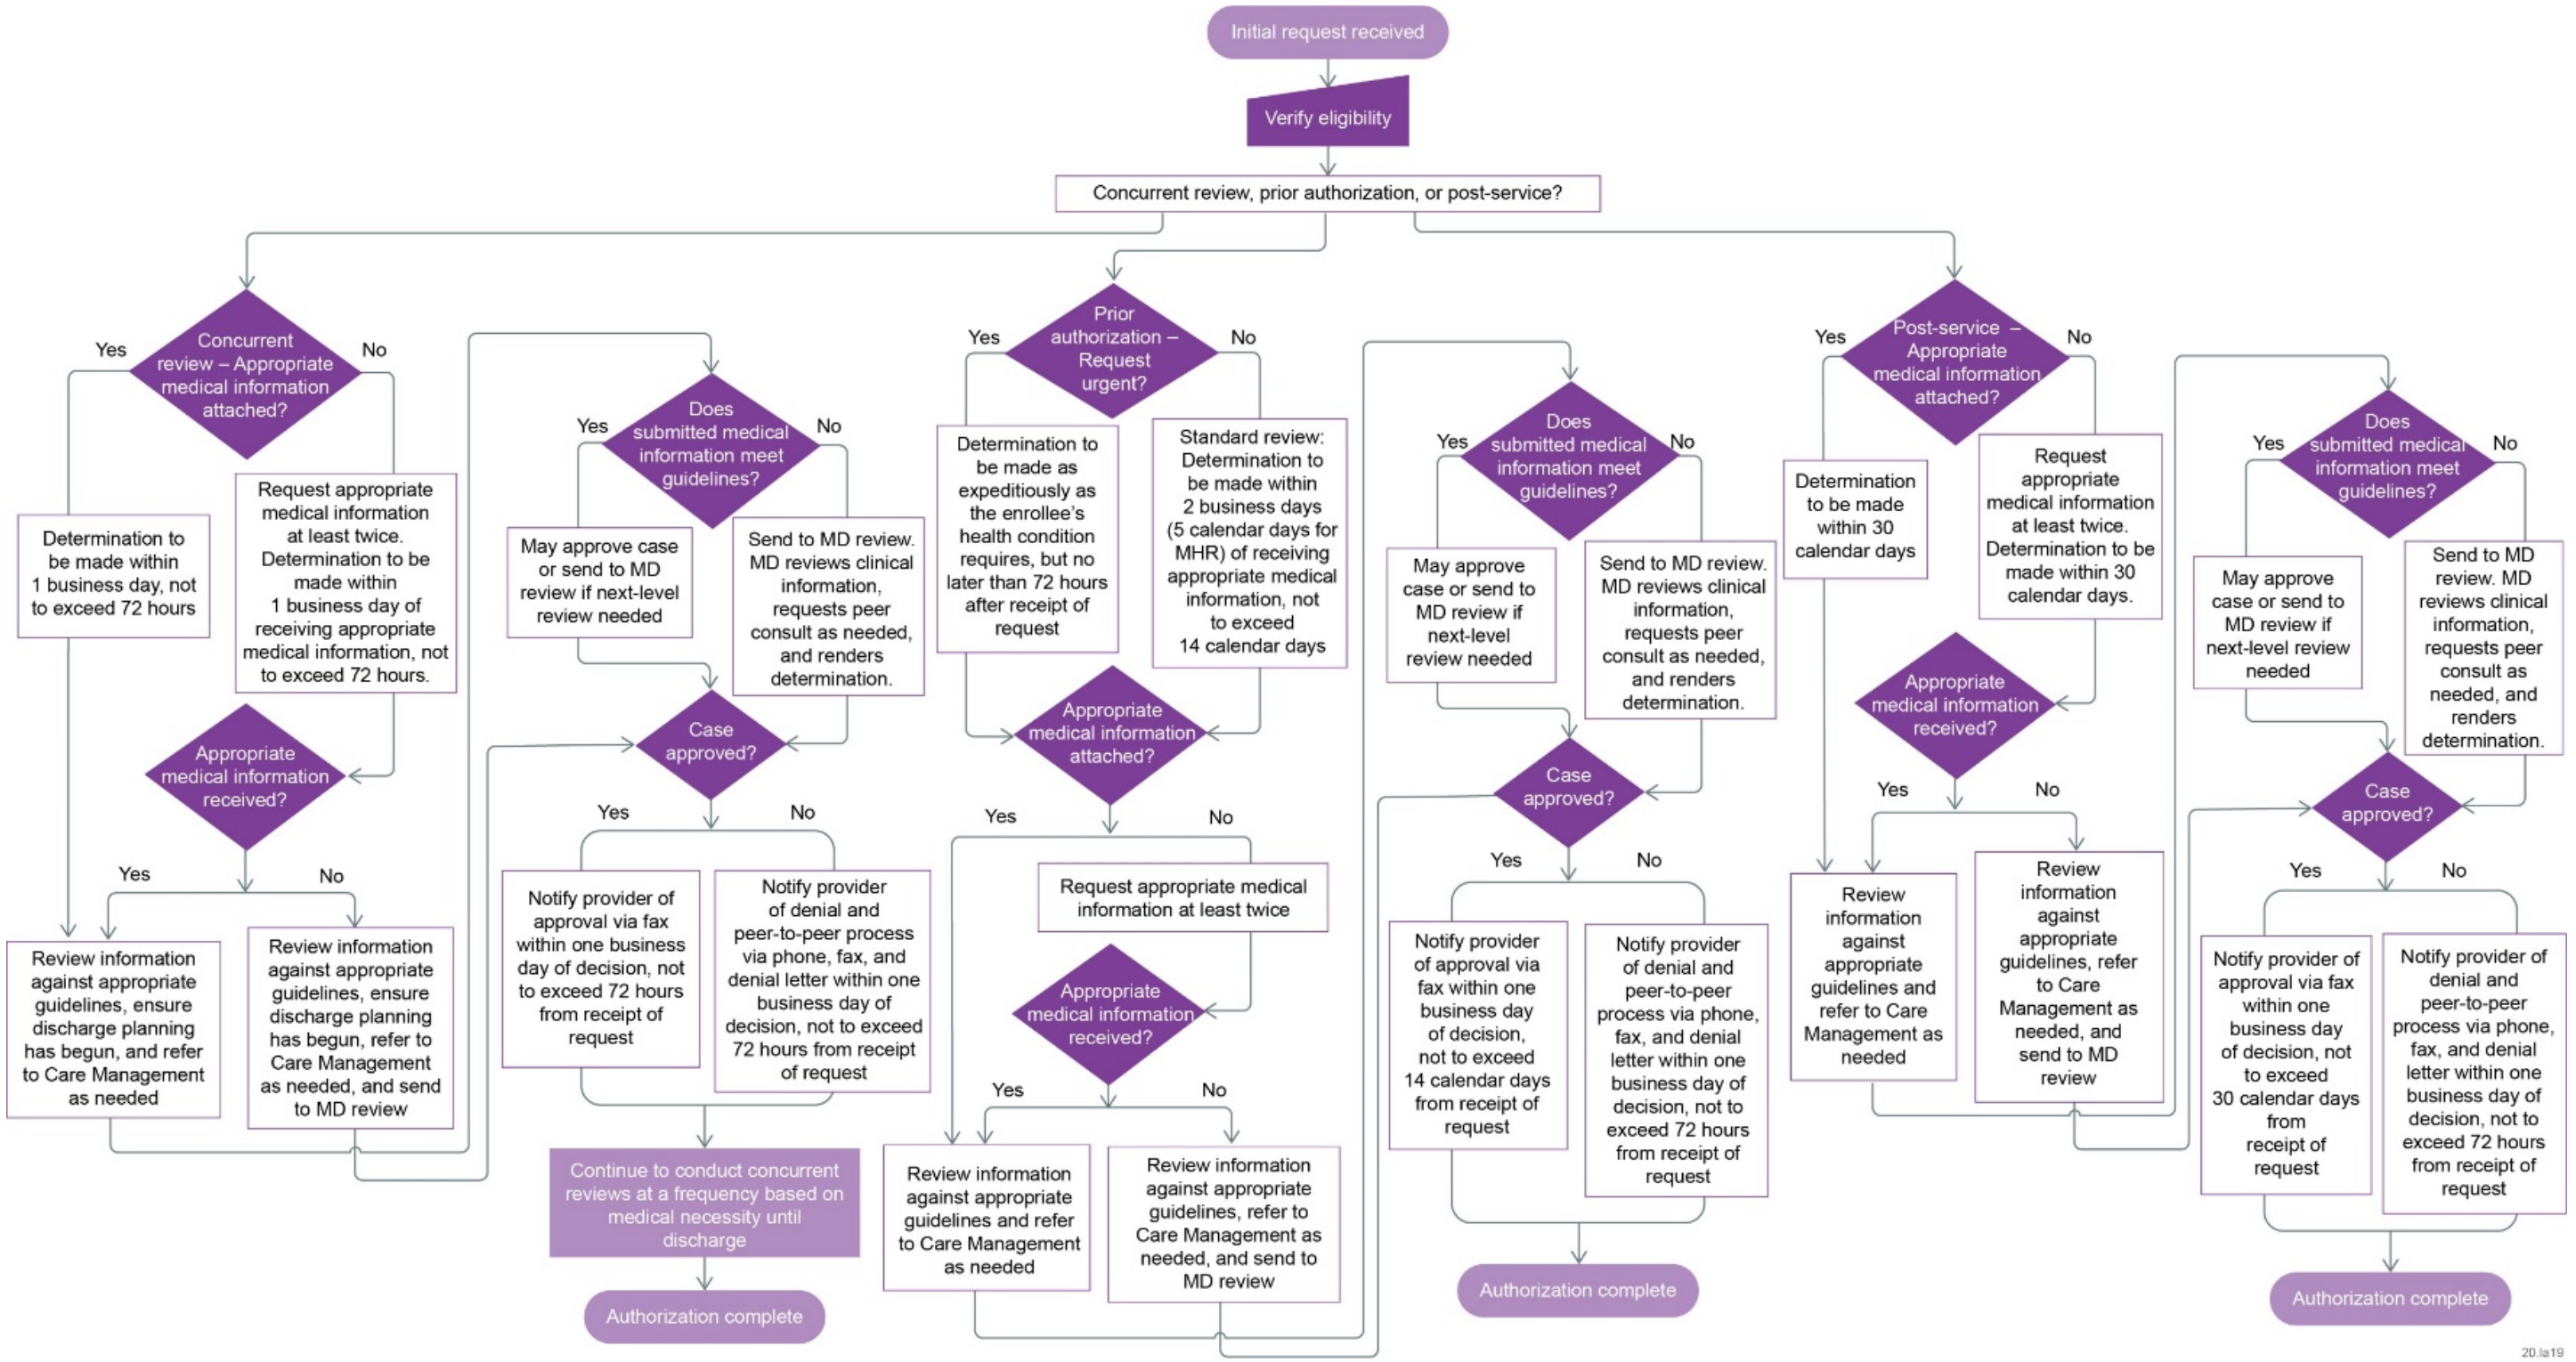

Figure 2.10.10-1: Aetna's Utilization Management Workflow

Aetna's UM workflow, from initial request to final disposition, including the workflow for expedited authorizations.

2.10.11 Quality

As an avid supporter of afterschool activities for children of all ages, Aetna routinely partners with the Boys & Girls Clubs of America to celebrate and recognize all of the hard work the Clubs do throughout the school year. Aetna CEO Rick Born is a board member of the Baton Rouge Boys & Girls Club and supports several programs for school-aged youth focused on academics, health, and character.

2.10.11 Quality

Improving the health of Louisianans and setting the bar for higher quality and cost-efficient care is Aetna's top priority. We are committed to quality, ready access, and innovation to maximize enrollee health, advance health equity, and address social determinants of health within a flexible value-based approach.

Aetna's Commitment to Quality Improvement (2.10.11.1)

Aetna brings the full complement of our local and national quality improvement infrastructure and resources in alignment with the **Louisiana Medicaid Quality Strategy** in achieving the **Triple Aim** to promote better health with better care at a lower cost. Our **substantial improvement trajectory** surpassed all other plans within Louisiana on the Healthcare Effectiveness Data and Information Set (HEDIS), LDH performance, Adult Consumer Assessment of Healthcare Providers and Systems (CAHPS) survey, and Child with Chronic Condition (CCC) CAHPS survey measures, including meeting the 75th percentile for the following:

- Antidepressant medication management acute phase
- Antidepressant medication management continuation phase
- Chlamydia screening in women aged 16 to 24 years
- Adult CAHPS and CCC CAHPS survey: how well doctors communicate

Aetna ranked #1 in Louisiana compared to other plans for the following HEDIS 2018 measures:

- Well-child visits in the first 15 months of life
- Appropriate testing for children with pharyngitis
- Appropriate treatment for children with upper respiratory infection
- Diabetes screening for people with schizophrenia or bipolar disorder

We will continue to increase our capabilities, resources, and programs to continue our improvement trajectory to meet or exceed the HEDIS 75th percentile across all measures identified in **Attachment G**. We are committed to fully engaging enrollees and providers in quality initiatives through increased staffing and face-to-face interactions targeting Louisiana communities experiencing health disparities. We will promote alternative treatment options, including telemedicine and mobile services in underserved parishes, and utilize community health workers (CHWs) to address each enrollee's unique needs. Our organizational commitment is evident by our year-over-year incline as shown in **Table 2.10.11-1**.

Table 2.10.11-1: Quality Measures Demonstrating Significant Improvements in Louisiana, 2016 to 2018

Performance Measure	HEDIS 2016	HEDIS 2017	HEDIS 2018	2017 Change	2018 Change
Childhood immunizations, combo 10	11.90%	14.81%	28.71%	↑2.91%	↑16.81%
Adult access to preventive/ambulatory health services	70.15%	77.57%	85.61%	↑7.42%	↑15.46%
Adolescent well-child visits	31.71%	42.82%	46.72%	↑11.11%	↑15.01%
Postpartum care	58.28%	63.08%	63.50%	↑4.80%	↑5.22%
Well-child visits 3 to 6 years	41.94%	53.94%	59.12%	↑12.00%	↑17.18%
WCC–body mass index (BMI) measurement	41.18%	42.59%	52.31%	↑1.41%	↑11.13%
Child and adolescent access to primary care (CAP) 12 to 24 months	76.58%	92.45%	93.77%	↑15.87%	↑17.19%
CAP 25 months to 6 years	68.04%	75.26%	81.27%	↑7.22%	↑13.23%
CAP 7 to 11 years	20.00%	76.22%	81.79%	↑56.22%	↑61.79%
CAP 12 to 19 years	50.00%	75.28%	81.46%	↑25.28%	↑31.46%
Comprehensive diabetes care eye exams	39.07%	47.02%	48.91%	↑7.95%	↑9.84%

Overall Quality Approach

As a National Committee for Quality Assurance (NCQA)-accredited organization, our innovative continuous quality improvement (CQI) approach encompasses an extensive array of activities to improve the experience of our enrollees and the care delivered by our providers. **We use an integrated and collaborative approach**, involving each department within Aetna; input from primary care providers (PCPs), specialists, and enrollees; and partnerships with organizations such as the Office of Public Health (OPH), Taking Aim at Cancer in Louisiana, March of Dimes, Well-Ahead School Health, the Louisiana Healthy Schools Collaborative, and other community resources.

Specific Strategies

We employ a comprehensive, multifaceted approach to identify and address unique characteristics of subpopulations for all measures in **Attachment G** in alignment with the **Louisiana Medicaid Quality Strategy**, including but not limited to quality measures #27, #35, #37, and #50. All of our quality improvement activities roll up to and are coordinated under our Quality Assessment and Performance Improvement (QAPI) program. All strategies related to quality measures #27, #35, #37, and #50 will include coordination with stakeholders and enrollee representation of the condition (new mother, cervical and colon cancer survivor, and individual with experience in overcoming alcohol and/or drug use) in our Enrollee Advisory and QAPI committees. We will highlight their stories in our enrollee newsletter as motivation and inspiration to our affected populations.

Childhood Immunization Status (#27)

Aetna ranked second of all managed care organizations (MCOs) in Louisiana for childhood immunization status (CIS) combination 10 vaccinations for HEDIS 2018. Our rates substantially improved from 11.9 percent in HEDIS 2016 to 28.7 percent in HEDIS 2018 secondary to coordinated upload of LINKS supplemental data, modification of our chase logic in the HEDIS data platform, extensive abstraction training, over-read during HEDIS audits, and local education at contracted federally qualified health centers (FQHCs). **Table 2.10.11-2** identifies our multimodality strategies and activities per Aetna functional area to continue our improvement trajectory as we expand our engagement of enrollees and providers.

Table 2.10.11-2: Specific Strategies to Address Childhood Immunization Status Quality Measure (#27)

Department	Strategies and Activities
Quality Management	• Enrollee outreach calls by a live person to schedule visits with the physician for wellness visits and immunizations • Hot Shots Kid's Club program for enrollees from birth to 2 years of age; the parent receives a certificate of completion and a special prize (e.g., puzzles, blocks, toy) is awarded to the child • Reminder mailers and text messages to the parent to complete the annual wellness visit and keep current in their immunizations • Baby book to new mothers detailing information about the well-baby visit schedule and immunization frequency • Enrollee education in newsletter articles on the importance of vaccinating their child and maintaining the immunization record • Health fairs and meetings in churches and schools promoting the need for childhood vaccinations • Pediatrician and PCPs assigned to the QAPI Committee to identify barriers faced by physicians • $20 gift card incentive for completion of annual wellness visits
Provider Relations	Provider Relations educates the pediatrician and provides them with the well-child HEDIS tips sheets and HEDIS value set billing codes and demonstrates how to access our web-based provider portal to review enrollee open gaps in care and current HEDIS rates.
Care Management (CM)	All pregnant mothers are enrolled into the CM Promise Program, which teaches them what to do after the baby is born, frequency of well-baby visits, and importance of vaccinations. We plan to have a home health agency conduct a well-baby visit and provide a welcome baby package and education.
Population Health Mgmt. (PHM)/CHW	CHWs outreach to new mothers to make certain they have the necessary skills, equipment, and food to keep their babies healthy. They reinforce the importance of vaccinations and assist in scheduling visits and transportation to the doctor's office or to OPH within their parish.

Department	Strategies and Activities
Health Care Equities/SDOH	The Health Care Equities department runs reports to identify health disparities and social determinant of health (SDOH) barriers and assists in planning interventions and/or initiatives for targeted areas and regions.
Value-based Payment (VBP)	VBP arrangements for completion of at least six wellness visits from birth to the age of 15 months; if completed, and immunizations are provided at each doctor's visit, the child will receive their full immunization series.

Cervical Cancer Screening (#35)

Aetna collaborates with the Cervical Cancer Free Louisiana initiative, Take Aim at Cancer in Louisiana, and the Louisiana Vaccination Coalition to increase awareness of cervical cancer prevention programs, increase rates of Pap testing and follow-up care, and improve human papillomavirus (HPV) vaccinations among adolescents for prevention. We promote collection of all sexually transmitted disease (STD) screenings during the annual Pap test, including HIV and hepatitis-C screenings, and work collaboratively with OPH to obtain administrative supplemental data. Utilizing continuous quality improvement (CQI) and the Plan-Do-Study-Act (PDSA) cycle, we identified an opportunity to increase vaccination rates and reduce over-screening for cervical cancer. **Aetna met the 90th percentile for HEDIS 2018 for non-recommended cervical screening rates at 3.30 percent and the 75th percentile at 30.17 percent for HPV screening.** Our cervical cancer screen rates showed strong improvement from 30.77 percent in HEDIS 2016 to 44.28 percent in HEDIS 2018. **Table 2.10.11-3** identifies our multimodality strategies and activities per Aetna functional area to produce continued improvement.

Table 2.10.11-3: Specific Strategies to Address Cervical Cancer Screening Quality Measure (35)

Department	Strategies and Activities
Quality Management	• Enrollee education includes reminder birthday flyers and annual cervical cancer newsletter article on the importance of getting their Pap test completed • Reminders in our enrollee handbook to get a Pap test done; text message reminders to enrollees who have not had screenings • Scheduled well-woman clinic days; enrollees receive an Aetna teal-colored T-shirt and/or free underwear gift card for participating • Health fairs around Mother's Day to promote women's health and preventive screenings with free Aetna Cares shirts • Assigned gynecologist QAPI Committee member to identify barriers physicians face • HEDIS education webinars and HEDIS liaison onsite provider education, to include prevention of over-testing, completion of STD screenings at the time of Pap, and point-of-care HIV and hepatitis-C lab finger-stick testing • $15 gift card given to women when they complete their Pap test; we also offer gift cards to a local merchandise store to purchase female underwear upon completion of their screening test
Enrollee Services	Every time an enrollee calls in, our Enrollee Services staff members receive an electronic alert to close any open gaps in care, including the need for a cervical cancer screening. Staff members schedule the appointment and arrange for transportation as needed.
Utilization Management (UM)	UM generates provider profile reports of under- or over-utilization of cervical cancer screening services. Specific providers receive education on evidence-based practices and required timeframes for completing Pap tests.
Provider Relations	Provider Relations staff members provide women's health tip sheets to PCPs and gynecologists including HEDIS value set billing codes; they collaborate with FQHCs to use evidence-based interventions to increase HPV vaccination and cervical cancer screenings.
Network Management	Recognizing a barrier of lack of female providers in rural areas, we plan to set up popup clinics and incentivize female practitioners to complete well-woman examinations within identified parishes.
Care Management	Electronic care management platform alerts prompt the CM of enrollees' needed tests and services; CM conducts education and assists in scheduling appointments, including arranging transportation as needed.
PHM/CHW	CORA, our innovative medical clinic on wheels, travels to high-density areas with low access; we collaborate with FQHCs and community health centers to make certain enrollees obtain their Pap and needed STD screening tests and discuss the importance of condom use in the prevention of STDs.

Department	Strategies and Activities
Health Care Equities/SDOH	We recognize African-American women in Louisiana are particularly at risk for cervical cancer, with a 25% higher incidence rate of cervical cancer compared to Caucasian women. We utilize data visualization software to map Louisiana cancer data to focus resources and identify areas for early detection interventions.
Value-based Payment	VBP arrangements with PCPs and gynecologists for enrollee completion of the cervical cancer screening test, with or without HPV. We incentivize providers for adherence to evidence-based guidelines and reduction of over-screening.

Colorectal Cancer Screening (#37)

Louisiana has the fourth-highest incidence and third-highest death (mortality) rate of colorectal cancer in the United States. We collaborate with Screen for Life: National Colorectal Cancer Action Campaign, the Louisiana Cancer Prevention and Control Programs, Taking Aim at Cancer in Louisiana, and the Office of Minority Health to address the needs of this population. **Table 2.10.1-4** identifies our multimodality strategies and activities per Aetna functional area.

Table 2.10.11-4: Specific Strategies to Address Colorectal Cancer Screening (#37)

Department	Strategies and Activities
Quality Management	• Education to enrollees 50 -75 years of age, including flyers on needed screening tests and how to obtain services, including flexible sigmoidoscopy every 5 years, colonoscopy every 10 years, double-contrast barium enema every 5 years, guaiac-based fecal occult blood test every year, and fecal immunochemical test (FIT) every year • Promote FIT-First and Flu-FIT campaigns to providers within the FQHC system to provide an annual, low-cost FIT test to enrollees • In collaboration with the provider, a FIT kit is mailed to the enrollee annually, with live call follow-up to remind them to send it back; the results are analyzed and sent to the provider for discussion of the results and recommended next steps if positive • Participating in health fairs, local community meetings, handing out free FIT kits, and promoting National Colorectal Cancer Awareness Month in March through our newsletter and mailers • HEDIS liaison onsite education and hand delivery of free FIT kits at provider offices for Aetna enrollee use • Adding a gastroenterologist to our QAPI Committee to identify the best ways to fight colon cancer • Incentive of $50 gift card for completion of colonoscopy • Partnership with National Colorectal Cancer Roundtable Initiative in 2019 to have more than 80% of targeted enrollees screened
Utilization Management	Utilize the Louisiana Colorectal Cancer Roundtable in recommending changes and additions of non-invasive DNA screening test every three years and computed tomography colonography every five years to the fee schedule to improve completion rates.
Provider Relations	Provider Relations staff members educate PCPs and gastroenterologists about recommended screening tests. FIT kits are hand-delivered free of charge to providers for Aetna enrollee use.
Network Management	Develop open access endoscopy systems centered on the enrollee's medical home at the FQHC as part of a committed medical neighborhood.
Care Management	CM conducts education and assists the enrollee to schedule their appointment, including transportation. CM enrolls enrollees with positive cancer diagnosis in the CM program and develops care plans.
PHM/ CHW	The PHM team outreaches to large provider groups, reviews HEDIS rates, and discusses closure of gaps, including demonstrations and discussions by vendors on FIT kits, importance of testing, and how to obtain free FIT kits. CHWs hand-deliver FIT kits and provide instruction within the home and recommend colonoscopy every 10 years.
Health Care Equities/SDOH	Use of data visualization software to map Louisiana cancer data to identify areas for early detection and incidence, targeting enrollees with screening rates and late-stage diagnosis rates less than 55%, with stratification by race and gender.
Value-based Payment	Develop competition among PCPs and gastroenterologists through VBP arrangements and collaborate with FQHCs to use evidence-based interventions

Initiation and Engagement of Alcohol and Other Drug Abuse or Dependence Treatment (#50)

Aetna met the 2018 HEDIS 75th percentile for total initiation of Alcohol and Other Drugs (AOD) treatment, met the 50th percentile for 2018 HEDIS total engagement of AOD treatment, and exceeded the

2018 Quality Compass South Central rates and 2018 Quality Compass National rates for all performance indicators except for total engagement alcohol abuse and dependence. Within our enrollee population in Louisiana, there are 18,698 enrollees with a confirmed diagnosis of substance abuse disorder (opioid or other drug) and alcohol abuse disorder, equating to 16.47 percent of our total population. Aetna has identified opportunities to improve health outcomes to our enrollees due to the prevalence of alcohol, opioid, or other drug abuse or dependence as identified in **Table 2.10.11-5**.

Table 2.10.11-5: Initiation and Engagement of Alcohol and Other Drug Abuse or Dependence Treatment(#50)

Department	Strategies and Activities
Quality Management	• Qualified project manager hired with Lean Six Sigma Black Belt for oversight of initiation and engagement of alcohol and other drug abuse or dependence treatment (IET) performance improvement project • Enrollee flyers on treatment programs, CM and enrollee services, behavioral health (BH) telemedicine and teletherapy options, and available transportation • Enrollee newsletter articles on alcohol and drug use, tobacco cessation, and depression • Educational health fairs at homeless shelters with provision of resources, treating providers, telemedicine/teletherapy options, and availability of transportation vendors • Outreach to enrollees through interactive voice response (IVR)calls to encourage engagement in treatment, including a prompt for initiation of treatment if they have alcohol or drug use concerns • Enrollee focus surveys on reasons for non-participation • Completion of Screening, Brief Intervention and Referral to Treatment training by first-line providers (primary care, urgent care, obstetrics/gynecology [OB/GYN], pain management, and emergency department [ED] settings), and medication-assisted treatment (MAT) training workshops at no cost • Completion of hospital ED practitioner training of MAT certification for initiation of buprenorphine treatment • Maternal, Infant, and Early Childhood Home Visiting program for families impacted by opioid use and neonatal abstinence syndrome to decrease infant morbidity and mortality
Enrollee Services	The Enrollee Services team receives annual training on alcohol and substance abuse disorders, how to recognize them, available resources for enrollees, and how enrollees can self-refer to treatment
Pharmacy Management	• Enrollee restriction program to identify enrollees misusing, abusing and/or diverting controlled substances, in collaboration with LDH of restricting enrollee to a specific practitioner/pharmacy • Medication lockbox program • Restriction of amount prescribed and order frequency to prevent over-use and dependence • Promotion of use of oral lozenges, gum, and patches to enrollees for cessation of tobacco/nicotine use
Provider Relations	• HEDIS tip sheets on billing codes for IET measure • Handouts of available trainings to first-line providers and available treatment centers for enrollee referrals
Network Management	• BH telemedicine/teletherapy vendor contracts Quarterly reports of available outpatient services and treatment programs within each parish/region
Care Management	• CM assessments for depression screenings, American Society of Addiction Medicine (ASAM) evaluation, and support system • CM training annually on substance abuse disorders prevalence and treatment, motivational interviewing techniques, ASAM 6 evaluations, depression screening, stages of change, available substance abuse providers and resources, and tobacco cessation • Development of communication flowchart to map existing and enhanced communication processes between the hospital and UM and CM staff to ensure appropriate placement post-discharge
PHM/ CHW	• Use of peer support specialists with known prior history of drug/alcohol abuse who maintain sobriety • CHW enrollee home visits to encourage them to remain sober and continue with ongoing treatment • •Engagement of support system in treatment plan
Health Care Equities/SDOH	• Identified top coexisting conditions of tobacco/nicotine addiction, depression, and pain • Aetna interventions include a tobacco cessation program for this subpopulation; advising smokers and tobacco users to quit and discussing cessation medications and strategies

- Focused interventions on enrollee referral to alcohol reduction programs; medication management for enrollees prescribed antidepressant therapy coordinated by the CM department

Assessment, Incentives, and Evidence-based Interventions (2.10.11.2.1)

Aetna aligns financial incentives for providers and builds shared capacity to improve health care quality through data and collaboration. We integrate a range of data sources, systems, care sites, and domains to identify enrollee populations and subpopulations, understand their care needs, and operate programs designed to meet those needs. Enrollment data received from LDH is integrated with medical, pharmacy, utilization reports, provider profiling, and lab claims. Together, these data sources, as well as survey and SDOH information, make up the key data elements necessary to identify enrollee risks, and pinpoint subpopulations and opportunities to improve services. We maintain the integrity, accuracy, and consistency in all data reported, and we conduct ongoing validation audits.

Available Data Sources

Aetna's assessment of utilization rates and potential for improvement is supported by sophisticated technology, databases, and tools, as described in **Table 2.10.11-6.**

Table 2.10.11-6: Available Data Sources

Data Source Type	Description
Claims Management System	Collection of medical claims for inpatient, outpatient, professional, and transportation services
HEDIS NCQA-certified Data Platform	For generation of annual HEDIS and non-standard HEDIS rates, creation of monthly trend reports, and provider gap-in-care lists
Elli/HMS Data System	Population management solution to drive risk intelligence and care management activities by providing a 360-degree view of the enrollee's four-year claims use prior to their current enrollment
Hotspot Analytics	Identification of enrollee penetration by gender, race, ethnicity, culture, HEDIS and non-standard performance indicators, and by region and parish
PHM Platform	Identifies enrollee health risk factors and social determinant of health indicators; alerts care manager of gaps in services, ED disparity dashboard, and health equity dashboard
Surveys/Assessments	Annual and post-call surveys and enrollee and provider surveys to measure their satisfaction and experience with our programs and services, social determinants, and care needs
Medical Record Audits	Provider adherence to medical record, HEDIS standards, and clinical practice guidelines
Grievances and Appeals Data Platform	Collection and tracking of enrollee and provider satisfaction with the plan and services rendered
Quality Data Platform	Tracking of provider preventable conditions, health care-acquired conditions, and potential quality of care concerns

Assessment of Utilization Rates and Potential for Improvement

Understanding utilization rates is foundational to improving enrollee health outcomes, ensuring closing gaps in care, and decreasing health care costs. Aetna formally assesses utilization rates through our Quality Management/Utilization Management Committee (QM/UM), including review of historic and current performance data for over-utilization of low-value care and under-utilization of high-value care. We produce monthly reports showing aggregate performance rates, predictive rates, and encounter data to identify enrollees needing care or outreach. Hotspot drilled-down reports show enrollee characteristics, race, ethnicity, specific gaps by parish, SDOH, and other variables to identify need for intervention based on region. We use the PDSA cycle and perform multiple analyses, including root-cause analysis, flow and run charting, Ishikawa diagrams, Pareto charts, and the 5 Whys. We create driver diagrams to show areas for potential improvement and take actions as guided by our QM/UM.

As one example of our assessment and improvement of appropriate utilization, during a review of community psychiatric support and treatment (CPST) facilities and psychosocial rehabilitation skills (PSR) training utilization reports, we found a sharp incline in service utilization and identified increased claim submission. We reviewed the current process of payment and noted that no prior authorization was required. We modified the process to require prior authorization for CPST/PSR services and submitted suspicious claims to Fraud, Waste, and Abuse for investigation for fraud, waste, or abuse and potential recoupment of monies. As a result, we will recoup an estimated $1.758 million dollars in 2019.

Provider and Enrollee Incentives (2.10.11.2.2)

Aetna leads the Louisiana Medicaid market in provider incentives through VBP arrangements to incentivize delivery of the right care in the right place at the right time. From January 1 to September 30, 2018, 51 percent of Aetna's provider payments in Louisiana were tied to VBP programs. Eighty-five percent of Aetna PCPs take part in a VBP arrangement benefitting 76 percent of enrollees. We have VBP arrangements with many of the largest systems in Louisiana, such as Franciscan Missionaries of Our Lady, Willis-Knighton Health System, Baton Rouge General, Seaside Health Systems, Acadia Healthcare, and Brentwood Hospital. We continue to add VBP providers. We use a variety of models, including pay-for-quality, pay-for-performance and shared savings for PCPs, patient-centered medical homes, BH hospitals, BH outpatient clinics, and acute hospitals. Providers earn incentives for meeting benchmarks, including closing gaps in care, and achieving the HEDIS 50th percentile or equivalent.

We recognize the most successful **enrollee incentives** are those specifically targeted to the individual's preventive, acute, and chronic health care needs. **Incentives are an opportunity for us to engage our enrollees in their care, and communicate the importance of visits, tests, screenings, and healthy behaviors**. Aetna's Quality and Data Analytics teams assess the efficacy of our incentives in closing gaps in care in a fiscally responsible manner, making modifications based on outcomes. In addition to committing to all six optional value-added enrollee benefits, we incorporate enrollee incentives to support the delivery of the right care in the right place at the right time, including those described in **Table 2.10.11-7**.

Table 2.10.11-7: Examples of Enrollee Incentives Programs

Program	Incentive Offered	Highlights of Improvements
Healthy Moms and Babies	$25 first prenatal visit, $10 each consecutive visit, $50 postpartum visit (PPC), $50 one 17P shot, over-the-counter benefits of diaper rash ointment, and condoms	• PPC: NCQA 50th percentile • 17P: ↑Increase by 8.20 points in 1 year
Healthy Milestones, Ages 0-20	$20 gift card for completion of wellness visits	• W15: NCQA 50th percentile • W34: ↑ 17.18 points in 2 years, Adolescent Well Care: NCQA 50th percentile
Ted E. Bear, M.D. Club™, Ages 0-20	Participants receive $15 first visit, $20 second visit, and $30 third visit for meeting with their physician or registered dietician to discuss weight loss goals	• WCC BMI: ↑ 11.13 points in 2 years • Physical activity:↑ 11.90 points in 2 years • Nutrition: ↑ 13.39 points in 2 years
Cancer Screening Program	$15 for breast cancer screening (BCS) women, ages 21 and older, $15 for cervical cancer screening, women ages 21-64, $50 colon cancer screening, enrollees ages 50 and older	BCS: NCQA 50th percentile
Asthma Screening Program	$15 gift card for completion of a follow-up visit after asthma-related ED visit	Asthma Medication Ratio 51-64 ratio: ↑25 points in 1 year
Chlamydia Screening	$10 gift card for enrollees 16 to 24 years for chlamydia screening (CHL)	CHL: ↑2.23 points in 2 years

Program	Incentive Offered	Highlights of Improvements
Diabetes Program	$10 gift card retinal eye exam, $10 gift card A1C testing, over-the-counter benefit of blood pressure (BP) cuff, sharps containers, and diabetic socks	• A1C: ↑5.20 points in 2 years • A1C <8: ↑23.33 points in 2 years • Retinal Eye Exam: ↑9.84 points in 2 years

Evidence-based Interventions (2.10.11.2.3)

Our evidence-based interventions targeting super-utilizers (classified as enrollees with 6 or more ED visits in the past 12 months) and reducing potentially preventable events include but are not limited to Care Management ED Diversion, CVS Health MinuteClinics, Hospital ED Diversion, and the Ready Responders community-based program as described in **Table 2.10.11-8.**

Table 2.10.11-8: Examples of Aetna Evidence-based Interventions and Strategies

Intervention	Description
Care Management ED Diversion[1]	This program follows National Center for Biotechnology Information guidelines for reducing frequent visits to the ED. We generate a regular report from our analytics platform of non-emergent ED visits by enrollee. CM ED coordinators establish relationships with the enrollee and develop care plans to guide them to use outpatient services, urgent care centers, and telemedicine.
CVS Health MinuteClinics[2]	Walk-in clinics can significantly reduce adult enrollee presentations to the ED department by improving access to care. We have six CVS Health MinuteClinics in Louisiana: Baton Rouge (two), Covington, Metairie, New Orleans, and Slidell. CVS Health MinuteClinics offer treatment of minor illnesses and injuries, screenings, vaccinations, injections, and wellness and physical examinations on a no-appointment basis seven days a week. We are prepared, upon award and in collaboration with the State, to expand MinuteClinic access in at least one existing CVS store and as many as three existing CVS stores. We will assess the regions of the state where there are a high number of potentially preventable emergency room visits, feasibility of Clinic placement and overall timing, and staging for the new clinic(s).
Hospital ED Diversion Program[3]	Aetna entered into VBP arrangements with the Natchitoches Regional Medical Center (NRMC) and St. Martin Hospital to reduce enrollee preventable emergency visits. We collaborated with LDH and NRMC to develop a VBP model to address PCP access issues and high non-emergent ED use. NRMC will use patient navigators for post-visit ED visits to assess enrollee needs and provide education on symptom management, community resources, urgent care locations, and transportation. St. Martin is a hospital in Breaux Bridge experiencing PCP challenges due to being in a rural environment. They built an urgent care center to improve enrollee PCP access and reduce non-emergent ED usage. We created a VBP arrangement with them to align incentives to provide them higher reimbursement for the urgent care center and shared savings on ED utilization.
Ready Responders Community-Based Program[4]	The Ready Responders community-based program in the Orleans and Jefferson parishes uses community paramedics for the management of urgent, low-acuity illnesses and injuries. Using data reports, we identify at-risk enrollees with CM high-risk scores, frequent ED usage, multiple hospital admissions, and lack of physician engagement. Each enrollee receives a minimum of five scheduled visits a month by a paramedic with completion of a full assessment, screenings, and tests, and development of a self-management plan. Usual participation is 60 to 90 days with extension based on health status or lack of progress. Measures impacted include plan all-cause readmission, potentially preventable ED visits, potentially preventable readmission, and reduction in ambulatory care ED visits.

Quality Assessment and Performance Improvement Program (2.10.11.3)

Aetna has a well-established QAPI program to direct organization-wide initiatives for continuously improving the health status of covered populations in compliance with the **Model Contract Section 2.16** and **42 C.F.R. 438.330(a)(1)**. We integrate a governance model with responsibilities and accountabilities of leadership and the board of directors. Our chief medical officer (CMO) and quality management coordinator are accountable for the management of the QAPI program, in collaboration with enrollees and key stakeholders, locally and nationally.

Analyzing Gaps in Service Delivery and Quality of Care (2.10.11.3.1)

Aetna integrates a range of data sources, systems, care sites, and domains to identify enrollee populations and subpopulations, understand their care needs, and operate programs designed to meet those needs.

Analyzing Gaps in Delivery of Services

Identifying, analyzing, and closing gaps in delivery of services is a multifunctional endeavor including information technology (IT), QM, CM, PHM, VBP, and enrollee services. Our data collection for identifying, measuring, and reporting gaps in service delivery includes information from enrollee and provider surveys, HEDIS and LDH performance metrics, and administrative data. We analyze results in workgroups with key leaders, providers, and enrollees comparing prior years and target goals by conducting the 5 Whys, Ishikawa diagrams, barrier analysis, and root-cause analysis to find opportunities for action plans to address gaps; we regularly conduct reevaluations of key data points based on findings.

Our Enrollee Services closed 6,155 identified gaps in care in 2018 by acting on electronic alerts in every enrollee interaction to schedule needed screenings, tests, and wellness visits.

In 2018, we conducted more than 24 in-depth and focused analyses, including examination of information from provider satisfaction, enrollee experience with services including BH, and all LDH performance and HEDIS measures that fell below the 50th percentile, or did not improve at least 2 percent. We acted on gaps by entering into contract negotiations with mobile enrollee engagement service providers to complete annual wellness exams, BMI measurements, chlamydia screens, and diabetic care (including A1C testing and retinal eye exams) and hired HEDIS liaisons to perform onsite training for lower-performing providers.

Analyzing Gaps in Quality of Care

Aetna's integrated quality review process makes certain that issues involving quality of care or service, safety, complaints, or other areas of dissatisfaction are systematically evaluated, tracked, and entered into the quality data platform for investigation. Potential quality of care concerns (PQOCs) are reported by internal Aetna personnel, or received directly from an enrollee or care provider. Documentation is collected and reviewed to determine if a PQOC exists.

Aetna's National Quality Oversight Committee (QOC) evaluates PQOCs related to facilities and vendors to make a determination; if a quality of care issue is found, the committee recommends appropriate action. The QOC sends case files to the Aetna Credentialing and Performance Committee for tracking and trending. Actions taken by the committee include peer-to-peer discussion, practitioner corrective action plan, financial penalties, suspension of privileges, termination of contract, and other follow-up determined necessary by peer review. PQOC data is aggregated monthly and reported to the QM/UM and Quality Management Oversight Committee (QMOC). If the termination results in a material change in the network, Aetna supplies written notice to LDH and/or the Office of Behavioral Health.

Areas for Improved Management of Chronic and Selected Acute Diseases or Conditions

We deploy a proactive year-round **prevention and wellness** strategy that aligns with evidence-based guidelines to determine best practice in the management of preventive, acute, and/or chronic conditions. We use a risk stratification model that integrates demographic, claims/encounter data, and results from health appraisals to stratify enrollees to appropriate programs based on score, from lowest risk (population health management), medium and rising risk (supportive care management), and high risk (intensive care management). Our care management program emphasizes early identification of symptomology to prevent an enrollee's decline in medical or mental condition.

Our electronic care management platform is crafted to alert care managers with up-to-date, enrollee-needed services, tests, and screenings to identify enrollees at risk for hospitalization, at risk for a premature birth or complications during delivery, and/or those that may require counseling for an existing medical or BH condition. We can track and evaluate CM interventions through customized reports of gap closure rates for acute and/or chronic conditions by population/region, and drill down to each assigned care manager. CM, UM, QM, and our Louisiana CMO review these reports monthly for trends.

As one example, through our reviews we identified 8.91 percent of our enrollees were diagnosed with diabetes at a total cost of $21,441,430 in 2018. To improve the care and health outcomes of our enrollees with diabetes, our care managers completed training to become certified diabetes educators knowledgeable in the latest clinical trends/practices to work collaboratively with enrollees, providers, and community agencies in development of education programs, health fairs, and other focused activities. We also developed provider incentives through VBP arrangements as well as enrollee incentives to increase and support the enrollee level of self-management.

Reduction in Disparities in Health Outcomes

Aetna is committed to reducing disparities for underserved enrollees with the goal of health care equity for all enrollees. We do this by stratifying key quality measures to narrow any health care disparities that exist through use of data visualization software to map data to identify areas for early detection and incidence. Using the initial health needs assessment and data collected through our population health data platform and data visualization software, we identify enrollee characteristics by region and parish, age, sex, race/ethnicity distribution, language preferences, and cultural diversity to develop and apply specific interventions by lowest-performing regions and parishes, and respective lower-performing clinics where we need to focus more energy and resources.

For each region, parish, and clinic, we set annual goals for improvement based on prior performance in comparison to all other clinics within their community, with financial incentives defined for reaching goals. The VBP, PHM, QM, and Provider Services teams coordinate their work with clinic managers and providers to tailor interventions based on their unique population and organizational structure. Our fully integrated, locally based UM/CM model promotes proactive and chronic care management visits at low-performing clinics within each parish. We promote rural community use of our mobile mammogram and lab services, telemedicine, and teletherapy options to those underserved populations.

Using geo-accessibility software, we can identify our practitioner availability by parish/region, race, and gender. For parishes/regions identified with enrollee access issues, we will provide incentives to practitioners to participate in popup clinics and work with FQHCs to host clinic days and have those specialists come in during normal business hours, extended hours, and on weekends. We will enhance reimbursement for those specialists who would agree to travel to underserved areas to practice one to two days per month. For example, we identified the need for female practitioners to conduct cervical cancer screenings in Region 3 Saint Charles Parish, Region 4 Evangeline Parish, Region 6 Avoyelles, Concordia, La Salle, and Rapides parishes, Region 7 Red River and Natchitoches parishes, and Region 8 Caldwell,

Lincoln, and Morehouse parishes. As such, we will contract with female practitioners to be available for clinic days to our female population within each region.

Identifying Underlying Reasons for Variations in Provision of Care (2.10.11.3.2)

In identifying reasons for variations in provision of care and evaluating practice variation, we assess the effectiveness of care rendered, adherence to evidence-based guidelines, treatment options chosen, and frequency of use of clinical activities as it relates to the capacity of our health care system, such as doctor visits, diagnostic tests, and hospital admissions. Inappropriate variation occurs when non-evidence-based care is provided, or the care lacks wide acceptance, and the high level of variation cannot be supported on a quality or outcomes basis, which can lead to disparate outcomes for enrollees, higher utilization, costs, and waste. We analyze data reports, provider patterns of over-and-under utilization of services, regional and provider demographic variations, complaints and appeals, quality of care events, and results of our onsite medical record audits to identify variation in care and low-performing practices. Our focus is to ensure enrollees get the right care, at the right time, and at the right place.

In 2017, Aetna implemented a national project across all markets to improve breast-screening rates and optimized outreach to enrollees to gain a better understanding of their motivation and barriers to care, including being too far, too sick, or too busy. We also tested the effectiveness of different types of messages (‘do it for yourself’ and ‘do it for your family’). A machine learning model was used to predict correctly 93 percent of the time which enrollees would receive or not receive a mammogram, and this informed our tests of different messages and outreach channels used. The recipients of the different outreach efforts showed breast cancer screening rates 28 percent higher than a randomized control group. In Louisiana, we also identified challenges of enrollee knowledge deficit and access to service issues. We reprioritized our live calls, emails and IVRs, and contracted with Louisiana State University to enhance mobile mammogram services with extended clinic hours to rural communities to the subset of enrollees most likely to not complete their screenings. Aetna ranked second in the LDH amongst current MCOs, and we met the NCQA 50th percentile at 58.21 percent.

Implementing Improvement Strategies Based on Analytical Findings (2.10.11.3.3)

All of the analytical findings gathered through the two functions described previously are discussed and addressed through our QMOC and QM/UM committees. During committee review, we establish a workgroup with an assigned project manager and/or champion to oversee the project, with key business leads, community partners, stakeholders, and enrollee participation. We conduct brainstorming sessions to identify areas of improvement and select multiple interventions to address identified gaps and generate action plans, which include project goal, measurement, and impact of change. We examine any social determinants or disparity prevalence and cost-ratios, incorporating outreach activities and care management strategies to engage enrollees with chronic and acute diseases.

We check progress using tools like Gantt charts and drive accountability through routine meetings and setting target dates for task completion. We use pilot studies first to evaluate feasibility, time, cost, and adverse variations to the proposed action plan. Data and information are collected, and results of the implementation are assessed and interpreted by reviewing measurement results to the goal, demonstrating the success or failure of the project. This provides valuable insight and cost feasibility of the project to make certain the change will provide desired results. If there is a positive impact, we implement network-wide change collaboratively within our internal departments, external vendors, and stakeholders.

One example of Aetna’s implementation of improvement strategies based on analytical findings is our well-child visit initiative. Recognizing a gap in care for our child enrollees not receiving well-child visits, we determined that underlying root causes included enrollee and provider knowledge deficits and inadequate outreach and engagement of enrollees and providers regarding the importance of visits and

corresponding HEDIS measures as well as access challenges. We changed our process to increase education, outreach, and engagement. We added a $20 incentive message to our birthday mailers, sent text message reminders, and started IVR call reminders. We tripled the content of our enrollee newsletter to focus on prevention and wellness. Our Enrollee Services staff members attended a four-hour intensive HEDIS training, and successfully closed 6,155 gaps in care within a one-year period. We developed additional VBP arrangements with providers; our PHM team followed up monthly to ensure they achieved the goal of the NCQA 50th percentile. Within a two-year period, we saw a significant improvement in parent engagement and participation in self-management of their child's care as identified in **Table 2.10.11-9**.

Table 2.10.11-9: Improvement in Performance Measures HEDIS 2016 to 2018

Performance Measures	HEDIS 2016	HEDIS 2017	HEDIS 2018	LDH Goal	Rate Change
Adolescent Well Care	31.71%	42.82%	46.72%	40.69%	15.01%
Well-child 15 months (6 visits)	N/A	53.94%	63.99%	62.06%	10.05%
Well-child 3 to 6years	41.94%	53.94%	59.12%	72.45%	17.18%

Data-driven Clinical Initiative in the Past 24 Months

Within the past 24 months across all nine regions of Louisiana, we implemented a data-driven clinical initiative targeting the administration of 17P, a progesterone medicine to prevent preterm birth. We examined gaps from data collected via claims, stratified it by subpopulation (race/ethnicity/region), and examined enrollee social-economic issues (e.g., childcare, transportation, distance to provider) to look for health disparities. We completed flow charting, run charts, Ishikawa diagrams, Pareto charts, and 5 Whys, and focused enrollee surveys to identify reasons for variations in provision of care and interventions needed. We implemented a strategic plan to increase the total number of pregnant enrollees receiving at least one inoculation of 17P between the 16th and 24th weeks of pregnancy. Despite our outreach attempts, we were initially unsuccessful in improving our rates. We then conducted an enrollee survey to better understand the underlying reasons for variations in provision of care and found a high percentage of African-American enrollees considered high-risk for preterm births that lacked transportation and were without childcare for children at home. We identified a breakdown in the referral process and communication flow between CM team and the treating physician, as well as CM knowledge deficits.

We accomplished an increase of 8.20 percentage points from 10.81 percent in HEDIS 2017 to 19.01 percent in the HEDIS 2018 measure for Initiation of Injectable Progesterone for Preterm Birth Prevention (PTB) through the following actions: modification of outreach material targeted to African-American females, changes to our referral process to include an eligibility list being faxed directly to the home health agency every two weeks, 17P inoculation provided by specialized home health agency in coordination with the ordering physician, and addition of a new transportation vendor which allowed for parent-child transport. Care management training was conducted to ensure provision of 17P education to enrollees identified at high risk for delivery of a preterm birth, including newsletters, baby books, flyers, mailers, phone calls, and text messages. Care managers receive a weekly list of enrollees at risk for high-risk pregnancies. Using this list, they conduct five outreach attempts to enroll them into the program. The benefits of progesterone were fully explained to the enrollee during every contact and they were made aware of availability of home health services and transportation benefits. Care managers, home health agency representatives, and the treating physician meet biweekly to identify gaps and coordinate care. Due to the added education and awareness of this initiative, we also realized improvements in screenings during pregnancy including chlamydia (14 percent), HIV (10 percent), and syphilis (57 percent).

Quality Management and Quality Improvement Approach (2.10.11.4)

Aetna clearly defines quality management and quality improvement (QM/QI) guiding principles, structures, and processes and assigns responsibility to the right individuals for implementation and monitoring through our QAPI program in compliance with all applicable provisions of **42 C.F.R. Part 438**.

QAPI Plan Description, Goals, Quality Committees, and Schedule (2.10.11.4.1)

Aetna's QAPI program achieves the following primary goals:

- Implement a QM/QI program that effectively promotes and builds quality into the organizational structure and processes throughout the plan to meet and surpass LDH target goals
- Conduct continuous monitoring and assessment of the physical and behavioral health services provided throughout our network to make certain they adhere to evidence-based practice standards
- Improve under-utilization of high-value services and over-utilization of low-value services
- Identify and analyze opportunities for improvement with implementation of action plan as indicated
- Set expectations around safety with enrollee-centered rights and choices
- Outline our Provider Support Plan to include how Aetna will support activities related to improvement in specific outcomes, including data sharing and metrics

QM/QI activities that support the goals and objectives of the QAPI program are coordinated on an annual basis through our structured framework described in **Table 2.10.11-10.**

Table 2.10.11-10: QAPI Program Components

QAPI Components	Description
QAPI Program Description	Outlines the strategic plan and goals to meet or exceed the LDH's quality strategy, quality plan, and other requirements. We modify our QAPI Program Description annually based on our findings, changes to contract, NCQA accreditation standards, and LDH and federal guidelines.
QAPI Work Plan	A Louisiana-specific activity-tracking tool reviewed quarterly at the QMOC and QM/UM meetings to facilitate achievement of goals identified internally by LDH, enrollees, and providers. It is a dynamic document with specific interventions and activities to drive the implementation of clinical and service quality improvement outcomes related to contractual performance measures, HEDIS measures, performance improvement projects, medical and treatment record audits, enrollee and provider surveys, and NCQA standards. It names staff members responsible for each activity and the periods for completion. Continuous progress is reflected, and activities, barriers, and outcomes are measured, trended, and compared to defined targets or the industry benchmarks, with the most stringent measure being used.
QAPI Program Evaluation	An annual evaluation of the QAPI program assesses the overall effectiveness of our QI program and reflects an assessment of completed and ongoing activities in the QAPI Work Plan. It addresses barriers from the previous year and provides recommended interventions for overcoming issues and barriers identified. Opportunities for improvement identified in the evaluation or articulated by LDH regulators, or from provider or enrollee feedback, drive the development of our goals and objectives.

Quality Committees

A formal committee structure allows for oversight of the QAPI program and for the flow of information to and from the board of directors and LDH. Formal committees, subcommittees, and ad hoc work groups advise and guide the QAPI process. The committees foster collaborative partnerships and integrate provider and enrollee feedback into development of operational policies and our decision-making. We encourage external stakeholders and community agencies to take part in our committees, presenting their programs and initiatives as topics for discussion. We incorporate information gleaned from our participation in LDH Quality Committee and activities into our committee discussions and goals.

Board of Directors

The board of directors has ultimate accountability for the QAPI program and related processes, activities, and systems, including the QAPI program description and any subsequent revisions, annual evaluation of the previous year QAPI activities, summary reports, data, outcomes of studies, and credentialing activities.

Quality Management Oversight Bodies and Schedule of QM Activities

Our QAPI process is guided by committees, subcommittees, and ad hoc work groups as outlined in **Table 2.10.11-11.** All meetings are recorded and minutes or summaries (based on confidentiality restrictions) are provided to the QMOC and LDH as requested. Meeting frequency is increased as needed.

Table 2.10.11-11: QAPI Committees and Schedule of Activities

QAPI Committee	Description	Meeting Frequency
Quality Management Oversight Committee (QMOC) – fulfills requirements of QAPI Committee	Chaired by the CMO with cross-functional representation, as well as medical and BH providers, enrollees, and LDH; integrates QM and performance improvement activities throughout the plan and provider network; provides executive oversight of the QAPI program and makes recommendations to the board of directors	Quarterly
Quality Management/Utilization Management Committee (QM/UM Committee)	Chaired by the CMO with active participation from the behavioral health medical director with cross-functional representation and network providers, including PCPs/medical homes, specialists, pediatrics, OB/GYNs, and BH; advises and makes recommendations regarding the quality of care and service provided to enrollees	Quarterly
Delegation Oversight Committee	Chaired by the director/manager of network management with cross-functional representation; advises the QMOC about delegated relationships	Quarterly
Committee for Service Improvement	Chaired by the director of operations with cross-functional representation; advises the QMOC and/or management about enrollee and provider issues	Quarterly
Member Advisory Committee (MAC) – fulfills requirements of Enrollee Advisory Council	Chaired by the manager of enrollee services as delegated by the chief executive officer with cross-functional representation and enrollee representatives; provides feedback regarding strategies for improving enrollee care and services including health education and other enrollee materials	Quarterly
Compliance Committee	Chaired by the compliance officer with cross-functional representation; reviews, monitors, and assesses the effectiveness of the compliance plan	Quarterly
Policy and Procedure Committee	Chaired by the compliance officer with cross-functional representation; development, implementation, approval, and communication of all policies	Quarterly
Grievance and Appeals (G&A) Committee	Chaired by the G&A manager, with cross-functional representation and at least one enrollee advocate; reviews trends, resolves issues, and renders decisions	Quarterly
Pharmacy and Therapeutics Committee	Chaired by the director of pharmacy with participation from the CMO, clinical liaison, BH prescribers, Aetna Medicaid organization medical directors, and network pharmacists and physicians; responsible for oversight of drug over- and under-utilization patterns and formulary.	Quarterly
Provider Advisory Council (new)	Will be comprised of enrollees and providers; provides expert council to the plan to improve access, provider satisfaction, and assistance with connecting with specialty providers; reviews satisfaction survey results and provides feedback and input on policies and programs	Quarterly
Hospital Advisory Committee (new)	Will consist of medical and BH hospitals, clinics, health centers, and key advocacy groups; provides feedback on new quality improvement initiatives and insight into local population health concerns	Monthly

Our QAPI program is also supported by national Aetna committees including the National Drug Utilization Review, Credentialing and Performance, Practitioner Appeal, and the National Quality Oversight Committee. Key plan staff members take part in these committees to represent Louisiana and incorporate the best practices found nationally across markets into our local initiatives.

Organizational Chart of QAPI Program (2.10.11.4.2)

Figure 2.10.11-1 depicts the organizational chart of our QAPI program reporting to our board of directors.

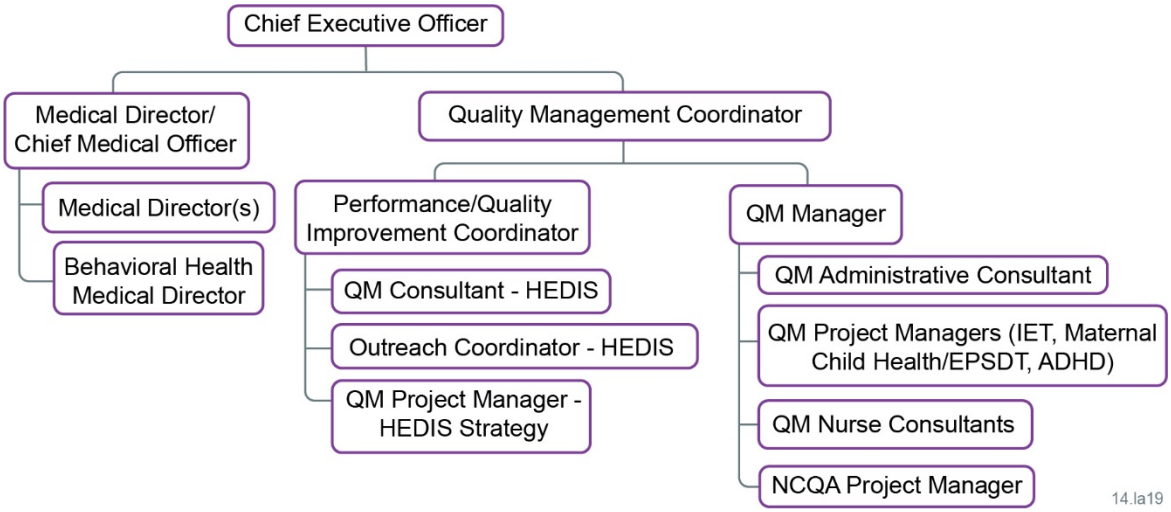

Figure 2.10.11-1: Quality Management Organizational Chart

Aetna is committed to significant investment in Quality staff to meet the goals of the Triple Aim.

As led by our medical director/CMO and our quality management coordinator, our QM program staff members described in **Table 2.10.11-12** are dedicated to maximizing health outcomes with additional support and guidance from the Aetna national team.

Table 2.10.11-12: QM Staff and Responsibilities

Title	Responsibilities
Medical Director/Chief Medical Officer	Full-time board-certified physician with current unencumbered license with at least three years of medical specialty training and five years post-training in providing clinical services; leads and implements the clinical direction for the organization and QAPI program
Medical Directors (BH and non-BH)	Full-time board-certified physicians with current unencumbered license with at least three years of medical specialty training and five years post-training; act as administrators providing oversight to the medical and BH programs and a minimum of one psychiatrist
Quality Management Coordinator (Quality Director)	Full-time, Louisiana-licensed registered nurse (RN), physician, physician assistant (PA), or certified professional in healthcare quality (CPHQ); responsible for developing, implementing, and monitoring quality management, performance improvement projects and initiatives, population health, prevention and wellness programs, and policies and procedures
Performance/Quality Improvement Coordinator	Full-time certified professional to focus organization efforts on improving HEDIS performance measures; manages all aspects of the annual HEDIS submission
QM Project Manager–HEDIS Strategy	Full-time CPHQ or Lean Six Sigma-certified project manager providing oversight of all aspects of the provider and enrollee marketing materials, budget accountability, and implementation
QM Consultants (4)	Full-time associates collect medical records from provider offices; performs administrative and office support activities related to QM essential business functions
NCQA Project Manager	Full-time CPHQ or Lean-Six Sigma certified project manager responsible for oversight of accreditation activities and compliance, including maintaining an accreditation work plan, oversight of workgroups, and conducting mock audits
QM Nurse Consultants (2)	Full-time QM nurse consultants to oversee surveys and delegation oversight

Title	Responsibilities
Quality Manager	Full-time Louisiana-licensed RN or has master's degree in health care administration with minimum of five years' QI experience; responsible for staff oversight; performs professional administrative duties related to NCQA process and compliance to contractual obligations
IET Performance Improvement Project (PIP) Manager	Full-time licensed mental health professional, Green Belt-preferred, that ensures enrollee receipt of alcohol and substance abuse services, arranging provider trainings, and promoting enrollee engagement in treatment and preventive health strategies
Maternal Child Health/EPSDT Coordinator	Full-time Louisiana licensed RN, physician, or PA, or with a master's degree in public health or health care administration; coordinates maternal/child health and EPSDT services, promoting preventive health strategies
Attention-Deficit/Hyperactivity Disorder (ADHD) PIP Manager	Full-time project manager with minimum three years of QI experience, preferred Yellow Belt Lean Six Sigma certification; ensures project management of ADHD services, promoting preventive health strategies, and identifying and coordinating assistance
Outreach Coordinator – HEDIS (5)	Full-time HEDIS abstractor professional coder assists in the review of medical records to highlight HEDIS and medical record review opportunities for the medical staff

HEDIS Performance Measurement and Reporting (2.10.11.4.3)

Aetna has proven capacity to participate in the LDH's annual HEDIS and non-HEDIS performance measurement and reporting initiative as evidenced by our timely submission in Louisiana to NCQA and State regulatory agencies for HEDIS 2016, 2017, and 2018. At the close of each review cycle, our contracted NCQA auditor validates our HEDIS data files. We validate the accuracy of our reports in collaboration with the national team to ensure no data integrity issues. We fully cooperate with external review organizations. **Table 2.10.11-13** describes our local and national resources committed to performance measurement, reporting, and data-driven initiatives.

Table 2.10.11-13: Resources Dedicated to HEDIS and Other Measurement and Data-driven Initiatives

Resource	Description
Aetna Medicaid Organization IT Team	Identifies, connects, manages, and verifies all data sources used for HEDIS measurement, and is comprised of over 200 individuals, with over 20 associates dedicated to data management
Shared Services Informatics Team	Performs HEDIS system oversight, data management, and quality reporting, as well as provider and value-based reporting that includes both HEDIS and utilization measures
Aetna Medicaid Organization QM Team	Support the Louisiana team by reviewing HEDIS trends, developing and evaluating new approaches to provider and enrollee engagement, and supporting scalable programs to test approaches through our work with industry-leading technology, analytics, software, and service companies (e.g., Elli)
Utilization Management	Monitors performance metrics, trends in outpatient, inpatient, and ED utilization patterns, and generates provider profile reports of over-/under-utilization
Care Management	Engages enrollees for closure of HEDIS and non-HEDIS performance measures, and coordinates care
Provider Services	Facilitates interactions between providers and Aetna and coordinates the ongoing HEDIS and non-HEDIS education of network providers and provision of gap-in-care reports
Value-based Payment	VBP arrangements incentivize providers to engage fully with the enrollee, provide needed services, and prevent over-/under-utilization of services
Population Health Management	The PHM team outreaches to large provider groups, reviews HEDIS rates, and discusses closure of gaps using our electronic population health management platform. Community health workers and peer support specialists provide enrollee education and link them to the services, tests, and screenings needed.

Recent Successful Quality Improvement Activity Example (2.10.11.4.4)

Childhood obesity is an epidemic in Louisiana with approximately one in three children being overweight or obese, leading to serious physical and behavioral health repercussions including diabetes, hypertension, anxiety, and depression. Our recent successful quality improvement activity is the **Ted E. Bear, M.D.**

Club initiative, aimed at improving health outcomes of our child and adolescent enrollees through completion of well-child visits with their PCPs, including a BMI measurement and physical and nutritional counseling. Our Louisiana Care Management team outreaches directly to enrollees with a BMI above the 85th percentile for participation and communicates directly to the practitioner, nutritionist, and school partner to promote improved health status. The enrollee receives a $15 gift card for completion of their first visit with their doctor or registered dietician, a $25 gift card for their second visit, and a $30 gift card third for their visit. Through this initiative, we have seen a significant improvement year-to-year for HEDIS measurements as outlined in **Table 2.10.11-14.**

Table 2.10.11-14: Results Achieved from Ted E. Bear, M.D. Club Quality Improvement Activity

Measure	HEDIS 2016	HEDIS 2017	HEDIS 2018	Improvement 2016 to 2018
Weight assessment counseling (WCC): BMI total	41.18%	42.59%	52.31%	11.13 points
WCC: physical activity total	27.76%	23.61%	39.66%	11.90 points
WCC: nutrition total	39.53%	34.26%	49.39%	9.86 points
Adolescent Well Care	31.71%	42.82%	46.72%	15.01 points/6.03 points above 50th percentile

Aetna also took part in 76 local health and wellness fairs throughout 2018 to provide screenings, physical activity demonstrations, cooking and nutrition education demonstrations, gift giveaways, special door prizes, and a healthy meal and/or snack. To promote healthy eating and access to healthy food options, we identified locations to plant six new community gardens in identified food deserts throughout South Baton Rouge. In partnership with the Baton Rouge Garden Alliance, our programming consists of education from a licensed horticulturalist with 10 years of sustainable community and school garden implementation. Children will be taught how to plant and grow fruits and vegetables, as well as how to prepare healthy meals using their ingredients with recipe cards we distribute at the site.

Quality Improvement Plans and Projects (2.10.11.4.5)

Continuous quality improvement is core to the success of Aetna's quality programs. Aetna identifies quality improvement plans and projects to put in place from the outcomes of our current initiatives, annual evaluations, HEDIS measures, enrollee and provider surveys, and internal monitoring results. Our ongoing monitoring includes provider profiling, utilization management reviews, gaps-in-care reports, trends, audit findings, annual assessments, and focus groups to look for opportunities to improve quality outcomes. We conduct a root-cause analysis and develop data-driven initiatives to address identified opportunities for improvement.

Potential Topics

We identified hypertension, diabetes, and cardiovascular disease as potential topics for quality improvement plans and projects—23.26 percent of our enrollees have a diagnosis of hypertension with a total cost of $37,280,292 in 2017, and 8.91 percent of our enrollees are diagnosed with diabetes with a cost of $21,441,430. Coronary artery disease affects 9.94 percent of our enrollees with a cost of $10,528,328. Through our root-cause analyses, we identified the following contributing factors: lack of enrollee engagement in self-management plans and CM programs, enrollee knowledge deficits, ineffective medication protocols, practitioner non-adherence to evidence-based guidelines, racial disparities, and lack of PCP or CM follow-up to make certain the enrollee is adherent to their treatment plan.

Monitoring of Implementation and Outcomes

Aetna monitors implementation and outcomes of all our quality improvement plans through our QAPI program. Each project has an assigned project manager to implement a project plan to identify goals, project tasks, defined roles and responsibilities, and outline budget and necessary resources needed.

Hypertension

Our plan is to implement a hypertension quality improvement project as guided by the American College of Cardiology 2017 guideline[5] for the prevention, detection, evaluation, and management of high blood pressure (BP) in adults. We will conduct a pilot study to evaluate feasibility, time, cost, and challenges/barriers, and improve upon the study design prior to full-scale project implementation. For our enrollees diagnosed with hypertension, we found 48.72 percent of those diagnosed are African American. Based on this prevalence, our focus is African-American females with BP rates greater than 140/90. Our data software will provide an accurate listing by parish of numerator noncompliant enrollees by race and ethnicity, and by practitioner. We will outreach and partner with each provider and get their agreement to participate in the study. Each enrollee identified will be sent a letter requesting their participation, including a special offer of a free pedicure or manicure upon each visit.

Meeting the enrollee where they are, we will co-locate at a local nail salon weekly, manned by a pharmacist, care manager, and CHW. The enrollee will be provided with a BP kit and education on how to monitor their BP at home, take their weight daily, modify their diet, and take medications as prescribed. The pharmacist will review the medication for efficacy and coordinate medication changes with their doctor. The enrollee will be scheduled to return every three to four weeks and taught to record their weight and BP in a tracking log, which they must bring at their next visit. We will also educate the aestheticians to provide ongoing education to enrollees between visits, and the CHW and care manager will follow up with the enrollee to validate their understanding of education provided.

For outcome monitoring, we will use HEDIS controlling BP technical specifications and value set codes to derive our eligible subpopulation and setting target goals. Baseline data will be collected, and all interactions will be documented in our data platform. We will calculate the current HEDIS controlling BP rate for the selected enrollees and compare it to the BP results calculated at each visit, for a time period not to exceed four months. We derive the final rate for this subset population and the effectiveness of our project over time. The project manager will conduct weekly meetings with the team to discuss progress.

Diabetes

Diabetes ranked second for cost utilization for our enrollees in 2017. Upon review of our HEDIS measures, we identified that although our A1C testing, A1C control less than 8.0, and retinal eye exam were increasing over a three-year trend from 2016-2018, (A1C by 7.82 percent, A1C control rate by 17.07 percent, and retinal eye exam 9.04 percent), the majority of our enrollees were not self-managing their blood sugar. We conducted an Ishikawa analysis to identify the challenges our enrollees faced. The major challenges were poverty, transportation issues, knowledge deficit, and access to care especially in rural areas. Our plan is to increase compliance with HbA1c testing for enrollees with diabetes targeting parishes identified with the highest propensity of adults with elevated HbA1c. Aetna is partnering with diagnostic labs/mobile services to schedule home visits to take their BP, height, and weight; draw their blood for A1C testing; obtain a urine sample; and perform a retinal eye exam that will be read by a board-certified ophthalmologist. These services are offered at no cost to the enrollee during the daytime, evening hours, or weekends. All results are sent to the enrollee's doctor and reviewed by our Care Management team. The team discusses the results with the enrollee to establish a self-management plan. Additionally, we utilize remote patient monitoring for diabetic patients as well for the rural communities to increase their compliance and improved health. We will utilize the CVS Health pharmacy bag messaging to provide reminders to enrollees. We will monitor to ensure enrollees with A1C control less

[5] Whelton Paul and Carey, Robert, "Guideline for the Prevention, Detection, Evaluation, and Management of High Blood Pressure in Adults: A Report of the American College of Cardiology/American Heart Association Task Force on Clinical Practice Guidelines," Journal of the American College of Cardiology, 71 (19) 127-248 (2018): accessed March 30, 2019; DOI: 10.1016/j.jacc.2017.11.006.

than 8.0 receive an A1C test every six months, and we will offer gift cards to the enrollee for their participation. Our CHWs and care managers will conduct home visits to provide education about diet and exercise and check their progress with their self-management plans. We will track effectiveness in closing gaps in care monthly, and assess our HEDIS final rates for A1C testing, A1C control less than 8.0, retinal eye exam, and nephropathy screening annually.

Cardiovascular Disease/Tobacco Cessation

Using claims data, we identified that nicotine dependence ranked as the number one primary diagnosis among our enrollees with alcohol and substance abuse disorders. Upon review of Adult CAHPS survey summary rates, we identified a three-year downward trend from 74.26 percent in 2016, to 68.83 percent in 2017, and to 68.70 percent in 2018 for how often medication was recommended or discussed by a provider. Our plan is to implement a tobacco cessation project to improve provider adherence to evidence-based guidelines, increase education, and decrease enrollee cigarette use in alignment with the Louisiana Cancer Prevention program. We will partner with community resources including FQHCs and school-based health centers to promote engagement with Quitline, the Smoking Cessation Trust, and the Tobacco Control Initiative programs. These programs offer free counseling, cessation medication, online support and tools, telephone support, individual and group counseling sessions, and specialized services for pregnant enrollees. Our CHWs and care managers will visit the enrollee in their home or work to assess their progress. They will deliver cessation medication to the visit and link them to local resources for support, including churches and recreational centers. They will communicate openly to the doctor, with enrollee permission, about the successes and challenges faced and work together in development of the enrollee cessation plan. We will monitor outcomes through CAHPS rates and by aggregate data obtained of the total number of enrollees successfully completing a tobacco cessation program as reported by CM, CHWs, and Enrollee Services.

Clinical Practice Guidelines (2.10.11.5)

Aetna is committed to supporting providers in the adoption of clinical practice guidelines (CPGs) to implement interventions to provide the right care, in the right place, at the right time.

List of CPGs Relevant to the LDH's Medicaid Population and Sample CPG

Our comprehensive list of medical, behavioral, and preventive CPGs relevant to LDH's Medicaid population are highlighted in **Table 2.10.11-15.** They are available at any time on our website at www.aetnabetterhealth.com/louisiana/providers/guidelines. **Attachment E** contains our chosen sample of the attention-deficit disorder CPG for review.

Table 2.10.11-15: Aetna Louisiana CPGs

CPG Category	CPG Topic
Medical Health	Asthma, chronic kidney disease, chronic obstructive pulmonary disease, chronic pain, contraceptive practice, coronary artery disease, diabetes, heart failure, hepatitis C, HIV/AIDS, hypertension, low back pain, sickle cell disease
Behavioral Health	Acute and post-traumatic stress disorders, attention-deficit disorder, alcohol use, bipolar disorder, trauma, disruptive behavior, eating disorders, major depressive disorder, obsessive-compulsive disorder, general anxiety disorder and panic, schizophrenia, substance use disorders, and suicidal behaviors
Preventive Health	U.S. Preventive Services Task Force A and B recommendations, vaccine recommendations, pediatric periodicity schedule, vaccines for pregnant women

Developing and Disseminating CPGs (2.10.11.5.1)

Aetna uses national policies and processes for adopting and updating CPGs and preventive health guidelines from recognized sources and in compliance with **42 CFR 438.236** and NCQA standards. We collaborate with LDH, other Louisiana MCOs, and providers to select physical, behavioral, and

preventive CPGs to be used across the system to decrease provider administrative burden in compliance with **Model Contract Section 2.12.1.4**. Our quality management coordinator brings all guidelines to our QM/UM committee for review, input, and adoption. Modifications to the guidelines are made by consensus with each CPG being formally approved by our QMOC.

We support **widespread dissemination of CPGs to our providers** through our website, web portal, provider manual, onsite visits, trainings, newsletter, and fax blasts. Providers receive a customized orientation within 30 days of the provider's effective date with the plan with ongoing training on best practices and CPGs. Our Provider Services liaisons conduct onsite education, including hand-delivering of select CPGs. From October 2018 through January 2019, our Provider Services liaisons and ADHD PIP project manager provided education and supplied the ADHD CPG toolkit to 352 targeted providers throughout all 9 regions. We emailed the availability of guidelines to all providers and will continue to outreach until we reach a closure rate of 100 percent. Our CPGs are available to our **enrollees** at any time through our website; we regularly analyze the web traffic data to make certain they are beings accessed. We recognize CPGs are written in academic, scientific language that may not be easily understood. We take the key messages out of the CPG (e.g., screening schedules, symptoms, and treatment options) and push them out through our mobile app, handbook, newsletter, on CVS Health pharmacy bag messaging, and through texts from Aetna. We have staff available to provide explanation to the enrollee in a culturally and linguistically appropriate manner.

Incorporating Evidence and Opinions into CPGs (2.10.11.5.2)

We select nationally recognized CPGs based on scientific evidence, national standards, and expert consensus. We encourage provider and enrollee participation in the selection and adoption of the CPGs through our QM/UM and QMOC committees, as well as through our regular regional Joint Operating Committees. If we do not have a corresponding specialist to the topic within our network, we obtain the opinion of an expert out of network. We make modifications to the guidelines to incorporate input from providers and enrollees as approved through QM/UM and QMOC.

Evaluation of Adherence to CPGs (2.10.11.5.3)

We check adherence to CPGs through corresponding clinical indicators and performance measures to examine enrollee behavior and provider habits for acute and chronic conditions, including but not limited to comprehensive diabetes care, COPD pharmacotherapy management and admission rates, well-child visits, attention-deficit disorder medication management, and prenatal and postpartum care. While many MCOs conduct remote desktop reviews of medical records to assess adherence to CPGs, Aetna has committed to completing **onsite medical record reviews** as an intervention to facilitate immediate feedback and education to support provider adherence. Through our VBP program, we offer multiple models for providers to earn financial incentives as well as non-financial incentives for adherence, including our tiered preferred provider performance program as well as free point-of-care kits for HIV and A1C testing and aid in obtaining Clinical Laboratory Improvement Amendments certification, if the practice is not currently certified.

Updating and Revising CPGs (2.10.11.5.4)

We review research annually and ongoing for changes to CPGs to ensure consistency with current medical practice standards. When a revision is needed, we work with LDH, MCOs, and providers across all nine regions to review, approve, and adopt the CPG. All CPGs are approved by our QM/UM and QMOC committees no less than every two years or as often as new information is available.

Quality Response Template (2.10.11.6)

Aetna has submitted the completed Quality Response Template for our NCQA Health Insurance Plan Ratings (2018-2019) for all of our Medicaid managed care contracts with full NCQA accreditation in **Attachment E.**

2.10.12 Value-Based Payment

Building partnerships between Aetna and Louisiana community-based organizations is a fundamental objective of promoting physical activity and improved nutrition to create healthier cities. Aetna participates in festivals to promote health screenings as part of community prevention programs, and the integration of health components into cultural events and activities.

2.10.12 Value-Based Payment

Aetna acknowledges, understands, and will comply with all the requirements of the RFP and the **Model Contract**.

Value-Based Payment (2.10.12)

Aetna is the leader in implementing value-based payment (VBP) arrangements that provide better health, better care, and lower costs among all Medicaid plans in Louisiana despite our overall higher risk population. The *2017 Healthy Louisiana Value-based Report* showed our VBP spend at 34 percent of provider payments compared to the statewide Medicaid health plan weighted average of just 16 percent. We do not rest on our laurels; Aetna has further increased the percent of provider payments tied to VBP to 51 percent in 2018. **Currently, 76 percent of Aetna Louisiana enrollees are served by a value-based primary care provider (PCP) and 85 percent of Aetna-contracted PCPs are participating in a VBP program.**

Aetna Meets and Exceeds LDH's VBP Goals

As of January 1, 2019, Aetna already meets several of LDH's VBP thresholds for managed care organizations (MCOs). We already exceed Contract Year 3 (2022) thresholds for the percent of provider payments and total amount of potential incentive payments made through VBP arrangements.

National VBP Expertise Informs Louisiana Efforts and Success

The Aetna enterprise has developed over 1,900 VBP arrangements including 350 arrangements with accountable care organizations (ACOs) and over 7 million enrollees in various VBP arrangements across all lines of business. Through **Aetna Better Value**, our Medicaid suite of VBP solutions, our VBP strategy supports delivery system reform and practice transformation. **Aetna Better Value** currently has over 10,000 individual providers and over 550,000 enrollees across the country participating in multiple Health Care Payment-Learning Action Network (HCP-LAN) alternative payment method (APM) categories. Aetna has been highly successful building on a national record of success in payment reform. As providers evolve along the HCP-LAN APM continuum, we link more provider payments and incentives to value and realize improved quality, reduced costs, and increased enrollee satisfaction and engagement. We also leverage our national and Louisiana commercial and Medicare enrollment to encourage providers delivering care to all product lines to accept VBP arrangements.

VBP Strategic Plan and Goals over the Life of the Contract

Aetna's goals over the life of the contract are as identified in **Table 2.10.12-1** and align with the **Model Contract Section 2.17.2**. These goals list by contract year our projected total percent of provider payments, projected provider incentive payments, number of anticipated implemented ACO arrangements, and the accompanying enrollee participation rates with the assigned PCP and supported specialized behavioral health enrollees.

Louisiana Strategic Plan Initiatives: Aetna's mission to build a healthier world centers on our commitment to transforming the health care delivery system through analytics, payment reform, and provider support. Aetna continues to construct and implement flexible, unique, and innovative VBP arrangements supporting our strategic plan and our goals over the life of the new contract to achieve the Triple Aim. Additionally, these VBP arrangements align with the goals and objectives of LDH, as we seek to maximize enrollee health, advance health equity, and address social determinants of health (SDOH), while supporting innovation and a culture of continuous quality improvement.

Table 2.10.12-1: Aetna's Goals by Contract Year for Incentive Payments, ACOs, and Enrollee Assignment

Contract Year	% of Total Provider Payments	Projected Provider Incentive Payments[1]	Number of Implemented ACOs	PCP Assignment/Behavioral Health-supported Enrollees Participation Rate
2019	51%	$2,801,601	0	76%
2020	60%	$9,542,657	1	80%
2021	70%	$10,974,056	2	85%
2022	75%	$12,620,164	3	90%

Building on our approved State Fiscal Year 2019 VBP Strategic Plan for the next contracting period, we will do the following:

- Evolve and expand APMs and arrangements focused on specialty provider types to include all HCP-LAN APM categories
- Enhance region- and provider-specific APMs and arrangement approaches based on the community's health care needs and provider capabilities
- Facilitate rural provider participation in APMs
- Target under-performing providers for improvement of population health through practice transformation and VBP arrangements
- Introduce VBP arrangements that advance and integrate behavioral health, SDOH, populations with special needs, and maternal health
- Develop and implement ACO arrangements that meet **Section 2.17.14 of the Model Contract**[2] requirements
- Promote provider input in APM design
- Collaborate with LDH on the development of other payer approaches to optimize provider success in VBP arrangements
- Improve our administrative and clinical outcome measures
- Provide tailored support, including but not limited to data exchange, collaboration on closing care gaps, and timely reporting to successfully impact delivery system reform

> *"Aetna has been a committed and innovative partner in working with St. Martin Hospital to develop a value-based approach to further advance the hospital's efforts to ensure enrollees in our community are seeking care in the most appropriate setting."*
>
> **—Karen Wyble**
> **CEO, St. Martin Hospital**

Aetna's VBP Approach

Our VBP arrangements are data-driven, based upon improvement opportunities via an analysis of claims, quality outcomes, SDOH, public health, and disparities data for each provider and model type. These VBP arrangements align with the HCP-LAN APM framework of 2(a), 2(b), 2(c), 3, and 4 with direct linkage to the provider-specific and applicable quality performance measures from **Attachment G of the Model Contract**. Aetna's VBP approach for various provider types includes primary care and specialty care (including behavioral health and hospital-based care) and expands into other treatment venues, such as community mental health centers, federally qualified health centers (FQHCs), rural health clinics, and non-traditional providers. Our unique approach with these providers increases improvement in the health of Louisianans through innovative, whole-person care and well-coordinated systems of care addressing

[1] Our projected provider incentive payments show a significant increase between 2019 and 2020 in **Table 2.10.12-1** in **Section 2.10.12**, due to the increase in enrollees from our current enrollment of 120,000 to the proposal enrollment of 375,000.
[2] We have letters of intent for an ACO model with Franciscan Missionaries of Our Lady Health System's Health Leaders Network and Aledade, currently representing 7,100 enrollees and expecting to grow to at least 22,500 enrollees based upon 375,000 enrollees with implementation by 2021.

medical and non-medical drivers of health. For example, in 2019 we developed a VBP arrangement called the Community Care program with Ready Responders, a community-based organization providing in-home education to enrollees with high utilization of the emergency department (ED). Education of these enrollees includes appropriate use of the ED, helping them manage any chronic conditions at home, close gaps in care, and assess their SDOH conditions that contribute to potentially preventable ED visits. Ready Responders' VBP arrangement (3B) includes downside risk for their fee-for-service reimbursement if they are unsuccessful in meeting the VBP performance targets. Another example of an innovative VBP arrangement is our planned initiative with Schumacher Clinical Partners, an ED group with a post-acute services program. The post-acute services program seeks to reduce repeat ED utilizers of potentially preventable ED visits, facilitate follow-up care to the enrollee's PCP, and identify SDOH that may trigger these potentially preventable ED visits. As a final example, we have a letter of intent with Woman's Hospital in Baton Rouge to develop a VBP arrangement focused on maternal health with incentive-based quality measures of elective or early induction delivery without medical indication, cesarean rate for low-risk first-birth mothers, and percentage of low birthweight births.

We have collaborated with the provider community to advance LDH's vision for better health, better care, and lower cost with a focus on rural hospital engagement in a VBP approach. As an example, we address potentially preventable ED visits through an ED diversion program with St. Martin Hospital with support from health information technology to advance health equity and address SDOHs.

Aetna Better Value's Specific Models, VBP Arrangements, and Expected Impacts

Aetna Better Value's VBP arrangements are custom-designed and align financial incentives with improved quality, cost, utilization, and outcomes through shared financial accountability. In alignment with our strategic plan, the following list in **Table 2.10.12-2** provides a comprehensive description of the specific types of VBP arrangements and their associated HCP-LAN APM category Aetna has and will utilize throughout the contract term.

Table 2.10.12-2: Aetna Better Value VBP Programs

VBP Program/APMs	Description	Measure Goals	Status
CMS Comprehensive Primary Care+ Program—Primary Care Providers—Patient-Centered Medical Home (PCMH) (2A)/Shared Savings (2C)	Providers receive an enhanced care coordination fee to assist with practice transformation in providing care in a payer agnostic manner. Providers also may receive a share of savings for any demonstrated reduction in historical cost and utilization.	HEDIS 50th Percentile	Currently implemented
Patient-Centered Medical Home (2A/2C)	PCPs receive a monthly care coordination fee (annually adjusted based on performance) for the practice's assigned enrollee panel to invest in infrastructure and care coordination. The practice is evaluated on five mutually agreed upon quality/utilization measures.	HEDIS 50th Percentile	Currently implemented
Virtual ACO (2A, 2C, 3A, 3B, and 4)	VBP arrangements within an Aetna-administered ACO designed to assist unaffiliated small and rural providers that provide care to the same cohort of enrollees to participate in APMs.	Medical Loss Ratio and/or HEDIS 50th Percentile	1st Quarter 2020
Social Determinants of Health Incentive Program (2B)	Community-based organizations and PCPs that report their enrollees' SDOH using billing the Z-codes receive quarterly incentive payments. The initial program focus is on homeless enrollees and women with high-risk pregnancies.	Z-codes used for over 50% of enrollees	3rd Quarter 2019

VBP Program/APMs	Description	Measure Goals	Status
Acute Hospitals P4Q Program—P4P (2C)	Providers may receive an incentive payment equal to a percentage of their previous year's claim spend based on performance in utilization and/or quality measures targets.	HEDIS 50th Percentile	Currently implemented
Behavioral Health (BH) Hospital P4Q Program—P4P (2C)	Providers may earn an incentive payment equal to a percentage of their previous years' claim spend based on performance in utilization and/or quality measures targets	HEDIS 50th Percentile	Currently implemented
Behavioral Health Outpatient Clinic P4Q Program—P4P (2C)	Providers may earn an incentive per behavioral health gap in care closed by the provider and improving their attributed population's historical utilization rate.	HEDIS 50th Percentile	Currently implemented
OB/GYN P4Q Program—Pay for Performance (2C)	Providers may earn incentive payments per maternity care closed gaps in care, by improving upon their previous C-section rate, and other maternity-related quality measures.	HEDIS 50th Percentile	3rd Quarter 2019
Primary Care Providers Pay for Quality (P4Q) Program—Pay for Performance (P4P) (2C)	Providers may earn an annual incentive for the provider's performance on select utilization and quality.	HEDIS 50th Percentile	Currently implemented
School-based Health Center P4Q Program—P4P (2C)	Providers may earn incentive payments per wellness screening closed by the provider.	HEDIS 50th Percentile	3rd Quarter 2019
Urgent Care Quality Program—P4P (2C)	Urgent care providers may earn incentive payments for closing wellness gaps in care and successfully coordinates follow-up care while the enrollees have an urgent care visit.	HEDIS 50th Percentile	2nd Quarter 2019
Shared Savings—Primary Care Providers—(3A)	Providers receive a financial budget to manage their attributed enrollee's health care cost below a medical benefit ratio or per member per month (PMPM) total cost of care target. If the provider's medical expenses are below the specified target, then the provider is eligible to receive a share of the surplus achieved for each quality performance target met.	Medical benefit ratio target or historical PMPM cost of care target and HEDIS 50th percentile	Currently implemented
In-home ED Diversion Performance-based Incentive—Community Paramedicine Providers—Shared Savings (3B**)**	Participating providers deliver in-home care and disease management services to referred Aetna enrollees who are frequent ED utilizers. Providers may earn incentive payments if they demonstrate improved ED rates.	Improved ED rate per 1,000 enrollees	Currently implemented
Physical Health (PH)/BH Integration Program—Primary Care Providers and Behavioral Health Professionals—Population-based-Payment Model (4A)	Providers with both BH and PH co-located providers receive a monthly capitation payment reflecting the PMPM cost for providing services related to treatment of dual-diagnosed enrollees with a specified chronic medical diagnosis (e.g., diabetes, hypertension) and behavioral health diagnosis (e.g., anxiety, depression, substance abuse disorder).	Performance targets on quality and utilization measures	1st Quarter 2020

Table 2.10.12-3 illustrates (from 2017 through 2019 YTD) that we have increased the number and types of VBP arrangements by HCP-LAN APM. This occurred as providers advance through the HCP-LAN APM continuum from our entry-level pay-for-quality program to more advanced HCP-LAN APMs. With several years' experience in adopting APMs across 16 states, we are fully committed to the APM framework and LDH's vision of the advancement of and comprehensive quality improvement. Aetna expanded PCMH arrangements in Louisiana from zero to 19 from 2017 to 2019.

Table 2.10.12-3: Aetna's 2017-2019 VBP Arrangements in Louisiana

Programs (APM)	2017	2018	2019	PCP Count	Enrollment Assigned	% Provider Payments (Jan–Sept 2018)
PCMH (2A, 2C)	0	13	19	245	5,305	1.16%
Pay-for-Quality (PCP) (2C)	839	820	813	1,081	49,074	18.09%
Pay-for-Quality (Acute Hosp.) (2C)	0	1	2	N/A	N/A	1.13%

Plan					118,504	100%
Percentage				85%	76%	

Aetna is in discussion with many providers in each region across Louisiana to bolster participation in VBP arrangements. We identify providers for potential VBP arrangements based upon their historical quality and cost performance, provider payment volume, enrollment panel size, region, and their unique value of services they provide to our enrollees. **Table 2.10.12-4** summarizes, by region, some of the providers with which we are exploring potential APMs and the associated HCP-LAN APM category. We will emphasize adding hospitals, obstetrics and gynecology (OB/GYNs), behavioral health, and non-traditional providers such as nursing facilities, home- and community-based providers, tribal providers, and transportation and housing providers. Our VBP Strategic Plan ensures that we will continue to be the leader in delivering value-based care in Louisiana.

Table 2.10.12-4: Aetna's Targeted 2019 and 2020 New VBP Arrangements

Region	Provider	HCP-LAN APM Category	HCP-LAN APM Category
Statewide	Aledade ACO	Shared Savings/PCMH	3A
Statewide	Hulin Health Urgent Care	Urgent Care Quality Incentive Program	2C
Statewide	Louisiana Breast and Cervical Cancer	SDOH Incentive Program	2B
1	Pediatric Clinic Westbank	PCMH	2A/2C
1	Kinsley House	SDOH Incentive Program	2B
1	Crescent City Physicians	CPC+	3A
1	Louisiana Children's Medical Center	Shared Savings/PCMH	3A
2	Mays Clinic	PCMH	2A/2C
2	Patient Plus Urgent Care	Urgent Care Quality Incentive Program	2C
2	Health Centers in Schools	SBHC P4Q	2C
2	Health Leaders Network CIN/ACO	Shared Savings/PCMH	3A

Region	Provider	HCP-LAN APM Category	HCP-LAN APM Category
3	Family Medicine Clinic of Reserve	PCMH	2A/2C
3	Louisiana Physicians ACO	Shared Savings	3A
4	Abbeville General Hospital	PCMH/Acute Hospital P4Q	2A/2C
4	Acadiana Practitioners	PCMH	2A/2C
4	Women's Clinic of Acadiana	OB/GYN P4Q	2C
5	Lake Charles Memorial Hospital	PCMH/Acute Hospital P4Q	2A/2C
5	West Calcasieu Cameron Hospital	Acute Hospital P4Q/ED Diversion P4Q	2C
6	Rapides Medical Center/Group	Acute Hospital P4Q/ Shared Savings	2C/3A
7	Bossier Family Medical Clinic	PCMH	2A/2C
7	North Caddo Medical Center	PCMH/Acute Hospital P4Q	2A/2C
7	Natchitoches Regional Medical Center	Acute Hospital P4Q/ED Diversion P4Q	2C
7	Pediatric Providers of Louisiana	PCMH	2A/2C
7	CHRISTUS Physician Group	Shared Savings/PCMH	3A
8	Internal Medicine of the Twin Cities	PCMH	2A/2C
8	Rehabilitation Services of Louisiana	PH/BH Integration Program	4A
9	North Oaks and North Oaks Medical Group	Shared Savings	3A

Solutions for Rural Providers

Aetna engages providers across the care and geographical spectrum, including those in rural areas with processes to assure equity in VBP programming. Our strategy provides incentives to our providers with various Healthcare Effectiveness Data and Information Set (HEDIS) and non-HEDIS measures, tailored to the enrollee population and in alignment with **Attachment G of the Model Contract**. This helps us accurately evaluate differences in rural and urban provider adoption of VBP. For example, we monitor and compare VBP adoption in rural areas versus urban areas.

The VBP team will approach small PCPs in rural areas to encourage enrollee care coordination and aggregation of enrollee data with other specialists and hospitals. The VBP team invites them to participate in a **Virtual ACO** with support from Aetna's electronic population health management and analytics platforms. Payments received from participation in the VBP arrangements within the Virtual ACO assist providers to build their internal information technology infrastructure or improve functionality of their electronic health record (EHR) and care coordination capacity.

It is important to engage rural non-traditional providers in VBP arrangements—those providers beyond primary care, such as nursing facilities, home- and community-based providers, tribal providers, and transportation and housing providers. These provider discussions help us understand their unique capabilities and challenges to shape VBP arrangements creating flexible, customized solutions.

Impact of APMs on Potential Incentive Earnings

For both 2016 and 2017, we made provider payouts and anticipate paying out additional incentives for 2018 and 2019. We project increases in provider incentive payments as more providers engage in VBP arrangements and continue advancement in care coordination. As of January 1, 2019, Aetna already meets several of LDH's VBP goals for MCOs. For example, **we already exceed Contract Year 3 requirements for the percent of provider payments made through VBP arrangements as described**

in Section 2.17.2. As illustrated in **Table 2.10.12-5**, for contract year 2020, we project expected and maximum payment amounts that contracted and targeted providers are eligible to earn, and if applicable, the expected and maximum downside risk or penalties from the provider for each VBP arrangement.

Table 2.10.12-5: VBP Projected Provider Incentive Earnings 2020

APM Categories	Projected VBP Provider Potential Incentive Earnings during Contract Year 2020			
	Expected Incentive	Maximum Incentive	Expected Risk/Penalty	Maximum Risk/Penalty
Category 2A Models	$659,016	$868,770	$50,877	$137,754
Category 2B Models	$1,084,702	$1,643,487	N/A	N/A
Category 2C Models	$1,631,990	$3,549,054	N/A	N/A
Category 3A/3B Models	$4,490,699	$9,904,805	$388,536	$777,072
Category 4 Models	$1,676,250	$1,760,063	$0	$83,813
Total	$9,542,657	$17,726,179	$439,413	$998,639
Plan Projected Enrollment	375,000			

Quantitative, Measurable, Clinical Outcomes Sought (2.10.12.2)

While the **Aetna Better Value VBP arrangements** may vary as to the degree of financial risk assumed, each of the models include quality, utilization, and clinical outcome measures tied to provider payments and include several measures aligned with LDH's goals. We tailor these measures to primary care, specialty care, hospital-based, and non-traditional provider types. Through our collaborative VBP approach with providers, we select relevant outcome measures that align with the practice's goals and set achievable targets to maximize program success.

