Many aspects of our operations are dependent on our information systems and the information collected, processed, stored, and handled by these systems. We rely heavily on our computer systems to manage our ordering, pricing, point-of-sale, pharmacy fulfillment, inventory replenishment, claims processing, ExtraCare customer loyalty program, finance, human resource and other processes. Throughout our operations, we receive, retain and transmit certain confidential information, including PII that our customers and clients provide to purchase products or services, enroll in programs or services, register on our websites, interact with our personnel, or otherwise communicate with us. In addition, for these operations, we depend in part on the secure transmission of confidential information over public networks. Our information systems are subject to damage or interruption from power outages, facility damage, computer and telecommunications failures, computer viruses, security breaches including credit card or personally identifiable information breaches, coordinated cyber attacks, vandalism, catastrophic events and human error. Although we deploy a layered approach to address information security threats and vulnerabilities, including ones from a cyber security standpoint, designed to protect confidential information against data security breaches, a compromise of our information security controls or of those businesses with whom we interact, which results in confidential information being accessed, obtained, damaged, or used by unauthorized or improper persons, could harm our reputation and expose us to regulatory actions and claims from customers and clients, financial institutions, payment card associations and other persons, any of which could adversely affect our business, financial position, and results of operations. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and may not immediately produce signs of intrusion, we may be unable to anticipate these techniques or to implement adequate preventative measures. Moreover, a data security breach could require that we expend significant resources related to our information systems and infrastructure, and could distract management and other key personnel from performing their primary operational duties. We also could be adversely affected by any significant disruption in the systems of third parties we interact with, including key payors and vendors.

If our information systems are damaged, fail to work properly or otherwise become unavailable, or if we are unable to successfully complete our planned consolidation of our PBM claims adjudication platforms, we may incur substantial costs to repair or replace them, and may experience reputational damage, loss of critical information, customer disruption and interruptions or delays in our ability to perform essential functions and implement new and innovative services. In addition, compliance with changes in privacy and information security laws and standards may result in considerable expense due to increased investment in technology and the development of new operational processes.

Failure to adequately protect receipt and use of confidential health information concerning individuals.

Many aspects of our business involve the collection, transmission and use of an individual's protected health information or other sensitive personal information. In some cases, we also use aggregated and de-identified data as defined by HIPAA for analytical and research purposes, particularly data related to improving the quality of the care we provide. In other cases, we may provide de-identified data to pharmaceutical manufacturers and to third-party data aggregators where permitted by our contracts. These activities are subject to federal and state privacy and security laws and regulations and, in the future, may be subject to international regulatory requirements such as the General Data Protection Regulation, a new European Union privacy regulation that takes effect on May 25, 2018. At the federal level, HIPAA imposes extensive privacy and security requirements governing the transmission, use and disclosure of health

information by all participants in the health care industry, whether directly as a covered entity or as a business associate. Our business encompasses both situations and includes our pharmacists, nurse practitioners and PBM operations. In addition, industry requirements, such as Generally Accepted Privacy Principles may be imposed on us by our contracts with our PBM clients or other customers. Many of our businesses are also subject to the Payment Card Industry Data Security Standard, which is a security standard mandated by the credit card industry for the purpose of protecting credit card account data. These increasingly complex laws, regulations and industry requirements are subject to change and compliance with them may result in significant expenses associated with increased operational and compliance costs, particularly as we continue to collect and retain large amounts of information. To the extent that either we or our vendors with whom we share information are found to be out of compliance with applicable laws and regulations or experience a data security breach, we could be subject to additional litigation, regulatory risks and reputational harm. For example, the privacy and security of the information we maintain may be compromised by the actions of outside parties, by employee errors or by malfeasance. Such risks may result in an unauthorized party obtaining access to our data systems thereby threatening the privacy of protected health information or other sensitive personal information we use and maintain. Failure to comply with federal or state statutes or regulations may result in criminal penalties and civil sanctions. In addition, failure to comply with our own privacy or security policies may result in sanctions by the FTC or other federal oversight agencies. Future regulations and legislation that severely restrict or prohibit our use of patient, member or customer identifiable or other information could limit our ability to use information critical to the operation of our business. Furthermore, if we violate a patient's privacy or are found to have violated any federal or state statute or regulation with regard to confidentiality or dissemination or use of PHI, we could be liable for significant damages, fines or penalties and suffer reputational harm, any one of which could have a material adverse effect on our business and results of operations.

Regulatory and business changes relating to our participation in Medicare Part D.

Medicare Part D has resulted in increased utilization and puts pressure on pharmacy gross margin rates due to regulatory and competitive pressures. Further, as a result of ACA and changes to the retiree drug subsidy rules, our PBM clients could decide to discontinue providing prescription drug benefits to their Medicare-eligible members. To the extent this occurs, the adverse effects of increasing customer migration into Medicare Part D may outweigh the benefits we realize from growth of our Medicare Part D business. In addition, if the cost and complexity of Medicare Part D exceed management's expectations or prevent effective program implementation or administration; if changes to the regulations regarding how drug costs are reported for Medicare Part D are implemented in a manner that impacts the profitability of our Medicare Part D business; if changes to the regulations impact our ability to retain fees from third parties including network pharmacies; if the government alters Medicare program requirements or reduces funding because of the higher-than-anticipated cost to taxpayers of Medicare Part D or for other reasons; if the government mandates the use of point-of-sale manufacturer rebates or makes changes to how pharmacy pay-for-performance is calculated; if Congress acts to reduce reinsurance thresholds from 80% to 20%; if we fail to design and maintain programs that are attractive to Medicare participants; if CMS imposes restrictions on our Medicare Part D business as a result of audits or other regulatory actions; if we fail to successfully implement corrective action or other remedial measures sufficient to prevent or remove any applicable restrictions that may be imposed by CMS; or if we are not successful in retaining enrollees, or winning contract renewals or new contracts under Medicare Part D's competitive bidding process, our Medicare Part D services and the ability to expand our Medicare Part D services could be negatively impacted.

Possible changes in industry pricing benchmarks and drug pricing generally.

It is possible that the pharmaceutical industry or regulators may evaluate and/or develop an alternative pricing reference to replace Average Wholesale Price ("AWP") or Wholesale Acquisition Cost ("WAC"), which are the pricing references used for many of our PBM and LTC client contracts, pharmaceutical purchase agreements, retail network contracts, specialty payor agreements and other contracts with third party payors in connection with the reimbursement of drug payments. In addition, many state Medicaid fee-for-service programs ("FFS Medicaid") have established pharmacy network payments on the basis of Actual Acquisition Cost ("AAC"). The use of an AAC basis in FFS Medicaid could have an impact in reimbursement practices in other commercial and government segments. Future changes to the use of AWP, WAC or to other published pricing benchmarks used to establish pharmaceutical pricing, including changes in the basis for calculating reimbursement by federal and state health programs and/or other payors, could impact the reimbursement we receive from Medicare and Medicaid programs, the reimbursement we receive from PBM clients and other payors and/or our ability to negotiate rebates and/or discounts with pharmaceutical manufacturers, wholesalers, PBMs and retail pharmacies. A failure or inability to fully offset any increased prices or costs or to modify our operations to mitigate the impact of such increases could have an adverse effect on our results of operations.

Additionally, any future changes in drug prices could be significantly different than our projections. The effect of these possible changes on our business cannot be predicted at this time.

Product liability, product recall or personal injury issues could damage our reputation; failure to maintain adequate liability insurance coverage.

The products that we sell could become subject to contamination, product tampering, mislabeling, recall or other damage. In addition, errors in the dispensing and packaging of pharmaceuticals could lead to serious injury or death. Product liability or personal injury claims may be asserted against us with respect to any of the products or pharmaceuticals we sell or services we provide. Our business involves the provision of professional services including by pharmacists, nurses and nurse practitioners that exposes us to professional liability claims. Should a product or other liability issue arise, the coverage limits under our insurance programs and the indemnification amounts available to us may not be adequate to protect us against claims. We also may not be able to maintain this insurance on acceptable terms in the future. Damage to our reputation in the event of a product liability or personal injury issue or judgment against us or a product recall could have a significant adverse effect on our business, financial condition and results of operations.

Relationship with our retail and specialty pharmacy customers and the demand for our products and services, including propriety brands.

The success of our business depends in part on customer loyalty, superior customer service and our ability to persuade customers to frequent our retail stores and online sites and to purchase products in additional categories and our proprietary brands. Failure to timely identify or effectively respond to changing consumer preferences and spending patterns, and evolving demographic mixes in our markets, an inability to expand the products being purchased by our clients and customers, or the failure or inability to obtain or offer particular categories of products could negatively affect our relationship with our clients and customers and the demand for our products and services and could result in excess inventories of products.

We offer our retail customers proprietary brand products that are available exclusively at our retail stores and through our online retail sites. The sale of proprietary products subjects us to unique risks including potential product liability risks and mandatory or voluntary product recalls, potential supply chain and distribution chain disruptions for raw materials and finished products, our ability to successfully protect our intellectual property rights and the rights of applicable third parties, and other risks generally encountered by entities that source, market and sell private-label products. Any failure to adequately address some or all of these risks could have an adverse effect on our business, results of operations and financial condition. Additionally, an increase in the sales of our proprietary brands may negatively affect our sales of products owned by our suppliers which, consequently, could adversely impact certain of our supplier relationships. Our ability to locate qualified, economically stable suppliers who satisfy our requirements, and to acquire sufficient products in a timely and effective manner, is critical to ensuring, among other things, that customer confidence is not diminished. Any failure to develop sourcing relationships with a broad and deep supplier base could adversely affect our financial performance and erode customer loyalty.

Finally, our specialty pharmacy business focuses on complex and high-cost medications, many of which are made available by manufacturers to a limited number of pharmacies (so-called limited distribution drugs), that serve a relatively limited universe of patients. As a result, the future growth of our specialty pharmacy business is dependent largely upon expanding our base of drugs or penetration in certain treatment categories. Any contraction of our base of patients or reduction in demand for the prescriptions we currently dispense could have an adverse effect on our business, financial condition and results of operations.

Risks related to developing and maintaining a relevant omni-channel experience for our customers.

Our business has evolved from a retail store experience to interaction with customers across numerous channels, including in-store, online, mobile and social media, among others. Omni-channel retailing is rapidly evolving and we must keep pace with changing customer expectations and new developments by our competitors. Our customers are increasingly using computers, tablets, mobile phones, and other devices to comparison shop, determine product availability and complete purchases through mobile commerce applications. As a result, the portion of total consumer expenditures with all retailers occurring online and through mobile commerce applications is increasing and the pace of this increase could accelerate. We must compete by offering a consistent and convenient shopping experience for our customers regardless of the ultimate sales channel and by investing in, providing and maintaining mobile commerce

applications for our customers that have the right features and are reliable and easy to use. If we are unable to make, improve, or develop relevant customer-facing technology in a timely manner that keeps pace with technological developments and dynamic customer expectations, our ability to compete and our results of operations could be materially and adversely affected. In addition, if our online activities or our other customer-facing technology systems do not function as designed, we may experience a loss of customer confidence, data security breaches, lost sales, or be exposed to fraudulent purchases, any of which could materially and adversely affect our business operations, reputation and results of operations.

We are subject to payment-related risks that could increase our operating costs, expose us to fraud or theft, subject us to potential liability and disrupt our business operations.

We accept payments using a variety of methods, including cash, checks, credit cards, debit cards, gift cards, mobile payments and potentially other technologies in the future. Acceptance of these payment methods subjects us to rules, regulations, contractual obligations and compliance requirements, including payment network rules and operating guidelines, data security standards and certification requirements, and rules governing electronic funds transfers. These requirements may change in the future, which could make compliance more difficult or costly. For certain payment options, including credit and debit cards, we pay interchange and other fees, which could increase periodically thereby raising our operating costs. We rely on third parties to provide payment processing services, including the processing of credit cards, debit cards, and various other forms of electronic payment. If these companies are unable to provide these services to us, or if their systems are compromised, our operations could be disrupted. The payment methods that we offer also expose us to potential fraud and theft by persons seeking to obtain unauthorized access to, or exploit any weaknesses in, the payment systems. If we fail to abide by applicable rules or requirements, or if data relating to our payment systems is compromised due to a breach or misuse, we may be responsible for any costs incurred by payment card issuing banks and other third parties or subject to fines and higher transaction fees. In addition, our reputation and ability to accept certain types of payments could each be harmed resulting in reduced sales and adverse effects on our results of operations.

Solvency of our customers.

In the event that our customers' operating and financial performance deteriorates, or they are unable to make scheduled payments or obtain adequate financing, our customers may not be able to pay timely, or may delay payment of, amounts owed to us. Any inability of our customers to pay us for our products and services may adversely affect our business, financial condition and results of operations. In addition, both state and federal government sponsored payers, as a result of budget deficits or reductions, may suspend payments or seek to reduce their healthcare expenditures resulting in our customers delaying payments to us or renegotiating their contracts with us. Any delay or reduction in payments by such government sponsored payers may adversely affect our business, financial condition and results of operations.

Our outstanding debt and associated payment obligations could significantly increase in the future if we incur additional debt and do not retire existing debt.

Our current debt service costs associated with our increased debt levels may negatively impact our ability to make important investments in our business and limit our flexibility to respond to industry changes and market conditions. In addition, our debt levels and related debt service obligations could make it more difficult or expensive for us to obtain financing for working capital, capital expenditures, acquisitions or other purposes in the future. These circumstances could have a material adverse effect on our business operations and financial condition.

Further, we may incur and assume significantly more debt in the future, including in connection with the Aetna Acquisition or other acquisitions, strategic investments or joint ventures. For example, in connection with the Aetna Acquisition, if it is completed, we expect to incur approximately, $45.0 billion of new indebtedness and assume approximately $8.2 billion of existing indebtedness of Aetna. If we do not retire our existing debt or debt we assume in acquisitions or other strategic transactions, the risks described above could increase. We also could be adversely impacted by any failure to renew or replace, on terms acceptable to us or at all, existing indebtedness when it expires, and by any failure to satisfy applicable covenants.

We may be unable to refinance existing indebtedness or otherwise access the capital markets for any reason, whether due to market conditions or otherwise. Our continued access to the capital markets, and the terms of such access, depend on multiple factors including the condition of debt capital markets, our operating performance, the amount of our

indebtedness and debt service obligations and our credit ratings. Any disruptions or turmoil in the capital markets or any downgrade of our credit ratings could have a material adverse effect on our cost of funds, liquidity, competitive position and access to capital markets, which could materially and adversely affect our business operations, financial condition, and results of operations.

Our long-term debt obligations include covenants that limit our ability and the ability of our subsidiaries to secure indebtedness with a security interest on certain property or stock or engage in certain sale and leaseback transactions with respect to certain properties. In addition, our existing credit agreements require us to maintain a ratio of consolidated debt to total capitalization not to exceed specified levels. Our ability to comply with these restrictions and covenants may be affected by events beyond our control, and if we fail to comply with such restrictions or covenants, our outstanding indebtedness could be declared immediately due and payable. This could have a material adverse effect on our business operations and financial condition.

We may be unable to successfully integrate companies acquired by us.

Upon the closing of any acquisition we complete, we will need to successfully integrate the products, services and related assets, as well as internal controls into our business operations. If an acquisition is consummated, the integration of the acquired business, its products, services and related assets into our company may also be complex and time-consuming and, if the integration is not fully successful, we may not achieve the anticipated benefits, operating and cost synergies or growth opportunities of an acquisition. Potential difficulties that may be encountered in the integration process include the following:

- Integrating personnel, operations and systems, while maintaining focus on producing and delivering consistent, high quality products and services;
- Coordinating geographically dispersed organizations;
- Disruption of management's attention from our ongoing business operations;
- Retaining existing customers and attracting new customers; and
- Managing inefficiencies associated with integrating our operations.

An inability to realize the full extent of the anticipated benefits, operating and cost synergies, innovations and operations efficiencies or growth opportunities of an acquisition, as well as any delays encountered in the integration process, could have a material adverse effect on our business and results of operation. Furthermore, these acquisitions, even if successfully integrated, may fail to further our business strategy as anticipated, expose us to increased competition or challenges with respect to our products, services or geographic markets, and expose us to additional liabilities associated with an acquired business including risks and liabilities associated with litigation involving the acquired business. Any one of these challenges or risks could impair our ability to realize any benefit from our acquisitions after we have expended resources on them.

Risks related to the seasonality of our business.

Although the majority of our revenues, particularly pharmacy revenues, are generally not seasonal in nature, front store revenues tend to be higher during the December holiday season. Uncharacteristic or extreme weather conditions can adversely impact consumer shopping patterns as well. This could lead to lost sales, as well as increased snow removal and other costs, thereby negatively affecting our short-term results of operations. In addition, both pharmacy and front store revenues are affected by the timing and severity of the cough, cold and flu season, which is susceptible to large fluctuations from year to year, and our quarterly earnings and operating cash flows are impacted by the Medicare Part D benefit design and changes in the composition of our membership. See "Business - Pharmacy Services Seasonality."

Our operations are subject to a variety of business continuity hazards and risks, any of which could interrupt operations or otherwise adversely affect our performance and results.

We are subject to business continuity hazards and other risks, including natural disasters, utility and other mechanical failures, acts of war or terrorism, disruption of communications, data security and preservation, disruption of supply or distribution, safety regulation and labor difficulties. The occurrence of any of these or other events might disrupt or shut down operations, or otherwise adversely impact our operations. We may also be subject to certain liability claims in the event of an injury or loss of life, or damage to property, resulting from such events. Although we have developed business continuity plans and maintain insurance policies that we believe are customary and adequate for our size and

industry, our insurance policies include limits and, as such, our coverage may be insufficient to protect against all potential hazards and risks incident to our business. Should any such hazards or risks occur, or should our insurance coverage be inadequate or unavailable, our business financial condition and results of operations could be adversely affected.

Risks related to litigation and other legal proceedings.

Pharmacy services, retail pharmacy and LTC pharmacy are highly regulated and litigious industries. We are currently subject to various litigation matters, investigations, audits, inspections, government inquiries, and regulatory and legal proceedings. Litigation, and particularly securities and collective or class action litigation, is often expensive and disruptive. Further, under the *qui tam* or "whistleblower" provisions of the federal and various state false claims acts, private citizens may bring lawsuits alleging that a violation of the federal anti-kickback statute or similar laws has resulted in the submission of "false" claims to federal and/or state health care programs, including Medicare and Medicaid. Litigation related to our provision of professional services in our pharmacies, specialty pharmacies, clinics and LTC facilities has also increased as we expand our services along the continuum of health care. We cannot predict the outcome of any of these matters, and the costs incurred may be substantial regardless of outcome. Our business, financial condition and results of operations may be adversely affected, or we may be required to materially change our business practices, as a result of such proceedings. We refer you to Item 3, "Legal Proceedings" for additional information.

We face significant competition in attracting and retaining talented employees. Further, managing succession for, and retention of, key executives is critical to our success, and our failure to do so could have an adverse impact on our future performance.

Our ability to attract and retain qualified and experienced employees is essential to meet current and future goals and objectives and there is no guarantee we will be able to attract and retain such employees or that competition among potential employers will not result in increased salaries or other benefits. An inability to retain existing employees or attract additional employees, or an unexpected loss of leadership, could have a material adverse effect on our business and results of operations.

In addition, our failure to adequately plan for succession of senior management and other key management roles or the failure of key employees to successfully transition into new roles could have a material adverse effect on our business and results of operations. While we have succession plans in place and employment arrangements with certain key executives, these do not guarantee the services of these executives will continue to be available to us.

Goodwill and other intangible assets could, in the future, become impaired.

As of December 31, 2017, we had $52.1 billion of goodwill and other intangible assets. Goodwill and indefinitely-lived intangible assets are subject to annual impairment reviews, or more frequent reviews if events or circumstances indicate that the carrying value may not be recoverable. When evaluating goodwill for potential impairment, we first compare the fair value of our reporting units to their respective carrying amounts. We estimate the fair value of our reporting units using a combination of a discounted cash flow model and a comparable market multiple model. If the estimated fair value of the reporting unit is less than its carrying amount, an impairment loss calculation is prepared. The impairment loss calculation compares the fair value of a reporting unit to its carrying amount. If the carrying amount of the reporting unit exceeds the fair value, a goodwill impairment loss is recognized in an amount equal to the excess to the extent of the goodwill balance. Estimated fair values could change if, for example, there are changes in the business climate, changes in the competitive environment, adverse legal or regulatory actions or developments, changes in capital structure, cost of debt, interest rates, capital expenditure levels, operating cash flows, or market capitalization. Because of the significance of our goodwill and intangible assets, any future impairment of these assets could require material noncash charges to our results of operations, which could have a material adverse effect on our financial condition and results of operations.

The foregoing is not a comprehensive listing of all possible risks and there can be no assurance that we have correctly identified and appropriately assessed all factors affecting the business. As such, we refer you to "Management's Discussion and Analysis of Financial Condition and Results of Operations," which includes our "Cautionary Statement Concerning Forward-Looking Statements" at the end of such section, of our Annual Report to Stockholders for the year ended December 31, 2017, which section is incorporated by reference herein.

Aetna-Related Risk Factors In addition to the risk factors described above that could materially adversely affect our business, financial condition, results of operations, cash flows and prospects, the following risk factors, and additional risks not presently known to us or that we currently deem to be immaterial, could also materially adversely affect us and the Aetna Acquisition.

In order to complete the merger, we and Aetna must obtain certain governmental authorizations, and if such authorizations are not granted or are granted with conditions that become applicable to the parties, completion of the merger may be jeopardized or prevented or the anticipated benefits of the merger could be reduced.

Completion of the merger is conditioned upon the expiration or early termination of the waiting period relating to the merger under the HSR Act and certain other applicable laws or regulations and the required governmental authorizations having been obtained and being in full force and effect. Although we and Aetna have agreed in the merger agreement to use our reasonable best efforts, subject to certain limitations, to make certain governmental filings or obtain the governmental authorizations required to complete the merger (the "required governmental authorizations"), as the case may be, there can be no assurance that the relevant waiting periods will expire or authorizations will be obtained and no assurance that the merger will be completed.

In addition, the governmental authorities from which these authorizations are required have broad discretion in administering the governing laws and regulations, and may take into account various facts and circumstances in their consideration of the merger, including other potential transactions in the health care industry or other industries. These governmental authorities may initiate proceedings seeking to prevent, or otherwise seek to prevent, the merger. As a condition to authorization of the merger or related transactions, these governmental authorities also may impose requirements, limitations or costs, require divestitures or place restrictions on the conduct of our business after completion of the merger. Under the terms of the merger agreement, we are not required, and Aetna is not permitted without our consent, to take any actions or agree to any terms or conditions in connection with (i) the expiration or early termination of the waiting period relating to the merger under the HSR Act, (ii) any other antitrust law or (iii) the required governmental authorizations, in each case if such action, term or condition would have, or would reasonably be expected to have, individually or in the aggregate, a regulatory material adverse effect on us or Aetna.

However, notwithstanding the provisions of the merger agreement, either we or Aetna could become subject to terms or conditions in connection with such waiting periods, laws or other authorizations (whether because such term or condition does not rise to the specified level of materiality or we otherwise consent to its imposition) the imposition of which could adversely affect our ability to integrate Aetna's operations with our operations, reduce the anticipated benefits of the merger or otherwise materially and adversely affect our business and results of operations after completion of the merger.

In addition to receipt of certain governmental authorizations, completion of the merger is subject to a number of other conditions, and if these conditions are not satisfied or waived, the merger will not be completed.

Our obligations and the obligations of Aetna to complete the merger are subject to satisfaction or waiver of a number of conditions in addition to receipt of certain governmental authorizations, including, among other conditions: (i) approval and adoption of the merger agreement by Aetna shareholders at an Aetna special meeting, (ii) approval of the stock issuance by our stockholders at the CVS Health special meeting, (iii) approval for the listing on the New York Stock Exchange of the shares of CVS Health common stock to be issued in the merger, (iv) absence of any applicable law or order that prohibits completion of the transaction, (v) accuracy of the representations and warranties made in the merger agreement by the other party, subject to certain materiality qualifications, (vi) performance in all material respects by the other party of the material obligations required to be performed by it at or prior to completion of the transaction, and (vii) the absence of a material adverse effect on the other party. There can be no assurance that the conditions to completion of the merger will be satisfied or waived or that the merger will be completed.

In addition, the CVS Health special meeting and the Aetna special meeting may take place before certain governmental authorizations have been obtained and, therefore, before the terms on which such governmental authorizations may be obtained, or the conditions to obtaining such governmental authorizations that may be imposed, are known. As a result, if CVS Health stockholders approve the stock issuance at the CVS Health special meeting, or Aetna shareholders approve and adopt the merger agreement at the Aetna special meeting, we and Aetna may make decisions after the respective meetings to waive a condition as to the receipt of certain governmental authorizations or to take certain

actions required to obtain such governmental authorizations without seeking further stockholder or shareholder approval, as applicable, and such actions could have an adverse effect on the combined company.

After completion of the merger, we may fail to realize the anticipated benefits and cost savings of the merger, which could adversely affect the value of shares of our common stock.

The success of the merger will depend, in part, on our ability to realize the anticipated benefits and cost savings from combining the businesses of CVS Health and Aetna. Our ability to realize these anticipated benefits and cost savings is subject to certain risks, including:

- Our ability to successfully combine the businesses of CVS Health and Aetna;
- whether the combined businesses will perform as expected;
- the possibility that we paid more for Aetna than the value we will derive from the acquisition;
- the reduction of our cash available for operations and other uses and the incurrence of indebtedness to finance the acquisition; and
- the assumption of known and unknown liabilities of Aetna.

If we are not able to successfully combine the businesses of CVS Health and Aetna within the anticipated time frame, or at all, the anticipated cost savings and other benefits of the merger may not be realized fully or may take longer to realize than expected, the combined businesses may not perform as expected and the value of the shares of our common stock may be adversely affected.

We and Aetna have operated and, until completion of the merger will continue to operate, independently, and there can be no assurances that our respective businesses can be integrated successfully. It is possible that the integration process could result in the loss of key CVS Health or Aetna employees, the disruption of either company's or both companies' ongoing businesses or in unexpected integration issues, higher than expected integration costs and an overall post-completion integration process that takes longer than originally anticipated. Specifically, issues that must be addressed in integrating the operations of Aetna and CVS Health in order to realize the anticipated benefits of the merger so the combined business performs as expected include, among other things:

- combining the companies' separate operational, financial, reporting and corporate functions;
- integrating the companies' technologies, products and services;
- identifying and eliminating redundant and underperforming operations and assets;
- harmonizing the companies' operating practices, employee development, compensation and benefit programs, internal controls and other policies, procedures and processes;
- addressing possible differences in business backgrounds, corporate cultures and management philosophies;
- consolidating the companies' corporate, administrative and information technology infrastructure;
- coordinating sales, distribution and marketing efforts;
- managing the movement of certain businesses and positions to different locations;
- maintaining existing agreements with customers, providers and vendors and avoiding delays in entering into new agreements with prospective customers, providers and vendors;
- operating in industry sectors in which we and our current management may have little or no experience;
- coordinating geographically dispersed organizations;
- consolidating offices of Aetna and CVS Health that are currently in or near the same location; and
- effecting potential actions that may be required in connection with obtaining regulatory approvals.

In addition, at times, the attention of certain members of each company's management and each company's resources may be focused on completion of the merger and the integration of the businesses of the two companies and diverted from day-to-day business operations, which may disrupt each company's ongoing business and the business of the combined company.

We have limited experience in the insurance and managed health care industry, which may hinder our ability to achieve the combined company's objectives.

We have limited experience operating an insurance and managed health care business, and will rely in large part on the existing management of Aetna to continue to manage the Aetna business following the merger. However, there is no

assurance that we will be able to retain the services of such management. If we fail to retain the existing management of Aetna, our ability to realize the anticipated benefits of the transaction may be adversely affected.

We and Aetna may have difficulty attracting, motivating and retaining executives and other key employees in light of the merger.

As we will be operating in industry sectors for which our existing management team has little or no experience, our success after the transaction will depend in part on our ability to retain key executives and other employees of Aetna. Uncertainty about the effect of the merger on CVS Health and Aetna employees may have an adverse effect on each of us and Aetna separately and consequently the combined business. This uncertainty may impair our and/or Aetna's ability to attract, retain and motivate key personnel. Employee retention may be particularly challenging during the pendency of the merger, as employees of CVS Health and Aetna may experience uncertainty about their future roles in the combined business.

Additionally, Aetna's officers and employees may hold Aetna common shares, as well as Aetna stock appreciation rights, Aetna restricted stock units ("Aetna RSUs") and Aetna performance stock units ("Aetna PSUs") that are subject to accelerated vesting on a change in control, and, if the merger is completed, these officers and employees may be entitled to cash and/or the consideration payable under the merger agreement in respect of such Aetna common shares, stock appreciation rights, Aetna RSUs and Aetna PSUs. These payouts could also make retention of these officers and employees more difficult. Additionally, pursuant to employment agreements and/or other agreements or arrangements with Aetna, certain key employees of Aetna are entitled to receive severance payments upon a termination without cause and/or a resignation for "good reason" following completion of the merger. Under these agreements, certain key employees of Aetna potentially could resign from his or her employment following specified circumstances set forth in his or her applicable agreement, including an adverse change in his or her title, authority or responsibilities, compensation and benefits or primary office location.

Furthermore, if key employees of CVS Health or Aetna depart or are at risk of departing, including because of issues relating to the uncertainty and difficulty of integration, financial security or a desire not to become employees of the combined business, we may have to incur significant costs in retaining such individuals or in identifying, hiring and retaining replacements for departing employees and may lose significant expertise and talent relating to the business of Aetna, and our ability to realize the anticipated benefits of the merger may be materially and adversely affected. Accordingly, no assurance can be given that we will be able to attract or retain key employees of Aetna to the same extent that Aetna has been able to attract or retain employees in the past.

Our and Aetna's business relationships may be subject to disruption due to uncertainty associated with the merger.

Parties with which we or Aetna do business may experience uncertainty associated with the merger, including with respect to current or future business relationships with us, Aetna or the combined business. Our and Aetna's business relationships may be subject to disruption as customers, providers, vendors and others may attempt to negotiate changes in existing business relationships or consider entering into business relationships with parties other than us, Aetna or the combined business. These disruptions could have a material adverse effect on the businesses, financial condition, results of operations or prospects of CVS Health, Aetna and/or the combined business, including a material adverse effect on our ability to realize the anticipated benefits of the merger. The risk and adverse effect of such disruptions could be exacerbated by a delay in completion of the merger or termination of the merger agreement.

The merger agreement contains provisions that may make it more difficult for us and Aetna to pursue alternatives to the merger.

The merger agreement contains provisions that make it more difficult for Aetna to sell its business to a party other than us, or for us to sell its business. These provisions include a general prohibition on each party soliciting any acquisition proposal. Further, there are only limited exceptions to each party's agreement that its board of directors will not withdraw or modify in a manner adverse to the other party the recommendation of its board of directors in favor of the approval and adoption of the merger agreement, in the case of Aetna, or the approval of the stock issuance, in our case, and the other party generally has a right to match any acquisition proposal that may be made. However, at any time prior to the approval and adoption of the merger agreement by Aetna shareholders, in the case of Aetna, or the approval of the stock issuance by CVS Health stockholders, in our case, such party's board of directors is permitted to take certain of

these actions if it determines in good faith that the failure to take such action would be reasonably likely to be inconsistent with its fiduciary duties under applicable law.

While we believe these provisions are reasonable and not preclusive of other offers, these restrictions might discourage a third party that has an interest in acquiring all or a significant part of either Aetna or CVS Health from considering or proposing that acquisition, even if that party were prepared to pay consideration with a higher per-share value than the currently proposed merger consideration, in the case of Aetna, or that party were prepared to enter into an agreement that may be favorable to us or our stockholders, in our case. Furthermore, the termination fees described below may result in a potential competing acquirer proposing to pay a lower per-share price to acquire the applicable party than it might otherwise have proposed to pay because of the added expense of the termination fee that may become payable by such party in certain circumstances.

Failure to complete the merger could negatively impact our stock price and our future business and financial results.

If the merger is not completed for any reason, including as a result of Aetna shareholders failing to approve and adopt the merger agreement or CVS Health stockholders failing to approve the stock issuance, our ongoing business may be materially and adversely affected and, without realizing any of the benefits of having completed the merger, we would be subject to a number of risks, including the following:

- we may experience negative reactions from the financial markets, including negative impacts on the trading price of our common stock and other securities, and from our customers, providers, vendors, regulators and employees;
- we may be required to pay Aetna a termination fee of $2.1 billion if the merger agreement is terminated under certain circumstances;
- we will be required to pay certain transaction expenses and other costs incurred in connection with the merger, whether or not the merger is completed;
- the merger agreement places certain restrictions on the conduct of our businesses prior to completion of the merger, and such restrictions, the waiver of which is subject to the consent of Aetna, may prevent us from making certain acquisitions, taking certain other specified actions or otherwise pursuing business opportunities during the pendency of the merger that we would have made, taken or pursued if these restrictions were not in place; and
- matters relating to the merger (including arranging permanent financing and integration planning) will require substantial commitments of time and resources by our management and the expenditure of significant funds in the form of fees and expenses, which would otherwise have been devoted to day-to-day operations and other opportunities that may have been beneficial to us as an independent company.

There can be no assurance that the risks described above will not materialize. If any of those risks materialize, they may materially and adversely affect our businesses, financial condition, financial results, ratings, stock prices and/or bond prices.

In addition, we could be subject to litigation related to any failure to complete the merger or related to any proceeding to specifically enforce our obligation to perform our obligations under the merger agreement. If the merger is not completed, these risks may materialize and may materially and adversely affect our businesses, financial condition, financial results, ratings, stock prices and/or bond prices.

We and Aetna may be targets of securities class action and derivative lawsuits which could result in substantial costs and may delay or prevent the merger from being completed.

Securities class action lawsuits and derivative lawsuits are often brought against public companies that have entered into merger agreements. Even if the lawsuits are without merit, defending against these claims can result in substantial costs and divert management time and resources. An adverse judgment could result in monetary damages, which could have a negative impact on our and Aetna's respective liquidity and financial condition. Additionally, if a plaintiff is successful in obtaining an injunction prohibiting completion of the merger, then that injunction may delay or prevent the merger from being completed, which may adversely affect our and Aetna's respective business, financial position and results of operation. Since the filing with the SEC of the preliminary joint proxy statement/prospectus relating to the proposed merger, a number of class action lawsuits in connection with the merger have been filed against us, Aetna and Aetna's

directors and officers. Neither we nor Aetna presently believe that there is any merit to any such lawsuit. We and Aetna intend to defend them vigorously.

Our indebtedness following completion of the merger will be substantially greater than our indebtedness on a stand-alone basis and greater than the combined indebtedness of CVS Health and Aetna existing prior to the announcement of the transaction. This increased level of indebtedness could adversely affect our business flexibility, and increase our borrowing costs. Downgrades in our ratings could adversely affect our business, cash flows, financial condition and operating results.

In order to complete the merger, we expect to incur acquisition-related debt financing of approximately $45.0 billion and assume Aetna's existing indebtedness of approximately $8.2 billion. Our substantially increased indebtedness and higher debt-to-equity ratio following completion of the merger in comparison to that of CVS Health prior to the merger will have the effect, among other things, of reducing our flexibility to respond to changing business and economic conditions and will increase our borrowing costs. In addition, the amount of cash required to service our increased indebtedness levels and thus the demands on our cash resources will be greater than the amount of cash flows required to service the indebtedness of CVS Health or Aetna individually prior to the merger. The increased levels of indebtedness could also reduce funds available to fund our efforts to combine our business with Aetna and realize expected benefits of the merger and/or engage in investments in product development, capital expenditures, dividend payments, share repurchases and other activities and may create competitive disadvantages for us relative to other companies with lower debt levels.

In addition, our credit ratings impact the cost and availability of future borrowings, and, as a result, our cost of capital. Our ratings reflect each rating organization's opinion of our financial strength, operating performance and ability to meet our debt obligations or, following completion of the merger, obligations to the combined company's insureds. Each of the ratings organizations reviews our ratings periodically, and there can be no assurance that our current ratings will be maintained in the future. Following the announcement of the merger agreement, each of Standard & Poor's and Moody's placed certain of our debt, financial strength and other credit ratings under review for a possible downgrade. Following the announcement of the merger agreement, Standard & Poor's, A.M. Best and Fitch placed Aetna's debt, financial strength and other credit ratings under review with negative implications. Downgrades in our ratings could adversely affect our business, cash flows, financial condition and operating results. In addition, if the merger is completed and, in certain circumstances, Aetna's debt securities are rated below investment grade, this may constitute a change of control triggering event under the indentures governing such debt. Upon the occurrence of a change of control triggering event, Aetna, as the surviving corporation of the merger, would be required to offer to repurchase most of Aetna's outstanding notes at 101% of the principal amount thereof plus accrued and unpaid interest if any, to, but not including, the date of repurchase. However, it is possible that Aetna (or us) would not have sufficient funds at the time of the change of control triggering event to make the required repurchase of notes or that restrictions in other debt instruments would not allow such repurchases. We cannot provide any assurance that there will be sufficient funds available for Aetna (or us) to make any required repurchases of the notes upon a change of control triggering event.

We will incur significant transaction and integration-related costs in connection with the merger.

We expect to incur a number of non-recurring costs associated with the merger and combining the operations of the two companies. We will incur significant transaction costs related to the merger, including with respect to the financing for the cash consideration to be paid to Aetna shareholders. We also will incur significant integration-related fees and costs related to formulating and implementing integration plans, including facilities and systems consolidation costs and employment-related costs. We continue to assess the magnitude of these costs, and additional unanticipated costs may be incurred in the merger and the integration of the two companies' businesses. Although we expect that the elimination of duplicative costs, as well as the realization of other efficiencies related to the integration of the businesses, should allow us to offset integration-related costs over time, this net benefit may not be achieved in the near term, or at all.

The merger may not be accretive, and may be dilutive, to our earnings per share, which may negatively affect the market price of shares of our common stock.

We currently project that the merger will result in a number of benefits, including enhanced competitive positioning and a platform from which to accelerate growth, and that it will be accretive to earnings per share in the second full year after the close of the transaction. This projection is based on preliminary estimates that may materially change. In addition, future events and conditions could decrease or delay the accretion that is currently projected or could result in dilution, including adverse changes in market conditions, additional transaction and integration-related costs and other factors such as the failure to realize some or all of the anticipated benefits of the merger. Any dilution of, decrease in or delay of any accretion to, our earnings per share could cause the price of shares of our common stock to decline or grow at a reduced rate.

The future results of the combined company may be adversely impacted if the combined company does not effectively manage its expanded operations following completion of the merger.

Following completion of the merger, the size of the combined company's business will be significantly larger than the current size of either our or Aetna's respective businesses. The combined company's ability to successfully manage this expanded business will depend, in part, upon management's ability to implement an effective integration of the two companies and its ability to manage a combined business with significantly larger size and scope with the associated increased costs and complexity. There can be no assurances that the management of the combined company will be successful or that the combined company will realize the expected operating efficiencies, cost savings and other benefits currently anticipated from the merger.

Additional information concerning these risks, uncertainties and assumptions can be found in the section entitled "Risk Factors" beginning on page 62 of our preliminary joint proxy statement/prospectus filed February 9, 2018 with the SEC on Form S-4/A.

Item 1B. Unresolved Staff Comments

There are no unresolved SEC Staff Comments.

Item 2. Properties

We lease most of our stores under long-term leases that vary as to rental amounts, expiration dates, renewal options and other rental provisions. For additional information on the amount of our rental obligations for our leases, we refer you to Note 7 "Leases" in our Annual Report to Stockholders for the year ended December 31, 2017, which section is incorporated by reference herein.

As of December 31, 2017, we owned approximately 4% of our 8,108 retail stores. Net selling space for our retail stores was approximately 79.5 million square feet as of December 31, 2017. Approximately 20% of our store base was opened or significantly remodeled within the last five years.

We lease 1,695 retail pharmacies and 79 clinics in Target stores located in 47 states and the District of Columbia.

We own nine distribution centers located in Alabama, California, Hawaii, New York, Rhode Island, South Carolina, Tennessee and Texas and lease 13 additional distribution facilities located in Arizona, Florida, Indiana, Michigan, Missouri, New Jersey, Pennsylvania, Texas, Virginia and Brazil. The 22 distribution centers total approximately 10.4 million square feet as of December 31, 2017.

As of December 31, 2017, we owned six and leased 139 LTC pharmacies in 44 states and owned one LTC repackaging facility in Kentucky.

As of December 31, 2017, we owned one mail service dispensing pharmacy located in Texas and leased three additional mail order dispensing pharmacies located in Hawaii, Illinois and Pennsylvania; we leased call centers located in California, Missouri, Pennsylvania, Tennessee and Texas; we leased 37 onsite pharmacy stores and 23 specialty pharmacy stores, and leased 18 specialty mail order pharmacies; we leased 83 branches for infusion and enteral services, including approximately 73 ambulatory infusion suites and three centers of excellence.

Table of Contents

We own our corporate offices located in Woonsocket, Rhode Island, which totals approximately one million square feet. In addition, we lease corporate offices in Scottsdale, Arizona, Northbrook, Illinois, Cincinnati, Ohio, Monroeville, Pennsylvania, Irving, Texas, and Sao Paulo, Brazil.

In connection with certain business dispositions completed between 1991 and 1997, we continue to guarantee lease obligations for approximately 85 former stores. We are indemnified for these guarantee obligations by the respective purchasers. These guarantees generally remain in effect for the initial lease term and any extension thereof pursuant to a renewal option provided for in the lease prior to the time of the disposition. For additional information, we refer you to Note 12 “Commitments and Contingencies” in our Annual Report to Stockholders for the year ended December 31, 2017, which section is incorporated by reference herein.

Management believes that the Company’s owned and leased facilities are suitable and adequate to meet the Company’s anticipated needs. At the end of the existing lease terms, management believes the leases can be renewed or replaced by alternative space.

The following is a breakdown by state, District of Columbia, Puerto Rico and Brazil of our retail stores, pharmacies and clinics in Target stores, LTC hub and spoke pharmacies, onsite pharmacy stores, specialty pharmacy stores, specialty mail order pharmacies, mail order dispensing pharmacies and branches and centers of excellence for infusion and enteral services as of December 31, 2017:

Item 3. Legal Proceedings

I. Legal Proceedings

We refer you to the Note 12 “Commitments and Contingencies” contained in the “Notes to the Consolidated Financial Statements” of our Annual Report to Stockholders for the year ended December 31, 2017, which section is incorporated by reference herein.

II. Environmental Matters

Item 103 of SEC Regulation S-K requires disclosure of certain environmental legal proceedings if management reasonably believes that the proceedings involve potential monetary sanctions of $100,000 or more. The Company is in the process of negotiating with the New York State Department of Environmental Conservation to resolve claims of alleged historical noncompliance with hazardous waste regulations in connection with long-term care pharmacies in the State of New York. These proceedings are not material to the Company's business or financial position.

Item 4. Mine Safety Disclosures

Not applicable.

Executive Officers of the Registrant

Executive Officers of the Registrant

The following sets forth the name, age and biographical information for each of our executive officers as of February 14, 2018. In each case the officer's term of office extends to the date of the board of directors meeting following the next annual meeting of stockholders of the Company. Previous positions and responsibilities held by each of the executive officers over the past five years are indicated below:

Lisa G. Bisaccia , age 61, Executive Vice President of CVS Health Corporation since March 2016 and Chief Human Resources Officer of CVS Health Corporation since January 2010; Senior Vice President of CVS Health Corporation from January 2010 through February 2016; Vice President, Human Resources of CVS Pharmacy, Inc. from September 2004 through December 2009. Ms. Bisaccia is also a member of the Board of Directors of Aramark, a leading global provider of food, facilities and uniform services.

Eva C. Boratto , age 51, Executive Vice President - Controller and Chief Accounting Officer of CVS Health Corporation since March 2017; Senior Vice President - Controller and Chief Accounting Officer of CVS Health Corporation from July 2013 through February 2017; Senior Vice President of PBM Finance from July 2010 through June 2013; Vice President, U.S. Market Finance Leader of Merck & Co., Inc. from June 2009 through June 2010.

Troyen A. Brennan, M.D ., age 63, Executive Vice President and Chief Medical Officer of CVS Health Corporation since November 2008; Executive Vice President and Chief Medical Officer of Aetna, Inc. from February 2006 through November 2008.

David M. Denton , age 52, Executive Vice President and Chief Financial Officer of CVS Health Corporation since January 2010; Senior Vice President and Controller and Chief Accounting Officer of CVS Health Corporation from March 2008 until December 2009; Senior Vice President, Financial Administration of CVS Health Corporation and CVS Pharmacy, Inc. from April 2007 to March 2008. Mr. Denton is also a member of the Board of Directors of Tapestry, Inc. (formerly known as Coach, Inc.), a leading retailer of premium bags and luxury accessories.

Larry J. Merlo, age 62, President and Chief Executive Officer of CVS Health Corporation since March 2011; President and Chief Operating Officer of CVS Health Corporation from May 2010 through March 2011; President of CVS Pharmacy from January 2007 through August 2011; Executive Vice President of CVS Health Corporation from January 2007 through May 2010; also a director of CVS Health Corporation since May 2010.

Thomas M. Moriarty , age 54, Executive Vice President and General Counsel of CVS Health Corporation since October 2012 and Chief Policy and External Affairs Officer since March 2017; Chief Strategy Officer from March 2014 through February 2017; General Counsel of Celgene Corporation, a global biopharmaceutical company, from May 2012 through September 2012; General Counsel and Corporate Secretary of Medco Health Solutions, Inc. ("Medco"), a pharmacy benefit management company, from March 2008 through April 2012; also President of Global Pharmaceutical Strategies of Medco from March 2011 through April 2012.

Jonathan C. Roberts , age 62, Executive Vice President and Chief Operating Officer of CVS Health Corporation since March 2017; Executive Vice President of CVS Health Corporation and President of CVS Caremark from September 2012 through February 2017; Executive Vice President of CVS Health Corporation and Chief Operating Officer of CVS Caremark from October 2010 through August 2011; Executive Vice President, Rx Purchasing, Pricing and Network Relations of CVS Health Corporation from January 2009 through October 2010.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our common stock is listed on the New York Stock Exchange under the symbol "CVS." The table below sets forth the high and low closing prices of our common stock on the New York Stock Exchange Composite Tape and the quarterly cash dividends declared per share of common stock during the periods indicated.

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year
2017 High	$ 83.92	$ 82.79	$ 83.31	$ 80.91	$ 83.92
Low	$ 74.80	$ 75.95	$ 75.35	$ 66.80	$ 66.80
Cash dividends per common share	$ 0.50	$ 0.50	$ 0.50	$ 0.50	$ 2.00
2016 High	$ 104.05	$ 106.10	$ 98.06	$ 88.80	$ 106.10
Low	$ 89.65	$ 93.21	$ 88.99	$ 73.53	$ 73.53
Cash dividends per common share	$ 0.425	$ 0.425	$ 0.425	$ 0.425	$ 1.70

CVS Health has paid cash dividends every quarter since becoming a public company. Future dividend payments will depend on the Company's earnings, capital requirements, financial condition and other factors considered relevant by the Company's Board of Directors. As of February 9, 2018, there were 21,453 registered shareholders according to the records maintained by our transfer agent.

The following share repurchase programs were authorized by the Company's Board of Directors:

In billions Authorization Date	Authorized	Remaining as of December 31, 2017
November 2, 2016 ("2016 Repurchase Program")	$ 15.0	$ 13.9
December 15, 2014 ("2014 Repurchase Program")	10.0	—
December 17, 2013 ("2013 Repurchase Program")	6.0	—

The share Repurchase Programs, each of which was effective immediately, permit the Company to effect repurchases from time to time through a combination of open market repurchases, privately negotiated transactions, accelerated share repurchase ("ASR") transactions, and/or other derivative transactions. The 2016 Repurchase Program can be modified or terminated by the Board of Directors at any time.

Pursuant to the authorization under the 2014 Repurchase Program, in August 2016, the Company entered into two fixed dollar ASRs with Barclays Bank PLC ("Barclays") for a total of $3.6 billion. Upon payment of the $3.6 billion purchase price in January 2017, the Company received a number of shares of its common stock equal to 80% of the $3.6 billion notional amount of the ASRs or approximately 36.1 million shares, which were placed into treasury stock in January 2017. The ASRs were accounted for as an initial treasury stock transaction for $2.9 billion and a forward contract for $0.7 billion. In April 2017, the Company received 9.9 million shares of common stock, representing the remaining 20% of the $3.6 billion notional amount of the ASRs, thereby concluding the ASRs. The remaining 9.9 million shares of common stock delivered to the Company by Barclays were placed into treasury stock and the forward contract was reclassified from capital surplus to treasury stock in April 2017.

In the ASR transactions described above, the initial repurchase of the shares and delivery of the remainder of the shares to conclude the ASR, resulted in an immediate reduction of the outstanding shares used to calculate the weighted average common shares outstanding for basic and diluted earnings per share.

During the year ended December 31, 2017, the Company repurchased an aggregate of 55.4 million shares of common stock for approximately $4.4 billion under the 2014 and 2016 Repurchase Programs. As of December 31, 2017, there remained an aggregate of approximately $13.9 billion available for future repurchases under the 2016 Repurchase Program and the 2014 Repurchase Program was complete. During the fourth quarter of 2017, the Company suspended share repurchase activity in connection with the Aetna Acquisition.

Fiscal Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
October 1, 2017 through October 31, 2017	—	$ —	—	$ 13,869,392,446
November 1, 2017 through November 30, 2017	—	$ —	—	$ 13,869,392,446
December 1, 2017 through December 31, 2017	—	$ —	—	$ 13,869,392,446
	—		—	

Item 6. Selected Financial Data

The selected consolidated financial data of CVS Health Corporation as of and for the periods indicated in the five-year period ended December 31, 2017, have been derived from the consolidated financial statements of CVS Health Corporation. The selected consolidated financial data should be read in conjunction with the consolidated financial statements and the audit reports of Ernst & Young LLP, which are incorporated elsewhere herein.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We refer you to "Management's Discussion and Analysis of Financial Condition and Results of Operations," which includes our "Cautionary Statement Concerning Forward-Looking Statements" at the end of such section of our Annual Report to Stockholders for the year ended December 31, 2017, which section is incorporated by reference herein.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

As of December 31, 2017, the Company had outstanding interest rate derivative instruments and believes that as of December 31, 2017, its exposure to interest rate risk (inherent in the Company's debt portfolio) is not material. We refer you to Note 1 "Significant Accounting Policies" contained in the "Notes to the Consolidated Financial Statements" of our Annual Report to Stockholders for the year ended December 31, 2017, which section is incorporated by reference herein.

As of December 31, 2017, the Company did not have any foreign currency exchange rate or commodity derivative instruments in place and believes that as of December 31, 2017, its exposure to foreign currency exchange rate risk and commodity price risk is not material

Item 8. Financial Statements and Supplementary Data

We refer you to the "Consolidated Statements of Income," "Consolidated Statements of Comprehensive Income," "Consolidated Balance Sheets," "Consolidated Statements of Shareholders' Equity," "Consolidated Statements of Cash Flows," "Notes to Consolidated Financial Statements," and "Report of Independent Registered Public Accounting Firm" of our Annual Report to Stockholders for the year ended December 31, 2017, which sections are incorporated by reference herein.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of disclosure controls and procedures: The Company's Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15 (f) and 15d-15(f) under the Securities Exchange Act of 1934) as of December 31, 2017, have concluded that as of such date the Company's disclosure controls and procedures were adequate and effective at a reasonable assurance level and designed to ensure that material information relating to the Company and its subsidiaries would be made known to such officers on a timely basis.

Internal control over financial reporting: We refer you to "Management's Report on Internal Control Over Financial Reporting" and "Report of Independent Registered Public Accounting Firm" of our Annual Report to Stockholders for the fiscal year ended December 31, 2017, which are incorporated by reference herein, for management's report on the Company's internal control over financial reporting and the Independent Registered Public Accounting Firm's report with respect to the effectiveness of internal control over financial reporting.

Changes in internal control over financial reporting: There have been no changes in our internal controls over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 that occurred during the fourth quarter ended December 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

No events have occurred during the fourth quarter that would require disclosure under this item.

CVS Health Corporation
Computation of Ratios of Earnings to Fixed Charges

	Year Ended December 31,				
In millions	**2017**	**2016**	**2015**	**2014**	**2013**
Earnings:					
Income from continuing operations before income taxes [(a)]	$ 8,267	$ 8,635	$ 8,614	$ 7,678	$ 7,528
Interest portion of net rental expense [(b)]	802	790	764	786	750
Interest expense (net of interest capitalized)	1,062	1,078	859	615	517
Adjusted earnings	$ 10,131	$ 10,503	$ 10,237	$ 9,079	$ 8,795
Fixed Charges:					
Interest portion of net rental expense [(b)]	802	790	764	786	750
Interest expense (net of interest capitalized)	1,062	1,078	859	615	517
Interest capitalized	8	13	12	19	25
Total fixed charges	$ 1,872	$ 1,881	$ 1,635	$ 1,420	$ 1,292
Ratio of earnings to fixed charges	5.41 x	5.58 x	6.26 x	6.39 x	6.81 x

(a) Excludes net (income) loss attributable to noncontrolling interest.
(b) The portion of net rental expense deemed to be representative of the interest factor.

Exhibit 13

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our audited consolidated financial statements and Cautionary Statement Concerning Forward-Looking Statements that are included in this Annual Report.

Overview of Our Business

CVS Health Corporation, together with its subsidiaries (collectively, "CVS Health," the "Company," "we," "our" or "us"), is a pharmacy innovation company helping people on their path to better health. At the forefront of a changing health care landscape, the Company has an unmatched suite of capabilities and the expertise needed to drive innovations that will help shape the future of health care.

We are currently the only integrated pharmacy health care company with the ability to impact consumers, payors, and providers with innovative, channel-agnostic solutions. We have a deep understanding of their diverse needs through our unique integrated model, and we are bringing them innovative solutions that help increase access to quality care, deliver better health outcomes and lower overall health care costs.

Through more than 9,800 retail locations, more than 1,100 walk-in health care clinics, a leading pharmacy benefits manager with more than 94 million plan members, a dedicated senior pharmacy care business serving more than one million patients per year, expanding specialty pharmacy services and a leading stand-alone Medicare Part D prescription drug plan, we enable people, businesses, and communities to manage health in more affordable, effective ways. We are delivering break-through products and services, from advising patients on their medications at our CVS Pharmacy ® locations, to introducing unique programs to help control costs for our clients at CVS Caremark ®, to innovating how care is delivered to our patients with complex conditions through CVS Specialty ®, to improving pharmacy care for the senior community through Omnicare ®, or by expanding access to high-quality, low-cost care at CVS MinuteClinic ®.

We have three reportable segments: Pharmacy Services, Retail/LTC and Corporate.

Overview of Our Pharmacy Services Segment

Our Pharmacy Services business generates revenue from a full range of pharmacy benefit management ("PBM") solutions, including plan design offerings and administration, formulary management, Medicare Part D services, mail order pharmacy, specialty pharmacy and infusion services, retail pharmacy network management services, prescription management systems, clinical services, disease management services and medical spend management.

Our clients are primarily employers, insurance companies, unions, government employee groups, health plans, Medicare Part D plans, Managed Medicaid plans, plans offered on the public and private exchanges, other sponsors of health benefit plans, and individuals throughout the United States. A portion of covered lives primarily within the Managed Medicaid, health plan and employer markets have access to our services through public and private exchanges.

As a pharmacy benefits manager, we manage the dispensing of prescription drugs through our mail order pharmacies, specialty pharmacies, national network of long-term care pharmacies and more than 68,000 retail pharmacies, consisting of approximately 41,000 chain pharmacies (which includes our CVS Pharmacy ® pharmacies) and 27,000 independent pharmacies, to eligible members in the benefit plans maintained by our clients and utilize our information systems to perform, among other things, safety checks, drug interaction screenings and brand-to-generic substitutions.

Our specialty pharmacies support individuals who require complex and expensive drug therapies. Our specialty pharmacy business includes mail order and retail specialty pharmacies that operate under the CVS Caremark ®, Navarro ® Health Services and Advanced Care Scripts ("ACS Pharmacy") names. Substantially all of our mail service specialty pharmacies have been accredited by The Joint Commission, which is an independent, not-for-profit organization that accredits and certifies health care organizations and programs in the United States. We also offer specialty infusion services and enteral nutrition services through Coram LLC and its subsidiaries (collectively, "Coram"). With Specialty Connect ®, which integrates our specialty pharmacy mail and retail capabilities, we provide members with disease-state specific counseling from our experienced specialty pharmacists and the choice to bring their specialty prescriptions to

any CVS Pharmacy location. Whether submitted through one of our mail order pharmacy or at a CVS Pharmacy, all prescriptions are filled through the Company's specialty mail order pharmacies, so all revenue from this specialty prescription services program is recorded within the Pharmacy Services Segment. Members then can choose to pick up their medication at their local CVS Pharmacy or have it sent to their home through the mail.

We also provide health management programs, which include integrated disease management for 18 conditions, through our AccordantCare ™ rare disease management offering. The majority of these integrated programs are accredited by the National Committee for Quality Assurance.

In addition, through our SilverScript Insurance Company ("SilverScript") subsidiary, we are a national provider of drug benefits to eligible beneficiaries under the federal government's Medicare Part D program. As of December 31, 2017, we provided Medicare Part D plan benefits to approximately 5.5 million beneficiaries through SilverScript, including our individual and employer group waiver plans.

The Pharmacy Services Segment operates under the CVS Caremark ® Pharmacy Services, Caremark ®, CVS Caremark ®, CVS Specialty ®, AccordantCare ™, SilverScript ®, Wellpartner ®, Coram ®, NovoLogix ®, Navarro ® Health Services and ACS Pharmacy names. As of December 31, 2017, the Pharmacy Services Segment operated 23 retail specialty pharmacy stores, 18 specialty mail order pharmacies, four mail order dispensing pharmacies, and 83 branches for infusion and enteral services, including approximately 73 ambulatory infusion suites and three centers of excellence, located in 42 states, Puerto Rico and the District of Columbia.

Overview of Our Retail/LTC Segment

Our Retail/LTC Segment sells prescription drugs and a wide assortment of general merchandise, including over-the-counter drugs, beauty products and cosmetics, personal care products, convenience foods, photo finishing, seasonal merchandise and greeting cards. With the acquisition of Omnicare's long-term care ("LTC") operations, the Retail/LTC Segment now also includes the distribution of prescription drugs, related pharmacy consulting and other ancillary services to chronic care facilities and other care settings. Omnicare operations also included commercialization services which were provided under the name RxCrossroads ® ("RxC"), until the sale of RxC was completed on January 2, 2018. See Note 3 "Goodwill and Other Intangibles" to our consolidated financial statements for more information. Our Retail/LTC Segment derives the majority of its revenues through the sale of prescription drugs, which are dispensed by our more than 32,000 pharmacists. The role of our retail pharmacists is expanding from primarily dispensing prescriptions to also providing services, including flu vaccinations as well as face-to-face patient counseling with respect to adherence to drug therapies, closing gaps in care, and more cost-effective drug therapies. Our integrated pharmacy services model enables us to enhance access to care while helping to lower overall health care costs and improve health outcomes.

Our Retail/LTC Segment also provides health care services through our MinuteClinic ® health care clinics. MinuteClinics are staffed by nurse practitioners and physician assistants who utilize nationally recognized protocols to diagnose and treat minor health conditions, perform health screenings, monitor chronic conditions, and deliver vaccinations. We believe our clinics provide high quality services that are affordable and convenient.

Our proprietary loyalty card program, ExtraCare ®, has about 62 million active cardholders, making it one of the largest and most successful retail loyalty card programs in the country.

As of December 31, 2017, our Retail/LTC Segment included 9,803 retail stores (of which 8,060 were our stores that operated a pharmacy and 1,695 were our pharmacies located within Target stores) located in 49 states, the District of Columbia, Puerto Rico and Brazil operating primarily under the CVS Pharmacy ®, CVS ®, CVS Pharmacy y más ®, Longs Drugs ®, Navarro Discount Pharmacy ® and Drogaria Onofre ™ names, 37 onsite pharmacies primarily operating under the CarePlus CVS Pharmacy ™, CarePlus ® and CVS Pharmacy ® names, and 1,134 retail health care clinics operating under the MinuteClinic ® name (of which 1,129 were located in our retail pharmacy stores or Target stores), and our online retail websites, CVS.com ®, Navarro.com ™ and Onofre.com.br ™. LTC operations are comprised of 145 spoke pharmacies that primarily handle new prescription orders, of which 30 are also hub pharmacies that use proprietary automation to support spoke pharmacies with refill prescriptions. LTC operates primarily under the Omnicare ® and NeighborCare ® names.

Overview of Our Corporate Segment

The Corporate Segment provides management and administrative services to support the Company. The Corporate Segment consists of certain aspects of our executive management, corporate relations, legal, compliance, human resources, information technology and finance departments.

Proposed Acquisition of Aetna

On December 3, 2017, we entered into a definitive merger agreement to acquire all of the outstanding shares of Aetna Inc. ("Aetna") for a combination of cash and stock ("Aetna Acquisition"). Under the terms of the merger agreement, Aetna shareholders will receive $145.00 per share in cash and 0.8378 CVS Health shares for each Aetna share. The transaction values Aetna at approximately $207 per share or approximately $69 billion based on the Company's 5-day volume weighted average price ending December 1, 2017 of $74.21 per share. Including the assumption of Aetna's debt, the total value of the transaction is approximately $77 billion. The final purchase price will be determined based on the Company's stock price on the date of closing of the transaction. We expect to finance the cash portion of the purchase price through a combination of cash on hand and by issuing approximately $45.0 billion of new debt, including senior notes and term loans (see "Liquidity and Capital Resources" in "Management's Discussion and Analysis of Financial Condition and Results of Operations"). We made customary representations, warranties and covenants in the merger agreement, including, among others, a covenant, subject to certain exceptions, to conduct our business in the ordinary course between the execution of the merger agreement and the closing of the transaction.

The proposed acquisition is currently projected to close in the second half of 2018 and remains subject to approval by CVS Health and Aetna shareholders and customary closing conditions, including the expiration of the waiting period under the federal Hart-Scott-Rodino Antitrust Improvements Act of 1976 and approvals of state departments of insurance and U.S. and international regulators.

If the transaction is not completed, the Company could be liable to Aetna for a termination fee of $2.1 billion in connection with the merger agreement, depending on the reasons leading to such termination.

Results of Operations

Summary of our Consolidated Financial Results

	Year Ended December 31,		
In millions, except per share amounts	**2017**	**2016**	**2015**
Net revenues	$ 184,765	$ 177,526	$ 153,290
Cost of revenues	156,220	148,669	126,762
Gross profit	28,545	28,857	26,528
Operating expenses	19,028	18,491	17,053
Operating profit	9,517	10,366	9,475
Interest expense, net	1,041	1,058	838
Loss on early extinguishment of debt	—	643	—
Other expense	208	28	21
Income before income tax provision	8,268	8,637	8,616
Income tax provision	1,637	3,317	3,386
Income from continuing operations	6,631	5,320	5,230
Income (loss) from discontinued operations, net of tax	(8)	(1)	9
Net income	6,623	5,319	5,239
Net income attributable to noncontrolling interest	(1)	(2)	(2)
Net income attributable to CVS Health	$ 6,622	$ 5,317	$ 5,237

Net revenues increased $7.2 billion in 2017 compared to 2016, and increased $24.2 billion in 2016 compared to 2015. As you review our performance in this area, we believe you should consider the following important information:

- During 2017, net revenues in our Pharmacy Services Segment increased 8.9% and net revenues in our Retail/LTC Segment decreased 2.1% compared to the prior year. The Retail/LTC Segment decrease was primarily due to a decline in same store sales of 2.6% as a result of the previously-announced marketplace changes that restrict CVS Pharmacy from participating in certain networks.

- During 2016, net revenues in our Pharmacy Services Segment increased by 19.5% and net revenues in our Retail/LTC Segment increased 12.6% compared to the prior year. The Retail/LTC Segment benefited from the 2015 acquisitions of Omnicare and the pharmacies and clinics of Target.

- In 2017 and 2016, the Pharmacy Services Segment continued to grow from net new business and specialty. The increase in our generic dispensing rates in both of our operating segments continued to have a negative effect on net revenue in 2017 as compared to 2016, as well as in 2016 as compared to 2015.

Please see the Segment Analysis later in this document for additional information about our net revenues.

Gross profit decreased $312 million, or 1.1% in 2017, to $28.5 billion, as compared to $28.9 billion in 2016. Gross profit increased $2.3 billion, or 8.8% in 2016, to $28.9 billion, as compared to $26.5 billion in 2015. Gross profit as a percentage of net revenues declined to 15.4%, as compared to 16.3% in 2016 and 17.3% in 2015.

- During 2017, gross profit in our Pharmacy Services Segment and Retail/LTC Segment increased by 2.4% and decreased by 1.8%, respectively, compared to the prior year. For the year ended December 31, 2017, gross profit as a percentage of net revenues in our Pharmacy Services Segment and Retail/LTC Segment was 4.6% and 29.4%, respectively.

- During 2016, gross profit in our Pharmacy Services Segment and Retail/LTC Segment increased by 12.9% and 7.9%, respectively, compared to the prior year. For the year ended December 31, 2016, gross profit as a percentage of net revenues in our Pharmacy Services Segment and Retail/LTC Segment was 4.9% and 29.3%, respectively.

- The increased weighting toward the Pharmacy Services Segment, which has a lower gross margin than the Retail/LTC Segment, resulted in a decline in consolidated gross profit as a percent of net revenues in 2017 as compared to 2016. In addition, gross profit for 2017 and 2016 has been negatively impacted by price compression in the Pharmacy Services Segment and reimbursement pressure in the Retail/LTC Segment.

- Our gross profit continued to benefit from the increased utilization of generic drugs, which normally yield a higher gross profit rate than brand name drugs, in both the Pharmacy Services and Retail/LTC segments for 2017 and 2016, partially offsetting the negative impacts described above.

Please see the Segment Analysis later in this document for additional information about our gross profit.

Operating expenses increased $537 million, or 2.9%, in the year ended December 31, 2017, as compared to the prior year. Operating expenses as a percent of net revenues declined to 10.3% in the year ended December 31, 2017 compared to 10.4% in the prior year. The increase in operating expense dollars in the year ended December 31, 2017 was primarily due to an increase in charges of $181 million associated with the closure of 71 retail stores in connection with our enterprise streamlining initiative, goodwill impairment charges of $181 million related to the RxCrossroads reporting unit within the Retail/LTC Segment, $57 million of hurricane related expenses which were predominately in the Retail/LTC Segment, and new store openings. The increase in operating expenses also reflects the lack of a favorable impact for the reversal of an accrual of $85 million, in the Pharmacy Services Segment, in connection with a legal settlement in the year ended December 31, 2016. These matters which led to the increase in operating expenses in 2017 were partially offset by a decrease in acquisition-related transaction and integration costs of $226 million due to the bulk of the Omnicare related integration costs being incurred in 2016. The improvement in operating expenses as a percentage of net revenues in 2017 is primarily due to expense leverage from net revenue growth.

Operating expenses increased $1.4 billion, or 8.4%, in the year ended December 31, 2016, as compared to the prior year. Operating expenses as a percent of net revenues declined to 10.4% in the year ended December 31, 2016 compared to 11.1% in the prior year. The increase in operating expense dollars in the year ended December 31, 2016 was primarily due to the acquisition of the Target pharmacy and clinic businesses in December 2015, the Omnicare acquisition in August 2015 and incremental store operating costs associated with a higher store count, partially offset by lower legal settlement costs, including the reversal of an accrual of $85 million, in the Pharmacy Services Segment, in the year ended December 31, 2016. The improvement in operating expenses as a percentage of net revenues in 2016 was primarily due to expense leverage from net revenue growth.

Please see the Segment Analysis later in this document for additional information about operating expenses.

Interest expense, net for the years ended December 31 consisted of the following:

In millions	2017	2016	2015
Interest expense	$ 1,062	$ 1,078	$ 859
Interest income	(21)	(20)	(21)
Interest expense, net	$ 1,041	$ 1,058	$ 838

Net interest expense decreased $17 million during the year ended December 31, 2017, primarily due to the Company's debt issuance and debt tender offers that occurred in 2016 which resulted in overall more favorable interest rates on the Company's long-term debt. See Note 5 "Borrowings and Credit Agreements" to the consolidated financial statements for additional information. During 2016, net interest expense increased $220 million, primarily due to the $15 billion debt issuance in July 2015, the proceeds of which were used to fund the acquisitions of Omnicare and the pharmacies and clinics of Target, and repay the majority of the debt assumed in the Omnicare acquisition.

Loss on early extinguishment of debt - During the year ended December 31, 2016, the Company purchased approximately $4.2 billion aggregate principal amount of certain of its senior notes pursuant to its tender offer for such senior notes and option to redeem the outstanding senior notes (see Note 5 "Borrowings and Credit Agreements" to the consolidated financial statements). The Company paid a premium of $583 million in excess of the debt principal, wrote off $54 million of unamortized deferred financing costs and incurred $6 million in fees, for a total loss on the early extinguishment of debt of $643 million.

Income tax provision - On December 22, 2017, the President signed into law the Tax Cuts and Jobs Act (the "TCJA"). Among numerous changes to existing tax laws, the TCJA permanently reduces the federal corporate income tax rate from 35% to 21% effective January 1, 2018. The effects of changes in tax rates on deferred tax balances are required to be taken into consideration in the period in which the changes are enacted, regardless of when they are effective. As the result of the reduction of the corporate income tax rate under the TCJA, the Company estimated the revaluation of its net deferred tax liabilities and recorded a provisional noncash income tax benefit of approximately $1.5 billion for year ended December 31, 2017. The Company has not completed all of its processes to determine the TCJA's final impact. The final impact may differ from this provisional amount due to, among other things, changes in interpretations and assumptions the Company has made thus far and the issuance of additional regulatory or other guidance. The accounting is expected to be completed by the time the 2017 federal corporate income tax return is filed in 2018.

Our effective income tax rate was 19.8%, 38.4% and 39.3% in 2017, 2016 and 2015, respectively. The effective income tax rate was lower in 2017 compared to 2016 primarily due to the provisional impact of the TCJA, including the revaluation of net deferred tax liabilities. The effective income tax rate was lower in 2016 compared to 2015 primarily due to the resolution in 2016 of certain income tax matters in tax years through 2012, as well as other permanent items.

Income (loss) from discontinued operations - In connection with certain business dispositions completed between 1991 and 1997, the Company retained guarantees on store lease obligations for a number of former subsidiaries, including Linens 'n Things, which filed for bankruptcy in 2008, and Bob's stores, which filed for bankruptcy in 2016. The Company's loss from discontinued operations includes lease-related costs required to satisfy its Linens 'n Things and Bob's Stores lease guarantees. We incurred a loss from discontinued operations, net of tax, of $8 million and $1 million in 2017 and 2016, respectively. The Company's income from discontinued operations in 2015 of $9 million, net of tax, was related to the release of certain store lease guarantees due to the settlement of a dispute with a landlord.

See Note 1 “Significant Accounting Policies - Discontinued Operations” to the consolidated financial statements for additional information about discontinued operations and Note 12 “Commitments and Contingencies” for additional information about our lease guarantees.

Segment Analysis

We evaluate the performance of our Pharmacy Services and Retail/LTC segments based on net revenues, gross profit and operating profit before the effect of nonrecurring charges and gains and certain intersegment activities. The Company evaluates the performance of its Corporate Segment based on operating expenses before the effect of nonrecurring charges and gains, and certain intersegment activities. The following is a reconciliation of the Company’s business segments to the consolidated financial statements:

In millions	Pharmacy Services Segment [1][2]	Retail/LTC Segment [2]	Corporate Segment	Intersegment Eliminations [2]	Consolidated Totals
2017:					
Net revenues	$ 130,596	$ 79,398	$ —	$ (25,229)	$ 184,765
Gross profit [3]	6,040	23,317	—	(812)	28,545
Operating profit (loss) [4][5]	4,755	6,469	(966)	(741)	9,517
2016:					
Net revenues	119,963	81,100	—	(23,537)	177,526
Gross profit [3]	5,901	23,738	—	(782)	28,857
Operating profit (loss) [4][5][6][7]	4,676	7,302	(891)	(721)	10,366
2015:					
Net revenues	100,363	72,007	—	(19,080)	153,290
Gross profit	5,227	21,992	—	(691)	26,528
Operating profit (loss) [4][5][6][7]	3,992	7,146	(1,035)	(628)	9,475

(1) Net revenues of the Pharmacy Services Segment include approximately $10.8 billion, $10.5 billion and $8.9 billion of Retail/LTC Co-Payments for 2017, 2016 and 2015, respectively. See Note 1 “Significant Accounting Policies - Revenue Recognition” to the consolidated financial statements for additional information about Retail/LTC Co-Payments.

(2) Intersegment eliminations relate to intersegment revenue generating activities that occur between the Pharmacy Services Segment and the Retail/LTC Segment. These occur in the following ways: when members of Pharmacy Services Segment clients (“members”) fill prescriptions at our retail pharmacies to purchase covered products, when members enrolled in programs such as Maintenance Choice ® elect to pick up maintenance prescriptions at one of our retail pharmacies instead of receiving them through the mail, or when members have prescriptions filled at our long-term care pharmacies. When these occur, both the Pharmacy Services and Retail/LTC segments record the revenues, gross profit and operating profit on a standalone basis.

(3) The Retail/LTC Segment gross profit for the year ended December 31, 2017 and 2016, includes $2 million and $46 million, respectively, of acquisition-related integration costs. The integration costs in 2017 are related to the acquisition of Omnicare and the integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacies and clinics of Target.

(4) The Retail/LTC Segment operating profit for 2017, 2016 and 2015, include $34 million, $281 million and $64 million, respectively, of acquisition-related integration costs. The integration costs in 2017 are related to the acquisition of Omnicare. The integration costs in 2016 and 2015 are related to the acquisitions of Omnicare and the pharmacies and clinics of Target. Operating profit for the year ended December 31, 2017 also includes $215 million of charges associated with store rationalization and $181 million of goodwill impairment charges related to the RxCrossroads reporting unit. For the year ended December 31, 2016, operating profit includes a $34 million asset impairment charge in connection with planned store closures in 2017 related to our enterprise streamlining initiative.

(5) The Corporate Segment operating loss for the year ended December 31, 2017, includes a reduction of $3 million in integration costs for a change in estimate related to the acquisition of Omnicare, $34 million in acquisition-related transaction costs related to the proposed Aetna acquisition and $9 million of transaction costs related to the divestiture of RxCrossroads. The Corporate Segment operating loss for the year ended December 31, 2016 includes integration costs of $10 million related to the acquisitions of Omnicare and the pharmacies and clinics of Target. For the year ended December 31, 2015, the Corporate Segment operating loss includes $156 million of acquisition-related transaction and integration costs related to the acquisitions of Omnicare and the pharmacies and clinics of Target and a $90 million charge related to a legacy lawsuit challenging the 1999 legal settlement by MedPartners of various securities class actions and a related derivative claim.

(6) The Pharmacy Services Segment operating profit for the year ended December 31, 2016, includes the reversal of an accrual of $88 million in connection with a legal settlement.

(7) Amounts revised to reflect the adoption of ASU 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* , which increased consolidated operating profit by $28 million and $21 million for the years ended December 31, 2016 and 2015, respectively.

Pharmacy Services Segment

The following table summarizes our Pharmacy Services Segment's performance for the respective periods:

In millions	Year Ended December 31, 2017	2016	2015
Net revenues	$ 130,596	$ 119,963	$ 100,363
Gross profit	$ 6,040	$ 5,901	$ 5,227
Gross profit % of net revenues	4.6 %	4.9 %	5.2 %
Operating expenses [1][2]	$ 1,285	$ 1,225	$ 1,235
Operating expenses % of net revenues	1.0 %	1.0 %	1.2 %
Operating profit [1]	$ 4,755	$ 4,676	$ 3,992
Operating profit % of net revenues	3.6 %	3.9 %	4.0 %
Net revenues:			
Mail choice [3]	$ 45,709	$ 42,783	$ 37,828
Pharmacy network [4]	$ 84,555	$ 76,848	$ 62,240
Other	$ 332	$ 332	$ 295
Pharmacy claims processed (90 Day = 3 prescriptions) [5][6]:			
Total	1,781.9	1,639.2	1,325.8
Mail choice [3]	265.2	251.5	241.1
Pharmacy network [4]	1,516.7	1,387.7	1,084.7
Generic dispensing rate [5][6]:			
Total	87.0 %	85.9 %	83.9 %
Mail choice [3]	83.1 %	81.4 %	79.4 %
Pharmacy network [4]	87.7 %	86.7 %	84.9 %
Mail choice penetration rate [5][6]	14.9 %	15.3 %	18.2 %

(1) Amounts revised to reflect the adoption of ASU 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* , which decreased operating expenses and increased operating profit by $4 million and $3 million for the year ended December 31, 2016 and 2015, respectively.

(2) The Pharmacy Services Segment operating expenses for the year ended December 31, 2016, includes the reversal of an accrual of $88 million in connection with a legal settlement.

(3) Mail choice is defined as claims filled at a Pharmacy Services mail facility, which includes specialty mail claims inclusive of Specialty Connect® claims picked up at retail, as well as prescriptions filled at our retail pharmacies under the Maintenance Choice® program.

(4) Pharmacy network net revenues, claims processed and generic dispensing rates do not include Maintenance Choice activity, which is included within the mail choice category. Pharmacy network is defined as claims filled at retail and specialty retail pharmacies, including our retail pharmacies and long-term care pharmacies, but excluding Maintenance Choice activity.

(5) Includes the adjustment to convert 90-day prescriptions to the equivalent of three 30-day prescriptions. This adjustment reflects the fact that these prescriptions include approximately three times the amount of product days supplied compared to a normal prescription.

(6) The pharmacy claims processed, the generic dispensing rate and the mail choice penetration rate for the year ended December 31, 2016, has been revised to reflect 90-day prescriptions to the equivalent of three 30-day prescriptions.

Net revenues in our Pharmacy Services Segment increased $10.6 billion, or 8.9%, to $130.6 billion for the year ended December 31, 2017, as compared to the prior year. The increase is primarily due to growth in pharmacy network and specialty pharmacy volume as well as brand inflation, partially offset by continued price compression and increased generic dispensing.

Net revenues increased $19.6 billion, or 19.5%, to $120.0 billion for the year ended December 31, 2016, as compared to the prior year. The increase is primarily due to increased pharmacy network claims, growth in specialty pharmacy, growth in Medicare Part D, addition of ACS Pharmacy through the acquisition of Omnicare, and inflation, partially offset by increased generic dispensing and price compression.

As you review our Pharmacy Services Segment's revenue performance, we believe you should also consider the following important information about the business:

- Our mail choice claims processed increased 5.5% to 265.2 million claims, on a 30-day equivalent basis, in the year ended December 31, 2017, compared to 251.5 million claims in the prior year. During 2016, our mail choice claims processed increased 4.3% to 251.5 million claims on a 30-day equivalent basis. The increases in mail choice claims

were driven by growth in specialty pharmacy claims, an increase in net new business, and continued adoption of our Maintenance Choice offerings.

- During 2017 and 2016, our average revenue per mail choice claim, on a 30-day equivalent basis, increased by 1.7% and 8.3%, compared to 2016 and 2015, respectively. The increase in both years was primarily due to growth in specialty pharmacy and inflation.

- Our pharmacy network claims processed increased 9.3% to 1,516.7 million claims in the year ended December 31, 2017, compared to 1,387.7 million claims in the prior year on a 30-day equivalent basis. During 2016, our pharmacy network claims processed, on a 30-day equivalent basis, increased 27.9% to 1,387.7 million compared to 1,084.7 million pharmacy network claims processed in 2015. These increases were primarily due to volume from net new business.

- During 2017 and 2016, our average revenue per pharmacy network claim processed remained flat on a 30-day equivalent basis.

- Our mail choice generic dispensing rate was 83.1%, 81.4% and 79.4% in the years ended December 31, 2017, 2016 and 2015, respectively. Our pharmacy network generic dispensing rate was 87.7%, 86.7%, and 84.9% in the years ended December 31, 2017, 2016 and 2015, respectively. These continued increases in mail choice and pharmacy network generic dispensing rates were primarily due to the impact of new generic drug introductions, and our continuous efforts to encourage plan members to use generic drugs when they are available and clinically appropriate. We believe our generic dispensing rates will continue to increase in future periods, albeit at a slower pace. This increase will be affected by, among other things, the number of new brand and generic drug introductions and our success at encouraging plan members to utilize generic drugs when they are available and clinically appropriate.

Gross profit in our Pharmacy Services Segment includes net revenues less cost of revenues. Cost of revenues includes (i) the cost of pharmaceuticals dispensed, either directly through our mail service and specialty retail pharmacies or indirectly through our pharmacy network, (ii) shipping and handling costs and (iii) the operating costs of our mail service dispensing pharmacies, customer service operations and related information technology support.

Gross profit increased $139 million, or 2.4%, to $6.0 billion in the year ended December 31, 2017, as compared to the prior year. Gross profit as a percentage of net revenues decreased to 4.6% for the year ended December 31, 2017, compared to 4.9% in the prior year. The increase in gross profit dollars in the year ended December 31, 2017 was primarily due to growth in specialty pharmacy, higher generic dispensing and favorable purchasing economics, partially offset by price compression. The decrease in gross profit as a percentage of net revenues was primarily due to changes in the mix of our business and continued price compression, partially offset by favorable generic dispensing and purchasing economics.

Gross profit increased $674 million, or 12.9%, to $5.9 billion in the year ended December 31, 2016, as compared to the prior year. Gross profit as a percentage of net revenues decreased to 4.9% for the year ended December 31, 2016, compared to 5.2% in the prior year. The increase in gross profit dollars in the year ended December 31, 2016 was primarily due to growth in specialty pharmacy, growth in Medicare Part D lives, higher generic dispensing and favorable purchasing economics, partially offset by price compression. The decrease in gross profit as a percentage of net revenues was primarily due to changes in the mix of our business and continued price compression, partially offset by favorable generic dispensing and purchasing economics.

As you review our Pharmacy Services Segment's performance in this area, we believe you should consider the following important information about the business:

- Our efforts to (i) retain existing clients, (ii) obtain new business and (iii) maintain or improve the rebates and/or discounts we received from manufacturers, wholesalers and retail pharmacies continue to have an impact on our gross profit dollars and gross profit as a percentage of net revenues. In particular, competitive pressures in the PBM industry have caused us and other PBMs to continue to share with clients a larger portion of rebates and/or discounts received from pharmaceutical manufacturers. In addition, market dynamics and regulatory changes have limited our

ability to offer plan sponsors pricing that includes retail network "differential" or "spread," and we expect these trends to continue. The "differential" or "spread" is any difference between the drug price charged to plan sponsors, including Medicare Part D plan sponsors, by a PBM and the price paid for the drug by the PBM to the dispensing provider.

Operating expenses in our Pharmacy Services Segment, which include selling, general and administrative expenses, depreciation and amortization related to selling, general and administrative activities and administrative payroll, employee benefits and occupancy costs, were flat at 1.0% of net revenues in 2017 and 2016, compared to 1.2% in 2015.

Operating expenses increased $60 million or 4.9% in the year ended December 31, 2017, compared to the prior year. Operating expenses decreased $10 million or 0.8% in the year ended December 31, 2016, compared to the prior year. These changes in operating expense dollars are primarily due to an $88 million reversal of an accrual in connection with a legal settlement in 2016, partially offset by an increase in costs associated with the growth of our business.

Retail/LTC Segment

The following table summarizes our Retail/LTC Segment's performance for the respective periods:

	Year Ended December 31,		
In millions	**2017**	**2016**	**2015**
Net revenues	$ 79,398	$ 81,100	$ 72,007
Gross profit [1]	$ 23,317	$ 23,738	$ 21,992
Gross profit % of net revenues	29.4 %	29.3 %	30.5 %
Operating expenses [2][3]	$ 16,848	$ 16,436	$ 14,846
Operating expenses % of net revenues	21.2 %	20.3 %	20.6 %
Operating profit [3]	$ 6,469	$ 7,302	$ 7,146
Operating profit % of net revenues	8.1 %	9.0 %	9.9 %
Prescriptions filled (90 Day = 3 prescriptions) [4]	1,230.5	1,223.5	1,031.6
Net revenue increase (decrease):			
Total	(2.1)%	12.6 %	6.2 %
Pharmacy	(2.2)%	15.9 %	9.5 %
Front Store	(1.9)%	0.3 %	(2.5)%
Total prescription volume (90 Day = 3 prescriptions) [4]	0.6 %	18.6 %	10.2 %
Same store sales increase (decrease) [5]:			
Total	(2.6)%	1.9 %	1.7 %
Pharmacy	(2.6)%	3.2 %	4.5 %
Front Store [6]	(2.6)%	(1.5)%	(5.0)%
Prescription volume (90 Day = 3 prescriptions) [4]	0.4 %	3.6 %	4.8 %
Generic dispensing rates	87.3 %	85.7 %	84.5 %
Pharmacy % of net revenues	75.0 %	75.0 %	72.9 %

(1) Gross profit for the years ended December 31, 2017 and 2016, includes $2 million and $46 million, respectively, of acquisition-related integration costs. In 2017, the integration costs related to the acquisition of Omnicare. In 2016, the integration costs related to the acquisitions of Omnicare and the pharmacies and clinics of Target.

(2) Operating expenses for the years ended December 31, 2017, 2016 and 2015, include $32 million, $235 million and $64 million, respectively, of acquisition-related integration costs. In 2017, the integration costs related to the acquisition of Omnicare. In 2016 and 2015, the integration costs related to the acquisitions of Omnicare and the pharmacies and clinics of Target. For the year ended December 31, 2017, operating expenses include $215 million of charges associated with store closures and $181 million of goodwill impairment charges related to the segment's RxCrossroads reporting unit. Operating expenses for the year ended December 31, 2016, also include a $34 million asset impairment charge in connection with planned store closures in 2017 related to our enterprise streamlining initiative.

(3) Amounts revised to reflect the adoption of ASU 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* , which decreased operating expenses and increased operating profit by $21 million and $16 million for the year ended December 31, 2016 and 2015, respectively.

(4) Includes the adjustment to convert 90-day, non-specialty prescriptions to the equivalent of three 30-day prescriptions. This adjustment reflects the fact that these prescriptions include approximately three times the amount of product days supplied compared to a normal prescription.

(5) Same store sales and prescriptions exclude revenues from MinuteClinic, and revenue and prescriptions from stores in Brazil, from LTC operations and from commercialization services.

(6) Front store same store sales would have been approximately 520 basis points higher for the year ended December 31, 2015, if tobacco and the estimated associated basket sales were excluded from the year ended December 31, 2014.

Net revenues decreased approximately $1.7 billion, or 2.1%, to $79.4 billion for the year ended December 31, 2017, as compared to the prior year. The decrease was primarily due to a decline in same store sales as a result of the previously-announced marketplace changes that restrict CVS Pharmacy from participating in certain networks.

Net revenues increased approximately $9.1 billion, or 12.6%, to $81.1 billion for the year ended December 31, 2016, as compared to the prior year. This increase was primarily driven by the acquisitions of the pharmacies and clinics of Target and new stores, which accounted for approximately 640 basis points of our total net revenue percentage increase during the year, the acquisition of Omnicare's LTC operations and a same store sales increase of 1.9%. As you review our Retail/LTC Segment's performance in this area, we believe you should consider the following important information about the business:

- Front store same store sales declined 2.6% in the year ended December 31, 2017, as compared to the prior year, and were negatively impacted approximately 30 basis points due to the absence of leap day in the current year. The decrease is primarily driven by softer customer traffic and efforts to rationalize promotional strategies, partially offset by an increase in basket size.

- Pharmacy same store sales declined 2.6% in the year ended December 31, 2017, as compared to the prior year. Pharmacy same store sales were negatively impacted by approximately 390 basis points due to recent generic introductions. Same store prescription volumes increased 0.4%, including the approximately 420 basis point negative impact from previously-discussed marketplace changes that restrict CVS Pharmacy from participating in certain networks that had an.

- Pharmacy revenues continue to be negatively impacted by the conversion of brand name drugs to equivalent generic drugs, which typically have a lower selling price. The generic dispensing rate grew to 87.3% for the year ended December 31, 2017, compared to 85.7% in the prior year. In addition, our pharmacy revenue growth has also been negatively affected by the mix of drugs sold, continued reimbursement pressure and the lack of significant new brand name drug introductions.

- Pharmacy revenue growth may be impacted by industry changes in the LTC business, such as continuing lower occupancy rates at skilled nursing facilities.

- Pharmacy revenue continued to benefit from our ability to attract and retain managed care customers, the increased use of pharmaceuticals by an aging population and as the first line of defense for health care.

Gross profit in our Retail/LTC Segment includes net revenues less the cost of merchandise sold during the reporting period and the related purchasing costs, warehousing costs, delivery costs and actual and estimated inventory losses.

Gross profit decreased $421 million, or 1.8%, to approximately $23.3 billion in the year ended December 31, 2017, as compared to the prior year. Gross profit as a percentage of net revenues increased slightly to 29.4% in year ended December 31, 2017, from 29.3% in 2016. Gross profit increased $1.7 billion, or 7.9%, to approximately $23.7 billion in the year ended December 31, 2016, as compared to the prior year. Gross profit as a percentage of net revenues decreased to 29.3% in year ended December 31, 2016, from 30.5% in 2015.

The decrease in gross profit dollars in both Retail Pharmacy and LTC in the year ended December 31, 2017, was primarily driven by the continued reimbursement pressure as well as a loss of prescriptions in Retail Pharmacy due to previously discussed network restrictions. In the year ended December 31, 2017, gross profit as a percentage of net revenues was relatively flat driven by increased front store margins which offset the continued reimbursement pressure on pharmacy. Front store margins increased due to changes in the mix of products sold and efforts to rationalize promotional strategies.

As you review our Retail/LTC Segment's performance in this area, we believe you should consider the following important information about the business:

- Front store revenues as a percentage of total Retail/LTC Segment net revenues for both of the years ended December 31, 2017 and 2016 was 23.6% and for the year ended December 31, 2015 was 26.5%. On average, our

gross profit on front store revenues is higher than our gross profit on pharmacy revenues. The mix effect from a higher proportion of pharmacy sales had a negative effect on our overall gross profit as a percentage of net revenues for the years ended December 31, 2016 and 2015. This negative effect was partially offset by an increase in generic drugs dispensed, and an improved front store gross margin rate, which includes efforts to rationalize promotional strategies.

- During 2017 and 2016, our front store gross profit as a percentage of net revenues increased compared to the prior year. In both years, the increase reflects a change in the mix of products sold, including store brand products, as a result of our efforts to rationalize promotional strategies.

- Our pharmacy gross profit rates have been adversely affected by the efforts of managed care organizations, PBMs and governmental and other third-party payors to reduce their prescription drug costs, including the use of restrictive networks, as well as changes in the mix of our business within the pharmacy portion of the Retail/LTC Segment. In the event the reimbursement pressure accelerates, we may not be able to grow our revenues and gross profit dollars could be adversely impacted. The increased use of generic drugs has positively impacted our gross profit but has resulted in third-party payors augmenting their efforts to reduce reimbursement payments to retail pharmacies for prescriptions. This trend, which we expect to continue, reduces the benefit we realize from brand to generic product conversions.

Operating expenses in our Retail/LTC Segment include store payroll, store employee benefits, store occupancy costs, selling expenses, advertising expenses, depreciation and amortization expense and certain administrative expenses.

Operating expenses increased $412 million, or 2.5% to $16.8 billion, or 21.2% as a percentage of net revenues, in the year ended December 31, 2017, as compared to $16.4 billion, or 20.3% as a percentage of net revenues, in the prior year. Operating expenses increased $1.6 billion, or 10.7%, to $16.4 billion, or 20.3% as a percentage of net revenues, in the year ended December 31, 2016, as compared to $14.9 billion, or 20.6% as a percentage of net revenues, in the prior year.

The increase in operating expense dollars for the year ended December 31, 2017, was primarily due to $181 million increase in charges associated with the closure of 71 retail stores in connection with our enterprise streamlining initiative, $181 million of goodwill impairment charges related to the RxCrossroads reporting unit, which was subsequently sold on January 2, 2018, $55 million in hurricane related costs, and new store openings. Operating expenses as a percentage of net revenues for the year ended December 31, 2017 increased due to a decline in expense leverage with the loss of business from restricted network changes.

The increase in operating expense dollars for the year ended December 31, 2016, was primarily due to the 2015 acquisitions of LTC and the pharmacies and clinics within Target stores, including acquisition-related integration costs of $235 million, as well as incremental store operating costs associated with operating more stores. Operating expenses for the year ended December 31, 2016, includes a gain from a legal settlement with certain credit card companies of $32 million and an asset impairment charge of $34 million in connection with planned store closures in 2017 related to our enterprise streamlining initiative. Additionally, in April 2016, the Retail/LTC Segment made a charitable contribution of $32 million to the CVS Foundation to fund future charitable giving. The CVS Foundation is a non-profit entity that focuses on health, education and community involvement programs. The charitable contribution was recorded as an operating expense in the year ended December 31, 2016.

Corporate Segment

Operating expenses increased $75 million, or 8.4%, to $966 million in the year ended December 31, 2017, as compared to the prior year. Operating expenses decreased $144 million, or 13.9%, to $891 million in the year ended December 31, 2016. Operating expenses within the Corporate Segment include executive management, corporate relations, legal, compliance, human resources, information technology and finance related costs. The increase in operating expenses for the year ended December 31, 2017, was partially driven by ongoing investments in strategic initiatives and increased employee benefit costs. Operating expenses for the year ended December 31, 2017, include $34 million in transaction costs associated with the proposed acquisition of Aetna, $9 million of transaction costs associated with the divestiture of RxCrossroads. The decrease in operating expenses for the year ended December 31, 2016 was primarily due to

acquisition-related transaction and integration costs associated with the acquisition of Omnicare that occurred in August 2015, and the acquisition of the pharmacies and clinics of Target that occurred in December 2015.

Liquidity and Capital Resources

We maintain a level of liquidity sufficient to allow us to meet our cash needs in the short-term. Over the long-term, we manage our cash and capital structure to maximize shareholder return, maintain our financial position and maintain flexibility for future strategic initiatives. We continuously assess our working capital needs, debt and leverage levels, capital expenditure requirements, dividend payouts, potential share repurchases and future investments or acquisitions. We believe our operating cash flows, commercial paper program, credit facilities, sale-leaseback program, as well as any potential future borrowings, will be sufficient to fund these future payments and long-term initiatives.

The change in cash and cash equivalents is as follows:

	Year Ended December 31,		
In millions	**2017**	**2016**	**2015**
Net cash provided by operating activities	$ 8,007	$ 10,141	$ 8,539
Net cash used in investing activities	(2,932)	(2,470)	(13,420)
Net cash provided by (used in) financing activities	(6,751)	(6,761)	4,879
Effect of exchange rate changes on cash and cash equivalents	1	2	(20)
Net increase (decrease) in cash and cash equivalents	$ (1,675)	$ 912	$ (22)

Net cash provided by operating activities decreased by $2.1 billion in 2017 and increased by $1.6 billion in 2016. These changes are primarily related to the timing of payments for our Medicare Part D operations.

Net cash used in investing activities increased by $462 million in 2017 and decreased $11.0 billion in 2016. The increase in 2017 is largely driven by an increase in acquisition activity as compared to 2016. The decrease in 2016 was primarily due to the $9.6 billion paid for the acquisition of Omnicare and the $1.9 billion paid for the acquisition of the pharmacies and clinics of Target in 2015, compared to the $539 million paid for acquisitions in 2016.

In 2017, gross capital expenditures totaled approximately $1.9 billion, a decrease of approximately $306 million compared to the prior year. The decrease in 2017 capital expenditures is due to the Target integration being completed in 2016. During 2017, approximately 25% of our total capital expenditures were for new store construction, 30% were for store, fulfillment and support facilities expansion and improvements and 45% were for technology and other corporate initiatives. Gross capital expenditures totaled approximately $2.2 billion and $2.4 billion during 2016 and 2015, respectively. During 2016, approximately 31% of our total capital expenditures were for new store construction, 20% were for store, fulfillment and support facilities expansion and improvements and 49% were for technology and other corporate initiatives.

Proceeds from sale-leaseback transactions totaled $265 million in 2017. This compares to $230 million in 2016 and $411 million in 2015. Under the sale-leaseback transactions, the properties are generally sold at net book value, which generally approximates fair value, and the resulting leases generally qualify and are accounted for as operating leases. The specific timing and amount of future sale-leaseback transactions will vary depending on future market conditions and other factors.

Below is a summary of our store development activity for the respective years:

	2017 (2)	**2016 (2)**	**2015 (2)**
Total stores (beginning of year)	9,750	9,665	7,866
New and acquired stores [(1)]	179	132	1,833
Closed stores [(1)]	(83)	(47)	(34)
Total stores (end of year)	9,846	9,750	9,665
Relocated stores	30	50	58

(1) Relocated stores are not included in new or closed store totals.
(2) Includes retail drugstores, certain onsite pharmacy stores, specialty pharmacy stores and pharmacies within Target stores.

Net cash used in financing activities was $6.8 billion in both 2017 and 2016 as net borrowings and net payments to shareholders were relatively flat in both years. Net cash provided by financing activities was $4.9 billion in 2015 versus net cash used in financing activities of $6.8 billion in 2016. The difference of $11.6 billion was primarily due to higher net borrowings in 2015, including the $14.8 billion in net proceeds received from the July 2015 debt issuance that was used to fund the acquisition of Omnicare and the acquisition of the pharmacies and clinics of Target.

Share repurchase programs — The following share repurchase programs were authorized by the Company's Board of Directors:

In billions Authorization Date	Authorized	Remaining as of December 31, 2017
November 2, 2016 ("2016 Repurchase Program")	$ 15.0	$ 13.9
December 15, 2014 ("2014 Repurchase Program")	10.0	—
December 17, 2013 ("2013 Repurchase Program")	6.0	—

The share Repurchase Programs, each of which was effective immediately, permit the Company to effect repurchases from time to time through a combination of open market repurchases, privately negotiated transactions, accelerated share repurchase ("ASR") transactions, and/or other derivative transactions. The 2016 Repurchase Program can be modified or terminated by the Board of Directors at any time.

Pursuant to the authorization under the 2014 Repurchase Program, in August 2016, the Company entered into two fixed dollar ASRs with Barclays Bank PLC ("Barclays") for a total of $3.6 billion. Upon payment of the $3.6 billion purchase price in January 2017, the Company received a number of shares of its common stock equal to 80% of the $3.6 billion notional amount of the ASRs or approximately 36.1 million shares, which were placed into treasury stock in January 2017. The ASRs were accounted for as an initial treasury stock transaction for $2.9 billion and a forward contract for $0.7 billion. In April 2017, the Company received 9.9 million shares of common stock, representing the remaining 20% of the $3.6 billion notional amount of the ASRs, thereby concluding the ASRs. The remaining 9.9 million shares of common stock delivered to the Company by Barclays were placed into treasury stock and the forward contract was reclassified from capital surplus to treasury stock in April 2017.

Pursuant to the authorization under the 2014 Repurchase Program, in December 2015, the Company entered into a $725 million fixed dollar ASR with Barclays. Upon payment of the $725 million purchase price in December 2015, the Company received a number of shares of its common stock equal to 80% of the $725 million notional amount of the ASR or approximately 6.2 million shares. The initial 6.2 million shares of common stock delivered to the Company by Barclays were placed into treasury stock in December 2015. The ASR was accounted for as an initial treasury stock transaction of $580 million and a forward contract of $145 million. The forward contract was classified as an equity instrument and was recorded within capital surplus on the consolidated balance sheet. In January 2016, the Company received 1.4 million shares of common stock, representing the remaining 20% of the $725 million notional amount of the ASR, thereby concluding the ASR. The remaining 1.4 million shares of common stock delivered to the Company by Barclays were placed into treasury stock in January 2016 and the forward contract was reclassified from capital surplus to treasury stock.

Pursuant to the authorization under the 2013 Repurchase Programs, in January 2015, the Company entered into a $2.0 billion fixed dollar ASR agreement with J.P. Morgan Chase Bank ("JP Morgan"). Upon payment of the $2.0 billion purchase price in January 2015, the Company received a number of shares of its common stock equal to 80% of the $2.0 billion notional amount of the ASR agreement or approximately 16.8 million shares, which were placed into treasury stock in January 2015. In May 2015, the Company received approximately 3.1 million shares of common stock, representing the remaining 20% of the $2.0 billion notional amount of the ASR, thereby concluding the ASR. The remaining 3.1 million shares of common stock delivered to the Company by JP Morgan were placed into treasury stock in May 2015. The ASR was accounted for as an initial treasury stock transaction of $1.6 billion and a forward contract of $0.4 billion. The forward contract was classified as an equity instrument and was initially recorded within capital surplus on the consolidated balance sheet and was reclassified to treasury stock upon the settlement of the ASR in May 2015.

In the ASR transactions described above, the initial repurchase of the shares and delivery of the remainder of the shares to conclude the ASR, resulted in an immediate reduction of the outstanding shares used to calculate the weighted average common shares outstanding for basic and diluted earnings per share.

During the year ended December 31, 2017, the Company repurchased an aggregate of 55.4 million shares of common stock for approximately $4.4 billion under the 2014 and 2016 Repurchase Programs. As of December 31, 2017, there remained an aggregate of approximately $13.9 billion available for future repurchases under the 2016 Repurchase Program and the 2014 Repurchase Program was complete. During the fourth quarter of 2017, the Company suspended share repurchase activity as a result of the Aetna Acquisition.

During the year ended December 31, 2016, the Company repurchased an aggregate of 47.5 million shares of common stock for approximately $4.5 billion under the 2014 Repurchase Program. As of December 31, 2016, there remained an aggregate of approximately $18.2 billion available for future repurchases under the 2016 and 2014 Repurchase Programs.

During the year ended December 31, 2015, the Company repurchased an aggregate of 48.0 million shares of common stock for approximately $5.0 billion under the 2013 and 2014 Repurchase Programs. As of December 31, 2015, there remained an aggregate of approximately $7.7 billion available for future repurchases under the 2014 Repurchase Program and the 2013 Repurchase Program was complete.

Short-term borrowings - The Company had approximately $1.3 billion of commercial paper outstanding at a weighted average interest rate of 2.0% as of December 31, 2017. The Company had approximately $1.9 billion of commercial paper outstanding at a weighted average interest rate of 1.22% as of December 31, 2016. In connection with its commercial paper program, the Company maintains a $1.0 billion 364-day unsecured back-up credit facility, which expires on May 17, 2018, a $1.25 billion, five-year unsecured back-up credit facility, which expires on July 24, 2019, a $1.25 billion, five-year unsecured back-up credit facility, which expires on July 1, 2020, and a $1.0 billion, five-year unsecured back-up credit facility which expires on May 18, 2022. The credit facilities allow for borrowings at various rates that are dependent, in part, on the Company's public debt ratings and require the Company to pay a weighted average quarterly facility fee of approximately 0.02%, regardless of usage. As of December 31, 2016, there were no borrowings outstanding under the back-up credit facilities. During 2018, the Company intends to refinance the 364-day unsecured back-up credit facility, which expires on May 17, 2018.

On December 3, 2017, in connection with the proposed acquisition of Aetna, the Company entered into a $49.0 billion unsecured bridge loan facility. The Company paid approximately $221 million in fees upon entering into the agreement. The fees were capitalized in other current assets and will be amortized as interest expense over the period the bridge facility is outstanding. The bridge loan facility was reduced to $44.0 billion on December 15, 2017 upon the Company entering into a $5.0 billion term loan agreement. The Company recorded $56 million of amortization of the bridge loan facility fees during the year ended December 31, 2017, which was recorded in interest expense. On December 15, 2017, in connection with the proposed acquisition of Aetna, the Company entered into a $5.0 billion unsecured term loan agreement. The term loan facility under the term loan agreement consists of a $3.0 billion three-year tranche and a $2.0 billion five-year tranche. The term loan facility allows for borrowings at various rates that are dependent, in part, on the Company's debt ratings and require the Company to pay a weighted average quarterly commitment fee, regardless of usage.

On January 3, 2017, the Company entered into a $2.5 billion revolving credit facility. The credit facility allows for borrowings at various rates that are dependent, in part, on the Company's debt ratings and require the Company to pay a weighted average quarterly facility fee of approximately 0.03%, regardless of usage. The Company terminated the credit facility in May 2017.

On May 20, 2015, in connection with the acquisition of Omnicare, the Company entered into a $13 billion unsecured bridge loan facility. The Company paid approximately $52 million in fees in connection with the facility. The fees were capitalized and amortized as interest expense over the period the bridge facility was outstanding. The bridge loan facility expired on July 20, 2015 upon the Company's issuance of unsecured senior notes with an aggregate principal of $15 billion as discussed below. The bridge loan facility fees became fully amortized in July 2015.

Long-term borrowings - On May 16, 2016, the Company issued $1.75 billion aggregate principal amount of 2.125% unsecured senior notes due June 1, 2021 and $1.75 billion aggregate principal amount of 2.875% unsecured senior notes due June 1, 2026 (collectively, the "2016 Notes") for total proceeds of approximately $3.5 billion, net of discounts and underwriting fees. The 2016 Notes pay interest semi-annually and may be redeemed, in whole at any time, or in part from time to time, at the Company's option at a defined redemption price plus accrued and unpaid interest to the redemption date. The net proceeds of the 2016 Notes were used for general corporate purposes and to repay certain corporate debt.

On May 16, 2016, the Company announced tender offers for (1) any and all of its 5.75% Senior Notes due 2017, its 6.60% Senior Notes due 2019 and its 4.75% Senior Notes due 2020 (collectively, the "Any and All Notes") and (2) up to $1.5 billion aggregate principal amount of its 6.25% Senior Notes due 2027, its 6.125% Senior Notes due 2039, its 5.75% Senior Notes due 2041, the 5.00% Senior Notes due 2024 issued by its wholly-owned subsidiary, Omnicare, Inc. ("Omnicare"), the 4.75% Senior Notes due 2022 issued by Omnicare, its 4.875% Senior Notes due 2035 and its 3.875% Senior Notes due 2025 (collectively, the "Maximum Tender Offer Notes" and together with the Any and All Notes, the "Notes"). On May 31, 2016, the Company increased the aggregate principal amount of the tender offers for the Maximum Tender Offer Notes to $2.25 billion. The Company purchased approximately $835 million aggregate principal amount of the Any and All Notes and $2.25 billion aggregate principal amount of the Maximum Tender Offer Notes pursuant to the tender offers, which expired on June 13, 2016. The Company paid a premium of $486 million in excess of the debt principal in connection with the purchase of the Notes, wrote off $50 million of unamortized deferred financing costs and incurred $6 million in fees, for a total loss on the early extinguishment of debt of $542 million which was recorded in income from continuing operations in the consolidated statement of income for the year ended December 31, 2016.

On June 27, 2016, the Company notified the holders of the remaining Any and All Notes that the Company was exercising its option to redeem the outstanding Any and All Notes pursuant to the terms of the Any and All Notes and the Indenture dated as of August 15, 2006, between the Company and The Bank of New York Mellon Trust Company, N.A. Approximately $1.1 billion aggregate principal amount of Any and All Notes was redeemed on July 27, 2016. The Company paid a premium of $97 million in excess of the debt principal and wrote off $4 million of unamortized deferred financing costs, for a total loss on early extinguishment of debt of $101 million during the year ended December 31, 2016.

The Company recorded a total loss on the early extinguishment of debt of $643 million which was recorded in the income from continuing operations in the consolidated statement of income for the year ended December 31, 2016.

On July 20, 2015, the Company issued an aggregate of $2.25 billion of 1.9% unsecured senior notes due 2018 ("2018 Notes"), an aggregate of $2.75 billion of 2.8% unsecured senior notes due 2020 ("2020 Notes"), an aggregate of $1.5 billion of 3.5% unsecured senior notes due 2022 ("2022 Notes"), an aggregate of $3 billion of 3.875% unsecured senior notes due 2025 ("2025 Notes"), an aggregate of $2 billion of 4.875% unsecured senior notes due 2035 ("2035 Notes"), and an aggregate of $3.5 billion of 5.125% unsecured senior notes due 2045 ("2045 Notes" and, together with the 2018 Notes, 2020 Notes, 2022 Notes, 2025 Notes and 2035 Notes, the "Notes") for total proceeds of approximately $14.8 billion, net of discounts and underwriting fees. The Notes pay interest semi-annually and contain redemption terms which allow or require the Company to redeem the Notes at a defined redemption price plus accrued and unpaid interest at the redemption date. The net proceeds of the Notes were used to fund the Omnicare acquisition and the acquisition of the pharmacies and clinics of Target. The remaining proceeds were used for general corporate purposes.

Upon the closing of the Omnicare acquisition in August 2015, the Company assumed the long-term debt of Omnicare that had a fair value of approximately $3.1 billion, $2.0 billion of which was previously convertible into Omnicare shares that holders were able to redeem subsequent to the acquisition. During the period from August 18, 2015 to December 31, 2015, all but $5 million of the $2.0 billion of previously convertible debt was redeemed and repaid and approximately $0.4 billion in Omnicare term debt assumed was repaid for total repayments of Omnicare debt of approximately $2.4 billion in 2015.

The remaining principal of the Omnicare debt assumed was comprised of senior unsecured notes with an aggregate principal amount of $700 million ($400 million of 4.75% senior notes due 2022 and $300 million of 5% senior notes due 2024). In September 2015, the Company commenced exchange offers for the 4.75% senior notes due 2022 and the 5%

senior notes due 2024 to exchange all validly tendered and accepted notes issued by Omnicare for notes to be issued by the Company. This offer expired on October 20, 2015 and the aggregate principal amounts of $388 million of the 4.75% senior notes due 2022 and $296 million of the 5% senior notes due 2024 were validly tendered and exchanged for notes issued by the Company. The Company recorded this exchange transaction as a modification of the original debt instruments. Consequently, no gain or loss on extinguishment was recognized in the Company's consolidated income statement as a result of this exchange transaction and the issuance costs of the new debt were expensed as incurred.

Our back-up credit facilities and unsecured senior notes (see Note 5 "Borrowings and Credit Agreements" to the consolidated financial statements) contain customary restrictive financial and operating covenants. The covenants do not materially affect the Company's financial or operating flexibility. As of December 31, 2017, the Company is in compliance with all debt covenants.

As of December 31, 2017, we had outstanding derivative financial instruments (see Note 1 "Significant Accounting Policies" to the consolidated financial statements). We had no outstanding derivative financial instruments as of December 31, 2016.

Debt Ratings - As of December 31, 2017, our long-term debt was rated "Baa1" by Moody's and "BBB+" by Standard & Poor's, and our commercial paper program was rated "P-2" by Moody's and "A-2" by Standard & Poor's. In December 2017, subsequent to the announcement of the proposed acquisition of Aetna, Moody's changed the outlook on our long-term debt to "Under Review" from "Stable." Similarly, S&P placed our-long-term debt outlook on "Watch Negative" from "Stable". The outlook for the commercial paper program was unchanged. In assessing our credit strength, we believe that both Moody's and Standard & Poor's considered, among other things, our capital structure and financial policies as well as our consolidated balance sheet, our historical acquisition activity and other financial information. Although we currently believe our long-term debt ratings will remain investment grade, we cannot guarantee the future actions of Moody's and/or Standard & Poor's. Our debt ratings have a direct impact on our future borrowing costs, access to capital markets and new store operating lease costs.

Quarterly Cash Dividend - In December 2016, our Board of Directors authorized an 18% increase in our quarterly common stock cash dividend to $0.50 per share effective in 2017. This increase equated to an annual dividend rate of $2.00 per share. The Company expects to maintain its quarterly dividend of $0.50 per share throughout 2018. In December 2015, our Board of Directors authorized a 21% increase in our quarterly common stock cash dividend to $0.425 per share. This increase equated to an annual dividend rate of $1.70 per share. In December 2014, our Board of directors authorized a 27% increase to our quarterly common stock cash dividend to $0.35 per share. This increase equated to an annual dividend rate of $1.40 per share.

Off-Balance Sheet Arrangements

In connection with executing operating leases, we provide a guarantee of the lease payments. We also finance a portion of our new store development through sale-leaseback transactions, which involve selling stores to unrelated parties and then leasing the stores back under leases that generally qualify and are accounted for as operating leases. We do not have any retained or contingent interests in the stores, and we do not provide any guarantees, other than a guarantee of the lease payments, in connection with the transactions. In accordance with generally accepted accounting principles, our operating leases are not reflected on our consolidated balance sheets.

Between 1995 and 1997, we sold or spun off a number of subsidiaries, including Bob's Stores, Linens 'n Things, and Marshalls. In many cases, when a former subsidiary leased a store, the Company provided a guarantee of the store's lease obligations. When the subsidiaries were disposed of, the Company's guarantees remained in place, although each initial purchaser agreed to indemnify the Company for any lease obligations the Company was required to satisfy. If any of the purchasers or any of the former subsidiaries were to become insolvent and failed to make the required payments under a store lease, the Company could be required to satisfy these obligations.

As of December 31, 2017, we guaranteed approximately 85 such store leases (excluding the lease guarantees related to Linens 'n Things), with the maximum remaining lease term extending through 2029. Management believes the ultimate disposition of any of the remaining lease guarantees will not have a material adverse effect on the Company's consolidated financial condition or future cash flows. Please see "Income (loss) from discontinued operations"

previously in this document for further information regarding our guarantee of certain Linens 'n Things' store lease obligations.

Below is a summary of our significant contractual obligations as of December 31, 2017:

	Payments Due by Period				
In millions	**Total**	**2018**	**2019 to 2020**	**2021 to 2022**	**Thereafter**
Operating leases	$27,151	$ 2,493	$ 4,562	$ 4,006	$ 16,090
Lease obligations from discontinued operations	11	3	5	3	—
Capital lease obligations	1,342	74	148	146	974
Contractual lease obligations with Target [(1)]	1,924	—	—	—	1,924
Long-term debt	25,224	3,523	3,600	5,449	12,652
Interest payments on long-term debt [(2)]	10,469	893	1,614	1,343	6,619
Other long-term liabilities in the consolidated balance sheet	468	52	346	33	37
	$66,589	$ 7,038	$10,275	$10,980	$ 38,296

(1) The Company leases pharmacy and clinic space from Target Corporation ("Target"). See Note 7 "Leases" to the consolidated financial statements for additional information regarding the lease arrangements with Target. Amounts related to the operating and capital leases with Target are reflected within the operating leases and capital lease obligations above. Amounts due in excess of the remaining estimated economic lives of the buildings are reflected herein assuming equivalent stores continue to operate through the term of the arrangements.

(2) Interest payments on long-term debt are calculated on outstanding balances and interest rates in effect on December 31, 2017.

Critical Accounting Policies

We prepare our consolidated financial statements in conformity with generally accepted accounting principles, which require management to make certain estimates and apply judgment. We base our estimates and judgments on historical experience, current trends and other factors that management believes to be important at the time the consolidated financial statements are prepared. On a regular basis, we review our accounting policies and how they are applied and disclosed in our consolidated financial statements. While we believe the historical experience, current trends and other factors considered, support the preparation of our consolidated financial statements in conformity with generally accepted accounting principles, actual results could differ from our estimates, and such differences could be material.

Our significant accounting policies are discussed in Note 1 "Significant Accounting Policies" to our consolidated financial statements. We believe the following accounting policies include a higher degree of judgment and/or complexity and, thus, are considered to be critical accounting policies. We have discussed the development and selection of our critical accounting policies with the Audit Committee of our Board of Directors and the Audit Committee has reviewed our disclosures relating to them.

Revenue Recognition

Pharmacy Services Segment

Our Pharmacy Services Segment sells prescription drugs directly through our mail service dispensing pharmacies and indirectly through our retail pharmacy network. We recognize revenues in our Pharmacy Services Segment from prescription drugs sold by our mail service dispensing pharmacies and under retail pharmacy network contracts where we are the principal using the gross method at the contract prices negotiated with our clients. Net revenue from our Pharmacy Services Segment includes: (i) the portion of the price the client pays directly to us, net of any volume-related or other discounts paid back to the client, (ii) the price paid to us ("Mail Co-Payments") or a third party pharmacy in our retail pharmacy network ("Retail Co-Payments") by individuals included in our clients' benefit plans, and (iii) administrative fees for retail pharmacy network contracts where we are not the principal. Sales taxes are not included in revenue.

We recognize revenue in the Pharmacy Services Segment when: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or services have been rendered, (iii) the seller's price to the buyer is fixed or determinable, and

(iv) collectability is reasonably assured. The following revenue recognition policies have been established for the Pharmacy Services Segment.

- Revenues generated from prescription drugs sold by mail service dispensing pharmacies are recognized when the prescription is delivered. At the time of delivery, the Pharmacy Services Segment has performed substantially all of its obligations under its client contracts and does not experience a significant level of returns or reshipments.

- Revenues generated from prescription drugs sold by third party pharmacies in the Pharmacy Services Segment's retail pharmacy network and associated administrative fees are recognized at the Pharmacy Services Segment's point-of-sale, which is when the claim is adjudicated by the Pharmacy Services Segment's online claims processing system.

We determine whether we are the principal or agent for our retail pharmacy network transactions on a contract by contract basis. In the majority of our contracts, we have determined we are the principal due to us: (i) being the primary obligor in the arrangement, (ii) having latitude in establishing the price, changing the product or performing part of the service, (iii) having discretion in supplier selection, (iv) having involvement in the determination of product or service specifications, and (v) having credit risk. Our obligations under our client contracts for which revenues are reported using the gross method are separate and distinct from our obligations to the third party pharmacies included in our retail pharmacy network contracts. Pursuant to these contracts, we are contractually required to pay the third party pharmacies in our retail pharmacy network for products sold, regardless of whether we are paid by our clients. Our responsibilities under these client contracts typically include validating eligibility and coverage levels, communicating the prescription price and the co-payments due to the third party retail pharmacy, identifying possible adverse drug interactions for the pharmacist to address with the physician prior to dispensing, suggesting clinically appropriate generic alternatives where appropriate and approving the prescription for dispensing. Although we do not have credit risk with respect to Retail Co-Payments or inventory risk related to retail network claims, we believe that all of the other indicators of gross revenue reporting are present. For contracts under which we act as an agent, we record revenues using the net method.

We deduct from our revenues the manufacturers' rebates that are earned by our clients based on their members' utilization of brand-name formulary drugs. We estimate these rebates at period-end based on actual and estimated claims data and our estimates of the manufacturers' rebates earned by our clients. We base our estimates on the best available data at period-end and recent history for the various factors that can affect the amount of rebates due to the client. We adjust our rebates payable to clients to the actual amounts paid when these rebates are paid or as significant events occur. We record any cumulative effect of these adjustments against revenues as identified, and adjust our estimates prospectively to consider recurring matters. Adjustments generally result from contract changes with our clients or manufacturers, differences between the estimated and actual product mix subject to rebates or whether the product was included in the applicable formulary. We also deduct from our revenues pricing guarantees and guarantees regarding the level of service we will provide to the client or member as well as other payments made to our clients. Because the inputs to most of these estimates are not subject to a high degree of subjectivity or volatility, the effect of adjustments between estimated and actual amounts have not been material to our results of operations or financial position.

We participate in the federal government's Medicare Part D program as a PDP through our SilverScript subsidiary. Our net revenues include insurance premiums earned by the PDP, which are determined based on the PDP's annual bid and related contractual arrangements with CMS. The insurance premiums include a beneficiary premium, which is the responsibility of the PDP member, but which is subsidized by CMS in the case of low-income members, and a direct premium paid by CMS. Premiums collected in advance are initially deferred as accrued expenses and are then recognized ratably as revenue over the period in which members are entitled to receive benefits.

In addition to these premiums, our net revenues include co-payments, coverage gap benefits, deductibles and co-insurance (collectively, the "Member Co-Payments") related to PDP members' actual prescription claims. In certain cases, CMS subsidizes a portion of these Member Co-Payments and we are paid an estimated prospective Member Co-Payment subsidy, each month. The prospective Member Co-Payment subsidy amounts received from CMS are also included in our net revenues. These amounts represent 7.2%, 5.9% and 6.3% of consolidated net revenues in 2017, 2016 and 2015, respectively. If the prospective Member Co-Payment subsidies received differ from the amounts based on actual prescription claims, the difference is recorded in either accounts receivable or accrued expenses. We account for fully insured CMS obligations and Member Co-Payments (including the amounts subsidized by CMS) using the gross

method consistent with our revenue recognition policies for Mail Co-Payments and Retail Co-Payments. We have recorded estimates of various assets and liabilities arising from our participation in the Medicare Part D program based on information in our claims management and enrollment systems. Significant estimates arising from our participation in the Medicare Part D program include: (i) estimates of low-income cost subsidy, reinsurance amounts and coverage gap discount amounts ultimately payable to or receivable from CMS based on a detailed claims reconciliation, (ii) an estimate of amounts payable to CMS under a risk-sharing feature of the Medicare Part D program design, referred to as the risk corridor and (iii) estimates for claims that have been reported and are in the process of being paid or contested and for our estimate of claims that have been incurred but have not yet been reported. Actual amounts of Medicare Part D-related assets and liabilities could differ significantly from amounts recorded. Historically, the effect of these adjustments has not been material to our results of operations or financial position.

Retail/LTC Segment

Retail Pharmacy - We recognize revenue from the sale of front store merchandise at the time the merchandise is purchased by the retail customer and recognize revenue from the sale of prescription drugs when the prescription is picked up by the customer. Customer returns are not material. Sales taxes are not included in revenue.

Long-term Care - We recognize revenue when products are delivered or services are rendered or provided to our customers, prices are fixed and determinable, and collection is reasonably assured. A significant portion of our revenues from sales of pharmaceutical and medical products are reimbursed by the federal Medicare Part D program and, to a lesser extent, state Medicaid programs. Payments for services rendered to patients covered by these programs are generally less than billed charges. We monitor our revenues and receivables from these reimbursement sources, as well as other third party insurance payors, and record an estimated contractual allowance for sales and receivable balances at the revenue recognition date, to properly account for anticipated differences between billed and reimbursed amounts. Accordingly, the total net revenues and receivables reported in our consolidated financial statements are recorded at the amount expected to be ultimately received from these payors. Since billing functions for a portion of our revenue systems are largely computerized, enabling on-line adjudication at the time of sale to record net revenues, our exposure in connection with estimating contractual allowance adjustments is limited primarily to unbilled and initially rejected Medicare, Medicaid and third party claims (typically approved for reimbursement once additional information is provided to the payor). For the remaining portion of our revenue systems, the contractual allowance is estimated for all billed, unbilled and initially rejected Medicare, Medicaid and third party claims. We evaluate several criteria in developing the estimated contractual allowances on a monthly basis, including historical trends based on actual claims paid, current contract and reimbursement terms, and changes in customer base and payor/product mix. Contractual allowance estimates are adjusted to actual amounts as cash is received and claims are settled, and the aggregate impact of these resulting adjustments was not significant to our results of operations. Further, we do not expect the impact of changes in estimates related to unsettled contractual allowance amounts from Medicare, Medicaid and third party payors as of December 31, 2017 to be significant to our future consolidated results of operations, financial position and cash flows.

Patient co-payments associated with Medicare Part D, certain state Medicaid programs, Medicare Part B and certain third party payors are typically not collected at the time products are delivered or services are rendered, but are billed to the individuals as part of our normal billing procedures and subject to our normal accounts receivable collections procedures.

Health Care Clinics - for services provided by our health care clinics, revenue recognition occurs for completed services provided to patients, with adjustments made for third party payor contractual obligations and patient direct bill historical collection rates.

Loyalty Program - our customer loyalty program, ExtraCare ®, is comprised of two components, ExtraSavings ™ and ExtraBucks ® Rewards. ExtraSavings coupons redeemed by customers are recorded as a reduction of revenue when redeemed. ExtraBucks Rewards are accrued as a charge to cost of revenues when earned, net of estimated breakage. We determine breakage based on our historical redemption patterns.

Allowances for Doubtful Accounts

Accounts receivable primarily includes amounts due from third party providers (e.g., pharmacy benefit managers, insurance companies, governmental agencies and long-term care facilities), clients, members and private pay customers, as well as vendors and manufacturers. We provide a reserve for accounts receivable considered to be at increased risk of becoming uncollectible by establishing an allowance to reduce the carrying value of such receivables to their estimated net realizable value. We establish this allowance for doubtful accounts and consider such factors as historical collection experience, (i.e., payment history and credit losses) and creditworthiness, specifically identified credit risks, aging of accounts receivable by payor category, current and expected economic conditions and other relevant factors. We regularly review our allowance for doubtful accounts for appropriateness. Judgment is used to assess the collectability of account balances and the economic ability of a customer to pay.

Our allowance for doubtful accounts as of December 31, 2017 was $307 million, compared with $286 million as of December 31, 2016. Our allowance for doubtful accounts represented 2.3% of gross receivables (net of contractual allowance adjustments) as of both December 31, 2017 and 2016. Unforeseen future developments could lead to changes in our provision for doubtful accounts levels and future allowance for doubtful accounts percentages. For example, a one percentage point increase in the allowance for doubtful accounts as a percentage of gross receivables as of December 31, 2017 would result in an increase to the provision of doubtful accounts of approximately $135 million.

Given our experience, we believe that our aggregate reserves for potential losses are adequate, but if any of our larger customers were to unexpectedly default on their obligations, our overall allowances for doubtful accounts may prove to be inadequate. In particular, if economic conditions worsen, the payor mix shifts significantly or reimbursement rates are adversely affected, we may adjust our allowance for doubtful accounts accordingly, and our accounts receivable collections, cash flows, financial position and results of operations could be adversely affected.

Vendor Allowances and Purchase Discounts

Pharmacy Services Segment

Our Pharmacy Services Segment receives purchase discounts on products purchased. Contractual arrangements with vendors, including manufacturers, wholesalers and retail pharmacies, normally provide for the Pharmacy Services Segment to receive purchase discounts from established list prices in one, or a combination, of the following forms: (i) a direct discount at the time of purchase, (ii) a discount for the prompt payment of invoices or (iii) when products are purchased indirectly from a manufacturer (e.g., through a wholesaler or retail pharmacy), a discount (or rebate) paid subsequent to dispensing. These rebates are recognized when prescriptions are dispensed and are generally calculated and billed to manufacturers within 30 days of the end of each completed quarter. Historically, the effect of adjustments resulting from the reconciliation of rebates recognized to the amounts billed and collected has not been material to the results of operations. We account for the effect of any such differences as a change in accounting estimate in the period the reconciliation is completed. The Pharmacy Services Segment also receives additional discounts under its wholesaler contracts if it exceeds contractually defined purchase volumes. In addition, the Pharmacy Services Segment receives fees from pharmaceutical manufacturers for administrative services. Purchase discounts and administrative service fees are recorded as a reduction of “Cost of revenues”.

Retail/LTC Segment

Vendor allowances received by the Retail/LTC Segment reduce the carrying cost of inventory and are recognized in cost of revenues when the related inventory is sold, unless they are specifically identified as a reimbursement of incremental costs for promotional programs and/or other services provided. Amounts that are directly linked to advertising commitments are recognized as a reduction of advertising expense (included in operating expenses) when the related advertising commitment is satisfied. Any such allowances received in excess of the actual cost incurred also reduce the carrying cost of inventory. The total value of any upfront payments received from vendors that are linked to purchase commitments is initially deferred. The deferred amounts are then amortized to reduce cost of revenues over the life of the contract based upon purchase volume. The total value of any upfront payments received from vendors that are not linked to purchase commitments is also initially deferred. The deferred amounts are then amortized to reduce cost of revenues on a straight-line basis over the life of the related contract.

We have not made any material changes in the way we account for vendor allowances and purchase discounts during the past three years.

Inventory

Inventories are valued at the lower of cost or market using the weighted average cost method.

We reduce the value of our ending inventory for estimated inventory losses that have occurred during the interim period between physical inventory counts. Physical inventory counts are taken on a regular basis in each store and a continuous cycle count process is the primary procedure used to validate the inventory balances on hand in each distribution center and mail facility to ensure that the amounts reflected in the accompanying consolidated financial statements are properly stated. The accounting for inventory contains uncertainty since we must use judgment to estimate the inventory losses that have occurred during the interim period between physical inventory counts. When estimating these losses, we consider a number of factors, which include, but are not limited to, historical physical inventory results on a location-by-location basis and current physical inventory loss trends.

Our total reserve for estimated inventory losses covered by this critical accounting policy was $297 million as of December 31, 2017. Although we believe we have sufficient current and historical information available to us to record reasonable estimates for estimated inventory losses, it is possible that actual results could differ. In order to help you assess the aggregate risk, if any, associated with the uncertainties discussed above, a ten percent (10%) pre-tax change in our estimated inventory losses, which we believe is a reasonably likely change, would increase or decrease our total reserve for estimated inventory losses by about $30 million as of December 31, 2017.

Although we believe that the estimates discussed above are reasonable and the related calculations conform to generally accepted accounting principles, actual results could differ from our estimates, and such differences could be material.

Goodwill and Intangible Assets

Identifiable intangible assets consist primarily of trademarks, client contracts and relationships, favorable leases and covenants not to compete. These intangible assets arise primarily from the determination of their respective fair market values at the date of acquisition.

Amounts assigned to identifiable intangible assets, and their related useful lives, are derived from established valuation techniques and management estimates. Goodwill represents the excess of amounts paid for acquisitions over the fair value of the net identifiable assets acquired.

We evaluate the recoverability of certain long-lived assets, including intangible assets with finite lives, but excluding goodwill and intangible assets with indefinite lives which are tested for impairment using separate tests, whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. We group and evaluate these long-lived assets for impairment at the lowest level at which individual cash flows can be identified. When evaluating these long-lived assets for potential impairment, we first compare the carrying amount of the asset group to the asset group's estimated future cash flows (undiscounted and without interest charges). If the estimated future cash flows are less than the carrying amount of the asset group, an impairment loss calculation is prepared. The impairment loss calculation compares the carrying amount of the asset group to the asset group's estimated future cash flows (discounted and with interest charges). If required, an impairment loss is recorded for the portion of the asset group's carrying value that exceeds the asset group's estimated future cash flows (discounted and with interest charges). Our long-lived asset impairment loss calculation contains uncertainty since we must use judgment to estimate each asset group's future sales, profitability and cash flows. When preparing these estimates, we consider historical results and current operating trends and our consolidated sales, profitability and cash flow results and forecasts.

These estimates can be affected by a number of factors including, but not limited to, general economic and regulatory conditions, efforts of third party organizations to reduce their prescription drug costs and/or increased member co-payments, the continued efforts of competitors to gain market share and consumer spending patterns.

Goodwill and indefinitely-lived intangible assets are subject to annual impairment reviews, or more frequent reviews if events or circumstances indicate that the carrying value may not be recoverable.

Indefinitely-lived intangible assets are tested by comparing the estimated fair value of the asset to its carrying value. If the carrying value of the asset exceeds its estimated fair value, an impairment loss is recognized and the asset is written down to its estimated fair value.

Our indefinitely-lived intangible asset impairment loss calculation contains uncertainty since we must use judgment to estimate the fair value based on the assumption that in lieu of ownership of an intangible asset, the Company would be willing to pay a royalty in order to utilize the benefits of the asset. Value is estimated by discounting the hypothetical royalty payments to their present value over the estimated economic life of the asset. These estimates can be affected by a number of factors including, but not limited to, general economic conditions, availability of market information as well as the profitability of the Company.

Goodwill is tested for impairment on a reporting unit basis. The impairment test is calculated by comparing the reporting unit's fair value with its net book value (or carrying amount), including goodwill. The fair value of our reporting units is estimated using a combination of a discounted cash flow method and a market multiple method. If the fair value of the reporting unit exceeds its carrying amount, the reporting unit's goodwill is considered to be impaired and an impairment is recognized in an amount equal to the excess.

The determination of the fair value of our reporting units requires the Company to make significant assumptions and estimates. These assumptions and estimates primarily include, but are not limited to, the selection of appropriate peer group companies; control premiums and valuation multiples appropriate for acquisitions in the industries in which the Company competes; discount rates, terminal growth rates; and forecasts of revenue, operating profit, depreciation and amortization, capital expenditures and future working capital requirements. When determining these assumptions and preparing these estimates, we consider each reporting unit's historical results and current operating trends and our consolidated revenues, profitability and cash flow results, forecasts and industry trends. Our estimates can be affected by a number of factors including, but not limited to, general economic and regulatory conditions, our market capitalization, efforts of customers and payers to reduce costs including their prescription drug costs and/or increase member co-payments, the continued efforts of competitors to gain market share and consumer spending patterns.

The carrying value of goodwill and other intangible assets covered by this critical accounting policy was $38.5 billion and $13.5 billion as of December 31, 2017, respectively. We recorded $181 million in goodwill impairments in 2017 related to our RxCrossroads reporting unit, see Note 3 "Goodwill and Other Intangibles" to our consolidated financial statements. We did not record any impairment losses related to goodwill or other intangible assets during 2016 or 2015. During the third quarter of 2017, we performed our required annual impairment tests of goodwill and indefinitely-lived trademarks. The goodwill impairment tests resulted in the fair values of our Pharmacy Services and Retail Pharmacy reporting units exceeding their carrying values by significant margins. The fair values of our LTC and RxC reporting units exceeded their carrying values by approximately 1% and 6%, respectively. The balance of goodwill for our LTC and RxCrossroads reporting units at December 31, 2017 was approximately $6.5 billion and $0.4 billion, respectively. On January 2, 2018, we sold our RxCrossroads reporting unit to McKesson Corporation for $725 million.

Although we believe we have sufficient current and historical information available to us to test for impairment, it is possible that actual results could differ from the estimates used in our impairment tests.

As previously discussed, the results of our annual goodwill impairment test resulted in the fair value of our LTC reporting unit exceeding its carrying value by approximately 1%. Our multi-year cash flow projections for our LTC reporting unit have declined from the prior year due to customer reimbursement pressures, industry trends such as lower occupancy rates in skilled nursing facilities, and client retention rates. Our projected discounted cash flow model assumes future script growth from our senior living initiative and the impact of acquisitions. Such projections also include expected cost savings from labor productivity and other initiatives. Our market multiple method is heavily dependent on earnings multiples of market participants in the pharmacy industry, including certain competitors and suppliers. If we do not achieve our forecasts, given the small excess of fair value over the related carrying value, as well as current market conditions in the healthcare industry, it is reasonably possible that the operational performance of the LTC reporting unit could be below our current expectations in the near term and the LTC reporting unit could be deemed to be impaired by a material amount.

We have not made any material changes in the methodologies utilized to test the carrying values of goodwill and intangible assets for impairment during the past three years.

Closed Store Lease Liability

We account for closed store lease termination costs when a leased store is closed. When a leased store is closed, we record a liability for the estimated present value of the remaining obligation under the noncancelable lease, which includes future real estate taxes, common area maintenance and other charges, if applicable. The liability is reduced by estimated future sublease income.

The initial calculation and subsequent evaluations of our closed store lease liability contain uncertainty since we must use judgment to estimate the timing and duration of future vacancy periods, the amount and timing of future lump sum settlement payments and the amount and timing of potential future sublease income. When estimating these potential termination costs and their related timing, we consider a number of factors, which include, but are not limited to, historical settlement experience, the owner of the property, the location and condition of the property, the terms of the underlying lease, the specific marketplace demand and general economic conditions.

Our total closed store lease liability covered by this critical accounting policy was $344 million as of December 31, 2017. This amount is net of $156 million of estimated sublease income that is subject to the uncertainties discussed above. Although we believe we have sufficient current and historical information available to us to record reasonable estimates for sublease income, it is possible that actual results could differ.

In order to help you assess the risk, if any, associated with the uncertainties discussed above, a ten percent (10%) pre-tax change in our estimated sublease income, which we believe is a reasonably likely change, would increase or decrease our total closed store lease liability by about $16 million as of December 31, 2017.

We have not made any material changes in the reserve methodology used to record closed store lease reserves during the past three years.

Self-Insurance Liabilities

We are self-insured for certain losses related to general liability, workers' compensation and auto liability, although we maintain stop loss coverage with third party insurers to limit our total liability exposure. We are also self-insured for certain losses related to health and medical liabilities.

The estimate of our self-insurance liability contains uncertainty since we must use judgment to estimate the ultimate cost that will be incurred to settle reported claims and unreported claims for incidents incurred but not reported as of the balance sheet date. When estimating our self-insurance liability, we consider a number of factors, which include, but are not limited to, historical claim experience, demographic factors, severity factors and other standard insurance industry actuarial assumptions. On a quarterly basis, we review our self-insurance liability to determine if it is adequate as it relates to our general liability, workers' compensation and auto liability. Similar reviews are conducted semi-annually to determine if our self-insurance liability is adequate for our health and medical liability.

Our total self-insurance liability covered by this critical accounting policy was $696 million as of December 31, 2017. Although we believe we have sufficient current and historical information available to us to record reasonable estimates for our self-insurance liability, it is possible that actual results could differ. In order to help you assess the risk, if any, associated with the uncertainties discussed above, a ten percent (10%) pre-tax change in our estimate for our self-insurance liability, which we believe is a reasonably likely change, would increase or decrease our self-insurance liability by about $70 million as of December 31, 2017.

We have not made any material changes in the accounting methodology used to establish our self-insurance liability during the past three years.

Income Taxes

Income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are established for any temporary differences between financial and tax reporting bases and are adjusted as needed to reflect changes in the enacted tax rates expected to be in effect when the temporary differences reverse. Such adjustments are recorded in the period in which changes in tax laws are enacted, regardless of when they are effective. Deferred tax assets are reduced, if necessary, by a valuation allowance to the extent future realization of those losses, deductions or other tax benefits is sufficiently uncertain.

Significant judgment is required in determining the provision for income taxes and the related taxes payable and deferred tax assets and liabilities since, in the ordinary course of business, there are transactions and calculations where the ultimate tax outcome is uncertain. Additionally, our tax returns are subject to audit by various domestic and foreign tax authorities that could result in material adjustments based on differing interpretations of the tax laws. Although we believe that our estimates are reasonable and are based on the best available information at the time we prepare the provision, actual results could differ from these estimates resulting in a final tax outcome that may be materially different from that which is reflected in our consolidated financial statements.

The tax benefit from an uncertain tax position is recognized only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the consolidated financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. Interest and/or penalties related to uncertain tax positions are recognized in income tax expense. Significant judgment is required in determining our uncertain tax positions. We have established accruals for uncertain tax positions using our best judgment and adjust these accruals, as warranted, due to changing facts and circumstances.

New Accounting Pronouncements

See Note 1 “Significant Accounting Policies” to the consolidated financial statements for a description of New Accounting Pronouncements applicable to the Company.

Cautionary Statement Concerning Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the “Reform Act”) provides a safe harbor for forward-looking statements made by or on behalf of the Company. In addition, the Company and its representatives may, from time to time, make written or verbal forward-looking statements, including statements contained in the Company’s filings with the U.S. Securities and Exchange Commission (“SEC”) and in its reports to stockholders, press releases, webcasts, conference calls, meetings and other communications. Generally, the inclusion of the words “believe,” “expect,” “intend,” “estimate,” “project,” “anticipate,” “will,” “should” and similar expressions identify statements that constitute forward-looking statements. All statements addressing operating performance of CVS Health Corporation or any subsidiary, events or developments that the Company expects or anticipates will occur in the future, including statements relating to corporate strategy; revenue growth; earnings or earnings per common share growth; adjusted earnings or adjusted earnings per common share growth; free cash flow; debt ratings; inventory levels; inventory turn and loss rates; store development; relocations and new market entries; retail pharmacy business, sales trends and operations; PBM business, sales trends and operations; specialty pharmacy business, sales trends and operations; LTC pharmacy business, sales trends and operations; the Company’s ability to attract or retain customers and clients; Medicare Part D competitive bidding, enrollment and operations; new product development; and the impact of industry and regulatory developments, as well as statements expressing optimism or pessimism about future operating results or events, are forward-looking statements within the meaning of the Reform Act.

The forward-looking statements are and will be based upon management’s then-current views and assumptions regarding future events and operating performance, and are applicable only as of the dates of such statements. The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

By their nature, all forward-looking statements involve risks and uncertainties. Actual results may differ materially from those contemplated by the forward-looking statements for a number of reasons as described in our SEC filings, including those set forth in the Risk Factors section within the 2017 Annual Report on Form 10-K, and including, but not limited to:

- *Risks relating to the health of the economy in general and in the markets we serve, which could impact consumer purchasing power, preferences and/or spending patterns, drug utilization trends, the financial health of our PBM and LTC clients, retail and specialty pharmacy payors or other payors doing business with the Company and our ability to secure necessary financing, suitable store locations and sale-leaseback transactions on acceptable terms.*

- *Efforts to reduce reimbursement levels and alter health care financing practices, including pressure to reduce reimbursement levels for generic drugs.*

- *The possibility of PBM and LTC client loss and/or the failure to win new PBM and LTC business, including as a result of failure to win renewal of expiring contracts, contract termination rights that may permit clients to terminate a contract prior to expiration and early or periodic renegotiation of pricing by clients prior to expiration of a contract.*

- *The possibility of loss of Medicare Part D business and/or failure to obtain new Medicare Part D business, whether as a result of the annual Medicare Part D competitive bidding process or otherwise.*

- *Risks related to the frequency and rate of the introduction of generic drugs and brand name prescription products.*

- *Risks of declining gross margins attributable to increased competitive pressures, increased client demand for lower prices, enhanced service offerings and/or higher service levels and market dynamics and, with respect to the PBM industry, regulatory changes that impact our ability to offer plan sponsors pricing that includes the use of retail "differential" or "spread" or the use of maximum allowable cost pricing.*

- *Regulatory changes, business changes and compliance requirements and restrictions that may be imposed by Centers for Medicare and Medicaid Services ("CMS"), Office of Inspector General or other government agencies relating to the Company's participation in Medicare, Medicaid and other federal and state government-funded programs, including sanctions and remedial actions that may be imposed by CMS on our Medicare Part D business.*

- *Risks and uncertainties related to the timing and scope of reimbursement from Medicare, Medicaid and other government-funded programs, including the possible impact of sequestration, the impact of other federal budget, debt and deficit negotiations and legislation that could delay or reduce reimbursement from such programs and the impact of any closure, suspension or other changes affecting federal or state government funding or operations.*

- *Possible changes in industry pricing benchmarks used to establish pricing in many of our PBM and LTC client contracts, pharmaceutical purchasing arrangements, retail network contracts, specialty payor agreements and other third party payor contracts.*

- *Efforts to increase reimbursement rates in PBM pharmacy networks and to inhibit the ability of PBMs to audit network pharmacies for fraud, waste and abuse.*

- *Risks related to increasing oversight of PBM activities by state departments of insurance and boards of pharmacy.*

- *A highly competitive business environment, including the uncertain impact of increased consolidation in the PBM industry, the possibility of combinations, joint ventures or other collaboration between PBMs and retailers, uncertainty concerning the ability of our retail pharmacy business to secure and maintain contractual relationships with PBMs and other payors on acceptable terms, uncertainty concerning the ability of our PBM business to secure and maintain competitive access, pricing and other contract terms from retail network pharmacies in an environment where some PBM clients are willing to consider adopting narrow or more restricted retail pharmacy networks, the possibility of our retail stores or specialty pharmacies being excluded from narrow or restricted networks, the potential of disruptive innovation from existing and new competitors and risks related to developing and maintaining a relevant experience for our customers.*

- *The Company's ability to timely identify or effectively respond to changing consumer preferences and spending patterns, an inability to expand the products being purchased by our customers, or the failure or inability to obtain or offer particular categories of products.*

- *Risks relating to our ability to secure timely and sufficient access to the products we sell from our domestic and/or international suppliers, including limited distribution drugs.*

- *Reform of the U.S. health care system, including ongoing implementation of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (collectively, "ACA") and the possible repeal and replacement of all or parts of ACA, continuing legislative efforts, regulatory changes and judicial interpretations impacting our health care system and the possibility of shifting political and legislative priorities related to reform of the health care system in the future.*

- *Risks related to changes in legislation, regulation and government policy (including through the use of Executive Orders) that could significantly impact our business and the health care and retail industries, including, but not limited to, the possibility of major developments in tax policy or trade relations, such as the imposition of unilateral tariffs on imported products, changes with respect to the approval process for biosimilars, or changes or developments with respect to the regulation of drug pricing, including federal and state drug pricing programs.*

- *Risks relating to any failure to properly maintain our information technology systems, our information security systems and our infrastructure to support our business and to protect the privacy and security of sensitive customer and business information.*

- *Risks related to compliance with a broad and complex regulatory framework, including compliance with new and existing federal, state and local laws and regulations relating to health care, network pharmacy reimbursement and auditing, accounting standards, corporate securities, tax, environmental and other laws and regulations affecting our business.*

- *Risks related to litigation, government investigations and other legal proceedings as they relate to our business, the pharmacy services, retail pharmacy, LTC pharmacy, specialty pharmacy or retail clinic industries, or to the health care industry generally.*

- *The risk that any condition related to the closing of any proposed acquisition, including the Aetna Acquisition, may not be satisfied on a timely basis or at all, including the inability to obtain required regulatory approvals of any proposed acquisition, including the Aetna Acquisition, or on the terms desired or anticipated; the risk that such approvals may result in the imposition of conditions that could adversely affect the resulting combined company or the expected benefits of any proposed transaction, including the Aetna Acquisition; and the risk that the proposed transactions, including the Aetna Acquisition fail to close for any other reason, which could negatively impact our stock price and our future business and financial results.*

- *The possibility that the anticipated synergies and other benefits from any acquisition by us, including the Aetna Acquisition, will not be realized, or will not be realized within the expected time periods.*

- *Other risks related to the Aetna Acquisition including the possibility of failing to retain existing management including key executives of Aetna, the potential for disruption of our business relationships due to uncertainty associated with the Aetna Acquisition, the increased difficulty for us to pursue alternatives to the Aetna Acquisition, and the possibility that the Aetna Acquisition may not be accretive to our earnings per share.*

- *The risks and uncertainties related to our ability to integrate the operations, products, services and employees of any entities acquired by us, including the Aetna Acquisition and the effect of the potential disruption of management's attention from ongoing business operations due to any pending acquisitions, including the Aetna Acquisition.*

- *The accessibility or availability of adequate financing on a timely basis and on reasonable terms and the risks of increased indebtedness incurred to fund the Aetna Acquisition.*

- *Risks related to the outcome of any legal proceedings related to, or involving any entity that is a part of, any proposed acquisition contemplated by us, including the risk that we may be subject to securities class action and derivative lawsuits in connection with the Aetna Acquisition .*

- *The possibility of lower than expected valuations at the Company's reporting units could result in goodwill impairment charges at those reporting units.*

- *Other risks and uncertainties detailed from time to time in our filings with the SEC.*

The foregoing list is not exhaustive. There can be no assurance that the Company has correctly identified and appropriately assessed all factors affecting its business. Additional risks and uncertainties not presently known to the Company or that it currently believes to be immaterial also may adversely impact the Company. Should any risks and uncertainties develop into actual events, these developments could have a material adverse effect on the Company's business, financial condition and results of operations. For these reasons, you are cautioned not to place undue reliance on the Company's forward-looking statements .

Management's Report on Internal Control Over Financial Reporting

We are responsible for establishing and maintaining adequate internal control over financial reporting. Our Company's internal control over financial reporting includes those policies and procedures that pertain to the Company's ability to record, process, summarize and report a system of internal accounting controls and procedures to provide reasonable assurance, at an appropriate cost/benefit relationship, that the unauthorized acquisition, use or disposition of assets are prevented or timely detected and that transactions are authorized, recorded and reported properly to permit the preparation of financial statements in accordance with generally accepted accounting principles (GAAP) and receipts and expenditures are duly authorized. In order to ensure the Company's internal control over financial reporting is effective, management regularly assesses such controls and did so most recently for its financial reporting as of December 31, 2017.

We conducted an assessment of the effectiveness of our internal controls over financial reporting based on the criteria set forth in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework). This evaluation included review of the documentation, evaluation of the design effectiveness and testing of the operating effectiveness of controls. Our system of internal control over financial reporting is enhanced by periodic reviews by our internal auditors, written policies and procedures and a written Code of Conduct adopted by our Company's Board of Directors, applicable to all employees of our Company. In addition, we have an internal Disclosure Committee, comprised of management from each functional area within the Company, which performs a separate review of our disclosure controls and procedures. There are inherent limitations in the effectiveness of any system of internal controls over financial reporting.

Based on our assessment, we conclude our Company's internal control over financial reporting is effective and provides reasonable assurance that assets are safeguarded and that the financial records are reliable for preparing financial statements as of December 31, 2017.

Ernst & Young LLP, independent registered public accounting firm, is appointed by the Board of Directors and ratified by our Company's shareholders. They were engaged to render an opinion regarding the fair presentation of our consolidated financial statements as well as conducting an audit of internal control over financial reporting. Their accompanying reports are based upon audits conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States).

February 14, 2018

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of CVS Health Corporation

Opinion on Internal Control over Financial Reporting

We have audited CVS Health Corporation's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, CVS Health Corporation (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2017, and the related notes and our report dated February 14, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to Consolidated Financial Statements

1 Significant Accounting Policies

Description of business - CVS Health Corporation and its subsidiaries (the "Company") is the largest integrated pharmacy health care provider in the United States based upon revenues and prescriptions filled. The Company currently has three reportable business segments, Pharmacy Services, Retail/LTC and Corporate, which are described below.

Pharmacy Services Segment (the "PSS") - The PSS provides a full range of pharmacy benefit management services including plan design offerings and administration, formulary management, Medicare Part D services, mail order, specialty pharmacy and infusion services, retail pharmacy network management services, prescription management systems, clinical services, disease management services and medical spend management. The Company's clients are primarily employers, insurance companies, unions, government employee groups, health plans, Medicare Part D, Managed Medicaid plans, plans offered on the public and private exchanges, and other sponsors of health benefit plans and individuals throughout the United States.

As a pharmacy benefits manager, the PSS manages the dispensing of pharmaceuticals through the Company's mail order pharmacies and national network of more than 68,000 retail pharmacies, consisting of approximately 41,000 chain pharmacies and 27,000 independent pharmacies, to eligible members in the benefits plans maintained by the Company's clients and utilizes its information systems to perform, among other things, safety checks, drug interaction screenings and brand to generic substitutions.

The PSS' specialty pharmacies support individuals that require complex and expensive drug therapies. The specialty pharmacy business includes mail order and retail specialty pharmacies that operate under the CVS Caremark ®, CarePlus CVS Pharmacy ™, Navarro ® Health Services and Advanced Care Scripts ("ACS Pharmacy") names. The Company enhanced its provides specialty infusion services and enteral nutrition services through Coram LLC and its subsidiaries (collectively, "Coram"). In August 2015, the Company further expanded its specialty offerings with the acquisition of ACS Pharmacy which was part of the Omnicare, Inc. ("Omnicare") acquisition. See Note 2 "Acquisitions."

The PSS also provides health management programs, which include integrated disease management for 18 conditions, through the Company's AccordantCare rare disease management offering.

In addition, through the Company's SilverScript Insurance Company ("SilverScript") subsidiary, the PSS is a national provider of drug benefits to eligible beneficiaries under the federal government's Medicare Part D program.

The PSS generates net revenues primarily by contracting with clients to provide prescription drugs to plan members. Prescription drugs are dispensed by the mail order pharmacies, specialty pharmacies and national network of retail pharmacies. Net revenues are also generated by providing additional services to clients, including administrative services such as claims processing and formulary management, as well as health care related services such as disease management.

The PSS operates under the CVS Caremark ® Pharmacy Services, Caremark ®, CVS Caremark ®, CVS Specialty ®, AccordantCare, SilverScript ®, Wellpartner ®, Coram ®, CVS Specialty ®, NovoLogix ®, Navarro ® Health Services and ACS Pharmacy names. As of December 31, 2017, the PSS operates 23 retail specialty pharmacy stores, 18 specialty mail order pharmacies, four mail order dispensing pharmacies, and 83 branches for infusion and enteral services, including approximately 73 ambulatory infusion suites and three centers of excellence, located in 42 states, Puerto Rico and the District of Columbia.

Retail/LTC Segment (the "RLS") - The RLS sells prescription drugs and a wide assortment of general merchandise, including over-the-counter drugs, beauty products and cosmetics, personal care products, convenience foods, photo finishing services, seasonal merchandise, and greeting cards, through the Company's CVS Pharmacy ®, CVS ®, CVS Pharmacy y más ®, Longs Drugs ®, Navarro Discount Pharmacy ® and Drogaria Onofre ™ retail stores and online through CVS.com ®, Navarro.com ™ and Onofre.com.br ™.

The RLS also provides health care services through its MinuteClinic ® health care clinics. MinuteClinics are staffed by nurse practitioners and physician assistants who utilize nationally recognized protocols to diagnose and treat minor health conditions, perform health screenings, monitor chronic conditions and deliver vaccinations.

In 2015, the Company made two larger acquisitions which expanded the Retail/LTC Segment's services. With the acquisition of Omnicare, the RLS began providing long-term care ("LTC") operations, which is comprised of providing the distribution of pharmaceuticals, related pharmacy consulting and other ancillary services to chronic care facilities and other care settings, as well as commercialization services which are provided under the name RxCrossroads ® ("RxC"). With the December 2015 acquisition of the pharmacies and clinics of Target Corporation ("Target"), the Company added 1,672 pharmacies and approximately 79 clinics.

As of December 31, 2017, our Retail/LTC Segment included 9,803 retail stores (of which 8,060 were our stores that operated a pharmacy and 1,695 were our pharmacies located within Target stores) located in 49 states, the District of Columbia, Puerto Rico and Brazil operating primarily under the CVS Pharmacy ®, CVS ®, CVS Pharmacy y más ®, Longs Drugs ®, Navarro Discount Pharmacy ® and Drogaria Onofre ™ names, 37 onsite pharmacies primarily operating under the CarePlus CVS Pharmacy ™, CarePlus ® and CVS Pharmacy ® names, and 1,134 retail health care clinics operating under the MinuteClinic ® name (of which 1,129 were located in our retail pharmacy stores or Target stores), and our online retail websites, CVS.com ®, Navarro.com ™ and Onofre.com.br ™. LTC operations are comprised of 145 spoke pharmacies that primarily handle new prescription orders, of which 30 are also hub pharmacies that use proprietary automation to support spoke pharmacies with refill prescriptions. LTC operates primarily under the Omnicare ® and NeighborCare ® names.

Corporate Segment - The Corporate Segment provides management and administrative services to support the Company. The Corporate Segment consists of certain aspects of the Company's executive management, corporate relations, legal, compliance, human resources, information technology and finance departments.

Principles of consolidation - The consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries and variable interest entities ("VIEs") for which the Company is the primary beneficiary. All material intercompany balances and transactions have been eliminated.

The Company continually evaluates its investments to determine if they represent variable interests in a VIE. If the Company determines that it has a variable interest in a VIE, the Company then evaluates if it is the primary beneficiary of the VIE. The evaluation is a qualitative assessment as to whether the Company has the ability to direct the activities of a VIE that most significantly impact the entity's economic performance. The Company consolidates a VIE if it is considered to be the primary beneficiary.

Assets and liabilities of VIEs for which the Company is the primary beneficiary were not significant to the Company's consolidated financial statements. VIE creditors do not have recourse against the general credit of the Company.

Use of estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Fair value hierarchy - The Company utilizes the three-level valuation hierarchy for the recognition and disclosure of fair value measurements. The categorization of assets and liabilities within this hierarchy is based upon the lowest level of input that is significant to the measurement of fair value. The three levels of the hierarchy consist of the following:

- Level 1 - Inputs to the valuation methodology are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

- Level 2 - Inputs to the valuation methodology are quoted prices for similar assets and liabilities in active markets, quoted prices in markets that are not active or inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the instrument.

- Level 3 - Inputs to the valuation methodology are unobservable inputs based upon management's best estimate of inputs market participants could use in pricing the asset or liability at the measurement date, including assumptions about risk.

Cash and cash equivalents - Cash and cash equivalents consist of cash and temporary investments with maturities of three months or less when purchased. The Company invests in short-term money market funds, commercial paper and time deposits, as well as other debt securities that are classified as cash equivalents within the accompanying consolidated balance sheets, as these funds are highly liquid and readily convertible to known amounts of cash. These investments are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices.

Restricted cash - As of December 31, 2017 and 2016, the Company had $190 million and $149 million, respectively, of restricted cash held in a trust in its insurance captive to satisfy collateral requirements associated with the assignment of certain insurance policies. Such amounts are included in other assets in the consolidated balance sheets. Additionally, as of December 31, 2017, the Company had $14 million of restricted cash held in escrow accounts in connection with certain recent acquisitions. Such amounts are included in other current assets in the consolidated balance sheets. All restricted cash is invested in time deposits which are classified within Level 1 of the fair value hierarchy.

Short-term investments - The Company's short-term investments consist of certificates of deposit with initial maturities of greater than three months when purchased that mature in less than one year from the balance sheet date. These investments, which were classified as available-for-sale within Level 1 of the fair value hierarchy, were carried at fair value, which approximated their historical cost at December 31, 2017 and 2016.

Fair value of financial instruments - As of December 31, 2017, the Company's financial instruments include cash and cash equivalents, short-term and long-term investments, accounts receivable, accounts payable and short-term debt approximate their fair value due to the nature of these financial instruments. The carrying amount and estimated fair value of total long-term debt was $25.7 billion and $26.8 billion, respectively, as of December 31, 2017. The fair value of the Company's long-term debt was estimated based on quoted rates currently offered in active markets for the Company's debt, which is considered Level 1 of the fair value hierarchy.

Derivative financial instruments - The Company is exposed to interest rate risk and management considers it prudent to periodically reduce the Company's exposure to cash flow variability resulting from interest rate fluctuations. In December 2017, the Company entered into several interest rate swap transactions. These agreements were designated as cash flow hedges and were used to hedge the exposure to variability in future cash flows resulting from changes in interest rates related to the anticipated issuance of long-term debt in connection with the proposed acquisition of Aetna Inc. ("Aetna"). The interest rate swaps had notional amounts totaling $4.75 billion. At December 31, 2017, the fair value of these agreements were a $5 million asset recorded in other current assets and a $23 million liability recorded in accrued expenses. The fair value of these derivative financial instruments was determined using quoted prices in markets that are not active or inputs that are observable for the asset or liability and therefore they are classified as Level 2 in the fair value hierarchy. The Company has deferred gains and losses in accumulated other comprehensive income which are expected to be reclassified to interest expense over the life of the underlying forecasted debt. The hedges are expected to be highly effective; therefore, no ineffectiveness was recognized in earnings. There were no outstanding derivative financial instruments as of December 31, 2016.

Foreign currency translation and transactions - For local currency functional currency, assets and liabilities are translated at end-of-period rates while revenues and expenses are translated at average rates in effect during the period. Equity is translated at historical rates and the resulting cumulative translation adjustments are included as a component of accumulated other comprehensive income (loss).

For U.S. dollar functional currency locations, foreign currency assets and liabilities are remeasured into U.S. dollars at end-of-period exchange rates, except for nonmonetary balance sheet accounts, which are remeasured at historical exchange rates. Revenue and expense are remeasured at average exchange rates in effect during each period, except for those expenses related to the nonmonetary balance sheet amounts, which are remeasured at historical exchange rates. Gains or losses from foreign currency remeasurement are included in income.

Gains and losses arising from foreign currency transactions and the effects of remeasurements were not material for all periods presented.

Accounts receivable - Accounts receivable are stated net of an allowance for doubtful accounts. The accounts receivable balance primarily includes amounts due from third party providers (e.g., pharmacy benefit managers, insurance companies, governmental agencies and long-term care facilities), clients, members and private pay customers, as well as vendors and manufacturers. Charges to bad debt are based on both historical write-offs and specifically identified receivables.

The activity in the allowance for doubtful accounts receivable for the years ended December 31 is as follows:

In millions	**2017**	**2016**	**2015**
Beginning balance	$ 286	$ 161	$ 256
Additions charged to bad debt expense	177	221	216
Write-offs charged to allowance	(156)	(96)	(311)
Ending balance	$ 307	$ 286	$ 161

Inventories - Inventories are stated at the lower of weighted average cost or market. Physical inventory counts are taken on a regular basis in each retail store and long-term care pharmacy and a continuous cycle count process is the primary procedure used to validate the inventory balances on hand in each distribution center and mail facility to ensure that the amounts reflected in the accompanying consolidated financial statements are properly stated. During the interim period between physical inventory counts, the Company accrues for anticipated physical inventory losses on a location-by-location basis based on historical results and current trends.

Property and equipment - Property, equipment and improvements to leased premises are depreciated using the straight-line method over the estimated useful lives of the assets, or when applicable, the term of the lease, whichever is shorter. Estimated useful lives generally range from 10 to 40 years for buildings, building improvements and leasehold improvements and 3 to 10 years for fixtures, equipment and internally developed software. Repair and maintenance costs are charged directly to expense as incurred. Major renewals or replacements that substantially extend the useful life of an asset are capitalized and depreciated. Application development stage costs for significant internally developed software projects are capitalized and depreciated.

The following are the components of property and equipment at December 31:

In millions	**2017**	**2016**
Land	$ 1,707	$ 1,734
Building and improvements	3,343	3,226
Fixtures and equipment	11,963	10,956
Leasehold improvements	4,793	4,494
Software	2,484	2,392
	24,290	22,802
Accumulated depreciation and amortization	(13,998)	(12,627)
Property and equipment, net	$ 10,292	$ 10,175

The gross amount of property and equipment under capital leases was $588 million and $547 million as of December 31, 2017 and 2016, respectively. Accumulated amortization of property and equipment under capital lease was $140 million

and $119 million as of December 31, 2017 and 2016, respectively. Amortization of property and equipment under capital lease is included within depreciation expense. Depreciation expense totaled $1.7 billion in both 2017 and 2016, and $1.5 billion in 2015.

Goodwill and other indefinitely-lived assets - Goodwill and other indefinitely-lived assets are not amortized, but are subject to impairment reviews annually, or more frequently if necessary. See Note 3 "Goodwill and Other Intangibles" for additional information on goodwill and other indefinitely-lived assets.

Intangible assets - Purchased customer contracts and relationships are amortized on a straight-line basis over their estimated useful lives between 9 and 20 years. Purchased customer lists are amortized on a straight-line basis over their estimated useful lives of up to 10 years. Purchased leases are amortized on a straight-line basis over the remaining life of the lease. See Note 3 "Goodwill and Other Intangibles" for additional information about intangible assets.

Impairment of long-lived assets - The Company groups and evaluates fixed and finite-lived intangible assets for impairment at the lowest level at which individual cash flows can be identified, whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. If indicators of impairment are present, the Company first compares the carrying amount of the asset group to the estimated future cash flows associated with the asset group (undiscounted and without interest charges). If the estimated future cash flows used in this analysis are less than the carrying amount of the asset group, an impairment loss calculation is prepared. The impairment loss calculation compares the carrying amount of the asset group to the asset group's estimated future cash flows (discounted and with interest charges). If required, an impairment loss is recorded for the portion of the asset group's carrying value that exceeds the asset group's estimated future cash flows (discounted and with interest charges).

Redeemable noncontrolling interest - As a result of the acquisition of Omnicare in 2015, the Company obtained a 73% ownership interest in a limited liability company ("LLC"). Due to the change in control in Omnicare, the noncontrolling member of the LLC had the contractual right to put its membership interest to the Company at fair value. Consequently, the noncontrolling interest in the LLC was recorded as a redeemable noncontrolling interest at fair value. During 2016, the noncontrolling shareholder of the LLC exercised its option to sell its ownership interest and the Company purchased the noncontrolling interest in the LLC for approximately $39 million.

Below is a summary of the changes in redeemable noncontrolling interest for the years ended December 31:

In millions	**2016**	**2015**
Beginning balance	$ 39	$ —
Acquisition of noncontrolling interest	—	39
Net income attributable to noncontrolling interest	1	1
Distributions	(2)	(1)
Purchase of noncontrolling interest	(39)	—
Reclassification to capital surplus in connection with purchase of noncontrolling interest	1	—
Ending balance	$ —	$ 39

Revenue Recognition

Pharmacy Services Segment

The PSS sells prescription drugs directly through its mail service dispensing pharmacies and indirectly through its retail pharmacy network. The PSS recognizes revenue from prescription drugs sold by its mail service dispensing pharmacies and under retail pharmacy network contracts where it is the principal using the gross method at the contract prices negotiated with its clients. Net revenues include: (i) the portion of the price the client pays directly to the PSS, net of any volume-related or other discounts paid back to the client (see "Drug Discounts" below), (ii) the price paid to the PSS by client plan members for mail order prescriptions ("Mail Co-Payments") and the price paid to retail network pharmacies by client plan members for retail prescriptions ("Retail Co-Payments"), and (iii) administrative fees for retail pharmacy network contracts where the PSS is not the principal as discussed below. Sales taxes are not included in revenue.

Revenue is recognized when: (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or services have been rendered, (iii) the seller's price to the buyer is fixed or determinable, and (iv) collectability is reasonably assured. The following revenue recognition policies have been established for the PSS:

- Revenues generated from prescription drugs sold by mail service dispensing pharmacies are recognized when the prescription is delivered. At the time of delivery, the PSS has performed substantially all of its obligations under its client contracts and does not experience a significant level of returns or reshipments.

- Revenues generated from prescription drugs sold by third party pharmacies in the PSS' retail pharmacy network and associated administrative fees are recognized at the PSS' point-of-sale, which is when the claim is adjudicated by the PSS online claims processing system.

The PSS determines whether it is the principal or agent for its retail pharmacy network transactions on a contract by contract basis. In the majority of its contracts, the PSS has determined it is the principal due to it: (i) being the primary obligor in the arrangement, (ii) having latitude in establishing the price, changing the product or performing part of the service, (iii) having discretion in supplier selection, (iv) having involvement in the determination of product or service specifications, and (v) having credit risk. The PSS' obligations under its client contracts for which revenues are reported using the gross method are separate and distinct from its obligations to the third party pharmacies included in its retail pharmacy network contracts. Pursuant to these contracts, the PSS is contractually required to pay the third party pharmacies in its retail pharmacy network for products sold, regardless of whether the PSS is paid by its clients. The PSS' responsibilities under its client contracts typically include validating eligibility and coverage levels, communicating the prescription price and the co-payments due to the third party retail pharmacy, identifying possible adverse drug interactions for the pharmacist to address with the prescriber prior to dispensing, suggesting generic alternatives where clinically appropriate and approving the prescription for dispensing. Although the PSS does not have credit risk with respect to Retail Co-Payments or inventory risk related to retail network claims, management believes that all of the other applicable indicators of gross revenue reporting are present. For contracts under which the PSS acts as an agent, revenue is recognized using the net method.

Drug Discounts - The PSS deducts from its revenues any rebates, inclusive of discounts and fees, earned by its clients. Rebates are paid to clients in accordance with the terms of client contracts, which are normally based on fixed rebates per prescription for specific products dispensed or a percentage of manufacturer discounts received for specific products dispensed. The liability for rebates due to clients is included in "Claims and discounts payable" in the accompanying consolidated balance sheets.

Medicare Part D - The PSS, through its SilverScript subsidiary, participates in the federal government's Medicare Part D program as a Prescription Drug Plan ("PDP"). Net revenues include insurance premiums earned by the PDP, which are determined based on the PDP's annual bid and related contractual arrangements with the Centers for Medicare and Medicaid Services ("CMS"). The insurance premiums include a direct premium paid by CMS and a beneficiary premium, which is the responsibility of the PDP member, but which is subsidized by CMS in the case of low-income members. Premiums collected in advance are initially deferred in accrued expenses and are then recognized in net revenues over the period in which members are entitled to receive benefits.

In addition to these premiums, net revenues include co-payments, coverage gap benefits, deductibles and co-insurance (collectively, the "Member Co-Payments") related to PDP members' actual prescription claims. In certain cases, CMS subsidizes a portion of these Member Co-Payments and pays the PSS an estimated prospective Member Co-Payment subsidy amount each month. The prospective Member Co-Payment subsidy amounts received from CMS are also included in net revenues. SilverScript assumes no risk for these amounts. If the prospective Member Co-Payment subsidies received differ from the amounts based on actual prescription claims, the difference is recorded in either accounts receivable or accrued expenses.

The PSS accounts for CMS obligations and Member Co-Payments (including the amounts subsidized by CMS) using the gross method consistent with its revenue recognition policies for Mail Co-Payments and Retail Co-Payments (discussed previously in this document).

Retail/LTC Segment

Retail Pharmacy - The retail drugstores recognize revenue at the time the customer takes possession of the merchandise. Customer returns are not material. Revenue generated from the performance of services in the RLS' health care clinics is recognized at the time the services are performed. Sales taxes are not included in revenue.

Long-term Care - Revenue is recognized when products are delivered or services are rendered or provided to the customer, prices are fixed and determinable, and collection is reasonably assured. A significant portion of the revenues from sales of pharmaceutical and medical products are reimbursed by the federal Medicare Part D program and, to a lesser extent, state Medicaid programs. Payments for services rendered to patients covered by these programs are generally less than billed charges. The Company monitors its revenues and receivables from these reimbursement sources, as well as other third party insurance payors, and record an estimated contractual allowance for sales and receivable balances at the revenue recognition date, to properly account for anticipated differences between billed and reimbursed amounts. Accordingly, the total net sales and receivables reported in the Company's consolidated financial statements are recorded at the amount expected to be ultimately received from these payors. Since billing functions for a portion of the Company's revenue systems are largely computerized, enabling on-line adjudication at the time of sale to record net revenues, the Company's exposure in connection with estimating contractual allowance adjustments is limited primarily to unbilled and initially rejected Medicare, Medicaid and third party claims (typically approved for reimbursement once additional information is provided to the payor). For the remaining portion of the Company's revenue systems, the contractual allowance is estimated for all billed, unbilled and initially rejected Medicare, Medicaid and third party claims. The Company evaluates several criteria in developing the estimated contractual allowances on a monthly basis, including historical trends based on actual claims paid, current contract and reimbursement terms, and changes in customer base and payor/product mix. Contractual allowance estimates are adjusted to actual amounts as cash is received and claims are settled, and the aggregate impact of these resulting adjustments was not significant to our results of operations for any of the periods presented.

Patient co-payments associated with Medicare Part D, certain state Medicaid programs, Medicare Part B and certain third party payors are typically not collected at the time products are delivered or services are rendered, but are billed to the individuals as part of our normal billing procedures and subject to our normal accounts receivable collections procedures.

Health Care Clinics - For services provided by our health care clinics, revenue recognition occurs for completed services provided to patients, with adjustments taken for third party payor contractual obligations and patient direct bill historical collection rates.

Loyalty Program - The Company's customer loyalty program, ExtraCare ®, is comprised of two components, ExtraSavings ™ and ExtraBucks ® Rewards. ExtraSavings coupons redeemed by customers are recorded as a reduction of revenue when redeemed. ExtraBucks Rewards are accrued as a charge to cost of revenues when earned, net of estimated breakage. The Company determines breakage based on historical redemption patterns.

See Note 13 "Segment Reporting" for additional information about the revenues of the Company's business segments.

Cost of revenues

Pharmacy Services Segment - The PSS' cost of revenues includes: (i) the cost of prescription drugs sold during the reporting period directly through its mail service dispensing pharmacies and indirectly through its retail pharmacy network, (ii) shipping and handling costs, and (iii) the operating costs of its mail service dispensing pharmacies and client service operations and related information technology support costs including depreciation and amortization. The cost of prescription drugs sold component of cost of revenues includes: (i) the cost of the prescription drugs purchased from manufacturers or distributors and shipped to members in clients' benefit plans from the PSS' mail service dispensing pharmacies, net of any volume-related or other discounts (see "Vendor allowances and purchase discounts" below) and (ii) the cost of prescription drugs sold (including Retail Co-Payments) through the PSS' retail pharmacy network under contracts where it is the principal, net of any volume-related or other discounts.

Retail/LTC Segment - The RLS' cost of revenues includes: the cost of merchandise sold during the reporting period and the related purchasing costs, warehousing and delivery costs (including depreciation and amortization) and actual and estimated inventory losses.

See Note 13 "Segment Reporting" for additional information about the cost of revenues of the Company's business segments.

Vendor allowances and purchase discounts

The Company accounts for vendor allowances and purchase discounts as follows:

Pharmacy Services Segment - The PSS receives purchase discounts on products purchased. The PSS' contractual arrangements with vendors, including manufacturers, wholesalers and retail pharmacies, normally provide for the PSS to receive purchase discounts from established list prices in one, or a combination, of the following forms: (i) a direct discount at the time of purchase, (ii) a discount for the prompt payment of invoices, or (iii) when products are purchased indirectly from a manufacturer (e.g., through a wholesaler or retail pharmacy), a discount (or rebate) paid subsequent to dispensing. These rebates are recognized when prescriptions are dispensed and are generally calculated and billed to manufacturers within 30 days of the end of each completed quarter. Historically, the effect of adjustments resulting from the reconciliation of rebates recognized to the amounts billed and collected has not been material to the PSS' results of operations. The PSS accounts for the effect of any such differences as a change in accounting estimate in the period the reconciliation is completed. The PSS also receives additional discounts under its wholesaler contracts if it exceeds contractually defined annual purchase volumes. In addition, the PSS receives fees from pharmaceutical manufacturers for administrative services. Purchase discounts and administrative service fees are recorded as a reduction of "Cost of revenues".

Retail/LTC Segment - Vendor allowances received by the RLS reduce the carrying cost of inventory and are recognized in cost of revenues when the related inventory is sold, unless they are specifically identified as a reimbursement of incremental costs for promotional programs and/or other services provided. Amounts that are directly linked to advertising commitments are recognized as a reduction of advertising expense (included in operating expenses) when the related advertising commitment is satisfied. Any such allowances received in excess of the actual cost incurred also reduce the carrying cost of inventory. The total value of any upfront payments received from vendors that are linked to purchase commitments is initially deferred. The deferred amounts are then amortized to reduce cost of revenues over the life of the contract based upon purchase volume. The total value of any upfront payments received from vendors that are not linked to purchase commitments is also initially deferred. The deferred amounts are then amortized to reduce cost of revenues on a straight-line basis over the life of the related contract. The total amortization of these upfront payments was not material to the accompanying consolidated financial statements.

Insurance - The Company is self-insured for certain losses related to general liability, workers' compensation and auto liability. The Company obtains third party insurance coverage to limit exposure from these claims. The Company is also self-insured for certain losses related to health and medical liabilities. The Company's self-insurance accruals, which include reported claims and claims incurred but not reported, are calculated using standard insurance industry actuarial assumptions and the Company's historical claims experience.

Facility opening and closing costs - New facility opening costs, other than capital expenditures, are charged directly to expense when incurred. When the Company closes a facility, the present value of estimated unrecoverable costs, including the remaining lease obligation less estimated sublease income and the book value of abandoned property and equipment, are charged to expense. The long-term portion of the lease obligations associated with facility closings was $306 million and $181 million in 2017 and 2016, respectively.

Advertising costs - Advertising costs are expensed when the related advertising takes place. Advertising costs, net of vendor funding (included in operating expenses), were $2 30 million, $216 million and $221 million in 2017, 2016 and 2015, respectively.

Interest expense, net - The following are the components of net interest expense for the years ended December 31:

In millions	2017	2016	2015
Interest expense	$ 1,062	$ 1,078	$ 859
Interest income	(21)	(20)	(21)
Interest expense, net	$ 1,041	$ 1,058	$ 838

Capitalized interest totaled $ 8 million, $13 million and $12 million in 2017, 2016 and 2015, respectively.

Shares held in trust - The Company maintains grantor trusts, which held approximately one million shares of its common stock at December 31, 2017 and 2016, respectively. These shares are designated for use under various employee compensation plans. Since the Company holds these shares, they are excluded from the computation of basic and diluted shares outstanding.

Accumulated other comprehensive income - Accumulated other comprehensive income (loss) consists of changes in the net actuarial gains and losses associated with pension and other postretirement benefit plans, net losses on cash flow hedge derivative instruments associated with forecasted debt issuances, and foreign currency translation adjustments. The amount included in accumulated other comprehensive loss related to the Company's pension and postretirement plans was $ 34 million pre-tax ($21 million after-tax) as of December 31, 2017 and $284 million pre-tax ($173 million after-tax) as of December 31, 2016. The net impact on cash flow hedges totaled $24 million pre-tax ($15 million after-tax) and $9 million pre-tax ($5 million after-tax) as of December 31, 2017 and 2016, respectively. Cumulative foreign currency translation adjustments at December 31, 2017 and 2016 were $129 million and $127 million, respectively.

Changes in accumulated other comprehensive income (loss) by component are shown below:

	Year Ended December 31, 2017 [1]			
In millions	Foreign Currency	Losses on Cash Flow Hedges	Pension and Other Postretirement Benefits	Total
Balance, December 31, 2016	$ (127)	$ (5)	$ (173)	$ (305)
Other comprehensive loss before reclassifications	(2)	(11)	—	(13)
Amounts reclassified from accumulated other comprehensive income [2]	—	1	152	153
Net other comprehensive income (loss)	(2)	(10)	152	140
Balance, December 31, 2017	$ (129)	$ (15)	$ (21)	$ (165)

	Year Ended December 31, 2016 [1]			
	Foreign Currency	Losses on Cash Flow Hedges	Pension and Other Postretirement Benefits	Total
Balance, December 31, 2015	$ (165)	$ (7)	$ (186)	$ (358)
Other comprehensive income before reclassifications	38	—	—	38
Amounts reclassified from accumulated other comprehensive income [2]	—	2	13	15
Net other comprehensive income	38	2	13	53
Balance, December 31, 2016	$ (127)	$ (5)	$ (173)	$ (305)

(1) All amounts are net of tax.

(2) The amounts reclassified from accumulated other comprehensive income for cash flow hedges are recorded within interest expense, net on the consolidated statement of income. The amounts reclassified from accumulated other comprehensive income for pension and other postretirement benefits are included in other expense on the consolidated statement of income.

Stock-based compensation - Stock-based compensation is measured at the grant date based on the fair value of the award and is recognized as expense over the applicable requisite service period of the stock award (generally 3 to 5 years) using the straight-line method.

Variable interest entity - In 2014, the Company and Cardinal Health, Inc. ("Cardinal") established Red Oak Sourcing, LLC ("Red Oak"), a generic pharmaceutical sourcing entity in which the Company and Cardinal each own 50%. The Red Oak arrangement has an initial term of ten years. Under this arrangement, the Company and Cardinal contributed their sourcing and supply chain expertise to Red Oak and agreed to source and negotiate generic pharmaceutical supply contracts for both companies through Red Oak; however, Red Oak does not own or hold inventory on behalf of either company. No physical assets (e.g., property and equipment) were contributed to Red Oak by either company and minimal funding was provided to capitalize Red Oak.

The Company has determined that it is the primary beneficiary of this variable interest entity because it has the ability to direct the activities of Red Oak. Consequently, the Company consolidates Red Oak in its consolidated financial statements within the Retail/LTC Segment.

Cardinal is required to pay the Company 39 quarterly payments beginning in October 2014. As milestones are met, the quarterly payments increase. The Company received approximately $183 million, $163 million and $122 million from Cardinal during the years ended December 31, 2017, 2016 and 2015, respectively. The payments reduce the Company's carrying value of inventory and are recognized in cost of revenues when the related inventory is sold. Revenues associated with Red Oak expenses reimbursed by Cardinal for the years ended December 31, 2017, 2016 and 2015, as well as amounts due to or due from Cardinal at December 31, 2017 and 2016 were immaterial.

Related party transactions - The Company has an equity method investment in SureScripts, LLC ("SureScripts"), which operates a clinical health information network. The Pharmacy Services and Retail/LTC segments utilize this clinical health information network in providing services to its client plan members and retail customers. The Company expensed fees of approximately $35 million, $39 million and $50 million in the years ended December 31, 2017, 2016 and 2015, respectively, for the use of this network. The Company's investment in and equity in earnings of SureScripts for all periods presented is immaterial.

The Company has an equity method investment in Heartland Healthcare Services ("Heartland"). Heartland operates several long-term care pharmacies in four states. Heartland paid the Company approximately $139 million, $140 million and $25 million for pharmaceutical inventory purchases during the years ended December 31, 2017, 2016 and 2015, respectively. Additionally, the Company performs certain collection functions for Heartland and then passes those customer cash collections to Heartland. The Company's investment in and equity in earnings of Heartland as of and for the years ended December 31, 2016 and 2015 is immaterial.

In 2016, the Company made charitable contributions of $32 million to the CVS Foundation (the "Foundation") to fund future giving. The Foundation is an unconsolidated non-profit entity managed by employees of the Company that focuses on health, education and community involvement programs. The charitable contributions were recorded as operating expenses in the Company's consolidated statement of income for the year ended December 31, 2016.

Income taxes - The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the consolidated financial statements. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the consolidated financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year or years in which the differences are expected to reverse. The effect of a change in the tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

On December 22, 2017, the President signed into law the "Tax Cuts and Jobs Act" (the "TCJA"). Among numerous changes to existing tax laws, the TCJA permanently reduces the federal corporate income tax rate from 35% to 21% effective January 1, 2018. The effects on deferred tax balances of changes in tax rates are required to be taken into consideration in the period in which the changes are enacted, regardless of when they are effective. As the result of the

reduction of the corporate income tax rate under the TCJA, the Company estimated the revaluation of its net deferred tax liabilities and recorded a provisional noncash income tax benefit of approximately $1.5 billion for year ended December 31, 2017. The Company has not completed all of its processes to determine the TCJA's final impact. The final impact may differ from this provisional amount due to, among other things, changes in interpretations and assumptions the Company has made thus far and the issuance of additional regulatory or other guidance. The accounting is expected to be completed by the time the 2017 federal income tax return is filed in 2018.

The Company recognizes net deferred tax assets to the extent that it believes these assets are more likely than not to be realized. In making such a determination, the Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies, and results of recent operations. To the extent that the Company does not consider it more likely than not that a deferred tax asset will be recovered, a valuation allowance is established.

The Company records uncertain tax positions on the basis of a two-step process whereby (1) the Company determines whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, the Company recognizes the largest amount of tax benefit that is more than 50% likely to be realized upon ultimate settlement with the related tax authority.

Interest and/or penalties related to uncertain tax positions are recognized in income tax expense.

Discontinued operations - In connection with certain business dispositions completed between 1991 and 1997, the Company retained guarantees on store lease obligations for a number of former subsidiaries, including Bob's Stores and Linens 'n Things which filed for bankruptcy in 2016 and 2008, respectively. Additionally, the Company's recently acquired Bluegrass Pharmacy is considered held for sale and is included in discontinued operations (see Note 2 "Acquisitions" for additional information). The Company's loss from discontinued operations in 2017 and 2016 primarily includes lease-related costs which the Company believes it will likely be required to satisfy pursuant to its lease guarantees. The Company's income from discontinued operations in 2015 of $9 million, net of tax, was related to the release of certain store lease guarantees due to a settlement with a landlord. See Note 12 "Commitments and Contingencies" of the consolidated financial statements.

Below is a summary of the results of discontinued operations for the years ended December 31:

In millions	**2017**	**2016**	**2015**
Income (loss) from discontinued operations	$ (13)	$ (2)	$ 15
Income tax benefit (expense)	5	1	(6)
Income (loss) from discontinued operations, net of tax	$ (8)	$ (1)	$ 9

Earnings per common share - Earnings per share is computed using the two-class method. Options to purchase 10.4 million, 6.7 million and 2.7 million shares of common stock were outstanding as of December 31, 2017, 2016 and 2015, respectively, but were not included in the calculation of diluted earnings per share because the options' exercise prices were greater than the average market price of the common shares and, therefore, the effect would be antidilutive.

New accounting pronouncements recently adopted - In July 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-11, *Inventory* , which amends Accounting Standard Codification ("ASC") Topic 330. This ASU simplifies current accounting treatments by requiring entities to measure most inventories at "the lower of cost and net realizable value" rather than using lower of cost or market. This guidance does not apply to inventories measured using the last-in, first-out method or the retail inventory method. The Company adopted this standard effective January 1, 2017. The adoption of this new guidance did not have any impact on the Company's consolidated results of operations, financial position or cash flows.

In March 2016, the FASB issued ASU No. 2016-09, *Improvements to Employee Share-Based Payment Accounting* , which amends the accounting for certain aspects of shared-based payments to employees in ASC Topic 718,

Compensation - Stock Compensation . The new guidance eliminates the accounting for any excess tax benefits and deficiencies through equity, and requires all excess tax benefits and deficiencies related to employee share-based compensation arrangements to be recorded in the income statement. This aspect of the guidance is required to be applied prospectively. The guidance also requires the presentation of excess tax benefits on the statement of cash flows as an operating activity rather than a financing activity, a change which may be applied prospectively or retrospectively. The guidance further provides an accounting policy election to account for forfeitures as they occur rather than utilizing the estimated amount of forfeitures at the time of issuance. The Company adopted this guidance effective January 1, 2017. The primary impact of adopting this guidance was the recognition of excess tax benefits in the income statement instead of recognizing them in equity. This income statement guidance was adopted on a prospective basis. As a result, a discrete tax benefit of $53 million was recognized in the income tax provision in the year ended December 31, 2017.

The Company elected to retrospectively adopt the guidance on the presentation of excess tax benefits in the statement of cash flows. The following is a reconciliation of the effect of the resulting reclassification of the excess tax benefits on the Company's consolidated statements of cash flows for the years ended December 31, 2016 and 2015:

In millions	**As Previously Reported**	**Adjustments**	**As Revised**
Year Ended December 31, 2016:			
Cash paid to other suppliers and employees	$ (15,550)	$ 72	$ (15,478)
Net cash provided by operating activities	10,069	72	10,141
Excess tax benefits from stock-based compensation	72	(72)	—
Net cash used in financing activities	(6,689)	(72)	(6,761)
Reconciliation of net income to net cash provided by operating activities:			
Accrued expenses	59	72	131
Year Ended December 31, 2015:			
Cash paid to other suppliers and employees	(14,162)	127	(14,035)
Net cash provided by operating activities	8,412	127	8,539
Excess tax benefits from stock-based compensation	127	(127)	—
Net cash provided by financing activities	5,006	(127)	4,879
Reconciliation of net income to net cash provided by operating activities:			
Accrued expenses	765	127	892

The Company elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period. None of the other provisions in this guidance had a material impact on the Company's consolidated financial statements.

In March 2017, the FASB issued ASU 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* , which amends ASC Topic 715, *Compensation – Retirement Benefits* . ASU 2017-07 requires entities to disaggregate the current service cost component from the other components of net benefit cost and present it with other current compensation costs for related employees in the income statement and present the other components of net benefit cost elsewhere in the income statement and outside of operating income. Only the service cost component of net benefit cost is eligible for capitalization. The guidance is effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted as of the beginning of any annual periods for which an entity's financial statements have not been issued. Entities are required to retrospectively apply the requirement for a separate presentation in the income statement of service costs and other components of net benefit cost and prospectively adopt the requirement to limit the capitalization of benefit costs to the service component. The Company adopted the income statement presentation aspects of this new guidance on a retrospective basis effective January 1, 2017. Nearly all of the Company's net benefit costs for the Company's defined benefit pension and postretirement plans do not contain a service cost component as most of these defined benefit plans have been frozen for an extended period of time.

The following is a reconciliation of the effect of the reclassification of the net benefit cost from operating expenses to other expense in the Company's consolidated statements of income for the years ended December 31 2016 and 2015:

In millions	As Previously Reported	Adjustments	As Revised
Year Ended December 31, 2016:			
Operating expenses	$ 18,519	$ (28)	$ 18,491
Operating profit	10,338	28	10,366
Other expense	—	28	28
Year Ended December 31, 2015:			
Operating expenses	17,074	(21)	17,053
Operating profit	9,454	21	9,475
Other expense	—	21	21

In January 2017, the FASB issued ASU 2017-04, *Simplifying the Test for Goodwill Impairment* , which amends ASC Topic 350, *Intangibles – Goodwill and Other* . This ASU requires the Company to perform its annual, or applicable interim, goodwill impairment test by comparing the fair value of each reporting unit with its carrying amount. An impairment charge must be recognized at the amount by which the carrying amount exceeds the fair value of the reporting unit; however, the charge recognized should not exceed the total amount of goodwill allocated to that reporting unit. Income tax effects resulting from any tax deductible goodwill should be considered when measuring a goodwill impairment charge, if applicable. The guidance in ASU 2017-04 is effective for annual or interim goodwill impairment tests in fiscal years beginning after December 15, 2019. The Company elected to early adopt this standard as of January 1, 2017. At the date of adoption of this new guidance, the guidance did not have any impact on the Company's consolidated results of operations, financial position or cash flows.

In August 2017, the FASB issued ASU 2017-12, *Targeted Improvements to Accounting for Hedging Activities* , which amends ASC Topic 815, *Derivative and Hedging* . ASU 2017-12 expands an entity's ability to hedge nonfinancial and financial risk components and reduces complexity in fair value hedges of interest rate risk. It eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires the entire change in the fair value of a hedging instrument to be presented in the same income statement line as the hedged item. ASU 2017-12 also eases certain documentation and assessment requirements and modifies the accounting for components excluded from the assessment of hedge effectiveness. The guidance is effective for fiscal years beginning after December 15, 2018, and interims periods with those years. Early adoption is permitted. The guidance with respect to cash flow and net investment hedge relationships existing on the date of adoption must be applied on a modified retrospective basis, and the new presentation and disclosure requirements must be applied on a prospective basis. The Company elected to early adopt this standard as of October 1, 2017. As the date of adoption of this new guidance, the guidance did not have any impact on the Company's consolidated results of operations, financial position or cash flows since the Company did not have any outstanding derivative instruments at that time.

New accounting pronouncements not yet adopted - In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (Topic 606). ASU 2014-09 outlines a single comprehensive model for companies to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. In March 2016, the FASB issued ASU 2016-08, " *Principal Versus Agent Considerations (Reporting Revenue Gross Versus Net)* ," which amends the principal-versus-agent implementation guidance and in April 2016 the FASB issued ASU 2016-10, " *Identifying Performance Obligations and Licensing* ," which amends the guidance in those areas in the new revenue recognition standard. The new revenue standard is effective for annual reporting periods (including interim reporting periods within those periods) beginning January 1, 2018. The Company does not expect that the implementation of the new standard will have a material effect on the Company's consolidated results of operations, cash flows or financial position. The new standard will however require more extensive revenue-related disclosures. The Company has identified one difference in its Retail/LTC Segment related to the accounting for its ExtraBucks Rewards customer loyalty program, which is currently accounted for under a cost deferral method. Under the new standard, this program will be accounted for under a revenue deferral method. On

January 1, 2018, the Company adopted the new revenue standard on a modified retrospective basis and recorded an after-tax transition adjustment to reduce retained earnings as of January 1, 2018 by approximately $13 million.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments – Overall* (Subtopic 825-10) *: Recognition and Measurement of financial Assets and Financial Liabilities* . This ASU requires equity investments, except those under the equity method of accounting or those that result in the consolidation of an investee, to be measured at fair value with changes in fair value recognized in net income. However, an entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or similar investment of the same issuer. This simplifies the impairment assessment of equity investments previously held at cost. Separate presentation of financial assets and liabilities by measurement category is required. The guidance is effective for fiscal years beginning after December 15, 2017 and interim periods within those years. Early adoption is permitted for fiscal years or interim periods that have not yet been issued as of the beginning of the fiscal year of adoption. Entities are required to apply the guidance retrospectively, with the exception of the amendments related to equity investments without readily determinable fair values, which must be applied on a prospective basis. The Company is evaluating the effect of adopting this guidance but does not expect the adoption to have a material impact on the Company's consolidated results of operations.

In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842). Lessees will be required to recognize a right-of-use asset and a lease liability for virtually all of their leases (other than leases that meet the definition of a short-term lease). The liability will be equal to the present value of lease payments. The asset will be based on the liability, subject to adjustment, such as for initial direct costs. For income statement purposes, a dual model was retained, requiring leases to be classified as either operating or finance leases. Operating leases will result in straight-line expense (similar to current operating leases) while finance leases will result in a front-loaded expense pattern (similar to current capital leases). Lessor accounting is similar to the current model, but updated to align with certain changes to the lessee model (e.g., certain definitions, such as initial direct costs, have been updated) and the new revenue recognition standard. The standard is effective for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted. The Company believes that the new standard will have a material impact on its consolidated balance sheet. The Company is currently evaluating the effect that implementation of this standard will have on the Company's consolidated results of operations, cash flows, financial position and related disclosures.

In August 2016, the FASB issued ASU No. 2016-15, *Classification of Certain Cash Receipts and Cash Payments* . ASU 2016-15 is intended to add or clarify guidance on the classification of certain cash receipts and payments in the statement of cash flows and to eliminate the diversity in practice related to such classifications. The guidance in ASU 2016-15 is required for annual reporting periods beginning after December 15, 2017, with early adoption permitted. The Company is evaluating the effect of adopting this guidance but does not expect the adoption will have a material impact on the Company's consolidated cash flows.

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows* , which amends ASC Topic 230. This ASU requires entities to show the changes in the total of cash, cash equivalents, restricted cash and restricted cash equivalents in the statement of cash flows. As a result, entities will no longer be required to present transfers between cash and cash equivalents and restricted cash and restricted cash equivalents in the statement of cash flows. When cash, cash equivalents, restricted cash and restricted cash equivalents are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet. Entities will also have to disclose the nature of their restricted cash and restricted cash equivalent balances. The guidance is effective for fiscal years beginning after December 15, 2017 and interim periods within those years. Early adoption is permitted. Entities are required to apply the guidance retrospectively. The Company is evaluating the effect of adopting this guidance but does not expect the adoption will have a material impact on the Company's consolidated cash flows.

2 Acquisitions

Proposed Aetna Acquisition

On December 3, 2017, the Company entered into a definitive merger agreement to acquire all of the outstanding shares of Aetna for a combination of cash and stock. Under the terms of the merger agreement, Aetna shareholders will receive $145.00 per share in cash and 0.8378 CVS Health shares for each Aetna share. The transaction values Aetna at approximately $207 per share or approximately $69 billion based on the Company's 5-day volume weighted average price ending December 1, 2017 of $74.21 per share. Including the assumption of Aetna's debt, the total value of the transaction is approximately $77 billion. The final purchase price will be determined based on the Company's stock price on the date of closing of the transaction.

The proposed acquisition remains subject to approval by CVS Health and Aetna shareholders and customary closing conditions, including the expiration of the waiting period under the federal Hart-Scott-Rodino Antitrust Improvements Act of 1976 and approvals of state departments of insurance and U.S. and international regulators.

If the transaction is not completed, the Company could be liable to Aetna for a termination fee of $2.1 billion in connection with the merger agreement, depending on the reasons leading to such termination.

During the year ended December 31, 2017, the Company recorded $34 million of transaction-related costs in operating expenses in connection with the proposed acquisition.