Creating Measurable VBP Results

Aetna uses the following quality, cost, and utilization measures in our VBP arrangements as described in **Table 2.10.12-6.** Each current and future customized VBP arrangement as required by LDH must include a link to at least one of the 61 LDH incentive measures identified in **Attachment G**. As the program matures, the targets are reset to align financial incentives and accountability with continuous improvement. In addition, Aetna will collaborate with LDH and seek approval to identify and implement VBP arrangements with measures that are not LDH quality performance measures to achieve similar Triple Aim results prior to implementing.

Table 2.10.12-6: Quality/Utilization/Cost Measures and Benchmarks for VBP Arrangements

Quality/Cost Measure	LDH Quality Performance Measures	Target	VBP Arrangements
Adolescent Well Care Well Child Visits in the 3rd, 4th, 5th and 6th Years of Life, Well Child Visits in the First 15 Months of Life, including Immunization Status	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, P4Q, SBHC P4Q, CPC+, Urgent Care Quality Program
Postpartum Care, Timeliness of Prenatal Care, Elective Delivery Rate, and Initiation of Injectable Progesterone for Preterm Births, Cervical Cancer Screening	Yes	HEDIS 50th Percentile	OB/GYN P4Q

Quality/Cost Measure	LDH Quality Performance Measures	Target	VBP Arrangements
Colorectal Cancer Screening	Yes	HEDIS 50th Percentile	PCMH, P4Q, CPC+, Shared Savings
Initiation and Engagement of Alcohol and Other Drug Abuse or Dependence Treatment	Yes	HEDIS 50th Percentile	PCMH, P4Q, CPC+, Shared Savings
Ambulatory ED Rate Per 1,000 enrollees	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, P4Q, Acute Hospital P4Q, In-home ED Diversion
Comprehensive Diabetes Care-HbA1c Control < 8.0	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, P4Q, BH/PH Integration
Counseling for Nutrition & Physical Activity	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, P4Q, SBHC P4Q, CPC+
Comprehensive Diabetes Care-**Hba1c** Testing	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, P4Q, CPC+, Urgent Care Quality Program
Breast Cancer Screening	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, OB/GYN P4Q, CPC+, Urgent Care Quality Program
Follow-up After Hospitalization for Mental Illness—Within 7 and 30 Days of Discharge (FUH)	Yes	HEDIS 50th Percentile	BH Hospital P4Q, BH Outpatient Clinic P4Q, Shared Savings, PCMH, CPC+
Plan All Cause Readmissions	Yes	HEDIS 50th Percentile	Shared Savings, Acute Hospital P4Q, CPC+
Follow-up after ED Visit for Alcohol and Other Drug Abuse or Dependence	Yes	HEDIS 50th Percentile	BH Outpatient Clinic P4Q, BH/PH Integration
Diabetes Screening for People with Schizophrenia or Bipolar Disorder who are using Antipsychotic Medications	Yes	HEDIS 50th Percentile	BH Outpatient Clinic P4Q, BH PH Integration
Cultural Competency Provider Training	No	Aetna-verified completion of provider training	Shared Savings, PCMH, CPC+
Trauma-informed Care Provider Training	No	Aetna-verified completion of provider training	Shared Savings, PCMH, OB/GYN P4Q, CPC+
Controlling High Blood Pressure	Yes	HEDIS 50th Percentile	Shared Savings, PCMH, P4Q, BH/PH Integration, CPC+
Antidepressant Medication Management	Yes	HEDIS 50th Percentile	BH/PH Integration, CPC+

Louisiana HEDIS Improvements

Aetna had 83% and, preliminarily, 71% of their HEDIS measures increase year-over-year from HEDIS 2017 to 2018 and 2018 to 2019, respectively. As an example of success within a provider group, Access Health achieved a 12% reduction in inpatient admissions, 9% improvement in the follow-up after an inpatient mental health hospital stay within 30 days, and over 8% improvement in the follow-up hospital/mental health visit with 7 days. This illustrates the true impact of our value-based payment programs.

Demonstrated VBP Results

Our VBP arrangements have the primary goal of ensuring enrollees experience better health and receive better care at a lower cost. Aetna has demonstrated results on improving readmission rate and ED visits per 1,000 enrollees as highlighted in **Table 2.10.12-7**. The providers identified below have achieved year-over-year **better care** success through participation in our shared savings program in reducing potentially preventable events (PPE) for utilization measures.

Table 2.10.12-7: Admissions, Readmission Rates, and ED Visits for Shared Savings Providers, 2015-2018

Provider	Admits/1000			Readmission Percent			ED Visits/1000		
	2015	2018	% Change	2015	2018	% Change	2015	2018	% Change
St. Thomas Community Health Center	46.1	16.2	-64.8%	27.3%	20.0%	-26.7%	193.5	79.4	-59.0%
Provider HealthLink	31.6	15.7	-50.3%	50.0%	12.9%	-74.2%	120.3	92.0	-23.5%
Access Health	23.3	14	-39.9%	15.5%	12.2%	-21.1%	100.8	79.0	-21.7%

Improvements in HEDIS measures from 2017 to 2018 show the impact VBP provider incentives, collaboration with our population health specialists, and reporting have had resulting in improved quality performance for **better health** as illustrated within the Reddy Family Medical practice, as shown in **Table 2.10.12-8**.

Table 2.10.12-8: Reddy Family Medical Clinic Performance

Measure Name	2017 Rate	HEDIS Target	2018 Rate	HEDIS Target
Adult BMI	85%	84.54%	100%	86.24%
Adolescent Well Care	0%	48.41%	40%	50.12%
Cervical Cancer Screening	41%	55.94%	64%	58.48%
Diabetes Care A1C testing	87%	87.83%	100%	87.10%
Diabetes Care Nephropathy Monitoring	93%	90.51%	90%	90.27%

Finally, Aetna's value-based providers have had success with lowering the **total cost of care** for their population. For example, in 2017, our Louisiana provider partners in shared savings VBP arrangements, representing 15 percent of the total plan's enrollment, had an overall 33 percent lower PMPM cost of care than the overall health plan's enrollment. These same provider partners' high-risk enrollees, representing 22 percent of the total plan's high-risk enrollees, had a 12 percent lower PMPM cost of care than the overall health plan's high-risk enrollees. These examples confirm our ability to achieve the Triple Aim of better care, better health, and lower costs through VBP arrangements with our provider partners.

Expansion of VBP Arrangements within First Three Years of Contract (2.10.12.3)

Aetna already exceeds LDH's projected 2022 requirements for the percent of provider payments and total amount of potential provider incentive payments through VBP arrangements. In accordance with our strategic plan and continuing our high rate of VBP enrollee participation, we focus on expanding VBP arrangements along the HCP-LAN APM continuum and to new provider types. We work to advance providers toward VBP arrangements that emphasize quality improvement, incorporate upside shared savings payments, downside risk, and condition-specific population-based payments.

To assess a provider's VBP arrangement readiness or move to more advanced APMs, we use the **Aetna Better Value Provider Readiness Survey.** This comprehensive questionnaire helps to determine

collaboratively the provider's VBP arrangement path. This proprietary tool leverages extensive research on which capabilities a provider requires to promote VBP success. The tool consists of 20 questions and is the first step in creating a relationship between Aetna and providers to assess their current capabilities. During face-to-face readiness survey completion, this tool promotes dialogue, as opposed to simply completing and returning a survey without interaction. It captures details such as technological capabilities, whether there is a physician champion, care manager involvement, and innovative payment experience. This tool guides providers on their journey to value while prioritizing quality of care.

Collaborating with Providers in VBP Arrangement Design

In compliance with all **Model Contract** requirements, our strategic plan details our outreach and engagement efforts with providers over the contract period. We highlight our plan to engage rural and urban, as well as large and small providers across Louisiana.

Aetna solicits information from providers participating in VBP to learn about their experiences and gather insight on how to improve our VBP programming through the following efforts:

- **Value-based Hospital and Provider Advisory Committees:** The committee consists of at least one administrative and clinical lead from our VBP provider networks. This group meets biannually along with plan leadership to give insight on existing program design and provide recommendations to the plan evolving our value-based program design and strategy.
- **Joint Operating Committee (JOC):** During multidisciplinary JOC meetings, we receive recommendations from providers on enhancing VBP reporting that drive improvements through additional specificity.
- **Quality Management Operating Committee:** The committee's primary purpose is to integrate quality management and performance improvement activities throughout the health plan and provider network; provide Quality Assessment Performance Improvement program executive oversight; and make recommendations to the board of directors.
- **Annual value-based partner forums:** The annual value-based quality forum will be an opportunity to discuss the health plan quality strategy with our value-based clinical leaders, conduct quality improvement panel discussions, and highlight and award quality performance achievement among the value-based provider system.

Leveraging Aetna's VBP team, we advance providers along the HCP-LAN APM continuum. This team collaborates directly with physicians and their staff to identify providers who are more likely to advance along the HCP-LAN APM continuum and show expertise to move to more advanced payment models, such as upside gainsharing with downside risk (HCP-LAN APM category 3B) and population-based payment (HCP-LAN APM category 4). Offering their expertise and background, the VBP team lends valuable technical assistance hand-in-hand, making real impact on the daily practice of care.

As an example of our interaction with specific providers in our expansion efforts, in 2019 we have secured a letter of intent with a clinically integrated ACO, Health Leaders Network (HLN). HLN represents a statewide collaboration of 850 independent and employed providers of Franciscan Missionaries of Our Lady Health System, focused on providing the communities they serve with high-quality and efficient health care. HLN's ACO network has participated in the Centers for Medicare & Medicaid Services (CMS) Medicare shared savings program and next-generation ACO model. Our intention is to contract with them as an ACO for 2020 in accordance with the **Model Contract 2.17.14**.

Timeline of VBP Advancement along the HCP-LAN APM Continuum

We emphasize moving providers toward HCP-LAN APM Categories 3 and 4, as illustrated in **Figure 2.10.12-1**, which include condition-specific population-based payments, upside gainsharing, upside gainsharing with downside risk, and other incentives. For example, Aetna increased its year-over-year

2017 to 2018 enrollment assigned and PCPs participating to the HCP-LAN APM Category 3 from 13 percent to 29 percent.

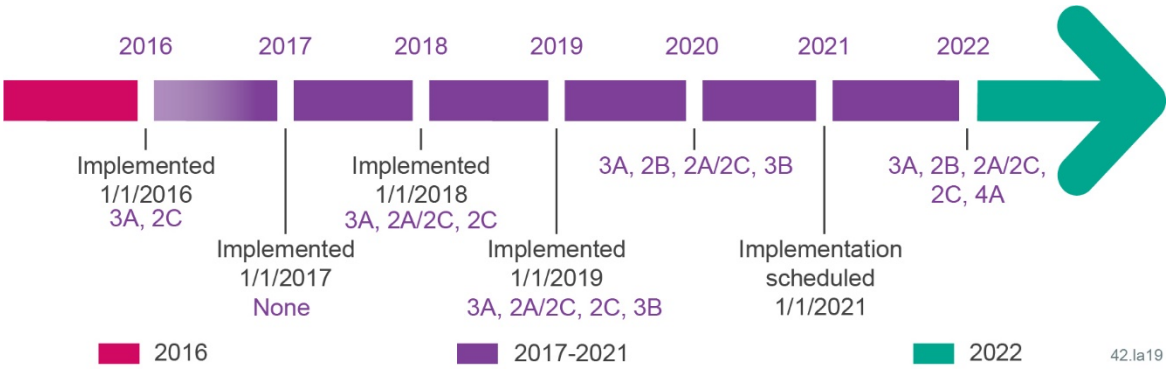

Figure 2.10.12-1: VBP Implementation Timeframe

Aetna's continual advancement of VBP arrangements across the timeframe from 2016 to the present, through the new contract period of 2020- 2022 from APM category 2 though categories 3 and 4.

Evolution of Providers: HCP-LAN APM Continuum

Aetna continuously seeks to engage new providers in VBP arrangements and advance those already participating within the APM framework with the goal of advancing to full-risk arrangements. **Table 2.10.12-9** demonstrates our proposed timeline for supporting the Louisiana PCPs and PCMHs currently in our VBP program toward more advanced APMs that include up to downside risk. We assess the ability to move along the continuum on the providers' enrollment panel size, the provider's historical success in their existing APMs, and resources and infrastructure in place to support advancement along the APM continuum in addition to criteria identified in the Aetna Provider Readiness Survey. For example, if a provider is not ready to undertake the next level of value-based arrangements, we assist them to close gaps in care with improved quality or assisting with enhancing their infrastructure through continuous care coordination infrastructure payments.

Table 2.10.12-9: Projected Timeframe for Movement along the APM Continuum with Louisiana PCPs/PCMHs

Provider	VBP Effective Date	Current HCP-LAN APM Category	2020 HCP-LAN APM Category	2021 HCP-LAN APM Category	2022 HCP-LAN APM Category
Access Health	1/1/2016	3A-Shared Savings	3A-Shared Savings	↑3B-Shared Risk	3B-Shared Risk

South Louisiana Medical Associates	1/1/2018	2A/2C-PCMH-P4Q	↑3A-Shared Savings	3A-Shared Savings	3A-Shared Savings
Willis-Knighton Physician Network	1/1/2018	3A-Shared Savings	↑3B-Shared Savings	↑3B-Shared Risk	3B-Shared Risk

We have developed strong relationships and built trust with our current provider partners and our contracts focus on responsibly increasing levels of risk as providers move along the APM continuum to categories 3 and 4 in a manageable timeframe. Our approach allows providers to decide what models are right for them and within the appropriate timeframe.

Based upon our experience, it can be challenging for providers to move to advanced APMs that include downside financial risk. Fifteen percent of our HCP-LAN APM Category 2 and 3 providers are FQHCs and are limited to the amount and type of downside risk they can accept. Our population health model addresses these concerns focusing on practice and delivery system transformation with a clinically integrated approach ensuring provider success with advanced payment models. In addition, we will add our Medicare and commercial enrollment to the VBP arrangements enabling providers to pool risk across a patient panel representing multiple populations rather than the singular Medicaid population. By creating a value-based ecosystem that includes all types of providers, Aetna partners with providers to start them in the most appropriate VBP arrangement and support them to move along the risk continuum in a responsible, timely, and quality-focused manner.

Supporting Providers in Delivery System Reform (2.10.12.4)

Aetna's VBP arrangements are the first step in driving successful delivery system reform. With our robust provider support, reporting tools, technical assistance, and data support including our electronic population health platform and data exchanges, we assist providers in improving health outcomes at the point of care and achieving system delivery reform. Our approach leverages strong payer-provider relationships built on trust and transparency supported by data, reporting, and connectivity—creating a valued partnership to advance delivery system reform.

Provider Support in System Delivery Reform

Through our robust provider support model, led by an assigned population health specialist, the Aetna VBP team assists providers in the pursuit of the Triple Aim of achieving better care, better health, and lower costs through shared savings arrangements. **We are the only Louisiana MCO assigning population health specialists (PHSs) to specific providers that focus on practice transformation.** Specifically**,** the VBP team assists providers in overall population health management, including providing a minimum of monthly reviews on all performance trends including total cost, quality, and utilization with guidance on actions to achieve targets, and supporting advanced care coordination. Through the provision of standard reports transmitted at least monthly, access to the electronic population health management (PHM) platform with near-real time enrollee utilization information, and direct claims data feeds into provider PHM systems, Aetna supports providers in transforming and improving care delivery with a 360-degree view of the enrollee's health activity. Aetna's VBP team engages providers with staff from the following departments to further assist the provider in system delivery reform:

- Population Health Management (including Louisiana-based population health specialists and community outreach coordinators)
- Provider Services, Care Management, Quality Management, Network Management, and Claims Management

"When comparing MCO platforms, Aetna's PHM platform stands out as one that is user-friendly…but provides great ability to identify and manage care gaps and high-risk enrollees and monitor group performance in improving the health of our patients."

—Ann Kay Logarbo, CMO, Children's International Medical Group

Our VBP team collaborated with and supported Franciscan Missionaries of Our Lady Health System in identifying enrollees who were frequent utilizers of the ED and had potentially preventable visits. The collaboration identified frequent utilizers, potentially preventable visits, and more appropriate venues of care over the course of a year, resulting in a 24 percent reduction in the ambulatory ED visits per 1,000 enrollee rate. We have also worked with Ready Responders using innovative interventions to reduce PPEs and low-value care, including reduced inpatient hospital readmissions, ED usage, and screening for cervical cancer. These are examples of how we assist providers in successful delivery system reform, including closing gaps in care and assessing and improving SDOH and health equity disparities.

Additionally, integrating behavioral and physical health within a VBP arrangement provides for movement toward successful delivery system reform. This includes appropriate placement post-hospital discharge and increasing co-located providers within our network. Our VBP team collaborates with providers to access, understand, and use data from a variety of reports and via Aetna's electronic PHM platform. Our data reports provide detail regarding our enrollee's medical, behavioral, functional, and social needs that assist in the advancement of delivery system reform. We integrate with providers and all components of the delivery system to assure achievement of reform.

Aetna Better Value Reporting

Table 2.10.12-10 describes standard performance reports Aetna distributes to providers in VBP arrangements to help identify quality, utilization, and cost trends and opportunities. For those providers who utilize their own population health platform, Aetna is willing to provide a data exchange of claims information to import into their platform. We have set up File Transfer Protocol sites to transfer files securely for providers in several states under full-risk agreements supporting them in gaining full reporting of claims data to allow for their own analytics to identify quality, utilization, site of service, and cost opportunities to achieve delivery system reform.

Table 2.10.12-10: Standard Reports Aetna Shares with VBP Providers

Report	Purpose	Aetna VBP Programs	Frequency
Quality	Insights on performance at the organizational, group, and individual provider level on enrollee-level gaps in care on HEDIS quality measures	P4Q, PCMH, Shared Savings	Monthly
Key Performance Indicator	Insights on performance at the organizational, group, and individual provider level on key utilization measures (ED visits, admissions, readmissions, and generic dispense rate) among their assigned enrollee panel	PCMH, Shared Savings	Monthly
Financial	Insights on performance at the organizational, group, and practitioner level on the medical benefit ratio among their assigned enrollee panel	Shared Savings	Quarterly

Through robust reporting and analytics, we measure providers' performance to make sure they are successful in meeting quality, utilization, satisfaction, and cost targets as they progress through the APM continuum and achieve delivery system reform. As providers succeed within their current APM, we

evaluate their capabilities to determine whether they exhibit readiness to assume additional risk, particularly as they become more capable and successful with a population-health reimbursement approach. For providers in a VBP program at level two of the HCP-LAN APM continuum, such as pay-for-quality, the Louisiana-based VBP director, along with Network, Quality, and PHSs, performs an annual determination of provider readiness to move to the next APM level. Movement along the APM continuum further enhances the VBP arrangements to influence delivery system reform.

Technical Assistance and Data Supporting System Delivery Reform

An example of how we assist providers in continuous process improvement and support is through our current Louisiana participation in the advancement of the CMS Comprehensive Primary Care Plus model—a national advanced primary care medical home model that strengthens primary care through regionally based multi-payer payment reform and care delivery transformation. Through collaborative multi-payer technical assistance, population health data access, and reporting, we help providers enhance services for enrollees in a payer agnostic manner. As an example, Aetna is collaboratively working other regional CPC+ payers to align performance measures in VBP programs to shared providers and develop provider-specific reporting inclusive of all payers. Through this initiative and others, we strengthen primary care by advancing EHR adoption and improved HEDIS performance outcomes.

Types of Technical Assistance

Types of technical assistance given include strategies for approaching performance measure improvement, education on HEDIS technical specifications for coding, closing gaps in care, and the use of our PHM platform. Technical assistance also includes supplemental data feeds to ensure upload to their data warehouse for calculation of HEDIS rates. Those that need ad hoc assistance can contact PHSs through secure messaging or can receive technical assistance 24/7/365 through our PHM platform.

Data Access through Population Health Platforms

Aetna's PHM platform provides a comprehensive tool to assist providers managing a VBP arrangement. The platform, shown in **(Figure 2.10.12-2)**, provides a single data-sharing tool empowering provider partners with near real-time access to complete enrollee profiles, fostering collaboration and quality improvement. The electronic population health management platform offers complete transparency, including the cost of care and promotes enrollee access, shared decision-making, proactive health management, coordinated care delivery, adherence to evidence-based guidelines, improved quality outcomes with an emphasis on closing gaps in care, improved operational performance, and decreased administrative burden for providers. Access to our electronic PHM platform is at no cost to the provider.

Providers who use the tool obtain data on hospital and ED admissions, readmissions, medication reconciliation, open care gaps, and care transitions. Our innovative platform includes transparency of cost of care with our providers, allowing a 360-degree view of enrollees' cost of care and care gaps. All of this creates a powerful system helping providers engage and manage their enrollees more closely without having to pay for additional resources. Our platform is available to primary care and specialty care physicians, hospitals, and facilities participating in our VBP arrangements. The platform also interfaces with Athena EMR as well as the following State health information exchanges:

- Greater New Orleans Health Information Exchange (GNOHIE)
- Louisiana Emergency Department Information Exchange (LaEDIE)
- Louisiana Health Information Exchange (LaHIE)
- Louisiana Health Information Network (LHIN)

Figure 2.10.12-2: Population Health Platform Screenshot

Aetna's electronic population health management platform provides comprehensive data and integrated tools to improve population health outcomes.

We educate and support new providers in accessing and adopting this platform. The platform offers an array of helpful, easy-to-use tools that ultimately serve as a feedback loop for the care team improving care delivery systems. All of this creates a powerful integrated system that helps providers engage and manage their patients more closely without having to pay for additional resources.

Aetna's comprehensive support for providers will lead to the achievement of better care, better health, and lower costs in alignment with our strategic plan and LDH's goals. Our comprehensive support empowers providers to transform the delivery system of care via improved population health outcomes.

Conclusion

We are committed to achieving our VBP Strategic Plan and related goals through the continued advancement of VBP arrangements by collaborating with providers to move them along the HCP-LAN APM continuum. With improvement of the quality performance measures and clinical outcomes, our enrollees achieve the Triple Aim of better care, better health, and lower costs through our support of providers aligning incentives for successful delivery system reform.

2.10.13 Claims Management and Systems and Technical Requirements

Providing health and prevention education to Louisiana communities is a top priority for Aetna. Through our partnerships and classroom curriculum, we connect students with opportunities and educational resources on health and wellness.

2.10.13 Claims Management and Systems and Technical Requirements

Aetna implemented our claims adjudication processes and other technical systems to promote LDH's objectives when we initiated the plan in 2015. Since that time, through transparent communication, responsible stewardship, and collaboration with LDH, we have operated and continuously improved our systems in alignment with LDH requirements. The Aetna Medicaid organization has over 30 years of experience managing the care of the medically vulnerable, supporting caregivers, and working closely with multiple states' departments of health and human services to achieve successful health care results and effective cost outcomes.

Aetna attests that we will adhere to all requirements of the Louisiana Medicaid Managed Care Organization related to this Request for Proposal including, but not limited, to the following:

- Model Contract Section 2.18, Claims Management
- Model Contract Section 2.19, Systems and Technical Requirements
- Model Contract Section 2.11 Provider Reimbursement and related sections of Part 4, Payment and Financial Provisions
- Louisiana Managed Care Organization Manual
- Louisiana System Companion Guide
- All applicable Louisiana State administrative rules and statutes
- All applicable federal requirements

Understanding of Rules and Statutes and Customization for Louisiana (2.10.13.1)

Aetna has been operating as a Healthy Louisiana plan since 2015 and understands all requirements of the Louisiana Medicaid program. We have customized the claims processing and encounter submission system to meet the unique requirements of LDH. This platform has the flexibility to respond quickly to the needs of LDH when off-cycle updates occur in health plan advisories, information bulletins, and ad hoc requests. We configure our systems in accordance with Louisiana fee schedules, covered services, and provider manual requirements.

Recently, the Applied Behavioral Analysis fee schedule was changed in relation to a specific population that receives careful oversight by the State due to legislative mandates. Aetna was able to facilitate this fee schedule change and have all systems updated and claims reprocessed within 15 days of the change—surpassing LDH's 45-day regulatory requirements to process changes and payment.

Our claims adjudication system properly supports and increases successful provider participation due to our ability to pay all submitted medical and pharmacy claims on a timely basis. Additionally, to avoid increased administration costs and to minimize provider burden, we bring a best-in-class claims payment process that maximizes first-pass auto-adjudication and minimizes incorrect payments or inappropriate denials. We have demonstrated strong performance for both medical and pharmacy claims in Louisiana, serving both traditional and non-traditional providers, and continue to be committed to meeting and exceeding LDH's targets for timeliness and accuracy of claims adjudication. In 2017 and 2018, Aetna paid pharmacies for prescriptions dispensed within 11 days (on average) from the date of fill, surpassing LDH's requirements of 15 days. Aetna also demonstrates strong performance with respect to medical encounter submissions. **Table 2.10.13-1** highlights these achievements.

Claims Adjudication Performance Metrics in Louisiana

- Electronic data interchange (EDI) rate (rolling 12-month): 93.9%
- Auto-adjudication rate (rolling 12-month): 92.2%
- Timeliness (new day claims 15 days) 2018 YTD: 97.39%
- Accuracy 2018 YTD: 99.47% (payment and financial)
- Denied claims average: 11%

Table 2.10.13-1: Aetna—Cumulative Encounter Completion Percentages (DOS 1/1/17-12/31/18)

Managed Care Organization (MCO)/Delegated Vendor	Cumulative Completion (%)
Entire Plan	97.89%
LogistiCare (non-emergency transportation)	99.22%
Superior Vision (vision services)	98.96%
DentaQuest (dental services)	97.90%
CaremarkPCS Health(pharmacy benefits)	99.77%
Aetna Non-vendor	97.18%

Over the past two years, we improved overall financial completeness by 2.61 percent and Aetna now consistently exceeds the financial encounter reconciliation rating of 95 percent. We participate in all encounter meetings/workshops hosted by LDH, and meet with LDH, Myers and Stauffer (auditing agency), and DXC Technology, the State's fiscal agent, on a regular basis to resolve any outstanding questions or issues related to encounters. We have applied continuous quality improvements, which resulted in a Myers and Stauffer report listing a decrease in complaints month-over-month.

Aetna is preparing for the upcoming changes in LDH's minimum performance standards for encounter submissions with the new contract term beginning in 2020. As part of our preparation, we are implementing a new encounter system, which will be completed prior to the start of the new contract term. In other states where we implemented this new encounter system, we achieved increases in our performance metrics related to encounter submissions. For example, in Kentucky and Florida we achieved a 1.79 percent and 2.26 percent increase in submission accuracy, respectively.

Moving to a New Encounter Management System

Rollout for Louisiana is enhanced by our vendor's development of Knowledge Packs, which are created directly from the State's encounter submission requirements and System Companion Guide. Turnaround time for rolling out this tool is greatly reduced, allowing us to move quickly and accurately to the deployment phase.

We achieve positive results with all Louisiana claims adjudication and encounter submission requirements through establishment and adherence to **customized** policies and procedures, configuration of **LDH-compliant** claims processing/encounter submission systems, and other tools tailored to support processing and payment within State requirements.

Policies and Procedures to Meet State Performance Standards and Prompt Payment

As a result of over 30 years of experience in Medicaid managed care programs, we have developed robust written policies and procedures (P&Ps) to support adherence to contractual, State, and federal requirements related to claims adjudication and encounter submission. We carefully monitor revised guidance, the provider manual, or policy notifications from LDH to customize our P&Ps to align with the needs of Louisiana. Our detailed procedures support our commitment to fiscal responsibility and foster the achievement of successful outcomes related to the timely and accurate payment of claims.

Automated Claims Adjudication System

Aetna views claims adjudication and encounter submission as an integrated set of end-to-end processes. Our claims adjudication system is a Health Insurance Portability and Accountability Act (HIPAA)-compliant, rules-based information processing system. It includes 28 integrated modules that maintain and process health care administration data, allowing us to increase administrative efficiency and improve the quality of care. The system contains every data element required for claims data adjudication. The provider module contains the unique provider identification number generated by the system, plus all

billing, tax, and State reporting information. The validation of provider data includes the ability to confirm the provider is enrolled as a provider in the Louisiana Medicaid program. If not, the claim is denied and returned to the provider. Aetna accepts claims through multiple channels and is capable of handling individual or a large volume of claims consistent with ASC X12 standards.

The claims module shows the date of receipt, history of actions taken on each claim, and date of payment, including the check number. The system accumulates claims by specific benefit limits and lifetime benefit rules. It scrubs and edits the claim data for accuracy during processing and payment. To maximize the quality and accuracy of our process, our system uses several embedded, configurable capabilities to review and edit claims data, including duplicate billing logic, coding accuracy, procedure code guidelines, procedure code definition policies, and technologies to detect questionable billing practices. We also have customized specific requests from LDH such as configuring to bypass explanation of benefits (EOB) requirements for our Chisholm members, allowing only one EOB per prior authorization. Our system's edits address all areas required within the **Louisiana Model Contract Section 2.18.8.** They include the following:

In 2018, Aetna's Medicaid organization processed over **46 million claims**. We processed **1.8 million medical claims in Louisiana** alone in 2018.

- Enrollee eligibility, enrollee name, and enrollee unique identification number
- Valid dates of service
- Medical necessity determination, prior authorization, and covered services
- Duplicate claims
- Provider validation
- Quantity of service

We use claim submission data to analyze our records and align our system provider data and State registry data. This continuous process improvement protocol improves accuracy of our claims payments and encounter submissions, thereby minimizing encounter rejections.

Potential Duplicate/Void Encounter Records in Louisiana

In 2017 over $4.4 million, or 1.32% of dollars in potential duplicates, were identified and removed from the cumulative financial completion rate. As a result of system enhancements and process improvement, potential duplicates have since been reduced by 97.81%, to $97,000.

In addition to managing claims for Medicaid managed care services, we possess operational and administrative capacity to efficiently and effectively process in lieu of services (ILOS), value-added services, and qualifying Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services claims. EPSDT, ILOS, and value-added services are assigned codes and are processed through our claims system and submitted through our encounter system as required by LDH.

Additional Tools to Support Compliance with Louisiana Claims Requirements

In addition to our P&Ps and a well-configured claims adjudication and encounter system, we utilize other tools and tasks to support our compliance with requirements.

Proactively Managing Claims Flow and Processing

Our standard and ad hoc claims reports proactively manage claims workflow to meet LDH's prompt pay requirements by alerting us to adverse trends. Based on this analysis, the Claims Operations department takes immediate action to address any trends that indicate a potential issue in areas such as turnaround times or inventory levels for aging claims. This approach enables us to identify the root cause of the problem and to develop and implement the appropriate action plan to ensure LDH's prompt pay requirements.

Robotic Processing Automation

To provide greater efficiency and accuracy of claims adjudication, we have deployed robotic processing automation (RPA) extensively within Aetna. RPA allows Aetna to remove manual processing and assists our team in providing additional data checks and data revisions. One such process deployed for Louisiana introduced supplemental checks to attach the appropriate provider to the appropriate claim using 10 different data points.

Supporting Providers in the Claims Submission Process

Aetna offers support, useful tools, and education to providers in their claims submission activities. Successful clean claims submission and accurate and timely payment upon initial submission allows providers to remain focused on their primary goal of maximizing the service delivery and health outcomes for Louisiana enrollees. We currently process check runs twice per week and will be moving to three-times-per-week frequency to support timely provider payments and enhance provider satisfaction.

Pharmacy Claims Adjudication and Compliance with Requirements

As Aetna's pharmacy benefits manager in Louisiana since 2015, CaremarkPCS Health brings the experience of a best-in-class pharmacy claims payment system that is used throughout the country. Serving the Medicaid population since 1988, CaremarkPCS Health currently supports 31 managed Medicaid health plans and more than 21 million covered members.

CaremarkPCS Health's pharmacy provider payment process is automated and it adheres to all State and federal prompt pay requirements. In the event a claim is paid beyond required timeframes, applicable interest is automatically calculated and paid. CaremarkPCS Health provides Aetna with monthly prompt pay reporting as a means to evidence compliance. CaremarkPCS Health has demonstrated exceptional processing outcomes. Additionally, the pharmacy claims processing system has been available 99.99 percent of its scheduled time during 24/7/365 operations; the system provides average response time of one second or less for all processed transactions calculated over a 12-month period.

Edits are used at the point of service and are designed to confirm pharmacy compliance with LDH's program parameters even before prescriptions are dispensed. A report is produced daily to check claims for inconsistencies in quantity, days' supply, etc., with the majority of these inconsistencies resulting from keying errors at the local pharmacy point of sale during the claim submission process. When errors are detected, an outreach is completed to the submitting network pharmacy to have them reverse the claim and submit a corrected claim with the appropriate data.

Management Information Systems Used and Compliance with Model Contract (2.10.13.2)

Aetna understands and complies with all systems and technology requirements of the Louisiana Medicaid program; we have been operating in compliance with these requirements since our entry into the program in 2015. Systems are designed, maintained, enhanced, or changed in alignment with requirements of the Louisiana Medicaid Managed Care Organization Model Contract, the Louisiana Managed Care Organization Manual, the Louisiana System Companion Guide, and all State and federal statutes and rules. We are proud of the robust and effective systems we have created, which minimize wasteful spending, abuse, and fraud and reduce complexity and administrative burden for providers and enrollees.

Length of Use and Brief Descriptions of all MIS Systems (2.10.13.2.1)

Over the past four years, we have successfully implemented numerous management information systems (MISs) in support of our health plan, assuring system stability. The systems listed in **Table 2.10.13-2** have been in use in Louisiana since plan implementation in December 2015, with the exception of the electronic population health management platform, which began in December 2016. **Table 2.10.13-2** identifies all MIS used in Louisiana.

Table 2.10.13-2: Aetna Management Information Systems Since Louisiana Implementation
December 2015

System	Description	System Implementation Date (Louisiana)[1]
Claims processing system	Suite of modules which include the books of record for claims processing, enrollment, customer service, utilization management/service authorization, and provider roster information	December 2015
Encounter data submission system	Industry-leading platform specifically designed around complexity and variation of State Medicaid encounter reporting requirements; upgraded system implementation scheduled for the second and third quarters of 2019	December 2015
Electronic care management platform	Clinical tools such as screenings, assessments, and care plan documents to be used in case management activities are stored and available to permitted members and providers	December 2015
Electronic population health management platform	A unified view of enrollee data for providers that shares data digitally and aggregates actionable data across member roster	December 2016
Enrollee and provider portals	Offers both members and providers extensive, interactive functionality and uses Aetna's rich data set to personalize the user experience	December 2015
Mobile application	App store-accessible platform that provides members access to the most widely sought functionality (e.g., find a provider, view ID card, check an authorization)	December 2015
Grievance and appeals	Tracks and monitors grievance and appeals records, provides workflows for service teams, and provides auto-letter generation using customized reporting templates for Louisiana	December 2015
Financial	Stores financial data and is utilized for production of reports and financial planning	December 2015

Hardware and System Architecture Specifications for All Systems Used (2.10.13.2.2)

Application/system: At the heart of our information systems are our rules-based eligibility, enrollment, customer service, and claims processing systems and our web-based case management application. The system is built on Microsoft's .NET architecture, which benefits LDH by providing a high degree of flexibility, scalability, and integration with other systems. **Figure 2.10.13-1** provides additional detail regarding application systems and interfaces.

Hardware: The Aetna Medicaid organization's databases run on our next-generation database platform. All databases reside on all-flash storage arrays from IBM. The arrays deliver orders of magnitude better throughout than prior-generation storage area networks, and they are replicated in near-real time (five-minute delay) to Aetna's standby data center for disaster recovery. The compute tier is comprised of Cisco's Unified Compute System rackmount servers, each containing 1TB of random access memory and Intel's v3 Chipset. The servers are combined into a VMWare, Inc. Elastic Sky X virtual cluster for superior maintenance, fault-tolerant, and scalability characteristics. Server maintenance can be performed in a round-robin fashion at the compute tier without downtime and in the event of node failure; the remaining servers in the cluster can take over for the failed node. Computing capacity can be seamlessly added to the cluster as well without downtime. Database workloads are segmented onto dedicated virtual machines that can be patched independently of each other.

Figure 2.10.13-2 provides additional detail regarding our MIS Network Hardware Configuration Design.

[1] Aetna's systems in Louisiana reflect the MIS deployed across the Aetna Medicaid organization, with the majority of the operational components in place nationally since at least 2007.

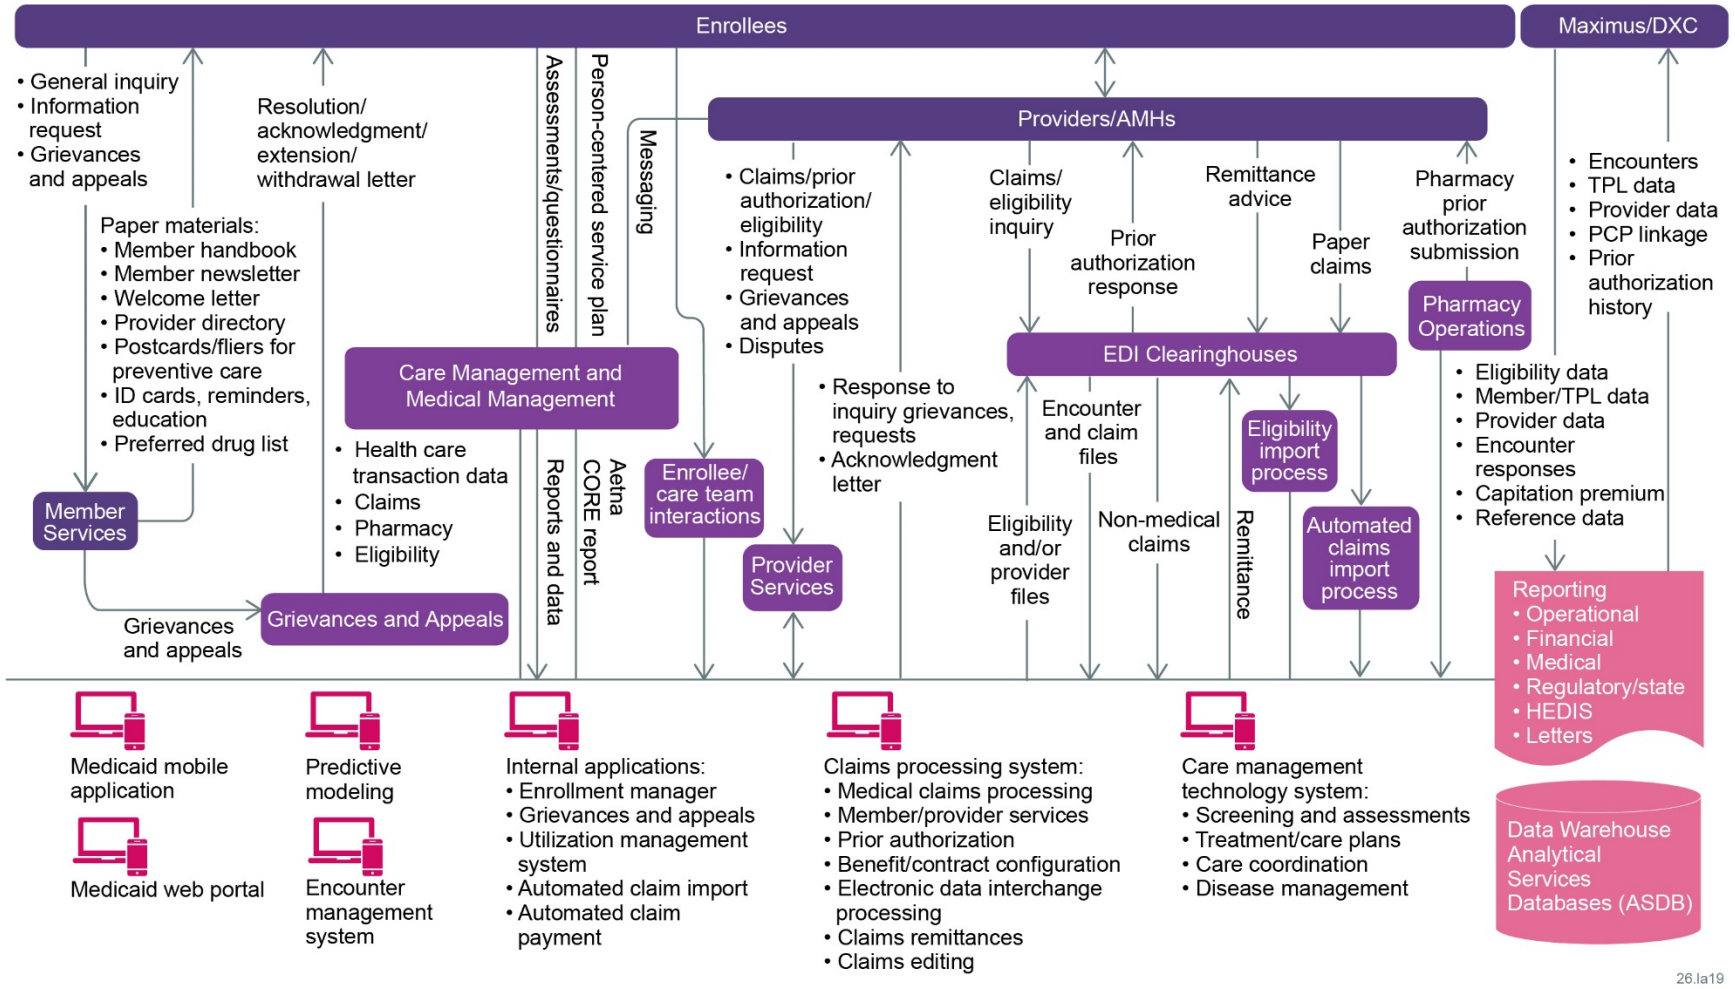

Figure 2.10.13-1: Aetna MIS Network Hardware Configuration Design

Aetna Application Systems and Interfaces Rules-based configuration provides flexibility, scalability, and integration across systems.

This page is exempt from page limits.

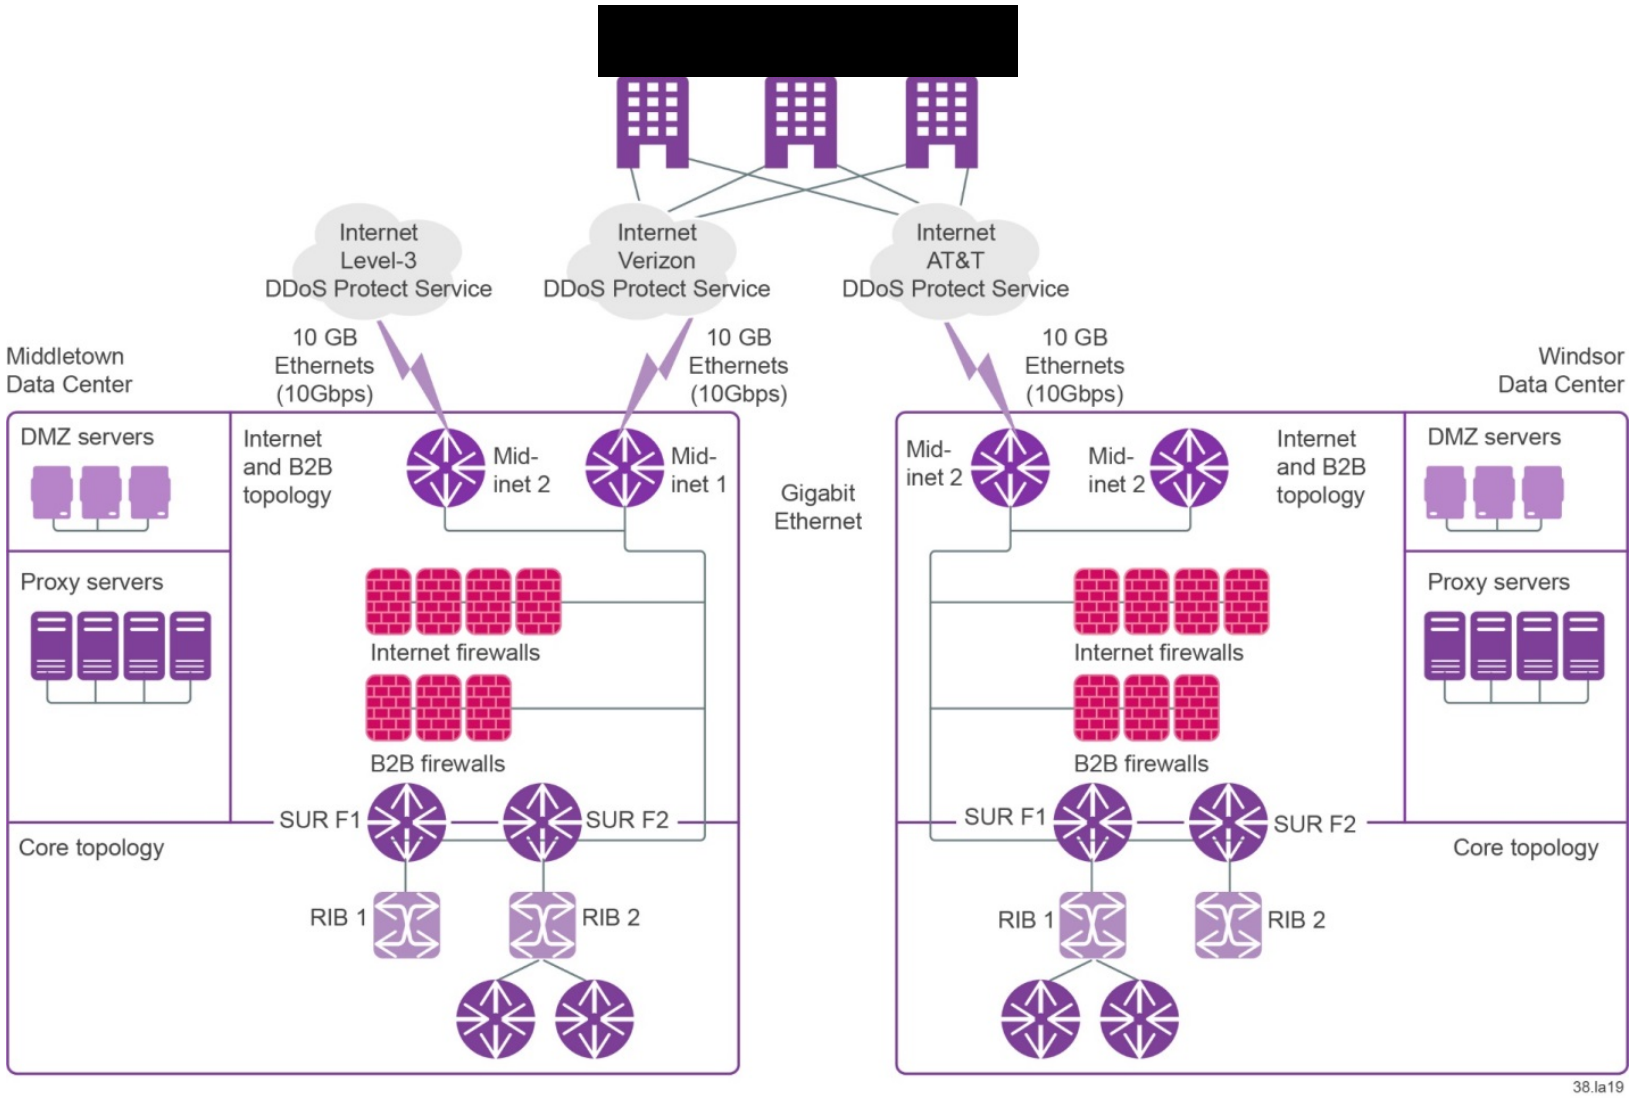

Figure 2.10.13-2: Aetna MIS Network Hardware Configuration System Design

Our resources and systems are fully integrated and scalable, supporting system changes or expansion.

This page is exempt from page limits.

Database layer: Our database layer is powered by Microsoft SQL server, which uses a wide variety of applications to display, print, and analyze data and to produce both standardized and customized reports. We configure systems to capture the data elements needed to provide accurate and insightful reporting.

Network and telecommunications: Our network and telecommunications infrastructure consists of triple-redundant servers that enable us to connect phone calls if two of the three servers fail. Our key production and telecommunication systems include the following systems/applications: key information systems in mirrored hardened data centers in [redacted]. We also use triple redundancy for telecommunication services: AT&T-hosted cloud-based services, onsite call management servers, and application/data servers in [redacted]; and technical support services.

Interfaces: To validate compliance with HIPAA and seamless connectivity/minimal interruption of services provided by all vendors/subcontractors, Aetna is currently in compliance with the recently released Statement on Standards for Attestation Engagements No. 18 (SSAE 18), which has enhanced requirements for adequate control environments for vendors/subcontractors.

All Proposed Functions and Data Interfaces (2.10.13.2.3)

Our MIS offer robust functionality for Aetna staff and integrated tools for members and providers. **Figure 2.10.13-2** provides detail regarding data interfaces of our MIS. Next, we provide additional information regarding the functions of our MIS.

Claims Processing System

The claims processing system includes a suite of modules for claims processing, enrollment, customer service, utilization management/service authorization, and provider roster information. To meet the changing needs of the Claims Management department, we use a claims hierarchical rules engine. It was built with a feature-flagging design (rules for claims processing with a minimum disruption of services) to allow us to rapidly adjust the configuration to provide flexibility while minimizing downtime and providing greater platform responsiveness. Louisiana claims import rules have been programmed and the application is built to ease turning rules and configuration characteristics on and off as needed without affecting the entire system, further ensuring service continuity.

Enrollment files are received, processed, tracked, and stored in the enrollment management system. Enrollment update information from LDH and/or directly from the enrollee is incorporated in the enrollment files. Once we receive the 834 files, the enrollee records are compared to the existing data within our electronic claims management system. Each enrollee record is fed through our highly configurable rules processor, which identifies, matches, consolidates, and updates enrollee information to ensure proper updates to demographics, enrollment benefit plan assignments, primary care provider (PCP) assignments, member classifications, and other critical information. This system allows Aetna to monitor enrollment and identify enrollees requiring immediate services and/or service coordination. Therefore, we can identify opportunities to engage new enrollees and maintain continuity of care.

Enrollee Services System

Aetna offers automated functions for enrollees on our website, portal, mobile app, and through our integrated voice response (IVR) system. Our Enrollee Service representatives (ESRs) and IVR track every call in a member module; if a call is not immediately resolved, a follow-up tracker is set. Call tracking queues items to areas such as appeals or to case managers. ESRs are able to update an enrollee's PCP, review claims and previous interactions, update addresses and phone numbers, and issue replacement ID cards (data is securely sent to the ID card vendor daily for fulfillment). ESRs also have access to our pharmacy benefit manager's system to assist members with real-time pharmacy questions.

Utilization Management/Service Authorization Business Application

Aetna has processes to accurately and timely load updated prior authorization requirements. Aetna's utilization management/service authorization business application electronically stores and reports the time and dates for all service authorization requests received, decisions made regarding the service requests, clinical data to support the decision, and timeframes for notification to providers and enrollees of decisions. Aetna also loads new provider contracts, provider demographic information, changes in provider contract terms, and changes to the provider directory into the claims processing system in accordance with all requisite timelines.

Encounter Data Submission System

Our encounter management system is an integrated, HIPAA X12-compliant, single system for encounter management that consolidates submission and reconciliation processes. It performs comprehensive encounter validation through a coordinated set of edits and validation rules that comply with State-specific business rules, allowing us to proactively identify potential data issues and correct them at the earliest stage of the reporting process. A dedicated team monitors regulatory changes in the market and performs any needed product updates to meet State requirements and timelines. This helps to ensure accurate, consistent tracking, trending, process improvement, data collection, monitoring, validation, reporting, and error correction. The encounter management system validates encounter files received from all subcontracted vendors (such as vision and pharmacy) for compliance using standard HIPAA guidelines, SNIP levels 1-5. It performs multiple levels of validations including duplicate checks on the encounter information and provides comprehensive validation steps that ensure files are accurate and complete prior to submission.

Care Management System

The electronic care management platform allows staff to complete the health needs assessment (HNA), comprehensive assessment, specialized screenings, and the individual plan of care in electronic formats. These documents are also stored in the portal for accessibility by enrollees and their approved treatment team partners as described later in this section. The electronic care management platform has a built-in alert system to notify case managers when required assessment and plan-of-care updates are due. The platform has the ability to generate patient chronic illness education, stratify members' acuity (immediate upon assessment), and seamlessly move members along the continuum of case management tiers as outlined in the **Model Contract**. The platform also stores member additional info and preferences (social determinants of health, other demographics, and caregiver or family information).

Population Health System

Our proprietary electronic population health management platform allows Aetna's Utilization and Case Management staff, providers, and other treatment teams the ability to view real-time, actionable data about a member's admissions, discharges, and treatment needs. This platform collects data related to predictive modeling, enrollment files, HNAs, care plans, enrollee self-referral and provider referral demographics, cost/utilization reports, pharmacy data, workflows, gaps in care, and social determinants of health in a timely manner.

Through our robust provider support model, we provide the resource support for system integration, education, and training on the electronic population health management platform. In working with providers who are operating with different configurations of electronic health record (EHR) systems in the marketplace, we have found that many EHR systems are not able to connect easily to other systems. We offer our population health management platform solution to select providers as a complementary tool to round out their data set. Where possible, we will leverage tools and technologies like our population health management platform to support providers with expanding their health information technology and health information exchange (HIE) capabilities where appropriate and consistent with existing State and federal EHR incentive and expansion programs.

Enrollee and Provider Portals

For enrollees: Aetna's website has a variety of helpful sections that provide information to enrollees and aim to equip them to more actively manage their health care. Features of the enrollee area include access to the most current enrollee handbook, a comprehensive provider search function and directory, the formulary drug list, how to access translation and interpreter services, health promotion and education information, and much more. The enrollee website allows the enrollee to communicate directly with a plan representative as well. The website is compliant with the Americans with Disabilities Act of 1990 (ADA) and meets Web Content Accessibility Guidelines (WCAG), which ensures content accessibility by everyone, irrespective of disability or age.

Aetna's secure portal links provide enrollees with access to claims, health and wellness tools, and CaremarkPCS Health's member website and secure web portal services via a secured, single sign-on credential. The web portal allows individuals to determine their financial responsibility for a drug; order a refill for mail order prescription; locate a network pharmacy by ZIP code or name; determine potential drug-drug interactions, side effects, and significant risks of drugs; and determine the availability of generic products. Enrollees can also securely review drug history information and access diverse pharmacy tools, which includes the ability to complete both electronic and telephone inquiries about their pharmacy benefit and drug coverage.

For providers: Aetna offers access to the provider portal, which improves efficiencies and offers complete accessibility to provider and enrollee data and reports. The portal contains information on provider and enrollee records, claim or authorization status, electronic explanations of benefits outlining claim services payment or denials, dates of service, procedure codes, amount billed and allowed, and amount paid, as well as the status of grievances and appeals. Providers have the ability to submit prior authorizations (including pharmacy prior authorizations) and appeals and grievances through the provider portal. This web-based platform allows us to communicate enrollee health care information directly with providers in real time, inclusive of enrollee assessments and care plans.

Medicaid Mobile Application

Our mobile engagement application (app) leverages technology at the enrollee's fingertips through Android and iOS devices, using enrollees' at-the-moment activities and location to deliver access to care virtually anywhere. Our electronic care coordination platform capabilities include sharing directly with enrollees to improve information availability and care outcomes. Personalization enables services to enrollees that greatly enhance their ability to access services. With the Aetna mobile app, enrollees can get on-demand access to the tools they need to stay healthy. For example, they can find a doctor, request a member ID card, or change their PCP at any time, from anywhere. As the application evolves in preparation for the contract term in 2020, we will add functionalities to improve the enrollee experience and care. For example, we intend to add functionality that allows enrollees to complete the health needs assessment in the mobile app and store this information within the electronic care management platform. Additionally, the app will be enhanced to provide claim notification information to enrollees and will give enrollees the option to notify Aetna if they view a claim for a service they did not incur (potential fraud flag). The mobile app is compliant with the ADA and meets WCAG, which ensures content accessibility by everyone, irrespective of disability or age.

Grievance and Appeals

Our grievance and appeals application is integrated into our claims processing system and is highly customizable to capture, process, store, and retrieve detailed information on each complaint, grievance, or appeal received. We do not delegate grievances or appeals processing to any subcontractors. Aetna's comprehensive documentation allows us to maintain and track all cases from origination through resolution. The application is housed in a secure location with access limited to role-based authorities, which includes Aetna leadership, the compliance officer, data staff, and Grievance and Appeal department staff. The application is maintained by the Grievance and Appeal Oversight team.

Establishment of a system to document, process, track, and report complaint, grievance, and appeal data is State-mandated, and our system meets the criteria established by LDH.

Financial

Aetna uses a financial reporting and planning system that stores financial information including revenue and expenses for Aetna by line of business. The financial system is used for external and management reporting, and for internal financial planning purposes. The Business Information System/Informatics Finance group supports a variety of plan-based reports including Daily Claims, Weekly Claims, Speedometer, TAT Comparison, and Top 200 High Cost Members.

Data and Process Flows for all Key Business Processes (2.10.13.2.4)

Aetna's MIS infrastructure supports for the integrated, interdependent flow of data within and across systems. The following diagrams provide detail regarding data and process flows for customer service (**Figure 2.10.13-3**), enrollment (**Figure 2.10.13-4**), claims adjudication (**Figure 2.10.13-5**), care management (**Figure 2.10.13-6**), utilization management (**Figure 2.10.13-7**), and financial processes (**Figure 2.10.13-8**).

Proposed Resources Dedicated to MMIS Exchanges (2.10.13.2.5)

Medicaid Management Information System (MMIS) exchanges are handled by our national team, which works closely every day with our local health plan staff to ensure timely, fully compliant processing of all inbound and outbound files. Aetna Medicaid Information Technology (IT) takes a business-focused strategy for MIS delivery. Our team is an independent, fully dedicated organization, which serves the Medicaid quality, care, and delivery teams. Our vice president of program delivery, who has over 40 years of health care IT management experience, leads the Aetna Medicaid organization IT team and is supported by a diverse team comprised of over 250 individuals. The team is organized around specific business functions (digital innovations, enrollee and enrollment, provider experience, claims and encounters, clinical management, and finance and reporting), which allow IT to be nimble and flexible to address the needs of the local Aetna plan. Other dedicated teams are responsible for compliance, governance, infrastructure, global security, architecture, production support, and data and file management, which brings additional expertise to critical data-heavy functions like MMIS exchanges. These teams are fully versed in the latest data interoperability standard, including HL7 and the newer Fast Healthcare Interoperability Resources standards, and partners with the Medicaid Quality team and Aetna to identify appropriate market HIEs, electronic medical record data clearinghouses (i.e., Athena), and directly with large provider practices. The national team works in concert with a dedicated team of local Louisiana managers and support staff to ensure IT processes such as file transfers, enrollment, and claims processing, reporting, and all auxiliary systems are functioning properly and within State guidelines. Local staff works closely with the State's subject matter experts to assist in the delivery of solutions and turn the State's requirements into specific system or process designs for leading-edge solutions. The local team coordinates the integration of all of Aetna infrastructure support areas to ensure required IT resources are appropriately allocated to meet Louisiana's business objectives.

Availability of Data Elements to Produce Management Reports (2.10.13.3)

Aetna attests that all data elements needed to produce required management reports are available for inclusion in our report submissions to LDH. We adhere to the requirements of the **Managed Care Reporting Guide** and utilize the **MCO Manual** and **LDH's Managed Care Reporting Website** as additional sources of guidance. Additionally, our data capture mechanisms are adaptable and can be customized as needed to meet new requests related to reporting. Aetna's system supports reporting all requested data elements for even the most complex regulatory reports. We have a proven record of meeting regulatory requirements for new, ad hoc, and changing reporting needs. We work closely with LDH subject matter experts to understand their requests so that we report accurately and appropriately.

Proposed System Changes and Enhancements and Ensuring Continuity (2.10.13.4)

At this time, Aetna is not proposing material changes or enhancements to our enrollment, utilization management/service authorization, or care management/disease management systems during the term of the contract beginning in 2020. Aetna is working toward transitioning our Louisiana plan to a new encounter management system that has delivered an even higher performance outcome for encounter metrics in states where it has already been implemented. We have not yet set a firm transition date for Louisiana; however, the transition date will occur in 2019.

When we do make systems changes, we do so with utmost awareness to avoid or minimize disruption in day-to-day operations. Our processes protect and maintain system operations through all phases of change from implementation to completion through regular communication, coordination, testing, scheduling, and monitoring. Our staff includes individuals with Six Sigma training and project management certification. **Figure 2.10.13-9** demonstrates our standardized process for system changes or enhancements.

Interface with LDH, Providers, and Material Subcontractor Systems (2.10.13.5)

Aetna works closely with LDH, along with its agents, to achieve both successful health care results and effective cost outcomes. Aetna follows a secure and proven process for establishing and maintaining all EDI interfaces. We utilize industry-standard secure File Transfer Protocol servers to handle inbound and outbound file exchanges. When establishing a new EDI interface, we collaborate with the State and trading partners to exchange key information required to establish the secure connection for exchanging files on both sides. These connections enable the implementation of a wide range of data sharing, including all HIPAA X12 file exchanges; examples include enrollment (834), claim payment/advice (835), health care claim and encounter (837I/P/D), prior authorization (278), and capitation premium financial reconciliation (820). In addition, Aetna supports the exchange of custom file interfaces whenever required by LDH or other subcontractor systems.

Aetna also supports critical, real-time HIPAA transactions including eligibility inquiry and response (270/271) and claim inquiry and response (276/277). Additionally, Aetna continually promotes and adopts different transaction formats and protocols including HL7, the messaging standard that enables clinical applications to exchange data.

Aetna accepts and processes daily and weekly (and others as scheduled) enrollment files provided by LDH. We maintain a proprietary rules processing engine for loading 834 files and reconciling the data with our business application. Our rules-based engine is fully customizable to meet the specific requirements of LDH's enrollment file processing and produces comprehensive statistics reports allowing extensive reporting and monitoring by our Enrollment team.

Aetna's information system design uses powerful, reliable, and expandable data processing systems. The foundation of this platform is a redundant, high-speed local area network and wide area network, with clusters of servers with built-in redundancy. This scalability allows systems to match any escalation in demand associated with LDH's, network providers' and subcontractors' performance requirements, while at the same time maintaining system uptime and performance. Our Enrollee Services Call Center runs on a top industry-standard Internet Protocol switch, which maintains 20 percent extra capacity to cover any spikes and growth spurts.

We are also working toward enhanced data interface results through blockchain technology. **We are the only health care payer that is a founding member of two health care blockchain alliances.** In 2018, we joined the Synaptic Health Alliance, which is focused on data quality for provider directories. We are also a founding member of Health Unity Network, which focuses on reducing the friction, cost, and integration complexity between the various parties within the health care ecosystem.

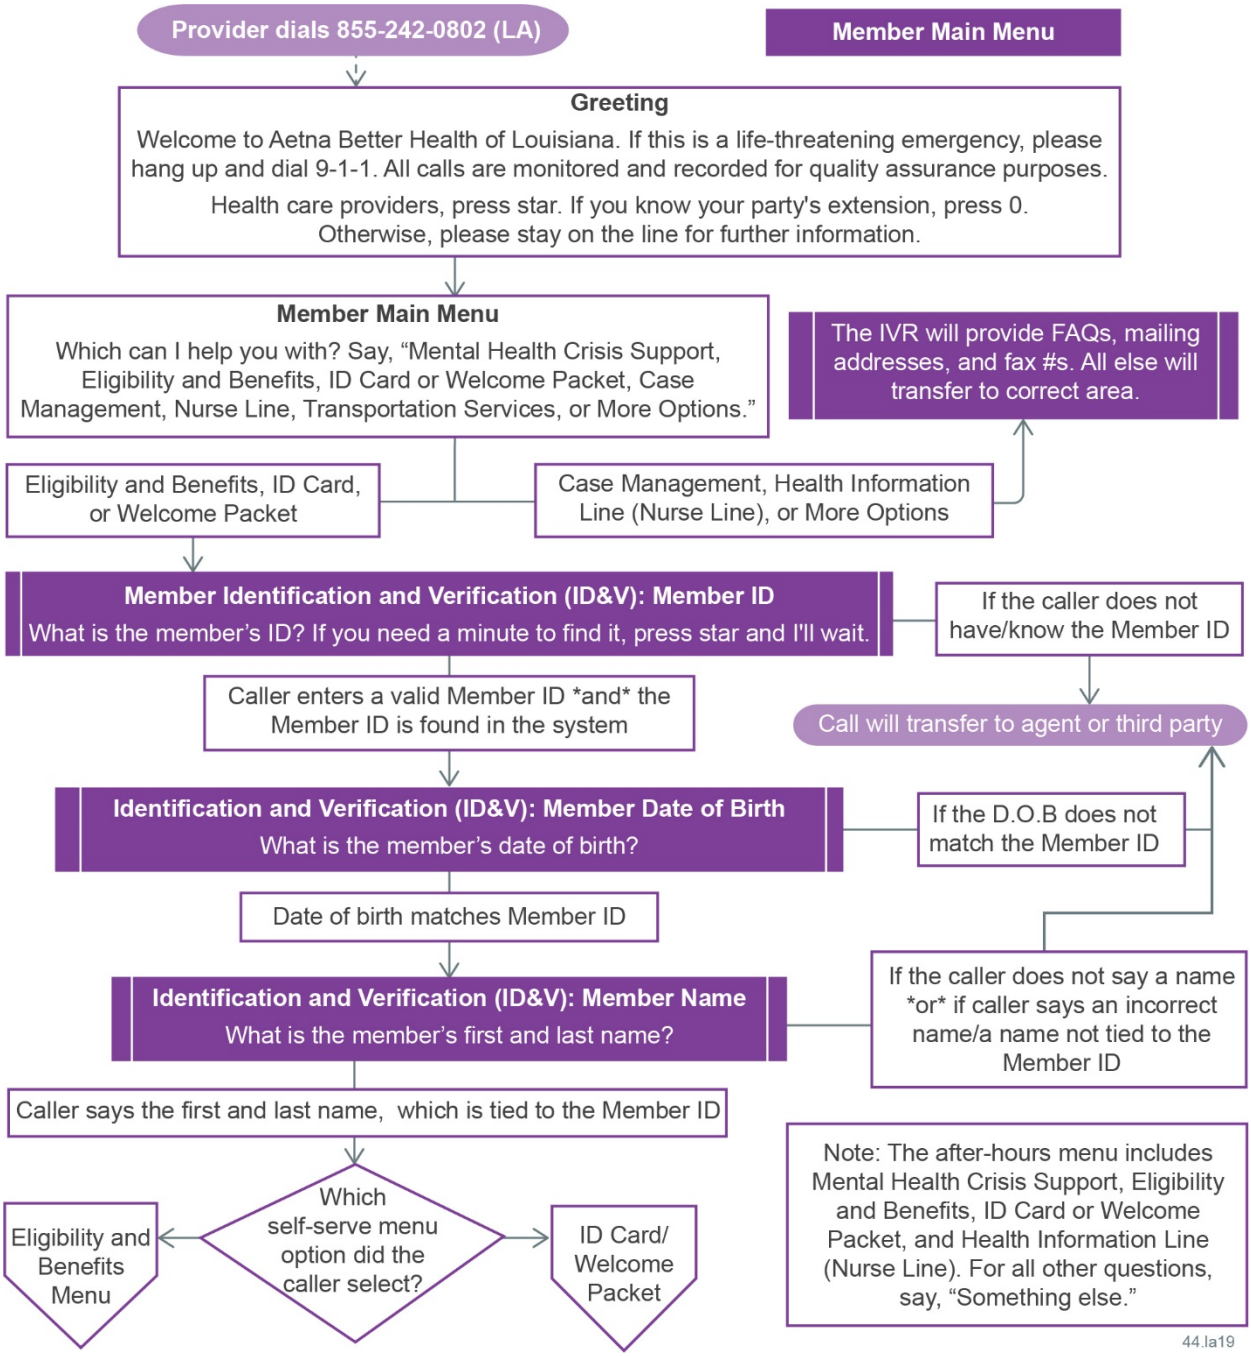

Figure 2.10.13-3: Customer Service Data and Process Flow

Our customer service system allows for documentation and verification of data related to general customer service, case management inquiry, and Health Information line (Nurse Line) activities.

This page is exempt from page limits.

- Enrollment files are processed per the State's contract requirements
- Typically, daily enrollment files are processed within 1 day of file receipt from the regulator/enrollment broker and monthly reconciliation enrollment files on an average of 3-5 days of file receipt

2.10.14 Program Integrity

To support Louisiana's efforts to build healthier communities, Aetna hosts regular Ted. E. Bear, M.D. festivals and fairs in all nine regions of the state. We invite several of our community partners to bring physical activities, such as yoga or Zumba, cooking and nutrition classes, and wellness screenings such as flu shots, immunizations, and body mass index checks. We also provide educational materials, safety instructions, and opportunities to connect our members to much-needed resources in their community.

2.10.14 Program Integrity

Aetna understands, acknowledges, and will comply with all program integrity (PI) and fraud, waste, and abuse requirements in the **RFP,** the **Model Contract,** and **the MCO Manual**.

Aetna's FWA Program and How We Address the Model Contract Requirements

Aetna's overall fraud, waste, and abuse (FWA) program complies with all State and federal laws and regulations relating to FWA in the Medicaid and Children's Health Insurance Program programs. Our approach consists of best practices—sound, proven policies and procedures that proactively prevent and reduce fraud, waste, and abuse. We enforce a zero-tolerance policy toward any form of FWA by staff, subcontractors, providers, enrollees, or others. Our compliance program contains robust PI processes designed to reduce or neutralize the deliberate misrepresentation of need or eligibility; providing false information concerning costs or conditions to obtain reimbursement or certification of services; prior authorization (PA) of services; or claiming payment for a service that was never delivered or received. Our major FWA activities include the following: **prevention**—prepayment claim review and routing to avoid fraudulent payments; **detection**—using proactive data analysis to identify providers of interest based on behaviors within their peer groups; **investigation**—thoroughly exploring historical/current provider billing/practice behavior; **recovery**—working with providers to understand, educate, and pursue recovery; and **reporting and compliance**—operational and financial results reporting and mandated State and federal fraud reporting. We focus on practices that are inconsistent with sound fiscal business or medical practices that result in unnecessary cost to the State's Medicaid program. Our PI program is supported by our unique local leadership and Aetna Medicaid organization that offers 30 years of national, robust experience in 16 states. This ultimately improves our enrollees' lives while reducing complexity and administrative burden for providers and enrollees and serving as responsible stewards of LDH's resources.

FWA Efforts Score High in 2018 Louisiana Compliance Audit

- Compliance rate of 100% for our FWA program
- Compliance rate of 100% for our reporting

Our PI process supports **Model Contract** requirements by being grounded in the U.S. Department of Health and Human Services and the Office of the Inspector General's (OIG) seven elements of an effective compliance program. Our approach includes information from the U.S. Government Accountability Office's July 2018 report, *Medicaid Managed Care: Improvements Needed to Better Oversee Payment Risks,* and LDH's December 2018 report, *Medicaid Eligibility: Modified Adjusted Gross Income Determination Process.* We continually prevent FWA and neutralize challenges to PI by doing the following:

- Using Aetna's LDH-approved **policies and procedures**
- **Maintaining adequate staff and resources** to include a dedicated medical director and certified fraud examiners with a wide variety of backgrounds such as medical coding, Medicaid compliance, law enforcement, nursing, and social work to investigate incidents and develop corrective action plans
- Delivering provider, subcontractor, enrollee, and employee **training and education**
- **Maintaining effective communication** by collaborating with LDH to track and neutralize FWA, receiving support from our parent organizations (CVS Health Corporation [CVS] and Aetna Inc.), Compliance, and Special Investigation Units (SIUs), and following federal and State regulations and guidance to comply with **Model Contract Section 2.20**
- Publicizing disciplinary guidelines to all employees and providers
- **Using auditing and monitoring** tools such as sophisticated, market-savvy technology to measure compliance with program requirements
- **Initiating a prompt response** through investigating, referring, and reporting suspected and confirmed fraud and abuse to LDH and the Medicaid Fraud Control Unit (MFCU) and creating

corrective action plans—**we have 144 national full-time staff dedicated to FWA including the team dedicated specifically to Louisiana**

Our effective system for escalating/resolving issues and our oversight and monitoring programs verify adherence to our policies. We are committed to collaborating with State and federal agencies to combat Medicaid FWA and overpayment. We stay current on FWA and related issues by participating with the National Health Care Anti-Fraud Association (NHCAA), for which Aetna is a founding member, the National Association for Medicaid Program Integrity, the Centers for Medicare & Medicaid Services (CMS) Healthcare Fraud Prevention Partnership, and multiple health care anti-fraud task forces at state and federal levels.

Program Integrity Officer, Contract Compliance Officer, and Staff

Aetna takes full responsibility for all PI components, including compliance and our SIU—no aspects are subcontracted. As we do in our current model, we will meet the minimum staffing requirement of one PI officer, one contract compliance officer, and one FWA investigator for every 50,000 enrollees and fraction thereof for this new contract as stated in **Section 2.20.1.11**. We will also comply with requirements by locating these positions in Louisiana. **Figure 2.10.14-1** depicts Aetna's FWA reporting structure. Our FWA team, along with local executive support, supervises data collection. Program Integrity Officer Cody Cieutat is highly qualified and has the authority and corporate governance reporting relationships to oversee, implement, and maintain our PI program and FWA efforts. He reports to the chief executive officer (CEO) and board of directors and develops and implements policies, procedures, and practices designed to ensure compliance with contract requirements. Mr. Cieutat meets with our compliance officer and the LDH PI officer on a monthly call to discuss compliance-related issues and potential topics for review at the quarterly PI meetings. Our [redacted] meet with LDH and the State's Office of Attorney General MFCU quarterly, annually, and whenever requested by LDH, to discuss FWA, neglect, or overpayment issues as stated in **Section 2.18.18.2 of the Model Contract.** The compliance officer chairs the Compliance Committee, which meets quarterly or more often as appropriate to review trends, data mining, and specific allegations of FWA as well as risk and risk mitigation, training (compliance and FWA), quality compliance issues, and delegated oversight. The committee is comprised of senior executive leadership from Medical Management, Quality, Health Services, Provider Services, Enrollee Services, the Special Investigations Unit (FWA), Operations, Grievances and Appeals, Pharmacy, and Provider Network. The PI/FWA staff present information to the committee, facilitated by the compliance officer, as a way to create awareness to all other departments of potential risk and further identification of prevention opportunities, training, or trends pursuant to the contract in accordance with State and federal law.

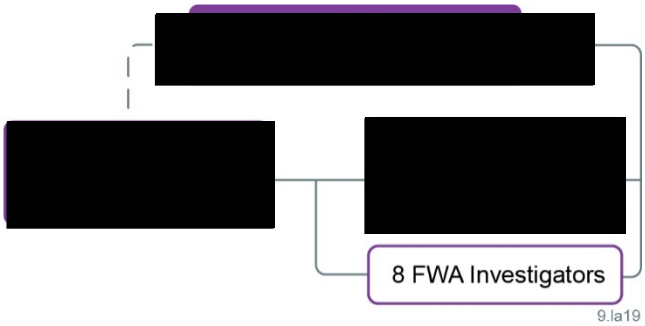

Figure 2.10.14-1: FWA Reporting Structure
Our FWA reporting structure ensures responsible oversight and executive input.

FWA Training for Employees, Subcontractors, and Providers (2.10.14.1.1)

Training is a key component to our prevention and detection. We deliver effective training programs and awareness initiatives to employees, subcontractors, and providers through a variety of forums.

Employee Training Programs and Awareness

We encourage collaboration, cross-training, and the exchange of best practices among all our staff. Our employee training supports our internal fraud prevention. Training begins on the first day of employment

and continues with Aetna's yearly education and training. This annual education includes all of our FWA and PI policies, our Code of Conduct, and ethics via a combination of in-person and online training modules. Trainings include the following: FWA mission and purpose; definitions and explanations of FWA; high-level overview of applicable federal and State regulations (such as the False Claims Act and anti-kickback regulations); how staff can report FWA to Compliance and FWA investigators; actions of an investigation (such as data mining, claims analysis, and medical record reviews); examples of successful FWA investigations; and overview of FWA partners (such as State MFCUs, the NHCAA, and CMS). Our core values of excellence and integrity align with LDH's goals and objectives to promote responsibility and accountability in the delivery of high-quality, cost-effective health care. Prevention, detection, and correction of instances of FWA and overpayment are vital to that commitment. These core values and commitment are consistently communicated to employees beginning at their onboarding/new-hire training through a variety of means, including in email communications, on our website, and during town hall and departmental meetings. Aetna's FWA policies are designed to help ensure that employees conduct business in a legal and ethical manner and to prevent, detect, and investigate embezzlement, internal theft, and other forms of employee fraud in addition to provider and enrollee FWA. New employees must complete this same training within 30 days of hire. Upon completion of initial and ongoing compliance training, our team members acknowledge that they participated and understood the information we provided and that they will adhere to compliance program requirements. **Our program integrity officer, FWA investigators, and other essential personnel receive specialized and mandatory trainings** on the investigative process; key State and federal regulations, processes, and procedures for addressing suspicious claims; and the procedure for facilitating communication among the health plan, appropriate authorities, and the FWA. Our in-person and web-based NHCAA- and industry-specific training includes coding clinics, fraud schemes in the behavioral health (BH) arena, medical record review strategies, prescription drug fraud schemes, and intensive outpatient therapy, among others. Our compliance and program integrity officers conduct ongoing FWA training at employee town halls, departmental meetings, monthly newsletters, and upon request. We also participate in all State trainings at the quarterly meetings.

Aetna publishes our **Code of Conduct training** on the intranet and on the Compliance and Regulatory Affairs home page. All employees are required to sign an attestation acknowledging that they understand and will comply with PI and compliance standards upon hire and annually as a component of their required compliance training. As set forth in our Code of Conduct, all business lines will be conducted based on the highest ethical standards and in strict compliance with applicable federal and State laws and regulations. Our Code of Conduct explains to all employees that disciplinary action will be taken, up to and including but not limited to termination, for the following:

- Failing to follow the Code of Conduct, other related policies, or breaking any laws or regulations
- Telling an employee to violate the code of conduct, an Aetna policy, a law, or a regulation
- Failing to share information, or providing false information in connection with an investigation, about a violation of the Code of Conduct, a law, or a regulation
- Retaliating against another employee who, in good faith, reports a suspected violation or who cooperates or helps with an investigation
- Neglecting to address or report a violation of the Code of Conduct, or a law or regulation, committed by someone an Aetna employee manages

We also reinforce that each employee is required to report any suspected violations of the Code of Conduct to their immediate supervisor, an Aetna compliance officer, or the CVS Health Ethics Line, which supports anonymous reporting via toll-free phone call, email, or written letter.

Provider and Subcontractor Training

Providers and subcontractors are educated on how to access our fraud and abuse form located on the main login page of our website. The link at the top right side of the page guides them to an easy-to-complete form and health plan and State toll-free numbers to call in case of suspected fraud.

Investigation Uncovers Enrollee Fraud

A local Enrollee Services representative notified FWA that an enrollee had misrepresented herself while making out-of-state transportation claims through Aetna. Once our FWA investigator contacted her primary insurer to confirm that the services had been received, we took steps to prevent further abuse. The investigator worked with our plan and the vendor to set up a prior authorization for future trips; travel would only be paid once the plan received a request with documentation from the provider. Once the PA was required, there were no more erroneous charges. This case is still pending with MFCU.

Provider Training

Initial provider training takes place during orientation, with ongoing/supplemental training occurring through online provider forums, our secure online provider portal (where content is available 24/7/365), the provider handbook, and through individual communications with the Provider Services team. Our providers are encouraged to request individual supplemental training via our Provider Services staff any time they need additional information. Providers are educated on the definitions of FWA, provider PI and compliance responsibilities, methods for preventing FWA, and how to report potential issues. Training also includes applicable laws such as the False Claims Act, Anti-Kick Back Statute, Stark Law, Office of Inspector General's List of Excluded Individuals/Entities, the General Services Administration System for Award Management, and the Health Insurance Portability and Accountability Act. Should providers have audit findings of potential FWA, we also provide FWA training to prevent further occurrences.

Subcontractor Training

All our subcontractors and their employees are required to participate in compliance and FWA training. We train our subcontractors in all areas of accountability and oversight for all functions and responsibilities that we delegate to them. In turn, we review their employee FWA program and verify that they provide FWA training to their employees. We monitor FWA activity, including whether the subcontractor is delivering the required reports and training, through subcontractor meetings.

FWA Prevention through Enrollee Engagement and Training (2.10.14.1.2)

Aetna's person-centered approach encourages enrollees to assume responsibility for their health, wellness, and care. We use the enrollee handbook, enrollee newsletters, website, and Enrollee Advisory Committee meetings as well as our verification of services process as ways to communicate with enrollees about their responsibilities in preventing and reporting instances of FWA. The enrollee handbook and website provide information on various types of fraud and abuse such as identification card fraud, inappropriate use of emergency department services, and prescription drug use and benefits. Each of these tools informs enrollees on the definition of fraud and abuse, their responsibilities, the responsibilities of others, and how and where to report suspected or known fraud and abuse. Enrollees are encouraged to report all suspected FWA by calling Aetna's fraud hotline, calling LDH's fraud and abuse hotline, or by submitting an online fraud and abuse form via our website.

Enrollee Training

Aetna is serious about tracking services and services billed to verify that the proper claims are being tracked to the enrollees receiving care and that no additional service claims are being billed for an enrollee who did not receive the service. We communicate information on FWA to our enrollees. Enrollees receive education on how to report FWA by calling the fraud hotline or using the online web form, as instructed in their enrollee materials and through explanation of benefits (EOB) letters mailed to a random sampling of enrollees every month. The following highlights our enrollee communications

vehicles concerning claims and FWA. All contacts display the amount billed, the enrollee rate, whether the claim is pending or not payable, deductible (if applicable), and copay, and include the following:

- **Enrollee mobile app:** Through a secure application, enrollees can view and verify their claims for primary care provider, pharmacy, specialist, transportation, BH, and other visits.
- **Enrollee secured portal:** Claims and pharmacy information is available for review.
- **EOB:** Enrollees can call our Enrollee Services staff and discuss the explanation of benefits and its significance; refer to their enrollee handbook, enrollee education materials, or the enrollee website; or discuss the EOB with their doctor. Enrollee EOB training includes how to track services received and confirmation that they will not have any balanced billing from us or their providers. Training also covers their responsibility to let us know if there are charges for services they did not receive.

Enrollee Helps Potential Medicaid Identity Theft

A Virginia enrollee's mother called our local fraud hotline to report potential Medicaid identity theft. Our PI department promptly reported the case to the state and provided our state partner and federal agencies with all requested information. We also issued a new identification number and card, and reviewed and identified claims resulting from the identity theft to confirm that no other members were involved. The state later announced the arrest of those involved and identified the theft as part of a scheme to obtain opioid drugs at six hospitals.

Using Data Analytic Algorithms to Detect and Prevent Fraud (2.10.14.1.3)

Aetna uses data analytics and auto-identification of potentially fraudulent claims to facilitate detection and mitigation of enrollee, provider, subcontractor, and vendor FWA throughout the claims lifecycle from prepayment to recovery. We use business intelligence software to identify providers whose billing, treatment, or patient profiles differ significantly from those of their peers. The FWA's Internal Analytics staff runs case- and scheme-specific reports that show our savings, recoveries, and prevented loss using Structured Query Language, Statistical Analysis System software, and Crystal Reports technology to support current investigations and identify new cases. The FWA team performs an annual review of the plan to identify high-dollar specialties, providers, and procedures codes. This can show the PI officer which specialties to review for outlier behavior. In addition, **on a quarterly basis, the FWA team runs a minimum of 25 tailored outlier reports of known fraudulent schemes** based on specialty and current procedural terminology codes to identify the top providers of certain services in LDH. Examples include services related to home- and community-based health care; claims from providers with historical overpayments, high resubmission/error rates, or high appeal rates; drugs/high-cost drugs; durable medical equipment (DME); services billed in a year without an associated physician visit such as outpatient or elective procedures; dramatic increase in individual provider billing year-over-year; rendering/performing providers who are prescribers/referrers of the same service; and services provided to enrollees with vulnerabilities such as extensive disabilities, multiple comorbidities, comorbid behavioral health, and frail elderly on expansive care plans. Examples that may trigger further investigation include the following:

- Discrepancy between the submitted diagnosis and the treatment
- Claims that are resubmitted with coding changes to gain benefits or alterations on claim submissions
- Questions about the medical necessity of services rendered
- High volume or high percentage of dollars paid in one or two procedures
- Providers using a post office box as their service address
- Pressure for quick claim payment

Additionally, we run quarterly outlier reports such as identifying the top providers billing 10 or more paid claims for adult day care services, the top paid providers of DME, and the top paid providers of physical therapy evaluations. The reports are referred to investigators for further review and appropriate action. At data mining meetings, FWA staff members, the medical director, clinicians, and certified coders discuss and prioritize data mining studies to analyze trends and schemes identified through various sources.

Our data mining is enhanced by **Healthcare Fraud Shield (HCFS), a platform that comes equipped with approximately 600 business rules and algorithms** that are maintained and updated quarterly. They are customizable at the health plan level to account for benefit variations, and can be applied pre- and post-payment. This platform identifies providers with potential FWA behaviors and assigns them a risk score. We use the HCFS application screens to visualize all leads and billing activity as well as download the past 12 months' worth of claims for each lead. This helps us further avoid inappropriate billing, identifies and mitigates provider confusion, and deters criminal activities, among others. It also enhances our success with our BH data mining and focuses our effort identifying significant BH issues. Our pharmacy benefits manager searches for outliers and potential fraud. For example, information from HCFS can supplement our pharmacy directors as they run high-cost claims reports. Current HCFS customers report returns from $3 to $10 for every dollar invested. Aetna completed a proof-of-concept analysis of the system in 2018, and based on the results, anticipates even greater increased FWA savings, recoveries, and prevented losses. We also receive and use leads provided by the Aetna Enterprise Analytics Fraud team. Our data analytics system provides efficient and proactive discovery of new fraudulent schemes, allowing for near real-time prepayment review capabilities to flag suspicious claims prior to adjudication. **The data analytics of all Aetna plans are shared among the plans to leverage the information on commonly used providers and provider types. This saves money by reducing the need for pay-and-chase methods of recovery**, fostering a comprehensive approach to addressing both enrollee and provider fraud by leveraging all available data sources to detect emerging fraudulent patterns. Our rules-based claims adjudication system maintains and processes health care administration data, providing increased efficiency. The provider module contains a unique provider identification number generated by the system, plus all billing and tax reporting information. The claims module shows the date of receipt, the history of actions taken on the claim, and the date of payment, including the check number. The system stores claims by specific benefit limits/lifetime benefit rules. It scrubs/edits this data for accuracy during claims processing and payment. Aetna's Medicaid Claim Quality Control department independently assesses the effectiveness of the Medicaid claims system configuration and claim procedures against the resulting adjudication process.

Defining and Identifying High-risk Claims (2.10.14.1.4)

We define high-risk claims as paid or denied claims from providers, or for enrollees whose individual profiles do not follow the expected and common pattern of their peers or have an element for patient safety/negligent. However, given the numerous FWA schemes, the definition is everchanging. Examples of high-risk claims are those paid as a percentage of billed charges, services related to home- and community-based health care, DME, and physical therapy, over-utilization and overprescribing of medications, billed for more than one unit of service, or claims that do not require PA. Currently, among the issues we review are providers who do not meet licensing requirements or those who do not have any 'barriers to entry' such as those in mental health rehabilitation; prescription claims without a corresponding medical service; use of non-emergent transportation without a medical claim; or enrollees who are inherently high-risk as referenced by the contract. We also flag claims for those enrollees with multiple chronic, physical illnesses, mental illness (with or without substance abuse), both physical and behavioral/cognitive problems, frail elderly with functional impairments, working-age people with disabilities, children with special needs, care/equipment from specialist providers such as DME, those with high emergency department use, and enrollees residing in nursing facilities.

Methods to Identifying High-risk Claims

We use a variety of technologies to prevent and detect questionable billing practices and to avoid fraudulent claims payments such as business intelligence software to identify providers whose billing, treatment, or patient demographic profiles differ significantly from their peers. We run a weekly report and manually review 100 percent of all claims submitted with dollar amounts of $70,000 or more and paid amounts of $30,000 or more. We also review the annual OIG work plan and follow CMS

recommendations on high-risk provider types. FWA investigators review the data mining report and take appropriate action. Additionally, we coordinate with our stakeholders, industry partners such as the Healthcare Fraud Prevention Partnership—a collaboration between the federal government, State agencies, law enforcement, private health insurance plans, and health care anti-fraud associations—and other managed care organizations (MCOs). Specific methods we use to identify high-risk claims include the following:

- **Internal applications** such as HCFS (previously mentioned) run enrollee analytics including: eligibility to determine if the home address is a P.O. Box; checking for multiple enrollees living at the same address/using the same phone number; verifying enrollee address and phone number during provider visits; pulling any enrollees with high emergency department use; and sorting through obituary files or investigatory news articles that may include enrollees or providers, among others.
- **Prior authorization** enables Aetna to monitor the use of defined outpatient services and procedures as well as non-emergency or elective hospitalizations before the enrollee receives the service. PAs confirm requested services are for eligible enrollees and are included in the defined benefits; provided at an appropriate level of care and place of service; appropriate, timely, and cost-effective; coordinated with medical management; communicated to applicable operations areas (e.g., finance, enrollee services, provider services) or per contractual requirement with external vendors; and documented accurately to facilitate timely reimbursement and reporting.
- **Drug utilization reviews** (DUR) are performed by Aetna's pharmacy benefit manager, CaremarkPCS, in addition to the State's required DUR reviews. We perform prospective, concurrent, and retrospective DURs as methods for identifying suspicious activity. DURs also enable enrollees to achieve improved health outcomes, help prevent negative outcomes, improve quality of care, and reduce costs by preventing inappropriate or unsafe drug use. The prospective and concurrent DUR processes are executed using computerized algorithms built into CaremarkPCS' claim history. The system prevents dispensing without further review and/or action by the dispensing pharmacists at the point of sale and creates alerts such as the following:
  - **Soft block alerts** so the pharmacist evaluates the enrollee's drug profile. The alerts offer considerations to the enrollee for discussion with their provider, counseling on appropriate drug use, and/or consultation with the provider concerning the appropriateness of the medication
  - **Hard block alerts** result in a rejection that would require the pharmacist to reach out to the prescribing provider to submit a request for PA and/or to contact the pharmacy help desk for an override prior to dispensing the requested medication
- **Retrospective DUR** adds a second layer of safety for situations that may have a negative clinical impact on an enrollee. Retail and mail prescriptions are reviewed daily for serious drug-to-drug interactions. The prescriber is notified with an actionable, enrollee-specific communication within 72 hours of the claim processing. This program provides near real-time review and intervention focused on increased enrollee safety and increased prescriber engagement. **In 2018, 3,422 drug interaction alerts were sent to prescribers within 72 hours of fill; 8 percent of the prescribers who responded noted that prescribers found intervention information useful 30 percent of the time, and not useful only 7 percent of the time**. A third layer of safety is applied through a program from CaremarkPCS to target high-risk drug classes, focusing on controlled substances and inappropriate use and misuse-related indicators such as poly-pharmacy, provider shopping, high-total controlled substance claims volume, and drugs at risk for FWA. On a quarterly basis, clinical pharmacists evaluate controlled substance claims and available supporting medical data to identify potential medication misuse and inappropriate claims for appropriate intervention. Pharmacists also conduct follow-up activities using physician responses and current claim activity. Situations identified as being potentially inappropriate may be referred to our pharmacy director and case manager for further action. Target drugs include opiates, anti-anxiety and sedative hypnotic agents, muscle relaxants, and central nervous system stimulants.

- **Pharmacy Lock-In Program** allows Aetna to control the over-use of opioids by only allowing an enrollee to obtain their opioids prescription from the same physician and same pharmacy. Some of the enrollees referred to case management are participants in our lock-in program. Based on the various monitoring and trend analyses described previously, we implement or refine interventions to improve prescribing and utilization patterns and to control costs. These interventions may include but are not limited to the following:
  - Identifying prescribing patterns of specific practitioners that warrant outreach and/or education to review inconsistency with nationally recognized treatment protocols
  - Making referrals to the Lock-in Review Committee to evaluate identified enrollees' utilization to determine whether they are candidates for pharmacy or prescriber lock-in
  - Making referrals to FWA, the OIG, or law enforcement agencies for further investigation of enrollees, prescribing practitioners, and pharmacies
  - Identifying and making referrals of enrollees to service coordination for outreach and engagement with a focus on adherence to medication regimens
- **Targeted audits** (e.g., contract, benefit, provider, diagnosis, procedure, specific service, and place of service). Aetna audits 2 percent of manually adjudicated claims, 15 percent of auto-adjudicated claims, and claims with billed charges of $70,000 or greater are subject to 100 percent prepay high-dollar audit review on a daily basis. Each audit includes key departmental issues identified in addition to a summary of financial and procedural accuracy. Aetna finalizes, publishes, and distributes monthly and quarterly audit results to the business units. The reports include trends by error type, claim identification, and analyst identification, which enable the Claim Operations department to conduct continuous quality improvement discussions. Based on audit findings, management staff provide or track additional training as needed.
- **Post-payment reviews** are conducted in collaboration with Cotiviti to perform postpay reviews for all claims using data mining analytics, plus validation of diagnosis-related group accuracy. Cotiviti performs a clinical chart review if improper billing or potential FWA is identified and contacts the provider for adjustment or recoupment as needed. In addition to Cotiviti, we contract with Change Healthcare and Equian to provide multiple types of external claims audits daily to check for billing errors and inconsistencies, service appropriateness, and correct coding.
- **Non-emergency medical transportation fraud scheme detection** highlights red flags. In coordination with our transportation vendor, we use the following methods: analyzing trip logs; performing a random sample of calls/monthly EOB letters to enrollees to verify trips; and auditing transportation vendor claims and reviewing grievance and appeals data. The intention is to identify documentation of trips to a doctor's office when the patient does not have a scheduled appointment; billing for trips that did not take place; cancelled trips or trips for deceased members; transport by ambulance when the member could have been transported by car or other safe mode; falsification of trip reports; and non-licensed drivers or the use of excluded personnel. Additional prevention measures include license and exclusion checks.

Other Methods of Fraud Detection

FWA are detected through several other activities and sources, including the following:

- Universal Web Information Delivery, a reporting application that investigators use to pull data for their desktop audits; FWA investigators can run standard reports to supplement investigations by provider tax ID, national provider identifier, enrollee ID, and procedure codes, among others
- TIPS also reviewed during monthly FWA from other MCOs
- Referrals of suspected FWA by enrollees, providers, and Aetna departments outside the FWA area
- Referrals from law enforcement/State regulatory agencies such as LDH, MFCU, and OIG
- Monitoring of national trends and specific case referrals through Aetna affiliations with national industry groups, including the NHCAA

- Offering a toll-free, 24-hour telephone hotline for reports of actual or suspected FWA
- Maintaining an email address and web form for enrollees and providers to report FWA

Experience with Provider Recovery Collection (2.10.14.1.5)

Aetna uses verified, time-tested policies and procedures (P&Ps) to outline all the steps we take from fraud and abuse identification to pre- and post-recovery efforts. This safeguards us, our providers, and our subcontractors, and helps us proactively manage and analyze prompt reporting of all overpayments identified or recovered, specifying the overpayments due to potential fraud to the State as required by **42 C.F.R. § 438.608(a)**. Aetna policies that protect our recovery efforts include the following:

2018 Louisiana FWA Savings

- Recoveries received: **$224,062**
- Recoveries pursuing: **$1,784,873**
- Flagged savings: **$826,542**
- Prevented loss: **$391,941**

Total program integrity savings: $26,237,246

- Procedures for notifying LDH of network providers' changed circumstance that may affect their eligibility to participate in the Medicaid managed care program
- Retention policies for the treatment of recoveries of overpayments from Aetna to providers, including recoveries of overpayments due to FWA
- Procedures for paying recoveries of overpayments to LDH when we are not permitted to retain the full recovered amount
- Procedures for reporting within 60 calendar days identified excess payments
- Procedures for routinely verifying whether services that have been represented to have been delivered by network providers were received by enrollees
- Procedures for providers to report and return overpayments within 60 days of identification

All overpayment recoveries are administered in accordance with LDH's requirements. We coordinate overpayment reimbursement with LDH to make certain payment recovery is accurately reflected in medical loss ratio calculations and capitation rate setting. Our specific encounters P&Ps help ensure compliance with LDH requirements and include data entry, claims manual adjudication, claims submission, non-contracted provider claims, claims inventory management, and micrographics. Our manual informs providers of their obligations to Aetna and LDH. Under the provider responsibilities section in the provider manual, we explain that providers must monitor and audit their activities to prevent/detect FWA; monitor/report on preventable conditions; retain patient records for the mandated period; ensure that all documentation provided is timely, accurate, and complete; ensure Aetna is the payer of last resort; and report/return any identified overpayments within 60 days. We will comply with all provider manual requirements, including submitting the manual to LDH for approval within 30 days of contract award before disseminating to our providers and submitting major updates within 15 days.