Wellpartner Acquisition

On November 30, 2017, the Company acquired Wellpartner, Inc. ("Wellpartner") for approximately $380 million. The purchase price is subject to a working capital adjustment. Wellpartner is a provider of specialty pharmacy services which provides products and services under the Section 340B drug discount program, which is a U.S. federal government program that requires drug manufacturers participating in the Medicaid program to provide outpatient drugs to eligible health care organizations and covered entities at significantly reduced prices. Wellpartner has two specialty pharmacies, one in Oregon, and the other, Bluegrass Pharmacy of Lexington, LLC ("Bluegrass Pharmacy"), is located in Kentucky. The fair value of the assets acquired and liabilities assumed were $532 million and $152 million, respectively, which included identifiable intangible assets of $233 million and goodwill of $182 million that were recorded in the PSS. The allocation of the purchase price is preliminary and is based on information that was available to management at the time the consolidated financial statements were prepared, accordingly, the allocation may change. The Company has classified the assets of Bluegrass Pharmacy as held for sale, and has reported Bluegrass Pharmacy as a discontinued operation. The assets held for sale and the operating results of Bluegrass Pharmacy as of and for the month ended December 31, 2017 are immaterial.

Target Pharmacy Acquisition

On December 16, 2015, the Company acquired the pharmacy and clinic businesses of Target for approximately $1.9 billion, plus contingent consideration of up to $60 million based on future prescription growth over a three year period through 2019. The Company acquired Target's 1,672 pharmacies which operate in 47 states and will operate them through a store-within-a-store format, branded as CVS Pharmacy. The Company also acquired 79 Target clinic locations which were rebranded as MinuteClinic. The Company acquired the Target pharmacy and clinic businesses primarily to expand the geographic reach of its retail pharmacy business.

The fair values of the assets acquired at the date of acquisition were approximately as follows:

In millions	
Accounts receivable	$ 2
Inventories	467
Property and equipment	9
Intangible assets	490
Goodwill	900
Total cash consideration	$ 1,868

Intangible assets acquired include customer relationships with an estimated useful life of 13 years. The goodwill represents future economic benefits expected to arise from the Company's expanded geographic presence in the retail pharmacy market, the assembled workforce acquired, expected purchasing and revenue synergies, as well as operating efficiencies and cost savings. The goodwill is deductible for income tax purposes. As of December 31, 2017 and 2016, no liability for any potential contingent consideration has been recorded based on projections for future prescription growth over the relevant period.

In connection with the closing of the transaction, the Company and Target entered into pharmacy and clinic operating and master lease agreements. See Note 7 "Leases" of the consolidated financial statements for disclosures of the Company's leasing arrangements.

During the year ended December 31, 2015, the Company incurred transaction costs of approximately $26 million associated with the acquisition that were recorded within operating expenses. The results of the Target pharmacies and clinics are included in the Company's Retail/LTC Segment beginning on December 16, 2015. Pro forma financial information for this acquisition is not presented as such results are immaterial to the Company's consolidated financial statements.

Omnicare Acquisition

On August 18, 2015, the Company acquired 100% of the outstanding common shares and voting interests of Omnicare, for $98 per share for a total of $9.6 billion and assumed long-term debt with a fair value of approximately $3.1 billion. Omnicare is a leading health care services company that specializes in the management of complex pharmaceutical care. Omnicare's LTC business is the nation's largest provider of pharmaceuticals, related pharmacy consulting and other ancillary services to chronic care facilities and other care settings. In addition, Omnicare has a specialty pharmacy business operating primarily under the name of ACS Pharmacy, and provides commercialization services under the name of RxCrossroads ®. The Company includes LTC and the commercialization services business in the Retail/LTC Segment, and includes the specialty pharmacy business in its Pharmacy Services Segment. The Company acquired Omnicare to expand its operations in dispensing prescription drugs to assisted-living and long-term care facilities, and to broaden its presence in the specialty pharmacy business as the Company seeks to serve a greater percentage of the growing senior patient population in the United States.

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of acquisition:

In Millions	
Current assets (including cash of $298)	$ 1,657
Property and equipment	313
Goodwill	9,139
Intangible assets	3,962
Other noncurrent assets	63
Current liabilities	(773)
Long-term debt	(3,110)
Deferred income tax liabilities	(1,498)
Other noncurrent liabilities	(69)
Redeemable noncontrolling interest	(39)
Total consideration	$ 9,645

The goodwill represents future economic benefits expected to arise from the Company's expanded presence in the pharmaceutical care market, the assembled workforce acquired, expected purchasing and revenue synergies, as well as operating efficiencies and cost savings. Goodwill of $8.7 billion was allocated to the Retail/LTC Segment and the remaining goodwill of $0.4 billion was allocated to the Pharmacy Services Segment. Approximately $0.4 billion of the goodwill is deductible for income tax purposes. Intangible assets acquired include customer relationships and trade names of $3.9 billion and $74 million, respectively, with estimated weighted average useful lives of 19.1 and 2.9 years, respectively, and 18.8 years in total.

During the year ended December 31, 2015, the Company incurred transaction costs of $70 million associated with the acquisition of Omnicare that were recorded within operating expenses.

The Company's consolidated results of operations for the year ended December 31, 2015, include $2.6 billion of net revenues and net income of $61 million associated with the operating results of Omnicare from August 18, 2015 to December 31, 2015. These Omnicare operating results include severance costs and accelerated stock-based compensation.

The following unaudited pro forma information presents a summary of the Company's combined results of operations for the year ended December 31, 2015 as if the Omnicare acquisition and the related financing transactions had occurred on January 1, 2015. The following pro forma financial information is not necessarily indicative of the results of operations as they would have been had the transactions been effected on the assumed date, nor is it necessarily an indication of trends in future results for a number of reasons, including, but not limited to, differences between the assumptions used to prepare the pro forma information, basic shares outstanding and dilutive equivalents, cost savings from operating efficiencies, potential synergies, and the impact of incremental costs incurred in integrating the businesses.

(In millions, except per share data)	
Total revenues	$ 156,798
Income from continuing operations	5,277
Basic earnings per share from continuing operations	4.70
Diluted earnings per share from continuing operations	4.66

Pro forma income from continuing operations for the year ended December 31, 2015, excludes $135 million related to severance costs, accelerated stock-based compensation and transaction costs incurred in connection with the Omnicare acquisition.

3 Goodwill and Other Intangibles

Goodwill and other indefinitely-lived assets are not amortized, but are subject to annual impairment reviews, or more frequent reviews if events or circumstances indicate an impairment may exist.

When evaluating goodwill for potential impairment, the Company compares the fair value of its reporting units to their respective carrying amounts. The Company estimates the fair value of its reporting units using a combination of a discounted cash flow method and a market multiple method. If the carrying amount of a reporting unit exceeds its estimated fair value, an impairment loss is recognized in an amount equal to that excess.

During 2017, the Company began pursuing various strategic alternatives for its RxC reporting unit. In connection with this effort, the Company performed an interim goodwill impairment test in the second quarter of 2017. The results of the impairment test determined that the fair value of the RxC reporting unit was lower than the carrying value, resulting in a $135 million goodwill impairment charge within operating expenses during the second quarter of 2017.

During the third quarter of 2017, the Company performed its required annual impairment tests of its reporting units and concluded there was no impairment of goodwill.

On January 2, 2018, the Company sold RxC to McKesson Corporation for $725 million. The transaction is subject to a working capital adjustment.

The TCJA enacted on December 22, 2017 reduces the U.S. federal corporate income tax rate from 35% to 21%, effective January 1, 2018 (see Note 11 “Income Taxes”). As a result, the RxC deferred income tax liabilities were reduced by $47 million and an income tax benefit of $47 million was recorded in the 2017 income statement. The reduction in the deferred income tax liabilities increased the carrying value of the RxC reporting unit by $47 million which triggered an additional goodwill impairment in the RxC reporting unit of $46 million during the fourth quarter of 2017.

The Company has cumulative goodwill impairments of $181 million as of December 31, 2017.

Below is a summary of the changes in the carrying amount of goodwill by segment for the years ended December 31, 2017 and 2016:

In millions	**Pharmacy Services**	**Retail/LTC**	**Total**
Balance, December 31, 2015	$ 21,685	$ 16,421	$ 38,106
Acquisitions	—	126	126
Foreign currency translation adjustments	—	17	17
Other [1]	(48)	48	—
Balance, December 31, 2016	21,637	16,612	38,249
Acquisitions	182	203	385
Foreign currency translation adjustments	—	(2)	(2)
Impairments	—	(181)	(181)
Balance, December 31, 2017	$ 21,819	$ 16,632	$ 38,451

(1) “Other” represents immaterial purchase accounting adjustments for acquisitions.

Indefinitely-lived intangible assets are tested for impairment by comparing the estimated fair value of the asset to its carrying value. The Company estimates the fair value of its indefinitely-lived trademark using the relief from royalty method under the income approach. If the carrying value of the asset exceeds its estimated fair value, an impairment loss is recognized and the asset is written down to its estimated fair value. During the third quarter of 2017, the Company performed its annual impairment test of the indefinitely-lived trademark and concluded there was no impairment as of the testing date.

The following table is a summary of the Company's intangible assets as of December 31:

	2017			2016		
In millions	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Trademark (indefinitely-lived)	$ 6,398	$ —	$ 6,398	$ 6,398	$ —	$ 6,398
Customer contracts and relationships and covenants not to compete	12,341	(5,536)	6,805	11,485	(4,802)	6,683
Favorable leases and other	1,190	(763)	427	1,123	(693)	430
	$ 19,929	$ (6,299)	$ 13,630	$ 19,006	$ (5,495)	$ 13,511

The Company amortizes intangible assets with finite lives over the estimated useful lives of the respective assets, which have a weighted average useful life of 15.4 years. The weighted average useful life of the Company's customer contracts and relationships and covenants not to compete is 15.3 years. The weighted average life of the Company's favorable leases and other intangible assets is 16.2 years. Amortization expense for intangible assets totaled $817 million, $ 795 million and $ 611 million in 2017, 2016 and 2015, respectively. The anticipated annual amortization expense for these intangible assets for the next five years is as follows:

In millions	
2018	$ 817
2019	771
2020	600
2021	539
2022	494

4 Share Repurchase Programs

The following share repurchase programs were authorized by the Company's Board of Directors:

In billions Authorization Date	Authorized	Remaining as of December 31, 2017
November 2, 2016 ("2016 Repurchase Program")	$ 15.0	$ 13.9
December 15, 2014 ("2014 Repurchase Program")	10.0	—
December 17, 2013 ("2013 Repurchase Program")	6.0	—

The share Repurchase Programs, each of which was effective immediately, permit the Company to effect repurchases from time to time through a combination of open market repurchases, privately negotiated transactions, accelerated share repurchase ("ASR") transactions, and/or other derivative transactions. The 2016 Repurchase Program can be modified or terminated by the Board of Directors at any time.

Pursuant to the authorization under the 2014 Repurchase Program, in August 2016, the Company entered into two fixed dollar ASRs with Barclays Bank PLC ("Barclays") for a total of $3.6 billion. Upon payment of the $3.6 billion purchase price in January 2017, the Company received a number of shares of its common stock equal to 80% of the $3.6 billion notional amount of the ASRs or approximately 36.1 million shares, which were placed into treasury stock in January 2017. The ASRs were accounted for as an initial treasury stock transaction for $2.9 billion and a forward contract for $0.7 billion. In April 2017, the Company received 9.9 million shares of common stock, representing the remaining 20% of the $3.6 billion notional amount of the ASRs, thereby concluding the ASRs. The remaining 9.9 million shares of common stock delivered to the Company by Barclays were placed into treasury stock and the forward contract was reclassified from capital surplus to treasury stock in April 2017.

Pursuant to the authorization under the 2014 Repurchase Program, in December 2015, the Company entered into a $725 million fixed dollar ASR with Barclays. Upon payment of the $725 million purchase price in December 2015, the Company received a number of shares of its common stock equal to 80% of the $725 million notional amount of the ASR or approximately 6.2 million shares. The initial 6.2 million shares of common stock delivered to the Company by Barclays were placed into treasury stock in December 2015. The ASR was accounted for as an initial treasury stock transaction of $580 million and a forward contract of $145 million. The forward contract was classified as an equity instrument and was recorded within capital surplus on the consolidated balance sheet. In January 2016, the Company received 1.4 million shares of common stock, representing the remaining 20% of the $725 million notional amount of the ASR, thereby concluding the ASR. The remaining 1.4 million shares of common stock delivered to the Company by Barclays were placed into treasury stock in January 2016 and the forward contract was reclassified from capital surplus to treasury stock.

Pursuant to the authorization under the 2013 Repurchase Programs, in January 2015, the Company entered into a $2.0 billion fixed dollar ASR agreement with J.P. Morgan Chase Bank ("JP Morgan"). Upon payment of the $2.0 billion purchase price in January 2015, the Company received a number of shares of its common stock equal to 80% of the $2.0 billion notional amount of the ASR agreement or approximately 16.8 million shares, which were placed into treasury stock in January 2015. In May 2015, the Company received approximately 3.1 million shares of common stock, representing the remaining 20% of the $2.0 billion notional amount of the ASR, thereby concluding the ASR. The remaining 3.1 million shares of common stock delivered to the Company by JP Morgan were placed into treasury stock in May 2015. The ASR was accounted for as an initial treasury stock transaction of $1.6 billion and a forward contract of $0.4 billion. The forward contract was classified as an equity instrument and was initially recorded within capital surplus on the consolidated balance sheet and was reclassified to treasury stock upon the settlement of the ASR in May 2015.

In the ASR transactions described above, the initial repurchase of the shares and delivery of the remainder of the shares to conclude the ASR, resulted in an immediate reduction of the outstanding shares used to calculate the weighted average common shares outstanding for basic and diluted earnings per share.

During the year ended December 31, 2017, the Company repurchased an aggregate of 55.4 million shares of common stock for approximately $4.4 billion under the 2014 and 2016 Repurchase Programs. As of December 31, 2017, there remained an aggregate of approximately $13.9 billion available for future repurchases under the 2016 Repurchase Program and the 2014 and 2013 Repurchase Programs were complete.

During the year ended December 31, 2016, the Company repurchased an aggregate of 47.5 million shares of common stock for approximately $4.5 billion under the 2014 Repurchase Program. During the year ended December 31, 2015, the Company repurchased an aggregate of 48.0 million shares of common stock for approximately $5.0 billion under the 2013 and 2014 Repurchase Programs.

5 Borrowings and Credit Agreements

The following table is a summary of the Company's borrowings as of December 31:

In millions	2017	2016
Short-term debt		
Commercial paper	$ 1,276	$ 1,874
Long-term debt		
1.9% senior notes due 2018	2,250	2,250
2.25% senior notes due 2018	1,250	1,250
2.25% senior notes due 2019	850	850
2.8% senior notes due 2020	2,750	2,750
2.125% senior notes due 2021	1,750	1,750
4.125% senior notes due 2021	550	550
2.75% senior notes due 2022	1,250	1,250
3.5% senior notes due 2022	1,500	1,500
4.75% senior notes due 2022	399	399
4% senior notes due 2023	1,250	1,250
3.375% senior notes due 2024	650	650
5% senior notes due 2024	299	299
3.875% senior notes due 2025	2,828	2,828
2.875% senior notes due 2026	1,750	1,750
6.25% senior notes due 2027	372	372
3.25% senior exchange debentures due 2035	1	1
4.875% senior notes due 2035	652	652
6.125% senior notes due 2039	447	447
5.75% senior notes due 2041	133	133
5.3% senior notes due 2043	750	750
5.125% senior notes due 2045	3,500	3,500
Capital lease obligations	670	648
Other	43	23
Total debt principal	27,170	27,726
Debt premiums	28	33
Debt discounts and deferred financing costs	(196)	(228)
	27,002	27,531
Less:		
Short-term debt (commercial paper)	(1,276)	(1,874)
Current portion of long-term debt	(3,545)	(42)
Long-term debt	$ 22,181	$ 25,615

The Company had approximately $1.3 billion of commercial paper outstanding at a weighted average interest rate of 2.0% as of December 31, 2017. The Company had approximately $1.9 billion of commercial paper outstanding at a weighted average interest rate of 1.22% as of December 31, 2016. In connection with its commercial paper program, the Company maintains a $1.0 billion 364-day unsecured back-up credit facility, which expires on May 17, 2018, a $1.25 billion, five-year unsecured back-up credit facility, which expires on July 24, 2019, a $1.25 billion, five-year unsecured back-up credit facility, which expires on July 1, 2020, and a $1.0 billion, five-year unsecured back-up credit facility, which expires on May 18, 2022. The credit facilities allow for borrowings at various rates that are dependent, in part, on the Company's public debt ratings and require the Company to pay a weighted average quarterly facility fee of approximately 0.02%, regardless of usage. As of December 31, 2017 and 2016, there were no borrowings outstanding under the back-up credit facilities.

On December 3, 2017, in connection with the proposed acquisition of Aetna, the Company entered into a $49.0 billion unsecured bridge loan facility. The Company paid approximately $221 million in fees upon entering into the agreement. The fees were capitalized in other current assets and will be amortized as interest expense over the period the bridge facility is outstanding. The bridge loan facility was reduced to $44.0 billion on December 15, 2017 upon the Company entering into a $5.0 billion term loan agreement. The Company recorded $56 million of amortization of the bridge loan facility fees during the three months and year ended December 31, 2017, which was recorded in interest expense. On December 15, 2017, in connection with the proposed acquisition of Aetna, the Company entered into a $5.0 billion unsecured term loan agreement. The term loan facility under the term loan agreement consists of a $3.0 billion three-year tranche and a $2.0 billion five-year tranche. The term loan facility allows for borrowings at various rates that are dependent, in part, on the Company's debt ratings and require the Company to pay a weighted average quarterly commitment fee, regardless of usage.

On January 3, 2017, the Company entered into a $2.5 billion revolving credit facility. The credit facility allows for borrowings at various rates that are dependent, in part, on the Company's debt ratings and require the Company to pay a weighted average quarterly facility fee of approximately 0.03%, regardless of usage. The Company terminated the credit facility in May 2017.

On May 16, 2016, the Company issued $1.75 billion aggregate principal amount of 2.125% unsecured senior notes due June 1, 2021 and $1.75 billion aggregate principal amount of 2.875% unsecured senior notes due June 1, 2026 (collectively, the "2016 Notes") for total proceeds of approximately $3.5 billion, net of discounts and underwriting fees. The 2016 Notes pay interest semi-annually and may be redeemed, in whole at any time, or in part from time to time, at the Company's option at a defined redemption price plus accrued and unpaid interest to the redemption date. The net proceeds of the 2016 Notes were used for general corporate purposes and to repay certain corporate debt.

On May 16, 2016, the Company announced tender offers for (1) any and all of its 5.75% Senior Notes due 2017, its 6.60% Senior Notes due 2019 and its 4.75% Senior Notes due 2020 (collectively, the "Any and All Notes") and (2) up to $1.5 billion aggregate principal amount of its 6.25% Senior Notes due 2027, its 6.125% Senior Notes due 2039, its 5.75% Senior Notes due 2041, the 5.00% Senior Notes due 2024 issued by its wholly-owned subsidiary, Omnicare, Inc. ("Omnicare"), the 4.75% Senior Notes due 2022 issued by Omnicare, its 4.875% Senior Notes due 2035 and its 3.875% Senior Notes due 2025 (collectively, the "Maximum Tender Offer Notes" and together with the Any and All Notes, the "Notes"). On May 31, 2016, the Company increased the aggregate principal amount of the tender offers for the Maximum Tender Offer Notes to $2.25 billion. The Company purchased approximately $835 million aggregate principal amount of the Any and All Notes and $2.25 billion aggregate principal amount of the Maximum Tender Offer Notes pursuant to the tender offers, which expired on June 13, 2016. The Company paid a premium of $486 million in excess of the debt principal in connection with the purchase of the Notes, wrote off $50 million of unamortized deferred financing costs and incurred $6 million in fees, for a total loss on the early extinguishment of debt of $542 million which was recorded in income from continuing operations in the consolidated statement of income for the year ended December 31, 2016.

On June 27, 2016, the Company notified the holders of the remaining Any and All Notes that the Company was exercising its option to redeem the outstanding Any and All Notes pursuant to the terms of the Any and All Notes and the Indenture dated as of August 15, 2006, between the Company and The Bank of New York Mellon Trust Company, N.A. Approximately $1.1 billion aggregate principal amount of Any and All Notes was redeemed on July 27, 2016. The Company paid a premium of $97 million in excess of the debt principal and wrote off $4 million of unamortized deferred financing costs, for a total loss on early extinguishment of debt of $101 million during the year ended December 31, 2016.

The Company recorded a total loss on the early extinguishment of debt of $643 million which was recorded in the income from continuing operations in the consolidated statement of income for the year ended December 31, 2016.

On May 20, 2015, in connection with the acquisition of Omnicare, the Company entered into a $13 billion unsecured bridge loan facility. The Company paid approximately $52 million in fees in connection with the facility. The fees were capitalized and amortized as interest expense over the period the bridge facility was outstanding. The bridge loan facility

expired on July 20, 2015 upon the Company's issuance of unsecured senior notes with an aggregate principal of $15 billion as discussed below. The bridge loan facility fees became fully amortized in July 2015.

On July 20, 2015, the Company issued an aggregate of $2.25 billion of 1.9% unsecured senior notes due 2018 ("2018 Notes"), an aggregate of $2.75 billion of 2.8% unsecured senior notes due 2020 ("2020 Notes"), an aggregate of $1.5 billion of 3.5% unsecured senior notes due 2022 ("2022 Notes"), an aggregate of $3 billion of 3.875% unsecured senior notes due 2025 ("2025 Notes"), an aggregate of $2 billion of 4.875% unsecured senior notes due 2035 ("2035 Notes"), and an aggregate of $3.5 billion of 5.125% unsecured senior notes due 2045 ("2045 Notes" and, together with the 2018 Notes, 2020 Notes, 2022 Notes, 2025 Notes and 2035 Notes, the "Notes") for total proceeds of approximately $14.8 billion, net of discounts and underwriting fees. The Notes pay interest semi-annually and contain redemption terms which allow or require the Company to redeem the Notes at a defined redemption price plus accrued and unpaid interest at the redemption date. The net proceeds of the Notes were used to fund the Omnicare acquisition and the acquisition of the pharmacies and clinics of Target. The remaining proceeds were used for general corporate purposes.

Upon the closing of the Omnicare acquisition in August 2015, the Company assumed the long-term debt of Omnicare that had a fair value of approximately $3.1 billion, $2.0 billion of which was previously convertible into Omnicare shares that holders were able to redeem subsequent to the acquisition. During the period from August 18, 2015 to December 31, 2015, all but $5 million of the $2.0 billion of previously convertible debt was redeemed and repaid and approximately $0.4 billion in Omnicare term debt assumed was repaid for total repayments of Omnicare debt of approximately $2.4 billion in 2015.

The remaining principal of the Omnicare debt assumed was comprised of senior unsecured notes with an aggregate principal amount of $700 million ($400 million of 4.75% senior notes due 2022 and $300 million of 5% senior notes due 2024). In September 2015, the Company commenced exchange offers for the 4.75% senior notes due 2022 and the 5% senior notes due 2024 to exchange all validly tendered and accepted notes issued by Omnicare for notes to be issued by the Company. This offer expired on October 20, 2015 and the aggregate principal amounts of $388 million of the 4.75% senior notes due 2022 and $296 million of the 5% senior notes due 2024 were validly tendered and exchanged for notes issued by the Company. The Company recorded this exchange transaction as a modification of the original debt instruments. Consequently, no gain or loss on extinguishment was recognized in the Company's consolidated income statement as a result of this exchange transaction and the issuance costs of the new debt were expensed as incurred.

The back-up credit facilities and unsecured senior notes contain customary restrictive financial and operating covenants. The covenants do not materially affect the Company's financial or operating flexibility. As of December 31, 2017, the Company is in compliance with all debt covenants.

The following is a summary of the Company's required principal debt repayments due during each of the next five years and thereafter, as of December 31, 2017:

In millions	
2018	$ 4,821
2019	873
2020	2,775
2021	2,327
2022	3,178
Thereafter	13,196
Total	$ 27,170

6 Store Closures

In December 2016, the Company announced an enterprise streamlining initiative designed to reduce costs and enhance operating efficiencies to allow the Company to be more competitive in the current health care environment. In connection with the enterprise streamlining initiative, the Company announced its intention to rationalize the number of retail stores by closing approximately 70 underperforming stores during the year ending December 31, 2017. During the

year ended December 31, 2017, the Company closed 71 retail stores and recorded charges of $215 million within operating expenses in the Retail/LTC Segment. The charges are primarily comprised of provisions for the present value of noncancelable lease obligations. The noncancelable lease obligations associated with stores closed during the year ended December 31, 2017 extend through the year 2039.

7 Leases

The Company leases most of its retail and mail order locations, 13 of its distribution centers and certain corporate offices under noncancelable operating leases, typically with initial terms of 15 to 25 years and with options that permit renewals for additional periods. The Company also leases certain equipment and other assets under noncancelable operating leases, typically with initial terms of 3 to 10 years. In December 2015, in connection with the acquisition of the pharmacy and clinic businesses of Target, the Company entered into lease agreements with Target for the pharmacy and clinic space within Target stores. Given that the noncancelable contractual term of the pharmacy lease arrangement exceeds the remaining estimated economic life of the buildings being leased, the Company concluded for accounting purposes that the lease term was the remaining economic life of the buildings. Consequently, most of the individual pharmacy leases are capital leases. Approximately $0.3 billion of capital lease obligations were recorded in connection with this transaction.

Minimum rent on operating leases is expensed on a straight-line basis over the term of the lease. In addition to minimum rental payments, certain leases require additional payments based on sales volume, as well as reimbursement for real estate taxes, common area maintenance and insurance, which are expensed when incurred.

The following table is a summary of the Company's net rental expense for operating leases for the years ended December 31:

In millions	**2017**	**2016**	**2015**
Minimum rentals	$ 2,455	$ 2,418	$ 2,317
Contingent rentals	29	35	34
	2,484	2,453	2,351
Less: sublease income	(24)	(24)	(22)
	$ 2,460	$ 2,429	$ 2,329

The following table is a summary of the future minimum lease payments under capital and operating leases as of December 31, 2017:

In millions	Capital Leases	Operating Leases [1]
2018	$ 74	$ 2,493
2019	74	2,361
2020	74	2,201
2021	73	2,072
2022	73	1,934
Thereafter	974	16,090
Total future lease payments [2]	1,342	$ 27,151
Less: imputed interest	(672)	
Present value of capital lease obligations	$ 670	

(1) Future operating lease payments have not been reduced by minimum sublease rentals of $171 million due in the future under noncancelable subleases.
(2) The Company leases pharmacy and clinic space from Target. Amounts related to such capital and operating leases are reflected above. Amounts due in excess of the remaining estimated economic life of the buildings of approximately $1.9 billion are not reflected herein since the estimated economic life of the buildings is shorter than the contractual term of the lease arrangement.

The Company finances a portion of its store development program through sale-leaseback transactions. The properties are generally sold at net book value, which generally approximates fair value, and the resulting leases generally qualify and are accounted for as operating leases. The operating leases that resulted from these transactions are included in the above table. The Company does not have any retained or contingent interests in the stores and does not provide any guarantees, other than a guarantee of lease payments, in connection with the sale-leaseback transactions. Proceeds from sale-leaseback transactions totaled $265 million in 2017, $230 million in 2016 and $411 million in 2015.

8 Medicare Part D

The Company offers Medicare Part D benefits through SilverScript, which has contracted with CMS to be a PDP and, pursuant to the Medicare Prescription Drug, Improvement and Modernization Act of 2003, must be a risk-bearing entity regulated under state insurance laws or similar statutes.

SilverScript is a licensed domestic insurance company under the applicable laws and regulations. Pursuant to these laws and regulations, SilverScript must file quarterly and annual reports with the National Association of Insurance Commissioners ("NAIC") and certain state regulators, must maintain certain minimum amounts of capital and surplus under a formula established by the NAIC and must, in certain circumstances, request and receive the approval of certain state regulators before making dividend payments or other capital distributions to the Company. The Company does not believe these limitations on dividends and distributions materially impact its financial position.

The Company has recorded estimates of various assets and liabilities arising from its participation in the Medicare Part D program based on information in its claims management and enrollment systems. Significant estimates arising from its participation in this program include: (i) estimates of low-income cost subsidy, reinsurance amounts, and coverage gap discount amounts ultimately payable to or receivable from CMS based on a detailed claims reconciliation that will occur in the following year; (ii) an estimate of amounts receivable from or payable to CMS under a risk-sharing feature of the Medicare Part D program design, referred to as the risk corridor and (iii) estimates for claims that have been reported and are in the process of being paid or contested and for our estimate of claims that have been incurred but have not yet been reported.

9 Pension Plans and Other Postretirement Benefits

Defined Contribution Plans

The Company sponsors several voluntary 401(k) savings plans that cover all employees who meet plan eligibility requirements. The Company makes matching contributions consistent with the provisions of the plans.

At the participant's option, account balances, including the Company's matching contribution, can be transferred without restriction among various investment options, including the Company's common stock fund under one of the defined contribution plans. The Company also maintains a nonqualified, unfunded deferred compensation plan for certain key employees. This plan provides participants the opportunity to defer portions of their eligible compensation and receive matching contributions equivalent to what they could have received under the CVS Health 401(k) Plan absent certain restrictions and limitations under the Internal Revenue Code. The Company's contributions under the above defined contribution plans were $314 million, $295 million and $251 million in 2017, 2016 and 2015, respectively.

Defined Benefit Pension Plans

As of December 31, 2016 and 2015, the Company sponsored seven defined benefit pension plans, all of which are closed to new participants. Two of the plans are tax-qualified plans that are funded based on actuarial calculations and applicable federal laws and regulations. The other five plans are unfunded nonqualified supplemental retirement plans. In 2015, the Company terminated its largest tax-qualified plan and in 2017, the Company terminated the other tax-qualified plan.

During the year ended December 31, 2017, the Company settled the pension obligations of its two tax-qualified plans by irrevocably transferring pension liabilities to an insurance company through the purchase of group annuity contracts and through lump sum distributions. These purchases, funded with pension plan assets, resulted in pre-tax settlement losses of $187 million in the year ended December 31, 2017, related to the recognition of accumulated deferred actuarial losses. The settlement losses are included in other expense in the consolidated statement of income.

The following tables outline the change in benefit obligations and plan assets over the comparable periods:

In millions	**2017**	**2016**
Change in benefit obligation:		
Benefit obligation at beginning of year	$ 844	$ 844
Interest cost	20	27
Actuarial loss (gain)	(31)	13
Benefit payments	(35)	(37)
Settlements	(667)	(3)
Benefit obligation at end of year	$ 131	$ 844

In millions	**2017**	**2016**
Change in plan assets:		
Fair value of plan assets at the beginning of the year	$ 624	$ 613
Actual return on plan assets	32	26
Employer contributions	46	25
Benefit payments	(35)	(37)
Settlements	(667)	(3)
Fair value of plan assets at the end of the year	—	624
Funded status	$ (131)	$ (220)

The components of net periodic benefit costs for the years ended December 31 are shown below:

In millions	2017	2016	2015
Components of net periodic benefit cost:			
Interest cost	$ 20	$ 27	$ 31
Expected return on plan assets	(20)	(32)	(33)
Amortization of net loss	21	32	21
Settlement losses	187	—	—
Net periodic pension cost	$ 208	$ 27	$ 19

Pension Plan Assumptions

The Company uses a series of actuarial assumptions to determine the benefit obligations and the net benefit costs. The discount rate is determined by examining the current yields observed on the measurement date of fixed-interest, high quality investments expected to be available during the period to maturity of the related benefits on a plan by plan basis. In 2016, the discount rate for the qualified plan that had been terminated was determined by examining the current assumed lump sum and annuity purchase rates. The expected long-term rate of return on plan assets is determined by using the plan's target allocation and historical returns for each asset class on a plan by plan basis. Certain of the Company's pension plans use assumptions on expected compensation increases of plan participants. These increases are determined by an actuarial analysis of the plan participants, their expected compensation increases, and the duration of their earnings period until retirement. Each of these assumptions is reviewed as plan characteristics change and on an annual basis with input from senior pension and financial executives and the Company's external actuarial consultants.

The discount rate for determining plan benefit obligations was 3.5% in 2017 and 4.0% in 2016 for all plans, except the terminated qualified plan. The discount rate for the terminated qualified plan was 3.09% in 2016. The expected long-term rate of return for the plans ranged from 4.0% to 5.5% in 2017 and 2016. The rate of compensation increases for certain of the plans with active participants ranged from 4.0% to 6.0% in 2017 and 2016.

Return on Plan Assets

The Company's investment strategy for its two qualified pension plans was liability management driven. The asset allocation targets were to hold fixed income investments based upon this strategy. The following tables show the fair value allocation of plan assets by asset category as of December 31, 2016.

	Fair value of plan assets at December 31, 2016			
	Level 1	Level 2	Level 3	Total
Cash and money market funds	$ 8	$ —	$ —	$ 8
Fixed income funds	3	580	—	583
Equity mutual funds	33	—	—	33
Total assets at fair value	$ 44	$ 580	$ —	$ 624

As of December 31, 2016, the Company's qualified defined benefit pension plan assets consisted of 5% equity, 94% fixed income and 1% money market securities of which 7% were classified as Level 1 and 93% as Level 2 in the fair value hierarchy. The Company had no investments in Level 3 alternative investments during the year ended December 31, 2016.

As of December 31, 2017, the assets in the Company's qualified defined benefit pension plans had been fully liquidated through the purchase of group annuity contracts and through lump sum distributions.

Cash Flows

The Company contributed $46 million, $25 million and $22 million to the pension plans during 2017, 2016 and 2015, respectively. The Company plans to make approximately $21 million in contributions to the pension plans during 2018. These contributions include contributions made to certain nonqualified benefit plans for which there is no funding requirement. The Company estimates the following future benefit payments which are calculated using the same actuarial assumptions used to measure the benefit obligation as of December 31, 2017:

In millions	
2018	$ 21
2019	14
2020	12
2021	23
2022	8
Thereafter	31

Multiemployer Pension Plans

The Company also contributes to a number of multiemployer pension plans under the terms of collective-bargaining agreements that cover its union-represented employees. The risks of participating in these multiemployer plans are different from single-employer pension plans in the following aspects: (i) assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers, (ii) if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers, and (iii) if the Company chooses to stop participating in some of its multiemployer plans, the Company may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

None of the multiemployer pension plans in which the Company participates are individually significant to the Company. Total Company contributions to multiemployer pension plans were $17 million in 2017, $15 million in 2016 and $14 million in 2015.

Other Postretirement Benefits

The Company provides postretirement health care and life insurance benefits to certain retirees who meet eligibility requirements. The Company's funding policy is generally to pay covered expenses as they are incurred. For retiree medical plan accounting, the Company reviews external data and its own historical trends for health care costs to determine the health care cost trend rates. As of December 31, 2017 and 2016, the Company's other postretirement benefits had an accumulated postretirement benefit obligation of $25 million and $24 million, respectively. Net periodic benefit costs related to these other postretirement benefits were $1 million in both 2017 and 2016, and $2 million in 2015.

Pursuant to various collective bargaining agreements, the Company also contributes to multiemployer health and welfare plans that cover certain union-represented employees. The plans provide postretirement health care and life insurance benefits to certain employees who meet eligibility requirements. Total Company contributions to multiemployer health and welfare plans were $58 million, $52 million and $60 million in 2017, 2016 and 2015, respectively.

10 Stock Incentive Plans

Stock-based compensation is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period of the stock award (generally three to five years) using the straight-line method. The following table is a summary of stock-based compensation for each of the respective periods:

In millions	2017	2016	2015
Stock options [1]	$ 65	$ 79	$ 90
Restricted stock awards [2]	169	143	140
Total stock-based compensation	$ 234	$ 222	$ 230

(1) Includes the Employee Stock Purchase Plan (the "ESPP")
(2) Stock-based compensation for the year ended December 31, 2015 includes $38 million associated with accelerated vesting of restricted stock replacement awards issued to Omnicare executives who were terminated subsequent to the acquisition.

The ESPP provides for the purchase of up to 30 million shares of common stock. Under the ESPP, beginning in 2016, eligible employees could purchase common stock at the end of each six month offering period at a purchase price equal to 90% of the lower of the fair market value on the first day or the last day of the offering period. Prior to 2016, the purchase price was equal to 85% of the lower of the fair market value on the first day or the last day of the offering period. During 2017, approximately one million shares of common stock were purchased under the provisions of the ESPP at an average price of $71.66 per share. As of December 31, 2017, approximately 11 million shares of common stock were available for issuance under the ESPP.

The fair value of stock-based compensation associated with the ESPP is estimated on the date of grant (the first day of the six month offering period) using the Black-Scholes option pricing model.

The following table is a summary of the assumptions used to value the ESPP awards for each of the respective periods:

	2017	2016	2015
Dividend yield [1]	1.24 %	0.88 %	0.71 %
Expected volatility [2]	22.70 %	20.64 %	13.92 %
Risk-free interest rate [3]	0.86 %	0.45 %	0.11 %
Expected life *(in years)* [4]	0.5	0.5	0.5
Weighted-average grant date fair value	$ 13.01	$ 14.98	$ 18.72

(1) The dividend yield is calculated based on semi-annual dividends paid and the fair market value of the Company's stock at the grant date.
(2) The expected volatility is based on the historical volatility of the Company's daily stock market prices over the previous six month period.
(3) The risk-free interest rate is based on the Treasury constant maturity interest rate whose term is consistent with the expected term of ESPP options (i.e., six months).
(4) The expected life is based on the semi-annual purchase period.

The terms of the Company's Incentive Compensation Plan ("ICP") provide for grants of annual incentive and long-term performance awards to executive officers and other officers and employees of the Company or any subsidiary of the Company. Payment of such annual incentive and long-term performance awards will be in cash, stock, other awards or other property, at the discretion of the Management Planning and Development Committee of the Company's Board of Directors. The ICP allows for a maximum of 74 million shares to be reserved and available for grants. The ICP is the only compensation plan under which the Company grants stock options, restricted stock and other stock-based awards to its employees, with the exception of the Company's ESPP. As of December 31, 2017, there were approximately 32 million shares available for future grants under the ICP.

The Company's restricted awards are considered nonvested share awards and require no payment from the employee. Compensation cost is recorded based on the market price of the Company's common stock on the grant date and is recognized on a straight-line basis over the requisite service period. As of December 31, 2017, there was $350 million of total unrecognized compensation cost related to the restricted stock units that are expected to vest. These costs are

expected to be recognized over a weighted-average period of 2.25 years. The total fair value of restricted shares vested during 2017, 2016 and 2015 was $175 million, $218 million and $164 million, respectively.

The following table is a summary of the restricted stock unit and restricted share award activity for the year ended December 31, 2017.

Units in thousands	Units	Weighted Average Grant Date Fair Value
Nonvested at beginning of year	4,876	$ 55.56
Granted	2,873	$ 78.35
Vested	(2,340)	$ 78.92
Forfeited	(395)	$ 89.21
Nonvested at end of year	5,014	$ 86.92

All grants under the ICP are awarded at fair value on the date of grant. The fair value of stock options is estimated using the Black-Scholes option pricing model and stock-based compensation is recognized on a straight-line basis over the requisite service period. Stock options granted generally become exercisable over a four-year period from the grant date. Stock options generally expire seven years after the grant date.

Cash received from stock options exercised, which includes the ESPP, totaled $329 million, $296 million and $362 million during 2017, 2016 and 2015, respectively. Payments for taxes for net share settlement of equity awards totaled $71 million in 2017, $72 million in 2016 and $63 million in 2015, respectively. The total intrinsic value of stock options exercised was $176 million, $244 million and $394 million in 2017, 2016 and 2015, respectively. The total fair value of stock options vested during 2017, 2016 and 2015 was $341 million, $298 million and $334 million, respectively.

The fair value of each stock option is estimated using the Black-Scholes option pricing model based on the following assumptions at the time of grant:

	2017	2016	2015
Dividend yield [1]	2.56 %	1.62 %	1.37 %
Expected volatility [2]	18.39 %	17.22 %	18.07 %
Risk-free interest rate [3]	1.77 %	1.24 %	1.24 %
Expected life *(in years)* [4]	4.1	4.2	4.2
Weighted-average grant date fair value	$ 9.43	$ 13.00	$ 14.01

(1) The dividend yield is based on annual dividends paid and the fair market value of the Company's stock at the grant date.
(2) The expected volatility is estimated using the Company's historical volatility over a period equal to the expected life of each option grant after adjustments for infrequent events such as stock splits.
(3) The risk-free interest rate is selected based on yields from U.S. Treasury zero-coupon issues with a remaining term equal to the expected term of the options being valued.
(4) The expected life represents the number of years the options are expected to be outstanding from grant date based on historical option holder exercise experience.

As of December 31, 2017, unrecognized compensation expense related to unvested options totaled $57 million, which the Company expects to be recognized over a weighted-average period of 1.76 years. After considering anticipated forfeitures, the Company expects approximately 9 million of the unvested stock options to vest over the requisite service period.

The following table is a summary of the Company's stock option activity for the year ended December 31, 2017:

Shares in thousands	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2016	23,275	$ 68.60		
Granted	3,513	$ 78.05		
Exercised	(4,814)	$ 43.07		
Forfeited	(889)	$ 94.25		
Expired	(555)	$ 60.00		
Outstanding at December 31, 2017	20,530	$ 75.32	3.62	$ 180,318,054
Exercisable at December 31, 2017	11,365	$ 61.37	2.30	$ 179,628,690
Vested at December 31, 2017 and expected to vest in the future	20,114	$ 75.00	3.57	$ 180,299,134

11 Income Taxes

The income tax provision for continuing operations consisted of the following for the years ended December 31:

In millions	2017	2016	2015
Current:			
Federal	$ 2,594	$ 2,803	$ 3,065
State	464	511	555
	3,058	3,314	3,620
Deferred:			
Federal	(1,435)	5	(180)
State	14	(2)	(54)
	(1,421)	3	(234)
Total	$ 1,637	$ 3,317	$ 3,386

On December 22, 2017, the President signed into law the Tax Cuts and Jobs Act (the "TCJA"). Among numerous changes to existing tax laws, the TCJA permanently reduces the federal corporate income tax rate from 35% to 21% effective on January 1, 2018. The effects on deferred tax balances of changes in tax rates are required to be taken into consideration in the period in which the changes are enacted, regardless of when they are effective. As the result of the reduction of the corporate income tax rate under the TCJA, the Company estimated the revaluation of its net deferred tax liabilities and recorded a provisional income tax benefit of approximately $1.5 billion for year ended December 31, 2017. The Company has not completed all of its processes to determine the TCJA's final impact. The final impact may differ from this provisional amount due to, among other things, changes in interpretations and assumptions the Company has made thus far and the issuance of additional regulatory or other guidance. The accounting is expected to be completed by the time the 2017 federal corporate income tax return is filed in 2018.

The following table is a reconciliation of the statutory income tax rate to the Company's effective income tax rate for continuing operations for the years ended December 31:

	2017	2016	2015
Statutory income tax rate	35.0 %	35.0 %	35.0 %
State income taxes, net of federal tax benefit	4.1	4.1	4.0
Provisional effect of the Tax Cuts and Jobs Act	(18.3)	—	—
Other	(1.0)	(0.7)	0.3
Effective income tax rate	19.8 %	38.4 %	39.3 %

The Company has $3.0 billion and $4.2 billion of net deferred income tax liabilities as of December 31, 2017 and 2016, respectively. The following table is a summary of the components of the Company's deferred income tax assets and liabilities as of December 31:

In millions	**2017**	**2016**
Deferred income tax assets:		
Lease and rents	$ 291	$ 375
Inventory	31	57
Employee benefits	246	400
Allowance for doubtful accounts	187	301
Retirement benefits	40	65
Net operating loss and capital loss carryforwards	101	125
Deferred income	93	144
Other	18	336
Valuation allowance	(77)	(135)
Total deferred income tax assets	930	1,668
Deferred income tax liabilities:		
Depreciation and amortization	(3,926)	(5,882)
Total deferred income tax liabilities	(3,926)	(5,882)
Net deferred income tax liabilities	$ (2,996)	$ (4,214)

The Company assesses positive and negative evidence to determine whether it is more likely than not some portion of a deferred tax asset would not be realized. When it would not, a valuation allowance is established for such portion of a deferred tax asset.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

In millions	**2017**	**2016**	**2015**
Beginning balance	$ 307	$ 338	$ 188
Additions based on tax positions related to the current year	62	68	57
Additions based on tax positions related to prior years	32	70	122
Reductions for tax positions of prior years	(28)	(100)	(11)
Expiration of statutes of limitation	(10)	(22)	(13)
Settlements	(19)	(47)	(5)
Ending balance	$ 344	$ 307	$ 338

The Company and most of its subsidiaries are subject to U.S. federal income tax as well as income tax of numerous state and local jurisdictions. The Company is a participant in the Compliance Assurance Process ("CAP"), which is a program made available by the Internal Revenue Service ("IRS") to certain qualifying large taxpayers, under which participants work collaboratively with the IRS to identify and resolve potential tax issues through open, cooperative and transparent interaction prior to the annual filing of their federal income tax return. The IRS is currently examining the Company's 2016 and 2017 consolidated U.S. federal income tax returns.

The Company and its subsidiaries are also currently under income tax examinations by a number of state and local tax authorities. As of December 31, 2017, no examination has resulted in any proposed adjustments that would result in a material change to the Company's results of operations, financial condition or liquidity.

Substantially all material state and local income tax matters have been concluded for fiscal years through 2011. Certain state exams are expected to/likely to be concluded and certain state statutes will lapse in 2018, but the change in the balance of our uncertain tax positions will be immaterial. In addition, it is reasonably possible that the Company's unrecognized tax benefits could change within the next twelve months due to the anticipated conclusion of various

examinations with the IRS for various years. An estimate of the range of the possible change cannot be made at this time.

The Company records interest expense related to unrecognized tax benefits and penalties in income tax expense. The Company accrued interest expense of approximately $11 million in 2017, $10 million in 2016 and $5 million in 2015. The Company had approximately $34 million and $30 million accrued for interest and penalties as of December 31, 2017 and 2016, respectively.

There are no material uncertain tax positions as of December 31, 2017 the ultimate deductibility of which is highly certain but for which there is uncertainty about the timing.

As of December 31, 2017, the total amount of unrecognized tax benefits that, if recognized, would affect the effective income tax rate is approximately $317 million, after considering the federal benefit of state income taxes.

12 Commitments and Contingencies

Lease Guarantees

Between 1995 and 1997, the Company sold or spun off a number of subsidiaries, including Bob's Stores, Linens 'n Things, and Marshalls. In many cases, when a former subsidiary leased a store, the Company provided a guarantee of the store's lease obligations. When the subsidiaries were disposed of and accounted for as discontinued operations, the Company's guarantees remained in place, although each initial purchaser has agreed to indemnify the Company for any lease obligations the Company was required to satisfy. If any of the purchasers or any of the former subsidiaries were to become insolvent and failed to make the required payments under a store lease, the Company could be required to satisfy these obligations. As of December 31, 2017, the Company guaranteed approximately 85 such store leases (excluding the lease guarantees related to Linens 'n Things, which have been recorded as a liability on the consolidated balance sheet), with the maximum remaining lease term extending through 2029.

Legal Matters

The Company is a party to legal proceedings, investigations and claims in the ordinary course of its business, including the matters described below. The Company records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonably estimated. The Company evaluates, on a quarterly basis, developments in legal matters that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. If a loss contingency is not both probable and estimable, the Company does not establish an accrued liability. None of the Company's accruals for outstanding legal matters are material individually or in the aggregate to the Company's financial position.

Except as otherwise noted, the Company cannot predict with certainty the timing or outcome of the legal matters described below, and is unable to reasonably estimate a possible loss or range of possible loss in excess of amounts already accrued for these matters.

- *Indiana State District Council of Laborers and HOD Carriers Pension and Welfare Fund v. Omnicare, Inc.,* et al. (U.S. District Court for the Eastern District of Kentucky). In February 2006, two substantially similar putative class action lawsuits were filed and subsequently consolidated. The consolidated complaint was filed against Omnicare, three of its officers and two of its directors and purported to be brought on behalf of all open-market purchasers of Omnicare common stock from August 3, 2005 through July 27, 2006, as well as all purchasers who bought shares of Omnicare common stock in Omnicare's public offering in December 2005. The complaint alleged violations of the Securities Exchange Act of 1934 and Section 11 of the Securities Act of 1933 and sought, among other things, compensatory damages and injunctive relief. After dismissals and appeals to the United States Court of Appeals for the Sixth Circuit, the United States Supreme Court remanded the case to the district court. In October 2016, Omnicare filed an answer to plaintiffs' third amended complaint, and

discovery commenced. In August 2017, the plaintiffs moved for class certification, which Omnicare has opposed.

- *FTC and Multi-State Investigation.* In March 2010, the Company learned that various State Attorneys General offices and certain other government agencies were conducting a multi-state investigation of certain of the Company's business practices similar to those being investigated at that time by the U.S. Federal Trade Commission ("FTC"). Twenty-eight states, the District of Columbia and the County of Los Angeles are known to be participating in this investigation. The prior FTC investigation, which commenced in August 2009, was officially concluded in May 2012 when the consent order entered into between the FTC and the Company became final. The Company has cooperated with the multi-state investigation.

- *United States* ex rel. *Jack Chin v. Walgreen Company,* et al. (U.S. District Court for the Central District of California). In March 2010, the Company received a subpoena from the U.S. Department of Health and Human Services, Office of the Inspector General requesting information about programs under which the Company has offered customers remuneration conditioned upon the transfer of prescriptions for drugs or medications to the Company's pharmacies in the form of gift cards, cash, non-prescription merchandise or discounts or coupons for non-prescription merchandise. In October 2016, the U.S. District Court for the Central District of California unsealed a *qui tam* complaint, filed in April 2009 against CVS Pharmacy and other retail pharmacies, alleging that the Company violated the federal False Claims Act, and the False Claims Acts of several states, by offering such programs. The complaint was served on the Company in January 2017. In December 2017, the same court unsealed a second *qui tam* complaint filed by the same relator in September 2017. The complaint is based on the same factual allegations but asserts a legal theory the Court did not permit him to add to the original case. The federal government has declined intervention in both cases. The Company is defending both lawsuits.

- *United States* ex rel. *Anthony R. Spay v. CVS Caremark Corporation,* et al. (U.S. District Court for the Eastern District of Pennsylvania). In January 2012, the court unsealed a first amended *qui tam* complaint filed in August 2011 by an individual relator, Anthony Spay, who is described in the complaint as having once been employed by a firm providing pharmacy prescription benefit audit and recovery services. The complaint seeks monetary damages and alleges that CVS Caremark's processing of Medicare claims on behalf of one of its clients violated the federal False Claims Act. The United States declined to intervene in the lawsuit. In September 2015, the Court granted CVS Caremark's motion for summary judgment in its entirety, and entered judgment in favor of CVS Caremark and against Spay. Spay appealed. In December 2017, the United States Court of Appeals for the Third Circuit affirmed the court's judgment in favor of CVS Caremark.

- *State of Texas* ex rel. *Myron Winkelman and Stephani Martinson,* et al. *v. CVS Health Corporation,* (Travis County Texas District Court). In February 2012, the Attorney General of the State of Texas issued Civil Investigative Demands and has issued a series of subsequent requests for documents and information in connection with its investigation concerning the CVS Health Savings Pass program and other pricing practices with respect to claims for reimbursement from the Texas Medicaid program. In January 2017, the court unsealed a first amended petition. The amended petition alleges the Company violated the Texas Medicaid Fraud Prevention Act by submitting false claims for reimbursement to Texas Medicaid by, among other things, failing to use the price available to members of the CVS Health Savings Pass program as the usual and customary price. The amended petition was unsealed following the Company's filing of *CVS Pharmacy, Inc. v. Charles Smith,* et al. (Travis County District Court), a declaratory judgment action against the State of Texas in December 2016 seeking a declaration that the prices charged to members of the CVS Health Savings Pass program do not constitute usual and customary prices under the Medicaid regulation. The State of Texas is also pursuing temporary injunctive relief.

- *Subpoena Concerning PBM Administrative Fees.* In March 2014, the Company received a subpoena from the United States Attorney's Office for the District of Rhode Island, requesting documents and information concerning bona fide service fees and rebates received from pharmaceutical manufacturers in connection with certain drugs utilized under Medicare Part D, as well as the reporting of those fees and rebates to Part D plan

sponsors. The Company has been cooperating with the government and providing documents and information in response to the subpoena.

- *Corcoran* et al. *v. CVS Health Corporation* (U.S. District Court for the Northern District of California) and *Podgorny* et al. *v. CVS Health Corporation* (U.S. District Court for the Northern District of Illinois). These putative class actions were filed against the Company in July and September 2015. The cases were consolidated in United States District Court in the Northern District of California. Plaintiffs seek damages and injunctive relief on behalf of a class of consumers who purchased certain prescription drugs under the consumer protection statutes and common laws of certain states. Several third-party payors filed similar putative class actions on behalf of payors captioned *Sheet Metal Workers Local No. 20 Welfare and Benefit Fund v. CVS Health Corp.* and *Plumbers Welfare Fund, Local 130 v. CVS Health Corporation* (both pending in the U.S. District Court for the District of Rhode Island) in February and August 2016. In all of these cases the plaintiffs allege the Company overcharged for certain prescription drugs by not submitting the price available to members of the CVS Health Savings Pass program as the pharmacy's usual and customary price. In the consumer case (Corcoran), the Court granted summary judgment to CVS on plaintiffs' claims in their entirety and certified certain subclasses in September 2017. The plaintiffs have filed a notice of appeal to the Ninth Circuit. The Company continues to defend these actions.

- *Omnicare DEA Subpoena.* In September 2015, Omnicare was served with an administrative subpoena by the U.S. Drug Enforcement Administration ("DEA"). The subpoena seeks documents related to controlled substance policies, procedures, and practices at eight pharmacy locations from May 2012 to the present. In September 2017, the DEA expanded the investigation to include an additional pharmacy. The Company has been cooperating and providing documents in response to this administrative subpoena.

- *Omnicare Cycle Fill Civil Investigative Demand.* In October 2015, Omnicare received a Civil Investigative Demand from the United States Attorney's Office for the Southern District of New York requesting information and documents concerning Omnicare's cycle fill process for assisted living facilities. The Company has been cooperating with the government and providing documents and information in response to the Civil Investigative Demand. In July 2017, Omnicare also received a subpoena from the California Department of Insurance requesting documents on similar subject matter.

- *PBM Pricing Civil Investigative Demand.* In October 2015, the Company received from the U.S. Department of Justice (the "DOJ") a Civil Investigative Demand requesting documents and information in connection with a federal False Claims Act investigation concerning allegations that the Company submitted, or caused to be submitted, to the Medicare Part D program prescription drug event data that misrepresented true prices paid by the Company's PBM to pharmacies for drugs dispensed to Part D beneficiaries with prescription benefits administered by the Company's PBM. The Company has been cooperating with the government and providing documents and information in response to the Civil Investigative Demand.

- *United States* ex rel. *Sally Schimelpfenig and John Segura v. Dr. Reddy's Laboratories Limited and Dr. Reddy's Laboratories, Inc.* (U.S. District Court for the Eastern District of Pennsylvania). In November 2015, the court unsealed a second amended *qui tam* complaint filed in September 2015. The DOJ declined to intervene in this action. The relators allege that the Company, Walgreens, Wal-Mart, and Dr. Reddy's Laboratories violated the federal and various state False Claims Acts by dispensing prescriptions in unit dose packaging supplied by Dr. Reddy's that was not compliant with the Consumer Product Safety Improvement Act and the Poison Preventive Packaging Act and thereby allegedly rendering the drugs misbranded under the Food, Drug and Cosmetic Act. In March 2017, the Court granted the Company's motion to dismiss with leave to file an amended complaint. In June 2017, the Company moved to dismiss relators' third amended complaint.

- *Barchock* et al. *v. CVS Health Corporation,* et al. (U.S. District Court for the District of Rhode Island). In February 2016, a class action lawsuit was filed against the Company, the Benefit Plans Committee of the Company, and Galliard Capital Management, Inc., by Mary Barchock, Thomas Wasecko, and Stacy Weller,

purportedly on behalf of the 401(k) Plan and the Employee Stock Ownership Plan of the Company (the "Plan"), and participants in the Plan. The complaint alleged that the defendants breached fiduciary duties owed to the plaintiffs and the Plan by investing too much of the Plan's Stable Value Fund in short-term money market funds and cash management accounts. The court recently granted the Company's motion to dismiss the plaintiffs' amended complaint. In May 2017, plaintiffs appealed that ruling in the United States Court of Appeals for the First Circuit.

- *State of California* ex rel. *Matthew Omlansky v. CVS Caremark Corporation* (Superior Court of the State of California, County of Sacramento). In April 2016, the court unsealed a first amended *qui tam* complaint filed in July 2013. The government has declined intervention in this case. The relator alleges that the Company submitted false claims for payment to California Medicaid in connection with reimbursement for drugs available through the CVS Health Savings Pass program as well as certain other generic drugs. The case has been stayed pending the relator's appeal of the judgment against him in a similar case against another retailer.

- *Retail DEA Matters.* The Company has been also undergoing several audits by the DEA Administrator and is in discussions with the DEA and the U.S. Attorney's Offices in several locations concerning allegations that the Company has violated certain requirements of the Controlled Substance Act.

- *National Opioid Litigation* . In December 2017, the United States Judicial Panel on Multidistrict Litigation ordered consolidated numerous cases filed against various defendants by plaintiffs such as counties, cities, hospitals, Indian tribes, and third-party payors, alleging claims generally concerning the impacts of widespread opioid abuse. The consolidated multidistrict litigation is *In re National Prescription Opiate Litigation* (MDL No. 2804), pending in the U.S. District Court for the Northern District of Ohio. This multidistrict litigation presumptively includes relevant federal court cases that name the Company, including actions filed by several counties in West Virginia; actions filed by several counties and cities in Michigan; actions filed by hospitals in Florida and Mississippi; and an action filed by the St. Croix Chippewa Indians of Wisconsin. Similar cases that name the Company in some capacity have been filed in state courts, including cases filed by Shelby County, Tennessee, *Shelby County (Tennessee) v. Purdue Pharma, L.P., et al.* (Shelby County Circuit Court, No. CT-004500-17), and several counties in West Virginia, *Brooke County (West Virginia) et al. v. Purdue Pharma, L.P., et al.* (Marshall County Circuit Court, Nos. 17-C-248 – 17-C-255). The Company is defending all such matters.

- *Cherokee Nation Opioid Litigation* . In April 2017, the Company was named as a defendant in an action filed on behalf of the Cherokee Nation in the District Court of Cherokee Nation (the "Cherokee Action") asserting various causes of action allegedly arising from the widespread abuse of opioids. In June 2017, the Company filed a motion to dismiss the Cherokee Action. The Cherokee Nation has since filed an amended petition in the Cherokee Action. Also in June 2017, the six defendants in the Cherokee Action collectively filed a complaint in the U.S. District Court for the Northern District of Oklahoma, *McKesson* , et al. *v. Hembree* , et al., seeking a declaration and preliminary injunction prohibiting the District Court of Cherokee Nation from exercising jurisdiction over the Cherokee Action. In January 2018, the U.S. District Court granted the preliminary injunction motion and issued an order enjoining the Cherokee Nation Attorney General and the judicial officers of the Cherokee Nation District Court from taking any action with respect to the Cherokee Action pending resolution of the federal court case.

- *State of Mississippi v. CVS Health Corporation,* et al. (Chancery Court of DeSoto County, Mississippi, Third Judicial District). In July 2016, the Company was served with a complaint filed on behalf of the State of Mississippi alleging that CVS retail pharmacies in Mississippi submitted false claims for reimbursement to Mississippi Medicaid by not submitting the price available to members of the CVS Health Savings Pass program as the pharmacy's usual and customary price. The Company has responded to the complaint, filed a counterclaim, and moved to transfer the case to circuit court. The motion to transfer was granted, which the State has appealed, and the motion to dismiss remains pending.

- *Part B Insulin Products Civil Investigative Demand.* In December 2016, the Company received a Civil Investigative Demand from the U.S. Attorney's Office for the Northern District of New York, requesting documents and information in connection with a False Claims Act investigation concerning whether the Company's retail pharmacies improperly submitted certain insulin claims to Medicare Part D rather than Part B. The Company has cooperated with the government and provided documents and information in response to the Civil Investigative Demand.

- *Cold Chain Logistics Civil Investigative Demand* . In September 2016, the Company received from the DOJ a Civil Investigative Demand in connection with an investigation as to whether the Company's handling of certain temperature-sensitive pharmaceuticals violates the federal Food, Drug and Cosmetic Act and the False Claims Act. The Company has been cooperating with the government and providing documents and information in response to the Civil Investigative Demand.

- *Amburgey,* et al. *v. CaremarkPCS Health, L.L.C.* (U.S. District Court for the Central District of California). In March 2017, the Company was served with a complaint challenging the policies and procedures used by CVS Specialty pharmacies to ship temperature-sensitive medications. The case is similar to a matter already pending against the Company in the Superior Court of California (Los Angeles County), *Bertram v. Immunex Corp.* , et al., which was filed in October 2014. In November 2017, the plaintiffs voluntarily dismissed the *Amburgey* case without prejudice. The Company continues to defend the Bertram matter.

- *Barnett,* et al. v. *Novo Nordisk Inc* ., et al. and *Boss* , et al. v. *CVS Health Corporation* , et al., and *Christensen,* et al., v. *Novo Nordisk Inc.* et al., (all pending in the U.S. District Court for the District of New Jersey). These putative class actions were filed against the Company and other PBMs and manufacturers of insulin in March and April 2017. Plaintiffs in all cases allege that the PBMs and manufacturers have engaged in a conspiracy whereby the PBMs sell access to their formularies by demanding the highest rebates, which in turn causes increased list prices for insulin. The primary claims are antitrust claims, claims under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), violations of state unfair competition and consumer protection laws and in *Boss* , claims pursuant to the Employee Retirement Income Security Act ("ERISA"). In December 2017, the attorney appointed as interim lead counsel in *Barnet, Boss* and *Christensen* filed a consolidated amended class action complaint in a related action, *In re Insulin Pricing Litigation* , against only the drug manufacturers, and not against the PBMs.

- *Insulin Products Investigation.* In April 2017, the Company received a Civil Investigative Demand from the Attorney General of Washington, seeking documents and information regarding pricing and rebates for insulin products in connection with a pending investigation into unfair and deceptive acts or practice regarding insulin pricing. We have been notified by the Office of the Attorney General of Washington that information provided in response to the Civil Investigative Demand will be shared with the Attorneys General of California, Florida, Minnesota, New Mexico and the District of Columbia. In July 2017, the Company received a Civil Investigative Demand from the Attorney General of Minnesota, seeking documents and information regarding pricing and rebates for insulin and epinephrine products in connection with a pending investigation into unfair and deceptive acts or practices regarding insulin and epinephrine pricing.

- *Bewley,* et al. v. *CVS Health Corporation* , et al. and *Prescott* , et al. v. *CVS Health Corporation* , et al. (both pending in the U.S. District Court for the Western District of Washington). These putative class actions were filed in May 2017 against the Company and other pharmacy benefit managers and manufacturers of glucagon kits (Bewley) and diabetes test strips (Prescott). Both cases allege that, by contracting for rebates with the manufacturers of these diabetes products, the Company and other PBMs caused list prices for these products to increase, thereby harming certain consumers. The primary claims are made under federal antitrust laws, RICO, state unfair competition and consumer protection laws, and ERISA. These cases have both been transferred to the United States District Court for the District of New Jersey on defendants' motions. The Company is defending these lawsuits.

- *Klein* , et al. v. *Prime Therapeutics* , et al. (U.S. District Court for the District of Minnesota). In June 2017, a putative class action complaint was filed against the Company and other pharmacy benefit managers on behalf of ERISA plan members who purchased and paid for EpiPen or EpiPen Jr. Plaintiffs allege that the pharmacy benefit managers are ERISA fiduciaries to plan members and have violated ERISA by allegedly causing higher inflated prices for EpiPen through the process of negotiating increased rebates from EpiPen manufacturer, Mylan. The Company is defending this lawsuit.

- *Medicare Part D Civil Investigative Demand* . In May 2017, the United States Attorney's Office for the Southern District of New York issued a Civil Investigative Demand to the Company concerning possible false claims submitted to Medicare in connection with reimbursements for prescription drugs under the Medicare Part D program. The Company has been cooperating with the government and providing documents and information in response to the Civil Investigative Demand.

- *Shareholder Matters.* In August and September 2017, four complaints were filed by putative derivative plaintiffs against certain officers and directors of the Company. Three of those actions, *Sherman v. Merlo,* et al., *Feghali v. Merlo,* et al., and *Banchalter v. Merlo,* et al., were filed in the U.S. District Court for the District of Rhode Island. A fourth, *Boron v. Bracken,* et al., was filed in Rhode Island Superior Court. These matters assert a variety of causes of action, including breach of fiduciary duty, waste of corporate assets, unjust enrichment, civil conspiracy and violation of Section 14(a) of the Exchange Act, and are premised on the allegation that the defendants approved business plans that exposed the Company to various litigations and investigations. The three federal matters have been stayed pending resolution of certain of the underlying matters, and the Company has filed a motion to stay the state court action.

- *MSP Recovery Claims Series, LLC* , et al. v. *CVS Health Corporation* , et al. (U.S. District Court for the Western District of Texas). In September 2017, a putative class action complaint was filed against the company, Express Scripts, Inc., and the manufacturers of insulin on behalf of assignees of claims of Medicare Advantage Organizations. Plaintiffs assert that the PBMs and manufacturers have engaged in a conspiracy whereby the PBMs sell access to their formularies by demanding the highest rebates, which in turn causes increased list prices for insulin. The plaintiffs assert claims on behalf of two putative classes: (1) all Medicare C payors and (2) all Medicare D payors. The complaint asserts claims under RICO, and for common law fraud and unjust enrichment.

The Company is also a party to other legal proceedings, government investigations, inquiries and audits, and has received and is cooperating with subpoenas or similar process from various governmental agencies requesting information, all arising in the normal course of its business, none of which is expected to be material to the Company. The Company can give no assurance, however, that its business, financial condition and results of operations will not be materially adversely affected, or that the Company will not be required to materially change its business practices, based on: (i) future enactment of new health care or other laws or regulations; (ii) the interpretation or application of existing laws or regulations as they may relate to the Company's business, the pharmacy services, specialty pharmacy, retail pharmacy, long-term care pharmacy or retail clinic industries or to the health care industry generally; (iii) pending or future federal or state governmental investigations of the Company's business or the pharmacy services, specialty pharmacy, retail pharmacy, long-term care pharmacy or retail clinic industry or of the health care industry generally; (iv) pending or future government enforcement actions against the Company; (v) adverse developments in any pending *qui tam* lawsuit against the Company, whether sealed or unsealed, or in any future *qui tam* lawsuit that may be filed against the Company; or (vi) adverse developments in pending or future legal proceedings against the Company or affecting the pharmacy services, specialty pharmacy, retail pharmacy, long-term care pharmacy or retail clinic industry or the health care industry generally.

13 Segment Reporting

The Company currently has three reportable segments: Pharmacy Services, Retail/LTC and Corporate. The Retail/LTC Segment includes the operating results of the Company's Retail Pharmacy and LTC/RxCrossroads operating segments as the operations and economics characteristics are similar. The Company's segments maintain separate financial information for which operating results are evaluated on a regular basis by the Company's chief operating decision maker in deciding how to allocate resources and in assessing performance.

The Company evaluates its Pharmacy Services and Retail/LTC segments' performance based on net revenue, gross profit and operating profit before the effect of nonrecurring charges and gains and certain intersegment activities. The Company evaluates the performance of its Corporate Segment based on operating expenses before the effect of nonrecurring charges and gains and certain intersegment activities. The chief operating decision maker does not use total assets by segment to make decisions regarding resources, therefore the total asset disclosure by segment has not been included. See Note 1 "Significant Accounting Policies" for a description of the Pharmacy Services, Retail/LTC and Corporate segments and related significant accounting policies.

In 2017, 2016 and 2015, approximately 12.3%, 11.7% and 10.0%, respectively, of the Company's consolidated net revenues were from Aetna, a Pharmacy Services Segment client. More than 99% of the Company's consolidated net revenues are earned in, and long-lived assets are located in the United States.

The following table is a reconciliation of the Company's business segments to the consolidated financial statements:

In millions	Pharmacy Services Segment [1][2]	Retail/LTC Segment [2]	Corporate Segment	Intersegment Eliminations [2]	Consolidated Totals
2017:					
Net revenues	$ 130,596	$ 79,398	$ —	$ (25,229)	$ 184,765
Gross profit [3]	6,040	23,317	—	(812)	28,545
Operating profit (loss) [4][5]	4,755	6,469	(966)	(741)	9,517
Depreciation and amortization	712	1,651	117	—	2,480
Additions to property and equipment	311	1,398	340	—	2,049
2016:					
Net revenues	119,963	81,100	—	(23,537)	$ 177,526
Gross profit [3]	5,901	23,738	—	(782)	28,857
Operating profit (loss) [4][5][6][7]	4,676	7,302	(891)	(721)	10,366
Depreciation and amortization	714	1,642	119	—	2,475
Additions to property and equipment	295	1,732	252	—	2,279
2015:					
Net revenues	100,363	72,007	—	(19,080)	$ 153,290
Gross profit	5,227	21,992	—	(691)	26,528
Operating profit (loss) [4][5][7]	3,992	7,146	(1,035)	(628)	9,475
Depreciation and amortization	654	1,336	102	—	2,092
Additions to property and equipment	359	1,883	125	—	2,367

(5) Net revenues of the Pharmacy Services Segment include approximately $10.8 billion, $10.5 billion and $8.9 billion of Retail Co-Payments for 2017, 2016 and 2015, respectively. See Note 1 "Significant Accounting Policies" to the consolidated financial statements for additional information about Retail Co-Payments.

(6) Intersegment eliminations relate to intersegment revenue generating activities that occur between the Pharmacy Services Segment and the Retail/LTC Segment. These occur in the following ways: when members of Pharmacy Services Segment clients ("members") fill prescriptions at the Company's retail pharmacies to purchase covered products, when members enrolled in programs such as Maintenance Choice ® elect to pick up maintenance prescriptions at one of the Company's retail pharmacies instead of receiving them through the mail, or when members have prescriptions filled at the Company's long-term care pharmacies. When these occur, both the Pharmacy Services and Retail/LTC segments record the revenues, gross profit and operating profit on a standalone basis.

(7) The Retail/LTC Segment gross profit for the years ended December 31, 2017 and 2016 includes $2 million and $46 million, respectively of acquisition-related integration costs. The integration costs in 2017 are related to the acquisition of Omnicare and the integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacies and clinics of Target.

(8) The Retail/LTC Segment operating profit for the year ended December 31, 2017 includes $215 million of charges associated with store closures and $181 million of goodwill impairment charges related to its RxCrossroads reporting unit. The Retail/LTC Segment operating profit for the year ended December 31, 2016 includes a $34 million asset impairment charge in connection with planned store closures in 2017 related to the Company's enterprise streamlining initiative. The Retail/LTC Segment operating profit for the years ended December 31, 2017, 2016 and 2015, include $34 million, $281 million and $64 million, respectively, of acquisition-related integration costs. The integration costs in 2017 are related to the acquisition of Omnicare and the integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacies and clinics of Target.

(9) The Corporate Segment operating loss for the year ended December 31, 2017 includes a $3 million reduction in integration costs for a change in estimate related to the acquisition of Omnicare. In addition, the Corporate Segment operating loss for the year ended December 31, 2017 includes $34 million in acquisition-related transaction costs related to the proposed Aetna acquisition and $9 million of transaction costs related to the divestiture of RxCrossroads. For the year ended December 31, 2016, the Corporate Segment operating loss includes $10 million of integration costs related to the acquisitions of Omnicare and the pharmacies and clinics of Target. For the year ended December 31, 2015, the Corporate Segment operating loss includes $156 million of acquisition-related transaction and integration costs related to the acquisitions of Omnicare and the pharmacies and clinics of Target. The Corporate Segment operating loss for 2015 also includes a $90 million charge related to a legacy lawsuit challenging the 1999 legal settlement by MedPartners of various securities class actions and a related derivative claim.

(10) The Pharmacy Services Segment operating profit for the year ended December 31, 2016 includes the reversal of an accrual of $88 million in connection with a legal settlement.

(11) Amounts revised to reflect the adoption of ASU 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* , which increased consolidated operating profit by $28 and $21 million for the years ended December 31, 2016 and 2015, respectively.

14 Earnings Per Share

The following is a reconciliation of basic and diluted earnings per share from continuing operations for the years ended December 31:

In millions, except per share amounts	**2017**	**2016**	**2015**
Numerator for earnings per share calculation:			
Income from continuing operations	$ 6,631	$ 5,320	$ 5,230
Income allocated to participating securities	(24)	(27)	(26)
Net income attributable to noncontrolling interest	(1)	(2)	(2)
Income from continuing operations attributable to CVS Health	$ 6,606	$ 5,291	$ 5,202
Denominator for earnings per share calculation:			
Weighted average shares, basic	1,020	1,073	1,118
Effect of dilutive securities	4	6	8
Weighted average shares, diluted	1,024	1,079	1,126
Earnings per share from continuing operations:			
Basic	$ 6.48	$ 4.93	$ 4.65
Diluted	$ 6.45	$ 4.91	$ 4.62

15 Quarterly Financial Information (Unaudited)

In millions, except per share amounts	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year
2017:					
Net revenues	$ 44,514	$ 45,685	$ 46,181	$ 48,385	$ 184,765
Gross profit	6,580	6,935	7,126	7,904	28,545
Operating profit	1,793	2,117	2,499	3,108	9,517
Income from continuing operations	962	1,097	1,285	3,287	6,631
Income (loss) from discontinued operations, net of tax	(9)	1	—	—	(8)
Net income attributable to CVS Health	952	1,098	1,285	3,287	6,622

(1) As of January 1, 2017, the Company adopted Accounting Standards Update ("ASU") 2017-07, *Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* , which resulted in a retrospective reclassification of $28 million, $21 million, $23 million and $33 million of net benefit costs from operating expenses to other expense in the years ended December 31, 2016, 2015, 2014, and 2013, respectively.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of CVS Health Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of CVS Health Corporation (the Company) as of December 31, 2017 and 2016, the related consolidated statements of income, comprehensive income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2017, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2017 and 2016, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 14, 2018 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2007.

Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Larry J. Merlo, President and Chief Executive Officer of CVS Health Corporation, certify that:

1. I have reviewed this annual report on Form 10-K of CVS Health Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors:

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Portions of the Annual Report to Stockholders for the fiscal year ended December 31, 2018 (the "Annual Report") are incorporated by reference in response to Items 1, 1A, 2 and 3 of Part I and Items 5, 6, 7, 7A, 8 and 9A of Part II, in each case to the extent described therein.

Information contained in the definitive proxy statement for CVS Health Corporation's 2019 Annual Meeting of Stockholders, to be filed on or about April 5, 2019 (the "Proxy Statement"), is incorporated by reference in response to Items 10 through 14 of Part III to the extent described therein.

TABLE OF CONTENTS

PART I

Item 1. Business

Overview

CVS Health Corporation, together with its subsidiaries (collectively, "CVS Health," the "Company," "we," "our" or "us"), is the nation's premier health innovation company helping people on their path to better health. Whether in one of its pharmacies or through its health services and plans, CVS Health is pioneering a bold new approach to total health by making quality care more affordable, accessible, simple and seamless. CVS Health is community-based and locally focused, engaging consumers with the care they need when and where they need it. The Company has more than 9,900 retail locations, approximately 1,100 walk-in medical clinics, a leading pharmacy benefits manager with approximately 92 million plan members, a dedicated senior pharmacy care business serving more than one million patients per year, expanding specialty pharmacy services, and a leading stand-alone Medicare Part D prescription drug plan. CVS Health also serves an estimated 38 million people through traditional, voluntary and consumer-directed health insurance products and related services, including rapidly expanding Medicare Advantage offerings. The Company believes its innovative health care model increases access to quality care, delivers better health outcomes and lowers overall health care costs.

On November 28, 2018 (the "Aetna Acquisition Date"), the Company acquired Aetna Inc. ("Aetna") for a combination of cash and CVS Health stock (the "Aetna Acquisition"). The Company acquired Aetna to help improve the consumer health care experience by combining Aetna's health care benefits products and services with CVS Health's more than 9,900 retail locations, approximately 1,100 walk-in medical clinics and integrated pharmacy capabilities with the goal of becoming the new, trusted front door to health care. Under the terms of the merger agreement, Aetna shareholders received $145.00 in cash and 0.8378 CVS Health shares for each Aetna share. The transaction valued Aetna at approximately $212 per share or approximately $70 billion. Including the assumption of Aetna's debt, the total value of the transaction was approximately $78 billion. The Company financed the cash portion of the purchase price through a combination of cash on hand and by issuing approximately $45.0 billion of new debt, including senior notes and term loans. For additional information, see Note 2 ''Acquisition of Aetna'' contained in the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein.

On October 10, 2018, the Company and Aetna entered into a consent decree with the United States Department of Justice (the "DOJ") that allowed the Company's proposed acquisition of Aetna to proceed, provided Aetna agreed to sell its individual standalone Medicare Part D prescription drug plans. As part of the agreement reached with the DOJ, Aetna entered into a purchase agreement with a subsidiary of WellCare Health Plans, Inc. ("WellCare") for the divestiture of Aetna's standalone Medicare Part D prescription drug plans effective December 31, 2018. On November 30, 2018, Aetna completed the sale of its standalone Medicare Part D prescription drug plans. Aetna's standalone Medicare Part D prescription drug plans had an aggregate of approximately 2.3 million members as of December 31, 2018 . Aetna will provide administrative services to, and will retain the financial results of, the divested plans through 2019.

As a result of the Aetna Acquisition, the Company added the Health Care Benefits segment, which is the equivalent of the former Aetna Health Care segment. Certain aspects of Aetna's operations, including products for which the Company no longer solicits or accepts new customers, such as large case pensions and long-term care insurance products, are included in the Company's Corporate/Other segment. The Company now has four reportable segments: Pharmacy Services, Retail/LTC, Health Care Benefits and Corporate/Other.

Business Strategy

The combined company expects to transform the consumer health care experience and build healthier communities through a new innovative health care model that is local, easier to use, less expensive and puts consumers at the center of their care. The Company believes that improving the consumer's health care experience will improve consumer engagement with their health which will lead to improved health outcomes and lower total health care costs. The Company believes there are three imperatives to accomplishing this transformation: be local, make it simple and improve health. These imperatives also guide the Company's five key strategies for delivering medical cost savings for its customers: improve common chronic disease management, reduce unnecessary hospital readmissions, improve the efficiency of the sites at which medical members receive care, optimize primary care delivery and improve the Company's complex chronic disease management capabilities.

Pharmacy Services Segment

The Pharmacy Services segment provides a full range of pharmacy benefit management ("PBM") solutions, including plan design offerings and administration, formulary management, retail pharmacy network management services, mail order pharmacy, specialty pharmacy and infusion services, Medicare Part D services, clinical services, disease management services and medical spend management. The Pharmacy Services segment's clients are primarily employers, insurance companies, unions, government employee groups, health plans, Medicare Part D prescription drug plans ("PDPs"), Medicaid managed care ("Managed Medicaid") plans, plans offered on public health insurance exchanges ("Public Exchanges") and private health insurance exchanges ("Private Exchanges" and together with Public Exchanges, "Insurance Exchanges"), other sponsors of health benefit plans and individuals throughout the United States. In addition, the Company is a national provider of drug benefits to eligible beneficiaries under the Medicare Part D prescription drug program. The Pharmacy Services segment operates retail specialty pharmacy stores, specialty mail order pharmacies, mail order dispensing pharmacies, compounding pharmacies and branches for infusion and enteral nutrition services. During the year ended December 31, 2018, the Company's PBM filled or managed approximately 1.9 billion prescriptions on a 30-day equivalent basis.

PBM Services

The Company dispenses prescription drugs directly through its mail order dispensing and specialty mail order pharmacies and through pharmacies in its retail network. All prescriptions processed by the Company are analyzed, processed and documented by the Company's proprietary prescription management systems. These systems provide essential features and functionality to allow a plan member to utilize their prescription drug benefits. These systems also streamline the process by which prescriptions are processed by staff and network pharmacists by enhancing review of various items through automation, including plan eligibility, early refills, duplicate dispensing, appropriateness of dosage, drug interactions or allergies, over-utilization and potential fraud.

Plan Design Offerings and Administration
The Company administers pharmacy benefit plans for clients who contract with it to facilitate prescription drug coverage and claims processing for their eligible plan members. The Company assists its PBM clients in designing pharmacy benefit plans that help improve health outcomes while minimizing the costs to the client. The Company also assists PBM clients in monitoring the effectiveness of their plans through frequent, informal communications, the use of proprietary software, as well as through formal annual, quarterly and sometimes monthly performance reviews.

The Company makes recommendations to help PBM clients design benefit plans that promote the use of lower cost, clinically appropriate drugs and helps its PBM clients control costs by recommending plan designs that encourage the use of generic equivalents of brand name drugs when such equivalents are available. Clients also have the option, through plan design, to further lower their pharmacy benefit plan costs by setting different member payment levels for different products on their drug lists or "formularies," which helps guide members to choose lower cost alternatives through appropriate financial incentives.

Formulary Management
The Company utilizes an independent panel of doctors, pharmacists and other medical experts, referred to as the CVS Caremark National Pharmacy and Therapeutics Committee, to review and approve the selection of drugs that meet the Company's standards of safety and efficacy for inclusion on one of the Company's template formularies. The Company's formularies provide recommended products in numerous drug classes to help ensure member access to clinically appropriate drugs with alternatives within a class under the client's pharmacy benefit plan, while helping to drive the lowest net cost for clients that select one of the Company's formularies. To help improve clinical outcomes for members and clients, the Company conducts ongoing, independent reviews of all drugs, including, but not limited to, those appearing on the formularies and generic equivalent products. Many of the Company's clients choose to adopt a template formulary offering as part of their plan design. Beginning in 2018, clients had new capabilities to offer real time benefits information for a member's specific plan design, provided digitally at the point of prescribing, at the pharmacy and directly to members.

Retail Pharmacy Network Management Services
The Company maintains a national network of more than 68,000 retail pharmacies, consisting of approximately 41,000 chain pharmacies (which includes CVS Pharmacy locations) and 27,000 independent pharmacies, in the United States, including Puerto Rico, the District of Columbia, Guam and the United States Virgin Islands. When a customer fills a prescription in a retail pharmacy, the pharmacy sends prescription data electronically to the Company from the point-of-sale. This data interfaces with the Company's proprietary prescription management systems, which verify relevant plan member data and eligibility, while also performing a drug utilization review to help evaluate clinical appropriateness and safety and confirming that the pharmacy will receive payment for the prescription. The Company is also able to build client-specific pharmacy networks and

managed pharmacy network solutions to further drive savings for clients. These include a performance-based pharmacy network with approximately 30,000 stores that is anchored by CVS Pharmacy and Walgreens, along with up to 10,000 independent pharmacies across the United States. The performance-based network is designed to deliver unit cost savings and to improve clinical outcomes in order to help to lower overall health care costs for participating payors and their members.

Mail Order Pharmacy Services
The Pharmacy Services segment operates mail order dispensing pharmacies in the United States. Plan members or their prescribers submit prescriptions or refill requests, primarily for maintenance medications, to these pharmacies via mail, telephone, fax, e-prescribing or the Internet, and staff pharmacists review these prescriptions and refill requests with the assistance of the Company's prescription management systems. This review may involve communications with the prescriber and, with the prescriber's approval when required, can result in generic substitution, therapeutic interchange or other actions designed to help reduce cost and/or improve quality of treatment. The Company's mail order dispensing pharmacies have been awarded Mail Order Pharmacy accreditation from Utilization Review Accreditation Commission ("URAC"), a health care accrediting organization that establishes quality standards for the health care industry.

Specialty Pharmacy and Infusion Services
The Pharmacy Services segment operates specialty mail order pharmacies, retail specialty pharmacy stores and branches for infusion and enteral nutrition services in the United States. These specialty mail order pharmacies are used for delivery of advanced medications to individuals with chronic or genetic diseases and disorders. The Company's specialty mail order pharmacies also have been awarded Specialty Pharmacy accreditation from URAC. Substantially all of the Company's mail service specialty mail order pharmacies also have been accredited by the Joint Commission, which is an independent, not-for-profit organization that accredits and certifies health care programs and organizations in the United States.

Medicare Part D Services
The Company participates in the administration of the Medicare Part D prescription drug program through the provision of PBM services to those health plan clients and other clients that have qualified as a PDP or as a Medicare Advantage prescription drug plan and by offering Medicare Part D pharmacy benefits through its SilverScript subsidiary that is a PDP that has contracted with the United States Centers for Medicare & Medicaid Services ("CMS"). The Company also assists employer, union and other health plan clients that qualify for the retiree drug subsidy made available under Medicare Part D by collecting and submitting eligibility and/or drug cost data to CMS in order for such clients to obtain the subsidy and offers Medicare Part D pharmacy benefits to such clients' retirees through Employer Group Waiver Plans ("EGWPs") sponsored by SilverScript.

Clinical Services
The Company offers multiple clinical programs and services to help clients manage overall pharmacy and health care costs in a clinically appropriate manner. These programs are primarily designed to promote better health outcomes, and to help target inappropriate medication utilization and non-adherence to medication, each of which may result in adverse medical events that negatively affect member health and client pharmacy and medical spend. These programs include utilization management ("UM"), medication management, quality assurance, adherence and counseling programs to complement the client's plan design and clinical strategies. To help address the opioid epidemic, the Company introduced an industry-leading UM approach that limits to seven days the supply of opioids dispensed for certain acute prescriptions for patients who are new to therapy; limits the daily dosage of opioids dispensed based on the strength of the opioid; and requires the use of immediate-release formulations of opioids before extended-release opioids are dispensed. The Company's Pharmacy Advisor program facilitates pharmacist counseling, both face-to-face and over the telephone, to help participating plan members with certain chronic diseases, such as diabetes and cardiovascular conditions, to identify gaps in care, adhere to their prescribed medications and manage their health conditions. The Company also has digital connectivity that helps to lower drug costs for patients by providing expanded visibility to lower cost alternatives through enhanced analytics and data sharing.

Disease Management Programs
The Company's clinical programs and services utilize advanced protocols and offer clients convenience in working with health care providers ("providers") and other third parties. The Company's integrated disease management programs cover diseases such as rheumatoid arthritis, Parkinson's disease, seizure disorders and multiple sclerosis. The majority of these integrated programs are accredited by the National Committee for Quality Assurance ("NCQA"), a private, not-for-profit organization that evaluates, accredits and certifies a wide range of health care organizations.

Medical Benefit Management
The Company's NovoLogix ® online preauthorization tool helps identify and capture cost savings opportunities for specialty drugs billed under the medical benefit by identifying outliers to appropriate dosages and costs, and helps to ensure clinically appropriate use of specialty drugs.

Pharmacy Services Information Systems

The majority of the Pharmacy Services segment's clients have migrated to a single claim adjudication platform. This platform incorporates architecture that centralizes the data generated from filling mail order prescriptions, adjudicating retail pharmacy claims and delivering other solutions to PBM clients. The Health Engagement Engine ® technology and proprietary clinical algorithms help connect the various parts of the enterprise and serve an essential role in cost management and health improvement. This capability transforms pharmacy data into actionable interventions at key points of care such as mail and specialty pharmacists to help provide quality care.

Pharmacy Services Clients

The Company's Pharmacy Services clients are primarily employers, insurance companies, unions, government employee groups, health plans, Medicare Part D plans, Managed Medicaid plans and plans offered on public and private health insurance exchanges, other sponsors of health benefit plans and individuals located throughout the United States. Pharmaceuticals are provided to eligible members in benefit plans maintained by clients and utilize the Company's information systems, among other things, to help perform safety checks, drug interaction screening and identify opportunities for generic substitution. Substantially all of the Pharmacy Services segment's revenue is generated from dispensing and managing prescription drugs to eligible members in benefit plans maintained by clients. In 2018 , 2017 and 2016 , revenues from Aetna accounted for approximately 9.8% , 12.3% and 11.7% , respectively, of the Company's consolidated total revenues. On the Aetna Acquisition Date, Aetna became a wholly-owned subsidiary of CVS Health. Subsequent to the Aetna Acquisition Date, revenues from Aetna will continue to be reported in the Pharmacy Services segment; however, these revenues are eliminated in the consolidated financial statements.

Pharmacy Services Seasonality

The majority of Pharmacy Services segment revenues are not seasonal in nature. However, quarterly earnings and operating cash flows are impacted by the Medicare Part D benefit design and changes in the composition of PDP membership. The Medicare Part D standard benefit design results in coverage that varies with a member's cumulative annual out-of-pocket costs. The benefit design generally results in employers or other entities that sponsor the Company's products ("plan sponsors") sharing a greater portion of the responsibility for total prescription drug costs in the early part of the year. As a result, the PDP pay percentage or benefit ratio generally decreases and operating income generally increases as the year progresses.

Pharmacy Services Competition

The Company believes the primary competitive factors in the pharmacy services industry include: (i) the ability to negotiate favorable discounts from drug manufacturers as well as to negotiate favorable discounts from, and access to, retail pharmacy networks; (ii) the ability to identify and apply effective cost management programs utilizing clinical strategies, including the development and utilization of preferred formularies; (iii) the ability to market PBM products and services; (iv) the commitment to provide flexible, clinically-oriented services to clients and be responsive to clients' needs; (v) the quality, scope and costs of products and services offered to clients and their members; and (vi) operational excellence in delivering services. The Pharmacy Services segment has a significant number of competitors (e.g., the Express Scripts business of Cigna Corporation, OptumRx, Prime Therapeutics, MedImpact and Humana) offering PBM services, including large, national PBM companies, PBMs owned by large national health plans and smaller standalone PBMs. References to competitors and other companies throughout this Annual Report on Form 10-K, including the information incorporated by reference herein, are for illustrative or comparison purposes only and do not indicate that these companies are the Company's or any segment's only competitors or closest competitors.

Retail/LTC Segment

The Retail/LTC segment sells prescription drugs and a wide assortment of general merchandise, including over-the-counter drugs, beauty products, cosmetics and personal care products, provides health care services through its MinuteClinic ® walk-in medical clinics and conducts long-term care ("LTC") pharmacy operations, which distribute prescription drugs and provide related pharmacy consulting and other ancillary services to chronic care facilities and other care settings. Prior to January 2, 2018, the Retail/LTC segment also provided commercialization services under the name RxCrossroads ®. The Company divested its RxCrossroads subsidiary on January 2, 2018. As of December 31, 2018, the Retail/LTC segment operated more than 9,900 retail locations, over 1,100 MinuteClinic ® locations as well as online retail pharmacy websites, LTC pharmacies and onsite pharmacies. During the year ended December 31, 2018, the Retail/LTC segment filled approximately 1.3 billion prescriptions

on a 30-day equivalent basis. In December 2018, the Company held approximately 26% of the United States retail pharmacy market.

Retail/LTC Products and Services

A typical retail store sells prescription drugs and a wide assortment of high-quality, nationally advertised brand name and proprietary brand merchandise. Front store categories include over-the-counter drugs, beauty products, cosmetics and personal care products. LTC operations include distribution of prescription drugs and related consulting and ancillary services. The Company purchases merchandise from numerous manufacturers and distributors. The Company believes that competitive sources are readily available for substantially all of the products carried in its retail stores and the loss of any one supplier would not likely have a material effect on the Retail/LTC segment. The Company's MinuteClinics offer a variety of health care services.

Retail/LTC revenues by major product group are as follows:

	Percentage of Revenues		
	2018	**2017**	**2016**
Pharmacy [(1)]	76.4%	75.0%	75.0%
Front store and other [(2)]	23.6%	25.0%	25.0%
	100.0%	100.0%	100.0%

(1) Pharmacy includes LTC sales and sales in pharmacies within Target Corporation stores.
(2) "Other" represents less than 5% of the "Front store and other" revenue category.

Pharmacy
Pharmacy revenues represented approximately three-fourths of Retail/LTC segment revenues in each of 2018 , 2017 and 2016 . The Company believes that retail pharmacy operations will continue to represent a critical part of the Company's business due to industry demographics, e.g., an aging American population consuming a greater number of prescription drugs, prescription drugs being used more often as the first line of defense for managing illness, the introduction of new pharmaceutical products, and Medicare Part D growth. The Company believes the retail pharmacy business benefits from investment in both people and technology, as well as innovative collaborations with health plans, PBMs and providers. Given the nature of prescriptions, consumers want their prescriptions filled accurately by professional pharmacists using the latest tools and technology, and ready when promised. Consumers also need medication management programs and better information to help them get the most out of their health care dollars. To assist consumers with these needs, the Company has introduced integrated pharmacy health care services that provide an earlier, easier and more effective approach to engaging consumers in behaviors that can help lower costs, improve health and save lives.

Front Store
Front store revenues reflect the Company's strategy of innovating with new and unique products and services, using innovative personalized marketing and adjusting the mix of merchandise to match customers' needs and preferences. A key component of the front store strategy is the ExtraCare ® card program, which is one of the largest and most successful retail loyalty programs in the United States. The ExtraCare program allows the Company to balance marketing efforts so it can reward its best customers by providing them with automatic sale prices, customized coupons, ExtraBucks ® rewards and other benefits. The Company continues to launch and enhance new and exclusive brands to create unmatched offerings in beauty products and deliver other unique product offerings, including a full range of high-quality CVS Health and other proprietary brand products that are only available through CVS stores. The Company currently carries approximately 7,000 CVS Health and proprietary brand products, which accounted for approximately 23% of front store revenues during 2018 .

MinuteClinic
As of December 31, 2018 , the Company operated approximately 1,100 MinuteClinic ® locations in the United States. The clinics are staffed by nurse practitioners and physician assistants who utilize nationally established guidelines to deliver a variety of health care services. Payors value these clinics because they provide convenient, high-quality, cost-effective care, in many cases offering an attractive alternative to more expensive sites of care. As a result, visits paid for by employers, health insurers or other third parties accounted for approximately 91% of MinuteClinic's total revenues in 2018 . MinuteClinic is collaborating with the Pharmacy Services and Health Care Benefits segments to help meet the needs of CVS Caremark's client plan members and the Company's health plan members by offering programs that can improve member health and lower costs.

MinuteClinic is now affiliated with more than 75 major health systems and continues to build a platform that supports primary care.

Long-term Care Pharmacy Operations
The Retail/LTC segment provides LTC pharmacy services through the Omnicare business. Omnicare's customers consist of skilled nursing facilities, assisted living facilities, independent living communities, hospitals, correctional facilities, and other health care service providers. The Company provides pharmacy consulting, including monthly patient drug therapy evaluations, to assist in compliance with state and federal regulations and provide proprietary clinical and health management programs. It also provides pharmaceutical case management services for retirees, employees and dependents who have drug benefits under corporate-sponsored health care programs.

Onsite Pharmacies
The Company also operates a limited number of pharmacies located at client sites, which provide certain health plan members and customers with a convenient alternative for filling their prescriptions.

Retail Store Development

The addition of new retail locations has played, and will continue to play, a key role in the Company's continued growth and success. The Company's store development program focuses on three areas: entering new markets, adding stores within existing markets and relocating stores to more convenient sites. During 2018 , the Company opened 145 new retail locations, relocated approximately 35 stores and closed approximately 30 locations. During the last five years, the Company opened approximately 900 new and relocated locations, and acquired approximately 1,825 locations, including the pharmacies acquired from Target Corporation ("Target") in 2015. The Company believes that continuing to grow its store base appropriately and locate retail stores in more accessible markets are essential components of competing effectively in the current health care environment. As a result, the Company believes that its store development program is an integral part of its ability to meet the needs of customers and maintain its leadership position in the retail pharmacy market given the changing health care landscape.

Retail/LTC Information Systems

The Company has continued to invest in information systems to enable it to deliver exceptional customer service, enhance safety and quality, and expand patient care services while lowering operating costs. The proprietary WeCARE Workflow supports pharmacy teams by prioritizing work to meet customer expectations, facilitating prescriber outreach, and seamlessly integrating clinical programs. This solution delivers improved efficiency and enhances the customer experience, as well as providing a framework to accommodate the evolution of pharmacy practice and the expansion of clinical programs. The Health Engagement Engine technology and proprietary clinical algorithms enable the Company to help identify opportunities for pharmacists to deliver face-to-face counseling regarding patient health and safety matters, including adherence issues, gaps in care and management of certain chronic health conditions. The Company's digital strategy is to empower the consumer to navigate their pharmacy experience and manage their condition through integrated online and mobile solutions that offer utility and convenience. The Company's LTC digital technology suite, Omniview ® , improves the efficiency of customers' operations with tools that include executive dashboards, pre-admission pricing, electronic ordering of prescription refills, proof-of-delivery tracking, access to patient profiles, receipt and management of facility bills, and real-time validation of Medicare Part D coverage, among other capabilities.

Retail/LTC Customers

The success of the Retail/LTC segment's businesses is dependent upon the Company's ability to establish and maintain contractual relationships with pharmacy benefit managers and other payors on acceptable terms. Pharmacy benefit managers, managed care organizations, government funded health care programs, commercial employers and other third party payors accounted for 99.5% of the Retail/LTC segment's pharmacy revenues. No single Retail/LTC payor accounted for 10% or more of the Company's consolidated total revenues in 2018 , 2017 or 2016 .

Retail/LTC Seasonality

The majority of Retail/LTC segment revenues, particularly pharmacy revenues, generally are not seasonal in nature. However, front store revenues tend to be higher during the December holiday season. In addition, both pharmacy and front store revenues are affected by the timing and severity of the cough, cold and flu season. Uncharacteristic or extreme weather conditions also can adversely affect consumer shopping patterns and Retail/LTC revenues, expenses and results of operations.

Retail/LTC Competition

The retail drugstore business is highly competitive. The Company believes that it competes principally on the basis of: (i) store location and convenience, (ii) customer service and satisfaction, (iii) product selection and variety, and (iv) price. In the markets it serves, the Company competes with other drugstore chains (e.g., Walgreens and Rite Aid), supermarkets, discount retailers (e.g., Wal-Mart), independent pharmacies, restrictive pharmacy networks, membership clubs, Internet companies, and retail health clinics (including urgent care centers), as well as mail order dispersing pharmacies.

LTC pharmacy services are highly regional or local in nature, and within a given geographic area of operation, highly competitive. The Company's largest LTC pharmacy competitor nationally is PharMerica. The Company also competes with numerous local and regional institutional pharmacies, pharmacies owned by long-term care facilities and local retail pharmacies. Some states have enacted "freedom of choice" or "any willing provider" requirements as part of their state Medicaid programs or in separate legislation, which may increase the competition that the Company faces in providing services to long-term care facility residents in these states.

References to competitors and other companies throughout this Annual Report on Form 10-K, including the information incorporated by reference herein, are for illustrative or comparison purposes only and do not indicate that these companies are the Company's or any segment's only competitors or closest competitors.

Health Care Benefits Segment

The Health Care Benefits segment is one of the nation's leading diversified health care benefits providers, serving an estimated 38 million people as of December 31, 2018 . The Health Care Benefits segment has the information and resources to help members, in consultation with their health care professionals, make better informed decisions about their health care. The Health Care Benefits segment offers a broad range of traditional, voluntary and consumer-directed health insurance products and related services, including medical, pharmacy, dental, behavioral health, medical management capabilities, Medicare Advantage and Medicare Supplement plans, PDPs, Medicaid health care management services, workers' compensation administrative services and health information technology ("HIT") products and services. The Health Care Benefits segment's customers include employer groups, individuals, college students, part-time and hourly workers, health plans, health care providers, governmental units, government-sponsored plans, labor groups and expatriates.

Health Care Benefits Products and Services

The Company refers to insurance products (where it assumes all or a majority of the risk for medical and dental care costs) as "Insured" and administrative services contract products (where the plan sponsor assumes all or a majority of the risk of medical and dental care costs) as "ASC." Health Care Benefits products and services consist of the following:

- *Commercial Medical* : The Health Care Benefits segment offers point-of-service ("POS"), preferred provider organization ("PPO"), health maintenance organization ("HMO") and indemnity benefit ("Indemnity") plans. Commercial medical products also include health savings accounts ("HSAs") and consumer-directed health plans that combine traditional POS or PPO and/or dental coverage, subject to a deductible, with an accumulating benefit account (which may be funded by the plan sponsor and/or the member in the case of HSAs). Principal products and services are targeted specifically to large multi-site national, mid-sized and small employers, individual insureds and expatriates. The Company offers medical stop loss insurance coverage for certain employers who elect to self-insure their health benefits. Under this product, the Company assumes risk for costs associated with large individual claims and/or aggregate loss experience within an employer's plan above a pre-set annual threshold.
- *Government Medical* : In select geographies, the Health Care Benefits segment offers Medicare Advantage plans, Medicare Supplement plans and prescription drug coverage for Medicare beneficiaries; participates in Medicaid and subsidized Children's Health Insurance Programs ("CHIP"); and participates in demonstration projects for members who are eligible for both Medicare and Medicaid ("Duals"). These Government Medical products are further described below:
    - *Medicare Advantage and PDP:* Through annual contracts with CMS, the Company offers HMO and PPO products for eligible individuals in certain geographic areas through the Medicare Advantage program. Members typically receive enhanced benefits over traditional fee-for-service Medicare coverage ("Original Medicare"), including reduced cost-sharing for preventive care, vision and other services. The Company offered network-based HMO and/or PPO plans in 1,317 counties in 40 states and Washington, D.C. in 2018 . The Company has expanded to 1,416 counties in 45 states and Washington, D.C. for 2019 . The Company is a national provider of drug benefits under the Medicare Part D prescription drug program to both individuals and EGWPs. All Medicare eligible individuals are eligible to participate in this voluntary prescription drug plan. Members typically receive

coverage for certain prescription drugs, usually subject to a deductible, co-insurance and/or co-payment. On November 30, 2018, Aetna completed the sale of all of its standalone Medicare Part D prescription drug plans to WellCare effective on December 31, 2018. Aetna will provide administrative services to, and retain the financial results of, the divested plans through 2019. For certain qualifying employer groups, the Company offers Medicare PPO products nationally. When combined with the Company's PDP product, these national PPO plans form an integrated national Insured Medicare product for employers that provides medical and pharmacy benefits.

- *Medicare Supplement:* For certain Medicare eligible members, the Company offers supplemental coverage for certain health care costs not covered by Original Medicare. The products included in the Medicare Supplement portfolio help to cover some of the gaps in Original Medicare, and include coverage for Medicare deductibles and coinsurance amounts. The Company offered a wide selection of Medicare Supplement products in 49 states and Washington, D.C. in 2018 .
- *Medicaid and CHIP:* The Company offers health care management services to individuals eligible for Medicaid and CHIP under multi-year contracts with government agencies in various states that are subject to annual appropriations. CHIP are state-subsidized insurance programs that provide benefits for families with uninsured children. The Company offered these services on an Insured or ASC basis in 16 states in 2018 .
- *Duals:* The Company provides health coverage to beneficiaries who are dually eligible for both Medicare and Medicaid coverage. These members must meet certain income and resource requirements in order to qualify for this coverage. The Company coordinates 100% of the care for these members and may provide them with additional services in order to manage their health care costs. During 2018 , the Company offered services on an Insured basis to Duals in four states under demonstration projects.

- *Pharmacy* : The Company offers PBM services and specialty and home delivery pharmacy services. The Company also performs various PBM services for Aetna pharmacy customers consisting of: product development, Commercial formulary management, pharmacy rebate contracting and administration, sales and account management and precertification programs. The Pharmacy Services segment performs the administration of selected functions for retail pharmacy network contracting and claims administration; home delivery and specialty pharmacy order fulfillment and inventory purchasing and management; and certain administrative services. Other suppliers also provide certain PBM services.
- *Specialty* : The Health Care Benefits segment has a portfolio of additional health products and services that complement its medical products such as dental plans, behavioral health and employee assistance products, provider network access and vision products and workers' compensation administrative services.
- *Consumer Health Products and Services* : The Company has a portfolio of products and services aimed at creating a holistic and integrated approach to individual health and wellness. These products and services complement the Commercial Medical and Government Medical products and enable enhanced delivery to and experience for customers.

Health Care Benefits Provider Networks

The Company contracts with physicians, hospitals and other providers for services they provide to members. The Company uses a variety of techniques designed to help encourage appropriate utilization of medical services ("utilization") and maintain affordability of quality coverage. In addition to contracts with providers for negotiated rates of reimbursement, these techniques include creating risk sharing arrangements that align economic incentives with providers, the development and implementation of guidelines for the appropriate utilization of medical services and the provision of data to providers to enable them to improve health care quality. At December 31, 2018 , the Company's underlying nationwide provider network had approximately 1.3 million participating providers, including over 697 thousand primary care and specialist physicians and approximately 5,700 hospitals. Other providers in the Company's provider networks also include laboratory, imaging, urgent care and other freestanding health facilities.

Health Care Benefits Quality Assessment

CMS uses a 5-star rating system to monitor Medicare health care and drug plans and ensure that they meet CMS's quality standards. CMS uses this rating system to provide Medicare beneficiaries with a tool that they can use to compare the overall quality of care and level of customer service of companies that provide Medicare health care and drug plans. The rating system considers a variety of measures adopted by CMS, including quality of preventative services, chronic illness management and overall customer satisfaction. See "Health Care Benefits Pricing" below in this Item 1 for further discussion of star ratings. The Company seeks Health Plan accreditation for Aetna HMO plans from the NCQA. Health care plans seeking accreditation must pass a rigorous, comprehensive review and must annually report on their performance.

Aetna Life Insurance Company (“ALIC”), a wholly-owned subsidiary of the Company, has received nationwide NCQA PPO Health Plan accreditation. As of December 31, 2018 , all of the Company’s Commercial HMO and all of ALIC’s PPO members who were eligible participated in HMOs or PPOs that are accredited by the NCQA.

The Company’s provider selection and credentialing/re-credentialing policies and procedures are consistent with NCQA and URAC, as well as state and federal, requirements. In addition, the Company is certified under the NCQA Credentials Verification Organization (“CVO”) certification program for all certification options and has URAC CVO accreditation.

Quality assessment programs for contracted providers who participate in the Company’s networks begin with the initial review of health care practitioners. Practitioners’ licenses and education are verified, and their work history is collected by the Company or in some cases by the practitioner’s affiliated group or organization. The Company generally requires participating hospitals to be certified by CMS or accredited by the Joint Commission, the American Osteopathic Association, or Det Norske Veritas Healthcare.

The Company also offers quality and outcome measurement programs, quality improvement programs, and health care data analysis systems to providers and purchasers of health care services.

Health Care Benefits Information Systems

The Health Care Benefits segment currently operates and supports an end to end suite of information technology platforms to support member engagement, enrollment, health benefit administration, care management, service operations, financial reporting and analytics. The multiple platforms are supported by an integration layer to facilitate the transfer of real-time data. There is continued focus and investment in digital products to offer innovative solutions and a seamless experience to the Company’s members through mobile and web channels. Capabilities available to members include digital wallet, provider search, cost transparency and behavioral monitoring. The Health Care Benefits segment care management solution supports the Company’s clinicians with data and recommendations. The Company continues to scale its clinical platform and its local personalized care model. The Company aims to build an integrated 360 degree view of the member to ensure that it can guide them through their healthcare journey and provide them a high level of service. Through its analytics platform the Company is beginning to harness the power of data to help drive healthier outcomes and proactive care and enable consumers to take the next best action for their health.

Health Care Benefits Customers

Medical membership is dispersed throughout the United States, and the Company also serves medical members in certain countries outside the United States. See Note 17 ‘‘Segment Reporting’’ contained in the “Notes to Consolidated Financial Statements” in the Annual Report, which is incorporated by reference herein, for additional information on foreign customers. The Company offers a broad range of traditional, voluntary and consumer-directed health insurance products and related services, many of which are available nationwide. Depending on the product, the Company markets to a range of customers including employer groups, individuals, college students, part-time and hourly workers, health plans, providers, governmental units, government-sponsored plans, labor groups and expatriates.

The following table presents total medical membership by United States and other geographic region and funding arrangement at December 31, 2018 :

In thousands	**Insured**	**ASC**	**Total**
Northeast	1,961	3,232	5,193
Southeast	1,752	2,886	4,638
Mid-America	1,632	2,530	4,162
West	1,618	4,510	6,128
Other	587	1,393	1,980
Total medical membership	7,550	14,551	22,101

For additional information on medical membership, see the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Health Care Benefits Segment” in the Annual Report, which section is incorporated by reference herein.

The Company markets both Commercial Insured and ASC products and services primarily to employers that sponsor the Company's products for the benefit of their employees and their employees' dependents. Frequently, larger employers offer employees a choice among coverage options, from which the employee makes his or her selection during a designated annual open enrollment period. Typically, employers pay all of the monthly premiums to the Company and, through payroll deductions, obtain reimbursement from employees for a percentage of the premiums that is determined by each employer. Some Health Care Benefits products are sold directly to employees of employer groups on a fully employee-funded basis. In some cases, the Company bills the covered individual directly.

The Company offers Insured Medicare coverage on an individual basis as well as through employer groups to their retirees. Medicaid and CHIP members are enrolled on an individual basis. The Company also offers Insured health care coverage to members who are dually-eligible for both Medicare and Medicaid.

Health Care Benefits products are sold through the Company's sales personnel; through independent brokers, agents and consultants who assist in the production and servicing of business; and Private Exchanges. For large plan sponsors, independent consultants and brokers are frequently involved in employer health plan selection decisions and sales. In some instances, the Company may pay commissions, fees and other amounts to brokers, agents, consultants and sales representatives who place business with the Company. In certain cases, the customer pays the broker for services rendered, and the Company may facilitate that arrangement by collecting the funds from the customer and transmitting them to the broker. The Company supports marketing and sales efforts with an advertising program that may include television, radio, billboards, print media and social media, supplemented by market research and direct marketing efforts.

The United States federal government is a significant customer of the Health Care Benefits segment through contracts with CMS for coverage of Medicare-eligible individuals, federal employee-related benefit programs and Medicaid products and services. Other than the contracts with CMS, the Health Care Benefits segment is not dependent upon a single customer or a few customers the loss of which would have a significant effect on the earnings of the segment. The loss of business from any one, or a few, independent brokers or agents would not have a material adverse effect on the earnings of the Health Care Benefits segment. For additional information, see Note 17 ''Segment Reporting'' contained in the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein.

Health Care Benefits Pricing

For Commercial Insured plans, contracts containing the pricing and other terms of the relationship are generally established in advance of the policy period and typically have a duration of one year. Fees under ASC plans are generally fixed for a period of one year.

Generally, a fixed premium rate is determined at the beginning of the policy period for Commercial Insured plans. The Company typically cannot recover unanticipated increases in health care and other benefit costs in the current policy period; however, it may consider prior experience for a product in the aggregate or for a specific customer, among other factors, in determining premium rates for future policy periods. Where required by state laws, premium rates are filed and approved by state regulators prior to contract inception. Future results of operations could be adversely affected if the premium rates requested are not approved or are adjusted downward or their approval is delayed by state or federal regulators.

The Company has Medicare Advantage and PDP contracts with CMS to provide HMO, PPO and prescription drug coverage to Medicare beneficiaries in certain geographic areas. Under these annual contracts, CMS pays the Company a fixed capitation payment and/or a portion of the premium, both of which are based on membership and adjusted for demographic and health risk factors. CMS also considers inflation, changes in utilization patterns and average per capita fee-for-service Medicare costs in the calculation of the fixed capitation payment or premium. PDP contracts also provide a risk-sharing arrangement with CMS to limit the Company's exposure to unfavorable expenses or benefit from favorable expenses. Amounts payable to the Company under the Medicare arrangements are subject to annual revision by CMS, and the Company elects to participate in each Medicare service area or region on an annual basis. Premiums paid to the Company for Medicare products are subject to federal government reviews and audits, which can result, and have resulted, in retroactive and prospective premium adjustments and refunds to the government and/or members. In addition to payments received from CMS, some of Medicare Advantage products and all PDP products require a supplemental premium to be paid by the member or sponsoring employer. In some cases these supplemental premiums are adjusted based on the member's income and asset levels. Compared to Commercial Medical products, Medicare contracts generate higher per member per month revenues and health care and other benefit costs.

The Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act (collectively, the "ACA") ties a portion of each Medicare Advantage plan's reimbursement to the plan's "star ratings." Since 2015, plans must have a star rating of four or higher (out of five) to qualify for a quality bonus in their basic premium rates. CMS released 2019

star ratings in October 2018. The 2019 star ratings will be used to determine which Medicare Advantage plans have ratings of four stars or higher and qualify for bonus payments in 2020. Based on membership at December 31, 2018 , 79% of the Company's Medicare Advantage members were in plans with 2019 star ratings of at least 4.0 stars.

Rates for Medicare Supplement products are regulated at the state level and vary by state and plan.

Under Insured Medicaid contracts, state government agencies pay the Company fixed monthly rates per member that vary by state, line of business and demographics; and the Company arranges, pays for and manages the health care services provided to Medicaid beneficiaries. These rates are subject to change by each state, and, in some instances, provide for adjustment for health risk factors. CMS requires these rates to be actuarially sound. The Company also receives fees from customers where it provides services under ASC Medicaid contracts. ASC Medicaid contracts generally are for periods of more than one year, and certain of them contain performance incentives and limited financial risk sharing with respect to certain medical, financial and operational metrics. Under these arrangements, performance is evaluated annually, with associated financial incentive opportunities, and financial risk share obligations are typically limited to a percentage of the fees otherwise payable to the Company. Payments to the Company under Medicaid contracts are subject to the annual appropriation process in the applicable state.

Under Duals contracts, the rate setting process is generally established by CMS in partnership with the state government agency participating in the demonstration project. Both CMS and the state government agency may seek premium and other refunds under certain circumstances, including if the Company fails to comply with CMS regulations or other contractual requirements.

The Company offers HMO and consumer-directed medical and dental plans to federal employees under the Federal Employees Health Benefits ("FEHB") Program and the Federal Employees Dental and Vision Insurance Program. Premium rates and fees for those plans are subject to federal government review and audit, which can result, and have resulted, in retroactive and prospective premium and fee adjustments and refunds to the government and/or members.

Beginning in 2014, the ACA imposed significant new industry-wide fees, assessments and taxes, including an annual levy called the Health Insurer Fee (the "HIF"). In December 2015, the Consolidated Appropriation Act was enacted, which included a one year suspension of the HIF for 2017. In January 2018, the HIF was suspended for 2019. For additional information on the ACA fees, assessments and taxes, see Note 1 ''Significant Accounting Policies'' contained in the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein. The Company's goal is to collect in premiums and fees where possible, or solve for all of these ACA-related fees, assessments and taxes.

Health Care Benefits Seasonality

The majority of Health Care Benefits segment revenues are not seasonal in nature. However, the Health Care Benefits segment's quarterly operating income progression is impacted by (i) the seasonality of benefit costs which generally increase during the year as Insured members progress through their annual deductibles and out-of-pocket expense limits and (ii) the seasonality of operating expenses which are generally the highest during the fourth quarter due to increased marketing spending associated with Medicare annual enrollment. As a result, the Health Care Benefits segment's operating income generally is the highest in the first quarter of the year and lowest in the fourth quarter of the year.

Health Care Benefits Competition

The health care benefits industry is highly competitive, primarily due to a large number of for-profit and not-for-profit competitors, competitors' marketing and pricing and a proliferation of competing products, including new products that are continually being introduced into the marketplace. New entrants into the marketplace, as well as consolidation within the industry, have contributed to and are expected to intensify the competitive environment. In addition, the rapid pace of change as the industry evolves towards a consumer-focused retail marketplace, including Public and Private Exchanges, and the increased use of technology to interact with members, providers and customers, increase the risks currently faced from new entrants and disruptive actions by existing competitors compared to prior periods. References to competitors and other companies throughout this Annual Report on Form 10-K, including the information incorporated by reference herein, are for illustrative or comparison purposes only and do not indicate that these companies are the Company's or any segment's only competitors or closest competitors.

The Company believes that the significant factors that distinguish competing health plans include the perceived overall quality (including accreditation status), quality of service, comprehensiveness of coverage, cost (including premium rates, provider discounts and member out-of-pocket costs), product design, financial stability and ratings, breadth and quality of

provider networks, ability to offer different provider network options, providers available in such networks, and quality of member support and care management programs. The Company believes that it is competitive on each of these factors. The Company's ability to increase the number of persons covered by its health plans or to increase Health Care Benefits segment revenues is affected by its ability to differentiate itself from its competitors on these factors. Competition may also affect the availability of services from health care providers, including primary care physicians, specialists and hospitals.

Insured products compete with local and regional health care benefits plans, health care benefits and other plans sponsored by other large commercial health care benefit insurance companies, health system owned health plans, new entrants into the marketplace and numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross and Blue Shield Association. The largest competitor in Medicare products is Original Medicare. Additional Health Care Benefits segment competitors include other types of medical and dental provider organizations, various specialty service providers (including PBM services providers), health care consultants, financial services companies, integrated health care delivery organizations (networks of providers who also coordinate administrative services for and assume insurance risk of their members), third party administrators ("TPAs"), HIT companies and, for certain plans, programs sponsored by the federal or state governments. Emerging competitors include start up health care benefits plans, technology companies, provider-owned health plans, new joint ventures (including not-for-profit joint ventures among firms from multiple industries), technology firms, financial services firms that are distributing competing products on their proprietary Private Exchanges, and consulting firms that are distributing competing products on their proprietary Private Exchanges, as well as non-traditional distributors such as retail companies. The Company's ability to increase the number of persons enrolled in Insured Commercial Medical products also is affected by the desire and ability of employers to self-fund their health coverage.

The Health Care Benefits segment's ASC plans compete primarily with other large commercial health care benefit companies, numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross and Blue Shield Association and TPAs.

The Health Care Benefits segment's international products compete with local, global and United States based health plans and commercial health care benefit insurance companies, many of whom have a longer operating history and better brand recognition and greater marketplace presence in one or more geographies.

The provider solutions and HIT marketplaces and products are evolving rapidly. The Company competes for provider solutions and HIT business with other large health plans and commercial health care benefit insurance companies as well as information technology companies and companies that specialize in provider solutions and HIT. Many information technology product competitors have longer operating histories, better brand recognition, greater marketplace presence and more experience in developing innovative products.

In addition to competitive pressures affecting the Company's ability to obtain new customers or retain existing customers, the Health Care Benefits segment's medical membership has been and may continue to be adversely affected by adverse and/or uncertain economic conditions and reductions in workforce by existing customers due to adverse and/or uncertain general economic conditions, especially in the United States and industries where such membership is concentrated.

Health Care Benefits Reinsurance

The Company currently has several reinsurance agreements with non-affiliated insurers that relate to Health Care Benefits insurance policies. The Company entered into these contracts to reduce the risk of catastrophic losses which in turn reduces capital and surplus requirements. The Company frequently evaluates reinsurance opportunities and refines its reinsurance and risk management strategies on a regular basis.

Corporate/Other Segment

The Company presents the remainder of its financial results in the Corporate/Other segment, which consists of:

- Management and administrative expenses to support the overall operations of the Company, which include certain aspects of executive management and the corporate relations, legal, compliance, human resources, information technology and finance departments; and
- Products for which the Company no longer solicits or accepts new customers such as large case pensions and long-term care insurance products.

Generic Sourcing Venture

The Company and Cardinal Health, Inc. (“Cardinal”) each have a 50% ownership in Red Oak Sourcing, LLC (“Red Oak”), a generic pharmaceutical sourcing entity. Under this arrangement, the Company and Cardinal contributed their sourcing and supply chain expertise to Red Oak and agreed to source and negotiate generic pharmaceutical supply contracts for both companies through Red Oak. Red Oak does not own or hold inventory on behalf of either company.

Working Capital Practices

The Company funds the growth of its businesses through a combination of cash flow from operations, commercial paper and other short-term borrowings, proceeds from sale-leaseback transactions and long-term borrowings. For additional information on the Company’s working capital practices, see the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources” in the Annual Report, which section is incorporated by reference herein. The majority of the Retail/LTC segment non-pharmacy revenues are paid in cash, or with debit or credit cards. Managed care organizations, pharmacy benefit managers, government funded health care programs, commercial employers and other third party insurance programs, which represent the vast majority of the Company’s consolidated pharmacy revenues, typically settle in less than 30 days. With the exception of the Medicare Part D services, described further below, the remainder of the Company’s consolidated pharmacy revenues are paid in cash, or with debit or credit cards. Employer groups, individuals, college students, part-time and hourly workers, health plans, providers, governmental units, government-sponsored plans (with the exception of Medicare Part D services, which are described below), labor groups and expatriates, which represent the vast majority of Health Care Benefits segment revenues, typically settle in less than 30 days. As a provider of Medicare Part D services, the Company contracts annually with CMS. Utilization of services each plan year results in the accumulation of either a receivable from or a payable to CMS. The timing of settlement of the receivable or payable with CMS takes several quarters which impacts working capital from year to year.

Colleague Development

As of December 31, 2018 , the Company employed approximately 295,000 colleagues in 50 states, the District of Columbia, Puerto Rico and a number of countries outside the United States. To deliver the highest levels of service to customers, the Company devotes considerable time and attention to its people and service standards. The Company emphasizes attracting and training knowledgeable, friendly and helpful associates to work in the organization.

Intellectual Property

The Company has registered and/or applied to register a variety of trademarks and service marks used throughout its businesses, as well as domain names, and relies on a combination of copyright, patent, trademark and trade secret laws, in addition to contractual restrictions, to establish and protect the Company’s proprietary rights. The Company regards its intellectual property as having significant value in the Pharmacy Services, Retail/LTC and Health Care Benefits segments. The Company is not aware of any facts that could materially impact the continuing use of any of its intellectual property.

Government Regulation

Overview

The Company’s operations are subject to comprehensive federal, state and local laws and regulations and comparable multiple levels of international regulation in the jurisdictions in which it does business. There also continues to be a heightened level of review and/or audit by federal, state and international regulators of the health and related benefits industry’s business and reporting practices. In addition, many of the Company’s PBM clients and the Company’s payors in the Retail/LTC Segment, including insurers, Medicare Part D plans, Managed Medicaid plans and managed care organizations (“MCOs”), are themselves subject to extensive regulations that affect the design and implementation of prescription drug benefit plans that they sponsor. Similarly, the Company’s LTC clients, such as skilled nursing facilities, are subject to government regulations, including many of the same government regulations to which the Company is subject.

The laws and rules governing the Company’s businesses and interpretations of those laws and rules continue to expand and become more restrictive each year and are subject to frequent change. The application of these complex legal and regulatory requirements to the detailed operation of the Company’s businesses creates areas of uncertainty. Further, there are numerous proposed health care laws and regulations at the federal, state and international levels, some of which could adversely affect the Company’s businesses if they are enacted. The Company cannot predict whether pending or future federal or state legislation or

court proceedings, including future United States Congressional appropriations, will change various aspects of the industries in which it operates or the health care industry generally or the impact those changes will have on the Company's businesses, results of operations and/or cash flows, but the effects could be materially adverse. Any failure or alleged failure to comply with applicable laws and regulations as summarized below, or any adverse applications or interpretations of, or changes in, the laws and regulations affecting the Company and/or its businesses, could have a material adverse effect on the Company's results of operations, financial condition and/or cash flows. See Item 3, "Legal Proceedings" for further information.

The Company cannot give any assurances that its businesses, financial condition, results of operations and/or cash flows will not be materially adversely affected, or that it will not be required to materially change its business practices, based on: (i) future enactment of new health care or other laws or regulations; (ii) the interpretation or application of existing laws or regulations, including the laws and regulations described in this Government Regulation section, as they may relate to one or more of the Company's businesses, one or more of the industries in which it operates and/or the health care industry generally; (iii) pending or future federal or state governmental investigations of one or more of the Company's businesses, one or more of the industries in which it operates and/or the health care industry generally; (iv) pending or future government audits, investigations or enforcement actions against the Company; (v) adverse developments in any pending *qui tam* lawsuit against the Company, whether sealed or unsealed, or in any future *qui tam* lawsuit that may be filed against the Company; or (vi) adverse developments in other pending or future legal proceedings against the Company or affecting one or more of the industries in which it operates and/or the health care industry generally.

Laws and Regulations Related to Multiple Segments of the Company's Business

Laws Related to Reimbursement by Government Programs - The Company is subject to various federal and state laws concerning its submission of claims for reimbursement by Medicare, Medicaid and other federal and state government-sponsored health care programs. Potential sanctions for violating these laws include recoupment or reduction of government reimbursement amounts, civil penalties, treble damages, and exclusion from participation in government health care programs. Such laws include the federal False Claims Act (the "False Claims Act"), the federal anti-kickback statute, state false claims acts and anti-kickback statutes in most states, the federal "Stark Law" and related state laws. In particular, the False Claims Act prohibits intentionally submitting, conspiring to submit, or causing to be submitted, false claims, records, or statements to the federal government, or intentionally failing to return overpayments, in connection with reimbursement by federal government programs. In addition, any claim for government reimbursement also violates the False Claims Act where it results from a violation of the federal anti-kickback statute.

Both federal and state false claims laws permit private individuals to file qui tam or "whistleblower" lawsuits on behalf of the federal or state government. Participants in the health and related benefits industry, including the Company, frequently are subject to actions under the False Claims Act or similar state laws. The federal Stark Law generally prohibits physicians from referring Medicare or Medicaid beneficiaries for certain services, including outpatient prescription drugs, to any entity with which the physician, or an immediate family member of the physician, has a financial relationship. The Stark Law further prohibits the entity receiving a prohibited referral from presenting a claim for reimbursement by Medicare or Medicaid for services furnished pursuant to the prohibited referral. Various states have enacted similar laws.

The ACA - The ACA made broad-based changes to the United States health care system. If the ACA is not further amended, repealed or replaced, certain of its components will continue to be phased in until 2022. While the Company anticipates continued efforts in 2019 and beyond to invalidate, modify, repeal or replace the ACA, the Company expects aspects of the ACA to continue to significantly impact its business operations and results of operations, including pricing, medical benefit ratios ("MBRs") and the geographies in which the Company's products are available.

While most of the significant aspects of the ACA became effective during or prior to 2014, parts of the ACA continue to evolve through the promulgation of executive orders, regulations and guidance as well as ongoing litigation. Additional changes to the ACA and those regulations and guidance at the federal and/or state level are likely, and those changes are likely to be significant. Growing federal and state budgetary pressures make it more likely that any changes, including changes at the state level in response to changes to, or invalidation, repeal or replacement of, the ACA and/or changes in the funding levels and/or payment mechanisms of federally supported benefit programs, will be adverse to us. For example, if any elements of the ACA are invalidated or repealed at the federal level, the Company expects that some states would seek to enact similar requirements, such as prohibiting pre-existing condition exclusions, prohibiting rescission of insurance coverage, requiring coverage for dependents up to age 26, requiring guaranteed renewability of insurance coverage and prohibiting lifetime limits on insurance coverage.

The expansion of health care coverage contemplated by the ACA is being funded in part by reductions to the reimbursements the Company and other health plans are paid by the federal government for Medicare members, among other sources. While not all-inclusive, the following are some of the key provisions of the ACA (assuming it continues to be implemented in its current form) that become effective on or after January 1, 2019. The Company continues to evaluate these provisions and the related regulations and regulatory guidance to determine the impact that they will have on its business operations and results of operations:

- The imposition on the Company and other health insurers, health plans and other market participants of significant fees, assessments and taxes, including an annual non-tax deductible industry-wide HIF that was $14.3 billion for 2018 and has been suspended for 2019. As currently enacted, the HIF will apply for 2020, be higher for 2020 than for 2018 and increase in 2021 and annually thereafter.
- A non-tax deductible 40% excise tax on employer-sponsored health care benefits above a certain threshold beginning in 2022.
- Reduced funding for Medicaid expansion, which began in 2017.

The ACA also specifies minimum medical loss ratios ("MLRs") for Commercial and Medicare Insured products, specifies features required to be included in Commercial benefit designs, limits Commercial individual and small group rating and pricing practices, encourages additional competition (including potential incentives for new market entrants) and significantly increases federal and state oversight of health plans, including regulations and processes that could delay or limit the Company's ability to appropriately increase its health plan premium rates. This in turn could adversely affect the Company's ability to continue to participate in certain product lines and/or geographies that it serves today.

Potential repeal of the ACA, ongoing legislative, regulatory and administrative policy changes to the ACA, the results of congressional and state level elections, the December 2018 U.S. District Court decision invalidating the ACA and other pending litigation challenging aspects of the law or funding for the law and federal budget negotiations continue to create uncertainty about the ultimate impact of the ACA. The pending litigation challenging the ACA includes challenges by various states of the federal government's decision to curtail payments related to the Cost-Sharing Subsidy Program. The time frame for conclusion and final outcome and ultimate impact of this litigation are uncertain. Given the inherent difficulty of foreseeing the nature and scope of future changes to the ACA and how states, businesses and individuals will respond to those changes, the Company cannot predict the impact on it of future changes to the ACA. It is reasonably possible that invalidation, repeal or replacement of or other changes to the ACA and/or states' responses to such changes, in the aggregate, could have a significant adverse effect on the Company's businesses, results of operations and cash flows.

Medicare Regulation - The Company's Medicare Advantage products compete directly with Original Medicare and Medicare Advantage products offered by other Medicare Advantage organizations and Medicare Supplement products offered by other insurers. The Company's Medicare PDP and Medicare Supplement products are products that Medicare beneficiaries who are enrolled in Original Medicare purchase to enhance their Original Medicare coverage.

The Company continues to expand the number of counties in which it offers Medicare products. The Company expects to further expand its Medicare service area and products in 2019 and is seeking to substantially grow its Medicare membership, revenue and results of operations over the next several years, including through growth in Medicare Supplement products. The anticipated organic expansion of the Medicare service area and Medicare products offered and the Medicare-related provisions of the ACA significantly increase the Company's exposure to funding and regulation of, and changes in government policy with respect to and/or funding or regulation of, the various Medicare programs in which the Company participates, including changes in the amounts payable to us under those programs and/or new reforms or surcharges on existing programs. For example, since the 2014 contract year, the ACA has required minimum MLRs for Medicare Advantage and Medicare Part D plans of 85%. If a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years, it will become ineligible to enroll new members. If a Medicare Advantage contract pays rebates for five consecutive years, it will be terminated by CMS.

The Company's Medicare Advantage and PDP products are heavily regulated by CMS. The regulations and contractual requirements applicable to the Company and other private participants in Medicare programs are complex, expensive to comply with and subject to change. For example, in the second quarter of 2014, CMS issued a final rule implementing the ACA requirements that Medicare Advantage and PDP plans report and refund to CMS overpayments that those plans receive from CMS. The precise interpretation, impact and legality of this rule are not clear and are subject to pending litigation. Payments the Company receives from CMS for its Medicare Advantage and Part D businesses also are subject to risk adjustment based on the health status of the individuals enrolled. Elements of that risk adjustment mechanism continue to be challenged by the DOJ, the Office of Inspector General ("OIG") and CMS itself. Substantial changes in the risk adjustment mechanism, including changes

that result from enforcement or audit actions, could materially affect the fairness of the Company's Medicare reimbursement, require the Company to raise prices or reduce the benefits offered to Medicare beneficiaries, and potentially limit the Company's (and the industry's) participation in the Medicare program.

The Company has invested significant resources to comply with Medicare standards, and its Medicare compliance efforts will continue to require significant resources. CMS may seek premium and other refunds, prohibit the Company from continuing to market and/or enroll members in or refuse to passively enroll members in one or more of the Company's Medicare or Medicare-Medicaid demonstration (historically known as "dual eligible") plans, exclude us from participating in one or more Medicare, dual eligible or dual eligible special needs plan programs and/or institute other sanctions and/or civil monetary penalties against the Company if it fails to comply with CMS regulations or its Medicare contractual requirements. The Company's Medicare Supplement products are regulated at the state level.

CMS regularly audits the Company's performance to determine its compliance with CMS's regulations and its contracts with CMS and to assess the quality of services it provides to Medicare Advantage and PDP beneficiaries. For example, CMS currently conducts risk adjustment data validation ("RADV") audits of a subset of Medicare Advantage contracts for each contract year. Since 2013, CMS has selected certain of the Company's Medicare Advantage contracts for various years for RADV audit. The OIG also is auditing the Company's risk adjustment data and that of other companies, and the Company expects CMS and the OIG to continue auditing risk adjustment data. The Company also has received Civil Investigative Demands ("CIDs") from, and provided documents and information to, the Civil Division of the DOJ in connection with a current investigation of its patient chart review processes in connection with risk adjustment data submissions under Parts C and D of the Medicare program.

On October 26, 2018, CMS issued proposed rules related to, among other things, changes to the RADV audit methodology established by CMS in 2012, CMS projects that the changes to the RADV audit methodology would increase its recoveries from Medicare Advantage plans as a result of RADV audits. CMS has requested comments on the proposed rules, including whether the proposed RADV rule change should apply retroactively to audits of Medicare Advantage plans for contract year 2011 and forward. The Company is evaluating the potential adverse effect, which could be material, on the Company's results of operations, financial condition, and cash flows if the proposed RADV rule change were adopted as proposed. CMS also has announced its intent to use third party auditors to attain its ultimate goal of subjecting all Medicare Advantage contracts to either a comprehensive or a targeted RADV audit for each contract year.

A portion of each Medicare Advantage plan's reimbursement is tied to the plan's "star ratings." The star rating system considers a variety of measures adopted by CMS, including quality of preventative services, chronic illness management, compliance and overall customer satisfaction. Only Medicare Advantage plans with an overall star rating of four or more stars (out of five stars) are eligible for a quality bonus in their basic premium rates. As a result, the Company's Medicare Advantage plans' results of operations in 2019 and going forward will be significantly affected by their star ratings. The Company's star ratings and past performance scores are adversely affected by the compliance issues that arise each year in its Medicare operations. CMS released the Company's 2019 star ratings in October 2018. The Company's 2019 star ratings will be used to determine which of its Medicare Advantage plans have ratings of four stars or higher and qualify for bonus payments in 2020. Based on the Company's membership at December 31, 2018, 79% of its Medicare Advantage members were in plans with 2019 star ratings of at least 4.0 stars. CMS will release updated stars ratings in October 2019 that will be used to determine which Medicare Advantage plans have ratings of four stars or higher and qualify for bonus payments in 2021. CMS also gives PDPs star ratings which affect PDP's enrollment and result in contract termination if the PDP is rated less than three stars for three consecutive years. CMS continues to revise its star ratings system to make it harder to achieve four stars or more. Despite the Company's success in maintaining high star ratings and other quality measures for 2019 and the continuation of its improvement efforts, there can be no assurances that it will be successful in maintaining or improving its star ratings in future years. Accordingly, the Company's Medicare Advantage plans may not be eligible for full level quality bonuses, which could adversely affect the benefits such plans can offer, reduce membership and/or reduce profit margins.

Overall, the Company projects the benchmark payment rates in CMS's April 2018 final notice detailing final Medicare Advantage benchmark payment rates for 2019 (the "Final Notice") will increase funding for the Company's Medicare Advantage business, excluding the impact of coding trend, by approximately 2.5 percent in 2019 compared to 2018. This 2019 rate increase only partially offsets the challenge the Company faces from the impact of the increasing cost of medical care (including prescription medications) and CMS local and national coverage decisions that require the Company to pay for services and supplies that are not factored into the Company's bids. The federal government may seek to impose restrictions on the configuration of pharmacy or other provider networks for Medicare Advantage and/or PDP plans, or otherwise restrict the ability of these plans to alter benefits, negotiate prices or establish other terms to improve affordability or maintain viability of products. The Company currently believes that the payments received and will receive in the near term are adequate to justify

the Company's continued participation in the Medicare Advantage and PDP programs, although there are economic and political pressures to continue to reduce spending on the program, and this outlook could change.

Going forward, the Company expects CMS, the OIG, the DOJ, other federal agencies and the United States Congress to continue to scrutinize closely each component of the Medicare program (including Medicare Advantage, PDP, demonstration projects such as Medicare-Medicaid plans and provider network access and adequacy), modify the terms and requirements of the program and possibly seek to recast or limit private insurers' role. It is not possible to predict the outcome of this Congressional or regulatory activity, any of which could adversely affect the Company.

Anti-Remuneration Laws - Federal law prohibits, among other things, an entity from knowingly and willfully offering, paying, soliciting or receiving, subject to certain exceptions and "safe harbors," any remuneration to induce the referral of individuals or the purchase, lease or order of items or services for which payment may be made under Medicare, Medicaid or certain other federal and state health care programs. A number of states have similar laws, some of which are not limited to services paid for with government funds. Sanctions for violating these federal and state anti-remuneration laws may include imprisonment, criminal and civil fines, and exclusion from participation in Medicare, Medicaid and other federal and state government-sponsored health care programs. Companies involved in public health care programs such as Medicare and/or Medicaid are required to maintain compliance programs to detect and deter fraud, waste and abuse, and are often the subject of fraud, waste and abuse investigations and audits. The Company has invested significant resources to comply with Medicare and Medicaid program standards. Ongoing vigorous law enforcement and the highly technical regulatory scheme mean that the Company's compliance efforts in this area will continue to require significant resources.

Antitrust and Unfair Competition - The Federal Trade Commission ("FTC") investigates and prosecutes practices that are "unfair trade practices" or "unfair methods of competition." Numerous lawsuits have been filed throughout the United States against pharmaceutical manufacturers, retail pharmacies and/or PBMs under various federal and state antitrust and unfair competition laws challenging, among other things: (i) brand name drug pricing and rebate practices of pharmaceutical manufacturers, (ii) the maintenance of retail or specialty pharmacy networks by PBMs, and (iii) various other business practices of PBMs and retail pharmacies. To the extent that the Company appears to have actual or potential market power in a relevant market or CVS Pharmacy, CVS Specialty or MinuteClinic plays a unique or expanded role in a PBM or Health Care Benefits segment product offering, the Company's business arrangements and uses of confidential information may be subject to heightened scrutiny from an anti-competitive perspective and possible challenge by state or federal regulators or private parties.

Privacy and Confidentiality Requirements - Many of the Company's activities involve the receipt, use and disclosure by the Company of personally identifiable information ("PII") as permitted in accordance with applicable federal and state privacy and data security laws, which require organizations to provide appropriate privacy and security safeguards for such information. In addition to PII, the Company uses and discloses de-identified data for analytical and other purposes when permitted. Additionally, there are industry standards for handling credit card data known as the Payment Card Industry Data Security Standard, which are a set of requirements designed to help ensure that entities that process, store or transmit credit card information maintain a secure environment. Certain states have incorporated these requirements into state laws or enacted other requirements relating to the use and/or disclosure of PII.

The federal Health Insurance Portability and Accountability Act of 1996 and the regulations issued thereunder (collectively, "HIPAA"), as further modified by the American Recovery and Reinvestment Act of 2009 ("ARRA") impose extensive requirements on the way in which health plans, health care providers, health care clearinghouses (known as "covered entities") and their business associates use, disclose and safeguard protected health information ("PHI"). Further, ARRA requires us and other covered entities to report any breaches of PHI to impacted individuals and to the United States Department of Health and Human Services ("HHS") and to notify the media in any states where 500 or more people are impacted by the unauthorized release or use of or access to PHI. Criminal penalties and civil sanctions may be imposed for failing to comply with HIPAA standards. The Health Information Technology for Economic and Clinical Health Act (the "HITECH Act"), enacted as part of ARRA, amended HIPAA to impose additional restrictions on third-party funded communications using PHI and the receipt of remuneration in exchange for PHI. The HITECH Act also extended HIPAA privacy and security requirements and penalties directly to business associates. HHS has begun to audit health plans, providers and other parties to enforce HIPAA compliance, including with respect to data security.

In addition to HIPAA, state health privacy laws apply to the extent they are more protective of individual privacy than is HIPAA, including laws that place stricter controls on the release of information relating to specific diseases or conditions and requirements to notify members of unauthorized release or use of or access to PHI. States also have adopted regulations to implement provisions of the Financial Modernization Act of 1999 (also known as the Gramm-Leach-Bliley Act ("GLBA")) which generally require insurers, including health insurers, to provide customers with notice regarding how their non-public

personal health and financial information is used and the opportunity to "opt out" of certain disclosures before the insurer shares such information with a non-affiliated third party. Like HIPAA, GLBA sets a "floor" standard, allowing states to adopt more stringent requirements governing privacy protection. Complying with additional state requirements requires us to make additional investments beyond those the Company has made to comply with HIPAA and GLBA.

The Cybersecurity Information Sharing Act of 2015 encourages organizations to share cyber threat indicators with the federal government and, among other things, directs HHS to develop a set of voluntary cybersecurity best practices for organizations in the health care industry. In addition, states have begun to enact more comprehensive privacy laws and regulations addressing consumer rights to data protection or transparency. States also are starting to issue regulations and proposed regulations specifically related to cybersecurity, such as the regulations issued by the New York Department of Financial Services. Complying with conflicting cybersecurity regulations, which may differ from state to state, requires significant resources. In addition, differing approaches to state privacy and/or cyber-security regulation and varying enforcement philosophies may materially and adversely affect the Company's ability to standardize its products and services across state lines. Widely-reported large scale commercial data breaches in the United States and abroad increase the likelihood that additional data security legislation will be considered by additional states. These legislative and regulatory developments will impact the design and operation of the Company's businesses, its privacy and security strategy and its web-based and mobile assets.

Finally, Public Exchanges are required to adhere to privacy and security standards with respect to PII, and to impose privacy and security standards that are at least as protective of PII as those the Public Exchange has implemented for itself or non-Public Exchange entities, which include insurers offering plans through the Public Exchanges and their designated downstream entities, including PBMs and other business associates. These standards may differ from, and be more stringent than, HIPAA.

Consumer Protection Laws - The federal government has many consumer protection laws, such as the Federal Trade Commission Act, the Federal Postal Service Act, the Consumer Product Safety Act and the FTC's Telemarketing Sales Rule. Most states also have similar consumer protection laws. In addition, the federal government and most states have adopted laws and/or regulations requiring places of public accommodation, health care services and other goods and services to be accessible to people with disabilities. These consumer protection and accessibility laws and regulations have been the basis for investigations, lawsuits and multistate settlements relating to, among other matters, the marketing of loyalty programs, and health care products and services, pricing accuracy, expired front store products, financial incentives provided by drug manufacturers to pharmacies in connection with therapeutic interchange programs, disclosures related to how personal data is used and protected and the accessibility of goods and services to people with disabilities. As a result of the Company's direct-to-consumer activities, including mobile and web-based solutions offered to members and to other consumers, the Company also is subject to federal and state regulations applicable to electronic communications and to other general consumer protection laws and regulations. For example, the California Consumer Privacy Act will become effective in 2020, and the Company expects additional federal and state regulation of consumer privacy protection to be enacted in 2019. The Company expects these new laws and regulations to impact the design of its products and services and the management and operation of its businesses and to increase its compliance costs.

Telemarketing and Other Outbound Contacts - Certain federal and state laws, such as the Telephone Consumer Protection Act, give the FTC, Federal Communications Commission and state attorneys general the ability to regulate, and bring enforcement actions relating to, telemarketing practices and certain automated outbound contacts such as phone calls, texts or emails. Under certain circumstances, these laws provide consumers with a private right of action. Violations of these laws could result in substantial statutory penalties and other sanctions.

Pharmacy and Professional Licensure and Regulation - The Company is subject to a variety of intersecting federal and state statutes and regulations that govern the wholesale distribution of drugs; operation of retail, specialty, infusion, LTC and mail order pharmacies; licensure of facilities and professionals, including pharmacists, technicians, nurses and other healthcare professionals; registration of facilities with the United States Drug Enforcement Administration ("DEA") and analogous state agencies that regulate controlled substances; packaging, storing, shipping and tracking of pharmaceuticals; repackaging of drug products; labeling, medication guides and other consumer disclosures; interactions with prescribers and health care professionals; compounding of prescription medications; dispensing of controlled and non-controlled substances; counseling of patients; transfers of prescriptions; advertisement of prescription products and pharmacy services; security; inventory control; recordkeeping; reporting to Boards of Pharmacy, the United States Food and Drug Administration ("FDA"), the Consumer Product Safety Commission, the DEA and related state agencies; and other elements of pharmacy practice. Pharmacies are highly regulated and have contact with a wide variety of federal, state and local agencies, with various powers to investigate, inspect, audit or solicit information, including Boards of Pharmacy and Nursing, the DEA, the FDA, the United States Department of Justice, HHS and others. Many of these agencies have broad enforcement powers, conduct audits on a regular

basis, can impose substantial fines and penalties, and may revoke the license, registration or program enrollment of a facility or professional.

State Insurance, HMO and Insurance Holding Company Regulation - A number of states regulate affiliated groups of insurers and HMOs such as the Company under holding company statutes. These laws may, among other things, require prior regulatory approval of dividends and material intercompany transfers of assets and transactions between the regulated companies and their affiliates, including their parent holding companies. The Company expects the states in which its insurance and HMO subsidiaries are licensed to continue to expand their regulation of the corporate governance and internal control activities of its insurance companies and HMOs. Changes to state insurance, HMO and/or insurance holding company laws or regulations or changes to the interpretation of those laws or regulations, including due to regulators' increasing concerns regarding insurance company and/or HMO solvency due, among other things, to recent and expected payor insolvencies, could negatively affect the Company's businesses in various ways, including through increases in solvency fund assessments, requirements that the Company hold greater levels of capital and/or delays in approving dividends from regulated subsidiaries.

PBM offerings of prescription drug coverage under certain risk arrangements may be subject to laws and regulations in various states. Such laws may require that the party at risk become licensed as an insurer, establish reserves or otherwise demonstrate financial viability. Laws that may apply in such cases include insurance laws and laws governing MCOs and limited prepaid health service plans.

The states of domicile of the Company's regulated subsidiaries have statutory risk-based capital, or "RBC", requirements for health and other insurance companies and HMOs based on the RBC Model Act. These RBC requirements are intended to assess the capital adequacy of life and health insurers and HMOs, taking into account the risk characteristics of a company's investments and products. The RBC Model Act sets forth the formula for calculating RBC requirements, which are designed to take into account asset risks, insurance risks, interest rate risks and other relevant risks with respect to an individual company's business. In general, under these laws, an insurance company or HMO must submit a report of its RBC level to the insurance department or insurance commissioner of its state of domicile for each calendar year. At December 31, 2018, the RBC level of each of the Company's insurance and HMO subsidiaries was above the level that would require regulatory action.

For information regarding restrictions on certain payments of dividends or other distributions by the Company's HMO and insurance company subsidiaries, see Note 12 ''Shareholders' Equity'' contained in the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein.

The holding company laws for the states of domicile of certain of the Company's subsidiaries also restrict the ability of any person to obtain control of an insurance company or HMO without prior regulatory approval. Under those statutes, without such approval (or an exemption), no person may acquire any voting security of an insurance holding company (such as the Company's parent company, CVS Health Corporation) that controls an insurance company or HMO, or merge with such a holding company, if as a result of such transaction such person would control the insurance holding company. Control is generally defined as the direct or indirect power to direct or cause the direction of the management and policies of a person and is presumed to exist if a person directly or indirectly owns or controls 10% or more of the voting securities of another person.

Certain states have laws that prohibit submitting a false claim or making a false record or statement in order to secure reimbursement from an insurance company. These state laws vary, and violation of them may lead to the imposition of civil or criminal penalties.

Government Agreements and Mandates - The Company and/or its various affiliates are subject to certain consent decrees, settlement and other agreements, corrective action plans and corporate integrity agreements with various federal, state and local authorities relating to such matters as privacy practices, controlled substances, Medicare Part D prescription drug plans, expired products, environmental and safety matters, marketing and advertising practices, PBM, LTC and other pharmacy operations and various other business practices. Certain of these agreements contain ongoing reporting, monitoring and/or other compliance requirements for the Company. Failure to meet the Company's obligations under these agreements could result in civil or criminal remedies, financial penalties, administrative remedies, and/or exclusion from participation in federal health care programs.

Environmental and Safety Regulation - The Company's businesses are subject to various federal, state and local laws, regulations and other requirements pertaining to protection of the environment, public health and employee safety, including, for example, regulations governing the management of hazardous substances, the cleaning up of contaminated sites, and the maintenance of safe working conditions in the Company's stores, distribution centers and other facilities. Governmental agencies at the federal, state and local levels continue to focus on the retail and health care sectors' compliance with such laws

and regulations, and have at times pursued enforcement activities. Any failure to comply with these regulations could result in fines or other sanctions by government authorities.

ERISA Regulation - The Employee Retirement Income Security Act of 1974 ("ERISA"), provides for comprehensive federal regulation of certain employee pension and benefit plans, including private employer and union sponsored health plans and certain other plans that contract with us to provide PBM services. In general, the Company assists plan sponsors in the administration of their health benefit plans, including the prescription drug benefit portion of those plans, in accordance with the plan designs adopted by the plan sponsors. In addition, the Company may have fiduciary duties where it has specifically contracted with a plan sponsor to accept limited fiduciary responsibility, such as for the adjudication of initial prescription drug benefit claims and/or the appeals of denied claims under a plan. In addition to its fiduciary provisions, ERISA imposes civil and criminal liability on service providers to health plans and certain other persons if certain forms of illegal remuneration are made or received. These provisions of ERISA are broadly written and their application to specific business practices is often uncertain.

Some of the Company's health and related benefits and large case pensions products and services and related fees also are subject to potential issues raised by judicial interpretations relating to ERISA. Under those interpretations, together with United States Department of Labor ("DOL") regulations, the Company may have ERISA fiduciary duties with respect to PBM members and/or certain general account assets held under contracts that are not guaranteed benefit policies. As a result, certain transactions related to those general account assets are subject to conflict of interest and other restrictions, and the Company must provide certain disclosures to policyholders annually. The Company must comply with these restrictions or face substantial penalties.

In addition, ERISA generally preempts all state and local laws that relate to employee benefit plans, but the extent of the pre-emption continues to be reviewed by courts.

Other Legislative Initiatives and Regulatory Initiatives - The United States federal and state governments, as well as governments in other countries where the Company does business, continue to enact and seriously consider many broad-based legislative and regulatory proposals that have had a material impact on or could materially impact various aspects of the health care and related benefits system and the Company's businesses. For example:

- Under the Budget Control Act of 2011 and the American Taxpayer Relief Act of 2012 significant, automatic across-the-board budget cuts (known as sequestration) began in March 2013, including Medicare spending cuts of not more than 2% of total program costs per year through 2024. Significant uncertainty remains as to whether and how the United States Congress will proceed with actions that create additional federal revenue and/or with entitlement reform. The Company cannot predict future federal Medicare or federal or state Medicaid funding levels or the impact that future federal or state budget actions or entitlement program reform, if it occurs, will have on the Company's businesses, operations or results of operations, but the effects could be materially adverse, particularly on the Company's Medicare and/or Medicaid revenues, MBRs and results of operations.
- The European Union's ("EU's") General Data Protection Regulation ("GDPR") began to apply across the EU during 2018.
- Other significant legislative and/or regulatory measures which are or recently have been under consideration include the following:
    - Elimination of the payment of manufacturer's rebates on prescription drugs to PBMs, PDPs and Managed Medicaid organizations in connection with federally funded health care programs. In January 2019, HHS proposed regulations that would exclude such rebates from the safe harbor that currently is available for such payments under the federal anti-kickback statute.
    - Imposing requirements and restrictions on the design and/or administration of pharmacy benefits plans offered by the Company's and its clients' health plans and/or its PBM clients and/or the services the Company provides to those clients, including restricting or eliminating the use of formularies for prescription drugs; restricting the Company's ability to require members to obtain drugs through a home delivery or specialty pharmacy; restricting the Company's ability to place certain specialty or other drugs in the higher cost tiers of its pharmacy formularies; restricting the Company's ability to make changes to drug formularies and/or clinical programs; limiting or eliminating rebates on pharmaceuticals; requiring the use of up front purchase price discounts on pharmaceuticals in lieu of rebates; restricting the Company's ability to configure its health plan and retail pharmacy networks; and restricting or eliminating the use of certain drug pricing methodologies.
    - Increased federal or state government regulation of, or involvement in, the pricing and/or purchasing of drugs.

- Restricting the Company's ability to limit providers' participation in its networks and/or remove providers from its networks by imposing network adequacy requirements or otherwise (including in its Medicare and Commercial Health Care Benefits products).
- Imposing assessments on (or to be collected by) health plans or health carriers, which may or may not be passed onto their customers. These assessments may include assessments for insolvency, the uninsured, uncompensated care, Medicaid funding or defraying health care provider medical malpractice insurance costs.
- Mandating coverage by the Company and its clients' health plans for additional conditions and/or specified procedures, drugs or devices (for example, high cost pharmaceuticals, experimental pharmaceuticals and oral chemotherapy regimens).
- Regulating electronic connectivity.
- Mandating or regulating the disclosure of provider fee schedules and other data about the Company's payments to providers.
- Mandating or regulating disclosure of provider outcome and/or efficiency information.
- Prescribing or limiting members' financial responsibility for health care or other covered services they utilize.
- Assessing the medical device status of HIT products and/or solutions, mobile consumer wellness tools and clinical decision support tools, which may require compliance with FDA requirements in relation to some of these products, solutions and/or tools.
- Imposing payment levels for services rendered to the Company's members by providers who do not have contracts with the Company.
- Restricting the ability of employers and/or health plans to establish or impose member financial responsibility.
- Amending or supplementing ERISA to impose greater requirements on PBMs, the administration of employer-funded benefit plans or limit the scope of current ERISA pre-emption, which would among other things expose us and other health plans to expanded liability for punitive and other extra-contractual damages and additional state regulation.

It is uncertain whether the Company can counter the potential adverse effects of such potential legislation or regulation on its results of operations or cash flows, including whether it can recoup, through higher premium rates, expanded membership or other measures, the increased costs of mandated coverage or benefits, assessments, fees, taxes or other increased costs, including the cost of modifying its systems to implement any enacted legislation or regulations.

The Company's businesses also may be affected by other legislation and regulations. The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Financial Reform Act") creates incentives for whistleblowers to speak directly to the government rather than utilizing internal compliance programs and reduces the burden of proof under the Foreign Corrupt Practices Act of 1977 (the "FCPA"). There also are laws and regulations that set standards for the escheatment of funds to states.

Health savings accounts, health reimbursement arrangements and flexible spending accounts and certain of the tax, fee and subsidy provisions of the ACA also are regulated by the United States Department of the Treasury and the Internal Revenue Service.

The Company also may be adversely affected by court and regulatory decisions that expand or revise the interpretations of existing statutes and regulations or impose medical malpractice or bad faith liability. Federal and state courts continue to consider cases, and federal and state regulators continue to issue regulations and interpretations, addressing bad faith liability for denial of medical claims, the scope of ERISA's fiduciary duty requirements, the scope of the False Claims Act and the pre-emptive effect of ERISA on state laws.

Contract Audits - The Company is subject to audits of many of its contracts, including its PBM client contracts, its PBM rebate contracts, its PBM network contracts, its contracts relating to Medicare Advantage, and/or Medicare Part D, the agreements the Company's pharmacies enter into with other payors, its Medicaid contracts and its customer contracts. Because some of the Company's contracts are with state or federal governments or with entities contracted with state or federal agencies, audits of these agreements are often regulated by the federal or state agencies responsible for administering federal or state benefits programs, including those which operate Medicaid fee for service plans, Managed Medicaid plans, Medicare Part D plans or Medicare Advantage organizations.

Federal Employee Health Benefits Program - The Company's subsidiaries contract with the Office of Personnel Management (the "OPM") to provide managed health care services under the FEHB program in their service areas. These contracts with the

OPM and applicable government regulations establish premium rating arrangements for this program. OPM regulations require that community-rated FEHB plans meet a FEHB program-specific MLR by plan code and market. Managing to these rules is complicated by the simultaneous application of the minimum MLR standards and associated premium rebate requirements of the ACA. The Company also has a contractual arrangement with carriers for the FEHB program, such as the BlueCross BlueShield Association, to provide pharmacy services to federal employees, postal workers, annuitants, and their dependents under the Government-wide Service Benefit Plan, as authorized by the FEHB Act and as part of the FEHB program. Additionally, the Company manages certain FEHB plans on a "cost-plus" basis. These arrangements subject the Company to certain aspects of FEHB Act, and other federal regulations, such as the FEHB Acquisition Regulation, that otherwise would not be applicable to the Company. The OPM also is auditing the Company and its other contractors to, among other things, verify that plans meet their applicable FEHB program-specific MLR and the premiums established under the OPM's Insured contracts and costs allocated pursuant to the OPM's cost-based contracts are in compliance with the requirements of the applicable FEHB program. The OPM may seek premium refunds or institute other sanctions against the Company if it fails to comply with the FEHB program requirements.

Disease Management Services Regulation - The Company provides disease management programs to health plan and PBM plan members for complex medical conditions and arranges for those members to receive disease management programs for common medical conditions. State laws regulate the practice of medicine, the practice of pharmacy and the practice of nursing. Clinicians engaged in a professional practice in connection with the provision of disease management services must satisfy applicable state licensing requirements and must act within their scope of practice.

Third Party Administration and Other State Licensure Laws - Many states have licensure or registration laws governing certain types of administrative organizations, such as PPOs, TPAs and companies that provide utilization review services. Several states also have licensure or registration laws governing the organizations that provide or administer consumer card programs (also known as cash card or discount card programs).

International Regulation - The Company currently has insurance licenses in several foreign jurisdictions and does business directly or through local affiliations in numerous countries around the world. The Company is taking steps to be able to continue to serve customers in the European Economic Area following the United Kingdom's pending exit from the EU ("Brexit"). However, the impact of Brexit on the Company's international business and results of operations is uncertain.

The Company's international operations are subject to different, and sometimes more stringent, legal and regulatory requirements, which vary widely by jurisdiction, including anti-corruption laws; economic sanctions laws; various privacy, insurance, tax, tariff and trade laws and regulations; corporate governance, privacy, data protection (including the EU's General Data Protection Regulation which began to apply across the EU during 2018), data mining, data transfer, labor and employment, intellectual property, consumer protection and investment laws and regulations; discriminatory licensing procedures; compulsory cessions of reinsurance; required localization of records and funds; higher premium and income taxes; limitations on dividends and repatriation of capital; and requirements for local participation in an insurer's ownership. In addition, the expansion of the Company's operations into foreign countries increases the Company's exposure to the anti-bribery, anti-corruption and anti-money laundering provisions of United States law, including the FCPA, and corresponding foreign laws, including the U.K. Bribery Act 2010 (the "UK Bribery Act").

Anti-Corruption Laws - The FCPA prohibits offering, promising or authorizing others to give anything of value to a foreign government official to obtain or retain business or otherwise secure a business advantage. The Company also is subject to applicable anti-corruption laws of the jurisdictions in which it operates. In many countries outside the United States, health care professionals are employed by the government. Therefore, the Company's dealings with them are subject to regulation under the FCPA. Violations of the FCPA and other anti-corruption laws may result in severe criminal and civil sanctions as well as other penalties, and the United States Securities and Exchange Commission (the "SEC") and the DOJ have increased their enforcement activities with respect to the FCPA. The UK Bribery Act is an anti-corruption law that is broader in scope than the FCPA and applies to all companies with a nexus to the United Kingdom. Disclosures of FCPA violations may be shared with the UK authorities, thus potentially exposing companies to liability and potential penalties in multiple jurisdictions. The Company has internal control policies and procedures and conducts training and compliance programs for its employees to deter prohibited practices. However, if the Company's employees or agents fail to comply with applicable laws governing its international operations, it may face investigations, prosecutions and other legal proceedings and actions which could result in civil penalties, administrative remedies and criminal sanctions.

Anti-Money Laundering Regulations - Certain lines of the Company's businesses are subject to Treasury anti-money laundering regulations. Those lines of business have implemented anti-money laundering policies designed to insure their

compliance with the regulations. The Company also may be subject to anti-money laundering laws in non-U.S. jurisdictions where it operates.

Office of Foreign Assets Control - The Company also is subject to regulation by OFAC. OFAC administers and enforces economic and trade sanctions based on United States foreign policy and national security goals against targeted foreign countries and regimes, terrorists, international narcotics traffickers, those engaged in activities related to the proliferation of weapons of mass destruction, and other threats to the national security, foreign policy or economy of the United States. In addition, the Company may be subject to similar regulations in the non-U.S. jurisdictions in which it operates.

Laws and Regulations Related to the Pharmacy Services Segment

In addition to the laws and regulations discussed above that may affect multiple segments of the Company's business, the Company is subject to federal, state and local statutes and regulations governing the operation of its Pharmacy Services segment specifically. Among these are the following:

PBM Laws and Regulation - Legislation seeking to regulate PBM activities in a comprehensive manner has been introduced or enacted in a number of states. This legislation could adversely affect the Company's ability to conduct business on commercially reasonable terms in states where the legislation is in effect. In addition, certain quasi-regulatory organizations, including the National Association of Boards of Pharmacy and the National Association of Insurance Commissioners ("NAIC") and the National Council of Insurance Legislators, have issued model regulations or may propose future regulations concerning PBMs and/or PBM activities. Similarly, credentialing organizations such as NCQA and URAC may establish voluntary standards regarding PBM, mail or specialty pharmacy activities. While the actions of these quasi-regulatory or standard-setting organizations do not have the force of law, they may influence states to adopt their requirements or recommendations and influence client requirements for PBM or specialty pharmacy services. Moreover, any standards established by these organizations could also impact the Company's health plan clients and/or the services provided to them and/or the Company's health plans.

The Company's PBM activities also are regulated directly and indirectly at the federal and state levels, including being subject to the False Claims Act and state false claims acts and federal and state anti-kickback laws. These laws and regulations govern, and proposed legislation and regulations may govern and/or further restrict, critical PBM practices, including disclosure, receipt and retention of rebates and other payments received from pharmaceutical manufacturers; use of, administration of and/or changes to drug formularies, maximum allowable cost ("MAC") list pricing, average wholesale prices ("AWPs") and/or clinical programs; the offering to plan sponsors of pricing that includes retail network "differential" or "spread" (i.e., a difference between the drug price charged to the plan sponsor by a PBM and the price paid by the PBM to the dispensing provider); disclosure of data to third parties; drug utilization management practices; the level of duty a PBM owes its customers; configuration of pharmacy networks; the operations of the Company's pharmacies (including audits of its pharmacies); disclosure of negotiated provider reimbursement rates; disclosure of fees associated with administrative service agreements and patient care programs that are attributable to members' drug utilization; and registration or licensing of PBMs. Failure by the Company or one of its PBM services suppliers to comply with these laws or regulations could result in material fines and/or sanctions and could have a material adverse effect on the Company's results of operations and/or cash flows.

PDPs and the Company's PBM service contracts, including those in which the Company assumes certain risks under performance guarantees or similar arrangements, are generally not subject to insurance regulation by the states. However, state departments of insurance are increasing their oversight of PBM activities due to legislation passing in several states requiring PBMs to register or obtain a license with the department. Rulemaking is either underway or has already taken place in a few states with the areas of focus on licensure requirements, pharmacy reimbursement for generics (MAC reimbursement) and pharmacy audits - most of which fall under the state insurance code.

Pharmacy Network Access Legislation - Medicare Part D and a majority of states now have some form of legislation affecting the Company's (and its health plans' and its health plan clients') ability to limit access to a pharmacy provider network or remove network providers. For example, certain "any willing provider" legislation may require the Company or its clients to admit a nonparticipating pharmacy if such pharmacy is willing and able to meet the plan's price and other applicable terms and conditions for network participation. These laws could negatively affect the services and economic benefits achievable through a limited pharmacy provider network. Also, a majority of states now have some form of legislation affecting the Company's ability (and the Company's and its client health plans' ability) to conduct audits of network pharmacies regarding claims submitted to the Company for payment. These laws could negatively affect the Company's ability to recover overpayments of claims submitted by network pharmacies that the Company identifies through pharmacy audits.

Pharmacy Pricing Legislation - Several states have passed legislation regulating the Company's ability to manage and establish MACs for generic prescription drugs. MAC methodology is a common cost management practice used by private and public payors (including CMS) to pay pharmacies for dispensing generic prescription drugs. MAC prices specify the allowable reimbursement by a PBM for a particular strength and dosage of a generic drug that is available from multiple manufacturers but sold at different prices. State legislation can regulate the disclosure of MAC prices and MAC price methodologies, the kinds of drugs that a PBM can pay for at a MAC price, and the rights of pharmacies to appeal a MAC price established by a PBM. These laws could negatively affect the Company's ability to establish MAC prices for generic drugs.

Formulary and Plan Design Regulation - A number of government entities regulate the administration of prescription drug benefits. HHS regulates how Medicare Part D formularies are developed and administered, including requiring the inclusion of all drugs in certain classes and categories, subject to limited exceptions. Under the ACA, CMS imposes drug coverage requirements for health plans required to cover essential health benefits, including plans offered through federal or state Public Exchanges. Additionally, the NAIC and health care accreditation agencies like NCQA and URAC have developed model acts and standards for formulary development that are often incorporated into government requirements. Many states regulate the scope of prescription drug coverage, as well as the delivery channels to receive prescriptions, for insurers, MCOs and Medicaid managed care plans. The increasing government regulation of formularies could significantly affect the Company's ability to develop and administer formularies, networks and other plan design features on behalf of its insurer, MCO and other clients. Similarly, some states prohibit health plan sponsors from implementing certain restrictive design features. This regulation could limit or preclude (i) limited networks, (ii) a requirement to use particular providers, (iii) copayment differentials among providers and (iv) formulary tiering practices.

FDA Regulation - The FDA regulates the Company's compounding pharmacy and clinical research operations.

Laws and Regulations Related to the Retail/LTC Segment

In addition to the laws and regulations discussed above that may affect multiple segments of the Company's business, the Company is subject to federal, state and local statutes and regulations governing the operation of its Retail/LTC segment specifically. Among these are the following:

FDA Regulation - The FDA generally has authority to, among other things, regulate the manufacture, distribution, sale and labeling of many products sold through retail pharmacies, including prescription drugs, over-the-counter medications, medical devices (including mobile medical devices), cosmetics, dietary supplements and certain food items. The FDA regulates the Company's activities as a distributor of store brand products.

Retail Clinics - States regulate retail clinics operated by nurse practitioners or physician assistants through physician oversight, clinic and lab licensure requirements and the prohibition of the corporate practice of medicine. A number of states have implemented or proposed laws or regulations that impact certain components of retail clinic operations such as physician oversight, signage, third party contracting requirements, bathroom facilities, and scope of services. These laws and regulations may affect the operation and expansion of the Company's owned and managed retail clinics.

Other Laws - Other federal, state and local laws and regulations also impact the Company's retail operations, including laws and regulations governing the practice of optometry, the practice of audiology, the provision of dietician services and the sale of durable medical equipment, contact lenses, eyeglasses, hearing aids and alcohol.

Laws and Regulations Related to the Health Care Benefits Segment

Overview - Differing approaches to state insurance regulation and varying enforcement philosophies may materially and adversely affect the Company's ability to standardize its Health Care Benefits products and services across state lines. These laws and regulations, including the ACA, restrict how the Company conducts its business and result in additional burdens and costs to the Company. Significant areas of governmental regulation include premium rates and rating methodologies, underwriting rules and procedures, required benefits, sales and marketing activities, provider rates of payment, restrictions on health plans' ability to limit providers' participation in their networks and/or remove providers from their networks and financial condition (including reserves and minimum capital or risk based capital requirements). These laws and regulations are different in each jurisdiction and vary from product to product.

Each health insurer and HMO must file periodic financial and operating reports with the states in which it does business. In addition, health insurers and HMOs are subject to state examination and periodic license renewal. Applicable laws also restrict the ability of the Company's regulated subsidiaries to pay dividends, and certain dividends require prior regulatory approval. In

addition, some of the Company's businesses and related activities may be subject to PPO, managed care organization, utilization review or TPA-related licensure requirements and regulations. These licensure requirements and regulations differ from state to state, but may contain provider network, contracting, product and rate, financial and reporting requirements. There also are laws and regulations that set specific standards for the Company's delivery of services, payment of claims, fraud prevention, protection of consumer health information, and payment for covered benefits and services.

Required Regulatory Approvals - The Company must obtain and maintain regulatory approvals to price, market and administer many of its Health Care Benefits products. Supervisory agencies, including CMS, the Center for Consumer Information and Insurance Oversight and the DOL, as well as state health, insurance, managed care and Medicaid agencies and state boards of pharmacy have broad authority to take one or more of the following actions:

- Grant, suspend and revoke the Company's licenses to transact business;
- Suspend or exclude the Company from participation in government programs;
- Suspend or limit the Company's authority to market products;
- Regulate many aspects of the products and services the Company offers, including the pricing and underwriting of many of its products and services;
- Assess damages, fines and/or penalties;
- Terminate the Company's contract with the government agency and/or withhold payments from the government agency to the Company;
- Impose retroactive adjustments to premiums and require the Company to pay refunds to the government, customers and/or members;
- Restrict the Company's ability to conduct acquisitions or dispositions;
- Require the Company to maintain minimum capital levels in its subsidiaries and monitor its solvency and reserve adequacy;
- Regulate the Company's investment activities on the basis of quality, diversification and other quantitative criteria; and/or
- Exclude the Company's plans from participating in Public Exchanges if they are deemed to have a history of "unreasonable" premium rate increases or fail to meet other criteria set by HHS or the applicable state.

The Company's operations, current and past business practices, current and past contracts, and accounts and other books and records are subject to routine, regular and special investigations, audits, examinations and reviews by, and from time to time the Company receives subpoenas and other requests for information from, federal, state and international supervisory and enforcement agencies, attorneys general and other state, federal and international governmental authorities and legislators.

Commercial Product Pricing and Underwriting Restrictions - Pricing and underwriting regulation by states limits the Company's underwriting and rating practices and those of other health insurers, particularly for small employer groups, and varies by state. In general, these limitations apply to certain customer segments and limit the Company's ability to set prices for new or renewing groups, or both, based on specific characteristics of the group or the group's prior claim experience. In some states, these laws and regulations restrict the Company's ability to price for the risk it assumes and/or reflect reasonable costs in the Company's pricing.

The ACA expanded the premium rate review process by, among other things, requiring the Company's Commercial Insured rates to be reviewed for "reasonableness" at either the state or the federal level. HHS established a federal premium rate review process that generally applies to proposed premium rate increases equal to or exceeding a federally (or lower state) specified threshold. HHS's rate review process imposes additional public disclosure requirements as well as additional review on filings requesting premium rate increases equal to or exceeding this "reasonableness" threshold. These combined state and federal review requirements may prevent, further delay or otherwise affect the Company's ability to price for the risk it assumes, which could adversely affect its MBRs and results of operations, particularly during periods of increased utilization of medical services and/or medical cost trend or when such utilization and/or trend exceeds the Company's projections.

The ACA also specifies minimum MLRs of 85% for large group Commercial products and 80% for individual and small group Commercial products. Because the ACA minimum MLRs are structured as "floors" for many of their requirements, states have the latitude to enact more stringent rules governing its various restrictions. For Commercial products, states have and may adopt higher minimum MLR requirements, use more stringent definitions of "medical loss ratio," incorporate minimum MLR requirements into prospective premium rate filings, require prior approval of premium rates or impose other requirements related to minimum MLR. Minimum MLR requirements and similar actions further limit the level of margin the Company can

earn in its Insured Commercial business while leaving the Company exposed to medical costs that are higher than those reflected in its pricing. The Company also may be subject to significant fines, penalties, premium refunds and litigation if it fails to comply with minimum MLR laws and regulations.

In addition, the Company requested significant increases in its premium rates in its Commercial small group Health Care Benefits business for 2019 and expects to continue to request significant increases in those rates for 2020 and beyond in order to adequately price for projected medical cost trends, required expansions of coverage and significant assessments, fees and taxes imposed by the federal and state governments, including the ACA. The Company's rates also must be adequate to reflect adverse selection in its products, particularly in small group Commercial products, which the Company expects to continue and potentially worsen in 2019. These significant rate increases heighten the risks of adverse public and regulatory action and adverse selection and the likelihood that the Company's requested premium rate increases will be denied, reduced or delayed, which could lead to operating margin compression.

Many of the laws and regulations governing the Company's pricing and underwriting practices also limit the differentials in premium rates insurers and other carriers may charge between new and renewal business, and/or between groups based on differing characteristics. They may also require that carriers disclose to customers the basis on which the carrier establishes new business and renewal premium rates and limit the ability of a carrier to terminate customers' coverage. In addition, HHS' rules on rates impose additional public disclosure requirements on any rate filings that exceed the "reasonableness" threshold and require additional review of those rates.

Medicaid Regulation - The Company is seeking to substantially grow its Medicaid, dual eligible and dual eligible special needs plan businesses over the next several years. As a result, the Company also is increasing its exposure to changes in government policy with respect to and/or regulation of the various Medicaid, dual eligible and dual eligible special needs plan programs in which the Company participates, including changes in the amounts payable to the Company under those programs.

Since 2017, Managed Medicaid products, including those the Company offers, are subject to a minimum MLR of 85%. A Medicaid managed care quality rating system and provider network adequacy requirements also apply to Medicaid products. Because the minimum MLR is structured as a "floor", states have the latitude to enact more stringent rules governing these various restrictions. For Managed Medicaid products, states may adopt higher minimum MLR requirements, use more stringent definitions of "medical loss ratio" or impose other requirements related to minimum MLR. Minimum MLR requirements and similar actions further limit the level of margin the Company can earn in its Insured Medicaid products while leaving the Company exposed to medical costs that are higher than those reflected in its pricing. The Company also may be subject to significant fines, penalties, premium refunds and litigation if it fails to comply with minimum MLR laws and regulations.

The impact of Medicaid expansion under the ACA is uncertain. The future of the ACA is uncertain, and states may opt out of the elements of the ACA requiring expansion of Medicaid coverage without losing their current federal Medicaid funding. To date, a number of states and the District of Columbia have expanded Medicaid coverage to the higher eligibility levels contemplated by the ACA. In addition, the election of new governors and/or state legislatures may impact states' previous decisions regarding Medicaid expansion. Proposals for substantial changes to federal funding of state Medicaid programs are likely to be considered in 2019 and beyond, including the possibility of converting federal Medicaid support to block grants and per capita caps on federal funding. Uncertainty regarding federal funding is causing and will continue to cause states to re-evaluate their Medicaid expansions and consider new assessments, fees and/or taxes on health plans. That re-evaluation may adversely affect Medicaid payment rates, the Company's revenues and its Medicaid membership in those states.

The economic aspects of the Medicaid, dual eligible and dual eligible special needs plan business vary from state to state and are subject to frequent change. Medicaid premiums are paid by each state and differ from state to state. The federal government and certain states also are considering proposals and legislation for Medicaid and dual eligible program reforms or redesigns, including restrictions on the collection of manufacturer's rebates on pharmaceuticals by Medicaid MCOs and their contracted PBMs, further program, population and/or geographic expansions of risk-based managed care, increasing beneficiary cost-sharing or payment levels, and changes to benefits, reimbursement, eligibility criteria, provider network adequacy requirements (including requiring the inclusion of specified high cost providers in the Company's networks) and program structure. In some states, current Medicaid and dual eligible funding and premium revenue may not be adequate for the Company to continue program participation. The Company's Medicaid and dual eligible contracts with states (or sponsors of Medicaid managed care plans) are subject to cancellation by the state (or the sponsors of the managed care plans) after a short notice period without cause (for example, when a state discontinues a managed care program) or in the event of insufficient state funding.

The Company's Medicaid, dual eligible and dual eligible special needs plan products also are heavily regulated by CMS and state Medicaid agencies, which have the right to audit the Company's performance to determine compliance with CMS

contracts and regulations. The Company's Medicaid products, dual eligible products and CHIP contracts also are subject to complex federal and state regulations and oversight by state Medicaid agencies regarding the services provided to Medicaid enrollees, payment for those services, network requirements (including mandatory inclusion of specified high-cost providers), and other aspects of these programs, and by external review organizations which audit Medicaid plans on behalf of the state Medicaid agencies. The laws, regulations and contractual requirements applicable to the Company and other participants in Medicaid and dual eligible programs, including requirements that the Company submit encounter data to the applicable state agency, are extensive, complex and subject to change. The Company has invested significant resources to comply with these standards, and its Medicaid and dual eligible program compliance efforts will continue to require significant resources. CMS and/or state Medicaid agencies may fine the Company, withhold payments to the Company, seek premium and other refunds, terminate the Company's existing contracts, elect not to award the Company new contracts or not to renew the Company's existing contracts, prohibit the Company from continuing to market and/or enroll members in or refuse to automatically assign members to one or more of the Company's Medicaid or dual eligible products, exclude the Company from participating in one or more Medicaid or dual eligible programs and/or institute other sanctions and/or civil monetary penalties against the Company if it fails to comply with CMS or state regulations or contractual requirements.

The Company cannot predict whether pending or future federal or state legislation or court proceedings will change various aspects of the Medicaid program, nor can it predict the impact those changes will have on its business operations or results of operations, but the effects could be materially adverse.

State Workers' Compensation Laws - The Company's workers' compensation business includes the comparison of medical claims data against the applicable state's fee schedule pricing, including applicable regulations and clinical guidelines. State fee schedules, which typically represent the maximum reimbursement for medical services provided to the injured worker, differ by state and change as state laws and regulations are passed and/or amended. The Company's workers' compensation business also includes PBM and care management services, both of which are regulated at the state level. The Company's workers' compensation customers include insurance carriers and TPAs who also are regulated at the state level. The laws and regulations applicable to the Company and other participants in the workers' compensation business are extensive, complex and subject to change. The Company has invested significant resources to comply with these standards, and its workers' compensation compliance efforts will continue to require significant resources. The Company may be subject to significant fines, penalties and litigation if it fails to comply with those laws and regulations.

Federal and State Reporting - The Company is subject to extensive financial and business reporting requirements, including penalties for inaccuracies and/or omissions, at both the federal and state level. The Company's ability to comply with certain of these requirements depends on receipt of information from third parties that may not be readily available or reliably provided in all instances. The Company is and will continue to be required to modify its information systems, dedicate significant resources and incur significant expenses to comply with these requirements. However, the Company cannot eliminate the risks of unavailability of or errors in its reports.

Product Design and Administration and Sales Practices - State and/or federal regulatory scrutiny of health care benefit product design and administration and marketing and advertising practices, including the filing of insurance policy forms, the adequacy of provider networks, the accuracy of provider directories, and the adequacy of disclosure regarding products and their administration, is increasing as are the penalties being imposed for inappropriate practices. Medicare, Medicaid and dual eligible products and products offering more limited benefits in particular continue to attract increased regulatory scrutiny.

Guaranty Fund Assessments/Solvency Protection - Under guaranty fund laws existing in all states, insurers doing business in those states can be assessed (in most states up to prescribed limits) for certain obligations of insolvent insurance companies to policyholders and claimants. The life and health insurance guaranty associations in which the Company participates that operate under these laws respond to insolvencies of long-term care insurers as well as health insurers. The Company's assessments generally are based on a formula relating to its health care premiums in the state compared to the premiums of other insurers. Certain states allow assessments to be recovered over time as offsets to premium taxes. Some states have similar laws relating to HMOs and/or other payors such as not-for-profit consumer governed health plans established under the ACA. While historically the Company has ultimately recovered more than half of guaranty fund assessments through statutorily permitted premium tax offsets, significant increases in assessments could lead to legislative and/or regulatory actions that may limit future offsets.

Available Information

CVS Health Corporation was incorporated in Delaware in 1996. The corporate office is located at One CVS Drive, Woonsocket, Rhode Island 02895, telephone (401) 765-1500. The Company's common stock is listed on the New York Stock

Exchange under the trading symbol “CVS.” General information about CVS Health is available through the Company’s website at *http://www.cvshealth.com* . The Company’s financial press releases and filings with the SEC are available free of charge within the Investors section of the Company’s website at *http://www.cvshealth.com/investors* . In addition, the SEC maintains an internet site that contains reports, proxy and information statements and other information regarding issuers, such as the Company, that file electronically with the SEC. The address of that website is *http://www.sec.gov.* The information on or linked to the Company’s website is neither a part of nor incorporated by reference in this Annual Report on Form 10-K or any of the Company’s other SEC filings.

In accordance with guidance provided by the SEC regarding use by a company of its websites and social media channels as a means to disclose material information to investors and to comply with its disclosure obligations under Regulation FD, CVS Health Corporation (the “Registrant”) hereby notifies investors, the media and other interested parties that it intends to continue to use its media and investor relations website (http://investors.cvshealth.com/) and its Twitter feed (@CVSHealthIR) to publish important information about the Registrant, including information that may be deemed material to investors. The list of social media channels that the Registrant uses may be updated on its media and investor relations website from time to time. The Registrant encourages investors, the media, and other interested parties to review the information the Registrant posts on its website and social media channels as described above, in addition to information announced by the Registrant through its SEC filings, press releases and public conference calls and webcasts.

Item 1A. Risk Factors

You should carefully consider each of the following risks and uncertainties and all of the other information set forth in this Annual Report on Form 10-K. These risks and uncertainties and other factors may affect forward-looking statements, including those we make in this Annual Report on Form 10-K or elsewhere, such as in news releases or investor or analyst calls, meetings or presentations. The risks and uncertainties described below are not the only ones we face. There can be no assurance that we have identified all the risks that affect us. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial also may adversely affect our businesses. Any of these risks or uncertainties could cause our actual results to differ materially from our expectations and the expected results discussed in our forward-looking statements. You should not consider past results to be an indication of future performance.

If any of the following risks or uncertainties develops into actual events or if the circumstances described in the risks or uncertainties occur or continue to occur, these events or circumstances could have a material adverse effect on our businesses, results of operations, cash flows and/or financial condition. In that case, our stock price could decline materially, among other effects on us. You should read the following section in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” (which includes our “Cautionary Statement Concerning Forward-Looking Statements” at the end of such section) in the Annual Report, which is incorporated by reference herein, and our consolidated financial statements and the related notes.

Overarching Risks

Risks to our brand and reputation, the Aetna Acquisition, data governance risks, effectiveness of our talent management and alignment of talent to our business needs, and potential changes in public policy, laws and regulations present overarching risks to our enterprise in 2019 and beyond.

We expect to face significant business challenges and uncertainties in 2019. Risks to our brand and reputation, the Aetna Acquisition, data governance risks, effectiveness of our talent management and alignment of talent to our business needs, and potential changes in public policy, laws and regulations present overarching risks to our enterprise in 2019 and beyond. There can be no assurance regarding our ability to avoid harm to our brand and reputation, our ability to manage the risks inherent in the Aetna Acquisition or our data governance risks, our ability to manage and align our talent to our business needs or our ability to manage the risks presented by changes in public policy, laws or regulations. In addition, there can be no assurance that the Aetna Acquisition, United States government fiscal policy, changes to the United States health care system (including changes to the ACA, to drug reimbursement and/or drug pricing laws and regulations and/or to laws and regulations governing PBMs’ interactions with government funded health care programs) or other unanticipated risks will not require us to revise the ways in which we conduct business, put us at risk of loss of business or materially adversely affect our businesses, cash flows, financial condition or results of operations.

Our brand and reputation are two of our most important assets; negative public perception of the industries in which we operate, or of our industries' or our practices, can adversely affect our businesses, results of operations, cash flows and prospects.

Reputational risk is inherent in many of the risks we face. The industries in which we operate regularly are negatively perceived by the public and subject to negative publicity, including as a result of adverse media coverage, litigation against us and other industry participants, the ongoing public debates over drug pricing, government involvement in drug pricing and purchasing, PBMs and the future of the ACA, governmental hearings and/or investigations and actual or perceived shortfalls regarding our industries' or our own products and/or business practices (including PBM operations, drug pricing, insurance coverage determinations and social media and other media relations activities). This risk may be increased as the federal government continues to consider increased involvement in drug reimbursement, pricing and/or purchasing and changes to the laws and regulations governing PBMs', PDPs' and/or Managed Medicaid organizations' interactions with government funded health care programs, and as states seek to maintain, replace or repeal elements of the ACA such as Public Exchanges and Medicaid expansion within increasingly challenging budget constraints. This risk also may be increased as we continue to offer products and services that make greater use of data and as our business model becomes more focused on delivering health care to consumers. Significant reductions or interruptions in funding for government health programs we serve also may lead us to reduce our exposure to these programs, which could adversely affect our brand and reputation.

Negative public perception and/or publicity of our industries in general, or of us or our key vendors, brokers or product distribution networks in particular, can further increase our costs of doing business and adversely affect our results of operations and our stock price by:

- Adversely affecting our brand and reputation;
- Adversely affecting our ability to market and sell our products and/or services and/or retain our existing customers and members;
- Requiring us to change our products and/or services;
- Reducing or restricting the compensation we can receive for our products and/or services; and/or
- Increasing or significantly changing the regulatory and legislative requirements with which we must comply.

Data governance failures can adversely affect our reputation, businesses and prospects. Our use and disclosure of members', customers' and other constituents' sensitive information is subject to complex regulations at multiple levels. We would be adversely affected if we or our business associates or other vendors fail to adequately protect members', customers' or other constituents' sensitive information.

Our information systems are critical to the operation of our businesses. We collect, process, maintain, retain, evaluate, utilize and distribute large amounts of personal health and financial information and other confidential and sensitive data about our customers, members and other constituents in the ordinary course of our businesses. Some of our information systems rely upon third party systems to accomplish these tasks. The use and disclosure of such information is regulated at the federal, state and international levels, and these laws, rules and regulations are subject to change and increased enforcement activity, such as the EU's GDPR which began to apply across the EU during 2018 and the audit program implemented by HHS under HIPAA. In some cases, such laws, rules and regulations also apply to our vendors and/or may hold us liable for any violations by our vendors. International laws, rules and regulations governing the use and disclosure of such information are generally more stringent than in the United States, and they vary from jurisdiction to jurisdiction. Noncompliance with any privacy or security laws or regulations, or any security breach, cyber-attack or cybersecurity breach, and any incident involving the theft, misappropriation, loss or other unauthorized disclosure of, or access to, sensitive or confidential member, customer or other constituent information, whether by us, by one of our vendors or by another third party, could require us to expend significant resources to remediate any damage, interrupt our operations and damage our brand and reputation, and could also result in investigations, regulatory enforcement actions, material fines and penalties, loss of customers, litigation or other actions which could have a material adverse effect on our brand, reputation, businesses, results of operations and cash flows.

Our businesses depend on our customers' and members' willingness to entrust us with their health related and other sensitive personal information. Events that adversely affect that trust, including inadequate disclosure to our members or customers of our uses of their information, failing to keep our information technology systems and our members', customers' and other constituents' sensitive information secure from significant attack, theft, damage, loss or unauthorized disclosure or access, whether as a result of our action or inaction or that of our business associates, vendors or other third parties, could adversely affect our brand and reputation, membership and results of operations and also can and/or has exposed us to mandatory disclosure to the media, litigation (including class action litigation), governmental investigations and enforcement proceedings,

material fines, penalties and/or remediation costs, and compensatory, special, punitive and statutory damages, consent orders, adverse actions against our licenses to do business and/or injunctive relief, any of which could adversely affect our businesses, cash flows, results of operations or financial condition. Large scale data breaches at other entities increase the challenge we and our vendors face in maintaining the security of our information technology systems and of our customers', members' and other constituents' sensitive information. There can be no assurance that additional such failures will not occur, or if any do occur, that we will detect them or that they can be sufficiently remediated.

We face significant competition in attracting and retaining talented employees. Further, managing succession for, and retention of, key executives is critical to our success, and our failure to do so could adversely affect our future performance.

Our ability to attract and retain qualified and experienced employees is essential to meet our current and future goals and objectives. There is no guarantee we will be able to attract and retain such employees or that competition among potential employers will not result in increased salaries or other benefits. If we are unable to retain existing employees or attract additional employees, or we experience an unexpected loss of leadership, we could experience a material adverse effect on our businesses and results of operations.

In addition, our failure to adequately plan for succession of senior management and other key management roles or the failure of key employees to successfully transition into new roles could have a material adverse effect on our businesses and results of operations. The succession plans we have in place and our employment arrangements with certain key executives do not guarantee the services of these executives will continue to be available to us.

We are subject to potential changes in public policy, laws and regulations, including reform of the United States health care system, that can adversely affect the markets for our products and services and our businesses, operations, results of operations, cash flows and prospects.

The political environment in which we operate remains uncertain. It is reasonably possible that our business operations and results of operations could be materially adversely affected by legislative, regulatory and public policy changes at the federal or state level, increased government involvement in drug reimbursement, pricing and/or purchasing, increased regulation of PBMs, changes to Medicare, Medicaid or the regulatory environment for health care benefits, including the ACA, changes to drug reimbursement and/or pricing laws and regulations, changes to the laws and regulations governing PBMs', PDPs' and/or Managed Medicaid organizations' interactions with government funded health care programs, changes to immigration policies and/or many other public policy initiatives. For example, in January 2019, HHS proposed regulations that would exclude from the current safe harbor under the federal anti-kickback statute manufacturer's rebates on prescription drugs paid to PBMs, PDPs and Managed Medicaid organizations in connection with federally funded health care programs. It is not possible to predict whether or when any such changes will occur or what form any such changes may take (including through the use of United States Presidential Executive Orders). Other significant changes to health care system legislation or regulation as well as changes with respect to tax and trade policies, tariffs and other government regulations affecting trade between the United States and other countries are also possible and could adversely affect us. If we fail to respond adequately to such changes, including by implementing strategic and operational initiatives, or do not do so as effectively as our competitors, our businesses, operations and results of operations may be materially adversely affected.

In addition to efforts to amend, repeal or replace the ACA and related regulations, we expect the federal and state governments to continue to enact and seriously consider many broad-based legislative and regulatory proposals that will or could materially impact various aspects of the health care and related benefits system and our businesses. Potential modification to the ACA, including changes in enforcement and/or funding that further destabilize the Public Exchanges, as well as significant changes to Medicaid funding could impact the number of Americans with health insurance and, consequently, prescription drug coverage. Further changes to federal health care laws, including the ACA, drug reimbursement and pricing laws and/or laws governing PBMs', PDPs' and/or Managed Medicaid organizations' interactions with government funded health care programs, are probable. We cannot predict the effect, if any, that new health care legislation, future changes to the ACA or the implementation or failure to implement the outstanding provisions of ACA, may have on our retail pharmacy, LTC pharmacy, specialty pharmacy, pharmacy services and/or Health Care Benefits operations and/or results of operations. The federal and many state governments also are considering changes in the interpretation, enforcement and/or application of existing programs, laws and regulations, including changes to payments under and funding of Medicare and Medicaid programs.

In addition, much of the branded and generic drug product that we sell in our retail, mail and specialty pharmacies, and much of the other merchandise we sell, is manufactured in whole or in substantial part outside of the United States. In most cases, the products or merchandise are imported by others and sold to us. As a result, significant changes in tax or trade policies, tariffs or trade relations between the United States and other countries, such as the imposition of unilateral tariffs on imported products, could result in significant increases in our costs, restrict our access to suppliers, depress economic activity, and have a material

adverse effect on our businesses, cash flows and results of operations. In addition, other countries may change their business and trade policies and such changes, as well as any negative sentiments towards the United States in response to increased import tariffs and other changes in United States trade regulations, could adversely affect our businesses.

We cannot predict the enactment or content of new legislation and regulations or changes to existing laws or regulations or their enforcement, interpretation or application, or the effect they will have on our business operations or results of operations, which could be materially adverse. Even if we could predict such matters, it is not possible to eliminate the adverse impact of public policy changes that would fundamentally change the dynamics of one or more of the industries in which we operate. Examples of such change include: the federal or one or more state governments fundamentally restructuring or reducing the funding available for Medicare, Medicaid, dual eligible or dual eligible special needs plan programs, increasing its involvement in drug reimbursement, pricing and/or purchasing, changing the laws and regulations governing PBMs', PDPs' and/or Managed Medicaid organizations' interactions with government funded health care programs, changing the tax treatment of health or related benefits, or repealing or otherwise significantly altering the ACA. The likelihood of adverse changes remains high due to state and federal budgetary pressures, and our businesses and results of operations could be materially and adversely affected by such changes, even if we correctly predict their occurrence. For more information on these matters, see "Government Regulation" included in Item 1 of this Annual Report on Form 10-K.

Our enterprise strategy may not be an effective response to the changing dynamics in the industries in which we operate, or we may not be able to implement our strategy and related strategic projects.

Our strategy includes effectively investing our capital and human resources in appropriate strategic projects, current operations and acquisitions to transform our businesses in response to the changing dynamics in the industries in which we operate. Our strategic projects include, among other things: integrating the Aetna Acquisition; significant investments in human and technology resources to expand our consumer-oriented products and services; optimizing our business platforms; managing certain significant technology projects; further improving relations with manufacturers, suppliers and health care providers; negotiating contract changes with customers, manufacturers, suppliers and health care providers and implementing other business process improvements. Implementing our strategic initiatives will require significant investments of capital and human resources. Among other things, we will need to simultaneously acquire and develop new personnel, products and systems to serve existing and new customers with existing and new products and to enhance our existing customer service, information technology, control and compliance processes and systems. The future performance of our businesses will depend in large part on our ability to design and implement our strategic initiatives, some of which will occur over several years. If these initiatives do not achieve their objectives, our results of operations could be adversely affected.

Our enterprise strategy may not be an effective response to the changing dynamics in the industries in which we operate, and we may fail to recognize and position ourselves to capitalize upon market opportunities. We may not have sufficient advance notice and resources to develop and effectively implement an alternative strategy. If our existing competitors and/or new entrants (whether vertical, horizontal or online/digital/e-commerce) into one or more of our businesses create new disruptive business models and/or develop new offerings that customers, members and/or health care providers prefer to our offerings, we may lose customers, members and/or providers, and our results of operations, cash flows and/or prospects may be adversely affected. In addition, our results of operations, cash flows and/or prospects may be adversely affected by consolidation among the participants in the industries in which we operate and/or our customer base. Our businesses and results of operations could be materially and adversely affected by such changes, even if we correctly predict their occurrence.

Risks Related to Our Businesses

Efforts to reduce reimbursement levels and alter health care financing practices could adversely affect our businesses.

The continued efforts of HMOs, MCOs, PBMs, government entities, and other third party payors to reduce prescription drug costs and pharmacy reimbursement rates, as well as litigation and other legal proceedings relating to how drugs are priced, may adversely affect our profitability. In particular, increased utilization of generic drugs (which normally yield a higher gross profit rate than equivalent brand named drugs) has resulted in pressure to decrease reimbursement payments to retail, specialty, LTC and mail order pharmacies for generic drugs, causing a reduction in our margins on sales of generic drugs. Historically, the effect of this trend on generic profitability has been mitigated by the introduction of new multi-source generic drugs as well as inflation on brand name drugs and by our efforts to negotiate reduced acquisition costs of generic drugs with manufacturers. However, in recent years, there has been significant consolidation within the generic manufacturing industry and in 2019 we expect fewer new multi-source generic drugs to be introduced and lower brand name drug inflation than in recent prior years, and it is possible that these and other external factors may enhance the ability of manufacturers to sustain or increase pricing of generic drugs and diminish our ability to negotiate reduced acquisition costs. Any inability to offset increased brand name or

generic prescription drug costs or to modify our activities to lessen the financial impact of such increased costs could have a significant adverse effect on our results of operations.