Experience Producing Reports and Proposed Innovations for Reporting Data

Once potential FWA is detected, our program integrity officer is responsible for the investigative process and reporting to LDH. After the investigation is complete, a final report including an executive summary, case notes, and recommendations, including any recovery figure, is presented to the compliance officer and the FWA Committee, when appropriate. This committee reviews the case and develops a corrective action plan. If Aetna finds a credible allegation of fraud at any point in the process, the case is reported to LDH and MFCU. When guided by LDH's workflow process, we pend the investigation and any other actions. For each complaint that warrants full investigation conducted in accordance with **42 C.F.R. §455.15 and §455.16**, Aetna provides LDH, at a minimum, with the provider name, ID number, source, and type; the nature and source of the complaint; the approximate amount of money, if applicable; and any legal or administrative disposition of the case needed to describe the activity regarding the complainant. Aetna sends a monthly report to LDH's Program Integrity Office on all audits performed and overpayments identified and recovered by Aetna or its subcontractors as well as a monthly report

stating all unsolicited provider refunds. We also report any overpayments made to us by LDH within 60 calendar days of identification. Examples of reports we use include the following:

- **The MCO enrollee fraud referral template** is used to evaluate an enrollee case to determine if a referral to LDH is warranted based on the findings. If the investigator has an allegation they cannot validate, yet details of the allegation are substantial, a referral will be made. Once the referral is complete, a workflow is set up; we have seven days to respond, approve, and email to LDH's program integrity and local law enforcement for further action.
- **Provider fraud notice** is used for validated allegations of fraud or abuse, and it includes information to determine if State sanctions are warranted. If so, a workflow is initiated, reviewed, and approved by our supervisor, an email is sent to LDH's PI Medicaid Fraud Control Unit's chief auditor, and then it is passed onto local law enforcement.
- **Provider fraud referral** is used to validate suspected fraud and determine if further action is required. If action is required, it is sent to LDH's PI for evaluation of sanctions and to MFCU to determine if a criminal investigation is warranted. Once workflows are established, reviewed, and approved, our supervisor will send the information to the provider fraud referral to LDH's PI and MFCU chief auditor and chief investigator for evaluation and local law enforcement review.
- **The SIU Medicaid Data Analytics reports** that track new, active, ongoing, and closed cases. The first one is a monthly TIPS report with data coming from the Case Tracker system (the SIU application that holds all referral/case detailed information and documentation). This report includes any active, open, or closed referrals/cases from the previous month, and is submitted to LDH by the SIU supervisor. The second report is the 2.17 Schedule AC Fraud and Abuse Activity report that lists all new, active, and closed fraud and abuse cases for the year and comes from our Case Tracker system and claims database system. The Data Analytics team submits this to internal employees in the Finance department. The third report is the PI 145 FWA quarterly report, created using our Case Tracker database, and is given to the FWA supervisor and investigators for review. Once completed, it is sent to compliance for LDH submission.

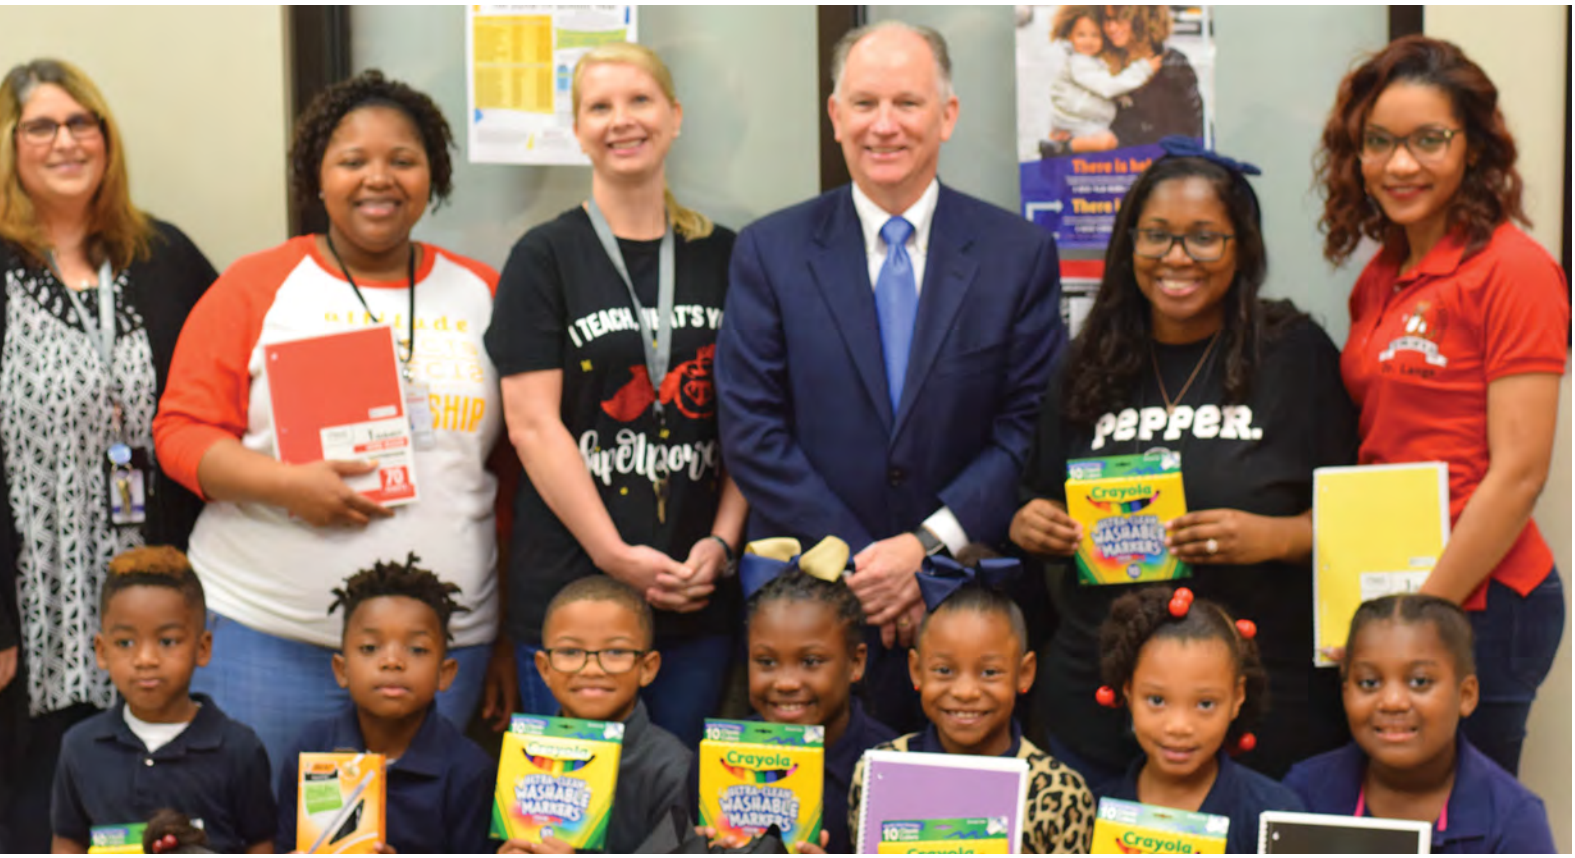
Coordination with Commercial and Medicare

As part of a national organization, our program integrity officer has open, immediate access to Aetna's corporate FWA leadership and tools to support our FWA prevention and detection efforts. This creates synergy with our corporate FWA investigators who monitor commercial and Medicare lines of business to leverage corporate-wide data. This economy of scale improves Aetna's ability to detect and remedy incidents of FWA. For example, if a provider improperly bills Medicare, FWA investigators check all lines of business for the same allegation, including Medicaid, which gives us additional leads through data mining we may not otherwise find. Similarly, Aetna's national Medical Economics department advises the local health plan regarding current trends and schemes occurring around the country.

Innovations for Reporting Data (2.10.14.2)

Enrollee-focused reporting innovation: We are in the process of creating our pending claims notification phone app. We will be providing claim notifications and other popup information in our enrollee mobile application to catch inappropriate claim billing after payment. This will allow the enrollee to either confirm or deny that the claim was theirs. We will provide easy-to-follow instructions when a member believes the claim was fraudulently submitted. **Internal-focused reporting innovation:** Healthcare Fraud Shield is our new lead generation tool, **a platform that comes equipped with approximately 600 business rules and algorithms** that are maintained and updated quarterly to prevent FWA. HCFS assigns a risk score for each provider or enrollee and uses application screens to show all leads/billing activity for follow-up. The tool can download the past 12 months' worth of claims for each lead. HCFS contains provider, enrollee, and alert dashboards that show the top potential FWA providers and enrollees, top scoring specialties, score analysis, and top changes in provider risk scores.

2.10.15 Veteran Initiative and Hudson Initiative Programs Participation



Each year, Aetna chooses schools in underserved communities to support throughout the school year. In the spring we help to restock the school supplies that many teachers are replacing with their own money for their classroom. We bring the basics such as crayons, markers, and pencils, as well as help to replace other much-needed supplies like copy paper, tissue, hand sanitizers, and cleaning supplies. In 2018, we served Donaldsonville Elementary School, providing essential items to over 300 students.

2.10.15 Veteran-Owned and Service-Connected Disabled Veteran-Owned Small Entrepreneurships (Veteran Initiative) and Louisiana Initiative for Small Entrepreneurships (Hudson Initiative)

Our commitment to veteran-owned and service-connected disabled veteran-owned small entrepreneurships (Veteran Initiative) and those participating in the Louisiana Initiative for Small Entrepreneurs (Hudson Initiative) helps us to better serve the communities in which we live and work. At Aetna, we believe that solutions for the people need to be of the people. This philosophy informs our approach not only to subcontracting, but also continues our tradition of Louisianans serving Louisianans.

Minority Business News (MBN USA) recognized Aetna among the 2017 Corporate 101: America's Most Admired Corporations for Supplier Diversity for demonstrated commitment to growing and developing minority-owned enterprises and "positively impacting the manner in which our world does business."

Aetna supports LDH's commitment to promoting full and equal business opportunities in State contracting and will comply with all federal and State laws and regulations, Healthy Louisiana policies, and rules regarding the use of Veteran and Hudson Initiative small entrepreneurships. Using local suppliers and subcontractors is valuable to Aetna—giving back to the community and gaining local insights improves our ability to serve our members. In our view, this is fundamental to success and innovation in a multicultural world. During our current contract, we maximized our use of Veteran and Hudson Initiative small entrepreneurships, and going forward, we will continue that commitment.

Aetna has made a good faith effort to identify services of certified small entrepreneurships to maximize and fulfill our subcontracting needs. In **Table 2.10.15-1,** we identify Louisiana Veteran and Hudson Initiative small entrepreneurships Aetna subcontracts for the Healthy Louisiana program.

Table 2.10.15-1: Veteran and Hudson Initiatives Subcontractors

Subcontractor Name	Hudson, Veteran, or Service-Connected Disabled Veteran/ Certification Number	Description of Work to be Performed	Anticipated Dollar Value of the Subcontract (3-Year Total)

Commitment to Supplier and Subcontractor Diversity

To support the local market, Aetna looks for ways to use businesses and suppliers that are certified as Veteran and Hudson Initiative small entrepreneurships. Supplier, subcontractor, and employee diversity can help us better understand and serve our multicultural markets, improve our products and services, and create a stronger, more vital company. By evaluating a diverse slate of subcontractors, we can lower costs and increase innovation. We also gain valuable insights into multicultural markets to better serve the communities where we live and work.

Leroy's LipSmack'n Lemonade

Aetna Better Health of Louisiana is especially proud to include Leroy's LipSmack'n Lemonade as one of our valued Hudson Initiative small entrepreneurs. We met owner Leroy Hayward III at a March of Dimes event we sponsored in 2018, when he was 11 years old. Leroy has growth hormone deficiency and hearing loss in both ears. His passion for lemonade and entrepreneurship prompted him to enter the Louisiana Lemonade Day contest, an annual event for young lemonade entrepreneurs[1]. Leroy's LipSmack'n Lemonade is the only Lemonade Day Entrepreneur of the Year award-winner with whom we subcontract. Leroy's lemonade stand will provide natural refreshment at Aetna Better Health of Louisiana community and employee engagement events.

We strive to be inclusive in our sourcing activities. We have established proactive efforts to reach Veteran and Hudson Initiative small entrepreneurships. Other Aetna Medicaid organization health plans have achieved a level of success in purchasing through historically underutilized subcontractors in support of our national portfolio. We continue to look for new opportunities to integrate them into the way we do business. As in the past, Aetna will report to the State our expenditures for certified Veteran and Hudson Initiative small entrepreneurships in Louisiana.

Supplier Diversity Program Objectives

Aetna's supplier diversity program has two major objectives. The first objective is to increase first-tier dollars procured directly through historically underutilized subcontractors such as Veteran and Hudson Initiative small entrepreneurships. Each year, Aetna establishes both enterprise and business-area subcontractor and supplier diversity targets that are directly tied to our management scorecard. We track and communicate performance to key business area leaders each month and to our Executive Committee each quarter. As an

DiversityInc named Aetna once again to its Top 50 Companies for Diversity in 2018. Aetna placed #30 on the Top 50 list and #12 on the Top Companies for Employee Resource Groups Specialty List.

[1] Randall, Kayla, "Summer Sippin': Leroy's LipSmack'n Lemonade," 225 Magazine (June 1, 2016): accessed April 12, 2019; https://www.225batonrouge.com/food-drink/summer-sippin-leroys-lipsmackn-lemonade.

enterprise, we strive to demonstrate year-over-year growth in our supplier diversity expense. The second objective of our program is to develop second-tier purchasing partnership relationships. Aetna requests our prime suppliers to meet second-tier targets in support of both our diversity strategy and business needs. We believe that to be successful, not only do we have to support historically underutilized subcontractors, but so must the other companies with whom we do business.

Aetna's Community Involvement

In addition to maximizing our investment in Veteran and Hudson Initiative small entrepreneurships, Aetna holds a national corporate membership with the following diversity organizations, through which we gain insights that inform our strategy and approach to diversity with our suppliers:

- National Minority Supplier Development Council
- Women's Business Enterprise National Council
- National LGBT Chamber of Commerce

Aetna also participates on the following boards and councils:

- Board of Directors for the Greater New England Minority Supplier Development Council
- Procurement Council through the National LGBT Chamber of Commerce

We remain committed to maximizing supplier diversity and contracting with Louisiana-certified Veteran and Hudson Initiative small entrepreneurships to better serve the Louisiana communities where we live and work. By working with local small entrepreneurships, we uphold our commitment to quality, ready access, and innovation to maximize enrollee health, advance health equity, and address social determinants of health within a flexible, value-based approach.

Financial Statements - Statutory Basis

Aetna Better Health, Inc.
(a Louisiana corporation)

Year Ended December 31, 2015
with Independent Auditors' Report

KPMG LLP
One Financial Plaza
755 Main Street
Hartford, CT 06103

Independent Auditors' Report

The Board of Directors
Aetna Better Health, Inc. (a Louisiana corporation):

Report on the Financial Statements

We have audited the accompanying financial statements of Aetna Better Health, Inc. (a Louisiana corporation) (the "Company"), which comprises the statutory statements of admitted assets, liabilities, capital and surplus as of December 31, 2015, and the related statutory statements of revenue and expenses, changes in capital and surplus, and cash flows for the year then ended, and the related notes to the statutory financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 2 to the financial statements, the financial statements are prepared by Aetna Better Health, Inc. (a Louisiana corporation) using statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance, which is a basis of accounting other than U.S. generally accepted accounting principles. Accordingly, the financial statements are not intended to be presented in accordance with U.S. generally accepted accounting principles.

The effects on the financial statements of the variances between the statutory accounting practices and U.S. generally accepted accounting principles as described in Note 2, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the variances between statutory accounting practices and U.S. generally accepted accounting principles discussed in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles paragraph, the financial statements referred to above do not present fairly, in accordance with U.S. generally accepted accounting principles, the financial position of Aetna Better Health, Inc. (a Louisiana corporation) as of December 31, 2015, or the results of its operations or its cash flows for the year then ended.

Opinion on Statutory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and capital and surplus of Aetna Better Health, Inc. (a Louisiana corporation) as of December 31, 2015, and the results of its operation and its cash flows for the year then ended, in accordance with statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance described in Note 2.

Other Matter

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information included in the Supplemental Investment Risks Interrogatories and Summary Investment Schedule is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Louisiana Department of Insurance. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

AETNA BETTER HEALTH, INC.
(a Louisiana corporation)

NOTES TO STATUTORY FINANCIAL STATEMENTS
December 31, 2015

1. Organization and operation

Aetna Better Health, Inc. (a Louisiana corporation) (the "Company") is a wholly-owned subsidiary of Aetna Health Holdings, LLC, whose ultimate parent is Aetna Inc. ("Aetna").

The Company was incorporated in the State of Louisiana on July 27, 2010. Effective February 1, 2015, the Company began administering a health plan for individuals who qualify for Medicaid coverage in the State of Louisiana. The contract with the Louisiana Department of Health and Hospitals is for a term through January 31, 2018. In the event the contract is not renewed, the Company has received a guarantee of financial support by its parent through December 31, 2017. The conditions of such support stipulate that the parent has the ability to provide the necessary financial support to the Company and that there are no restrictions on the parent to provide such support.

2. Summary of significant accounting policies

Accounting practices

The accompanying statutory financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Louisiana Department of Insurance ("Louisiana Department") ("Louisiana Accounting Practices"). The Louisiana Department recognizes only statutory accounting practices prescribed or permitted by the State of Louisiana for determining and reporting the financial condition and results of operations of an insurance company, which include accounting practices and procedures adopted by the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP"). The Company's net loss and capital and surplus as stated on a NAIC SAP basis and on the basis of practices prescribed or permitted by the State of Louisiana were the same as of and for the year ended December 31, 2015.

The Louisiana Accounting Practices vary from U.S. generally accepted accounting principles ("GAAP"). The primary differences include the following:

- Certain assets, designated as nonadmitted assets (other receivables, which are nonadmitted in accordance with Statements of Statutory Accounting Principles ("SSAP") No. 4 - *Assets and Nonadmitted Assets*) are not recorded as assets, but are charged to surplus. Assets having economic value other than those which can be used to fulfill policyholder obligations, or those assets which are unavailable due to encumbrances or other third party interests should not be recognized on the balance sheet, and are, therefore, considered nonadmitted;
- Bonds are recorded at amortized cost except for those with an NAIC designation of 3 through 6, which are reported at the lower of amortized cost or fair value. Therefore, changes in unrealized gains and losses for those securities held at amortized cost are not reflected in the financial statements. Under GAAP, bonds classified as available for sale are recorded at fair value, and related changes in unrealized gains and losses are recorded as a component of equity, net of deferred federal income taxes; and
- Deferred tax assets and liabilities are determined and admitted in accordance with SSAP No. 101 - *Income Taxes* ("SSAP No. 101"). Changes in net deferred tax assets and liabilities are reflected as changes in surplus, whereas under U.S. GAAP, changes in such assets and liabilities are reflected in net income. In addition, statutory accounting requires consideration of a statutory allowance adjustment in the calculation of adjusted gross deferred tax assets and an admissibility test for deferred tax assets.

There were no permitted practices by the State of Louisiana for the year ended December 31, 2015.

Use of estimates in the preparation of the financial statements

The preparation of these financial statements in conformity with Louisiana Accounting Practices requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses. Actual results could differ from those estimates.

Significant accounting policies

The Company applies the following significant accounting policies:

Cash, cash equivalents and short-term investments

Cash, cash equivalents and short-term investments, consisting primarily of money market instruments and other debt issues with an original maturity of up to one year, are carried at amortized cost. Short-term investments consist primarily of investments purchased with an original maturity date of greater than three months but less than one year. Cash equivalents consist of highly liquid instruments, which mature within three months from the date of purchase. The carrying amount of cash, cash equivalents and short-term investments approximates fair value.

Bonds

Bonds, which include special deposits as discussed more fully in Note 4, are carried at amortized cost except for those bonds with an NAIC designation of 3 through 6, which are carried at the lower of amortized cost or fair value. The amount carried at fair value is not material to the financial statements. Bond premiums and discounts are amortized using the scientific interest method. When quoted prices in active markets for identical assets are available, the Company uses these quoted market prices to determine the fair value of bonds. This is used primarily for U.S. government securities. In other cases where a quoted market price for identical assets in an active market is either not available or not observable, the Company estimates fair values using valuation methodologies based on available and observable market information or by using a matrix pricing model. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. The Company had no investments where fair value was determined using broker quotes or an internal analysis of financial performance and cash flow projections at December 31, 2015. Bonds include all investments whose maturity is greater than one year when purchased.

The Company periodically reviews its bonds to determine whether a decline in fair value below the carrying value is other-than-temporary. For bonds, other than loan-backed and structured securities, an other-than-temporary impairment ("OTTI") shall be recorded if it is probable that the Company will be unable to collect all amounts due according to the contractual terms in effect at the date of acquisition. Declines deemed to be OTTI in the cost basis are recognized as realized capital losses. Yield-related impairments are deemed other-than-temporary when the Company intends to sell an investment at the reporting date before recovery of the cost of the investment.

For loan-backed and structured securities, the Company records OTTI when the fair value of the loan-backed or structured security is less than the amortized cost basis at the balance sheet date and (1) the Company intends to sell the investment, or (2) the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the security, even if it does not intend to sell the security and has the intent and ability to hold. If it is determined an OTTI has occurred because of (1) or (2), the amount of the OTTI is equal to the difference between the amortized cost and the fair value of the security at the balance sheet date and this difference is recorded as a realized capital loss. If it is determined an OTTI has occurred because of (3), the amount of the OTTI is equal to the difference between the amortized cost and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate and this difference is also accounted for as a realized capital loss.

The Company analyzes all relevant facts and circumstances for each investment when performing its analysis to determine whether an OTTI exists. Among the factors considered in evaluating whether a decline is other-than-temporary, management considers whether the decline in fair value results from a change in the quality of the investment security itself, whether the decline results from a downward movement in the market as a whole, the prospects for realizing the carrying value of the bond based on the investee's current and short-term prospects for recovery and other factors. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations and the risk that facts and circumstances factored into our assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods may result in a current period decision to sell securities that were not other-than-temporarily-impaired in prior reporting periods.

Investment income due and accrued

Accrued investment income consists primarily of interest. Interest is recognized on an accrual basis and dividends are recorded as earned on the ex-dividend date. Due and accrued income is not recorded on: (a) bonds in default; and (b) bonds delinquent more than 90 days or where collection of interest is improbable. At December 31, 2015, the Company did not have any nonadmitted investment income due and accrued.

Premiums and amounts due and unpaid

Premium revenue for prepaid health care products is recognized as income in the month in which enrollees are entitled to health care services.

Nonadmitted amounts consist of all premiums due and unpaid greater than 90 days past due, with the exception of amounts due under government insured plans, which may be admitted assets under certain circumstances.

The Company did not have any premiums or amounts due and unpaid at December 31, 2015.

Hospital and medical costs and claims adjustment expenses and related reserves

Hospital and medical costs consist principally of fee-for-service medical claims and capitation costs. Claims unpaid and aggregate health claim reserves include the Company's estimate of payments to be made on claims reported but not yet paid and for health care services rendered to enrollees but not yet reported to the Company as of the Statutory Statements of Assets and Liabilities, Capital and Surplus date. Such estimates are developed using actuarial principles and assumptions, which consider, among other things, historical and projected claim submission and processing payment patterns, medical cost trends, historical utilization of health care services, claim inventory levels, medical inflation, contract requirement changes in membership and product mix, seasonality and other relevant factors. The Company reflects changes in estimates in hospital and medical costs in the Statutory Statements of Revenue and Expenses in the period they are determined. Capitation costs, which are recorded in hospital and medical expenses in the Statutory Statements of Revenue and Expenses, represent contractual monthly fees paid to participating physicians and other medical providers for providing medical care, regardless of the medical services provided to the enrollee.

The Company uses the triangulation method to estimate reserves for claims incurred but not reported. The method of triangulation makes estimates of completion factors that are then applied to the total paid claims (net of coordination of benefits) to date for each incurral month. This provides an estimate of the total projected incurred claims and total amount outstanding or claims incurred but not reported (claims unpaid). For the most current dates of service where there is insufficient paid claim data to rely solely on the triangulation method, the Company examines cost and utilization trends as well as environmental factors, plan changes, provider contracts, changes in membership and/or benefits, and historical seasonal patterns to estimate the reserve required for these months.

Claims adjustment expenses, which include cost containment expenses, represent the costs incurred related to the claim settlement process such as costs to record, process and adjust claims. These expenses are included in the Company's management agreement with an affiliate described in Note 7.

Aggregate health policy reserves and related expenses

Premium deficiency reserves ("PDR") are recognized when it is probable that the expected future hospital and medical costs, including maintenance costs, will exceed anticipated future premiums and reinsurance recoveries on existing contracts. Where allowed, anticipated investment income is considered in the calculation of any PDR. For purposes of calculating a PDR, contracts are grouped in manner consistent with the method of acquiring, servicing and measuring the profitability of such contracts. The PDR balance of $475,465 was included in aggregate health policy reserves in the Statutory Statements of Liabilities, Capital and Surplus at December 31, 2015.

Fees Paid to the Federal Government by Health Insurers

Beginning January 1, 2014, SSAP No. 106 – *Affordable Care Act Assessments* ("SSAP No. 106") required (1) that the health insurer fee be recognized in full on January 1 of the fee year (the calendar year in which the assessment must be paid to the federal government), in the operating expense category of insurance taxes, licenses and fees, excluding federal income taxes and (2) that in each data year preceding a fee year a reporting entity pro-ratably accrue by reclassifying from unassigned funds (surplus) to aggregate write-ins for special surplus funds an amount equal to its estimated subsequent fee year assessment. This reclassification has no impact on total capital and surplus and is reversed in full on January 1 of the fee year beginning with fee years starting on January 1, 2015 and after.

Reinsurance

In the normal course of business, the Company seeks to reduce the loss that may arise from catastrophes or other events that cause unfavorable underwriting results and to help balance its risks and capital by reinsuring certain levels of risk with other insurance enterprises. The reinsurance coverage does not relieve the Company of its primary obligations. Reinsurance premiums and reserves related to reinsured business are accounted for on a basis consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Premiums ceded for medical losses and the related unpaid reserves have been reported as reductions of these items. The reinsurance agreements are more fully discussed in Note 9.

Federal income taxes

The Company is included in the consolidated federal income tax return of its parent company, Aetna and Aetna's other wholly-owned subsidiaries pursuant to the terms of a tax sharing agreement. In accordance with a written tax sharing agreement with an affiliate, the Company's current federal income tax provisions are generally computed as if the Company were filing a separate federal income tax return; current income tax benefits, including those resulting from net operating losses, are recognized to the extent realized in the consolidated return. Pursuant to this agreement, the Company has the enforceable right to recoup federal income taxes paid in prior years in the event of future net losses, which it may incur, or to recoup its net losses carried forward as an offset to future net income subject to federal income taxes.

Income taxes are accounted for under the asset and liability method. Deferred income tax assets ("DTAs") and liabilities ("DTLs") represent the expected future tax consequences of temporary differences generated by statutory accounting as defined in SSAP No. 101. DTAs and DTLs are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. DTAs and DTLs are computed by means of identifying temporary differences which are measured using a balance sheet approach whereby statutory and tax basis balance sheets are compared. Current income tax recoverables include all current income taxes, including interest, reasonably expected to be recovered in a subsequent accounting period.

Pursuant to SSAP No. 101, gross DTAs are first reduced by a statutory valuation allowance adjustment to an amount that is more likely than not to be realized ("adjusted gross DTAs"). Adjusted gross DTAs are then admitted in an amount equal to the sum of paragraphs a. b. and c. below:

a. Federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with Internal Revenue Service ("IRS") tax loss carryback provisions.

b. The amount of adjusted gross DTAs, after the application of paragraph a. above, expected to be realized within the applicable period and that is no greater than the applicable percentage as determined using the applicable Realization Threshold Limitation Table. The applicable period refers to the number of years in which the DTA will reverse in the Company's tax return and the applicable percentage refers to the percentage of the Company's statutory capital and surplus as required to be shown on the statutory balance sheet adjusted to exclude any net DTAs, electronic data processing equipment and operating system software and any net positive goodwill ("Stat Cap ExDTA").

   The Realization Threshold Limitation Tables allow DTAs to be admitted based upon either realization within 3 years and 15% of Stat Cap ExDTA, 1 year and 10% of Stat Cap ExDTA, or no DTA admitted pursuant to this paragraph b. In general, the Realization Threshold Limitation Tables allow the Company to admit more DTAs if total DTAs as reported by the Company are a smaller percentage of statutory capital and surplus.

c. The amount of gross DTAs, after the application of paragraphs a. and b. above that can be offset against existing gross DTLs. In applying this offset, the Company considers the character (i.e. ordinary versus capital) of the DTAs and DTLs such that offsetting would be permitted in the tax return under existing enacted federal income tax laws and regulations and the reversal patterns of temporary differences.

Changes in DTAs and DTLs are recognized as a separate component of gains and losses in surplus ("Change in net deferred income tax") except to the extent allocated to changes in unrealized gains and losses. Changes in DTAs and DTLs allocated to unrealized gains and losses are netted against the related changes in unrealized gains and losses and are reported as "Change in net unrealized capital gains (losses)", also a separate component of gains and losses in surplus.

Going concern

Effective December 31, 2016, the Company will adopt amended accounting guidance related to management's evaluation of whether there is a substantial doubt about the entity's ability to continue as a going concern and the related disclosures and will make disclosures at that time and thereafter pursuant to the guidance.

3. Accounting changes and corrections of errors

During 2016, the Company recorded a correction to current federal and foreign income tax recoverable and interest thereon in the amount of $1,009,750. This adjustment is further discussed in Note 16.

The Company did not have any accounting changes in the year ended December 31, 2015.

4. Special deposits

Special deposits, included in bonds, consist of U.S. Treasury Notes, at amortized cost, which approximates fair value, of $1,000,000 at December 31, 2015. These assets are restricted in accordance with certain state requirements relating to HMOs.

5. Bonds and other financial instruments

The following is a summary of bonds and other financial instruments, which include special deposits, cash equivalents, and short-term investments, at December 31, 2015:

	Amortized cost	Statutory carrying value	Gross unrealized gains	Gross unrealized losses	Fair value
U.S. Government	$54,515,204	$54,515,204	$20,352	-	$54,535,556
Industrial and miscellaneous (unaffiliated)	1,000,000	1,000,000	-	-	1,000,000
Total	$55,515,204	$55,515,204	$20,352	-	$55,535,556

At December 31, 2015, the Company did not have any bonds and other financial instruments, which include special deposits, with unrealized losses.

The contractual or expected maturities of bonds, cash equivalents and short-term investments at December 31, 2015 were as follows:

	Carrying value	Fair value
Due one year or less	$29,425,007	$29,425,007
Due after one year through five years	26,090,197	26,110,549
	$55,515,204	$55,535,556

The maturity for a mortgage pass-through security, included in U.S. Government and U.S. special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of governments and their political subdivisions, is not based on stated maturity, but instead is based on prepayment assumptions. Prepayment assumptions are calculated utilizing published repayment factors that estimate the prepayment rates on the mortgages in the Federal National Mortgage Association ("FNMA") and Government National Mortgage Association ("GNMA") pools.

Proceeds from the sales of bonds and other financial instruments were approximately $13,161,000 in 2015. There were no proceeds from the maturities of bonds in 2015. Gross realized gains on sales of bonds were approximately $46,000 in 2015. Gross realized losses on sales of bonds was approximately $21,000 in 2015. Included in net realized capital losses for 2015 were approximately $248,000 of OTTI charges on debt securities that were in an unrealized loss position. The Company conducts regular reviews of its bond investments to assess whether a decline in fair value below carrying value is an OTTI. The Company will also recognize an OTTI on debt securities when we intend to sell a security that is in an unrealized loss position. Declines deemed to be OTTI are recognized as realized capital losses.

There was no investment income due and accrued excluded from surplus at December 31, 2015.

Restricted assets (including pledged)

The Company had $1,000,000 on deposit with other regulatory bodies, which represented 1.13% of total admitted assets at December 31, 2015.

The Company did not have any assets pledged as collateral not captured in other categories at December 31, 2015.

The Company did not have any other restricted assets at December 31, 2015.

6. Financial instruments

Financial instruments measured at fair value in the financial statements

Certain of the Company's financial instruments are measured at fair value in the financial statements. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by U.S. generally accepted accounting principles. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, we use these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, we determine fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

The statutory carrying values and estimated fair values of the Company's financial instruments at December 31, 2015 were as follows:

	Aggregate fair value	Admitted assets	Level 1	Level 2	Level 3	Not practicable (carrying value)
Bonds, short-term investments and cash equivalents	$55,535,556	$55,515,204	$54,532,765	$1,002,791	-	-
Total	$55,535,556	$55,515,204	$54,532,765	$1,002,791	-	-

The valuation methods and assumptions used by the Company in estimating the fair value of debt securities are discussed in Note 2.

There were no material realized and unrealized capital gains, purchases, sales, settlements, or transfers into or out of the Company's Level 3 financial assets during 2015. There were no transfers between the Company's Level 1 or 2 financial assets during 2015.

In evaluating the Company's management of interest rate and liquidity risk and currency exposures, the fair values of all assets and liabilities should be taken into consideration, not only those presented above.

7. Information concerning Parent, subsidiaries, and affiliates

As of and for the year ended December 31, 2015, the Company had the following significant transactions with affiliates:

The Company and Aetna Medicaid Administrators LLC ("AMA"), indirectly a wholly-owned subsidiary of Aetna, are parties to an administrative services agreement, under which AMA provides certain administrative services, including accounting and processing of premiums and claims. Under this agreement, the Company will remit a percentage of its earned premium revenue, as applicable, to AMA as a fee. For these services, the Company was charged $14,218,553 in 2015. The agreement also provides for interest on all intercompany balances. There was no interest earned (incurred) on amounts due from (to) affiliates in 2015.

The Company has coverage for certain litigation exposures ($10,000,000 per claim and in the aggregate including defense costs) through an affiliated captive insurance company.

As explained in Note 2, the Company participates in a tax sharing agreement with Aetna and Aetna's other subsidiaries. All federal income tax receivables/payables were due from/due to Aetna.

Amounts due to and due from affiliates shown in the accompanying Statutory Statements of Assets, Liabilities, Capital and Surplus include the Company's net receipts and disbursements processed by affiliates and transactions related to its administrative services agreement with AMA.

At December 31, 2015, the Company had the following amounts due to affiliates:

	December 31, 2015
Amounts due to affiliates	
Aetna Inc.	$10,237,657
Aetna Medicaid Administrators LLC	3,980,896
	$14,218,553

The Company had no amounts due from affiliates at December 31, 2015.

The terms of settlement require that these amounts be settled within 45 days after the end of the calendar quarter.

8. Income taxes

The components of the net DTAs recognized in the Company's Statutory Statements of Assets and Liabilities, Capital and Surplus are as follows:

	December 31, 2015		
	Ordinary	Capital	Total
Gross DTAs	$1,535,388	$86,806	$1,622,194
Statutory valuation allowance adjustment	(1,533,871)	(86,806)	(1,620,677)
Adjusted gross DTAs	1,517	-	1,517
DTAs nonadmitted	-	-	-
Subtotal net admitted DTAs	1,517	-	1,517
DTLs	-	(1,517)	(1,517)
Net admitted DTAs	$1,517	$(1,517)	-

The amount of admitted gross DTAs admitted under each component of SSAP No. 101 is as follows:

	December 31, 2015		
	Ordinary	Capital	Total
(a) Federal income taxes paid in prior years recoverable through loss carrybacks	$1,365	-	$1,365
(b) Adjusted gross DTAs expected to be realized (excluding the amount of DTAs) after application of the threshold limitations (the lesser of (b)1 and (b)2 below):	-	-	-
1. Adjusted gross DTAs expected to be realized following the balance sheet date	-	-	-
2. Adjusted gross DTAs allowed per limitation threshold	N/A	N/A	$2,450,441
(c) Adjusted gross DTAs (excluding the amount of DTAs from (a) and (b) above) offset by gross DTLs	152	-	152
(d) DTAs admitted as the result of application of SSAP No. 101	$1,517	-	$1,517

	2015
(a) Ratio percentage used to determine recovery period and threshold limitation amount	292%
(b) Amount of adjusted capital and surplus used to determine recovery period threshold limitation in (b)2 above	$23,494,662

There was no impact of tax planning strategies on the Company's adjusted gross DTAs or net admitted adjusted gross DTAs at December 31, 2015. The Company's tax-planning strategies did not include the use of reinsurance.

There are no DTLs that were not recognized at December 31, 2015.

The benefit for income taxes for the year ended December 31, 2015 were as follows:

	December 31, 2015
Federal income tax benefit on operations	$(6,118,234)
Federal income tax on net capital gains	8,591
Federal income tax benefit incurred	$(6,109,643)

The tax effects of temporary differences that gave rise to deferred tax assets and liabilities at December 31, 2015 were as follows:

	December 31, 2015
DTAs:	
Ordinary	
Claims unpaid	$1,144,585
Premium deficiency reserve	166,413
Provider advances – nonadmitted	224,390
Total ordinary DTAs	1,535,388
Statutory valuation allowance adjustment	(1,533,871)
Nonadmitted ordinary DTAs	-
Admitted ordinary DTAs	1,517
Capital	
Investments - impairment	86,806
Total admitted capital DTAs	86,806
Statutory valuation allowance adjustment	(86,806)
Nonadmitted capital DTAs	-
Admitted capital DTAs	-
Admitted DTAs	1,517
DTLs:	
Ordinary	
Ordinary DTLs	-
Capital	
Investments	1,517
Capital DTLs	1,517
Total DTLs	1,517
Net admitted DTAs	-

The change in net deferred income taxes is comprised of the following:

	December 31		
	2015	2014	Change
Total DTAs	$1,517	-	$1,517
Total DTLs	(1,517)	-	(1,517)
Net DTAs/(DTLs)	-	-	-
Tax effect of unrealized gains (losses)			-
Change in net deferred income tax			-

The valuation allowance adjustment to gross DTAs was $1,620,677 for December 31, 2015.

The benefit for federal income taxes is different from that which would be obtained by applying the statutory federal income tax rate to income before income taxes. The items causing this difference are as follows:

	December 31, 2015	Effective tax rate
Benefit computed at statutory rate	$(6,647,340)	35.0%
Other permanent items	(5,673)	0.0%
Transfer pricing adjustment	(852,917)	4.5%
Change in nonadmitted assets	(224,390)	1.2%
Change in statutory valuation allowance adjustment	1,620,677	(8.5)%
Total	$(6,109,643)	32.2%
Federal and foreign income tax benefit	$(6,109,643)	32.2%
Change in net deferred income taxes	-	0.0%
Total statutory income taxes	$(6,109,643)	32.2%

The transfer pricing adjustment allows taxpayers to apply different methods to price current period intercompany services at arm's length prices as compared to what would be charged to an unrelated entity, which results in a permanent deduction for tax reporting purposes.

At December 31, 2015, the Company had no net capital loss or net operating loss carryforwards for tax purposes.

There are no federal income taxes incurred that are available for recoupment in the event of future net losses for the year ended December 31, 2015.

The Company did not report any deposits as admitted assets under Internal Revenue Code Section 6603 at December 31, 2015.

At December 31, 2015, the Company's Federal Income Tax Return was consolidated with the following entities:

As explained in Note 2, the Company participates in a tax sharing agreement with its parent and affiliates.

The Company does not have any tax loss contingencies for which it is reasonably possible that the total liability will significantly increase within twelve months of the reporting date.

The Company is subject to Louisiana premium taxes. Premium tax expenses were recorded in general administrative expenses in the Statutory Statements of Revenue and Expenses. Premium tax expenses were $3,813,410 for the year ended December 31, 2015. The Company had premium taxes payable of $3,813,410 at December 31, 2015 which was recorded as general expenses due or accrued in the Statutory Statements of Liabilities.

9. Reinsurance

Effective February 1, 2015, the Company and Berkley Life and Health Insurance Company ("Berkley") entered into an excess loss reinsurance agreement for Medicaid only dual eligible members. Under this agreement, Berkley is liable for 90% of covered expenses in excess of the specific deductible of $350,000 per covered member, with a maximum reimbursement of $5,000,000 per member per agreement year. The Company paid reinsurance premiums of $282,984 in 2015.

10. Change in claims unpaid, unpaid claims adjustment expense, and aggregate health claim reserves

The following table shows the components of the change in claims unpaid, unpaid claims adjustment expense and aggregate health claim reserves for the year ended December 31, 2015:

	2015
Balance, January 1	-
Health care receivable	-
Balance, January 1, net of health care receivable	-
Incurred related to:	
Current year	$183,167,045
Prior years	-
Total incurred	183,167,045
Paid related to:	
Current year	136,729,874
Prior years	-
Total paid	136,729,874
Balance, December 31, net of health care receivable	46,437,171
Health care receivable	-
Balance, December 31	$46,437,171

Net coordination of benefits is implicit in the claims incurred but not reported calculation and could not be specifically identified.

11. Capital and surplus, shareholder's dividend restrictions and quasi-reorganizations

The Company had 10,000 shares of common stock with no par value authorized, with 1,000 shares issued and outstanding at December 31, 2015.

The Company did not have any preferred stock outstanding at December 31, 2015.

Dividend restrictions

No domestic stock insurer shall declare and pay any dividends to its stockholders unless its capital is fully paid in cash and is unimpaired and it has a surplus beyond its capital stock and the initial minimum surplus required and all other liabilities equal to fifteen percent of its capital stock, provided that this restriction shall not apply to an insurer when its paid-in capital and surplus exceed the minimum required by the Louisiana Department Code by one hundred percent or more.

At December 31, 2015, there was no portion of the Company's profits that may be paid as ordinary dividends to stockholders.

The Company did not pay any dividends in 2015. The Company received capital contributions in the amounts of $24,000,000 and $10,000,000 from its parent on December 28 and March 31, 2015, respectively. The Louisiana Department approved these transactions on December 28 and March 30, 2015, respectively.

There were no restrictions placed on the Company's surplus, including for whom the surplus was being held at December 31, 2015, except as noted in Note 13.

The Company did not hold any stock for any special purposes at December 31, 2015.

Changes in the balances of special surplus funds from the prior year are due to the accrual of estimated ACA health insurer fees reclassified from unassigned funds or surplus to aggregate write-ins for special surplus funds as discussed more fully in Notes 2 and 17.

At December 31, 2015, there was no portion of unassigned funds or surplus that was represented or reduced by unrealized gains and losses.

The Company did not have any special surplus funds or surplus notes at December 31, 2015.

12. Contingencies

Litigation and Regulatory Proceedings

The following description of litigation and regulatory proceedings covers Aetna Inc. and certain of its subsidiaries, including the Company (collectively, "we", "our" or "us"). Certain of the proceedings described below may not impact the Company directly but may have an indirect impact on the Company as the Company is a member of the Aetna holding company group.

Out-of-Network Benefit Proceedings

We are named as a defendant in several purported class actions and individual lawsuits arising out of our practices related to the payment of claims for services rendered to our members by health care providers with whom we do not have a contract ("out-of-network providers"). Among other things, these lawsuits allege that we paid too little to our health plan members and/or providers for these services, among other reasons, because of our use of data provided by Ingenix, Inc., a subsidiary of one of our competitors ("Ingenix"). Other major health insurers are the subject of similar litigation or have settled similar litigation.

Various plaintiffs who are health care providers or medical associations seek to represent nationwide classes of out-of-network providers who provided services to our members during the period from 2001 to the present. Various plaintiffs who are members in our health plans seek to represent nationwide classes of our members who received services from out-of-network providers during the period from 2001 to the present. Taken together, these lawsuits allege that we violated state law, the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Racketeer Influenced and Corrupt Organizations Act ("RICO") and federal antitrust laws, either acting alone or in concert with our competitors. The purported classes seek reimbursement of all unpaid benefits, recalculation and repayment of deductible and coinsurance amounts, unspecified damages and treble damages, statutory penalties, injunctive and declaratory relief, plus interest, costs and attorneys' fees, and seek to disqualify us from acting as a fiduciary of any benefit plan that is subject to ERISA. Individual lawsuits that generally contain similar allegations and seek similar relief have been brought by health plan members and out-of-network providers.

The first class action case was commenced on July 30, 2007. The federal Judicial Panel on Multi-District Litigation (the "MDL Panel") has consolidated these class action cases in the U.S. District Court for the District of New Jersey (the "New Jersey District Court") under the caption In re: Aetna UCR Litigation, MDL No. 2020 ("MDL 2020"). In addition, the MDL Panel has transferred the individual lawsuits to MDL 2020. On May 9, 2011, the New Jersey District Court dismissed the

physician plaintiffs from MDL 2020 without prejudice. The New Jersey District Court's action followed a ruling by the United States District Court for the Southern District of Florida (the "Florida District Court") that the physician plaintiffs were enjoined from participating in MDL 2020 due to a prior settlement and release. The United States Court of Appeals for the Eleventh Circuit has dismissed the physician plaintiffs' appeal of the Florida District Court's ruling.

On December 6, 2012, we entered into an agreement to settle MDL 2020. Under the terms of the proposed nationwide settlement, we would have been released from claims relating to our out-of-network reimbursement practices from the beginning of the applicable settlement class period through August 30, 2013. The settlement agreement did not contain an admission of wrongdoing. The medical associations were not parties to the settlement agreement.

Under the settlement agreement, we would have paid up to $120 million to fund claims submitted by health plan members and health care providers who were members of the settlement classes. These payments also would have funded the legal fees of plaintiffs' counsel and the costs of administering the settlement. In connection with the proposed settlement, the Company recorded an after tax charge to net income attributable to Aetna of approximately $78.0 million in the fourth quarter of 2012. There was no after-tax charge to net income for the Company associated to the proposed settlement.

The settlement agreement provided us the right to terminate the agreement under certain conditions related to settlement class members who opted out of the settlement. Based on a report provided to the parties by the settlement administrator, the conditions permitting us to terminate the settlement agreement were satisfied. On March 13, 2014, we notified the New Jersey District Court and plaintiffs' counsel that we were terminating the settlement agreement. Various legal and factual developments since the date of the settlement agreement led us to believe terminating the settlement agreement was in our best interests. We intend to vigorously defend ourselves against the claims brought by the plaintiffs. As a result of the termination of settlement, we released the reserve established, net of amounts due to the settlement administrator, which reduced first quarter 2014 other general and administrative expenses of Aetna by $67.0 million ($103.0 million pretax).

On June 30, 2015, the New Jersey District Court granted in part our motion to dismiss the proceeding. The New Jersey District Court dismissed with prejudice the plaintiffs' RICO and federal antitrust claims; their ERISA claims that are based on our disclosures and our purported breach of fiduciary duties; and certain of their state law claims. The New Jersey District Court also dismissed with prejudice all claims asserted by several medical association plaintiffs. The plaintiffs' remaining claims are for ERISA benefits and breach of contract. We intend to vigorously defend ourselves against the plaintiffs' remaining claims.

We also have received subpoenas and/or requests for documents and other information from, and been investigated by, attorneys general and other state and/or federal regulators, legislators and agencies relating to our out-of-network benefit payment and administration practices. It is reasonably possible that others could initiate additional litigation or additional regulatory action against us with respect to our out-of-network benefit payment and/or administration practices.

Other Litigation and Regulatory Proceedings

We are involved in numerous other lawsuits arising, for the most part, in the ordinary course of our business operations, including claims of or relating to bad faith, medical malpractice, non-compliance with state and federal regulatory regimes, marketing misconduct, failure to timely or appropriately pay or administer claims and benefits in our Health Care and Group Insurance businesses (including our post-payment audit and collection practices and reductions in payments to providers due to sequestration), provider network structure (including the use of performance-based networks and termination of provider contracts), provider directory accuracy, rescission of insurance coverage, improper disclosure of personal information, anticompetitive practices, patent infringement and other intellectual property litigation, other legal proceedings in our Health Care and Group Insurance businesses and employment litigation. Some of these other lawsuits are or are purported to be class actions. We intend to vigorously defend ourselves against the claims brought in these matters.

Awards to us and others of certain government contracts, particularly in our Medicaid business, are subject to increasingly frequent protests by unsuccessful bidders. These protests may result in awards to us being reversed, delayed or modified. The loss or delay in implementation of any government contract could adversely affect our operating results. We will continue to defend vigorously contract awards we receive.

In addition, our operations, current and past business practices, current and past contracts, and accounts and other books and records are subject to routine, regular and special investigations, audits, examinations and reviews by, and from time to time we receive subpoenas and other requests for information from, The Centers for Medicare & Medicaid Services ("CMS"), the U.S. Department of Health and Human Services, various state insurance and health care regulatory authorities, state attorneys general and offices of inspector general, the Center for Consumer Information and Insurance Oversight, OIG, the Office of Personnel Management, the U.S. Department of Labor, the U.S. Department of the Treasury, the U.S. Food and Drug Administration, committees, subcommittees and members of the U.S. Congress, the U.S. Department of Justice, the Federal Trade Commission, U.S. attorneys and other state, federal and international governmental authorities. These government actions include inquiries by, and testimony before, certain members, committees and subcommittees of the U.S. Congress regarding certain of our current and past business practices, including our overall claims processing and payment practices, our business practices with respect to our small group products, student health products or individual customers (such as market withdrawals, rating information, premium increases and medical benefit ratios), executive compensation matters and travel and entertainment expenses, as well as the investigations by, and subpoenas and requests from, attorneys general and others described above under "*Out-of-Network Benefit Proceedings*."

There also continues to be a heightened level of review and/or audit by regulatory authorities of, and increased litigation regarding, our and the rest of the health care and related benefits industry's business and reporting practices, including premium rate increases, utilization management, development and application of medical policies, complaint, grievance and appeal processing, information privacy, provider network structure (including provider network adequacy, the use of performance-based networks and termination of provider contracts), provider directory accuracy, calculation of minimum medical loss ratios, delegated arrangements, rescission of insurance coverage, limited benefit health products, student health products, pharmacy benefit management practices (including the use of narrow networks and the placement of drugs in formulary tiers), sales practices, customer service practices, vendor oversight and claim payment practices (including payments to out-of-network providers and payments on life insurance policies).

As a leading national health and related benefits company, we regularly are the subject of government actions of the types described above. These government actions may prevent or delay us from implementing planned premium rate increases and may result, and have resulted, in restrictions on our business, changes to or clarifications of our business practices, retroactive adjustments to premiums, refunds or other payments to members, beneficiaries, states or the federal government, withholding of premium payments to us by government agencies, assessments of damages, civil or criminal fines or penalties, or other sanctions, including the possible suspension or loss of licensure and/or suspension or exclusion from participation in government programs.

Estimating the probable losses or a range of probable losses resulting from litigation, government actions and other legal proceedings is inherently difficult and requires an extensive degree of judgment, particularly where the matters involve indeterminate claims for monetary damages, may involve fines, penalties or punitive damages that are discretionary in amount, involve a large number of claimants or regulatory authorities, represent a change in regulatory policy, present novel legal theories, are in the early stages of the proceedings, are subject to appeal or could result in a change in business practices. In addition, because most legal proceedings are resolved over long periods of time, potential losses are subject to change due to, among other things, new developments, changes in litigation strategy, the outcome of intermediate procedural and substantive rulings and other parties' settlement posture and their evaluation of the strength or weakness of their case against us. Except as specifically noted above under "*Other Litigation and Regulatory Proceedings*," we are currently unable to predict the ultimate outcome of, or reasonably estimate the losses or a range of losses resulting from, the matters described above, and it is reasonably possible that their outcome could be material to us.

Health Care Reform

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively, "Health Care Reform" or "ACA"), enacted in March 2010, has changed and will continue to make broad-based changes to the U.S. health care system. The Company expects Health Care Reform and changes to Health Care Reform to continue to significantly impact the Company's business operations and financial results, including the Company's pricing, medical benefit ratios and the geographies in which the Company's products are available. Health Care Reform presents the Company with business opportunities, but also with financial and regulatory challenges. Most of the key components of Health Care Reform were phased in during or prior to 2014, including health insurance exchanges ("Public Exchanges), required MLRs in commercial and Medicare products, the individual coverage mandate, guaranteed issue, rating limits in individual and small group products, significant new industry-wide fees, assessments and taxes, enhanced premium rate review and disclosure processes, reduced Medicare Advantage payment rates to insurers, and linking Medicare Advantage payments to a plan's CMS quality performance ratings or "star ratings." The effects of these changes are reflected in the Company's financial results. Certain components of Health Care Reform will continue to be phased in until 2020.

The Company is dedicating and will continue to be required to dedicate significant resources and incur significant expenses during 2016 to implement and comply with Health Care Reform and changes in Health Care Reform as well as state level health care reform. While most of the significant aspects of Health Care Reform became effective during or prior to 2014, significant parts of Health Care Reform, including aspects of Public Exchanges, nondiscrimination requirements, reinsurance, risk corridor and risk adjustment, continue to evolve through the promulgation of regulations and guidance at the federal level. It is likely that further changes will be made to Health Care Reform at the federal and/or state level as issues arise and its practical effects become clearer. Growing state and federal budgetary pressures make it more likely that any changes will be adverse to us. As a result, many of the specific aspects and impacts of Health Care Reform will not be known for several years, and given the inherent difficulty of foreseeing how individuals and businesses will respond to the choices afforded them by Health Care Reform, the Company cannot predict the full effect Health Care Reform will have on the Company or the impact of future changes to Health Care Reform. It is reasonably possible that Health Care Reform or changes to Health Care Reform, in the aggregate, could have a significant adverse effect on the Company's business operations and financial results.

Ongoing legislative and regulatory changes to Health Care Reform, other pending efforts in the U.S. Congress to amend or restrict funding for various aspects of Health Care Reform (including risk corridors), the 2016 presidential election, pending litigation challenging aspects of the law and federal budget negotiations continue to create uncertainty about the ultimate impact of Health Care Reform. Examples of these legislative and regulatory changes include: the December 2015 suspension of the health insurer fee for 2017 and two year delay of the "Cadillac" tax on high-cost employer-sponsored health coverage; the October 2015 Protecting Affordable Coverage for Employees Act, which leaves groups with 51 to 100 employees within the large group category for each state unless the state exercises its option to include these groups within the small group category; and the October 2015 HHS announcement that Health Care Reform risk corridor receivables for the 2014 program year would only be funded at 12.6%. The pending litigation includes the House of Representatives' challenge to HHS's ability to make payments under ACA's Cost Sharing Subsidiary program without an explicit appropriation.

As described above, the availability of funding for the ACA's temporary risk corridor program is an example of this uncertainty. In May 2014, CMS published a final rule on Public Exchanges. The final rule provides that payments to health plans under the ACA's risk corridor program will no longer be limited to the aggregate amount of the risk corridor collections received by HHS over the duration of the risk corridor program. However, it is possible that payments to health plans under the risk corridor program will require additional appropriation legislation to be passed by the U.S. Congress. In each of December 2014 and December 2015, legislation was enacted that prohibits HHS's use of certain funds to pay HHS's potential obligation under the ACA's risk corridor program. In October 2015, HHS announced that 2014 Health Care

Reform risk corridor receivables would be funded at 12.6% to the extent HHS fully collects risk corridor payables. In addition, these limited risk corridor payments may create instability in the marketplace for individual commercial products in 2016 and going forward by, among other things, causing health plans to change or stop offering their Public Exchange products. 2016 is the last program year for the ACA's risk corridor program.

The federal and state governments also continue to enact and seriously consider many other broad-based legislative and regulatory proposals that have had a material impact on or could materially impact various aspects of the health care and related benefits system. The Company cannot predict whether pending or future federal or state legislation or court proceedings, including future U.S. Congressional appropriations, will change various aspects of the health care and related benefits system or Health Care Reform or the impact those changes will have on the Company's business operations or financial results, but the effects could be materially adverse.

13. Minimum capital and surplus

Pursuant to the laws of Louisiana, each health maintenance organization shall establish prior to the issuance of any certificate of authority, and shall maintain as long as it does business in Louisiana as a health maintenance organization, capital and surplus in the amount of three million dollars. At December 31, 2015, the Company's capital and surplus exceeded all such requirements.

The NAIC and the State of Louisiana adopted risk-based capital ("RBC") standards for health organizations, including HMOs, that are designed to identify weakly capitalized companies by comparing each company's adjusted capital and surplus to its required capital and surplus (the "RBC Ratio"). The RBC Ratio is designed to reflect the risk profile of the company. Within certain ratio ranges, regulators have increasing authority to take action as the RBC Ratio decreases. There are four levels of regulatory action, ranging from requiring insurers to submit a comprehensive plan to the state insurance commissioner to requiring the state insurance commissioner to place the insurer under regulatory control. At December 31, 2015, the Company had capital and surplus that exceeded the highest threshold specified by the RBC rules.

14. Medicaid

Medicaid and dual eligible products also are regulated by CMS and state Medicaid agencies, which have the right to audit our performance to determine compliance with CMS contracts and regulations. The Company's Medicaid products, dual eligible products and Children's Health Insurance Program ("CHIP") contracts also are subject to federal and state regulations and oversight by state Medicaid agencies regarding the services we provide to Medicaid enrollees, payment for those services, network requirements (including mandatory inclusion of specified high-cost providers), and other aspects of these programs, and by external review organizations which audit Medicaid plans on behalf of the state Medicaid agencies. The laws, regulations and contractual requirements applicable to the company and other participants in Medicaid and dual eligible programs, including requirements that the Company submit encounter data to the applicable state agency, are extensive, complex and subject to change. The Company has invested significant resources to comply with these standards, and the Company's Medicaid and dual eligible program compliance efforts will continue to require significant resources. CMS and/or state Medicaid agencies may fine the Company, withhold payments to the Company, seek premium and other refunds, terminate the Company's existing contracts, elect not to award the Company new contracts or renew existing contracts, prohibit the Company from continuing to market and/or enroll members in or refuse to auto assign members to one or more of the Company's Medicaid or dual eligible products, exclude the Company from participating in one or more Medicaid or dual eligible programs and/or institute other sanctions against the Company if it fails to comply with CMS or state regulations or our contractual requirements. The Company cannot predict whether pending or future federal or state legislation or court proceedings will change various aspects of the Medicaid program, nor can it predict the impact of those changes.

15. Accounting for the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010's (collectively, "Health Care Reform") Reinsurance, Risk Adjustment and Risk Corridor (the "3Rs") pursuant to SSAP No. 107 and INT 15-01: ACA Risk Corridors Collectibility ("INT 15-01")

Reinsurance

Health Care Reform established a temporary reinsurance program that expires at the end of 2016. Under this program, all issuers of major medical commercial insurance products and self-insured plan sponsors are required to contribute funding in amounts set by the U.S. Department of Health and Human Services ("HHS"). A portion of the funds collected will be utilized to reimburse issuers' high claims costs incurred for qualified individual members. The expense related to this required funding is reflected in insurance, taxes, licenses and fees for all of the Company's insurance products with the exception of products associated with qualified individual members; this expense for qualified individual members is reflected as a reduction of premium revenue. When annual claim costs incurred by the Company's qualified individual members exceed a specified attachment point, the Company is entitled to certain reimbursements from this program. The Company records amounts recoverable for claims paid and unpaid and ceded claim benefit recoveries to reflect its estimate of these recoveries. At December 31, 2015, the Company did not record a payable or a receivable under the temporary three-year reinsurance program.

Risk Adjustment

Health Care Reform established a permanent risk adjustment program to transfer funds from qualified individual and small group insurance plans with below average risk scores to plans with above average risk scores. Based on the risk of the Company's qualified plan members relative to the average risk of members of other qualified plans in comparable markets, the Company estimates its ultimate risk adjustment receivable or payable for the current calendar year and reflects the impact as an adjustment to its premium revenue. At December 31, 2015, the Company did not record a payable or a receivable under the risk adjustment program.

Risk Corridor

Health Care Reform established a temporary risk sharing program, which expires at the end of 2016, for qualified individual and small group insurance plans. Under this program the Company makes (or receives) a payment to (or from) HHS based on the ratio of allowable costs to target costs (as defined by Health Care Reform). The Company records a risk corridor receivable or payable as an adjustment to premium revenue based on the Company's estimate of the ultimate risk sharing amount for the current calendar year.

The Company expects to perform an annual final reconciliation and settlement with HHS of the 3Rs in each subsequent year.

16. Reconciliation to statutory financial statements as filed with the Louisiana Department

The Company's federal and foreign income tax benefits incurred were understated on the statutory financial statements for December 31, 2015.

The following is a reconciliation of December 31, 2015 total assets as reflected in the accompanying Statutory Statements of Assets to amounts reported to the Louisiana Department (statutory reports) in the Company's 2015 annual statement:

Total assets as reflected in the accompanying Statutory Statements of Assets	$88,435,077
Increase in current federal and foreign income tax recoverable and interest thereon	1,009,750
Total assets as reported in the annual statement	$89,444,827

The following is a reconciliation of December 31, 2015 capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus to amounts reported to the Louisiana Department (statutory reports) in the Company's 2015 annual statement:

Capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus	$23,494,662
Increase in current federal and foreign tax recoverable and interest thereon	1,009,750
Statutory capital and surplus as reported in the annual statement	$24,504,412

The following is a reconciliation of December 31, 2015 net loss as reflected in the accompanying Statutory Statements of Revenue and Expenses to amounts reported to the Louisiana Department (statutory reports) in the Company's 2015 annual statement:

Net loss as reflected in the accompanying Statutory Statements of Revenue and Expenses	$(12,882,761)
Increase in federal and foreign income tax benefits incurred	1,009,750
Statutory net loss as reported in the annual statement	$(11,873,011)

17. Subsequent events

Type I - Recognized subsequent events

Subsequent events have been considered through May 27, 2016.

The Company had no known reportable recognized subsequent events.

Type II - Nonrecognized subsequent events

Subsequent events have been considered through May 27, 2016.

On January 1, 2016, the Company will be subject to an annual fee under section 9010 of the Federal ACA. This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2015, the Company has written health insurance subject to the ACA assessment, expects to conduct health insurance business in 2016, and estimates their portion of the annual health insurance industry fee to be payable on September 30, 2016 to be $3,290,000. This amount is reflected in special surplus. This assessment is expected to impact RBC by 14%. Reporting the ACA assessment as of December 31, 2015, would not have triggered an RBC action level.

	2015
ACA fee assessment payable for upcoming year	$3,290,000
ACA fee assessment paid	-
Premium written subject to ACA 9010 assessment	$180,946,342
Total Adjusted Capital before surplus adjustment	$23,494,662
Total Adjusted Capital after surplus adjustment	$20,204,622
Authorized Control Level after surplus adjustment	$8,385,950

SUPPLEMENTAL INVESTMENT RISKS INTERROGATORIES

For the year ended December 31, 2015

(To be filed by April 1)

Of Aetna Better Health, Inc. (a Louisiana corporation)

Address (City, State, Zip Code): Kenner LA 70062

NAIC Group Code.....0001 NAIC Company Code.....15616 Employer's ID Number.....80-0629718

The Investment Risks Interrogatories are to be filed by April 1. They are also to be included with the Audited Statutory Financial Statements.

Answer the following interrogatories by reporting the applicable U.S. dollar amounts and percentages of the reporting entity's total admitted assets held in that category of investments.

1. Reporting entity's total admitted assets as reported on Page 2 of this annual statement. $.....88,435,077

2. Ten largest exposures to a single issuer/borrower/investment.

	1 Issuer	2 Description of Exposure	3 Amount	4 Percentage of Total Admitted Assets
2.01	WHITNEY NATL CD	ST BOND	$.....250,000	.....0.283 %
2.02	LIBERTY BANK CD	ST BOND	$.....250,000	.....0.283 %
2.03	CAPITAL ONE CAPITAL VI CD	ST BOND	$.....250,000	.....0.283 %
2.04	CITIZENS BANK & TRUST CD	ST BOND	$.....250,000	.....0.283 %
2.05			$.....0	.....0.000 %
2.06			$.....0	.....0.000 %
2.07			$.....0	.....0.000 %
2.08			$.....0	.....0.000 %
2.09			$.....0	.....0.000 %
2.10			$.....0	.....0.000 %

3. Amounts and percentages of the reporting entity's total admitted assets held in bonds and preferred stocks by NAIC designation.

	Bonds	1	2
3.01	NAIC-1	$.....55,515,204	.....62.775 %
3.02	NAIC-2	$.....0	.....0.000 %
3.03	NAIC-3	$.....0	.....0.000 %
3.04	NAIC-4	$.....0	.....0.000 %
3.05	NAIC-5	$.....0	.....0.000 %
3.06	NAIC-6	$.....0	.....0.000 %
	Preferred Stocks	**3**	**4**
3.07	P/RP-1	$.....0	.....0.000 %
3.08	P/RP-2	$.....0	.....0.000 %
3.09	P/RP-3	$.....0	.....0.000 %
3.10	P/RP-4	$.....0	.....0.000 %
3.11	P/RP-5	$.....0	.....0.000 %
3.12	P/RP-6	$.....0	.....0.000 %

4. Assets held in foreign investments:

4.01 Are assets held in foreign investments less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 4.01 above is yes, responses are not required for interrogatories 5-10.

4.02	Total admitted assets held in foreign investments	$.....0	.....0.000 %
4.03	Foreign-currency-denominated investments	$.....0	.....0.000 %
4.04	Insurance liabilities denominated in that same foreign currency	$.....0	.....0.000 %

5. Aggregate foreign investment exposure categorized by NAIC sovereign designation:

		1	2
5.01	Countries designated NAIC-1	$.....0	.....0.000 %
5.02	Countries designated NAIC-2	$.....0	.....0.000 %
5.03	Countries designated NAIC-3 or below	$.....0	.....0.000 %

6. Largest foreign investment exposures by country, categorized by the country's NAIC sovereign designation:

		1	2
	Countries designated NAIC-1:		
6.01	Country 1:	$.....0	.....0.000 %
6.02	Country 2:	$.....0	.....0.000 %
	Countries designated NAIC-2:		
6.03	Country 1:	$.....0	.....0.000 %
6.04	Country 2:	$.....0	.....0.000 %
	Countries designated NAIC-3 or below:		
6.05	Country 1:	$.....0	.....0.000 %
6.06	Country 2:	$.....0	.....0.000 %

		1	2
7.	Aggregate unhedged foreign currency exposure	$.....0	.....0.000 %

See accompanying independent auditors' report.

8. Aggregate unhedged foreign currency exposure categorized by NAIC sovereign designation:

		1	2
8.01	Countries designated NAIC-1	$ 0	0.000 %
8.02	Countries designated NAIC-2	$ 0	0.000 %
8.03	Countries designated NAIC-3 or below	$ 0	0.000 %

9. Largest unhedged foreign currency exposures by country, categorized by the country's NAIC sovereign designation:

		1	2
	Countries designated NAIC-1:		
9.01	Country 1:	$ 0	0.000 %
9.02	Country 2:	$ 0	0.000 %
	Countries designated NAIC-2:		
9.03	Country 1:	$ 0	0.000 %
9.04	Country 2:	$ 0	0.000 %
	Countries designated NAIC-3 or below:		
9.05	Country 1:	$ 0	0.000 %
9.06	Country 2:	$ 0	0.000 %

10. Ten largest non-sovereign (i.e. non-governmental) foreign issues:

	1 Issuer	2 NAIC Designation	3	4
10.01			$ 0	0.000 %
10.02			$ 0	0.000 %
10.03			$ 0	0.000 %
10.04			$ 0	0.000 %
10.05			$ 0	0.000 %
10.06			$ 0	0.000 %
10.07			$ 0	0.000 %
10.08			$ 0	0.000 %
10.09			$ 0	0.000 %
10.10			$ 0	0.000 %

11. Amounts and percentages of the reporting entity's total admitted assets held in Canadian investments and unhedged Canadian currency exposure:

11.01 Are assets held in Canadian investments less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 11.01 is yes, detail is not required for the remainder of Interrogatory 11.

11.02	Total admitted assets held in Canadian Investments	$ 0	0.000 %
11.03	Canadian currency-denominated investments	$ 0	0.000 %
11.04	Canadian-denominated insurance liabilities	$ 0	0.000 %
11.05	Unhedged Canadian currency exposure	$ 0	0.000 %

12. Report aggregate amounts and percentages of the reporting entity's total admitted assets held in investments with contractual sales restrictions.

12.01 Are assets held in investments with contractual sales restrictions less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 12.01 is yes, responses are not required for the remainder of Interrogatory 12.

	1	2	3
12.02	Aggregate statement value of investments with contractual sales restrictions	$ 0	0.000 %
	Largest three investments with contractual sales restrictions:		
12.03		$ 0	0.000 %
12.04		$ 0	0.000 %
12.05		$ 0	0.000 %

13. Amounts and percentages of admitted assets held in the ten largest equity interests:

13.01 Are assets held in equity interest less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 13.01 above is yes, responses are not required for the remainder of Interrogatory 13.

	1 Name of Issuer	2	3
13.02		$ 0	0.000 %
13.03		$ 0	0.000 %
13.04		$ 0	0.000 %
13.05		$ 0	0.000 %
13.06		$ 0	0.000 %
13.07		$ 0	0.000 %
13.08		$ 0	0.000 %
13.09		$ 0	0.000 %
13.10		$ 0	0.000 %
13.11		$ 0	0.000 %

14. Amounts and percentages of the reporting entity's total admitted assets held in nonaffiliated, privately placed equities:

14.01 Are assets held in nonaffiliated, privately placed equities less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 14.01 above is yes, responses are not required for the remainder of Interrogatory 14.

	1	2	3
14.02	Aggregate statement value of investments held in nonaffiliated, privately placed equities	$ 0	0.000 %
	Largest three investments held in nonaffiliated, privately placed equities:		
14.03		$ 0	0.000 %
14.04		$ 0	0.000 %
14.05		$ 0	0.000 %

See accompanying independent auditors' report.

15. Amounts and percentages of the reporting entity's total admitted assets held in general partnership interests:

15.01 Are assets held in general partnership interests less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 15.01 above is yes, responses are not required for the remainder of Interrogatory 15.

	1	2	3
15.02	Aggregate statement value of investments held in general partnership interests	$ 0	0.000 %
	Largest three investments in general partnership interests:		
15.03		$ 0	0.000 %
15.04		$ 0	0.000 %
15.05		$ 0	0.000 %

16. Amounts and percentages of the reporting entity's total admitted assets held in mortgage loans:

16.01 Are mortgage loans reported in Schedule B less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 16.01 above is yes, responses are not required for the remainder of Interrogatory 16 and Interrogatory 17.

	1 Type (Residential, Commercial, Agricultural)	2	3
16.02		$ 0	0.000 %
16.03		$ 0	0.000 %
16.04		$ 0	0.000 %
16.05		$ 0	0.000 %
16.06		$ 0	0.000 %
16.07		$ 0	0.000 %
16.08		$ 0	0.000 %
16.09		$ 0	0.000 %
16.10		$ 0	0.000 %
16.11		$ 0	0.000 %

Amount and percentage of the reporting entity's total admitted assets held in the following categories of mortgage loans:

		Loans	
16.12	Construction loans	$ 0	0.000 %
16.13	Mortgage loans over 90 days past due	$ 0	0.000 %
16.14	Mortgage loans in the process of foreclosure	$ 0	0.000 %
16.15	Mortgage loans foreclosed	$ 0	0.000 %
16.16	Restructured mortgage loans	$ 0	0.000 %

17. Aggregate mortgage loans having the following loan-to-value ratios as determined from the most current appraisal as of the annual statement date:

Loan-to-Value	Residential		Commercial		Agricultural	
	1	2	3	4	5	6
17.01 above 95%	$ 0	0.000 %	$ 0	0.000 %	$ 0	0.000 %
17.02 91% to 95%	$ 0	0.000 %	$ 0	0.000 %	$ 0	0.000 %
17.03 81% to 90%	$ 0	0.000 %	$ 0	0.000 %	$ 0	0.000 %
17.04 71% to 80%	$ 0	0.000 %	$ 0	0.000 %	$ 0	0.000 %
17.05 below 70%	$ 0	0.000 %	$ 0	0.000 %	$ 0	0.000 %

18. Amounts and percentages of the reporting entity's total admitted assets held in each of the five largest investments in real estate:

18.01 Are assets held in real estate reported less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 18.01 above is yes, responses are not required for the remainder of Interrogatory 18.

Largest five investments in any one parcel or group of contiguous parcels of real estate:

	Description	2	3
18.02		$ 0	0.000 %
18.03		$ 0	0.000 %
18.04		$ 0	0.000 %
18.05		$ 0	0.000 %
18.06		$ 0	0.000 %

19. Report aggregate amounts and percentages of the reporting entity's total admitted assets held in investments held in mezzanine real estate loans.

19.01 Are assets held in investments held in mezzanine real estate loans less than 2.5% of the reporting entity's admitted assets? Yes [X] No [ ]

If response to 19.01 is yes, responses are not required for the remainder of Interrogatory 19.

	1	2	3
19.02	Aggregate statement value of investments held in mezzanine real estate loans	$ 0	0.000 %
	Largest three investments held in mezzanine real estate loans:		
19.03		$ 0	0.000 %
19.04		$ 0	0.000 %
19.05		$ 0	0.000 %

20. Amounts and percentages of the reporting entity's total admitted assets subject to the following types of agreements:

	At Year-End		At End of Each Quarter		
			1st Qtr	2nd Qtr	3rd Qtr
	1	2	3	4	5
20.01 Securities lending agreements (do not include assets held as collateral for such transactions)	$ 0	0.000 %	$ 0	$ 0	$ 0
20.02 Repurchase agreements	$ 0	0.000 %	$ 0	$ 0	$ 0
20.03 Reverse repurchase agreements	$ 0	0.000 %	$ 0	$ 0	$ 0
20.04 Dollar repurchase agreements	$ 0	0.000 %	$ 0	$ 0	$ 0
20.05 Dollar reverse repurchase agreements	$ 0	0.000 %	$ 0	$ 0	$ 0

See accompanying independent auditors' report.

21. Amounts and percentages of the reporting entity's total admitted assets for warrants not attached to other financial instruments, options, caps and floors:

	Owned		Written	
	1	2	3	4
21.01 Hedging	$0	0.000 %	$0	0.000 %
21.02 Income generation	$0	0.000 %	$0	0.000 %
21.03 Other	$0	0.000 %	$0	0.000 %

22. Amounts and percentages of the reporting entity's total admitted assets of potential exposure for collars, swaps, and forwards:

	At Year-End		At End of Each Quarter		
			1st Qtr	2nd Qtr	3rd Qtr
	1	2	3	4	5
22.01 Hedging	$0	0.000 %	$0	$0	$0

Independent Auditors' Report

The Board of Directors
Aetna Better Health, Inc. (a Louisiana corporation)

Report on the Financial Statements

We have audited the accompanying financial statements of Aetna Better Health, Inc. (a Louisiana corporation), which comprise the statutory statements of assets, liabilities, and capital and surplus as of December 31, 2016 and 2015, and the related statutory statements of revenue and expense, changes in capital and surplus, and cash flow for the years then ended, and the related notes to the statutory financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 2 to the financial statements, the financial statements are prepared by Aetna Better Health, Inc. (a Louisiana corporation) using statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance, which is a basis of accounting other than U.S. generally accepted accounting principles. Accordingly, the financial statements are not intended to be presented in accordance with U.S. generally accepted accounting principles.

The effects on the financial statements of the variances between the statutory accounting practices described in Note 2 and U.S. generally accepted accounting principles, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the variances between statutory accounting practices and U.S. generally accepted accounting principles discussed in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles paragraph, the financial statements referred to above do not present fairly, in accordance with U.S. generally accepted accounting principles, the financial position of Aetna Better Health, Inc. (a Louisiana corporation) as of December 31, 2016 and 2015, or the results of its operations or its cash flows for the years then ended.

Opinion on Statutory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and surplus of Aetna Better Health, Inc. (a Louisiana corporation) as of December 31, 2016 and 2015, and the results of its operations and its cash flow for the years then ended, in accordance with statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance described in Note 2.

Other Matters

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information included in the Supplemental Investment Risks Interrogatories and Summary Investment Schedule is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Louisiana Department of Insurance. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

AETNA BETTER HEALTH, INC.
(a Louisiana corporation)

NOTES TO STATUTORY FINANCIAL STATEMENTS
December 31, 2016 and 2015

1. Organization and operation

Aetna Better Health, Inc. (a Louisiana corporation) (the "Company") is a wholly-owned subsidiary of Aetna Health Holdings, LLC, whose ultimate parent is Aetna Inc. ("Aetna").

The Company was incorporated in the State of Louisiana on July 27, 2010. Effective February 1, 2015, the Company began administering a health plan for individuals who qualify for Medicaid coverage in the State of Louisiana. The contract with the Louisiana Department of Health and Hospitals is for a term through January 31, 2018. In the event the contract is not renewed, the Company has received a guarantee of financial support by its parent through December 31, 2018. The conditions of such support stipulate that the parent has the ability to provide the necessary financial support to the Company and that there are no restrictions on the parent to provide such support.

2. Summary of significant accounting policies

Accounting practices

The accompanying statutory financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Louisiana Department of Insurance ("Louisiana Department") ("Louisiana Accounting Practices"). The Louisiana Department recognizes only statutory accounting practices prescribed or permitted by the State of Louisiana for determining and reporting the financial condition and results of operations of an insurance company, which include accounting practices and procedures adopted by the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP"). The Company's net loss and capital and surplus as stated on a NAIC SAP basis and on the basis of practices prescribed or permitted by the State of Louisiana were the same as of and for the years ended December 31, 2016 and 2015.

The Louisiana Accounting Practices vary from U.S. generally accepted accounting principles ("GAAP"). The primary differences include the following:

- Certain assets, designated as nonadmitted assets (other receivables, which are nonadmitted in accordance with Statements of Statutory Accounting Principles ("SSAP") No. 4 - *Assets and Nonadmitted Assets*) are not recorded as assets, but are charged to surplus. Assets having economic value other than those which can be used to fulfill policyholder obligations, or those assets which are unavailable due to encumbrances or other third party interests should not be recognized on the Statutory Statements of Assets, and are, therefore, considered nonadmitted;
- Bonds are recorded at amortized cost except for those with an NAIC designation of 3 through 6, which are reported at the lower of amortized cost or fair value. Therefore, changes in unrealized gains and losses for those securities held at amortized cost are not reflected in the financial statements. Under GAAP, bonds classified as available for sale are recorded at fair value, and related changes in unrealized gains and losses are recorded as a component of equity, net of deferred federal income taxes; and
- Deferred tax assets and liabilities are determined and admitted in accordance with SSAP No. 101 - *Income Taxes* ("SSAP No. 101"). Changes in net deferred tax assets and liabilities are reflected as changes in surplus, whereas under U.S. GAAP, changes in such assets and liabilities are reflected in net income. In addition, statutory accounting requires consideration of a statutory allowance adjustment in the calculation of adjusted gross deferred tax assets and an admissibility test for deferred tax assets.

There were no permitted practices by the State of Louisiana for the years ended December 31, 2016 and 2015.

Use of estimates in the preparation of the financial statements

The preparation of these financial statements in conformity with Louisiana Accounting Practices requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses. Actual results could differ from those estimates.

Significant accounting policies

The Company applies the following significant accounting policies:

Cash, cash equivalents and short-term investments

Cash, cash equivalents and short-term investments, consisting primarily of money market instruments and other debt issues with an original maturity of up to one year, are carried at amortized cost. Short-term investments consist primarily of investments purchased with an original maturity date of greater than three months but less than one year. Cash equivalents consist of highly liquid instruments, which mature within three months from the date of purchase. The carrying amount of cash, cash equivalents and short-term investments approximates fair value.

Bonds

Bonds, which include special deposits as discussed more fully in Note 4, are carried at amortized cost except for those bonds with an NAIC designation of 3 through 6, which are carried at the lower of amortized cost or fair value. The amount carried at fair value is not material to the financial statements. Bond premiums and discounts are amortized using the scientific interest method. When quoted prices in active markets for identical assets are available, the Company uses these quoted market prices to determine the fair value of bonds. This is used primarily for U.S. government securities. In other cases where a quoted market price for identical assets in an active market is either not available or not observable, the Company estimates fair values using valuation methodologies based on available and observable market information or by using a matrix pricing model. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. The Company had no investments where fair value was determined using broker quotes or an internal analysis of financial performance and cash flow projections at December 31, 2016 and 2015. Bonds include all investments whose maturity is greater than one year when purchased.

The Company periodically reviews its bonds to determine whether a decline in fair value below the carrying value is other-than-temporary. For bonds, other than loan-backed and structured securities, an other-than-temporary impairment ("OTTI") shall be recorded if it is probable that the Company will be unable to collect all amounts due according to the contractual terms in effect at the date of acquisition. Declines deemed to be OTTI in the cost basis are recognized as realized capital losses. Yield-related impairments are deemed other-than-temporary when the Company intends to sell an investment at the reporting date before recovery of the cost of the investment.

For loan-backed and structured securities, the Company records OTTI when the fair value of the loan-backed or structured security is less than the amortized cost basis at the balance sheet date and (1) the Company intends to sell the investment, or (2) the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the security, even if it does not intend to sell the security and has the intent and ability to hold. If it is determined an OTTI has occurred because of (1) or (2), the amount of the OTTI is equal to the difference between the amortized cost and the fair value of the security at the balance sheet date and this difference is recorded as a realized capital loss. If it is determined an OTTI has occurred because of (3), the amount of the OTTI is equal to the difference between the amortized cost and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate and this difference is also accounted for as a realized capital loss.

The Company analyzes all relevant facts and circumstances for each investment when performing its analysis to determine whether an OTTI exists. Among the factors considered in evaluating whether a decline is other-than-temporary, management considers whether the decline in fair value results from a change in the quality of the investment security itself, whether the decline results from a downward movement in the market as a whole, the prospects for realizing the carrying value of the bond based on the investee's current and short-term prospects for recovery and other factors. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations and the risk that facts and circumstances factored into our assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods may result in a current period decision to sell securities that were not other-than-temporarily-impaired in prior reporting periods.

Investment income due and accrued

Accrued investment income consists primarily of interest. Interest is recognized on an accrual basis and dividends are recorded as earned on the ex-dividend date. Due and accrued income is not recorded on: (a) bonds in default; and (b) bonds delinquent more than 90 days or where collection of interest is improbable. At December 31, 2016 and 2015, the Company did not have any nonadmitted investment income due and accrued.

Premiums and amounts due and unpaid

Premium revenue for prepaid health care products is recognized as income in the month in which enrollees are entitled to health care services.

Nonadmitted amounts consist of all premiums due and unpaid greater than 90 days past due, with the exception of amounts due under government insured plans, which may be admitted assets under certain circumstances.

The Company did not have any premiums or amounts due and unpaid at December 31, 2016 and 2015.

Hospital and medical costs and claims adjustment expenses and related reserves

Hospital and medical costs consist principally of fee-for-service medical claims and capitation costs. Claims unpaid and aggregate health claim reserves include the Company's estimate of payments to be made on claims reported but not yet paid and for health care services rendered to enrollees but not yet reported to the Company as of the Statutory Statements of Assets and Liabilities, Capital and Surplus date. Such estimates are developed using actuarial principles and assumptions, which consider, among other things, historical and projected claim submission and processing payment patterns, medical cost trends, historical utilization of health care services, claim inventory levels, medical inflation, contract requirement changes in membership and product mix, seasonality and other relevant factors. The Company reflects changes in estimates in hospital and medical costs in the Statutory Statements of Revenue and Expenses in the period they are determined. Capitation costs, which are recorded in hospital and medical expenses in the Statutory Statements of Revenue and Expenses, represent contractual monthly fees paid to participating physicians and other medical providers for providing medical care, regardless of the medical services provided to the enrollee.

The Company uses the triangulation method to estimate reserves for claims incurred but not reported. The method of triangulation makes estimates of completion factors that are then applied to the total paid claims (net of coordination of benefits) to date for each incurral month. This provides an estimate of the total projected incurred claims and total amount outstanding or claims incurred but not reported (claims unpaid). For the most current dates of service where there is insufficient paid claim data to rely solely on the triangulation method, the Company examines cost and utilization trends as well as environmental factors, plan changes, provider contracts, changes in membership and/or benefits, and historical seasonal patterns to estimate the reserve required for these months.

Claims adjustment expenses, which include cost containment expenses, represent the costs incurred related to the claim settlement process such as costs to record, process and adjust claims. These expenses are included in the Company's management agreement with an affiliate described in Note 7.

Aggregate health policy reserves and related expenses

Premium deficiency reserves ("PDR") are recognized when it is probable that the expected future hospital and medical costs, including maintenance costs, will exceed anticipated future premiums and reinsurance recoveries on existing contracts. Where allowed, anticipated investment income is considered in the calculation of any PDR. For purposes of calculating a PDR, contracts are grouped in manner consistent with the method of acquiring, servicing and measuring the profitability of such contracts. The Company had no PDR at December 31, 2016. The PDR balance of $475,465 was included in aggregate health policy reserves in the Statutory Statements of Liabilities, Capital and Surplus at December 31, 2015.

Fees Paid to the Federal Government by Health Insurers

SSAP No. 106 – *Affordable Care Act Section 9010 Assessment* ("SSAP No. 106") required (1) that the health insurer fee be recognized in full on January 1 of the fee year (the calendar year in which the assessment must be paid to the federal government), in the operating expense category of insurance taxes, licenses and fees, excluding federal income taxes and (2) that in each data year preceding a fee year a reporting entity pro-ratably accrue by reclassifying from unassigned funds (surplus) to aggregate write-ins for special surplus funds an amount equal to its estimated subsequent fee year assessment. This reclassification has no impact on total capital and surplus and is reversed in full on January 1 of the fee year beginning with fee years starting on January 1, 2015 and after. In December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the health insurer fee. As interpreted in INT 16-01: ACA Section 9010 Assessment 2017 Moratorium, because there is not an ACA Section 9010 fee due in September 2017, there is not an accrual of a liability on January 1, 2017 based on 2016 data year net written premiums. Accrual of a liability on January 1, 2018 for the ACA Section 9010 assessment based on 2017 data year net written premiums and the reclassification from unassigned funds (surplus) to aggregate write-ins for special surplus funds equal to the estimated 2018 fee year assessment accrued in data year 2017 will both continue as prescribed under SSAP No. 106. See Note 18 for disclosure of all amounts related to the health insurer fee for the Company.

Federal income taxes

The Company is included in the consolidated federal income tax return of its parent company, Aetna and Aetna's other wholly-owned subsidiaries pursuant to the terms of a tax sharing agreement. In accordance with a written tax sharing agreement with an affiliate, the Company's current federal income tax provisions are generally computed as if the Company were filing a separate federal income tax return; current income tax benefits, including those resulting from net operating losses, are recognized to the extent realized in the consolidated return. Pursuant to this agreement, the Company has the enforceable right to recoup federal income taxes paid in prior years in the event of future net losses, which it may incur, or to recoup its net losses carried forward as an offset to future net income subject to federal income taxes.

Income taxes are accounted for under the asset and liability method. Deferred income tax assets ("DTAs") and liabilities ("DTLs") represent the expected future tax consequences of temporary differences generated by statutory accounting as defined in SSAP No. 101. DTAs and DTLs are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. DTAs and DTLs are computed by means of identifying temporary differences which are measured using a balance sheet approach whereby statutory and tax basis balance sheets are compared. Current income tax recoverables include all current income taxes, including interest, reasonably expected to be recovered in a subsequent accounting period.

Pursuant to SSAP No. 101, gross DTAs are first reduced by a statutory valuation allowance adjustment to an amount that is more likely than not to be realized ("adjusted gross DTAs"). Adjusted gross DTAs are then admitted in an amount equal to the sum of paragraphs a. b. and c. below:

a. Federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with Internal Revenue Service ("IRS") tax loss carryback provisions.

b. The amount of adjusted gross DTAs, after the application of paragraph a. above, expected to be realized within the applicable period and that is no greater than the applicable percentage as determined using the applicable Realization Threshold Limitation Table. The applicable period refers to the number of years in which the DTA will reverse in the Company's tax return and the applicable percentage refers to the percentage of the Company's statutory capital and surplus as required to be shown on the statutory balance sheet adjusted to exclude any net DTAs, electronic data processing equipment and operating system software and any net positive goodwill ("Stat Cap ExDTA").

   The Realization Threshold Limitation Tables allow DTAs to be admitted based upon either realization within 3 years and 15% of Stat Cap ExDTA, 1 year and 10% of Stat Cap ExDTA, or no DTA admitted pursuant to this paragraph b. In general, the Realization Threshold Limitation Tables allow the Company to admit more DTAs if total DTAs as reported by the Company are a smaller percentage of statutory capital and surplus.

c. The amount of gross DTAs, after the application of paragraphs a. and b. above that can be offset against existing gross DTLs. In applying this offset, the Company considers the character (i.e. ordinary versus capital) of the DTAs and DTLs such that offsetting would be permitted in the tax return under existing enacted federal income tax laws and regulations and the reversal patterns of temporary differences.

Changes in DTAs and DTLs are recognized as a separate component of gains and losses in surplus ("Change in net deferred income tax") except to the extent allocated to changes in unrealized gains and losses. Changes in DTAs and DTLs allocated to unrealized gains and losses are netted against the related changes in unrealized gains and losses and are reported as "Change in net unrealized capital gains (losses)", also a separate component of gains and losses in surplus.

Reinsurance

In the normal course of business, the Company seeks to reduce the loss that may arise from catastrophes or other events that cause unfavorable underwriting results and to help balance its risks and capital by reinsuring certain levels of risk with other insurance enterprises. The reinsurance coverage does not relieve the Company of its primary obligations. Reinsurance premiums and reserves related to reinsured business are accounted for on a basis consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Premiums ceded for medical losses and the related unpaid reserves have been reported as reductions of these items. The reinsurance agreements are more fully discussed in Note 10.

Going concern

As of June 1, 2017, management has evaluated whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern and management has determined that it is not probable that the Company will be unable to meet its obligations as they become due within one year after the financial statements are available to be issued. Management will continuously evaluate the Company's ability to continue as a going concern and will take appropriate action and will make appropriate disclosures if there is any change in any condition or events that would raise substantial doubt about the Company's ability to continue as a going concern.

3. Accounting changes and corrections of errors

The Company did not have any accounting changes in the years ended December 31, 2016 and 2015.

4. Special deposits

Special deposits, included in bonds, consist of U.S. Treasury Notes, at amortized cost, which approximates fair value, of $1,000,000 at December 31, 2016 and 2015. These assets are restricted in accordance with certain state requirements relating to HMOs.

5. Bonds and other financial instruments

The following is a summary of bonds and other financial instruments, which include special deposits, cash equivalents, and short-term investments, at December 31, 2016 and 2015:

December 31, 2016

	Amortized cost	Statutory carrying value	Gross unrealized gains	Gross unrealized losses	Fair value
U.S. Government	$128,840,975	$128,840,975	$375,202	-	$129,216,177
U.S. states, territories and possessions (direct and guaranteed)	8,097,059	8,097,059	44,630	$(51,279)	8,090,410
U.S. political subdivisions of states, territories and possessions (direct and guaranteed)	11,757,953	11,757,953	64,383	(2,384)	11,819,952
U.S. special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of governments and their political subdivisions	8,776,736	8,776,736	144,639	-	8,921,375
Industrial and miscellaneous (unaffiliated)	1,000,000	1,000,000	-	-	1,000,000
Total	$158,472,723	$158,472,723	$628,854	$(53,663)	$159,047,914

December 31, 2015

	Amortized cost	Statutory carrying value	Gross unrealized gains	Gross unrealized losses	Fair value
U.S. Government	$54,515,204	$54,515,204	$20,352	-	$54,535,556
Industrial and miscellaneous (unaffiliated)	1,000,000	1,000,000	-	-	1,000,000
Total	$55,515,204	$55,515,204	$20,352	-	$55,535,556

Summarized below are the Company's bonds and other financial instruments, which include special deposits, with unrealized losses at December 31, 2016, along with the related fair values, aggregated by the length of time the investments have been in an unrealized loss position:

December 31, 2016

	Less than 12 months			Greater than 12 months		
	Number of Securities	Fair value	Unrealized losses	Number of Securities	Fair value	Unrealized losses
U.S. states, territories and possessions (direct and guaranteed)	1	$5,844,750	$(51,279)	-	-	-
U.S. political subdivisions of states, territories and possessions (direct and guaranteed)	1	2,685,517	(2,384)	-	-	-
Total	2	$8,530,267	$(53,663)	-	-	-

	Total		
	Number of Securities	Fair value	Unrealized losses
U.S. states, territories and possessions (direct and guaranteed)	1	$5,844,750	$(51,279)
U.S. political subdivisions of states, territories and possessions (direct and guaranteed)	1	2,685,517	(2,384)
Total	2	$8,530,267	$(53,663)

At December 31, 2015, the Company did not have any bonds and other financial instruments, which include special deposits, with unrealized losses.

The Company has reviewed the investments in the table above and has concluded that these are performing assets generating investment income to support the needs of the business. In performing this review, we considered factors such as the quality of the investment security based on research performed by external rating agencies and internal credit analysts and the prospects of realizing the carrying value of the security based on the investment's current prospects for recovery. Furthermore, the Company has no intention to sell the investments in the table above at December 31, 2016 before their cost can be recovered and for loan-backed and structured securities the Company has the ability and intent to hold these securities for a period of time sufficient to recover the amortized cost; therefore, no OTTI was determined to have occurred on these

investments. In determining if the Company needs to sell before full recovery of value, the Company considers the forecasted recovery period, expected investment returns relative to other funding sources, projected cash flow and capital requirements, regulatory obligations, and other factors. Unrealized losses at December 31, 2016 associated with the Company's bond portfolio were primarily driven by higher Treasury yields in 2016 over 2015.

The contractual or expected maturities of bonds, cash equivalents and short-term investments at December 31, 2016 were as follows:

	Carrying value	Fair value
Due one year or less	$28,400,158	$28,400,158
Due after one year through five years	84,913,000	85,243,596
Due after five years through ten years	40,782,829	40,882,785
Due after ten years	4,376,736	4,521,375
	$158,472,723	$159,047,914

The maturity for a mortgage pass-through security, included in U.S. Government and U.S. special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of governments and their political subdivisions, is not based on stated maturity, but instead is based on prepayment assumptions. Prepayment assumptions are calculated utilizing published repayment factors that estimate the prepayment rates on the mortgages in the Federal National Mortgage Association ("FNMA") and Government National Mortgage Association ("GNMA") pools.

Proceeds from the sales of bonds and other financial instruments were $11,473,125 and $13,161,300 in 2016 and 2015, respectively. There were no proceeds from the maturities of bonds in 2016 and 2015. Gross realized gains on sales of bonds were $51,866 and $45,838 in 2016 and 2015, respectively. There were no gross realized losses on sales of bonds in 2016. Gross realized losses on sales of bonds was $21,264 in 2015. Included in net realized capital losses for 2016 and 2015 were $1,810,687 and $248,017, respectively, of OTTI charges on debt securities that were in an unrealized loss position. The Company conducts regular reviews of its bond investments to assess whether a decline in fair value below carrying value is an OTTI. The Company will also recognize an OTTI on debt securities when the Company intends to sell a security that is in an unrealized loss position. Declines deemed to be OTTI are recognized as realized capital losses. The Company had no individually material realized capital losses on debt or equity securities that impacted its results of operations in 2016 or 2015.

There was no investment income due and accrued excluded from surplus at December 31,2016 and 2015.

Restricted assets (including pledged)

The Company had $1,000,000 on deposit with other regulatory bodies, which represented 0.47% and 1.13% of total admitted assets at December 31, 2016 and 2015, respectively.

The Company did not have any assets pledged as collateral not captured in other categories at December 31, 2016 and 2015.

The Company did not have any other restricted assets at December 31, 2016 and 2015.