In addition, during the past several years, the United States health care industry has been subject to an increase in governmental regulation and audits at both the federal and state levels. Efforts to control health care costs, including prescription drug costs, are continuing at the federal and state government levels. Changing political, economic and regulatory influences may significantly affect health care financing and reimbursement practices. For example, we anticipate that federal and state governments will continue to review and assess alternative health care delivery systems, payment methodologies and operational requirements for health care providers, including LTC facilities and pharmacies, and participants in government funded health care programs. A change in the composition of pharmacy prescription volume toward programs offering lower reimbursement rates could adversely affect our profitability. Any action taken to repeal or replace all or significant parts of ACA also could adversely affect our profitability, though it is unclear at this time what the full effects of any such changes would be.

The ACA made several significant changes to Medicaid rebates and to reimbursement rates. One of these changes was to revise the definition of the Average Manufacturer Price, a pricing element common to most payment formulas, and the reimbursement formula for generic drugs. This change has adversely affected the reimbursements we receive when we dispense prescription drugs to Medicaid recipients. In addition, the ACA made other changes that affect the coverage and plan designs that are or will be provided by many of our health plan clients, including the requirement for health insurers to meet a minimum MLR to avoid having to pay rebates to enrollees. These ACA changes may not affect our businesses directly, but they could indirectly impact our services, business practices and/or results of operations.

Gross margins in the industries in which we operate may decline.

The PBM industry has been experiencing margin pressure as a result of competitive pressures and increased client demands for lower prices, increased revenue sharing, enhanced service offerings and/or higher service levels. In that regard, we maintain contractual relationships with generic drug manufacturers and brand name drug manufacturers that provide for purchase discounts and/or rebates on drugs dispensed by pharmacies in our retail network and by our specialty and mail order pharmacies (all or a portion of which may be passed on to clients). Manufacturer's rebates often depend on a PBM's ability to meet contractual market share or other requirements, including in some cases the placement of a manufacturer's products on the PBM's formularies. If we lose our relationship with one or more drug manufacturers, or if the discounts or rebates provided by drug manufacturers decline, our businesses and results of operations could be adversely affected. Further, competitive pressures in the PBM industry have resulted in our clients sharing in a larger portion of rebates and/or discounts received from drug manufacturers. Marketplace dynamics and regulatory changes also have impacted our ability to offer plan sponsors pricing that includes the use of retail "differential" or "spread", which could adversely affect our future profitability, and we expect these trends to continue. Further, changes in existing federal or state laws or regulations or the adoption of new laws or regulations relating to additional regulation of PBMs, drug pricing or purchasing, patent term extensions, purchase discount and/or rebate arrangements with drug manufacturers, or additional regulation of PBMs, formulary management or other PBM services could also reduce the discounts or rebates we receive. In addition, changes in federal or state laws or regulations or the adoption of new laws or regulations relating to claims processing and billing, including our ability to use MAC lists and collect transmission fees, could adversely affect our profitability.

Our retail pharmacy, specialty pharmacy and LTC pharmacy operations also have been affected by the margin pressures described above, including client demands for lower prices, generic pricing and network reimbursement pressure. In addition, as competition increases in the geographies in which we operate, including competition from new entrants, a significant increase in general pricing pressures could occur, and this could require us to reevaluate our pricing structures to remain competitive. A shift in the mix of our pharmacy prescription volume towards programs offering lower reimbursement rates could adversely affect our margins, including the ongoing shift in pharmacy mix towards 90-day prescriptions at retail and the ongoing shift in pharmacy mix towards Medicare Part D prescriptions. Finally, the margins of our LTC business are further affected by the increased efforts of health care payors to negotiate reduced or capitated pricing arrangements. These actions could also adversely affect the margins of our LTC business.

Our results of operations are affected by the health of the economy in general and in the geographies we serve.

Our businesses are affected by the United States economy and consumer confidence in general and in the geographies we serve, including various economic factors, inflation and changes in consumer purchasing power, preferences and/or spending patterns. It is possible that an unfavorable, uncertain or volatile economic environment will cause a decline in drug utilization, an increase in health care utilization and dampen demand for PBM services as well as consumer demand for products sold in our retail stores. Further, economic conditions including interest rate fluctuations, changes in capital market conditions and

regulatory changes may affect our ability to obtain necessary financing on acceptable terms, our ability to secure suitable store locations under acceptable terms and our ability to execute sale-leaseback transactions under acceptable terms. Adverse changes in the United States economy, consumer confidence and economic conditions could have an adverse effect on our businesses and financial results. This adverse effect could be further exacerbated by the increasing prevalence of high deductible health plans and health plan designs favoring co-insurance over co-payments as members and other consumers may decide to postpone, or not to seek, medical treatment which may lead them to incur more expensive medical treatment in the future and/or decrease our prescription volumes.

In addition, our Health Care Benefits membership remains concentrated in certain geographic areas in the United States and in certain industries. Unfavorable changes in health care or other benefit costs or reimbursement rates or increased competition in those geographic areas where our membership is concentrated could therefore have a disproportionately adverse effect on our Health Care Benefits results of operations. Our Health Care Benefits membership has been and may continue to be affected by workforce reductions by our customers due to adverse and/or uncertain general economic conditions, especially in the United States geographies and industries where our membership is concentrated. As a result, we may not be able to profitably grow and diversify our Health Care Benefits membership geographically, by product type or by customer industry, and our revenue and results of operations may be disproportionately affected by adverse changes affecting our customers.

We operate in a highly competitive business environment. Competitive and economic pressures may limit our ability to increase pricing to reflect higher costs or may force us to accept lower margins. If customers elect to self-insure, reduce benefits or adversely renegotiate or amend their agreements with us, our revenues and results of operations will be adversely affected. We may not be able to obtain appropriate pricing on new or renewal business.

Each of our businesses currently operates in a highly competitive and evolving business environment. We must compete successfully with existing competitors and new entrants, including strategic alliances and online, digital and e-commerce companies.

The competitive success of our retail pharmacy business, as well as our specialty pharmacy operations with third-party payors, is dependent on our ability to establish and maintain contractual relationships with PBMs and other payors on acceptable terms in an environment where some PBM clients are considering adopting narrow or restricted retail pharmacy networks. As a pharmacy retail business, we compete with other drugstore chains, supermarkets, online and other discount retailers, independent pharmacies, membership clubs, convenience stores and mass merchants, some of which are aggressively expanding into markets we serve. We also face competition from other retail health care clinics, as well as other mail order pharmacies and PBMs. Disruptive innovation by existing or new competitors could alter the competitive landscape in the future and require us to accurately identify and assess such changes and make timely and effective changes to our strategies and business model to compete effectively. Competition may also come from other sources in the future. Changes in market dynamics or the actions of competitors or manufacturers, including industry consolidation, the emergence of new competitors and strategic alliances, and decisions to exclude us from new narrow or restricted retail pharmacy networks, could materially and adversely affect our businesses, results of operations, cash flows and prospects.

We also could be adversely affected if we fail to identify or effectively respond to changes in market dynamics. For example, specialty pharmacy represents a significant and growing proportion of prescription drug spending in the United States, a significant portion of which is dispensed outside of traditional retail pharmacies. Because our specialty pharmacy operations focus on complex and high-cost medications that serve a relatively limited universe of patients, the future growth of this business depends to a significant extent upon expanding our ability to access key drugs and successfully penetrate key treatment categories.

The competitive success of our LTC pharmacy operations is dependent upon our ability to compete in each geographic region where we have operations. In the geographic regions we serve, we compete with PharMerica, our largest LTC pharmacy competitor, as well as with numerous local and regional institutional pharmacies, pharmacies owned by long-term care facilities and local retail pharmacies. Our LTC pharmacy customers consist of skilled nursing facilities, assisted living facilities, independent living communities, hospitals, correctional facilities, and other health care service providers. One of our growth opportunities is to increase our penetration rate in the assisted living segment, where residents can choose which pharmacy will provide them with prescription drugs. The ability of a resident of an assisted living facility to select the pharmacy that supplies him or her with prescription drugs could adversely affect our business, financial condition and results of operations because there can be no assurance that such resident will select us.

The competitive success of our pharmacy services business is impacted by its ability to establish and maintain contractual relationships with network pharmacies in an environment where some PBM clients are considering adopting narrow or restricted retail pharmacy networks. Competitors in the PBM industry (e.g., the Express Scripts business of Cigna Corporation,

OptumRx, Prime Therapeutics, MedImpact and Humana), include large, national PBM companies, PBMs owned by large national health plans and smaller standalone PBMs. Competition also may come from other sources in the future. In addition, changes in the overall composition of our pharmacy networks, or reduced pharmacy access under our networks, could adversely affect our claims volume and/or our competitiveness generally.

Customer contracts in our Health Care Benefits segment are generally for a period of one year, and our customers have considerable flexibility in moving between us and our competitors. One of the key factors on which we compete for customers, especially in uncertain economic environments, is overall cost. We are therefore under pressure to contain premium price increases despite being faced with increasing health care and other benefit costs and increasing operating costs. If we are unable to increase our prices to reflect increasing costs, our profitability will be adversely affected. If we are unable to limit our price increases, we may lose members to competitors with more favorable pricing, adversely affecting our revenues and results of operations. In response to rising prices, our customers may elect to self-insure or to reduce benefits in order to limit increases in their benefit costs. Alternatively, our customers may purchase different types of products from us that are less profitable. Such elections may result in reduced membership in our more profitable Insured products and/or lower premiums for our Insured products, which may adversely affect our revenues and results of operations, although such elections also may reduce our health care and other benefit costs. In addition, our Medicare, Medicaid and CHIP products are subject to termination without cause, periodic re-bid, rate adjustment and program redesign, as customers seek to contain their benefit costs, particularly in an uncertain economy. These actions may adversely affect our membership, revenues and results of operations

Competitors in each of our businesses may offer services and pricing terms that we may not be willing or able to offer. For example, strong competition in the PBM marketplace has generated greater client demand for lower pricing, increased revenue sharing and enhanced product and service offerings. Unless we can demonstrate enhanced value to our clients through innovative product and service offerings, particularly in a rapidly changing health care industry, we may be unable to remain competitive.

We may lose clients and/or fail to win new business. If we fail to compete effectively in the geographies and product areas in which we operate, including maintaining or increasing membership in our Health Care Benefits segment, our results of operations, financial condition and cash flows could be materially and adversely affected.

Our PBM business generates revenues primarily by contracting with clients to provide prescription drugs and related health care services to plan members. PBM client contracts often have terms of approximately three years in duration, so approximately one third of a PBM's client base typically is subject to renewal each year. In some cases, however, PBM clients may negotiate a shorter or longer contract term or may require early or periodic renegotiation of pricing prior to expiration of a contract. Our clients are generally well informed and organized, can move between our competitors and often seek competing bids prior to expiration of their contracts. In addition, the reputational impact of a service-related incident could adversely affect our businesses. These factors, together with the impact of competitive pressures, could make it difficult for us to attract new clients, retain existing clients and cross-sell additional products and/or services. Further, the PBM industry has been affected by consolidation activity that may continue in the future. If one or more of our PBM clients is acquired by an entity that is not also our client, we may be unable to retain all or a portion of the acquired client's business. These circumstances, either individually or in the aggregate, could result in an adverse effect on our businesses and financial results. Therefore, we continually face challenges in competing for new PBM business and retaining or renewing our existing PBM business. With respect to our LTC pharmacy business, reimbursement from skilled nursing facilities for prescriptions we dispense is determined pursuant to our agreements with those skilled nursing facilities. The termination of these agreements generally terminates our ability to provide services to any of the residents of that facility, resulting in the loss of revenue from any source for those residents. There can be no assurance that we will be able to win new business or secure renewal business on terms as favorable to us as the present terms.

Additionally, with respect to our retail and LTC pharmacy businesses, reimbursement under Medicare Part D, as well as reimbursement from certain private third-party payors, is determined pursuant to agreements that we negotiate with those payors or their PBM representatives. The loss of those agreements, or a material change in the terms of those agreements, could adversely affect our results of operations and cash flows. In addition, restricted networks that exclude our retail or specialty pharmacies adversely affect those businesses.

The health care and related benefits industry is highly competitive, primarily due to a large number of for-profit and not-for-profit competitors, our competitors' marketing and pricing, and a proliferation of competing products, including new products that are continually being introduced into the marketplace. Our Health Care Benefits segment faces significant competition in all of the geographies and product areas in which it operates. New entrants into the marketplace, as well as consolidation within the industry, have contributed to and are expected to intensify the competitive environment. In addition, the rapid pace of change as the industry evolves towards a consumer-focused retail marketplace, including Insurance Exchanges, and the

increased use of technology to interact with members, providers and customers, increase the risks we currently face from new entrants and disruptive actions by existing competitors compared to prior periods.

Our Health Care Benefits segment competes on the basis of many factors, including perceived overall quality, quality of service, comprehensiveness of coverage, cost (including premium, provider discounts and member out-of-pocket costs), product design, financial stability and ratings, breadth and quality of provider networks, providers available in such networks, and quality of member support and care management programs. Our Health Care Benefits segment's competitors include, among others, UnitedHealth Group Incorporated, Anthem, Inc., Humana Inc., Cigna Corporation, WellCare Health Plans, Inc., Centene Corporation, Molina Healthcare, Inc., Kaiser Permanente, health system owned health plans and new entrants into the marketplace, and numerous for-profit and not-for-profit organizations operating under licenses from the Blue Cross and Blue Shield Association. The Health Care Benefits segment's largest competitor in its Medicare products is Original Medicare. Additional competitors in this segment's businesses include other types of medical and dental provider organizations, various specialty service providers (including PBM services providers), health care consultants, financial services companies, integrated health care delivery organizations (networks of providers who also coordinate administrative services for and assume insurance risk of their members), TPAs, HIT companies and, for certain plans, programs sponsored by the federal or state governments. Emerging competitors include start up health care benefit plans, provider-owned health plans, new joint ventures (including for-profit and not-for-profit joint ventures among firms from multiple industries), technology firms, financial services firms that are distributing competing products on their proprietary Private Exchanges, consulting firms that are distributing competing products on their proprietary Private Exchanges, as well as non-traditional distributors such as retail companies. In particular geographies, competitors may have greater capabilities, resources or membership; a more established reputation; superior supplier or health care professional pricing and contract terms; better business relationships; or other factors that give such competitors a competitive advantage. The Health Care Benefits segment competes for sales on Insurance Exchanges and is developing and expanding its Consumer Health Products and Services product and service offerings, where we face additional risks from existing and new competitors (including our vendors) who have lower cost structures, greater experience marketing to consumers and/or who target the higher margin portions of our business. Among the Health Care Benefits segment's international and HIT competitors, many have longer operating histories, better brand recognition and greater market presence in many of the areas in which the segment is seeking to expand and more experience at rapidly innovating products.

There can be no assurance that the Aetna Acquisition will not adversely affect any of our segments' respective abilities to attract new clients or retain existing clients or our ability to cross-sell additional products and/or services within any segment or between segments. If we do not compete effectively in the geographies and product areas in which we operate, our businesses, results of operations, financial condition and cash flows could be materially and adversely affected.

We are exposed to risks relating to the solvency of our customers and of other insurers.

If our customers' operating and financial performance deteriorates, or they are unable to make scheduled payments or obtain adequate financing, our customers may not be able to pay timely, or may delay payment of, amounts owed to us. Any inability of our customers to pay us for our products and services may adversely affect our businesses, financial condition and results of operations. In addition, both state and federal government sponsored payers, as a result of budget deficits or reductions, may suspend payments or seek to reduce their healthcare expenditures resulting in our customers delaying payments to us or renegotiating their contracts with us. Any delay or reduction in payments by such government sponsored payers may adversely affect our businesses, financial condition and results of operations.

We are subject to assessments under guaranty fund laws for obligations of insolvent insurance companies (such as the discounted estimated liability expense of $231 million pretax for our estimated share of future assessments for Penn Treaty Network America Insurance Company and one of its subsidiaries that Aetna recorded in the first quarter of 2017), HMOs, ACA co-ops and other payors to policyholders and claimants.

We face risks relating to the market availability, pricing, suppliers and safety profiles of prescription drugs that we purchase and sell.

We dispense significant volumes of brand-name and generic drugs from our retail, LTC, specialty and mail order pharmacies and through our PBM's network of retail pharmacies. When increased safety risk profiles or manufacturing or other supply issues of specific drugs or classes of drugs occur, or drugs become subject to greater restrictions as controlled substances, physicians may cease writing prescriptions for these drugs or the utilization of these drugs may be otherwise reduced.

Additionally, adverse publicity regarding drugs with higher safety risk profiles may result in reduced consumer demand for such drugs. On occasion, products are withdrawn by their manufacturers or transition to over-the-counter products, which can

result in lower prescription utilization. In addition, future FDA rulings could restrict the supply or increase the cost of products sold to our customers. Our results of operations and cash flows may decline as a result of such regulatory rulings or market changes.

Further, we acquire a substantial amount of our mail and specialty pharmacies' prescription drug supply from a limited number of suppliers. Our agreements with these suppliers are often short-term and easily cancelable by either party without cause. In addition, these agreements may limit our ability to provide services for competing drugs during the term of the agreement and may allow the supplier to distribute through channels other than us. Certain of these agreements also allow pricing and other terms to be adjusted periodically for changing market conditions or required service levels. A termination or modification to any of these relationships could have a material adverse effect on our businesses, financial condition and results of operations. Moreover, many products distributed by our specialty pharmacy business are manufactured with ingredients that are susceptible to supply shortages. In some cases, we depend upon a single source of supply. Any such supply shortages or loss of any such single source of supply could adversely affect our results of operations and cash flows.

In addition, our suppliers are independent entities subject to their own operational and financial risks that are outside our control. If our current suppliers were to stop selling prescription drugs to us or delay delivery, including as a result of supply shortages, supplier production disruptions, supplier quality issues, closing or bankruptcies of our suppliers, or for other reasons, we may be unable to procure alternatives from other suppliers in a timely and efficient manner and on acceptable terms, or at all.

A disruption in our business operations could occur as a result of contamination of drugs, a failure to maintain necessary shipment and storage conditions, errors in mail order processing, the unavailability of prescription drugs provided by suppliers, labor disruptions or other unanticipated disruptions at our mail order dispensing pharmacy facilities, specialty pharmacy facilities, call centers, data centers or corporate facilities, among other factors. Such disruption could reduce our ability to process and dispense prescriptions and provide products and services to our customers.

If any products we distribute are in limited supply for significant periods of time, our financial condition and results of operations could be materially and adversely affected.

We face risks related to the frequency and rate of the introduction and pricing of generic drugs and brand name prescription drug products.

The profitability of our Retail/LTC and Pharmacy Services segments is dependent upon the utilization of prescription drug products. Utilization trends are affected by, among other factors, the introduction of new and successful prescription drugs as well as lower-priced generic alternatives to existing brand name products because we generally earn higher gross margins on the sale of generic alternatives than on brand name equivalents. In addition, inflation in the price of brand name drugs can affect utilization, particularly given the increase in high deductible health plans. Accordingly, our businesses and results of operations could be adversely affected by a slowdown or delay in the number or magnitude of new and successful prescription drugs and/or generic alternatives, as well as inflation in the price of brand name drugs. For example, we project that the operating income of our Pharmacy Services and Retail/LTC segments may be reduced in 2019 compared to 2018 due in part to fewer new multi-source generic drugs being introduced and lower brand name drug price inflation in 2019 than 2018.

Possible changes in industry pricing benchmarks and drug pricing generally can adversely affect our PBM business.

It is possible that the pharmaceutical industry or regulators may evaluate and/or develop an alternative pricing reference to replace AWP or Wholesale Acquisition Cost ("WAC"), which are the pricing references used for many of our PBM and LTC client contracts, drug purchase agreements, retail network contracts, specialty payor agreements and other contracts with third party payors in connection with the reimbursement of drug payments. In addition, many state Medicaid fee-for-service programs ("FFS Medicaid") have established pharmacy network payments on the basis of Actual Acquisition Cost ("AAC"). The use of an AAC basis in FFS Medicaid could have an impact on reimbursement practices in other commercial and government products. Future changes to the use of AWP, WAC or to other published pricing benchmarks used to establish drug pricing, including changes in the basis for calculating reimbursement by federal and state health programs and/or other payors, could impact the reimbursement we receive from Medicare and Medicaid programs, the reimbursement we receive from our PBM clients and other payors and/or our ability to negotiate rebates and/or discounts with drug manufacturers, wholesalers, PBMs and retail pharmacies. A failure or inability to fully offset any increased prices or costs or to modify our operations to mitigate the impact of such increases could have a material adverse effect on our results of operations. Additionally, any future changes in drug prices could be significantly different than our projections. The effect of these possible changes on our businesses cannot be predicted at this time.

Product liability, product recall or personal injury issues could damage our reputation.

The products that we sell could become subject to contamination, product tampering, mislabeling, recall or other damage. In addition, errors in the dispensing and packaging of drugs and consuming drugs in a manner that is not prescribed could lead to serious injury or death. Product liability or personal injury claims may be asserted against us with respect to any of the drugs or other products we sell or services we provide. For example, we are a defendant in litigation proceedings relating to opioids and the sale of products containing talc. Our businesses involve the provision of professional services, including by pharmacists, physician assistants, nurses and nurse practitioners, that exposes us to professional liability claims. Should a product or other liability issue arise, the coverage limits under our insurance programs and the indemnification amounts available to us may not be adequate to protect us against claims. We also may not be able to maintain our existing levels of insurance on acceptable terms in the future. Damage to our reputation in the event of a product liability or personal injury issue or judgment against us or a product recall could have a significant adverse effect on our businesses, financial condition and results of operations.

We face challenges in growing our Medicare Advantage and Medicare Part D membership.

We are seeking to substantially grow our Medicare Advantage and Medicare Part D membership, revenue and results of operations in 2019 and over the next several years, including by significantly expanding our Medicare Advantage service area. The organic expansion of our Medicare Advantage service area is subject to the ability of CMS to process our requests for service area expansions and our ability to build cost competitive provider networks in the expanded service areas that meet applicable network adequacy requirements. CMS' decisions on our requests for service area expansions also may be affected adversely by compliance issues that arise each year in our Medicare operations. If we are not successful in expanding our Medicare Advantage service area, we may not be able to achieve our Medicare Advantage growth goals.

We face challenges in growing our Medicaid membership, and expanding our Medicaid membership exposes us to additional risks.

We are seeking to substantially grow our Medicaid, dual eligible and dual eligible special needs plan membership over the next several years. In many instances, to acquire and retain our government customers' business, we must bid against our competitors in a highly competitive environment. Winning bids often are challenged successfully by unsuccessful bidders. Our ability to maintain and grow membership, revenues and results of operations in our Medicaid products is dependent on our remaining competitive on price, performance and preparing successful bids. In cases where a successful bid is challenged, we incur defense costs and may incur unreimbursed implementation and other costs to meet contractual deadlines even if we ultimately lose the challenge.

If we are successful in expanding our Medicaid membership, we may increase our exposure to states that face budgetary pressures, hospitals and other providers that face revenue challenges associated with uncompensated care and pressures on our operating margins driven by the projected rapid growth in the size of and cost of care for the Medicaid eligible population.

A change in our Health Care Benefits product mix may adversely affect our profit margins.

Our Insured Health Care Benefits products that involve greater potential risk generally tend to be more profitable than our ASC products. Historically, smaller employer groups have been more likely to purchase Insured Health Care Benefits products because such purchasers are generally unable or unwilling to bear greater liability for health care expenditures, although recently even relatively small employers have moved to ASC products. We also serve government-sponsored programs, including Medicare and Medicaid, that are subject to competitive bids and regulatory requirements and have lower profit margins than the Insured Commercial products in our Health Care Benefits segment. Although our Health Care Benefits membership is projected to continue to shift towards Government products in 2019, the profitability of each of those products differs and may be less than the profitability of an Insured Commercial product. A shift of enrollees from more profitable products to less profitable products could have a material adverse effect on our results of operations.

We may not be able to accurately forecast health care and other benefit costs, which could adversely affect our Health Care Benefits segment's results of operations. There can be no assurance that the future health care and other benefit costs of our Insured Health Care Benefits products will not exceed our projections.

Premiums for our Insured Health Care Benefits products, which comprised 87% of our Health Care Benefits revenues for 2018, are priced in advance based on our forecasts of health care and other benefit costs during a fixed premium period, which is generally one year. These forecasts are typically developed several months before the fixed premium period begins, are influenced by historical data (and recent historical data in particular), are dependent on our ability to anticipate and detect medical cost trends and changes in our members' behavior and healthcare utilization patterns and require a significant degree of

judgment. For example, our revenue on Medicare policies is based on bids submitted in June of the year before the contract year. Cost increases in excess of our projections cannot be recovered in the fixed premium period through higher premiums. As a result, our profits are particularly sensitive to the accuracy of our forecasts and our ability to anticipate and detect medical cost trends. Even relatively small differences between predicted and actual health care and other benefit costs as a percentage of premium revenues can result in significant adverse changes in our results of operations.

Our health care and other benefit costs can be affected by external events that we cannot forecast or anticipate and over which we have little or no control, such as emerging changes in the economy and/or public policy, additional government mandated benefits or other regulatory changes, changes in our members' behavior and healthcare utilization patterns, changes in health care practices, new technologies, increases in the cost of prescription drugs, influenza related health care costs (which may be substantial and were higher than Aetna projected in 2017-2018), direct-to-consumer marketing by drug manufacturers, clusters of high cost cases, epidemics, pandemics, terrorist attacks or other man-made disasters, natural disasters or other events that materially increase utilization of medical and/or other covered services, including prescription drugs, as well as changes in provider billing practices. Our health care and other benefit costs also can be affected by changes in our business mix, product designs, contracts with providers, medical management, underwriting, rating and/or claims processing methods and processes, and our medical management initiatives may not deliver the reduction in utilization and/or medical cost trend that we project.

It is particularly difficult to accurately anticipate, detect, price, forecast, manage and reserve for medical cost trends and utilization of medical and/or other covered services during and following periods when such utilization and/or trends are below recent historical levels, during periods of changing economic conditions and employment levels and for products with substantial membership growth and/or turnover. For example, as of December 31, 2018, we held a premium deficiency reserve of $16 million for the 2019 coverage year related to our Medicaid products. We expect utilization to increase in 2019 when compared to 2018.

If health care and other benefit costs are higher than the levels reflected in our pricing or if we are not able to obtain appropriate pricing on new or renewal business, our prices will not reflect the risk we assume, and our results of operations will be adversely affected. If health care and other benefit costs are lower than we predict, our prices may be higher than those of our competitors, which may cause us to lose Health Care Benefits membership.

A number of factors, many of which are beyond our control, contribute to rising health care and other benefit costs. If we are unable to satisfactorily manage our health care and other benefit costs, our Health Care Benefits segment's results of operations and competitiveness will be adversely affected.

A number of factors contribute to rising health care and other benefit costs, including previously uninsured members entering the health care system, changes in members' behavior and healthcare utilization patterns, turnover in our membership, additional government mandated benefits or other regulatory changes, changes in the health status of our members, the aging of the population and other changing demographic characteristics, advances in medical technology, increases in the number and cost of prescription drugs (including specialty pharmacy drugs), direct-to-consumer marketing by drug manufacturers, the increasing influence of social media on our members' utilization and other behavior, changes in health care practices and inflation. In addition, government-imposed limitations on Medicare and Medicaid reimbursements to health plans and providers have caused the private sector to bear a greater share of increasing health care and other benefits costs over time, and future amendments or repeal or replacement of the ACA that increase the uninsured population may exacerbate this problem. Other factors that affect our health care and other benefit costs include changes as a result of the ACA, changes to the ACA and other changes in the regulatory environment, the evolution toward a consumer driven business model, changes in health care practices, general economic conditions (such as inflation and employment levels), new technologies, influenza related health care costs (which may be substantial and were higher than Aetna projected in 2017-2018), clusters of high-cost cases, epidemics or pandemics, health care provider and member fraud, and numerous other factors that are or may be beyond our control.

Our Health Care Benefits segment's results of operations and competitiveness depend in large part on our ability to appropriately manage future health care and other benefit costs through underwriting criteria, product design, provider network configuration, negotiation of favorable provider contracts and medical management programs. Our medical cost management programs may not be successful and may have a smaller impact on health care and benefit costs than we expect. The factors described above may adversely affect our ability to predict and manage health care and other benefit costs, which can adversely affect our competitiveness and results of operations.

The reserves we hold for expected claims in our Insured Health Care Benefits products are based on estimates that involve an extensive degree of judgment and are inherently variable. Any reserve, including a premium deficiency reserve, may be

insufficient. If actual claims exceed our estimates, our results of operations could be materially adversely affected, and our ability to take timely corrective actions to limit future costs may be limited.

A large portion of health care claims are not submitted to us until after the end of the quarter in which services are rendered by providers to our members. Our reported health care costs payable for any particular period reflect our estimates of the ultimate cost of such claims as well as claims that have been reported to us but not yet paid. We also must estimate the amount of rebates payable under the ACA's, CMS's and OPM's minimum MLR rules and the amounts payable by us to, and receivable by us from, the United States federal government under the ACA's remaining premium stabilization program.

Our estimates of health care costs payable are based on a number of factors, including those derived from historical claim experience, but this estimation process also makes use of extensive judgment. Considerable variability is inherent in such estimates, and the accuracy of the estimates is highly sensitive to changes in medical claims submission and processing patterns and/or procedures, turnover and other changes in membership, changes in product mix, changes in the utilization of medical and/or other covered services, including prescription drugs, changes in medical cost trends, changes in our medical management practices and the introduction of new benefits and products. We estimate health care costs payable periodically, and any resulting adjustments, including premium deficiency reserves, are reflected in current-period results of operations within benefit costs. For example, as of December 31, 2018, we held a premium deficiency reserve of $16 million for the 2019 coverage year related to our Medicaid products. A worsening (or improvement) of health care cost trend rates or changes in claim payment patterns from those that we assumed in estimating health care costs payable as of December 31, 2018 would cause these estimates to change in the near term, and such a change could be material.

Furthermore, if we are not able to accurately and promptly anticipate and detect medical cost trends or accurately estimate the cost of incurred but not yet reported claims or reported claims that have not been paid, our ability to take timely corrective actions to limit future costs and reflect our current benefit cost experience in our pricing process may be limited, which would further exacerbate the extent of any adverse impact on our results of operations. These risks are particularly acute during and following periods when utilization of medical and/or other covered services and/or medical cost trends are below recent historical levels and in products where there is significant turnover in our membership each year, and such risks are further magnified by the ACA and other legislation and regulations that limit our ability to price for our projected and/or experienced increases in utilization and/or medical cost trends.

Extreme events, or the threat of extreme events, could materially increase our health care (including behavioral health) costs. We cannot predict whether or when any such events will occur.

Nuclear, biological or other attacks, whether as a result of war or terrorism, other man-made disasters, natural disasters, epidemics, pandemics and other extreme events can affect the United States economy in general, our industries and us specifically. In particular, such extreme events or the threat of such extreme events could result in significant health care (including behavioral health) costs, which would also be affected by the government's actions and the responsiveness of public health agencies and other insurers. In addition, our employees and those of our vendors are concentrated in certain large, metropolitan areas which may be particularly exposed to these events. Such events could adversely affect our businesses, cash flows and results of operations, and, in the event of extreme circumstances, our financial condition or viability, particularly if our responses to such events are less adequate than those of our competitors.

Changes in Public Policy and Other Legal and Regulatory Risks

Legislative and regulatory changes could create significant challenges to our Medicare Advantage and Medicare Part D revenues and results of operations, and proposed changes to these programs could create significant additional challenges. Entitlement program reform, if it occurs, could have a material adverse effect on our businesses, operations and/or results of operations.

Medicare Advantage payment rates to health plans have been cut over the last several years, with additional reductions to be phased in through 2019. CMS issued the Final Notice in April 2018. Overall, we project the benchmark rates in the Final Notice will increase funding for our Medicare Advantage business, excluding the impact of coding trend, by approximately 2.5 percent in 2019 compared to 2018. This 2019 rate increase only slightly offsets the challenge we face from the impact of the increasing cost of medical care (including prescription medications), the HIF and CMS local and national coverage decisions that require us to pay for services and supplies that are not factored into our bids and creates continued pressure on the Medicare Advantage program and our Medicare Advantage results of operations. We cannot predict future Medicare funding levels, the impact of future federal budget actions or ensure that such changes or actions will not have an adverse effect on our Medicare results of operations.

In addition, the "star ratings" from CMS for our Medicare Advantage plans will continue to have a significant effect on our plans' results of operations. Since 2015, only Medicare Advantage plans with a star rating of four or higher (out of five) are eligible for a quality bonus in their basic premium rates. CMS continues to change its rating system to make achieving and maintaining a four or higher star rating more difficult. Our star ratings and past performance scores are adversely affected by the compliance issues that arise each year in our Medicare operations. If our star ratings fall below 4 for a significant portion of our Medicare Advantage membership or do not match the performance of our competitors or the star rating quality bonuses are reduced or eliminated, our revenues and results of operations may be significantly adversely affected.

Payments we receive from CMS for our Medicare Advantage and Part D businesses also are subject to risk adjustment based on the health status of the individuals we enroll. Elements of that risk adjustment mechanism continue to be challenged by the DOJ, the OIG and CMS itself. Substantial changes in the risk adjustment mechanism, including changes that result from enforcement or audit actions, could materially affect the fairness of our Medicare reimbursement, require us to raise prices or reduce the benefits we offer to Medicare beneficiaries, and potentially limit our (and the industry's) participation in the Medicare program.

Medicare Part D has resulted in increased utilization of prescription medications and puts pressure on our pharmacy gross margin rates due to regulatory and competitive pressures. Further, as a result of the ACA and changes to the retiree drug subsidy rules, clients of our PBM could decide to discontinue providing prescription drug benefits to their Medicare-eligible members. To the extent this phenomenon occurs, the adverse effects of increasing customer migration into Medicare Part D may outweigh the benefits we realize from growth of our Medicare Part D business. In addition, if the cost and complexity of Medicare Part D exceed management's expectations or prevent effective program implementation or administration; if changes to the regulations regarding how drug costs are reported for Medicare Part D are implemented in a manner that adversely affects the profitability of our Medicare Part D business; if changes to the applicable regulations impact our ability to retain fees from third parties including network pharmacies; if the government alters Medicare Part D program requirements or reduces funding because of the higher-than-anticipated cost to taxpayers of Medicare Part D or for other reasons; if the government mandates the use of point-of-sale manufacturer's rebates or up front drug pricing discounts, makes drug manufacturer's rebates illegal, or makes changes to how pharmacy pay-for-performance is calculated; or if reinsurance thresholds are reduced below their current levels, our Medicare Part D results of operations and our ability to expand our Medicare Part D business could be adversely affected.

More generally, our Medicare results of operations and our ability to expand our Medicare membership and revenues also could be adversely affected if we fail to design and maintain programs that are attractive to Medicare Advantage or Part D participants; if CMS imposes restrictions on our Medicare business as a result of audits or other regulatory actions; if we fail to successfully implement corrective actions or other remedial measures sufficient to prevent or remove any applicable restrictions that may be imposed by CMS; or if we are not successful in retaining enrollees, or winning contract renewals or new contracts under Medicare's competitive bidding process.

Federal funding for expanded Medicaid coverage began to decrease in 2017. This reduction is causing states to re-evaluate funding for their Medicaid expansions. That re-evaluation may adversely affect Medicaid payment rates, our Medicaid membership in those states, our revenues, our MBRs and our results of operations.

We may not be able to obtain adequate premium rate increases in our Insured Health Care Benefits products, which would have an adverse effect on our revenues, MBRs and results of operations and could magnify the adverse impact of increases in health care and other benefit costs and of ACA assessments, fees and taxes.

Premium rates for our Insured Health Care Benefits products generally must be filed with state insurance regulators and are subject to their approval, which creates risk for us in the current political and regulatory environment. The ACA generally requires a review by HHS in conjunction with state regulators of premium rate increases that exceed a federally specified threshold (or lower state-specific thresholds set by states determined by HHS to have adequate processes). Rate reviews can magnify the adverse impact on our operating margins and results of operations of increases in health care and other benefit costs, increased utilization of covered services, and ACA assessments, fees and taxes, by restricting our ability to reflect these increases and/or these assessments, fees and taxes in our pricing. The risk of increases in utilization of medical and/or other covered services and/or in health care and other benefit costs is particularly acute during and following periods when utilization has been below recent historical levels, during periods of changing economic conditions and/or employment levels and in products where there is significant turnover in our membership each year. Further, our ability to reflect ACA assessments, fees and taxes in our Medicare rates is limited. Similarly, our ability to reflect them in our Medicaid and/or CHIP premium rates is limited due, among other things, to the budgetary pressures currently facing many state governments. This could magnify the adverse impact on our operating margins and results of operations of increases in utilization of medical and other covered services, health care and other benefit costs and/or medical cost trends that exceed our projections.

Since 2013, HHS has issued determinations to health plans that their rate increases were "unreasonable," and we continue to experience challenges to appropriate premium rate increases in certain states. Regulators or legislatures in a number of states have implemented or are considering limits on premium rate increases, either by enforcing existing legal requirements more stringently or proposing different regulatory standards. Regulators or legislatures in a number of states also have conducted hearings on proposed premium rate increases, which can result, in some instances have resulted, in substantial delays in implementing proposed rate increases even if they ultimately are approved. Our plans can be excluded from participating in small group Public Exchanges if they are deemed to have a history of "unreasonable" rate increases. We requested significant increases in our premium rates in our small group Commercial Health Care Benefits products for 2019 and expect to continue to request significant increases in those rates for 2020 and beyond in order to adequately price for projected medical cost trends, required expansions of coverage and significant assessments, fees and taxes imposed by the federal and state governments, including the ACA. Our rates also must be adequate to reflect the risk that our products will be selected by people with a higher risk profile or utilization rate than the pool of participants we anticipated when we established the pricing for the applicable products (also known as "adverse selection") in our products, particularly in small group products, which we expect to continue and potentially worsen in 2019 following the expiration of the ACA's risk corridor and reinsurance programs at the end of 2016. These significant rate increases heighten the risks of adverse public and regulatory reaction and adverse selection and the likelihood that our requested premium rate increases will be denied, reduced or delayed, which could lead to operating margin compression.

We anticipate continued regulatory and legislative action to increase regulation of premium rates in our Insured Health Care Benefits products. We may not be able to obtain rates that are actuarially justified or that are sufficient to make our policies profitable in any product line or geography. If we are unable to obtain adequate rates and/or rate increases, it could materially and adversely affect our operating margins and our ability to earn adequate returns on Insured Health Care Benefits business in one or more states or cause us to withdraw from certain geographies and/or products.

Minimum MLR rebate requirements limit the level of margin we can earn in our Insured Health Care Benefits products while leaving us exposed to higher than expected medical costs. Challenges to our minimum MLR rebate methodology and/or reports could adversely affect our results of operations.

The ACA requires us to pay minimum MLR rebates each year with respect to prior years. The ACA's minimum MLR rebate requirements limit the level of margin we can earn in our Commercial Insured and Medicare Insured businesses. CMS minimum MLR rebate regulations limit the level of margin we can earn in our Medicaid Insured business. Certain portions of our Health Care Benefits Medicaid and FEHB program business also are subject to minimum MLR rebate requirements in addition to but separate from those imposed by the ACA. Minimum MLR rebate requirements leave us exposed to medical costs that are higher than those reflected in our pricing. The process supporting the management and determination of the amount of MLR rebates payable is complex and requires judgment, and the minimum MLR reporting requirements are detailed. Federal and state auditors are challenging our Commercial Health Care Benefits business' compliance with the ACA's minimum MLR requirements as well as our FEHB plans' compliance with the OPM's FEHB program-specific minimum MLR requirements. Our Medicare and Medicaid contracts also are subject to minimum MLR audits. If a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years, it will become ineligible to enroll new members. If a Medicare Advantage or Medicare Part D contract pays such rebates for five consecutive years, it will be terminated by CMS. Additional challenges to our methodology and/or reports relating to minimum MLR and related rebates by federal and state regulators and private litigants are reasonably possible. The outcome of these audits and additional challenges could adversely affect our results of operations.

Our business activities are highly regulated. Our Pharmacy Services, Medicare Advantage, Medicare Part D, Medicaid, dual eligible, dual eligible special needs plan, small group and certain other products are subject to particularly extensive and complex regulations. If we fail to comply with applicable laws and regulations, we could be subject to significant adverse regulatory actions or suffer brand and reputational harm which may have a material adverse effect on our businesses. Compliance with existing and future laws, regulations and/or judicial decisions may reduce our profitability and limit our growth.

Our businesses are subject to extensive regulation and oversight by state, federal and international governmental authorities. The laws and regulations governing our operations and interpretations of those laws and regulations are increasing in number and complexity, change frequently and can be inconsistent or conflicting. In general, these laws and regulations are designed to benefit and protect customers, members and providers rather than us or our investors. In addition, the governmental authorities that regulate our businesses have broad latitude to make, interpret and enforce the laws and regulations that govern us and continue to interpret and enforce those laws and regulations more strictly and more aggressively each year. In connection with the Aetna Acquisition, we also agreed to undertakings with certain state regulators that place various restrictions on certain of our businesses and the payment of dividends by certain of our subsidiaries.

Our Pharmacy Services products are subject to:

- The clinical quality, patient safety and other risks inherent in the dispensing, packaging and distribution of drugs and other health care products and services, including claims related to purported dispensing and other operational errors (any failure by us to adhere to the laws and regulations applicable to the dispensing of drugs could subject our Pharmacy Services businesses to civil and criminal penalties).
- Federal and state anti-kickback and other laws that govern our relationship with drug manufacturers, customers and consumers.
- Compliance requirements under ERISA, including fiduciary obligations in connection with the development and implementation of items such as drug formularies and preferred drug listings.
- Federal and state legislative proposals and/or regulatory activity that could adversely affect pharmacy benefit industry practices.

Our Health Care Benefits products are highly regulated, particularly those that serve Medicare, Medicaid, dual eligible, dual eligible special needs and small group Commercial customers and members. The laws and regulations governing participation in Medicare Advantage, Medicare Part D, Medicaid, dual eligible and dual eligible special needs plan programs are complex, are subject to interpretation and can expose us to penalties for non-compliance, including penalties under the False Claims Act and state false claims acts. In addition, the ACA may have expanded the jurisdiction of, and our exposure to, the False Claims Act to products that are sold on Public Exchanges or otherwise subject to the ACA. The scope of the practices and activities that are prohibited by federal and state false claims acts is the subject of pending litigation. Claims under federal and state false claims acts can be brought by the government or by private individuals on behalf of the government through a *qui tam* or "whistleblower" suit, and we are a defendant in a number of such proceedings. If we are convicted of fraud or other criminal conduct in the performance of a health program or if there is an adverse decision against us under the False Claims Act, we may be temporarily or permanently suspended from participating in government health care programs, including Medicare Advantage, Medicare Part D, Medicaid, dual eligible and dual eligible special needs plan programs, and we also may be required to pay significant fines and/or other monetary penalties.

If we fail to comply with laws and regulations that apply to government programs, we could be subject to criminal fines, civil penalties, premium refunds, prohibitions on marketing or active or passive enrollment of members, corrective actions, termination of our contracts or other sanctions which could have a material adverse effect on our ability to participate in Medicare Advantage, Medicare Part D, Medicaid, dual eligible, dual eligible special needs plan and other programs, cash flows, financial condition and results of operations.

Our businesses, profitability and growth also may be adversely affected by (i) judicial and regulatory decisions that change and/or expand the interpretations of existing statutes and regulations, impose medical or bad faith liability, increase our responsibilities under ERISA or the remedies available under ERISA, or reduce the scope of ERISA pre-emption of state law claims or (ii) other legislation and regulations.

If our compliance or other systems and processes fail or are deemed inadequate, we may suffer brand and reputational harm and become subject to regulatory actions or litigation which could adversely affect our businesses, results of operations, cash flows and/or financial condition.

Our businesses are subject to extensive and complex regulations, and many of our contracts with customers include detailed requirements. In order to be eligible to offer certain products or bid on certain contracts, we must demonstrate that we have robust systems in place to ensure that we comply with all applicable legal, regulatory and contractual requirements. These systems frequently are reviewed and audited by our customers and regulators. If our systems and processes designed to maintain compliance with applicable legal and contractual requirements, and to prevent and detect instances of, or the potential for, non-compliance fail or are deemed inadequate, we may suffer brand and reputational harm and be subject to regulatory actions, litigation and other proceedings which may result in damages, fines, suspension or loss of licensure, suspension or exclusion from participation in government programs and/or other penalties, any of which could adversely affect our businesses, cash flows, results of operations or financial condition.

Our litigation and regulatory risk profile are changing as a result of the Aetna Acquisition and as we offer new products and services and expand in business areas beyond our historical core businesses of Retail/LTC and Pharmacy Services.

Historically, we focused primarily on providing Retail/LTC and Pharmacy Services products and services. As a result of the Aetna Acquisition, we have significantly expanded our presence in Health Care Benefits products and services (including

products and services offered in multiple countries outside of the United States), which present a different litigation and regulatory risk profile than the products and services that we historically have offered.

The increased volume of business in areas beyond our historical core business and new products and services subject us to litigation and regulatory risks that are different from the risks of providing Retail/LTC and Pharmacy Services products and services and increase significantly our exposure to other risks.

We routinely are subject to litigation and other adverse legal proceedings, including class actions and qui tam actions. Many of these proceedings seek substantial damages which may not be covered by insurance. These proceedings may be costly to defend, result in changes in our business practices, harm our brand and reputation and adversely affect our businesses and results of operations.

Pharmacy services, retail pharmacy, LTC pharmacy and health care benefits are highly regulated and litigious industries. We are currently subject to various litigation matters, investigations, regulatory audits, inspections, government inquiries, and regulatory and other legal proceedings. Litigation, and particularly securities, collective or class action and *qui tam* litigation, is often expensive and disruptive. Certain of the lawsuits against us are or are purported to be class actions or *qui tam* actions. Litigation related to our provision of professional services in our pharmacies, specialty pharmacies, medical clinics and LTC facilities also has increased as we expand our services along the continuum of health care.

The majority of these proceedings relate to the conduct of our Retail/LTC, Pharmacy Services and Health Care Benefits operations and allege various violations of law. In addition, we operate in jurisdictions outside the United States, where contractual rights, tax positions and applicable regulations may be subject to interpretation or uncertainty to a greater degree than in the United States, and are therefore more likely to be subject to dispute by customers, members, governmental authorities and others. We are incurring expenses to resolve these proceedings. The outcome of litigation and other adverse legal proceedings is always uncertain, and outcomes that are not justifiable by the evidence or existing law or regulation can and do occur.

Litigation has been and may be brought against us by private individuals on behalf of the government through a *qui tam* or "whistleblower" suit. Under the provisions of the federal and various state false claims acts, private citizens may bring lawsuits alleging that a violation of the federal anti-kickback statute or similar laws has resulted in the submission of "false" claims to federal and/or state health care programs, including Medicare and Medicaid, and we are a defendant in a number of such proceedings. When a private individual brings a whistleblower suit, the defendant often will not be made aware of the suit for many months or even years, until the government commences its own investigation or determines whether it will intervene. Whistleblower suits have resulted in significant settlements between governmental agencies and health care companies. The significant incentives and protections provided under the Financial Reform Act increase the risk of whistleblower suits.

Many of the legal proceedings against us seek substantial damages (including non-economic or punitive damages and treble damages), and certain of these proceedings also seek changes in our business practices. While we currently have insurance coverage for some potential liabilities, other potential liabilities may not be covered by insurance, insurers may dispute coverage, or the amount of our insurance may not be enough to cover the damages awarded or costs incurred. In addition, some types of damages, like punitive damages, may not be covered by insurance, and in some jurisdictions the coverage of punitive damages is prohibited. Insurance coverage for all or some forms of liability may become unavailable or prohibitively expensive in the future.

We cannot predict the outcome of any of these matters, and the costs incurred may be substantial regardless of outcome. Litigation and other adverse legal proceedings could materially adversely affect our businesses or results of operations because of brand and reputational harm to us caused by such proceedings, the costs of defending such proceedings, the costs of settlement or judgments against us, or the changes in our operations that could result from such proceedings. See Item 3 of this Annual Report on Form 10-K for additional information.

We frequently are subject to regular and special governmental audits, investigations and reviews that could result in changes to our business practices and also could result in material refunds, fines, penalties, civil liabilities, criminal liabilities and other sanctions.

As one of the largest national retail and LTC pharmacy, pharmacy services and health care benefits providers, we frequently are subject to regular and special governmental market conduct and other audits, investigations and reviews by, and we receive subpoenas and other requests for information from, various federal and state agencies, regulatory authorities, attorneys general, committees, subcommittees and members of the United States Congress and other state, federal and international governmental authorities. For example, we have received CIDs from, and provided documents and information to, the Civil Division of the

DOJ in cooperation with a current investigation of our patient chart review processes in connection with risk adjustment data submissions under Parts C and D of the Medicare program. Several such audits, investigations and reviews currently are pending, some of which may be resolved in 2019, and the results of which may be adverse to us.

Federal and state governments have made investigating and prosecuting health care and other insurance fraud, waste and abuse a priority. Fraud, waste and abuse prohibitions encompass a wide range of activities, including kickbacks for referral of members, billing for unnecessary medical and/or other covered services, improper marketing and violations of patient privacy rights. The regulations and contractual requirements applicable to us and other industry participants are complex and subject to change, making it necessary for us to invest significant resources in complying with our regulatory and contractual requirements. Ongoing vigorous law enforcement and the highly technical regulatory scheme mean that our compliance efforts in this area will continue to require significant resources. In addition, our medical costs and the medical expenses of our Health Care Benefits ASC customers may be adversely affected if we do not prevent or detect fraudulent activity by providers and/or members.

Regular and special governmental audits, investigations and reviews by federal, state and international regulators could result in changes to our business practices, and also could result in significant or material premium refunds, fines, penalties, civil liabilities, criminal liabilities or other sanctions, including suspension or exclusion from participation in government programs and suspension or loss of licensure. Any of these audits, investigations or reviews could have a material adverse effect on our financial condition, results of operations or businesses or result in significant liabilities and negative publicity for our company. For example, since 2013, CMS has selected certain of the Company's Medicare Advantage contracts for various years for RADV audit. In addition, federal and state auditors are challenging our Commercial Health Care Benefits business' compliance with the ACA's minimum MLR requirements as well as our FEHB plans' compliance with OPM's FEHB program-specific minimum MLR requirements. Our Medicare and Medicaid contracts also are subject to minimum MLR audits. If a Medicare Advantage or Medicare Part D contract pays minimum MLR rebates for three consecutive years, it will become ineligible to enroll new members. If a Medicare Advantage or Medicare Part D contract pays such rebates for five consecutive years, it will be terminated by CMS.

We are subject to retroactive adjustments to and/or withholding of certain premiums and fees, including as a result of CMS RADV audits. We generally rely on health care providers to appropriately code claim submissions and document their medical records. If these records do not appropriately support our risk adjusted premiums, we may be required to refund premium payments to CMS and/or pay fines and penalties under the False Claims Act.

Premiums and/or fees for Medicare members, certain federal government employee groups and Medicaid beneficiaries are subject to retroactive adjustments and/or withholding by the federal and applicable state governments. Our business that is subject to the ACA, including amounts payable to us or payable by us under the ACA's premium stabilization programs and our risk adjustment and reinsurance data, also is subject to audit by governmental authorities. CMS regularly audits our performance to determine our compliance with CMS's regulations and our contracts with CMS and to assess the quality of the services we provide to our Medicare members.

CMS uses various payment mechanisms to allocate and adjust premium payments to our and other companies' Medicare plans by considering the applicable health status of Medicare members as supported by information prepared, maintained and provided by health care providers. We collect claim and encounter data from providers and generally rely on providers to appropriately code their submissions to us and document their medical records, including the diagnosis data submitted to us with claims. CMS pays increased premiums to Medicare Advantage plans and PDPs for members who have certain medical conditions identified with specific diagnosis codes.

Federal regulators review and audit the providers' medical records to determine whether those records support the related diagnosis codes that determine the members' health status and the resulting risk-adjusted premium payments to us. In that regard, CMS has instituted RADV audits of a subset of Medicare Advantage plans for various contract years, including certain of our plans for various contract years, to validate coding practices and supporting medical record documentation maintained by health care providers and the resulting risk adjusted premium payments to the plans. CMS may require us to refund premium payments if our risk adjusted premiums are not properly supported by medical record data. The OIG also is auditing our risk adjustment data and that of other companies, and we expect CMS and the OIG to continue auditing risk adjustment data. We also have received CIDs from, and provided documents and information to, the Civil Division of the DOJ in connection with a current investigation of our patient chart review processes in connection with risk adjustment data submissions under Parts C and D of the Medicare program.

In 2012, CMS revised its audit methodology for RADV audits to determine refunds payable by Medicare Advantage plans for contract year 2011 and forward. Under the revised methodology, among other things, CMS will project the error rate identified

in the audit sample of approximately 200 members to all risk adjusted premium payments made under the contract being audited. For contract years prior to 2011, CMS did not project sample error rates to the entire contract. As a result, the revised methodology may increase our exposure to premium refunds to CMS based on incomplete medical records maintained by providers. On October 26, 2018, CMS issued proposed rules related to, among other things, changes to the RADV audit methodology established by CMS in 2012. CMS projects that the changes to the RADV audit methodology would increase its recoveries from Medicare Advantage plans as a result of RADV audits. CMS has requested comments on the proposed rules, including whether the proposed RADV rule change should apply retroactively to audits of Medicare Advantage plans for contract year 2011 and forward. We are evaluating the potential adverse effect, which could be material, on our results of operations, financial condition and cash flows if the proposed RADV rule change were adopted as proposed. CMS also has announced its intent to use third party auditors to attain its ultimate goal of subjecting all Medicare Advantage contracts to either a comprehensive or a targeted RADV audit for each contract year. We are currently unable to predict which of our Medicare Advantage contracts will be selected for future audit, the amounts of any retroactive refunds of, or prospective adjustments to, Medicare Advantage premium payments made to us, the effect of any such refunds or adjustments on the actuarial soundness of our Medicare Advantage bids, or whether any RADV audit findings would require us to change our method of estimating future premium revenue in future bid submissions to CMS or compromise premium assumptions made in our bids for prior contract years, the current contract year or future contract years.

If we fail to report and correct errors discovered through our own auditing procedures or during a CMS audit or otherwise fail to comply with the applicable laws and regulations, we could be subject to fines, civil monetary penalties or other sanctions, including fines and penalties under the False Claims Act, which could have a material adverse effect on our ability to participate in Medicare Advantage, Part D or other government programs, and on our financial condition, cash flows and results of operations.

CMS has issued a final rule implementing ACA requirements that Medicare Advantage and PDP plans report and refund to CMS overpayments that those plans receive from CMS. However, CMS's statements in formalized guidance regarding "overpayments" to Medicare Advantage plans appear to be inconsistent with CMS's prior RADV audit guidance. These statements appear to equate each Medicare Advantage risk adjustment data error with an "overpayment" without reconciliation to the principles underlying the fee for service adjustment comparison contemplated by CMS's RADV audit methodology. The precise interpretation, impact and legality of the final rule are not clear and are subject to pending litigation. If Medicare Advantage plans were not paid based on payment model principles that align with the requirements of the Social Security Act or such payments were not implemented correctly, it could have a material adverse effect on our results of operations, financial condition and/or cash flows.

Certain of our Medicaid contracts require the submission of complete and correct encounter data. The accurate and timely reporting of encounter data is increasingly important to the success of our Medicaid programs because more states are using encounter data to determine compliance with performance standards and, in part, to set premium rates. We have expended and may continue to expend additional effort and incur significant additional costs to collect accurate, or to correct inaccurate or incomplete, encounter data and have been and could be exposed to premium withholding, operating sanctions and financial fines and penalties for noncompliance. We have experienced challenges in obtaining complete and accurate encounter data due to difficulties with providers and third-party vendors submitting claims in a timely fashion in the proper format, and with state agencies in coordinating such submissions. As states increase their reliance on encounter data, these difficulties could affect the Medicaid premium rates we receive and how Medicaid membership is assigned to us, which could have a material adverse effect on our Medicaid results of operations and cash flows and/or our ability to bid for, and continue to participate in, certain Medicaid programs.

Any premium or fee refunds, adjustments or withholding or civil or criminal fines or penalties, or other sanctions, including restrictions on or changes in the way we do business, loss of licensure or exclusion from participation in government programs, resulting from regulatory audits or investigations, whether as a result of RADV, Public Exchange related, recovery audit program or other audits or investigations by CMS, the OIG, HHS, the DOJ or otherwise, including audits of our minimum MLR rebates, methodology and/or reports, could be material and could adversely affect our results of operations, financial condition and cash flows.

Programs funded in whole or in part by the U.S. federal government account for a significant portion of our revenues. The U.S. federal government and our other government customers may reduce funding for health care or other programs, cancel or decline to renew contracts with us, or make changes that adversely affect the number of persons eligible for certain programs, the services provided to enrollees in such programs, our premiums and our administrative and health care and other benefit costs, any of which could have a material adverse effect on our businesses, results of operations and cash flows. In addition, an extended federal government shutdown or a delay by Congress in raising the federal government's debt ceiling could lead to a delay, reduction, suspension or cancellation of federal government spending and a

significant increase in interest rates that could, in turn, have a material adverse effect on our businesses, results of operations and cash flows.

Programs funded in whole or in part by the United States federal government account for a significant portion of our revenue, and we expect that percentage to increase. As our government funded businesses grow, our exposure to changes in federal and state government policy with respect to and/or regulation of the various government funded programs in which we participate also increases.

Our revenues from government funded programs, including our Medicare, Medicaid, dual eligible and dual eligible special needs plan businesses and our government customers in our Commercial business, are dependent on annual funding by the federal government and/or applicable state or local governments. Federal, state and local governments have the right to cancel or not to renew their contracts with us on short notice without cause or if funds are not available. Funding for these programs is dependent on many factors outside our control, including general economic conditions, continuing government efforts to contain health care costs and budgetary constraints at the federal or applicable state or local level and general political issues and priorities.

For example, CMS is transitioning the process of calculating Medicare members' risk scores from using diagnoses data from the Risk Adjustment Processing System, or RAPS, to using diagnoses data from the Encounter Data System, or EDS. The RAPS process requires Medicare Advantage plans to apply a filter logic based on CMS guidelines and only submit claims that satisfy those guidelines. For submissions through EDS, CMS requires Medicare Advantage plans to submit all encounter data, and CMS applies the risk adjustment filtering logic to determine the risk scores. For 2019, 25% of the risk score will be calculated from claims data submitted through EDS, up from 15% in 2018. For 2020, the EDS percentage will increase to 50%. The transition from RAPS to EDS could result in different risk scores from each dataset as a result of plan processing issues, CMS processing issues or filtering logic differences between RAPS and EDS and could have a material adverse effect on our results of operations, financial condition and/or cash flows.

In addition, while the ACA provided substantial federal funding for the expansion of the number of people who qualify to enroll in Medicaid beginning in 2014, that funding began to decrease in 2017, and the future of that funding is uncertain. As a result, in 2019, states are preparing for the adverse impact on their budgets and programs by seeking to reduce their Medicaid expenditures and/or changing the design of their Medicaid programs. These changes could have a material adverse effect on the revenues, medical benefit ratios and results operations of our Medicaid contracts and/or our ability to grow our Medicaid membership, revenues and results of operations.

Our government customers also determine the eligibility criteria, premium levels and other aspects of Medicare, Medicaid, dual eligible and dual eligible special needs plan programs that affect the number of persons enrolled in these programs, the services provided to enrollees under these programs, the conditions for participating in these programs and our administrative and health care and other benefit costs under these programs. For example, states may require participation on their Public Exchange as a condition to participating in their Medicaid or state employee health benefit programs and/or take program design actions that shift provider costs from state employee plans to Commercial and Medicare plans. In the past, determinations of this type have at times adversely affected our results of operations from and willingness to participate in such programs, and they may do so again in the future. If a government customer reduces premium levels or increases premiums by less than the increase in our costs (such as by not allowing us to recover ACA and other applicable fees, taxes and assessments), and we cannot offset the adverse impact of these actions with supplemental premiums and/or changes in benefit plans, then our businesses and results of operations could be adversely affected. In addition, if states allow certain programs to expire, reduce the number of firms with which they contract for Managed Medicaid services or choose to opt out of Medicaid expansion, we could experience reduced Medicaid enrollment or reduced Medicaid enrollment growth, which would adversely affect our businesses, revenues and results of operations.

The federal government's "debt ceiling", or the amount of debt the federal government is permitted to borrow to meet its legal obligations (including, among other things, interest on the national debt, Medicare and Medicaid premiums and contributions to the FEHB program), is limited by statute and can only be raised by an act of Congress.

During a federal government shutdown or if Congress does not raise the debt ceiling before the federal government's current obligations approach or exceed its cash on hand and incoming receipts, federal government spending may be subject to delay, reduction, suspension or cancellation, which may be prolonged. Over 30% of our Health Care Benefits segment's revenues are derived from health care coverage programs that are funded in whole or in part by the federal government, including the Medicare, Medicaid, dual eligible and dual eligible specials needs plan programs, CHIP and the FEHB program. When federal spending is delayed, suspended or curtailed, we continue to receive claims from providers providing services to beneficiaries of these programs, and we remain liable for, and are required to fund, such claims. A federal government shutdown or a failure to

timely raise the debt ceiling could have a material adverse effect on our businesses, results of operations, cash flows, brand and reputation and, in the case of a prolonged shutdown or failure to raise the debt ceiling, our financial condition.

If the United States defaults on its obligations due to a failure to timely raise the debt ceiling or otherwise, or its credit rating is downgraded by any of the credit rating agencies, interest rates could rise, financial markets could become volatile and/or the availability of credit (and short-term credit in particular) could be adversely affected, thereby increasing our borrowing costs, adversely affecting the value of our investment portfolio, and/or adversely affecting our ability to access the capital markets, which could have a material adverse effect on our results of operations, financial condition and cash flows and could adversely affect our liquidity.

Our results of operations may be adversely affected by changes in laws and policies governing employers and by union organizing activity.

The federal and certain state legislatures continue to consider and pass legislation that increases our costs of doing business, including increased minimum wages and requiring employers to provide paid sick leave. In addition, our employee related operating costs may be increased by union organizing activity. If we are unable to reflect these increased expenses in our pricing or otherwise modify our operations to mitigate the effects of such increases, our results of operations will be adversely affected.

Risks Related to Customer Perceptions of our Products and Services

We must develop and maintain a relevant omni-channel experience for our retail customers.

Our business has evolved from a retail store experience to interaction with customers across numerous channels, including in-store, online, mobile and social media, among others. Omni-channel retailing is rapidly evolving and we must keep pace with changing customer expectations and new developments by our competitors. Our customers are increasingly using mobile phones, tablets, computers and other devices to comparison shop, determine product availability and complete purchases through mobile commerce applications. As a result, the portion of total consumer expenditures with all retailers occurring online and through mobile commerce applications is increasing and the pace of this increase could accelerate. We must compete by offering a consistent and convenient shopping experience for our customers regardless of the ultimate sales channel and by investing in, providing and maintaining mobile commerce applications for our customers that have the right features and are reliable and easy to use. If we are unable to make, improve or develop relevant customer-facing technology in a timely manner that keeps pace with technological developments and dynamic customer expectations, our ability to compete and our results of operations could be materially and adversely affected. In addition, if our online activities or our other customer-facing technology systems do not function as designed, we may experience a loss of customer confidence, data security breaches, lost sales, or be exposed to fraudulent purchases, any of which could materially and adversely affect our business operations, reputation and results of operations.

We must maintain and improve our relationships with our retail and specialty pharmacy customers and increase the demand for our products and services, including proprietary brands. If we fail to develop new products, differentiate our products from those of our competitors or demonstrate the value of our products to our customers and members, our ability to retain or grow our customer base may be adversely affected.

The success of our businesses depends in part on customer loyalty, superior customer service and our ability to persuade customers to frequent our retail stores and online sites and to purchase products in additional categories and our proprietary brands. Failure to timely identify or effectively respond to changing consumer preferences and spending patterns, and evolving demographic mixes in our markets, an inability to expand the products being purchased by our clients and customers, or the failure or inability to obtain or offer particular categories of products could adversely affect our relationship with our customers and clients and the demand for our products and services and could result in excess inventories of products.

We offer our retail customers proprietary brand products that are available exclusively at our retail stores and through our online retail sites. The sale of proprietary products subjects us to unique risks including potential product liability risks, mandatory or voluntary product recalls, potential supply chain and distribution chain disruptions for raw materials and finished products, our ability to successfully protect our intellectual property rights and the rights of applicable third parties, and other risks generally encountered by entities that source, market and sell private-label products. Any failure to adequately address some or all of these risks could have an adverse effect on our retail business, results of operations and financial condition. Additionally, an increase in the sales of our proprietary brands may adversely affect our sales of products owned by our suppliers which, consequently, could adversely impact certain of our supplier relationships. Our ability to locate qualified, economically stable suppliers who satisfy our requirements, and to acquire sufficient products in a timely and effective manner,

is critical to ensuring, among other things, that customer confidence is not diminished. Any failure to develop sourcing relationships with a broad and deep supplier base could adversely affect our financial performance and erode customer loyalty.

Our specialty pharmacy business focuses on complex and high-cost medications, many of which are made available by manufacturers to a limited number of pharmacies (so-called limited distribution drugs), that serve a relatively limited universe of patients. As a result, the future growth of our specialty pharmacy business is dependent largely upon expanding our base of drugs or penetration in certain treatment categories. Any contraction of our base of patients or reduction in demand for the prescriptions we currently dispense could have an adverse effect on our specialty pharmacy business, results of operations and cash flows.

We operate in rapidly evolving industries. Our customers generally, and our larger customers in particular, are well-informed and organized and, along with our individual customers, can easily move between us and our competitors. These factors require us to differentiate our products and solutions, anticipate changes in customer and consumer preferences, anticipate and effectively compete with the products and solutions of new and existing competitors and innovate and deliver new and existing products and solutions that demonstrate value to our customers and members, particularly in response to marketplace changes from public policy. Any failure to do so may adversely affect our ability to retain or grow customers and/or profitable medical membership, which can adversely affect our results of operations.

In order to be competitive in the increasingly consumer-oriented marketplace for our health care products and services, we will need to develop and deploy consumer-friendly products and services and make investments in consumer engagement, reduce our cost structure and compete successfully with new entrants into our businesses. If we are unsuccessful, our future growth and profitability may be adversely affected.

Historically, employers have been the most significant customers driving purchases of our Pharmacy Services and Health Care Benefits segments. However, decisions to buy our Pharmacy Services and Health Care Benefits products and services increasingly are made or influenced by consumers, either through direct purchasing (for example, Medicare Advantage plans and PDPs) or through Insurance Exchanges that allow individual choice. Similarly, consumers increasingly seek to access health care products and services locally and through other direct channels such as mobile devices and our websites. In response to this demand, we are expanding our consumer focus. To compete effectively in the consumer-driven marketplace, we will be required to develop or acquire new capabilities, attract new talent and develop new service and distribution relationships that respond to consumer needs and preferences.

We also will have to respond to pricing and other actions taken by existing competitors as well as potentially disruptive new entrants. Regulatory and participation requirements for Insurance Exchange-based plans tend to emphasize price and make competitive differentiation of our Health Care Benefits products and services based on other attributes more difficult. Price competition from existing and potentially new disruptive competitors in the industries in which each of our segments compete also continues to increase. Accordingly, we face competitive pricing pressures from existing and new competitors (including our vendors and others who may have lower cost structures than we do), and these pressures may reduce our operating margins or limit sales of our products and services. Our competitors may bring their consumer-oriented products and services to market more quickly, have greater experience marketing to consumers and/or may be targeting the higher margin portions of our businesses. These risks may be enhanced if employers shift to defined contribution health care benefits plans and make greater utilization of Private Exchanges or encourage their employees to purchase health insurance on the Public Exchanges. We can provide no assurance that we will be able to develop or operate successful or profitable consumer-oriented products and services, or that our Health Care Benefits segment will be able to compete successfully or profitably on Public Exchanges or Private Exchanges or benefit from any opportunities presented by Public Exchanges or Private Exchanges, or that we will be able to benefit from opportunities available to any of our segments in the industries in which we operate. If we do not develop and expand competitive and profitable consumer products, are not competitive in the industries in which we operate, or are unsuccessful in reducing our cost structure, our future growth and profitability may be adversely affected.

Risks Related to Our Relationships with Manufacturers, Providers, Suppliers and Vendors

Our results of operations may be adversely affected if we are unable to contract with manufacturers, providers, suppliers and vendors on competitive terms and develop and maintain attractive networks with high quality providers.

Our PBM business generates revenues primarily by contracting with clients to provide prescription drugs and related health care services to plan members. As a result, we are dependent on our relationships with prescription drug manufacturers and suppliers. We acquire a substantial amount of our mail order and specialty pharmacies' prescription drug supply from a limited number of suppliers. Our agreements with these suppliers often are short-term and easily cancelable by either party without cause. In addition, these agreements may limit our ability to provide services for competing drugs during the term of the

agreement and may allow the supplier to distribute through channels other than the Company. A termination or modification to any of these relationships could have a material adverse effect on our businesses, financial condition and results of operations.

We are seeking to enhance our health care provider networks by entering into joint ventures and other collaborative risk-sharing arrangements with health care providers. Providers' willingness to enter these arrangements with us depends upon, among other things, our ability to provide them with up to date quality of care data to support these value-based contracts. These arrangements are designed to give providers incentives to engage in population health management and optimize delivery of health care to our members. These arrangements also may allow us to expand into new geographies, target new customer groups, increase membership and reduce medical costs and, if we provide technology or other services to the relevant health system or provider organization, may contribute to our revenue and earnings from alternative sources. If such arrangements do not result in the lower medical costs that we project or if we fail to attract health care providers to such arrangements, or are less successful at implementing such arrangements than our competitors, our medical costs may not be competitive and may be higher than we project, our attractiveness to customers may be reduced, we may lose or be unable to grow membership, and our ability to profitably grow our business and/or our results of operations may be adversely affected.

While we believe joint ventures, ACOs and other non-traditional health care provider organizational structures present opportunities for us, the implementation of our joint ventures and other non-traditional structure strategies may not achieve the intended results, which could adversely affect our results of operations and cash flows. Among other things, joint ventures require us to maintain collaborative relationships with our counterparties, continue to gain access to provider rates that make the joint ventures economically sustainable and devote significant management time to the operation and management of the joint venture. We may not be able to achieve these objectives in one or more of our joint ventures, which could adversely affect our results of operations and cash flows.

If our service providers fail to meet their contractual obligations to us or to comply with applicable laws or regulations, we may be exposed to brand and reputational harm, litigation or regulatory action. This risk is particularly high in our Medicare, Medicaid, dual eligible and dual eligible special needs plan programs.

We contract with various third parties to perform certain functions and services and provide us with certain information technology systems. Our arrangements with these third parties may expose us to public scrutiny, adversely affect our brand and reputation, expose us to litigation or regulatory action, and otherwise make our operations vulnerable if we fail to adequately oversee, monitor and regulate their performance or if they fail to meet their contractual obligations to us or to comply with applicable laws or regulations. For example, certain of our vendors have been responsible for releases of sensitive information of our members and employees, which has caused us to incur additional expenses and given rise to litigation against us.

These risks are particularly high in our Medicare, Medicaid, dual eligible and dual eligible special needs plan programs, where third parties perform PBM, medical management and other member related services for us. Any failure of our or these third parties' prevention, detection or control systems related to regulatory compliance, compliance with our internal policies, data security and/or cybersecurity or any incident involving the theft, misappropriation, loss or other unauthorized disclosure of, or access to, members', customers' or other constituents' sensitive information could require us to expend significant resources to remediate any damage, interrupt our operations and adversely affect our brand and reputation and also expose us to whistleblower, class action and other litigation, other proceedings, prohibitions on marketing or active or passive enrollment of members, corrective actions, fines, sanctions and/or penalties, any of which could adversely affect our businesses, cash flows, results of operations and/or financial condition.

Continuing consolidation and integration among providers and other suppliers may increase our medical and other covered benefits costs, make it difficult for us to compete in certain geographies and create new competitors.

Hospitals and other providers and health systems continue to consolidate across the health care industry. While this consolidation could increase efficiency and has the potential to improve the delivery of health care services, it also reduces competition and the number of potential contracting parties in certain geographies. These health systems also are increasingly forming and considering forming health plans to directly offer health insurance in competition with us, a process that has been accelerated by the ACA. In addition, ACOs (including commercial and Medicaid-only ACOs developed as a result of state Medicaid laws), practice management companies, consolidation among and by integrated health systems and other changes in the organizational structures that physicians, hospitals and other health care providers adopt continues to change the way these providers interact with us and the competitive landscape in which we operate. These changes may increase our medical and other covered benefits costs, may affect the way we price our products and services and estimate our medical and other covered benefits costs and may require us to change our operations, including by withdrawing from certain geographies where we do not have a significant presence across our businesses or are unable to collaborate or contract with providers on acceptable terms. Each of these changes may adversely affect our businesses and results of operations.

We may experience increased medical and other benefit costs, litigation risk and customer and member dissatisfaction when providers that do not have contracts with us render services to our Health Care Benefits members.

Some providers that render services to our Health Care Benefits members do not have contracts with us. In those cases, we do not have a pre-established understanding with these providers as to the amount of compensation that is due to them for services rendered to our members. In some states, the amount of compensation due to these nonparticipating providers is defined by law or regulation, but in most instances it is either not defined or it is established by a standard that is not clearly translatable into dollar terms. In such instances providers may believe that they are underpaid for their services and may either litigate or arbitrate their dispute with us or try to recover the difference between what we have paid them and the amount they charged us from our members, which may result in customer and member dissatisfaction. For example, on October 15, 2018, an arbitrator awarded certain claimant hospitals approximately $150 million in a proceeding relating to Aetna's out-of-network benefit payment and administration practices. Such disputes may cause us to pay higher medical or other benefit costs than we projected.

Risks Related to Our Operations

Customers, particularly large sophisticated customers, expect us to implement their contracts and onboard their employees and members efficiently and effectively. Failure to do so could adversely affect our reputation, businesses, results of operations, cash flows and prospects. If we or our vendors fail to provide our customers with quality service that meets their expectations, our ability to retain and grow our membership and customer base will be adversely affected.

Our ability to attract and retain customers and members is dependent upon providing cost effective, quality customer service operations (such as call center operations, PBM functions, retail pharmacy and LTC services, home delivery pharmacy prescription delivery, specialty pharmacy prescription delivery, claims processing, customer case installation and online access and tools) that meet or exceed our customers' and members' expectations. As we seek to reduce general and administrative expenses, we must balance the potential impact of cost-saving measures on our customer and other service and performance. If we misjudge the effects of such measures, customer and other service may be adversely affected. We depend on third parties for certain of our customer service, PBM and prescription delivery operations. If we or our vendors fail to provide service that meets our customers' and members' expectations, we may have difficulty retaining or profitable growing our customer base and/or membership, which can adversely affect our results of operations. For example, noncompliance with any privacy or security laws or regulations or any security breach involving one of our third party vendors could have a material adverse effect on our businesses, results of operations, brand and reputation.

We are subject to payment-related risks that could increase our operating costs, expose us to fraud or theft, subject us to potential liability and disrupt our business operations.

We accept payments using a variety of methods, including cash, checks, credit cards, debit cards, gift cards, mobile payments and potentially other technologies in the future. Acceptance of these payment methods subjects us to rules, regulations, contractual obligations and compliance requirements, including payment network rules and operating guidelines, data security standards and certification requirements, and rules governing electronic funds transfers. These requirements may change in the future, which could make compliance more difficult or costly. For certain payment options, including credit and debit cards, we pay interchange and other fees, which could increase periodically thereby raising our operating costs. We rely on third parties to provide payment processing services, including the processing of credit cards, debit cards, and various other forms of electronic payment. If these vendors are unable to provide these services to us, or if their systems are compromised, our operations could be disrupted. The payment methods that we offer also expose us to potential fraud and theft by persons seeking to obtain unauthorized access to, or exploit any weaknesses in, the payment systems we use. If we fail to abide by applicable rules or requirements, or if data relating to our payment systems is compromised due to a breach or misuse, we may be responsible for any costs incurred by payment card issuing banks and other third parties or subject to fines and higher transaction fees. In addition, our reputation and ability to accept certain types of payments could each be harmed resulting in reduced sales and adverse effects on our results of operations.

Our and our vendors' operations are subject to a variety of business continuity hazards and risks, any of which could interrupt our operations or otherwise adversely affect our performance and results of operations.

We and our vendors are subject to business continuity hazards and other risks, including natural disasters, utility and other mechanical failures, acts of war or terrorism, disruption of communications, data security and preservation, disruption of supply or distribution, safety regulation and labor difficulties. The occurrence of any of these or other events to the Company or our vendors might disrupt or shut down our operations or otherwise adversely affect our operations. We may also be subject to certain liability claims in the event of an injury or loss of life, or damage to property, resulting from such events. Although we

have developed procedures for crisis management and disaster recovery and business continuity plans and maintain insurance policies that we believe are customary and adequate for our size and industry, our insurance policies include limits and, as such, our coverage may be insufficient to protect against all potential hazards and risks incident to our businesses. In addition, our crisis management and disaster recovery procedures and business continuity plans may not be effective. Should any such hazards or risks occur, or should our insurance coverage be inadequate or unavailable, our businesses, financial condition and results of operations could be adversely affected.

We and our vendors have experienced cyber attacks. We can provide no assurance that we or our vendors will be able to detect, prevent or contain the effects of such attacks or other information security (including cybersecurity) risks or threats in the future.

We and our vendors have experienced and continue to experience a variety of cyber attacks, and we and our vendors expect to continue to experience cyber attacks going forward. Among other things, we and our vendors have experienced automated attempts to gain access to our public facing networks, brute force, SYN flood and distributed denial of service attacks, attempted malware infections, vulnerability scanning, ransomware attacks, spear-phishing campaigns, mass reconnaissance attempts, injection attempts, phishing, PHP injection and cross-site scripting. We also have seen an increase in attacks designed to obtain access to consumers' accounts using illegally obtained demographic information. Although the impact of such attacks has not been material to our operations or results of operations through December 31, 2018, we can provide no assurance that we or our vendors will be able to detect, prevent or contain the effects of such attacks or other information security (including cybersecurity) risks or threats in the future. As we expand our consumer-oriented products and services, increase the amount and types of data we acquire, generate and use, increase the amount of information we make available to members, consumers and providers on mobile devices, expand our use of vendors, expand internationally and expand our use of social media, our exposure to these data security and related cybersecurity risks, including the risk of undetected attacks, damage, loss or unauthorized disclosure or access to and/or disruption of our systems and the customer, member, provider, employee, ACO, joint venture, vendor and other third party information they contain, increases, and the cost of attempting to protect against these risks also increases.

Although we deploy a layered approach to address information security (including cybersecurity) threats and vulnerabilities that is designed to protect confidential information against data security breaches, a compromise of our information security controls or of those businesses with whom we interact, which results in confidential information being accessed, obtained, damaged, or used by unauthorized or improper persons, could harm our reputation and expose us to regulatory actions and claims from customers and clients, financial institutions, payment card associations and other persons, any of which could adversely affect our businesses, financial condition, and results of operations. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and may not immediately produce signs of intrusion, we may be unable to anticipate these techniques or to implement adequate preventative measures. Moreover, a data security breach could require that we expend significant resources related to our information systems and infrastructure, and could distract management and other key personnel from performing their primary operational duties. We also could be adversely affected by any significant disruption in the systems of third parties we interact with, including key payors and vendors.

The costs of attempting to protect against the foregoing risks and the costs of responding to a cyber-incident are significant. Large scale data breaches at other entities increase the challenge we and our vendors face in maintaining the security of our information technology systems and proprietary information and of our members' and customers' sensitive information. Following a cyber-incident, our and/or our vendors' remediation efforts may not be successful, and a cyber-incident could result in interruptions, delays or cessation of service, and loss of existing or potential customers and members. In addition, breaches of our and/or our vendors' security measures and the unauthorized dissemination of sensitive personal information or proprietary information or confidential information about us, our customers, our members or other third-parties, could expose our customers' and members' private information and our customers and members to the risk of financial or medical identity theft, or expose us or other third parties to a risk of loss or misuse of this information, and result in investigations, regulatory enforcement actions, material fines and penalties, loss of customers, litigation or other actions which could have a material adverse effect on our businesses, brand, reputation, cash flows and results of operations.

The failure or disruption of our information technology systems or the failure of our information technology infrastructure to support our businesses could adversely affect our reputation, businesses, results of operations and cash flows.

Our information systems are subject to damage or interruption from power outages, facility damage, computer and telecommunications failures, computer viruses, security breaches (including credit card or personally identifiable information breaches), cyber attacks, vandalism, catastrophic events and human error. If our information systems are damaged, fail to work properly or otherwise become unavailable, or if we are unable to successfully complete our planned consolidation of our PBM

claims adjudication platforms, we may incur substantial costs to repair or replace them, and may experience reputational damage, loss of critical information, customer disruption and interruptions or delays in our ability to perform essential functions and implement new and innovative services. In addition, compliance with changes in United States and foreign privacy and information security laws and standards may result in considerable expense due to increased investment in technology and the development of new operational processes.

Our business success and results of operations depend in part on effective information technology systems and on continuing to develop and implement improvements in technology. Pursuing multiple initiatives simultaneously could make this continued development and implementation significantly more challenging.

Many aspects of our operations are dependent on our information systems and the information collected, processed, stored, and handled by these systems. We rely heavily on our computer systems to manage our ordering, pricing, point-of-sale, pharmacy fulfillment, inventory replenishment, claims processing, ExtraCare customer loyalty program, finance and other processes. Throughout our operations, we receive, retain and transmit certain confidential information, including PII and PHI, that our customers and clients provide to purchase products or services, enroll in programs or services, register on our websites, interact with our personnel, or otherwise communicate with us. In addition, for these operations, we depend in part on the secure transmission of confidential information over public networks.

We have many different information and other technology systems supporting our businesses (including as a result of our acquisitions). Our businesses depend in large part on these systems to adequately price our products and services; accurately establish reserves, process claims and report results of operations; and interact with providers, employer plan sponsors, members and vendors in an efficient and uninterrupted fashion. In addition, recent trends toward greater consumer engagement in health care require new and enhanced technologies, including more sophisticated applications for mobile devices. Certain of our technology systems (including software) are older, legacy systems that are less flexible, less efficient and require a significant ongoing commitment of capital and human resources to maintain, protect and enhance them and to integrate them with our other systems. We must re-engineer and reduce the number of these systems to meet changing consumer and vendor preferences and needs, improve our productivity and reduce our operating expenses. We also need to develop or acquire new technology systems, contract with new vendors or modify certain of our existing systems to support the consumer-oriented products and services we are developing, operating and expanding and/or to meet current and developing industry and regulatory standards, including to keep pace with continuing changes in information processing technology and emerging cybersecurity risks and threats. If we fail to achieve these objectives, our ability to profitably grow our business and/or our results of operations may be adversely affected.

Our business strategy involves providing customers with differentiated, easy to use, secure products and solutions that use information to meet customer needs. The types of technology and levels of service that are acceptable to customers and members today will not necessarily be acceptable in the future, requiring us to anticipate and meet marketplace demands for technology. Our success therefore is dependent in large part on our ability, within the context of a limited budget of human resources and capital and our existing and future business relationships, to timely secure, integrate, develop, redesign and enhance our (or contract with vendors to provide) technology systems that support our business strategy initiatives and processes in a compliant, secure, and cost and resource efficient manner. Integration of our acquisitions increases these challenges, and we may not be successful in integrating various systems in a timely or cost-effective manner.

Information technology projects frequently are long-term in nature and may take longer to complete and cost more than we expect and may not deliver the benefits we project once they are complete. If we do not effectively and efficiently secure, manage, integrate and enhance our technology portfolio (including vendor sourced systems), we could, among other things, have problems determining health care and other benefit cost estimates and/or establishing appropriate pricing, meeting the needs of customers, providers and members, developing and expanding our consumer-oriented products and services or keeping pace with industry and regulatory standards, and our results of operations may be adversely affected.

Sales of our products and services are dependent on our ability to attract and motivate internal sales personnel and independent third-party brokers, consultants and agents. New distribution channels create new disintermediation risk. We may be subject to penalties or other regulatory actions as a result of the marketing practices of brokers and agents selling our products.

Our products are sold primarily through our sales personnel, who frequently work with independent brokers, consultants and agents who assist in the production and servicing of business. The independent brokers, consultants and agents generally are not dedicated to us exclusively and may frequently recommend and/or market health care benefits products of our competitors. Accordingly, we must compete intensely for their services and allegiance. Our sales could be adversely affected if we are unable to attract, retain or motivate sales personnel and third-party brokers, consultants and agents, or if we do not adequately

provide support, training and education to this sales network regarding our complex product portfolio, or if our sales strategy is not appropriately aligned across distribution channels. This risk is heightened as we develop, operate and expand our Consumer Health Products and Services products and services and our business model evolves to include a greater focus on consumers and direct-to-consumer sales, such as competing for sales on Insurance Exchanges.

New distribution channels for our products and services continue to emerge, including Private Exchanges operated by health care consultants and technology companies. These channels may make it more difficult for us to directly engage consumers and other customers in the selection and management of their health care benefits, in health care utilization and in the effective navigation of the health care system. We also may be challenged by new technologies and marketplace entrants that could interfere with our existing relationships with customers and health plan members in these areas.

In addition, there have been a number of investigations regarding the marketing practices of brokers and agents selling health care and other insurance products and the payments they receive. These investigations have resulted in enforcement actions against companies in our industry and brokers and agents marketing and selling those companies' products. For example, CMS and state departments of insurance have increased their scrutiny of the marketing practices of brokers and agents who market Medicare products. These investigations and enforcement actions could result in penalties and the imposition of corrective action plans and/or changes to industry practices, which could adversely affect our ability to market our products.

We also face other risks that could adversely affect our businesses, results of operations, financial condition and/or cash flows, which include:

- Failure of our corporate governance policies or procedures, for example significant financial decisions being made at an inappropriate level in our organization;
- Inappropriate application of accounting principles or a significant failure of internal control over financial reporting, which could lead to a restatement of our results of operations and/or a deterioration in the soundness and accuracy of our reported results of operations; and
- Failure to adequately manage our run-off businesses and/or our regulatory and financial exposure to businesses we have sold, including Aetna's divested standalone Medicare Part D, domestic group life insurance, group disability insurance and absence management businesses.

Financial Risks

Goodwill and other intangible assets could, in the future, become impaired.

As of December 31, 2018, we had $115.2 billion of goodwill and other intangible assets. During the year ended December 31, 2018, we took $6.1 billion of goodwill impairment charges related to our LTC reporting unit. Goodwill and indefinitely-lived intangible assets are subject to annual impairment reviews, or more frequent reviews if events or circumstances indicate that the carrying value may not be recoverable. When evaluating goodwill for potential impairment, we compare the fair value of our reporting units to their respective carrying amounts. We estimate the fair value of our reporting units using a combination of a discounted cash flow method and a market multiple method. If the carrying amount of a reporting unit exceeds its estimated fair value, a goodwill impairment loss is recognized in an amount equal to the excess to the extent of the goodwill balance. Estimated fair values could change if, for example, there are changes in the business climate, changes in the competitive environment, adverse legal or regulatory actions or developments, changes in capital structure, cost of debt, interest rates, capital expenditure levels, operating cash flows or market capitalization. Because of the significance of our goodwill and intangible assets, any future impairment of these assets could require material noncash charges to our results of operations, which could have a material adverse effect on our financial condition and results of operations.

We would be adversely affected if we do not effectively deploy our capital . Downgrades or potential downgrades in our credit ratings, should they occur, could adversely affect our brand and reputation, businesses, cash flows, financial condition and results of operations.

Our operations generate significant capital, and we have the ability to raise additional capital. The manner in which we deploy our capital, including investments in our businesses, our operations (such as information technology and other strategic and capital projects), dividends, acquisitions, share and/or debt repurchases, repayment of debt, reinsurance or other capital uses, impacts our financial strength, claims paying ability and credit ratings issued by recognized rating organizations. Credit ratings issued by nationally-recognized organizations are broadly distributed and generally used throughout our industries. Our ratings reflect each rating organization's opinion of our financial strength, operating performance and ability to meet our debt obligations or obligations to our insureds. We believe our credit ratings and the financial strength and claims paying ability of

our principal insurance and HMO subsidiaries are important factors in marketing our Health Care Benefits products to certain of our customers.

Each of the ratings organizations reviews our ratings periodically, and there can be no assurance that our current ratings will be maintained in the future. In connection with the completion of the Aetna Acquisition, each of Standard & Poor's, Moody's and Fitch downgraded certain of our debt, financial strength and/or other credit ratings. Downgrades in our ratings could adversely affect our businesses, cash flows, financial condition and results of operations.

Adverse conditions in the U.S. and global capital markets can significantly and adversely affect the value of our investments in debt and equity securities, mortgage loans, alternative investments and other investments, our results of operations and/or our financial condition.

The global capital markets, including credit markets, continue to experience volatility and uncertainty. As an insurer, we have a substantial investment portfolio that supports our policy liabilities and surplus and is comprised largely of debt securities of issuers located in the United States. As a result, the income we earn from our investment portfolio is largely driven by the level of interest rates in the United States, and to a lesser extent the international financial markets; and volatility, uncertainty and/or disruptions in the global capital markets, particularly the United States credit markets, and governments' monetary policy, particularly United States monetary policy, can significantly and adversely affect the value of our investment portfolio, our results of operations and/or our financial condition by:

- Significantly reducing the value and/or liquidity of the debt securities we hold in our investment portfolio and creating realized capital losses that reduce our results of operations and/or unrealized capital losses that reduce our shareholders' equity;
- Keeping interest rates low on high-quality short-term or medium-term debt securities (such as we have experienced during recent years) and thereby materially reducing our net investment income and results of operations as the proceeds from securities in our investment portfolio that mature or are otherwise disposed of continue to be reinvested in lower yielding securities;
- Reducing the fair values of our investments if interest rates rise;
- Causing non-performance or defaults on their obligations to us by third parties, including customers, issuers of securities in our investment portfolio, mortgage borrowers and/or reinsurance and/or derivatives counterparties;
- Making it more difficult to value certain of our investment securities, for example if trading becomes less frequent, which could lead to significant period-to-period changes in our estimates of the fair values of those securities and cause period-to-period volatility in our net income and shareholders' equity;
- Reducing our ability to issue short-term debt securities at attractive interest rates, thereby increasing our interest expense and decreasing our results of operations; and
- Reducing our ability to issue other securities.

Although we seek, within guidelines we deem appropriate, to match the duration of our assets and liabilities and to manage our credit and counterparty exposures, a failure adequately to do so could adversely affect our net income and our financial condition and, in extreme circumstances, our cash flows.

Risks Relating to Our Acquisition of Aetna

We have limited experience in the insurance and managed health care industry, which may hinder our ability to achieve our objectives as a combined company.

We have limited experience operating an insurance and managed health care business, and are relying in large part on the existing management of Aetna to continue to manage our Health Care Benefits business. However, there is no assurance that we will be able to continue to retain the services of such management. If we fail to retain the existing management of Aetna, our ability to realize the anticipated benefits of the transaction may be adversely affected.

The Aetna Acquisition may not be accretive, and may be dilutive, to our earnings per share, which may adversely affect our stock price.

Although we currently project that the Aetna Acquisition will result in a number of benefits, including that it will be accretive to our earnings per share, changes in the estimates we use for these projections and the impact of future events and conditions, some of which we do not control, could cause actual results to be lower than these projections. In addition, future events and

conditions could decrease or delay the accretion that is currently projected or could result in dilution. These events and conditions include adverse changes in market conditions, changes in the regulatory environment, additional transaction and integration-related costs and other factors such as the failure to realize some or all of the anticipated benefits of the Aetna Acquisition. Any dilution of, decrease in or delay of any accretion to, our earnings per share could cause our stock price to decline or grow at a reduced rate.

We may fail to successfully combine the businesses and operations of CVS Health and Aetna to realize the anticipated benefits and cost savings of the Aetna Acquisition within the anticipated timeframe or at all, which could adversely affect our stock price.

The success of the Aetna Acquisition will depend, in part, on our ability to realize the anticipated benefits and cost savings from combining the businesses of CVS Health and Aetna. Our ability to realize these anticipated benefits and cost savings is subject to certain risks, including:

- Our ability to successfully combine the businesses of CVS Health and Aetna;
- whether the combined businesses will perform as expected;
- the possibility that we paid more for Aetna than the value we will derive from the acquisition;
- the reduction of our cash available for operations and other uses and the incurrence of indebtedness to finance the acquisition; and
- the assumption of known and unknown liabilities of Aetna.

If we are not able to successfully combine the businesses of CVS Health and Aetna within the anticipated time frame, the anticipated cost savings and other benefits of the Aetna Acquisition may not be realized fully or may take longer to realize than expected, the combined businesses may not perform as expected, and our stock price may be adversely affected.

Until the completion of the Aetna Acquisition, we and Aetna operated independently, and there can be no assurances that our respective businesses can be integrated successfully. It is possible that the integration process could result in the loss of key CVS Health or Aetna employees, the disruption of either company's or both companies' ongoing businesses or in unexpected integration issues, higher than expected integration costs and an overall post-completion integration process that takes longer than originally anticipated. Specifically, issues that must be addressed in integrating the operations of CVS Health and Aetna in order to realize the anticipated benefits of the Aetna Acquisition so the combined business performs as expected include, among other things:

- combining the companies' separate operational, financial, reporting and corporate functions;
- integrating the companies' technologies, products and services;
- identifying and eliminating redundant and underperforming operations and assets;
- harmonizing the companies' operating practices, employee development, compensation and benefit programs, internal controls and other policies, procedures and processes;
- addressing possible differences in business backgrounds, corporate cultures and management philosophies;
- consolidating the companies' corporate, administrative and information technology infrastructure;
- coordinating sales, distribution and marketing efforts;
- managing the movement of certain businesses and positions to different locations;
- maintaining existing agreements with customers, providers and vendors and avoiding delays in entering into new agreements with prospective customers, providers and vendors;
- operating in industry sectors in which we and our current management may have little or no experience;
- coordinating geographically dispersed organizations;
- consolidating offices of CVS Health and Aetna that are currently in or near the same location; and
- effecting the actions that are required by regulatory approvals we obtained in connection with completing the Aetna Acquisition.

In addition, at times, the attention of certain members of our management and our resources will be focused on the integration of the businesses of the two companies and diverted from day-to-day business operations, which may adversely affect our businesses.

Our future results may be adversely impacted if we do not effectively manage our expanded operations following completion of the Aetna Acquisition.

Following completion of the Aetna Acquisition our business is significantly larger than the size of either CVS Health's or Aetna's respective pre-transaction businesses. The combined company's ability to successfully manage this expanded business will depend, in part, upon management's ability to implement an effective integration of the two companies and its ability to manage a combined business with significantly larger size and scope with the associated increased costs and complexity. There can be no assurances that the management of the combined company will be successful or that the combined company will realize the expected operating efficiencies, cost savings and other benefits currently anticipated from the Aetna Acquisition. If we are not able to fully realize the expected operating efficiencies, cost savings and other benefits anticipated from the Aetna Acquisition, or such benefits take longer to realize than expected, our combined businesses may not perform as expected and our stock price may be adversely affected.

We may have difficulty attracting, motivating and retaining executives and other key employees following completion of the Aetna Acquisition.

Our future success will depend in part on our ability to retain key executives and other employees of Aetna. Uncertainty about the effect of the Aetna Acquisition on CVS Health and Aetna employees may have an adverse effect on the combined company and consequently the combined business. This uncertainty may impair our ability to attract, retain and motivate key personnel. Employee retention may be particularly challenging during the integration process, as employees of CVS Health and Aetna may experience uncertainty about their future roles in the combined business.

Furthermore, if key employees of CVS Health or Aetna depart or are at risk of departing, including because of issues relating to the uncertainty and difficulty of integration, financial security or a desire not to remain as employees of the combined business, we may have to incur significant costs in retaining such individuals or in identifying, hiring and retaining replacements for departing employees and may lose significant expertise and talent relating to the business of Aetna, and our ability to realize the anticipated benefits of the Aetna Acquisition may be materially and adversely affected. Accordingly, no assurance can be given that we will be able to attract or retain key employees of Aetna to the same extent that Aetna was able to attract or retain employees in the past.

The Aetna integration process could disrupt our ongoing businesses and/or operations.

Parties with which we do business may experience uncertainty associated with the Aetna Acquisition and/or the post-closing integration process, including with respect to current or future business relationships with the combined business. Our business relationships (including business relationships of our Health Care Benefits segment) may be subject to disruption as customers, members, manufacturers, providers, vendors and others may attempt to negotiate changes in existing business relationships or consider entering into business relationships with parties other than the combined business. These disruptions could have a material adverse effect on the businesses, financial condition, results of operations or prospects of one or more of the combined company's businesses, including a material adverse effect on our ability to realize the anticipated benefits of the Aetna Acquisition.

Our indebtedness following completion of the Aetna Acquisition is substantially greater than our indebtedness on a stand-alone basis and greater than the combined indebtedness of CVS Health and Aetna existing prior to the announcement of the transaction. This increased level of indebtedness could adversely affect our business flexibility and increase our borrowing costs.

In order to complete the Aetna Acquisition, we incurred acquisition-related debt financing of approximately $45.0 billion and assumed Aetna's existing indebtedness with a fair value of approximately $8.1 billion. Our substantially increased indebtedness and higher debt-to-equity ratio following completion of the Aetna Acquisition in comparison to that of CVS Health prior to the Aetna Acquisition has the effect, among other things, of reducing our flexibility to respond to changing business and economic conditions and increases our interest expense compared to pre Aetna Acquisition periods. In addition, the amount of cash required to service our increased indebtedness levels and thus the demands on our cash resources are greater than the amount of cash flows required to service the indebtedness of CVS Health or Aetna individually prior to the Aetna Acquisition. The increased levels of indebtedness could also reduce funds available to fund our efforts to combine our business with Aetna and realize expected benefits of the Aetna Acquisition and/or engage in investments in product development, capital expenditures, dividend payments, share repurchases and other activities and may create competitive disadvantages for us relative to other companies with lower debt levels.

We will continue to incur significant integration-related costs in connection with the Aetna Acquisition.

We expect to continue to incur significant non-recurring costs associated with combining the operations of CVS Health and Aetna. We expect to continue to incur significant integration-related costs related to formulating and implementing integration plans, including facilities and systems consolidation costs and employment-related costs. We continue to assess the magnitude of these costs, and additional unanticipated costs may be incurred in the integration of the two companies' businesses. We may not achieve the net benefit of such expenditures that we project associated with the elimination of duplicative costs, as well as the realization of other efficiencies related to the integration of our businesses in the near term, or at all. If we fail to realize the expected expense and other efficiencies we project, our results of operations, cash flows and stock price may be adversely affected.

Risks Related to Our Acquisitions, Joint Ventures and International Operations

We expect to continue to pursue acquisitions, joint ventures, strategic alliances and other inorganic growth opportunities, which may be unsuccessful, cause us to assume unanticipated liabilities, disrupt our existing businesses, be dilutive or lead us to assume significant debt, among other things.

We expect to continue to pursue acquisitions, joint ventures, strategic alliances and other inorganic growth opportunities as part of our growth strategy. In addition to integration risks, some other risks we face with respect to acquisitions and other inorganic growth strategies include:

- We frequently compete with other firms, some of which may have greater financial and other resources and a greater tolerance for risk, to acquire attractive companies;
- The acquired, alliance and/or joint venture businesses may not perform as projected;
- The goodwill or other intangible assets established as a result of our acquisitions may be incorrectly valued or may become non-recoverable;
- We may assume unanticipated liabilities, including those that were not disclosed to us or which we underestimated;
- The acquired businesses, or the pursuit of other inorganic growth strategies, could disrupt or compete with our existing businesses, distract management, result in the loss of key employees, divert resources, result in tax costs or inefficiencies and make it difficult to maintain our current business standards, controls, information technology systems, policies, procedures and performance;
- We may finance future acquisitions and other inorganic growth strategies by issuing common stock for some or all of the purchase price, which would dilute the ownership interests of our shareholders;
- We may incur significant debt in connection with acquisitions (whether to finance acquisitions or by assuming debt from the businesses we acquire);
- We may not have the expertise to manage and profitably grow the businesses we acquire, and we may need to rely on the retention of key personnel and other suppliers of businesses we acquire, which may be difficult or impossible to accomplish;
- We may enter into merger or purchase agreements but, due to reasons within or outside our control, fail to complete the related transactions, which could result in termination fees or other penalties that could be material, material disruptions to our businesses and operations and adversely affect our brand and reputation;
- In order to complete a proposed acquisition, we may be required to divest certain portions of our business;
- We may be involved in litigation related to mergers or acquisitions, including for matters which occurred prior to the applicable closing, which may be costly to defend and may result in adverse rulings against us that could be material; and
- The integration into our businesses of the businesses and entities we acquire may affect the way in which existing laws and regulations apply to us, including subjecting us to laws and regulations that did not previously apply to us.

We expect joint ventures to be an important part of our business model transformation and inorganic growth strategies. Joint ventures present risks that are different from acquisitions, including selection of appropriate joint venture parties, initial and ongoing governance of the joint venture, joint venture compliance activities (including compliance with applicable CMS requirements), growing the joint venture's business in a manner acceptable to all the parties, including other providers in the networks that include joint ventures, maintaining positive relationships among the joint venture parties and the customers, and member and business disruption that may occur upon joint venture termination.

We may be unable to successfully integrate companies we acquire.

Upon the closing of any acquisition we complete, we will need to successfully integrate the products, services and related assets, as well as internal controls into our business operations. If an acquisition is consummated, the integration of the acquired business, its products, services and related assets into our company may also be complex and time-consuming and, if the integration is not fully successful, we may not achieve the anticipated benefits, operating and cost synergies or growth opportunities of an acquisition. Potential difficulties that may be encountered in the integration process include the following:

- Integrating personnel, operations and systems (including internal control environments and compliance policies), while maintaining focus on producing and delivering consistent, high quality products and services;
- Coordinating geographically dispersed organizations;
- Disruption of management's attention from our ongoing business operations;
- Retaining existing customers and attracting new customers; and
- Managing inefficiencies associated with integrating our operations.

An inability to realize the full extent of the anticipated benefits, operating and cost synergies, innovations and operations efficiencies or growth opportunities of an acquisition, as well as any delays or additional expenses encountered in the integration process, could have a material adverse effect on our businesses and results of operations. Furthermore, acquisitions, even if successfully integrated, may fail to further our business strategy as anticipated, expose us to increased competition or challenges with respect to our products, services or geographic markets, and expose us to additional liabilities associated with an acquired business including risks and liabilities associated with litigation involving the acquired business. Any one of these challenges or risks could impair our ability to realize any benefit from our acquisitions after we have expended resources on them.

As a result of our expanded international operations, we face political, legal and compliance, operational, regulatory, economic and other risks that we do not face or are more significant than in our domestic operations.

We significantly expanded our international operations as a result of the closing of the Aetna Acquisition in November 2018. As a result of our expanded international operations, we face political, legal, compliance, operational, regulatory, economic and other risks that we do not face or that are more significant than in our domestic operations. These risks vary widely by country and include varying regional and geopolitical business conditions and demands, government intervention and censorship, discriminatory regulation, nationalization or expropriation of assets and pricing constraints. Our international products need to meet country-specific customer and member preferences as well as country-specific legal requirements, including those related to licensing, privacy, data storage, location, protection and security.

Our international operations increase our exposure to, and require us to devote significant management resources to implement controls and systems to comply with, the privacy and data protection laws of non-U.S. jurisdictions and the anti-bribery, anti-corruption and anti-money laundering laws of the United States (including the FCPA) and the United Kingdom (including the UK Bribery Act) and similar laws in other jurisdictions. Implementing our compliance policies, internal controls and other systems upon our expansion into new countries and geographies may require the investment of considerable management time and management, financial and other resources over a number of years before any significant revenues or profits are generated. Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or employees, restrictions or outright prohibitions on the conduct of our business, and significant brand and reputational harm. We must regularly reassess the size, capability and location of our global infrastructure and make appropriate changes, and must have effective change management processes and internal controls in place to address changes in our businesses and operations. Our success depends, in part, on our ability to anticipate these risks and manage these difficulties, and the failure to do so could have a material adverse effect on our businesses, results of operations, financial condition, brand, reputation and/or long-term growth.

Our international operations require us to overcome logistical and other challenges based on differing languages, cultures, legal and regulatory schemes and time zones. Our international operations encounter labor laws, standards and customs that can be difficult and make employee relationships less flexible than in our domestic operations and expensive to modify or terminate. In some countries we are required to, or choose to, operate with local business associates, which requires us to manage our relationships with these third parties and may reduce our operational flexibility and ability to quickly respond to business challenges.

In some countries we may be exposed to currency exchange controls or other restrictions that prevent us from transferring funds internationally or converting local currencies into U.S. dollars or other currencies. Fluctuations in foreign currency exchange rates may adversely affect our revenues, results of operations and cash flows from our international operations. Some of our operations are, and are increasingly likely to be, in emerging markets where these risks are heightened. Any measures we may implement to reduce the effect of volatile currencies and other risks on our international operations may not be effective.

Item 1B. Unresolved Staff Comments

There are no unresolved SEC Staff Comments.

Item 2. Properties

The Company's principal office is an owned building complex located in Woonsocket, Rhode Island, which totals approximately one million square feet. In addition, the Company leases corporate offices in Arizona, Illinois, Ohio, Pennsylvania, Texas, and Brazil.

Pharmacy Services Segment

As of December 31, 2018 , the Pharmacy Services segment had the following properties:

- An owned mail service dispensing pharmacy located in Texas;
- Leased mail order dispensing pharmacies located in Hawaii, Illinois and Pennsylvania;
- Leased call centers located in California, Missouri, Pennsylvania, Tennessee and Texas;
- Approximately 40 leased on-site pharmacy stores, approximately 25 leased retail specialty pharmacy stores, approximately 20 specialty mail order pharmacies and approximately 90 branches for infusion and enteral services.

Retail/LTC Segment

As of December 31, 2018 , the Retail/LTC segment had the following properties:

- Approximately 8,200 retail stores, of which approximately 4% were owned. Net selling space for retail stores was approximately 80.5 million square feet as of December 31, 2018 . Approximately 25% of the store base was opened or significantly remodeled within the last five years;
- Approximately 1,700 retail pharmacies and approximately 80 clinics in Target stores;
- Nine owned distribution centers located in eight states and 13 leased distribution facilities located in twelve additional states and Brazil. The 22 distribution centers totaled approximately 10.4 million square feet as of December 31, 2018 ; and
- Six owned LTC pharmacies, approximately 150 leased LTC pharmacies in 46 states and one owned LTC repackaging facility.

In connection with certain business dispositions completed between 1991 and 1997, the Company continues to guarantee lease obligations for approximately 85 former stores. The Company is indemnified for these guarantee obligations by the respective purchasers. These guarantees generally remain in effect for the initial lease term and any extension thereof pursuant to a renewal option provided for in the lease prior to the time of the disposition. For additional information on these guarantees, see "Lease Guarantees" in Note 16 "Commitments and Contingencies" contained in the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein.

Health Care Benefits Segment

The Health Care Benefits segment's principal office is an owned building complex that is approximately 1.7 million square feet in size and is located in Hartford, Connecticut. The Health Care Benefits segment also owns or leases other space in the greater Hartford area, Maryland, Pennsylvania, and various field locations in the United States and several other countries.

Management believes that the Company's owned and leased facilities are suitable and adequate to meet the Company's anticipated needs. At the end of the existing lease terms, management believes the leases can be renewed or replaced by

alternative space. For additional information on the amount of rental obligations for the Company's leases, see Note 6 ''Leases'' contained in the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein.

Item 3. Legal Proceedings

I. Legal Proceedings

The information contained in Note 16 ''Commitments and Contingencies'' of the "Notes to Consolidated Financial Statements" in the Annual Report is incorporated by reference herein.

II. Environmental Matters

Item 103 of SEC Regulation S-K requires disclosure of environmental legal proceedings with a governmental authority if management reasonably believes that the proceedings involve potential monetary sanctions of $100,000 or more. The Company is in the process of negotiating with the New York State Department of Environmental Conservation to resolve claims of alleged historical noncompliance with hazardous waste regulations in connection with LTC pharmacies in the State of New York. These proceedings are not material to the Company's business or financial condition.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market information

The Company's common stock is listed on the New York Stock Exchange under the symbol "CVS."

Holders of common stock

The information under the heading "Holders of Common Stock" in the Annual Report is incorporated by reference herein.

Dividends

The quarterly cash dividend declared by the Company's Board of Directors (the "Board") was $0.50 per share in 2018 and 2017.

CVS Health has paid cash dividends every quarter since becoming a public company. Future dividends will depend on the Company's earnings, capital requirements, financial condition and other factors considered relevant by the Board.

Issuer purchases of equity securities

The following share repurchase programs were authorized by the Board:

In billions				
Authorization Date		**Authorized**		**Remaining as of December 31, 2018**
November 2, 2016 ("2016 Repurchase Program")	$	15.0	$	13.9
December 15, 2014 ("2014 Repurchase Program")		10.0		—

The share Repurchase Programs, each of which was effective immediately, permit the Company to effect repurchases from time to time through a combination of open market repurchases, privately negotiated transactions, accelerated share repurchase transactions, and/or other derivative transactions. The 2016 Repurchase Program can be modified or terminated by the Board at any time. During the three months ended December 31, 2018 the Company did not repurchase any shares of common stock.

See Note 12 ''Shareholders' Equity'' of the "Notes to Consolidated Financial Statements" in the Annual Report, which is incorporated by reference herein, for additional information regarding the Company's share repurchases.

Item 6. Selected Financial Data

The selected consolidated financial data of CVS Health Corporation as of and for the periods indicated in the five-year period ended December 31, 2018 , have been derived from the consolidated financial statements of CVS Health Corporation and is incorporated herein by reference to the information contained in the Annual Report under the heading "Five-Year Financial Summary." The selected consolidated financial data should be read in conjunction with the consolidated financial statements and the audit reports of Ernst & Young LLP, which are incorporated by reference elsewhere in this Annual Report on Form 10-K.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Annual Report, which includes the "Cautionary Statement Concerning Forward-Looking Statements" at the end of such section, is incorporated by reference herein.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The information contained in "Management's Discussion and Analysis of Financial Condition and Results of Operations — Quantitative and Qualitative Disclosures About Market Risk" in the Annual Report is incorporated by reference herein.

Item 8. Financial Statements and Supplementary Data

The information contained in "Consolidated Statements of Operations," "Consolidated Statements of Comprehensive Income (Loss)," "Consolidated Balance Sheets," "Consolidated Statements of Shareholders' Equity," "Consolidated Statements of Cash Flows," "Notes to Consolidated Financial Statements," and "Report of Independent Registered Public Accounting Firm" in the Annual Report, is incorporated by reference herein.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of disclosure controls and procedures

The Company's Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15 (f) and 15d-15(f) under the Securities Exchange Act of 1934) as of December 31, 2018 , have concluded that as of such date the Company's disclosure controls and procedures were adequate and effective at a reasonable assurance level and designed to ensure that material information relating to the Company and its consolidated subsidiaries would be made known to such officers on a timely basis.

Internal control over financial reporting

The "Management's Report on Internal Control Over Financial Reporting" and "Report of Independent Registered Public Accounting Firm" sections of the Annual Report are incorporated by reference herein. These sections contain management's report on the Company's internal control over financial reporting and the Independent Registered Public Accounting Firm's report with respect to the effectiveness the Company's internal control over financial reporting.

Changes in internal control over financial reporting

On November 28, 2018, the Company completed its acquisition of Aetna. In conducting its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018 , management has elected to exclude Aetna from that assessment, as permitted under SEC rules. The Company is in the process of integrating the historical internal control over financial reporting of Aetna with the rest of the Company. Aetna's operations are included in the Company's 2018 consolidated financial statements for the period from November 28, 2018 to December 31, 2018 and represented 21% of the Company's consolidated total assets as of December 31, 2018 and 3% of the Company's consolidated total revenues for the year ended December 31, 2018.

Other than the foregoing, there has been no change in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 that occurred during the fourth quarter ended December 31, 2018 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

No events have occurred during the fourth quarter ended December 31, 2018 that would require disclosure under this item.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The sections of the Proxy Statement under the captions "Committees of the Board," "Code of Conduct," "Audit Committee Report," "Biographies of our Incumbent Board Nominees," and "Section 16(a) Beneficial Ownership Reporting Compliance" are incorporated by reference herein.

Executive Officers of the Registrant

The following sets forth the name, age and biographical information for each of the Registrant's executive officers as of February 28, 2019 . In each case the officer's term of office extends to the date of the board of directors meeting following the next annual meeting of stockholders of the Company. Previous positions and responsibilities held by each of the executive officers over the past five years or more are indicated below:

Lisa G. Bisaccia , age 62, Executive Vice President of CVS Health Corporation since March 2016 and Chief Human Resources Officer of CVS Health Corporation since January 2010; Senior Vice President of CVS Health Corporation from January 2010 through February 2016; Vice President, Human Resources of CVS Pharmacy, Inc. from September 2004 through December 2009. Ms. Bisaccia is also a member of the board of directors of Aramark, a leading global provider of food, facilities and uniform services.

Eva C. Boratto , age 52, Executive Vice President and Chief Financial Officer of CVS Health Corporation since November 2018; Executive Vice President - Controller and Chief Accounting Officer of CVS Health Corporation from March 2017 through November 2018; Senior Vice President - Controller and Chief Accounting Officer of CVS Health Corporation from July 2013 through February 2017; Senior Vice President of PBM Finance from July 2010 through June 2013.

Troyen A. Brennan, M.D ., age 64, Executive Vice President and Chief Medical Officer of CVS Health Corporation since November 2008; Executive Vice President and Chief Medical Officer of Aetna Inc. from February 2006 through November 2008.

James D. Clark , age 54, Senior Vice President - Controller and Chief Accounting Officer of CVS Health Corporation since November 2018; Vice President - Finance and Accounting of CVS Pharmacy, Inc. from September 2009 through October 2018.

Joshua M. Flum , age 49, Executive Vice President, Enterprise Strategy and Digital since November 2018; Executive Vice President, Corporate Strategy and Business Development of CVS Pharmacy, Inc. from June 2016 through October 2018; Executive Vice President - Pharmacy Services of CVS Pharmacy, Inc. from March 2015 through May 2016; Senior Vice President of Retail Pharmacy of CVS Pharmacy, Inc. from December 2010 through February 2015. Mr. Flum is a member of the board of directors of CreditRiskMonitor.com, Inc., a company that facilitates the analysis of corporate financial risk, mostly in the context of the extension of trade credit from one business to another.

Kevin P. Hourican , age 45, Executive Vice President of CVS Health Corporation and President of CVS Pharmacy since April 2018; Executive Vice President - Retail Pharmacy and Supply Chain of CVS Pharmacy, Inc. from June 2016 through March 2018; Senior Vice President, Field Operations and Supply Chain of CVS Pharmacy, Inc. from June 2014 through May 2016; Senior Vice President, Field Operations of CVS Pharmacy, Inc. from June 2012 through May 2014.

Alan M. Lotvin, M.D ., age 57, Executive Vice President - Transformation of CVS Health Corporation since June 2018; Executive Vice President - Specialty Pharmacy, CVS Caremark from November 2012 through May 2018.

Karen S. Lynch , age 56, Executive Vice President of CVS Health Corporation and President of Aetna since November 2018; President of Aetna from January 2015 to the present; Executive Vice President, Local and Regional Businesses of Aetna from February 2013 through December 2014; Executive Vice President, Head of Specialty Products of Aetna from July 2012 through January 2013. Ms. Lynch is a member of the board of directors of U.S. Bancorp, a banking and financial services company.

Larry J. Merlo , age 63, President and Chief Executive Officer of CVS Health Corporation since March 2011; President and Chief Operating Officer of CVS Health Corporation from May 2010 through March 2011; President of CVS Pharmacy from January 2007 through August 2011; Executive Vice President of CVS Health Corporation from January 2007 through May 2010; also a director of CVS Health Corporation since May 2010.

Thomas M. Moriarty , age 55, Executive Vice President and General Counsel of CVS Health Corporation since October 2012 and Chief Policy and External Affairs Officer since March 2017; Chief Strategy Officer from March 2014 through February 2017.

Derica W. Rice , age 54, Executive Vice President of CVS Health Corporation and President of CVS Caremark since March 2018; Executive Vice President of Global Services and Chief Financial Officer of Eli Lilly & Co. from May 2006 through December 2017. Mr. Rice was formerly a director of Target Corporation from September 2007 until January 2018, and is a candidate for election to the board of directors of The Walt Disney Company in March 2019.

Jonathan C. Roberts , age 63, Executive Vice President and Chief Operating Officer of CVS Health Corporation since March 2017; Executive Vice President of CVS Health Corporation and President of CVS Caremark from September 2012 through February 2017; Executive Vice President of CVS Health Corporation and Chief Operating Officer of CVS Caremark from October 2010 through August 2011.

Item 11. Executive Compensation

The sections of the Proxy Statement under the captions “Non-Employee Director Compensation” and “Executive Compensation and Related Matters,” including “Compensation Discussion and Analysis,” “Letter from the Management Planning and Development Committee,” “Compensation Committee Report” and “Executive Compensation Tables” are incorporated by reference herein.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The sections of the Proxy Statement under the captions “Share Ownership of Directors and Certain Executive Officers” and “Share Ownership of Principal Stockholders” are incorporated by reference herein. Those sections contain information concerning security ownership of certain beneficial owners and management and related stockholder matters.

The following table summarizes information about the Company’s common stock that may be issued upon the exercise of options, warrants and rights under all of equity compensation plans as of December 31, 2018 .

	Number of securities to be issued upon exercise of outstanding options, warrants and rights [1][2] (a)	Weighted average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column) [1] (c)
Equity compensation plans approved by stockholders [3]	27,102	$ 77.51	25,927
Equity compensation plans not approved by stockholders [4][5]	5,136	43.01	31,633
Total	32,238	$ 75.04	57,560

(1) Shares in thousands.

(2) Consists of: (i) 18,597 shares of common stock underlying outstanding options, (ii) 1,435 shares of common stock issuable upon the exercise of outstanding stock appreciation rights (“SARs”) and (iii) 12,206 shares of common stock issuable on the vesting of outstanding restricted stock units, deferred stock units and performance stock units, assuming target level performance in the case of performance stock units. The number of shares included with respect to

outstanding SARs is the number of shares of the Company's common stock that would have been issued had the SARs been exercised based on the closing price per share of the Company's common stock on December 31, 2018, as reported on the NYSE, which was $65.52.

(3) Consists of the CVS Health 2017 Incentive Compensation Plan.

(4) Consists of the Amended Aetna Inc. 2010 Stock Incentive Plan (the "Aetna Stock Plan").

(5) Amount in column (c) consists of the maximum number of shares of the Company's common stock available for future issuance under the Aetna Stock Plan as of December 31, 2018.

The Aetna Stock Plan was last approved by Aetna's shareholders at Aetna's 2017 Annual Meeting on May 19, 2017. The Company elected to continue to grant awards under the Aetna Stock Plan to employees of Aetna and its subsidiaries following the completion of the Aetna Acquisition. The Aetna Stock Plan is designed to promote the Company's interests and those of its stockholders and to further align the interests of stockholders and employees by tying awards to total return to stockholders, enabling plan participants to acquire additional equity interests in the Company and providing compensation opportunities dependent upon the Company's performance. The Aetna Stock Plan has not been submitted to the Company's stockholders and will expire on May 21, 2020.

Under the Aetna Stock Plan, eligible participants can be granted stock options to purchase shares of the Company's common stock, SARs, time vesting and/or performance vesting incentive stock or incentive units and other stock based awards. As of December 31, 2018, the maximum number of shares of the Company's common stock that may be issued under the awards outstanding under the Aetna Stock Plan was 5.1 million shares, subject to adjustment for corporate transactions and 31.6 million shares remained available for future awards. If an award under the Aetna Stock Plan is paid solely in cash, no shares are deducted from the number of shares available for issuance under the Aetna Stock Plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The sections of the Proxy Statement under the captions "Independence Determinations for Directors" and "Related Person Transaction Policy" are incorporated by reference herein.

Item 14. Principal Accounting Fees and Services

The section of the Proxy Statement under the caption "Item 2: Ratification of Appointment of Independent Registered Public Accounting Firm" is incorporated by reference herein.

PART IV

Item 15. Exhibits, Financial Statement Schedules

The following documents are filed as part of this Annual Report on Form 10-K:

1. Financial Statements. The following financial statements, related notes and report are incorporated by reference from the Annual Report in Item 8 hereof:

Consolidated Statements of Operations for the Years Ended December 31, 2018, 2017 and 2016

Consolidated Statements of Comprehensive Income (Loss) for the Years Ended December 31, 2018, 2017 and 2016

Consolidated Balance Sheets as of December 31, 2018 and 2017

Consolidated Statements of Cash Flows for the Years Ended December 31, 2018, 2017 and 2016

Consolidated Statements of Shareholders' Equity for the Years Ended December 31, 2018, 2017 and 2016

Notes to Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm

2. Financial Statement Schedules. All financial statement schedules are omitted because they are not applicable, not required under the instructions, or the information is included in the consolidated financial statements or related notes.

3. Exhibits. The exhibits listed in the "Index to Exhibits" in this Item 15 are filed or incorporated by reference as part of this Annual Report on Form 10-K. Exhibits marked with an asterisk (*) are management contracts or compensatory plans or arrangements. Exhibits other than those listed are omitted because they are not required to be listed or are not applicable. Pursuant to Item 601(b)(4)(iii) of Regulation S-K, the Registrant hereby agrees to furnish to the Securities and Exchange Commission a copy of any omitted instrument that is not required to be listed.

INDEX TO EXHIBITS

Exhibit	Description
2	**Plan of acquisition, reorganization, arrangement, liquidation or succession**
2.1	Agreement and Plan of Merger, dated as of May 20, 2015, among CVS Pharmacy, Inc., Tree Merger Sub, Inc. and Omnicare, Inc. (incorporated by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed May 21, 2015; Commission File No. 001-01011).
2.2	Agreement and Plan of Merger, dated as of December 3, 2017, among CVS Health Corporation, Hudson Merger Sub Corp. and Aetna Inc. (incorporated by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed December 5, 2017; Commission File No. 001-01011).
2.3	Master Transaction Agreement by and between Aetna Inc. and Hartford Life and Accident Insurance Company dated as of October 22, 2017.
3	**Articles of Incorporation and Bylaws**
3.1	Restated Certificate of Incorporation of the Registrant (incorporated by reference to Exhibit 3.1C of Registrant's Current Report on Form 8-K filed June 5, 2018; Commission File No. 001-01011).
3.2	By-laws of the Registrant, as amended and restated (incorporated by reference to Exhibit 3.2 to the Registrant's Current Report on Form 8-K filed June 5, 2018; Commission File No. 001-01011).
4	**Instruments defining the rights of security holders, including indentures**
4.1	Specimen common stock certificate (incorporated by reference to Exhibit 4.1 to the Registration Statement of the Registrant ((then known as CVS Corporation) as successor to Melville Corporation) on Form 8-B filed November 4, 1996; Commission File No. 001-01011).
4.2	Senior Indenture dated August 15, 2006, between the Registrant and The Bank of New York Mellon Trust Company, N.A., as trustee (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed August 15, 2006; Commission File No. 001-01011).
4.3	Form of the Registrant's 2020 Floating Rate Note (incorporated by reference to Exhibit 4.1 to the Registrant's Current Report on Form 8-K filed March 12, 2018; Commission File No. 001-01011).
4.4	Form of the Registrant's 2021 Floating Rate Note (incorporated by reference to Exhibit 4.2 to the Registrant's Current Report on Form 8-K filed March 12, 2018; Commission File No. 001-01011).

4.5	Form of the Registrant's 2020 Note (incorporated by reference to Exhibit 4.3 to the Registrant's Current Report on Form 8-K filed March 12, 2018; Commission File No. 001-01011).
4.6	Form of the Registrant's 2021 Note (incorporated by reference to Exhibit 4.4 to the Registrant's Current Report on Form 8-K filed March 12, 2018; Commission File No. 001-01011).
4.7	Form of the Registrant's 2023 Note (incorporated by reference to Exhibit 4.5 to the Registrant's Current Report on Form 8-K filed March 12, 2018; Commission File No. 001-01011).

EXHIBITS

MASTER TRANSACTION AGREEMENT

This Master Transaction Agreement (this " Agreement"), dated as of October 22, 2017, is entered into by and between Aetna Inc., a Pennsylvania corporation (" Seller"), and Hartford Life and Accident Insurance Company, a Connecticut insurance company (" Purchaser").

WITNESSETH:

WHEREAS, Seller owns 100% of the issued and outstanding shares of capital stock of Aetna Life Insurance Company, an insurance company organized under the laws of the State of Connecticut (the " Ceding Company");

WHEREAS, Seller and its Affiliates (as hereinafter defined), including the Ceding Company and Aetna Health and Life Insurance Company, an insurance company organized under the laws of the State of Connecticut (" AHLIC"), are engaged, among other things, in the operation of the Business (as hereinafter defined) in the United States; and

WHEREAS, the parties hereto desire to enter into this Agreement pursuant to which, on the terms and subject to the conditions set forth herein, at the Closing (as hereinafter defined), among other things:

(a) the Ceding Company will enter into a commutation agreement with AHLIC substantially in the form attached hereto as Exhibit A (the " Commutation Agreement"), pursuant to which, on the terms and subject to the conditions set forth therein, the Ceding Company will recapture the portion of the Business reinsured by AHLIC effective as of immediately prior to the effectiveness of the Reinsurance Agreement (as defined below) (the " Pre-Closing Commutation");

(b) the Ceding Company will enter into a reinsurance agreement with Purchaser substantially in the form attached hereto as Exhibit B (the " Reinsurance Agreement"), pursuant to which, on the terms and subject to the conditions set forth therein, the Ceding Company shall cede to Purchaser, and Purchaser shall reinsure, all "Policy Liabilities" (as such term is defined in such attached form of the Reinsurance Agreement, the " Reinsured Liabilities"), on a 100% coinsurance basis;

(c) the Ceding Company and Purchaser will enter into a trust agreement with the Trustee (as hereinafter defined) substantially in the form attached hereto as Exhibit C (the " Trust Agreement "), pursuant to which, on the terms and subject to the conditions set forth therein, Purchaser will establish and maintain a trust account (the " Trust Account") with the Trustee for the benefit of the Ceding Company to secure Purchaser's obligations to the Ceding Company under the Reinsurance Agreement;

(d) the Ceding Company will enter into an administrative services agreement with Purchaser substantially in the form attached hereto as Exhibit D (the " Administrative Services Agreement "), pursuant to which, on the terms and subject to the conditions set forth therein, Purchaser will provide to the Ceding Company administrative services with respect to the Business reinsured under the Reinsurance Agreement;

(e) the Ceding Company and Purchaser will enter into a transition services agreement substantially in the form attached hereto as Exhibit E (the " Transition Services Agreement"), pursuant to which, on the terms and subject to the conditions set forth therein, the Ceding Company will, or will cause its Affiliates or third party service providers to, perform certain transition services with respect to the Business for Purchaser or its designated Affiliates;

(f) Seller and Purchaser will enter into an intellectual property assignment and license agreement substantially in the form attached hereto as Exhibit F (the " Intellectual Property Agreement"), pursuant to which Seller and the Ceding Company will, on the terms and subject to the conditions set forth therein, transfer, assign and license the Transferred Intellectual Property to Purchaser, and Purchaser will license certain Transferred Intellectual Property back to Seller;

(g) the Ceding Company, Carefree Insurance Services, Inc., a company organized under the laws of Florida and a Subsidiary of Seller, Purchaser and one or more Affiliates of Purchaser will enter into a distribution agreement substantially in the form attached hereto as Exhibit G (the " Distribution Agreement"), pursuant to which, on the terms and subject to the conditions set forth therein, the parties thereto will market and sell insurance policies to each other's customers and joint customers;

(h) subject to obtaining relevant third party consents, Purchaser and Seller or their applicable Affiliates will enter into a lease assignment agreement substantially in the form attached hereto as Exhibit J (the " Portland Location Assignment Agreement"), pursuant to which Purchaser or its applicable Affiliate(s) will accept assignment of the Assigned Lease on the terms and subject to the conditions set forth herein and therein;

(i) subject to obtaining relevant third party consents, Purchaser and Seller or their applicable Affiliates will enter into sublease agreements substantially in the form attached hereto as Exhibit K , pursuant to which Seller or its applicable Affiliate(s) will sublease certain real property to Purchaser or its applicable Affiliate(s), on the terms and subject to the conditions set forth herein and therein; and

(j) Seller and its applicable Affiliates will sell to Purchaser, and Purchaser will purchase from Seller and its Affiliates, the Transferred Assets (as hereinafter defined), and Seller and its applicable Affiliates will assign to Purchaser, and Purchaser will assume from Seller and its applicable Affiliates, the Assumed Liabilities and the Assigned Contracts (as hereinafter defined).

NOW, THEREFORE, in consideration of the representations, warranties, covenants and agreements set forth herein, the parties hereto hereby agree as follows:

ARTICLE I.

DEFINITIONS

Section 1.01. Definitions. For purposes of this Agreement, the following terms have the respective meanings set forth below:

"Accounting Date" has the meaning given to such term in Section 2.06.

"Accounting Value" means, with respect to any Investment Asset as of any date of determination, the sum of: (i) the Book Value of such Investment Asset as of the applicable date of determination; plus (ii) all accrued but unpaid interest on such Investment Asset through the applicable date of determination.

"Action" means any civil, criminal, administrative or other claim, action, suit, litigation, arbitration hearing, charge, complaint, demand, notice or other similar proceeding, in each case by or before any Governmental Authority or arbitral body.

"Actuarial Report" has the meaning given to such term in Section 3.21.

"Adjusted Required Asset Value" means, as of any applicable date of determination, an amount equal to (i) the Required Asset Value as of such date, plus (if positive) or minus (if negative) (ii) the sum of all Capital Gain or Loss Adjustments required with respect to the period from the Reference Date through the applicable date of determination, plus (if positive) or minus (if negative) (iii) the sum of all Reallocated Asset Value Adjustments required with respect to the period from the Reference Date through the applicable date of determination. The Capital Gain or Loss Adjustments and Reallocated Asset Value Adjustments required with respect to the period from the Reference Date to the date hereof are required to be set forth on Section 3.19(b) of the Seller Disclosure Schedule. All Capital Gain or Loss Adjustments and Reallocated Asset Value Adjustments required with respect to the period beginning on the date hereof and ending at the Closing will be determined in accordance with Section 5.11.

"Administrative Services Agreement" has the meaning given to such term in the Recitals.

"Affiliate" means, with respect to any Person at the time in question, any other Person controlling, controlled by or under common control with such Person. For purposes of the foregoing, "control," including the terms "controlling," "controlled by" and "under common control with," means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise. Notwithstanding anything to the contrary contained in this Agreement, none of the following nor any of their respective Subsidiaries shall be deemed to be an Affiliate of Seller or any of its Subsidiaries for purposes of this Agreement: (i) bswift LLC, a Delaware limited liability company, or Prodigy Health Group, Inc., a Delaware corporation; and (ii) (x) any joint venture, accountable care organization or similar arrangement for the establishment, management or operation of a provider collaboration, network or group in which Seller and its Affiliates collectively own 50% or less of the outstanding equity securities or

economic interest and (y) any other joint venture entity formed with health systems or health care providers to the extent such joint venture entity owns or operates a health plan.

"Agreement" has the meaning given to such term in the Preamble.

"AHLIC" has the meaning given to such term in the Recitals.

"Allocable Amount" has the meaning given to such term in Section 7.01.

"Applicable Law" means all laws, common law, rules, regulations, ordinances, codes, statutes, judgments, injunctions, Governmental Orders and decrees of all Governmental Authorities applicable to the Person, place and situation in question.

"ASO Contracts" means: (i) the contracts pursuant to which the Ceding Company provides to plan sponsors of self-funded groups administrative or related services for the management of disability benefits prior to the Effective Time; and (ii) the contracts pursuant to which the Ceding Company provides to employers administrative services or software for the management of leaves of absence by employees and related rights and benefits under Applicable Law (including the Family and Medical Leave Act of 1993, as amended, the Americans with Disabilities Act of 1990, as amended, and similar U.S. state and municipal laws, and including as a result of long-term or short-term disability) and internal policies and practices of such employers, in each case of (i) and (ii) in connection with the Business.

"Asset Consideration" has the meaning given to such term in Section 2.07(a)(ii).

"Assigned Contracts" means: (i) those contracts and other agreements to which Seller or an Affiliate of Seller is a party and which are listed on Schedule I; (ii) any renewals or replacement of those contracts and other agreements to which Seller or an Affiliate of Seller is a party that are listed on Schedule I , to the extent such agreements or divisible sub-agreements thereof are entered into prior to the Closing in the ordinary course of business and in accordance with this Agreement; (iii) any vendor contracts and other vendor agreements to which Seller or an Affiliate of Seller is a party, to the extent such agreements or divisible sub-agreements thereof relate primarily or exclusively to the Business and are entered into between the date hereof and the Closing, in the ordinary course of business and in accordance with this Agreement; and (iv) each Business Employee Benefit Plan.

"Assigned Lease" has the meaning given to such term in Section 2.01.

"Assumed Liabilities" has the meaning given to such term in Section 2.04.

"Bill of Sale and Assumption and Assignment Agreement" means a bill of sale and assumption and assignment agreement, substantially in the form attached hereto as Exhibit H , to be entered into by Seller and its applicable Affiliates, on the one hand, and Purchaser, on the other hand, at the Closing.

"Board Materials" has the meaning given to such term in the definition of "Books and Records."

"Books and Records" means all records (including computer generated, recorded or stored records) relating directly and primarily to the Business that are in the possession or control of Seller, or any of its Affiliates; provided , however , that "Books and Records" excludes (the following, collectively, the " Excluded Books and Records"): (1) Tax Returns, Tax records and all other data and information with respect to Taxes of Seller and its Affiliates (other than Tax records of individual insureds under Group Contracts); (2) files, records, data and information with respect to the employees of Seller or its Affiliates, any Employee or any Employee Benefit Plan (except data and information provided pursuant to this Agreement or the Employee Leasing Agreement, in either case, with respect to any Business Employee Benefit Plan and Employee, unless prohibited by Applicable Law); (3) any materials prepared for the boards of directors or similar governing bodies of Seller or any of its Affiliates (" Board Materials"); (4) any corporate minute books, stock records or similar corporate records of Seller or any of its Affiliates; (5) any materials that are legally privileged, it being understood that Seller shall use commercially reasonable efforts to obtain waivers or make other arrangements (including redacting information or entering into joint defense agreements) that would enable such item to be transferred to or shared with Purchaser without destroying such privilege; (6) any information the disclosure or transfer of which is prohibited or restricted by Applicable Law, including antitrust, Privacy and Data Security Laws or pursuant to a contract (it being understood that Seller shall identify the records that are prohibited or restricted to be disclosed or transferred under Applicable Law and the basis for such prohibition or restriction, and shall use commercially reasonable efforts to obtain waivers or make other arrangements (including redacting information) that would enable such item to be transferred to Purchaser without so contravening any such Applicable Law or obligation under contract) (7) any internal drafts, opinions, valuations, correspondence, documents or other materials produced by, or provided between or among, Seller, its Affiliates or their respective Representatives in connection with the sale of the Business (including the negotiation, evaluation and consummation of the transactions contemplated by this Agreement and the other Transaction Agreements) or the terms of engagement of Representatives with respect thereto; and (8) consolidated financial records (including general ledgers) of Seller or its Affiliates, consolidated regulatory filings made by Seller or its Affiliates and any related correspondence with Governmental Authorities, except to the extent the information contained therein specifically or separately identifies the Business and is not otherwise included in a Book and Record. For purposes of this definition, the term " primarily" means records that relate to the Business more than any other business area of Seller or any of its Affiliates.

"Book Value" means, with respect to any Investment Asset as of any date of determination, the statutory book value thereof determined in accordance with SAP; provided that, until the Closing has occurred, the statutory book value of any asset that is transferred from AHLIC to the Ceding Company in connection with the Pre-Closing Commutation will be its statutory book value prior to such transfer.

"Burdensome Condition" has the meaning given to such term in Section 5.06(c).

"Business" means: (i) the Ceding Company's business of issuing, underwriting, reinsuring, selling, entering into, distributing, marketing, delivering, pricing, servicing, canceling, terminating and administering, as applicable, Group Contracts in the United States; and (ii) prior to the Closing, AHLIC's business of reinsuring certain Group Insurance Contracts

from the Ceding Company; provided , however , that the Business does not include any insurance business or administrative services sold by (a) the Ceding Company's "Strategic Resource Company" business unit to (x) plan sponsors seeking coverage primarily for part-time, temporary, seasonal, interim, hourly or transient employees, or (y) plan sponsors seeking coverage to meet requirements under the Davis-Bacon Act of 1931, as amended, for governmental contractors; or (b) the Ceding Company's "International" business unit to (x) plan sponsors located in Canada to cover fewer than 750 employees and beneficiaries located in the U.S., (y) plan sponsors (whether located in the United States or outside the United States) where the number of employees and beneficiaries located in the United States is fewer than (A) 25% of the total number of employees and beneficiaries on cover, or (B) 100 lives.

"Business Day" means any day other than a Saturday, Sunday or a day on which banking institutions in New York, New York or Hartford, Connecticut are permitted or obligated by Applicable Law to be closed.

"Business Employee" means each employee of Seller or any of its Affiliates who, to the Knowledge of Seller, provides, as of the Reference Date, 60 percent or more of his or her services to the Business; whose names are set forth on Section 6.01(a)(ii) of the Seller Disclosure Schedule, as such section of the Seller Disclosure Schedule may be updated in accordance with Section 6.01(a). For the avoidance of doubt, such section of the Seller Disclosure Schedule shall include such employees who as of the date hereof are actively employed as well as such employees who are on (i) a leave of absence (including temporary leave for purposes of jury or military duty, maternity or paternity leave, leave under the Family Medical Leave Act of 1993, approved personal leave or disability or medical leave) or (ii) vacation or paid time off).

"Business Employee Benefit Plan" means each plan, program or agreement set forth on Section 3.10(b) of the Seller Disclosure Schedule.

"Capital Gain or Loss Adjustment" has the meaning given to such term in Section 5.11(b)(ii).

"Ceded Reinsurance Contracts" has the meaning given to such term in Section 3.16(a).

"Ceding Commission" has the meaning given to such term in Section 2.07(a)(i).

"Ceding Company" has the meaning given to such term in the Recitals.

"Closing" has the meaning given to such term in Section 2.06.

"Closing Date" has the meaning given to such term in Section 2.06.

"Closing Required Asset Value" means the Adjusted Required Asset Value as of the Accounting Date calculated after taking into account all Capital Gain or Loss Adjustments and all Reallocated Asset Value Adjustments required pursuant to Section 5.11 or Section 3.19(b) from the Reference Date through the Closing.

"Closing Statement" means, as of any date of determination, a statement as of such date prepared in the same format as the Reference Closing Statement (assuming, for this purpose, the Closing occurred, and that the Reinsurance Agreement became effective, as of the end of the day on such date) and in accordance with the Transaction Accounting Principles.

"COBRA" means Part 6 of Subtitle B of Title I of ERISA, Section 4980B of the Code and any similar state law.

"Code" means the Internal Revenue Code of 1986.

"Commutation Agreement" has the meaning given to such term in the Recitals.

"Competing Businesses" has the meaning given to such term in Section 5.13.

"Competing Person" has the meaning given to such term in Section 5.13(e).

"Condition Satisfaction" has the meaning given to such term in Section 2.06.

"Confidentiality Agreement" has the meaning given to such term in Section 5.04(a).

"Data Input Inaccuracies" means inaccuracies or omissions to the extent arising from (i) the inputting of factual data relating to the Group Contracts or (ii) the coding, compilation or aggregation of such factual data in connection with such inputting.

"Deductible" has the meaning given to such term in Section 10.03(a).

"Discretionary Turnover Allowance" has the meaning given to such term in Section 5.11(b)(i)(B).

"Distribution Agreement" has the meaning given to such term in the Recitals.

"Effective Time" means 12:00:01 a.m. on the first calendar day of the month in which the Closing occurs.

"Employee" means each employee of Seller or any of its Affiliates whose name is set forth on Section 6.01(a)(i) of the Seller Disclosure Schedule, as such section of the Seller Disclosure Schedule may be updated in accordance with Section 6.01(a). For the avoidance of doubt, such section of the Seller Disclosure Schedule shall include such employees who as of the Closing Date are actively employed as well as such employees who are (i) on a leave of absence (including temporary leave for purposes of jury or military duty, maternity or paternity leave, leave under the Family Medical Leave Act of 1993, approved personal leave or disability or medical leave), (ii) on a vacation or paid time off or (iii) hired by Seller or any of its Affiliates in accordance with the terms and conditions of the Employee Leasing Agreement.

"Employee Benefit Plan" means each written or unwritten plan, policy, program, agreement and arrangement, other than a Business Employee Benefit Plan, whether covering a single individual or a group of individuals, that is (a) an "employee benefit plan" within the

meaning of Section 3(3) of ERISA, (b) a stock bonus, stock purchase, stock option, restricted stock, stock appreciation right, incentive stock or similar equity-based plan or (c) any other employment, severance, deferred-compensation, retention, change in control, retirement, welfare benefit, bonus, incentive or fringe benefit plan, policy, program, agreement or arrangement, in each case, which is maintained, sponsored or contributed to by Seller or any of its Affiliates and in which any Employee participates or is eligible to participate or with respect to which Seller or any of its Affiliates has any liability with respect to any Employee.

"Employee Leasing Agreement" has the meaning given to such term in Section 2.08(a)(xv).

"Employee Lease Term" has the meaning given to such term in the Employee Leasing Agreement.

"Enforceability Exceptions" has the meaning given to such term in Section 3.02.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended.

"Estimated Asset Value Statement" has the meaning given to such term in Section 2.07(d)(iii).

"Estimated Closing Required Asset Value" has the meaning given to such term in Section 2.07(d)(i).

"Estimated Closing Statement" has the meaning given to such term in Section 2.07(c)(iii).

"Estimated Required Balance" has the meaning given to such term in Section 2.07(d)(iii).

"Excluded Assets" has the meaning given to such term in Section 2.02.

"Excluded Benefits Liabilities" means any Liabilities in respect of the Employee Benefit Plans and any other benefit plans, programs, policies, arrangement or agreements maintained or contributed to by, or with respect to which Seller or its Affiliates may have any liability, other than the Business Employee Benefit Plans or as set forth in Section 6.01(i).

"Excluded Books and Records" has the meaning given to such term in the definition of "Books and Records."

"Excluded Liabilities" has the meaning given to such term in Section 2.05.

"Excluded Taxes" has the meaning given to such term in Section 2.05(c).

"Fair Market Value" means: (i) in the case of cash and cash equivalents, the face amount thereof; (ii) in the case of securities listed on an exchange or in an over-the-counter market (other than securities that constitute cash equivalents as described in clause (i) above), the final bid price on such exchange or market (provided that such bid price includes all accrued and

unpaid interest on such security through the date of determination; otherwise the amount of such accrued and unpaid interest shall be added to such bid price); and (iii) in the case of any other asset, the fair market value or valuation thereof (including accrued but unpaid interest), as determined in accordance with GAAP; provided that (a) the Fair Market Value of any Investment Asset for which a price is available through Bloomberg's "BVAL" valuation service shall be the sum of (x) the 4:00 p.m. Eastern Time bid price set for that Investment Asset by such valuation service on the applicable date of determination plus (y) all accrued and unpaid interest on such asset through the applicable date of determination, and (b) the Fair Market Value of any Investment Asset for which a price is not available through Bloomberg's "BVAL" valuation service but is available through IDC's valuation service shall be the sum of (x) the 4:00 p.m. Eastern Time bid price set for that Investment Asset by IDC's valuation service on the applicable date of determination plus (y) all accrued and unpaid interest on such asset through the applicable date of determination. Notwithstanding the foregoing, the Fair Market Value of any Investment Asset that is sold by the Ceding Company or AHLIC to a third party during the Interim Period for a price that differs from the amount determined pursuant to the prior sentence shall be the gross proceeds received by the Ceding Company or AHLIC, as applicable, in such sale, including, for the avoidance of doubt, the amount of such gross proceeds that is attributable to accrued but unpaid interest on such Investment Asset.

"Final Allocation" has the meaning given to such term in Section 7.01.

"Final Asset Value Statement" has the meaning given to such term in Section 2.09(f).

"Final Closing Required Asset Value" has the meaning given to such term in Section 2.09(f).

"Final Closing Required Asset Value Statement" has the meaning given to such term in Section 2.09(f).

"Final Closing Statement" has the meaning given to such term in Section 2.09(f).

"FMV Ex-Accrued" means, with respect to any Investment Asset as of any date of determination, the Fair Market Value thereof as of such date, excluding the amount of all accrued but unpaid interest on such Investment Asset through such date; provided that, notwithstanding the foregoing, (a) the FMV Ex-Accrued of any Investment Asset for which a price is available through Bloomberg's "BVAL" valuation service shall be the 4:00 p.m. Eastern Time bid price set for that Investment Asset by such valuation service on the applicable date of determination, and (b) the FMV Ex-Accrued of any Investment Asset for which a price is not available through Bloomberg's "BVAL" valuation service but is available through IDC's valuation service shall be the 4:00 p.m. Eastern Time bid price set for that Investment Asset by IDC's valuation service on the applicable date of determination. Notwithstanding the foregoing, the FMV Ex-Accrued of any Investment Asset that is sold by the Ceding Company or AHLIC to a third party in the period from the Reference Date through the Closing Date for a price (excluding accrued but unpaid interest) that differs from the amount determined pursuant to the prior sentence shall be the gross proceeds received by the Ceding Company or AHLIC, as

applicable, in such sale, less the amount of such gross proceeds that is attributable to accrued but unpaid interest on such Investment Asset.

"GAAP" means generally accepted accounting principles in the United States.

"Governmental Approval" has the meaning given to such term in Section 3.05.

"Governmental Authority" means any governmental, legislative, judicial, administrative or regulatory authority, agency, commission, board, body, court, self-regulatory body or entity or any instrumentality thereof, including any Tax Authority, whether United States federal, state, local or non-U.S.

"Governmental Order" means any order, writ, judgment, injunction, decree, stipulation, determination or award entered by or with any Governmental Authority.

"Group Contracts" means the Group Insurance Contracts and the ASO Contracts.

"Group Insurance Contracts" means (i) the contracts, policies, certificates, binders, slips, covers or other agreements of employer and employee paid (a) group life insurance, including group term life insurance, voluntary spouse and dependent term life insurance, group universal life insurance, supplemental life insurance and accidental death and dismemberment insurance, (b) group disability insurance, including long-term and short-term disability insurance and statutory disability insurance and New York Paid Family Leave, and (c) individual or group life insurance issued or established as a result of the exercise of any conversion or other portability option or feature under any of the contracts, policies, certificates, binders, slips, covers or other agreements described in clause (i)(a) above, (ii) all funding or premium deposit agreements used to fund the group long-term disability or group life insurance contracts described in clause (i) above, (iii) all reserve buy out agreements for disability insurance and life insurance and (iv) all retained asset accounts relating to the agreements described in clause (i) above, in each case of clause (i) through (iv) that are issued or assumed by the Ceding Company prior to the Effective Time in connection with the Business and including all supplements, riders, endorsements and ancillary agreements issued or written in connection therewith and extensions thereto.

"Hannover Consent" means the consent and waiver, dated as of October 11, 2017, by Hannover Life Reassurance Company of America of Section 13.1 of that certain Yearly Renewable Term Reinsurance Agreement by and between the Ceding Company and Hannover Life Reassurance Company of America, effective January 1, 2017.

"Hartford License Agreement" has the meaning given to such term in Section 2.08(a)(xiv).

"Hartford Fire" means Hartford Fire Insurance Company, an insurance company organized under the laws of the State of Connecticut.

"HCERA" has the meaning given to such term in Section 3.10(g).

"Health Plan" has the meaning given to such term in Section 3.10(g).

"IMR" means interest maintenance reserve, calculated in accordance with SAP.

"Indemnifiable Losses" has the meaning given to such term in Section 10.04(iii).

"Indemnitee" has the meaning given to such term in Section 10.04(i).

"Indemnitor" has the meaning given to such term in Section 10.04(ii).

"Indemnity Payment" has the meaning given to such term in Section 10.04(iv).

"Independent Accountant" has the meaning given to such term in Section 2.09(e).

"Initial Asset Value Statement" has the meaning given to such term in Section 2.09(a).

"Initial Closing Required Asset Value Statement" has the meaning give to such term in Section 2.09(a).

"Initial Closing Statement" has the meaning given to such term in Section 2.09(a).

"Insurance Regulator" means, with respect to any jurisdiction, the Governmental Authority charged with the supervision of insurance companies in such jurisdiction.

"Intellectual Property" means, in any and all jurisdictions, any: (i) Trademarks; (ii) copyrights, rights in copyrightable subject matter in published and unpublished works of authorship and database rights, (iii) registrations and applications to register or renew the registration of any of the foregoing, (iv) patents and patent applications, including all reissues, divisionals, renewals, extensions, provisionals, continuations and continuations-in-part thereof, (v) rights in Trade Secrets, and (vi) intellectual property rights embodied in Software.

"Investment Assets" means any interest in any bonds, notes, debentures, mortgage loans, real estate, instruments of indebtedness, stocks, joint venture or partnership interests, and all other equity interests, certificates issued by or interests in trusts, derivatives or other assets acquired or held for investment purposes, including without limitation, any assignment instruments relating thereto.

"Investment Guidelines" means the investment policies and guidelines applicable to the investment activities of the Ceding Company (in respect of the Business) as in effect as of the date hereof, a true and complete copy of which is set forth in Section 1.01(a) of the Seller Disclosure Schedule.

"Intellectual Property Agreement" has the meaning given to such term in the Recitals.

"IT Systems" means the hardware, Software, data, databases, data communication lines, network and telecommunications equipment, Internet-related information technology infrastructure, wide area network and other information technology equipment, owned, leased or licensed by Seller or any of its Affiliates and used in the Business.

"Knowledge" means, unless otherwise expressly provided herein, the actual knowledge, after reasonable inquiry of direct reports, of those individuals listed (a) with respect to Seller, on Section 1.01(b) of the Seller Disclosure Schedule, and (b) with respect to Purchaser, on Section 1.01(b) of the Purchaser Disclosure Schedule.

"Leases" has the meaning given to such term in Section 3.15.

"Lease Consents" has the meaning given to such term in Section 5.12(b).

"Leave Recipient" has the meaning given to such term in Section 6.01(b).

"Legal Hold" means any requirement to preserve documents and records in connection with any pending or reasonably contemplated litigation or arbitration (or other form of dispute resolution), nonparty subpoena, regulatory inquiry or investigation by a Governmental Authority or other legal process or proceedings (i) for which Seller provides notice to Purchaser or (ii) arising out of, relating to or in respect of any Indemnifiable Loss for which a Purchaser Indemnified Person seeks indemnification pursuant to Article X. For purposes of this definition, the term "documents" is defined as synonymous with the term "documents or electronically stored information" in Federal Rule of Civil Procedure 34(a)(1)(A).

"Liabilities" means, with respect to any Person, any liability or obligation of such Person of any kind, character or description, whether known or unknown, absolute or contingent, accrued or unaccrued, disputed or undisputed, liquidated or unliquidated, secured or unsecured, joint or several, due or to become due, vested or unvested, executory, determined, determinable or otherwise.

"Lien" means any pledge, security interest, mortgage, lien, attachment, right of first refusal, or option, including any restriction on receipt of income or exercise of any other attribute of ownership, except such restrictions as may be contained in any Applicable Law relating to insurance.

"Listed Sales Employee" has the meaning given to such term in Section 6.01(c).

"Material Adverse Effect" means a material adverse effect on (A) the financial condition, business, assets (when compared to liabilities) or results of operations of the Business, but excluding any such effect to the extent resulting from or arising out of: (i) changes occurring after the date of this Agreement in general political, economic or securities, currency, capital, credit or financial market conditions (including changes in interest rates and changes in equity prices in general); (ii) any occurrence or condition generally affecting participants in any jurisdiction or geographic area in any segment of the industries or markets in which the Business is operated; (iii) any change or proposed change in GAAP, SAP or Applicable Law, or the interpretation or enforcement thereof; (iv) natural or man-made catastrophe events, hostilities, acts of war or terrorism, or any escalation or worsening thereof; (v) any pandemic or similar outbreak; (vi) the negotiation, execution and delivery of, or compliance with the terms of, or the taking of any action required by, this Agreement or the other Transaction Agreements, the failure to take any action prohibited by this Agreement or the other Transaction Agreements, or the public announcement of, or consummation of, any of the transactions contemplated hereby or thereby (including the effect thereof on the relationships (contractual or otherwise) of the Ceding

Company and its Affiliates with policyholders, clients, customers, employees, suppliers, vendors, service providers, members or Governmental Authorities); (vii) the identity of or facts related to Purchaser or its Affiliates or the effect of any action taken by Purchaser or its Affiliates, or taken by Seller or any of its Affiliates at the request of Purchaser or with Purchaser's prior consent (including the effect thereof on the relationships (contractual or otherwise) of the Ceding Company and its Affiliates with policyholders, clients, customers, employees, suppliers, vendors, service providers, members or Governmental Authorities); (viii) any downgrade or threatened downgrade in the rating assigned to Seller or any of its Affiliates by any rating agency (provided , that this clause (viii) shall not by itself exclude the underlying cause of any such downgrade or threatened downgrade); (ix) the fair market value of, or any change or development in the fair market value of, any of the Investment Assets of the Ceding Company or any of the Investment Assets that are to be transferred to Purchaser or the Trust Account pursuant to the terms of any Transaction Agreement; or (x) any failure of the Business to meet any financial projections or targets (provided , that this clause (x) shall not by itself exclude the underlying causes of any such failure); except, in the cases of clauses (i) through (iii), to the extent such effect disproportionately affects the Business relative to other Persons engaged in businesses similar to the Business; or (B) the ability of Seller or any of its Affiliates to perform any of their respective material obligations under this Agreement or any of the other Transaction Agreements or to consummate the material transactions contemplated by this Agreement and the other Transaction Agreements (including the ability to consummate the Closing prior to the Outside Date).

"Material Contract" has the meaning given to such term in Section 3.06(a).

"Milliman" has the meaning given to such term in Section 3.21.

"Monthly Asset Value Statement" has the meaning given to such term in Section 5.11(a)(i).

"Munich Consent" means the consent and waiver, dated as of October 21, 2017, by Munich American Reassurance Company of Section 17.4 of that certain Yearly Renewal Term Reinsurance Agreement by and between the Ceding Company and Munich American Reassurance Company, effective January 1, 2017.

"New Award" has the meaning given to such term in Section 6.01(m).

"Non-Assignable Asset" has the meaning given to such term in Section 2.03.

"Non-Assigned Leases" has the meaning given to such term in Section 3.15.

"Non-Occupied Properties" has the meaning given to such term in Section 5.12(a).

"Notice of Disagreement" has the meaning given to such term in Section 2.09(c).

"Occupied Properties" has the meaning given to such term in Section 5.12(a).

"Omaha Sublease" has the meaning given to such term in Section 2.08(a)(xiii).

"One Common Solution" means the comprehensive vendor integration Software platform for the Business.

"Open Source Software" means all Software that is distributed as "free software," "open source software," or under a similar licensing or distribution model, including the GNU General Public License, GNU Lesser General Public License, Mozilla Public License, BSD Licenses, the Artistic License, the Netscape Public License, the Sun Community Source License, the Sun Industry Standards License, the Apache License, and any license identified as an open source license by the Open Source Initiative (www.opensource.org).

"Operating Permits" has the meaning given to such term in Section 3.11.

"Outside Date" has the meaning given to such term in Section 9.01(b).

"PPACA" has the meaning given to such term in Section 3.10(g).

"Permit" means any license, permit, order, approval, consent, registration, membership, authorization or qualification under any Applicable Law or with any Governmental Authority or under any industry or non-governmental self-regulatory organization.

"Permitted Liens" means: (a) materialmen's, mechanics', construction, carriers', workmen's and repairmen's liens and other similar liens arising in the ordinary course of business; (b) Liens for Taxes, assessments and governmental charges or levies which are not yet due or delinquent, which are being contested in good faith and for which appropriate reserves are maintained in accordance with GAAP or SAP, as applicable; (c) easements, rights-of-way, encroachments, restrictions, conditions and other similar Liens which, individually or in the aggregate, do not materially impair the use or value of the applicable real property or materially interfere with the ordinary conduct of the Business; (d) statutory landlords' liens and liens granted to landlords under any lease; (e) Liens contemplated by this Agreement or any Transaction Agreement, and any custodian or similar liens contemplated or permitted thereunder; (f) in the case of the Assigned Lease, Liens affecting the interest of the lessor; (g) licenses of Intellectual Property made in the ordinary course of business (excluding any source code escrow agreements or any other agreement requiring the deposit of source code or related materials for any such Developed Software); (h) Liens incurred or pledges or deposits made in compliance with workers' compensation, unemployment insurance or other social security laws or regulations; and (i) any other Liens that do not materially impair the value of or interfere with or prohibit the current use or operation of the relevant asset in the Business.

"Person" means any individual, corporation, partnership, firm, joint venture, association, limited liability company, limited liability partnership, joint-stock company, trust, unincorporated organization, governmental, judicial or regulatory body, business unit, division or other entity.

"Personal Data" has the same meaning as the term "personal data," "personal information," or the equivalent under the applicable Privacy and Data Security Law.

"Plantation Sublease" has the meaning given to such term in Section 2.08(a)(xi).

"Portland Location" has the meaning given to such term in Section 3.15.

"Portland Location Assignment Agreement" has the meaning given to such term in the Recitals.

"Pre-Closing Commutation" has the meaning given to such term in the Recitals.

"Pre-Closing Investment Guidelines" means the investment policies and guidelines applicable to the investment activities of the Ceding Company and AHLIC with respect to the Specified Portfolio as set forth on Schedule IV.

"Pre-Closing Period" means a Tax period (or portion thereof) that ends on or before the Closing Date

"Primary Contract" has the meaning given to such term in Section 3.06(vi).

"Privacy and Data Security Law" means any Applicable Laws relating to data privacy, data security, cybersecurity, or data protection, including with respect to the collection, storage, transmission, transfer (including cross-border transfers), processing, breach notification, unauthorized access, encryption, security, safeguarding, loss, disclosure and use of Personal Data.

"Producer" means any producer, broker, agent, general agent, managing general agent, master broker agency, broker general agency, financial specialist or other Person responsible for marketing or producing Group Insurance Contracts prior to the Closing Date.

"Pro Forma Financial Statements" has the meaning given to such term in Section 3.18(b).

"Properties" has the meaning given to such term in Section 5.12.

"Purchase Price" has the meaning given to such term in Section 2.07(a).

"Purchaser" has the meaning given to such term in the Preamble.

"Purchaser 401(k) Plan" has the meaning given to such term in Section 6.01(f).

"Purchaser Disclosure Schedule" has the meaning given to such term in Article IV.

"Purchaser FSA" has the meaning given to such term in Section 6.01(k).

"Purchaser Indemnified Persons" has the meaning given to such term in Section 10.02(a).

"Purchaser Material Adverse Effect" means a material adverse effect on the ability of Purchaser or any of its Affiliates to perform its respective obligations under this Agreement or any Transaction Agreement or to consummate the material transactions contemplated by this Agreement or any of the other Transaction Agreements. For the avoidance

of doubt and without limiting the foregoing, "Purchaser Material Adverse Effect" includes a material impairment on the ability of Purchaser to obtain any Governmental Approval required to be obtained by Purchaser in connection with the consummation of the transactions contemplated by the Transaction Agreements, notwithstanding the compliance by Purchaser with the terms of this Agreement (including Section 5.06).

"Purchaser Permits" has the meaning given to such term in Section 4.08(a).

"Purchaser Specified Representations" means the representations and warranties made in Section 4.01 , Section 4.02 , Section 4.07(a) and Section 4.09.

"Reallocated Asset Value Adjustment" has the meaning given to such term in Section 5.11(c).

"Reallocated Investment Asset" means any Investment Asset or portion thereof that is designated for inclusion in the Specified Portfolio during the period from the Reference Date through the Closing Date pursuant to terms of Section 5.11 or Section 3.19(b) and was, immediately prior to such designation, held by the Ceding Company or AHLIC but not allocated to the Specified Portfolio.

"Reference Closing Statement" means the pro forma balance sheet of the Business as of the Reference Date set forth, for illustrative purposes, in Section 2.07(c)(i) of the Seller Disclosure Schedule (assuming, for this purpose, the Closing occurred, and that the Reinsurance Agreement became effective, as of the Reference Date).

"Reference Date" means June 30, 2017.

"Registered" means issued by, registered or filed with, renewed by or the subject of a pending application before, any Governmental Authority, social media service provider or Internet domain name registrar.

"Reinsurance Agreement" has the meaning given to such term in the Recitals.

"Reinsured Liabilities" has the meaning given to such term in the Recitals.

"Representative" means, with respect to any Person, such Person's Affiliates and the officers, directors, employees, agents, investment bankers, attorneys, financial advisers, accountants, actuaries or other representatives of such Person or any of its Affiliates.

"Required Asset Value" means, as of any date of determination, the amount that would be required to be set forth on the line item labeled "Investments, cash, cash equivalents & accrued inv. Income" in the column labeled "Target Unit Items to be transferred" on a Closing Statement prepared as of such date. For the avoidance of doubt, "Required Asset Value" shall not include any assets required to support any new interest maintenance reserve that will be required to be established upon the transfer of Investment Assets from AHLIC to the Ceding Company in connection with the Pre-Closing Commutation.

"Restricted Entities" has the meaning given to such term in Section 5.13.

"Restricted Period" has the meaning given to such term in Section 5.13.

"Retained Books and Records" has the meaning given to such term in Section 5.05(a).

"Review Period" has the meaning given to such term in Section 2.09(b).

"SAP" means, as to any regulated insurance company, the statutory accounting practices prescribed or permitted by the Governmental Authority responsible for the regulation of insurance companies in the jurisdiction in which such company is domiciled.

"Section 409A" has the meaning given to such term in Section 3.10(e).

"Selection Waterfall" has the meaning given to such term in Section 5.11(a)(iii).

"Seller" has the meaning given to such term in the Preamble.

"Seller 401(k) Plan" has the meaning given to such term in Section 6.01(g).

"Seller Confidentiality Agreement" has the meaning given to such term in Section 5.04(d).

"Seller Disclosure Schedule" has the meaning given to such term in Article III.

"Seller Forfeited Equity Award" has the meaning given to such term in Section 6.01(m).

"Seller FSA" has the meaning given to such term in Section 6.01(k).

"Seller Indemnified Persons" has the meaning given to such term in Section 10.02(b).

"Seller Retention Bonus Liabilities" has the meaning given to such term in Section 6.01(q).

"Seller Specified Representations" means the representations and warranties made in Section 3.01 , Section 3.02 and Section 3.20.

"Seller Trademarks" has the meaning given to such term in Section 5.10(b).

"Shared Service Functions and Assets" means the shared service functions and assets listed on Section 1.01(c) of the Seller Disclosure Schedule.

"Software" means all computer software, including but not limited to application software, system software, firmware, middleware, mobile digital applications, assemblers, applets, compilers and binary libraries, including all source code and object code versions of any and all of the foregoing, in any and all forms and media, and all related documentation.

"South Portland Sublease" has the meaning given to such term in Section 2.08(a)(xii).

"Specified Portfolio" has the meaning given to such term in Section 2.07(c)(ii).

"Statutory Statements" has the meaning given to such term in Section 3.18(a).

"Straddle Period" means a Tax period that begins on or before the Closing Date and ends after the Closing Date, provided that in the case of any Straddle Period, Taxes allocable to the Pre-Closing Period shall equal: (i) in the case of Taxes imposed on a periodic basis (such as real or personal property Taxes), the product of the amount of such Taxes for the Straddle Period and a fraction, the numerator of which is the number of calendar days in the Straddle Period that elapsed through the date hereof and the denominator of which is the number of calendar days in the entire Straddle Period, and (ii) in the case of Taxes not described in clause (i), the amount computed as if such taxable period ended as of the close of business on the date hereof.

"Subleases" means the South Portland Sublease, the Plantation Sublease and the Omaha Sublease.

"Subsidiary" of any Person at the time in question means another Person (other than a joint venture formed with health care providers) more than 50% of the total combined voting power of all classes of capital stock or other voting interests of which, or more than 50% of the equity securities of which, is at such time owned directly or indirectly by such first Person.

"Tax" or " Taxes" means any and all federal, state, provincial, foreign or local income, gross receipts, premium, capital stock, franchise, profits, withholding, social security, Medicare, unemployment, disability, real property, ad valorem/personal property, stamp, goods and services, harmonized sales, excise, occupation, sales, use, transfer, value added, alternative minimum, estimated or other tax, fee, duty, levy, custom, tariff, impost, assessment or charge of the same or of a similar nature to any of the foregoing, including any interest, penalty or addition thereto.

"Tax Authority" means, with respect to any Tax, any government or political subdivision thereof that imposes such Tax, and any agency charged with the collection, assessment, determination or administration of such Tax for such government or subdivision.

"Tax Contest" has the meaning given to such term in Section 7.03.

"Tax Return" means any return, report, declaration, claim for refund or other return or statement, including any schedule or attachment thereto, and any amendment thereof, required to be filed or furnished in connection with the determination, assessment or collection of any Tax.

"Third Party Claim" has the meaning given to such term in Section 10.04(v).

"Threshold Amount" has the meaning given to such term in Section 10.03(a).

"Trademark License Agreement" has the meaning given to such term in Section 5.10(a).

"Trademarks" means trademarks, service marks, Internet domain names, trade dress, trade names, logos, slogans, social media identifiers, handles and tags, and any other indicia of origin, registrations and applications with respect to the foregoing, and the goodwill associated therewith and symbolized thereby.

"Trade Secrets" means all confidential information deriving economic value from not being generally known or readily ascertainable, and that is the subject of reasonable efforts to maintain confidentiality, including, as applicable, inventions, processes, designs, formulae, models, tools, algorithms, Software architectures, trade secrets, know-how, ideas, research and development, data and databases and confidential information.

"Transaction Accounting Principles" means the methodologies, procedures, judgments, practices, principles and estimates used to compute and prepare the Reference Closing Statement and described in Schedule V.

"Transaction Agreements" means this Agreement, the Reinsurance Agreement, the Trust Agreement, the Administrative Services Agreement, the Transition Services Agreement, the Bill of Sale and Assignment and Assumption Agreement, the Intellectual Property Agreement, the Distribution Agreement, the Trademark License Agreement, the Commutation Agreement, the Portland Location Assignment Agreement, the Plantation Sublease, the South Portland Sublease, the Omaha Sublease, the Employee Leasing Agreement and the Data Processing Side Letter.

"Transfer Date" has the meaning given to such term in Section 6.01(c).

"Transfer Offers" has the meaning given to such term in Section 6.01(a).

"Transfer Taxes" has the meaning given to such term in Section 7.02.

"Transferred Assets" has the meaning given to such term in Section 2.01.

"Transferred Employee" has the meaning given to such term in Section 6.01(c).

"Transferred Intellectual Property" has the meaning given to such term in Section 2.01.

"Transferred Portfolio" has the meaning give to such term in Section 2.07(d)(ii).

"Transition Services Agreement" has the meaning given to such term in the Recitals.

"Triggering Event" has the meaning given to such term in the form of the Reinsurance Agreement attached hereto as Exhibit B.

"True-Up Amount" means an amount (which may be positive or negative) equal to (i) the final Accounting Value of the Transferred Portfolio as set forth in the Final Asset Value Statement minus (ii) the Final Closing Required Asset Value.

"Trust Account" has the meaning given to such term in the Recitals.

"Trust Agreement" has the meaning given to such term in the Recitals.

"Trustee" means a U.S. bank or other financial institution or another Person mutually agreed upon by Seller and Purchaser.

"WARN Act" has the meaning given to such term in Section 6.01(e).

"Workability" means the integrated leave, disability and premium life waiver administration Software platform for the Business that includes One Common Solution, as well as the following functionality: (a) absence management, (b) web portal, (c) mobile and claims payment systems, (d) tax reporting, and (e) data analytics.

ARTICLE II.

TRANSFER AND ACQUISITION OF ASSETS

Section 2.01. Purchase and Sale of the Transferred Assets. Upon the terms and subject to the conditions set forth in this Agreement, at the Closing (except with respect to the Business Employee Benefit Plans and the Assigned Lease (subject to the terms of Section 2.08(d)), at the date of termination of the Employee Lease Term), Seller shall, and shall cause its Affiliates to, sell, convey, assign, transfer and deliver to Purchaser, free and clear of all Liens other than Permitted Liens, and Purchaser shall purchase, acquire, assume and accept from Seller and its Affiliates, pursuant to agreements, notifications, or other instruments in such form, reasonably satisfactory to Purchaser, all of Seller's and each such Affiliate's right, title and interest in and to the following assets, properties, rights and contracts (other than the Excluded Assets and excluding, for the avoidance of doubt, any cash or Investment Assets that are transferred to Purchaser or to the Trust Account in connection with the transactions contemplated by the Reinsurance Agreement or pursuant to the terms of Sections 2.07 , 2.09 and 2.10), in each case that exist as of the Closing Date (such assets, properties, rights and contracts to be purchased, acquired, assumed and accepted by Purchaser being referred to herein as the " Transferred Assets"):

(a) the Assigned Contracts;

(b) (i) the Intellectual Property (other than intellectual property rights embodied in Software, and the Trademarks and domain names licensed to Purchaser pursuant to the Trademark License Agreement) owned by Seller or any of its Affiliates and primarily used in the Business, including the Intellectual Property listed on Schedule II(b);

(ii) Workability, including the Intellectual Property embodied therein, other than Software that is generally commercially available and set forth on Section 2.01(b)(ii) of the Seller Disclosure Schedule; and

(iii) all other Software that is necessary to operate Workability, in each case other than (A) Software that is generally commercially available, (B) Open Source Software, and (C) the Seller Software licensed to Purchaser pursuant to the Intellectual Property Agreement ((i), (ii) and (iii) collectively, the " Transferred Intellectual Property");

(c) all furniture, fixtures, equipment (including computer hardware), supplies and other tangible personal property of the Business, in each case to the extent listed on Schedule II(c);

(d) the Books and Records, the transfer of which shall be subject to Section 5.05;

(e) all advertising, marketing, sales and promotional materials relating directly and primarily to the Business;

(f) all rights and claims under any and all warranties extended by suppliers, vendors, contractors, manufacturers and licensors to the extent in relation to any of the Transferred Intellectual Property and hardware assets included in the Transferred Assets;

(g) subject to the terms of Section 2.08(d) , the real estate lease listed on Schedule II(g) (the " Assigned Lease") and all installations, fixtures, improvements and benefits in connection therewith;

(h) the phone numbers listed on Schedule II(h); and

(i) all other assets of the Business listed on Schedule II(i).

Section 2.02. Excluded Assets. Notwithstanding anything contained in this Agreement (including Section 2.01) to the contrary and except to the extent of rights expressly provided in certain Transaction Agreements, neither Seller nor any of its Affiliates is selling, transferring, conveying or delivering (or causing to be sold, transferred, conveyed or delivered), and Purchaser is not purchasing, assuming or accepting any assets, properties, rights and contracts of Seller or any of its Affiliates, or any interests therein, other than the Transferred Assets (all such assets, properties, rights and contracts of Seller or any of its Affiliates, or any interests therein, other than the Transferred Assets being referred to herein as the " Excluded Assets"). Without limiting the generality of the foregoing, all of the following shall constitute Excluded Assets:

(a) all cash and cash equivalents, including checking accounts, bank accounts, certificates of deposit and securities, of Seller or any of its Affiliates;

(b) all intercompany receivables and other amounts due from Seller or its Affiliates;

(c) all contracts to which Seller or any Affiliate thereof is a party or is otherwise bound other than the Assigned Contracts;

(d) any real estate leases, real estate title, or any installations, fixtures, and other improvements at Seller's or any of its Affiliates' leased real estate, whether or not used for the benefit of the Business, in each case other than the Assigned Lease or as contemplated by Section 2.01(g) ;

(e) all furniture, fixtures, equipment (including computer hardware), machinery and other tangible personal property of Seller or any of its Affiliates that are not listed on Schedule II(c);

(f) all Permits of Seller or its Affiliates;

(g) Seller's or any of its Affiliates' rights under any policies of insurance or any benefits, proceeds, or premium refunds payable or paid thereunder or with respect thereto;

(h) all rights of Seller or any of its Affiliates to file for or receive any refunds, credits or similar benefits for Taxes levied and imposed upon, or in connection with, the Transferred Assets or the conduct or operation of the Business allocable to any Pre-Closing Period or to the portion of the Straddle Period ending on the Closing Date;

(i) the Excluded Books and Records;

(j) all rights of Seller or any of its Affiliates under the Transaction Agreements;

(k) all rights of Seller or any of its Affiliates to indemnification from any Person with respect to any of the Excluded Liabilities;

(l) all prepaid Taxes allocable to taxable periods or portions thereof ending on or before the Closing Date;

(m) all Intellectual Property owned by Seller or any of its Affiliates (including all rights in and to the Seller Trademarks), other than the Transferred Intellectual Property;

(n) all Intellectual Property licensed to Seller or any of its Affiliates, other than Intellectual Property licensed pursuant to an Assigned Contract;

(o) all of Seller's or any of its Affiliates' e-mail addresses, URLs, websites, website content, and telephone numbers, other than as contemplated by Section 2.01(h);

(p) all bank accounts and lockboxes used in the Business;

(q) all assets in respect of any Employee Benefit Plan;

(r) any assets arising out of, and any associated claims arising out of, the Excluded Liabilities;

(s) any legal or beneficial interest in the capital stock and other equity interests of Seller or its Affiliates;

(t) the accounts and notes receivable not included in the Transferred Assets;

(u) any assets transferred or otherwise disposed of by Seller or any of its Affiliates (other than any intercompany transfers or sales) in compliance with Section 5.01(a) prior to the Closing;

(v) all accounting systems owned or used by Seller or any of its Affiliates, whether or not used in connection with the operation of the Business, including those that comprise the Shared Service Functions and Assets;

(w) any assets utilized by Seller or any of its Affiliates in connection with businesses other than the Business, including those that comprise the Shared Service Functions and Assets; and

(x) the Shared Service Functions and Assets.

Section 2.03. Procedures for Assets Not Transferrable.

(a) Notwithstanding anything to the contrary contained in this Agreement, if any asset, property, right or contract intended to be included in the Transferred Assets (other than with respect to the Assigned Lease, which is addressed in Section 5.12) is not assignable, transferable or able to be subleased or licensed (as applicable) (each a " Non-Assignable Asset") to Purchaser without the consent or waiver of any Person (other than Seller, Purchaser or any of their respective Affiliates or Governmental Authority), and such consent or waiver has not been obtained on or prior to the Closing Date, this Agreement and the other Transaction Agreements shall not constitute an assignment, transfer, sublease or license (as applicable) thereof unless and until such consent is obtained; provided , that this Section 2.03(a) shall not affect whether any such asset, property, right or contract will be deemed a "Transferred Asset" or "Assigned Contract" under this Agreement. In each such case, Seller shall, and shall cause its Affiliates to, use commercially reasonable efforts to obtain, prior to the Closing, any consent or waiver from any third party (other than a Governmental Authority) that is required for Seller or its applicable Affiliates to sell, transfer, assign, convey and deliver the Transferred Assets and Assigned Contracts to Purchaser or to provide the services to be provided under the Transition Services Agreement. Purchaser shall, and shall cause each of its Affiliates to, cooperate with Seller and its Affiliates at Seller's request to assist Seller and its Affiliates in obtaining such consents or waivers. Each of Seller and Purchaser shall bear its own and its Affiliates' internal costs to obtain such consents and waivers, and the costs payable to third parties for obtaining such consents and waivers (which, for the avoidance of doubt, shall not include any increased fees under the terms of any Assigned Contract from and after the Closing) shall be borne equally by Seller and Purchaser.

(b) If any such consent or waiver referred to in Section 2.03(a) cannot be obtained prior to the Closing, then, to the extent permitted by Applicable Law and the terms of any relevant contracts with third parties, Seller shall, and shall cause its applicable Affiliates to, until the earlier of (i) the time at which such consent or waiver is obtained, and (ii) the expiration or termination of the term or duration of any such Non-Assignable Asset (the length of such term or duration being as it exists as of the Closing): (A) hold the Non-Assignable Assets, from and after the Closing, in trust for the benefit of Purchaser, and all benefits and obligations existing thereunder shall be for Purchaser's account; and (B) take or cause to be taken such actions in its name or otherwise as Purchaser may reasonably request so as to provide Purchaser with the benefits of such Non-Assignable Assets, to enforce (for the benefit of Purchaser or one its Affiliates and to the extent it is commercially reasonable to do so) any of Seller's or Seller's Affiliates' respective rights relating to such Non-Assignable Assets and to effect the collection of

money or other consideration that becomes due and payable under such Non-Assignable Asset, and shall promptly pay over to Purchaser all money or other consideration received by it in respect of such Non-Assignable Asset, provided that Purchaser shall indemnify Seller and Seller's Affiliates for any Liabilities arising out of any action or omission by Purchaser relating to such Non-Assignable Asset (other than any such action or omission by Purchaser at the request or direction of Seller). Purchaser shall timely pay, perform or otherwise discharge (in accordance with the respective terms and subject to the respective conditions thereof, and in the name of Seller or its applicable Affiliate) all of the covenants and obligations of Seller or its applicable Affiliate incurred after the Closing with respect to such Non-Assignable Asset (including, for the avoidance of doubt, any increases in fees, costs or expenses required to be paid by Seller under the terms thereof), provided that Seller shall indemnify Purchaser for any Liabilities arising out of any action or omission by Seller relating to such Non-Assignable Asset (other than any such action or omission by Seller at the request or direction of Purchaser). Purchaser and Seller shall mutually cooperate to provide any other reasonable alternative arrangements as may be reasonably required to implement the purpose and intent of this Agreement and the other Transaction Agreements so that Purchaser and its Affiliates will have access to the rights and benefits contemplated by such Non-Assignable Asset from and after the Closing. Upon obtaining the requisite consent of any applicable Person, any previously Non-Assignable Asset and any Leases that were not assigned, transferred, subleased or licensed (as applicable) at the Closing (in accordance with the first sentence of this Section 2.03(a)) shall be promptly transferred, assigned, subleased or licensed (as applicable) by the Seller or its applicable Affiliate(s) to Purchaser for no additional consideration.

Section 2.04. Assumption of the Assumed Liabilities. Upon the terms and subject to the conditions set forth in this Agreement, at the Closing, Seller shall, and shall cause its Affiliates to, assign to Purchaser, and Purchaser shall assume, satisfy and discharge when due, any and all Liabilities of Seller or any of its Affiliates relating to the Transferred Assets (other than the Excluded Liabilities and excluding, for the avoidance of doubt, (i) all Reinsured Liabilities reinsured by Purchaser under and pursuant to the Reinsurance Agreement, which will be governed by the terms of the Reinsurance Agreement, to the extent arising on or after the Closing Date, (ii) any Liabilities that result from a breach by Seller or its Affiliates of any Assigned Contract arising out of an action or omission occurring prior to the Closing) (all such Liabilities to be so assumed, satisfied or discharged being referred to herein as the " Assumed Liabilities"), including the following: (a) all Liabilities arising under the Assigned Contracts; (b) all Liabilities for Taxes relating to the Transferred Assets other than Excluded Taxes; (c) all Liabilities assumed by Purchaser pursuant to Articles VI and VII; and (d) all Liabilities listed on Schedule III. Notwithstanding the foregoing, the Liabilities of Seller or any of its Affiliates relating to the Business Employee Benefit Plans and the Assigned Lease shall not be assumed or assigned to Purchaser until the termination of the Employee Lease Term, after which time Purchaser shall (with respect to the Assigned Lease, subject to the terms of Section 2.08(d)) assume, satisfy and discharge when due, any and all Liabilities of Seller or any of its Affiliates thereunder.

Section 2.05. Excluded Liabilities. Notwithstanding anything to the contrary contained in this Agreement, Purchaser will not assume or be liable for, and Seller and its applicable Affiliates will retain and remain responsible for, all of Seller's and such Affiliates' Liabilities (fixed or contingent, known or unknown) (other than the Assumed Liabilities and excluding, for

the avoidance of doubt, all Reinsured Liabilities reinsured by Purchaser under and pursuant to the Reinsurance Agreement, which will be governed by the terms of the Reinsurance Agreement), regardless of when asserted (collectively, the " Excluded Liabilities"). Without limiting the foregoing, the Excluded Liabilities include the following:

(a) all of Seller's and its Affiliates' Liabilities under the Transaction Agreements;

(b) the Excluded Benefits Liabilities;

(c) any Liability for or in respect of the payment of all Taxes of Seller or any of its Affiliates, and of any Taxes arising out of or relating to the ownership or use of the Transferred Assets or the conduct of the Business for a Pre-Closing Period, other than as provided in Section 7.02 and Taxes arising out of or relating to actions that Purchaser requests Seller to take prior to Closing (the " Excluded Taxes");

(d) all Liabilities arising out of, in connection with or under contracts to which Seller or any of its Affiliates is a party other than Liabilities relating to periods (or portions thereof) beginning from or after the Closing under the Assigned Contracts, the Assigned Lease and any other contracts included in the Transferred Assets (which such Liabilities shall be Assumed Liabilities);

(e) Seller Retention Bonus Liabilities; and

(f) Liabilities of Seller or any of its Affiliates related to any Permitted Liens on the Transferred Assets.

Section 2.06. Place and Date of Closing. Unless another date, time or place is agreed to in writing by the parties hereto, the closing of the transactions contemplated by this Agreement (the " Closing") shall take place at the offices of Willkie Farr & Gallagher LLP, 787 Seventh Avenue, New York, New York 10019, at 10:00 a.m., New York City time, on the third Business Day after the date on which the last of the conditions set forth in Article VIII to be satisfied or waived (other than those conditions that by their terms are to be satisfied at the Closing, but subject to the satisfaction or waiver of such conditions at the Closing) shall have been so satisfied or waived in accordance with this Agreement (the " Condition Satisfaction"); provided , however , that if the Condition Satisfaction occurs less than ten Business Days prior to the first Business Day of the next calendar month, then the Closing shall take place on the first Business Day of the calendar month immediately following the calendar month in which the Condition Satisfaction occurs. The Closing shall be deemed effective as of the Effective Time. For purposes of preparing the Estimated Closing Statement, Estimated Asset Value Statement, Initial Closing Statement, Initial Asset Value Statement, Final Closing Statement and Final Asset Value Statement and calculating any amounts required to be calculated therefrom, such statements shall be prepared as of the close of the last calendar day of the month immediately preceding the month in which the Closing occurs (the " Accounting Date"). The actual date and time at which the Closing occurs is referred to herein as the " Closing Date. "

Section 2.07. Consideration.

(a) The consideration with respect to the transactions contemplated by this Agreement will be an aggregate amount in cash equal to $1,450,000,000 (the " Purchase Price"), comprised of:

(i) $1,382,000,000, constituting the ceding commission to be paid to the Ceding Company in connection with the Reinsurance Agreement (the "Ceding Commission"), which amount shall constitute consideration for the reinsurance arrangements contemplated by the Reinsurance Agreement; and

(ii) $68,000,000 (the "Asset Consideration") representing the aggregate purchase price for the Transferred Assets.

(b) At the Closing, Purchaser shall pay to Seller or an Affiliate of Seller (as designated by Seller), by wire transfer of immediately available funds to such account or accounts of Seller or its Affiliates as Seller may designate in writing at least two Business Days prior to the Closing Date, an amount equal to the Asset Consideration.

(c) Reference and Estimated Closing Statement; Specified Portfolio.

(i) Section 2.07(c)(i) of the Seller Disclosure Schedule contains, for illustrative purposes, a pro forma Closing Statement assuming, for this purpose, that the Closing occurred, and the Reinsurance Agreement became effective, as of the Reference Date (the "Reference Closing Statement").

(ii) Section 2.07(c)(ii) of the Seller Disclosure Schedule contains a schedule of cash and Investment Assets held by the Ceding Company or AHLIC in respect of the Business as of the Reference Date (such portfolio, as it may have been or will be adjusted or changed between the Reference Date and the Closing Date in accordance with Sections 3.19 and 5.11 , the "Specified Portfolio"), which portfolio had an aggregate Accounting Value as of the Reference Date equal to the Required Asset Value as of the Reference Date.

(iii) Not less than five Business Days prior to the anticipated Closing Date, Seller shall prepare and deliver to Purchaser an estimated Closing Statement as of the anticipated Accounting Date (the "Estimated Closing Statement"). The Estimated Closing Statement shall be prepared in accordance with the Transaction Accounting Principles applied in a manner consistent with the preparation of the Reference Closing Statement and be in the same format as the Reference Closing Statement.

(d) Determination of Transferred Portfolio.

(i) Not less than two Business Days prior to the anticipated Closing Date, Seller shall prepare and deliver to Purchaser a calculation of the Closing Required Asset Value, which calculation will be based on the Required Asset Value reflected in the Estimated Closing Statement and will take into account all Capital Gain or Loss Adjustments and all Reallocated Asset Value Adjustments required pursuant to Section 5.11 or Section 3.19(b) through the Closing Date (the "Estimated Closing Required Asset Value").

(ii) The "Transferred Portfolio" will be determined as follows:

(A) if the Accounting Value of the Specified Portfolio as of the Closing Date equals the Closing Required Asset Value, the Transferred Portfolio will comprise all, and only, the cash and Investment Assets in the Specified Portfolio as of immediately prior to the Closing;

(B) if the Accounting Value of the Specified Portfolio as of the Closing Date is less than the Closing Required Asset Value, the Transferred Portfolio will comprise (x) all of the cash and Investment Assets in the Specified Portfolio as of immediately prior to the Closing and (y) cash or other Investment Assets selected by Seller in accordance with the Pre-Closing Investment Guidelines that have an aggregate Fair Market Value equal to the amount of such shortfall; and

(C) if the Accounting Value of the Specified Portfolio as of the Closing Date is greater than the Closing Required Asset Value, Seller will select for removal from the Specified Portfolio cash or Investment Assets that have an aggregate Accounting Value equal to such excess in accordance with the Selection Waterfall. The cash and Investment Assets remaining in the Specified Portfolio after such removal will be the Transferred Portfolio.

(iii) Concurrently with the delivery by Seller to Purchaser of the calculation of the Estimated Closing Required Asset Value pursuant to clause (i) of this Section 2.07(d) , Seller will also deliver to Purchaser (A) a schedule showing the cash and Investment Assets in the Transferred Portfolio and its estimated calculation of the aggregate Accounting Value of the cash and Investment Assets in the Transferred Portfolio as of immediately prior to the Closing (the "Estimated Asset Value Statement"), and (B) a calculation of Seller's estimate of the Required Balance (as defined in the Reinsurance Agreement) as of the Closing Date based on amounts set forth on the Estimated Closing Statement and calculated using the aggregate FMV-Ex Accrued and the aggregate Book Value of the Transferred Portfolio (the "Estimated Required Balance").

(e) Payment of Ceding Commissions and Initial Transfer Amounts. At the Closing, upon the terms set forth in this Agreement and the Reinsurance Agreement:

(i) in addition to the payment Purchaser is required to make to Seller pursuant to Section 2.07(b) above, Purchaser shall pay to Seller, by wire transfer of immediately available funds to an account or accounts designated in writing to Purchaser by Seller at least two Business Days prior to the Closing Date, an amount equal to the Ceding Commission; and

(ii) Seller shall cause the Ceding Company (or AHLIC on behalf of the Ceding Company) to deposit into the Trust Account, on behalf of Purchaser, the cash and Investment Assets in the Transferred Portfolio; provided that:

(A) if on the Closing Date the aggregate Fair Market Value of the cash and Investment Assets in the Transferred Portfolio exceeds the Estimated Required Balance, then Seller shall cause the Ceding Company (or AHLIC on behalf of the Ceding Company) to transfer to Purchaser cash or Investment Assets from the Transferred Portfolio selected by Purchaser with a Fair Market Value equal to such excess and shall cause the Ceding Company (or AHLIC on behalf of the Ceding Company) to transfer the remainder of the cash and Investment Assets in the Transferred Portfolio to the Trust Account; and

(B) if on the Closing Date the aggregate Fair Market Value of the cash and Investment Assets in the Transferred Portfolio is less than the Estimated Required Balance, Purchaser shall, at the Closing, transfer to the Trust Account Authorized Investments (as defined in the Trust Agreement) having a Fair Market Value as of the Closing Date equal to such shortfall.

Section 2.08. Closing Deliveries.

(a) Upon the terms and subject to the conditions set forth in this Agreement, at the Closing, in addition to the payments contemplated by Section 2.07 above, Seller shall, and shall cause its applicable Affiliates to, enter into and deliver to Purchaser:

(i) a copy of the Commutation Agreement duly executed by the Ceding Company and AHLIC;

(ii) a counterpart to the Reinsurance Agreement duly executed by the Ceding Company;

(iii) a counterpart to the Trust Agreement duly executed by the Ceding Company;

(iv) a counterpart to the Administrative Services Agreement duly executed by the Ceding Company;

(v) a counterpart to the Transition Services Agreement duly executed by the Ceding Company;

(vi) a counterpart to the Intellectual Property Agreement duly executed by Seller and the Ceding Company;

(vii) a counterpart to the Distribution Agreement duly executed by each of the Ceding Company and Carefree Insurance Services, Inc.;

(viii) a counterpart to the Bill of Sale and Assignment and Assumption Agreement duly executed by Seller and the Ceding Company;

(ix) a counterpart to the Trademark License Agreement duly executed by Seller and the Ceding Company;

(x) a counterpart to the Portland Location Assignment Agreement, duly executed by the Ceding Company;

(xi) a counterpart to the sublease in the form attached hereto as Exhibit K-1 (the "Plantation Sublease"), duly executed by the Ceding Company;

(xii) a counterpart to the sublease in the form attached hereto as Exhibit K-2 (the "South Portland Sublease"), duly executed by the Ceding Company;

(xiii) a counterpart to the sublease in the form attached hereto as Exhibit K-3 (the "Omaha Sublease"), duly executed by Aetna Health Management, LLC;

(xiv) a counterpart to the license agreement in the form attached hereto as Exhibit L (the "Hartford License Agreement"), duly executed by the Ceding Company;

(xv) a counterpart to the Employee Leasing Agreement in the form attached hereto as Exhibit M (the "Employee Leasing Agreement"), duly executed by Seller;

(xvi) a counterpart to the Data Processing Side Letter duly executed by the Ceding Company;

(xvii) a certificate of Seller duly executed by an authorized officer of Seller, dated as of the Closing Date, certifying as to Seller's compliance with the conditions set forth in Section 8.02(a) and Section 8.02(b); and

(xviii) such other agreements, instruments and documents as are contemplated by this Agreement or the other Transaction Agreements to be executed and delivered by Seller or any of its Affiliates on the Closing Date.

(b) Upon the terms and subject to the conditions set forth in this Agreement, at the Closing, in addition to the payments contemplated by Section 2.07 above, Purchaser shall, and shall cause its applicable Affiliates to, enter into and deliver to Seller:

(i) a counterpart to the Reinsurance Agreement duly executed by Purchaser;

(ii) a counterpart to the Trust Agreement duly executed by Purchaser;

(iii) a counterpart to the Administrative Services Agreement duly executed by Purchaser;

(iv) a counterpart to the Transition Services Agreement duly executed by Purchaser;

(v) a counterpart to the Intellectual Property Agreement duly executed by Hartford Fire;

(vi) a counterpart to the Distribution Agreement duly executed by Purchaser;

(vii) a counterpart to the Bill of Sale and Assignment and Assumption Agreement duly executed Purchaser;

(viii) a counterpart to the Trademark License Agreement duly executed by Hartford Fire;

(ix) a counterpart to a side letter in the form attached hereto as Exhibit N (the "Data Processing Side Letter"), duly executed by Purchaser, acknowledging that the Ceding Company, its Affiliates (as defined in the Transition Services Agreement) and their respective subcontractors have processed, and will continue to process, data relating to the Business in Alaska, Hawaii, India and the Philippines;

(x) a counterpart to the Portland Location Assignment Agreement, duly executed by Hartford Fire;

(xi) a counterpart to the Plantation Sublease, duly executed by Hartford Fire;

(xii) a counterpart to the South Portland Sublease, duly executed by Hartford Fire;

(xiii) a counterpart to the Omaha Sublease, duly executed by Hartford Fire;

(xiv) a counterpart to the Hartford License Agreement, duly executed by Hartford Fire;

(xv) a counterpart to the Employee Leasing Agreement, duly executed by Purchaser;

(xvi) a certificate of Purchaser duly executed by an authorized officer of Purchaser, dated as of the Closing Date, certifying as to Purchaser's compliance with the conditions set forth in Section 8.03(a) , Section 8.03(b) and 8.03(c); and

(xvii) such other agreements, instruments and documents as are contemplated by this Agreement or the other Transaction Agreements to be executed and delivered by Seller or any of its Affiliates on the Closing Date.

(c) Purchaser and Seller shall each use their reasonable best efforts to obtain, at or prior to the Closing, a counterpart to the Trust Agreement duly executed by the Trustee.

(d) Notwithstanding the delivery by Seller or Purchaser of any counterpart to the Portland Location Assignment Agreement or any Sublease pursuant to Section 2.08(a) or Section 2.08(b) , as applicable, such counterparts shall not be effective at the Closing but shall instead be held in escrow and not become effective with respect to such agreement unless and until, and shall become effective with respect to such agreement only if (i) the applicable Lease Consent is obtained on or prior to December 31, 2017 and (ii) the Employee Lease Term has expired or been terminated. If the foregoing conditions to the effectiveness of the counterparts to the Portland Location Assignment Agreement or any such Sublease are not satisfied, then, upon the expiration or termination of the Employee Lease Term, the applicable agreement to which such counterparts relate shall be deemed not to have been executed by the parties thereto and shall be void and have no force or effect. If the Portland Location Assignment Agreement is deemed not to have been executed in accordance with the prior sentence, then: (i) the Assigned Lease shall be deemed not to be a Transferred Asset or Assigned Contract hereunder; (ii) Seller shall have no Liability to any Purchaser Indemnified Person by virtue of the fact that the Assigned Lease is not a Transferred Asset or Assigned Contract hereunder; and (iii) the Liabilities of Seller and its Affiliates under the Assigned Lease shall not be Assumed Liabilities hereunder; provided , that the foregoing shall not affect either party's obligations under Article V , including Section 5.12 , or any rights to indemnification under Article X arising out of any breach by the other party of its obligations under Article V.