6. Financial instruments

Financial instruments measured at fair value in the financial statements

Certain of the Company's financial instruments are measured at fair value in the financial statements. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by U.S. generally accepted accounting principles. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, we use these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, we determine fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

The statutory carrying values and estimated fair values of the Company's financial instruments at December 31, 2016 and 2015 were as follows:

December 31, 2016

	Aggregate fair value	Admitted assets	Level 1	Level 2	Level 3	Not practicable (carrying value)
Bonds, short-term investments and cash equivalents	$159,047,914	$158,472,723	$129,214,752	$29,833,162	-	-
Total	$159,047,914	$158,472,723	$129,214,752	$29,833,162	-	-

December 31, 2015

	Aggregate fair value	Admitted assets	Level 1	Level 2	Level 3	Not practicable (carrying value)
Bonds, short-term investments and cash equivalents	$55,535,556	$55,515,204	$54,532,765	$1,002,791	-	-
Total	$55,535,556	$55,515,204	$54,532,765	$1,002,791	-	-

The valuation methods and assumptions used by the Company in estimating the fair value of debt securities are discussed in Note 2.

There were no material realized and unrealized capital gains, purchases, sales, settlements, or transfers into or out of the Company's Level 3 financial assets during 2016 or 2015. There were no transfers between the Company's Level 1 or 2 financial assets during 2016 or 2015.

In evaluating the Company's management of interest rate and liquidity risk and currency exposures, the fair values of all assets and liabilities should be taken into consideration, not only those presented above.

7. Information concerning Parent, subsidiaries, and affiliates

As of and for the years ended December 31, 2016 and 2015, the Company had the following significant transactions with affiliates:

The Company and AMA are parties to an administrative services agreement, under which AMA provides certain administrative services, including accounting and processing of premiums and claims. Under this agreement, the Company will remit a percentage of its earned premium revenue, as applicable, to AMA as a fee. For these services, the Company was charged $31,302,565 in 2016 and $24,581,615 in 2015. The agreement also provides for interest on all intercompany balances. There was no interest earned (incurred) on amounts due from (to) affiliates in 2016 or 2015.

Prior to March 1, 2016, the Company had coverage for certain litigation exposures ($10,000,000 per claim and in the aggregate including defense costs) through an affiliated captive insurance company.

As explained in Note 2, the Company participates in a tax sharing agreement with Aetna and Aetna's other subsidiaries. All federal income tax receivables/payables were due from/due to Aetna.

Amounts due to and due from affiliates shown in the accompanying Statutory Statements of Assets, Liabilities, Capital and Surplus include the Company's net receipts and disbursements processed by affiliates and transactions related to its administrative services agreement with AMA.

At December 31, 2016 and 2015, the Company reported $3,230,743 and $3,980,896, respectively, due to AMA related to this agreement. The Company also reported $13,582,380 and $10,237,657 due to Aetna at December 31, 2016 and 2015, respectively.

The terms of settlement require that these amounts be settled within 45 days after the end of the calendar quarter.

8. Health care receivables

Pharmaceutical rebates

The Company receives pharmaceutical rebates through an arrangement with Aetna Health Management, LLC ("AHM"), indirectly a wholly-owned subsidiary of Aetna. AHM has contractual agreements with pharmaceutical companies for rebates, which cover the Company's membership as well as the membership of other Aetna affiliates. The Company receives those rebates from AHM (either directly or through intercompany arrangements with other Aetna affiliates) that relate to the Company's membership. The Company estimates pharmaceutical rebate receivables based upon the historical payment trends, actual utilization and other variables. Actual rebates collected are applied to the collection periods below, using a first in, first out methodology. The Company had admitted pharmaceutical rebate receivables of $453,001 at December 31, 2016. The Company had no admitted pharmaceutical rebate receivables at December 31, 2015. (Refer to the Company's accounting practices related to pharmaceutical rebate receivables in Note 2).

The following table discloses the quarterly revenue and subsequent cash collections relating to the pharmaceutical rebates:

Quarter	Estimated pharmacy rebates as reported on financial statements	Pharmacy rebates as invoiced/ confirmed	Actual rebates collected within 90 days of invoicing/ confirmation	Actual rebates collected within 91 to 180 days of invoicing/ confirmation	Actual rebates collected more than 180 days after invoicing/ confirmation
12/31/2016	$453,001	-	-	-	-
9/30/2016	$364,342	$364,342	-	-	-
6/30/2016	$167,062	$167,061	$44,026	-	-
3/31/2016	$142,155	$142,089	$83,063	$40,304	-
12/31/2015	$138,640	$140,287	$61,099	$49,907	$12,020
9/30/2015	$126,685	$126,659	$36,348	$68,449	$8,552
6/30/2015	$92,635	$91,697	$21,139	$55,620	$6,264
3/31/2015	$49,466	$49,238	$22,742	$18,368	$4,832

9. Income taxes

The components of the net DTAs recognized in the Company's Statutory Statements of Assets and Liabilities, Capital and Surplus are as follows:

	December 31, 2016		
	Ordinary	Capital	Total

4. Percentage of net admitted adjusted DTAs by tax character admitted because of the impact of tax planning strategies	0%	0%	0%

The Company's tax-planning strategies did not include the use of reinsurance.

There are no DTLs that were not recognized at December 31, 2016 or 2015.

The (benefit) provision for income taxes for the years ended December 31, 2016 and 2015 were as follows:

	December 31		
	2016	2015	Change
Federal income tax benefit on operations	$(1,552,686)	$(6,118,234)	$4,565,548
Federal income tax expense on net capital gains	16,823	8,591	8,232
Federal income tax benefit incurred	$(1,535,863)	$(6,109,643)	$4,573,780

The tax effects of temporary differences that gave rise to deferred tax assets and liabilities at December 31, 2016 and 2015 were as follows:

	December 31		
	2016	2015	Change
DTAs:			
Ordinary			
Claims unpaid	$2,916,040	$1,144,585	$1,771,455
Premium deficiency reserve	-	166,413	(166,413)
Provider advances – nonadmitted	1,169,436	224,390	945,046
Total ordinary DTAs	4,085,476	1,535,388	2,550,088
Statutory valuation allowance adjustment	(4,085,476)	(1,533,871)	(2,551,605)
Nonadmitted ordinary DTAs	-	-	-
Admitted ordinary DTAs	-	1,517	(1,517)
Capital			
Investments	720,547	86,806	633,741
Total admitted capital DTAs	720,547	86,806	633,741
Statutory valuation allowance adjustment	(654,122)	(86,806)	(567,316)
Nonadmitted capital DTAs	-	-	-
Admitted capital DTAs	66,425	-	66,425
Admitted DTAs	66,425	1,517	64,908
DTLs:			
Ordinary			
Ordinary DTLs	-	-	-
Capital			
Investments	38,808	1,517	37,291
Capital DTLs	38,808	1,517	37,291
Total DTLs	38,808	1,517	37,291
Net admitted DTAs	$27,617	-	$27,617

The change in net deferred income taxes is comprised of the following:

	December 31		
	2016	2015	Change
Total DTAs	$66,425	$1,517	$64,908
Total DTLs	(38,808)	(1,517)	(37,291)
Net DTAs/(DTLs)	27,617	-	27,617
Tax effect of unrealized gains (losses)			-
Change in net deferred income tax			27,617

The valuation allowance adjustment to gross DTAs was $4,739,598 and $1,620,677 at December 31, 2016 and 2015, respectively

The benefit for federal income taxes is different from that which would be obtained by applying the statutory federal income tax rate to income before income taxes. The items causing this difference are as follows:

	December 31, 2016	Effective tax rate	December 31, 2015	Effective tax rate
Benefit computed at statutory rate	$(3,286,344)	35.0%	$(6,647,340)	35.0%
Health Insurer Fee	1,130,668	(12.0)%	-	
Transfer pricing adjustment	(1,982,297)	21.1%	(852,917)	4.5%
Tax exempt interest	(16,407)	0.2%	-	0.0%
Change in nonadmitted assets	(945,046)	10.1%	(224,390)	1.2%
Prior year true-up	(44,975)	0.5%	-	0.0%
Change in statutory valuation allowance adjustment	3,118,921	(33.2)%	1,620,677	(8.5)%
Non-deductible penalties	462,000	(5.0)%	-	0.0%
Other	-	0.0%	(5,673)	0.0%
Total	$(1,563,480)	16.7%	$(6,109,643)	32.2%
Federal and foreign income tax (benefit) expense	$(1,535,863)	16.4%	$(6,109,643)	32.2%
Change in net deferred income taxes	(27,617)	0.3%	-	0.0%
Total statutory income taxes	$(1,563,480)	16.7%	$(6,109,643)	32.2%

The transfer pricing adjustment allows taxpayers to apply different methods to price current period intercompany services at arm's length prices as compared to what would be charged to an unrelated entity, which results in a permanent deduction for tax reporting purposes.

At December 31, 2016 and 2015, the Company had no net capital loss or net operating loss carryforwards for tax purposes.

The amount of federal income taxes incurred that are available for recoupment in the event of future net losses are:

Year	Ordinary	Capital	Total
2016	-	$16,822	$16,822
2015	-	8,950	8,950
2014	-	1,845	1,845
Total	-	$27,617	$27,617

The Company did not report any deposits as admitted assets under Internal Revenue Code Section 6603 at December 31, 2016 and 2015.

At December 31, 2016, the Company's Federal Income Tax Return was consolidated with the following entities:

AUSHC Holdings, Inc.	U.S. Health Care Properties, Inc.
Broadspire National Services, Inc.	Work and Family Benefits, Inc.

As explained in Note 2, the Company participates in a tax sharing agreement with its parent and affiliates.

The Company does not have any tax loss contingencies for which it is reasonably possible that the total liability will significantly increase within twelve months of the reporting date.

The Company is subject to Louisiana premium taxes. Premium tax expenses were recorded in general administrative expenses in the Statutory Statements of Revenue and Expenses. Premium tax expenses were $23,560,150 and $3,813,410 for the years ended December 31, 2016 and 2015, respectively. The Company had premium taxes payable of $19,234,270 and $3,813,410 at December 31, 2016 and 2015, respectively, which was recorded as general expenses due or accrued in the Statutory Statements of Liabilities.

10. Reinsurance

Effective February 1, 2016, the Company and Berkley Life and Health Insurance Company ("Berkley") entered into an excess loss reinsurance agreement for Medicaid only dual eligible members. Under this agreement, Berkley is liable for 90% of covered expenses in excess of the specific deductible of $350,000 per covered member, with a maximum reimbursement of $5,000,000 per member per agreement year. The Company paid reinsurance premiums of $574,667 in 2016 and $282,984 in 2015. In 2016, the Company realized reinsurance recoveries of $467,279. The Company had no reinsurance recoveries in 2015.

11. Change in claims unpaid, unpaid claims adjustment expense, and aggregate health claim reserves

The following table shows the components of the change in claims unpaid, unpaid claims adjustment expense and aggregate health claim reserves for the years ended December 31, 2016 and 2015:

	2016	2015
Balance, January 1	$46,407,227	-
Health care receivable	-	-
Balance, January 1, net of health care receivable	46,407,227	-
Incurred related to:		
Current year	394,571,509	$179,314,803
Prior years	(11,374,995)	-
Total incurred	383,196,514	179,314,803
Paid related to:		
Current year	286,666,821	132,907,576
Prior years	33,232,768	-
Total paid	319,899,589	132,907,576
Balance, December 31, net of health care receivable	109,704,152	46,407,227
Health care receivable	1,001,642	-
Balance, December 31	$110,705,794	$46,407,227

In 2016, reserves for incurred claims and claim adjustment expenses attributable to insured events of prior years decreased by $11,374,995 from $46,407,227 in 2015 to $35,032,232 in 2016. The lower than anticipated health care cost trend rates observed in 2016 for claims incurred in 2015 were generally due to the result of ongoing analysis of recent loss development trends. Health care cost trend rates observed in 2016 for claims incurred in 2015 were generally consistent with expectations. The Company considers historical trend rates together with knowledge of recent events that may impact current trends when developing estimates of current trend rates. Original estimates are increased or decreased as additional information becomes known regarding individual claims. Historical health care cost trend rates are not necessarily representative of current trends.

Net coordination of benefits is implicit in the claims incurred but not reported calculation and could not be specifically identified.

12. Capital and surplus, shareholder's dividend restrictions and quasi-reorganizations

The Company had 10,000 shares of common stock with no par value authorized, with 1,000 shares issued and outstanding at December 31, 2016 and 2015.

The Company did not have any preferred stock outstanding at December 31, 2016 and 2015.

Dividend restrictions

No domestic stock insurer shall declare and pay any dividends to its stockholders unless its capital is fully paid in cash and is unimpaired and it has a surplus beyond its capital stock and the initial minimum surplus required and all other liabilities equal to fifteen percent of its capital stock, provided that this restriction shall not apply to an insurer when its paid-in capital and surplus exceed the minimum required by the Louisiana Department Code by one hundred percent or more.

At December 31, 2016 and 2015, there was no portion of the Company's profits that may be paid as ordinary dividends to stockholders.

The Company did not pay any dividends in 2016 or 2015. The Company received capital contributions in the amounts of $10,000,000, $20,000,000 and $20,000,000 from its parent on March 30, June 29 and September 28, 2016, respectively. The Louisiana Department approved these transactions on March 30, June 29 and September 28, 2016, respectively. The Company received capital contributions in the amounts of $24,000,000 and $10,000,000 from its parent on December 28 and March 31, 2015, respectively. The Louisiana Department approved these transactions on December 28 and March 30, 2015, respectively.

There were no restrictions placed on the Company's surplus, including for whom the surplus was being held at December 31, 2016 or 2015, except as noted in Note 14.

The Company did not hold any stock for any special purposes at December 31, 2016 or 2015.

Changes in the balances of special surplus funds from the prior year are due to the accrual of estimated ACA health insurer fees reclassified from unassigned funds or surplus to aggregate write-ins for special surplus funds as discussed more fully in Notes 2 and 18.

At December 31, 2016 and 2015, there was no portion of unassigned funds or surplus that was represented or reduced by unrealized gains and losses.

The Company did not have any special surplus funds or surplus notes at December 31, 2016 or 2015.

13. Contingencies

Litigation and Regulatory Proceedings

The following description of litigation and regulatory proceedings covers Aetna Inc. and certain of its subsidiaries, including the Company (collectively, "we", "our" or "us"). Certain of the proceedings described below may not impact the Company directly but may have an indirect impact on the Company as the Company is a member of the Aetna holding company group.

Out-of-Network Benefit Proceedings

We are named as a defendant in several purported class actions and individual lawsuits arising out of our practices related to the payment of claims for services rendered to our members by health care providers with whom we do not have a contract ("out-of-network providers"). Among other things, these lawsuits allege that we paid too little to our health plan members and/or providers for these services, among other reasons, because of our use of data provided by Ingenix, Inc., a subsidiary of one of our competitors ("Ingenix"). Other major health insurers are the subject of similar litigation or have settled similar litigation.

Various plaintiffs who are health care providers or medical associations seek to represent nationwide classes of out-of-network providers who provided services to our members during the period from 2001 to the present. Various plaintiffs who are members in our health plans seek to represent nationwide classes of our members who received services from out-of-network providers during the period from 2001 to the present. Taken together, these lawsuits allege that we violated state law, the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), the Racketeer Influenced and Corrupt Organizations Act ("RICO") and federal antitrust laws, either acting alone or in concert with our competitors. The purported classes seek reimbursement of all unpaid benefits, recalculation and repayment of deductible and coinsurance amounts, unspecified damages and treble damages, statutory penalties, injunctive and declaratory relief, plus interest, costs and attorneys' fees, and seek to disqualify us from acting as a fiduciary of any benefit plan that is subject to ERISA. Individual lawsuits that generally contain similar allegations and seek similar relief have been brought by health plan members and out-of-network providers.

The first class action case was commenced on July 30, 2007. The federal Judicial Panel on Multi-District Litigation (the "MDL Panel") has consolidated these class action cases in the U.S. District Court for the District of New Jersey (the "New Jersey District Court") under the caption *In re: Aetna UCR Litigation*, MDL No. 2020 ("MDL 2020"). In addition, the MDL Panel has transferred the individual lawsuits to MDL 2020. On May 9, 2011, the New Jersey District Court dismissed the physician plaintiffs from MDL 2020 without prejudice. The New Jersey District Court's action followed a ruling by the United States District Court for the Southern District of Florida (the "Florida District Court") that the physician plaintiffs were enjoined from participating in MDL 2020 due to a prior settlement and release. The United States Court of Appeals for the Eleventh Circuit has dismissed the physician plaintiffs' appeal of the Florida District Court's ruling.

On December 6, 2012, we entered into an agreement to settle MDL 2020. Under the terms of the proposed nationwide settlement, we would have been released from claims relating to our out-of-network reimbursement practices from the beginning of the applicable settlement class period through August 30, 2013. The settlement agreement did not contain an admission of wrongdoing. The medical associations were not parties to the settlement agreement.

Under the settlement agreement, we would have paid up to $120 million to fund claims submitted by health plan members and health care providers who were members of the settlement classes. These payments also would have funded the legal fees of plaintiffs' counsel and the costs of administering the settlement. In connection with the proposed settlement, Aetna recorded an after tax charge to net income of approximately $78.0 million in the fourth quarter of 2012.

The settlement agreement provided us the right to terminate the agreement under certain conditions related to settlement class members who opted out of the settlement. Based on a report provided to the parties by the settlement administrator, the conditions permitting us to terminate the settlement agreement were satisfied. On March 13, 2014, we notified the New Jersey District Court and plaintiffs' counsel that we were terminating the settlement agreement. Various legal and factual developments since the date of the settlement agreement led us to believe terminating the settlement agreement was in our best interests. As a result of this termination, we released the reserve established in connection with the settlement agreement, net of amounts due to the settlement administrator, which reduced first quarter 2014 other general and administrative expenses of Aetna Inc. by $67.0 million ($103.0 million pretax). There was no after-tax charge to net income for the Company associated to the proposed settlement.

On June 30, 2015, the New Jersey District Court granted in part our motion to dismiss the proceeding. The New Jersey District Court dismissed with prejudice the plaintiffs' RICO and federal antitrust claims; their ERISA claims that are based on our disclosures and our purported breach of fiduciary duties; and certain of their state law claims. The New Jersey District Court also dismissed with prejudice all claims asserted by several medical association plaintiffs. The plaintiffs' remaining claims are for ERISA benefits and breach of contract. We intend to defend ourselves vigorously against the plaintiffs' remaining claims.

We also have received subpoenas and/or requests for documents and other information from, and been investigated by, attorneys general and other state and/or federal regulators, legislators and agencies relating to, and we are involved in other litigation regarding, our out-of-network benefit payment and administration practices. It is reasonably possible that others could initiate additional litigation or additional regulatory action against us with respect to our out-of-network benefit payment and/or administration practices.

Other Litigation and Regulatory Proceedings

We are involved in numerous other lawsuits arising, for the most part, in the ordinary course of our business operations, including claims of or relating to bad faith, medical malpractice, non-compliance with state and federal regulatory regimes, marketing misconduct, failure to timely or appropriately pay or administer claims and benefits in our Health Care and Group Insurance businesses (including our post-payment audit and collection practices and reductions in payments to providers due to sequestration), provider network structure (including the use of performance-based networks and termination of provider contracts), provider directory accuracy, rescission of insurance coverage, improper disclosure of personal information, anticompetitive practices, patent infringement and other intellectual property litigation, other legal proceedings in our Health Care and Group Insurance businesses and employment litigation. Some of these other lawsuits are or are purported to be class actions. We intend to defend ourselves vigorously against the claims brought in these matters.

Awards to us and others of certain government contracts, particularly Medicaid contracts and contracts with government customers in our commercial business, are subject to increasingly frequent protests by unsuccessful bidders. These protests may result in awards to us being reversed, delayed or modified. The loss or delay in implementation of any government contract could adversely affect our operating results. We will continue to defend vigorously contract awards we receive.

In addition, our operations, current and past business practices, current and past contracts, and accounts and other books and records are subject to routine, regular and special investigations, audits, examinations and reviews by, and from time to time we receive subpoenas and other requests for information from, the Centers for Medicare and Medicaid Services ("CMS"), the U.S. Department of Health and Human Services, various state insurance and health care regulatory authorities, state attorneys general, treasurers and offices of inspector general, the Center for Consumer Information and Insurance Oversight, OIG, the Office of Personnel Management, the U.S. Department of Labor, the U.S. Department of the Treasury, the U.S. Food and Drug Administration, committees, subcommittees and members of the U.S. Congress, the U.S. Department of Justice, the Federal Trade Commission, U.S. attorneys and other state, federal and international governmental authorities. These government actions include inquiries by, and testimony before, certain members, committees and subcommittees of the U.S. Congress regarding our withdrawal from certain states' health insurance exchanges ("Public Exchanges") for 2017, certain of our current and past business practices, including our overall claims processing and payment practices, our business practices with respect to our small group products, student health products or individual customers (such as market withdrawals, rating information, premium increases and medical benefit ratios), executive compensation matters and travel and entertainment expenses, as well as the investigations by, and subpoenas and requests from, attorneys general and others described above under "*Out-of-Network Benefit Proceedings*."

There also continues to be a heightened level of review and/or audit by regulatory authorities of, and increased litigation regarding, our and the rest of the health care and related benefits industry's business and reporting practices, including premium rate increases, utilization management, development and application of medical policies, complaint, grievance and appeal processing, information privacy, provider network structure (including provider network adequacy, the use of performance-based networks and termination of provider contracts), provider directory accuracy, calculation of minimum medical loss ratios and/or payment of related rebates, delegated arrangements, rescission of insurance coverage, limited benefit health products, student health products, pharmacy benefit management practices (including the use of narrow networks and the placement of drugs in formulary tiers), sales practices, customer service practices, vendor oversight and claim payment practices (including payments to out-of-network providers and payments on life insurance policies).

As a leading national health and related benefits company, we regularly are the subject of government actions of the types described above. These government actions may prevent or delay us from implementing planned premium rate increases and may result, and have resulted, in restrictions on our business, changes to or clarifications of our business practices, retroactive adjustments to premiums, refunds or other payments to members, beneficiaries, states or the federal government, withholding of premium payments to us by government agencies, assessments of damages, civil or criminal fines or penalties, or other sanctions, including the possible suspension or loss of licensure and/or suspension or exclusion from participation in government programs.

Estimating the probable losses or a range of probable losses resulting from litigation, government actions and other legal proceedings is inherently difficult and requires an extensive degree of judgment, particularly where the matters involve indeterminate claims for monetary damages, involve claims for injunctive relief, may involve fines, penalties or punitive damages that are discretionary in amount, involve a large number of claimants or regulatory authorities, represent a change in regulatory policy, present novel legal theories, are in the early stages of the proceedings, are subject to appeal or could result in changes in business practices. In addition, because most legal proceedings are resolved over long periods of time, potential losses are subject to change due to, among other things, new developments, changes in litigation strategy, the outcome of intermediate procedural and substantive rulings and other parties' settlement posture and their evaluation of the strength or weakness of their case against us. Except as specifically noted above under "*Other Litigation and Regulatory Proceedings*," we are currently unable to predict the ultimate outcome of, or reasonably estimate the losses or a range of losses resulting from, the matters described above, and it is reasonably possible that their outcome could be material to us.

Litigation exposure coverage

Effective March 1, 2016, the Company has coverage for certain litigation exposures ($10,000,000 per claim and in the aggregate including defense costs) through an unaffiliated insurance company.

Health Care Reform

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (as amended, collectively, "Health Care Reform" or "ACA"), has made broad-based changes to the U.S. health care system. On January 20, 2017, the President signed an executive order that gives the regulatory agencies that enforce the ACA the authority to interpret regulations issued under the ACA in a way that limits fiscal burdens on states and financial or regulatory burdens on individuals, providers, health insurers and others. The practical implications of that order are unclear, and the future of the ACA is uncertain. While we anticipate efforts in 2017 and beyond to substantially modify, repeal or replace the ACA, the Company expects aspects of the ACA to continue to significantly impact the Company's business operations and operating results, including the Company's pricing, medical benefit ratios and the geographies in which the Company's products are available. Health Care Reform has presented the Company with business opportunities, but also with financial and regulatory challenges. Most of the ACA's key components were phased in during or prior to 2014, including Public Exchanges, required minimum MLRs in commercial and Medicare products, the individual coverage mandate, guaranteed issue, rating limits in individual and small group products, significant new industry-wide fees, assessments and taxes, enhanced premium rate review and disclosure processes, reduced Medicare Advantage payment rates to insurers, and linking Medicare Advantage payments to a plan's CMS quality performance ratings or "star ratings." The effects of these changes are reflected in the Company's operating results. If the ACA is not amended, repealed or replaced, certain of its components will continue to be phased in until 2020.

The Company has dedicated and expects to continue to be required to dedicate significant resources and incur significant expenses during 2017 to implement and comply with Health Care Reform and changes in Health Care Reform as well as state level health care reform. While most of the significant aspects of Health Care Reform became effective during or prior to 2014, significant parts of Health Care Reform, including aspects of nondiscrimination requirements, continue to evolve through the promulgation of executive orders, regulations and guidance. Additional changes to Health Care Reform and

those regulations and guidance at the federal and/or state level are likely, and those changes are likely to be significant. Growing state and federal budgetary pressures make it more likely that any changes, including changes at the state level in response to changes to, or repeal or replacement of, Health Care Reform and/or changes in the funding levels and/or payment mechanisms of federally supported benefit programs, will be adverse to us. Given the inherent difficulty of foreseeing the nature and scope of future changes to Health Care Reform and how states, businesses and individuals will respond to those changes, the Company cannot predict the impact to the Company of future changes to Health Care Reform. It is reasonably possible that repeal or replacement of or other changes to Health Care Reform and/or states' responses to such changes, in the aggregate, could have a significant adverse effect on the Company's business operations and financial results.

Potential repeal of Health Care Reform, ongoing legislative and regulatory changes to Health Care Reform, other pending efforts in the U.S. Congress to amend or restrict funding for various aspects of Health Care Reform (including risk corridors and Health Care Reform's Cost Sharing Subsidy program), the results of the 2016 presidential, congressional and state level elections, pending litigation challenging aspects of the law and federal budget negotiations continue to create uncertainty about the ultimate impact of Health Care Reform. Examples of recent legislative and regulatory changes include: the January 20, 2017 executive order relating to Health Care Reform; the November 2016 HHS announcement that risk corridor collections for the 2015 program year will be applied first to amounts owed to plans for the 2014 program year; the May 2016 final regulations relating to Health Care Reform's non-discrimination requirements; the December 2015 suspension of the health insurer fee for 2017 and two year delay of the "Cadillac" tax on high-cost employer-sponsored health coverage; the October 2015 PACE, which leaves groups with 51 to 100 employees within the large group category for each state unless the state exercises its option to include these groups within the small group category; and the October 2015 HHS announcement that Health Care Reform's risk corridor receivables for the 2014 program year would only be funded at 12.6%. With respect to pending litigation, in May 2016, the U.S. District Court for the District of Columbia ruled that the U.S. Department of Health and Human Services does not have the authority to make payments under Health Care Reform's Cost Sharing Subsidy program. Implementation of this decision has been stayed pending appeal. A final ruling that adversely impacts the Cost Sharing Subsidy program could cause significant adverse selection in individual Public Exchange products and instability in the individual Public Exchange marketplace and could have a material adverse effect on the Company's business, cash flows, financial condition and operating results as well as hinder the Company's ability to offer Public Exchange products.

As described above, the availability of funding for the ACA's temporary risk corridor program is an example of this uncertainty. The Company continues to believe that receipt of any risk corridor payment from HHS for the 2016 or 2015 program year and receipt of such payments in excess of the announced prorated amount for the 2014 program year are uncertain. At December 31, 2016, the Company had no receivable for the remaining 2014 program year prorated amount that had not been collected from HHS and had no receivable for either of the 2015 or 2016 program years. In addition, these limited risk corridor payments created additional instability in the marketplace for individual commercial products in 2016 and going forward by contributing to decisions by health plans to change or stop offering their Public Exchange products. 2016 was the last program year for Health Care Reform's risk corridor program. On-going uncertainty regarding the funding of Health Care Reform-related programs and subsidies can be expected to create additional instability in the marketplace.

In addition to efforts to amend, repeal or replace Health Care Reform and the related regulations, the federal and state governments also continue to enact and seriously consider many other broad-based legislative and regulatory proposals that have had a material impact on or could materially impact various aspects of the health care and related benefits system and the Company's business. The Company cannot predict whether pending or future federal or state legislation or court proceedings, including future U.S. Congressional appropriations, will change various aspects of the health care and related benefits system or Health Care Reform or the impact those changes will have on the Company's business operations or operating results, but the effects could be materially adverse.

In addition, Health Care Reform ties a portion of each Medicare Advantage plans' reimbursement to the achievement of favorable CMS quality performance measures ("star ratings"). Since 2015, only Medicare Advantage plans with an overall star rating of four or more stars (out of five stars) are eligible for a quality bonus in their basic premium rates. As a result, the Company's Medicare Advantage plans' operating results in 2017 and going forward will be significantly affected by their star ratings.

14. Minimum capital and surplus

Pursuant to the laws of Louisiana, each health maintenance organization shall establish prior to the issuance of any certificate of authority, and shall maintain as long as it does business in Louisiana as a health maintenance organization, capital and surplus in the amount of three million dollars. At December 31, 2016 and 2015, the Company's capital and surplus exceeded all such requirements.

The NAIC and the State of Louisiana adopted risk-based capital ("RBC") standards for health organizations, including HMOs, that are designed to identify weakly capitalized companies by comparing each company's adjusted capital and surplus to its required capital and surplus (the "RBC Ratio"). The RBC Ratio is designed to reflect the risk profile of the company. Within certain ratio ranges, regulators have increasing authority to take action as the RBC Ratio decreases. There are four levels of regulatory action, ranging from requiring insurers to submit a comprehensive plan to the state insurance commissioner to requiring the state insurance commissioner to place the insurer under regulatory control. At December 31, 2016 and 2015, the Company had capital and surplus that exceeded the highest threshold specified by the RBC rules.

15. Medicaid

The Company's Medicaid and dual eligible products also are heavily regulated by CMS and state Medicaid agencies, which have the right to audit the Company's performance to determine compliance with CMS contracts and regulations. The Company's Medicaid products, dual eligible products and Children's Health Insurance Program ("CHIP") contracts also are subject to complex federal and state regulations and oversight by state Medicaid agencies regarding the services the Company provides to Medicaid enrollees, payment for those services, network requirements (including mandatory inclusion of specified high-cost providers), and other aspects of these programs, and by external review organizations which audit Medicaid plans on behalf of the state Medicaid agencies. The laws, regulations and contractual requirements applicable to the Company and other participants in Medicaid and dual eligible programs, including requirements that the Company submit encounter data to the applicable state agency, are extensive, complex and subject to change. The Company has invested significant resources to comply with these standards, and the Company's Medicaid and dual eligible program compliance efforts will continue to require significant resources. CMS and/or state Medicaid agencies may fine the Company, withhold payments to the Company, seek premium and other refunds, terminate the Company's existing contracts, elect not to award the Company new contracts or renew existing contracts, prohibit the Company from continuing to market and/or enroll members in or refuse to automatically assign members to one or more of the Company's Medicaid or dual eligible products, exclude the Company from participating in one or more Medicaid or dual eligible programs and/or institute other sanctions against the Company if it fails to comply with CMS or state regulations or the Company's contractual requirements. The Company cannot predict whether pending or future federal or state legislation or court proceedings will change various aspects of the Medicaid program, nor can it predict the impact those changes will have on its business operations or financial results, but the effects could be materially adverse.

16. Accounting for the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010's (collectively, "Health Care Reform") Reinsurance, Risk Adjustment and Risk Corridor (the "3Rs") pursuant to SSAP No. 107 and INT 15-01: ACA Risk Corridors Collectibility ("INT 15-01")

Reinsurance

Health Care Reform established a temporary reinsurance program that expired at the end of 2016. Under this program, all issuers of major medical commercial insurance products and self-insured plan sponsors are required to contribute funding in amounts set by the U.S. Department of Health and Human Services ("HHS"). A portion of the funds collected will be utilized to reimburse issuers' high claims costs incurred for qualified individual members. The expense related to this required funding is reflected in insurance, taxes, licenses and fees for all of the Company's insurance products with the exception of products associated with qualified individual members; this expense for qualified individual members is reflected as a reduction of premium revenue. When annual claim costs incurred by the Company's qualified individual members exceed a specified attachment point, the Company is entitled to certain reimbursements from this program. The Company records amounts recoverable for claims paid and unpaid and ceded claim benefit recoveries to reflect its estimate of these recoveries. At December 31, 2016 and 2015, the Company did not record a payable or a receivable under the temporary three-year reinsurance program.

Risk Adjustment

Health Care Reform established a permanent risk adjustment program to transfer funds from qualified individual and small group insurance plans with below average risk scores to plans with above average risk scores. Based on the risk of the Company's qualified plan members relative to the average risk of members of other qualified plans in comparable markets, the Company estimates its ultimate risk adjustment receivable or payable for the current calendar year and reflects the impact as an adjustment to its premium revenue. At December 31, 2016 and 2015, the Company did not record a payable or a receivable under the risk adjustment program.

Risk Corridor

Health Care Reform established a temporary risk sharing program, which expires at the end of 2016, for qualified individual and small group insurance plans. Under this program the Company makes (or receives) a payment to (or from) HHS based on the ratio of allowable costs to target costs (as defined by Health Care Reform). The Company records a risk corridor receivable or payable as an adjustment to premium revenue based on the Company's estimate of the ultimate risk sharing amount for the current calendar year. In October 2015, HHS announced that 2014 Health Care Reform risk corridor receivables would be funded at 12.6% to the extent HHS fully collects risk corridor payables. In November 2015, INT 15-01 was issued as guidance to address the accounting for risk corridor receivables. In conjunction with this guidance, the Company recorded a risk corridor receivable at December 31, 2015 that coincided with the portion of the 2014 Health Care Reform risk corridor receivables that were considered collectible. The Company currently has not recorded any risk corridor receivables for the 2016 and 2015 program years or any amount in excess of HHS's announced pro-rated funding amount for the 2014 program year because payments from HHS are uncertain. The Company currently has not recorded any risk corridor receivables for the 2016 and 2015 program years.

The Company expects to perform an annual final reconciliation and settlement with HHS of the 3Rs in each subsequent year.

17. Reconciliation to statutory financial statements as filed with the Louisiana Department

The Company's nonadmitted health care receivables were understated on the statutory financial statements for December 31, 2016.

The following is a reconciliation of December 31, 2016 total assets as reflected in the accompanying Statutory Statements of Assets to amounts reported to the Louisiana Department (statutory reports) in the Company's 2016 annual statement:

Total assets as reflected in the accompanying Statutory Statements of Assets	$211,776,587
Decrease in health care receivables	2,119,801
Total assets as reported in the annual statement	$213,896,388

The following is a reconciliation of December 31, 2016 capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus to amounts reported to the Louisiana Department (statutory reports) in the Company's 2016 annual statement:

Capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus	$62,968,453
Increase in nonadmitted health care receivables	2,119,801
Statutory capital and surplus as reported in the annual statement	$65,088,254

The Company's federal and foreign income tax benefits incurred were understated on the statutory financial statements for December 31, 2015.

The following is a reconciliation of December 31, 2015 total assets as reflected in the accompanying Statutory Statements of Assets to amounts reported to the Louisiana Department (statutory reports) in the Company's 2015 annual statement:

Total assets as reflected in the accompanying Statutory Statements of Assets	$88,435,077
Increase in current federal and foreign income tax recoverable and interest thereon	1,009,750
Total assets as reported in the annual statement	$89,444,827

The following is a reconciliation of December 31, 2015 capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus to amounts reported to the Louisiana Department (statutory reports) in the Company's 2015 annual statement:

Capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus	$23,494,662
Increase in current federal and foreign tax recoverable and interest thereon	1,009,750
Statutory capital and surplus as reported in the annual statement	$24,504,412

The following is a reconciliation of December 31, 2015 net loss as reflected in the accompanying Statutory Statements of Revenue and Expenses to amounts reported to the Louisiana Department (statutory reports) in the Company's 2015 annual statement:

Net loss as reflected in the accompanying Statutory Statements of Revenue and Expenses	$(12,882,761)
Increase in federal and foreign income tax benefits incurred	1,009,750
Statutory net loss as reported in the annual statement	$(11,873,011)

18. Subsequent events

Type I - Recognized subsequent events

Subsequent events have been considered through June 1, 2017.

The Company had no known reportable recognized subsequent events.

Type II - Nonrecognized subsequent events

Subsequent events have been considered through June 1, 2017.

As discussed in Note 2, in December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the health insurer fee. As a result, there is no annual health insurance industry fee payable on September 30, 2017 and there are no amounts reflected in the Company's aggregate write-ins for special surplus funds related to this payable at December 31, 2016 as a result. There is also no resulting impact to the Company's RBC to assess as of December 31, 2016 as a result of this suspension. As of December 31, 2015, the Company estimated its portion of the annual health industry fee that was payable on September 30, 2016 to be $3,290,000. This was estimated based on premiums written subject to the ACA assessment of $180,946,342. During 2016, the Company paid $3,230,480 to the federal government for its portion of the health insurer fee due on September 30, 2016.

SUPPLEMENTAL INFORMATION

SUPPLEMENTAL INVESTMENT RISKS INTERROGATORIES

For The Year Ended December 31, 2016
(To Be Filed by April 1)

Of The Aetna Better Health, Inc. (a Louisiana corporation)

ADDRESS (City, State and Zip Code) Kenner , LA 70062

NAIC Group Code 0001 NAIC Company Code 15616 Federal Employer's Identification Number (FEIN) 80-0629718

The Investment Risks Interrogatories are to be filed by April 1. They are also to be included with the Audited Statutory Financial Statements.

Answer the following interrogatories by reporting the applicable U.S. dollar amounts and percentages of the reporting entity's total admitted assets held in that category of investments.

1. Reporting entity's total admitted assets as reported on Page 2 of this annual statement. $ 211,776,587

2. Ten largest exposures to a single issuer/borrower/investment.

	1 Issuer	2 Description of Exposure	3 Amount	4 Percentage of Total Admitted Assets
2.01	LOUISIANA STATE REF-SER B	Bond	$ 8,097,059	3.8 %
2.02	DOUGLAS CNTY NE SCH DIST 1	Bond	$ 4,620,819	2.2 %
2.03	COLUMBIA DIST OF SER D	Bond	$ 4,449,232	2.1 %
2.04	LOUISIANA PUB FACS AUTH REV VAR COCA COLA BOTTLING CO	Bond	$ 4,400,000	2.1 %
2.05	ALABAMA ECON SETTLEMENT AUTH BP SETTLEMENT REV-SER A	Bond	$ 4,376,736	2.1 %
2.06	NEW YORK ST DORM AUTH ST SER A	Bond	$ 2,687,902	1.3 %
2.07	WHITNEY BANK	Bond	$ 250,000	0.1 %
2.08	CAPITAL ONE	Bond	$ 250,000	0.1 %
2.09	LIBERTY BANK AND TRUST	Bond	$ 250,000	0.1 %
2.10	CITIZENS BANK	Short Term	$ 250,000	0.1 %

3. Amounts and percentages of the reporting entity's total admitted assets held in bonds and preferred stocks by NAIC designation.

	Bonds	1	2		Preferred Stocks	3	4
3.01	NAIC-1	$ 158,472,723	74.8 %	3.07	P/RP-1	$ 0	0.0 %
3.02	NAIC-2	$ 0	0.0 %	3.08	P/RP-2	$ 0	0.0 %
3.03	NAIC-3	$ 0	0.0 %	3.09	P/RP-3	$ 0	0.0 %
3.04	NAIC-4	$ 0	0.0 %	3.10	P/RP-4	$ 0	0.0 %
3.05	NAIC-5	$ 0	0.0 %	3.11	P/RP-5	$ 0	0.0 %
3.06	NAIC-6	$ 0	0.0 %	3.12	P/RP-6	$ 0	0.0 %

4. Assets held in foreign investments:

4.01 Are assets held in foreign investments less than 2.5% of the reporting entity's total admitted assets? Yes [X] No [ ]

If response to 4.01 above is yes, responses are not required for interrogatories 5 - 10.

4.02	Total admitted assets held in foreign investments	$ 0	0.0 %
4.03	Foreign-currency-denominated investments	$ 0	0.0 %
4.04	Insurance liabilities denominated in that same foreign currency	$ 0	0.0 %

5. Aggregate foreign investment exposure categorized by NAIC sovereign designation:

		1	2
5.01	Countries designated NAIC-1	$ 0	0.0 %
5.02	Countries designated NAIC-2	$ 0	0.0 %
5.03	Countries designated NAIC-3 or below	$ 0	0.0 %

6. Largest foreign investment exposures by country, categorized by the country's NAIC sovereign designation:

		1	2
	Countries designated NAIC - 1:		
6.01	Country 1:	$ 0	0.0 %
6.02	Country 2:	$ 0	0.0 %
	Countries designated NAIC - 2:

Independent Auditors' Report

The Board of Directors
Aetna Better Health, Inc. (a Louisiana corporation)

Report on the Financial Statements

We have audited the accompanying financial statements of Aetna Better Health, Inc. (a Louisiana corporation), which comprise the statutory statements of assets, liabilities, capital and surplus as of December 31, 2017 and 2016, and the related statutory statements of revenue and expenses, changes in capital and surplus, and cash flows for the years then ended, and the related notes to the statutory financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 2 to the financial statements, the financial statements are prepared by Aetna Better Health, Inc. (a Louisiana corporation) using statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance, which is a basis of accounting other than U.S. generally accepted accounting principles. Accordingly, the financial statements are not intended to be presented in accordance with U.S. generally accepted accounting principles.

The effects on the financial statements of the variances between the statutory accounting practices described in Note 2 and U.S. generally accepted accounting principles, although not reasonably determinable, are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the significance of the variances between statutory accounting practices and U.S. generally accepted accounting principles discussed in the Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles paragraph, the financial statements referred to above do not present fairly, in accordance with U.S. generally accepted accounting principles, the financial position of Aetna Better Health, Inc. (a Louisiana corporation) as of December 31, 2017 and 2016, or the results of its operations or its cash flows for the years then ended.

Opinion on Statutory Basis of Accounting

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and capital and surplus of Aetna Better Health, Inc. (a Louisiana corporation) as of December 31, 2017 and 2016, and the results of its operations and its cash flow for the years then ended, in accordance with statutory accounting practices prescribed or permitted by the Louisiana Department of Insurance described in Note 2.

Other Matter

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information included in the supplemental schedules titled Summary Investment Schedule and Supplemental Investment Risks Interrogatories is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Louisiana Department of Insurance. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audits of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

See accompanying notes to statutory financial statements.

1. Organization and operation

Aetna Better Health, Inc. (a Louisiana corporation) (the "Company") is a wholly-owned subsidiary of Aetna Health Holdings, LLC, whose ultimate parent is Aetna Inc. ("Aetna").

The Company was incorporated in the State of Louisiana on July 27, 2010. Effective February 1, 2015, the Company began administering a health plan for individuals who qualify for Medicaid coverage in the State of Louisiana. The contract with the Louisiana Department of Health and Hospitals is for a term through December 31, 2019.

2. Summary of significant accounting policies

Accounting practices

The accompanying statutory financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Louisiana Department of Insurance ("Louisiana Department") ("Louisiana Accounting Practices"). The Louisiana Department recognizes only statutory accounting practices prescribed or permitted by the State of Louisiana for determining and reporting the financial condition and results of operations of an insurance company, which include accounting practices and procedures adopted by the National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP"). The Company's net income (loss) and capital and surplus as stated on a NAIC SAP basis and on the basis of practices prescribed or permitted by the State of Louisiana were the same as of and for the years ended December 31, 2017 and 2016.

The Louisiana Accounting Practices vary from U.S. generally accepted accounting principles ("GAAP"). The primary differences include the following:

- Certain assets, designated as non-admitted assets (other receivables, which are non-admitted in accordance with Statements of Statutory Accounting Principles ("SSAP") No. 4 - *Assets and Non-admitted Assets*) are not recorded as assets, but are charged to surplus. Assets having economic value other than those which can be used to fulfill policyholder obligations, or those assets which are unavailable due to encumbrances or other third party interests should not be recognized on the Statutory Statements of Assets, and are, therefore, considered non-admitted;
- Bonds are recorded at amortized cost except for those with an NAIC designation of 3 through 6, which are reported at the lower of amortized cost or fair value. Therefore, changes in unrealized gains and losses for those securities held at amortized cost are not reflected in the financial statements. Under GAAP, bonds classified as available for sale are recorded at fair value, and related changes in unrealized gains and losses are recorded as a component of equity, net of deferred federal income taxes;
- Deferred tax assets and liabilities are determined and admitted in accordance with SSAP No. 101 - *Income Taxes* ("SSAP No. 101"). Changes in net deferred tax assets and liabilities are reflected as changes in surplus, whereas under GAAP, changes in such assets and liabilities are reflected in net income. In addition, statutory accounting requires consideration of a statutory allowance adjustment in the calculation of adjusted gross deferred tax assets and an admissibility test for deferred tax assets; and
- Reinsurance recoverables on unpaid losses are reported as a reduction of liability for unpaid claims and claims adjustment expenses, while under GAAP, they are reported as an asset.

There were no permitted practices by the State of Louisiana for the years ended December 31, 2017 and 2016.

Use of estimates in the preparation of the financial statements

The preparation of these financial statements in conformity with Louisiana Accounting Practices requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses. Actual results could differ from those estimates.

Significant accounting policies

The Company applies the following significant accounting policies:

Cash, cash equivalents and short-term investments

Cash, cash equivalents and short-term investments, consisting primarily of money market instruments and other debt issues with an original maturity of up to one year, are carried at amortized cost. Short-term investments consist primarily of investments purchased with an original maturity date of greater than three months but less than one year. Cash equivalents consist of highly liquid instruments, which mature within three months from the date of purchase. The carrying amount of cash, cash equivalents and short-term investments approximates fair value.

Bonds

Bonds, which include special deposits as discussed more fully in Note 4, are carried at amortized cost except for those bonds with an NAIC designation of 3 through 6, which are carried at the lower of amortized cost or fair value. The amount carried at fair value is not material to the financial statements. Bond premiums and discounts are amortized using the scientific interest method. When quoted prices in active markets for identical assets are available, the Company uses these quoted market prices to determine the fair value of bonds. This is used primarily for U.S. government securities. In other cases where a quoted market price for identical assets in an active market is either not available or not observable, the Company estimates fair values using valuation methodologies based on available and observable market information or by using a matrix pricing model. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. The Company had no investments where fair value was determined using broker quotes or an internal analysis of financial performance and cash flow projections at December 31, 2017 and 2016. Bonds include all investments whose maturity is greater than one year when purchased.

The Company periodically reviews its bonds to determine whether a decline in fair value below the carrying value is other-than-temporary. For bonds, other than loan-backed and structured securities ("LB&SS"), an other-than-temporary impairment ("OTTI") shall be recorded if it is probable that the Company will be unable to collect all amounts due according to the contractual terms in effect at the date of acquisition. Declines deemed to be OTTI in the cost basis are recognized as realized capital losses. Yield-related impairments are deemed other-than-temporary when the Company intends to sell an investment at the reporting date before recovery of the cost of the investment.

For LB&SS, the Company records OTTI when the fair value of the loan-backed or structured security is less than the amortized cost basis at the balance sheet date and (1) the Company intends to sell the investment, or (2) the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the security, even if it does not intend to sell the security and has the intent and ability to hold. If it is determined an OTTI has occurred because of (1) or (2), the amount of the OTTI is equal to the difference between the amortized cost and the fair value of the security at the balance sheet date and this difference is recorded as a realized capital loss. If it is determined an OTTI has occurred because of (3), the amount of the OTTI is equal to the difference between the amortized cost and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate and this difference is also accounted for as a realized capital loss.

The Company analyzes all relevant facts and circumstances for each investment when performing its analysis to determine whether an OTTI exists. Among the factors considered in evaluating whether a decline is other-than-temporary, management considers whether the decline in fair value results from a change in the quality of the investment security itself, whether the decline results from a downward movement in the market as a whole, the prospects for realizing the carrying value of the bond based on the investee's current and short-term prospects for recovery and other factors. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations and the risk that facts and circumstances factored into our assessment may change with the

passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods may result in a current period decision to sell securities that were not other-than-temporarily-impaired in prior reporting periods.

For the Company's bonds and LB&SS that provide for a prepayment penalty or acceleration fee in the event the bond is liquidated prior to its scheduled termination date, the Company reports such fees as investment income when earned.

Investment income due and accrued

Accrued investment income consists primarily of interest. Interest is recognized on an accrual basis and dividends are recorded as earned on the ex-dividend date. Due and accrued income is not recorded on: (a) bonds in default; and (b) bonds delinquent more than 90 days or where collection of interest is improbable. At December 31, 2017 and 2016, the Company did not have any non-admitted investment income due and accrued.

Premiums and amounts due and unpaid

Premium revenue for prepaid health care products is recognized as income in the month in which enrollees are entitled to health care services.

Non-admitted amounts consist of all premiums due and unpaid greater than 90 days past due, with the exception of amounts due under government insured plans, which may be admitted assets under certain circumstances.

Hospital and medical costs and claims adjustment expenses and related reserves

Hospital and medical costs consist principally of fee-for-service medical claims and capitation costs. Claims unpaid and aggregate health claim reserves include the Company's estimate of payments to be made on claims reported but not yet paid and for health care services rendered to enrollees but not yet reported to the Company as of the Statutory Statements of Assets and Liabilities, Capital and Surplus date. Such estimates are developed using actuarial principles and assumptions, which consider, among other things, historical and projected claim submission and processing payment patterns, medical cost trends, historical utilization of health care services, claim inventory levels, medical inflation, contract requirement changes in membership and product mix, seasonality and other relevant factors. The Company reflects changes in estimates in hospital and medical costs in the Statutory Statements of Revenue and Expenses in the period they are determined. Capitation costs, which are recorded in hospital and medical expenses in the Statutory Statements of Revenue and Expenses, represent contractual monthly fees paid to participating physicians and other medical providers for providing medical care, regardless of the medical services provided to the enrollee.

The Company uses the triangulation method to estimate reserves for claims incurred but not reported. The method of triangulation makes estimates of completion factors that are then applied to the total paid claims (net of coordination of benefits) to date for each incurral month. This provides an estimate of the total projected incurred claims and total amount outstanding or claims incurred but not reported (claims unpaid). For the most current dates of service where there is insufficient paid claim data to rely solely on the triangulation method, the Company examines cost and utilization trends as well as environmental factors, plan changes, provider contracts, changes in membership and/or benefits, and historical seasonal patterns to estimate the reserve required for these months.
Claims adjustment expenses, which include cost containment expenses, represent the costs incurred related to the claim settlement process such as costs to record, process and adjust claims. These expenses are included in the Company's management agreement with an affiliate described in Note 7.

Aggregate health policy reserves and related expenses

Premium deficiency reserves ("PDR") are recognized when it is probable that the expected future hospital and medical costs, including maintenance costs, will exceed anticipated future premiums and reinsurance recoveries on existing contracts. Where allowed, anticipated investment income is considered in the calculation of any PDR. For purposes of

calculating a PDR, contracts are grouped in manner consistent with the method of acquiring, servicing and measuring the profitability of such contracts. The Company had no PDR at December 31, 2017 and 2016, respectively.

Fees Paid to the Federal Government by Health Insurers

SSAP No. 106 – *Affordable Care Act Section 9010 Assessment* ("SSAP No. 106") required (1) that the health insurer fee be recognized in full on January 1 of the fee year (the calendar year in which the assessment must be paid to the federal government), in the operating expense category of insurance taxes, licenses and fees, excluding federal income taxes and (2) that in each data year preceding a fee year a reporting entity pro-ratably accrue by reclassifying from unassigned funds (surplus) to aggregate write-ins for special surplus funds an amount equal to its estimated subsequent fee year assessment. This reclassification has no impact on total capital and surplus and is reversed in full on January 1 of the fee year. In December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the health insurer fee. As interpreted in INT 16-01: ACA Section 9010 Assessment 2017 Moratorium, because there was not an ACA Section 9010 fee due in September 2017, there was not an accrual of a liability on January 1, 2017 based on 2016 data year net written premiums. Accrual of a liability on January 1, 2018 for the ACA Section 9010 assessment based on 2017 data year net written premiums and the reclassification from unassigned funds (surplus) to aggregate write-ins for special surplus funds equal to the estimated 2018 fee year assessment accrued in data year 2017 both continued as prescribed under SSAP No. 106. See Note 17 for disclosure of all amounts related to the health insurer fee for the Company.

Federal income taxes

The Company is included in the consolidated federal income tax return of its parent company, Aetna and Aetna's other wholly-owned subsidiaries pursuant to the terms of a tax sharing agreement. In accordance with a written tax sharing agreement with an affiliate, the Company's current federal income tax provisions are generally computed as if the Company were filing a separate federal income tax return; current income tax benefits, including those resulting from net operating losses, are recognized to the extent realized in the consolidated return. Pursuant to this agreement, the Company has the enforceable right to recoup federal income taxes paid in prior years in the event of future net losses, which it may incur, or to recoup its net losses carried forward as an offset to future net income subject to federal income taxes.

Income taxes are accounted for under the asset and liability method. Deferred income tax assets ("DTAs") and liabilities ("DTLs") represent the expected future tax consequences of temporary differences generated by statutory accounting as defined in SSAP No. 101. DTAs and DTLs are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. DTAs and DTLs are computed by means of identifying temporary differences which are measured using a balance sheet approach whereby statutory and tax basis balance sheets are compared. Current income tax recoverables include all current income taxes, including interest, reasonably expected to be recovered in a subsequent accounting period.

Pursuant to SSAP No. 101, gross DTAs are first reduced by a statutory valuation allowance adjustment to an amount that is more likely than not to be realized ("adjusted gross DTAs"). Adjusted gross DTAs are then admitted in an amount equal to the sum of paragraphs a. b. and c. below:

a. Federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with Internal Revenue Service ("IRS") tax loss carryback provisions.

b. The amount of adjusted gross DTAs, after the application of paragraph a. above, expected to be realized within the applicable period and that is no greater than the applicable percentage as determined using the applicable Realization Threshold Limitation Table. The applicable period refers to the number of years in which the DTA will reverse in the Company's tax return and the applicable percentage refers to the percentage of the Company's statutory capital and surplus as required to be shown on the statutory balance sheet adjusted to

exclude any net DTAs, electronic data processing equipment and operating system software and any net positive goodwill ("Stat Cap ExDTA").

The Realization Threshold Limitation Tables allow DTAs to be admitted based upon either realization within 3 years and 15% of Stat Cap ExDTA, 1 year and 10% of Stat Cap ExDTA, or no DTA admitted pursuant to this paragraph b. In general, the Realization Threshold Limitation Tables allow the Company to admit more DTAs if total DTAs as reported by the Company are a smaller percentage of statutory capital and surplus.

c. The amount of gross DTAs, after the application of paragraphs a. and b. above that can be offset against existing gross DTLs. In applying this offset, the Company considers the character (i.e. ordinary versus capital) of the DTAs and DTLs such that offsetting would be permitted in the tax return under existing enacted federal income tax laws and regulations and the reversal patterns of temporary differences.

Changes in DTAs and DTLs are recognized as a separate component of gains and losses in surplus ("Change in net deferred income tax") except to the extent allocated to changes in unrealized gains and losses. Changes in DTAs and DTLs allocated to unrealized gains and losses are netted against the related changes in unrealized gains and losses and are reported as "Change in net unrealized capital gains (losses)", also a separate component of gains and losses in surplus.

On December 22, 2017, the Tax Cuts and Jobs Act of 2017 (the "TCJA") was enacted. Among other things, the TCJA reduced the federal corporate income tax rate to 21 percent effective January 1, 2018. See Note 9 for the impact that the TCJA had on the Company.

Reinsurance

In the normal course of business, the Company seeks to reduce the loss that may arise from catastrophes or other events that cause unfavorable underwriting results and to help balance its risks and capital by reinsuring certain levels of risk with other insurance enterprises. The reinsurance coverage does not relieve the Company of its primary obligations. Reinsurance premiums and reserves related to reinsured business are accounted for on a basis consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Premiums ceded for medical losses and the related unpaid reserves have been reported as reductions of these items. The reinsurance agreements are more fully discussed in Note 10.

Reclassifications

Certain reclassifications have been made to the 2016 audited financial statements to conform with the classifications used in 2017.

Going concern

As of May 25, 2018, management evaluated whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern and management has determined that it is not probable that the Company will be unable to meet its obligations as they become due within one year after the financial statements are available to be issued. Management will continuously evaluate the Company's ability to continue as a going concern and will take appropriate action and will make appropriate disclosures if there is any change in any condition or events that would raise substantial doubt about the Company's ability to continue as a going concern.

3. Accounting changes and corrections of errors

The Company did not have any accounting changes in the years ended December 31, 2017 and 2016 or corrections of errors in the year ended December 31, 2017.

During 2016, the Company recorded a correction to its nonadmitted healthcare receivables in the amount of $2,119,801. This adjustment is further discussed in Note 16.

4. Special deposits

Special deposits, included in bonds, consist of U.S. Treasury Notes, at amortized cost, which approximates fair value of $1,000,000 at December 31, 2017 and 2016. These assets are restricted in accordance with certain state requirements relating to health maintenance organizations ("HMO").

5. Bonds and other financial instruments

The following is a summary of bonds and other financial instruments receiving bond treatment, which include special deposits, cash equivalents and short-term investments, at December 31, 2017 and 2016:

December 31, 2017

	Amortized cost	Statutory carrying value	Gross unrealized gains	Gross unrealized losses	Fair value
U.S. Government	$79,059,550	$79,059,550	$81,468	($149)	$79,140,869
U.S. states, territories and possessions (direct and guaranteed)	12,384,088	12,384,088	555,787	-	12,939,875
U.S. political subdivisions of states, territories and possessions (direct and guaranteed)	4,555,199	4,555,199	170,059	-	4,725,258
U.S. special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of governments and their political subdivisions	25,549,129	25,549,129	566,495	(13,148)	26,102,476
Industrial and miscellaneous (unaffiliated)	41,106,458	41,106,458	80,201	(168,449)	41,018,210
Total	$162,654,424	$162,654,424	$1,454,010	($181,746)	$163,926,688

December 31, 2016

	Amortized cost	Statutory carrying value	Gross unrealized gains	Gross unrealized losses	Fair value
U.S. Government	$128,840,975	$128,840,975	$375,202	-	$129,216,177
U.S. states, territories and possessions (direct and guaranteed)	8,097,059	8,097,059	44,630	($51,279)	8,090,410
U.S. political subdivisions of states, territories and possessions (direct and guaranteed)	11,757,953	11,757,953	64,383	(2,384)	11,819,952
U.S. special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of governments and their political subdivisions	8,776,736	8,776,736	144,639	-	8,921,375
Industrial and miscellaneous (unaffiliated)	1,000,000	1,000,000	-	-	1,000,000
Total	$158,472,723	$158,472,723	$628,854	($53,663)	$159,047,914

Summarized below are the Company's bonds and other financial instruments, which include special deposits, with unrealized losses at December 31, 2016, along with the related fair values, aggregated by the length of time the investments have been in an unrealized loss position:

December 31, 2017

	Less than 12 months			Greater than 12 months		
	Number of Securities	Fair Value	Unrealized Losses	Number of Securities	Fair Value	Unrealized Losses
United States Government	1	$9,088,523	($149)	-	-	-
Special Revenue and Assessment	3	8,489,590	(13,148)	-	-	-
Industrial & Miscellaneous	17	25,389,354	(168,449)	-	-	-

The Company has reviewed the investments in the table above and has concluded that these are performing assets generating investment income to support the needs of the business. In performing this review, the Company considered factors such as the quality of the investment security based on research performed by external rating agencies and internal credit analysts and the prospects of realizing the carrying value of the security based on the investment's current prospects for recovery. Furthermore, the Company has no intention to sell the investments in the table above at December 31, 2017 and 2016 before their cost can be recovered and for LB&SS the Company has the ability and intent to hold these securities for a period of time sufficient to recover the amortized cost; therefore, no OTTI was determined to have occurred on these investments during the years December 31, 2017 and 2016. In determining if the Company needs to sell before full recovery of value, the Company considers the forecasted recovery period, expected investment returns relative to other funding sources, projected cash flow and capital requirements, regulatory obligations, and other factors. Unrealized losses at December 31, 2017 and 2016 were generally caused by widening of market credit spreads for these securities relative to interest rates on U.S. Treasury securities.

The contractual or expected maturities of bonds, cash equivalents and short-term investments at December 31, 2017 were as follows:

	Carrying value	Fair value
Due one year or less	$15,837,991	$15,837,842
Due after one year through five years	94,463,986	94,417,007
Due after five years through ten years	47,970,429	48,922,494
Due after ten years	4,382,018	4,749,345
	$162,654,424	$163,926,688

The maturity for a mortgage pass-through security, included in U.S. Government and U.S. special revenue and assessment obligations and all non-guaranteed obligations of agencies and authorities of governments and their political subdivisions, is not based on stated maturity, but instead is based on prepayment assumptions. Prepayment assumptions are calculated

utilizing published repayment factors that estimate the prepayment rates on the mortgages in the Federal National Mortgage Association and Government National Mortgage Association pools.

Proceeds from the sales of bonds and other financial instruments were $37,854,595 and $11,473,125 in 2017 and 2016, respectively. Proceeds from the maturities of bonds in were $1,500,000 and $0 in 2017 and 2016, respectively. Gross realized gains on sales of bonds were $161,299 and $51,866 in 2017 and 2016, respectively. Gross realized losses on sales of bonds were $32,699 and $0 in 2017 and 2016, respectively. Included in net realized capital losses for 2017 and 2016 were $329,309 and $1,810,687, respectively, of OTTI charges on debt securities that were in an unrealized loss position. The Company conducts regular reviews of its bond investments to assess whether a decline in fair value below carrying value is an OTTI. The Company will also recognize an OTTI on debt securities when the Company intends to sell a security that is in an unrealized loss position. Declines deemed to be OTTI are recognized as realized capital losses. The Company had no individually material realized capital losses on debt or equity securities that impacted its results of operations in 2017 or 2016.

The Company's unrealized loss position on LB&SS held by the Company at December 31, 2017 is as follows:

December 31, 2017

a.	The aggregate amount of unrealized losses:			
		1.	Less than 12 months	$23,186
		2.	12 months or longer	-
b.	The aggregate related fair value of securities with unrealized losses:			
		1.	Less than 12 months	$4,976,138
		2.	12 months or longer	-

There were no securities in an unrealized loss position in 2016.

The Company has reviewed the LB&SS in accordance with SSAP No. 43R - *Loan-Backed and Structured Securities* ("SSAP No. 43R") in the table above and have concluded that these are performing assets generating investment income to support the needs of the business. Furthermore, the Company has no intention to sell the securities at December 31, 2017 before their cost can be recovered and does have the intent and ability to retain the securities for the time sufficient to recover the amortized cost basis; therefore, no OTTI write-down to fair value was determined to have occurred on these securities.

There was no investment income due and accrued excluded from surplus at December 31, 2017 and 2016.

Restricted assets (including pledged)

The Company had $1,000,000 on deposit with other regulatory bodies, which represented 0.45% and 0.47% of total admitted assets at December 31, 2017 and 2016, respectively.

The Company did not have any assets pledged as collateral not captured in other categories at December 31, 2017 and 2016.

The Company did not have any other restricted assets at December 31, 2017 and 2016.

Prepayment Penalty and Acceleration Fees

	General Account
Number of Cusips	1
Aggregate Amount of Investment Income	$15,000

6. Financial instruments

Financial instruments measured at fair value in the financial statements

Certain of the Company's financial instruments are measured at fair value in the financial statements. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by U.S. generally accepted accounting principles. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, we use these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, we determine fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

The statutory carrying values and estimated fair values of the Company's financial instruments at December 31, 2017 and 2016 were as follows:

December 31, 2017

	Aggregate fair value	Admitted assets	Level 1	Level 2	Level 3	Not practicable (carrying value)
Bonds, short-term investments and cash equivalents	$163,926,688	$162,654,424	$79,139,238	$84,787,450	-	-
Total	$163,926,688	$162,654,424	$79,139,238	$84,787,450	-	-

December 31, 2016

	Aggregate fair value	Admitted assets	Level 1	Level 2	Level 3	Not practicable (carrying value)
Bonds, short-term investments and cash equivalents	$159,047,914	$158,472,723	$129,214,752	$29,833,162	-	-
Total	$159,047,914	$158,472,723	$129,214,752	$29,833,162	-	-

The valuation methods and assumptions used by the Company in estimating the fair value of debt securities are discussed in Note 2.

There were no material realized and unrealized capital gains, purchases, sales, settlements, or transfers into or out of the Company's Level 3 financial assets during 2017 or 2016. There were no transfers between the Company's Level 1 or 2 financial assets during 2017 or 2016.

In evaluating the Company's management of interest rate and liquidity risk and currency exposures, the fair values of all assets and liabilities should be taken into consideration, not only those presented above.

7. Information concerning Parent, subsidiaries, and affiliates

As of and for the years ended December 31, 2017 and 2016, the Company had the following significant transactions with affiliates:

The Company and Aetna Medicaid Administrators, LLC ("AMA"), an indirectly wholly-owned subsidiary of Aetna, are parties to an administrative services agreement, under which AMA provides certain administrative services, including accounting and processing of premiums and claims. Under this agreement, the Company will remit a percentage of its earned premium revenue, as applicable, to AMA as a fee. For these services, the Company was charged $38,744,284 in 2017 and $31,302,565 in 2016. The agreement also provides for interest on all intercompany balances. There was no interest earned (incurred) on amounts due from (to) affiliates in 2017 or 2016.

Prior to March 1, 2016, the Company had coverage for certain litigation exposures ($10,000,000 per claim and in the aggregate including defense costs) through an affiliated captive insurance company.

As explained in Note 2, the Company participates in a tax sharing agreement with Aetna and Aetna's other subsidiaries. All federal income tax receivables/payables were due from/due to Aetna.

Amounts due to and due from affiliates shown in the accompanying Statutory Statements of Assets, Liabilities, Capital and Surplus include the Company's net receipts and disbursements processed by affiliates and transactions related to its administrative services agreement with AMA.

At December 31, 2017 and 2016, the Company had no amounts due from affiliates and the following amounts due to affiliates:

	December 31	
	2017	2016
Amounts due to affiliates:		
Aetna Medicaid Administrators LLC	$10,522,578	$3,230,743
Aetna Inc.	15,225,486	13,582,380
Others not individually listed	19	500,306
	$25,748,083	$17,313,429

The terms of settlement require that these amounts be settled within 45 days after the end of the calendar quarter.

8. Health care receivables

Pharmaceutical rebates

The Company receives pharmaceutical rebates through an arrangement with Aetna Health Management, LLC ("AHM"), indirectly a wholly-owned subsidiary of Aetna. AHM has contractual agreements with pharmaceutical companies for rebates, which cover the Company's membership as well as the membership of other Aetna affiliates. The Company receives those rebates from AHM (either directly or through intercompany arrangements with other Aetna affiliates) that relate to the Company's membership. The Company estimates pharmaceutical rebate receivables based upon the historical payment trends, actual utilization and other variables. Actual rebates collected are applied to the collection periods below, using a first in, first out methodology. The Company had admitted pharmaceutical rebate receivables of $732,169 and $453,001 at December 31, 2017 and 2016, respectively. (Refer to the Company's accounting practices related to pharmaceutical rebate receivables in Note 2).

The following table discloses the quarterly revenue and subsequent cash collections relating to the pharmaceutical rebates:

Quarter	Estimated pharmacy rebates as reported on financial statements	Pharmacy rebates as invoiced/ confirmed	Actual rebates collected within 90 days of invoicing/ confirmation	Actual rebates collected within 91 to 180 days of invoicing/ confirmation	Actual rebates collected more than 180 days after invoicing/ confirmation
12/31/2017	$732,169	-	-	-	-
9/30/2017	632,953	$732,169	-	-	-
6/30/2017	438,408	632,953	$188,967	-	-
3/31/2017	424,111	438,407	123,440	$312,237	-
12/31/2016	$453,001	$424,110	$144,710	$275,258	$394
9/30/2016	364,342	363,229	161,366	178,397	134
6/30/2016	167,062	167,028	44,026	83,680	35,745
3/31/2016	142,155	142,122	83,063	40,304	15,036
12/31/2015	$138,640	$140,137	$61,099	$49,907	$25,732
9/30/2015	126,685	122,763	36,348	68,449	13,682
6/30/2015	92,635	91,541	21,139	55,620	7,285
3/31/2015	49,466	47,311	22,742	18,368	6,196

9. Income taxes

The components of the net DTAs recognized in the Company's Statutory Statements of Assets and Liabilities, Capital and Surplus are as follows:

	December 31, 2017		
	Ordinary	Capital	Total
(a) Gross DTAs	$2,437,654	$271,210	$2,708,864
(b) Statutory valuation allowance adjustment	-	-	-
(c) Adjusted gross DTAs	2,437,654	271,210	2,708,864
(d) DTAs non-admitted	-	(43,890)	(43,890)
(e) Subtotal net admitted DTAs	2,437,654	227,320	2,664,974
(f) DTLs	-	(67,537)	(67,537)
(g) Net admitted DTAs/(DTLs)	$2,437,654	$159,783	$2,597,437

	December 31, 2016		
	Ordinary	Capital	Total
(a) Gross DTAs	$4,085,476	$720,547	$4,806,023
(b) Statutory valuation allowance adjustment	(4,085,476)	(654,122)	(4,739,598)
(c) Adjusted gross DTAs	-	66,425	66,425
(d) DTAs non-admitted	-	-	-
(e) Subtotal net admitted DTAs	-	66,425	66,425
(f) DTLs	-	(38,808)	(38,808)
(g) Net admitted DTAs/(DTLs)	-	$27,617	$27,617

	Change		
	Ordinary	Capital	Total
(a) Gross DTAs	($1,647,822)	($449,337)	($2,097,159)
(b) Statutory valuation allowance adjustment	4,085,476	654,122	4,739,598
(c) Adjusted gross DTAs	2,437,654	204,785	2,642,439
(d) DTAs non-admitted	-	(43,890)	(43,890)
(e) Subtotal net admitted DTAs	2,437,654	160,895	2,598,549
(f) DTLs	-	(28,729)	(28,729)
(g) Net admitted DTAs/(DTLs)	$2,437,654	$132,166	$2,569,820

The amount of admitted gross DTAs admitted under each component of SSAP No. 101:

	December 31, 2017		
	Ordinary	Capital	Total
(a) Federal income taxes paid in prior years recoverable through loss carrybacks	$2,421,022	$27,235	$2,448,257
(b) Adjusted gross DTAs expected to be realized (excluding the amount of DTAs) after application of the threshold limitations (the lesser of 2(b)1 and 2(b)2 below)	16,632	132,548	149,180
1. Adjusted gross DTAs expected to realized following the balance sheet date	16,632	132,548	149,180
2. Adjusted gross DTAs allowed per limitation threshold	N/A	N/A	12,802,283
(c) Adjusted gross DTAs (excluding the amount of DTAs from 2(a) and 2(b) above) offset by gross DTLs	-	67,537	67,537
(d) DTAs admitted as the result of application of SSAP No. 101	$2,437,654	$227,320	$2,664,974

	December 31, 2016		
	Ordinary	Capital	Total
(a) Federal income taxes paid in prior years recoverable through loss carrybacks	-	$27,617	$27,617
(b) Adjusted gross DTAs expected to be realized (excluding the amount of DTAs) after application of the threshold limitations (the lesser of 2(b)1 and 2(b)2 below)	-	-	-
1. Adjusted gross DTAs expected to realized following the balance sheet date	-	-	-
2. Adjusted gross DTAs allowed per limitation threshold	N/A	N/A	9,759,096
(c) Adjusted gross DTAs (excluding the amount of DTAs from 2(a) and 2(b) above) offset by gross DTLs	-	38,808	38,808
(d) DTAs admitted as the result of application of SSAP No. 101	-	$66,425	$66,425

	Change		
	Ordinary	Capital	Total
(a) Federal income taxes paid in prior years recoverable through loss carrybacks	$2,421,022	($382)	$2,420,640
(b) Adjusted gross DTAs expected to be realized (excluding the amount of DTAs) after application of the threshold limitations (the lesser of 2(b)1 and 2(b)2 below)	16,632	132,548	149,180
1. Adjusted gross DTAs expected to realized following the balance sheet date	16,632	132,548	149,180
2. Adjusted gross DTAs allowed per limitation threshold	N/A	N/A	3,043,187
(c) Adjusted gross DTAs (excluding the amount of DTAs from 2(a) and 2(b) above) offset by gross DTLs	-	28,729	28,729
(d) DTAs admitted as the result of application of SSAP No. 101	$2,437,654	$160,895	$2,598,549

	2017	2016
(a) Ratio percentage used to determine recovery period and threshold limitation amount	435%	433%
(b) Amount of adjusted capital and surplus used to determine recovery period threshold limitation in 2(b)2 above	$85,348,550	$64,894,225

The impact of tax planning strategies is as follows:

	December 31, 2017		
	Ordinary	Capital	Total
(a) Determination of adjusted gross DTAs and net admitted DTAs, by tax character as a percentage:			
1. Adjusted gross DTAs	$2,437,654	$271,210	$2,708,864
2. Percentage of adjusted DTAs by tax character attributable to the impact of tax planning strategies	0%	5%	5%
3. Net admitted adjusted gross DTAs	2,437,654	227,320	$2,664,974
4. Percentage of net admitted adjusted DTAs by tax character admitted because of the impact of tax planning strategies	0%	5%	5%

	December 31, 2016		
	Ordinary	Capital	Total
(a) Determination of adjusted gross DTAs and net admitted DTAs, by tax character as a percentage:			
1. Adjusted gross DTAs	-	$66,425	$66,425
2. Percentage of adjusted DTAs by tax character attributable to the impact of tax planning strategies	0%	0%	0%
3. Net admitted adjusted gross DTAs	-	$66,425	$66,425
4. Percentage of net admitted adjusted DTAs by tax character admitted because of the impact of tax planning strategies	0%	0%	0%

	Change		
	Ordinary	Capital	Total
(a) Determination of adjusted gross DTAs and net admitted DTAs, by tax character as a percentage:			
1. Adjusted gross DTAs	$2,437,654	$204,785	$2,642,439
2. Percentage of adjusted DTAs by tax character attributable to the impact of tax planning strategies	0%	5%	5%
3. Net admitted adjusted gross DTAs	$2,437,654	$160,895	$2,598,549
4. Percentage of net admitted adjusted DTAs by tax character admitted because of the impact of tax planning strategies	0%	5%	5%

The Company's tax-planning strategies did not include the use of reinsurance.

There are no DTLs that were not recognized at December 31, 2017 or 2016.

The (benefit) provision for income taxes for the years ended December 31, 2017 and 2016 were as follows:

	December 31		
	2017	2016	Change
Federal income tax benefit on operations	$8,160,926	($1,552,686)	$9,713,612
Federal income tax expense on net capital gains	(275,566)	16,823	(292,389)
Federal income tax benefit incurred	$7,885,360	($1,535,863)	$9.421.223

The tax effects of temporary differences that gave rise to deferred tax assets and liabilities at December 31, 2017 and 2016 were as follows:

	2017	2016	Change
DTAs:			
Ordinary			
Claims unpaid	$1,663,218	$2,916,040	($1,252,822)
Provider advances – non-admitted	774,436	1,169,436	(395,000)
Total ordinary DTAs	2,437,654	4,085,476	(1,647,822)
Statutory valuation allowance adjustment	-	(4,085,476)	4,085,476
Non-admitted ordinary DTAs	-	-	-
Admitted ordinary DTAs	2,437,654	-	2,437,654
Capital			
Investments - impairment	271,210	720,547	(449,337)
Total capital DTAs	271,210	720,547	(449,337)
Statutory valuation allowance adjustment	-	(654,122)	654,122
Non-admitted capital DTAs	(43,890)	-	(43,890)
Admitted capital DTAs	227,320	66,425	160,895
Admitted DTAs	2,664,974	66,425	2,598,549
DTLs:			
Ordinary			
Ordinary DTLs	-	-	-
Capital			
Investments	67,537	38,808	28,729
Capital DTLs	67,537	38,808	28,729
Total DTLs	67,537	38,808	28,729
Net admitted DTAs	$2,597,437	$27,617	$2,569,820

The change in net deferred income taxes is comprised of the following:

	2017	2016	Change
Total DTAs	$2,708,864	$66,425	$2,642,439
Total DTLs	(67,537)	(38,808)	(28,729)
Net DTAs/(DTLs)	2,641,327	27,617	2,613,710
Tax effect of unrealized gains (losses)			-
Change in net deferred income tax			$2,613,710

The valuation allowance adjustment to gross DTAs was $0 and $4,739,598 at December 31, 2017 and 2016, respectively

The benefit for federal income taxes is different from that which would be obtained by applying the statutory federal income tax rate to income before income taxes. The items causing this difference are as follows:

	December 31, 2017	Effective tax rate	December 31, 2016	Effective tax rate
Provision (benefit) computed at statutory rate	$10,723,866	35.0%	($3,286,344)	35.0%
Health Insurer Fee	-	-	1,130,668	(12.0)%
Transfer pricing adjustment	(2,149,445)	(7.0)%	(1,982,297)	21.1%
Tax exempt interest	(272,281)	(0.9)%	(16,407)	0.2%
Change in non-admitted assets	(121,291)	(0.4)%	(945,046)	10.1%
Prior year true-up	252,915	0.8%	(44,975)	0.5%
Change in statutory valuation allowance adjustment	(4,739,598)	(15.5)%	3,118,921	(33.2)%
Impact on deferred tax for enacted rate change	1,760,884	5.7%	-	-
Non-deductible penalties	(183,400)	(0.6)%	462,000	(5.0)%
Other	(1)	0.1%	-	-
Total	$5,271,650	17.2%	($1,563,480)	16.7%
Federal and foreign income tax (benefit) expense	$7,885,360	25.7%	($1,535,863)	16.4%
Change in net deferred income taxes	(2,613,710)	(8.5)%	(27,617)	0.3%
Total statutory income taxes	$5,271,650	17.2%	($1,563,480)	16.7%

The transfer pricing adjustment allows taxpayers to apply different methods to price current period intercompany services at arm's length prices as compared to what would be charged to an unrelated entity, which results in a permanent deduction for tax reporting purposes.

At December 31, 2017 and 2016, the Company had no net capital loss or net operating loss carryforwards for tax purposes.

The amount of federal income taxes incurred that are available for recoupment in the event of future net losses are:

Year	Ordinary	Capital	Total
2017	$7,328,125	-	$7,328,125
2016	-	18,286	18,286
2015	-	8,949	8,949
Total	$7,328,125	$27,235	$7,355,360

The Company did not report any deposits as admitted assets under Internal Revenue Code Section 6603 at December 31, 2017 and 2016.

At December 31, 2017, the Company's Federal Income Tax Return was consolidated with the following entities:

As explained in Note 2, the Company participates in a tax sharing agreement with its parent and affiliates.

The Company does not have any tax loss contingencies for which it is reasonably possible that the total liability will significantly increase within twelve months of the reporting date.

The Company is subject to Louisiana premium taxes. Premium tax expenses were recorded in general administrative expenses in the Statutory Statements of Revenue and Expenses. Premium tax expenses were $32,046,093 and $23,560,150 for the years ended December 31, 2017 and 2016, respectively. The Company had premium taxes payable of $14,681,631 and $19,234,270 at December 31, 2017 and 2016, respectively, which was recorded as general expenses due or accrued in the Statutory Statements of Liabilities.

10. Reinsurance

Effective February 1, 2017, the Company and Berkley Life and Health Insurance Company ("Berkley") entered into an excess loss reinsurance agreement. Under this agreement, Berkley is liable for 90% of covered expenses in excess of the specific deductible of $500,000 per covered member, with a maximum reimbursement of $5,000,000 per member per agreement year. The Company paid reinsurance premiums of $350,464 in 2017 and $574,667 in 2016. In 2017 and 2016, the Company realized reinsurance recoveries of $322,618 and $467,279, respectively.

11. Change in claims unpaid, unpaid claims adjustment expense, and aggregate health claim reserves

The following table shows the components of the change in claims unpaid, unpaid claims adjustment expense and aggregate health claim reserves for the years ended December 31, 2017 and 2016:

	2017	2016
Balance, January 1	$110,705,794	$46,407,227
Health care receivable	(1,001,642)	-
Balance, January 1, net of health care receivable	109,704,152	46,407,227
Incurred related to:		
Current year	540,829,707	$394,571,509
Prior years	(33,850,029)	(11,374,995)
Total incurred	506,979,678	383,196,514
Paid related to:		
Current year	456,636,325	286,666,821
Prior years	69,503,739	33,232,768
Total paid	526,140,064	319,899,589
Balance, December 31, net of health care receivable	90,543,766	109,704,152
Health care receivable	5,022,763	1,001,642
Balance, December 31	$95,566,529	$110,705,794

In 2017, reserves for incurred claims and claim adjustment expenses attributable to insured events of prior years' decreased by $33,850,029 from $110,705,794 in 2016 to $76,855,765 in 2017. In 2016, reserves for incurred claims and claim adjustment expenses attributable to insured events of prior years' decreased by $11,374,995 from $46,407,227 in 2015 to $35,032,232 in 2016. The lower than anticipated health care cost trend rates observed in 2017 and 2016 for claims incurred in 2016 and 2015 were generally due to the result of ongoing analysis of recent loss development trends. The Company considers historical trend rates together with knowledge of recent events that may impact current trends when developing estimates of current trend rates. Original estimates are increased or decreased as additional information becomes known regarding individual claims. Historical health care cost trend rates are not necessarily representative of current trends.

Net coordination of benefits is implicit in the claims incurred but not reported calculation and could not be specifically identified.

12. Capital and surplus, shareholder's dividend restrictions and quasi-reorganizations

The Company had 10,000 shares of common stock with no par value authorized, with 1,000 shares issued and outstanding at December 31, 2017 and 2016.

The Company did not have any preferred stock outstanding at December 31, 2017 and 2016.

Dividend restrictions

No domestic stock insurer shall declare and pay any dividends to its stockholders unless its capital is fully paid in cash and is unimpaired and it has a surplus beyond its capital stock and the initial minimum surplus required and all other liabilities equal to fifteen percent of its capital stock, provided that this restriction shall not apply to an insurer when its paid-in capital and surplus exceed the minimum required by the Louisiana Department Code by one hundred percent or more.

At December 31, 2017 and 2016, there was $22,677,699 and $0, respectively, of the Company's net income less realized capital gains that may be paid as ordinary dividends to stockholders.

The Company did not pay any dividends in 2017 or 2016. The Company did not receive any capital contributions in 2017. The Company received capital contributions in the amounts of $10,000,000, $20,000,000 and $20,000,000 from its parent on March 30, June 29 and September 28, 2016, respectively. The Louisiana Department approved these transactions on March 30, June 29 and September 28, 2016, respectively.

There were no restrictions placed on the Company's surplus, including for whom the surplus was being held at December 31, 2017 or 2016, except as noted in Note 14.

The Company did not hold any stock for any special purposes at December 31, 2017 or 2016.

Changes in the balances of special surplus funds from the prior year are due to the accrual of estimated ACA health insurer fees reclassified from unassigned funds or surplus to aggregate write-ins for special surplus funds as discussed more fully in Notes 2 and 17.

At December 31, 2017 and 2016, there was no portion of unassigned funds or surplus that was represented or reduced by unrealized gains and losses.

13. Contingencies

Litigation and Regulatory Proceedings

The following description of litigation and regulatory proceedings covers Aetna Inc. and certain of its subsidiaries, including the Company (collectively, "we", "our" or "us"). Certain of the proceedings described below may not impact the Company directly but may have an indirect impact on the Company as the Company is a member of the Aetna holding company group.

Other Litigation and Regulatory Proceedings

We are involved in numerous other lawsuits arising, for the most part, in the ordinary course of our business operations, including claims of or relating to bad faith, medical malpractice, non-compliance with state and federal regulatory regimes, marketing misconduct, failure to timely or appropriately pay or administer claims and benefits in our Health Care and Group Insurance businesses (including our post-payment audit and collection practices and reductions in payments to providers due to sequestration), provider network structure (including the use of performance-based networks and termination of provider contracts), provider directory accuracy, rescission of insurance coverage, improper disclosure of personal information, anticompetitive practices, intellectual property litigation, other legal proceedings in our Health Care and Group Insurance businesses and employment litigation. Some of these other lawsuits are or are purported to be class actions. We intend to defend ourselves vigorously against the claims brought in these matters.

Awards to us and others of certain government contracts, particularly Medicaid contracts and contracts with government customers in our Commercial business are subject to increasingly frequent protests by unsuccessful bidders. These protests may result in awards to us being reversed, delayed or modified. The loss or delay in implementation of any government contract could adversely affect our operating results. We will continue to defend vigorously contract awards we receive.

In addition, our operations, current and past business practices, current and past contracts, and accounts and other books and records are subject to routine, regular and special investigations, audits, examinations and reviews by, and from time to time we receive subpoenas and other requests for information from, the Centers for Medicare and Medicaid Services ("CMS"), the U.S. Department of Health and Human Services, various state insurance and health care regulatory authorities, state attorneys general, treasurers and offices of inspector general, the Center for Consumer Information and Insurance Oversight, OIG, the Office of Personnel Management, the U.S. Department of Labor, the U.S. Department of the Treasury, the U.S. Food and Drug Administration, committees, subcommittees and members of the U.S. Congress, the U.S. Department of Justice, the

Federal Trade Commission, U.S. attorneys and other state, federal and international governmental authorities. These government actions include inquiries by, and testimony before, certain members, committees and subcommittees of the U.S. Congress regarding our withdrawal from certain states' health insurance exchanges ("Public Exchanges") for 2017, certain of our current and past business practices, including our overall claims processing and payment practices, our business practices with respect to our small group products, student health products or individual customers (such as market withdrawals, rating information, premium increases and medical benefit ratios), executive compensation matters and travel and entertainment expenses, as well as the investigations by, and subpoenas and requests from attorneys general. We also have produced documents and information to the Civil Division of the Department of Justice in cooperation with a current investigation of our patient chart review processes in connection with risk adjustment data submissions under Parts C and D of the Medicare program.

There also continues to be a heightened level of review and/or audit by regulatory authorities of, and increased litigation regarding, our and the rest of the health care and related benefits industry's business and reporting practices, including premium rate increases, utilization management, development and application of medical policies, complaint, grievance and appeal processing, information privacy, provider network structure (including provider network adequacy, the use of performance-based networks and termination of provider contracts), provider directory accuracy, calculation of minimum medical loss ratios and/or payment of related rebates, delegated arrangements, rescission of insurance coverage, limited benefit health products, student health products, pharmacy benefit management practices (including the use of narrow networks and the placement of drugs in formulary tiers), sales practices, customer service practices, vendor oversight and claim payment practices (including payments to out-of-network providers and payments on life insurance policies).

As a leading national health and related benefits company, we regularly are the subject of government actions of the types described above. These government actions may prevent or delay us from implementing planned premium rate increases and may result, and have resulted, in restrictions on our business, changes to or clarifications of our business practices, retroactive adjustments to premiums, refunds or other payments to members, beneficiaries, states or the federal government, withholding of premium payments to us by government agencies, assessments of damages, civil or criminal fines or penalties, or other sanctions, including the possible suspension or loss of licensure and/or suspension or exclusion from participation in government programs.

Estimating the probable losses or a range of probable losses resulting from litigation, government actions and other legal proceedings is inherently difficult and requires an extensive degree of judgment, particularly where the matters involve indeterminate claims for monetary damages, involve claims for injunctive relief, may involve fines, penalties or punitive damages that are discretionary in amount, involve a large number of claimants or regulatory authorities, represent a change in regulatory policy, present novel legal theories, are in the early stages of the proceedings, are subject to appeal or could result in changes in business practices. In addition, because most legal proceedings are resolved over long periods of time, potential losses are subject to change due to, among other things, new developments, changes in litigation strategy, the outcome of intermediate procedural and substantive rulings and other parties' settlement posture and their evaluation of the strength or weakness of their case against us. Except as specifically noted above under "*Other Litigation and Regulatory Proceedings*," we are currently unable to predict the ultimate outcome of, or reasonably estimate the losses or a range of losses resulting from, the matters described above, and it is reasonably possible that their outcome could be material to us.

Litigation exposure coverage

The Company has coverage for certain litigation exposures ($10,000,000 per claim and in the aggregate including defense costs) through an unaffiliated insurance company.

14. Minimum capital and surplus

Pursuant to the laws of Louisiana, each health maintenance organization shall establish prior to the issuance of any certificate of authority, and shall maintain as long as it does business in Louisiana as a health maintenance organization, capital and surplus in the amount of three million dollars. At December 31, 2017 and 2016, the Company's capital and surplus exceeded all such requirements.

The NAIC and the State of Louisiana adopted risk-based capital ("RBC") standards for health organizations, including HMOs, that are designed to identify weakly capitalized companies by comparing each company's adjusted capital and surplus to its required capital and surplus (the "RBC Ratio"). The RBC Ratio is designed to reflect the risk profile of the company. Within certain ratio ranges, regulators have increasing authority to take action as the RBC Ratio decreases. There are four levels of regulatory action, ranging from requiring insurers to submit a comprehensive plan to the state insurance commissioner to requiring the state insurance commissioner to place the insurer under regulatory control. At December 31, 2017 and 2016, the Company had capital and surplus that exceeded the highest threshold specified by the RBC rules.

15. Medicaid

The Company's Medicaid products also are heavily regulated by state Medicaid agencies, which have the right to audit the Company's performance to determine compliance with contracts and regulations. The Company's Medicaid products and Children's Health Insurance Program ("CHIP") contracts also are subject to complex federal and state regulations and oversight by state Medicaid agencies regarding the services the Company provides to Medicaid enrollees, payment for those services, network requirements (including mandatory inclusion of specified high-cost providers), and other aspects of these programs, and by external review organizations which audit Medicaid plans on behalf of the state Medicaid agencies. The laws, regulations and contractual requirements applicable to the Company and other participants in Medicaid programs, including requirements that the Company submit encounter data to the applicable state agency, are extensive, complex and subject to change. The Company has invested significant resources to comply with these standards, and the Company's Medicaid program compliance efforts will continue to require significant resources. State Medicaid agencies may fine the Company, withhold payments to the Company, seek premium and other refunds, terminate the Company's existing contracts, elect not to award the Company new contracts or not to renew the Company's existing contracts, prohibit the Company from continuing to market and/or enroll members in or refuse to automatically assign members to one or more of the Company's Medicaid products, exclude the Company from participating in one or more Medicaid program and/or institute other sanctions and/or civil monetary penalties against the Company if it fails to comply with state regulations or the Company's contractual requirements. The Company cannot predict whether pending or future federal or state legislation or court proceedings will change various aspects of the Medicaid program, nor can it predict the impact those changes will have on its business operations or financial results, but the effects could be materially adverse.

16. Reconciliation to statutory financial statements as filed with the Louisiana Department

There were no reconciling differences between the amounts previously reported to state regulatory authorities in the 2017 Annual Statement and those reported in the accompanying statutory financial statements.

The Company's non-admitted health care receivables were understated on the statutory financial statements for December 31, 2016.

The following is a reconciliation of December 31, 2016 total assets as reflected in the accompanying Statutory Statements of Assets to amounts reported to the Louisiana Department (statutory reports) in the Company's 2016 annual statement:

Total assets as reflected in the accompanying Statutory Statements of Assets	$211,776,587
Decrease in health care receivables	2,119,801
Total assets as reported in the annual statement	$213,896,388

The following is a reconciliation of December 31, 2016 capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus to amounts reported to the Louisiana Department (statutory reports) in the Company's 2016 annual statement:

Capital and surplus as reflected in the accompanying Statutory Statements of Liabilities, Capital and Surplus	$62,968,453
Increase in current federal and foreign tax recoverable and interest thereon	2,119,801
Statutory capital and surplus as reported in the annual statement	$65,088,254

17. Subsequent events

Type I - Recognized subsequent events

Subsequent events have been considered through May 25, 2018.

The Company had no known reportable recognized subsequent events.

Type II – Non-recognized subsequent events

Subsequent events have been considered through May 25, 2018.

On January 1, 2018, the Company will be subject to an annual fee under the Section 9010 of the Federal Affordable Care Act ("ACA"). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2017, the Company has written health insurance subject to the ACA assessment, expects to conduct health insurance business in 2018, and estimates its portion of the annual health insurance industry fee to be payable on September 30, 2018 to be $11,880,000. This amount is reflected in aggregate write-ins for special surplus funds and was estimated based on premiums written subject to the ACA assessment of $592,308,464. The Company's total adjusted capital before and after the special surplus adjustment was $87,945,987 and $76,065,987, respectively. The Company's total authorized control level both before and after the special surplus adjustment was estimated to be $19,641,636. As a result, this assessment is expected to impact RBC by 14%. Reporting the ACA assessment as of December 31, 2017 would not have triggered an RBC action level.

As discussed in Note 2, in December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the health insurer fee. As a result, there was no annual health insurance industry fee payable on September 30, 2017 and there were no amounts reflected in the Company's aggregate write-ins for special surplus funds related to this payable at December 31, 2016 as a result. There was also no resulting impact to the Company's RBC to assess as of December 31, 2016 as a result of this suspension.

In January 2018, the annual fee was suspended for 2019.

For the Year Ended December 31, 2016

Table of Contents **Page**

FORWARD-LOOKING INFORMATION

The Private Securities Litigation Reform Act of 1995 (the "1995 Act") provides a "safe harbor" for forward-looking statements, so long as (1) those statements are identified as forward-looking, and (2) the statements are accompanied by meaningful cautionary statements that identify important factors that could cause actual results to differ materially from those discussed in the statement. We want to take advantage of these safe harbor provisions.

Certain information contained in this Annual Report on Form 10-K is forward-looking within the meaning of the 1995 Act or SEC rules. This information includes, but is not limited to: "Outlook for 2017" and "Regulatory Environment" of Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") included in Part II, Item 7, "Quantitative and Qualitative Disclosures About Market Risk" included in Part II, Item 7A, and "Risk Factors" included in Part I, Item 1A. In addition, throughout this Annual Report on Form 10-K and our other reports and communications, we use the following words or variations or negatives of these words and similar expressions, when we intend to identify forward-looking statements:

· *Expects*	· *Intends*	· *Seeks*	· *Will*	· *Potential*
· *Projects*	· *Plans*	· *Estimates*	· *Should*	· *Continue*
· *Anticipates*	· *Believes*	· *May*	· *Could*	· *View*
· *Outlook*	· *Guidance*	· *Predict*	· *Likely*	· *Probable*
· *Forecast*	· *Can*	· *Explore*	· *Evaluate*	· *Might*

Forward-looking statements rely on a number of estimates, assumptions and projections concerning future events, and are subject to a number of significant uncertainties and other factors that could cause actual results to differ materially from those statements. Many of these uncertainties and other factors are outside our control. Certain of these uncertainties and other factors are described under "Risk Factors" included in Part I, Item 1A of this Annual Report on Form 10-K. You should not put undue reliance on forward-looking statements. Any forward-looking statement speaks only as of the date of this report, and we disclaim any intention or obligation to update or revise forward-looking statements, whether as a result of new information, future events, uncertainties or otherwise.

Unless the context otherwise requires, references to the terms "we", "our" or "us" used throughout this Annual Report on Form 10-K refer to Aetna Inc. (a Pennsylvania corporation) ("Aetna") and its subsidiaries (collectively, the "Company").

Part I

Item 1. Business

General

We are one of the nation's leading diversified health care benefits companies, serving an estimated 46.7 million people. We have the information and resources to help our members, in consultation with their health care professionals, make better informed decisions about their health care. We offer a broad range of traditional, voluntary and consumer-directed health insurance products and related services, including medical, pharmacy, dental, behavioral health, group life and disability plans, medical management capabilities, Medicaid health care management services, Medicare Advantage and Medicare Supplement plans, workers' compensation administrative services and health information technology ("HIT") products and services. Our customers include employer groups, individuals, college students, part-time and hourly workers, health plans, health care providers ("providers"), governmental units, government-sponsored plans, labor groups and expatriates.

2016 Accomplishments

We are working to build healthier communities, a healthier nation and a healthier world. Our operational, financial and strategically important accomplishments during 2016 included:

- Continued strong performance in our Government businesses including;
    - Expanding our presence in Government programs through membership growth in Medicare Advantage, Medicare Supplement and Medicaid as well as through programs for members who are dually eligible for both Medicare and Medicaid ("Duals").
    - Increasing our percentage of Medicare Advantage members in plans with 2017 star ratings of at least 4.0 stars for the third consecutive year to 92 percent, based on our membership as of December 31, 2016, the highest percentage among our publicly traded peers.
- Delivering solid results in our Commercial ASC and fee-based businesses driven by positive fee yields and a focus on cost control.
- Successfully advancing our strategy to help transform the healthcare system from volume-based payment models to ones that reward the quality and value provided. We formed multiple collaborations with healthcare providers that span a wide spectrum of value-based care models, including two new joint venture relationships. We carried that momentum into 2017 with the announced signing of a new joint venture with Allina Health in Minneapolis. We made solid progress in 2016, with over 45 percent of Aetna's medical spend currently flowing through some form of value-based care model, positioning us to achieve our 2020 goal of 75 percent.
- Participating in a number of private health insurance exchanges ("Private Exchanges") in 2016. We continue to believe that Private Exchanges are an efficient way for plan sponsors to shift towards a defined contribution model for employee health benefits, and we expect to continue our participation in 2017.
- Making progress in developing a portfolio of products and tools that will help to transform the health benefits industry to a retail model that is consumer-centric, affordable and convenient. In 2016, we signed an agreement with Apple that we believe will improve our members' health experience by combining the power of iOS apps and the renowned user experience of Apple products, including Apple Watch, iPhone and iPad, with Aetna's analytics-based wellness and care management programs.

Terminated Acquisition of Humana Inc. ("Humana") and Terminated Divestiture to Molina

On July 2, 2015, we entered into a definitive agreement (the "Merger Agreement") to acquire Humana (the "Humana Acquisition") in a transaction valued at approximately $37 billion, based on the closing price of Aetna common shares on July 2, 2015, including the assumption of Humana debt and Humana cash and cash equivalents.

On July 21, 2016, the U.S. Department of Justice (the "DOJ") and certain state attorneys general filed a civil complaint in the U.S. District Court for the District of Columbia (the "District Court") against us and Humana charging that the Humana Acquisition would violate Section 7 of the Clayton Antitrust Act, and seeking a permanent injunction to prevent Aetna from acquiring Humana. On January 23, 2017, the District Court granted the DOJ's request to enjoin the Humana Acquisition. On February 14, 2017, Aetna and Humana entered into a mutual termination agreement (the "Termination Agreement") pursuant to which the parties thereto (collectively the "Parties") agreed to terminate the Merger Agreement, including all schedules and exhibits thereto, and all ancillary agreements contemplated thereby, entered pursuant thereto or entered in connection therewith (other than certain confidentiality agreements) (collectively with the Merger Agreement, the "Transaction Documents"), effective immediately as of February 14, 2017 (the "Termination Date"). Under the Termination Agreement, Aetna agreed to

pay Humana the Regulatory Termination Fee (as defined in the Merger Agreement) of $1.0 billion in cash in full satisfaction of any amounts required to be paid by Aetna under the Merger Agreement. The Parties also agreed to release each other from any and all liability, claims, rights, actions, causes of action, suits, liens, obligations, accounts, debts, demands, agreements, promises, liabilities, controversies, costs, charges, damages, expenses and fees, however arising, in connection with, arising out of or related to the Transaction Documents, the transactions contemplated therein or thereby or certain related matters. We paid Humana the Regulatory Termination Fee on February 16, 2017 and funded that payment with the proceeds of the 2016 senior notes (as defined below).

In June 2016, we issued $13.0 billion of senior notes to partially fund the Humana Acquisition (collectively, the "2016 senior notes"). In accordance with the terms of the 2016 senior notes, on February 14, 2017, we issued a notice of redemption for $10.2 billion aggregate principal amount of certain of the 2016 senior notes (collectively, the "Special Mandatory Redemption Notes") at a redemption price equal to 101% of the aggregate principal amount of those notes plus accrued and unpaid interest. We will redeem the Special Mandatory Redemption Notes on or about March 16, 2017, and we expect to fund the redemption with the proceeds of the 2016 senior notes. As a result of the redemption of the Special Mandatory Redemption Notes, in the first quarter of 2017, we will recognize on a pretax basis in our net income the entire approximately $420 million unamortized portion of the related cash flow hedge losses, debt issuance costs and debt issuance discounts and the entire approximately $100 million redemption premium paid on the Special Mandatory Redemption Notes upon such redemption.

In order to address the DOJ's perceived competitive concerns regarding Medicare Advantage relating to the Humana Acquisition, on August 2, 2016, we entered into a definitive agreement (the "Aetna APA") to sell for cash to Molina Healthcare, Inc. ("Molina") certain of our Medicare Advantage assets. On February 14, 2017, Aetna and Molina entered into a Termination Agreement (the "APA Termination Agreement") pursuant to which Aetna terminated the Molina APA, including all schedules and exhibits thereto, and all ancillary agreements contemplated thereby or entered pursuant thereto. Under the APA Termination Agreement, Aetna agreed to pay Molina in cash (a) a termination fee of $53 million and (b) approximately 70% of Molina's transaction costs. We paid Molina the termination fee on February 16, 2017 and funded that payment with the proceeds of the 2016 senior notes. We expect to pay Molina the applicable transaction costs during the first quarter of 2017.

Heath Care Reform

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (as amended, collectively, the "ACA") made broad-based changes to the U.S. health care system. On January 20, 2017, the President signed an executive order that gives the regulatory agencies that enforce the ACA the authority to interpret regulations issued under the ACA in a way that limits fiscal burdens on states and financial or regulatory burdens on individuals, providers, health insurers and others. The practical implications of that order are unclear, and the future of the ACA is uncertain. While we anticipate efforts in 2017 and beyond to substantially modify, repeal or replace the ACA, we expect aspects of the ACA to continue to significantly impact our business operations and operating results, including our pricing, our medical benefit ratios ("MBRs") and the geographies in which our products are available. The ACA has presented us with business opportunities, but also with financial and regulatory challenges. Most of the ACA's key components were phased in during or prior to 2014, including public health insurance exchanges ("Public Exchanges" and together with Private Exchanges, "Insurance Exchanges"), required minimum Medical Loss Ratios ("MLRs") in Commercial and Medicare products, the individual coverage mandate, guaranteed issue, rating limits in individual and small group products, significant new industry-wide fees, assessments and taxes, enhanced premium rate review and disclosure processes, reduced Medicare Advantage payment rates to insurers, and linking Medicare Advantage payments to a plan's Centers for Medicare & Medicaid Services ("CMS") quality performance ratings or "star ratings." The effects of these changes are reflected in our operating results. If the ACA is not amended, repealed or replaced certain of its components will continue to be phased in until 2020. For additional information on federal and state health care reform, refer to "Regulatory Environment" of MD&A included in Part II, Item 7 of this Annual Report on Form 10-K and for a discussion of certain factors that may cause our actual results to differ from currently anticipated results in connection with health care reform, see "Risk Factors" included in Part I, Item 1A of this Annual Report on Form 10-K.

Reportable Segments

Our operations are conducted in three business segments: Health Care, Group Insurance and Large Case Pensions. We derive our revenues primarily from insurance premiums, administrative service fees, net investment income and other revenue. Refer to MD&A included in Part II, Item 7 and Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K regarding revenue and profit information for each of our business segments and revenue and asset information about geographic areas. The following is a description of each of our business segments.

Health Care Segment

Products and Services

We refer to insurance products (where we assume all or a majority of the risk for medical and dental care costs) as "Insured" and administrative services contract products (where the plan sponsor assumes all or a majority of the risk of medical and dental care costs) as "ASC." Health Care products and services consist of the following:

- ***Commercial Medical:*** We offer point-of-service ("POS"), preferred provider organization ("PPO"), health maintenance organization ("HMO") and indemnity benefit ("Indemnity") plans. Our Commercial medical products also include health savings accounts ("HSAs") and Aetna HealthFund®, consumer-directed health plans that combine traditional POS or PPO and/or dental coverage, subject to a deductible, with an accumulating benefit account (which may be funded by the plan sponsor and/or the member in the case of HSAs). Our principal products and services are targeted specifically to large multi-site national, mid-sized and small employers, individual insureds and expatriates.
- ***Government Medical:*** In select geographies, we offer Medicare Advantage plans, Medicare Supplement plans and prescription drug coverage for Medicare beneficiaries; participate in Medicaid and subsidized Children's Health Insurance Programs ("CHIP"); and participate in Duals demonstration projects. These Government products are further described below:
    - *Medicare:* Through annual contracts with CMS, we offer HMO and PPO products for eligible individuals in certain geographic areas through the Medicare Advantage program. Members typically receive enhanced benefits over Original Medicare fee-for-service coverage, including reduced cost-sharing for preventive care, vision and other services. We offered network-based HMO and/or PPO plans in 1,093 counties in 39 states and Washington, D.C. in 2016. We are expanding to 1,213 counties in 40 states and Washington, D.C. in 2017. We are a national provider of the Medicare Part D Prescription Drug Program ("PDP") in all 50 states and Washington, D.C. to both individuals and employer groups. All Medicare eligible individuals are eligible to participate in this voluntary prescription drug plan. Members typically receive coverage for certain prescription drugs, usually subject to a deductible, co-insurance and/or co-payment. For certain qualifying employer groups, we offer our Medicare PPO products nationally. When combined with our PDP product, these national PPO plans form an integrated national fully-insured Medicare product for employers that provides medical and pharmacy benefits.
    - *Medicare Supplement:* For certain Medicare eligible members, we offer supplemental coverage for certain health care costs not covered by Original Medicare. The products included in our Medicare Supplement portfolio help to cover some of the gaps in Original Medicare, and include coverage for Medicare deductibles and coinsurance amounts. We offered a wide selection of Medicare Supplement products in 49 states and Washington, D.C. in 2016.
    - *Medicaid and CHIP*: We offer health care management services to individuals eligible for Medicaid and CHIP under multi-year contracts with government agencies in various states that are subject to annual appropriations. CHIP are state-subsidized insurance programs that provide benefits for families with uninsured children. We offered these services on an Insured or ASC basis in 16 states in 2016.
    - *Duals:* We provide health coverage to beneficiaries who are dually eligible for both Medicare and Medicaid coverage. These members must meet certain income and resource requirements in order to qualify for this coverage. We coordinate 100% of the care for these members and may provide them with additional services in order to manage their health care costs. During 2016, we offered services on an Insured basis to members who were dually eligible in four states under demonstration projects.
- ***Dental:*** We offer managed dental plans on an Insured and ASC basis. We are one of the nation's largest providers of dental coverage, based on membership at December 31, 2016.
- ***Behavioral Health:*** Our behavioral health and employee assistance products provide members who experience stress, depression and other types of mental health related illness with integrated behavioral health benefit administration, access to a network of providers and innovative wellness programs. We provide customized behavioral health solutions to members in all 50 states.
- ***Provider Network Access ("First Health" and "Cofinity"):*** Through our First Health and Cofinity products, we provide access to health care provider networks to other insurance companies, third-party administrators, health plans and employers. First Health products are marketed nationally, while Cofinity products are marketed in certain states.
- ***Stop Loss:*** We offer medical stop loss insurance coverage for certain employers who elect to self insure their health benefits. Under this product, we assume risk for costs associated with large individual claims and/or aggregate loss experience within an employer's plan above a pre-set annual threshold.

- ***Aetna Vision℠ Preferred:*** We offer vision benefits that provide members with access to one of the largest vision networks in the U.S. The Aetna Vision Preferred program can be customized with a wide range of benefit levels and co-payments.
- ***Workers' Compensation Administrative Services:*** Our workers' compensation administrative services products and services consist of fee-based, managed care services, such as provider network access, cost containment services, pharmacy benefit management, durable medical equipment and ancillary services, and care management services to underwriters and administrators of workers' compensation insurance.
- ***Consumer Health and Services:*** We have a portfolio of products aimed at creating an holistic and integrated approach to individual health and wellness, including products previously marketed under the Healthagen® brand. These products and services complement our Commercial, Medicare and Medicaid products.
    - *Pharmacy:* We offer pharmacy benefit management services and specialty and mail order pharmacy services to our members. Our pharmacy fulfillment services are delivered by Aetna Specialty Pharmacy ("ASP") and Aetna Rx Home Delivery®. ASP dispenses specialty medications and offers certain support services associated with specialty medications. Specialty medications include injectable or infused medications that may not be readily available at local pharmacies. Aetna Rx Home Delivery® provides mail order prescription drug services. CaremarkPCS Health, L.L.C. performs the administration of selected functions for our retail pharmacy network contracting and claims administration; mail order and specialty pharmacy order fulfillment and inventory purchasing and management; and certain administrative services for us. Another supplier also provides certain pharmacy benefit management services to us and our customers.
    - *Advanced Provider Models ("APM"):* We are focused on growing membership in our medical products through provider collaborations that are designed to lower medical costs for us and our customers and make our products more affordable. These collaboration models include joint ventures and accountable care organizations ("ACOs"). We offer a suite of solutions designed to facilitate delivery system reform and help reduce the cost of care by enabling population health management for providers. Our APM products facilitate providers changing their business model from episodic acute care to patient population management which allows them to convert from volume-based reimbursement to value-based reimbursement. Our APM products deploy Aetna's population health management assets to collaborate with providers in new ways to improve the quality and efficiency of care for all patients, whether they are Aetna members or members of other payors. In 2016, we continued expanding our offering of APM products and services to employers and individuals in more geographic areas to create mutually beneficial relationships with providers through a variety of methods, including alignment of financial incentives based on cost and quality, implementation of innovative HIT and deploying leading care management programs. Our APM relationships include joint ventures with Allina Health, Banner Health Network, Inova Health System and Texas Health Resources.
    - *ActiveHealth Management:* Through the use of our patented CareEngine® system, our ActiveHealth Management products provide evidence-based medical management and data analytics products and services to a broad range of customers, including health plans, employers and others. ActiveHealth Management also is a key component of our APM solutions.
    - *Medicity:* Medicity is a health information exchange company and a key component of our APM and provider enablement solutions. Medicity offers a set of convenient, easy-to-access technology solutions for physicians, hospitals and other health care providers. These capabilities allow us to further the adoption of electronic health records and contribute to initiatives that foster administrative simplicity in health care, a key issue for consumers, patients and providers. Medicity provides customers clinical data integration and secure data exchange capabilities.
    - *Consumer:* We believe the role of the consumer in health care is changing and that consumers will become the primary decision makers when it comes to choosing their health-related benefits. As a result, we are developing a portfolio of products and tools, including bswift and iTriage, that are designed for a retail model in the health benefits industry that is consumer-centric, affordable and convenient. Our Consumer business is focusing on developing a simplified, integrated offering to help consumers navigate the health care system and manage their health care costs.
        - *bswift:* bswift provides benefit administration technology and services to employers nationwide, streamlining the benefits process. bswift's technology also provides the shopping, buying and enrolling experience for Public Exchanges, Private Exchanges and individuals.

- *iTriage:* The iTriage application gives smart phone and computer users access to a symptom navigator which assists users in finding nearby health facilities or physicians that could help with their specific health issue. iTriage assists users in finding health care that is right for them.

Provider Networks

We contract with physicians, hospitals and other health care providers for services they provide to our members. The health care providers who participate in our networks are independent contractors and are neither our employees nor our agents, except for providers who work in our mail-order and specialty pharmacy facilities.

We use a variety of techniques designed to help encourage appropriate utilization of medical services ("utilization") and maintain affordability of quality coverage. In addition to contracts with health care providers for negotiated rates of reimbursement, these techniques include creating risk sharing arrangements that align economic incentives with our providers, the development and implementation of guidelines for the appropriate utilization of medical services and the provision of data to providers to enable them to improve health care quality.

At December 31, 2016, Aetna's underlying nationwide provider network had approximately 1.3 million participating health care providers, including over 702,000 primary care and specialist physicians and approximately 5,700 hospitals.

- ***Advanced Provider Models:*** We collaborate with hospitals and other providers through our APM products. Our arrangements focus on high value narrow network solutions to provide high-quality, low-cost options in local geographies. We are able to help enhance our relationships with hospitals and other providers through a variety of methods, including a re-alignment of financial incentives for providing high quality care, total cost management initiatives and risk sharing arrangements.
- ***Primary Care Physicians:*** We compensate primary care physicians ("PCPs") participating in our networks on both a fee-for-service and capitated basis, with capitation generally limited to HMO products in certain geographic areas and representing approximately 4 percent of health care costs in both 2016 and 2015 and 5 percent of health care costs in 2014. In a fee-for-service arrangement, physicians are paid for health care services provided to the member based upon a set fee for the services provided. Under a capitation arrangement, physicians receive a monthly fixed fee for each member, regardless of the volume of health care services provided to the member. In some cases, PCPs who are paid on a fee-for-service or capitated basis also receive additional incentive fees if certain performance metrics are attained.
- ***Specialist Physicians:*** Specialist physicians participating in our networks are generally reimbursed at contracted rates per visit or per procedure.
- ***Hospitals:*** We typically enter into contracts with hospitals that provide for per-day and/or per-case rates, often with fixed rates for ambulatory, surgery and emergency room services. We also have hospital contracts that provide for reimbursement based on a percentage of the charges billed by the hospital. Our medical plans generally require notification of elective hospital admissions, and we monitor the length of hospital stays. Physicians who participate in our networks generally admit their patients in network-based products to participating hospitals using referral procedures that direct the hospital to contact our patient management unit in order to confirm the patient's membership status and facilitate the patient management process. This unit also assists members and providers with related activities, including, if necessary, the subsequent transition to the home environment and home care. Case management assistance for complex cases is provided by a special unit.
- ***Other Providers:*** Laboratory, imaging, urgent care and other freestanding health facility providers are generally paid under fee-for-service arrangements, except for certain laboratory services.

Quality Assessment

CMS uses a 5-star rating system to monitor plans and ensure that they meet CMS's quality standards. CMS uses this rating system to provide Medicare beneficiaries with a tool that they can use to compare the overall quality of care and level of customer service of companies that provide Medicare health care and drug plans. The rating system considers a variety of measures adopted by CMS, including quality of preventative services, chronic illness management and overall customer satisfaction. Refer to "Pricing" below in this Item 1 for further discussion of our star ratings.

We seek Health Plan accreditation for our Aetna HMO plans from the National Committee for Quality Assurance (the "NCQA"), a national organization established to review the quality and medical management systems of health care plans. Health care plans seeking accreditation must pass a rigorous, comprehensive review and must annually report on their performance.

Aetna Life Insurance Company ("ALIC"), a wholly-owned subsidiary of Aetna, has received nationwide NCQA PPO Health Plan accreditation, through December 13, 2019. As of December 31, 2016, all of our Aetna Health Inc. Commercial HMO and ALIC PPO members who were eligible, participated in HMOs or PPOs that are accredited by the NCQA.

NCQA and URAC (formally known as American Accreditation HealthCare Commission, Inc.), are national organizations founded to establish standards for the health care industry. Purchasers and consumers look to URAC's and NCQA's accreditation and certification as an indication that a health care organization has the necessary structures and processes to promote high-quality care and preserve patient rights. In addition, regulators in over 80% of the states recognize NCQA's accreditation and certification standards.

Our provider selection and credentialing/re-credentialing policies and procedures are consistent with NCQA and URAC, as well as state and federal, requirements. In addition, we are certified under the NCQA Credentials Verification Organization ("CVO") certification program for all certification options through January 5, 2019. Our URAC CVO accreditation is valid through October 1, 2018.

Our quality assessment programs for contracted providers who participate in our networks begin with the initial review of health care practitioners. Practitioners' licenses and education are verified, and their work history is collected by us or in some cases by the practitioner's affiliated group or organization. We generally require participating hospitals to be certified by CMS or accredited by the Joint Commission, the American Osteopathic Association, or Det Norske Veritas Healthcare.

We also offer quality and outcome measurement programs, quality improvement programs, and health care data analysis systems to providers and purchasers of health care services.

Principal Markets and Sales

Our medical membership is dispersed throughout the U.S., and we serve a limited number of members in certain countries outside the U.S. Refer to Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on our foreign customers. We offer a broad range of traditional, voluntary and consumer-directed health insurance products and related services, many of which are available nationwide. Depending on the product, we market to a range of customers including employer groups, individuals, college students, part-time and hourly workers, health plans, providers, governmental units, government-sponsored plans, labor groups and expatriates.

The following table presents total medical membership by U.S. and other geographic region and funding arrangement at December 31, 2016, 2015 and 2014:

	2016			2015			2014		
(Thousands)	**Insured**	**ASC**	**Total**	**Insured**	**ASC**	**Total**	**Insured**	**ASC**	**Total**
Northeast	**2,121**	**2,966**	**5,087**	2,166	2,952	5,118	2,314	2,905	5,219
Southeast	**2,260**	**3,076**	**5,336**	2,173	3,183	5,356	2,149	3,167	5,316
Mid-America	**2,506**	**2,673**	**5,179**	2,507	2,913	5,420	2,372	2,980	5,352
West	**1,954**	**4,848**	**6,802**	1,837	5,008	6,845	1,999	4,950	6,949
Other	**331**	**375**	**706**	440	308	748	452	260	712
Total medical membership	**9,172**	**13,938**	**23,110**	9,123	14,364	23,487	9,286	14,262	23,548

Additional information on Health Care's membership is included in the "Healthcare - Membership" section of the MD&A included in Part II, Item 7 of this Annual Report on Form 10-K.

We market both Commercial Insured and ASC products and services primarily to employers that sponsor our products (also called "plan sponsors") for the benefit of their employees and their employees' dependents. Frequently, larger employers offer employees a choice among coverage options, from which the employee makes his or her selection during a designated annual open enrollment period. Typically, employers pay all of the monthly premiums to us and, through payroll deductions, obtain reimbursement from employees for a percentage of the premiums that is determined by each employer. We also sell Insured plans directly to individual consumers in a number of states, including through Public Exchanges. Some Health Care products are sold directly to employees of employer groups on a fully employee-funded basis. In some cases, we bill the covered individual directly.

We offer Insured Medicare coverage on an individual basis as well as through employer groups to their retirees. Medicaid and CHIP members are enrolled on an individual basis. We also offer Insured health care coverage to members who are dually-eligible for both Medicare and Medicaid.

Health Care products are sold through our sales personnel; through independent brokers, agents and consultants who assist in the production and servicing of business; and Insurance Exchanges. For large plan sponsors, independent consultants and brokers are frequently involved in employer health plan selection decisions and sales. In some instances, we may pay commissions, fees and other amounts to brokers, agents, consultants and sales representatives who place business with us. In certain cases, our customer pays the broker for services rendered, and we may facilitate that arrangement by collecting the funds from the customer and transmitting them to the broker. We support our marketing and sales efforts with an advertising program that may include television, radio, billboards, print media and social media, supplemented by market research and direct marketing efforts.

Pricing

For Commercial Insured plans, including our Public Exchange plans, contracts containing the pricing and other terms of the relationship are generally established in advance of the policy period and typically have a duration of one year. Fees under our ASC plans are generally fixed for a period of one year.

We use prospective rating methodologies in determining the premium rates charged to the majority of employer groups, and we also use retrospective rating methodologies for a limited number of groups. Premium rates for customers with more than approximately 125 employees generally take into consideration the individual plan sponsor's historical and anticipated claim experience where permitted by law. Some states may prohibit the use of one or more of these rating methods for some customers, such as small employer groups, or all customers.

Under prospective rating, a fixed premium rate is determined at the beginning of the policy period. We typically cannot recover unanticipated increases in health care costs in the current policy period; however, we may consider prior experience for a product in the aggregate or for a specific customer, among other factors, in determining premium rates for future policy periods. Where required by state laws, premium rates are filed and approved by state regulators prior to contract inception. Our future operating results could be adversely affected if the premium rates we request are not approved or are adjusted downward or their approval is delayed by state or federal regulators.

Under retrospective rating, we determine a premium rate at the beginning of the policy period. After the policy period has ended, the actual claim and cost experience is reviewed. If the actual claim costs and other expenses are less than expected, we may issue a refund to the plan sponsor based on this favorable experience. If the experience is unfavorable, in certain instances we may recover the resulting deficit through contractual provisions or consider the deficit in setting future premium levels. However, we may not recover the deficit if a plan sponsor elects to terminate coverage. Retrospective rating may be used for Commercial Insured plans that cover more than approximately 300 lives.

We have Medicare Advantage and PDP contracts with CMS to provide HMO, PPO and prescription drug coverage to Medicare beneficiaries in certain geographic areas. Under these annual contracts, CMS pays us a fixed capitation payment and/or a portion of the premium, both of which are based on membership and adjusted for demographic and health risk factors. CMS also considers inflation, changes in utilization patterns and average per capita fee-for-service Medicare costs in the calculation of the fixed capitation payment or premium. Our PDP contracts also provide a risk-sharing arrangement with CMS to limit our exposure to unfavorable expenses or benefit from favorable expenses. Amounts payable to us under the Medicare arrangements are subject to annual revision by CMS, and we elect to participate in each Medicare service area or region on an annual basis. Premiums paid to us for Medicare products are subject to federal government reviews and audits, which can result, and have resulted, in retroactive and prospective premium adjustments and refunds to the government and/or members. In addition to payments received from CMS, some of our Medicare Advantage products and all of our PDP products require a supplemental premium to be paid by the member or sponsoring employer. In some cases these supplemental premiums are adjusted based on the member's income and asset levels. Compared to Commercial products, Medicare contracts generate higher per member per month revenues and health care costs.

The ACA ties a portion of each Medicare Advantage plan’s reimbursement to the plan’s “star ratings.” Since 2015, plans must have a star rating of four or higher (out of five) to qualify for a quality bonus in their basic premium rates. CMS released our 2017 star ratings in October 2016. Our 2017 star ratings will be used to determine which of our Medicare Advantage plans have ratings of four stars or higher and qualify for bonus payments in 2018. Based on our membership at December 31, 2016, 92% of our Medicare Advantage members were in plans with 2017 star ratings of at least 4.0 stars, compared to 85% of our Medicare Advantage members being in plans with 2016 star ratings of at least 4.0 stars based on our membership at December 31, 2015.

Rates for our Medicare Supplement products are regulated at the state level and vary by state and plan.

Under our Insured Medicaid contracts, state government agencies pay us fixed monthly rates per member that vary by state, line of business and demographics; and we arrange, pay for and manage health care services provided to Medicaid beneficiaries. These rates are subject to change by each state, and in some instances, provide for adjustment for health risk factors. CMS requires these rates to be actuarially sound. We also receive fees from our customers where we provide services under ASC Medicaid contracts. Our ASC Medicaid contracts generally are for periods of more than one year, and certain of them contain performance incentives and limited financial risk sharing with respect to certain medical, financial and operational metrics. Under these arrangements, performance is evaluated annually, with associated financial incentive opportunities, and our financial risk share obligations are typically limited to a percentage of the fees otherwise payable to us. Payments to us under our Medicaid contracts are subject to the annual appropriation process in the applicable state.

Under our Duals contracts, the rate setting process is generally established by CMS in partnership with the state government agency participating in the demonstration project. Both CMS and the state government agency may seek premium and other refunds under certain circumstances, including if we fail to comply with CMS regulations or other contractual requirements.

We offer HMO and consumer-directed medical and dental plans to federal employees under the Federal Employees Health Benefits Program and the Federal Employees Dental and Vision Insurance Program. Premium rates and fees for those plans are subject to federal government review and audit, which can result, and have resulted, in retroactive and prospective premium and fee adjustments and refunds to the government and/or members.

Beginning in 2014, the ACA imposed significant new industry-wide fees, assessments and taxes. In December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the ACA's health insurer fee (the "HIF"). Refer to Note 2 "Summary of Significant Accounting Policies" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on the ACA fees, assessments and taxes. Our goal is to collect in premiums and fees or solve for all of these estimated fees, assessments and taxes.

Competition

The health care benefits industry is highly competitive, primarily due to a large number of for-profit and not-for-profit competitors, our competitors' marketing and pricing, and a proliferation of competing products, including new products that are continually being introduced into the marketplace. New entrants into the marketplace, as well as consolidation within the industry, have contributed to and are expected to intensify the competitive environment. In addition, the rapid pace of change as the industry evolves towards a consumer-focused retail marketplace, including Public and Private Exchanges, and the increased use of technology to interact with members, providers and customers, increase the risks we currently face from new entrants and disruptive actions by existing competitors compared to prior periods. References to competitors and other companies throughout this Annual Report on Form 10-K, including the information incorporated herein by reference, are for illustrative or comparison purposes only and do not indicate that these companies are our only competitors or are our closest competitors.

We believe that the significant factors that distinguish competing health plans include the perceived overall quality (including accreditation status), quality of service, comprehensiveness of coverage, cost (including premium rates, provider discounts and member out-of-pocket costs), product design, financial stability and ratings, breadth and quality of provider networks, ability to offer different provider network options, providers available in such networks, and quality of member support and care management programs. We believe that we are competitive on each of these factors. Our ability to increase the number of persons covered by our plans or to increase our revenues is affected by our ability to differentiate ourselves from our competitors on these factors. Competition may also affect the availability of services from health care providers, including primary care physicians, specialists and hospitals.

Our Insured products compete with local and regional health care benefits plans, health care benefits and other plans sponsored by other large commercial health care benefit insurance companies, health system owned health plans, new entrants into the marketplace and numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross and Blue Shield Association. Our largest competitor in our Medicare products is Original Medicare. Additional competitors include other types of medical and dental provider organizations, various specialty service providers (including pharmacy benefit management services providers), health care consultants, financial services companies, integrated health care delivery organizations (networks of providers who also coordinate administrative services for and assume insurance risk of their members), third party administrators, HIT companies and, for certain plans, programs sponsored by the federal or state governments. Emerging competitors include start up health care benefits plans, technology companies, provider-owned health plans, new joint ventures, technology firms, financial services firms that are distributing competing products on their

proprietary Private Exchanges, consulting firms that are distributing competing products on their proprietary Private Exchanges, as well as non-traditional distributors such as retail companies. Our ability to increase the number of persons enrolled in our Insured products also is affected by the desire and ability of employers to self-fund their health coverage.

Our ASC plans compete primarily with other large commercial health care benefit companies, numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross and Blue Shield Association and third-party administrators.

Our international products compete with local, global and U.S. based health plans and commercial health care benefit insurance companies, many of whom have a longer operating history and better brand recognition and greater marketplace presence in one or more geographies.

The provider solutions and HIT marketplaces and provider solutions and HIT products are evolving rapidly. We compete for provider solutions and HIT business with other large health plans and commercial health care benefit insurance companies as well as information technology companies and companies that specialize in provider solutions and HIT. Many of our information technology product competitors have longer operating histories, better brand recognition, greater marketplace presence and more experience in developing innovative products.

In addition to competitive pressures affecting our ability to obtain new customers or retain existing customers, our membership has been and may continue to be adversely affected by adverse and/or uncertain economic conditions and reductions in workforce by existing customers due to adverse and/or uncertain general economic conditions, especially in the U.S. and industries where our membership is concentrated.

Reinsurance

We currently have several reinsurance agreements with non-affiliated insurers that relate to Health Care insurance policies. We entered into these contracts to reduce the risk of catastrophic losses which in turn reduces our capital and surplus requirements. We frequently evaluate reinsurance opportunities and refine our reinsurance and risk management strategies on a regular basis.

Group Insurance Segment

Principal Products

Group Insurance products consist primarily of the following:

- ***Life Insurance:*** Our life insurance products principally consist of group term life insurance, the amounts of which may be fixed or linked to individual employee wage levels. We also offer voluntary spouse and dependent term life insurance, and group universal life and accidental death and dismemberment insurance. We offer life insurance products on an Insured basis.
- ***Disability Insurance:*** Our Disability products provide employee income replacement benefits for both short-term and long-term disability (and products which combine both). Similar to Health Care products, we offer disability benefits on both an Insured and employer-funded basis. We also provide absence management services to employers, including short-term and long-term disability administration and leave management.
- ***Long-Term Care Insurance:*** Our Long-Term Care Insurance products provide benefits to cover the cost of care in private home settings, adult day care, assisted living or nursing facilities. We no longer solicit or accept new long-term care customers. Long-term care benefits were offered primarily on an Insured basis. The product was available on both a service reimbursement and disability basis.

Principal Markets and Sales

We offer our Group Insurance products in 49 states as well as Washington, D.C., Guam, Puerto Rico, the U.S. Virgin Islands and Canada. Depending on the product, we market to a range of customers from small employer groups to large, multi-site and/or multi-state employer programs.

We market Group Insurance products and services primarily to employers that sponsor our products for the benefit of their employees and their employees' dependents. Frequently, employers offer employees a choice of benefits, from which the employee makes his or her selection during a designated annual open enrollment period. Typically, employers pay all of the monthly premiums to us and, through payroll deductions, obtain reimbursement from employees for a percentage of the premiums that is determined by each employer. Some Group Insurance products are sold directly to employees of employer groups on a fully employee-funded basis. In some cases, we bill the covered individual directly.

Group Insurance products are sold through our sales personnel, as well as through independent brokers, agents and consultants who assist in the production and servicing of business. For large plan sponsors, independent consultants and brokers are frequently involved in employer plan selection decisions and sales. We pay commissions, fees and other amounts to brokers, agents, consultants and sales representatives who place business with us. We support our marketing and sales efforts with an advertising program that may include direct marketing efforts as well as television, radio, billboards, print media and social media, supplemented by market research.

Pricing

For Insured and employer-funded Group Insurance plans, employer group contracts containing the pricing and other terms of the relationship are generally established in advance of the policy or contract period. We use prospective and retrospective rating methodologies to determine the premium rates charged to employer groups on our Insured products. Contracts are typically offered with rate guarantees that generally range from one to five years.

Under prospective rating, a fixed premium rate is determined at the beginning of the policy period. We typically cannot recover unanticipated increases in mortality or morbidity costs in the current policy period; however, we may consider prior experience for a product in the aggregate or for a specific customer, among other factors, in determining premium rates for future policy periods.

Under retrospective rating, we determine a premium rate at the beginning of the policy period. After the policy period has ended, the actual claim and cost experience is reviewed. If the actual claim costs and other expenses are less than expected, we may issue a refund to the plan sponsor based on this favorable experience. If the experience is unfavorable, we consider the deficit in setting future premium levels, and in certain instances, we may recover the deficit through contractual provisions such as offsets against refund credits that develop for future policy periods. However, we may not recover the deficit if a plan sponsor elects to terminate coverage. Retrospective rating is most often used for Insured plans that cover more than approximately 3,000 lives.

Competition

For the group insurance industry, we believe that the significant factors that distinguish competing companies are cost, quality of service, financial strength of the insurer, comprehensiveness of coverage, and product array and design. We believe we are reasonably competitive on each of these factors; however, some of our competitors have greater scale, financial and other resources, better brand recognition and lower expenses. The group life and group disability marketplaces remain highly competitive.

Reinsurance

We currently have several reinsurance agreements with non-affiliated insurers that relate to both life and long-term disability products. Certain of our reinsurance arrangements are established on a case-by-case basis, and a subset of our reinsurance agreements cover closed blocks of business and canceled cases. We also have a reinsurance arrangement to mitigate long-term disability claim severity risk at the individual claim level, and another reinsurance arrangement that provides a limited degree of catastrophic risk protection for certain of our life products. We frequently evaluate reinsurance opportunities and refine our reinsurance and risk management strategies on a regular basis.

Large Case Pensions Segment

Principal Products

Large Case Pensions manages a variety of retirement products (including pension and annuity products) primarily for tax-qualified pension plans. We do not actively market Large Case Pensions products, but continue to accept deposits from existing customers and manage the run-off of our existing business. Contracts provide non-guaranteed, experience-rated and guaranteed investment options through general and separate account products. Large Case Pensions products that use separate accounts provide contract holders with a vehicle for investments under which the contract holders primarily assume the investment risk. Large Case Pensions earns a management fee on these separate accounts.

In 1993, we discontinued our fully-guaranteed Large Case Pensions products. Refer to Note 19 “Discontinued Products” included in Part II, Item 8 of this Annual Report on Form 10-K for additional information.

Other Matters

Access to Reports and Other Information

Our reports to the U.S. Securities and Exchange Commission (the "SEC"), including our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to those reports are available without charge on our website at www.aetna.com as soon as practicable after they are electronically filed with or furnished to the SEC. The information on or linked to our website is neither a part of nor incorporated by reference in this Annual Report on Form 10-K or any of our other SEC filings. Copies of these reports are also available, without charge, from Aetna's Investor Relations Department, 151 Farmington Avenue, Hartford, CT 06156.

You also can download from our website our articles of incorporation, by-laws and corporate governance policies, including our Corporate Governance Guidelines, the charters of the key standing Committees of our Board of Directors and our Code of Conduct. Copies of these documents are also available, without charge, from Aetna's Corporate Secretary, 151 Farmington Avenue, RW61, Hartford, CT 06156.

Our transfer agent, Computershare Trust Company, N.A., can help with a variety of shareholder-related services, including change of address, lost stock certificates, transfer of stock to another person or other administrative services. Shareholders can write to our transfer agent by mail at P.O. Box 30170, College Station, TX 77842-3170 or contact them by telephone at 1-800-446-2617.

Regulation

For information regarding significant regulation that affects us, refer to "Regulatory Environment" of MD&A included in Part II, Item 7 of this Annual Report on Form 10-K and for a discussion of certain factors that may cause our actual results to differ from currently anticipated results in connection with regulation that affects us, see "Risk Factors" included in Part I, Item 1A of this Annual Report on Form 10-K.

Patents and Trademarks

We own a number of trademarks and patents that are important to Aetna. Some of the trademarks include Aetna, as well as the corresponding Aetna design logo, Aetna Navigator®, ActiveHealth®, bswift®, CareEngine®, Coventry®, DocFind®, Healthagen®, Healthy Merits®, iTriage®, Medicity®, Meritain Health®, NeoCare Solutions®, PayFlex®, Practice IQ®, Prodigy Health Group®, Springboard Marketplace® and Wellmatch®. Some of our patents include the CareEngine patent that expires in 2021 and the Master Patient Index patent that expires in 2029. We consider these patents and trademarks and our other patents, trademarks and trade names important in the operation of our business. However, our business, including that of each of our individual segments, is not dependent on any individual patent, trademark or trade name.

Employees

We had approximately 49,500 employees at December 31, 2016.

Customer Concentration

The U.S. federal government is a significant customer of both the Health Care segment and the Company as described below:

- Premiums and fees and other revenue paid by the federal government accounted for 34% of the Health Care segment's revenue and 33% of our consolidated total revenue in 2016.

- Contracts with CMS for coverage of Medicare-eligible individuals accounted for 82% of our federal government premiums and fees and other revenue, with the balance coming from federal employee-related benefit programs and ACA programs. No other individual customer, in any of our segments, accounted for 10% or more of our consolidated total revenue in 2016.

- Our Medicaid products accounted for 13% of both the Health Care segment's revenue and our consolidated total revenue in 2016. However, no individual state government agency accounted for more than 10% of our consolidated total revenue or the Health Care segment's revenue in 2016.

Other than our contracts with CMS, our segments are not dependent upon a single customer or a few customers the loss of which would have a significant effect on the earnings of a segment. The loss of business from any one, or a few, independent brokers or agents would not have a material adverse effect on our earnings or the earnings of any of our segments. Refer to Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information.

Item 1A. Risk Factors

Risk Factors

You should carefully consider each of the following risks and uncertainties and all of the other information set forth in this Annual Report on Form 10-K. These risks and uncertainties and other factors may affect forward-looking statements, including those we make in this Annual Report on Form 10-K or elsewhere, such as in news releases or investor or analyst calls, meetings or presentations. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business. Any of these risks or uncertainties could cause our actual results to differ materially from our expectations and the expected results discussed in our forward-looking statements. You should not consider past results to be an indication of future performance.

If any of the following risks or uncertainties develops into actual events or if the circumstances described in the risks or uncertainties occur or continue to occur, these events or circumstances could have a material adverse effect on our business, cash flows, financial position or operating results. In that case, the trading price of our common stock could decline materially, among other effects on us.

Effectiveness of our enterprise strategy, talent management and alignment of talent to our business needs and risks to our brand and reputation present overarching risks to our enterprise in 2017.

We expect to face significant business challenges and uncertainties in 2017. Effectiveness of our enterprise strategy, talent management and alignment of talent to our business needs and risks to our brand and reputation present overarching risks to our enterprise in 2017. There can be no assurance regarding the effectiveness of our enterprise strategy, our ability to manage and align our talent to our business needs or our ability to avoid harm to our brand and reputation. In addition, there can be no assurance that U.S. government fiscal policy, the implementation of the ACA, repeal or other changes to the ACA or additional changes to the U.S. health care system will not require us to revise the ways in which we conduct business, put us at risk of loss of business or materially adversely affect our business, cash flows, financial position or operating results.

While we consider the foregoing to be the overarching risks we face in 2017, they are not the only material risks we face. We face numerous other challenges, as described elsewhere in this Annual Report, including below in this "Risk Factors" discussion, and other unanticipated risks may develop.

Our enterprise strategy may not be an effective response to the changing dynamics in the health and related benefits industry, or we may not be able to implement our strategy and related strategic projects.

Our strategy includes effectively investing our capital and human resources in appropriate strategic projects, current operations and acquisitions to transform our business in response to the changing dynamics in the health and related benefits industry, including the evolution toward a direct-to-consumer marketing and operating model, the declining number of commercially insured people and the potential shift to a defined contribution model for health benefits. Our strategic projects include, among other things: significant investments in human and technology resources to expand our Consumer Health and Services product line, including to develop and expand our consumer business, and compete effectively in a direct-to-consumer marketplace; transforming our business model through consumer engagement, joint ventures, ACOs and collaborative provider networks; participating in select Public Exchanges and Private Exchanges (collectively, "Insurance Exchanges"); optimizing our business platforms; managing certain significant technology projects; further improving relations with health care providers; negotiating contract changes with customers and providers; and implementing other business process improvements. Implementing our strategic initiatives will require significant investments of capital and human resources. Among other things, we will need to simultaneously acquire and develop new personnel, products and systems to serve existing and new customers with existing and new products, our consumer business, which began serving members on January 1, 2016, and enhance our existing customer service, information technology, control and compliance processes and systems. The future performance of our businesses will depend in large part on our ability to design and implement our strategic initiatives, some of which will occur over several years. If these initiatives do not achieve their objectives, our operating results could be adversely affected.

Our enterprise strategy may not be an effective response to the changing dynamics in the health and related benefits industry, and we may fail to recognize and position ourselves to capitalize upon market opportunities. We may not have sufficient advance notice and resources to develop and effectively implement an alternative strategy. Competitors who develop a superior strategy, or more effectively implement their strategy, may develop capabilities, competitive advantages and competitive positions that are difficult to match or overcome.

We are dependent on our ability to recruit, retain and develop a very large and diverse workforce. We must transform our culture in order to successfully grow our business.

Our products and services and our operations require a large number of employees. A significant number of employees have joined us in recent years as a result of our acquisitions and our entry into new businesses. Our success is dependent on our ability to transform our culture, align our talent with our business needs, engage our employees and inspire our employees to be open to change, to innovate and to maintain consumer-focus when delivering services to our customers. Our business would be adversely affected if we fail to adequately plan for succession of our executives and senior management; or if we fail to effectively recruit, integrate, retain and develop key talent and/or align our talent with our business needs, in light of the current rapidly changing environment. While we have succession plans in place and we have employment arrangements with a limited number of key executives, these do not guarantee that the services of these or suitable successor executives will continue to be available to us. In addition, as we expand internationally, we face the challenge of recruiting, integrating, educating, managing, retaining and developing a more culturally diverse workforce.

Our brand and reputation are two of our most important assets; negative public perception of the health and related benefits industry, or of the industry's or our practices, can adversely affect our operating results.

The health and related benefits industry regularly is negatively perceived by the public and subject to negative publicity, including as a result of the ongoing public debate over the future of the ACA, proposed transactions in our industry (including the Humana Acquisition and related litigation), governmental investigations and actual or perceived shortfalls regarding the industry's or our own products and/or business practices (including withdrawing from participation in Public Exchanges and social media activities). This risk may be increased as the federal government continues to consider alternatives to amend, repeal and/or replace the ACA (including Medicaid expansion) and as states seek to maintain, replace or repeal elements of the ACA such as Public Exchanges and Medicaid expansion within increasingly challenging budget constraints. This risk will increase further if we implement significant increases in premium rates to price for additional risk and/or expanded benefits resulting from, and fees, assessments and taxes imposed by, the federal and state governments as well as any acceleration in medical cost inflation. This risk may be increased as states and the federal government continue to debate the ACA and implement any amendment, repeal or replacement of the ACA, as we continue to offer products that make greater use of data and products (including products for people who are eligible for Medicare or Medicaid or dually eligible for Medicare and Medicaid) beyond those in our core Commercial business and as our business model becomes more focused on consumers and direct-to-consumer sales, including as a result of us developing and expanding our Consumer Health and Services product line, competing for sales on select Insurance Exchanges and withdrawing from participation on most individual Public Exchanges. Significant reductions or interruptions in funding for government health programs we serve also may lead us to reduce our exposure to these programs, which could adversely affect our brand and reputation.

Negative public perception and/or publicity of the health and related benefits industry in general, or us or our key vendors, brokers or product distribution networks in particular, can further increase our costs of doing business and adversely affect our operating results and our stock price by:

- Adversely affecting our brand and reputation;
- Adversely affecting our ability to market and sell our products and/or services and/or retain our existing customers and members;
- Requiring us to change our products and/or services; and/or
- Increasing or significantly changing the regulatory and legislative requirements with which we must comply.

Changes in Public Policy and Other Legal and Regulatory Risks

We are subject to potential changes in public policy (in respect of the ACA or otherwise) that can adversely affect the markets for our products and services and our business, operations and operating results.

The political environment in which we operate remains uncertain, including as a result of the new U.S. presidential administration and the control of the U.S. Congress by a single political party. It is reasonably possible that our business operations and operating results could be materially adversely affected by public policy changes at the state or federal level, which include amendment, repeal or replacement of the ACA but also extend to many other public policy initiatives. Such changes may present us with new financial and other challenges, which may, for example, cause membership in our health plans to decrease or make doing business in particular states less attractive. If we fail to adequately respond to such changes, including by implementing effective operational and strategic initiatives, or do not do so as effectively as our competitors, our business, operations and operating results may be materially adversely affected.

In addition to efforts to amend, repeal or replace the ACA and related regulations, we expect the federal and state governments to continue to enact and seriously consider many broad-based legislative and regulatory proposals that will or could materially impact various aspects of the health care and related benefits system and our business. At the federal level these proposals include changes in the funding levels and/or design of federally-supported benefit programs, changes in payment methodologies for health plans and/or providers under Medicare and substantial change in the regulations governing our business. At the state level, these proposals include mandating pharmacy benefits; expanded provider network requirements; significant new fees, assessments and taxes on payors, including in response to reduced federal funding or other state budgetary pressures; mandating lower out of pocket costs for members; and raising Medicaid minimum MLR thresholds above 85%, instituting profit caps on Medicaid contracts and changing the designs of state Medicaid programs. The federal and many state governments are also considering changes in the interpretation, enforcement and/or application of existing programs, laws and regulations, including substantial changes to federal funding of state Medicaid programs. At the state level, all 50 U.S. states and the District of Columbia will hold regular legislative sessions in 2017. In 2016, state legislatures focused on state budgets and taxes (including new assessments on health care premiums), provider network composition and provider directory accuracy requirements, pharmacy benefit and drug coverage requirements, Medicaid reforms and health care delivery system transformation. We expect state legislatures to focus on these issues again in 2017, as well as the adverse impact of expected changes to the ACA and other federal programs on state programs and budgets.

We cannot predict the enactment or content of new legislation and regulations or changes to existing laws or regulations or their enforcement, interpretation or application, or the effect they will have on our business operations or operating results, which could be materially adverse. Even if we could predict such matters, it is not possible to eliminate the adverse impact of public policy changes that would fundamentally change the dynamics of our industry. Examples of such change include: the federal or one or more state governments fundamentally restructuring or reducing the funding available for Medicare, Medicaid, or dual eligible programs, changing the tax treatment of health or related benefits, or repealing or otherwise significantly altering the ACA. The likelihood of adverse changes is increasing due to state and federal budgetary pressures, and our business and operating results could be materially and adversely affected by such changes, even if we correctly predict their occurrence. For more information on these matters, refer to “Regulatory Environment” of MD&A included in Part II, Item 7 of this Annual Report on Form 10-K.

The ACA may be repealed or amended. If the ACA is not amended or repealed, certain aspects of the ACA as currently enacted have yet to take full effect, are unclear, or are subject to effective amendment through the implementation process, making their practical effects difficult to predict. Our business and operating results may be materially and adversely affected by the ACA and/or changes to the ACA even if we correctly predict their effects.

If the ACA is not amended, repealed or replaced, certain of its components will continue to be phased in until 2020. Potential repeal of the ACA, ongoing legislative and regulatory changes to the ACA, other pending efforts in the U.S. Congress to amend or restrict funding for various aspects of the ACA (including risk corridors and the ACA’s Cost Sharing Subsidy program), the results of the 2016 presidential, congressional and state level elections, pending litigation challenging aspects of the law and federal budget negotiations continue to create uncertainty about the ultimate impact of the ACA. Examples of recent legislative and regulatory changes include: the January 20, 2017 executive order relating to the ACA; the November 2016 HHS announcement that risk corridor collections for the 2015 program year will be applied first to amounts owed to plans for the 2014 program year; the May 2016 final regulations relating to the ACA’s non-discrimination requirements; the December 2015 suspension of the ACA’s health insurer fee (the “HIF”) for 2017 and two year delay of the “Cadillac” tax on high-cost employer-sponsored health coverage; the October 2015 PACE, which leaves groups with 51 to 100 employees within the large group category for each state unless the state exercises its option to include these groups within the small group category; and the October 2015 HHS announcement that ACA risk corridor receivables for the 2014 program year would only be funded at 12.6%.

We expect the 2017 suspension of the HIF to adversely affect our 2017 revenues and MBRs compared to 2016 as this change was reflected in reduced premiums for 2017 medical customer renewals. In addition, there is some uncertainty whether we will be able to include all of our portion of the industry-wide $14.3 billion 2018 HIF (as currently enacted) in our premium rates beginning with 2017 medical customer renewals that have member months in 2018, particularly following the HIF suspension for 2017.

The pending litigation challenging the ACA includes the House of Representatives’ challenge to HHS’s ability to make payments under the ACA’s Cost Sharing Subsidy program without an explicit appropriation. The time frame for conclusion, final outcome and ultimate impact of this litigation are uncertain. A final ruling that adversely impacts the Cost Sharing Subsidy program could cause significant adverse selection in individual Public Exchange products and instability in the individual Public Exchange marketplace and could have a material adverse effect on our business, cash flows, financial condition and operating results as well as hinder our ability to offer Public Exchange products.

While most of the significant aspects of the ACA became effective during or prior to 2014, as currently enacted, certain components of the ACA will continue to be phased in through 2020. In addition, significant parts of the ACA, including aspects of non-discrimination requirements, continue to evolve through the promulgation of executive orders, regulations and guidance. Additional changes to the ACA and those regulations and guidance at the federal and/or state level are likely, and those changes are likely to be significant. Growing state and federal budgetary pressures make it more likely that any changes, including changes at the state level in response to repeal or replacement of or changes to the ACA and/or changes in the funding levels and/or payment mechanisms of federally supported benefit programs, will be adverse to us.

Accordingly, even in the absence of any amendment or repeal, many of the specific aspects and impacts of the ACA as currently enacted will not be known for several years, and given the inherent difficulty of foreseeing how individuals and businesses will respond to the choices afforded to them by the ACA, we cannot predict the full effect of the ACA or the impact of future changes to the ACA on us. Further, even if we correctly predict how parts of the ACA will develop or change and affect us, our business and operating results may still be materially and adversely affected. For example, we anticipate that some aspects of the ACA and other existing measures and new measures, if enacted, could materially adversely affect our Health Care and/or Group Insurance operations and/or operating results by, among other things:

- Reducing our ability to obtain adequate premium rates for the risk we assume (including denial of or delays in obtaining regulatory approval for and implementation of those rates);
- Significantly reducing the level or changing the design of Medicare and/or Medicaid program payments;
- Adversely affecting the stability of the individual insurance marketplace;
- Restricting our ability to price for the risk we assume and/or reflect reasonable costs or profits in our pricing, and/or limiting the level of margin we can earn, including by mandating minimum medical loss ratios;
- Reducing our ability to manage health care or other benefit costs (including by mandating benefits, restricting our ability to manage our provider network and/or capping member cost sharing or otherwise limiting members' financial responsibility for health care or other covered services they utilize and thus increasing our medical costs);
- Increasing health care or other benefit costs and operating expenses (including duplicate expenses resulting from changes in regulations during implementation);
- Increasing our exposure to lawsuits and other adverse legal proceedings;
- Adversely affecting our product mix;
- Imposing new or increasing existing taxes and financial assessments; and/or
- Increasing the general and administrative expenses of our Group Insurance business relative to its competitors.

Legislative and regulatory changes could create significant challenges to our Medicare Advantage and PDP revenues and operating results, and proposed changes to these programs could create significant additional challenges. Starting in 2017, federal funding for Medicaid expansion will decrease. Entitlement program reform, if it occurs, could have a material adverse effect on our business, operations or operating results.

From time to time the federal government alters the level of funding for government health care programs, including Medicare. Under the Budget Control Act of 2011 (the "BCA") and the American Taxpayer Relief Act of 2012 (the "ATRA"), significant, automatic across-the-board budget cuts (known as sequestration) to several federal government programs started in March 2013. These include Medicare spending cuts of up to 2% of total program costs per year through 2024. The ATRA also contained additional reductions to Medicare reimbursements to health plans that commenced in April 2013 and eliminated funding for certain ACA programs. These reductions could adversely affect us, our customers and our providers.

Medicare Advantage payment rates to health plans have been cut over the last several years, with additional reductions to be phased in through 2017. CMS's April 2016 final notice for Medicare Advantage benchmark payment rates (the "Final Notice") provides for rate cuts to the employer group waiver program that will begin in 2017 and be fully phased in for 2018 as well as adverse changes to the risk adjustment mechanism for dual eligible beneficiaries and the Medicare Advantage star rating program. Overall, we project the benchmark rates for 2017 in the Final Notice will decrease funding for our Medicare Advantage business by less than 1 percent in 2017 compared to 2016. This 2017 rate decrease adds to the challenge we face from the impact of the increasing cost of medical care, the HIF beginning in 2018 (as currently enacted) and CMS local and national coverage decisions that require us to pay for services and supplies that are not factored into our bids and creates continued pressure on the Medicare Advantage program and our Medicare Advantage operating results. We cannot predict

future Medicare funding levels, the impact of future federal budget actions or ensure that such changes or actions will not have an adverse effect on our Medicare operating results.

In addition, the "star ratings" from CMS for our Medicare Advantage plans will continue to have a significant effect on our plans' operating results. Since 2015, only Medicare Advantage plans with a star rating of four or higher (out of five) are eligible for a quality bonus in their basic premium rates. CMS continues to change its rating system to make achieving and maintaining a four or higher star rating more difficult. Our star ratings and past performance scores are adversely affected by compliance issues that arise in our Medicare operations, such as our distribution of inaccurate information regarding which pharmacies were part of our Medicare network and related $1 million civil monetary penalty in 2015 and notices of non-compliance and warning letters in 2016. During 2016, our star ratings resulted in additional revenue of approximately $560 million, inclusive of bonus payments and rebates. If our star ratings fall below 4 for a significant portion of our Medicare Advantage membership or do not match the performance of our competitors or the star rating quality bonuses are reduced or eliminated, our revenues and operating results may be significantly adversely affected.

In April 2016, CMS issued a final rule that overhauls the entire Medicaid managed care delivery system. The final rule represents the first update to Medicaid managed care regulations since 2002. Among other things the final rule requires Medicaid managed care products to have a minimum MLR of 85%; establishes a Medicaid managed care quality rating system; and establishes provider network adequacy requirements. The minimum MLR requirements are effective beginning in 2017.

Beginning in 2017, federal funding for expanded Medicaid coverage is decreasing, which is causing states to re-evaluate funding for their Medicaid expansions. That re-evaluation may adversely affect Medicaid payment rates, our Medicaid membership in those states, our revenues, our Government medical benefit ratio and our operating results.

We anticipate extensive debate concerning entitlement program reform in 2017, particularly over the federal government's funding of the Medicaid program. If entitlement program reform occurs, it could have a material adverse effect on our business, operations or operating results, particularly on our Medicare and/or Medicaid revenues, medical benefit ratios and operating results.

We may not be able to obtain adequate premium rate increases, which would have an adverse effect on our revenues, medical benefit ratios and operating results and could magnify the adverse impact of increases in health care and other benefit costs and of ACA assessments, fees and taxes.

Premium rates generally must be filed with state insurance regulators and are subject to their approval, which creates risk for us in the current political and regulatory environment. The ACA generally requires a review by HHS in conjunction with state regulators of premium rate increases of 10% or more (or another state-specific threshold set by states determined by HHS to have adequate processes). Rate reviews can magnify the adverse impact on our operating margins and operating results of increases in health care and other benefit costs, increased utilization of covered services, and ACA assessments, fees and taxes, by restricting our ability to reflect these increases and/or these assessments, fees and taxes in our pricing. The risk of increases in utilization of medical and/or other covered services and/or in health care and other benefit costs is particularly acute during and following periods, when utilization has been below recent historical levels, during periods of changing economic conditions and/or employment levels and in products where there is significant turnover in our membership each year, such as Public Exchanges. Further, our ability to reflect ACA assessments, fees and taxes in our Medicare rates is limited. Similarly, our ability to reflect them in our Medicaid and/or CHIP premium rates is limited due, among other things, to the budgetary pressures currently facing many state governments. This could magnify the adverse impact on our operating margins and operating results of increases in utilization of medical and other covered services, health care and other benefit costs and/or medical cost trends that exceed our projections.

Since 2013, HHS has issued determinations to health plans that their rate increases were "unreasonable," and we continue to experience challenges to appropriate premium rate increases in certain states. Regulators or legislatures in a number of states have implemented or are considering limits on premium rate increases, either by enforcing existing legal requirements more stringently or proposing different regulatory standards. Regulators or legislatures in a number of states also have conducted hearings on proposed premium rate increases, which can result, in some instances have resulted, in substantial delays in implementing proposed rate increases even if they ultimately are approved. Our plans can be excluded from participating in Public Exchanges if they are deemed to have a history of "unreasonable" rate increases. We requested significant increases in our premium rates in our individual and small group Health Care businesses for 2017 and expect to continue to request significant increases in those rates for 2018 and beyond in order to adequately price for projected medical cost trends, required expansions of coverage and significant assessments, fees and taxes imposed by the federal and state governments, including the ACA. Our rates also must be adequate to reflect the risk that our products will be selected by people with a higher risk profile or utilization rate than the pool of participants we anticipated when we established the pricing for the applicable products (also

known as “adverse selection”) in our products, particularly in individual and small group products, which we expect to continue and potentially worsen in 2017 with the expiration of the ACA’s risk corridor and reinsurance programs at the end of 2016. These significant rate increases heighten the risks of adverse public and regulatory reaction and adverse selection and the likelihood that our requested premium rate increases will be denied, reduced or delayed, which could lead to operating margin compression.

We anticipate continued regulatory and legislative action to increase regulation of premium rates in our Insured business. We may not be able to obtain rates that are actuarially justified or that are sufficient to make our policies profitable in any product line or geography. If we are unable to obtain adequate rates and/or rate increases, it could materially and adversely affect our operating margins and our ability to earn adequate returns on Insured business in one or more states or cause us to withdraw from certain geographies and/or products.

Minimum MLR rebate requirements limit the level of margin we can earn in our Commercial Insured, Medicare Insured and Medicaid Insured businesses while leaving us exposed to higher than expected medical costs. Challenges to our minimum MLR rebate methodology and/or reports could adversely affect our operating results.

The ACA requires us to pay minimum MLR rebates each year with respect to prior years. The ACA’s minimum MLR rebate requirements limit the level of margin we can earn in our Commercial Insured and Medicare Insured businesses. CMS minimum MLR rebate regulations limit the level of margin we can earn in our Medicaid Insured business. Minimum MLR rebate requirements leave us exposed to medical costs that are higher than those reflected in our pricing. Refer to “Revenue Recognition” in Note 2 “Summary of Significant Accounting Policies” included in Part II, Item 8 of this Annual Report on Form10-K for more information. Certain portions of our Medicaid and Federal Employees Health Benefits (“FEHB”) program business are subject to minimum MLR rebate requirements in addition to but separate from those imposed by the ACA. The process supporting the management and determination of the amount of MLR rebates payable is complex and requires judgment, and the rebate reporting requirements are detailed. Federal and state auditors are challenging our Commercial business compliance with the ACA’s minimum MLR requirements, and our Medicare and Medicaid contracts also are subject to minimum MLR audits. If a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years (including on a retrospective basis), it will become ineligible to participate in open enrollment. If a Medicare Advantage or Medicare Part D contract pays such rebates for five consecutive years (including on a retrospective basis), it will be terminated by CMS. Federal auditors also are challenging our FEHB plans’ compliance with the Office of Personnel Management’s (“OPM’s”) FEHB program specific minimum MLR requirements. Additional challenges to our methodology and/or reports relating to minimum MLR rebates by federal and state regulators and private litigants are reasonably possible. The outcome of these audits and additional challenges could adversely affect our operating results.

Additionally, we are required to pay minimum MLR rebates in a number of states in which we offer Medicaid coverage. In 2017, there also are pending proposals in a number of states to raise Medicaid minimum MLR thresholds above 85% and/or institute profit caps on state Medicaid contracts. These rebates and proposals are not required by the ACA; they are mandated by our Medicaid contracts or applicable state laws or regulations.

We may be subject to regulatory actions or suffer brand and reputational harm if we do not or cannot adequately implement the ACA, any amendment, repeal or replacement of the ACA and/or related legislation or regulations, which may have a material adverse effect on our business.

We are dedicating, and will continue to be required to dedicate significant resources and incur significant expenses to implement and comply with the ACA as currently enacted and any amendment, repeal or replacement of the ACA and/or related legislation or regulations at both the state and federal level, including complying with the implementation timeframe set by the government each year for developing and pricing our Public Exchange products for the following year and implementing as well as complying with future legislation and regulations that will provide guidance on and clarification of and changes to significant parts of the legislation. If we fail to effectively implement the ACA and changes to, or repeal or replacement of, the ACA and/or related legislation or regulations and our related operational and strategic initiatives, or do not do so as effectively as our competitors, our business, operating results, brand and reputation may be materially adversely affected, we may lose customers and we may be subject to penalties, sanctions or other regulatory actions.

If we are unable to include the significant assessments, fees and taxes imposed on us by the ACA or otherwise by federal or state governments in our premiums and fees or otherwise solve for them, our operating results, financial position and/or cash flows would be materially and adversely affected. The inclusion of these assessments, fees and taxes in our premiums also could adversely affect our ability to grow and/or maintain our medical membership.

The ACA imposes significant assessments, fees and taxes on us and other health insurers, health plans and other industry participants. There is some uncertainty whether we will be able to include all of these assessments, fees and taxes in our premium rates. It may be particularly challenging to be able to include all of our portion of the industry-wide $14.3 billion 2018 HIF (as currently enacted) in our premium rates beginning with 2017 medical customer renewals that have member months in 2018 because of the HIF suspension for 2017. Our ability to reflect the ACA assessments, fees and taxes in our Medicare rates is limited. Similarly, our ability to reflect them in our Medicaid and CHIP rates is limited due, among other things, to the budgetary pressures currently facing many state governments.

We cannot predict the nature or extent of any new or increased federal or state assessments, fees or taxes associated with changes in the ACA or state actions in 2017 or thereafter. Those new or increased assessments, fees or taxes may be significant. If we are unable to include assessments, fees and taxes in our premiums and fees or otherwise adjust our business model to solve for them, these assessments, fees and taxes could have a material adverse effect on our operating results, financial position and/or cash flows. The increases in our prices caused by including all of these assessments, fees and taxes in our premiums and fees also could adversely affect our ability to profitably grow and/or maintain our medical membership, for example, if our competitors do not seek to include all or a significant portion of these assessments, fees and taxes in their premiums or fees.

Our business activities are highly regulated. Our Medicare, Medicaid, specialty and mail order pharmacy, Public Exchange and certain other products are subject to particularly extensive and complex regulations. If we fail to comply with applicable laws and regulations, we could be subject to significant adverse regulatory actions or suffer brand and reputational harm which may have a material adverse effect on our business. Compliance with existing and future laws, regulations and/or judicial decisions may reduce our profitability and limit our growth.

Our business is subject to extensive regulation and oversight by state, federal and international governmental authorities. The laws and regulations governing our operations and interpretations of those laws and regulations are increasing in number and complexity, change frequently (as evidenced by amendments to, and possible repeal or replacement of, the ACA and the continuing administrative changes in, and pending litigation regarding, the implementation of the ACA as well as other new federal and state laws and regulations), and can be inconsistent or conflicting. In general, these laws and regulations are designed to benefit and protect members and providers rather than us or our investors. In addition, the governmental authorities that administer our business have broad latitude to make, interpret and enforce the laws and regulations that govern us and continue to interpret and enforce those laws and regulations more strictly and more aggressively each year.

Our Medicare, Medicaid, dual eligible, Public Exchange, specialty pharmacy and mail order pharmacy products are more highly regulated than our other Health Care products. The laws and regulations governing participation in Medicare, Medicaid and dual eligible programs are complex, are subject to interpretation and can expose us to penalties for non-compliance, including penalties under the federal false claims act (the "False Claims Act") and state false claims acts. In addition, the ACA may have expanded the jurisdiction of, and our exposure to, the False Claims Act to products sold on Public Exchanges. The scope of the practices and activities that are prohibited by federal and state false claims acts is the subject of pending litigation. Claims under federal and state false claims acts can be brought by the government or by private individuals on behalf of the government through a *qui tam* or "whistleblower" suit. If we are convicted of fraud or other criminal conduct in the performance of a health program or if there is an adverse decision against us under the False Claims Act, we may be temporarily or permanently suspended from participating in government health care programs, including Medicare, Medicaid and dual eligible programs, and we also may be required to pay significant fines and/or other monetary penalties.

If we fail to comply with laws and regulations that apply to government programs, we could be subject to criminal fines, civil penalties, premium refunds, prohibitions on marketing or active or passive enrollment of members, corrective actions, termination of our contracts or other sanctions which could have a material adverse effect on our ability to participate in Medicare, Medicaid, dual eligible and other programs, cash flows, financial position and operating results. For example, CMS assessed a civil monetary penalty of $1 million against us in 2015 for distributing inaccurate information regarding which pharmacies were part of our Medicare network. Also, from April 2010 through June 2011, we were subject to intermediate sanctions that CMS imposed on us that required us to suspend the enrollment of and marketing to new members of all Aetna Medicare Advantage and PDP contracts. As a result of these sanctions, our 2011 Medicare membership and operating results were adversely affected because we did not participate in the annual enrollment process for 2011 and were not again eligible to receive automatic assignments of low income subsidy PDP members from CMS until September 2012.

Our products providing PBM and specialty and mail order pharmacy services are subject to:

- The risks inherent in the dispensing, packaging and distribution of pharmaceuticals and other health care products, including claims related to purported dispensing and other operational errors (any failure by us or one of our PBM

services suppliers to adhere to the laws and regulations applicable to the dispensing of pharmaceuticals could subject our PBM and/or pharmacy subsidiaries to civil and criminal penalties).

- Federal and state anti-kickback and other laws that govern our relationship with pharmaceutical manufacturers, customers and consumers.
- Compliance requirements under ERISA, including fiduciary obligations in connection with the development and implementation of items such as drug formularies and preferred drug listings.
- Federal and state legislative proposals and/or regulatory activity that could adversely affect pharmacy benefit industry practices, including the management and breadth of provider networks, the regulation of the development and use of drug formularies (such as the 2014 regulatory activity requiring us and certain other payors to place certain high cost drugs in preferred positions in our drug formularies) and/or maximum allowable cost list pricing, legislation, regulations or regulatory activity increasing the regulation of prescription drug pricing, imposing additional rights to access to drugs for individuals enrolled in health care benefit plans or reducing the cost of such drugs to those individuals, the receipt or required disclosure of rebates from pharmaceutical manufacturers, and restrictions on the use of average wholesale prices.

Our business, profitability and growth also may be adversely affected by (i) judicial and regulatory decisions that change and/or expand the interpretations of existing statutes and regulations, impose medical or bad faith liability, increase our responsibilities under ERISA or the remedies available under ERISA, or reduce the scope of ERISA pre-emption of state law claims or (ii) other legislation and regulations, including new legislation or regulations that apply to Private Exchanges. For more information regarding these matters, refer to “Regulatory Environment” of MD&A included in Part II, Item 7 and “Litigation and Regulatory Proceedings” in Note 17 “Commitments and Contingencies” included in Part II, Item 8 of this Annual Report on Form10-K.

We frequently are subject to regular and special governmental audits, investigations and reviews that could result in changes to our business practices, and also could result in material refunds, fines, penalties, civil liabilities, criminal liabilities and other sanctions.

As one of the largest national health and related benefits providers, we frequently are subject to regular and special governmental market conduct and other audits, investigations and reviews by, and we receive subpoenas and other requests for information from, various federal and state agencies, regulatory authorities, attorneys general, committees, subcommittees and members of the U.S. Congress and other state, federal and international governmental authorities. Several such audits, investigations and reviews currently are pending, some of which may be resolved in 2017, and the results of which may be adverse to us.

There continues to be a heightened level of review and/or audit by federal, state and international regulators of the health and related benefits industry’s business and reporting practices, including premium rate increases, provider network adequacy, provider network directories, pharmacy formulary tiering, pharmacy network structures, utilization management and payment of providers with whom the payor does not have a contract and other health and life insurance claim payment practices. In addition, a significant number of states are investigating life insurers’ and health insurers’ claims payment and related escheat practices. These investigations have resulted in significant charges to earnings by other life insurers in connection with related settlement agreements. We have received requests for information from a number of states, and certain of our subsidiaries are being audited, with respect to our life insurance and health insurance claim payment and related escheat practices. Given the judicial, legislative and regulatory uncertainty with respect to life insurance and health insurance claim payment and related escheat practices, it is reasonably possible that we may incur additional liability related to those practices, whether as a result of changes in our business practices, litigation, government actions or otherwise, which could adversely affect our operating results and cash flows. For additional information on these life insurance matters, refer to “Regulatory Environment - Life and Disability Insurance” of MD&A included in Part II, Item 7 of this Annual Report on Form 10-K.

Federal and state governments have made investigating and prosecuting health care and other insurance fraud, waste and abuse a priority. Fraud, waste and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical and/or other covered services, improper marketing and violations of patient privacy rights. The regulations and contractual requirements applicable to us and other market participants are complex and subject to change, making it necessary for us to invest significant resources in complying with our regulatory and contractual requirements. Ongoing vigorous law enforcement and the highly technical regulatory scheme mean that our compliance efforts in this area will continue to require significant resources. In addition, our medical costs and the medical expenses of our self-insured customers may be adversely affected if we do not prevent or detect fraudulent activity by providers and/or members.

Regular and special governmental audits, investigations and reviews could result in changes to our business practices, and also could result in significant or material premium refunds, fines, penalties, civil liabilities, criminal liabilities or other sanctions, including suspension or exclusion from participation in government programs and suspension or loss of licensure. For example, CMS assessed a civil monetary penalty of $1 million against us in 2015. Any of these audits, investigations or reviews could have a material adverse effect on our financial position, operating results or business or result in significant liabilities and negative publicity for our company. Federal and state auditors are challenging our Commercial business compliance with the ACA's minimum MLR requirements. Our Commercial business has been subject to audits related to the ACA's risk adjustment and reinsurance data since those programs were implemented in 2014. Our Medicare and Medicaid contracts also are subject to minimum MLR audits. If a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years (including on a retrospective basis), it will become ineligible to participate in open enrollment. If a Medicare Advantage or Medicare Part D contract pays such rebates for five consecutive years (including on a retrospective basis), it will be terminated by CMS. Federal auditors are also challenging our FEHB plans' compliance with the OPM's FEHB program specific minimum MLR requirements. For more information on certain CMS and other audits, see *"We are subject to retroactive adjustments to and/or withholding of certain premiums and fees, including as a result of CMS RADV audits. We generally rely on health care providers to appropriately code claim submissions and document their medical records. If these records do not appropriately support our risk adjusted premiums, we may be required to refund premium payments to CMS"* on page 25.

For more information regarding these matters, refer to "Regulatory Environment" of MD&A included in Part II, Item 7 and "Litigation and Regulatory Proceedings" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form10-K..

If our compliance systems and processes fail or are deemed inadequate, we may suffer brand and reputational harm and become subject to regulatory actions or litigation which could adversely affect our business, cash flows, operating results or financial position.

Our businesses are subject to extensive and complex regulations, and many of our contracts with customers include detailed requirements. In order to be eligible to offer certain products or bid on certain contracts, we must demonstrate that we have robust systems in place to ensure that we comply with all applicable legal, regulatory and contractual requirements. These systems are frequently reviewed and audited by our customers and regulators. If our systems and processes designed to maintain compliance with applicable legal and contractual requirements, and to prevent and detect instances of, or the potential for, non-compliance fail or are deemed inadequate, we may suffer brand and reputational harm and be subject to regulatory actions, litigation and other proceedings which may result in damages, fines, suspension or loss of licensure, suspension or exclusion from participation in government programs and/or other penalties, any of which could adversely affect our business, cash flows, operating results or financial position.

Our litigation and regulatory risk profile is changing as we offer new products and expand in business areas beyond our historical core business of providing Commercial managed care and health insurance products in the United States. Changes in the ACA at the federal or state level could accelerate that change.

Historically, we focused primarily on providing Commercial managed care and health insurance products in the United States. In comparison, our Medicare and Medicaid products were significantly smaller. In 2016, our Medicare and Medicaid products accounted for 48% of total Health Care premiums. Our business continues to change due to the following:

- *Acquisitions:* Our 2014 acquisition of InterGlobal expanded our international business.
- *Expansion within the health care marketplace:* We are expanding or seeking to expand our presence in various sectors of the health care marketplace, including Medicare, Medicaid, dual eligibles, international, and certain customers who are not subject to ERISA's limits on state law remedies and working to deliver innovative products in those sectors.
- *Entry into new business and new product lines:* We are in the process of developing and seeking to expand our Consumer Health and Services product line. Over the last several years we have entered into new product lines, including Insurance Exchanges, dual eligible programs, support services for ACOs, data analytics, recruitment for clinical trials and HIT.
- *ACA Changes:* Changes in the ACA at the federal or state level may create new products or expose us to new or expanded regulatory and/or litigation risk.

The increased volume of business in areas beyond our historical core business and new products subject us to litigation and regulatory risks that are different from the risks of providing Commercial managed care and health insurance products and increase significantly our exposure to other risks.

We are routinely subject to litigation and adverse legal proceedings, including class actions. Many of these proceedings seek substantial damages which may not be covered by insurance. These proceedings may be costly to defend, result in changes in our business practices, harm our brand and reputation and adversely affect our business and operating results.

We are routinely involved in numerous claims, lawsuits, regulatory audits, investigations and other legal proceedings arising in the ordinary course of our businesses. Certain of the lawsuits against us are purported to be class actions. The majority of these proceedings relate to the conduct of our health care operations and allege various violations of law. In addition, we operate in jurisdictions outside the United States, where contractual rights, tax positions and applicable regulations may be subject to interpretation or uncertainty to a greater degree than in the United States, and therefore more likely to be subject to dispute by customers, members, governmental authorities and others. We are incurring expenses to resolve these proceedings. The outcome of litigation and other adverse legal proceedings is always uncertain, and outcomes that are not justifiable by the evidence or existing law or regulation can and do occur.

Litigation has been and may be brought against us by private individuals on behalf of the government through a *qui tam* or "whistleblower" suit. When a private individual brings a whistleblower suit, the defendant often will not be made aware of the suit for many months or even years, until the government commences its own investigation or determines whether it will intervene. Whistleblower suits have resulted in significant settlements between governmental agencies and health care companies. The significant incentives and protections provided under the Dodd-Frank Wall Street Reform and Consumer Protection Act increase the risk of whistleblower suits.

Many of the legal proceedings against us seek substantial damages (including non-economic or punitive damages and treble damages), and certain of these proceedings also seek changes in our business practices. For example, since 2007, we have been in class action litigation with non-participating providers over our payments to them, and during 2009, we settled a matter with the New York Attorney General that caused us to transition to different databases to determine the amount we pay non-participating providers under certain benefit plan designs. While we currently have insurance coverage for some potential liabilities, other potential liabilities may not be covered by insurance, insurers may dispute coverage, or the amount of our insurance may not be enough to cover the damages awarded or costs incurred. In addition, some types of damages, like punitive damages, may not be covered by insurance, and in some jurisdictions the coverage of punitive damages is prohibited. Insurance coverage for all or some forms of liability may become unavailable or prohibitively expensive in the future.

Litigation and other adverse legal proceedings could materially adversely affect our business or operating results because of brand and reputational harm to us caused by such proceedings, the costs of defending such proceedings, the costs of settlement or judgments against us, or the changes in our operations that could result from such proceedings. Refer to "Litigation and Regulatory Proceedings" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form10-K

Our use and disclosure of members', customers' and other constituents' sensitive information is subject to complex regulations at multiple levels. We would be adversely affected if we or our business associates or other vendors fail to adequately protect members', customers' or other constituents' sensitive information.

Our information systems are critical to the operation of our business. We collect, process, maintain, retain, evaluate, utilize and distribute large amounts of personal health and financial information and other confidential and sensitive data about our members, customers and other constituents in the ordinary course of our business. Some of our information systems rely upon third party systems to accomplish these tasks. The use and disclosure of such information is regulated at the federal, state and international levels, and these laws, rules and regulations are subject to change and increased enforcement activity, such as the European Union's ("EU's") General Data Protection Regulation which will apply across the EU effective May 2018 and the audit program implemented by HHS under HIPAA. In some cases, such laws, rules and regulations also apply to our vendors and/or may hold us liable for any violations by our vendors. International laws, rules and regulations governing the use and disclosure of such information are generally more stringent than in the United States, and they vary from jurisdiction to jurisdiction. Noncompliance with any privacy or security laws or regulations, or any security breach, cyber-attack or cybersecurity breach, and any incident involving the theft, misappropriation, loss or other unauthorized disclosure of, or access to, sensitive or confidential member information, whether by us, by one of our vendors or by another third party, could require us to expend significant resources to remediate any damage, interrupt our operations and damage our brand and reputation, and could also result in investigations, regulatory enforcement actions, material fines and penalties, loss of customers, litigation or other actions which could have a material adverse effect on our business, brand, reputation, cash flows and operating results.

Our business depends on our members' and customers' willingness to entrust us with their health related and other sensitive personal information. Events that negatively affect that trust, including inadequate disclosure to our members or customers our

uses of their information, failing to keep our information technology systems and our members' and customers' sensitive information secure from significant attack, theft, damage, loss or unauthorized disclosure or access, whether as a result of our action or inaction or that of our business associates, vendors or other third parties, including our PBM services suppliers, could adversely affect our brand and reputation, membership and revenues and also expose us to mandatory disclosure to the media, litigation (including class action litigation) and other enforcement proceedings, material fines, penalties and/or remediation costs, and compensatory, special, punitive and statutory damages, consent orders, adverse actions against our licenses to do business and/or injunctive relief, any of which could adversely affect our business, cash flows, operating results or financial position. There can be no assurance that any such failure will not occur, or if any does occur, that we will detect it or that it can be sufficiently remediated.

We are subject to retroactive adjustments to and/or withholding of certain premiums and fees, including as a result of CMS RADV audits. We generally rely on health care providers to appropriately code claim submissions and document their medical records. If these records do not appropriately support our risk adjusted premiums, we may be required to refund premium payments to CMS.

Premiums and/or fees for Medicare members, certain federal government employee groups and Medicaid beneficiaries are subject to retroactive adjustments and/or withholding by the federal and applicable state governments. Our Public Exchange business, including amounts payable to us or payable by us under the ACA's premium stabilization programs and our risk adjustment and reinsurance data, also is subject to audit by governmental authorities. CMS regularly audits our performance to determine our compliance with CMS's regulations and our contracts with CMS and to assess the quality of the services we provide to our Medicare members.

CMS uses various payment mechanisms to allocate and adjust premium payments to our and other companies' Medicare plans by considering the applicable health status of Medicare members as supported by information prepared, maintained and provided by health care providers. We collect claim and encounter data from providers and generally rely on providers to appropriately code their submissions to us and document their medical records, including the diagnosis data submitted to us with claims. CMS pays increased premiums to Medicare Advantage plans and PDPs for members who have certain medical conditions identified with specific diagnosis codes. Federal regulators review and audit the providers' medical records to determine whether those records support the related diagnosis codes that determine the members' health status and the resulting risk-adjusted premium payments to us. In that regard, CMS has instituted risk adjustment data validation ("RADV") audits of a subset of Medicare Advantage plans for various contract years, including certain of the Company's plans for certain contract years, to validate coding practices and supporting medical record documentation maintained by health care providers and the resulting risk adjusted premium payments to the plans. CMS may require us to refund premium payments if our risk adjusted premiums are not properly supported by medical record data. The OIG also is auditing risk adjustment data of other companies, and we expect CMS and the OIG to continue auditing risk adjustment data.

CMS revised its audit methodology for RADV audits to determine refunds payable by Medicare Advantage plans for contract year 2011 and forward. Under the revised methodology, among other things, CMS will project the error rate identified in the audit sample of approximately 200 members to all risk adjusted premium payments made under the contract being audited. Historically, CMS did not project sample error rates to the entire contract. As a result, the revised methodology may increase our exposure to premium refunds to CMS based on incomplete medical records maintained by providers.

Since 2013, CMS has selected certain of our Medicare Advantage contracts for various contract years for RADV audit. In December 2015, CMS released a RFI for a significant expansion of the RADV audit program. As described in the RFI, CMS would use third party auditors to attain its ultimate goal of subjecting all Medicare Advantage contracts to either a comprehensive or a targeted RADV audit for each contract year. We are currently unable to predict which of our Medicare Advantage contracts will be selected for future audit, the amounts of any retroactive refunds of, or prospective adjustments to, Medicare Advantage premium payments made to us, the effect of any such refunds or adjustments on the actuarial soundness of our Medicare Advantage bids, or whether any RADV audit findings would require us to change to our method of estimating future premium revenue in future bid submissions to CMS or compromise premium assumptions made in our bids for prior contract years or the current contract year. For additional information, refer to "Regulatory Environment - Medicare" of MD&A included in Part II, Item 7 of this Annual Report on Form 10-K.

If we fail to report and correct errors discovered through our own auditing procedures or during a CMS audit or otherwise fail to comply with the applicable laws and regulations, we could be subject to fines, civil penalties or other sanctions which could have a material adverse effect on our ability to participate in Medicare Advantage, Part D or other government programs, and on our financial position, cash flows and operating results.

CMS has issued a final rule implementing ACA requirements that Medicare Advantage and PDP plans report and refund to CMS overpayments that those plans receive from CMS. However, CMS's statements in formalized guidance regarding "overpayments" to Medicare Advantage plans appear to be inconsistent with CMS's prior RADV audit guidance. These statements appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the fee for service adjustment comparison contemplated by CMS's RADV audit methodology. The precise interpretation, impact and legality of the final rule are not clear and are subject to pending litigation. If Medicare Advantage plans were not paid based on payment model principles that align with the requirements of the Social Security Act or such payments were not implemented correctly, it could have a material adverse effect on our operating results, financial position or cash flows.

Certain of our Medicaid contracts require the submission of complete and correct encounter data. The accurate and timely reporting of encounter data is increasingly important to the success of our Medicaid programs because more states are using encounter data to determine compliance with performance standards and, in part, to set premium rates. We have expended and may continue to expend additional effort and incur significant additional costs to collect accurate, or to correct inaccurate or incomplete, encounter data and have been and could be exposed to premium withholding, operating sanctions and financial fines and penalties for noncompliance. We have experienced challenges in obtaining complete and accurate encounter data due to difficulties with providers and third-party vendors submitting claims in a timely fashion in the proper format, and with state agencies in coordinating such submissions. As states increase their reliance on encounter data, these difficulties could affect the Medicaid premium rates we receive and how Medicaid membership is assigned to us, which could have a material adverse effect on our Medicaid operating results, cash flows and/or our ability to bid for, and continue to participate in, certain Medicaid programs.

Any premium or fee refunds, adjustments or withholding resulting from regulatory audits, whether as a result of RADV, Public Exchange related, recovery audit program or other audits by CMS, the OIG, HHS or otherwise, including audits of our minimum medical loss ratio rebates, methodology and/or reports, could be material and could adversely affect our operating results, financial position and cash flows. For more information see "Regulatory Environment" of MD&A included in Part II, Item 7 of this Annual Report on Form10-K.

If our service providers fail to meet their contractual obligations to us or to comply with applicable laws or regulations, we may be exposed to brand and reputational harm, litigation or regulatory action. This risk is particularly high in our Medicare, Medicaid and dual eligible programs.

We contract with various third parties to perform certain functions and services and provide us with certain information technology systems. Our arrangements with these third parties may expose us to public scrutiny, adversely affect our brand and reputation, expose us to litigation or regulatory action, and otherwise make our operations vulnerable if we fail to adequately monitor and regulate their performance or if they fail to meet their contractual obligations to us or to comply with applicable laws or regulations. For example, certain of our vendors have been responsible for releases of sensitive information of our members and employees, which has caused us to incur additional expenses and given rise to litigation against us.

These risks are particularly high in our Medicare, Medicaid and dual eligible programs, where third parties perform pharmacy benefit management, medical management and other member related services for us. Any failure of our or these third parties' prevention, detection or control systems related to regulatory compliance, compliance with our internal policies, data security and/or cybersecurity or any incident involving the theft, misappropriation, loss or other unauthorized disclosure of, or access to, members', customers' or other constituents' sensitive information could require us to expend significant resources to remediate any damage, interrupt our operations and adversely affect our brand and reputation and also expose us to whistleblower, class action and other litigation, other proceedings, prohibitions on marketing or active or passive enrollment of members, corrective actions, fines, sanctions and/or penalties, any of which could adversely affect our business, cash flows, operating results or financial position. For more information on these matters, see "*Our business activities are highly regulated. Our Medicare, Medicaid, specialty and mail order pharmacy, Public Exchange and certain other products are subject to particularly extensive and complex regulations. If we fail to comply with applicable laws and regulations, we could be subject to significant adverse regulatory actions or suffer brand and reputational harm which may have a material adverse effect on our business. Compliance with existing and future laws, regulations and/or judicial decisions may reduce our profitability and limit our growth*" on page 21.

Programs funded by the U.S. federal government account for a substantial portion of our revenue and operating earnings. A delay by Congress in raising the federal government's debt ceiling could lead to a delay, reduction, suspension or cancellation of federal government spending and a significant increase in interest rates that could, in turn, have a material adverse effect on our businesses, operating results and cash flows.

The federal government's "debt ceiling", or the amount of debt the federal government is permitted to borrow to meet its legal obligations (including, among other things, interest on the national debt, Medicare and Medicaid premiums, Social Security benefits and contributions to the Federal Employees Health Benefits Program), is limited by statute and can only be raised by an act of Congress.

If Congress does not raise the debt ceiling before the federal government's current obligations approach or exceed its cash on hand and incoming receipts, federal government spending may be subject to delay, reduction, suspension or cancellation, including a federal government shutdown, which may be prolonged. A significant portion of our revenues are derived from health care coverage programs that are funded in whole or in part by the federal government, including the Medicare, Medicaid, and dual eligible programs, CHIP and the Federal Employees Health Benefits Program and subsidies for qualified individuals and families purchasing health insurance through Public Exchanges. If federal spending is delayed, suspended or curtailed, we would continue to receive claims from providers providing services to beneficiaries of these programs, and we could be liable for, and be required to fund, such claims. Furthermore, the terms of our disability products often provide that the benefits due to beneficiaries are reduced by the amount of certain federal benefits they receive, most notably Social Security Disability Insurance ("SSDI") payments. If such payments are suspended or reduced due to a failure to timely raise the debt ceiling, our disability payment obligations would be increased accordingly, and such increase could be material. If beneficiaries subsequently receive such payments from the federal government, we would seek reimbursement or attempt to offset a portion of such payments against future disability benefit payments. We may not be successful in recovering the amount sought. A failure to timely raise the debt ceiling could have a material adverse effect on our businesses, operating results, cash flows, brand and reputation and, in the case of a prolonged failure to raise the debt ceiling, our financial position.

If the United States defaults on its obligations due to a failure to timely raise the debt ceiling or otherwise, or its credit rating is downgraded by any of the credit rating agencies, interest rates could rise, financial markets could become volatile and/or the availability of credit (and short-term credit in particular) could be adversely affected, thereby increasing our borrowing costs, negatively impacting the value of our investment portfolio, and/or adversely affecting our ability to access the capital markets, which could have a material adverse effect on our operating results, financial position and cash flows and could adversely affect our liquidity.

Risks Related to Our Business

We may not be able to accurately forecast health care and other benefit costs, which could adversely affect our operating results. We may not able to obtain appropriate pricing on new or renewal business.

Premiums for our insured Health Care Products, which comprised 86% of our total consolidated revenues for 2016, are priced in advance based on our forecasts of health care and other benefit costs during a fixed premium period, which is generally one year. These forecasts are typically developed several months before the fixed premium period begins, are influenced by historical data (and recent historical data in particular), are dependent on our ability to anticipate and detect medical cost trends and changes in our members' behavior and healthcare utilization patterns and require a significant degree of judgment. For example, our revenue on Medicare policies is based on bids submitted in June of the year before the contract year. Cost increases in excess of our projections cannot be recovered in the fixed premium period through higher premiums. As a result, our profits are particularly sensitive to the accuracy of our forecasts and our ability to anticipate and detect medical cost trends. Even relatively small differences between predicted and actual health care and other benefit costs as a percentage of premium revenues can result in significant adverse changes in our operating results.

Our health care and other benefit costs can be affected by external events that we cannot forecast or project and over which we have little or no control, such as emerging changes in the economy and/or public policy, government mandated benefits or other regulatory changes, changes in our members' behavior and healthcare utilization patterns, changes in health care practices, new technologies, increases in the cost of prescription drugs, direct-to-consumer marketing by pharmaceutical companies, clusters of high cost cases, influenza related health care costs (which may be substantial and are currently projected to be approximately the same in 2016-2017 as in 2015-2016), epidemics, pandemics, terrorist attacks or other man-made disasters, natural disasters or other events that materially increase utilization of medical and/or other covered services, as well as changes in provider billing practices. Our health care and other benefit costs also can be affected by changes in our business mix, product designs, contracts with providers, medical management, underwriting, rating and/or claims processing methods and processes, and our medical management initiatives may not deliver the reduction in utilization and/or medical cost trend that we project.

It is particularly difficult to accurately anticipate, detect, forecast, manage and reserve for medical cost trends and utilization of medical and/or other covered services during and following periods when such utilization and/or trends are below recent historical levels, during periods of changing economic conditions and employment levels and for products with substantial membership turnover such as Public Exchange products. For example, in the second and third quarters of 2016, we recorded

premium deficiency reserves totaling $85 million related to anticipated future losses for the 2016 coverage year in our individual Commercial products. Similarly, during calendar year 2014, medical costs in our smaller middle market and individual businesses were higher than we projected, and during the calendar years 2010-2013, medical costs and members' utilization of medical and/or other covered services were lower than we projected and members' utilization was below recent historical levels. We expect utilization to increase in 2017 when compared to 2016.

We have implemented price increases for 2017. If health care and other benefit costs are higher than the levels reflected in our pricing or if we are not able to obtain appropriate pricing on new or renewal business, our prices will not reflect the risk we assume, and our operating results will be adversely affected. If health care and other benefit costs are lower than we predict, our prices may be higher than those of our competitors, which may cause us to lose membership. For more information, see "Critical Accounting Estimates - Health Care Costs Payable" of MD&A included in Part II, Item 7 of this Annual Report on Form10-K.

Competitive and economic pressures may limit our ability to increase pricing to reflect higher costs or may force us to accept lower margins. If customers elect to self-insure, reduce benefits or adversely renegotiate or amend their agreements with us, our revenues and operating results will be negatively affected.

Our customer contracts are generally for a period of one year, and our customers have considerable flexibility in moving between us and our competitors. One of the key factors on which we compete for customers, especially in uncertain economic environments, is overall cost. We are therefore under pressure to contain premium price increases despite being faced with increasing health care and other benefit costs and increasing operating costs. If we are unable to increase our prices to reflect increasing costs, our profitability will be adversely affected. If we are unable to limit our price increases, we may lose members to competitors with more favorable pricing, adversely affecting our revenues and operating results.

In response to rising prices, our customers may elect to self-insure or to reduce benefits in order to limit increases in their benefit costs. Alternatively, our customers may purchase different types of products from us that are less profitable. Such elections may result in reduced membership in our more profitable Insured products and/or lower premiums for our Insured products, which may adversely affect our revenues and operating results, although such elections also may reduce our health care and other benefit costs.

In addition, our Medicare, Medicaid and CHIP products are subject to termination without cause, periodic re-bid, rate adjustment and program redesign, as customers seek to contain their benefit costs, particularly in an adverse and/or uncertain economy. These actions may adversely affect our membership, revenues and operating results.

If we fail to compete effectively in the geographies and product areas in which we operate, including maintaining or increasing membership in our Health Care business, our operating results, financial position and cash flows could be materially and adversely affected.

The health care benefits industry is highly competitive, primarily due to a large number of for-profit and not-for-profit competitors, our competitors' marketing and pricing, and a proliferation of competing products, including new products that are continually being introduced into the marketplace. Our businesses face significant competition in all of the geographies and product areas in which we operate. For example, our largest competitor in our Medicare products is Original Medicare. New entrants into the marketplace, as well as consolidation within the industry, have contributed to and are expected to intensify the competitive environment. In addition, the rapid pace of change as the industry evolves towards a consumer-focused retail marketplace, including Insurance Exchanges, and the increased use of technology to interact with members, providers and customers, increase the risks we currently face from new entrants and disruptive actions by existing competitors compared to prior periods.

In our Health Care business, we compete on the basis of many factors, including perceived overall quality, quality of service, comprehensiveness of coverage, cost (including premium, provider discounts and member out-of-pocket costs), product design, financial stability and ratings, breadth and quality of provider networks, providers available in such networks, and quality of member support and care management programs. Our competitors in our Health Care business include, among others, UnitedHealth Group Incorporated, Anthem, Inc., Humana Inc., Cigna Corporation, WellCare Health Plans, Inc., Centene Corporation, Molina Healthcare, Inc., Kaiser Permanente, health system owned health plans and new entrants into the marketplace, and numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross and Blue Shield Association. Our largest competitor in our Medicare products is Original Medicare. Additional competitors in our businesses include other types of medical and dental provider organizations, various specialty service providers (including pharmacy benefit management services providers), health care consultants, financial services companies, integrated health care delivery organizations (networks of providers who also coordinate administrative services for and assume insurance risk of

their members), third-party administrators, HIT companies and, for certain plans, programs sponsored by the federal or state governments. Emerging competitors include start up health care benefit plans, provider-owned health plans, new joint ventures, technology firms, financial services firms that are distributing competing products on their proprietary Private Exchanges, consulting firms that are distributing competing products on their proprietary Private Exchanges, as well as non-traditional distributors such as retail companies. In particular geographies, competitors may have greater capabilities, resources or membership; a more established reputation; superior supplier or health care professional arrangements; better business relationships; or other factors that give such competitors a competitive advantage. We compete for sales on Insurance Exchanges and are developing and expanding our Consumer Health and Services product line, where we face additional risks from existing and new competitors (including our vendors) who have lower cost structures, greater experience marketing to consumers and/or who target the higher margin portions of our business. Among our international and HIT competitors, many have longer operating histories, better brand recognition and greater market presence in many of the areas in which we are seeking to expand and more experience at rapidly innovating products. If we do not compete effectively in the geographies and product areas in which we operate, our business, operating results, financial position and cash flows could be materially and adversely affected.

A number of factors, many of which are beyond our control, contribute to rising health care and other benefit costs. If we are unable to satisfactorily manage our health care and other benefit costs, our operating results and competitiveness will be adversely affected.