Section 2.09. Adjustment to Initial Transfer Amount after Closing.

(a) Within 90 days following the Closing Date, Seller shall prepare and deliver to Purchaser: (i) a Closing Statement as of the Accounting Date (the " Initial Closing Statement"), which shall be prepared in accordance with the Transaction Accounting Principles applied consistently with their application in connection with the preparation of the Reference Closing Statement and be in the same format as the Reference Closing Statement; (ii) Seller's determination of the Accounting Value of the Transferred Portfolio as of the Accounting Date (the " Initial Asset Value Statement"); and (iii) Seller's calculation of the Closing Required Asset Value based on the amounts set forth on the Initial Closing Statement and the Initial Asset Value Statement and taking into account all Capital Gain or Loss Adjustments and all Reallocated Asset Value Adjustments required from the Reference Date through the Closing Date (the

"Initial Closing Required Asset Value Statement"). Each of the Initial Closing Statement, Initial Asset Value Statement and the Initial Closing Required Asset Value Statement will be accompanied by reasonably detailed supporting documentation relating to the amounts and calculations therein. Each of the amounts set forth on the Estimated Closing Statement, the Initial Closing Statement and the Final Closing Statement shall not include any interest maintenance reserve related to the transfer of Investment Assets from AHLIC to the Ceding Company in connection with the Pre-Closing Commutation; provided , that the foregoing shall not affect the inclusion of such amounts in the calculation of the "Closing Date IMR Amount" under the Reinsurance Agreement.

(b) During the 60 days immediately following Purchaser's receipt of the Initial Closing Statement, the Initial Asset Value Statement and the Initial Closing Required Asset Value Statement (the " Review Period"), Purchaser and its Representatives shall be permitted to review Sellers's working papers and any working papers of Seller's independent accountants directly relating to the preparation of the Initial Closing Statement, the Initial Asset Value Statement and the Initial Closing Required Asset Value Statement, as well as all of the Books and Records and other relevant information or documents relating to the operations and finances of the Business with respect to the period up to and including the Closing Date, and Seller shall make available the individuals in its or its Affiliates' employ who are responsible for and knowledgeable about the information used in, and the preparation or calculation (as applicable) of, the Initial Closing Statement, the Initial Asset Value Statement and the Initial Closing Required Asset Value Statement in order to respond to the inquiries of Purchaser; provided , however , that the independent accountants of Seller shall not be obligated to make any working papers available to Purchaser unless and until Purchaser has signed a customary confidentiality and hold harmless agreement relating to such access to working papers in form and substance reasonably acceptable to such independent accountants.

(c) If Purchaser disagrees with the Initial Closing Statement, the Initial Asset Value Statement or the Initial Closing Required Asset Value Statement (including any amount or computation set forth therein) in any respect and on any basis (including that the representations and warranties in Section 3.18(d) or the covenants in Section 5.11 were breached), Purchaser may, on or prior to the last day of the Review Period, deliver a notice to Seller setting forth, in reasonable detail, each disputed item or amount and the basis for Purchaser's disagreement therewith (the " Notice of Disagreement"). The Notice of Disagreement shall set forth, with respect to each disputed item, Purchaser's position as to the correct amount or computation that should have been included in the Initial Closing Statement, the Initial Asset Value Statement or the Initial Closing Required Asset Value Statement. If Purchaser does not deliver a Notice of Disagreement with respect to the Initial Closing Statement, the Initial Asset Value Statement or the Initial Closing Required Asset Value Statement to Seller by the end of the Review Period, the Initial Closing Statement, the Initial Asset Value Statement or the Initial Closing Required Asset Value Statement, as applicable, shall become final and binding on the parties.

(d) During the 20 Business Days immediately following the delivery of a Notice of Disagreement, Seller and Purchaser shall seek in good faith to resolve any disagreement that they may have with respect to the matters specified in the Notice of Disagreement.

(e) If, at the end of such 20 Business Day period, Seller and Purchaser have been unable to resolve all disagreements that they may have with respect to the matters specified in the Notice of Disagreement, then Seller and Purchaser shall submit all matters that remain in dispute with respect to the Notice of Disagreement (along with a copy of the applicable Initial Closing Statement, the Initial Asset Value Statement and the Initial Closing Required Asset Value Statement marked to indicate those line items that are in dispute) to PricewaterhouseCoopers LLP or, if PricewaterhouseCoopers LLP is unwilling or unable to serve, another independent certified public accounting firm in the United States of international recognition mutually agreeable to Seller and Purchaser and that is not the auditor or independent accounting firm of any of the parties (the " Independent Accountant"), to make a determination with respect to all matters in dispute.

(f) Seller and Purchaser shall use commercially reasonable efforts to cause the Independent Accountant to render a determination within 30 days after the submission of such matters to the Independent Accountant or as soon as practicable thereafter. Seller, on the one hand, and Purchaser, on the other hand, shall promptly (and in any event within five Business Days) after the Independent Accountant's engagement, each submit to the Independent Accountant their respective computations of the disputed items identified in the Notice of Disagreement and information, arguments and support for their respective positions, and shall concurrently deliver a copy of such materials to the other party. Each party shall then be given an opportunity to supplement the information, arguments and support included in its initial submission with one additional submission to respond to any arguments or positions taken by the other party in such other party's initial submission, which supplemental information shall be submitted to the Independent Accountant (with a copy thereof to the other party) within 10 Business Days after the first date on which both parties have submitted their respective initial submissions to the Independent Accountant. The Independent Accountant shall thereafter be permitted to request additional or clarifying information from the parties, and each of the parties shall cooperate and shall cause their Representatives to cooperate with such requests of the Independent Accountant. The Independent Accountant shall determine, based solely on the materials so presented by the parties and upon information received in response to such requests for additional or clarifying information and not by independent review, only those issues in dispute specifically set forth in the Notice of Disagreement and shall render a written report to Seller and Purchaser in which the Independent Accountant shall, after considering all matters set forth in the Notice of Disagreement, determine what adjustments, if any, should be made to the amounts and computations set forth in the Initial Closing Statement, Initial Asset Value Statement and the Initial Closing Required Asset Value Statement solely as to the disputed items. Such written report shall set forth, in reasonable detail, the determination of the Independent Accountant with respect to each of the disputed line items specified in the Notice of Disagreement and the revisions, if any, to be made to the Initial Closing Statement, the Initial Asset Value Statement or the Initial Closing Required Asset Value Statement resulting therefrom, together with supporting calculations. With respect to each disputed line item, such determination shall be made in accordance with the Transaction Accounting Principles and the terms of this Agreement and, if not in accordance with the position of either Seller or Purchaser, shall not be in excess of the highest amount proposed by either party, nor less than the lowest amount proposed by either party, in the Notice of Disagreement, the Initial Closing Statement, the Initial Asset Value Statement or the Initial Closing Required Asset Value Statement with respect to such disputed line item. For the avoidance of doubt, the Independent Accountant shall

not review any line items or make any determination with respect to any matter other than those matters in the Notice of Disagreement that remain in dispute. The Independent Accountant's final written determination shall, absent fraud or manifest error, be conclusive and binding upon Seller and Purchaser, shall not be subject to review by a court or other tribunal and shall have the same force and effect as an arbitration award governed by the Federal Arbitration Act, 9 U.S.C. §1 et. seq. The " Final Closing Statement" means the Initial Closing Statement as made final and binding either pursuant to Section 2.09(c) or after it has been modified to reflect any revisions thereto made through the mutual agreement of Purchaser and Seller or through the determination of the Independent Accountant pursuant to this Section 2.09(f). The " Final Asset Value Statement" means the Initial Asset Value Statement as made final and binding either pursuant to Section 2.09(c) or after it has been modified to reflect any revisions thereto made through the mutual agreement of Purchaser and Seller or through the determination of the Independent Accountant pursuant to this Section 2.09(f). The " Final Closing Required Asset Value Statement" means the Initial Closing Required Asset Value Statement as made final and binding either pursuant to Section 2.09(c) or after it has been modified to reflect any revisions thereto made through mutual agreement of Purchaser and Seller or through the determination of the Independent Accountant pursuant to this Section 2.09(f) , and the " Final Closing Required Asset Value" is the Closing Required Asset Value as set forth on the Final Closing Required Asset Value Statement.

(g) The cost of the Independent Accountant's review and determination shall be shared equally by Seller and Purchaser. During the review by the Independent Accountant, Seller and Purchaser shall each make available to the Independent Accountant such individuals and such information, books, records and work papers, as may be reasonably required by the Independent Accountant to fulfill its obligations under Sections 2.09(e) and 2.09(f); provided , however , that the independent accountants of Seller or Purchaser shall not be obligated to make any working papers available to the Independent Accountant unless and until the Independent Accountant has signed a customary confidentiality and hold harmless agreement relating to such access to working papers in form and substance reasonably acceptable to such independent accountants. In acting under this Agreement, the Independent Accountant shall be entitled to the privileges and immunities of an arbitrator. Notwithstanding anything to the contrary contained in this Agreement, the provisions of this Section 2.09 represent the sole and exclusive method for determining the Final Closing Statement, the Final Asset Value Statement, the Final Closing Required Asset Value Statement and the Final Closing Required Asset Value.

(h) Seller shall, following the Closing through the date that the Final Closing Statement, the Final Asset Value Statement and the Final Closing Required Asset Value Statement become final and binding on the parties in accordance with the last three sentences of Section 2.09(f) , take all actions necessary to maintain and preserve all accounting books, records, policies and procedures on which the Initial Closing Statement, Initial Asset Value Statement and Initial Closing Required Asset Value Statement are based or on which the Final Closing Statement, Final Asset Value Statement or Final Closing Required Asset Value Statement are to be based so as not to impede or delay the final determination of the amounts set forth therein.

Section 2.10. Post-Closing Adjustments.

(a) The following adjustments will be made based on the amounts set forth on the Final Closing Statement, Final Asset Value Statement and Final Closing Required Asset Value Statement:

(i) Purchaser shall pay to the Ceding Company the True-Up Amount, if positive; or

(ii) Seller shall cause the Ceding Company to pay into the Trust Account the absolute value of the True-Up Amount, if negative.

(b) Payment of any amounts due under Section 2.10(a) shall be made within five Business Days after the date on which all three of the Final Closing Statement, the Final Asset Value Statement and Final Closing Required Asset Value Statement have become such in accordance with the last three sentences of Section 2.09(f) by wire transfer of immediately available funds.

ARTICLE III.

REPRESENTATIONS AND WARRANTIES OF SELLER

Except as set forth in the corresponding sections or subsections of the disclosure schedule delivered to Purchaser by Seller concurrently with the execution and delivery of this Agreement (the " Seller Disclosure Schedule") (it being understood and agreed by the parties hereto that disclosure of any item in any section or subsection of the Seller Disclosure Schedule shall be deemed disclosure with respect to any other section or subsection of the Seller Disclosure Schedule to which the relevance of such item is reasonably apparent, notwithstanding the omission of a reference or cross-reference thereto), Seller hereby makes the following representations and warranties to Purchaser, as of the date hereof and as of the Closing Date, as follows:

Section 3.01. Organization; Standing and Authority.

(a) Seller is a corporation duly incorporated, validly existing and in good standing under the laws of the Commonwealth of Pennsylvania. The Ceding Company is an insurance company duly organized, validly existing and in good standing under the laws of the State of Connecticut. AHLIC is an insurance company duly organized, validly existing and in good standing under the laws of the State of Connecticut.

(b) Each of Seller, the Ceding Company and AHLIC (i) have all corporate or other applicable organizational power and authority to carry on the activities it currently conducts in connection with the Business as it is now being conducted and to own, lease and operate its properties and assets and (ii) is duly qualified to do business as a foreign or alien corporation or other legal entity, as the case may be, in good standing in each jurisdiction in which the conduct of the Business makes such qualification necessary, except, in the case of clause (ii), where the failure to be so qualified, would not, individually or in the aggregate, reasonably be expected to

have a Material Adverse Effect. This Section 3.01(b) does not relate to Permits from Insurance Regulators and Operating Permits, which are addressed in Section 3.11.

Section 3.02. Authorization. Seller or the applicable Affiliate of Seller (as applicable) has all requisite corporate or other applicable organizational power to enter into, consummate the transactions contemplated by and carry out its obligations under, each of the Transaction Agreements to which it is or is contemplated to become a party. The execution and delivery by Seller or the applicable Affiliate of Seller (as applicable) of each of the Transaction Agreements to which it is or is contemplated to become a party, and the consummation by Seller or the applicable Affiliate of Seller (as applicable) of the transactions contemplated by each of the Transaction Agreements to which it is or is contemplated to become a party, have been duly authorized by all requisite corporate or other similar organizational action on the part of Seller or the applicable Affiliate of Seller (as applicable). Each of the Transaction Agreements to which Seller or the applicable Affiliate of Seller (as applicable) is or is contemplated to become a party has been, or upon execution and delivery thereof will be, duly executed and delivered by Seller or the applicable Affiliate of Seller (as applicable). Assuming due authorization, execution and delivery by the other parties hereto or thereto, each of the Transaction Agreements to which Seller or the applicable Affiliate of Seller (as applicable) is or is contemplated to become a party constitutes, or upon execution and delivery thereof will constitute, the legal, valid and binding obligation of Seller or the applicable Affiliate of Seller (as applicable), enforceable against it in accordance with its terms, subject in each case to the effect of any applicable bankruptcy, reorganization, insolvency, moratorium, rehabilitation, liquidation, fraudulent conveyance, preferential transfer or similar laws now or hereafter in effect relating to or affecting creditors' rights and remedies generally and subject, as to enforceability, to the effect of general equitable principles (regardless of whether enforcement is sought in a proceeding in equity or at law) (the " Enforceability Exceptions").

Section 3.03. Sufficiency of Assets. Except as set forth in Section 3.03 of the Seller Disclosure Schedule and subject to the receipt of all Governmental Approvals, the assets, rights, properties, Employees, Intellectual Property and services transferred or made available to Purchaser and its Affiliates pursuant to this Agreement, the other Transaction Agreements and the Assigned Contracts will, as of the Closing, comprise assets, rights, properties, Employees, Intellectual Property and services that are sufficient to permit Purchaser to operate the Business immediately following the Closing Date in substantially the same manner as the Business is being operated as of the date hereof. This Section 3.03 does not address any Permit needed for the Purchaser to write new or renewal insurance policies with respect to the Business after the Closing Date.

Section 3.04. No Conflict or Violation. Provided that all consents, approvals, authorizations and other actions described in Section 3.05 of the Seller Disclosure Schedule have been obtained or taken, the execution and delivery by Seller or the applicable Affiliate of Seller (as applicable) of, and the consummation by Seller or the applicable Affiliate of Seller (as applicable) of the transactions contemplated by, the Transaction Agreements to which Seller or the applicable Affiliate of Seller (as applicable) is or is contemplated to become a party do not and will not (a) violate or conflict with the organizational documents of Seller or the applicable Affiliate of Seller (as applicable), (b) subject to the Governmental Approvals referred to in Section 3.05 , conflict with or violate any Applicable Law or Governmental Order applicable to

Seller or the applicable Affiliate of Seller (as applicable) or by which any of them or any of their respective properties, assets or rights is bound or subject, (c) result in any breach of, or constitute a default (or event which, with the giving of notice or lapse of time or both, would constitute a default) under, or give to any Person any rights of termination, acceleration or cancellation of, or result in the creation of any Lien (other than Permitted Liens) on any of the assets, properties or rights of Seller or the applicable Affiliate of Seller (as applicable) pursuant to, any contract, or any note, bond, loan or credit agreement, mortgage or indenture to which Seller or such applicable Affiliate of Seller is a party or by which any of them or any of their respective properties, assets or rights is bound or subject or (d) result in a breach or violation of any of the terms or conditions of, result in a default under, or otherwise cause an impairment or revocation of, any material Permit used in the Business, except, in the case of clauses (b), (c) and (d) of this Section 3.04 , for any such conflicts, violations, breaches, defaults, terminations, accelerations, cancellations or creations that, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect.

Section 3.05. Consents and Approvals. Except in connection, or in compliance, with the approvals, filings and notifications required by Applicable Laws that are set forth in Section 3.05 of the Seller Disclosure Schedule, the execution and delivery by Seller or the applicable Affiliate of Seller (as applicable) of the Transaction Agreements to which it is or is contemplated to become a party do not and will not, and the consummation by Seller or the applicable Affiliate of Seller (as applicable) of the transactions contemplated by the Transaction Agreements to which it is or is contemplated to become a party will not, require any consent, approval, license, permit, order, qualification or authorization of, or registration with or other action by, or any filing with or notification to, any Governmental Authority (each, a " Governmental Approval") to be obtained or made by or with respect to Seller or such applicable Affiliate of Seller (as applicable), except for any Governmental Approvals the failure to obtain or make which, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect.

Section 3.06. Certain Contracts.

(a) Section 3.06(a) of the Seller Disclosure Schedule lists each Material Contract to which Seller or any of its Affiliates is a party or by which it is bound as of the date hereof. The term " Material Contract" means all of the following types of contracts (other than any Ceded Reinsurance Contract or any Group Contract) in effect on the date hereof:

(i) the Assigned Contracts;

(ii) any contract that (A) contains a restriction on the ability of the Business to solicit specified customers or prospective customers for the purchase, renewal, lapse or amendment of any Group Contract or (B) limits in any way the ability of the Business to compete or engage in the conduct of the Business or in the marketing, selling and administration of any Group Contract, in each case, that would be legally binding on Purchaser or any of its Affiliates following the consummation of the transactions contemplated hereby;

(iii) mortgages, indentures, loan or credit agreements, security agreements and other agreements and instruments relating to the borrowing of money or extension of credit directly by or to Seller or an Affiliate thereof in respect of the Business or the direct or indirect guarantee by Seller or an Affiliate thereof for the benefit of the Business of any obligation for borrowed money of any other Person, in each case other than Investment Assets held in the ordinary course of business consistent with the Investment Guidelines;

(iv) any retention agreements providing for payments to any Employee;

(v) any contract restricting or granting rights to use or practice rights under the Transferred Intellectual Property;

(vi) any contract that is primarily related to the Business but is not an Assigned Contract (each, a "Primary Contract") pursuant to which any third Person provides support, maintenance or other services for IT Systems;

(vii) any Primary Contract pursuant to which any material operational function of the Business is outsourced to or otherwise performed by a third Person;

(viii) any Primary Contract pursuant to which one or more independent contractors provides services to the Business;

(ix) any contract that relates to the acquisition or disposition of any business or operation included in the Business, or any other contract that includes an ongoing material indemnification obligation or guarantee of the Ceding Company in respect of the Business, but in either case only where any such contract contains any material obligation of Seller or any of its Affiliates that remains unperformed (other than any obligation to indemnify the buyer thereunder for breaches of provisions that have expired or which are not subject to any survival period); or

(x) any other Primary Contract.

(b) Section 3.06(b) of the Seller Disclosure Schedule lists each vendor with which, as of the date hereof, there is a direct contractual or other relationship to provide rights, services, functions or goods, as applicable, directly to the Business or which charge the Business directly for such rights, services, functions or goods, as applicable (each such vendor, a " Vendor"). For the avoidance of doubt, Section 3.06(b) of the Seller Disclosure Schedule does not list vendors for which the Business is allocated a share of the cost as part of a corporate or enterprise cost allocation.

(c) True and complete copies in all material respects of each of the Material Contracts, including in each case all amendments and addenda thereto, have been made available to Purchaser on the Project DeLorean Intralinks site or by email prior to the date hereof. Each of the Material Contracts is in full force and effect and is the valid and binding obligation of Seller and each Affiliate of Seller party thereto, and, to the Knowledge of Seller as of the date hereof,

each other party thereto, subject to the Enforceability Exceptions. None of Seller or any Affiliate of Seller that is party thereto, nor, to the Knowledge of Seller as of the date hereof, any other Person that is a party thereto, is (or, with the giving of notice or the lapse of time or both, will be), in any material respect, in violation or breach of or default under any of the Material Contracts. None of Seller or any Affiliate of Seller that is party thereto has received written or, to the Knowledge of Seller, oral notice of cancellation of any Material Contract.

Section 3.07. Title to Assets. Seller or one of its Affiliates is the record and beneficial owner of, and holder of good and valid title to, all of the Transferred Assets, free and clear of all Liens other than Permitted Liens. Purchaser will acquire good and valid title to the Transferred Assets, free and clear of Liens, except for Permitted Liens or any Liens arising from acts of Purchaser (other than entering into any Transaction Agreement), (a) in the case of Transferred Assets other than the Business Employee Benefit Plans and the Assigned Lease, at the Closing, and (b) in the case of the Business Employee Benefit Plans, upon the termination of the Employee Lease Term, and (c) in the case of the Assigned Lease, upon the termination of the Employee Lease Term and the effectiveness of the Portland Location Assignment Agreement.

Section 3.08. Absence of Litigation. Except as disclosed in Section 3.08 of the Seller Disclosure Schedule, as of the date hereof, there are no Actions relating to the Business (other than claims under or in connection with Group Contracts in the ordinary course of business) pending or, to the Knowledge of Seller, threatened in writing against (i) the Ceding Company or (ii) Seller or any of its other Affiliates with respect to the Business that, individually or in the aggregate, would reasonably be expected to have a Material Adverse Effect.

Section 3.09. Compliance With Laws.

(a) Except as disclosed in Section 3.09(a)(i) of the Seller Disclosure Schedule, Seller and its Affiliates (solely with respect to, and to the extent related to, the Business) are, and since December 31, 2014 have been, in compliance in all respects with all Applicable Laws, including Privacy and Data Security Laws, except for such instances of non-compliance that would not, individually or in the aggregate, have a material adverse impact on the Business. Except as set forth in Section 3.09(a)(ii) of the Seller Disclosure Schedule, as of the date hereof, since December 31, 2014, none of Seller or any of its Affiliates (solely with respect to, and to the extent related to, the Business) has received any written notice or other written or, to the Knowledge of Seller, oral communication from any Governmental Authority or has paid or incurred any penalty or fine imposed by a Governmental Authority, in each case, regarding any actual or alleged violation of, or failure to comply with, Applicable Law in connection with the Business (other than actual or alleged violations which have been resolved).

(b) Except as set forth in Section 3.09(b) of the Seller Disclosure Schedule, as of the date hereof, all material deficiencies or violations with respect to the Business in all reports of examinations of the affairs of the Ceding Company or AHLIC (including financial, market conduct and similar examinations) issued by any Insurance Regulator to the Ceding Company or AHLIC for any period ending on or after December 31, 2014, have been resolved to the reasonable satisfaction of the Insurance Regulator that noted such deficiencies or violations.

(c) Except as set forth in Section 3.09(c) of the Seller Disclosure Schedule, as of the date hereof, there are no Governmental Orders in effect against or involving Seller or any of its Affiliates under which Seller or any of its Affiliates has any continuing obligation relating to the Business and none of Seller or any of its Affiliates (solely with respect to, and to the extent related to, the Business) is a party to any material contract with any Governmental Authority (other than any Group Contract with respect to which a Governmental Authority is a policyholder or contractholder) in each case to the extent relating to the Business.

(d) Except as set forth in Section 3.09(d) of the Seller Disclosure Schedule, since December 31, 2014, Seller or an Affiliate thereof has filed all material reports, statements, documents, registrations, filings or submissions required to be filed with any Governmental Authority (solely with respect to, and to the extent related to, the Business). All such registrations, filings and submissions were in compliance in all material respects with Applicable Law when filed or as amended or supplemented, and, as of the date hereof, no material deficiencies have been asserted by any Governmental Authority with respect to such registrations, filings or submissions that have not been satisfied.

Section 3.10. Employee Matters.

(a) Section 3.10(a) of the Seller Disclosure Schedule sets forth a list of all material written Employee Benefit Plans as of the date hereof and a description of any material Employee Benefit Plan that is not in written form.

(b) Section 3.10(b) of the Seller Disclosure Schedule sets forth a list of all Business Employee Benefit Plans as of the date hereof. As of the date hereof, there are no material claims or disputes pending, or to the Knowledge of Seller, threatened with respect to any Business Employee Benefit Plan, other than routine claims for benefits in the ordinary course of business.

(c) No Business Employee Benefit Plan and, except as set forth on Section 3.10(c) of the Seller Disclosure Schedule, none of the Employee Benefit Plans is subject to Title IV of ERISA and no Employee participates or is eligible to participate in an Employee Benefit Plan or Business Employee Benefit Plan that is subject to Title IV of ERISA. None of the Employee Benefit Plans or Business Employee Benefit Plans is a "multiemployer plan" (as defined in section 3(37) of ERISA) and no Employee participates or is eligible to participate in an Employee Benefit Plan or Business Employee Benefit Plan that is a multiemployer plan. Purchaser shall have no Liabilities in respect of any Employee Benefit Plan, except as expressly set forth in Section 6.01(j) below.

(d) No Business Employee Benefit Plan and, except as disclosed in Section 3.10(d) of the Disclosure Schedule, no Employee Benefit Plan provides medical, dental, or life insurance coverage or any other welfare benefits after termination of employment.

(e) Each Employee Benefit Plan (i) complies in form in all material respects with all requirements of Applicable Laws and has been administered in all material respects in accordance with its terms and all Applicable Laws, and (ii) is otherwise in compliance in all material respects with all Applicable Laws. Each Business Employee Benefit Plan (i) complies in form in all material respects with all requirements of Applicable Laws and has been

administered in all material respects in accordance with its terms and all Applicable Laws, and (ii) is otherwise in compliance in all material respects with all Applicable Laws. With respect to each Employee Benefit Plan that is intended to be qualified under Section 401(a) of the Code, such plan, and its related trust, has received a determination letter (or opinion letters in the case of any prototype plans) from the IRS that it is so qualified and that its trust is exempt from tax under Section 501(a) of the Code and, to the Knowledge of the Seller, no event has occurred which will or could reasonably be expected to cause any such Employee Benefit Plan to fail to comply with such requirements. Each Employee Benefit Plan and Business Employee Benefit Plan is either (i) exempt from Section 409A of the Code (" Section 409A") or (ii) has, in all material respects, been maintained and operated in documentary and operational compliance in accordance with Section 409A and the regulations and guidance issued thereunder.

(f) Except as set forth on Section 3.10(f) of the Seller Disclosure Schedule, neither consummation of the transactions contemplated by this Agreement nor this Agreement (whether separately or together with any other action) will accelerate the time of vesting or the time of payment, or increase the amount, of compensation due to any Employee. None of the payments contemplated by the Employee Benefit Plans or any Business Employee Benefit Plan to or with respect to Employees would, in the aggregate, constitute excess parachute payments (as defined in section 280G of the Code (without regard to subsection (b)(4) thereof)). As of the date hereof, each of Seller and its Affiliates is in compliance, in all material respects, with all Applicable Laws regarding employment, labor and wage and hour matters, disability, immigration, health and safety, harassment, non-discrimination in employment, workers' compensation, and unemployment compensation (solely with respect to, and to the extent related to, the Business). To the Knowledge of the Seller, each independent contractor and consultant, in each case, providing personal services to the Seller and its Affiliates (solely with respect to, and to the extent related to, the Business) has been properly classified as an independent contractor for purposes of and consistent with good faith interpretations of, all Applicable Laws, including Applicable Laws with respect to employee benefits, and to the Knowledge of the Seller, each Employee has been properly classified consistent with good faith interpretations under the Fair Labor Standards Act (solely with respect to, and to the extent related to, the Employees). The Seller and its Affiliates are not a party to, bound by or in the process of negotiating any collective bargaining agreement or similar labor-related contract (solely with respect to, and to the extent related to, the Business). As of the date hereof, no labor organization or group of current Employees has made a pending demand (solely with respect to, and to the extent related to, the Business) for recognition or certification, and there are no representation or certification proceedings or petitions seeking a representation proceeding presently pending or, to the Knowledge of the Seller, threatened to be brought or filed with the National Labor Relations Board or any other labor relations tribunal or authority (in each case solely with respect to, and to the extent related to, the Business). To the Knowledge of the Seller, as of the date hereof, there are no material organizing activities, strikes, work stoppages, slowdowns, lockouts, arbitrations or grievances, or other material labor disputes, pending or threatened against or involving any Employees (solely with respect to, and to the extent related to, the Business).

(g) Each Employee Benefit Plan that is a "group health plan" as defined in Section 733(a)(1) of ERISA (a " Health Plan") (i) is currently in compliance in all material respects with the Patient Protection and Affordable Care Act, Pub. L. No. 111-148 (" PPACA"), the Health Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152 (" HCERA"), and the

regulations and guidance issued thereunder (collectively, with PPACA and HCERA, the "Healthcare Reform Laws"), and (ii) has been in compliance in all material respects with all applicable Healthcare Reform Laws since January 1, 2015.

(h) Neither Seller nor any of its Affiliates is a party to any employment agreement with any Employee, other than retention agreements that are listed in Section 3.06(a)(iv) of the Disclosure Schedule and offer letters.

(i) Section 3.10(i) of the Seller Disclosure Schedule sets forth a list of all individual independent contractors providing personal services to the Business as of the date hereof.

(j) Except as set forth on Section 3.10(j) of the Seller Disclosure Schedule, none of the Employees is a foreign national is in the United States pursuant to a United States H1-B visa or similar employer-sponsored work permit.

(k) Seller has performed a criminal background check on each Employee in a reasonable manner consistent with prudent hiring practices. Seller requires each Employee to annually complete an attestation regarding criminal conduct. To the Knowledge of Seller, none of the Employees are disqualified from performing services for the Business by reason of a criminal conviction.

Section 3.11. Permits.

(a) (i) The Ceding Company and AHLIC holds all Permits from all Insurance Regulators that are necessary for the current operation and conduct of the Business; and (ii) each of Seller and its Affiliates (solely with respect to, and to the extent related to, the Business) holds all other material Permits from all other Governmental Authorities that are necessary for the current operation and conduct of the Business and to own or use its assets and properties to the extent relating to the Business (collectively, the " Operating Permits"), except where the failure to hold an Operating Permit would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect. Except as would not be reasonably likely to have a Material Adverse Effect, all such Operating Permits are valid and in full force and effect in accordance with their terms. Each of the Ceding Company and AHLIC is, and since December 31, 2014 has been, in compliance in all material respects with all such Operating Permits.

(b) As of the date hereof, since December 31, 2014, Seller and its Affiliates have not received any written notice, or, to the Knowledge of Seller, oral communication from any Governmental Authority regarding any actual, alleged, or potential material violation of, or failure to comply with, the terms or requirements of any such Operating Permit (solely with respect to, and to the extent related to, the Business). As of the date hereof, none of Seller or any of its Affiliates is the subject of any pending or, to the Knowledge of Seller, threatened action seeking the revocation, withdrawal, suspension, termination, cancellation, nonrenewal, modification or impairment of any such Operating Permit (solely with respect to, and to the extent related to, the Business).

Section 3.12. Intellectual Property.

(a) Section 3.12(a) of the Seller Disclosure Schedule sets forth, as of the date hereof, a true, complete and correct list of (i) all Transferred Intellectual Property that is Registered, indicating for each item: (A) the current owner; (B) the jurisdiction where the application or registration is located; and (C) the application or registration number, and (ii) proprietary Software and material unregistered Trademarks that are Transferred Intellectual Property.

(b) Seller or an Affiliate thereof are the exclusive owners of the Transferred Intellectual Property free and clear of all Liens other than Permitted Liens. As of the Closing Date, Purchaser or its designee will be the exclusive owners of the Transferred Intellectual Property, free and clear of all Liens other than Permitted Liens.

(c) Except as set forth in Section 3.12(c) of the Seller Disclosure Schedule (i) to the Knowledge of Seller, the operation of the Business has not been and is not infringing, violating or misappropriating the Intellectual Property of any third party, (ii) no third party has asserted in a writing received by Seller or any of its Affiliates, or to the Knowledge of Seller asserted orally, that its conduct of the Business has infringed, violated or misappropriated the Intellectual Property of any third party and there are no such claims pending or, to the Knowledge of Seller , threatened, (iii) and, to the Knowledge of Seller, as of the date hereof, no third party has infringed, violated or misappropriated or is now infringing, violating or misappropriating any Transferred Intellectual Property. Notwithstanding anything to the contrary set forth in this Agreement, this Section 3.12(c) contains all of the representations and warranties provided by Seller with respect to the non-infringement, non-violation and non-misappropriation of Intellectual Property.

(d) Seller and its Affiliates have taken commercially reasonable actions to maintain the enforceability of the Transferred Intellectual Property under all Applicable Law (including (i) making and maintaining in full force and effect all necessary filings, registrations and issuances and (ii) maintaining the secrecy of all Trade Secrets).

(e) Seller has maintained and currently maintains complete source code for all current and the immediately prior (i.e., n-1) versions and releases of all Software developed by or for Seller and included within the Transferred Intellectual Property (" Developed Software"). All Developed Software is designed and documented in a reasonable manner, consistent with accepted industry practices. Except as would not be material to the Business, no Developed Software contains any viruses, worms, back doors, spyware, adware, malware, time-bombs or key-locks (as such terms are commonly understood in the software industry).

(f) Except as set forth on Section 3.12(f) of the Seller Disclosure Schedule, no Transferred Intellectual Property that is Software contains any Open Source Software, including any software governed by an "open source" license that may (i) require, as a condition to the use of such Software, that Seller disclose, license or distribute to third parties any of the source code for such Software, (ii) requires derivative works of such Software to be licensed under the same "open source" license as the original work or otherwise requires its licensing thereof for the purpose of making derivative works, (iii) imposes any restriction on the consideration to be charged for the distribution of such Software, or (iv) creates, or purports to create, obligations for

Seller with respect to the Intellectual Property rights owned by Seller or grants, or purports to grant, to any third party any rights or immunities under Intellectual Property rights owned by Seller.

Section 3.13. Insurance Business.

(a) Except as set forth in Section 3.13 of the Seller Disclosure Schedule, since December 31, 2014 any application, form of insurance policy, certificates of insurance, riders, endorsements, advertising material, rate, rule or producer compensation utilized by the Seller and its Affiliates (solely with respect to, and to the extent related to, the Business), the use or issuance of which requires filing or approval, has been appropriately filed, and, if required, approved by the Insurance Regulator of any state in which such application forms, forms of insurance policies, advertising materials and rates and rules are required to be filed and (as applicable) approved or not objected to by such authorities within the period provided for approval or objection, except for failures to effect such filings or secure such approvals, which would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect. All such application forms, forms of insurance policies, advertising materials and rates or rules are utilized in compliance in all material respects with all Applicable Laws and within the scope of the approvals (if any) received with respect thereto. No material deficiencies have been asserted by any Governmental Authority with respect to any such filings or compliance with the filings or approvals issued by the Insurance Regulators which have not been cured or otherwise resolved.

(b) The underwriting standards and ratings applied by the Ceding Company since such date with respect to Group Contracts have conformed in all material respects to those contained in the underwriting manuals utilized by the Ceding Company, as in effect at the times such Group Contracts were underwritten.

(c) Since December 31, 2014, Seller and any applicable Affiliates have timely paid in all material respects all guaranty fund assessments that have been due, claimed or asserted by, or are the subject of any voluntary contribution commitment to, any state guaranty fund or association or any Insurance Regulator in any jurisdiction in which Seller or any applicable Affiliate operates the Business arising out of or resulting from such operation of the Business by Seller and its Affiliates. Except for regular periodic assessments in the ordinary course of business or assessments based on developments that are publicly known within the insurance industry, no material claim or assessment is pending or, to the Knowledge of Seller, threatened against Seller or any Affiliate with respect to the Business by any state insurance guaranty association in connection with such association's fund relating to insolvent insurers.

(d) The Business does not include (i) any policies issued to a plan sponsor located outside the United States and its territories, or (ii) any policies issued to plan sponsors located in the United States to cover primarily employees located outside the United States.

Section 3.14. Producers; Sale Practices.

(a) Except as set forth in Section 3.14(a) of the Seller Disclosure Schedule, to the Knowledge of Seller, from December 31, 2014 to the date hereof, each Producer, at any time that

it wrote, sold or produced Group Insurance Contracts for Seller or any of its Affiliates, was duly licensed, authorized and appointed (for the Group Insurance Contract written, sold or produced by such Producer) in the particular jurisdiction in which such Producer wrote, sold or produced such Group Insurance Contract and, to the Knowledge of Seller, from December 31, 2014 to the date hereof, no such Producer violated any term or provision of Applicable Law relating to the writing, sale or production of Group Insurance Contracts, in each case except as would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

(b) Except as set forth in Section 3.14(b) of the Seller Disclosure Schedule, since December 31, 2014, none of Seller or the Ceding Company has received any written notice or communication from any Governmental Authority that a Producer is in material violation of any Applicable Law applicable to the writing, sale, production or marketing of any Group Insurance Contract.

Section 3.15. Real Property. The Transferred Assets do not include any real property other than the real property that is leased pursuant to the Assigned Lease. Section 3.15 of the Seller Disclosure Schedule lists, as of the date hereof, all real property, including the real property located at 222 SW Columbia Street, Portland, Oregon (the " Portland Location"), (a) which are owned by Seller or an Affiliate of Seller or (b) in which Seller or an Affiliate of Seller has a leasehold interest and, in each case, in which Seller intends will be occupied by Purchaser or an Affiliate thereof from and after the day immediately following the expiration or termination of the Employee Lease Term (such leases in subclause (b) of this Section 3.15 (but expressly excluding the Assigned Lease) are collectively referred to as the " Non-Assigned Leases" ; together with the Assigned Lease, collectively, the " Leases"). True and complete copies in all material respects of each of the Leases, including in each case all amendments and addenda thereto, have been made available to Purchaser on the Project DeLorean Intralinks site or by email prior to the date hereof. Seller or an Affiliate thereof has a valid and enforceable leasehold interest under the Leases, subject to Permitted Liens and to the Enforceability Exceptions and neither Seller nor any such Affiliate has received any written notice of any default under the Leases, and, to the Knowledge of Seller, no event has occurred and no condition exists that, with notice or lapse of time or both, would constitute a default by Seller or any such Affiliate under the Leases, except, in each case, for such invalidity, unenforceability or defaults that, individually or in the aggregate, would not reasonably be expected to have a Material Adverse Effect.

Section 3.16. Ceded Reinsurance Contracts.

(a) Section 3.16(a) of the Seller Disclosure Schedule lists each reinsurance agreement to which the Ceding Company or AHLIC is a party and under which the Ceding Company or AHLIC reinsured or retroceded risk under any of the Group Insurance Contracts that were in effect as of the date hereof (the " Ceded Reinsurance Contracts").

(b) Each of the Ceded Reinsurance Contracts constitutes a valid and binding obligation of the Ceding Company or AHLIC and, to the Knowledge of Seller, each other party thereto, enforceable against the Ceding Company or AHLIC and, to the Knowledge of Seller, each other party thereto in accordance with its terms, subject to the Enforceability Exceptions. Except as set forth in Section 3.16(b) of the Seller Disclosure Schedule, as of the date hereof,

neither the Ceding Company nor AHLIC has delivered notice or received written or, to the Knowledge of Seller, oral notice of early termination of any such Ceded Reinsurance Contract. There exists no material breach or event of default with respect to any Ceded Reinsurance Contract on the part of the Ceding Company or AHLIC or, to the Knowledge of Seller, as of the date hereof, any other party thereto, in each case that would, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

(c) Since December 31, 2014, there has not been any dispute with respect to any material amounts recoverable or payable by the Ceding Company pursuant to any Ceded Reinsurance Contract. All amounts owed under any Ceded Reinsurance Contracts have been timely paid in accordance with their terms.

Section 3.17. Tax.

(a) There are no outstanding audits or other administrative or judicial actions by any Governmental Authority with regard to, or related to, the Tax treatment of the Business or the Transferred Assets, nor to the Knowledge of Seller, as of the date hereof, is any such audit or other administrative or judicial action pending or threatened.

(b) Seller and its Affiliates have timely paid all material Taxes which will have been required to be paid on or prior to the date hereof in respect of the Business or the ownership of the Transferred Assets.

(c) All material Taxes required to have been withheld, collected or remitted with respect to the Business or the Transferred Assets have been withheld, collected or remitted, as applicable, to the applicable Governmental Authority in accordance with Applicable Law.

(d) Seller and its Affiliates have materially complied with all Tax reporting, withholding, and disclosure requirements applicable to the Ceded Insurance Contracts under the Code, Treasury Regulations, and forms issued by the Internal Revenue Service and under any corresponding or similar provision of state or local law.

(e) Seller and its Affiliates have duly and timely (including any applicable extensions) filed all material Tax Returns required to have been filed by them in respect of the Business or the ownership of the Transferred Assets, and all such Tax Returns are accurate and complete in all material respects as they relate to the Business or the Transferred Assets.

(f) All material deficiencies asserted in writing or assessments made in writing with respect to the Business or the ownership of the Transferred Assets by a Tax authority have been paid in full, except to the extent they are being contested in good faith through appropriate proceedings.

(g) There are no material Liens for Taxes (other than Permitted Liens) upon the Transferred Assets.

(h) Seller and each of its Affiliates are not and have not been a party to any "reportable transaction" within the meaning of Treasury Regulation Section 1.6011-4 with respect to the Business or the Transferred Assets.

(i) There is no written claim pending from any Tax authority in any jurisdiction where the Seller does not file Tax Returns in respect of the Business that the Business is or may be subject to taxation by that jurisdiction.

(j) The reserves reflected with respect to the Ceded Insurance Contracts on the consolidated federal income Tax Return filed by the affiliated group of which Seller is a member for the year ending December 31, 2014, and since such date, have been determined in all material respects in the manner required by the Code and other Applicable Law, and to the extent relevant to the determination and maintenance thereof, have been determined and maintained in all material respects in accordance with SAP.

(k) The Tax treatment of each Ceded Insurance Contract is not, and, since the time of issuance, has not been, materially less favorable to the purchaser, policyholder or intended beneficiaries thereof, than the Tax treatment and purported to qualify for at the time of issuance.

Section 3.18. Financial Statements; Books and Records.

(a) Seller has previously delivered to Purchaser true, correct and complete copies of (i) the audited annual statutory financial statements of each of the Ceding Company and AHLIC, together with the report of each such company's independent auditors thereon, as of and for the years ended December 31, 2015 and December 31, 2016 and (ii) the unaudited statutory financial statements of each of the Ceding Company and AHLIC as of and for the quarter ended June 30, 2017 (collectively, the " Statutory Statements"), in each case, as filed with the Insurance Regulator of such entity's jurisdiction of domicile. The Statutory Statements were prepared in accordance with applicable SAP consistently applied throughout all such periods and, except as set forth in Section 3.18(a) of the Seller Disclosure Schedule, fairly present in all material respects the financial position, admitted assets, liabilities, capital, and surplus of the Ceding Company and AHLIC (as applicable) at December 31, 2015, December 31, 2016 and June 30, 2017, and the results of operations, changes in surplus, and cash flows of the Ceding Company and AHLIC (as applicable) for the periods covered thereby, subject, in the case of the quarterly Statutory Statements as of and for the quarter ended June 30, 2017, to normal yearend adjustments and the absence of full footnote disclosures and other presentation items. Section 3.18(a) of the Seller Disclosure Schedule sets forth a complete list of all permitted practices used by each such company in the preparation of the Statutory Statements.

(b) The reserves, including incurred but not reported (IBNR), for payment of benefits, losses, claims, expenses, and other similar purposes (including claims litigation) with respect to the Group Contracts reflected in the Statutory Statements, the Reference Closing Statement, and the Pro Forma Financial Statements, as of their respective dates: (a) were computed in all material respects in accordance with generally accepted actuarial standards, consistently applied and developed by the Ceding Company applying consistent practices, assumptions and methodologies used as of their respective dates; (b) met the requirements of SAP and other Applicable Law; and (c) were based on actuarial information and data and inventories and policies and contracts that were accurate in all material respects; provided that this Section 3.18(b) shall not be deemed to be a representation or warranty of Seller that the reserves of the Ceding Company or AHLIC (to the extent relating to the Business) are or will be adequate or sufficient for the purposes for which they were established.

(c) Seller has previously delivered to Purchaser a true, correct and complete copy of the unaudited pro forma balance sheets of the Business as of December 31, 2015 and December 31, 2016 and an unaudited pro forma statement of profits and losses for the annual period ended December 31, 2016 (" Pro Forma Financial Statements"). The Pro Forma Financial Statements were prepared in good faith from the Books and Records using methodologies, estimates and adjustments to give effect to assumptions that provide a reasonable basis for presenting the financial position, direct profits and direct losses of the Business in accordance with GAAP, applied consistently with the historical practices of Seller, as of December 31, 2015 and December 31, 2016.

(d) The Reference Closing Statement was prepared in accordance with the Transaction Accounting Principles and fairly presents, in all material respects in accordance with the Transaction Accounting Principles, the assets and liabilities of the Business as of the Reference Date.

(e) The Books and Records (i) have been maintained in all material respects in accordance with Applicable Law and (ii) are in material compliance with any and all record keeping maintenance requirements in applicable Group Contracts. No Board Materials relating to the Business exist except those certain Board Materials identified and made available by Seller for inspection and review by Purchaser prior to the date hereof.

(f) Seller and the Ceding Company maintain a system of internal control over financial reporting sufficient to provide reasonable assurance regarding the reliability of the financial reporting of the Ceding Company with respect to the Business and the preparation of financial statements for external purposes in accordance with GAAP, applied consistently with the historical practices of Seller, or SAP, as applicable. There are no material weaknesses or significant deficiencies in the internal controls over financial reporting of Seller or the Ceding Company with respect to the Business.

Section 3.19. Specified Portfolio.

(a) During the period from the Reference Date to the date hereof, (i) no Investment Assets that were in the Specified Portfolio as of the Reference Date have been sold except: (A) sales of Investment Assets that were determined by Seller (in accordance with SAP and Seller's and its Affiliates' past practices), to have become, or to be reasonably likely to become, impaired, all of which sales are set forth on Section 3.19(a)(i)(A) of the Seller Disclosure Schedule; and (B) sales of Investment Assets set forth in Section 3.19(a)(i)(B) of the Seller Disclosure Schedule, which collectively did not exceed the Discretionary Turnover Allowance; and (ii) all additions to the Specified Portfolio were made in accordance with the Pre-Closing Investment Guidelines.

(b) Section 3.19(b)(i) of the Seller Disclosure Schedule sets forth, as of the date hereof, the Capital Gain or Loss Adjustments for each of the sales of Investment Assets set forth in Section 3.19(a)(i)(B) of the Seller Disclosure Schedule. Section 3.19(b)(ii) of the Seller Disclosure Schedule sets forth a list of each of the Reallocated Investment Assets that were added to the Specified Portfolio between the Reference Date and the date of this Agreement, and the Reallocated Asset Value Adjustments, if any, that were required with respect to such

Reallocated Investment Assets during such period. The representations and warranties in this Section 3.19 have been made assuming, for this purpose, that the terms of Section 5.11 (other than the definition of "Selection Waterfall" included therein) applied with respect to the period between the Reference Date and the date of this Agreement.

Section 3.20. No Undisclosed Liabilities. The Business has no Liabilities required to be disclosed or reserved for on a balance sheet of the Ceding Company prepared in accordance with applicable SAP, except (i) Liabilities set forth in Section 3.20 of the Seller Disclosure Schedule, (ii) Liabilities disclosed or reserved for in the Statutory Statements and (iii) Liabilities that (x) were incurred after December 31, 2016 in the ordinary course of business consistent with past practice and (y) have not had and would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.

Section 3.21. Actuarial Report. Seller has delivered to Purchaser true, complete and correct copies of the actuarial report, dated as of June 7, 2017 (as adjusted by a memorandum dated August 28, 2017) prepared by Milliman Inc. (" Milliman") with respect to the Business as of December 16, 2016 (the " Actuarial Report"). The information and factual data furnished by Seller and its Affiliates in writing to Milliman with respect to the Business in connection with the preparation of the Actuarial Report (and any supplements or addenda thereto) were (a) obtained from the Books and Records, (b) generated from the same underlying sources and systems that were utilized by Seller or its applicable Affiliates to prepare the Pro Forma Statements to the extent applicable and (c) to the Knowledge of Seller, did not include any material Data Input Inaccuracies. As of the date hereof, Milliman has not issued to Seller or its Affiliates any new or revised report with respect to the Business or any errata with respect to the Actuarial Report nor has it notified Seller or any of its Affiliates that the Actuarial Report is inaccurate in any material respect.

Section 3.22. Absence of Certain Changes or Events. Except as expressly contemplated or required by this Agreement or as set forth in Section 3.22 of the Seller Disclosure Schedule, since December 31, 2016 (a) Seller and its Affiliates have operated and conducted the Business in all material respects in the ordinary course of business; (b) there has not been any event, occurrence, condition or change that has had, or would reasonably be expected to have, individually or in the aggregate, a Material Adverse Effect; and (c) neither Seller nor any of its Affiliates has taken any action or failed to take any action that, if taken or failed to have been taken after the date hereof, would violate Section 5.01.

Section 3.23. Brokers and Finders. Except for Barclays Capital Inc. and one or more of its Affiliates, whose fees will be paid by Seller, no broker, investment banker, financial adviser or other person is entitled to any broker's, finder's, financial adviser's or other similar fee or commission in connection with the transactions contemplated by this Agreement based upon arrangements made by or on behalf of Seller or any of its Affiliates.

Section 3.24. Data Protection and Privacy; IT Systems.

(a) Since December 31, 2014, Seller and its Affiliates with respect to the Business have been and are in compliance in all material respects with any and all contractual requirements, including applicable terms of use and privacy policies, pertaining to the protection,

privacy, security, collection, storage, use, disclosure, disposal, maintenance and transmission of Personal Data.

(b Since December 31, 2014, to the Knowledge of Seller, none of Seller and its Affiliates, or any third Person working on behalf of any of them, has experienced an incident of unauthorized access, disclosure, use, destruction or loss of any Personal Data that Seller or its Affiliates (or a third Person on behalf of any of them) collects, stores, uses or transmits in the conduct of the Business that required the delivery of notice to affected individuals pursuant to Privacy and Data Security Laws.

(c) Section 3.24(c) of the Seller Disclosure Schedule identifies (i) all IT Systems that are included in the Transferred Assets and (ii) all Vendors that provide "cloud", support, hosting, servicing, interfacing, connectivity, security, and redundancy services to the Business. All IT Systems that are included in the Transferred Assets or access to which will be provided pursuant to the Transition Services Agreement (x) are in good repair and operating condition and in all material respects adequate and suitable for the purposes for which they are being used or held for use, and (y) have not, since December 31, 2014, experienced bugs, failures, breakdowns, unauthorized access or use, or substandard performance, malfunction or failure of any unplanned downtime that caused any material disruption or interruption in or to the operation of the Business, and (z) to the Knowledge of Seller, do not contain any "malware" that would reasonably be expected to interfere with the ability of the Purchaser to conduct the Business. Seller and its Affiliates have implemented, currently maintain, and comply with commercially reasonable business continuity and backup and disaster recovery plans and procedures with respect to the IT Systems that are included in the Transferred Assets or access to which will be provided pursuant to the Transition Services Agreement.

Section 3.25. Distribution of Group Insurance Contracts.

(a) Seller hereby represents and warrants that (a) the Service Standards which are attached to the Distribution Agreement as Exhibit A are based upon and are consistent in all material respect with the Ceding Company's service standards generally applicable on an individual plan basis to specified services provided to plans in connection with large Group Insurance Contracts, except (i) as modified to reflect that the Service Standards are applicable to specified categories of Group Insurance Contracts in the aggregate, rather than on an individual plan basis; or (ii) as expressly agreed by the Parties to apply solely to Group Insurance Contracts administered on Purchaser's systems; and (b) since December 31, 2015 all Group Insurance Contracts issued by Seller or its Affiliates, in the aggregate, have been administered in material compliance with the service standards upon which such Service Standards are based.

(b) Seller hereby represents and warrants that Seller and its Affiliates calculated the compensation payable by Seller or its Affiliates to the Sales Force (as such term is defined in the Form of Distribution Agreement) in respect of the distribution of Group Insurance Contracts during the calendar year 2017 in a manner consistent with the terms of Exhibit D to the attached Form of Distribution Agreement, except in such instances as would not, individually or in the aggregate, have a material adverse impact on the Business.

Section 3.26. Administration of the Subject Contracts. The Service Standards that are attached to the form of Administrative Services Agreement as Exhibit II are based upon and are consistent in all material respects with the Ceding Company's service standards generally applicable on an individual plan basis to specified services provided to plans in connection with the Subject Contracts (as such term is defined in the form of Administrative Services Agreement attached hereto as Exhibit D). Since December 31, 2015, Seller and its Affiliates in the aggregate have administered the Subject Contracts in material compliance with the service standards upon which such Service Standards are based. In addition, since December 31, 2015, Seller and its Affiliates have administered the Subject Contracts in material compliance with all agreements with customers who purchased the Subject Contracts, including requirements to maintain the administration of the Subject Contracts in the United States.

ARTICLE IV.

REPRESENTATIONS AND WARRANTIES OF PURCHASER

Except as set forth in the corresponding sections or subsections of the disclosure schedule delivered to Seller by Purchaser concurrently with the execution and delivery of this Agreement (the " Purchaser Disclosure Schedule") (it being understood and agreed by the parties hereto that disclosure of any item in any section or subsection of the Purchaser Disclosure Schedule shall be deemed disclosure with respect to any other section or subsection of the Purchaser Disclosure Schedule to which the relevance of such item is reasonably apparent, notwithstanding the omission of a reference or cross-reference thereto), Purchaser hereby makes the following representations and warranties to Seller, as of the date hereof and as of the Closing Date as follows:

Section 4.01. Organization, Standing. Purchaser is an insurance company duly incorporated, validly existing and in good standing under the laws of Connecticut.

Section 4.02. Authorization. Purchaser or the applicable Affiliate of Purchaser (as applicable) has all requisite corporate or other applicable organizational power to enter into, consummate the transactions contemplated by and carry out its obligations under, each of the Transaction Agreements to which it is or is contemplated to become a party. The execution and delivery by Purchaser or the applicable Affiliate of Purchaser (as applicable) of each of the Transaction Agreements to which it is or is contemplated to become a party and the consummation by Purchaser or the applicable Affiliate of Purchaser (as applicable) of the transactions contemplated by each of the Transaction Agreements to which it is or is contemplated to become a party have been duly authorized by all requisite corporate or other similar organizational action on the part of Purchaser or the applicable Affiliate of Purchaser (as applicable). Each of the Transaction Agreements to which Purchaser or the applicable Affiliate of Purchaser (as applicable) is or is contemplated to become a party has been, or upon execution and delivery thereof will be, duly executed and delivered by Purchaser or the applicable Affiliate of Purchaser (as applicable). Assuming due authorization, execution and delivery by the other parties hereto or thereto, each of the Transaction Agreements to which Purchaser or the applicable Affiliate of Purchaser (as applicable) is or is contemplated to become a party constitutes, or upon execution and delivery thereof will constitute, the legal, valid and binding

obligation of Purchaser or the applicable Affiliate of Purchaser (as applicable), enforceable against it in accordance with its terms, subject in each case to the Enforceability Exceptions.

Section 4.03. No Conflict or Violation. Provided that all consents, approvals, authorizations and other actions described in Section 4.04 have been obtained or taken, the execution and delivery by Purchaser or the applicable Affiliate of Purchaser (as applicable) of, and the consummation by Purchaser or the applicable Affiliate of Purchaser (as applicable) of the transactions contemplated by, the Transaction Agreements to which Purchaser or the applicable Affiliate of Purchaser (as applicable) is or is contemplated to become a party do not and will not (a) violate or conflict with the organizational documents of Purchaser or the applicable Affiliate of Purchaser (as applicable), (b) subject to the Governmental Approvals referred to in Section 4.04 , conflict with or violate any Applicable Law or Governmental Order applicable to Purchaser or the applicable Affiliate of Purchaser (as applicable) or by which any of them or any of their respective properties, assets or rights is bound or subject to, (c) result in any breach of, or constitute a default (or event which, with the giving of notice or lapse of time or both, would constitute a default) under, or give to any Person any rights of termination, acceleration or cancellation of or result in the creation of any Lien (other than Permitted Liens) on any of the assets, properties or rights of Purchaser or any of its Affiliates pursuant to, any contract or any note, bond, loan or credit agreement, mortgage or indenture to which Purchaser or any of its Affiliates is a party or by which any of them or any of their respective properties or assets is bound or subject, or (d) result in a breach or violation of any of the terms or conditions of, result in a default under, or otherwise cause an impairment or revocation of, any material Permit of Purchaser or its Affiliates; except, in the case of clauses (b), (c) and (d) of this Section 4.03 , for any such conflicts, violations, breaches, defaults, terminations, accelerations, cancellations or creations that, individually or in the aggregate, would not reasonably be expected to have a Purchaser Material Adverse Effect.

Section 4.04. Consents and Approvals. The execution and delivery by Purchaser or the applicable Affiliate of Purchaser (as applicable) of the Transaction Agreements to which it is or is contemplated to become a party do not, and the consummation by Purchaser or the applicable Affiliate of Purchaser (as applicable) of the transactions contemplated by the Transaction Agreements to which it is or is contemplated to become a party will not, require any Governmental Approval to be obtained or made by or with respect to Purchaser or the applicable Affiliate of Purchaser (as applicable), except for any Governmental Approvals the failure to obtain or make which, individually or in the aggregate, would not reasonably be expected to have a Purchaser Material Adverse Effect.

Section 4.05. Absence of Litigation. There are no Actions pending or, to the Knowledge of Purchaser, threatened in writing against Purchaser or any of its Affiliates or any of their respective assets, properties or businesses that (i) question the legality of the transactions contemplated by any of the Transaction Agreements or (ii) as of the date hereof, individually or in the aggregate, would reasonably be expected to have a Purchaser Material Adverse Effect.

Section 4.06. Compliance With Laws.

(a) Purchaser and its Affiliates are not in violation of any Applicable Laws (including any Applicable Laws regulating the insurance business) or Governmental Orders applicable to

them or their respective assets, properties or businesses, except for violations that, individually or in the aggregate, would not reasonably be expected to have a Purchaser Material Adverse Effect.

(b) All material deficiencies or violations with respect to the respective insurance businesses of Purchaser and its Affiliates that are party to any Transaction Agreement in all reports of examinations of the affairs of Purchaser or any such Affiliate with respect to such businesses (including financial, market conduct and similar examinations) issued by any Insurance Regulator for any period ending on a date on or after December 31, 2014, have been resolved to the reasonable satisfaction of the Insurance Regulator that noted such deficiencies or violations, except as would not reasonably be expected to have a Purchaser Material Adverse Effect.

(c) Neither Purchaser nor its Affiliates, nor any of their respective properties, assets or rights, is a party to, or bound by, any Governmental Order, except for those Governmental Orders that, individually or in the aggregate, would not reasonably be expected to have a Purchaser Material Adverse Effect.

(d) Purchaser and each Affiliate of Purchaser that is party to a Transaction Agreement has filed all reports, statements, documents, registrations, filings or submissions required to be filed by Purchaser or such Affiliate with any Governmental Authority to the extent they relate to their respective insurance businesses, except for any failures to file that, individually or in the aggregate, would not reasonably be expected to have a Purchaser Material Adverse Effect. All such registrations, filings and submissions were in compliance in all material respects with Applicable Law when filed or as amended or supplemented, and no deficiencies have been asserted by any Governmental Authority with respect to such registrations, filings or submissions that have not been satisfied, except for any non-compliance or failures to file that, individually or in the aggregate, would not reasonably be expected to have a Purchaser Material Adverse Effect.

Section 4.07. Financial Ability.

(a) Purchaser has, and will have at the Closing, all funds necessary to: (i) pay all amounts required to be paid or deposited by Purchaser and its Affiliates pursuant to Article II; and (ii) consummate the transactions contemplated by this Agreement and the other Transaction Agreements.

(b) Purchaser has previously delivered to Seller copies of (i) the audited annual statutory financial statements of Purchaser as of and for the years ended December 31, 2015 and December 31, 2016 and (ii) the unaudited interim statutory financial statements of the Purchaser as of and for the six-month period ending June 30, 2017. The foregoing statutory financial statements were prepared in all material respects in accordance with SAP and fairly present, in all material respects in accordance therewith, the admitted assets, liabilities and capital and surplus of Purchaser at their respective dates and the results of operations, changes in surplus and cash flows of Purchaser at and for the periods indicated, subject, in the case of the financial statements referenced in clause (ii) above, to normal year-end adjustments.

Section 4.08. Permits.

(a) Purchaser and each of its Affiliates executing any Transaction Agreement holds, or as of the Closing Date will hold, all registrations, filings, licenses, permits, approvals or authorizations issued or granted by Governmental Authorities that are necessary to consummate the transactions contemplated by the Reinsurance Agreement, for the current operation and conduct of the Business and to own or use its assets and properties to the extent relating to the Business (collectively, the " Purchaser Permits") except for such failure to hold Purchaser Permits as would not reasonably be expected to have, individually or in the aggregate, a Purchaser Material Adverse Effect.

(b) Since December 31, 2014, none of Purchaser or any of its Affiliates executing any Transaction Agreement has received any written notice or communication from any Governmental Authority regarding any actual, alleged, or potential violation of, or failure to comply with, the terms or requirements of any such Purchaser Permit, except as would not reasonably be expected to have, individually or in the aggregate, a Purchaser Material Adverse Effect. As of the date hereof, none of Purchaser or any of its Affiliates executing any Transaction Agreement is the subject of any pending or, to the Knowledge of Purchaser, threatened action seeking the revocation, withdrawal, suspension, termination, cancellation, nonrenewal, modification or impairment of any such Purchaser Permit except as would not reasonably be expected to have, individually or in the aggregate, a Purchaser Material Adverse Effect.

Section 4.09. Brokers and Finders. Except for Merrill Lynch, Pierce, Fenner & Smith Inc., whose fees will be paid by Purchaser, no broker, investment banker, financial adviser or other person is entitled to any broker's, finder's, financial adviser's or other similar fee or commission in connection with the transactions contemplated by this Agreement based upon arrangements made by or on behalf of Purchaser or any of its Affiliates.

Section 4.10. Absence of Triggering Event. As of the date hereof and assuming, for this purpose, that the Reinsurance Agreement became effective immediately prior to the date hereof, to the Knowledge of Purchaser, no Triggering Event (as defined in the Reinsurance Agreement) shall have occurred thereunder.

ARTICLE V.

COVENANTS

Section 5.01. Conduct of Business. Between the date hereof and the Closing Date, and, with respect to Section 5.01(c)-(h) , between the date hereof and the end of the Employee Lease Term, subject to the terms of the Employee Leasing Agreement, except (a) as required under any Applicable Law, (b) as otherwise contemplated by or necessary to effectuate the Transaction Agreements (including compliance with Sections 5.06(a) and 5.11), (c) for matters identified in Section 5.01 of the Seller Disclosure Schedule or (d) with the consent of Purchaser (which consent may not be unreasonably withheld, delayed or conditioned), Seller shall, and shall cause its Affiliates to, in each case solely with respect to, and to the extent relating to, the Business, use commercially reasonable efforts to (x) conduct the Business in the ordinary course of business,

(y) maintain current significant business relationships and goodwill with policyholders, customers, suppliers and service providers of and to the Business, and with the Governmental Authorities with jurisdiction over the Business, and (z) not do any of the following:

(a) other than in the ordinary course of business and other than with respect to Investment Assets, sell, voluntarily terminate, transfer, assign, lease, sublease, license or otherwise dispose of any Transferred Assets;

(b) sell, terminate, transfer or otherwise dispose of any of the cash or Investment Assets in the Specified Portfolio other than as contemplated by Section 5.11;

(c) increase the base salary (or wages), target cash incentive compensation opportunity, benefits (including severance benefits) paid or payable to any Employee, except for annual salary or wage adjustment increases in the ordinary course of business and consistent with increases applicable to similarly situated employees of the Seller and its Affiliates or as required by the terms of any Employee Benefit Plan in existence as of the date hereof;

(d) (A) establish or adopt, enter into, change, terminate, or amend in any material respect any Employee Benefit Plan or any retention or severance agreement with respect to any Employee, (B) take any action to accelerate any material rights or benefits under any Employee Benefit Plan with respect to any Employee (except to the extent required as of the date hereof by any such plan), or (C) grant any new equity or equity-based awards to any Employee;

(e) establish, adopt, enter into, change or amend any Business Employee Benefit Plan or take any action to accelerate any material rights or benefits under any Business Employee Benefit Plan;

(f) hire or engage any Employee or independent contractor providing personal services with respect to the Business, in each case, who will earn annual base salary in excess of $150,000;

(g) terminate, other than for cause, the employment or engagement of any Employee or independent contractor providing personal services with respect to the Business;

(h) transfer or reallocate, or permit the transfer or reallocation of, the employment or services of any employee or independent contractor providing personal services to Seller or its Affiliates into or out of the Business;

(i) enter into, amend in any material respect, waive any rights under, or assign or transfer any Assigned Contract or Material Contract;

(j) make any material change in the accounting, actuarial, investment, reserving, underwriting or claims administration policies, practices, or principles of (and solely to the extent relating to) the Business, except as may be required by GAAP, SAP, Applicable Law or internal accounting policies existing as at December 31, 2016;

(k) make or change any material Tax election in respect of the Business, adopt or materially change any accounting method in respect of the Business, file any material amended

Tax Return in respect of the Business, or materially modify the method by which Seller and its Affiliates determine reserves with respect to the Ceded Insurance Contracts;

(l) voluntarily grant any Lien (other than Permitted Liens) on any Transferred Assets;

(m) abandon, modify, waive, terminate or allow to lapse any material Permit of Seller or the Ceding Company to the extent relating to the Business; or

(n) enter into a binding agreement to take any of the foregoing actions.

Section 5.02. Pre-Closing Access to Information.

(a) Between the date of this Agreement and the Closing Date, subject to Applicable Law and subject to the rules applicable to visitors at Seller's offices generally, Seller shall afford to Purchaser and its Representatives reasonable access, upon reasonable advance notice and during normal business hours, to such contracts, documents and information of or relating to the assets, liabilities, business, operations and other aspects of the Business as Purchaser may reasonably request; provided , however , that Seller shall not be obligated to provide such access or information if Seller determines, in its reasonable judgment, that doing so would violate Applicable Law or a contract, agreement or obligation of confidentiality owing to a third party, jeopardize the protection of an attorney-client privilege, or expose Seller or any of its Affiliates to risk of liability for disclosure of sensitive or personal information; provided, further , that Seller shall not be obligated to provide such access to its offices if Seller determines, in its reasonable judgment, that such contracts, documents and information can be provided electronically or in another reasonably accessible location. Purchaser agrees that it will hold, and will cause its Representatives to hold, any information so obtained in confidence to the extent required by, and in accordance with, the provisions of the Confidentiality Agreement and Section 5.04. Notwithstanding anything to the contrary set forth herein, none of Seller, its Affiliates or their respective Representatives shall be required to disclose or provide access to Excluded Books and Records to Purchaser or, prior to the Closing Date, any of its Representatives or any information that Seller reasonably determines to be competitively sensitive.

(b) Without limiting the foregoing, from the date hereof until the Closing, Seller shall deliver to Purchaser complete copies of the audited or unaudited statutory financial statements of the Ceding Company, together with any notes, exhibits or schedules thereto, that are filed with the Insurance Regulator for the applicable company's jurisdiction of domicile between the date hereof and the Closing, as promptly as practicable after the filing of such statements with such Insurance Regulator.

Section 5.03. Post-Closing Access to Information.

(a) For a period of five years following the Closing Date, Seller shall: (i) allow Purchaser, upon reasonable prior notice and during normal business hours, through its Representatives, the right, at Purchaser's expense, to examine and make copies of any Excluded Books and Records which were retained by Seller or its Affiliates pursuant to this Section 5.03; and (ii) allow Purchaser to interview Seller's and its Affiliates' Representatives for any reasonable business purpose relating to the Business, including in connection with Seller's pre-

Closing employment of the Transferred Employees or Purchaser's preparation or examination of regulatory and statutory filings and financial statements and the conduct of any litigation relating to the Business (other than any litigation or dispute between Seller or its Affiliates, on the one hand, and Purchaser or its Affiliates, on the other hand), or the conduct of any regulatory authority, policyholder, reinsurer or other dispute resolution or any other Third Party Claim (whether or not such Third Party Claim is the subject of an indemnification claim by a Purchaser Indemnified Person or Seller Indemnified Person), whether pending or threatened; provided , however , that Seller shall not be obligated to provide such access to its offices if Seller determines, in its reasonable judgment, that such Excluded Books and Records can be provided electronically or in another reasonably accessible location. Access to such Representatives and Excluded Books and Records shall be at Purchaser's expense and shall not unreasonably interfere with Seller's or its Affiliates' or any of their respective successor companies' business operations.

(b) For a period of five years following the Closing Date, Purchaser shall: (i) allow Seller, upon reasonable prior notice and during normal business hours, through its Representatives, the right, at Seller's expense, to examine and make copies, at Seller's expense, of any Books and Records which were transferred to Purchaser or its Affiliates at or after the Closing and of which neither Seller nor any of its Affiliates retained a copy; and (ii) allow Seller to interview Purchaser's Representatives, upon reasonable prior notice and during normal business hours, for any reasonable business purpose relating to the Business, including in connection with Seller's preparation or examination of regulatory and statutory filings and financial statements, and the conduct of any litigation relating to the Business (other than any litigation or dispute between Seller or its Affiliates, on the one hand, and Purchaser or its Affiliates, on the other hand), or the conduct of any regulatory, contract holder, reinsurer or other dispute resolution or any other Third Party Claim (whether or not such Third Party Claim is the subject of an indemnification claim by a Purchaser Indemnified Person or Seller Indemnified Person), whether pending or threatened; provided , however , that Purchaser shall not be obligated to provide such access to its offices if Purchaser determines, in its reasonable judgment, that such Books and Records can be provided electronically or in another reasonably accessible location. Access to such Representatives and Books and Records shall be at Seller's expense and shall not unreasonably interfere with the business operations of Purchaser or its Affiliates.

(c) Except as otherwise prohibited by Applicable Law and subject to clause (d) and (e) below, Purchaser shall, with respect to the Books and Records, and Seller and its Affiliates shall, with respect to the Excluded Books and Records and the Retained Books and Records, in each case, to which the other party is entitled to access pursuant to the foregoing provisions of this Section 5.03(a) and (b) and Section 5.05 : (i) comply in all material respects with all Applicable Laws relating to the preservation and retention of records; (ii) apply preservation and retention policies that are no less stringent than those generally applied by such party; and (iii) without limitation to the foregoing, for at least five years after the Closing Date, preserve and retain all original Books and Records, Retained Books and Records, and Excluded Books and Records, as the case may be, and thereafter dispose of such originals only after it shall have given the other party 90 days' prior written notice of such disposition and the opportunity (at such other party's expense) to remove and retain such information.

(d) Notwithstanding any other provision of this Agreement, a party hereto shall not be obligated to provide such access to any Books and Records, Retained Books and Records, or Excluded Books and Records or information if such party determines, in its reasonable judgment, that doing so would violate Applicable Law (except that copies thereof shall be furnished to the requesting party or its Representatives to the extent permitted under Applicable Law) or a contract, agreement or obligation of confidentiality owing to a third party, or jeopardize the protection of an attorney-client privilege; provided, that the party contemplated to provide access shall use commercially reasonable efforts to obtain waivers or make other arrangements (including redacting information or entering into joint defense agreements) that would enable otherwise required disclosure to the other party or its Representatives to occur without so jeopardizing privilege or contravening such Applicable Law, contract or obligation of confidentiality.

(e) Notwithstanding any other provision of this Agreement to the contrary, Purchaser shall, and shall cause its Affiliates to, retain and preserve all Books and Records (in whatever form maintained) transferred to Purchaser that are subject to a Legal Hold in effect as of the Closing, until such time as Seller notifies Purchaser in writing that such Books and Records may be destroyed. Seller shall use commercially reasonable efforts to notify Purchaser within 30 days of the termination of any applicable Legal Hold. Purchaser shall provide Seller and its Affiliates with access to any Books and Records subject to this Section 5.03(e); provided that access to Books and Records subject to Legal Holds shall be limited in time only by the terms of the applicable Legal Hold; provided , however , that Purchaser shall not be obligated to provide access to its offices for such purposes if Purchaser determines, in its reasonable judgment, that such Books and Records can be provided electronically or in another reasonably accessible location.

Section 5.04. Confidentiality.

(a) The terms of the confidentiality agreement, dated June 12, 2017 (the " Confidentiality Agreement"), between Seller and The Hartford Financial Services Group Inc. shall continue in full force and effect until the Closing, at which time the confidentiality obligations under the Confidentiality Agreement shall terminate.

(b) Notwithstanding the foregoing, nothing in the Confidentiality Agreement shall restrict, prohibit or delay the ability of Seller or Purchaser to exercise its rights or perform its obligations under the Transaction Agreements. If, for any reason, the transactions contemplated by this Agreement are not consummated, the Confidentiality Agreement shall nonetheless continue in full force and effect in accordance with its terms.

(c) From and after the Closing: (i) Seller shall, and shall cause its Representatives to, maintain in confidence any written, oral or other information to the extent relating to the Business obtained by virtue of Seller's ownership of the Business prior to the Closing, including the Retained Books and Records; and (ii) Purchaser shall, and shall cause its Representatives to, maintain in confidence any written, oral or other information of or relating to Seller or its Affiliates (other than information relating to the Business) obtained by virtue of its ownership of the Business from and after the Closing, except, in each case, to the extent that the applicable party is required to disclose such information by judicial or administrative process or pursuant to

Applicable Law (provided that, except in connection with any required disclosure pursuant to any Applicable Law relating to Taxes and any filings required by the applicable securities laws, such party has given the other party written notice of such potential disclosure and, to the extent reasonably requested by such other party, cooperated with such other party in seeking an appropriate order or other remedy protecting such information from disclosure) or such information can be shown to have been in the public domain through no fault of the applicable party.

(d) Effective as of the Closing, Seller shall (i) enforce, on behalf of and at the request of Purchaser, Seller's rights, powers and privileges under any in-force confidentiality agreements with third Persons other than Purchaser regarding the potential sale of the Business executed prior to the date hereof (each, a " Seller Confidentiality Agreement") in connection with any material breach thereof by such third persons, provided that Purchaser shall reimburse Seller for its costs and expenses (including reasonable legal fees and expenses) incurred in connection with such enforcement, and (ii) submit written requests to all third Persons who executed a Seller Confidentiality Agreement that such other Persons promptly deliver to Purchaser or otherwise destroy all proprietary or confidential material furnished to such Person by or on behalf of Seller or its Affiliates in accordance with the terms of such Seller Confidentiality Agreement.

Section 5.05. Maintenance and Transfer of Books and Records.

(a) Through the Closing Date, Seller shall, and shall cause its Affiliates to, maintain the Books and Records in all material respects in the same manner and with the same care that the Books and Records have been maintained for the 12-month period prior to the execution of this Agreement. Books and Records of the type identified in Section 5.05(a) of the Seller Disclosure Schedule, including, for the avoidance of doubt, Books and Records that (i) are necessary for Seller to provide services under the Transition Services Agreement (to the extent that such Books and Records cannot reasonably be duplicated and a copy retained by Seller or its applicable Affiliate(s)); or (ii) are not permitted to be disclosed or transferred under applicable Law (such Books and Records, the " Retained Books and Records"), shall not be transferred at the Closing but will instead be made available by Seller to Purchaser, at Seller's expense, from and after the Closing in accordance with the guidelines set forth in Section 5.05(a) of the Seller Disclosure Schedule. Notwithstanding anything to the contrary in this Agreement, Seller and its Affiliates shall not be required to transfer the Retained Books and Records at the Closing or on the Closing Date, and Seller and its Affiliates shall be entitled to retain copies of any Books and Records transferred to Purchaser at the Closing or on the Closing Date. Seller shall, and shall cause its Affiliates to, provide Purchaser and its Representatives reasonable access to such Retained Books and Records, and once any Retained Books and Records are no longer necessary for the provision of services under the Transition Services Agreement or are permitted to be transferred, as applicable, Seller shall cause such Retained Books and Records to be delivered to Purchaser (or a Person designated by Purchaser) or, at Purchaser's option, to be destroyed.

(b) At the Closing, Seller shall cause all Books and Records (except the Retained Books and Records) in the possession or control of Seller or any of its Affiliates to be delivered to Purchaser (or a Person designated by Purchaser) in accordance with the requirements and guidelines set forth in Section 5.05(b) of the Seller Disclosure Schedule.

Section 5.06. Consents, Approvals and Filings.

(a) Subject to the terms and conditions hereof, Seller and Purchaser shall each use their reasonable best efforts, and shall cooperate fully with each other, (i) to comply as promptly as practicable with all requirements of Governmental Authorities applicable to the transactions contemplated by the Transaction Agreements and (ii) to obtain as promptly as practicable all Governmental Approvals necessary in connection with the consummation of the transactions contemplated by the Transaction Agreements; provided that, Purchaser shall be responsible for the costs (including any license or other fees and expenses) associated with Seller, Purchaser or any of their respective Affiliates obtaining any such Governmental Approvals. In connection therewith, Seller and Purchaser shall make and cause their respective Affiliates to make all legally required filings as promptly as practicable in order to facilitate prompt consummation of the transactions contemplated by the Transaction Agreements, shall provide and shall cause their respective Affiliates to provide such information and communications to Governmental Authorities as such Governmental Authorities may request, shall take and shall cause their respective Affiliates to take all steps that are necessary, proper, or advisable to avoid any Action by any Governmental Authority with respect to the transactions contemplated by the Transaction Agreements, shall defend or contest in good faith any Action by any third party (including any Governmental Authority), whether judicial or administrative, challenging any of the Transaction Agreements or the transactions contemplated thereby, or that could otherwise prevent, impede, interfere with, hinder, or delay in any material respect the consummation of the transactions contemplated thereby, including by using their reasonable best efforts to have vacated or reversed any stay or temporary restraining order entered with respect to the transactions contemplated by any of the Transaction Agreements by any Governmental Authority, and shall consent to and comply with any condition imposed by any Governmental Authority on its grant of any such permit, order, consent, approval, or authorization, other than any Burdensome Condition. Each of the parties shall provide to the other party copies of all applications or other communications to Governmental Authorities in connection with this Agreement in advance of the filing or submission thereof.

(b) Without limiting the generality of the foregoing, as promptly as practicable after the date hereof, each of Purchaser and Seller shall file with all applicable Insurance Regulators all required requests for approval of the transactions contemplated by the Transaction Agreements, which requests shall include all required exhibits. A reasonable time prior to furnishing any written materials to any Insurance Regulator in connection with the transactions contemplated by the Transaction Agreements, the furnishing party shall provide the other party with a copy thereof, and the other party shall have a reasonable opportunity to provide comments thereon, which comments shall be considered by the furnishing party in good faith. Each party shall give to the other party prompt written notice if it receives any notice or other communication from any Insurance Regulator or other Governmental Authority in connection with the transactions contemplated by the Transaction Agreements and, in the case of any such notice or communication that is in writing, shall promptly furnish the other party with a copy thereof. If any Governmental Authority requires that a hearing be held in connection with any such approval, each party shall use its reasonable best efforts to arrange for such hearing to be held promptly after the notice that such hearing is required has been received by such party. Each party shall give to the other party reasonable prior written notice of the time and place when any meetings, telephone calls, or other conferences may be held by it with any

Governmental Authority in connection with the transactions contemplated by the Transaction Agreements, and the other party shall have the right to have a representative or representatives attend or otherwise participate in any such meeting, telephone call, or other conference unless prohibited by Applicable Law.

(c) Notwithstanding anything herein to the contrary, neither Purchaser nor Seller shall be obligated to take or refrain from taking or to agree to it, its Affiliates or any of their respective Representatives taking or refraining from taking any action or to permit or suffer to exist any restriction, condition, limitation or requirement which, individually or together with all other such actions, restrictions, conditions, limitations or requirements, would constitute a Burdensome Condition. As used in this Agreement, " Burdensome Condition" means any arrangement, condition or restriction (i) in the case of Purchaser, (A) to sell or hold separate or agree to sell, divest or discontinue, before or after the Closing Date, any properties, assets, businesses or licenses of Purchaser or its Affiliates that are material to Purchaser and its Affiliates, taken as a whole, or to the Business, as applicable, or (B) that otherwise is reasonably likely to have a Material Adverse Effect or a material adverse effect on the business, financial condition, operations or results of operations of Purchaser and its Affiliates, taken as a whole; and (ii) in the case of Seller, would require Seller or any of its Affiliates to provide any guarantee or incur any liability with respect to the Business or the Transferred Assets after the Closing Date, or restrict the ability of Seller or any of its Affiliates to conduct their respective businesses after the Closing Date.

Section 5.07. Further Assurances.

(a) Subject to the terms and conditions herein provided, including Section 5.06 , each of the parties hereto shall, and shall cause its Affiliates to, execute such documents and other papers and perform such further acts as may be reasonably required to carry out the provisions hereof and the transactions contemplated hereby and by the other Transaction Agreements. Each such party shall, at or prior to the Closing Date, use its reasonable best efforts to fulfill or obtain the fulfillment of the conditions precedent to the consummation of the transactions contemplated hereby and by the other Transaction Agreements, including the execution and delivery of any documents, certificates, instruments or other papers and the taking of any other actions that are reasonably necessary for the consummation of the transactions contemplated hereby and by the other Transaction Agreements.

(b) Subject to the terms and conditions of this Agreement, on and after the Closing Date, Seller and Purchaser shall, and shall cause their respective Affiliates to, take all reasonable actions and execute any additional documents, instruments or conveyances of any kind which may be reasonably necessary to put Purchaser and its Affiliates in full possession and operating control of the Business and to effect fully the separation of the Business from Seller and its Affiliates.

Section 5.08. Privacy and Data Security Compliance; Use of Information. Notwithstanding any other provision of this Agreement or any Transaction Agreement to the contrary, none of Seller, Purchaser or any of their respective Affiliates shall be required to take any action that would violate or conflict with, and each such Person shall comply with, all Privacy and Data Security Laws. Notwithstanding any other provision of this Agreement, Seller

and Purchaser shall use their respective reasonable best efforts to ensure that all Personal Data about individual insureds and employees on leaves of absence under Group Contracts or other individuals is used, shared, accessed, stored, transmitted, disclosed, or otherwise processed in a manner (including the scope of information) that complies with, and facilitates each party's compliance with, Privacy and Data Security Laws. For the avoidance of doubt, any Personal Data relating to individual insureds and employees on leaves of absence under Group Contracts accessed by or disclosed to Purchaser or any of its Affiliates pursuant to this Agreement shall be subject to Purchaser's confidentiality obligations under Section 5.04 and under the Administrative Services Agreement.

Section 5.09. Non-Solicitation of Employees.

(a) For a period of 24 months following the Closing Date, without the prior written consent of Purchaser, neither Seller nor any of its Affiliates shall, whether directly or indirectly, solicit for employment or employ any Transferred Employee or any employee of the Purchaser whose name is set forth on Section 5.09(a) of the Purchaser Disclosure Schedule; provided , that nothing in this Section 5.09(a) shall prohibit Seller or any of its Affiliates from engaging in general solicitations not directed at such Persons (including general media advertisements and the use of a search firm not directed to target Transferred Employees) or from soliciting or employing any such Person whose employment with or engagement by Purchaser or any of its Affiliates has been terminated by Purchaser or its applicable Affiliate at least three months prior to the first such solicitation or employment.

(b) For a period of 24 months following the Closing Date, without the prior written consent of Seller, neither Purchaser nor any of its Affiliates shall, whether directly or indirectly, solicit for employment or employ any employee of the Seller whose name is set forth on Section 5.09(b) of the Seller Disclosure Schedule; provided , that nothing in this Section 5.09(b) shall prohibit Purchaser or any of its Affiliates from engaging in general solicitations not directed at such Persons (including general media advertisements and the use of a search firm not directed to target such Persons) or from soliciting or employing any such Person whose employment with or engagement by Seller or any of its Affiliates has been terminated by Seller or its applicable Affiliate at least three months prior to the first such solicitation or employment.

(c) For a period of 24 months following the Closing Date (including during the Employee Lease Term), without the prior written consent of Purchaser, neither Seller nor any of its Affiliates shall, whether directly or indirectly, interfere with Purchaser's obligations under Section 6.01(a) or attempt to retain for employment or rehire any Employee set forth on Section 6.01(a)(i) of the Seller Disclosure Schedule who does not become a Transferred Employee; provided , that nothing in this Section 5.09(c) shall prohibit Seller or any of its Affiliates from engaging in general solicitations not directed at such Persons (including general media advertisements and the use of a search firm not directed to target such Persons).

Section 5.10. Use of Names.

(a) At the Closing, Seller shall enter into a royalty-free license agreement with Purchaser substantially in the form attached hereto as Exhibit I (the " Trademark License Agreement"), among other things, permitting Purchaser to use the "Aetna" name and related

Trademarks on a transitional basis in connection with the operation of the Business in the United States in accordance with the terms thereof.

(b) Except as otherwise contemplated by the Administrative Services Agreement, the Distribution Agreement, the Transition Services Agreement and the Trademark License Agreement in accordance with the terms thereof: (i) following the Closing Date (including in connection with the operation of the Business and the Transferred Assets), Purchaser shall not, and shall cause its Affiliates not to, use any of the names or Trademarks set forth in Section 5.10 of the Seller Disclosure Schedule, any other Trademarks of Seller's Affiliates that include the name "Aetna," or any name, Trademark, or acronym that is confusingly similar to, or is based on or incorporates, any of such names or Trademarks (collectively, the " Seller Trademarks") whether or not in combination with other words, symbols, or other distinctive or non-distinctive elements, and all trade, corporate or business names, trademarks, tag-lines, identifying logos, trade dress, monograms, slogans, service marks, domain names, brand names, and other name or source identifiers that are derivations, translations, adaptations, combinations or variations of the Seller Trademarks or Trademarks of Seller's Affiliates, or embodying any of the foregoing, whether or not in combination with other words, symbols, or other distinctive or non-distinctive elements; and (ii) Purchaser, for itself and its Affiliates, agrees that any and all rights arising out of the Transferred Assets to the Seller Trademarks or Trademarks of Seller's Affiliates, whether written or oral, with Seller or its Affiliates, shall terminate on the Closing Date without recourse by Purchaser or any of its Affiliates. Neither Purchaser nor any of its Affiliates shall seek to register in any jurisdiction any trade, corporate, or business name, trademark, tag-line, identifying logo, trade dress, monogram, slogan, service mark, domain name, brand name, or other name or source identifier that is a derivation, translation, adaptation, combination, or variation of the Seller Trademarks or Trademarks of Seller's Affiliates.

Section 5.11. Pre-Closing Management of Specified Portfolio.

(a) Monthly Asset Value Statements and Related Adjustments.

(i) After the end of each calendar month that occurs between the date hereof and the Closing Date, Seller shall estimate in good faith the Adjusted Required Asset Value and the Accounting Value of the Specified Portfolio as of the end of such month and deliver to Purchaser a statement (each, a "Monthly Asset Value Statement") specifying such Adjusted Required Asset Value and Accounting Value as of the end of such month, provided that no such Monthly Asset Value Statement shall be so prepared or delivered with respect to the month preceding the month in which the Closing occurs.

(ii) If the Accounting Value of the Specified Portfolio set forth in a Monthly Asset Value Statement is less than the Adjusted Required Asset Value set forth in such Monthly Asset Value Statement, Seller shall (or shall cause the Ceding Company or AHLIC to), promptly following the delivery of such Monthly Asset Value Statement to Purchaser pursuant to Section 5.11(a)(i) , acquire or, subject to Section 5.11(c) below, designate for

inclusion in the Specified Portfolio additional cash or Investment Assets with an aggregate Fair Market Value equal to the amount of such shortfall.

(iii) If the Accounting Value of the Specified Portfolio set forth in a Monthly Asset Value Statement is greater than the Adjusted Required Asset Value set forth in such Monthly Asset Value Statement, Seller may, at its option and in its sole discretion, select for removal from the Specified Portfolio cash or Investment Assets that have an aggregate Accounting Value equal to such excess as follows (clauses (A) and (B) below, the "Selection Waterfall"):

(A) cash and cash equivalents in the Specified Portfolio will be selected first; and

(B) otherwise, Investment Assets will be selected in an order of shortest stated maturity to longest stated maturity, determined in each case in good faith by Seller.

(iv) Notwithstanding anything to the contrary in this Agreement, Seller may (and may cause the Ceding Company or AHLIC to) sell any Investment Asset in the Specified Portfolio if Seller determines in good faith that such Investment Asset has become, or is reasonably likely to become, impaired. In the event of any such sale of an impaired asset, Seller shall (or shall cause the Ceding Company or AHLIC to), as promptly as practicable following such sale (with a target of within one Business Day), acquire or designate for inclusion in the Specified Portfolio cash or replacement Investment Assets with an aggregate Fair Market Value equal to the Accounting Value of the Investment Asset sold in such sale, determined prior to any adjustment as a result of the impairment. For the avoidance of doubt, the Capital Gain or Loss Adjustment (as defined in clause (b) below) does not apply to sales of Investment Asset pursuant to this Section 5.11(a)(iv) , but the Reallocated Asset Value Adjustment (as defined in Section 5.11(c) below) does apply to any Reallocated Investment Asset that replaces such an Investment Asset.

(v) Any changes to the Specified Portfolio contemplated by this Section 5.11(a) will be effected in accordance with Pre-Closing Investment Guidelines.

(b) Discretionary Turnover Allowance.

(i) Between the date hereof and the Closing Date, Seller may, at its option and in its sole discretion, sell:

(A) any bond in the Specified Portfolio that has an option adjusted duration of 3.00 years or less as of the close of business on the Business Day immediately prior to the date on which it is sold, determined in accordance with the OAD model provided by

Bloomberg L.P.'s Portfolio & Risk Analytics solution (PORT); and

(B) an additional (x) 5% of the aggregate Specified Portfolio (where such percentage is determined by reference to the Accounting Value of the Specified Portfolio as of the Reference Date and sales are measured by Accounting Value of the sold Investment Assets as of the applicable sale dates) during the period between the Reference Date through December 31, 2017; and (y) if the Closing has not occurred on or prior to December 31, 2017, 1% of the Specified Portfolio (where such percentage is determined by reference to the Accounting Value of the Specified Portfolio as of the beginning of each applicable month and sales are measured by Accounting Value of the sold Investment Assets as of the applicable sale dates) during each calendar month, or portion thereof, that between December 31, 2017 and the Closing (this Section 5.11(b)(i) collectively, the "Discretionary Turnover Allowance");

provided , however , that the sales described in (A) and (B) above may not, in the aggregate, exceed 10% of the Specified Portfolio through November 30, 2017, plus 2% of the Specified Portfolio for every calendar month after November 2017.

(ii) On the date that any Investment Asset in the Specified Portfolio is sold pursuant to this Section 5.11(b) , the Adjusted Required Asset Value as of such date will, in addition to any adjustment to the Required Asset Value required under the Transaction Accounting Principles to account for any change in the interest maintenance reserve of the Ceding Company or AHLIC, as applicable, resulting from such sale, be adjusted as set forth below (each of the adjustments described in (A) and (B) below, a "Capital Gain or Loss Adjustment"):

(A) if the sale of the Investment Asset generates a (statutory basis) capital gain (calculated as the excess, if any, of the FMV Ex-Accrued of such Investment Asset as of the applicable date of sale over the Book Value of such Investment Asset as of such date), the Adjusted Required Asset Value as of such date will be increased by the amount of such capital gain, less the amount of any interest maintenance reserve of the Ceding Company or AHLIC, as applicable, generated by the sale of such asset in accordance with the Transaction Accounting Principles; and

(B) if the sale of the Investment Asset generates a (statutory basis) capital loss (calculated as the excess, if any, of the Book Value of such Investment Asset as of the applicable date of sale over the FMV Ex-Accrued of such Investment Asset as of such date), the

Adjusted Required Asset Value as of such date will be decreased by an amount equal to (A) the absolute value of such capital loss minus (B) the absolute value of any decrease in interest maintenance reserve of the Ceding Company or AHLIC, as applicable, resulting from the sale of such asset in accordance with the Transaction Accounting Principles.

(iii) In the event that Seller elects to sell any Investment Asset pursuant to this Section 5.11(b) , Seller shall, as promptly as reasonably practicable (with a target of within one Business Day) reinvest the gross proceeds it receives from such sale (less the amount of such gross proceeds that is attributable to accrued but unpaid interest on such Investment Asset) in the Specified Portfolio by either acquiring one or more new Investment Assets or, subject to Section 5.11(c) below, selecting for inclusion in the Specified Portfolio one or more Reallocated Investment Assets, in each case that have an aggregate FMV Ex-Accrued equal to the amount of such gross proceeds (less the amount of such gross proceeds that is attributable to accrued but unpaid interest on such Investment Asset).

(iv) Any changes to the Specified Portfolio contemplated by this Section 5.11(b) will be effected in accordance with the Pre-Closing Investment Guidelines.

(c) Reallocated Investment Assets. If, between the date of this Agreement and the Closing Date, any Reallocated Investment Asset is designated for inclusion in the Specified Portfolio pursuant to Section 5.11(a) or Section 5.11(b) , then the following adjustment shall be made to the Adjusted Required Asset Value as of the date of such designation (each of the adjustments described in (i) and (ii) below, a " Reallocated Asset Value Adjustment"):

(i) if the FMV Ex-Accrued of the Reallocated Investment Asset as of such date exceeds the Book Value of such Reallocated Investment Assets as of such date, the Adjusted Required Asset Value shall be decreased by the amount of such excess; and

(ii) if the FMV Ex-Accrued of the Reallocated Investment Asset as of such date is less than the Book Value of such Reallocated Investment Asset as of such date, the Adjusted Required Asset Value shall be increased by the amount of such shortfall.

Section 5.12. Properties.

(a) Schedule VI hereto sets forth all real property at which Employees of the Business use space for the current operation and conduct of the Business (collectively, the " Properties"). The Properties are separated on Schedule VI into the following two (2) categories: (1) the Properties that Seller intends, and agrees to cooperate as required in Section 5.12(b) to enable, Purchaser and such Employees to have the right to occupy or use (in the case of the Subleases, on a co-location basis with Seller, its Affiliates and their respective employees)

from and after the day immediately following the expiration or termination of the Employee Lease Term pursuant to the Portland Location Assignment Agreement, the Subleases and the Hartford License Agreement (collectively, the " Occupied Properties"); and (2) the Properties that Purchaser and such Employees will not have the right to occupy or use from and after the day immediately following the expiration of the Employee Lease Term (collectively, the " Non-Occupied Properties"). Purchaser acknowledges and agrees that all Employees at the Non-Occupied Properties shall vacate the Non-Occupied Properties from and after the day immediately following the expiration of the Employee Lease Term and Purchaser shall cause such Employees' job location to either be a home-office or an alternative real estate solution other than the Non-Occupied Properties. The Employees' job location between the Closing Date and the expiration of the Employee Lease Term shall remain at the Properties pursuant to the Employee Leasing Agreement.

(b) Seller and Purchaser shall, and shall cause their respective Affiliates to, use commercially reasonable efforts to obtain, on or prior to December 31, 2017, the required consent of (i) the landlord of the Portland Location to the assignment of the Assigned Lease pursuant to the Portland Location Assignment Agreement and (ii) the respective landlords of the other Occupied Properties to the subleasing of such locations to Purchaser pursuant to the Subleases, in each case, on the terms and subject to the conditions set forth herein and therein (collectively, the " Lease Consents"). Seller and Purchaser shall cooperate with each other as may be reasonably required to obtain the Lease Consents.

(c) If any such Lease Consent is not obtained on or prior to December 31, 2017, then, (i) the Portland Location Assignment Agreement and/or any applicable Sublease to which such Lease Consent was not obtained shall not become effective as of the expiration or termination of the Employee Lease Term and (ii) Purchaser shall, and shall cause its Affiliates to, obtain alternative office space, at its sole cost and expense, and vacate the applicable Occupied Properties for which a Lease Consent has not been obtained prior to the expiration of the Employee Lease Term for such applicable Occupied Properties as provided for in this Section 5.12(c).

Section 5.13. Non-Competition. During the period beginning on the Closing Date and ending on the date that is three years and six months after the Closing Date (the " Restricted Period"), Seller shall not, and shall cause its Affiliates (together with Seller, the " Restricted Entities") not to, directly or indirectly, issue or sell in any state or jurisdiction within the United States, any products or services of a type that comprises part of the Business as of the date hereof and that was underwritten, issued, sold, renewed or serviced as part of the Business during the two years prior to the date hereof (the " Competing Businesses"); provided , however , that this Section 5.13 shall not prohibit or in any way prevent or restrict:

(a) any Restricted Entity from operating any business other than the Business (including the business described in the proviso included in the definition of "Business") or from operating the Business from and after the time at which the Business or any portion thereof is recaptured under any coinsurance agreement;

(b) any Restricted Entity from providing (i) provider network access or network management services; (ii) medical management, case management, or cost containment services;

or (iii) administrative services for short-term disability plans that are provided in conjunction with a self-funded plan sponsor's medical benefits coverage or plan that is administered or serviced by a Restricted Entity.