A number of factors contribute to rising health care and other benefit costs, including previously uninsured members entering the health care system, changes in members' behavior and healthcare utilization patterns, turnover in our membership, government mandated benefits or other regulatory changes, changes in the health status of our members, the aging of the population and other changing demographic characteristics, advances in medical technology, increases in the number and cost of prescription drugs (including specialty pharmacy drugs such as new hepatitis C and cholesterol treatments and auto-immune therapies), direct-to-consumer marketing by pharmaceutical companies, the increasing influence of social media on our members' utilization and other behavior, changes in health care practices and inflation. In addition, government-imposed limitations on Medicare and Medicaid reimbursements to health plans and providers, have caused the private sector to bear a greater share of increasing health care and other benefits costs over time, future amendments or repeal or replacement of the ACA that increase the uninsured population may exacerbate this problem. Other factors that affect our health care and other benefit costs include changes as a result of the ACA, changes to the ACA and other changes in the regulatory environment, the evolution toward a consumer driven business model, changes in health care practices, general economic conditions (such as inflation and employment levels), new technologies, clusters of high-cost cases, epidemics or pandemics, health care provider and member fraud, and numerous other factors that are or may be beyond our control.

Our operating results and competitiveness depend in large part on our ability to appropriately manage future health care and other benefit costs through underwriting criteria, product design, provider network configuration, negotiation of favorable provider contracts and medical management programs. Our medical cost management programs may not be successful and may have a smaller impact on health care and benefit costs than we expect. The factors described above may adversely affect our ability to predict and manage health care and other benefit costs, which can adversely affect our competitiveness and operating results.

The U.S. federal government and our other government customers may reduce funding for health care or other programs, cancel or decline to renew contracts with us, or may make changes that adversely affect the number of persons eligible for certain programs, the services provided to enrollees in such programs, our premiums and our administrative and health care and other benefit costs.

Our revenues from government-funded health and other programs, including our Medicare, Medicaid and dual eligible businesses and our government customers in our Commercial business, are dependent on annual funding by the federal government and/or applicable state or local governments. Federal, state and local governments have the right to cancel or not to renew their contracts with us on short notice without cause or if funds are not available. Funding for these programs is dependent on many factors outside our control, including general economic conditions, continuing government efforts to contain health care costs and budgetary constraints at the federal or applicable state or local level and general political issues and priorities.

For example, while the ACA provided substantial federal funding for the expansion of the number of people who qualify to enroll in Medicaid beginning in 2014, that funding is decreasing beginning in 2017, and the future of that funding is uncertain. As a result, in 2017, states are preparing for the adverse impact on their budgets and programs of expected changes to the ACA and other federal programs by seeking to reduce their Medicaid expenditures by raising minimum MLR thresholds, instituting profit caps and/or changing the design of their Medicaid programs. These changes could have a material adverse effect on the

revenues, medical benefit ratio and operating results of our Medicaid contracts and/or our ability to grow our Medicaid membership, revenues and operating results.

Our government customers also determine the eligibility criteria, premium levels and other aspects of Medicare, Medicaid and dual eligible programs that affect the number of persons enrolled in these programs, the services provided to enrollees under the programs, and our administrative and health care and other benefit costs under these programs. In the past, determinations of this type have at times adversely affected our operating results from and willingness to participate in such programs, and they may do so again in the future. For example, effective January 1, 2015, we terminated our Insured Medicaid contract in Delaware because we did not believe the premium level was adequate. If a government customer reduces premium levels or increases premiums by less than the increase in our costs (such as by not allowing us to recover ACA and other applicable fees, taxes and assessments), and we cannot offset the impact of these actions with supplemental premiums and/or changes in benefit plans, then our business and operating results could be adversely affected. In addition, if states allow certain programs to expire, reduce the number of firms with which they contract for Medicaid managed care services or choose to opt out of Medicaid expansion, we could experience reduced Medicaid enrollment or reduced Medicaid enrollment growth, which would adversely affect our business, revenues and operating results.

In addition, the terms of our disability products often provide that the benefits due to beneficiaries are reduced by the amount of certain federal benefits they receive, most notably SSDI payments. If such payments are suspended or reduced for any reason, including due to funding shortfalls for the SSDI program, our disability payment obligations would be increased accordingly, and such increase could be material.

Unanticipated increases in our Public Exchange and other individual Commercial product and our ACA compliant small group Commercial product health care benefit costs adversely affected our 2016 operating results and could adversely affect our operating results in 2017 and future years. Our individual Commercial products, including our Public Exchange products, were not profitable in 2016. There can be no assurance that our pricing or other actions will improve the profitability of our individual Commercial products, including our Public Exchange products, or our ACA compliant small group Commercial products in 2017. There can be no assurance that the future health care benefit costs of our individual Commercial products will not exceed our projections.

Unanticipated increases in our Public Exchange and other individual Commercial product and our ACA compliant small group Commercial product health care benefit costs adversely affected our 2016 operating results and could adversely affect our operating results in 2017 and future years. Our individual Commercial products, including our Public Exchange products, were not profitable in 2014, 2015 or 2016 due to higher than projected health care benefit costs. In 2016, we reported pretax losses of $450 million in our individual Commercial products. We project a reduced level of losses in those products in 2017.

We have set 2017 premium rates for our individual Commercial products, including our Public Exchange products, and our ACA compliant small group Commercial products based on our projections, including as to the health status and quantity of individual and small group Commercial product membership and utilization of medical and/or other covered services by individual and small group Commercial product members. The ACA's risk management programs will provide us with less protection in 2017 than 2016. The 2017 marketplace for individual Commercial products also may be less stable than in 2016 because, among other things, other health plans have changed or stopped offering their Public Exchange products in the states we are serving in 2017, which, among other things, increases our adverse selection risk. There can be no assurance that our pricing or other actions will improve the profitability of our individual Commercial products, including our Public Exchange products, or our ACA compliant small group Commercial products in 2017 or any future year.

The premium rates for our individual Commercial and ACA compliant small group Commercial products are set in advance and fixed for one-year periods. As a result, health care benefit costs in excess of the projections reflected in our pricing for those products cannot be recovered in the fixed premium period through higher premiums. The profitability of individual Commercial and ACA compliant small group Commercial products is particularly sensitive to the accuracy of our forecasts of health care benefit costs. Those forecasts were made several months before the fixed premium period began, require a significant degree of judgment and are dependent on our ability to detect medical cost trends as well as the accuracy of our projections used in setting our individual Commercial and ACA compliant small group Commercial product premium rates.

There can be no assurance regarding the accuracy of the health care benefit cost, membership or other projections reflected in our individual Commercial and ACA compliant small group Commercial product pricing. The risks related to the accuracy of projections reflected in our pricing are magnified by adverse selection among individuals who require or utilize more expensive medical and/or other covered services (such as those who purchase coverage during special election periods), other plans' withdrawals from participation in the Insurance Exchanges we serve and legislation, regulations, enforcement activity and/or judicial decisions that cause Insurance Exchanges or Insurance Exchange products to operate in a manner different than what

we projected in setting our Insurance Exchange product premium rates, such as ongoing initiatives in several states to require insurers to allow members to pay insurers less for certain high cost drugs than the amounts assumed in pricing of their Public Exchange products or situations where ACA co-op insolvencies have required and may in the future require us to take on Public Exchange membership that we did not anticipate or price for. In addition, the limited payments under the ACA's risk corridor program for the 2014 and 2015 program years created additional instability in the marketplace for individual Commercial products in 2016 and going forward by contributing to decisions by health plans to change or stop offering their Public Exchange products. 2016 was the last year for the ACA's rick corridor program. On-going uncertainty regarding the funding of ACA-related programs and subsidies can be expected to create additional instability in the marketplace. For additional information on certain of the medical cost trend, pricing and economic conditions risks associated with our Insurance Exchange and other Health Care products, see "*We may not be able to accurately forecast health care and other benefit costs, which could adversely affect our operating results. We may not able to obtain appropriate pricing on new or renewal business*" on page 27; and "*We may not be able to obtain adequate premium rate increases, which would have an adverse effect on our revenues, medical benefit ratios and operating results and could magnify the adverse impact of increases in health care and other benefit costs and of ACA assessments, fees and taxes*" on page 19.

The reserves we hold for expected claims are based on estimates that involve an extensive degree of judgment and are inherently variable. Any reserve, including a premium deficiency reserve, may be insufficient. If actual claims exceed our estimates, our operating results could be materially adversely affected, and our ability to take timely corrective actions to limit future costs may be limited.

A large portion of health care claims are not submitted to us until after the end of the quarter in which services are rendered by providers to our members. Our reported health care costs payable for any particular period reflect our estimates of the ultimate cost of such claims as well as claims that have been reported to us but not yet paid. We also must estimate the amount of rebates payable under the ACA's, CMS's and OPM's minimum MLR rules and the amounts payable by us to, and receivable by us from, the U.S. federal government under the ACA's premium stabilization programs.

Our estimates of health care costs payable are based on a number of factors, including those derived from historical claim experience, but this estimation process also makes use of extensive judgment. Considerable variability is inherent in such estimates, and the accuracy of the estimates is highly sensitive to changes in medical claims submission and processing patterns and/or procedures, turnover and other changes in membership, changes in product mix, changes in the utilization of medical and/or other covered services, changes in medical cost trends, changes in our medical management practices and the introduction of new benefits and products. We estimate health care costs payable periodically, and any resulting adjustments, including premium deficiency reserves, are reflected in current-period operating results within health care costs. For example, in the second and third quarters of 2016, we recorded premium deficiency reserves totaling $85 million related to anticipated future losses for the 2016 coverage year in our individual Commercial products. A worsening (or improvement) of health care cost trend rates or changes in claim payment patterns from those that we assumed in estimating health care costs payable at December 31, 2016 would cause these estimates to change in the near term, and such a change could be material.

Furthermore, if we are not able to accurately and promptly anticipate and detect medical cost trends or accurately estimate the cost of incurred but not yet reported claims or reported claims that have not been paid, our ability to take timely corrective actions to limit future costs and reflect our current benefit cost experience in our pricing process may be limited, which would further exacerbate the extent of any negative impact on our operating results. These risks are particularly acute during and following periods when utilization of medical and/or other covered services and/or medical cost trends are below recent historical levels and in products where there is significant turnover in our membership each year, such as Public Exchanges, and such risks are further magnified by the ACA and other legislation and regulations that limit our ability to price for our projected and/or experienced increases in utilization and/or medical cost trends.

Refer to "Critical Accounting Estimates - Health Care Costs Payable" of MD&A included in Part II, Item 7 of this Annual Report on Form10-K for more information.

Our medical membership remains concentrated in certain geographic areas and industries, exposing us to unfavorable changes in local benefit costs, reimbursement rates, competition and economic conditions.

Our medical membership remains concentrated in certain geographic areas in the United States and in certain industries. Unfavorable changes in health care or other benefit costs or reimbursement rates or increased competition in those geographic areas where our membership is concentrated could therefore have a disproportionately adverse effect on our operating results. Our membership has been and may continue to be affected by workforce reductions by our customers due to adverse and/or uncertain general economic conditions, especially in the U.S. geographies and industries where our membership is concentrated. As a result, we may not be able to profitably grow and diversify our membership geographically, by product type

or by customer industry, and our revenue and operating results may be disproportionately affected by adverse changes affecting our customers.

A change in our health care product mix may impact our profit margins.

Our health care products that involve greater potential risk generally tend to be more profitable than administrative services contract products. Individuals and small employer groups are more likely to purchase our higher-risk health care products because such purchasers are generally unable or unwilling to bear greater liability for health care expenditures. Typically, government-sponsored programs also involve our higher-risk health care products and have lower profit margins than our Insured Commercial products, and our membership is projected to continue to shift towards higher revenue, higher MBR Government products in 2017. In 2014, 2015 and 2016, our individual Commercial products, including those sold on the Public Exchanges, were not profitable. In 2016, we reported pretax losses of $450 million in our individual Commercial products. We project a reduced level of losses in those products in 2017. A shift of enrollees from more profitable products to less profitable products could have a material adverse effect on our operating results.

Bids for Government business in our Health Care segment are increasingly subject to challenge, which may adversely affect contracts initially awarded to us and may result in increased costs.

We continue to increase our focus on the government customers in our Health Care segment as part of our business growth and diversification strategy. We are seeking to substantially grow our Medicare, Medicaid and dual eligibles business over the next several years. In many instances, to acquire and retain our government customers' business, we must bid against our competitors in a highly competitive environment. Winning bids often are challenged successfully by unsuccessful bidders. For example, as of January 2017, certain of our winning Medicaid bids are being protested, and during 2016 we were not successful in retaining certain Medicaid contracts. As a result, we are seeking to improve our process for responding to Medicaid requests for proposal. Our ability to maintain and grow membership, revenues and operating results in our Medicaid products is dependent on our remaining competitive on price, performance and preparing successful bids. In cases where our bid is successful, we incur defense costs and may incur unreimbursed implementation and other costs to meet contractual deadlines even if we ultimately lose the challenge.

Extreme events, or the threat of extreme events, could materially increase our health care (including behavioral health), life insurance and disability costs and impact our business continuity. We cannot predict whether or when any such events will occur.

Nuclear, biological or other attacks, whether as a result of war or terrorism, other man-made disasters, natural disasters, epidemics, pandemics and other extreme events can affect the U.S. economy in general, our industry and us specifically. In particular, such extreme events or the threat of such extreme events could result in significant health care (including behavioral health), life insurance and disability costs, which would also be affected by the government's actions and the responsiveness of public health agencies and other insurers. In addition, our life insurance members and our employees and those of our vendors are concentrated in certain large, metropolitan areas which may be particularly exposed to these events. Such events could adversely affect our business, cash flows, and operating results, and, in the event of extreme circumstances, our financial position or viability.

Our business could also be adversely affected if we do not maintain adequate procedures for crisis management, disaster recovery and business continuity during and after such events. Other than obtaining insurance coverage for our facilities and limited reinsurance of our Health Care and/or Group Insurance liabilities, there are few, if any, commercial options through which to transfer the exposure from terrorism or other extreme events away from us.

Risks Related to Our Operations

Unless we are able to develop alternative sources of revenue and earnings and achieve transformational change in our business model, our ability to profitably grow our business could be adversely affected.

We operate in a highly competitive environment and in an industry that is subject to significant ongoing changes from marketplace pressures brought about by public policy forces, the ACA, changes to or repeal or replacement of the ACA, Insurance Exchanges, customer demands, demographic shifts, new and expanding health care capabilities, business consolidations, strategic alliances, new market entrants, legislative and regulatory changes and marketing practices. As a result of these and other factors, our ability to grow profitably through the sale of traditional Insured health care and related benefits products in the United States may be limited. In order to profitably grow our business in the future, we need to diversify the sources of our revenue and earnings and transform our business model, including through developing and expanding our

Consumer Health and Services product line, making investments in consumer engagement capabilities and our Consumer Health and Services' technology and other services for health systems and provider organizations (including joint ventures, ACOs and collaborative provider networks), optimizing our business platforms and expanding internationally.

Achieving these goals will require us to devote significant senior management and other resources to acquisitions or other transactions and to develop internally or acquire new products, solutions and technology before any significant revenues or earnings are generated from such initiatives. If we are not able to acquire and/or develop and launch new products and solutions, our ability to profitably grow our business could be adversely affected.

We and our vendors have experienced cyber attacks. We can provide no assurance that we or our vendors will be able to detect, prevent or contain the effects of such attacks or other information security (including cybersecurity) risks or threats in the future.

We and our vendors have experienced a variety of cyber attacks, and we and our vendors expect to continue to experience cyber attacks going forward. Among other things, we have experienced automated attempts to gain access to our public facing networks, brute force, SYN flood and distributed denial of service attacks, attempted virus infections, ransomware attacks, spear-phishing campaigns, mass reconnaissance attempts, malware or injection attempts, phishing, PHP injection and cross-site scripting. We also have seen an increase in attacks designed to obtain access to consumers' accounts using illegally obtained demographic information. Although the impact of such attacks has not been material to our operations or operating results through December 31, 2016, we can provide no assurance that we or our vendors will be able to detect, prevent or contain the effects of such attacks or other information security (including cybersecurity) risks or threats in the future. As we expand our Consumer Health and Services product line, including through our growth of ACS, Medicity, and ActiveHealth, increase the amount and types of data we acquire, generate and use, increase the amount of information we make available to members, consumers and providers on mobile devices, expand our use of vendors, expand internationally and expand our use of social media, our exposure to these data security and related cybersecurity risks, including the risk of undetected attacks, damage, loss or unauthorized disclosure or access to and/or disruption of our systems and the customer, member, provider, employee, ACO, joint venture, vendor and other third party information they contain, increases, and the cost of attempting to protect against these risks also increases.

The costs of attempting to protect against the foregoing risks and the costs of responding to a cyber-incident are significant. Following a cyber-incident, our and/or our vendors' remediation efforts may not be successful, and a cyber-incident could result in interruptions, delays or cessation of service, and loss of existing or potential customers. In addition, breaches of our and/or our vendors' security measures and the unauthorized dissemination of sensitive personal information or proprietary information or confidential information about us, our customers or other third-parties, could expose our customers' private information and our customers to the risk of financial or medical identity theft, or expose us or other third parties to a risk of loss or misuse of this information, and result in investigations, regulatory enforcement actions, material fines and penalties, loss of customers, litigation or other actions which could have a material adverse effect on our business, brand, reputation, cash flows and operating results.

We may not be able to effectively manage our general and administrative expenses to competitive levels, which may reduce our membership or profitability, or we may need to implement expense reduction measures that adversely affect our future growth potential.

Our operating results depend in part on our ability to manage our general and administrative expenses to competitive levels while delivering improved customer, member and provider service, expanding our marketplace presence and accomplishing our strategic initiatives, including developing, operating and expanding our Consumer Health and Services product line. Controlling general and administrative expenses is particularly important in our Health Care businesses that are subject to regulatory changes that may restrict our underwriting margins (calculated as premiums less health care costs), such as minimum MLR requirements. We have significant fixed costs, and our ability to reduce variable costs in the short term is limited. We attempt to manage general and administrative expenses by, among other things, making our processes more efficient, reducing the number of products we offer and controlling costs for salaries and related benefits, information technology and other general and administrative costs. However, we may not be successful in achieving the intended benefits of the cost-cutting and process improvement initiatives we undertake. In addition, our cost-cutting measures may adversely affect our ability to implement the ACA, changes to the ACA and other regulatory requirements, attract and retain key employees, maintain robust management practices and controls (including internal controls over financial reporting), implement improvements in technology and achieve our strategic goals, including profitable membership growth. Given the foregoing, we can provide no assurance that we will be able to manage our general and administrative expenses to competitive levels, which may reduce our membership, profitability and operating results and adversely affect our business and future growth potential.

Our business success and operating results depend in part on effective information technology systems and on continuing to develop and implement improvements in technology.

We have many different information and other technology systems supporting our businesses (including as a result of our acquisitions). Our businesses depend in large part on these systems to adequately price our products and services; accurately establish reserves, process claims and report operating results; and interact with providers, employer plan sponsors, members and vendors, including our PBM services suppliers, in an efficient and uninterrupted fashion. In addition, recent trends toward greater consumer engagement in health care require new and enhanced technologies, including more sophisticated applications for mobile devices. Certain of our technology systems (including software) are older, legacy systems that are less flexible, less efficient and require a significant ongoing commitment of capital and human resources to maintain, protect and enhance them and to integrate them with our other systems. We must re-engineer and reduce the number of these systems to meet changing consumer and vendor preferences and needs, improve our productivity and reduce our operating expenses. We also need to develop or acquire new technology systems, contract with new vendors or modify certain of our existing systems to support the Consumer Health and Services products we are developing and seeking to expand and/or to meet current and developing industry and regulatory standards, including with regard to minimum MLR rebates, Insurance Exchanges, and various aspects of the ACA, and to keep pace with continuing changes in information processing technology and emerging cybersecurity risks and threats. If we fail to achieve these objectives, our ability to profitably grow our business and/or our operating results may be adversely affected.

Our business strategy involves providing customers with differentiated, easy to use, secure products and solutions that use information to meet customer needs. The types of technology and levels of service that are acceptable to customers and members today will not necessarily be acceptable in the future, requiring us to anticipate and meet marketplace demands for technology. Our success therefore is dependent in large part on our ability, within the context of a limited budget of human resources and capital and our existing and future business relationships, to timely secure, integrate, develop, redesign and enhance our (or contract with vendors to provide) technology systems that support our business strategy initiatives and processes in a compliant, secure, and cost and resource efficient manner. Integration of our acquisitions increases these challenges, and we may not be successful in integrating various systems in a timely or cost-effective manner.

Information technology projects are long-term in nature and may take longer to complete and cost more than we expect and may not deliver the benefits we project once they are complete. If we do not effectively and efficiently secure, manage, integrate and enhance our technology portfolio (including vendor sourced systems), we could, among other things, have problems determining health care cost and other benefit cost estimates and/or establishing appropriate pricing, meeting the needs of providers, employer plan sponsors and members, developing and expanding our Consumer Health and Services product line or keeping pace with industry and regulatory standards, and our operating results may be adversely affected.

In order to remain competitive, we must further integrate our businesses, processes and systems. Pursuing multiple initiatives simultaneously could make this integration significantly more challenging.

Many of our businesses, processes and systems, both those we have acquired or will acquire, and those we have developed or are developing, are not integrated, are complex or require disproportionate resources in order to work together effectively. Businesses, processes and systems that are excessively complex or are not effectively integrated may adversely affect our ability to compete by, among other things, increasing our costs relative to competitors, reducing our flexibility and limiting our ability to react quickly to marketplace opportunities or changing circumstances. Accordingly, we must effectively and efficiently simplify and integrate these businesses, processes and systems to meet changing consumer and vendor needs and improve our productivity. This task is significantly more difficult when we pursue multiple transactions or other initiatives, such as significant acquisitions, strategic alliances, joint ventures and multi-year strategic projects (including developing, operating and seeking to expand our Consumer Health and Services product line and implementing new provider support programs), simultaneously. Our existing business partnership relationships and a limited budget of human resources and capital present further challenges.

If we are unable to successfully simplify and integrate our businesses, processes and systems, including those from acquisitions, to realize anticipated economic and other benefits in a timely manner, it could result in substantial costs or delays and adversely affect our business, operations and operating results.

Sales of our products and services are dependent on our ability to attract and motivate internal sales personnel and independent third-party brokers, consultants and agents. New distribution channels create new disintermediation risk. We may be subject to penalties or other regulatory actions as a result of the marketing practices of brokers and agents selling our products.

Our products are sold primarily through our sales personnel, who frequently work with independent brokers, consultants and agents who assist in the production and servicing of business. The independent brokers, consultants and agents generally are not dedicated to us exclusively and may frequently recommend and/or market health care benefits products of our competitors. Accordingly, we must compete intensely for their services and allegiance. Our sales could be adversely affected if we are unable to attract, retain or motivate sales personnel and third-party brokers, consultants and agents, or if we do not adequately provide support, training and education to this sales network regarding our complex product portfolio, or if our sales strategy is not appropriately aligned across distribution channels. This risk is heightened as we develop and seek to expand our Consumer Health and Services product line and our business model evolves to include a greater focus on consumers and direct-to-consumer sales, such as competing for sales on Insurance Exchanges.

New distribution channels for our products and services continue to emerge, including Private Exchanges operated by health care consultants and technology companies. These channels may make it more difficult for us to directly engage consumers and other customers in the selection and management of their health care benefits, in health care utilization and in the effective navigation of the health care system. We also may be challenged by new technologies and marketplace entrants that could interfere with our existing relationships with health plan members in these areas.

In addition, there have been a number of investigations regarding the marketing practices of brokers and agents selling health care and other insurance products and the payments they receive. These investigations have resulted in enforcement actions against companies in our industry and brokers and agents marketing and selling those companies' products. For example, CMS and state departments of insurance have increased their scrutiny of the marketing practices of brokers and agents who market Medicare products. These investigations and enforcement actions could result in penalties and the imposition of corrective action plans and/or changes to industry practices, which could adversely affect our ability to market our products.

We face a wide range of risks, and our success depends on our ability to identify, prioritize and appropriately manage our enterprise risk exposures.

As a large company operating in a complex industry and in many countries, we encounter a variety of risks. The risks we face include, among other matters, the range of industry, competitive, regulatory, financial, operational or external risks identified in this "Risk Factors" discussion. We continue to devote resources to further develop and integrate our enterprise-wide risk management processes. Failure to identify, prioritize and appropriately manage or mitigate these risks, including risk concentrations across different business lines, products (e.g., Insured vs. ASC), industries, customers and geographies, can adversely affect our operating results, our ability to retain or grow business, or, in the event of extreme circumstances, our financial position or business operations.

We also face other risks that could adversely affect our business, operating results or financial position, which include:

- Health care benefits fraud by providers and members that is not prevented or detected and impacts our medical cost trends or the medical expenses of our self-insured customers. In addition, in an adverse and/or uncertain economic environment, whether in the United States or abroad, our businesses may see increased fraudulent claims volume, which may lead to additional costs because of an increase in disputed claims and litigation;
- Assessments under guaranty fund laws for obligations of insolvent insurance companies (including Penn Treaty Network America Insurance Company and one of its subsidiaries as described in Note 17 "Commitments and Contingencies - Guaranty Fund Assessments, Market Stabilization and Other Non-Voluntary Risk Sharing Pools" included in Part II, Item 8 of this Annual Report on Form 10-K), HMOs, ACA co‑ops and other payors to policyholders and claimants;
- Failure of our corporate governance policies or procedures, for example significant financial decisions being made at an inappropriate level in our organization;
- Inappropriate application of accounting principles or a significant failure of internal control over financial reporting, which could lead to a restatement of our operating results and/or a deterioration in the soundness and accuracy of our reported operating results;
- Financial loss from inadequate insurance coverage due to self-insurance levels or unavailability of insurance and reinsurance coverage for credit or other reasons;
- Failure to protect our proprietary information, including as a result of cyber-attacks on us, one or more providers and/or one or more of our vendors; and
- Failure to adequately manage our run-off businesses and/or our financial exposure to businesses we have sold.

Risks Related to Customer Perceptions of our Products and Services

In order to be competitive in the growing marketplace for direct-to-consumer sales and on public and private health insurance exchanges, we will need to develop our Consumer Health and Services products and make investments in consumer engagement, reduce our cost structure and face new competitors. If we are unsuccessful, our future growth and profitability may be adversely affected.

Historically, employers have been our most significant customers. Our direct-to-consumer sales have been limited, and our individual Health Care business has been small relative to the other businesses in our Health Care segment. We are developing and seeking to expand our Consumer Health and Services product line, and we are now competing for sales on Insurance Exchanges. To develop and expand our Consumer Health and Services product line and compete effectively on Insurance Exchanges, we will be required to develop or acquire the technology systems and tools and talent necessary to interact with Insurance Exchanges and engage individual consumers using Insurance Exchanges and social media, increase our focus on individual consumers and expand and improve our consumer-focused sales and marketing channels, customer interfaces, customer service and product offerings.

We also will have to respond to pricing and other actions taken by existing competitors and regulators as well as potentially disruptive new entrants which could reduce our profit margins. Due to the price transparency provided by Insurance Exchanges, when we market our individual and small group health insurance products we face competitive pressures from existing and new competitors (including our vendors) who have lower cost structures. Our competitors may bring their Insurance Exchange and other consumer products to market more quickly, have greater experience marketing to consumers and/or may be targeting the higher margin portions of our business. These risks may be enhanced if employers shift to defined contribution health care benefits plans and make greater utilization of Private Exchanges or encourage their employees to purchase health insurance on the Public Exchanges. We can provide no assurance that we will be able to develop or operate successful or profitable Consumer Health and Services products or compete successfully or profitably on Public Exchanges or Private Exchanges or that we will be able to benefit from any opportunities presented by Public Exchanges or Private Exchanges. If we do not develop and expand competitive and profitable Consumer Health and Services products, are not competitive on Insurance Exchanges or are unsuccessful in reducing our cost structure, our future growth and profitability may be adversely affected.

We may not be able to compete effectively in the HIT business and earn a profit. Our HIT business increases our risk of patent infringement and other intellectual property litigation and may become subject to significant regulation in the future.

With our current focus on consumer engagement, joint ventures, ACOs, collaborative provider networks and optimizing our business platforms and our 2014 acquisition of bswift, we have increased our commitment to HIT products and solutions, a business that is rapidly changing and highly competitive. There is no assurance that we will be able to successfully adapt to changes to the HIT marketplace, or compete effectively and earn a profit in our HIT business. Our technology products and solutions may not operate as intended. Moreover, we may not have identified and mitigated, or be able to identify and mitigate, the significant risks of pursuing the HIT business, including the risk that we will be unable to protect our proprietary rights and the risks of patent infringement and other intellectual property litigation against us. Certain of our HIT products and/or solutions are subject to patent litigation, which is often associated with significant litigations costs, damages and/or injunctions.

In addition, although the HIT industry is not currently subject to significant regulation, we face an uncertain and rapidly evolving federal, state and international legislative and regulatory framework, and certain of our HIT products and/or solutions could become subject to regulation. New legislation and/or regulations may make it difficult to achieve and maintain compliance and could adversely affect both our ability to compete in the HIT business and the operating results of our HIT business.

If we fail to develop new products, differentiate our products from those of our competitors or demonstrate the value of our products to our customers and members, our ability to retain or grow profitable membership may be adversely affected.

We operate in a rapidly evolving industry. Our customers generally, and our larger customers in particular, are well-informed and organized and, along with our individual customers, can easily move between us and our competitors. These factors require us to differentiate our products and solutions, anticipate changes in customer and consumer preferences, anticipate and effectively compete with the products and solutions of new and existing competitors and innovate and deliver new and existing products and solutions that demonstrate value to our customers and members, particularly in response to marketplace changes from public policy. Differentiating our Insurance Exchange products is particularly challenging due to the standardization (for

example, network adequacy and standardization of benefits requirements) of these products. Any failure to do so may adversely affect our ability to retain or grow profitable membership, which can adversely affect our operating results.

If we or our vendors fail to provide our customers with quality service that meets their expectations, our ability to retain and grow our membership will be adversely affected.

Our ability to attract and retain membership is dependent upon providing cost effective, quality customer service operations (such as call center operations, claim processing, outsourced PBM functions, mail order pharmacy prescription delivery, specialty pharmacy prescription delivery, customer case installation and on-line access and tools) that meet or exceed our customers' and members' expectations. As we seek to reduce general and administrative expenses, we must balance the potential impact of cost-saving measures on our customer and other service and performance. If we misjudge the effects of such measures, customer and other service may be adversely affected. We depend on third parties for certain of our customer service, PBM and prescription delivery operations. For example, CaremarkPCS Health, L.L.C. (and its predecessors, collectively, "CVS") and Express Scripts provide us with certain PBM services. If we or our vendors fail to provide service that meets our customers' and members' expectations, we may have difficulty retaining or growing profitable membership, which can adversely affect our operating results. For example, noncompliance with any privacy or security laws or regulations or any security breach involving one of our third party vendors could have a material adverse effect on our businesses, operating results, brand and reputation.

Our competitive position and ability to differentiate our products will be adversely affected if we cannot demonstrate that our products and processes result in our members receiving quality affordable care.

One of the key factors on which we compete for customers is the degree to which our products and processes (including our disease management and patient safety programs and our provider credentialing and other quality of care and information management initiatives) result in our members receiving quality affordable care from providers, our vendors (including our PBM services suppliers) and us. If our products and process do not result in our members receiving quality affordable care, or if we are unable to demonstrate that our members receive quality affordable care, then our competitive position and ability to differentiate our product and/or solution offerings from those of our competitors would be adversely affected, which in turn could adversely affect our operating results.

Risks Related to Our Relationships with Providers, Suppliers and Vendors

If we are unable to enter into joint ventures and other collaborative risk-sharing agreements with health care providers on satisfactory terms, it may have an adverse effect on our ability to enhance our provider networks, contain our medical costs, grow our business and/or develop alternative sources of revenue and earnings.

We are seeking to enhance our health care provider networks by entering into joint ventures and other collaborative risk-sharing arrangements with health care providers. Providers' willingness to enter these arrangements with us depends upon, among other things, our ability to provide them with up to date quality of care data to support these value-based contracts. These arrangements are designed to give providers incentives to engage in population health management and optimize delivery of health care to our members. These arrangements also may allow us to expand into new geographies, target new customer groups, increase membership and reduce medical costs and, if we provide technology or other services to the relevant health system or provider organization, may contribute to our revenue and earnings from alternative sources. If such arrangements do not result in the lower medical costs that we project or if we fail to attract health care providers to such arrangements, or are less successful at implementing such arrangements than our competitors, our medical costs may not be competitive and may be higher than we project, our attractiveness to customers may be reduced, we may lose or be unable to grow membership, and our ability to profitably grow our business and/or our operating results may be adversely affected.

While we believe joint ventures, ACOs and other non-traditional health care provider organizational structures present opportunities for us, the implementation of our ACS and ACO strategies may not achieve the intended results, which could adversely affect our operating results and cash flows. Among other things, joint ventures require us to maintain collaborative relationships with our counterparties, continue to gain access to provider rates that make the joint ventures economically sustainable and devote significant management time to the operation and management of the joint venture. We may not be able to achieve these objectives in one or more of our joint ventures, which could adversely affect our operating results and cash flows.

Continuing consolidation and integration among providers and other suppliers may increase our medical and other covered benefits costs, make it difficult for us to compete in certain geographies and create new competitors.

Hospitals and other provider and health systems continue to consolidate across the industry. While this consolidation could increase efficiency and has the potential to improve the delivery of health care services, it also reduces competition and the number of potential contracting parties in certain locations. These health systems are also increasingly forming and considering forming health plans to directly offer health insurance in competition with us, a process that has been accelerated by the ACA. In addition, ACOs (including commercial and Medicaid-only ACOs developed as a result of state Medicaid laws), practice management companies, consolidation among and by integrated health systems and other changes in the organizational structures that physicians, hospitals and other health care providers adopt continues to change the way these providers interact with us and the competitive landscape in which we operate. These changes may increase our medical and other covered benefits costs, may affect the way we price our products and services and estimate our medical and other covered benefits costs and may require us to change our operations, including by withdrawing from certain geographies where we do not have a significant presence or are unable to collaborate or contract with providers on acceptable terms. Each of these changes may adversely affect our business and operating results.

Our operating results may be adversely affected if we are unable to contract with providers on competitive terms and develop and maintain attractive networks with high quality providers.

Our operating results are dependent in part upon our ability simultaneously to contract competitively with and develop and maintain favorable relationships with hospitals, physicians, pharmaceutical benefit management service providers, pharmaceutical manufacturers and other health care benefits providers. Our relationships with providers are affected by the rates we pay them for services rendered to our members (including financial incentives to deliver quality services in a cost-effective manner), by our business practices and processes, by our acquisitions and proposed acquisitions, and by our provider payment and other provider relations practices (including whether we include providers in the various provider network options we make available to our customers). Our relationships with providers are also affected by factors that impact those providers, but are not directly related to us, such as consolidations and strategic relationships among providers and/or among our competitors, changes in Medicare and/or Medicaid reimbursement levels to health care providers (including reductions due to the ATRA, sequestration and/or any repeal or amendment of the ACA), and increasing revenue and other financial pressures on providers, including increases in uncompensated care resulting from the any repeal or amendment of the ACA, ongoing reductions by CMS and state governments (including reductions due to recommendations of the Independent Payment Advisory Board, the ATRA, sequestration and/or any repeal or amendment of the ACA) in amounts payable to providers, particularly hospitals, for services provided to Medicare and Medicaid enrollees.

The breadth and quality of our networks of available providers and our ability to offer different provider network options are important factors when customers consider our products and services. Our customers, particularly our self-insured customers, also consider our hospital and other medical provider discounts when evaluating our products and services. For certain of our businesses, we must maintain provider networks that satisfy applicable access to care and/or network adequacy requirements. Regulators also consider the breadth and nature of our provider networks when assessing whether such networks meet network adequacy requirements which, in some cases, are becoming more stringent. For example, a 2016 CMS regulation established network adequacy requirements that apply to all Medicaid managed care plans. Our contracts with providers generally may be terminated by either party without cause on short notice.

The failure to maintain or to secure new cost-effective health care provider contracts, may result in a loss of or inability to grow membership, higher health care or other benefits costs (which we may not be able to reflect in our pricing due to rate reviews or other factors), health care provider network disruptions, less desirable products for our customers and/or difficulty in meeting regulatory or accreditation requirements, any of which could adversely affect our operating results.

We may experience increased medical and other benefit costs, litigation risk and customer and member dissatisfaction when providers that do not have contracts with us render services to our members.

Some providers that render services to our members do not have contracts with us. In those cases, we do not have a pre-established understanding with these providers as to the amount of compensation that is due to them for services rendered to our members. In some states, the amount of compensation due to these non-participating providers is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances providers may believe that they are underpaid for their services and may either litigate or arbitrate their dispute with us or try to recover the difference between what we have paid them and the amount they charged us from our members, which may result in customer and member dissatisfaction. For example, since 2007, we have been in class litigation with non-participating providers over our payments to them, and during 2009, we settled a matter with the New York Attorney General that caused us to transition to different databases to determine the amount we pay non-participating providers under certain benefit plan designs. Such disputes may cause us to pay higher medical or other benefit costs than we projected.

Certain of these matters are described in more detail in "Litigation and Regulatory Proceedings" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form 10-K.

We could become overly dependent on key service providers, which could expose us to operational risks and cause us to lose core competencies. If their services become unavailable, we may experience service disruptions, reduced service quality and increased costs and may be unable to meet our obligations to our customers.

We contract with various third parties to perform certain functions and services and provide us with certain information technology systems. These third parties include our PBM services suppliers, information technology system providers, independent practice associations, accountable care organizations and call center and claim and billing service providers. Certain of these third parties provide us with significant portions of our requirements, and we could become overly dependent on key vendors, which could cause us to lose core competencies. Certain third parties to whom we delegated selected functions, such as independent practice associations and specialty services providers, have experienced financial difficulties, including bankruptcy. Furthermore, certain legislative authorities have in recent years discussed or proposed legislation that would restrict outsourcing. A termination of our agreements with, or disruption in the performance of, one or more of these service providers could result in service disruption or unavailability, reduced service quality and effectiveness, increased or duplicative costs, an inability to meet our obligations to our customers or require us to seek alternative service providers on less favorable contract terms, any of which can adversely affect our business, brand, reputation and/or operating results. Furthermore, where our arrangements with these service providers are not acceptable to our customers, we must make alternate arrangements, which may be more costly and difficult to implement.

In particular, we have entered into agreements with our PBM services suppliers to provide us and certain of our customers and members with certain PBM services. If our PBM agreement with CVS or our agreements with our other PBM services supplier were to terminate for any reason or one of our PBM services supplier's ability to perform their respective obligations under their agreements with us were impaired, we may not be able to find an alternative supplier in a timely manner or on acceptable financial terms. As a result, our costs may increase, we would not realize the anticipated benefits of our PBM agreement with CVS or our other agreements for PBM services (including projected operating efficiencies), and we may not be able to meet the full demands of our customers, any of which could have a material adverse effect on our business, brand, reputation and/or operating results.

Risks Related to Our Acquisitions and International Operations

We expect to continue to pursue acquisitions and other inorganic growth opportunities, which may be unsuccessful, cause us to assume unanticipated liabilities, disrupt our existing business, be dilutive or lead us to assume significant debt, among other things.

We expect to continue to pursue acquisitions, joint ventures, strategic alliances and other inorganic growth opportunities as part of our growth strategy. In addition to integration risks, some other risks we face with respect to acquisitions and other inorganic growth strategies include:

- We frequently compete with other firms, some of which may have greater financial and other resources and a greater tolerance for risk, to acquire attractive companies;
- The acquired and/or joint venture businesses may not perform as projected;
- The goodwill or other intangible assets established as a result of our acquisitions may be incorrectly valued or may become non-recoverable;
- We may not obtain the projected synergies as we integrate the acquired businesses;
- We may assume unanticipated liabilities, including those that were not disclosed to us or which we underestimated;
- We may experience difficulties in integrating acquired businesses into our existing operations (including our internal control environment), be unable to integrate acquired businesses successfully or as quickly as expected, and be unable to realize anticipated economic, operational and/or other benefits in a timely manner or at all, which could result in substantial costs and delays or other operational, technical or financial problems;
- The acquired businesses, or the pursuit of other inorganic growth strategies, could disrupt or compete with our existing businesses, distract management, result in the loss of key employees, divert resources, result in tax costs or inefficiencies and make it difficult to maintain our current business standards, controls, information technology systems, policies, procedures and performance;

- We may finance future acquisitions and other inorganic growth strategies by issuing common stock for some or all of the purchase price, which would dilute the ownership interests of our shareholders;
- We may incur significant debt in connection with acquisitions (whether to finance acquisitions or by assuming debt from the businesses we acquire);
- We may not have the expertise to manage and profitably grow the businesses we acquire, and we may need to rely on the retention of key personnel and other suppliers of companies we acquire, which may be difficult or impossible to accomplish;
- We may enter into merger or purchase agreements but, due to reasons within or outside our control, fail to complete the related transactions, which could result in termination fees or other penalties that could be material, material disruptions to our business and operations and negatively affect our brand and reputation;
- In order to complete a proposed acquisition, we may be required to divest certain portions of our business;
- We may be involved in litigation related to mergers or acquisitions, including for matters which occurred prior to the applicable closing, which may be costly to defend and may result in adverse rulings against us that could be material; and
- The integration into our businesses of the businesses and entities we acquire may affect the way in which existing laws and regulations apply to us, including subjecting us to laws and regulations that did not previously apply to us.

We expect joint ventures to be a critical part of our business model transformation and inorganic growth strategies. Joint ventures present risks that are different from acquisitions, including selection of appropriate joint venture parties, initial and ongoing governance of the joint venture, growing the joint venture's business in a manner acceptable to all the parties, maintaining positive relationships among the joint venture parties and the customer, and member and business disruption that may occur upon joint venture termination.

As we expand our international operations, we will increasingly face political, legal and compliance, operational, regulatory, economic and other risks that we do not face or are more significant than in our domestic operations. Our exposure to these risks is expected to increase.

As we expand our international operations we will increasingly face political, legal and compliance, operational, regulatory, economic and other risks that we do not face or that are more significant than in our domestic operations. These risks vary widely by country and include varying regional and geopolitical business conditions and demands, government intervention and censorship, discriminatory regulation, nationalization or expropriation of assets and pricing constraints. Our international products need to meet country-specific customer and member preferences as well as country-specific legal requirements, including those related to licensing, privacy, data storage, location, protection and security.

Our international operations increase our exposure to, and require us to devote significant management resources to implement controls and systems to comply with, the privacy and data protection laws of non-U.S. jurisdictions and the anti-bribery, anti-corruption and anti-money laundering laws of the United States (including the FCPA) and the United Kingdom (including the Bribery Act 2010) and similar laws in other jurisdictions. Implementing our compliance policies, internal controls and other systems upon our expansion into new countries and geographies may require the investment of considerable management time and management, financial and other resources over a number of years before any significant revenues or profits are generated. Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or employees, restrictions or outright prohibitions on the conduct of our business, and significant brand and reputational harm. We must regularly reassess the size, capability and location of our global infrastructure and make appropriate changes, and must have effective change management processes and internal controls in place to address changes in our business and operations. Our success depends, in part, on our ability to anticipate these risks and manage these difficulties, and the failure to do so could have a material adverse effect on our business, operating results, financial position, brand, reputation and/or long-term growth.

Our international operations require us to overcome logistical and other challenges based on differing languages, cultures, legal and regulatory schemes and time zones. Our international operations encounter labor laws, customs and employee relationships that can be difficult, less flexible than in our domestic operations and expensive to modify or terminate. In some countries we are required to, or choose to, operate with local business partners, which requires us to manage our partner relationships and may reduce our operational flexibility and ability to quickly respond to business challenges.

In some countries we may be exposed to currency exchange controls or other restrictions that prevent us from transferring funds internationally or converting local currencies into U.S. dollars or other currencies. Fluctuations in foreign currency exchange rates may have an impact on our revenues, operating results and cash flows from our international operations. Some

of our operations are, and are increasingly likely to be, in emerging markets where these risks are heightened. Any measures we may implement to reduce the effect of volatile currencies and other risks on our international operations may not be effective.

Our exposure to all of the above risks is expected to increase as we seek to grow our foreign operations over the next several years.

Financial Risks

We would be adversely affected if we do not effectively deploy our capital. Downgrades or potential downgrades in our credit ratings, should they occur, could adversely affect our brand and reputation, business, cash flows, financial position and operating results.

Our operations generate significant capital, and we have the ability to raise additional capital. The manner in which we deploy our capital, including investments in our businesses, our operations (such as information technology and other strategic and capital projects), dividends, acquisitions, share and/or debt repurchases, reinsurance or other capital uses, impacts our financial strength, claims paying ability and credit ratings issued by recognized rating organizations. Credit ratings issued by nationally-recognized organizations are broadly distributed and generally used throughout our industry. Our ratings reflect each rating organization's opinion of our financial strength, operating performance and ability to meet our debt obligations or obligations to our insureds. We believe our credit ratings and the financial strength and claims paying ability of our principal insurance and HMO subsidiaries are important factors in marketing our products to certain of our customers. In addition, our credit ratings impact the cost and availability of future borrowings, and accordingly our cost of capital.

Each of the ratings organizations reviews our ratings periodically, and there can be no assurance that our current ratings will be maintained in the future. Among other things, our ratings may be affected by the assumption and/or issuance of debt in connection with an acquisition. For example, following the announcement of the Humana Acquisition in July 2015, each of Standard & Poor's, A.M. Best, Fitch and Moody's placed certain of our debt, financial strength and other credit ratings under review for possible downgrade. Following the issuance of the 2016 senior notes, each of Standard & Poor's, A.M. Best and Moody's downgraded certain of our debt, financial strength and other credit ratings by one notch. Downgrades or potential downgrades in our ratings, should they occur, could adversely affect our brand and reputation, business, cash flows, financial position and operating results.

Adverse conditions in the U.S. and global capital markets can significantly and adversely affect the value of our investments in debt and equity securities, mortgage loans, alternative investments and other investments, our operating results and/or our financial position.

The global capital markets, including credit markets, continue to experience volatility and uncertainty. As an insurer, we have a substantial investment portfolio that supports our policy liabilities and surplus and is comprised largely of debt securities of issuers located in the United States. As a result, the income we earn from our investment portfolio is largely driven by the level of interest rates in the United States, and to a lesser extent the international financial markets; and volatility, uncertainty and/or disruptions in the global capital markets, particularly the United States credit markets, and governments' monetary policy, particularly United States monetary policy, can significantly and adversely affect the value of our investment portfolio, our operating results and/or our financial position by:

- Significantly reducing the value and/or liquidity of the debt securities we hold in our investment portfolio and creating realized capital losses that reduce our operating results and/or unrealized capital losses that reduce our shareholders' equity;
- Keeping interest rates low on high-quality short-term or medium-term debt securities (such as we have experienced during recent years) and thereby materially reducing our net investment income and operating results as the proceeds from securities in our investment portfolio that mature or are otherwise disposed of continue to be reinvested in lower yielding securities;
- Reducing the fair values of our investments if interest rates rise;
- Causing non-performance or defaults on their obligations to us by third parties, including customers, issuers of securities in our investment portfolio, mortgage borrowers and/or reinsurance and/or derivatives counterparties;
- Making it more difficult to value certain of our investment securities, for example if trading becomes less frequent, which could lead to significant period-to-period changes in our estimates of the fair values of those securities and cause period-to-period volatility in our net income and shareholders' equity;

- Reducing our ability to issue short-term debt securities at attractive interest rates, thereby increasing our interest expense and decreasing our operating results; and
- Reducing our ability to issue other securities.

Although we seek, within guidelines we deem appropriate, to match the duration of our assets and liabilities and to manage our credit and counterparty exposures, a failure to adequately do so could adversely affect our net income and our financial position and, in extreme circumstances, our cash flows.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal office is a building complex that is approximately 1.7 million square feet in size and is located at 151 Farmington Avenue, Hartford, Connecticut. Our principal office is used by all of our business segments. We also own or lease other space in the greater Hartford area, Bethesda, Maryland, Blue Bell, Pennsylvania, and various field locations in the U.S. and several foreign countries. Such properties are primarily used by our Health Care segment. We believe our properties are adequate and suitable for our business as presently conducted.

Item 3. Legal Proceedings

The Information contained under "Litigation and Regulatory Proceedings" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form10-K is incorporated by reference herein.

Item 4. Mine Safety Disclosures

Not applicable.

Part II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common shares ("common stock") are listed on the New York Stock Exchange, where they trade under the symbol AET. The following table presents high and low sales prices for our common stock for the periods indicated.

	High	Low
2016		
First quarter	**$ 114.19**	**$ 94.31**
Second quarter	**122.72**	**107.90**
Third quarter	**121.04**	**112.81**
Fourth Quarter	**134.90**	**105.20**
2015		
First quarter	$ 109.26	$ 87.60
Second quarter	132.60	106.08
Third quarter	128.90	105.30
Fourth Quarter	115.34	99.89

Holders of our Common Stock

At January 31, 2017, there were 6,467 record holders of our common stock.

Dividends

The quarterly cash dividend declared by Aetna's Board of Directors (our "Board") was $.25 per share in 2016 and 2015. In 2014, the quarterly cash dividend declared was $.225 for the first, second and third quarters and $.25 for the fourth quarter. On February 17, 2017, our Board declared a cash dividend of $.50 per common share that will be paid on April 28, 2017, to shareholders of record at the close of business on April 13, 2017.

Declaration and payment of future dividends is at the discretion of our Board and may be adjusted as business needs or marketplace conditions change. Information regarding restrictions on our present and future ability to pay dividends is included in "Liquidity and Capital Resources" of MD&A included in Part II, Item 7 and Note 13 "Shareholders' Equity" included in Part II, Item 8 of this Annual Report on Form 10-K.

Securities Authorized for Issuance under Equity Compensation Plans

The information required by this Item concerning securities authorized for issuance under our equity compensation plans is incorporated herein by reference to "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" included in Part III, Item 12 in this Annual Report on Form 10-K.

Issuer Purchase of Equity Securities

During the three months ended December 31, 2016, we did not repurchase any shares of common stock. At December 31, 2016, we had remaining authorization to repurchase an aggregate of up to approximately $1.1 billion of common stock under our November 21, 2014 and February 28, 2014 programs. On February 17, 2017, our Board approved a new share repurchase program that authorized us to repurchase up to $4.0 billion of our common stock.

Prior to the termination of the Humana Merger Agreement, our ability to repurchase shares of our common stock was limited.

Refer to Note 13 "Shareholders' Equity" included in Part II, Item 8 of this Annual Report on Form 10-K for information regarding our share repurchases including Board authorizations, shares repurchased during 2016 and our remaining share repurchase authorization as of December 31, 2016.

Corporate Performance Graph

The following graph compares the cumulative total shareholder return on our common stock (assuming reinvestment of dividends) with the cumulative total return on the published Standard & Poor's 500 Stock Index ("S&P 500") and the cumulative total return on the published Standard & Poor's Supercomposite Managed Health Care Index ("S&P MHCI") from December 31, 2011 through December 31, 2016. The graph assumes a $100 investment in shares of our common stock on December 31, 2011.

	December 31,					
	2011	2012	2013	2014	2015	2016
AET	$ 100	$ 112	$ 168	$ 220	$ 270	$ 312
S&P	100	116	154	175	177	198
S&P MHCI [1]	100	106	156	210	255	304

[1] At December 31, 2016, the companies included in the S&P MHCI were: Aetna Inc., Anthem, Inc., Centene Corporation, Cigna Corporation, HealthEquity, Inc., Humana Inc., Magellan Health, Inc., Molina Healthcare, Inc., UnitedHealth Group Incorporated and WellCare Health Plans, Inc.

Shareholder returns over the period shown on the corporate performance graph should not be considered indicative of future shareholder returns.

Item 6. Selected Financial Data

The table below provides selected consolidated financial data of Aetna. The information has been derived from our consolidated financial statements for each of the years in the five year period ended December 31, 2016. You should read this selected consolidated financial data in conjunction with MD&A included in Part II, Item 7 of this Annual Report on Form 10-K and the audited consolidated financial statements and notes as of and for the year ended December 31, 2016 included in Part II, Item 8 of this Annual Report on Form 10-K.

	As of and for the Years Ended December 31,				
(Millions, except per common share data)	**2016**	**2015**	**2014**	**2013** [1]	**2012**[1]
Income Statement Data					
Total revenue	**$ 63,155**	$ 60,337	$ 58,003	$ 47,295	$ 36,600
Net income attributable to Aetna	**2,271**	2,390	2,041	1,914	1,658

(1) We acquired Coventry Health Care, Inc. ("Coventry") in May 2013, which impacts the comparability of operating results for the years ended December 31, 2013 to 2016 to prior periods.

(2) Amounts as of December 31, 2012 to 2015 have been retroactively restated to reflect the reclassification of debt issuance costs from other current and long-term assets to a reduction of long-term debt as a result of the adoption of new accounting guidance during the year ended December 31, 2016.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A")

OVERVIEW

We are one of the nation's leading diversified health care benefits companies, serving an estimated 46.7 million people. We have the information and resources to help our members, in consultation with their health care professionals, make better informed decisions about their health care. We offer a broad range of traditional, voluntary and consumer-directed health insurance products and related services, including medical, pharmacy, dental, behavioral health, group life and disability plans, medical management capabilities, Medicaid health care management services, Medicare Advantage and Medicare Supplement plans, workers' compensation administrative services and health information technology ("HIT") products and services. Our customers include employer groups, individuals, college students, part-time and hourly workers, health plans, health care providers ("providers"), governmental units, government-sponsored plans, labor groups and expatriates. Our operations are conducted in three business segments: Health Care, Group Insurance and Large Case Pensions.

The following MD&A provides a review of our financial condition at December 31, 2016 and December 31, 2015 and operating results for the years ended December 31, 2016, 2015 and 2014. This Overview should be read in conjunction with the entire MD&A, which contains detailed information that is important to understanding our operating results and financial condition, the consolidated financial statements and other data presented in this Annual Report on Form 10-K. This Overview is qualified in its entirety by the full MD&A.

Summarized Results

				Change			
				2016 vs. 2015		2015 vs. 2014	
(Millions, except total medical membership)	**2016**	**2015**	**2014**	**$**	**%**	**$**	**%**
Total revenue	**$ 63,155**	$ 60,337	$ 58,003	$ 2,818	5 %	$ 2,334	4 %
Net income attributable to Aetna	**2,271**	2,390	2,041	(119)	(5)%	349	17 %
Operating earnings [(1)]	**2,917**	2,717	2,405	200	7 %	312	13 %
Total medical membership (in thousands)	**23,110**	23,487	23,548	(377)	(2)%	(61)	— %
Cash flows from operations	**3,719**	3,866	3,373	(147)	(4)%	493	15 %

(1) Operating earnings excludes from net income attributable to Aetna net realized capital gains and losses, amortization of other acquired intangible assets and the other items described in the reconciliation in Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K.

Our discussion of operating results for our reportable business segments is based on operating earnings, which is a non-GAAP measure of net income attributable to Aetna (the term "GAAP" refers to U.S. generally accepted accounting principles). Non-GAAP financial measures we disclose, such as operating earnings, should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with GAAP. Refer to "Segment Results and Use of Non-GAAP Measures in this Document" below in this MD&A for a discussion of non-GAAP measures. Refer to Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K for a reconciliation of net income attributable to Aetna to operating earnings.

Commentary - 2016 compared to 2015

- *Net income attributable to Aetna* decreased $119 million in 2016 compared to 2015 primarily due to an increase in restructuring costs which include a $215 million ($330 million pre-tax) expense recorded during 2016 related to our previously announced voluntary early retirement program, higher transaction and integration-related costs and the favorable impact of litigation-related proceeds recorded during 2015. The decrease was partially offset by the increase in operating earnings described below, net realized capital gains during 2016 compared with net realized capital losses during 2015 and the favorable impact of the 2016 reduction of our reserve for anticipated future losses on discontinued products.
- *Operating earnings* increased $200 million in 2016 compared to 2015, primarily as a result of higher fees and other revenue in our Health Care segment.
- *Total revenue* increased approximately $2.8 billion during 2016 compared to 2015, primarily due to to higher premiums in our Health Care segment.

- *Total medical membership* at December 31, 2016 decreased 377 thousand members compared to December 31, 2015, primarily reflecting declines in our Commercial business, partially offset by growth in our Government business. Refer to "Health Care - Membership" below in this MD&A for further information.

Commentary - 2015 compared to 2014

- *Net income attributable to Aetna* increased $349 million in 2015 compared to 2014 primarily due to the increase in operating earnings described below and the loss on early extinguishment of long-term debt recorded in 2014, partially offset by net realized capital losses in 2015 compared with net realized capital gains in 2014.
- *Operating earnings* increased $312 million in 2015 compared to 2014 primarily as a result of higher underwriting margins (calculated as premiums less health care costs) and higher fees and other revenue in our Health Care segment, partially offset by an increase in general and administrative expenses.
- *Total revenue* increased $2.3 billion in 2015 compared to 2014 primarily due to membership growth in our Government business as well as higher Health Care premium yields, partially offset by membership losses in our group Commercial Insured products.
- *Total medical membership* at December 31, 2015 remained relatively flat compared to December 31, 2014, primarily reflecting declines in our Commercial Insured products substantially offset by growth in our Medicare and Medicaid products. Refer to "Health Care - Membership" below in this MD&A for further information.

During the past three years our cash flows supported both new and ongoing initiatives.
We generated substantial cash flows in the past three years, which we used to support our ordinary course operating activities; increase cash and cash equivalents in preparation for our then proposed acquisition of Humana Inc. (the "Humana Acquisition"); repurchase our common stock; repurchase our long-term debt; and pay shareholder dividends. During 2016, we issued $13 billion of senior notes to partially fund the Humana Acquisition. We did not repurchase any shares of our common stock in 2016. During 2015 and 2014, we repurchased 3 million and 16 million shares of our common stock, respectively, at a cost of $296 million and approximately $1.2 billion, respectively, under share repurchase programs authorized by our Board. Prior to the termination of the Merger Agreement (as defined below), our ability to repurchase shares of our common stock was limited. Refer to Note 13 "Shareholders' Equity" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on share repurchases.

Refer to "Liquidity and Capital Resources" below in this MD&A for additional information on our primary sources and uses of cash flows.

Outlook for 2017
In August 2016, we announced that we would reduce our participation on the individual public health insurance exchanges established pursuant to the ACA ("Public Exchanges") to 242 counties for the 2017 plan year from the 778 counties we served in the 2016 plan year. We have maintained an on-Public Exchange presence for the 2017 plan year in Delaware, Iowa, Nebraska and Virginia. We have modified our off-Public Exchange product options for 2017 in the vast majority of counties where we offered individual Public Exchange products in 2016, which may adversely affect 2017 membership and premium in those counties. Based on our current view of open enrollment, we project first quarter 2017 Individual Commercial products membership will decline from approximately 965 thousand members at December 31, 2016 to approximately 240 thousand members at March 31, 2017.

We see the following opportunities in 2017:

- Projected growth in our Commercial business operating earnings, including a reduced level of losses in our Individual Commercial products;
- Projected continued Medicare top-line growth primarily due to continued strong growth in our Individual Medicare Advantage products; and
- The resumption of share repurchase activity.

In 2017, we also project the following challenges:

- The projected negative impact on operating earnings of known state Medicaid contract losses; and
- Lower projected Group Insurance segment operating earnings.

Refer to "Risk Factors" included in Part I, Item 1A of this Annual Report on Form 10-K for information regarding other important factors that may cause our actual results to differ from those currently projected and/or otherwise materially affect us.

Terminated Acquisition of Humana and Terminated Divestiture to Molina

On July 2, 2015, we entered into a definitive agreement (the "Merger Agreement") to acquire Humana Inc. ("Humana") in a transaction valued at approximately $37 billion, based on the closing price of Aetna common shares on July 2, 2015, including the assumption of Humana debt and Humana cash and cash equivalents.

On July 21, 2016, the U.S. Department of Justice (the "DOJ") and certain state attorneys general filed a civil complaint in the U.S. District Court for the District of Columbia (the "District Court") against us and Humana charging that the Humana Acquisition would violate Section 7 of the Clayton Antitrust Act, and seeking a permanent injunction to prevent Aetna from acquiring Humana. On January 23, 2017, the District Court granted the DOJ's request to enjoin the Humana Acquisition. On February 14, 2017, Aetna and Humana entered into a mutual termination agreement (the "Termination Agreement") pursuant to which the parties thereto (collectively, the "Parties") agreed to terminate the Merger Agreement, including all schedules and exhibits thereto, and all ancillary agreements contemplated thereby, entered pursuant thereto or entered in connection therewith (other than certain confidentiality agreements) (collectively with the Merger Agreement, the "Transaction Documents"), effective immediately as of February 14, 2017 (the "Termination Date"). Under the Termination Agreement, Aetna agreed to pay Humana the Regulatory Termination Fee (as defined in the Merger Agreement) of $1.0 billion in cash in full satisfaction of any amounts required to be paid by Aetna under the Merger Agreement. The Parties also agreed to release each other from any and all liability, claims, rights, actions, causes of action, suits, liens, obligations, accounts, debts, demands, agreements, promises, liabilities, controversies, costs, charges, damages, expenses and fees, however arising, in connection with, arising out of or related to the Transaction Documents, the transactions contemplated therein or thereby or certain related matters. We paid Humana the Regulatory Termination Fee on February 16, 2017 and funded that payment with the proceeds of the 2016 senior notes (as defined below).

In June 2016, we issued $13.0 billion of senior notes to partially fund the Humana Acquisition (collectively, the "2016 senior notes"). In accordance with the terms of the 2016 senior notes, on February 14, 2017, we issued a notice of redemption for $10.2 billion aggregate principal amount of certain of the 2016 senior notes (collectively, the "Special Mandatory Redemption Notes") at a redemption price equal to 101% of the aggregate principal amount of those notes plus accrued and unpaid interest. We will redeem the Special Mandatory Redemption Notes on or about March 16, 2017, and we expect to fund the redemption with the proceeds of the 2016 senior notes. As a result of the redemption of the Special Mandatory Redemption Notes, in the first quarter of 2017, we will recognize on a pretax basis in our net income the entire approximately $420 million unamortized portion of the related cash flow hedge losses, debt issuance costs and debt issuance discounts and the entire approximately $100 million redemption premium paid on the Special Mandatory Redemption Notes upon such redemption.

In order to address the DOJ's perceived competitive concerns regarding Medicare Advantage relating to the Humana Acquisition, on August 2, 2016, we entered into a definitive agreement (the "Aetna APA") to sell for cash to Molina Healthcare, Inc. ("Molina") certain of our Medicare Advantage assets. On February 14, 2017, Aetna and Molina entered into a Termination Agreement (the "APA Termination Agreement") pursuant to which Aetna terminated the Molina APA, including all schedules and exhibits thereto, and all ancillary agreements contemplated thereby or entered pursuant thereto. Under the APA Termination Agreement, Aetna agreed to pay Molina in cash (a) a termination fee of $53 million and (b) approximately 70% of Molina's transaction costs. We paid Molina the termination fee on February 16, 2017 and funded that payment with the proceeds of the 2016 senior notes. We expect to pay Molina the applicable transaction costs during the first quarter of 2017.

Refer to Notes 3 "Acquisitions, Terminated Acquisition and Terminated Divestiture" and 9 "Debt" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on the Humana Acquisition.

Health Care Reform

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (as amended, collectively, the "ACA") has made broad-based changes to the U.S. health care system. On January 20, 2017, the President signed an executive order that gives the regulatory agencies that enforce the ACA the authority to interpret regulations issued under the ACA in a way that limits fiscal burdens on states and financial or regulatory burdens on individuals, providers, health insurers and others. The practical implications of that order are unclear, and the future of the ACA is uncertain. While we anticipate efforts in 2017 and beyond to substantially modify, repeal or replace the ACA, we expect aspects of the ACA to continue to significantly impact our business operations and operating results, including our pricing, our MBRs and the geographies in which our products are available. The ACA has presented us with business opportunities, but also with financial and regulatory challenges. Most of the ACA's key components were phased in during or prior to 2014, including Public Exchanges, required minimum MLRs in Commercial and Medicare products, the individual coverage mandate, guaranteed issue, rating limits in individual and small group products, significant new industry-wide fees, assessments and taxes, enhanced premium rate review and disclosure processes, reduced Medicare Advantage payment rates to insurers, and linking Medicare Advantage payments to a plan's CMS quality performance ratings or "star ratings." The effects of these changes are reflected in our operating results. If the ACA is not amended, repealed or replaced, certain of its components will continue to be phased in until 2020.

During the years ended December 31, 2016, 2015 and 2014, we paid the following fees and contributions required by the ACA:

(Millions)	2016	2015	2014
Current year HIF	$ 837	$ 856	$ 605
Estimated current year ACA reinsurance contribution	114	185	298
Remaining portion of prior year ACA reinsurance contribution	62	60	—

In December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the ACA's health insurer fee (the "HIF").

Ongoing legislative and regulatory changes to the ACA, other pending efforts in the U.S. Congress to amend or restrict funding for various aspects of the ACA (including risk corridors), the results of the 2016 presidential, congressional and state level elections, pending litigation challenging aspects of the law and federal budget negotiations continue to create uncertainty about the ultimate impact of the ACA. Examples of recent legislative and regulatory changes include: the January 20, 2017 executive order relating to the ACA; the November 2016 HHS announcement that risk corridor collections for the 2015 program year will be applied first to amounts owed to plans for the 2014 program year; the May 2016 final regulations relating to the ACA's non-discrimination requirements; the December 2015 suspension of the HIF for 2017 and two year delay of the "Cadillac" tax on high-cost employer-sponsored health coverage; the October 2015 PACE, which leaves groups with 51 to 100 employees within the large group category for each state unless the state exercises its option to include these groups within the small group category; and the October 2015 HHS announcement that the ACA's risk corridor receivables for the 2014 program year would only be funded at 12.6%. With respect to pending litigation, in May 2016, the U.S. District Court for the District of Columbia ruled that the U.S. Department of Health and Human Services does not have the authority to make payments under the ACA's Cost Sharing Subsidy program. Implementation of this decision has been stayed pending appeal.

As described above, the availability of funding for the ACA's temporary risk corridor program is an example of this uncertainty. We continue to believe that receipt of any risk corridor payment from HHS for the 2016 or 2015 program year and receipt of such payments in excess of the announced prorated amount for the 2014 program year are uncertain. At December 31, 2016, we had an immaterial receivable for the remaining 2014 program year prorated amount that had not been collected from HHS and no receivable for either of the 2015 or 2016 program years. In addition, these limited risk corridor payments created additional instability in the marketplace for individual Commercial products in 2016 and going forward by contributing to decisions by health plans to change or stop offering their Public Exchange products. 2016 was the last program year for the ACA's risk corridor program. On-going uncertainty regarding the funding of ACA-related programs and subsidies can be expected to create additional instability in the marketplace.

The federal and state governments also continue to enact and seriously consider many other broad-based legislative and regulatory proposals that have had a material impact on or could materially impact various aspects of the health care and related benefits system. We cannot predict whether pending or future federal or state legislation or court proceedings, including future U.S. Congressional appropriations, will change various aspects of the health care and related benefits system or the ACA or the impact those changes will have on our business operations or operating results, but the effects could be materially adverse.

For additional information on the ACA, refer to "Regulatory Environment" below in this MD&A and Notes 2 "Summary of Significant Accounting Policies" and 8 "The ACA's Reinsurance, Risk Adjustment and Risk Corridor" included in Part II, Item 8 of this Annual Report on Form 10-K. For a discussion of certain factors that may cause our actual results to differ from currently anticipated results in connection with the ACA, refer to "Risk Factors" included in Part I, Item 1A of this Annual Report on Form 10-K.

Medicare Update
On April 5, 2016, CMS issued its final notice detailing final 2017 Medicare Advantage benchmark payment rates (the "Final Notice"). The Final Notice provides for rate cuts to the employer group waiver program that will begin in 2017 and be fully phased in for 2018 as well as adverse changes to the risk adjustment mechanism for dual eligible beneficiaries and the Medicare Advantage star rating program. Overall, we project the benchmark rates in the Final Notice will decrease funding for our Medicare Advantage business by less than 1 percent in 2017 compared to 2016.

The ACA ties a portion of each Medicare Advantage plan's reimbursement to the plan's "star ratings." Since 2015, plans must have a star rating of four or higher (out of five) to qualify for a quality bonus in their basic premium rates. CMS released our 2017 star ratings in October 2016. Our 2017 star ratings will be used to determine which of our Medicare Advantage plans have ratings of four stars or higher and qualify for bonus payments in 2018. Based on our membership at December 31, 2016, 92% of our Medicare Advantage members were in plans with 2017 star ratings of at least 4.0 stars, compared to 85% of our Medicare Advantage members being in plans with 2016 star ratings of at least 4.0 stars based on our membership at December 31, 2015. During 2016, our star ratings resulted in additional revenue of approximately $560 million, inclusive of bonus payments and rebates.

Voluntary Early Retirement Program
In September 2016, we announced a voluntary early retirement program (the "Program"). Under the terms of the Program, eligible employees elected early retirement during the fourth quarter of 2016. In connection with the Program, we recorded an expense of $330 million pretax for the year ended December 31, 2016.

Management Update
Thomas J. Sabatino, Jr., Executive Vice President and General Counsel, joined Aetna in April 2016 and succeeded William J. Casazza who decided to retire and agreed to continue to serve as a strategic advisor to Aetna in connection with the Humana Acquisition until March 2017.

Segment Results and Use of Non-GAAP Measures in this Document
The following discussion of operating results is presented based on our reportable segments in accordance with the accounting guidance for segment reporting and is consistent with our segment disclosure included in Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K. Our operations are conducted in three business segments: Health Care, Group Insurance and Large Case Pensions. Our Corporate Financing segment is not a business segment; it is added to our business segments to reconcile our segment reporting to our consolidated results. The Corporate Financing segment includes interest expense on our outstanding debt and the financing components of our pension and other postretirement employee benefit plans ("OPEB") expense (the service cost and prior service cost components of this expense are allocated to our business segments).

Operating earnings discussed in this Annual Report on Form 10-K exclude from net income attributable to Aetna reported in accordance with GAAP net realized capital gains or losses, amortization of other acquired intangible assets and other items, if any, that neither relate to the ordinary course of our business nor reflect our underlying business performance. Although the excluded items may recur, we believe excluding them from net income attributable to Aetna to arrive at operating earnings provides a more useful comparison of our underlying business performance from period to period. Net realized capital gains and losses arise from various types of transactions, primarily in the course of managing a portfolio of assets that support the payment of liabilities. Amortization of other acquired intangible assets relates to our acquisition activities, including Coventry Health Care, Inc. ("Coventry"), the InterGlobal Group ("InterGlobal") and bswift LLC ("bswift"). These transactions and amortization do not directly relate to the underwriting or servicing of products for our customers and are not directly related to the core performance of our business operations. Operating earnings is the measure reported to our Chief Executive Officer for purposes of assessing financial performance and making operating decisions, such as the allocation of resources among our business segments. In each business segment discussion in this MD&A, we provide a table that reconciles net income attributable to Aetna to operating earnings. Each table details the net realized capital gains or losses, amortization of other acquired intangible assets and any other items excluded from net income attributable to Aetna, and the footnotes to each table describe the nature of each other item and the reason we believe it is appropriate to exclude that item from net income

attributable to Aetna. Non-GAAP financial measures we disclose, such as operating earnings, should not be considered a substitute for, or superior to, financial measures determined or calculated in accordance with GAAP.

HEALTH CARE

Health Care consists of medical, pharmacy benefit management services, dental, behavioral health and vision plans offered on both an Insured basis (where we assume all or a majority of the risk for medical and dental care costs) and an employer-funded basis (where the plan sponsor under an administrative services contract ("ASC") assumes all or a majority of this risk) and emerging businesses products and services that complement and enhance our medical products. We also offer Medicare and Medicaid products and services and other medical products, such as medical management and data analytics services, medical stop loss insurance, workers' compensation administrative services and products that provide access to our provider networks in select geographies. We separately track premiums and health care costs for Government businesses (which represent our combined Medicare and Medicaid products). All other medical, dental and other Health Care products are referred to as Commercial.

Operating Summary

				Change			
				2016 vs. 2015		2015 vs. 2014	
(Millions)	**2016**	**2015**	**2014**	**$**	**%**	**$**	**%**
Premiums:							
Commercial	**$ 27,916**	$ 28,709	$ 28,563	$ (793)	(3)%	$ 146	1 %
Government	**26,200**	22,909	20,999	3,291	14 %	1,910	9 %
Total premiums	**54,116**	51,618	49,562	2,498	5 %	2,056	4 %
Fees and other revenue	**5,744**	5,585	5,115	159	3 %	470	9 %
Net investment income	**458**	408	368	50	12 %	40	11 %
Net realized capital gains (losses)	**52**	(50)	64	102	204 %	(114)	(178)%
Total revenue	**60,370**	57,561	55,109	2,809	5 %	2,452	4 %
Health care costs:							
Commercial	**22,896**	23,057	22,918	(161)	(1)%	139	1 %
Government	**21,359**	18,655	17,829	2,704	14 %	826	5 %
Total health care costs	**44,255**	41,712	40,747	2,543	6 %	965	2 %
Operating expenses:							
Selling expenses	**1,545**	1,490	1,537	55	4 %	(47)	(3)%
General and administrative expenses	**10,099**	9,766	8,801	333	3 %	965	11 %
Total operating expenses	**11,644**	11,256	10,338	388	3 %	918	9 %
Amortization of other acquired intangible assets	**247**	255	242	(8)	(3)%	13	5 %
Total benefits and expenses	**56,146**	53,223	51,327	2,923	5 %	1,896	4 %
Income before income taxes	**4,224**	4,338	3,782	(114)	(3)%	556	15 %
Income tax expense	**1,856**	1,908	1,587	(52)	(3)%	321	20 %
Net income including non-controlling interests	**2,368**	2,430	2,195	(62)	(3)%	235	11 %
Less: Net (loss) income attributable to non-controlling interests	**(15)**	3	2	(18)	(600)%	1	50 %
Net income attributable to Aetna for Health Care	**$ 2,383**	$ 2,427	$ 2,193	$ (44)	(2)%	$ 234	11 %

We calculate our medical benefit ratio ("MBR") by dividing health care costs by health care premiums. Our Commercial, Government and Total Health Care MBRs for the last three years were:

				Change (basis points)	
	2016	**2015**	**2014**	**2016 vs. 2015**	**2015 vs. 2014**
Commercial	**82.0%**	80.3%	80.2%	170	10
Government	**81.5%**	81.4%	84.9%	10	(350)
Total Health Care	**81.8%**	80.8%	82.2%	100	(140)

The table presented below reconciles net income attributable to Aetna to operating earnings [1] for our Health Care segment:

(Millions)	2016	2015	2014
Net income attributable to Aetna for Health Care	**$ 2,383**	$ 2,427	$ 2,193
Transaction and integration-related costs	**230**	208	201
Restructuring costs	**404**	15	—
Release of litigation-related reserve	**—**	—	(103)
Litigation-related proceeds	**—**	(110)	—
Amortization of other acquired intangible assets	**247**	255	242
Net realized capital (gains) losses	**(52)**	50	(64)
Income tax benefit	**(264)**	(133)	(92)
Operating earnings for Health Care	**$ 2,948**	$ 2,712	$ 2,377

[1] Operating earnings excludes net realized capital gains and losses, amortization of other acquired intangible assets and the other items described in the reconciliation in Note 18 “Segment Information” included in Part II, Item 8 of this Annual Report on Form 10-K.

Commentary - 2016 compared to 2015

- *Net income attributable to Aetna for Health Care* decreased $44 million in 2016 compared to 2015, primarily as a result of an increase in restructuring costs and the favorable impact of litigation-related proceeds recorded during 2015, substantially offset by the increase in operating earnings described below and net realized capital gains during 2016 compared with net realized capital losses during 2015.
- *Operating earnings* increased by $236 million in 2016 compared to 2015, primarily as a result of higher underwriting margins in our Government business, higher fees and other revenue primarily due to higher average fee yields, and lower general and administrative expenses. The increase was partially offset by lower underwriting margins in Aetna's Commercial business.
- *Commercial premiums* were $793 million lower in 2016 than 2015, primarily as a result of membership losses in our Commercial Insured products, partially offset by higher premium yields.
- *Our Commercial MBR* increased 170 basis points over the prior year. The increase in our Commercial MBR is primarily due to higher medical costs in our Individual Commercial products and performance in our Middle Market Commercial products.
- *Government premiums* were approximately $3.3 billion higher in 2016 than 2015 primarily due to membership growth in our Government business.
- *Our Government MBR* remained consistent in 2016 compared to 2015 reflecting higher MBRs in our Medicaid products and lower favorable development of prior-year health care cost estimates in 2016, offset by improved performance in our Medicare products.
- *Health Care fees and other revenue* for 2016 increased $159 million compared to 2015 primarily due to higher average fee yields in 2016, partially offset by the favorable impact of $110 million pretax of net litigation-related proceeds recorded in 2015.
- *General and administrative expenses* increased by $333 million during 2016 compared to 2015 primarily due to an increase in restructuring costs, which include a $330 million expense recorded during 2016 related to our previously announced voluntary early retirement program.
- *Our effective tax rate* was 44 percent in both 2016 and 2015.

Commentary - 2015 compared to 2014

- *Net income attributable to Aetna for Health Care* increased by $234 million in 2015 compared to 2014, primarily as a result of the increase in operating earnings described below and the favorable impact of $110 million pretax of net litigation-related proceeds recorded in 2015, partially offset by net realized capital losses in 2015 compared with net realized capital gains in 2014, as well as 2014 net income including the favorable impact of the release of a litigation-related reserve.
- *Operating earnings* increased by $335 million in 2015 compared to 2014, primarily as a result of higher underwriting margins in our Government business and higher fees and other revenue, partially offset by an increase in general and administrative expenses.

- *Commercial premiums* were $146 million higher in 2015 than 2014, primarily as a result of higher premium yields partially offset by membership losses in our group Commercial Insured products and an increase in net ACA risk adjustment payables recorded in 2015.
- *Our Commercial MBR* increased 10 basis points in 2015 compared to 2014 primarily due to performance in our ACA compliant products substantially offset by improved performance in our group Commercial products.
- *Government premiums* were approximately $1.9 billion higher in 2015 compared to 2014 primarily due to membership growth in both our Medicare and Medicaid Insured products.
- Our *Government MBR* improved 350 basis points in 2015 compared with 2014 primarily as a result of actions impacting revenue and medical costs designed to solve for the gap between Medicare premiums and medical costs and other expenses and improved performance in our Medicaid products.
- *Health Care fees and other revenue* for 2015 increased $470 million compared to 2014 primarily as a result of higher average fee yields, the favorable impact of $110 million pretax of net litigation-related proceeds recorded in 2015 and growth in our Commercial ASC membership.
- *General and administrative expenses* increased by $965 million during 2015 compared to 2014 primarily due to higher employee-related costs, increased investment spend to support our growth initiatives and 2014 operating results including the favorable impact of the release a litigation-related reserve. Refer to Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on the release of the litigation-related reserve.
- *Our effective tax rate* was 44 percent in 2015 compared to 42 percent in 2014. The increase in 2015 compared to 2014 primarily reflects a higher 2015 non-tax deductible HIF, partially offset by lower estimated state taxes.

Membership

Health Care's membership at December 31, 2016 and 2015 was:

	2016			2015			Change 2016 vs. 2015		
(Thousands)	**Insured**	**ASC**	**Total**	**Insured**	**ASC**	**Total**	**Insured**	**ASC**	**Total**
Medical:									
Commercial	**5,457**	**13,132**	**18,589**	5,777	13,593	19,370	(320)	(461)	(781)

Medicaid [1]			**2,783**			2,587			196
Total Pharmacy Benefit Management Services			**15,203**			15,153			50

[1] Medicaid membership includes members who are dually-eligible for both Medicare and Medicaid.

Commentary - 2016 compared to 2015

- *Total medical membership* at December 31, 2016 decreased 377 thousand members compared to December 31, 2015, primarily reflecting membership declines in our Commercial business, partially offset by growth in our Government business.
- *Total dental membership* at December 31, 2016 decreased 162 thousand members compared to December 31, 2015 primarily reflecting membership declines in our Insured dental products.

- T*otal pharmacy benefit management services membership* remained relatively flat at December 31, 2016 compared to December 31, 2015 primarily reflecting membership growth in our Government business, substantially offset by membership declines in our Commercial business.

GROUP INSURANCE

Group Insurance primarily includes group life insurance and group disability products. Group life insurance products are offered on an Insured basis. Group disability products are offered to employers on both an Insured and an ASC basis. Group Insurance also includes long-term care products that were offered primarily on an Insured basis. We no longer solicit or accept new long-term care customers.

Operating Summary

				Change			
				2016 vs. 2015		2015 vs. 2014

Income tax expense	**26**	38	57	(12)	(32)%	(19)	(33)%
Net income attributable to Aetna for Group Insurance	**$ 139**	$ 136	$ 180	$ 3	2 %	$ (44)	(24)%

We calculate our group benefit ratio by dividing current and future benefits by total premiums. Our group benefit ratios for the last three years were:

				Change (basis points)	
	2016	**2015**	**2014**	**2016 vs. 2015**	**2015 vs. 2014**
Group benefit ratio	**86.3%**	85.9%	85.2%	40	70

The table presented below reconciles net income attributable to Aetna to operating earnings [1] for our Group Insurance segment:

(Millions)	2016	2015	2014
Net income attributable to Aetna for Group Insurance	**$ 139**	$ 136	$ 180
Amortization of other acquired intangible assets	**—**	—	2
Net realized capital gains	**(24)**	—	(15)
Income tax expense	**9**	—	4
Operating earnings for Group Insurance	**$ 124**	$ 136	$ 171

[1] Operating earnings excludes net realized capital gains and losses, amortization of other acquired intangible assets and the other items described in the reconciliation in Note 18 "Segment Information" included in Part II, Item 8 of this Annual Report on Form 10-K.

Commentary - 2016 compared to 2015

- *Net income attributable to Aetna for Group Insurance* for 2016 remained relatively flat compared to 2015 primarily due to higher net realized capital gains in 2016, substantially offset by the decrease in operating earnings described below.
- *Operating earnings* for 2016 declined by $12 million compared to 2015, primarily due to lower underwriting margins (calculated as premiums less current and future benefits) in our disability products and higher operating expenses, partially offset by improved underwriting margins in our long-term care products.
- *Our group benefit ratio* increased by 40 basis points in 2016 over the prior year, primarily due to lower underwriting margins in our disability products, partially offset by improved underwriting margins in our long-term care products.

Commentary - 2015 compared to 2014

- *Net income attributable to Aetna for Group Insurance* for 2015 declined by $44 million compared to 2014 primarily due to the decrease in operating earnings described below and higher net realized capital gains in 2014.
- *Operating earnings* for 2015 declined by $35 million compared to 2014, primarily due to lower underwriting margins in our long-term care and life products as well as lower net investment income, partially offset by higher underwriting margins in our disability products.
- *Our group benefit ratio* increased by 70 basis points in 2015 over the prior year, primarily due to due to lower underwriting margins in our long-term care and life products partially offset by higher underwriting margins in our disability products.

LARGE CASE PENSIONS

Large Case Pensions manages a variety of retirement products (including pension and annuity products) primarily for tax-qualified pension plans. These products provide a variety of funding and benefit payment distribution options and other services. The Large Case Pensions segment also includes certain discontinued products.

Operating Summary

				Change			
				2016 vs. 2015		2015 vs. 2014	
(Millions)	2016	2015	2014	$	%	$	%

Net income attributable to Aetna for Large Case Pensions	**$ 104**	$ 8	$ 22	$ 96	1,200 %	$ (14)	(64)%

The table presented below reconciles net income attributable to Aetna to operating earnings [(1)] for our Large Case Pensions segment:

(Millions)	2016	2015	2014
Net income attributable to Aetna for Large Case Pensions	**$ 104**	$ 8	$ 22
Net realized capital (gains) losses	**(10)**	15	(2)
Reduction of reserve for anticipated future losses on discontinued products	**(128)**	—	—
Income tax expense (benefit)	**48**	(6)	1
Operating earnings for Large Case Pensions	**$ 14**	$ 17	$ 21

(1) Operating earnings excludes net realized capital gains and losses, amortization of other acquired intangible assets and the other items described in the reconciliation in Note 18 “Segment Information” included in Part II, Item 8 of this Annual Report on Form 10-K.

Commentary - 2016 compared to 2015

- *Total revenue* decreased by $14 million in 2016 compared to 2015, primarily as a result of lower net investment income, partially offset by net realized capital gains during 2016 compared with net realized capital losses during 2015.
- *Net income attributable to Aetna for Large Case Pensions* for 2016 increased by $96 million compared to 2015. The increase was primarily due to the 2016 reduction of our reserve for anticipated future losses on discontinued products, which was primarily due to favorable retirement experience as well as favorable investment performance compared to assumptions we previously made in estimating the reserve.

Commentary - 2015 compared to 2014

- *Total revenue* decreased by $107 million in 2015 compared to 2014, primarily as a result of lower net investment income in 2015 and lower premiums due to the discontinuance of certain services under an existing customer contract during 2014, which resulted in a corresponding reduction in current and future benefits during 2015.
- *Net income attributable to Aetna for Large Case Pensions* for 2015 declined by $14 million compared to 2014, primarily due to net realized capital losses in 2015 compared with net realized capital gains in 2014.

Discontinued Products
Prior to 1993, we sold single-premium annuities ("SPAs") and guaranteed investment contracts ("GICs"), primarily to employer sponsored pension plans. In 1993, we discontinued selling these products to Large Case Pensions customers, and now we refer to these products as discontinued products. We discontinued selling these products because they were generating losses for us, and we projected that they would continue to generate losses over their life (which is currently greater than 30 years for SPAs); so we established a reserve for anticipated future losses at the time of discontinuance. In November 2016, the last outstanding GIC matured.

The operating summary for Large Case Pensions above includes revenues and expenses related to our discontinued products, with the exception of net realized capital gains and losses which are recorded as part of current and future benefits. Since we established a reserve for anticipated future losses on discontinued products, as long as our expected future losses remain consistent with prior projections, the results of our discontinued products are applied against the reserve and do not impact net income attributable to Aetna. If actual or expected future losses are greater than we currently estimate, we may increase the reserve, which could adversely impact net income attributable to Aetna. If actual or expected future losses are less than we currently estimate, we may decrease the reserve, which could favorably impact net income attributable to Aetna. In those cases, we disclose such adjustment separately in the operating summary. Management reviews the adequacy of the discontinued products reserve quarterly. As a result of this review, $84 million ($128 million pretax) of the reserve was released in 2016, and no releases were made to the reserve in 2015 or 2014. This reserve release was primarily due to favorable retirement experience as well as favorable investment performance compared to assumptions we previously made in estimating the reserve. The current reserve reflects management's best estimate of anticipated future losses, and is included in future policy benefits on our balance sheet.

Refer to Note 19 "Discontinued Products" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on the activity in the reserve for anticipated future losses on discontinued products during 2016, 2015 and 2014.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows
We meet our operating cash requirements by maintaining liquidity in our investment portfolio, using overall cash flows from premiums, fees and other revenue, deposits and income received on investments, issuing commercial paper, entering into repurchase agreements and obtaining cash advances from the Federal Home Loan Bank of Boston (the "FHLBB") from time to time. We monitor the duration of our investment portfolio of highly marketable debt securities and mortgage loans, and execute purchases and sales of these investments with the objective of having adequate funds available to satisfy our maturing liabilities. Overall cash flows are used primarily for claim and benefit payments, operating expenses, share and debt repurchases, repayment of debt, acquisitions, contract withdrawals and shareholder dividends. We have committed short-term borrowing capacity of $2.0 billion through a revolving credit facility agreement that expires in March 2020.

Presented below is a condensed statement of cash flows for each of the last three years. We present net cash flows used for operating activities and net cash flows provided by investing activities separately for our Large Case Pensions segment because changes in the insurance reserves for the Large Case Pensions segment (which are reported as cash used for operating activities) are funded from the sale of investments (which are reported as cash provided by investing activities). Refer to the Consolidated Statements of Cash Flows included in Part II, Item 8 of this Annual Report on Form 10-K for additional information.

				Change			
				2016 vs. 2015		2015 vs. 2014	
(Millions)	2016	2015	2014	$	%	$	%
Cash flows from operating activities							
Health Care and Group Insurance	**$ 3,988**	$ 4,388	$ 3,601	$ (400)	(9)%	$ 787	22 %
Large Case Pensions	**(269)**	(522)	(228)	253	48 %	(294)	(129)%
Net cash provided by operating activities	**3,719**	3,866	3,373	(147)	(4)%	493	15 %
Cash flows from investing activities							
Health Care and Group Insurance	**(628)**	(1,663)	(2,453)	1,035	62 %	790	32 %
Large Case Pensions	**247**	636	323	(389)	(61)%	313	97 %
Net cash used for investing activities	**(381)**	(1,027)	(2,130)	646	63 %	1,103	52 %
Net cash provided by (used for) financing activities	**12,134**	(1,735)	(1,235)	13,869	799 %	(500)	(40)%
Net increase (decrease) in cash and cash equivalents	**$ 15,472**	$ 1,104	$ 8	$ 14,368	1,301 %	$ 1,096	13,700 %

Commentary - 2016 compared to 2015

- *Cash flows provided by operating activities for Health Care and Group Insurance* decreased $400 million during 2016 compared to 2015 primarily due to a smaller increase in our health care costs payable liability in 2016 compared with 2015 and decreased operating performance primarily due to higher transaction and integration-related costs, partially offset by the timing of collections of premium receivables.
- *Cash flows used for investing activities* decreased $646 million in 2016 compared to 2015 primarily due to lower net purchases of investments in 2016.
- *Cash flows provided by financing activities* increased approximately $13.9 billion in 2016 compared to 2015 primarily due to the issuance of the 2016 senior notes. The increase is also driven by the repayment of debt, settlement of repurchase agreements and repurchases of common shares that occurred in 2015 and did not recur in 2016, partially offset by higher net repayment on interest rate derivatives in 2016.

Commentary - 2015 compared to 2014

- *Cash flows provided by operating activities for Health Care and Group Insurance* increased $787 million during 2015 compared to 2014 primarily due to improved operating performance and the receipt of our ACA reinsurance recoverables related to 2014, partially offset by the payment of our ACA risk adjustment payable related to 2014 and an increase in the amount we paid for the HIF in September 2015.
- *Cash flows used for investing activities* decreased $1.1 billion in 2015 compared to 2014 primarily due to lower net purchases of investments and a decline in cash used for acquisitions in 2015.
- *Cash flows used for financing activities* increased $500 million in 2015 compared to 2014 primarily attributable to the repayment of short-term debt issued in 2014 and net settlements from repurchase agreements in 2015 compared to net proceeds from repurchase agreements in 2014, partially offset by lower common share repurchases in 2015 compared to 2014.

Refer to Notes 9 “Debt” and 13 “Shareholders’ Equity” included in Part II, Item 8 of this Annual Report on Form 10-K for additional information about debt issuances and repayments, share repurchases and dividend payments.

Termination of Merger Agreement and Aetna APA
As a result of the termination of the Merger Agreement, we paid Humana the applicable $1.0 billion Regulatory Termination Fee on February 16, 2017. As a result of the APA Termination Agreement, we paid Molina the applicable termination fee on February 16, 2017, and we expect to pay Molina the applicable transaction costs during the first quarter of 2017. We funded the February 16, 2017 payments with the proceeds of the 2016 senior notes.

2016 Senior Notes
In June 2016, we issued $13 billion of 2016 senior notes. At December 31, 2016, the approximately $13 billion of net proceeds related to the issuance of the 2016 senior notes are invested in highly rated money market fund investments and classified as cash and cash equivalents on our balance sheets. Additionally, in conjunction with the closing of the 2016 senior notes, we

terminated the Bridge Credit Agreement effective June 9, 2016. In accordance with the terms of the 2016 senior notes, on February 14, 2017, following the termination of the Merger Agreement, we issued a notice of redemption for the entire $10.2 billion aggregate principal amount of the Special Mandatory Redemption Notes at a redemption price equal to 101% of the aggregate principal amount of those notes plus accrued and unpaid interest. We will redeem the Special Mandatory Redemption Notes on or about March 16, 2017, and we expect to fund the redemption with the proceeds of the 2016 senior notes. As a result of such redemption, in the first quarter of 2017, we will recognize on a pretax basis in our net income the entire approximately $420 million unamortized portion of the related cash flow hedge losses, debt issuance costs and debt issuance discounts and the entire approximately $100 million redemption premium paid on the Special Mandatory Redemption Notes upon such redemption. Refer to Note 9 "Debt" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on these transactions.

Cash Flow Hedges
Prior to issuing the 2016 senior notes, we entered into various interest rate swaps and treasury rate locks that were designated as cash flow hedges against interest rate exposure related to the forecasted future issuance of fixed-rate debt to be primarily used to finance a portion of the purchase price of the Humana Acquisition. We terminated these hedges in conjunction with the issuance of the 2016 senior notes and paid an aggregate of $348 million to the hedge counterparties upon termination of these interest rate swaps and treasury rate locks. As a result of the redemption of the Special Mandatory Redemption Notes, in the first quarter of 2017, we will recognize the remaining approximately $330 million pretax unamortized portion of the related cash flow hedge losses in our net income upon such redemption. Refer to Note 9 "Debt" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on these transactions.

Other Liquidity Information
From time to time, we use short-term commercial paper borrowings, repurchase agreements and cash advances from the FHLBB to address timing differences between cash receipts and disbursements. At December 31, 2016 and 2015, we did not have any commercial paper outstanding or outstanding advances from the FHLBB. There were no commercial paper borrowings during 2016.

Our debt to capital ratio (calculated as the sum of all short- and long-term debt outstanding ("total debt") divided by the sum of total Aetna shareholders' equity plus total debt) was 54% and 33% at December 31, 2016 and 2015, respectively. We continually monitor existing and alternative financing sources to support our capital and liquidity needs, including, but not limited to, debt issuance, preferred or common stock issuance, reinsurance and pledging or selling of assets.

Interest expense was $604 million, $369 million and $334 million for 2016, 2015 and 2014, respectively. The increase in interest expense during 2016 compared to 2015 reflects financing activity associated with the Humana Acquisition. The increase in interest expense during 2015 compared to 2014 reflects the impact of the Bridge Credit Agreement and Term Loan Credit Agreement.

Our current funding strategy for our tax-qualified noncontributory defined benefit pension plan (the "Aetna Pension Plan") is to contribute an amount at least equal to the minimum funding requirement as determined under applicable law with consideration of factors such as the maximum tax deductibility of such amounts. Refer to Note 10 "Pension and Other Postretirement Plans" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information regarding our current funding strategy for the Aetna Pension Plan.

Contractual Obligations
The following table summarizes certain estimated future obligations by period under our various contractual obligations at December 31, 2016. The table below does not include future payments of claims to health care providers or pharmacies because certain terms of these payments are not determinable at December 31, 2016 (for example, the timing and volume of future services provided under fee-for-service arrangements and future membership levels for capitated arrangements).

The table below also does not include future payments related to the termination of the Merger Agreement, which we expect to make in the first quarter of 2017, including:

- 70% of Molina's transaction costs as specified in the Aetna APA Termination Agreement; and
- The redemption on or about March 16, 2017 of $10.2 billion aggregate principal amount of the Special Mandatory Redemption Notes at a redemption price equal to 101% of the aggregate principal amount of such notes, plus accrued and unpaid interest. Those notes are reflected at their respective maturities at issuance in the table below.

We believe that funds from future operating cash flows, together with cash, investments and other funds available under the Facility; from the FHLBB; and from public or private financing sources, will be sufficient to meet our existing commitments as well as our liquidity needs associated with future operations, including our strategic growth initiatives.

(Millions)	2017	2018-2019	2020-2021	Thereafter	Total
Long-term debt obligations, including interest	$ 2,345	$ 4,345	$ 4,870	$ 19,102	$ 30,662
Operating lease obligations	143	201	85	84	513
Purchase obligations	269	264	94	2	629
Other liabilities reflected on our balance sheet: [1]					
Future policy benefits [2]	645	1,230	958	3,741	6,574
Unpaid claims [2]	801	554	366	783	2,504
Policyholders' funds [2] [3]	917	83	91	454	1,545
Other liabilities [4]	5,661	314	84	199	6,258
Total	$ 10,781	$ 6,991	$ 6,548	$ 24,365	$ 48,685

[1] Payments of other long-term liabilities exclude Separate Accounts liabilities of approximately $4.0 billion because these liabilities are supported by assets that are legally segregated and are not subject to claims that arise out of our business.

[2] Total payments of future policy benefits, unpaid claims and policyholders' funds include $506 million, $35 million and $143 million, respectively, of reserves for contracts subject to reinsurance. We expect the assuming reinsurance carrier to fund these obligations and have reflected these amounts as reinsurance recoverable assets on our consolidated balance sheet.

[3] Customer funds associated with group life and health contracts of approximately $2.0 billion have been excluded from the table above because such funds may be used primarily at the customer's discretion to offset future premiums and/or for refunds, and the timing of the related cash flows cannot be determined. Additionally, net unrealized capital gains on debt and equity securities supporting experience-rated products of $42 million, before tax, have been excluded from the table above.

[4] Other liabilities in the table above include general expense accruals and other related payables and exclude the following:

- Employee-related benefit obligations of $578 million, including our pension and other postretirement and post-employment benefit obligations and certain deferred compensation arrangements. These liabilities do not necessarily represent future cash payments we will be required to make, or such payment patterns cannot be determined. However, other long-term liabilities include expected benefit payments of $338 million over the next ten years for our non-qualified supplemental pension plan and our postretirement benefit plans, which we primarily fund when paid by the plans.
- Deferred gains of $50 million which will be recognized in our earnings in the future in accordance with GAAP.
- Net unrealized capital gains of $165 million, before tax, supporting discontinued products.
- Non-controlling interests supporting our discontinued products of $71 million consisting of third party interests in our investment holdings. This amount does not represent future cash payments we will be required to make.
- Other payables of $45 million.

Restrictions on Certain Payments

In addition to general state law restrictions on payments of dividends and other distributions to shareholders applicable to all corporations, health maintenance organizations ("HMOs") and insurance companies are subject to further regulations that, among other things, may require those companies to maintain certain levels of equity (referred to as surplus) and restrict the amount of dividends and other distributions that may be paid to their equity holders. These regulations are not directly applicable to Aetna as a holding company, since Aetna is not an HMO or an insurance company. The additional regulations applicable to our HMO and insurance company subsidiaries are not expected to affect our ability to service our debt, meet our other financing obligations or pay dividends, or the ability of any of our subsidiaries to service other financing obligations. Under applicable regulatory requirements, at December 31, 2016, the amount of dividends that may be paid by our insurance and HMO subsidiaries without prior approval by regulatory authorities was approximately $1.9 billion in the aggregate.

We maintain capital levels in our operating subsidiaries at or above targeted and/or required capital levels and dividend amounts in excess of these levels to meet our liquidity requirements, including the payment of interest on debt and shareholder dividends. In addition, at our discretion, we use these funds for other purposes such as funding share and debt repurchase programs, investments in new businesses and other purposes we consider advisable.

At December 31, 2016 and 2015, we held investments of $657 million and $690 million, respectively, that are not accounted for as Separate Accounts assets but are legally segregated and are not subject to claims that arise out of our business. Refer to

Note 4 “Investments” included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on investments related to the 2012 conversion of an existing group annuity contract from a participating to a non-participating contract.

Off-Balance Sheet Arrangements

We do not have any guarantees or other off-balance sheet arrangements that we believe, based on historical experience and current business plans, are reasonably likely to have a material impact on our current or future operating results, financial position or cash flows (other than the guarantees described in Note 17 “Commitments and Contingencies” included in Part II, Item 8 of this Annual Report on Form 10-K) at December 31, 2016. In addition, refer to Note 4 “Investments” included in Part II, Item 8 of this Annual Report on Form 10-K for additional detail of our variable interest entities at December 31, 2016.

Solvency Regulation

The National Association of Insurance Commissioners (the “NAIC”) utilizes risk-based capital (“RBC”) standards for insurance companies that are designed to identify weakly-capitalized companies by comparing each company’s adjusted surplus to its required surplus (the “RBC Ratio”). The RBC Ratio is designed to reflect the risk profile of insurance companies. Within certain ratio ranges, regulators have increasing authority to take action as the RBC Ratio decreases. There are four levels of regulatory action, ranging from requiring an insurer to submit a comprehensive financial plan for increasing its RBC to the state insurance commissioner to requiring the state insurance commissioner to place the insurer under regulatory control. At December 31, 2016, the RBC Ratio of each of our primary insurance subsidiaries was above the level that would require regulatory action. The RBC framework described above for insurers has been extended by the NAIC to health organizations, including HMOs. Although not all states had adopted these rules at December 31, 2016, at that date, each of our active HMOs had a surplus that exceeded either the applicable state net worth requirements or, where adopted, the levels that would require regulatory action under the NAIC’s RBC rules. External rating agencies use their own capital models and/or RBC standards when they determine a company’s rating.

CRITICAL ACCOUNTING ESTIMATES

We prepare our consolidated financial statements in accordance with GAAP. The application of GAAP requires management to make estimates and assumptions that affect our consolidated financial statements and related notes. The accounting estimates described below are those we consider critical in preparing our consolidated financial statements. We use information available to us at the time the estimates are made; however, as described below, these estimates could change materially if different information or assumptions were used. Also, these estimates may not ultimately reflect the actual amounts that occur.

Health Care Costs Payable

At December 31, 2016 and 2015, 86% and 85%, respectively, of health care costs payable are estimates of the ultimate cost of claims that have been incurred but not yet reported to us and of those which have been reported to us but not yet paid (collectively “IBNR”). The remainder of health care costs payable is primarily comprised of pharmacy and capitation payables and accruals for state assessments. We develop our estimate of IBNR using actuarial principles and assumptions that consider numerous factors. Refer to Note 2 “Summary of Significant Accounting Policies - Health Care Costs Payable” included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on our reserving methodology.

During 2016 and 2015 we observed an increase in our completion factors relative to those assumed at the prior year end. After considering the claims paid in 2016 and 2015 with dates of service prior to the fourth quarter of the previous year, we observed the assumed incurred claims weighted average completion factors were 28 and 35 basis points higher, respectively, than previously estimated, resulting in a reduction of $230 million and $282 million in 2016 and in 2015, respectively, in health care costs payable that related to the prior year. We have considered the pattern of changes in our completion factors when determining the completion factors used in our estimates of IBNR at December 31, 2016. However, based on our historical claim experience, it is reasonably possible that our estimated weighted average completion factor may vary by plus or minus 18 basis points from our assumed rates, which could impact health care costs payable by approximately plus or minus $212 million pretax.

Also during 2016 and 2015, we observed that our health care costs for claims with claim incurred dates of three months or less before the financial statement date were lower than previously estimated. Specifically, after considering the claims paid in 2016 and 2015 with claim incurred dates for the fourth quarter of the previous year, we observed health care costs that were 6.5% lower for each fourth quarter than previously estimated, resulting in a reduction of $534 million in 2016 and $559 million in 2015 in health care costs payable that related to the prior year.

We consider historical health care cost trend rates together with our knowledge of recent events that may impact current trends when developing our estimates of current health care cost trend rates. When establishing our reserves at December 31, 2016, we increased our assumed health care cost trend rates for the most recent three months by 5% from health care cost trend rates

recently observed. However, based on our historical claim experience, it is reasonably possible that our estimated health care cost trend rates may vary by plus or minus 3.5% from our assumed rates, which could impact health care costs payable by plus or minus $304 million pretax.

Health care costs payable as of December 31, 2016 and 2015 consisted of the following products:

(Millions)	2016	2015
Commercial	$ 3,273	$ 3,252
Government	3,285	3,054
Total health care costs payable	$ 6,558	$ 6,306

Other Insurance Liabilities

We establish insurance liabilities other than health care costs payable for benefit claims primarily related to our Group Insurance segment. We refer to these liabilities as other insurance liabilities. These liabilities primarily relate to our life, disability and long-term care products.

Life and Disability

The liabilities for our life and disability products reflect estimates of the ultimate cost of benefit claims that have been reported to us but not yet paid, benefit claims that have been incurred but not yet reported to us, and future policy benefits earned under insurance contracts. We develop our estimate of these reserves and the related benefit expenses using actuarial principles and assumptions that consider, among other things, discount, resolution and mortality rates. Completion factors are also evaluated when estimating our reserves for claims incurred but not yet reported for life products. We also consider the benefit payments from the U.S. Social Security Administration for which our disability members may be eligible and which may offset our liability for disability claims (this is known as the Social Security offset). Each period, we estimate these factors, to the extent relevant, based primarily on historical data, and use these estimates to determine the assumptions underlying our reserve calculations. Given the extensive degree of judgment and uncertainty used in developing these estimates, it is possible that our estimates could develop either favorably or unfavorably.

The discount rate is the interest rate at which future benefit cash flows are discounted to determine the present value of those cash flows. The discount rate we select is a critical estimate, because higher discount rates result in lower reserves. We determine the discount rate based on the current and estimated future yield of the asset portfolio supporting our life and disability reserves. If the discount rate we select in estimating our reserves is lower (higher) than our actual future portfolio returns, our reserves may be higher (lower) than necessary. The discount rates we selected for life insurance waiver of premiums and long-term disability reserves at December 31, 2016 were 40 basis points lower than the rate selected at December 31, 2015, primarily due to the decrease in projected portfolio rates of return. The discount rates we selected for life insurance waiver of premiums and long-term disability reserves at December 31, 2015 were consistent with the rates used at 2014. Based on our historical experience, it is reasonably possible that the assumed discount rates for our life and disability reserves may vary by plus or minus 50 basis points from year to year. A 50 basis point decrease in the discount rates selected for both our life insurance waiver of premium and disability reserves would have increased current and future life and disability benefit costs by $38 million pretax for 2016.

For disability claims and a portion of our life claims, we must estimate the timing of benefit payments, which takes into consideration the maximum benefit period and the probabilities of recovery (i.e., recovery rate) or death (i.e., mortality rate) of the member. Benefit payments may also be affected by a change in employment status of a disabled member, for example, if the member returns to work on a part-time basis. Estimating the recovery and mortality rates of our members is complex. Our actuaries evaluate our current and historical claim patterns, the timing and amount of any Social Security offset (for disability only), as well as other factors including the relative ages of covered members and the duration of each member's disability when developing these assumptions. For disability reserves, if our actual recovery and mortality rates are lower (higher) than our estimates, our reserves will be lower (higher) than required to cover future disability benefit payments. For certain life insurance premium waiver reserves, if the actual recovery rates are lower (higher) than our estimates or the actual mortality rates are higher (lower) than our estimates, our reserves will be lower (higher) than required to cover future life benefit payments. We use standard industry tables and our historical claim experience to develop our estimated recovery and mortality rates. Claim reserves for our disability and life products are sensitive to these assumptions. Our historical experience has been that our recovery or mortality rates for our life and disability reserves vary by less than ten percent during the course of a year. A ten percent less (more) favorable assumption for our recovery or mortality rates would have increased (decreased) current and future life and disability benefit costs by $71 million pretax for 2016. When establishing our reserves at December 31, 2016, we set our estimates of recovery and mortality rates based on recent experience. Refer to Note 2 "Summary of

Significant Accounting Policies" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on our reserving methodology.

Long-term Care
We established reserves for future policy benefits for the long-term care products we issued based on the present value of estimated future benefit payments less the present value of estimated future net premiums. In establishing this reserve, we evaluated assumptions about mortality, morbidity, lapse rates and the rate at which new claims would be submitted to us. We estimated the future policy benefits reserve for long-term care products using these assumptions and actuarial principles. For long-term care insurance contracts, we use our original assumptions throughout the life of the policy and do not subsequently modify them unless we deem the reserves to be inadequate. A portion of our reserves for long-term care products also reflect our estimates relating to future payments to members currently receiving benefits. These reserves are estimated primarily using recovery and mortality rates, as described above.

Premium Deficiency Reserves on our Health Care and Group Insurance products
We recognize a premium deficiency loss when it is probable that expected future claims, including maintenance costs (for example, direct costs such as claim processing costs), will exceed existing reserves plus anticipated future premiums and reinsurance recoveries. Anticipated investment income is considered in the calculation of premium deficiency losses for short-duration contracts. Any such reserves established would normally cover expected losses until the next policy renewal dates for the related policies. In the second and third quarters of 2016, we recorded premium deficiency reserves totaling $85 million related to anticipated future losses for the 2016 coverage year in our individual Commercial products. We did not have any premium deficiency reserves for our Health Care or Group Insurance business at December 31, 2016 or 2015.

Large Case Pensions Discontinued Products Reserve
We discontinued certain Large Case Pensions products in 1993 and established a reserve to cover losses expected during the run-off period. Since 1993, we have made several adjustments resulting in a reduction to this reserve that have increased net income attributable to Aetna. These adjustments occurred primarily because our investment experience as well as our mortality and retirement experience have been better than the experience we projected at the time we discontinued the products. In 2016, we released $84 million ($128 million pre-tax) of this reserve primarily due to favorable retirement experience as well as favorable investment performance compared to assumptions we previously made in estimating the reserve. There was no adjustment of this reserve in 2015 or 2014. There can be no assurance that adjustments to the discontinued products reserve will occur in the future. Future adjustments could positively or negatively impact net income attributable to Aetna.

Recoverability of Goodwill and Other Acquired Intangible Assets
We have made acquisitions that included a significant amount of goodwill and other intangible assets. When we complete an acquisition, we apply the acquisition method of accounting, which among other things, requires the recognition of goodwill (which represents the excess cost of the acquisition over the fair value of net assets acquired and identified intangible assets). Goodwill is subject to an annual (or under certain circumstances more frequent) impairment test based on its estimated fair value. Other intangible assets that meet certain criteria are amortized over their useful lives, except for the valuation of business acquired which amortizes in proportion to estimated premiums over the expected life of the acquired contracts, and are also subject to a periodic impairment test. Historically, for these impairment evaluations, we have used an implied fair value approach, which used a discounted cash flow analysis and other valuation methodologies. Beginning in 2017, we adopted, on a prospective basis, the recently issued accounting standards update related to the methodology utilized to evaluate goodwill impairment. This update simplifies the methodology used to perform our annual, or interim, goodwill impairment evaluations. Our evaluation will be performed by comparing the estimated fair value of a reporting unit with its carrying amount. An impairment charge would be recognized when the carrying amount exceeds the estimated fair value of the reporting unit. These impairment evaluations use many assumptions and estimates in determining an impairment loss, including certain assumptions and estimates related to future earnings. If we do not achieve our earnings objectives, the assumptions and estimates underlying these impairment evaluations could be adversely affected, which could result in an asset impairment charge that would negatively impact our operating results. There were no impairment losses recognized in any of the three years ended December 31, 2016, 2015 or 2014.

Measurement of Defined Benefit Pension and Other Postretirement Employee Benefit Plans
We sponsor defined benefit pension plans ("pension plans") and OPEB plans for our employees and retirees. Effective December 31, 2010, our employees no longer earn future pension service credits in the Aetna Pension Plan, although the Aetna Pension Plan will continue to operate and account balances will continue to earn annual interest credits. Employees covered by our non-qualified supplemental pension plan stopped accruing benefits effective January 1, 2007, although interest credits continue to be credited on these cash balance accounts.

Major assumptions used in the accounting for our pension plans include the expected return on plan assets, if applicable, mortality rates and the discount rate. We select our assumptions based on our information and market indicators, and we evaluate our assumptions at each annual measurement date (December 31, for each year presented). A change in any of our assumptions would have an effect on our pension and OPEB plan costs. A discussion of our assumptions used to determine the expected return on plan assets and mortality rates can be found in Note 10 "Pension and Other Postretirement Plans" included in Part II, Item 8 of this Annual Report on Form 10-K.

The discount rates we used in accounting for our pension and OPEB plans were calculated using a yield curve as of our annual measurement date. Each yield curve consisted of a series of individual discount rates, with each discount rate corresponding to a single point in time, based on high-quality bonds (that is, bonds with an average rating of AA based on ratings from Standard & Poor's, Fitch, and the equivalent ratings from Moody's). We project the benefits expected to be paid from each plan at each point in the future based on each participant's current service (but reflecting expected future pay increases). These projected benefit payments are then discounted to the measurement date using the corresponding rate from the yield curve. A lower discount rate increases the present value of benefit obligations. In 2016, we decreased our weighted average discount rate to 4.22% for our pension plans from the 4.50% used at the measurement date in 2015. In 2016, we decreased our weighted average discount rate on OPEB plans to 4.12% from the 4.39% used at the measurement date in 2015. A one-percentage point decrease in the assumed discount rate would decrease our annual pension costs by $10 million after-tax and would have a negligible effect on our annual OPEB costs.

Beginning in 2017, we changed the approach used to estimate the interest cost component of net periodic benefit cost for pension and OPEB for plans that utilize a yield curve approach. Historically, we estimated the interest cost using a single weighted-average discount rate derived from the yield curve used to measure the projected benefit obligation. With this refinement, we now measure interest costs by applying the specific spot rates along that yield curve to the relevant projected cash flows for each component. We believe the new approach provides a more precise measurement of interest cost. This refinement has no effect on the measurement of our plan obligations. We have accounted for this refinement as a change in accounting estimate and, accordingly, have accounted for it on a prospective basis beginning in 2017.

At December 31, 2016, our pension and OPEB plans had aggregate pretax accumulated actuarial losses of approximately $2.5 billion. Accumulated actuarial losses are primarily due to an increase in the present value of future plan obligations driven by lower interest rates and improving mortality trends as well as investment results below assumed returns in 2008. The accumulated actuarial loss is amortized over the weighted-average expected life of pension plan participants (estimated to be up to 28 years at December 31, 2016 for the pension plans) and the expected life of OPEB plan participants (estimated to be up to 16 years at December 31, 2016) to the extent the loss is outside of a corridor established in accordance with GAAP. The corridor is established based on the greater of 10% of the plan assets or 10% of the projected benefit obligation. At December 31, 2016, approximately $1.9 billion of the actuarial loss was outside of the corridor, which will result in amortization of $44 million after-tax in our 2017 pension and OPEB expense.

The expected return on plan assets and discount rate assumptions discussed above impacted the reported net periodic benefit costs and benefit obligations of our pension and OPEB plans, but did not impact the required contributions to these plans, if any. Refer to Note 10 "Pension and Other Postretirement Plans" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on our defined benefit pension and other postretirement employee benefit plans, including our current funding strategy.

Other-Than-Temporary Impairment of Debt Securities

We regularly review our debt securities to determine whether a decline in fair value below the carrying value is other-than-temporary. If a decline in fair value is considered other-than-temporary, the cost basis or carrying value of the debt security is written down. The write-down is then bifurcated into its credit and non-credit related components. The amount of the credit-related component is included in our operating results, and the amount of the non-credit related component is included in other comprehensive income, unless we intend to sell the security or it is more likely than not that we will be required to sell the security prior to its anticipated recovery of its amortized cost basis. We analyze all facts and circumstances we believe are relevant for each investment when performing this analysis, in accordance with applicable accounting guidance promulgated by the Financial Accounting Standards Board and the U.S. Securities and Exchange Commission (the "SEC").

Among the factors we consider in evaluating whether a decline is other-than-temporary are whether the decline in fair value results from a change in the quality of the debt security itself, whether the decline results from a downward movement in the market as a whole, and the prospects for realizing the carrying value of the debt security based on the investment's current and short-term prospects for recovery. For unrealized losses determined to be the result of market conditions (for example, increasing interest rates and volatility due to conditions in the overall market) or industry-related events, we determine whether we intend to sell the debt security or if it is more likely than not that we will be required to sell the debt security before

recovery of its amortized cost basis. If either case is true, we recognize an other-than-temporary impairment ("OTTI"), and the cost basis/carrying amount of the debt security is written down to fair value.

Debt securities in an unrealized loss position for which we believe we will not recover the amortized cost due to the quality of the debt security or the creditworthiness of the issuer are categorized as credit-related OTTI.

The risks inherent in assessing the impairment of a debt security include the risk that market factors may differ from our projections and the risk that facts and circumstances factored into our assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods are among the factors that may result in a current period decision to sell debt securities that were not impaired in prior reporting periods.

Revenue Recognition and Allowance for Estimated Terminations and Uncollectible Accounts
Our revenue is principally derived from premiums and fees billed to customers in the Health Care and Group Insurance segments. In Health Care, revenue is recognized based on customer billings, which reflect contracted rates per employee and the number of covered employees recorded in our records at the time the billings are prepared. Billings are generally sent monthly for coverage during the following month. In Group Insurance, premium for group life and disability products is recognized as revenue, net of allowances for uncollectible accounts, over the term of coverage. Amounts received before the period of coverage begins are recorded as unearned premiums.

Health Care billings may be subsequently adjusted to reflect enrollment changes due to terminations or other factors. These adjustments are known as retroactivity adjustments. In each period, we estimate the amount of future retroactivity and adjust the recorded revenue accordingly. In each period, we also estimate the amount of uncollectible receivables and establish an allowance for uncollectible amounts. We base such estimates on historical trends, premiums billed, the amount of contract renewal activity during the period and other relevant information. As information regarding actual retroactivity and uncollectible amounts becomes known, we refine our estimates and record any required adjustments to revenues in the period they arise. A significant difference in the actual level of retroactivity or uncollectible amounts compared to our estimated levels would have a significant effect on our operating results.

Additionally, premium revenue subject to the ACA's minimum MLR rebate requirements is recorded net of the estimated minimum MLR rebates for the current calendar year. We estimate the minimum MLR rebates by projecting MLRs for certain markets, as defined by the ACA, for each state in which each of our insurance entities operate. The claims and premiums used in estimating such rebates are modified for certain adjustments allowed by the ACA and include a statistical credibility adjustment for those states with a number of members that is not statistically credible.

Furthermore, premium revenue subject to the ACA's permanent risk adjustment program transfers funds from qualified individual and small group insurance plans with below average risk scores to plans with above average risk scores. Based on the risk of our qualified plan members relative to the average risk of members of other qualified plans in comparable markets, we estimate our ultimate risk adjustment receivable or payable for the current calendar year and reflect the pro-rata year-to-date impact as an adjustment to our premium revenue. In this analysis, we consider the estimate of the average risk of members of other qualified plans in comparable markets the most critical assumption. We estimate this assumption using management's best estimates, which are based on various data sources, including but not limited to market risk data compiled by third party sources as well as pricing and other regulatory inputs. Refer to Note 2 "Summary of Significant Accounting Policies" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on each of the ACA's risk adjustment, risk corridor and reinsurance programs.

NEW ACCOUNTING STANDARDS
Refer to Note 2 "Summary of Significant Accounting Policies" included in Part II, Item 8 of this Annual Report on Form 10-K for a discussion of recently issued accounting standards.

REGULATORY ENVIRONMENT

General
Our operations are subject to comprehensive United States federal, state and local and comparable multiple levels of international regulation in the jurisdictions in which we do business. The laws and rules governing our business and interpretations of those laws and rules continue to expand and become more restrictive each year and are subject to frequent change. The new U.S. presidential administration and the control of the U.S. Congress by a single political party increase the likelihood of significant changes in those laws and rules, including the ACA. There also continues to be a heightened level of review and/or audit by federal, state and international regulators of the health and related benefits industry's business and reporting practices.

We must obtain and maintain regulatory approvals to price, market and administer many of our products. Supervisory agencies, including CMS, the Center for Consumer Information and Insurance Oversight ("CCIIO") and the Department of Labor ("DOL"), as well as state health, insurance, managed care and Medicaid agencies and state boards of pharmacy have broad authority to take one or more of the following actions:

- Grant, suspend and revoke our licenses to transact business;
- Suspend or exclude us from participation in government programs;
- Suspend or limit our authority to market products;
- Regulate many aspects of the products and services we offer, including the pricing and underwriting of many of our products and services;
- Audit us and our performance of our contracts, which can, among other things, affect our Medicare Advantage plans' and Medicare Part D Prescription Drug plans' ("PDPs'") star ratings;
- Assess damages, fines and/or penalties;
- Terminate our contract with the government agency and/or withhold payments from the government agency to us;
- Impose retroactive adjustments to premiums and require us to pay refunds to the government, customers and/or members;
- Restrict our ability to conduct acquisitions or dispositions;
- Require us to maintain minimum capital levels in our companies and monitor our solvency and reserve adequacy;
- Regulate our investment activities on the basis of quality, diversification and other quantitative criteria; and/or
- Exclude our plans from participating in Public Exchanges if they are deemed to have a history of "unreasonable" premium rate increases or fail to meet other criteria set by the U.S. Department of Health and Human Services ("HHS") or the applicable state.

Our operations, current and past business practices, current and past contracts, and accounts and other books and records are subject to routine, regular and special investigations, audits, examinations and reviews by, and from time to time we receive subpoenas and other requests for information from, federal, state and international supervisory and enforcement agencies, attorneys general and other state, federal and international governmental authorities and legislators. See "Audits and Investigations" below in this MD&A - Regulatory Environment for additional information on these matters.

The ACA made broad-based changes to the U.S. health care system. On January 20, 2017, the President signed an executive order that gives the regulatory agencies that enforce the ACA the authority to interpret regulations issued under the ACA in a way that limits fiscal burdens on states and financial or regulatory burdens on individuals, providers, health insurers and others. The practical implications of that order are unclear, and the future of the ACA is uncertain. While we anticipate efforts in 2017 and beyond to substantially modify, repeal or replace the ACA, we expect aspects of the ACA to continue to significantly impact our business operations and operating results, including our pricing, our MBRs and the geographies in which our products are available. The ACA has presented us with business opportunities, but also with financial and regulatory challenges. Most of the ACA's key components were phased in during or prior to 2014, including Public Exchanges, required minimum MLRs in Commercial and Medicare products, the individual coverage mandate, guaranteed issue, rating limits in individual and small group products, significant new industry-wide fees, assessments and taxes, enhanced premium rate review and disclosure processes, reduced Medicare Advantage payment rates to insurers, and linking Medicare Advantage payments to a plan's CMS quality performance ratings or "star ratings." The effects of these changes are reflected in our operating results. If the ACA is not amended, repealed or replaced, certain of its components will continue to be phased in until 2020.

We have dedicated and expect to continue to be required to dedicate significant resources and incur significant expenses during 2017 to implement and comply with ACA-related requirements and changes to the ACA as well as state level health care reform. While most of the significant aspects of the ACA became effective during or prior to 2014, significant parts of the ACA, including aspects of nondiscrimination requirements, continue to evolve through the promulgation of executive orders, regulations and guidance. Additional changes to the ACA and those regulations and guidance at the federal and/or state level are likely, and those changes are likely to be significant. Growing state and federal budgetary pressures make it more likely that any changes, including changes at the state level in response changes to, or repeal or replacement of, the ACA and/or changes in the funding levels and/or payment mechanisms of federally supported benefit programs, will be adverse to us. Given the inherent difficulty of foreseeing the nature and scope of future changes to the ACA and how states, businesses and individuals will respond to those changes, we cannot predict the impact on us of future changes to the ACA. It is reasonably possible that

repeal or replacement of or other changes to the ACA and/or states' responses to such changes, in the aggregate, could have a significant adverse effect on our business operations and operating results.

Potential repeal of the ACA, ongoing legislative and regulatory changes to the ACA, other pending efforts in the U.S. Congress to amend or restrict funding for various aspects of the ACA (including risk corridors and the ACA's Cost Sharing Subsidy program), the results of the 2016 presidential, congressional and state level elections, pending litigation challenging aspects of the law and federal budget negotiations continue to create uncertainty about the ultimate impact of the ACA. Examples of recent legislative and regulatory changes include: the January 20, 2017 executive order relating to the ACA; the November 2016 HHS announcement that risk corridor collections for the 2015 program year will be applied first to amounts owed to plans for the 2014 program year; the May 2016 final regulations relating to the ACA's non-discrimination requirements; the December 2015 suspension of the HIF for 2017 and two year delay of the "Cadillac" tax on high-cost employer-sponsored health coverage; the October 2015 PACE, which leaves groups with 51 to 100 employees within the large group category for each state unless the state exercises its option to include these groups within the small group category; and the October 2015 HHS announcement that the ACA's risk corridor receivables for the 2014 program year would only be funded at 12.6%. With respect to pending litigation, in May 2016, the U.S. District Court for the District of Columbia ruled that the U.S. Department of Health and Human Services does not have the authority to make payments under the ACA's Cost Sharing Subsidy program. Implementation of this decision has been stayed pending appeal. A final ruling that adversely impacts the Cost Sharing Subsidy program could cause significant adverse selection in individual Public Exchange products and instability in the individual Public Exchange marketplace and could have a material adverse effect on our business, cash flows, financial condition and operating results as well as hinder our ability to offer Public Exchange products.

As described above, the availability of funding for the ACA's temporary risk corridor program is an example of this uncertainty. We continue to believe that receipt of any risk corridor payment from HHS for the 2016 or 2015 program year and receipt of such payments in excess of the announced prorated amount for the 2014 program year are uncertain. At December 31, 2016, we had an immaterial receivable for the remaining 2014 program year prorated amount that had not been collected from HHS and no receivable for either of the 2015 or 2016 program years. In addition, these limited risk corridor payments created additional instability in the marketplace for individual Commercial products in 2016 and going forward by contributing to decisions by health plans to change or stop offering their Public Exchange products. 2016 was the last program year for the ACA's risk corridor program. On-going uncertainty regarding the funding of ACA-related programs and subsidies can be expected to create additional instability in the marketplace.

In addition to efforts to amend, repeal or replace the ACA and the related regulations, the federal and state governments also continue to enact and seriously consider many other broad-based legislative and regulatory proposals that have had a material impact on or could materially impact various aspects of the health care and related benefits system and our business. We cannot predict whether pending or future federal or state legislation or court proceedings, including future U.S. Congressional appropriations, will change various aspects of the health care and related benefits system or the ACA or the impact those changes will have on our business operations or operating results, but the effects could be materially adverse.

The expansion of health care coverage contemplated by the ACA is being funded in part by reductions to the reimbursements we and other health plans are paid by the federal government for our Medicare members, among other sources. While not all-inclusive, the following are some of the key provisions of the ACA (assuming it continues to be implemented in its current form) that become effective on or after January 1, 2017. We continue to evaluate these provisions and the related regulations and regulatory guidance to determine the impact that they will have on our business operations and operating results:

- States can open Public Exchanges to large group employers beginning January 1, 2017.
- The ACA's non-discrimination requirements for benefit plans beginning January 1, 2017.
- Closure of the gap in coverage for Medicare Part D prescription drug coverage (the so-called "donut hole") which began to close in 2010 and will incrementally close until the coverage gap is eliminated in 2020.
- Continuing reductions to Medicare Advantage payment rates for payments to us and other plans which are fully phased-in for 2017 and the linking of Medicare Advantage payments to a plan's CMS quality performance ratings or "star ratings." Any inability on our part to achieve and maintain acceptable star ratings could have a material adverse effect on our Medicare operating results and/or the geographies in which our Medicare products are available.
- The imposition on us and other health insurers, health plans and other market participants of significant fees, assessments and taxes, including the industry-wide reinsurance assessment of $5 billion in 2016 and an annual non-tax deductible industry-wide $11.3 billion HIF in 2016, which will be zero in 2017 and, as currently enacted, $14.3 billion in 2018 and increase annually thereafter. Our share of the 2016 ACA fees, assessments and taxes was $979 million, which includes our share of the HIF, which was $837 million. As a result of the 2017 suspension of the HIF and the

termination of the ACA's reinsurance and risk corridor provisions at the end of 2016, we do not expect our share of the applicable 2017 ACA fees, assessments and taxes to be significant.

- A non-tax deductible 40% excise tax on employer-sponsored health care benefits above a certain threshold beginning in 2020.
- Reduced funding for Medicaid expansion beginning in 2017.

The ACA also specifies minimum MLRs for our Commercial and Medicare Insured products, specifies required Commercial benefit designs, limits Commercial individual and small group rating and pricing practices, encourages additional competition (including potential incentives for new market entrants) and significantly increases federal and state oversight of health plans, including regulations and processes that could delay or limit our ability to appropriately increase our health plan premium rates. This in turn could adversely affect our ability to continue to participate in certain product lines and/or geographies we serve today.

In addition, the ACA ties a portion of each Medicare Advantage plan's reimbursement to the achievement of favorable CMS quality performance measures ("star ratings"). Since 2015, only Medicare Advantage plans with an overall star rating of four or more stars (out of five stars) are eligible for a quality bonus in their basic premium rates. As a result, our Medicare Advantage plans' operating results in 2017 and going forward will be significantly affected by their star ratings. For additional information on CMS's stars program and our related performance, see "Medicare" below in this MD&A - Regulatory Environment.

In 2016, state legislatures focused on state budgets and taxes (including new assessments on health care premiums), provider network composition and provider directory accuracy requirements, pharmacy benefit and drug coverage requirements, Medicaid reforms and health care delivery system transformation. At the state level, all 50 U.S. states and the District of Columbia will hold regular legislative sessions in 2017. We expect additional state level legislation and regulatory activity that impacts our businesses to be enacted in 2017, including potentially significant changes in individual, small group and Medicaid products and/or programs in response to or in anticipation of reduced federal funding. In addition, independent of federal efforts, we expect many states to continue to consider legislation or regulations that affect privately-financed health insurance arrangements and/or public programs, including imposing requirements on the composition of our provider networks and the accuracy of our provider directories, requiring changes to health benefit product structure, mandating specific benefit coverages, and enhancing consumer transparency on provider network composition as well as cost and quality of care. For example, regulators or legislatures in a number of states have implemented or are considering limits on premium rate increases, either by enforcing existing legal requirements more stringently or proposing different regulatory standards or procedures for reviewing proposed premium rate changes, as well as imposing taxes on insurers and other health plans to finance Public Exchanges, Medicaid and other state programs. If any elements of the ACA are repealed at the federal level, we expect that some states would seek to enact similar requirements, such as prohibiting pre-existing condition exclusions, prohibiting rescission of insurance coverage, requiring coverage for dependents up to age 26, requiring guaranteed renewability of insurance coverage and prohibiting lifetime limits on insurance coverage.

We cannot predict what provisions legislation or regulation will contain in any state or what effect legislation or regulation will have on our business operations or operating results, but the effect could be materially adverse.

Health Care Regulation

General

Federal, state, local and foreign governments have adopted comprehensive laws and regulations that govern our business activities in various ways. Differing approaches to state insurance regulation and varying enforcement philosophies may materially and adversely affect our ability to standardize our products and services across state lines. These laws and regulations, including the ACA, restrict how we conduct our business and result in additional burdens and costs to us.

In addition to the expanded regulation created by the ACA discussed above, significant areas of governmental regulation include premium rates and rating methodologies, underwriting rules and procedures, required benefits, sales and marketing activities, health care provider rates of payment, restrictions on health plans' ability to limit providers' participation in their networks and/or remove providers from their networks, pharmacy and pharmacy benefit management operations and financial position (including reserves and minimum capital or risk based capital requirements). These laws and regulations are different in each jurisdiction and vary from product to product.

Each health insurer and HMO must file periodic financial and operating reports with the states in which it does business. In addition, health insurers and HMOs are subject to state examination and periodic license renewal. Applicable laws also restrict the ability of our regulated subsidiaries to pay dividends, and certain dividends require prior regulatory approval. In addition,

some of our business and related activities may be subject to preferred provider organization ("PPO"), managed care organization, utilization review or third-party administrator-related licensure requirements and regulations. These licensure requirements and regulations differ from state to state, but may contain health care provider network, contracting, product and rate, financial and reporting requirements. There also are laws and regulations that set specific standards for our delivery of services, payment of claims, fraud prevention, protection of consumer health information, payment for covered benefits and services and escheatment of funds to states. Our pharmacy benefit management ("PBM") services suppliers, including CaremarkPCS Health, L.L.C. (and its predecessors, collectively "CVS"), also are subject to extensive federal and state regulation, including many of the items described above.

Pricing and Underwriting Restrictions

Pricing and underwriting regulation by states limits our underwriting and rating practices and those of other health insurers, particularly for small employer groups and individuals. Since 2014, as a result of the ACA, health insurers cannot vary small group or individual premium rates based on individual members' characteristics except for geography and limited variation for age and tobacco use. Since 2016, as a result of the ACA, states have the ability to expand the small group rating category to cover groups of up to 100 employees. Pricing and underwriting laws and regulations vary by state. In general, they apply to certain customer segments and limit our ability to set prices for new or renewing groups, or both, based on specific characteristics of the group or the group's prior claim experience. In some states, these laws and regulations restrict our ability to price for the risk we assume and/or reflect reasonable costs in our pricing.

The ACA expanded the premium rate review process by, among other things, requiring our rates to be reviewed for "reasonableness" at either the state or the federal level. HHS established a federal premium rate review process that generally applies to proposed premium rate increases equal to or exceeding 10% (or a state specified threshold). HHS's rate review process imposes additional public disclosure requirements as well as additional review on filings requesting premium rate increases equal to or exceeding this "reasonableness" threshold. These combined state and federal review requirements may prevent, further delay or otherwise affect our ability to price for the risk we assume, which could adversely affect our medical benefit ratios and operating results, particularly during periods of increased utilization of medical services and/or medical cost trend or when such utilization and/or trend exceeds our projections.

The ACA also specifies minimum MLRs of 85% for large group commercial products, 80% for individual and small group commercial products and 85% for Medicare Advantage and Medicare Part D plans. Beginning in 2017, Medicaid managed care products, including those we offer, also are subject to a minimum MLR of 85% under a final rule issued by CMS in 2016. Because the ACA and the Medicaid minimum MLRs are structured as "floors" for many of their requirements, states have the latitude to enact more stringent rules governing its various restrictions. For Medicaid managed care and commercial products, states may adopt higher minimum MLR requirements, use more stringent definitions of "medical loss ratio," incorporate minimum MLR requirements into prospective premium rate filings for commercial products, require prior approval of premium rates for commercial products, or impose other requirements related to minimum MLR. For example, Texas has expanded from 50 to 100 the maximum size of "small groups" that are subject to its minimum MLR requirements, and New York, New Jersey and California all have established state-specific minimum MLR requirements. Minimum MLR requirements and similar actions further limit the level of margin we can earn in our Insured business while leaving us exposed to medical costs that are higher than those reflected in our pricing. We also may be subject to significant fines, penalties, premium refunds and litigation if we fail to comply with minimum MLR laws and regulations. In addition, if a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years (including on a retrospective basis), it will become ineligible to participate in open enrollment. If a Medicare Advantage or Medicare Part D contract pays such rebates for five consecutive years (including on a retrospective basis), it will be terminated by CMS.

In addition, we requested significant increases in our premium rates in our individual and small group Health Care businesses for 2017 and expect to continue to request significant increases in those rates for 2018 and beyond in order to adequately price for projected medical cost trends, required expansions of coverage and significant assessments, fees and taxes imposed by the federal and state governments, including the ACA. Our rates also must be adequate to reflect adverse selection in our products, particularly in individual and small group products, which we expect to continue and potentially worsen in 2017 with the expiration of the ACA's risk corridor and reinsurance programs at the end of 2016. These significant rate increases heighten the risks of adverse public and regulatory action and adverse selection and the likelihood that our requested premium rate increases will be denied, reduced or delayed, which could lead to operating margin compression.

Many of these laws and regulations also limit the differentials in premium rates insurers and other carriers may charge between new and renewal business, and/or between groups or individuals based on differing characteristics. They may also require that carriers disclose to customers the basis on which the carrier establishes new business and renewal premium rates and limit the ability of a carrier to terminate customers' coverage. In addition, HHS' rules on rates impose additional public disclosure requirements on any rate filings that exceed the "reasonableness" threshold and require additional review of those rates.

In addition, a number of states provide for a voluntary reinsurance mechanism to spread small group risk among participating insurers and other carriers. In a small number of states, participation in this pooling mechanism is mandatory for all small group carriers. In general, we have elected not to participate in voluntary pools. However, even in the voluntary pool states, we may be subject to certain supplemental assessments related to the state's small group experience. Core elements of the ACA were designed to reduce or eliminate reliance on these state pooling mechanisms. If those elements of the ACA are modified or repealed, states may reinstate or expand their pooling requirements, including mandatory participation.

HIPAA Administrative Simplification, GLBA and Other Privacy, Security and Confidentiality Requirements
Federal, state and international privacy and security requirements change periodically because of legislation, regulations and judicial or administrative interpretation. The regulations under the administrative simplification provisions of the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), as further modified by the American Recovery and Reinvestment Act of 2009 ("ARRA") and the ACA, also impose a number of additional obligations on issuers of health insurance coverage and health benefit plan sponsors.

HIPAA's administrative simplification requirements apply to self-funded group health plans, health insurers and HMOs, health care clearinghouses and health care providers who transmit health information electronically ("Covered Entities"). Regulations adopted to implement administrative simplification also require that "business associates" acting for or on behalf of these Covered Entities be contractually obligated to meet HIPAA standards. The administrative simplification regulations establish significant criminal penalties and civil sanctions for noncompliance.

The HIPAA privacy regulations adopted by HHS establish limits on the use and disclosure of medical records and other individually identifiable health information (protected health information or "PHI") by Covered Entities. Further, ARRA requires us and other Covered Entities to report any breaches of PHI to impacted individuals and to HHS and to notify the media in any states where 500 or more people are impacted by the unauthorized release or use of or access to PHI. Business associates (e.g., entities that provide services to health plans, such as electronic claims clearinghouses, print and fulfillment vendors, consultants, and us for the administrative services we provide to our ASC customers) must also comply with certain HIPAA provisions. In addition, ARRA establishes greater civil and criminal penalties for Covered Entities and business associates who fail to comply with HIPAA's provisions and gives new enforcement rights to state attorneys general. Additional regulations under HIPAA remain pending. We will continue to assess the impact of these regulations on our business as they are issued.

The HIPAA privacy regulations do not preempt more stringent state laws and regulations that may apply to us and other Covered Entities, including laws that place stricter controls on the release of information relating to specific diseases or conditions and requirements to notify members of unauthorized release or use of or access to PHI. Complying with additional state requirements requires us to make additional investments beyond those we have made to comply with the HIPAA regulations. HHS also has adopted security regulations designed to protect member health information from unauthorized use or disclosure. HHS has begun to audit health plans, providers and other parties to enforce HIPAA compliance, including with respect to data security.

The HIPAA privacy regulations provide patients with rights to understand and control how their health information is used. States also have adopted regulations to implement provisions of the Financial Modernization Act of 1999 (also known as Gramm-Leach-Bliley Act ("GLBA")) which generally require insurers to provide customers with notice regarding how their non-public personal health and financial information is used and the opportunity to "opt out" of certain disclosures before the insurer shares such information with a non-affiliated third party. The GLBA regulations apply to health, life and disability insurance. Like HIPAA, GLBA sets a "floor" standard, allowing states to adopt more stringent requirements governing privacy protection.

The Cybersecurity Information Sharing Act of 2015 ("CISA") encourages organizations to share cyber threat indicators with the federal government and, among other things, directs HHS to develop a set of voluntary cybersecurity best practices for organizations in the health care industry. In addition, states have begun to enact more comprehensive privacy laws and regulations addressing consumer rights to data protection or transparency. States are also starting to issue regulations and proposed regulations specifically related to cybersecurity, such as the regulations issued by the New York Department of Financial Services. Complying with possibly conflicting cybersecurity regulations, which may differ from state to state, would require significant resources. In addition, differing approaches to state privacy and/or cyber-security regulation and varying enforcement philosophies may materially and adversely affect our ability to standardize our products and services across state lines. Widely-reported large scale U.S. commercial data breaches increase the likelihood that additional data security legislation will be considered by additional states. These legislative and regulatory developments will impact the design and operation of

our businesses, including the consumer business we are creating, our privacy and security strategy and our web-based and mobile assets.

Other Legislative Initiatives and Regulatory Initiatives

In addition to the ACA, HIPAA and ARRA measures discussed above, the U.S. federal and state governments, as well as governments in other countries where we do business, continue to enact and seriously consider many other broad-based legislative and regulatory proposals that have had a material impact on or could materially impact various aspects of the health care and related benefits system. For example:

- Under the Budget Control Act of 2011 (the "BCA") and the American Taxpayer Relief Act of 2012 (the "ATRA") significant, automatic across-the-board budget cuts (known as sequestration) began in March 2013, including Medicare spending cuts of not more than 2% of total program costs per year through 2024. CMS's April 2016 final notice for 2017 Medicare Advantage benchmark payment rates (the "Final Notice") provides for rate cuts to the employer group waiver program that will begin in 2017 and be fully phased in for 2018 as well as adverse changes to the risk adjustment mechanism for dual eligible beneficiaries and the Medicare Advantage star rating program. Overall, we project the benchmark payment rates for 2017 in the Final Notice will decrease funding for our Medicare Advantage businesses by less than 1 percent in 2017 compared to 2016. This 2017 rate decrease adds to the challenge we face from the impact of the increasing cost of medical care, the HIF beginning in 2018 (as currently enacted) and CMS local and national coverage decisions that require us to pay for services and supplies that are not factored into our bids. Significant uncertainty remains as to whether and how the U.S. Congress will proceed with actions that create additional federal revenue and/or with entitlement reform. We cannot predict future Medicare or Medicaid funding levels or the impact that future federal budget actions or entitlement program reform, if it occurs, will have on our business, operations or operating results, but the effects could be materially adverse, particularly on our Medicare and/or Medicaid revenues, medical benefit ratios and operating results.
- A number of states have enacted or introduced legislation or regulations requiring life insurers to take additional steps to identify unreported deceased policyholders and make other changes to their claim payment and related escheat practices. For additional information on these life insurance matters, refer to "Life and Disability Insurance" below in this MD&A - Regulatory Environment.
- The Department of Labor has issued final rules that will increase the administrative expense of and our related liability for processing claims for disability benefits. These rules are scheduled to become effective January 1, 2018.

Other significant legislative and/or regulatory measures which are or recently have been under consideration include the following:

- Restricting our ability to limit providers' participation in our networks and/or remove providers from our networks by imposing network adequacy requirements or otherwise (including in our Medicare, Public Exchange and other Commercial products).
- Stabilizing the marketplace for individual Commercial insurance products.
- Imposing assessments on (or to be collected by) health plans or health carriers, which may or may not be passed onto their customers. These assessments may include assessments for insolvency, the uninsured, uncompensated care, Medicaid funding or defraying health care provider medical malpractice insurance costs.
- Reducing federal and/or state government funding of government-sponsored health programs in which we participate, including Medicare and Medicaid programs.
- Restricting or mandating health plan or life insurer claim processing, review, payment and/or related procedures.
- Mandating coverage for additional conditions and/or specified procedures, drugs or devices (for example, high cost pharmaceuticals, experimental pharmaceuticals and oral chemotherapy regimens).
- Imposing requirements and restrictions on the administration of pharmacy benefits, including restricting or eliminating the use of formularies for prescription drugs; restricting our ability to require members to obtain drugs through a mail order or specialty pharmacy; restricting our ability to place certain specialty or other drugs in the higher cost tiers of our pharmacy formularies; restricting our ability to make changes to drug formularies and/or our clinical programs; limiting or eliminating rebates on pharmaceuticals; restricting our ability to configure our pharmacy networks; and restricting or eliminating the use of certain drug pricing methodologies.
- Regulating electronic connectivity.
- Mandating or regulating the disclosure of health care provider fee schedules and other data about our payments to providers.

- Mandating or regulating disclosure of health care provider outcome and/or efficiency information.
- Prescribing or limiting members' financial responsibility for health care or other covered services they utilize.
- Assessing the medical device status of health information technology ("HIT") products and/or solutions, mobile consumer wellness tools and clinical decision support tools, which may require compliance with U.S. Food and Drug Administration ("FDA") requirements in relation to some of these products, solutions and/or tools.
- Imposing payment levels for services rendered to our members by health care providers who do not have contracts with us.
- Restricting the ability of employers and/or health plans to establish or impose member financial responsibility.
- Imposing additional requirements on the processing of claims for disability benefits.
- Amending or supplementing the Employee Retirement Income Security Act of 1974 ("ERISA") to impose greater requirements on the administration of employer-funded benefit plans or limit the scope of current ERISA pre-emption, which would among other things expose us and other health plans to expanded liability for punitive and other extra-contractual damages and additional state regulation.

Some of the changes, if enacted, could provide us with business opportunities. However, it is uncertain whether we can counter the potential adverse effects of such potential legislation or regulation, including whether we can recoup, through higher premium rates, expanded membership or other measures, the increased costs of mandated coverage or benefits, assessments, fees, taxes or other increased costs, including the cost of modifying our systems to implement any enacted legislation or regulations.

Our business also may be affected by other legislation and regulations. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Financial Reform Act") creates incentives for whistleblowers to speak directly to the government rather than utilizing internal compliance programs, reduces the burden of proof under the Foreign Corrupt Practices Act of 1977 (the "FCPA") and creates a Federal Insurance Office ("FIO") within the U.S. Department of the Treasury (the "Treasury") with powers that include information-gathering and subpoena authority. Although the FIO does not have authority over health insurance, it may have authority over other parts of our business, primarily life insurance.

Health savings accounts, health reimbursement arrangements and flexible spending accounts and certain of the tax, fee and subsidy provisions of the ACA are also regulated by the Treasury and the Internal Revenue Service (the "IRS").

We also may be adversely impacted by court and regulatory decisions that expand or revise the interpretations of existing statutes and regulations or impose medical malpractice or bad faith liability. Federal and state courts continue to consider cases, and federal and state regulators continue to issue regulations and interpretations, addressing group and individual life insurance payment practices, bad faith liability for denial of medical claims, the scope of ERISA's fiduciary duty requirements, the scope of the False Claims Act and the pre-emptive effect of ERISA on state laws.

Medicare

Our Medicare Advantage products compete directly with Original Medicare and Medicare Advantage products offered by other Medicare Advantage organizations and Medicare Supplement products offered by other insurers. Our Medicare PDP and Medicare Supplement products are complementary products that Medicare beneficiaries who are enrolled in Original Medicare purchase to enhance their Original Medicare coverage.

We continue to expand the Medicare markets we serve and Medicare products we offer. We expect to further expand our Medicare service area and products in 2017 and are seeking to substantially grow our Medicare membership, revenue and operating results over the next several years, including through growth in our Medicare Supplement products, which products are regulated at the state level. The organic expansion of the Medicare markets we serve and Medicare products we offer and the Medicare-related provisions of the ACA significantly increase our exposure to funding and regulation of, and changes in government policy with respect to and/or funding or regulation of, the various Medicare programs in which we participate, including changes in the amounts payable to us under those programs and/or new reforms or surcharges on existing programs. For example, sequestration began in 2013 and resulted in an automatic reduction in Medicare reimbursements to health plans of not more than 2% of total program costs per year through 2024. In addition, the ACA as currently enacted contains further significant reductions in the reimbursements we receive for our Medicare Advantage members which were fully phased-in for 2017. Since the 2014 contract year, the ACA also has required minimum MLRs for Medicare Advantage and Medicare Part D plans of 85%. If a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years (including on a retrospective basis), it will become ineligible to participate in open enrollment. If a Medicare Advantage contracts pays rebates for five consecutive years (including on a retrospective basis), it will be terminated by CMS.

CMS's Final Notice provides for rate cuts to the employer group waiver program that will begin in 2017 and be fully phased in for 2018 as well as adverse changes to the risk adjustment mechanism for dual eligible beneficiaries and the Medicare Advantage star rating program. Overall, we project the benchmark payment rates for 2017 in the Final Notice will decrease funding for our Medicare Advantage businesses by less than 1 percent in 2017 compared to 2016. This 2017 rate decrease adds to the challenge we face from the impact of the increasing cost of medical care, the HIF beginning in 2018 (as currently enacted) and CMS local and national coverage decisions that require us to pay for services and supplies that are not factored into our bids.

Our Medicare Advantage and PDP products are heavily regulated by CMS. The regulations and contractual requirements applicable to us and other private participants in Medicare programs are complex, expensive to comply with and subject to change. For example, in the second quarter of 2014, CMS issued a final rule implementing the ACA requirements that Medicare Advantage and PDP plans report and refund to CMS overpayments that those plans receive from CMS. The precise interpretation, impact and legality of this rule are not clear and are subject to pending litigation. We have invested significant resources to comply with Medicare standards, and our Medicare compliance efforts will continue to require significant resources. CMS may seek premium and other refunds, prohibit us from continuing to market and/or enroll members in or refuse to passively enroll members in one or more of our Medicare or Medicare-Medicaid demonstration (historically known as "dual eligible") plans, exclude us from participating in one or more Medicare or dual eligible programs and/or institute other sanctions against us if we fail to comply with CMS regulations or our Medicare contractual requirements.

CMS regularly audits our performance to determine our compliance with CMS's regulations and our contracts with CMS and to assess the quality of services we provide to Medicare Advantage and PDP beneficiaries. For example, CMS currently conducts risk adjustment data validation ("RADV") audits of a subset of Medicare Advantage contracts for each contract year. In December 2015, CMS released a request for information ("RFI") for a significant expansion of the RADV audit program. As described in the RFI, CMS would use third party auditors to attain its ultimate goal of subjecting all Medicare Advantage contracts to either a comprehensive or a targeted RADV audit for each contract year. Refer to "CMS Actions" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form 10-K for information on certain pending CMS audits.

A portion of each Medicare Advantage plan's reimbursement is tied to the plan's "star ratings." The star rating system considers a variety of measures adopted by CMS, including quality of preventative services, chronic illness management, compliance and overall customer satisfaction. Our star ratings and past performance scores are adversely affected by compliance issues that arise in our Medicare operations, such as our distribution of inaccurate information regarding which pharmacies were part of our Medicare network and related $1 million civil monetary penalty in 2015 and notices of non-compliance and warning letters in 2016.

Since 2015, Medicare Advantage plans must have an overall star rating of four stars or higher (out of five stars) to qualify for a quality bonus in their basic premium rates. CMS released our 2017 star ratings in October 2016. Our 2017 star ratings will be used to determine which of our Medicare Advantage plans have ratings of four stars or higher and qualify for bonus payments in 2018. Based on our membership at December 31, 2016, 92% of our Medicare Advantage members were in plans with 2017 star ratings of at least 4.0 stars. CMS will release updated stars ratings in October 2017 that will be used to determine the portion of our Medicare Advantage membership that will reside in plans with ratings of four stars or higher and qualify for bonus payments in 2019. In 2017 and going forward, our Medicare Advantage plans' operating results will continue to be significantly affected by their star ratings. CMS continues to revise the star ratings system to make it harder to achieve four stars or more. Despite our success in improving our star ratings and other quality measures for 2017 and the continuation of our improvement efforts, there can be no assurances that we will be successful in maintaining or improving our star ratings in future years. Accordingly, our plans may not be eligible for full level quality bonuses, which could adversely affect the benefits such plans can offer, reduce membership and/or reduce profit margins.

We cannot predict future Medicare funding levels or the impact that future federal budget actions or entitlement program reform, if it occurs, will have on our business, operations or operating results, but the effects could be materially adverse, particularly on our Medicare and/or Medicaid revenues, medical benefit ratios and operating results. For example, the Federal government may seek to impose restrictions on the configuration of pharmacy or other provider networks for Medicare Advantage and/or PDP plans, or otherwise restrict the ability of these plans to alter benefits, negotiate prices or establish other terms to improve affordability or maintain viability of products. We currently believe that the payments we receive and will receive in the near term are adequate to justify our continued participation in the Medicare Advantage and PDP programs, although there are economic and political pressures to continue to reduce spending on the program, and this outlook could change.

Going forward, we expect CMS, the DOJ, other federal agencies and the U.S. Congress to continue to scrutinize closely each component of the Medicare program (including Medicare Advantage, PDP, demonstration projects such as Medicare-Medicaid plans and provider network access and adequacy), modify the terms and requirements of the program and possibly seek to recast or limit private insurers' role. It is not possible to predict the outcome of this Congressional or regulatory activity, either of which could adversely affect us.

Medicaid

We are seeking to substantially grow our Medicaid and dual eligible businesses over the next several years. As a result, we also are increasing our exposure to changes in government policy with respect to and/or regulation of the various Medicaid and dual eligible programs in which we participate, including changes in the amounts payable to us under those programs.

In April 2016, CMS issued a final rule that overhauls the entire Medicaid managed care delivery system. The final rule represents the first update to Medicaid managed care regulations since 2002. Among other things the final rule requires Medicaid products to have a minimum MLR of 85%; establishes a Medicaid managed care quality rating system; and establishes provider network adequacy requirements. The minimum MLR requirements are effective beginning in 2017.

The impact of Medicaid expansion under the ACA is uncertain. The future of the ACA is uncertain, and states may opt out of the elements of the ACA requiring expansion of Medicaid coverage without losing their current federal Medicaid funding. To date, thirty-one states and the District of Columbia have expanded Medicaid coverage to the higher eligibility levels contemplated by the ACA. In addition, the election of new governors and/or state legislatures may impact states' previous decisions regarding Medicaid expansion. Starting in 2017, federal funding for expanded Medicaid coverage is decreasing and proposals for substantial changes to federal funding of state Medicaid programs are likely to be considered in 2017 and beyond, including the possibility of converting federal Medicaid support to block grants and per capita caps on federal funding. Uncertainty regarding federal funding is causing and will continue to cause states to re-evaluate their Medicaid expansions and consider new assessments, fees and/or taxes on health plans. That re-evaluation may adversely affect Medicaid payment rates, our revenues and our Medicaid membership in those states.

The economic aspects of the Medicaid and dual eligible business vary from state to state and are subject to frequent change. Medicaid premiums are paid by each state and differ from state to state. The federal government and certain states are also considering proposals and legislation for Medicaid and dual eligible program reforms or redesigns, including further program, population and/or geographic expansions of risk-based managed care, increasing beneficiary cost-sharing or payment levels, and changes to benefits, reimbursement, eligibility criteria, provider network adequacy requirements (including requiring the inclusion of specified high cost providers in our networks) and program structure. In some states, current Medicaid and dual eligible funding and premium revenue may not be adequate for us to continue program participation due to state and federal budgetary constraints and continuing efforts to reduce health care costs. In addition, our Medicaid and dual eligible contracts with states (or sponsors of Medicaid managed care plans) are subject to cancellation by the state (or the sponsors of the managed care plans) after a short notice period without cause (for example, when a state discontinues a managed care program) or in the event of insufficient state funding.

Our Medicaid and dual eligible products also are heavily regulated by CMS and state Medicaid agencies, which have the right to audit our performance to determine compliance with CMS contracts and regulations. Our Medicaid products, dual eligible products and Children's Health Insurance Program ("CHIP") contracts also are subject to complex federal and state regulations and oversight by state Medicaid agencies regarding the services we provide to Medicaid enrollees, payment for those services, network requirements (including mandatory inclusion of specified high-cost providers), and other aspects of these programs, and by external review organizations which audit Medicaid plans on behalf of the state Medicaid agencies. The laws, regulations and contractual requirements applicable to us and other participants in Medicaid and dual eligible programs, including requirements that we submit encounter data to the applicable state agency, are extensive, complex and subject to change. We have invested significant resources to comply with these standards, and our Medicaid and dual eligible program compliance efforts will continue to require significant resources. CMS and/or state Medicaid agencies may fine us, withhold payments to us, seek premium and other refunds, terminate our existing contracts, elect not to award us new contracts or renew our existing contracts, prohibit us from continuing to market and/or enroll members in or refuse to automatically assign members to one or more of our Medicaid or dual eligible products, exclude us from participating in one or more Medicaid or dual eligible programs and/or institute other sanctions against us if we fail to comply with CMS or state regulations or our contractual requirements.

We cannot predict whether pending or future federal or state legislation or court proceedings will change various aspects of the Medicaid program, nor can we predict the impact those changes will have on our business operations or operating results, but the effects could be materially adverse.

Federal Employees Health Benefits Program

Our subsidiaries contract with the Office of Personnel Management (the "OPM") to provide managed health care services under the FEHB program in their service areas. These contracts with the OPM and applicable government regulations establish premium rating arrangements for this program. OPM regulations require that community-rated FEHB plans meet a FEHB program-specific MLR by plan code and market. Managing to these rules is complicated by the simultaneous application of the minimum MLR standards and associated premium rebate requirements of the ACA. We also manage certain FEHB plans on a "cost-plus" basis. The OPM conducts periodic audits of its contractors to, among other things, verify that plans meet their applicable FEHB program-specific MLR and the premiums established under its insured contracts and costs allocated pursuant to its cost-based contracts are in compliance with the requirements of the applicable FEHB program. The OPM may seek premium refunds or institute other sanctions against us if we fail to comply with the FEHB program requirements.

The Employee Retirement Income Security Act of 1974

The provision of services to certain employee benefit plans, including certain Health Care, Group Insurance and Large Case Pensions benefit plans, is subject to ERISA, a complex set of laws and regulations subject to interpretation and enforcement by the IRS and the U.S. Department of Labor (the "DOL"). ERISA regulates certain aspects of the relationships between us and employers who maintain employee benefit plans subject to ERISA. Some of our administrative services and other activities also are subject to regulation and/or review by the DOL under ERISA. ERISA generally preempts all state and local laws that relate to employee benefit plans, but the extent of the pre-emption continues to be reviewed by courts.

Some of our Health Care, Group Insurance and Large Case Pensions products and services and related fees we charge are also subject to potential issues raised by certain judicial interpretations relating to ERISA. Under those interpretations, together with DOL regulations, we may have ERISA fiduciary duties with respect to certain general account assets held under contracts that are not guaranteed benefit policies. As a result, certain transactions related to those assets are subject to conflict of interest and other restrictions, and we must provide certain disclosures to policyholders annually. We must comply with these restrictions or face substantial penalties.

HMO, Insurance Holding Company and Other State Laws

A number of states, including Pennsylvania and Connecticut, regulate affiliated groups of insurers and HMOs such as the Company under holding company statutes. These laws may, among other things, require us and our subsidiaries to maintain certain levels of equity and require prior regulatory approval of material intercompany transfers of assets as well as transactions between the regulated companies and their affiliates, including their parent holding companies. We expect the states in which our insurance and HMO subsidiaries are licensed to continue to expand their regulation of the corporate governance and internal control activities of our insurance companies and HMOs.

The states of domicile of our regulated subsidiaries have statutory risk-based capital, or "RBC", requirements for health and other insurance companies and HMOs based on the RBC Model Act. These RBC requirements are intended to assess the capital adequacy of life and health insurers and HMOs, taking into account the risk characteristics of a company's investments and products. The RBC Model Act sets forth the formula for calculating RBC requirements, which are designed to take into account asset risks, insurance risks, interest rate risks and other relevant risks with respect to an individual company's business. In general, under these laws, an insurance company or HMO must submit a report of its RBC level to the insurance department or insurance commissioner of its state of domicile for each calendar year. At December 31, 2016, the RBC level of each of our insurance and HMO subsidiaries was above the level that would require regulatory action.

In addition, changes to regulations or the interpretation of those regulations due to regulators' increasing concerns regarding insurance company and/or HMO solvency due, among other things, to recent and expected payor insolvencies, could negatively impact our business in various ways, including through increases in solvency fund assessments, requirements that the Company hold greater levels of capital and/or delays in approving dividends from regulated subsidiaries.

For information regarding restrictions on certain payments of dividends or other distributions by our HMO and insurance company subsidiaries, refer to Note 13 "Shareholders' Equity" included in Part II, Item 8 of this Annual Report on Form 10-K.

The holding company laws for the states of domicile of Aetna and certain of its subsidiaries also restrict the ability of any person to obtain control of an insurance company or HMO without prior regulatory approval. Under those statutes, without such approval (or an exemption), no person may acquire any voting security of an insurance holding company (such as our parent company, Aetna Inc.) that controls an insurance company or HMO, or merge with such a holding company, if as a result of such transaction such person would control the insurance holding company. Control is generally defined as the direct or indirect power to direct or cause the direction of the management and policies of a person and is presumed to exist if a person directly or indirectly owns or controls 10% or more of the voting securities of another person.

Our workers' compensation business includes the comparison of medical claims data against the applicable state's fee schedule pricing, including applicable regulations and clinical guidelines. State fee schedules, which typically represent the maximum reimbursement for medical services provided to the injured worker, differ by state and change as state laws and regulations are passed and/or amended. Our workers' compensation business also includes PBM and care management services, both of which are regulated at the state level. Our workers' compensation customers include insurance carriers and TPA's who also are regulated at the state level. The laws and regulations applicable to us and other participants in the workers' compensation business are extensive, complex and subject to change. We have invested significant resources to comply with these standards, and our workers' compensation compliance efforts will continue to require significant resources. We may be subject to significant fines, penalties and litigation if we fail to comply with those laws and regulations.

Audits and Investigations

We and our vendors and other downstream entities typically have been, are currently and may in the future be involved in various governmental investigations, audits, examinations, reviews, subpoenas and other requests for information, the intensity and scope of which continue to increase. These include routine, regular and special investigations, audits, examinations and reviews by, as well as subpoenas and other requests for information from, CMS, HHS (including the Office of Civil Rights), various state insurance and health care regulatory authorities, state attorneys general, treasurers and offices of inspector general, the CCIIO, the Office of the Inspector General (the "OIG"), the OPM, the DOL, the Treasury, the FDA, committees, subcommittees and members of the U.S. Congress, the U.S. Department of Justice (the "DOJ"), the U.S. Federal Trade Commission (the "FTC"), the Office of Foreign Assets Control ("OFAC") of the Treasury, U.S. attorneys and other state, federal and international governmental authorities.

For example, certain of our Medicare Advantage plans are currently under audit for, among other things, compliance with coding and other requirements under the Medicare risk adjustment model; federal and state auditors are challenging our Commercial business compliance with the ACA's minimum MLR requirements; federal auditors are challenging our FEHB plans' compliance with the OPM's FEHB program specific minimum MLR requirements; and our Commercial business is subject to audits related to the ACA's risk adjustment and reinsurance data since those programs were implemented in 2014. HHS also has begun to audit health plans, providers and other parties to enforce HIPAA compliance, including with respect to data security. Such government actions may, among other things, prevent or delay us from implementing planned premium rate increases and have resulted and may result in restrictions on our business, changes to or clarifications of our business practices, retroactive adjustments to premiums, refunds to members or the government, withholding of premium payments to us by government agencies, payments under insurance policies prior to those payments being due under the terms of the policy, assessments of damages, civil or criminal fines or penalties (including under the federal false claims act (the "False Claims Act")), or other sanctions, including the possible suspension or loss of licensure and/or suspension or exclusion from participation in government programs.

A significant number of states are investigating life insurers' and health insurers' claims payment and related escheat practices. For additional information on these life insurance matters, refer to "Life and Disability Insurance" below in this MD&A - Regulatory Environment.

Refer to "Litigation and Regulatory Proceedings" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form 10-K for more information regarding pending audits and investigations.

Federal and State Reporting

We are subject to extensive financial and business reporting requirements, including penalties for inaccuracies and/or omissions, at both the state and federal level. Our ability to comply with certain of these requirements depends on receipt of information from third parties that may not be readily available or reliably provided in all instances. We are and will continue to be required to modify our information systems, dedicate significant resources and incur significant expenses to comply with these requirements. However, we cannot eliminate the risks of unavailability of or errors in our reports.

Fraud, Waste and Abuse Laws

Federal and state governments have made investigating and prosecuting health care fraud, waste and abuse a priority. Fraud, waste and abuse prohibitions encompass a wide range of activities, including kickbacks or other inducements for referral of members or for the coverage of products (such as prescription drugs) by a plan, billing for unnecessary medical services by a health care provider, improper marketing, and violations of patient privacy rights. Companies involved in public health care programs such as Medicare and/or Medicaid are required to maintain compliance programs to detect and deter fraud, waste and abuse, and are often the subject of fraud, waste and abuse investigations and audits. The regulations and contractual requirements applicable to us and other participants in these public-sector programs are complex and subject to change. Although our compliance program is designed to meet all statutory and regulatory requirements, our policies and procedures are frequently under review and subject to updates, and our training and education programs continue to evolve. We have

invested significant resources to comply with Medicare and Medicaid program standards. Ongoing vigorous law enforcement and the highly technical regulatory scheme mean that our compliance efforts in this area will continue to require significant resources.

Federal and State Laws and Regulations Governing Submission of Information and Claims to Agencies
We are subject to federal and state laws and regulations that apply to the submission of information and claims to various government agencies. For example, the False Claims Act provides, in part, that the federal government may bring a lawsuit against any person or entity who the government believes has knowingly presented, or caused to be presented, a false or fraudulent request for payment from the federal government, or who has made a false statement or used a false record to get a claim approved. There also is False Claims Act liability for knowingly or improperly avoiding repayment of an overpayment received from the government and/or failing to promptly report and return any such overpayment. The federal government, whistleblowers and some courts have taken the position that claims presented in violation of other statutes, such as the federal anti-kickback statute, may be considered a violation of the False Claims Act. In addition, the ACA may have expanded the jurisdiction of, and our exposure to, the False Claims Act to products sold on Public Exchanges. Violations of the False Claims Act are punishable by treble damages and penalties of up to a specified dollar amount per false claim. In addition, a special provision under the False Claims Act allows a private person (for example, a "whistleblower" such as a disgruntled current or former competitor, member or employee) to bring an action under the False Claims Act on behalf of the government alleging that a company has defrauded the federal government and permits the private person to share in any settlement of, or judgment entered in, the lawsuit.

A number of states, including states in which we operate, have adopted their own false claims acts and whistleblower provisions that are similar to the False Claims Act. From time to time, companies in the health and related benefits industry, including ours, may be subject to actions under the False Claims Act or similar state laws.

Product Design and Administration and Sales Practices
State and/or federal regulatory scrutiny of health care benefit and life insurance product design and administration and marketing and advertising practices, including the filing of insurance policy forms, the adequacy of provider networks, the accuracy of provider directories, and the adequacy of disclosure regarding products and their administration, is increasing as are the penalties being imposed for inappropriate practices. Medicare, Medicaid and dual eligible products and products offering more limited benefits in particular continue to attract increased regulatory scrutiny.

Guaranty Fund Assessments/Solvency Protection
Under guaranty fund laws existing in all states, insurers doing business in those states can be assessed (in most states up to prescribed limits) for certain obligations of insolvent insurance companies to policyholders and claimants. The life and health insurance guaranty associations in which we participate that operate under these laws respond to insolvencies of long-term care insurers as well as health insurers. Our assessments generally are based on a formula relating to our health care premiums in the state compared to the premiums of other insurers. Certain states allow assessments to be recovered over time as offsets to premium taxes. Some states have similar laws relating to HMOs and/or other payors such as not-for-profit consumer governed health plans established under the ACA. Refer to "Guaranty Fund Assessments, Market Stabilization and Other Non-Voluntary Risk Sharing Pools" in Note 17 "Commitments and Contingencies" included in Part II, Item 8 of this Annual Report on Form 10-K for more information on the expected liquidation of Penn Treaty Network America Insurance Company and one of its subsidiaries (collectively, "Penn Treaty") and certain assessments to which our HMOs are subject. If Penn Treaty is placed in liquidation in the first half of 2017, we expect to record an estimated liability and expense of approximately $230 million pretax at the time of such event. While historically we have ultimately recovered more than half of guaranty fund assessments through statutorily permitted premium tax offsets, significant increases in assessments could lead to legislative and/or regulatory actions that may limit future offsets.

Regulation of Pharmacy Operations
CVS has provided certain PBM services to us and certain of our customers and members since January 1, 2011. As amended, our PBM agreement with CVS has a term ending in December 2022, although we have certain termination rights beginning in January 2020. Express Scripts also provides certain PBM services to certain of our customers and members under an agreement with a term ending in 2017 for a portion of our Commercial and Medicaid members. Express Scripts also provided PBM services to a portion of our Medicare members in 2015.

Notwithstanding our contracting with our PBM services suppliers, we remain responsible to regulators and members for the delivery of PBM services. In addition, we continue to operate two mail order pharmacy facilities and one specialty pharmacy facility (our "Pharmacies") and utilize certain pharmacies of our PBM services suppliers. Our Pharmacies dispense pharmaceuticals throughout the U.S. and are participating providers in Medicare, Medicare Part D and various Medicaid programs. The pharmacy practice is generally regulated at the state level by state boards of pharmacy. Our Pharmacies are

required to be licensed in the state where they are located, as well as the states that require registration or licensure of mail order pharmacies with the state's board of pharmacy or similar regulatory body. Our Pharmacies also must register with the U.S. Drug Enforcement Administration and individual state controlled substance authorities in order to dispense controlled substances and must comply with applicable Medicare, Medicaid and other provider rules and regulations, including the False Claims Act, state false claims acts and federal and state anti-kickback laws. Our PBM services suppliers' owned and contracted pharmacies are subject to these same licensing requirements and other laws and regulations. The loss or suspension of any such licenses or registrations could have a material adverse effect on our ability to meet our contractual obligations to our customers, which could, in turn, have a material adverse effect on our pharmacy business and/or operating results.

Regulation of Pharmacy Benefit Management Operations

Our PBM services are regulated directly and indirectly at the federal and state levels, including being subject to the False Claims Act and state false claims acts and federal and state anti-kickback laws. These laws and regulations govern, and proposed legislation and regulations may govern, critical PBM practices, including disclosure, receipt and retention of rebates and other payments received from pharmaceutical manufacturers; use of, administration of, and/or changes to drug formularies, maximum allowable cost list pricing, average wholesale prices and/or clinical programs; disclosure of data to third parties; drug utilization management practices; the level of duty a PBM owes its customers; configuration of pharmacy networks; the operations of our Pharmacies (including audits of our Pharmacies); disclosure of negotiated provider reimbursement rates; disclosure of fees associated with administrative service agreements and patient care programs that are attributable to members' drug utilization; and registration or licensing of PBMs. Failure by us or one of our PBM services suppliers to comply with these laws or regulations could result in material fines and/or sanctions and could have a material adverse effect on our operating results.

Life and Disability Insurance

Our life and disability insurance operations are subject to extensive regulation. Changes in these regulations, such as expanding the definition of disability or mandating changes to claim payment, determination and/or settlement practices, could have a material adverse impact on our life insurance and/or disability insurance operations and/or operating results. Legislation has been enacted or introduced in a number of states requiring life insurers to take additional steps to identify unreported deceased policy holders, and make other changes to their claim payment and related escheat practices, including consultation of certain databases. A significant number of states are investigating life insurers' claims payment and related escheat practices, and these investigations have resulted in significant charges to earnings by other life insurers in connection with related settlement agreements. We have received requests for information from a number of states, and certain of our subsidiaries are being audited, with respect to our life insurance claim payment and related escheat practices. Given the judicial, legislative and regulatory uncertainty with respect to life insurance claim payment and related escheat practices, it is reasonably possible that we may incur additional liability related to those practices, whether as a result of changes in our business practices, litigation, government actions or otherwise, which could adversely affect our operating results and cash flows.

Consumer Protection Laws

Our consumer business which began serving members on January 1, 2016 and certain of our other businesses participate in direct-to-consumer activities, and we increasingly offer mobile and web-based solutions to our members and to other consumers. We are therefore subject to federal and state regulations applicable to electronic communications and to other general consumer protection laws and regulations. In particular, the FTC is aggressively exercising its enforcement authority in the areas of consumer privacy and data security with a focus on web-based, mobile products and "big data." As a result of the widely-reported large scale U.S. commercial data breaches during 2016 and prior years, the FTC and state regulators have increased their enforcement activity in these regimes. These enforcement developments will impact the design, management and operation of our businesses, including our consumer business, our privacy and security strategy and our web-based and mobile assets.

International Regulation

We expect to continue to expand our Health Care operations in foreign countries through both organic growth and acquisitions. We currently have insurance licenses in several foreign jurisdictions and do business directly or through local affiliations in numerous countries around the world. The impact on our international operations and results of the United Kingdom's pending exit from the European Union ("EU") is uncertain.

Our international operations are subject to different, and sometimes more stringent, legal and regulatory requirements, which vary widely by jurisdiction, including anti-corruption laws; economic sanctions laws; various privacy, insurance, tax, tariff and trade laws and regulations; corporate governance, privacy, data protection (including the EU's General Data Protection Regulation which will apply across the EU effective May 2018), data mining, data transfer, labor and employment, intellectual property, consumer protection and investment laws and regulations; discriminatory licensing procedures; compulsory cessions of reinsurance; required localization of records and funds; higher premium and income taxes; limitations on dividends and

repatriation of capital; and requirements for local participation in an insurer's ownership. In addition, the expansion of our operations into foreign countries increases our exposure to the anti-bribery, anti-corruption and anti-money laundering provisions of U.S. law, including the FCPA, and corresponding foreign laws, including the U.K. Bribery Act 2010 (the "UK Bribery Act").

The FCPA prohibits offering, promising or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage. We also are subject to applicable anti-corruption laws of the jurisdictions in which we operate. In many countries outside the U.S., health care professionals are employed by the government. Therefore, our dealings with them are subject to regulation under the FCPA. Violations of the FCPA and other anti-corruption laws may result in severe criminal and civil sanctions as well as other penalties, and the SEC and the DOJ have increased their enforcement activities with respect to the FCPA. The UK Bribery Act is an anti-corruption law that is broader in scope than the FCPA and applies to all companies with a nexus to the United Kingdom. Disclosures of FCPA violations may be shared with the UK authorities, thus potentially exposing companies to liability and potential penalties in multiple jurisdictions. We have internal control policies and procedures and conduct training and compliance programs for our employees to deter prohibited practices. However, if our employees or agents fail to comply with applicable laws governing our international operations, we may face investigations, prosecutions and other legal proceedings and actions which could result in civil penalties, administrative remedies and criminal sanctions. See *"As we expand our international operations, we will increasingly face political, legal and compliance, operational, regulatory, economic and other risks that we do not face or are more significant than in our domestic operations. Our exposure to these risks is expected to increase"* in "Risk Factors" included in Part I, Item 1A of this Annual Report on Form 10-K for a discussion of the risks related to operating globally.

Anti-Money Laundering Regulations

Certain of our lines of business are subject to Treasury anti-money laundering regulations. Those lines of business have implemented anti-money laundering policies designed to insure their compliance with the regulations. We also may be subject to anti-money laundering laws in non-U.S. jurisdictions where we operate.

Office of Foreign Assets Control

We also are subject to regulation by OFAC. OFAC administers and enforces economic and trade sanctions based on U.S. foreign policy and national security goals against targeted foreign countries and regimes, terrorists, international narcotics traffickers, those engaged in activities related to the proliferation of weapons of mass destruction, and other threats to the national security, foreign policy or economy of the United States. In addition, we may be subject to similar regulations in the non-U.S. jurisdictions in which we operate.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Our earnings and financial position are exposed to interest rate risk, credit quality risk and market valuation risk.

Evaluation of Interest Rate and Credit Quality Risk

We manage interest rate risk by seeking to maintain a tight match between the durations of our assets and liabilities when appropriate. We manage credit risk by seeking to maintain high average credit quality ratings and diversified sector exposure within our debt securities portfolio. In connection with our investment and risk management objectives, we also use derivative financial instruments whose market value is at least partially determined by, among other things, levels of or changes in interest rates (short-term or long-term), duration, prepayment rates, equity markets or credit ratings/spreads. Our use of these derivatives is generally limited to hedging risk and has principally consisted of using interest rate swaps, treasury rate locks, forward contracts, futures contracts, warrants, put options and credit default swaps. These instruments, viewed separately, subject us to varying degrees of interest rate, equity price and credit risk. However, when used for hedging, we expect these instruments to reduce overall risk.

Investments

Our investment portfolio supported the following products at December 31, 2016 and 2015:

(Millions)	**2016**	**2015**
Experience-rated products	**$ 1,154**	$ 1,157
Discontinued products	**2,929**	3,059
Remaining products	**20,796**	20,464
Total investments	**$ 24,879**	$ 24,680

Investment risks associated with our experience-rated and discontinued products generally do not impact our operating results. The risks associated with investments supporting experience-rated pension and annuity products in our Large Case Pensions business are assumed by the contract holders and not by us (subject to, among other things, certain minimum guarantees). Assets supporting experience-rated products may be subject to contract holder or participant withdrawals. The distributions on our experience-rated products consisted of scheduled contract maturities and benefit payments and contract holder withdrawals of $90 million, $285 million and $153 million, respectively, in the years ended December 31, 2016, 2015 and 2014. Participant-directed withdrawals were not material in the years ended December 31, 2016, 2015 or 2014. Refer to Note 19 "Discontinued Products" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information related to our discontinued products.

Debt and Equity Securities

The debt securities in our investment portfolio had an average credit quality rating of A at both December 31, 2016 and 2015, with approximately $5.2 billion and $5.0 billion rated AAA at December 31, 2016 and 2015, respectively. The debt securities that were rated below investment grade (that is, having a credit quality rating below BBB-/Baa3) were $1.6 billion and $1.4 billion at December 31, 2016 and 2015, respectively (of which 12% and 13% at December 31, 2016 and 2015, respectively, supported our experience-rated and discontinued products).

At December 31, 2016 and 2015, we held $812 million and $956 million, respectively, of municipal debt securities that were guaranteed by third parties, representing 3% and 4%, respectively, of our total investments. These securities had an average credit quality rating of AA at both December 31, 2016 and 2015 with the guarantee. These securities had an average credit quality rating of A at both December 31, 2016 and 2015 without the guarantee. We do not have any significant concentration of investments with third party guarantors (either direct or indirect).

At both December 31, 2016 and 2015, less than 1% of our investment portfolio was comprised of investments that were either European sovereign, agency, or local government debt of countries which, in our judgment based on an analysis of market-yields, are experiencing economic, fiscal or political strains such that the likelihood of default may be higher than if those factors did not exist.

We generally classify our debt and equity securities as available for sale, and carry them at fair value on our balance sheets. At both December 31, 2016 and 2015, 1% of our debt and equity securities were valued using inputs that reflect our own assumptions (categorized as Level 3 inputs in accordance with GAAP). Refer to Note 5 "Fair Value" included in Part II, Item 8 of this Annual Report on Form 10-K for additional information on the methodologies and key assumptions we use to determine the fair value of investments.

For additional information related to our investments, see Note 4 "Investments" included in Part II, Item 8 of this Annual Report on Form 10-K.

We regularly review our debt securities to determine if a decline in fair value below the carrying value is other-than temporary. If we determine a decline in fair value is other-than-temporary, we will write down the carrying value of the debt security. The amount of the credit-related impairment is included in our operating results, and the non-credit related component is included in other comprehensive income unless we intend to sell the debt security or it is more likely than not that we will be required to sell the debt security prior to its anticipated recovery of its amortized cost basis. Accounting for other-than-temporary impairment ("OTTI") of our debt securities is considered a critical accounting estimate. Refer to "Critical Accounting Estimates - Other-Than-Temporary Impairment of Debt Securities" of MD&A included in Part II, Item 7 of this Annual Report on Form 10-K for additional information.

Evaluation of Market Risks

We regularly evaluate our risk from market-sensitive instruments by examining, among other things, levels of or changes in interest rates (short-term or long-term), duration, prepayment rates, equity markets and/or credit ratings/spreads. We also regularly evaluate the appropriateness of investments relative to our management-approved investment guidelines (and operate within those guidelines) and the business objectives of our portfolios.

On a quarterly basis, we review the impact of hypothetical net losses in our investment portfolio on our consolidated near-term financial position, operating results and cash flows assuming the occurrence of certain reasonably possible changes in near-term market rates and prices. Interest rate changes (whether resulting from changes in treasury yields or credit spreads or other factors) represent the most material risk exposure category for us. We have estimated the impact on the fair value of our market sensitive instruments based on the net present value of cash flows using a representative set of likely future interest rate scenarios. The assumptions used were as follows: an immediate increase of 100 basis points in interest rates (which we believe represents a moderately adverse scenario and is approximately equal to the historical annual volatility of interest rate

movements for our intermediate-term available-for-sale debt securities) and an immediate decrease of 15% in prices for domestic equity securities.

Assuming an immediate 100 basis point increase in interest rates and immediate decrease of 15% in the prices for domestic equity securities, the theoretical decline in the fair values of our market sensitive instruments at December 31, 2016 is as follows:

- The fair value of our long-term debt would decline by $1.1 billion ($1.6 billion pretax). Changes in the fair value of our long-term debt do not impact our financial position or operating results.
- The theoretical reduction in the fair value of our investment securities partially offset by the theoretical reduction in the fair value of our interest rate sensitive liabilities would result in a net decline in fair value of $322 million ($495 million pretax) related to our non-experience-rated products. Reductions in the fair value of our investment securities would be reflected as an unrealized loss in equity, as we classify these securities as available for sale. We do not record our liabilities at fair value.

Based on our overall exposure to interest rate risk and equity price risk, we believe that these changes in market rates and prices would not materially affect our consolidated near-term financial position, operating results or cash flows as of December 31, 2016.

Evaluation of Operational Risks

We also face certain operational risks, including risks related to information security, including cybersecurity. We and our vendors have experienced a variety of cyber attacks, and we and our vendors expect to continue to experience cyber attacks going forward. Among other things, we have experienced automated attempts to gain access to our public facing networks, brute force, SYN flood and distributed denial of service attacks, attempted virus infections, ransomware attacks, spear-phishing campaigns, mass reconnaissance attempts, malware or injection attempts, phishing, PHP injection and cross-site scripting. We also have seen an increase in attacks designed to obtain access to consumers' accounts using illegally obtained demographic information. We are dedicating and will continue to dedicate significant resources and incur significant expenses to maintain and update on an ongoing basis our systems and processes that are designed to mitigate the information security risks we face and protect the security of our computer systems, software, networks and other technology assets against attempts by unauthorized parties to obtain access to confidential information, destroy data, disrupt or degrade service, sabotage systems or cause other damage. The impact of the cyber attacks we have experienced through December 31, 2016 has not been material to our operations or operating results. Our Board and Audit Committee are regularly informed regarding our information security policies, practices and status.

Item 8. Financial Statements and Supplementary Data

Index to Consolidated Financial Statements

Consolidated Balance Sheets

(Millions)	At December 31, 2016	2015
Assets:

Notes to Consolidated Financial Statements

1. Organization

We conduct our operations in three business segments:

- **Health Care** consists of medical, pharmacy benefit management services, dental, behavioral health and vision plans offered on both an Insured basis (where we assume all or a majority of the risk for medical and dental care costs) and an employer-funded basis (where the plan sponsor under an administrative services contract ("ASC") assumes all or a majority of this risk) and emerging business products and services that complement and enhance our medical products. We also offer Medicare and Medicaid products and services and other medical products, such as medical management and data analytics services, medical stop loss insurance, workers' compensation administrative services and products that provide access to our provider networks in select geographies.
- **Group Insurance** primarily includes group life insurance and group disability products. Group life insurance products are offered on an Insured basis. Group disability products are offered to employers on both an Insured and an ASC basis. Group Insurance also includes long-term care products that were offered primarily on an Insured basis. We no longer solicit or accept new long-term care customers.
- **Large Case Pensions** manages a variety of retirement products (including pension and annuity products) primarily for tax-qualified pension plans. These products provide a variety of funding and benefit payment distribution options and other services. Large Case Pensions also includes certain discontinued products (refer to Note 19 for additional information).

Our three business segments are distinct businesses that offer different products and services. Our Chief Executive Officer evaluates financial performance and makes resource allocation decisions at these segment levels. The accounting policies of the segments are the same as those described in the summary of significant accounting policies in Note 2. We evaluate the performance of these business segments based on operating earnings (net income or loss attributable to Aetna, excluding net realized capital gains or losses and other items, if any). Refer to Note 18 for segment financial information.

2. Summary of Significant Accounting Policies

Basis of Presentation
The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and include the accounts of Aetna and the subsidiaries that we control. All significant intercompany balances have been eliminated in consolidation. The Company has evaluated subsequent events from the balance sheet date through the date the financial statements were issued and determined there were no subsequent events to disclose other than as disclosed in Notes 3, 9, 13, 16 and 17.

Reclassifications
Certain prior year amounts have been reclassified to conform to the current year presentation.

Use of Estimates
The preparation of the accompanying consolidated financial statements in conformity with GAAP requires the use of estimates and assumptions that affect the amounts reported in these consolidated financial statements and notes. We consider the following accounting estimates critical in the preparation of the accompanying consolidated financial statements: health care costs payable, other insurance liabilities, recoverability of goodwill and other acquired intangible assets, measurement of defined benefit pension and other postretirement employee benefit plans, other-than-temporary impairment of debt securities, revenue recognition, allowance for estimated terminations and uncollectible accounts and accounting for certain provisions of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (as amended, collectively, the "ACA"). We use information available to us at the time estimates are made; however, these estimates could change materially if different information or assumptions were used. Additionally, these estimates may not ultimately reflect the actual amounts of the final transactions that occur.

Cash and Cash Equivalents
Cash and cash equivalents include cash on-hand and debt securities with an original maturity of three months or less when purchased. The carrying value of cash equivalents approximates fair value due to the short-term nature of these investments. Cash and cash equivalents at December 31, 2016 include approximately $13 billion of highly-rated money market fund investments related to the net proceeds received from the 2016 senior notes we issued in June 2016 to partially fund our then pending acquisition of Humana Inc. (the "Humana Acquisition"). These money market funds have average maturities of 60 days or less and are redeemable daily at par value plus accrued dividends with specified yield rates.

Investments
Debt and Equity Securities
Debt and equity securities consist primarily of U.S. Treasury and agency securities, mortgage-backed securities, corporate and foreign bonds and other debt and equity securities. Debt securities are classified as either current or long-term investments based on their contractual maturities unless we intend to sell an investment within the next twelve months, in which case it is classified as current on our balance sheets. We have classified our debt and equity securities as available for sale and carry them at fair value. Refer to Note 5 for additional information on how we estimate the fair value of these investments.

The cost for mortgage-backed and other asset-backed securities is adjusted for unamortized premiums and discounts, which are amortized using the interest method over the estimated remaining term of the securities, adjusted for anticipated prepayments.

We regularly review our debt and equity securities to determine whether a decline in fair value below the carrying value is other-than-temporary. When a debt or equity security is in an unrealized capital loss position, we monitor the duration and severity of the loss to determine if sufficient market recovery can occur within a reasonable period of time. If a decline in the fair value of a debt security is considered other-than-temporary, the cost basis or carrying value of the debt security is written down. The write-down is then bifurcated into its credit and non-credit related components. The amount of the credit-related component is included in our operating results, and the amount of the non-credit related component is included in other comprehensive income, unless we intend to sell the debt security or it is more likely than not that we will be required to sell the debt security prior to its anticipated recovery of its amortized cost basis. We do not accrue interest on debt securities when management believes the collection of interest is unlikely. If we intend to sell an equity security, we will recognize the unrealized capital gain or loss in our operating results.

Mortgage Loans
We value our mortgage loan investments on our balance sheet at the unpaid principal balance, net of impairment reserves. A mortgage loan may be impaired when it is a problem loan (i.e., more than 60 days delinquent, in bankruptcy or in process of foreclosure), a potential problem loan (i.e., high probability of default) or a restructured loan. For impaired loans, a specific impairment reserve is established for the difference between the recorded investment in the loan and the estimated fair value of the collateral. We apply our loan impairment policy individually to all loans in our portfolio.

The impairment evaluation described above also considers characteristics and risk factors attributable to the aggregate portfolio. We establish an additional allowance for loan losses if it is probable that there will be a credit loss on a group of similar mortgage loans. We consider the following characteristics and risk factors when evaluating if a credit loss is probable on a group of similar mortgage loans: loan to value ratios, property type (e.g., office, retail, apartment, industrial), geographic location, vacancy rates and property condition. As a result of that evaluation, we determined that a credit loss was not probable and did not record any additional allowance for groups of similar mortgage loans in 2016, 2015 or 2014.

We record full or partial impairments of loans at the time an event occurs affecting the legal status of the loan, typically at the time of foreclosure or upon a loan modification giving rise to forgiveness of debt. Interest income on a potential problem loan or restructured loan is accrued to the extent we deem it collectible and the loan continues to perform under its original or restructured terms. Interest income on problem loans is recognized on a cash basis. Cash payments on loans in the process of foreclosure are treated as a return of principal. Mortgage loans with a maturity date or a committed prepayment date within twelve months are classified as current on our balance sheets.

Other Investments
Other investments consist primarily of the following:

- Private equity and hedge fund limited partnerships, which are carried at fair value on our balance sheets. The fair values of private equity limited partnerships are estimated based on the fair value of the underlying investment funds provided by the general partner or manager of the investments, the financial statements of which generally are audited. We typically do not have a controlling ownership in our private equity limited partnership investments, and therefore we apply the equity method of accounting for these investments. Hedge fund limited partnerships are carried at fair

value which is estimated using the net asset value ("NAV") per unit as reported by the administrator of the underlying investment fund as a practical expedient to fair value. We review our investments for impairment at least quarterly and monitor their performance throughout the year through discussions with the administrators, managers and/or general partners. If we become aware of an impairment of a limited partnership's investments through our review or prior to receiving the limited partnership's financial statements at the balance sheet date, we will recognize an impairment by recording a reduction in the carrying value of the limited partnership with a corresponding charge to realized capital losses.

- Investment real estate, which is carried on our balance sheets at depreciated cost, including capital additions, net of write-downs for other-than-temporary declines in fair value. Depreciation is calculated using the straight-line method based on the estimated useful life of each asset. If any of our real estate investments is considered held-for-sale, we carry it at the lower of its carrying value or fair value less estimated selling costs. We generally estimate fair value using a discounted future cash flow analysis in conjunction with comparable sales information. At the time of the sale, we record the difference between the sales price and the carrying value as a realized capital gain or loss.
- Privately-placed equity securities, which are carried at cost on our balance sheets. We do not estimate the fair value of these securities if there are no identified events or changes in circumstances that may have a significant adverse effect on the fair value of the investment. Additionally, as a member of the Federal Home Loan Bank of Boston ("FHLBB"), we are required to purchase and hold shares of the FHLBB. These shares are restricted and also carried at cost.
- Bank loans, which are carried on our balance sheets at amortized cost, net of any allowance for impairments. If any of our bank loans are considered held-for-sale, we carry those loans at the lower of cost or fair value.
- Derivatives, which we make limited use of in order to manage interest rate, foreign exchange and price risk and credit exposure. The derivatives we use consist primarily of interest rate swaps, treasury rate locks, forward contracts, futures contracts, warrants, put options, and credit default swaps. Derivative assets are recorded in investments and derivative liabilities are recorded in accrued expenses and other current liabilities on our balance sheets and reflected at fair value. When we enter into a derivative contract, if certain criteria are met, we may designate it as one of the following: a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment; a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability; or a foreign currency fair value or cash flow hedge.

Net Investment Income

Net investment income on investments supporting Health Care and Group Insurance liabilities and Large Case Pensions products (other than experience-rated and discontinued products) is reflected in our operating results.

Experience-rated products are products in the Large Case Pensions business where the contract holder, not us, assumes investment and other risks, subject to, among other things, minimum guarantees provided by us. The effect of investment performance on experience-rated products is allocated to contract holders' accounts daily, based on the underlying investment experience and, therefore, does not impact our operating results (as long as our minimum guarantees are not triggered).

When we discontinued the sale of our fully-guaranteed Large Case Pensions products, we established a reserve for anticipated future losses from these discontinued products and segregated the related investments. Investment performance on this separate portfolio is ultimately credited/charged to the reserve and, generally, does not impact our operating results.

Net investment income supporting Large Case Pensions' experience-rated and discontinued products is included in net investment income in our statements of income and is credited to contract holders' accounts or the reserve for anticipated future losses through a charge to current and future benefits.

Realized/Unrealized Capital Gains and Losses

Realized capital gains and losses on investments supporting Health Care and Group Insurance liabilities and Large Case Pensions products (other than experience-rated and discontinued products) are reflected in our operating results. Realized capital gains and losses are determined on a specific identification basis. We reflect purchases and sales of debt and equity securities and alternative investments on the trade date. We reflect purchases and sales of mortgage loans and investment real estate on the closing date.

Realized capital gains and losses on investments supporting Large Case Pensions' experience-rated and discontinued products are not included in realized capital gains and losses in our statements of income and instead are credited directly to contract holders' accounts, in the case of experience-rated products, or allocated to the reserve for anticipated future losses, in the case of discontinued products. The contract holders' accounts are reflected in policyholders' funds, and the reserve for anticipated future losses is reflected in future policy benefits on our balance sheets.

Unrealized capital gains and losses on investments supporting Health Care and Group Insurance liabilities and Large Case Pensions products (other than experience-rated and discontinued products) are reflected in shareholders' equity, net of tax, as a component of accumulated other comprehensive loss.

Unrealized capital gains and losses on investments supporting Large Case Pensions' experience-rated products are credited directly to contract holders' accounts, which are reflected in policyholders' funds on our balance sheets. Unrealized capital gains and losses on discontinued products are reflected in other long-term liabilities on our balance sheets.

Refer to Note 19 for additional information on our discontinued products.

Premium Receivables
Premium receivables include the uncollected amounts from fully-insured groups, individuals and government programs and are reported net of an allowance for estimated terminations and uncollectible accounts of $139 million and $146 million at December 31, 2016 and 2015, respectively. We estimate the allowance for estimated terminations and uncollectible accounts using management's best estimate of collectability, taking into consideration the age of the outstanding amount, historical collection patterns and other economic factors.

Other Receivables
Other receivables include uncollected amounts from self-funded groups, pharmacy rebates, other government receivables, proceeds due from brokers on investment trades, provider advances and other miscellaneous amounts due to us. These receivables are reported net of an allowance for uncollectible accounts of $37 million and $20 million at December 31, 2016 and 2015, respectively. We estimate the allowance for uncollectible accounts using management's best estimate of collectability, taking into consideration the age of the outstanding amount, historical collection patterns and other economic factors.

Reinsurance Recoverables
We utilize reinsurance agreements primarily to reduce our required capital and to facilitate the acquisition or disposition of certain insurance contracts. Ceded reinsurance agreements permit us to recover a portion of our losses from reinsurers, although they do not discharge our primary liability as the direct insurer of the risks reinsured. Failure of reinsurers to indemnify us could result in losses; however, we do not expect charges for unrecoverable reinsurance to have a material effect on our operating results or financial position. We evaluate the financial condition of our reinsurers and monitor concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of our reinsurers. At December 31, 2016, our reinsurance recoverables consisted primarily of amounts due from third parties that are rated consistent with companies that are considered to have the ability to meet their obligations.

Health Care Contract Acquisition Costs
Health care benefits products included in our Health Care segment are cancelable by either the customer or the member monthly upon written notice. Acquisition costs related to our prepaid health care and health indemnity contracts are generally expensed as incurred. At December 31, 2016 and 2015, the balance of our deferred acquisition costs was $412 million and $305 million, respectively, comprised primarily of commissions paid on our Medicare Supplement products. Deferred acquisition costs are recorded as other current assets or other long-term assets on our balance sheets and are amortized over the estimated life of the contracts.

Goodwill and Other Acquired Intangible Assets
When we complete an acquisition, we apply the acquisition method of accounting, which requires the recognition of goodwill (the excess cost of the acquisition over the fair value of net assets acquired and identified intangible assets). We evaluate goodwill for impairment (at the reporting unit level) annually, or more frequently if circumstances indicate a possible impairment, by comparing an estimate of the fair value of the applicable reporting unit to its carrying value, including goodwill. If the carrying value exceeds fair value, we have historically compared the implied fair value of the applicable goodwill to its carrying amount to measure the amount of goodwill impairment, if any. Beginning in 2017, we adopted, on a prospective basis, the recently issued accounting standards update related to the methodology utilized to evaluate goodwill impairment. This update simplifies the methodology used to perform our annual, or interim, goodwill impairment evaluations. Our evaluation will be performed by comparing the estimated fair value of a reporting unit with its carrying amount. An impairment charge would be recognized when the carrying amount exceeds the estimated fair value of the reporting unit. Impairments, if any, would be classified as an operating expense. The fair value of each reporting unit substantially exceeded its carrying value in each of the years in the three-year period ended December 31, 2016, and therefore there were no goodwill impairment losses recognized in any of those years.

Our annual impairment tests were based on an evaluation of future discounted cash flows. These evaluations utilized the best information available to us at the time, including supportable assumptions and projections we believe are reasonable. Collectively, these evaluations were our best estimates of projected future cash flows. Our discounted cash flow evaluations used discount rates that correspond to a weighted-average cost of capital consistent with a market-participant view. The discount rates are consistent with those used for investment decisions and take into account the operating plans and strategies of the Health Care and Group Insurance segments. Certain other key assumptions utilized, including changes in membership, revenue, health care costs, operating expenses, impacts of health care reform fees, assessments and taxes, and effective tax rates, are based on estimates consistent with those utilized in our annual planning process that we believe are reasonable. If we do not achieve our earnings objectives, the assumptions and estimates underlying these goodwill impairment evaluations could be adversely affected, and we may impair a portion of our goodwill, which would adversely affect our operating results in the period of impairment.

We report other acquired intangible assets at historical cost, net of accumulated amortization. Other acquired intangible assets primarily relate to provider networks, customer lists, value of business acquired ("VOBA"), technology and trademarks and are amortized over the useful-life based upon the pattern of future cash flows attributable to the asset. Other than VOBA and indefinite lived trademarks, other acquired intangible assets generally are amortized using the straight-line method. VOBA is amortized over the expected life of the acquired contracts in proportion to estimated premiums. Other intangible assets with indefinite lives are not amortized but are tested for impairment at least annually.

We regularly evaluate whether events or changes in circumstances indicate that the carrying value of other acquired intangible assets may not be recoverable. If we determine that the carrying value of an asset may not be recoverable, we group the asset with other assets and liabilities at the lowest level for which independent identifiable cash flows are available and estimate the future undiscounted cash flows expected to result from future use of the asset group and its eventual disposition. If the sum of the expected undiscounted future cash flows is less than the carrying value of the asset group, we recognize an impairment loss for the amount by which the carrying value of the asset group exceeds its fair value. There were no material impairment losses on other acquired intangible assets recognized in any of the three years ended December 31, 2016, 2015 or 2014.

Property and Equipment

We report property and equipment at historical cost, net of accumulated depreciation. At December 31, 2016 and 2015, the historical cost of property and equipment was each approximately $1.4 billion, and the related accumulated depreciation was $851 million and $774 million, respectively. We calculate depreciation primarily using the straight-line method over the estimated useful lives of the respective assets, which range from 10 to 40 years for buildings and 3 to 15 years for equipment. Depreciation expense was $125 million, $131 million and $137 million for the years ended December 31, 2016, 2015 and 2014, respectively. If we determine the carrying value of our property and equipment is not recoverable, an impairment charge is recorded. There were no material impairment losses on property and equipment recognized in any of the three years ended December 31, 2016, 2015 or 2014.

Separate Accounts

Separate Accounts assets and liabilities in the Large Case Pensions segment represent funds maintained to meet specific objectives of contract holders who bear the investment risk. These assets and liabilities are carried at fair value. Net investment income and net realized capital gains and losses accrue directly to such contract holders. The assets of each account are legally segregated and are not subject to claims arising from our other businesses. Deposits, withdrawals, net investment income and net realized and net unrealized capital gains and losses on Separate Accounts assets are not reflected in our statements of income or cash flows. Management fees charged to contract holders are included in fees and other revenue and recognized over the period earned.

Health Care Costs Payable

Health care costs payable consist principally of unpaid fee-for-service medical, dental and pharmacy claims, capitation costs and other amounts due to health care providers pursuant to risk-sharing arrangements related to the Health Care segment's Insured Commercial, Medicare and Medicaid products. Unpaid health care claims include our estimate of payments we will make on claims reported to us but not yet paid and for services rendered to members but not yet reported to us as of the balance sheet date (collectively, "IBNR") in our Health Care segment. Also included in these estimates is the cost of services that will continue to be rendered after the balance sheet date if we are obligated to pay for such services in accordance with contractual or regulatory requirements. Such estimates are developed using actuarial principles and assumptions which consider, among other things, historical and projected claim submission and processing patterns, assumed and historical medical cost trends, historical utilization of medical services, claim inventory levels, changes in membership and product mix, seasonality and other relevant factors. We reflect changes in these estimates in health care costs in our operating results in the period they are determined. Capitation costs represent contractual monthly fees paid to participating physicians and other medical providers for providing medical care, regardless of the medical services provided to the member. Approximately 4%, 4% and 5% of our

health care costs related to capitated arrangements in 2016, 2015 and 2014, respectively. Amounts due under risk-sharing arrangements are based on the terms of the underlying contracts with the providers and consider claims experience under the contracts through the balance sheet date.

We develop our estimate of IBNR using actuarial principles and assumptions that consider numerous factors. Of those factors, we consider the analysis of historical and projected claim payment patterns (including claims submission and processing patterns) and the assumed health care cost trend rate (the year-over-year change in per member per month health care costs) to be the most critical assumptions. In developing our estimate of IBNR, we consistently apply these actuarial principles and assumptions each period, with consideration to the variability of related factors. There have been no significant changes to the methodologies or assumptions used to calculate IBNR in 2016.

We analyze historical claim payment patterns by comparing claim incurred dates (i.e., the date services were provided) to claim payment dates to estimate "completion factors." We estimate completion factors by aggregating claim data based on the month of service and month of claim payment and estimating the percentage of claims incurred for a given month that are complete by each month thereafter. For any given month, substantially all claims are paid within six months of the date of service, but it can take up to 48 months or longer before all of the claims are completely resolved and paid. These historically-derived completion factors are then applied to claims paid through the financial statement date to estimate the ultimate claim cost for a given month's incurred claim activity. The difference between the estimated ultimate claim cost and the claims paid through the financial statement date represents our estimate of claims remaining to be paid as of the financial statement date and is included in our health care costs payable. We use completion factors predominantly to estimate reserves for claims with claim incurred dates greater than three months prior to the financial statement date. The completion factors we use reflect judgments and possible adjustments based on data such as claim inventory levels, claim submission and processing patterns and, to a lesser extent, other factors such as changes in health care cost trend rates, changes in membership and changes in product mix. If claims are submitted or processed on a faster (slower) pace than prior periods, the actual claims may be more (less) complete than originally estimated using our completion factors, which may result in reserves that are higher (lower) than the ultimate cost of claims.

Because claims incurred within three months prior to the financial statement date are less mature, we use a combination of historically-derived completion factors and the assumed health care cost trend rate to estimate the ultimate cost of claims incurred for these months. We place a greater emphasis on the assumed health care cost trend rate for the most recent claim incurred dates as these months may be influenced by seasonal patterns and changes in membership and product mix.

Our health care cost trend rate is affected by changes in per member utilization of medical services as well as changes in the unit cost of such services. Many factors influence the health care cost trend rate, including our ability to manage health care costs through product design, negotiation of favorable provider contracts and medical management programs, as well as the mix of our business. The health status of our members, aging of the population and other demographic characteristics, advances in medical technology and other factors continue to contribute to rising per member utilization and unit costs. Changes in health care practices, inflation, new technologies, increases in the cost of prescription drugs (including specialty pharmacy drugs), direct-to-consumer marketing by pharmaceutical companies, clusters of high-cost cases, claim intensity, changes in the regulatory environment, health care provider or member fraud and numerous other factors also contribute to the cost of health care and our health care cost trend rate.

For each reporting period, we use an extensive degree of judgment in the process of estimating our health care costs payable. As a result, considerable variability and uncertainty is inherent in such estimates; and the adequacy of such estimates is highly sensitive to changes in assumed completion factors and the assumed health care cost trend rates. For each reporting period we recognize the actuarial best estimate of health care costs payable considering the potential volatility in assumed completion factors and health care cost trend rates, as well as other factors. We believe our estimate of health care costs payable is reasonable and adequate to cover our obligations at December 31, 2016; however, actual claim payments may differ from our estimates. A worsening (or improvement) of our health care cost trend rates or changes in completion factors from those that we assumed in estimating health care costs payable at December 31, 2016 would cause these estimates to change in the near term, and such a change could be material.

Each quarter, we re-examine previously established health care costs payable estimates based on actual claim payments for prior periods and other changes in facts and circumstances. Given the extensive degree of judgment in this estimate, it is possible that our estimates of health care costs payable could develop either favorably (that is, our actual health care costs for the period were less than we estimated) or unfavorably. The changes in our estimate of health care costs payable may relate to a prior quarter, prior year or earlier periods. For our roll forward of our health care costs payable, refer to Note 7. Our reserving practice is to consistently recognize the actuarial best estimate of our ultimate liability for health care costs payable.

Unpaid claims
Unpaid claims consist primarily of reserves associated with certain short-duration group disability and term life insurance contracts in the Group Insurance segment, including an estimate for IBNR in our Group Insurance segment as of the balance sheet date. Reserves associated with certain short-duration group disability and term life insurance contracts are based upon our estimate of the present value of future benefits, which is based on assumed investment yields and assumptions regarding mortality, morbidity and recoveries from the U.S. Social Security Administration. We develop our estimate of IBNR using actuarial principles and assumptions which consider, among other things, contractual requirements, claim incidence rates, claim recovery rates, seasonality and other relevant factors. We discount certain claim liabilities related to group long-term disability and life insurance waiver of premium contracts. The discount rates generally reflect our expected investment returns for the investments supporting all incurral years of these liabilities. The discount rates for retrospectively-rated contracts are set at contractually specified levels. Our estimates of unpaid claims are subject to change due to changes in the underlying experience of the insurance contracts, changes in investment yields or other factors, and these changes are recorded in current and future benefits in our statements of income in the period they are determined. Refer to Note 7 for additional information related to our long-term disability unpaid claim liabilities.

We estimate our reserve for claims IBNR for life products largely based on completion factors. The completion factors we use are based on our historical experience and reflect judgments and possible adjustments based on data such as claim inventory levels, claim payment patterns, changes in business volume and other factors. If claims are submitted or processed on a faster (slower) pace than historical periods, the actual claims may be more (less) complete than originally estimated using our completion factors, which may result in reserves that are higher (lower) than required to cover future life benefit payments. At December 31, 2016, we held $246 million in reserves for life claims incurred but not yet reported to us.

There have been no significant changes to the methodologies or assumptions used to calculate IBNR in 2016.

Future policy benefits
Future policy benefits consist primarily of reserves for limited payment pension and annuity contracts in the Large Case Pensions segment and long-duration group life and long-term care insurance contracts in the Group Insurance segment. Reserves for limited payment contracts are computed using actuarial principles that consider, among other things, assumptions reflecting anticipated mortality, retirement, expense and interest rate experience. Such assumptions generally vary by plan, year of issue and policy duration. Assumed interest rates on such contracts ranged from .8% to 11.3% in both 2016 and 2015. We periodically review mortality assumptions against both industry standards and our experience. Reserves for long-duration group life and long-term care contracts represent our estimate of the present value of future benefits to be paid to or on behalf of policyholders less the present value of future net premiums. Assumed interest rates on such contracts ranged from 2.5% to 8.8% in both 2016 and 2015. Our estimate of the present value of future benefits under such contracts is based upon mortality, morbidity and interest rate assumptions.

Policyholders' funds
Policyholders' funds consist primarily of reserves for pension and annuity investment contracts in the Large Case Pensions segment and customer funds associated with group life and health contracts in the Health Care and Group Insurance segments. Reserves for such contracts are equal to cumulative deposits less withdrawals and charges plus credited interest thereon, net of experience-rated adjustments. In 2016, interest rates for pension and annuity investment contracts ranged from 3.5% to 15.9%, and interest rates for group life and health contracts ranged from 0% to 2.4%. In 2015, interest rates for pension and annuity investment contracts ranged from 3.5% to 14.7%, and interest rates for group life and health contracts ranged from 0% to 2.7%. Reserves for contracts subject to experience rating reflect our rights as well as the rights of policyholders and plan participants.

We also hold funds for health savings accounts ("HSAs") on behalf of members associated with high deductible health plans. These amounts are held to pay for qualified health care expenses incurred by these members. The HSA balances were approximately $1.7 billion and $1.5 billion at December 31, 2016 and 2015, respectively, and are reflected in other current assets with a corresponding liability in policyholder funds.

We review health care and other insurance liabilities periodically. We reflect any necessary adjustments during the current period in operating results. While the ultimate amount of claims and related expenses are dependent on future developments, it is management's opinion that the liabilities that have been established are adequate to cover such costs. The health care and other insurance liabilities that are expected to be paid within twelve months are classified as current on our balance sheets.

Premium Deficiency Reserves

We evaluate our insurance contracts to determine if it is probable that a loss will be incurred. We recognize a premium deficiency loss when it is probable that expected future claims, including maintenance costs (for example, direct costs such as claim processing costs), will exceed existing reserves plus anticipated future premiums and reinsurance recoveries. Anticipated investment income is considered in the calculation of premium deficiency losses for short-duration contracts. For purposes of determining premium deficiency losses, contracts are grouped consistent with our method of acquiring, servicing and measuring the profitability of such contracts. In the second and third quarters of 2016, we recorded premium deficiency reserves totaling $85 million related to anticipated future losses for the 2016 coverage year in our individual Commercial products. We did not have any premium deficiency reserves at December 31, 2016 or 2015.

Revenue Recognition

Premium Revenue

Health care premiums are recognized as income in the month in which the enrollee is entitled to receive health care services. Health care premiums are reported net of an allowance for estimated terminations and uncollectible amounts. Additionally, premium revenue subject to the ACA's minimum Medical Loss Ratio ("MLR") rebate requirements is recorded net of the estimated minimum MLR rebates for the current calendar year. Other premium revenue for group life, long-term care and disability products is recognized as income, net of allowances for termination and uncollectible accounts, over the term of the coverage. Other premium revenue for Large Case Pensions' limited payment pension and annuity contracts is recognized as revenue in the period received. Premiums related to unexpired contractual coverage periods are reported as unearned premiums in our balance sheets and recognized as revenue when earned.

Some of our contracts allow for premiums to be adjusted to reflect actual experience or the relative health status of members. Such adjustments are reasonably estimable at the outset of the contract, and adjustments to those estimates are made based on actual experience of the customer emerging under the contract and the terms of the underlying contract.

Administrative Service Contract ("ASC") Fees

Fees and other revenue consists primarily of ASC fees which are received in exchange for performing certain claim processing and member services for health and disability members and are recognized as revenue over the period the service is provided. Fees and other revenue also includes fees related to our pharmacy benefit management and workers' compensation administrative services products and services. Some of our contracts include guarantees with respect to certain functions, such as customer service response time, claim processing accuracy and claim processing turnaround time, as well as certain guarantees that a plan sponsor's benefit claim experience will fall within a certain range. With any of these guarantees, we are financially at risk if the conditions of the arrangements are not met, although the maximum amount at risk is typically limited to a percentage of the fees otherwise payable to us by the customer involved. Each period we estimate our obligations under the terms of these guarantees and record it as an offset to our ASC fees.

In addition, fees and other revenue also include charges assessed against contract holders' funds for contract fees, participant fees and asset charges related to pension and annuity products in the Large Case Pensions segment. Other amounts received on pension and annuity investment-type contracts are reflected as deposits and are not recorded as revenue. Some of our Large Case Pensions contract holders have the contractual right to purchase annuities with life contingencies using the funds they maintain on deposit with us. Since these products are considered an insurance contract, when the contract holder makes this election, we treat the accumulated investment balance as a single premium and reflect it as both premiums and current and future benefits in our statements of income.

Accounting for the Medicare Part D Prescription Drug Program Plans ("PDPs")

We were selected by the Centers for Medicare & Medicaid Services ("CMS") to be a national provider of PDPs in all 50 states to both individuals and employer groups in 2016, 2015 and 2014. Under these annual contracts, CMS pays us a portion of the premium, a portion of, or a capitated fee for, catastrophic drug costs and a portion of the health care costs for low-income Medicare beneficiaries and provides a risk-sharing arrangement to limit our exposure to unexpected expenses.

We recognize premiums received from, or on behalf of, members or CMS and capitated fees as premium revenue ratably over the contract period. We expense the cost of covered prescription drugs as incurred. Costs associated with low-income Medicare beneficiaries (deductible, coinsurance, etc.) and the catastrophic drug costs paid in advance by CMS are recorded as a liability and offset health care costs when incurred. For individual PDP coverage, the risk-sharing arrangement provides a risk corridor whereby the amount we received in premiums from members and CMS based on our annual bid is compared to our actual drug costs incurred during the contract year. Based on the risk corridor provision and PDP activity-to-date, we record an estimated risk-sharing receivable or payable on a quarterly basis as an adjustment to premium revenue. We perform a reconciliation of the final risk-sharing, low-income subsidy and catastrophic amounts after the end of each contract year.

Health Care Reform

Health Insurer Fee

Since January 1, 2014, the ACA imposes an annual premium-based health insurer fee ("HIF") for each calendar year payable in September which is not deductible for tax purposes. We are required to estimate a liability for the HIF at the beginning of the calendar year in which the fee is payable with a corresponding deferred asset that is amortized ratably to general and administrative expense over the calendar year. We record the liability for the health insurer fee in accrued expenses and other current liabilities and record the deferred asset in other current assets in our consolidated financial statements. In 2016, 2015 and 2014, general and administrative expense includes $837 million, $857 million and $605 million, respectively, related to our share of the HIF. In December 2015, the Consolidated Appropriation Act was enacted which included a one year suspension in 2017 of the HIF.

Public Exchanges

We are participating in certain public health insurance exchanges established pursuant to the ACA ("Public Exchanges"). Under regulations established by the U.S. Department of Health and Human Services ("HHS"), HHS pays us a portion of the premium ("Premium Subsidy") and a portion of the health care costs ("Cost Sharing Subsidy") for low-income individual Public Exchange members. In addition, HHS administers the ACA's Reinsurance, Risk Adjustment and Risk Corridor (the "3Rs") risk management programs.

We recognize monthly premiums received from Public Exchange members and the Premium Subsidy as premium revenue ratably over the contract period. The Cost Sharing Subsidy offsets health care costs based on our estimate of the portion of claim costs incurred by our low income individual Public Exchange members that qualify for reimbursement by HHS. We record a liability or a receivable depending on whether qualifying health care costs incurred are less than or greater than the Cost Sharing Subsidy received to date.

Reinsurance

The ACA established a temporary reinsurance program that expired at the end of 2016. Under this program, all issuers of major medical commercial insurance products and self-insured plan sponsors are required to contribute funding in amounts set by HHS. Funds collected will be utilized to reimburse issuers' high claims costs incurred for qualified individual members. The expense related to this required funding is reflected in general and administrative expenses for all of our insurance products with the exception of products associated with qualified individual members; this expense for qualified individual members is reflected as a reduction of premium revenue.

In 2016, 2015 and 2014, our estimated contribution to the funding of the ACA's reinsurance program was $118 million, $210 million and $336 million, respectively, which was recorded in general and administrative expenses. When annual claim costs incurred by our qualified individual members exceed a specified attachment point, we are entitled to certain reimbursements from this program. We record a receivable and offset health care costs to reflect our estimate of these recoveries.

Risk Adjustment

The ACA established a permanent risk adjustment program to transfer funds from qualified individual and small group insurance plans with below average risk scores to plans with above average risk scores. Based on the risk of our qualified plan members relative to the average risk of members of other qualified plans in comparable markets, we estimate our ultimate risk adjustment receivable or payable for the current calendar year and reflect the pro-rata year-to-date impact as an adjustment to our premium revenue.

Risk Corridor

The ACA established a temporary risk sharing program, which expired at the end of 2016, for qualified individual and small group insurance plans. Under this program we make (or receive) a payment to (or from) HHS based on the ratio of allowable costs to target costs (as defined by the ACA). We record a risk corridor receivable or payable as an adjustment to premium revenue on a pro-rata year-to-date basis based on our estimate of the ultimate risk sharing amount for the current calendar year. At December 31, 2016, we did not record any ACA risk corridor receivables related to the 2016 or 2015 program years or any amount in excess of HHS's announced pro-rated funding amount for the 2014 program year because payments from HHS are uncertain.

We expect to perform an annual final reconciliation and settlement with HHS of the Cost Sharing Subsidy and 3Rs in each subsequent year, except for the final reconciliation and settlement of the 2014 Cost Sharing Subsidy which occurred in 2016.

Refer to Note 8 for additional information related to the 3Rs.

Voluntary Early Retirement Program
In September 2016, we announced a voluntary early retirement program (the "Program"). Under the terms of the Program, eligible employees elected early retirement during the fourth quarter of 2016. We recorded a liability associated with the Program in accrued expenses and other current liabilities and an expense in general and administrative expenses of $330 million pretax at and for the year ended December 31, 2016, respectively.

Selling Expenses
Selling expenses include broker commissions, the variable component of our internal sales force compensation and premium taxes.

Stock-Based Compensation
We record compensation expense for stock-based awards over their vesting periods primarily based on the estimated fair value at the grant date. For stock appreciation rights ("SARs"), the fair value is estimated using the Black-Scholes option-pricing model. For restricted stock units ("RSUs") and performance stock units ("PSUs"), the fair value is equal to the market price of the Company's common stock on the date of grant. For market stock units ("MSUs") and performance stock appreciation rights ("PSARs"), the fair value is estimated using Monte Carlo simulations. Refer to Note 12 for additional information related to our stock-based employee incentive plans.

Income Taxes
We are taxed at the statutory corporate income tax rates after adjusting income reported for financial statement purposes for certain items. We recognize deferred income tax assets and liabilities for the differences between the financial and income tax reporting basis of assets and liabilities based on enacted tax rates and laws. Valuation allowances are provided when it is considered more likely than not that deferred tax assets will not be realized. Deferred income tax expense or benefit primarily reflects the net change in deferred income tax assets and liabilities during the year.

Our current income tax provision reflects the tax results of revenues and expenses currently taxable or deductible. Penalties and interest on our tax positions are classified as a component of our income tax provision.

Measurement of Defined Benefit Pension and Other Postretirement Employee Benefit ("OPEB") Plans
We sponsor defined benefit pension plans ("pension plans") and OPEB plans for our employees and retirees. We recognize the funded status of our pension plans and OPEB plans on the consolidated balance sheets based on our year-end measurements of plan assets and benefit obligations. Prepaid pension and OPEB benefits represent prepaid costs related to our pension plans and are reported with other current and long-term assets. Liabilities associated with pension plans and OPEB plans are reported within current and other long-term liabilities based on the amount by which the actuarial present value of benefits payable in the next twelve months included in the benefit obligation exceeds the fair value of plan assets.

Earnings Per Share
We calculate basic earnings per share based on the weighted average number of common shares outstanding for the period. Diluted earnings per common share is calculated based on the weighted average number of common shares outstanding plus the dilutive effect of outstanding SARs, MSUs, PSUs, RSUs and PSARs using the treasury stock method. Refer to Notes 12 and 15 for additional information.

New Accounting Standards
Amendments to the Consolidation Analysis
Effective January 1, 2016, we adopted new accounting guidance related to the evaluation of consolidation for certain legal entities. The new guidance changes how a reporting entity assesses consolidation, including whether an entity is considered a variable interest entity, determination of the primary beneficiary and how related parties are considered in the analysis. The adoption of this new guidance required more of our other investments to be considered variable interest entities; however, it did not require additional investments to be consolidated or de-consolidated or have a material impact on our financial position or operating results. Our variable interest entity disclosures as of December 31, 2015 were retrospectively adjusted to conform with the new accounting guidance. Refer to Note 4 for further discussion.

Simplifying the Presentation of Debt Issuance Costs
Effective January 1, 2016, we adopted new accounting guidance related to the financial statement presentation of all debt issuance costs, including those related to line-of-credit arrangements. The new guidance requires debt issuance costs to be presented as a direct deduction from the carrying amount of our debt liability, consistent with the approach used for debt premiums or discounts. We also elected to report debt issuance costs associated with any line-of-credit arrangements as a direct deduction from the carrying amount of our debt liability. Amortization of debt issuance costs also will be reported in our statements of income in interest expense, as opposed to general and administrative expenses. We are applying this new

guidance on a full retrospective basis, with all prior periods restated for the new presentation. As a result of adopting this guidance, we reclassified $43 million of other current and long-term assets as a reduction of long-term debt on our balance sheet at December 31, 2015. Additionally, we reclassified an immaterial amount of general and administrative expenses into interest expense for the year ended December 31, 2015.

Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)
Effective January 1, 2016, we adopted new accounting guidance related to the presentation of investments in certain entities that calculate net asset value per share (or its equivalent). The new guidance removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. This new guidance is applicable to certain of our investments that reside in our general accounts, separate accounts and employee benefit plans. The adoption of this new guidance did not have a material impact on our financial position or operating results.

Improvements to Employee Share-Based Payment Accounting
Effective April 1, 2016, we elected to early adopt new accounting guidance related to the accounting for and financial statement presentation of employee share-based payments. As a result of adopting this new guidance, we recognized $29 million of excess tax benefits in our statements of income that previously would have been recorded in additional paid-in capital for the year ended December 31, 2016, and correspondingly reclassified the excess tax benefits for the year ended December 31, 2016 from financing activities to operating activities in our statements of cash flows. We applied each of these provisions on a prospective basis, with adjustments reflected as of January 1, 2016, and prior periods were not retrospectively adjusted. Our ability under the new guidance to withhold more shares to satisfy our statutory income tax obligations had no impact on our financial statements and was adopted on a modified retrospective basis. We continue to estimate expected forfeitures of share-based payment awards in each period.

Disclosures about Short-Duration Insurance Contracts
Effective December 31, 2016, we adopted new accounting guidance related to the disclosure of short-duration insurance contracts. The new guidance requires insurance companies that issue short-duration contracts to include additional disclosures about those insurance liabilities, including disaggregation of certain disclosures, as appropriate. The adoption of this new guidance did not have an impact on our financial position or operating results; however, the new guidance required additional disclosure for our health care cost payable and unpaid claims short-duration insurance liabilities that reside in our Health Care and Group Insurance segments.

Future Application of Accounting Standards
Simplifying the Test for Goodwill Impairment
Effective January 1, 2017, we adopted, on a prospective basis, new accounting guidance which simplifies the accounting for goodwill impairment. The new guidance eliminates the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment charge. A goodwill impairment charge would be recognized if the carrying amount of a reporting unit exceeds the estimated fair value of the reporting unit. The adoption of this new guidance is not expected to have a material impact on our financial position or operating results.

Revenue from Contracts with Customers
Effective January 1, 2018, we will adopt new accounting guidance related to revenue recognition from contracts with customers. While industry-specific guidance related to contracts with customers within the scope of *Accounting Standards Codification ("ASC") 944 Financial Services - Insurance* remains unchanged, most other industry-specific revenue recognition requirements have been removed. The new guidance requires that an entity recognize revenue for the transfer of goods or services to a customer at an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. The new guidance also requires additional disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts. We currently anticipate adopting the new guidance using the modified retrospective approach with a cumulative effect adjustment to retained earnings. While we are still evaluating the impact of this new guidance to our financial statements, we anticipate that any impact will only relate to contracts with customers outside the scope of ASC Topic 944. Adoption of this new guidance could result in reclassifications within our consolidated statements of income; however, we do not anticipate any material changes in the timing of our recognition of revenue or net income.

Recognition and Measurement of Financial Assets and Financial Liabilities
Effective January 1, 2018, we will adopt new accounting guidance related to the recognition and measurement of financial assets and financial liabilities. Under the new guidance, all equity investments in unconsolidated entities will be measured at fair value with changes in fair value recognized in net income. A reporting entity may elect to report equity investments without a readily determinable fair value at cost. The new guidance also revises certain disclosures regarding financial assets and

liabilities. The adoption of this new guidance is not expected to have a material impact on our financial position or operating results.

Leases
Effective January 1, 2019, we will adopt new accounting guidance related to the recognition, measurement and disclosure requirements for leases. Under the new guidance, lessees will be required to recognize a right-of-use asset and corresponding lease liability on their balance sheets for all leases other than those that meet the definition of a short-term lease. The new guidance also revises certain disclosure requirements regarding leases. While we are still evaluating the impact of adoption of this new guidance, we anticipate that obligations related to our operating leases (as described in Note 17) will be required to be recorded on our balance sheet.

Measurement of Credit Losses on Financial Instruments
Effective January 1, 2020, we will adopt new accounting guidance related to the measurement of credit losses on financial assets and certain other instruments. The new guidance requires the use of a new forward-looking expected loss impairment model for trade and other receivables, held-to-maturity debt securities, loans and other instruments; requires impairments and recoveries for available-for-sale debt securities to be recorded through an allowance account; and revises certain disclosure requirements. We are still assessing the impact of this new guidance on our financial position and operating results.

3. Acquisitions, Terminated Acquisition and Terminated Divestiture

Terminated Acquisition of Humana and Terminated Divestiture to Molina
On July 2, 2015, we entered into a definitive agreement (the "Merger Agreement") to acquire Humana Inc. ("Humana") in a transaction valued at approximately $37.0 billion, based on the closing price of Aetna common shares on July 2, 2015, including the assumption of Humana debt and Humana cash and cash equivalents.

On July 21, 2016, the U.S. Department of Justice (the "DOJ") and certain state attorneys general filed a civil complaint in the U.S. District Court for the District of Columbia (the "District Court") against us and Humana charging that the Humana Acquisition would violate Section 7 of the Clayton Antitrust Act, and seeking a permanent injunction to prevent Aetna from acquiring Humana. On January 23, 2017, the District Court granted the DOJ's request to enjoin the Humana Acquisition. On February 14, 2017, Aetna and Humana entered into a mutual termination agreement (the "Termination Agreement") pursuant to which the parties thereto (collectively the "Parties") agreed to terminate the Merger Agreement, including all schedules and exhibits thereto, and all ancillary agreements contemplated thereby, entered pursuant thereto or entered in connection therewith (other than certain confidentiality agreements) (collectively with the Merger Agreement, the "Transaction Documents"), effective immediately as of February 14, 2017 (the "Termination Date"). Under the Termination Agreement, Aetna agreed to pay Humana the Regulatory Termination Fee (as defined in the Merger Agreement) of $1.0 billion in cash in full satisfaction of any amounts required to be paid by Aetna under the Merger Agreement. The Parties also agreed to release each other from any and all liability, claims, rights, actions, causes of action, suits, liens, obligations, accounts, debts, demands, agreements, promises, liabilities, controversies, costs, charges, damages, expenses and fees, however arising, in connection with, arising out of or related to the Transaction Documents, the transactions contemplated therein or thereby or certain related matters. We paid Humana the Regulatory Termination Fee on February 16, 2017 and funded that payment with the proceeds of the 2016 senior notes (as defined below).

In June 2016, we issued $13.0 billion of senior notes to partially fund the Humana Acquisition (collectively, the "2016 senior notes"). In accordance with the terms of the 2016 senior notes, on February 14, 2017, we issued a notice of redemption for $10.2 billion aggregate principal amount of certain of the 2016 senior notes (collectively, the "Special Mandatory Redemption Notes") at a redemption price equal to 101% of the aggregate principal amount of those notes plus accrued and unpaid interest. We will redeem the Special Mandatory Redemption Notes on or about March 16, 2017. As a result of the redemption of the Special Mandatory Redemption Notes, in the first quarter of 2017, we will recognize on a pretax basis in our net income the entire approximately $420 million unamortized portion of the related cash flow hedge losses, debt issuance costs and debt issuance discounts and the entire approximately $100 million redemption premium paid on the Special Mandatory Redemption Notes upon such redemption.

In order to address the DOJ's perceived competitive concerns regarding Medicare Advantage relating to the Humana Acquisition, on August 2, 2016, we entered into a definitive agreement (the "Aetna APA") to sell for cash to Molina Healthcare, Inc. ("Molina") certain of our Medicare Advantage assets. On February 14, 2017, Aetna and Molina entered into a Termination Agreement (the "APA Termination Agreement") pursuant to which Aetna terminated the Molina APA, including all schedules and exhibits thereto, and all ancillary agreements contemplated thereby or entered pursuant thereto. Under the APA Termination Agreement, Aetna agreed to pay Molina in cash (a) a termination fee of $53 million and (b) approximately 70% of

Molina's transaction costs. We paid Molina the termination fee on February 16, 2017 and funded that payment with the proceeds of the 2016 senior notes. We expect to pay Molina the applicable transaction costs during the first quarter of 2017.

Acquisition of bswift LLC

In November 2014, we acquired bswift LLC ("bswift") for approximately $400 million. bswift provides a technology platform that offers a retail shopping experience for health insurance exchanges and employees nationwide, and provides benefit administration technology and services to employers. We recorded goodwill related to this transaction of $329 million, none of which will be tax deductible. All of the goodwill related to this acquisition was assigned to our Health Care segment.

Acquisition of the InterGlobal Group

In April 2014, we acquired the InterGlobal group ("InterGlobal"), a company that specializes in international private medical insurance for groups and individuals in the Middle East, Asia, Africa and Europe. The purchase price was not material, and the goodwill related to this acquisition was assigned to our Health Care segment.

4. Investments

Total investments at December 31, 2016 and 2015 were as follows:

	2016			2015		
(Millions)	**Current**	**Long-term**	**Total**	**Current**	**Long-term**	**Total**
Debt and equity securities available for sale	**$ 2,876**	**$ 18,866**	**$ 21,742**	$ 2,877	$ 18,446	$ 21,323
Mortgage loans	**170**	**1,341**	**1,511**	127	1,427	1,554
Other investments	**—**	**1,626**	**1,626**	11	1,792	1,803
Total investments	**$ 3,046**	**$ 21,833**	**$ 24,879**	$ 3,015	$ 21,665	$ 24,680

At December 31, 2016 and 2015, we held investments of $657 million and $690 million, respectively, related to the 2012 conversion of an existing group annuity contract from a participating to a non-participating contract. These investments are included in the total investments of our Large Case Pensions segment supporting non-experience-rated products. Although these investments are not accounted for as Separate Accounts assets, they are legally segregated and are not subject to claims that arise out of our business and only support our future policy benefits obligations under that group annuity contract. Refer to Note 2 for additional information.

Debt and Equity Securities

Debt and equity securities available for sale at December 31, 2016 and 2015 were as follows:

(Millions)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2016				
Debt securities:				
U.S. government securities	**$ 1,643**	**$ 51**	**$ —**	**$ 1,694**
States, municipalities and political subdivisions	**5,047**	**152**	**(61)**	**5,138**
U.S. corporate securities	**8,145**	**385**	**(55)**	**8,475**
Foreign securities	**2,958**	**163**	**(33)**	**3,088**

Residential mortgage-backed securities	914	17	(6)	925
Commercial mortgage-backed securities	1,262	17	(9) [1]	1,270
Other asset-backed securities	910	3	(19) [1]	894
Redeemable preferred securities	33	11	—	44
Total debt securities	20,705	849	(252)	21,302
Equity securities	23	4	(6)	21
Total debt and equity securities [2]	$ 20,728	$ 853	$ (258)	$ 21,323

[1] At both December 31, 2016 and 2015, we held securities for which we previously recognized an immaterial amount of non-credit related impairments in accumulated other comprehensive loss. These securities each had an immaterial amount of net unrealized capital gains at December 31, 2016 and 2015, respectively.

[2] Investment risks associated with our experience-rated and discontinued products generally do not impact our operating results (refer to Note 19 for additional information on our accounting for discontinued products). At December 31, 2016, debt and equity securities with a fair value of approximately $2.9 billion, gross unrealized capital gains of $195 million and gross unrealized capital losses of $35 million and, at December 31, 2015, debt and equity securities with a fair value of approximately $3.0 billion, gross unrealized capital gains of $209 million and gross unrealized capital losses of $68 million were included in total debt and equity securities, but support our experience-rated and discontinued products. Changes in net unrealized capital gains (losses) on these securities are not reflected in accumulated other comprehensive income.

The fair value of debt securities at December 31, 2016 is shown below by contractual maturity. Actual maturities may differ from contractual maturities because securities may be restructured, called or prepaid, or we intend to sell a security prior to maturity.

(Millions)	Amortized Cost	Fair Value
Due to mature:		
Less than one year	$ 1,380	$ 1,394
One year through five years	6,604	6,758
After five years through ten years	5,059	5,162
Greater than ten years	4,772	5,108
Residential mortgage-backed securities	793	795
Commercial mortgage-backed securities	1,382	1,348
Other asset-backed securities	1,077	1,075
Total	$ 21,067	$ 21,640

Mortgage-Backed and Other Asset-Backed Securities
All of our residential mortgage-backed securities at December 31, 2016 were issued by the Government National Mortgage Association, the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation and carry agency guarantees and explicit or implicit guarantees by the U.S. Government. At December 31, 2016, our residential mortgage-backed securities had an average credit quality rating of AAA and a weighted average duration of 4.9 years.

Our commercial mortgage-backed securities have underlying loans that are dispersed throughout the United States. Significant market observable inputs used to value these securities include loss severity and probability of default. At December 31, 2016, these securities had an average credit quality rating of AAA and a weighted average duration of 6.8 years.

Our other asset-backed securities have a variety of underlying collateral (e.g., automobile loans, credit card receivables, home equity loans and commercial loans). Significant market observable inputs used to value these securities include the unemployment rate, loss severity and probability of default. At December 31, 2016, these securities had an average credit quality rating of AA- and a weighted average duration of 1.2 years.

Summarized below are the debt and equity securities we held at December 31, 2016 and 2015 that were in an unrealized capital loss position, aggregated by the length of time the investments have been in that position:

	Less than 12 months			Greater than 12 months			Total [1]

[1] At December 31, 2016 and 2015, debt and equity securities in an unrealized capital loss position of $35 million and $68 million, respectively, and with related fair value of $890 million and $966 million, respectively, related to experience-rated and discontinued products.

We reviewed the securities in the tables above and concluded that they are performing assets generating investment income to support the needs of our business. In performing this review, we considered factors such as the quality of the investment security based on research performed by our internal credit analysts and external rating agencies and the prospects of realizing the carrying value of the security based on the investment's current prospects for recovery. At December 31, 2016, we did not intend to sell these securities, and we did not believe it was more likely than not that we would be required to sell these securities prior to anticipated recovery of their amortized cost basis.

The maturity dates for debt securities in an unrealized capital loss position at December 31, 2016 were as follows:

	Supporting discontinued and experience-rated products		Supporting remaining products		Total	
(Millions)	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Due to mature:						
Less than one year	$ 5	$ —	$ 201	$ —	$ 206	$ —

Commercial mortgage-backed securities	174	6	867	33	1,041	39
Other asset-backed securities	20	1	560	8	580	9
Total	$ 890	$ 35	$ 6,970	$ 171	$ 7,860	$ 206

Mortgage Loans

Our mortgage loans are collateralized by commercial real estate. During 2016 and 2015 we had the following activity in our mortgage loan portfolio:

(Millions)	2016	2015
New mortgage loans	$ 190	$ 213
Mortgage loans fully-repaid	173	163
Mortgage loans foreclosed	8	9

We assess our mortgage loans on a regular basis for credit impairments, and annually assign a credit quality indicator to each loan. Our credit quality indicator is internally developed and categorizes our portfolio on a scale from 1 to 7. These indicators are based upon several factors, including current loan to value ratios, property condition, market trends, creditworthiness of the borrower and deal structure. The vast majority of our mortgage loans fall into categories 2 to 4.

- *Category 1* - Represents loans of superior quality
- *Category 2 to 4* - Represents loans where credit risk is minimal to acceptable; however, these loans may display some susceptibility to economic changes.
- *Categories 5 and 6* - Represents loans where credit risk is not substantial, but these loans warrant management's close attention.
- *Category 7* - Represents loans where collections are potentially at risk and if necessary, an impairment is recorded.

Based upon our most recent assessments at December 31, 2016 and 2015, our mortgage loans were given the following credit quality indicators:

(In Millions, except credit ratings indicator)	2016	2015
1	$ 45	$ 66
2 to 4	1,449	1,467
5 and 6	17	21
7	—	—
Total	$ 1,511	$ 1,554

At December 31, 2016 scheduled mortgage loan principal repayments were as follows:

(Millions)	
2017	**$ 171**
2018	**216**
2019	**123**
2020	**166**
2021	**253**
Thereafter	**582**

Net Investment Income

Sources of net investment income for 2016, 2015 and 2014 were as follows:

(Millions)	2016	2015	2014
Debt securities	**$ 772**	$ 794	$ 801
Mortgage loans	**95**	91	108
Other investments	**82**	78	76
Gross investment income	**949**	963	985
Investment expenses	**(39)**	(46)	(39)
Net investment income [1]	**$ 910**	$ 917	$ 946

[1] Net investment income includes $208 million, $248 million and $289 million for 2016, 2015 and 2014, respectively, related to investments supporting our experience-rated and discontinued products.

Realized Capital Gains/Losses

Net realized capital (losses) gains for the three years ended December 31, 2016, 2015 and 2014, excluding amounts related to experience-rated contract holders and discontinued products, were as follows:

(Millions)	2016	2015	2014
Other-than-temporary impairment ("OTTI") losses on debt securities recognized in earnings	**$ (30)**	$ (64)	$ (5)
Other net realized capital gains (losses)	**116**	(1)	85
Net realized capital gains (losses)	**$ 86**	$ (65)	$ 80

The net realized capital gains in 2016 were primarily attributable to gains from the sales of debt securities and other investments, partially offset by yield-related OTTI on debt securities. The net realized capital losses in 2015 were primarily attributable to yield-related OTTI on U.S. corporate debt securities. The net realized capital gains in 2014 were primarily attributable to gains from the sales of debt and equity securities.

Yield-related impairments are recognized in other comprehensive income unless we have the intention to sell the security in an unrealized capital loss position, in which case the yield-related OTTI is recognized in earnings. In 2016 and 2015, we recognized yield-related OTTI losses of $24 million and $63 million, respectively, related to our debt securities. Yield-related OTTI losses were not significant in 2014. We had no other individually material realized capital losses on debt or equity securities that impacted our operating results during 2016, 2015 or 2014.

Excluding amounts related to experience-rated and discontinued products, proceeds from the sale of available for sale debt and equity securities and the related gross realized capital gains and losses for 2016, 2015 and 2014 were as follows [1]:

(Millions)	2016	2015	2014
Proceeds on sales	**$ 6,725**	$ 4,987	$ 4,615
Gross realized capital gains	**155**	83	109
Gross realized capital losses	**61**	76	36

[1] The proceeds on sales and gross realized capital gains and losses exclude the impact of the sales of short-term debt securities which primarily relate to our investments in mutual funds. These investments were excluded from the disclosed amounts because they represent an immaterial amount of aggregate gross realized capital gains or losses and have a high volume of sales activity.

Variable Interest Entities

As discussed in Note 2, we adopted the guidance of Accounting Standards Update (ASU) *No. 2015-02, Amendments to the Consolidation Analysis (Topic 810)* effective January 1, 2016. As a result of adopting the new guidance, we have investments in certain hedge fund and private equity investments and real estate partnerships that are considered Variable Interest Entities ("VIE's"). We do not have a future obligation to fund losses or debts on behalf of these investments; however, we may voluntarily contribute funds.

In evaluating whether we are the primary beneficiary of a VIE, we considered several factors, including whether we (a) have the power to direct the activities that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses and the right to receive benefits that could potentially be significant to the VIE.

Variable Interest Entities - Primary Beneficiary

Upon adoption of the new guidance, we identified one hedge fund investment previously consolidated as a Voting Interest Entity in our balance sheets and operating results that is determined to be a VIE under the new guidance. The investment represents a majority-owned hedge fund where we are the investment manager and have the power to direct the activities that most significantly impact the VIE's economic performance, including determining the hedge fund's investment strategy. Accordingly, we are the primary beneficiary and will continue to consolidate the investment in our operating results. The fund invests in additional hedge funds that are VIEs; however, we are not the primary beneficiary of these underlying funds as discussed in further detail below.

Substantially all of the assets of the VIE hedge fund are comprised of hedge fund investments reported as long-term investments on our balance sheets. The VIE hedge fund had no material liabilities at December 31, 2016 or 2015. The total amount of the VIE hedge fund's assets included in long term investments on our balance sheets at December 31, 2016 and 2015 was $472 million and $477 million, respectively.

Variable Interest Entities - Other Variable Interest Holder

Our involvement with VIEs where we are not determined to be the primary beneficiary consists of the following:

- *Hedge fund and private equity investments* - We invest in hedge fund and private equity investments in order to generate investment returns for our investment portfolio supporting our businesses.
- *Real estate partnerships* - We invest in various real estate partnerships including those that construct, own and manage low-income housing developments. For the low income housing development investments, substantially all of the projected benefits to us are from tax credits and other tax benefits.

We are not the primary beneficiary of these investments because the nature of our involvement with the activities of these VIEs does not give us the power to direct the activities that most significantly impact their economic performance. We record the amount of our investment in these VIEs as long-term investments on our balance sheets and recognize our share of each VIE's income or losses in earnings. Our maximum exposure to loss from these VIEs is limited to our investment balances as disclosed below and the risk of recapture of tax credits related to the real estate partnerships previously recognized, which we do not consider significant.

The total amount of other variable interest holder VIE assets included in long term investments on our balance sheets at December 31, 2016 and 2015 were as follows:

(Millions)	**December 31, 2016**	**December 31, 2015**
Hedge fund investments	**$ 384**	$ 418
Private equity investments	**454**	443
Real estate partnerships	**278**	254
Total	**$ 1,116**	$ 1,115

The carrying value of the total assets and liabilities of our other variable interest holder VIE investments at December 31, 2016 and 2015 were as follows:

(Millions)	December 31, 2016	December 31, 2015
Assets:		
Hedge fund investments	**$ 32,926**	$ 33,066
Private equity investments	**25,368**	28,552
Real estate partnerships	**6,743**	6,809
Total	**$ 65,037**	$ 68,427
Liabilities:		
Hedge fund investments	**$ 2,819**	$ 3,535
Private equity investments	**2,354**	3,236
Real estate partnerships	**4,938**	5,045
Total	**$ 10,111**	$ 11,816

Non-controlling (Minority) Interests
At December 31, 2016 and 2015, continuing business non-controlling interests were $62 million and $65 million, respectively, primarily related to third party interests in our investment holdings as well as third party interests in certain of our operating entities. The non-controlling entities' share was included in total equity. Net loss attributable to non-controlling interests was $15 million during 2016. Net income attributable to non-controlling interests was $5 million and $4 million during 2015 and 2014, respectively. These non-controlling interests did not have a material impact on our financial position or operating results.

5. Fair Value

The preparation of our consolidated financial statements in accordance with GAAP requires certain of our assets and liabilities to be reflected at their fair value, and others on another basis, such as an adjusted historical cost basis. In this note, we provide details on the fair value of financial assets and liabilities and how we determine those fair values. We present this information for those financial instruments that are measured at fair value for which the change in fair value impacts net income attributable to Aetna or other comprehensive income separately from other financial assets and liabilities.

Financial Instruments Measured at Fair Value in our Balance Sheets
Certain of our financial instruments are measured at fair value in our balance sheets. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by GAAP. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, we use these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities in Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified in Level 2. If quoted market prices are not available, we determine fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

The following is a description of the valuation methodologies used for our financial assets and liabilities that are measured at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Debt Securities – Where quoted prices are available in an active market, our debt securities are classified in Level 1 of the fair value hierarchy. Our Level 1 debt securities are comprised primarily of U.S. Treasury securities.

The fair values of our Level 2 debt securities are obtained using models such as matrix pricing, which use quoted market prices of debt securities with similar characteristics, or discounted cash flows to estimate fair value. We review these prices to ensure they are based on observable market inputs that include, but are not limited to, quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets and inputs that are observable but not prices (for example, interest rates and credit risks). We also review the methodologies and the assumptions used to calculate prices from these observable inputs. On a quarterly basis, we select a sample of our Level 2 debt securities' prices and compare them to prices provided by a secondary source. Variances over a specified threshold are identified and reviewed to confirm the price provided by the primary source represents an appropriate estimate of fair value. In addition, our internal investment team consistently compares the prices obtained for select Level 2 debt securities to the team's own independent estimates of fair value for those securities. We obtained one price for each of our Level 2 debt securities and did not adjust any of these prices at December 31, 2016 or 2015.

We also value certain debt securities using Level 3 inputs. For Level 3 debt securities, fair values are determined by outside brokers or, in the case of certain private placement securities, are priced internally. Outside brokers determine the value of these debt securities through a combination of their knowledge of the current pricing environment and market flows. We obtained one non-binding broker quote for each of these Level 3 debt securities and did not adjust any of these quotes at December 31, 2016 or 2015. The total fair value of our broker quoted debt securities was $80 million and $78 million at December 31, 2016 and 2015, respectively. Examples of these broker quoted Level 3 debt securities include certain U.S. and foreign corporate securities and certain of our commercial mortgage-backed securities as well as other asset-backed securities. For some of our private placement securities, our internal staff determines the value of these debt securities by analyzing spreads of corporate and sector indices as well as interest spreads of comparable public bonds. Examples of these private placement Level 3 debt securities include certain U.S. and foreign securities and certain tax-exempt municipal securities.

Equity Securities – We currently have two classifications of equity securities: those that are publicly traded and those that are privately placed. Our publicly-traded securities are classified in Level 1 because quoted prices are available for these securities in an active market. For privately placed equity securities, there is no active market; therefore, we classify these securities in Level 3 because we price these securities through an internal analysis of each investment's financial statements and cash flow projections. Significant unobservable inputs consist of earnings and revenue multiples, discount for lack of marketability and comparability adjustments. An increase or decrease in any of these unobservable inputs would result in a change in the fair value measurement, which may be significant.

Derivatives – Where quoted prices are available in an active market, our derivatives are classified in Level 1. Certain of our derivative instruments are valued using models that primarily use market observable inputs and therefore are classified in Level 2 because they are traded in markets where quoted market prices are not readily available.

Financial assets and liabilities measured at fair value on a recurring basis in our balance sheets at December 31, 2016 and 2015 were as follows:

(Millions)	Level 1	Level 2	Level 3	Total
December 31, 2016				
Assets:				
Debt securities:				
U.S. government securities	**$ 1,514**	**$ 180**	**$ —**	**$ 1,694**

There were no transfers between Levels 1 and 2 during the years ended December 31, 2016 and 2015.

The changes in the balances of Level 3 financial assets during 2016 were as follows:

(Millions)	Foreign securities	U.S. corporate securities	Equity securities	Other	Total
Beginning balance	**$ 25**	**$ 64**	**$ 19**	**$ 6**	**$ 114**
Net realized and unrealized capital (losses) gains:					
Included in earnings	**—**	**(15)**	**—**	**—**	**(15)**
Included in other comprehensive income	**—**	**(4)**	**11**	**(3)**	**4**
Other [1]	**—**	**—**	**3**	**—**	**3**
Purchases	**16**	**41**	**10**	**33**	**100**
Sales	**(8)**	**(3)**	**—**	**(5)**	**(16)**
Settlements	**(2)**	**(3)**	**—**	**—**	**(5)**
Transfers out of Level 3, net	**(10)**	**—**	**—**	**(29)**	**(39)**
Ending balance	**$ 21**	**$ 80**	**$ 43**	**$ 2**	**$ 146**

(1) Reflects realized and unrealized capital gains and losses on investments supporting our experience-rated and discontinued products, which do not impact our operating results.

The changes in the balances of Level 3 financial assets during 2015 were as follows:

(Millions)	Foreign securities	U.S. corporate securities	Equity securities	Other	Total
Beginning balance	$ 32	$ 58	$ 18	$ 54	$ 162
Net realized and unrealized capital gains (losses):					
Included in earnings	—	(6)	—	—	(6)
Included in other comprehensive income	—	2	2	—	4
Other [1]	(1)	—	(3)	—	(4)
Purchases	—	11	2	24	37
Sales	(5)	(1)	—	—	(6)
Settlements	(1)	—	—	(9)	(10)
Transfers out of Level 3, net	—	—	—	(63)	(63)
Ending balance	$ 25	$ 64	$ 19	$ 6	$ 114

(1) Reflects realized and unrealized capital gains and losses on investments supporting our experience-rated and discontinued products, which do not impact our operating results.

The total gross transfers into (out of) Level 3 during the years ended December 31, 2016 and 2015 were as follows:

(Millions)	2016	2015
Gross transfers into Level 3	**$ —**	$ 1
Gross transfers out of Level 3	**(39)**	(64)
Net transfers out of Level 3	**$ (39)**	$ (63)

Gross transfers out of Level 3 during 2016 primarily related to commercial mortgage-backed securities. Gross transfers out of Level 3 during 2015 primarily related to other asset-backed securities.

Financial Instruments Not Measured at Fair Value in our Balance Sheets

The following is a description of the valuation methodologies used for estimating the fair value of our financial assets and liabilities that are carried on our balance sheets at adjusted cost or contract value.

Mortgage loans: Fair values are estimated by discounting expected mortgage loan cash flows at market rates that reflect the rates at which similar loans would be made to similar borrowers. These rates reflect our assessment of the creditworthiness of the borrower and the remaining duration of the loans. The fair value estimates of mortgage loans of lower credit quality, including problem and restructured loans, are based on the estimated fair value of the underlying collateral.

Bank loans: Where fair value is determined by quoted market prices of bank loans with similar characteristics, our bank loans are classified in Level 2. For bank loans classified in Level 3, fair value is determined by outside brokers using their internal analyses through a combination of their knowledge of the current pricing environment and market flows.

Equity securities: Certain of our equity securities are carried at cost. The fair values of our cost-method investments are not estimated if there are no identified events or changes in circumstances that may have a significant adverse effect on the fair value of the investment.

Investment contract liabilities:

- *With a fixed maturity*: Fair value is estimated by discounting cash flows at interest rates currently being offered by, or available to, us for similar contracts.
- *Without a fixed maturity*: Fair value is estimated as the amount payable to the contract holder upon demand. However, we have the right under such contracts to delay payment of withdrawals that may ultimately result in paying an amount different than that determined to be payable on demand.

Long-term debt: Fair values are based on quoted market prices for the same or similar issued debt or, if no quoted market prices are available, on the current rates estimated to be available to us for debt of similar terms and remaining maturities.

The carrying value and estimated fair value classified by level of fair value hierarchy for our financial instruments carried on our balance sheets at adjusted cost or contract value at December 31, 2016 and 2015 were as follows:

(Millions)	Carrying Value	Estimated Fair Value			
		Level 1	Level 2	Level 3	Total
December 31, 2016					
Assets:					
Mortgage loans	**$ 1,511**	**$ —**	**$ —**	**$ 1,540**	**$ 1,540**
Bank loans	**8**	**—**	**—**	**8**	**8**
Equity securities [1]	**35**	**N/A**	**N/A**	**N/A**	**N/A**
Liabilities:					
Investment contract liabilities:					
With a fixed maturity	**8**	**—**	**—**	**8**	**8**
Without a fixed maturity	**378**	**—**	**—**	**364**	**364**
Long-term debt	**20,661**	**—**	**21,468**	**—**	**21,468**

(Millions)	Carrying Value	Estimated Fair Value			
		Level 1	Level 2	Level 3	Total
December 31, 2015					
Assets:					
Mortgage loans	$ 1,554	$ —	$ —	$ 1,599	$ 1,599
Bank loans	193	—	180	8	188
Equity securities [1]	35	N/A	N/A	N/A	N/A
Liabilities:					
Investment contract liabilities:					
With a fixed maturity	9	—	—	9	9
Without a fixed maturity	371	—	—	351	351
Long-term debt	7,785	—	8,227	—	8,227

[1] It was not practical to estimate the fair value of these cost-method investments as it represents shares of unlisted companies.

Separate Accounts Measured at Fair Value in our Balance Sheets

Separate Accounts assets in our Large Case Pensions segment represent funds maintained to meet specific objectives of contract holders. Since contract holders bear the investment risk of these assets, a corresponding Separate Accounts liability has been established equal to the assets. These assets and liabilities are carried at fair value. Net investment income and capital gains and losses accrue directly to such contract holders. The assets of each account are legally segregated and are not subject to claims arising from our other businesses. Deposits, withdrawals, net investment income and realized and unrealized capital gains and losses on Separate Accounts assets are not reflected in our statements of income, shareholders' equity or cash flows.

Separate Accounts assets include debt and equity securities and derivative instruments. The valuation methodologies used for these assets are similar to the methodologies described above in this Note 5. Separate Accounts assets also include investments in common/collective trusts that are carried at fair value. Common/collective trusts invest in other investment funds otherwise known as the underlying funds. The Separate Accounts' interests in the common/collective trust funds are based on the fair values of the investments of the underlying funds and therefore are classified in Level 2. The assets in the underlying funds primarily consist of equity securities. Investments in common/collective trust funds are valued at their respective net asset value per share/unit on the valuation date.

Separate Accounts financial assets at December 31, 2016 and 2015 were as follows:

	2016				2015			
(Millions)	**Level 1**	**Level 2**	**Level 3**	**Total**	**Level 1**	**Level 2**	**Level 3**	**Total**
Debt securities	**$ 766**	**$ 2,378**	**$ —**	**$ 3,144**	$ 751	$ 2,382	$ 4	$ 3,137
Equity securities	**166**	**6**	**—**	**172**	170	5	—	175
Common/collective trusts	**—**	**582**	**—**	**582**	—	540	—	540
Total [1]	**$ 932**	**$ 2,966**	**$ —**	**$ 3,898**	$ 921	$ 2,927	$ 4	$ 3,852

[1] Excludes $93 million and $183 million of cash and cash equivalents and other receivables at December 31, 2016 and 2015, respectively.

During 2016 and 2015, we had an immaterial amount of Level 3 Separate Accounts financial assets and an immaterial amount of gross transfers of Separate Accounts financial assets into or out of Level 3. During 2016 and 2015, there were no transfers of Separate Accounts financial assets between Levels 1 and 2.

Offsetting Financial Assets and Liabilities

Certain financial assets and liabilities are offset in our balance sheets or are subject to master netting arrangements or similar agreements with the applicable counterparty. Financial assets, including derivative assets, subject to offsetting and enforceable master netting arrangements as of December 31, 2016 and December 31, 2015 were as follows:

		Gross Amounts Not Offset In the Balance Sheets		
(Millions)	**Gross Amounts of Recognized Assets [1]**	**Financial Instruments**	**Cash Collateral Received**	**Net Amount**
December 31, 2016				
Derivatives	**$ —**	**$ 17**	**$ —**	**$ 17**
Total	**$ —**	**$ 17**	**$ —**	**$ 17**
December 31, 2015				
Derivatives	$ 20	$ 12	$ (17)	$ 15
Total	$ 20	$ 12	$ (17)	$ 15

[1] There were no amounts offset in our balance sheets at December 31, 2016 or December 31, 2015.

Financial liabilities, including derivative liabilities, subject to offsetting and enforceable master netting arrangements as of December 31, 2016 and December 31, 2015 were as follows:

		Gross Amounts Not Offset In the Balance Sheets		
(Millions)	**Gross Amounts of Recognized Liabilities [1]**	**Financial Instruments**	**Cash Collateral Paid**	**Net Amount**
December 31, 2016				
Derivatives	**$ —**	**$ —**	**$ —**	**$ —**
Total	**$ —**	**$ —**	**$ —**	**$ —**
December 31, 2015				
Derivatives	$ 88	$ —	$ (90)	$ (2)
Total	$ 88	$ —	$ (90)	$ (2)

[1] There were no amounts offset in our balance sheets at December 31, 2016 or December 31, 2015.

6. Goodwill and Other Acquired Intangible Assets

The change in the carrying amount of goodwill for our reportable segments for the years ended December 31, 2016 and 2015 was as follows:

(Millions)	Health Care	Group Insurance	Total Company
Balance at January 1, 2015	$ 10,500	$ 113	$ 10,613
Acquisitions	12	—	12
Dispositions	—	—	—
Subsequent adjustments	12	—	12
Balance at December 31, 2015	**10,524**	**113**	**10,637**
Acquisitions	—	—	—
Dispositions	—	—	—
Subsequent adjustments	—	—	—
Balance at December 31, 2016	**$ 10,524**	**$ 113**	**$ 10,637**

No goodwill is allocated to the Large Case Pensions segment. The increase in goodwill during 2015 was due to purchase accounting adjustments related to the bswift acquisition and goodwill associated with an immaterial acquisition.

Other acquired intangible assets at December 31, 2016 and 2015 were comprised of the following:

(Millions)	Cost	Accumulated Amortization	Net Balance	Amortization Period (Years)	
2016					
Provider networks	**$ 1,254**	**$ 694**	**$ 560**	**12-25**	(1)
Customer lists	**1,166**	**485**	**681**	**3-14**	(1)
Value of business acquired	**149**	**92**	**57**	**20**	
Technology	**176**	**123**	**53**	**4-10**	
Other	**10**	**4**	**6**	**10-15**	
Definite-lived trademarks	**170**	**107**	**63**	**5-20**	
Indefinite-lived trademarks	**22**	**—**	**22**		
Total other acquired intangible assets	**$ 2,947**	**$ 1,505**	**$ 1,442**		
2015					
Provider networks	$ 1,254	$ 632	$ 622	12-25	(1)
Customer lists	1,165	374	791	5-14	(1)
Value of business acquired	149	80	69	20	
Technology	176	93	83	4-10	
Other	10	3	7	2-15	
Definite-lived trademarks	170	76	94	5-20	
Indefinite-lived trademarks	22	—	22		
Total other acquired intangible assets	$ 2,946	$ 1,258	$ 1,688		

(1) The amortization period for our provider networks and customer lists includes an assumption of renewal or extension of these arrangements. At both December 31, 2016 and 2015, the periods prior to the next renewal or extension for our provider networks primarily ranged from 1 to 3 years, and the period prior to the next renewal or extension for our customer lists was 1 year. Any costs related to the renewal or extension of these contracts are expensed as incurred.

We estimate annual pre-tax amortization for other acquired intangible assets over the next five years to be as follows:

(Millions)	
2017	**$ 234**
2018	**198**
2019	**192**
2020	**180**
2021	**156**

7. Health Care and Other Insurance Liabilities

Health Care Costs Payable

The following is information about incurred and cumulative paid Health Care claims development as of December 31, 2016, net of reinsurance, and the total IBNR liabilities plus expected development on reported claims included within the net incurred claims amounts. Refer to Note 2 for information on how we estimate our IBNR reserve and health care costs payable as well as changes to those methodologies, if any. Our estimate of IBNR liabilities is primarily based on trend and completion factors. Claim frequency is not used in the calculation of our liability. In addition, it is impracticable to disclose claim frequency information for health care claims due to our inability to gather consistent claim frequency information across our multiple claims processing systems. Any claim frequency count disclosure would not be comparable across our different claim processing systems and would not be consistent from period to period based on the volume of claims processed through each system. As a result, we have not included health care claim count frequency in the disclosures included below.

The information about incurred and paid Health Care claims development for the year ended December 31, 2015 is presented as required unaudited supplemental information.

(Millions)	**Incurred Health Care Claims, Net of Reinsurance For the Years Ended December 31,**	
Date of Service	**2015**	**2016**
	(Unaudited)	
2015	$ 41,825	**$ 41,114**
2016		**44,110**
	Total	**$ 85,224**

(Millions)	**Cumulative Paid Health Care Claims, Net of Reinsurance For the Years Ended December 31,**	
Date of Service	**2015**	**2016**
	(Unaudited)	
2015	$ 35,735	**$ 40,947**
2016		**37,888**
	Total	**$ 78,835**
All outstanding liabilities for health care costs payable prior to 2015, net of reinsurance		**66**
Total outstanding liabilities for health care costs payable, net of reinsurance		**$ 6,455**

At December 31, 2016, total Health Care IBNR liabilities plus expected development on reported claims totaled approximately $5.6 billion. Substantially all of the total Health Care IBNR liabilities plus expected development on reported claims at December 31, 2016 related to the current year.

The reconciliation of the December 31, 2016 Health Care net incurred and paid claims development tables to the health care costs payable liability in the consolidated balance sheet is as follows:

(Millions)	December 31, 2016
Short-duration health care costs payable, net of reinsurance	**$ 6,455**
Reinsurance recoverables	**5**
Insurance lines other than short duration	**98**
Total health care costs payable	**$ 6,558**

The following table shows the components of the change in health care costs payable during 2016, 2015 and 2014:

(Millions)	2016	2015	2014
Health care costs payable, beginning of the period	**$ 6,306**	$ 5,621	$ 4,547
Less: Reinsurance recoverables	**4**	6	8
Health care costs payable, beginning of the period, net	**6,302**	5,615	4,539
Acquisition of businesses	**—**	—	29
Add: Components of incurred health care costs			
Current year	**45,019**	42,553	41,328
Prior years	**(764)**	(841)	(581)
Total incurred health care costs	**44,255**	41,712	40,747
Less: Claims paid			
Current year	**38,700**	36,389	35,851
Prior years	**5,304**	4,636	3,849
Total claims paid	**44,004**	41,025	39,700
Health care costs payable, end of period, net	**6,553**	6,302	5,615
Add: Reinsurance recoverables	**5**	4	6
Health care costs payable, end of period	**$ 6,558**	$ 6,306	$ 5,621

Our estimates of prior years' health care costs payable decreased in each of 2016, 2015 and 2014, respectively, because claims settled for amounts less than originally estimated, primarily due to lower health care cost trends as well as the actual claim submission time being faster than we assumed in establishing our health care costs payable in the prior year. This development does not directly correspond to an increase in our current year operating results as these reductions were offset by estimated current period health care costs when we established our estimate of the current year health care costs payable.

Long-Term Disability Unpaid Claims

The following is information about incurred and cumulative paid long-term disability claims development as of December 31, 2016, net of reinsurance, and the total IBNR liabilities plus expected development on reported claims included within the net incurred claims amounts. Refer to Note 2 for information on how we estimate our IBNR reserve and unpaid long-term disability claims liability as well as changes to those methodologies. We define a unique claim in our long-term disability Insured products based on the date an individual is placed on disability. There have been no significant changes to the methodologies or assumptions used to determine claim frequency in 2016.

The information about incurred and paid long-term disability claims development for the years ended December 31, 2011 through 2015 is presented as required unaudited supplemental information. At December 31, 2016, we have disclosed six years of claims development and will add one year going forward in each subsequent year until we reach ten years of disclosure.

Incurred Long-Term Disability Claims, Net of Reinsurance

(Millions)	For the Years Ended December 31, (Unaudited)						As of December 31, 2016	
Date of Service	**2011**	**2012**	**2013**	**2014**	**2015**	**2016**	**Total IBNR liabilities plus expected development on reported claims**	**Cumulative number of reported claims** *(Actual)*
2011	$ 360	$ 346	$ 335	$ 338	$ 342	**$ 340**	**$ 2**	**6,988**
2012		413	394	385	381	**384**	**1**	**8,171**
2013			473	482	463	**478**	**2**	**10,104**
2014				512	490	**481**	**8**	**11,622**
2015					533	**504**	**18**	**12,924**
2016						**573**	**270**	**11,464**
					Total	**$ 2,760**		

Cumulative Paid Long-Term Disability Claims, Net of Reinsurance

(Millions)	For the Years Ended December 31, (Unaudited)					
Date of Service	**2011**	**2012**	**2013**	**2014**	**2015**	**2016**
2011	$ 20	$ 96	$ 144	$ 173	$ 199	**$ 219**
2012		24	119	177	208	**236**
2013			32	151	224	**264**
2014				35	161	**242**
2015					40	**181**
2016						**48**
					Total	**1,190**
					All outstanding unpaid long-term disability claims prior to 2011, net of reinsurance	**754**
					Total outstanding unpaid long-term disability claims, net of reinsurance	**$ 2,324**

The reconciliation of the December 31, 2016 short-duration long-term disability net incurred and paid claims development tables to the short-duration long-term disability unpaid claims liability is as follows:

	December 31, 2016
Short-duration long-term disability unpaid claims, net of reinsurance	**$ 2,324**
Reinsurance recoverables	**26**
Impact of discounting	**(446)**
Total short-duration long-term disability unpaid claims	**$ 1,904**

The following is information on long-term disability unpaid claims liabilities presented at present value:

Unpaid Long-Term Disability Claims Liabilities Presented at Present Value

	Carrying amount of unpaid claims liabilities		**Discount rate**		**Aggregate amount of discount**	
	As of December 31,		**As of December 31,**		**As of December 31,**	
(Millions)	**2016**	**2015**	**2016**	**2015**	**2016**	**2015**
Long-term disability	**$ 1,878**	$ 1,793	**5.0%**	5.4%	**$ 446**	$ 473

Interest accretion in the amounts of $97 million, $97 million and $93 million were recognized for the years ended December 31, 2016, 2015 and 2014, respectively, within current and future benefits in our statements of income.

The following is required unaudited supplementary information about average historical long-term disability claims duration as of December 31, 2016:

Average Annual Percentage Payout of Incurred Claims by Age, Net of Reinsurance (Unaudited)

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Long-term disability	7.3%	25.3%	15.0%	8.2%	6.9%	5.8%

The following table shows the components of the change in unpaid long-term disability claims during 2016, 2015 and 2014:

(Millions)	2016	2015	2014
Long-term disability unpaid claims beginning of the period	**$ 1,819**	$ 1,772	$ 1,685
Less: Reinsurance recoverables	**27**	27	28
Long-term disability unpaid claims, beginning of the period, net	**1,792**	1,745	1,657
Add: Components of incurred claims			
Current year	**529**	488	465
Prior years	**41**	(4)	22
Total incurred claims	**570**	484	487
Less: Claims paid			
Current year	**48**	40	35
Prior years	**436**	397	364
Total claims paid	**484**	437	399
Long-term disability unpaid claims, end of period, net	**1,878**	1,792	1,745
Add: Reinsurance recoverables	**26**	27	27
Long-term disability unpaid claims, end of period	**$ 1,904**	$ 1,819	$ 1,772

Our estimates of prior years' long-term disability unpaid claims liability were relatively consistent with actual results in each of 2016, 2015 and 2014, respectively.

The reconciliation of the short-duration long-term disability unpaid claims liability to the total unpaid claims liability in the consolidated balance sheet is as follows for 2016, 2015 and 2014:

(Millions)	2016	2015	2014
Short duration long-term disability unpaid claims	**$ 1,904**	$ 1,819	$ 1,772
Term life unpaid claims	**481**	493	518
Other unpaid claims	**119**	116	106
Total unpaid claims	**$ 2,504**	$ 2,428	$ 2,396

8. The ACA's Reinsurance, Risk Adjustment and Risk Corridor

We participate in certain Public Exchanges established pursuant to the ACA. Under regulations established by HHS, HHS pays us a portion of the Premium Subsidy and the Cost Sharing Subsidy for low-income individual Public Exchange members. In addition, HHS administers the 3Rs risk management programs.

Our current net receivable (payable) related to the 3Rs risk management programs at December 31, 2016 and 2015 was as follows:

	At December 31, 2016			At December 31, 2015		
(Millions)	Reinsurance	Risk Adjustment	Risk Corridor	Reinsurance	Risk Adjustment	Risk Corridor
Total current net receivable (payable)	**$ 202**	**$ (690)**	**$ (10)**	$ 395	$ (710)	$ (8)

At December 31, 2016, we estimate that we are entitled to receive a total of $465 million from HHS under the three-year ACA risk corridor program for the 2014 through 2016 program years. In November 2016, HHS announced that all 2015 ACA risk corridor collections will be used to pay a portion of the balances on the 2014 ACA risk corridor payments. At December 31, 2016, we did not record any ACA risk corridor receivables related to the 2016 or 2015 program years or any amount in excess of HHS's announced pro-rated funding amount for the 2014 program year because payments from HHS are uncertain.

We expect to perform an annual final reconciliation and settlement with HHS of the Cost Sharing Subsidy and 3Rs in each subsequent year, except for the final reconciliation and settlement of the 2014 Cost Sharing Subsidy which occurred in 2016.

Refer to Note 2 for additional information.

9. Debt

Long-term debt

The carrying value of our long-term debt at December 31, 2016 and 2015 was as follows:

(Millions)	2016	2015
Senior notes, 5.95% due March 2017 [1]	**$ 386**	$ 402
Senior notes, 1.75% due May 2017 [1]	**250**	249
Senior notes, 1.5% due November 2017 [1]	**499**	498
Senior notes, floating rate due December 2017 [1]	**499**	—
Senior notes, 1.7% due June 2018	**997**	—
Senior notes, 2.2% due March 2019	**374**	373
Senior notes, 1.9% due June 2019	**1,642**	—
Senior notes, 3.95% due September 2020	**745**	743
Senior notes, 2.4% due June 2021	**1,839**	—
Senior notes, 5.45% due June 2021	**661**	675
Senior notes, 4.125% due June 2021	**495**	494
Senior notes, 2.75% due November 2022	**986**	983
Senior notes, 2.8% due June 2023	**1,290**	—
Senior notes, 3.5% due November 2024	**742**	741
Senior notes, 3.2% due June 2026	**2,771**	—
Senior notes, 4.25% due June 2036	**1,480**	—
Senior notes, 6.625% due June 2036	**765**	765
Senior notes, 6.75% due December 2037	**527**	527
Senior notes, 4.5% due May 2042	**478**	477
Senior notes, 4.125% due November 2042	**489**	489
Senior notes, 4.75% due March 2044	**371**	371
Senior notes, 4.375% due June 2046	**2,375**	—
Total long-term debt	**20,661**	7,787
Less current portion of long-term debt	**1,634**	—
Less credit facility issuance costs	**—**	2
Total long-term debt, less current portion and credit facility issuance costs	**$ 19,027**	$ 7,785

[1] At December 31, 2016, our 5.95% senior notes due March 2017, 1.75% senior notes due May 2017, 1.5% senior notes due November 2017 and floating rate senior notes due December 2017 are each classified as current in our consolidated balance sheet.

At December 31, 2016 the amount of future maturities of our long-term debt are as follows:

(Millions)		
2017	**$**	**1,634**
2018		**997**
2019		**2,016**
2020		**745**
2021		**2,995**
Thereafter		**12,274**

2016 Senior Notes; Long-Term Debt and Bridge Credit Agreement
In June 2016, in connection with the Humana Acquisition, we issued the 2016 senior notes, which are comprised of: $500 million of floating rate senior notes due December 2017, $1.0 billion of 1.7% senior notes due June 2018, approximately $1.7 billion of 1.9% senior notes due June 2019, approximately $1.9 billion of 2.4% senior notes due June 2021, $1.3 billion of 2.8% senior notes due June 2023, $2.8 billion of 3.2% senior notes due June 2026, $1.5 billion of 4.25% senior notes due June 2036 and $2.4 billion of 4.375% senior notes due June 2046. As a result of the termination of the Merger Agreement, we will redeem all of the $10.2 billion aggregate principal amount of the 2016 senior notes that are due in 2019, 2021, 2026, 2036 and 2046 at a redemption price equal to 101% of the aggregate principal amount of those notes plus accrued and unpaid interest. We will redeem those notes on or about March 16, 2017, and we expect to fund the redemption with the proceeds of the 2016 senior notes.

On July 30, 2015, we entered into a $13.0 billion 364-day senior unsecured bridge credit agreement (the "Bridge Credit Agreement") with a group of fifteen lenders. In connection with the closing of the 2016 senior notes, we terminated the Bridge Credit Agreement effective June 9, 2016. There were no amounts outstanding under the Bridge Credit Agreement at any time during the year ended December 31, 2016.

Early Extinguishment of Long-Term Debt
November 2014
On November 3, 2014, we announced the redemption for cash of the entire $496 million aggregate principal amount outstanding of our 6.50% senior notes due 2018. The redemption of these notes occurred on December 3, 2014 (the "December Redemption Date") at a redemption price that included a make-whole premium, plus interest accrued and unpaid at the December Redemption Date. We financed the redemption by issuing $750 million of 3.5% senior notes due 2024 (the "November 2014 Senior Notes"). As a result of the redemption, in the fourth quarter of 2014, we recorded a loss on the early extinguishment of long-term debt of $58 million ($89 million pretax).

In April 2014, we entered into an interest rate swap with a notional value of $250 million. We designated this swap as a cash flow hedge against interest rate exposure related to the forecasted future issuance of fixed-rate debt to be primarily used to refinance long-term debt maturing in 2018. In November 2014, prior to issuing the November 2014 Senior Notes used to refinance our 6.50% senior notes due 2018 and for general corporate purposes, we terminated this swap and paid an aggregate of $15 million to the swap counterparty upon termination. We performed a final effectiveness test upon termination of this swap and determined there was $3 million pretax of ineffectiveness that arose due to the actual debt issuance date being earlier than forecasted. The ineffectiveness was recorded as a realized capital loss in the fourth quarter of 2014. The effective portion of the hedge loss of $12 million pretax was recorded in accumulated other comprehensive loss, net of tax, and is being amortized as an increase to interest expense over the first 20 semi-annual interest payments of the November 2014 Senior Notes.

March 2014
On February 7, 2014, we announced the redemption for cash of the entire $750 million aggregate principal amount outstanding of our 6.0% senior notes due 2016. The redemption of these notes occurred on March 14, 2014 (the "March Redemption Date") at a redemption price that included a make-whole premium, plus interest accrued and unpaid at the March Redemption Date. We financed the redemption by issuing $375 million of 2.2% senior notes due 2019 and $375 million of 4.75% senior notes due 2044 (collectively, the "March 2014 Senior Notes"), together with other available resources. As a result of the redemption, in the first quarter of 2014, we recorded a loss on the early extinguishment of long-term debt of $60 million ($92 million pretax).

During June and July 2012, we entered into two interest rate swaps with an aggregate notional value of $375 million. We designated these swaps as cash flow hedges against interest rate exposure related to the forecasted future issuance of fixed-rate debt to refinance our 6.0% senior notes due 2016. In March 2014, prior to issuing the March 2014 Senior Notes used to

refinance our 6.0% senior notes due 2016, we terminated these swaps and received an aggregate of $34 million from the swap counterparties upon termination. We performed a final effectiveness test upon termination of these swaps and determined there was $12 million pretax of ineffectiveness that arose due to the actual debt issuance date being earlier than forecasted. The ineffectiveness was recorded as a realized capital gain in the first quarter of 2014. The effective portion of the hedge gain of $22 million pretax was recorded in accumulated other comprehensive loss, net of tax, and is being amortized as a reduction to interest expense over the first 20 semi-annual interest payments associated with the $375 million of 4.75% senior notes due 2044.

Cash Flow Hedges

In 2015 and 2016, we entered into various interest rate swaps and treasury rate locks with an aggregate notional value of $3.5 billion. We designated these interest rate swaps and treasury rate locks as cash flow hedges against interest rate exposure related to the forecasted future issuance of fixed-rate debt to be primarily used to finance a portion of the purchase price of the Humana Acquisition.

During the second quarter of 2016, prior to issuing the 2016 senior notes, we terminated interest rate swaps with an aggregate notional value of $2.3 billion and paid an aggregate of $193 million to the swap counterparties upon termination. We performed a final effectiveness test upon the termination of each swap, and the effective portion of the hedge loss of $193 million was recorded in accumulated other comprehensive loss, net of tax, as the forecasted future issuance of fixed-rate debt associated with the Humana Acquisition remained probable of occurring at the time of termination. Upon termination of the interest rate swaps in the second quarter of 2016, we concurrently entered into treasury rate locks with an aggregate notional value of $2.3 billion to replace the vacated hedged positions. The treasury rate locks were designated as cash flow hedges against interest rate exposure related to the forecasted future issuance of fixed-rate debt to be primarily used to finance a portion of the purchase price of the Humana Acquisition. In June 2016, in conjunction with the issuance of the 2016 senior notes, we terminated outstanding interest rate swaps and treasury rate locks with an aggregate notional value of $3.5 billion and paid an aggregate of $51 million to the hedge counterparties upon termination. We performed a final effectiveness test upon termination of each interest rate swap and treasury rate lock, and the effective portion of the hedge loss of $51 million was recorded in accumulated other comprehensive loss, net of tax. Upon the redemption of certain of the 2016 senior notes as described above, the remaining unamortized effective portion of the hedge loss recorded in accumulated other comprehensive income will be recognized in net income upon such redemption for each of the cash flow hedges discussed above.

In March 2014, we entered into two interest rate swaps with an aggregate notional value of $500 million. We designated these swaps as cash flow hedges against interest rate exposure related to the forecasted future issuance of fixed-rate debt to be primarily used to refinance long-term debt maturing in 2017. On September 30, 2015, we modified the timing of the forecasted future issuance of fixed-rate debt in conjunction with the expected timing of the financing of the Humana Acquisition and, as a result, we de-designated these swaps and re-designated them as cash flow hedges against interest rate exposure related to the forecasted future issuance of fixed-rate debt. The effective portion of the hedge loss of $73 million pretax remains in accumulated other comprehensive loss, net of tax, and will be amortized as an increase to interest expense over the first 20 semi-annual interest payments related to the fixed-rate debt. At March 31, 2016, we performed a quarterly effectiveness test of these swaps and determined there was $4 million pretax of ineffectiveness. That ineffectiveness was recorded as a realized capital loss in the first quarter of 2016. In June 2016, we terminated the hedges in conjunction with the issuance of the 2016 senior notes and paid an aggregate of $103 million to the hedge counterparties upon termination. We performed a final effectiveness test upon termination of each interest rate swap and determined there was $2 million pretax of ineffectiveness. That ineffectiveness was recorded as a realized capital loss in the second quarter of 2016. The effective portion of the hedge loss of $25 million pretax was recorded in accumulated other comprehensive loss, net of tax. Upon the redemption of certain of the 2016 senior notes as described above, the remaining unamortized effective portion of the hedge loss recorded in accumulated other comprehensive income will be recognized in net income upon such redemption.

Refer to Note 14 for additional information regarding hedge losses reclassified from accumulated other comprehensive loss to net income during the year ended December 31, 2016. Upon the redemption of certain of the 2016 senior notes in the first quarter of 2017, the remaining unamortized effective portion of the hedge loss as discussed above of approximately $330 million pretax recorded in accumulated other comprehensive income will be recognized in net income as a realized capital loss.

Revolving Credit Facility
On March 27, 2012, we entered into an unsecured $1.5 billion five-year revolving credit agreement (the "Credit Agreement") with several financial institutions. On September 24, 2012, in connection with the acquisition of Coventry, we entered into a First Amendment (the "First Amendment") to the Credit Agreement and also entered into an Incremental Commitment Agreement (the "Incremental Commitment Agreement"). On March 2, 2015, we entered into a Second Amendment to the Credit Agreement (the "Second Amendment"). On July 30, 2015, in connection with the Humana Acquisition, we entered into a Third Amendment (the "Third Amendment," and together with the First Amendment, the Incremental Commitment Agreement, the Second Amendment and the Credit Agreement, resulting in the "Facility"). The Facility is an unsecured $2.0 billion revolving credit agreement. The Third Amendment modified the calculation of total debt for the purposes of determining compliance prior to the Closing Date (as defined below) with certain covenants to exclude debt incurred by us to finance the Humana Acquisition, the other financing transactions related to the Humana Acquisition and/or the payment of fees and expenses incurred in connection therewith so long as either (A) the net proceeds of such debt are set aside to finance the Humana Acquisition, the other financing transactions related to the Humana Acquisition and/or the payment of fees and expenses incurred in connection therewith or (B) such debt is subject to mandatory redemption in the event that the Merger Agreement is terminated or expires.

In addition, upon our agreement with one or more financial institutions, we may expand the commitments under the Facility by an additional $500 million. The Facility also provides for the issuance of up to $200 million of letters of credit at our request, which count as usage of the available commitments under the Facility. In each of 2013, 2014 and 2015, we extended the maturity date of the Facility by one year. The maturity date of the Facility is March 27, 2020.

Various interest rate options are available under the Facility. Any revolving borrowings mature on the termination date of the Facility. We pay facility fees on the Facility ranging from .050% to .150% per annum, depending upon our long-term senior unsecured debt rating. The facility fee was .100% at December 31, 2016. The Facility contains a financial covenant that requires us to maintain a ratio of total debt to consolidated capitalization as of the end of each fiscal quarter at or below 50%. For this purpose, consolidated capitalization equals the sum of total shareholders' equity, excluding any overfunded or underfunded status of our pension and OPEB plans and any net unrealized capital gains and losses, and total debt (as defined in the Facility). We met this requirement at December 31, 2016. There were no amounts outstanding under the Facility at any time during the year ended December 31, 2016 or 2015.

Term Loan Agreement
On July 30, 2015, in connection with the Humana Acquisition, we entered into a senior three-year $3.2 billion term loan credit agreement (the "Term Loan Agreement") with a group of seventeen lenders. The lenders' commitments under the Term Loan Agreement terminated on February 14, 2017, as a result of the termination of the Merger Agreement.

Commercial Paper
At December 31, 2016 and 2015, we did not have any commercial paper outstanding.

Federal Home Loan Bank of Boston
We are a member of the Federal Home Loan Bank of Boston (the "FHLBB"), and as a member we have the ability to obtain cash advances, subject to certain minimum collateral requirements. Our maximum borrowing capacity available from the FHLBB at December 31, 2016 was $854 million. At both December 31, 2016 and 2015, we did not have any outstanding borrowings from the FHLBB.

10. Pension and Other Postretirement Plans

Defined Benefit Retirement Plans
We sponsor various defined benefit plans, including two pension plans, and OPEB plans that provide certain health care and life insurance benefits for retired employees, including those of our former parent company.

During 2016, 2015 and 2014 we did not make any contribution to the Aetna Pension Plan. Effective December 31, 2010, our employees no longer earn future pension service credits in the Aetna Pension Plan (i.e., the Plan was "frozen" effective December 31, 2010), although the Aetna Pension Plan will continue to operate and account balances will continue to earn annual interest credits.

In July 2014, we enhanced the Aetna Pension Plan. Effective December 1, 2014, we permitted certain current and future former employees with deferred vested Aetna Pension Plan balances to elect to receive a 100% lump-sum distribution. This election is a permanent addition to the Aetna Pension Plan. In addition, in July 2014, we announced a limited-time offer permitting certain former employees with deferred vested Aetna Pension Plan balances to elect a 100% lump-sum distribution. These distributions

in 2014 were funded from existing Aetna Pension Plan assets and exceeded the total 2014 service and interest cost. As a result, we performed a remeasurement of the Aetna Pension Plan, and we recorded a pretax non-cash settlement charge of $112 million in 2014 in general and administrative expenses.

We also sponsor a non-qualified supplemental pension plan (the "Non-qualified Pension Plan") that, prior to January 1, 2007, had been used to provide benefits for wages above the Internal Revenue Code wage limits applicable to tax qualified pension plans (such as the Aetna Pension Plan). Effective January 1, 2007, no new benefits accrue under the Non-qualified Pension Plan, but interest will continue to be credited on outstanding supplemental cash balance accounts; and the plan may continue to be used to credit special pension arrangements.

In addition, we currently provide certain medical and life insurance benefits for retired employees, including those of our former parent company. We provide subsidized health care benefits to certain eligible employees who terminated employment prior to December 31, 2006. There is a cap on our portion of the cost of providing medical and dental benefits to our retirees. Through December 31, 2015, all current and future retirees and employees who terminated employment at age 45 or later with at least five years of service were eligible to participate in our group health plans at their own cost. Effective January 1, 2016, only current and future retirees and employees who terminate employment at age 55 or later are eligible for such participation.

The information set forth in the following tables is based upon current actuarial reports using the annual measurement dates (December 31, for each year presented) for our pension and OPEB plans.

The following table shows the changes in the benefit obligations during 2016 and 2015 for our pension and OPEB plans:

	Pension Plans		OPEB Plans	
(Millions)	**2016**	**2015**	**2016**	**2015**
Benefit obligation, beginning of year	**$ 5,946**	$ 6,505	**$ 257**	$ 277
Interest cost	**260**	261	**11**	11
Actuarial loss (gain)	**161**	(453)	**—**	(10)
Benefits paid	**(335)**	(367)	**(20)**	(21)
Benefit obligation, end of year	**$ 6,032**	$ 5,946	**$ 248**	$ 257

The pension plans' benefit obligation remained relatively consistent in 2016 driven by interest cost recognized in 2016 and an increase in actuarial losses arising as a result of a lower discount rate as further described below; substantially offset by benefits paid in 2016.

The Aetna Pension Plan comprises 96% of the pension plans' total benefit obligation at December 31, 2016. The discount rates used to determine the benefit obligation of our pension and OPEB plans were calculated using a yield curve as of our annual measurement date. Each yield curve consisted of a series of individual discount rates, with each discount rate corresponding to a single point in time, based on high-quality bonds. Projected benefit payments are discounted to the measurement date using the corresponding rate from the yield curve. The weighted average discount rate for our pension plans was 4.22% and 4.50% for 2016 and 2015, respectively. The discount rate for our OPEB plans was 4.12% and 4.39% for 2016 and 2015, respectively. The discount rates differ for our pension and OPEB plans due to the duration of the projected benefit payments for each plan.

Beginning in 2017, we changed the approach used to estimate the interest cost component of net periodic benefit cost for pension and OPEB for plans that utilize a yield curve approach. Historically, we estimated the interest cost using a single weighted-average discount rate derived from the yield curve used to measure the projected benefit obligation. With this refinement, we will measure interest cost by applying the specific spot rates along that yield curve to the relevant projected cash flows for each component. We believe the new approach provides a more precise measurement of interest cost. This refinement has no effect on the measurement of our plan obligations. We have accounted for this as a change in accounting estimate and accordingly, have accounted for it on a prospective basis beginning in 2017.

Additionally, based on the mortality experience of our pension and OPEB plans, in 2016 we utilized the RP-2014 Mortality Table with a generation projection of future mortality improvements using Scale MP-2016. In 2015 we utilized the RP-2014 Mortality Table with a generational projection of future mortality improvements using Scale MP-2015. In 2014 we utilized the RP-2014 Mortality Table with a generational projection of future mortality improvements using Scale MP-2014.

The following table reconciles the beginning and ending balances of the fair value of plan assets during 2016 and 2015 for our pension and OPEB plans:

	Pension Plans		OPEB Plans	
(Millions)	**2016**	**2015**	**2016**	**2015**
Fair value of plan assets, beginning of year	**$ 5,802**	$ 6,147	**$ 55**	$ 58
Actual return on plan assets	**426**	—	**1**	1
Employer contributions	**21**	22	**16**	17
Benefits paid	**(335)**	(367)	**(20)**	(21)
Fair value of plan assets, end of year	**$ 5,914**	$ 5,802	**$ 52**	$ 55

The difference between the fair value of plan assets and the plan's benefit obligation is referred to as the plan's funded status. This funded status is an accounting-based calculation and is not indicative of our mandatory funding requirements.

The funded status of our pension and OPEB plans at the measurement date for 2016 and 2015 was as follows:

	Pension Plans		OPEB Plans	
(Millions)	**2016**	**2015**	**2016**	**2015**
Benefit obligation	**$ (6,032)**	$ (5,946)	**$ (248)**	$ (257)
Fair value of plan assets	**5,914**	5,802	**52**	55
Funded status	**$ (118)**	$ (144)	**$ (196)**	$ (202)

At December 31, 2016, the fair value of plan assets of the Aetna Pension Plan was in excess of the benefit obligations, while the Non-qualified Pension Plan had benefit obligations in excess of the fair value of plan assets. Below is the funded status of each of our Pension Plans:

	Aetna Pension Plan		Non-qualified Pension Plan	
(Millions)	**2016**	**2015**	**2016**	**2015**
Benefit obligation	**$ (5,807)**	$ (5,714)	**$ (225)**	$ (232)
Fair value of plan assets	**5,914**	5,802	**—**	—
Funded status	**$ 107**	$ 88	**$ (225)**	$ (232)

The amounts in accumulated other comprehensive loss that have not yet been recognized in net periodic benefit cost as of December 31, 2016 and 2015 were as follows:

	Pension Plans		OPEB Plans	
(Millions)	**2016**	**2015**	**2016**	**2015**
Unrecognized prior service credit	**$ —**	$ (1)	**$ (19)**	$ (22)
Unrecognized net actuarial losses	**2,460**	2,398	**66**	67
Amount recognized in accumulated other comprehensive loss	**$ (2,460)**	$ (2,397)	**$ (47)**	$ (45)

The (liabilities) assets recognized on our balance sheets at December 31, 2016 and 2015 for our pension and OPEB plans were comprised of the following:

	Pension Plans		OPEB Plans	
(Millions)	**2016**	**2015**	**2016**	**2015**
Accrued benefit assets reflected in other long-term assets	**$ 107**	$ 88	**$ —**	$ —
Accrued benefit liabilities reflected in other current liabilities	**(20)**	(19)	**(13)**	(14)
Accrued benefit liabilities reflected in other long-term liabilities	**(205)**	(213)	**(183)**	(188)
Net amount of (liabilities) assets recognized at December 31,	**$ (118)**	$ (144)	**$ (196)**	$ (202)

At December 31, 2016, we had approximately $2.5 billion and $66 million of net actuarial losses for our pension and OPEB plans, respectively, and $19 million of prior service credits for our OPEB plans and an immaterial amount of prior service credits

for our pension plan, that have not been recognized as components of net periodic benefit costs. We expect to recognize $65 million and $2 million in amortization of net actuarial losses for our pension and OPEB plans, respectively, and $4 million in amortization of prior service credits for our OPEB plans in 2017. Our amortization of prior service credits for our pension plans in 2017 is not expected to be material.

Components of the net periodic benefit (income) cost of our defined benefit pension plans and OPEB plans for the years ended December 31, 2016, 2015 and 2014 were as follows:

	Pension Plans			OPEB Plans		
(Millions)	**2016**	**2015**	**2014**	**2016**	**2015**	**2014**
Amortization of prior service credit	**$ —**	$ (1)	$ (1)	**$ (4)**	$ (4)	$ (4)
Interest cost	**260**	261	288	**11**	11	12
Expected return on plan assets	**(389)**	(419)	(422)	**(3)**	(3)	(3)
Recognized net actuarial losses	**61**	62	47	**3**	3	1
Settlement charge	**—**	—	112	**—**	—	—
Net periodic benefit (income) cost	**$ (68)**	$ (97)	$ 24	**$ 7**	$ 7	$ 6

The weighted average assumptions used to determine net periodic benefit (income) cost in 2016, 2015 and 2014 for the pension and OPEB plans were as follows:

	Pension Plans			OPEB Plans		
	2016	**2015**	**2014**	**2016**	**2015**	**2014**
Discount rate	**4.50%**	4.12%	4.96%	**4.39%**	4.02%	4.73%