(c) any Restricted Entity from performing any act or conducting any business expressly required by this Agreement or any other Transaction Agreement;

(d) any Restricted Entity from entering into a reinsurance agreement or similar arrangement primarily reinsuring the Competing Business of a ceding company that is not a Restricted Entity, so long as none of the Restricted Entities engages in the issuing, underwriting, selling, distributing, marketing, delivering, cancelling or administering of such underlying reinsured business;

(e) any Restricted Entity from (A) making any investment or providing advisory services (or activities related thereto) in a fiduciary or agency capacity and carried out on behalf of clients or other third party beneficiaries in the ordinary course of business, or (B) making passive investments for general insurance accounts or investment management, proprietary investing or trading activities in the ordinary course of its businesses; provided that in no event shall the aggregate ownership interest held by Restricted Entities in any Person engaged in a Competing Business, whether directly or indirectly, equal or exceed 20% of the aggregate voting power or issued and outstanding equity securities of such Person, subject to Sections 5.13(f) and (g) below;

(f) the ownership of, any affiliation with, or the conduct of any other activity with respect to, a Person that conducts, either directly or indirectly, a Competing Business (any such person, together with all of its Affiliates, a " Competing Person") that is the result of (A) the merger, consolidation, share exchange, sale or purchase of assets, scheme of arrangement or similar business combination involving any Restricted Entity with any Competing Person or (B) the acquisition of 20% or more of the voting power or outstanding equity interests in any Competing Person by any Restricted Entity, if, in the case of either (A) or (B), at least 66 2/3% of the total consolidated revenues of such Competing Person in the calendar year prior to such ownership or affiliation was derived from activities that do not constitute Competing Business; provided , however , that such Restricted Entity may proceed with such acquisition of a Competing Person that derived in excess of 33 1/3% of its total consolidated revenues in its most recent fiscal year from activities that constitute Competing Business only if such Restricted Entity divests, within 24 months of its acquisition, a sufficient portion of such Competing Person such that the total consolidated revenues from activities that constitute Competing Business that remain with any such Competing Person after such divestment over the last four full fiscal quarters prior to such acquisition are not greater than 33 1/3% of its consolidated revenues for such period; or

(g) subject to the foregoing clause (f), any Restricted Entity from foreclosing on collateral of or acquiring any of the outstanding capital stock or other interests in any person that has outstanding indebtedness to any Restricted Entity, or engaging in any activities otherwise prohibited by this Section 5.13 in connection with any such Person as a result of the acquisition of such capital stock or other interests in connection with a debt previously contracted.

ARTICLE VI.

EMPLOYEE MATTERS

Section 6.01. Employee Matters.

(a) Except as set forth in Section 6.01(b), Purchaser or its Affiliate shall, not more than 30 Business Days following the Closing Date, extend offers of employment ("Transfer Offers") to all then-current Employees. Section 6.01(a)(i) of the Seller Disclosure Schedule sets forth, as of the date hereof, a list of then-current Employees, together with such Employees' (i) current base salary (or wages), (ii) current target incentive compensation opportunities by component, including (1) target annual cash bonus opportunity, (2) commission opportunity, and (3) target long-term incentive opportunity, (iii) recognized years of service, (iv) current work address, (v) remote work arrangement, if any, (vi) exempt or non-exempt status, (vii) hourly or salaried status, (viii) annual paid time off accrual rate, (ix) paid time off carryover amount, (x) current job title and career level, (xi) date of hire, (xii) valid work email address, and (xiii) status as active or on leave. Seller shall promptly update Section 6.01(a)(i) of the Seller Disclosure Schedule between the date hereof and the expiration of the Employee Lease Term to reflect any new hires, transfers, resignations and other employment additions and terminations of Employees which may have occurred subsequent to the date hereof in the ordinary course of business of the Business and shall deliver to Purchaser (A) a Closing version of Section 6.01(a)(i) of the Seller Disclosure Schedule no later than two days prior to the Closing Date, and (B) a final version of Section 6.01(a)(i) of the Seller Disclosure Schedule no later than 10 Business Days prior to the expiration of the Employee Lease Term. Notwithstanding anything to the contrary herein, to the extent an individual is hired or otherwise retained at the direction of Purchaser and added to Section 6.01(a)(i) of the Seller Disclosure Schedule after the date hereof, Purchaser or its Affiliate shall extend a Transfer Offer to such Employee as soon as reasonably practicable following such addition, but not more than the later to occur of (x) 30 Business Days following the Closing Date, and (y) ten Business Days following such addition. Section 6.01(a)(ii) of the Seller Disclosure Schedule sets forth, as of the date hereof, a list of then current Business Employees on a no-name basis by each Business Employee's current job title.

(b) With respect to any Employee identified on Section 6.01(a) of the Seller Disclosure Schedule hereto who is not actively at work upon the expiration of the Employee Lease Term as a result of a leave of absence (including temporary leave for purposes of jury or military duty, maternity or paternity leave, leave under the Family Medical Leave Act of 1993, approved personal leave or disability or medical leave) (each, a "Leave Recipient"), Purchaser shall make an offer of employment in the manner required by this Section 6.01, contingent on such Leave Recipient's return to active status within six months following the expiration of the Employee Lease Term or such longer period as required by Applicable Law; provided that, notwithstanding anything in this Agreement to the contrary, Purchaser shall not be required to make an offer of employment to any such Employee (and shall have no obligation of any nature to hire or employ any such Employee) who is receiving long-term disability benefits. When a Leave Recipient who has accepted the offer returns to active status pursuant to the terms hereof and commences active employment with Purchaser or its Affiliates, such Leave Recipient shall be considered a Transferred Employee. Purchaser shall take, or cause its Affiliates to take, all reasonably necessary steps to sponsor or transfer sponsorship of, the work permits for all

Employees who are foreign nationals listed in Section 3.10(j) of the Seller Disclosure Schedule on or after the expiration of the Employee Lease Term. Seller shall cooperate as reasonably necessary to effect Purchaser's or its Affiliates' sponsorship or transfer of sponsorship of all such foreign national Employees, in each case, to the extent permitted by Applicable Law. Each such foreign national Employee who accepted an offer of employment from Purchaser or an Affiliate pursuant to the terms hereof shall be considered a Transferred Employee on the later of the Transfer Date or the date such Employee obtains the necessary authorization to work for Purchaser and its Affiliates and commences active employment with Purchaser and its Affiliates.

(c) Purchaser or its Affiliate shall set forth in the Transfer Offers the proposed terms of employment (or service) for the Employees and, as of the expiration of the Employee Lease Term and for a period of 12 months immediately following the expiration of the Employee Lease Term (or such earlier date on which such Employee's employment with Purchaser or its Affiliate terminates), Purchaser or its Affiliate shall provide each Transferred Employee with the following terms of employment (or service): (i) base salary (or wages) no less than the base salary (or wages) provided to such Employee by Seller or its Affiliates immediately prior to the Closing Date, or, if later, as of the Employee's date of hire; (ii) annual incentive opportunities no less than those provided by Seller or its Affiliates immediately prior to the Closing Date, or, if later, as of the Employee's date of hire, (iii) a long-term incentive compensation opportunity (whether paid in cash or equity) at a similar range and participation rate to that provided to such Employee by Seller or its Affiliates immediately prior to the Closing Date or, if later, as of the Employee's date of hire; (iv) commission opportunities that are no less than those provided to such Employee by Seller or its Affiliates immediately prior to the Closing Date or, if later, as of the Employee's date of hire, including, with respect to each individual set forth on Section 6.01(c) of the Seller Disclosure Schedule (each, a " Listed Sales Employee"), guaranteed commission opportunities consistent with the terms of the retention letter with each such Listed Sales Employee set forth on Section 3.10(a) of the Seller Disclosure Schedule, but in each case to be paid consistent with Purchaser's or its Affiliate's standard payroll cycle; (iii) employee retirement and welfare (including paid time off) benefits, in each case, substantially similar to those provided to similarly-situated employees of Purchaser or its Affiliate; and (iv) with respect to Employees whose job location is a home-office as of the Closing Date, the ability to continue to work from such home-office, and with respect to all other Employees, a job location that does not increase such Employee's commute by more than 30 miles when compared to the commute from such Employee's residence to the job location to which such Employee reports immediately prior to the expiration of the Closing Date, or if later, as of the Employee's date of hire, or provide the Employee the ability to work from a home-office. Without limiting the foregoing, Purchaser hereby acknowledges and agrees that if the Employee Lease Term extends past Lessee's regularly scheduled long-term incentive grant date in the first quarter of calendar year 2018, Purchaser shall, during the first "open window" trading period following the expiration of the Employee Lease Term, grant an award to each Transferred Employee who is eligible to earn a long-term incentive award for calendar year 2018. Employment or service, as applicable, pursuant to a Transfer Offer shall be contingent upon such Employee (i) being employed by (or providing on-going services with) Seller or any of its Subsidiaries immediately prior to the expiration of the Employee Lease Term, (ii) satisfying required professional licensure requirements (to the extent applicable), (iii) successfully completing a background check, I-9 form/eVerify process, and all applicable Purchaser new hire documentation and (iv) with respect to Employees who are foreign nationals, obtaining the necessary authorization to work for

Purchaser or its Affiliates within six (6) months of the expiration of the Employee Lease Term. All employment offers shall be for employment at-will and nothing in this Article VI shall require Purchaser or any of its Affiliates to continue to employ any Transferred Employee for any specified period of time following the expiration of the Employee Lease Term. Except as set forth in Section 6.01(b) , each Employee who accepts Purchaser's Transfer Offer shall be a " Transferred Employee" at 12:00:01 a.m. on the first day following the expiration of the Employee Lease Term. Effective as of the date they become Transferred Employees (the " Transfer Date"), such Transferred Employees shall cease to be employees of Seller and its Affiliates and shall cease any further participation in (and shall cease to accrue benefits under) Employee Benefit Plans, subject to the terms and conditions of the Employee Benefit Plans and Applicable Law.

(d) As of the expiration of the Employee Lease Term, in no event shall any Employee be entitled to accrue any benefits under the Employee Benefit Plans with respect to services rendered or compensation paid on or after the expiration of the Employee Lease Term, subject to the terms and conditions of the Employee Benefit Plans and Applicable Law.

(e) Notwithstanding anything in this Agreement to the contrary, any Transferred Employee who incurs a termination of employment during the 12-month period immediately following the expiration of the Employee Lease Term shall be entitled to receive severance payments and benefits that are no less favorable than the severance payments and benefits provided to similarly-situated employees of Purchaser or its Affiliates under the Purchaser severance plan as in effect immediately prior to the date hereof and set forth on Section 6.01(e) of the Seller Disclosure Schedule; provided , however, that in lieu of the thirty (30) day paid notice period applicable to similarly-situated employees of Purchaser, Transferred Employees will be entitled to a nine (9) week paid non-working period with benefits continuation during such period.

(f) Notwithstanding anything in this Agreement to the contrary, Purchaser or its Affiliate shall be solely responsible for all Liabilities arising from, related to or based upon the termination of any Employee who is terminated by Seller or its respective Affiliates on or after the expiration of the Employee Lease Term in the event such employee is not offered employment or service with Purchaser in accordance with the provisions of this Section 6.01. Purchaser or its Affiliate shall be solely responsible for providing all notices required under the Worker Adjustment and Retraining Notification Act, 29 U.S.C. § 2109 *et seq.* , or the regulations promulgated thereunder (the " WARN Act") (including comparable state, local or other Applicable Laws) and for taking all remedial measures, including, without limitation, the payment of all amounts, penalties, liabilities, costs and expenses if such notices are not provided, with respect to any obligations under the WARN Act (including comparable state, local or other Applicable Laws) arising out of or resulting from any termination of employment of any Transferred Employees by Purchaser and its Affiliates on or after the expiration of the Employee Lease Term.

(g) Purchaser shall cause its Affiliate to: (i) permit each Transferred Employee participating in each Employee Benefit Plan that is a defined contribution plan with a qualified cash or deferred arrangement within the meaning of Section 401(k) of the Code (the " Seller 401(k) Plan") to effect, and (ii) cause its defined contribution plan that includes a qualified cash

or deferred arrangement within the meaning of Section 401(k) of the Code (the " Purchaser 401(k) Plan") to accept, in accordance with Applicable Law, a "direct rollover" (within the meaning of Section 401(a)(31) of the Code) of his or her account balances (including earnings thereon through the date of transfer) under the Seller 401(k) Plan if such rollover to the Purchaser 401(k) Plan is elected in accordance with Applicable Law by such Transferred Employee.

(h) Subject to any reimbursement or other obligations of Purchaser or its Affiliates agreed upon pursuant to the Employee Leasing Agreement, Seller shall retain responsibility for all liabilities under and with respect to, and claims incurred under, the Employee Benefit Plans (including those relating to Transferred Employees and their covered dependents). Purchaser or its Affiliate shall be responsible for all liabilities under and with respect to, and claims incurred under, any employee benefit plans, programs, policies and arrangements maintained by Purchaser or its Affiliates (including those relating to Transferred Employees and their covered dependents).

(i) Unless Seller or one of its Affiliates is required under Applicable Law to make a payment in settlement of accrued paid time off of a Transferred Employee, (i) Purchaser or its Affiliate shall assume, recognize and provide each Transferred Employee up to forty (40) hours of the Transferred Employee's earned but unused paid time-off as of the expiration of the Employee Lease Term as determined under Seller's policy in effect as of the expiration of the Employee Lease Term and (ii) Seller or one of its Affiliates shall make a payment in settlement of accrued paid time off of any such Transferred Employee in excess of forty (40) hours in accordance with Seller's paid time off policy and Applicable Law.

(j) Purchaser or its Affiliate shall assume and pay, the accrued but unpaid annual cash bonuses with respect to performance in the calendar year ending December 31, 2017. In respect thereof, the following shall be accrued on the Initial Closing Statement: (i) accruals for ten-twelfths (10/12) of such annual cash bonuses, assuming maximum (140%) performance, and (ii) accruals representing the matching contribution that would have been made under Seller 401(k) Plan with respect to the bonus amounts accrued pursuant to Section 6.01(j)(i). In no event shall the amount of such payment by Purchaser to the Transferred Employees in the aggregate be less than the aggregate amount set forth with respect to such bonuses in the Initial Closing Statement as described in Section 6.01(j)(i).

(k) Purchaser shall, or shall cause one of its Affiliates to, make available to the Transferred Employees a flex spending account plan for medical and dependent care expenses under a new or existing plan established or maintained under Section 125 and Section 129 of the Code (the " Purchaser FSA"), effective as of the expiration of the Employee Lease Term and in accordance with this Section 6.01(k). If the Employee Lease Term ends after December 31, 2017, Purchaser, or one of its Affiliates, shall credit the applicable account under the Purchaser FSA of each Transferred Employee participating in the Seller Employee Benefit Plan maintained pursuant to Section 125 and Section 129 of the Code (the " Seller FSA" *)* with an amount equal to the balance of such Transferred Employee's account under the Seller FSA immediately prior to the expiration of the Employee Lease Term, in accordance with the following:

(i) If the aggregate amount withheld from Transferred Employees' compensation under the Seller FSA for 2018 exceeds the aggregate amount of reimbursements paid to Transferred Employees prior to the expiration of the Employee Lease Term under the Seller FSA for claims incurred in 2018, Seller shall transfer (or cause to be transferred) to Purchaser within 30 days after the expiration of the Employee Lease Term a cash payment equal to such excess, if any.

(ii) If the aggregate amount of reimbursements paid to Transferred Employees prior to the expiration of the Employee Lease Term under the Seller FSA for claims incurred in 2018 exceeds the aggregate amount withheld from Transferred Employees' compensation under the Seller FSA for 2018 prior to the expiration of the Employee Lease Term, Purchaser shall transfer (or cause to be transferred) to Seller within 30 days after the expiration of the Employee Lease Term a cash payment equal to such excess, if any.

(iii) In each case, Purchaser shall assume and be solely responsible for all claims for reimbursement by Transferred Employees for 2018 that have not been paid in full as of the expiration of the Employee Lease Term, which claims shall be paid pursuant to and under the terms of the Purchaser FSA, and Purchaser shall indemnify and hold harmless Seller and its Affiliates from any and all claims by or with respect to Transferred Employees for reimbursement under the Seller FSA that have not been paid in full as of the expiration of the Employee Lease Term; provided, however, that the foregoing indemnification shall not apply to any claims that were adjudicated under the terms of the Seller FSA on or prior to the expiration of the Employee Lease Term. Purchaser agrees to cause the Purchaser FSA to honor through the end of the calendar year in which the Employee Lease Term expires the elections made by each Transferred Employee under the Seller FSA in respect of the flexible spending reimbursement accounts under the Purchaser FSA that are in effect immediately prior to the expiration of the Employee Lease Term, subject to each Transferred Employee's ability to adjust such elections pursuant to the terms of the Purchaser FSA. For the avoidance of doubt, except as provided herein, (A) in no event shall Seller or any of its Affiliates have any liability or obligation under the Purchaser FSA, and (B) any Transferred Employee who elects coverage under a high deductible health plan may be ineligible to make continuing elections under the Purchaser health care FSA pursuant to the terms of such plans.

For the avoidance of doubt, if the Employee Lease Term ends on December 31, 2017, Purchaser shall have no obligation to provide credits as described in this Section 6.01(k).

(l) In respect of each Employee who becomes a Transferred Employee, Seller and Purchaser shall adopt the "standard procedure" for preparing and filing IRS Forms W-2 (Wage

and Tax Statements), as described in Revenue Procedure 2004-53. Under this procedure, Purchaser, as successor employer, shall provide, as applicable, all required Forms W-2 to all Employees who become Transferred Employees reflecting only wages paid and Taxes withheld by Purchaser and its Affiliates as the successor employer. In addition, Seller and Purchaser shall adopt the "standard procedure" of Revenue Procedure 2004-53 for purposes of filing IRS Forms W-4 (Employee's Withholding Allowance Certificate) and W-5 (Earned Income Credit Advance Payment Certificate).

(m) Purchaser or one of its Affiliates shall grant during the first "open window" trading period following the expiration of the Employee Lease Term new awards, payable in cash or in stock (each, a " New Award"), vesting over two (2) years, to each Transferred Employee who, as a result of the transactions contemplated by this Agreement, forfeits restricted share units, performance share units or stock appreciation rights that were granted pursuant to any Employee Benefit Plan prior to the date hereof and are not vested as of the expiration of the Employee Lease Term (each, a " Seller Forfeited Equity Award"). The value of the New Awards will be no less than the value of the Seller Forfeited Equity Awards, both individually and in the aggregate. Seller shall provide Purchaser with a schedule of the value of each Seller Forfeited Equity Award as soon as practicable following the termination of the Employee Lease Term.

(n) Purchaser agrees to cause its Affiliate to (i) provide coverage for the Transferred Employees under its employee benefit plans as of the applicable Transfer Date, (ii) waive any preexisting conditions, waiting periods and actively at work requirements under such plans and (iii) cause such plans to honor any expenses incurred by the Transferred Employees and their beneficiaries under similar Employee Benefit Plans during the portion of the calendar year in which the Transfer Date occurs for purposes of satisfying applicable deductible, co-insurance and maximum out-of-pocket expenses. Transferred Employees shall be given credit under each employee benefit plan, program, policy or arrangement of Purchaser in which the Transferred Employees are eligible to participate for all service with Seller (to the extent such credit was given by the applicable Employee Benefit Plan) for all purposes (except that no benefit accrual will be provided under any defined benefit pension plans), except to the extent it would result in a duplication of benefits.

(o) The parties hereto shall coordinate with each other prior to the Closing Date as to the form and content of any material, broad based communication from Purchaser or any of its Affiliates to the Employees. Seller acknowledges, understands and agrees, on behalf of itself and its Affiliates, that Purchaser shall, from the date hereof, be allowed to approach and meet with all Employees. Seller and its Affiliates shall permit Purchaser reasonable access to all Employees; provided, that such access shall not interfere with the operations of the Business, and that when on Seller premises, Purchaser shall abide by any Seller security protocols. In no event shall Purchaser or any of its employees have access to the systems of Seller.

(p) Seller, Purchaser and their respective Affiliates shall promptly take all steps necessary to fulfill their obligations, and to cause their applicable employee benefit plans to fulfill the obligations that Seller and Purchaser have agreed to pursuant to this Section 6.01. All transfers of information required by this Section 6.01 shall be made at the time and in the manner (including applicable file format) as reasonably requested by Purchaser or its applicable vendor.

In furtherance thereof, Seller shall provide to Purchaser a complete employee data file, in the format and with the elements prescribed by Purchaser, no later than October 23, 2017.

(q) Seller shall be solely responsible for and shall discharge all retention bonuses under Business Employee Benefit Plans that become vested at or prior to the termination of the Employee Lease Term (" Seller Retention Bonus Liabilities").

Section 6.02. No Third Party Beneficiaries. Notwithstanding the provisions of this Article VI , this Article VI is not intended to and shall not (a) create any third party rights, (b) amend any Employee Benefit Plan or Business Employee Benefit Plan, (iii) require Purchaser or any of its Affiliates to continue any Business Employee Benefit Plan beyond the time when it otherwise lawfully could be terminated or modified, or (d) require Purchaser or any of its Affiliates to continue to employ any Transferred Employee for any specified period, or (e) provide any Transferred Employee with any rights to continued employment, severance pay or similar benefits following any termination of employment.

ARTICLE VII.

TAX MATTERS

Section 7.01. Allocation of Consideration. In addition to the allocation of the Purchase Price contemplated by Article II , Seller and Purchaser shall further allocate the Purchase Price, as finally determined pursuant to Article II , and any other applicable consideration (the " Allocable Amount") in accordance with the requirements of Section 1060 of the Code (and the regulations promulgated thereunder) for all Tax purposes; provided that such allocation for Tax purposes shall be consistent with the allocation of the Purchase Price as contemplated by Article II. As soon as practicable following the date on which the Final Closing Statement becomes final and binding on the parties pursuant to Section 2.09(f) , Seller shall prepare a schedule reflecting the allocation of the Allocable Amount and shall submit such allocation to Purchaser for review. Purchaser and Seller shall use commercially reasonable efforts to agree on the amount and proper allocation of the Allocable Amount in accordance with Section 1060 of the Code. If Seller and Purchaser have not agreed on the allocation within 90 calendar days after the date on which the Final Closing Statement become final and binding on the parties pursuant to Section 2.09(f) , then Purchaser and Seller shall each have the right to deliver notice to the other party of its intent to refer the matter for resolution to the Independent Accountant. Purchaser and Seller will each deliver to the other and to the Independent Accountant a notice setting forth in reasonable detail their proposed allocations. Within 30 days after receipt thereof, the Independent Accountant will deliver the allocation schedule and provide a written description of the basis for its determination of the allocations therein (such allocations, whether agreed to by Purchaser and Seller or determined by the Independent Accountant (the " Final Allocation") shall be final, binding and conclusive on Purchaser and Seller and the parties will report, and will cause their respective Affiliates to report, the federal, state, local and other Tax consequences of the transactions, including the filing of Internal Revenue Service Form 8594, in a manner consistent with such Final Allocation). One-half of all fees, costs and expenses of retaining the Independent Accountant shall be borne by Seller and one-half of such fees, costs and expenses of retaining the Independent Accountant shall be borne by Purchaser. Each party will bear the costs of its own counsel, witnesses (if any) and employees.

Section 7.02. Transfer Taxes. Any Transfer Taxes shall be borne fifty percent (50%) by Seller and fifty percent (50%) by Purchaser. Seller and Purchaser shall cooperate in (a) determining the amount of Transfer Taxes, (b) obtaining any relief, exemption or refund of any such Transfer Tax, (c) preparing and timely filing any and all required Tax Returns for or with respect to such Transfer Taxes with any and all appropriate Tax authorities, (d) promptly providing the other party with evidence that such Transfer Taxes have been paid, and (e) promptly reimbursing the other party for fifty percent (50%) of such Transfer Taxes, as applicable. " Transfer Taxes" means any and all sales, use, stamp, documentary, filing, recording, transfer, goods and services, provincial sales, harmonized sales, excise, real estate, stock transfer, intangible property transfer, personal property transfer, gross receipts, registration, securities transactions, conveyance and notarial Taxes, and similar fees, Taxes and governmental charges (together with any interest, penalty, addition to Tax, and additional amount imposed in respect thereof) arising out of or in connection with the transactions contemplated by this Agreement.

Section 7.03. Cooperation and Exchange of Information. Seller and Purchaser shall provide each other with such cooperation and information as either of them or their respective Affiliates may reasonably request of the other in filing any Tax Return, amended Tax Return or claim for Tax refund, determining a liability for Taxes or a right to a Tax refund, or participating in or conducting any contest in respect of Taxes (a " Tax Contest"). Such cooperation and information shall include providing copies of relevant Tax Returns or portions thereof, together with accompanying schedules, related work papers and documents relating to rulings or other determinations by Tax Authorities. Each party and its Affiliates shall make its employees available on a basis mutually convenient to both parties to provide explanations of any documents or information provided hereunder. Each of Seller and Purchaser shall retain all Tax Returns, schedules and work papers, records and other documents in its possession relating to Tax matters of the Business for each Tax period first ending after the Closing Date and for all prior Tax periods until the later of (i) the expiration of the statute of limitations of the Tax period to which such Tax Returns and other documents relate, without regard to extensions except to the extent notified in writing of such extensions for the respective Tax periods, and (ii) three years following the due date (without extension) for such Tax Returns. Any information obtained under this Section 7.03 shall be kept confidential except as otherwise may be necessary in connection with the filing of Tax Returns or claims for Tax refunds or in conducting a contest or as otherwise may be required by Applicable Law or the rules of any stock exchange. Seller shall promptly notify Purchaser if, as a result of the amendment of any Tax Return, any claim or assessment by any Tax authority or any other cause, the Tax reserves in respect of the Ceded Insurance Contracts no longer accurately reflect the reserves maintained by Seller, the Ceding Company of any of its Affiliates as of the Closing Date (immediately prior to the Closing) with respect to the Ceded Insurance Contracts, and shall provide Purchaser updated information of such reserves. Upon receipt of such information, Purchaser shall provide Seller with a revised Purchase Price allocation in accordance with the principles of Section 7.01.

Section 7.04. Miscellaneous. Seller and Purchaser agree to treat all payments (other than interest on a payment) made by either of them to or for the benefit of the other or the other's Affiliates under this Article VII and under other indemnity provisions of this Agreement as adjustments to the Purchase Price for Tax purposes and that such treatment shall govern for purposes hereof to the extent permissible under Applicable Law.

ARTICLE VIII.

CONDITIONS TO CLOSING

Section 8.01. Conditions to Obligations of Each Party.

The respective obligations of each party hereto to consummate the transactions contemplated by this Agreement shall be subject to the fulfillment or waiver, at or prior to the Closing, of each of the following conditions:

(a) Governmental Consents and Approvals. All consents, approvals, or authorizations of, declarations or filings with, or notices to, any Governmental Authority in connection with the transactions contemplated hereby that are set forth in Section 8.01(a) of the Seller Disclosure Schedule shall have been obtained or made and shall be in full force and effect, and all waiting periods required under Applicable Law with respect thereto shall have expired or been terminated, in each case without the imposition of a Burdensome Condition with respect to the party asserting the failure of this condition.

(b) No Injunction or Illegality. There shall be no law or Governmental Order in existence that prohibits the consummation of the transactions contemplated by this Agreement.

(c) Reinsurance Consents. Seller shall have received the Munich Consent and the Hannover Consent.

Section 8.02. Conditions to Obligations of Purchaser.

The obligations of Purchaser under this Agreement are subject to the satisfaction on or prior to the Closing Date of the following conditions, any one or more of which may be waived by Purchaser to the extent permitted by Applicable Law:

(a) Representations and Warranties. (i) Each of the Seller Specified Representations that are qualified by materiality or Material Adverse Effect shall be true and correct in all respects, and each of the other Seller Specified Representations that are not so qualified shall be true and correct in all material respects and (ii) each of the representations and warranties of Seller contained in Article III of this Agreement (other than those referenced in subclause (i) above) shall be true and correct in all respects (without regard to materiality or Material Adverse Effect qualifiers), in each case as of the Closing Date with the same force and effect as though made on and as of the Closing Date (except to the extent that any such representations and warranties are given as of a particular date and relate solely to a particular date or period, which representations and warranties shall be true and correct as of such date or period), except in the case of clause (ii) above where the failure to be true and correct would not have, individually or in the aggregate, a Material Adverse Effect.

(b) Covenants. Seller and its Affiliates shall have performed and complied in all material respects with all covenants and agreements required by this Agreement to be performed or complied with by Seller and its Affiliates on or prior to the Closing Date.

(c) Closing Deliverables. Seller shall have delivered or caused to be delivered to Purchaser each of the documents required to be delivered by Seller pursuant to Section 2.08(a).

Section 8.03. Conditions to Obligations of Seller. The obligations of Seller under this Agreement are subject to the satisfaction on or prior to the Closing Date of the following conditions, any one or more of which may be waived by Seller to the extent permitted by Applicable Law:

(a) Representations and Warranties. (i) Each of the Purchaser Specified Representations that are qualified by materiality or Purchaser Material Adverse Effect shall be true and correct in all respects, and each of the other Purchaser Specified Representations that are not so qualified shall be true and correct in all material respects and (ii) each of the representations and warranties of Purchaser contained in Article IV of this Agreement (other than those referenced in subclause (i) above) shall be true and correct in all respects (without regard to materiality or Purchaser Material Adverse Effect qualifiers), in each case as of the Closing Date with the same force and effect as though made on and as of the Closing Date (except to the extent that any such representations and warranties are given as of a particular date and relate solely to a particular date or period, which representations and warranties shall be true and correct as of such date or period), except in the case of clause (ii) above where the failure to be true and correct would not have, individually or in the aggregate, a Purchaser Material Adverse Effect.

(b) Covenants. Purchaser shall have performed and complied in all material respects with all covenants and agreements required by this Agreement to be performed or complied with by Purchaser on or prior to the Closing Date.

(c) Triggering Event. Assuming for the purposes of this Section 8.03(c) that the Reinsurance Agreement is in full force and effect at all applicable times prior to the Closing, there shall not have been a Triggering Event (as defined in the Reinsurance Agreement) under the Reinsurance Agreement.

(d) Closing Deliverables. Purchaser shall have delivered or caused to be delivered to Seller each of the documents required to be delivered by Purchaser pursuant to Section 2.08(b).

ARTICLE IX.

TERMINATION PRIOR TO CLOSING

Section 9.01. Termination of Agreement. This Agreement may be terminated at any time prior to the Closing:

(a) by Seller or Purchaser in writing, if there shall be any order, injunction or decree of any Governmental Authority which prohibits or restrains the parties from consummating the transactions contemplated hereby, and such order, injunction or decree shall have become final and nonappealable; provided that prior to termination under this Section 9.01(a) , the party seeking to terminate this Agreement shall have used best efforts to have such order, injunction or decree vacated;

(b) by either Seller or Purchaser in writing, if the Closing has not occurred on or before February 1, 2018 (as it may be extended as contemplated below or by Section 11.14 , the " Outside Date"), unless the failure of the Closing to occur is the result of a breach of this Agreement by the party seeking to terminate this Agreement; provided that, if on the Outside Date the condition set forth in Section 8.01(a) has not been satisfied then, upon the written notice of Seller to Purchaser, the Outside Date shall be extended to a date and time that is not later than 5:00 p.m., New York City time, on March 31, 2018;

(c) by either Seller or Purchaser (but only so long as Seller or Purchaser, as applicable, is not in material breach of its obligations under this Agreement) in writing, if a material breach of any provision of this Agreement that has been committed by the other party would cause the failure of any mutual condition to Closing or any condition to Closing for the benefit of the non-breaching party and such breach is not subsequently waived by the non-breaching party or capable of being cured or is not cured within 20 Business Days after the breaching party receives written notice from the non-breaching party that the non-breaching party intends to terminate this Agreement pursuant to this Section 9.01(c);

(d) by Seller if, (i) except for the condition in Section 8.03(c) , all of the conditions set forth in Section 8.01 , Section 8.02 and Section 8.03 have been satisfied or waived (other than those conditions that by their terms are to be satisfied at the Closing, so long as such conditions are capable of being satisfied at the Closing) and (ii) the Closing has not occurred at the then most recent date on which it was otherwise required to occur pursuant to Section 2.06 because the condition set forth in Section 8.03(c) has not been satisfied; or

(e) at any time on or prior to the Closing Date, by mutual written consent of Seller and Purchaser.

Section 9.02. Termination Procedure. In the event of termination by Purchaser or Seller pursuant to Section 9.01 , written notice thereof shall forthwith be given to the other party and the transactions contemplated by this Agreement shall be terminated, without further action by any party. If the transactions contemplated by this Agreement are terminated as provided herein:

(a) Each party shall, and shall cause its Representatives to, return all documents and other material received from the other party and its Affiliates relating to the transactions contemplated hereby, whether so obtained before or after the execution hereof, to the other party; and

(b) all information received by Purchaser or any of its Representatives with respect to the Business shall be treated in accordance with the Confidentiality Agreement and Section 5.04.

Section 9.03. Survival. In the event of the termination of this Agreement as provided in Section 9.01 , this Agreement shall thereafter become null and void as to all parties, and no party hereto shall have any liability to any other party hereto or their respective Representatives, except as set forth in Section 5.04 , this Article IX and Article XI , which shall survive the termination hereof pursuant to this Article IX; provided , however , that nothing in this Agreement shall relieve any party hereto from liability for (x) any willful and material breach of this Agreement prior to such termination or (y) fraud in the event that such party is finally

determined by a court of competent jurisdiction to have willfully and knowingly committed a fraud, with specific intent to deceive and mislead any other party, regarding such party's representations, warranties, covenants or other agreements set forth in this Agreement; provided , further , that any claim for fraud may only be brought against the party that committed such fraud. For purposes hereof, "willful and material breach" means a material breach by a party of the applicable provision of this Agreement as a result of an action or failure to act by such Person that it actually knew would result in a breach of this Agreement.

ARTICLE X.

INDEMNIFICATION

Section 10.01. Survival.

(a) The representations and warranties of Seller and Purchaser contained in this Agreement shall survive the Closing solely for purposes of this Article X and shall terminate and expire on the date that is 18 months following the Closing Date; provided , that the Seller Specified Representations and the Purchaser Specified Representations and the representations and warranties of Seller set forth in Section 3.17 shall survive until the date that is 60 days following the expiration of the applicable statute of limitations and the representations and warranties of Seller set forth in Section 3.18(d) or Section 3.19 will terminate and be of no further force and effect from and after the Closing. Any claim for indemnification in respect of any representation or warranty that is not asserted by notice given as required herein prior to the expiration of the specified period of survival shall not be valid and any right to indemnification is hereby irrevocably waived after the expiration of such period of survival. Any claim properly made for an Indemnifiable Loss in respect of such a breach asserted within such period of survival as herein provided will be timely made for purposes hereof.

(b) To the extent that it is to be performed after the Closing, each covenant in this Agreement will, for purposes of this Article X , survive and remain in effect in accordance with its terms plus a period of six months thereafter, after which no claim for indemnification with respect thereto may be brought hereunder. All covenants in this Agreement that by their terms are required to be fully performed prior to the Closing will, for purposes of this Article X , survive and remain in effect until the date that is 18 months following the Closing Date, after which time no claim for indemnification with respect thereto may be brought hereunder; provided , however , that the covenants set forth in Section 5.11 will terminate and be of no further force and effect from and after the Closing.

Section 10.02. Indemnification.

(a) Seller shall indemnify, defend and hold harmless Purchaser, its Affiliates and their respective directors, officers and employees, successors and, in connection with a sale of all or substantially all of the group benefits business of Purchaser and its Affiliates, assignees (provided , that in the case of any such sale during the 18-month period after the Closing, Seller shall have provided its consent to such assignment) (collectively, the " Purchaser Indemnified Persons") from and against any and all Indemnifiable Losses asserted against, imposed upon or incurred or suffered by any Purchaser Indemnified Person resulting from or arising out of:

(i) any inaccuracy in or breach of any representation or warranty of Seller made in this Agreement;

(ii) any breach or non-fulfillment of any agreement or covenant of Seller under this Agreement; or

(iii) any Excluded Liabilities including Excluded Taxes.

(b) Purchaser shall indemnify, defend and hold harmless Seller, its Affiliates and their respective directors, officers and employees (collectively, the " Seller Indemnified Persons") from and against any and all Indemnifiable Losses asserted against, imposed upon or incurred or suffered by any Seller Indemnified Person resulting from or arising out of:

(i) any inaccuracy in or breach of any representation or warranty of Purchaser made in this Agreement;

(ii) any breach or non-fulfillment of any agreement or covenant of Purchaser under this Agreement;

(iii) any Assumed Liability; or

(iv) the operation of the Business from and after the Closing Date (except to the extent such Indemnifiable Loss is subject to indemnification by Seller of a Purchaser Indemnified Person pursuant to Section 10.02(a)).

(c) For purposes of determining whether any representation and warranty (other than the representations and warranties set forth in Section 3.06(a) and Section 3.22) has any inaccuracy or been breached and the amount of any Indemnifiable Losses under this Article X , each representation and warranty contained in this Agreement shall be read without regard to any materiality or Material Adverse Effect qualifier contained therein.

Section 10.03. Certain Limitations.

(a) Except with respect to Indemnifiable Losses resulting from Excluded Taxes or from any inaccuracy in or breach of a representation or warranty set forth in Section 3.17 , no party shall be obligated to indemnify and hold harmless its respective Indemnitees under Section 10.02(a)(i) (in the case of Seller, and other than with respect to an inaccuracy in or breach of any Seller Specified Representation) or Section 10.02(b)(i) (in the case of Purchaser, and other than with respect to an inaccuracy in or breach of any Purchaser Specified Representation) (i) with respect to any claim or series of claims arising out of substantially similar facts and circumstances, unless such claim or series of claims involves Indemnifiable Losses in excess of $100,000 (the " Threshold Amount") (nor shall any claim that does not exceed the Threshold Amount be applied to or considered for purposes of calculating the amount of Indemnifiable Losses for which the Indemnitor is responsible under clause (ii) below) and (ii) unless and until the aggregate amount of all Indemnifiable Losses of the Indemnitees under Section 10.02(a)(i) or such Section 10.02(b)(i) , as the case may be, exceeds $14,500,000 for all Indemnifiable Losses (the " Deductible"), at which point such Indemnitor shall be liable to its respective Indemnitees for the value of the Indemnitee's claims under Section 10.02(a)(i) (other than with respect to a

breach of any Seller Specified Representation) or Section 10.02(b)(i) (other than with respect to a breach of any Purchaser Specified Representation), as the case may be, that is in excess of the Deductible, subject to the limitations set forth in this Article X; provided , however , that any Indemnifiable Losses of the Purchaser Indemnified Persons resulting from or arising out of any inaccuracy in or breach of any representation or warranty set forth in Section 3.03 shall not be subject to the Deductible, and the Threshold Amount for such Indemnifiable Losses shall be $50,000; provided further that, for the avoidance of doubt, any such Indemnifiable Losses shall be subject to the Threshold Amount and the maximum aggregate liability set forth in the following sentence prior to the proviso set forth therein. The maximum aggregate liability of Seller, on the one hand, and Purchaser on the other hand, to their respective Indemnitees for any and all Indemnifiable Losses under Section 10.02(a)(i) , in the case of Seller (other than with respect to a breach of any Seller Specified Representation), or Sections 10.02(b)(i) , in the case of Purchaser (other than with respect to a breach of any Purchaser Specified Representation), shall be $174,000,000; provided , that the maximum aggregate liability of Seller to all Purchaser Indemnified Persons for any or all Indemnifiable Losses under this Agreement shall not exceed the Purchase Price. The limitations in this Section 10.03(a) shall not apply to claims made under Section 10.02(a)(iii) , Section 10.02(b)(iii) or Section 10.02(b)(iv).

(b) Each Indemnitee shall use commercially reasonable efforts to mitigate all Indemnifiable Losses for which indemnification may be sought hereunder; provided that the costs and expenses of such mitigation shall constitute Indemnifiable Losses hereunder.

(c) Notwithstanding anything to the contrary herein, any Indemnifiable Losses resulting from or arising out of any breach of any representation or warranty of Seller made in this Agreement in respect of Taxes, including under Section 3.17 , shall be limited to Taxes attributable to Pre-Closing Periods.

Section 10.04. Definitions. As used in this Agreement:

(i) "Indemnitee" means any Person entitled to indemnification under this Agreement;

(ii) "Indemnitor" means any Person required to provide indemnification under this Agreement;

(iii) "Indemnifiable Losses" means any and all damages, losses, Liabilities, obligations, costs and expenses (including reasonable attorneys' and other professional fees and expenses); provided , that any Indemnity Payment (x) shall in no event include any amounts constituting consequential or punitive damages, or any damages calculated based on a loss of future revenue, income or profits, relating to the breach or alleged breach of this Agreement; provided , however , that notwithstanding the foregoing or anything to the contrary contained in this Agreement, Indemnifiable Losses shall include recoveries for lost profits (including diminution in value used by a trier of fact in determining lost profits) if and only if (A) such damages for lost profits are recoverable under the laws of the State of New York; (B) the Indemnitee satisfies all elements necessary for proof of

such damages for lost profits under such laws; and (C) such lost profits can be demonstrated by reference to the Actuarial Report and, with respect to the reduction or elimination of any profits contemplated by the Actuarial Report, shall in no event exceed the present value ascribed to any such remaining profits contemplated by the Actuarial Report as of the date of the Indemnifiable Loss giving rise to the related claim, calculated based on the assumptions on which the Actuarial Report was prepared and discounted using a 9% discount rate; provided , further , that the Purchaser Indemnified Persons may recover lost profits only to the extent such lost profits are attributable to the Business; and (y) shall be net of any amounts actually recovered by the Indemnitee for the Indemnifiable Losses for which such Indemnity Payment is made under any insurance policy, reinsurance agreement, warranty or indemnity or otherwise from any Person other than a party hereto (net of any actual costs, expenses or increases in premiums incurred as a result of obtaining such proceeds), and the Indemnitee shall promptly reimburse the Indemnitor for any such amount that is received by it from any such other Person with respect to an Indemnifiable Losses after any indemnification with respect thereto has actually been paid pursuant to this Agreement;

(iv) "Indemnity Payment" means any amount of Indemnifiable Losses required to be paid pursuant to this Agreement; and

(v) "Third Party Claim" means any claim, action, suit, or proceeding made or brought by any Person that is not a party to this Agreement and not an Affiliate of such party to this Agreement.

Section 10.05. Procedures for Third Party Claims.

(a) If any Indemnitee receives notice of assertion or commencement of any Third Party Claim against such Indemnitee in respect of which an Indemnitor may be obligated to provide indemnification under this Agreement, the Indemnitee shall give such Indemnitor reasonably prompt written notice (but in no event later than 30 days after becoming aware of such Third Party Claim) thereof and such notice shall include a reasonable description of the claim based on the facts known at the time and any documents relating to the claim and an estimate of the Indemnifiable Loss and shall reference the specific sections of this Agreement that form the basis of such claim to the extent reasonably ascertainable; provided , that no delay on the part of the Indemnitee in notifying any Indemnitor shall relieve the Indemnitor from any obligation hereunder unless (and then solely to the extent that) the Indemnitor is actually prejudiced by such delay (except that the Indemnitor shall not be liable for any expenses incurred during the period in which the Indemnitee failed to give such notice). Thereafter, the Indemnitee shall deliver to the Indemnitor, within five Business Days after the Indemnitee's receipt thereof, copies of all notices and documents (including court papers) received by the Indemnitee relating to the Third Party Claim.

(b) The Indemnitor shall be entitled to participate in the defense of any Third Party Claim and, if it so chooses, to assume the defense thereof with counsel selected by the

Indemnitor. Should the Indemnitor so elect to assume the defense of a Third Party Claim, the Indemnitor shall not as long as it conducts such defense be liable to the Indemnitee for legal expenses incurred by the Indemnitee in connection with the defense thereof subsequent to the Indemnitor notifying the Indemnitee in writing of its election to assume such defense. If the Indemnitor assumes such defense, the Indemnitee shall have the right to participate in the defense thereof and to employ counsel, at its own expense, separate from the counsel employed by the Indemnitor, it being understood that the Indemnitor shall control such defense. The Indemnitor shall be liable for the reasonable fees and expenses of counsel employed by the Indemnitee (A) for any period during which the Indemnitor has not assumed the defense thereof (other than during any period in which the Indemnitee shall have not yet given notice of the Third Party Claim as provided above) or (B) if the Third Party Claim involves conflicts of interest for the Indemnitee and the Indemnitor (in the reasonable opinion of counsel to the Indemnitee) that would make representation by the same counsel inappropriate, in which event the Indemnitor shall be responsible for only one counsel for the Indemnitee. If the Indemnitor chooses to defend any Third Party Claim, the other party hereto shall cooperate in the defense thereof. Such cooperation shall include the retention and (upon the Indemnitor's request) the provision to the Indemnitor of records and information that are relevant to such Third Party Claim, and making employees available on a mutually convenient basis to provide additional information and explanation of any material provided hereunder; provided , in each case, that such other party shall not be obligated to provide such records, information or access to Indemnitor if doing so would violate Applicable Law or jeopardize the protection of an attorney-client privilege. Whether or not the Indemnitor shall have assumed the defense of a Third Party Claim, the Indemnitee shall not admit any liability with respect to, or pay, settle, compromise or discharge, such Third Party Claim without the Indemnitor's prior written consent (which consent shall not be unreasonably withheld, conditioned or delayed). If the Indemnitor has assumed the defense of a Third Party Claim, the Indemnitor may only pay, settle, compromise or discharge a Third Party Claim with the Indemnitee's prior written consent (which consent shall not be unreasonably withheld, conditioned or delayed); provided , that the Indemnitor may pay, settle, compromise or discharge such a Third Party Claim without the written consent of the Indemnitee if such settlement (i) includes a release of the Indemnitee from all Liability in respect of such Third Party Claim, (ii) does not subject the Indemnitee to any injunctive relief or other equitable remedy, (iii) does not include a statement or admission of fault, culpability or failure to act by or on behalf of the Indemnitee and (iv) does not impose any financial cost on the Indemnitee (other than by application of the limitations set forth in Section 10.03(a)). If the Indemnitor submits to the Indemnitee a bona fide settlement offer with respect to a Third Party Claim that has been accepted by all Persons bringing such Third Party Claim and otherwise satisfies the requirements set forth in the proviso of the immediately preceding sentence and the Indemnitee refuses to consent to such settlement, then thereafter the Indemnitor's liability to the Indemnitee with respect to such Third Party Claim shall not exceed the Indemnitor's portion of the settlement amount included in such settlement offer.

(c) Notwithstanding anything in this Agreement to the contrary, Seller shall have the sole right to represent the interests of the Business and settle all issues in its sole discretion, and to employ counsel of its choice at its expense, in any audit or other examination or administrative or court proceeding relating to Taxes for all taxable periods (or portions thereof) ending on or before the Closing Date; provided , that Seller shall not pay, discharge, settle, compromise, litigate or otherwise dispose of any item subject to such Tax proceedings in a manner that will

adversely affect Purchaser or any of its Affiliates without obtaining the prior written consent of Purchaser, which consent shall not be unreasonably withheld, conditioned or delayed. Notwithstanding the foregoing and subject to Seller's rights set forth in the immediately preceding sentence, Purchaser shall be entitled, at its expense, to participate in the conduct of any Tax audit and any judicial or administrative proceeding relating to any such Tax audit that may adversely affect Purchaser or any of its Affiliates.

Section 10.06. Direct Claims. The Indemnitor will have a period of 30 days within which to respond in writing to any claim by an Indemnitee on account of an Indemnifiable Loss that does not result from a Third Party Claim. If the Indemnitor does not so respond within such 30 day period, the Indemnitor will be deemed to have rejected such claim, in which event the Indemnitee will be entitled to pursue such remedies as may be available to the Indemnitee.

Section 10.07. Sole Remedy. The parties hereto acknowledge and agree that, except as (a) set forth in Section 11.14 , (b) as expressly contemplated by Section 2.09 , (c) for any remedy expressly contemplated by any other Transaction Agreement with respect to a claim made under such Transaction Agreement and (d) under the circumstances described in Section 9.03(y) , if the Closing occurs, their sole and exclusive remedy following the Closing with respect to any and all claims arising out of or related to the transactions contemplated by this Agreement shall be pursuant to the provisions set forth in this Article X.

Section 10.08. Certain Other Matters.

(a) Upon making any Indemnity Payment, Indemnitor will, to the extent of such Indemnity Payment, be subrogated to all rights of Indemnitee against any third Person (other than any Tax Authority) in respect of the Indemnifiable Loss to which the Indemnity Payment related. Without limiting the generality or effect of any other provision hereof, each such Indemnitee and Indemnitor will duly execute upon request all instruments reasonably necessary to evidence and perfect the above-described subrogation rights.

(b) The rights and remedies of any party in respect of any inaccuracy or breach of any representation, warranty, covenant or agreement shall in no way be limited by the fact that the act, omission, occurrence or other state of facts or circumstances upon which any claim of any such inaccuracy or breach is based may also be the subject matter of any other representation, warranty, covenant or agreement as to which there is no inaccuracy or breach. The representations, warranties and covenants of Seller set forth herein (as such representations and warranties are qualified in accordance with the introductory paragraph of Article III), and the Purchaser Indemnified Persons' rights to indemnification with respect thereto, shall not be affected or deemed waived by reason of (and the Purchaser Indemnified Persons shall be deemed to have relied upon such representations and warranties notwithstanding) (i) any investigation made by or on behalf of any of the Purchaser Indemnified Persons (including by any of its Representatives) or by reason of the fact that any of the Purchaser Indemnified Persons or any of such Representatives knew or should have known that any such representation or warranty is, was or might be inaccurate, regardless of whether such investigation was made or such knowledge was obtained before or after the execution and delivery of this Agreement or (ii) Purchaser's waiver of any condition set forth in Article VIII. The representations, warranties and covenants of Purchaser set forth herein (as such representations and warranties are qualified

in accordance with the introductory paragraph of Article IV), and the Seller Indemnified Persons' rights to indemnification with respect thereto, shall not be affected or deemed waived by reason of (and the Seller Indemnified Persons shall be deemed to have relied upon such representations and warranties notwithstanding) (i) any investigation made by or on behalf of any of the Seller Indemnified Persons (including by any of its Representatives) or by reason of the fact that any of the Seller Indemnified Persons or any of such Representatives knew or should have known that any such representation or warranty is, was or might be inaccurate, regardless of whether such investigation was made or such knowledge was obtained before or after the execution and delivery of this Agreement or (ii) Seller's waiver of any condition set forth in Article VIII.

ARTICLE XI.

GENERAL PROVISIONS

Section 11.01. Publicity. Except as may otherwise be required by Applicable Law, regulation or obligation pursuant to any listing agreement with any national securities exchange, no press release or public announcement, including any presentation to the investment community (other than pro forma financial statements and dilution or accretion analyses included in shareholder presentations), concerning this Agreement or the transactions contemplated hereby shall be made by Seller, on the one hand, or Purchaser, on the other hand, prior to the Closing Date without advance approval thereof by the other party, such approval not to be unreasonably withheld. The parties hereto shall cooperate with each other in making any press release or public announcement concerning the Business on or prior to the Closing Date.

Section 11.02. Expenses. Regardless of whether any or all of the transactions contemplated by this Agreement are consummated, and except as otherwise expressly provided herein or in any Transaction Agreement, Purchaser and its Affiliates, on the one hand, and Seller and its Affiliates, on the other hand, shall each bear their respective direct and indirect fees, costs and expenses incurred in connection with the negotiation and preparation of this Agreement, the Transaction Agreements and the consummation of the transactions contemplated hereby or thereby, including all fees and expenses of their respective Representatives.

Section 11.03. Notices. All notices, requests, consents, claims, demands and other communications under this Agreement and the other Transaction Agreements shall be in writing and shall be given or made (and shall be deemed to have been duly given or made upon receipt) by delivery in person, by overnight courier service, by electronic mail (followed by delivery of an original via overnight courier service) or by registered or certified mail (postage prepaid, return receipt requested) to the respective parties hereto at the following respective addresses (or at such other address for a party hereto as shall be specified in a notice given in accordance with this Section 11.03):

(a) If to Purchaser:

Hartford Life and Accident Insurance Company
c/o The Hartford Financial Services Group, Inc.

rabbassi@willkie.com

Any party may, by notice given in accordance with this Section 11.03 to the other parties, designate another address or person for receipt of notices hereunder, provided that notice of such a change shall be effective upon receipt.

Section 11.04. Entire Agreement. Except as otherwise expressly provided in the Transaction Agreements, this Agreement and the other Transaction Agreements constitute the entire agreement of the parties hereto with respect to the subject matter of the Transaction Agreements and supersede all prior agreements and undertakings, both written and oral, other than the Confidentiality Agreement to the extent not in conflict with this Agreement, between or on behalf of Seller and its Affiliates, on the one hand, and Purchaser and its Affiliates, on the other hand, with respect to the subject matter of the Transaction Agreements.

Section 11.05. Severability. If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced under any Applicable Law or as a matter of public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the transactions contemplated by this Agreement is not affected in any manner materially adverse to any party hereto. Upon such determination that any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties hereto as closely as possible in a mutually acceptable manner in order that the transactions contemplated by this Agreement be consummated as originally contemplated to the greatest extent possible. If any provision of this Agreement is determined by a court of competent jurisdiction to be so broad as to be unenforceable, that provision shall be interpreted to be only so broad as it is enforceable.

Section 11.06. Assignment. This Agreement may not be assigned, in whole or in part, by operation of law or otherwise without the prior written consent of the parties hereto. Any attempted assignment in violation of this Section 11.06 shall be void. This Agreement shall be binding upon, shall inure to the benefit of, and shall be enforceable by the parties hereto and their successors and permitted assigns.

Section 11.07. Waivers and Amendments. No provision of this Agreement or any other Transaction Agreements may be amended, supplemented or modified except by a written instrument signed by all of the parties thereto. No provision of this Agreement or any other Transaction Agreements may be waived except by a written instrument signed by the party against whom the waiver is to be effective.

Section 11.08. Disclosure Schedules. Matters reflected in any Section of this Agreement, including any section or subsection of the Seller Disclosure Schedule or Purchaser Disclosure Schedule, are not necessarily limited to matters required by this Agreement to be so reflected. Such additional matters are set forth for informational purposes and do not necessarily include other matters of a similar nature. No reference to or disclosure of any item or other matter in any Section or Schedule of this Agreement, including any section or subsection of the Seller Disclosure Schedule or Purchaser Disclosure Schedule, shall be construed as an admission or indication that such item or other matter is material or that such item or other matter is required to be referred to or disclosed in this Agreement, the Seller Disclosure Schedule or Purchaser Disclosure Schedule. Without limiting the foregoing, no such reference to or disclosure of a possible breach or violation of any contract, Applicable Law or Governmental Order shall be construed as an admission or indication that breach or violation exists or has actually occurred.

Section 11.09. Governing Law; Submission to Jurisdiction; Waiver of Jury Trial.

(a) THIS AGREEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF NEW YORK WITHOUT REGARD TO SUCH STATE'S PRINCIPLES OF CONFLICT OF LAW THAT COULD COMPEL THE APPLICATION OF THE LAWS OF ANOTHER JURISDICTION.

(b) Each party hereto irrevocably and unconditionally submits to the exclusive jurisdiction of any federal court located in New York County in the State of New York, over any

action, suit or proceeding arising out of or relating to this Agreement or the transactions contemplated hereby; provided , however , that, if said court determines that it does not have subject matter jurisdiction, then said action, suit or proceeding may be brought in the Supreme Court of the State of New York for New York County. Each party hereto agrees that service of any process, summons, notice or document by U.S. registered mail addressed to such party shall be effective service of process for any action, suit or proceeding brought against such party in any such court. Purchaser hereby designates the individual listed in Section 11.03(a) to whom notice may be given on behalf of Purchaser as its true and lawful agent upon whom may be served any lawful process in any action, suit or proceeding instituted by or on behalf of Seller. Seller hereby designates the individual listed in Section 11.03(b) to whom notice may be given on behalf of Seller as its true and lawful agent upon whom may be served any lawful process in any action, suit or proceeding instituted by or on behalf of Purchaser. In the event either party decides to change its designation of agent, it shall provide written notice to the other party. Each party hereto irrevocably and unconditionally waives any objection to the laying of venue of any such action, suit or proceeding brought in any such court and any claim that any such action, suit or proceeding brought in any such court has been brought in an inconvenient forum. Each party hereto agrees that any final, nonappealable judgment in any such action, suit or proceeding brought in any such court shall be conclusive and binding upon such party and may be enforced in any other courts to whose jurisdiction such party may be subject, by suit upon such judgment.

(c) EACH OF THE PARTIES HERETO HEREBY WAIVES TO THE FULLEST EXTENT PERMITTED BY LAW ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY WITH RESPECT TO ANY LITIGATION DIRECTLY OR INDIRECTLY ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED BY THIS AGREEMENT. EACH OF THE PARTIES HERETO HEREBY (A) CERTIFIES THAT NO REPRESENTATIVE, AGENT OR ATTORNEY OF THE OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF LITIGATION, SEEK TO ENFORCE THE FOREGOING WAIVER, AND (B) ACKNOWLEDGES THAT IT HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT AND THE TRANSACTIONS CONTEMPLATED BY THIS AGREEMENT, AS APPLICABLE, BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 11.09.

Section 11.10. Rules of Construction. Interpretation of this Agreement and the other Transaction Agreements (except as specifically provided in any such other Transaction Agreements, in which case such specified rules of construction shall govern with respect to such other Transaction Agreements) shall be governed by the following rules of construction: (a) words in the singular shall be held to include the plural and vice versa, and words of one gender shall be held to include the other gender as the context requires; (b) references to the terms Preamble, Recitals, Article, Section, paragraph, Schedule and Exhibit are references to the Preamble, Recitals, Articles, Sections, paragraphs, Schedules and Exhibits to this Agreement unless otherwise specified; (c) references to "$" mean, and all payments required to be made under this Agreement shall be required to be made in, U.S. dollars; (d) the word "including" and words of similar import means "including without limitation," unless otherwise specified; (e) the word "or" shall not be exclusive; (f) the words "herein," "hereof," "hereunder" or "hereby" and similar terms are to be deemed to refer to this Agreement as a whole and not to any specific Section; (g) the headings are for reference purposes only and shall not affect in any way the

meaning or interpretation of the Transaction Agreements; (h) the Transaction Agreements shall be construed without regard to any presumption or rule requiring construction or interpretation against the party drafting or causing any instrument to be drafted; (i) if a word or phrase is defined, the other grammatical forms of such word or phrase have a corresponding meaning; (j) references to any statute, listing rule, rule, standard, regulation or other law include a reference to the corresponding rules and regulations; (k) references to any section of any statute, listing rule, rule, standard, regulation or other law include any successor or amendment to such section; (l) references to any Person include such Person's predecessors or successors, whether by merger, consolidation, amalgamation, reorganization or otherwise; and (m) references to any contract (including this Agreement) or organizational document are to the contract or organizational document as amended, modified, supplemented or replaced from time to time, unless otherwise stated.

Section 11.11. Certain Limitations.

(a) Notwithstanding anything to the contrary contained in this Agreement, the other Transaction Agreements, the Seller Disclosure Schedule or any of the Schedules or Exhibits hereto or thereto, Purchaser acknowledges and agrees that neither Seller nor any of its Representative makes or has made, and Purchaser has not relied on, any inducement or promise to Purchaser except as specifically made in this Agreement or any representation or warranty to Purchaser, oral or written, express or implied, other than as expressly set forth in Article III. Without limiting the generality of the foregoing, other than as expressly set forth in Article III , no Person has made any representation or warranty to Purchaser with respect to the Business, the Transferred Assets (including the Assigned Contracts), the Assumed Liabilities or any other matter, including with respect to (i) merchantability, suitability or fitness for any particular purpose, (ii) the operation of the Business by Purchaser after the Closing, (iii) the probable success or profitability of the Business after the Closing or (iv) any information, documents or material made available to Purchaser or its Representatives in any "data rooms," information memoranda, management presentations, functional "break-out" discussions or in any other form or forum in connection with the transactions contemplated by this Agreement, including any estimation, valuation, appraisal, projection or forecast with respect to the Business. With respect to any such estimation, valuation, appraisal, projection or forecast (including the confidential information memoranda prepared by or on behalf of Seller in connection with the transactions contemplated by this Agreement or the any actuarial reports provided to Purchaser), Purchaser acknowledges that: (i) there are uncertainties inherent in attempting to make such estimations, valuations, appraisals, projections and forecasts; (ii) it is familiar with such uncertainties; (iii) it is not acting and has not acted in reliance on any such estimation valuation, appraisal, projection or forecast delivered by or on behalf of Seller to Purchaser; (iv) such estimations, valuations, appraisals, projections and forecasts are not and shall not be deemed to be representations or warranties of Seller or any of its Affiliates and (v) it shall have no claim against any Person with respect to any such valuation, appraisal, projection or forecast.

(b) Seller makes no express or implied representation or warranty hereby or otherwise under this Agreement: (i) as to the future experience, success or profitability of the Business, whether or not conducted in a manner similar to the manner in which the Business was conducted prior to the Closing; (ii) that the reserves held by or on behalf of the Business or the assets supporting such reserves have been or will be adequate or sufficient for the purposes for

which they were established; (iii) that the reinsurance recoverables taken into account in determining the amount of such reserves will be collectible or whether such reserves were calculated, established or determined in accordance with any actuarial, statutory or other standard; or (iv) concerning any financial statement "line item" or asset, liability or equity amount that would be affected by any of the foregoing.

(c) Purchaser further acknowledges and agrees that it: (i) has made its own inquiry and investigation into and, based thereon, has formed an independent judgment concerning the Business, the Transferred Assets (including the Assigned Contracts) and the Assumed Liabilities; (ii) has been provided adequate access to such information as it has deemed necessary to enable it to form such independent judgment; (iii) has had such time as it deems necessary and appropriate fully and completely to review and analyze such information, documents and other materials; and (iv) has been provided an opportunity to ask questions of Seller with respect to such information, documents and other materials and has received answers to such questions that it considers satisfactory. Purchaser further acknowledges and agrees that neither Seller nor any of its Affiliates has made any representations or warranties, express or implied, as to the accuracy or completeness of, and that Purchaser and its Affiliates have made their investment decision with respect to the acquisition of the Transferred Assets without reliance upon, such information, documents and other materials other than the representations and warranties expressly set forth in this Agreement.

Section 11.12. No Third Party Beneficiaries. Nothing in this Agreement is intended or shall be construed to give any Person (including the employees of Seller or Purchaser or any Affiliate of Seller or Purchaser), other than the parties hereto, their successors and permitted assigns, any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision contained herein.

Section 11.13. Execution in Counterparts. This Agreement may be executed by the parties hereto in separate counterparts, each of which when so executed and delivered shall be an original, but all such counterparts shall together constitute one and the same instrument. Delivery of an executed counterpart of a signature page to any Transaction Agreement by facsimile or other means of electronic transmission utilizing reasonable image scan technology shall be as effective as delivery of a manually executed counterpart of any such Agreement.

Section 11.14. Equitable Remedies. The parties hereto agree that irreparable damage would occur in the event that any of the provisions of this Agreement were not performed in accordance with their specific terms or were otherwise breached. It is accordingly agreed that, without the necessity of posting bond or other undertaking, the parties hereto shall be entitled to an injunction or injunctions to prevent breaches of this Agreement and to enforce specifically the terms and provisions of this Agreement in accordance with this Agreement, this being in addition (subject to the terms of this Agreement) to any other remedy to which such party is entitled at law or in equity. In the event that any Action is brought in equity to enforce the provisions of this Agreement, no party hereto shall allege, and each party hereto hereby waives any defense or counterclaim, that there is an adequate remedy at law. If, prior to the Outside Date, any party hereto brings any Action in accordance with this Section 11.14 to enforce specifically the performance of the terms and provisions hereof by the other party, the Outside Date shall be automatically extended (i) for the period during which such action is pending, plus 10 Business Days or (ii) by such other time period established by the court presiding over such action, as the case may be.

(The remainder of this page is intentionally left blank)

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first above written.

Exhibit 10.36

2018 Management Incentive Plan

I. Objectives and Summary

CVS Health Corporation's Management Incentive Plan (the "MIP") is designed to reward incentive-eligible employees ("Eligible Participants") of CVS Health Corporation and its subsidiaries (together, "the Company") for their role in driving performance and to encourage Eligible Participants' continued employment with the Company. Funding for the payment of incentive awards will be based on actual results measured against pre-established financial goals and/or operating goals. The amount of each incentive award paid will be based on the performance of the Company and the performance of the individual Eligible Participant.

The MIP shall be administered by the Management Planning and Development Committee (the "Committee") of the Board of Directors (the "Board") under the provisions herein and of the 2017 Incentive Compensation Plan or any successor plan (the "ICP"), and the Committee may delegate to officers of CVS Health the authority to perform administrative functions of the MIP as the Committee may determine and may appoint officers and others to assist it in administering the MIP.

II. Plan Year

The MIP is a calendar year plan, which runs from January 1 to December 31, 2018 ("Plan Year"). All dates in this document occur during the current Plan Year unless otherwise stated.

III. Eligibility

A. Eligibility for Participation

The Chief Executive Officer of CVS Health Corporation ("CEO") or the CEO's designee determines those employees who are eligible to participate in the MIP except as set forth in Section III.B, below. In general, Eligible Participants include exempt employees who are not covered by any other incentive plans and who are employed on or before November 1 of the Plan Year.

The CEO may, for any reason and in his or her sole discretion, at any time during the Plan Year, determine an employee's eligibility for participation in the MIP except as set forth in Section III.B. Eligible Participants are subject to the terms and conditions relating to incentive awards set forth in the MIP.

B. Section 16 Officers

The Committee shall determine the eligibility of Section 16 Officers of CVS Health, whom will also be included in the term "Eligible Participants" unless otherwise noted. The Committee shall retain sole discretion to determine Section 16 Officer eligibility for an award, the target award, and the amount of the actual award.

C. Newly-Eligible Employees

The award, if any, to an Eligible Participant who became an Eligible Participant after the beginning of the Plan Year may be prorated based on the date of eligibility.

D. Position Change

An employee who becomes an Eligible Participant on or before November 1 of the Plan Year as a result of a position change may be eligible for a prorated incentive award. If a position change results in an employee becoming an Eligible Participant for part of the Plan Year and other incentives during other parts of the Plan Year, the employee may be eligible to receive a prorated award for the amount of time in each incentive eligible position, subject to the terms of each applicable incentive plan. A position change from one MIP-eligible

position to another MIP-eligible position during the Plan Year also may result in a prorata award as described below under Section V. (B).

E. Demotions

If a previously Eligible Participant is demoted to a non-incentive eligible position due to his or her violation of CVS Health policy or his or her performance, or if he or she voluntarily transfers to a non-incentive eligible position during the Plan Year, and is in the non-incentive eligible position on the last day of the Plan Year, he or she will not be eligible to earn an incentive award for the Plan Year under the MIP.

F. Terminations

Unless otherwise stated in Section VII of the MIP, if an Eligible Participant's employment terminates prior to March 1 following a Plan Year, he or she will not be eligible to receive an incentive award under the MIP for the most recently completed Plan Year.

G. Rehires

Employees who are rehired as Eligible Participants on or before November 1 of the Plan Year may be eligible for a prorated incentive award. For purposes of proration, credit will only be given for time worked during the Plan Year in incentive-eligible positions.

IV. MIP Funding

A. Consolidated Company Funding

MIP funding is based on consolidated Company performance, measured by Operating Profit, and modified by performance measurements set forth in Exhibit A, for a given Plan Year. Achievement of the Company's Operating Profit target and MIP modifiers will determine the total funding (the "Total Pool") as described below.

1. Operating Profit

Operating Profit may be adjusted by the financial adjustments as approved by the Committee prior to the end of the first fiscal quarter of the Plan Year (the "Financial Adjustments").

If Operating Profit is below the minimum performance threshhold, no formulaic funding will be made available for incentive awards, regardless of MIP modifier metrics performance, and there shall be no incentive awards paid under the MIP.

B. Total Pool Funding

After the minimum threshold for Operating Profit has been achieved, performance of MIP modifiers against target will be calculated for the Plan Year. The Total Pool for all business units will be fully based (100%) on consolidated Company performance.

The CEO (or, as to Section 16 Eligible Participants, the Committee) may, for any reason and in his or her (or Its) sole discretion, adjust the funding of the Total Pool based on (a) input from senior Company executives regarding their assessment of the overall performance of the Company; and (b) assessment of the achievement of Plan Year performance goals. In no case, however, can the CEO or the Committee increase Total Pool funding due solely to the results of the MIP modifiers.

C. Individual Performance

The Total Pool will be available for award to Eligible Participants under the MIP, taking into account the individual contribution of each Eligible Participant. The amount, if any, of the incentive award for an Eligible Participant shall be detemined in the sole discretion of the Company, which shall be final, binding and conclusive as to all parties having an interest therein. The amount, if any, of the incentive award for a Section 16 Eligible Participant shall be determined in the sole discretion of the Committee, which shall be final, binding and conclusive as to all parties having an interest therein.

V. Earnings, Proration, and Payout

A. Timing

Incentive awards will be paid to Eligible Participants, as soon as administratively feasible following the date the Total Pool is determined and approved, but no later than March 15 of the calendar year immediately following the Plan Year. Incentive payments under the MIP may be subject to garnishments and other state or federal requirements.

B. Calculations

Calculations for full and partial awards for each Eligible Participant will be based on "Eligible Earnings" (defined below) for the Plan Year while in a MIP-eligible position. Eligible Earnings will be multiplied by the individual target opportunity of the Eligible Participant. If the Eligible Participant has been employed in multiple MIP-eligible positions during the Plan Year, then the individual opportunity will be prorated based on the number of days worked in each position.

Eligible Earnings include reoccurring items such as pay earned for hours worked, paid time off (e.g. vacation, sick, holiday, funeral, jury duty, military) but will exclude one-time payments such as annual cash incentives, commissions and similar payments, and earnings associated with equity releases and stock option exercises.

For purposes of proration under the MIP and except as otherwise provided in Section VII of the MIP, calculations will be based on the number of days that the employee was an Eligible Participant in the MIP during the Plan Year.

C. Award Opportunity

Individual target awards will be determined by position and may vary based on the Eligible Participant's level in the organization.

D. Obligation to Pay Out Percentage of Total Pool

Eligible Participants, as a group, have a right to receive an amount at least equal to the Total Pool, but no individual Eligible Participant shall be entitled to receive an award or any specific amount of the Total Pool. In no event will the aggregate of the total awards paid from the MIP be less than 92.5% of the Total Pool. To discourage unmerited litigation, any party or class asserting a challenge or claim against the Company under any provision of the MIP, including this Section V, shall bear their own costs relating to such challenge or claim, and if the challenge or claim is unsuccessful, such party or class shall reimburse the Company for all reasonable costs incurred by the Company in responding to such challenge or claim.

VI. MIP Dispute Resolution

Any questions by an Eligible Participant regarding an incentive award granted under the MIP shall first be submitted by the Eligible Participant to his or her Human Resources Business Partner ("HRBP") within 7 days of distribution of such incentive award, and the HRBP shall submit any correction that the HRBP deems appropriate to the Compensation Department by the first business day of April immediately following the distribution date.

In the event of a dispute regarding an incentive award under the MIP after the Eligible Participant has submitted his or her question to the HRBP and received a response, as provided above, the Eligible Participant may submit an appeal for resolution of such dispute to CVS Health's Advice and Counsel in writing within 30 days of the distribution of the incentive award. Failure to follow these procedures or submit a question or dispute in a timely manner may result in a waiver of the Eligible Participant's right to dispute the MIP provision or amount of the incentive award.

VII. Eligible Participant Status

A. Performance

The CEO or other designated executives have full discretion in determining the amount, if any, of an incentive awarded to an Eligible Participant, and the Participant's individual performance throughout the Plan Year will be considered by the Company in the final determination of the Eligible Participant's incentive award.

B. Leaves of Absence

An Eligible Participant on a Company-approved leave of absence at any time during the Plan Year who remains employed in an eligible position as of the last day of the Plan Year will earn a prorated incentive award based on the number of days actively worked (including time compensated as vacation, myTime or Paid Time Off ("PTO")) during the Plan Year, provided he or she meets all other eligibility criteria for an incentive award.

C. Reduction in Force, Retirement and Death

1. Reduction in Force

If an Eligible Participant is separated from employment by the Company during the Plan Year due to a reduction in force, he or she may be eligible, at the Company's discretion, to receive a prorated incentive award based on the calculation methodology described in Section V.(B) above, provided the Eligible Participant meets all other eligibility criteria for an incentive award.

2. Retirement

If an Eligible Participant is at least age 55 and has a minimum of 10 years of service with CVS Health or a predecessor company/subsidiary or is at least age 60 and has a minimum of 5 years of service with CVS Health or a predecessor company/subsidiary and the Eligible Participant retires during the Plan Year, he/she may be eligible to receive a prorated incentive award based on the calculation methodology described in Section V.(B) above, provided he/she meets all other eligibility criteria for an incentive award. Eligible Participants who do not meet the minimum retirement requirements under Section VII at the time of retirement will not be eligible for an incentive award for the Plan Year.

3. Death

In case of the death of an Eligible Participant, a prorated incentive award may be paid to the Eligible Participant's spouse, if living; otherwise, in equal shares to surviving children of the Eligible Participant. If there are no surviving children, the benefit shall be paid to the Eligible Participant's estate. The incentive award will be prorated based on the calculation methodology described in Section V.(B) above. The incentive award shall be paid as soon as administratively practicable, following the death of the Eligible Participant but no later than March 15 of the calendar year immediately following the Plan Year.

VIII. Miscellaneous

A. No Promise of Continued Employment

The MIP does not create an express or implied contract of employment between CVS Heath or and an Eligible Participant. Both CVS Health and the Eligible Participant retain the right to terminate the employment relationship at will, at any time and for any reason.

B. Rights are Non-Assignable

Neither the Eligible Participant, nor any beneficiary, nor any other person shall have any right to assign, in whole or in part, the right to receive payments under the MIP. Payments are non-assignable and non-transferable, whether voluntarily or involuntarily.

C. Compliance with Applicable Law

An Eligible Participant must comply with all applicable state and federal laws and CVS Health policies to be eligible to receive an incentive award under the MIP.

CVS Health will comply with all applicable laws concerning incentive awards; the MIP and its administration are not intended to conflict with any applicable state or federal law.

D. Change in Control

In the event of a change in control of CVS Health, as defined in the ICP, the MIP shall remain in force. Any amendments, modifications, termination or dissolution of the MIP by the acquiring entity may only occur prospectively and will not affect incentive targets or awards or eligibility in place immediately before the date of the change in control or such later date as it may be modified or dissolved by the acquiring entity.

Provisions regarding the payment of annual incentive awards that are set forth in change in control agreements with Eligible Employees shall supersede those appearing in the MIP.

E. Withholding

All required deductions will be withheld from the incentive awards prior to distribution. This includes all applicable federal, state, or local taxes, as well as any eligible 401(k) deductions and deferred compensation contributions, as defined by the applicable plans. Incentive awards that are deferred will be taxed according to applicable federal and state tax law. Each Eligible Participant shall be solely responsible for any tax consequences of his or her award hereunder.

F. MIP Amendment/Modification/Termination

CVS Health retains the right to amend, modify, or terminate the MIP at any time on or before the last day of the Plan Year for any reason, with or without notice to Eligible Participants.

G. MIP Interpretation

CVS Health retains sole, full and final authority to prescribe rules and regulations for the administration of the Plan, construe and interpret the Plan and Award agreements and correct defects, supply omissions or reconcile inconsistencies therein and to make all other decisions and determinations as it may deem necessary or advisable for the administration of the Plan.

Capitalized terms not otherwise defined herein shall have the meaning assigned to such defined term(s) in the ICP. In the event of any conflict between the ICP and the MIP, the terms of the ICP shall govern.

H. Recoupment of Incentive Awards

Each incentive award under the MIP shall be subject to the terms of the Company's Recoupment Policy as it exists from time to time, which may require the Eligible Employee to immediately repay to the Company the value of any pre-tax economic benefit that he or she may derive from the MIP.

I. Section 409A of the Internal Revenue Code

The Company intends that the MIP not violate any applicable provision of, or result in any additional tax or penalty under, Section 409A of the Code, as amended, and the regulations and guidance thereunder (collectively, "Section 409A"), and that to the extent any provisions of the Plan do not comply with Section 409A the Company will make such changes as it deems reasonable in order to comply with Section 409A. Payments hereunder are intended to qualify as short-term deferral payments under Section 409A. In all events, the provisions of CVS Health Corporation's Universal 409A Definition Document are hereby incorporated by reference, and notwithstanding the any other provision of the Plan or any Award to the contrary, to the extent required to avoid a violation of the applicable rules under Section 409A by reason of Section 409A(a)(2)(B)(i) of the Code (requiring certain delays for "specified employees"), payment of any amounts subject to Section 409A shall be delayed until the first business day of the seventh (7th) month following the date of termination of employment. For purposes of any provision of the Plan providing for the payment of any amounts or

benefits in connection with a termination of employment, references to an Eligible Person's "termination of employment" (and corollary terms) shall be construed to refer to the Eligible Person's "separation from service" with the Company as determined under Section 409A.

J. Restrictive Covenant Agreement

Any award pursuant to the MIP is expressly subject to and contingent upon the requirement that the Eligible Participant shall have fully executed and delivered to the Company a restrictive covenant agreement deemed appropriate by the Company; the Company may waive such requirement in its sole discretion. Any applicable agreement containing the restrictive covenants the Company requires in connection with this award is referred to herein as the "Restrictive Covenant Agreement".

If the Company requires an Eligible Participant to execute and deliver the Restrictive Covenant Agreement in connection with any MIP award, the Company shall provide such Restrictive Covenant Agreement to the Eligible Participant. The Eligible Participant must execute and deliver such agreement by the deadline set forth by the Company. The failure of an Eligible Participant to execute and return the Restrictive Covenant Agreement by the deadline set forth by the Company, if required, shall result in the immediate and irrevocable forfeiture of any MIP award.

This Section VIII (J) of the MIP shall not constitute the Company's exclusive remedy for Eligible Participant's violation of the Restrictive Covenant Agreement. The Company reserves all rights to seek all available legal or equitable remedies in the event of Eligible Participant's violation or threatened violation of the Restrictive Covenant Agreement, including injunctive relief.

Exhibit 10.37

CVS HEALTH SEVERANCE PLAN FOR NON-STORE EMPLOYEES (Amended as of November 28, 2018)

CVS HEALTH SEVERANCE PLAN

FOR NON-STORE EMPLOYEES

(Amended as of November 28, 2018)

WHEREAS, CVS Health Corporation (the "Company") has established the CVS Health Severance Plan for Non-Store Employees (the "Plan") to provide financial assistance to employees in non- store positions who are involuntarily terminated and are eligible within the terms and conditions of the Plan;

WHEREAS, it is intended that the Plan constitute an employee welfare benefit plan within the scope of Section 3(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), that the Plan constitute a separation pay plan within the scope of Department of Labor ("DOL") Regulation Section 2510.3-2(b), and that all payments made under the Plan be deductible by the Company under Section 162(a) of the Internal Revenue Code of 1986, as amended (the "Code");

WHEREAS, the benefits provided under the Plan are intended to constitute separation pay within the meaning of Treasury Regulation Section 1.409A-1(b)(9)(iii);

WHEREAS, this document is the official plan document; and

WHEREAS, the Company wishes to make certain amendments to the Plan, effective as of November 28, 2018 (the "Effective Date");

NOW, THEREFORE, as of the Effective Date, the Company does hereby amend the Plan to provide as follows:

ARTICLE 1

DEFINITIONS

For purposes of the Plan, the following terms, when used with an initial capital letter, shall have the meaning set forth below unless a different meaning is plainly required by the context.

1.1 " Affiliate " shall mean (a) any corporation which is required to be aggregated with the Company under Code Section 414(b), (c), (m), or (o) and (b) any other entity in which the Company has an ownership interest and which the Company designates as an Affiliate for purposes of the Plan.

1.2 " Cause " shall refer to a termination of an Eligible Employee's employment because of the Eligible Employee's (a) poor performance; (b) acts of unethical business activity, including but not limited to fraud, misappropriation, embezzlement, dishonesty, harassment, discrimination in violation of Employer policies, or willful or negligent destruction of property of an Employer or an Affiliate; (c) misconduct that is reasonably likely to cause material damage (monetary or otherwise) to the Employer, an Affiliate, or any personnel thereof; (d) conviction of or a plea of guilty or nolo contendere to any felony, whether or not any right to appeal has been or may be exercised; (e) negligence of duty; (f) insubordination; or (g) a violation of the Employer's policy, procedure, or practice.

1.3 " Code " shall mean the Internal Revenue Code of 1986, as amended.

1.4 " Eligible Employee " shall mean an individual who is employed by the Employer on a regular basis in a non-store position and has been employed by the Employer in any position for a minimum of twelve (12) months prior to the individual's separation of employment. For purposes of the Plan, distribution warehouse employees, field managers and employees employed by CVS ProCare, Inc. working at Company headquarters, shall be treated as working in a non-store location and therefore not subject to exclusion from eligibility. For purposes of the Plan, individuals in the following categories will not be considered Eligible Employees:

(a) individuals who are covered by a collective bargaining agreement, provided welfare benefits were the subject of good faith bargaining, unless the terms of the collective bargaining agreement provide for participation in the Plan;

(b) individuals who are seasonal employees, leased employees, independent contractors, temporary employees, or consultants;

(c) individuals who work for the Employer or an Affiliate in a store location of the Company or an Affiliate, or whose compensation is paid through or according to a store payroll, including but not limited to: pharmacists, store managers, assistant store managers, crew, and pharmacy staff;

(d) individuals employed by MinuteClinic, L.L.C. or by any practitioner-owned entity managed by MinuteClinic, L.L.C.;

(e) the President and CEO of CVS Health Corporation;

(f) individuals employed in Puerto Rico; and

(g) individuals employed outside the United States of America.

The decision of whether an individual falls into one of these categories and whether an individual is employed by an Employer on a regular basis in a non-store position for a minimum of 12 months shall be made by the Employer in its sole discretion. Any individual who is excluded from being considered an Eligible Employee under the Plan shall be excluded from the Plan regardless of the individual's reclassification by a government agency, including a reclassification by the Internal Revenue Service for tax withholding purposes.

1.5 " Employer " shall mean CVS Pharmacy, Inc. and Caremark Rx, L.L.C. and any current or future Affiliate thereof that does not maintain its own severance plan for employees of that Affiliate.

1.6 " ERISA " shall mean the Employee Retirement Income Security Act of 1974, as amended.

1.7 " Exempt Employee " shall mean an Eligible Employee who is paid on a salaried basis for payroll purposes and classified in the sole discretion of the Employer under its normal classification procedures as an exempt employee under the Fair Labor Standards Act.

1.8 " Involuntary Termination " shall mean an Eligible Employee's termination of employment with the Employer due to the unilateral action of the Employer, including but not limited to a termination as a result of the elimination of an Eligible Employee's position due to a reorganization or changes in responsibilities, a reduction in force, or a closing of the business unit in which the Eligible Employee works; provided, however, that such Involuntary Termination constitutes a separation from service under Treasury Regulation Section 1.409A-1(h). Notwithstanding the foregoing, an Eligible Employee will not have an Involuntary Termination if the Eligible Employee: (a) is terminated for Cause, as determined by the Employer in its sole discretion; (b) voluntarily terminates employment or resigns prior to an Involuntary Termination; (c) takes a leave of absence; (d) is administratively terminated for failure to return from a leave of absence upon expiration of his or her leave; (e) terminates employment due to his or her death; (f) transfers to an Affiliate; (g) transfers to a new employer in connection with the sale of an Employer facility; or (h) fails to accept an offer for a job with the Employer that is comparable to the job that he or she is performing for the Employer at the time of the offer. For purposes of Subsection (h) of this Section 1.8, whether a job is considered "comparable" shall be determined in the sole discretion of the Employer, taking into account whether the new job is located 50 or fewer miles from the Eligible Employee's job at the time of the offer, whether the compensation offered is materially less than the Eligible Employee's compensation at the time of the offer, and whether the new job will result in a substantial change of duties from the Eligible Employee's job at the time of the offer. The determination of whether an Eligible Employee's termination of employment is an Involuntary Termination shall be made in the sole discretion of the Employer. If an Employer deems an Eligible Employee's termination of employment to be an Involuntary Termination and, Employer later learns of facts and circumstances that, had

the Employer known such facts and circumstances at the time of termination, would have resulted in a termination of employment for Cause, the Eligible Employee's termination shall be deemed as of the date of termination to not have been an Involuntary Termination.

1.9 " Non-exempt Employee " shall mean an Eligible Employee who is paid on an hourly basis for time worked and classified in the sole discretion of the Employer under its normal classification procedures as a non-exempt employee under the Fair Labor Standards Act.

1.10 " Plan Administrator " shall mean the Senior Vice President of Human Resources of CVS Pharmacy, Inc., or such other person designated to act as the Plan Administrator.

1.11 " Rehire Date " shall mean the date an Eligible Employee accepts reemployment with any Employer.

1.12 " Severance Pay " shall mean the pay an Eligible Employee is eligible to receive under Subsection (b) of Section 2.1 of the Plan upon his or her Involuntary Termination.

1.13 " Severance Period " shall mean the period of time during which an Eligible Employee is eligible to receive Severance Pay.

1.14 " Transaction-Related Termination " shall mean an Involuntary Termination, of an Eligible Employee in a Corporate/Shared Services function, that is deemed by the Plan Administrator, in his or her sole discretion, after consultation with the Employer, to have resulted from the Company's acquisition of Aetna, Inc., at any time during the period beginning with the date the acquisition closes and ending on the second anniversary of such closing date. For this purpose, a Corporate/Shared Services function shall exclude all functions in MinuteClinic, MinuteClinic IT, Omnicare, Specialty/Coram, Retail Merchandising, Retail & Pharmacy Growth, Retail Supply Chain, Retail Pharmacy Operations, Retail Stores & Field and in any other business unit that may be determined by the Plan Administrator from time to time, regardless of which Employer employs the Eligible Employee.

1.15 " Weekly Rate " shall mean, (a) with respect to an Eligible Employee paid on a salaried basis, an Eligible Employee's annual base salary (as determined by the Employer), as of the date of the Eligible Employee's Involuntary Termination, expressed on a weekly basis (as determined in the sole discretion of the Employer), and (b) with respect to an Eligible Employee paid on an hourly basis, the hourly wage rate of the Eligible Employee as of the date of the Eligible Employee's Involuntary Termination multiplied by the Eligible Employee's regularly scheduled number of hours of service per week (as determined by the Employer), not in excess of 40 hours. Weekly Rate shall exclude any overtime, incentive, and bonus payments, unless otherwise required by law.

1.16 " Year of Service " shall mean each full year of service performed by the Eligible Employee for an Employer as reflected in the records of the Employer and as determined as of the Eligible Employee's date of termination of employment, based on the Employer's policies and procedures for determining periods of service, and the applicable law.

ARTICLE 2
SEVERANCE PAY AND ELIGIBLE EMPLOYEE BENEFITS

2.1 (a) Eligibility . Upon his or her Involuntary Termination, an Eligible Employee may, in the discretion of the Plan Administrator, be granted Severance Pay and benefits provided under Subsections (b), (c), and (d) of this Section 2.1, provided the conditions of Section 2.2 are satisfied. The determination of whether Severance Pay is payable under the Plan, and the form and amount of such pay, shall be made in the sole discretion of the Plan Administrator.

(b) Severance Pay . The Severance Pay payable to an Eligible Employee in the event of Involuntary Termination shall be determined by the Plan Administrator in its sole discretion, using the following guidelines

for the applicable Eligible Employee classification:

(i) For Eligible Employees who are Non-exempt Employees:

(A) the Eligible Employee's Weekly Rate multiplied by two (2), plus

(B) an amount equal to the Eligible Employee's Weekly Rate multiplied by the number of Years of Service completed by the Eligible Employee multiplied by two (2),

provided Severance Pay for Non-exempt employees should not exceed the Eligible Employee's Weekly Rate multiplied by thirteen (13);

(ii) For Eligible Exempt Employees in grades 105-108, 201-203, 301, 302, 405-408:

(A) the Eligible Employee's Weekly Rate multiplied by four (4), plus,

(B) an amount equal to the Eligible Employee's Weekly Rate multiplied by the number of Years of Service completed by the Eligible Employee multiplied by two (2),

provided Severance Pay for Exempt Employees should not exceed the Eligible Employee's Weekly Rate multiplied by twenty (20);

(iii) For Eligible Exempt Employees in grades 109-111, 204, 205, 303, 304, 409-411, the greater of

(A) the Eligible Employee's Weekly Rate multiplied by thirteen (13) or,

(B) the amount determined under the formula set forth in the immediately preceding Paragraph (ii), provided Severance Pay should not exceed the Eligible Employee's Weekly Rate multiplied by twenty (20);

(iv) For Eligible Exempt Employees in grades 112, 206, 305, 412, the Eligible Employee's Weekly Rate multiplied by twenty-six (26);

(v) For Eligible Exempt Employees in grades 36A-Z, the Eligible Employee's Weekly Rate multiplied by fifty-two (52); and

(vi) For Eligible Exempt Employees in grades 38A-Z and 39 A-Z, the Eligible Employee's Weekly Rate multiplied by fifty-two (52).

Notwithstanding the above guidelines, in the event of a Transaction-Related Termination of an Eligible Employee, Severance Pay shall be determined by the Plan Administrator in its sole discretion, using the following guidelines for the applicable Employee classification:

(1) For Eligible Employees who are Non-exempt Employees:

(A) the Eligible Employee's Weekly Rate multiplied by two (2), plus

(B) an amount equal to the Eligible Employee's Weekly Rate multiplied by the

number of Years of Service completed by the Eligible Employee multiplied by two (2),

provided Severance Pay for Non-exempt employees should not exceed the Eligible Employee's Weekly Rate multiplied by thirty-one (31);

(2) For Eligible Exempt Employees in grades 105-108, 201-203, 301, 302, 405-408:

(A) the Eligible Employee's Weekly Rate multiplied by four (4), plus

(B) an amount equal to the Eligible Employee's Weekly Rate multiplied by the number of Years of Service completed by the Eligible Employee multiplied by two (2),

provided Severance Pay for Exempt Employees should not exceed the Eligible Employee's Weekly Rate multiplied by thirty-one (31);

(3) For Eligible Exempt Employees in grades 109-111, 204, 205, 303, 304, 409-411, the greater of (A) the Eligible Employee's Weekly Rate multiplied by thirteen (13) or, (B) the amount determined under the formula set forth in the immediately preceding Paragraph (2), provided Severance Pay should not exceed the Eligible Employee's Weekly Rate multiplied by forty-four (44);

(4) For Eligible Exempt Employees in grades 112, 206, 305, 412:

(A) the Eligible Employee's Weekly Rate multiplied by twenty-six (26), plus

(B) an amount equal to the Eligible Employee's Weekly Rate multiplied by the number of Years of Service completed by the Eligible Employee multiplied by two (2),

provided Severance Pay for Exempt Employees should not exceed the Eligible Employee's Weekly Rate multiplied by ninety-six (96);

(5) For Eligible Exempt Employees in grades 36A-Z, who have completed at least five (5) Years of Service:

(A) the Eligible Employee's Weekly Rate multiplied by fifty-two (52), plus

(B) an amount equal to the Eligible Employee's Weekly Rate multiplied by the number of Years of Service completed in excess of four (4) Years of Service by the Eligible Employee multiplied by two (2),

provided Severance Pay for Exempt Employees should not exceed the Eligible Employee's Weekly Rate multiplied by ninety-six (96); and

(6) For Eligible Exempt Employees in grades 38A-Z and 39 A-Z:

(A) the Eligible Employee's Weekly Rate multiplied by seventy-eight (78), plus

(B) provided the Eligible Exempt Employee has completed at least five (5) Years of Service, an amount equal to the Eligible Employee's Weekly Rate multiplied by the number of Years of Service completed in excess of four (4) Years of Service by the Eligible Employee multiplied by two (2),

provided Severance Pay for Exempt Employees should not exceed the Eligible Employee's Weekly Rate multiplied by ninety-six (96).

Notwithstanding the above guidelines, the Plan Administrator may increase or decrease (including, to zero) the amount of Severance Pay with respect to any Eligible Employee for reasons it deems appropriate in its sole discretion (including, but not limited to, an increase to provide consideration for Eligible Employees who have outstanding employment agreements with an Employer or a decrease to take into account any debts owed to an Employer), at any time, whether before or after payments of Severance Pay have commenced.

(c) COBRA Assistance . In the event an Eligible Employee who has an Involuntary Termination (i) is eligible to elect continuation coverage under the Consolidated Omnibus Budget Reconciliation Act of 1985 as amended ("COBRA") in accordance with the terms of the medical and prescription drug plan and/or dental plan of the Employer and (ii) properly and timely elects such continuation coverage, the Employer may pay for a portion of the cost of COBRA coverage equivalent to the contribution which the Employer makes on behalf of similarly situated active employees under such plan for the appropriate tier of coverage selected and in place immediately prior to the date of the Eligible Employee's Involuntary Termination (*e.g.* , employee-only, family coverage), for a period determined in the sole discretion of the Plan Administrator, which generally shall be the Severance Period but in any event no longer than eighteen (18) months from the date of the Involuntary Termination. Any COBRA assistance provided under this Subsection (c) shall be paid by the Employer directly to the insurance carrier, if applicable. The portion of the COBRA premium not covered by the COBRA assistance specified in this Subsection (c) must be paid by the Eligible Employee directly to the insurance carrier or service provider that administers COBRA, as applicable, based on the standard rules under the respective plan for payment of COBRA premiums. This Subsection (c) does not provide COBRA assistance in the event the Eligible Employee fails to properly and timely elect COBRA continuation coverage, regardless of whether his or her covered dependents elect COBRA continuation coverage.

(d) Outplacement Services . Upon an Involuntary Termination, the outplacement services provided to an Eligible Employee shall be provided in the sole discretion of the Plan Administrator based on the guidelines contained in this Subsection (d).

(i) If an Eligible Employee so desires, he or she may be eligible for outplacement services for assistance in obtaining new employment, provided through a vendor selected by the Employer, with the Employer directly providing payment to such vendor. The provision of outplacement services is contingent upon the Eligible Employee's cooperation with the outplacement service vendor, upon the active efforts of the Eligible Employee to locate a new position, and upon the Eligible Employee initiating outplacement services during the Severance Period.

(ii) Subject to the requirements of Paragraph (i) of this Subsection (d), outplacement services shall be offered for a period of time determined in the sole discretion of the Plan Administrator, based on guidelines that include:

(A) a virtual or group training session for Eligible Non-exempt Employees and Exempt Employees in grades 105-108, 201-203, 301, 302, 405-408;

(B) three (3) months of outplacement services for Eligible Exempt Employees in grades 109-112, 204-206, 303-305, 409-412; and

(C) six (6) months of outplacement services for Eligible Exempt Employees in grades 36A-Z, 38A-Z, and 39 A-Z;

provided, in no event shall such services extend beyond twelve (12) months following the Involuntary Termination of the Eligible Employee.

(e) Form and Timing of Payment . In the event an Eligible Employee is awarded Severance Pay

under the terms of Subsection (a) of this Section 2.1, such Severance Pay shall be paid following an Eligible Employee's Involuntary Termination (except as provided in Section 2.3, below), as follows: No Severance Pay shall commence (with respect to salary continuation payments) or be paid (with respect to a lump sum) (i) prior to the expiration of the later of a period that is identified in a separate agreement with the Eligible Employee during which he or she may consider the execution of the release of claims form (the "Consideration Period") or a period ending at least seven (7) days following the execution of the release of claims form (the "Revocation Period"), or (ii) later than sixty (60) days following the date of Eligible Employee's Involuntary Termination. Severance Pay that is paid in the form of salary continuation shall commence as soon as feasible following expiration of the later of the Consideration Period or the Revocation Period, which generally shall be the first regularly scheduled payroll date following the expiration of the Consideration Period or the Revocation Period, as the case may be, and shall thereafter be paid in substantially equal installments in accordance with the Employer's regular payroll practice, except as provided in Section 2.3 of the Plan. Further, in the Plan Administrator's sole discretion, Severance Pay may be paid to any Eligible Employees in a single lump sum, in which event Severance Pay shall be paid within the period that satisfies the 409A requirements for short-term deferrals under Section 409A of the Code.

(f) Withholding . Any payment of Severance Pay to an Eligible Employee shall be subject to normal withholding for state and federal income taxes and Social Security taxes.

(g) Death . Upon the death of the Eligible Employee who had an Involuntary Termination and who has not received all Severance Pay payable under the Plan, the Severance Pay otherwise payable under Section 2.1(b) of the Plan shall be paid in the form of a lump sum to the Eligible Employee's estate or beneficiary as soon as practicable, but in no event later than 60 days following death. Any other severance benefits provided under this Section 2.1 (COBRA assistance and outplacement services) shall cease upon the Eligible Employee's death.

2.2 Conditions on Payment of Severance Pay and Benefits . Payment of the Severance Pay and benefits provided in Section 2.1 of the Plan shall be subject to and conditioned upon the following:

(a) to the extent an Eligible Employee receives notice of a date selected by the Employer (in its sole discretion) on which the Eligible Employee's Involuntary Termination shall occur (a "Designated Termination Date"), the Eligible Employee must continue to work in a satisfactory manner until his or her Designated Termination Date;

(b) the Eligible Employee must cooperate in transitioning all of the Eligible Employee's work in consultation with the Eligible Employee's supervisor or other designated employee;

(c) the Eligible Employee must execute and deliver a release of claims form (in the form specified by the Employer from time to time which may include restrictive covenants and, if applicable, a waiver as described in Subsection (d) of this Section 2.2) within the time period specified under the terms of the applicable severance offer. Further, in no event will Severance Pay be paid with respect to an Eligible Employee in the event the release of claims form is revoked during the Revocation Period (described in Section 2.1(e) of the Plan); and

(d) the Eligible Employee must waive the right to receive any other severance payment relating to salary continuation or salary replacement the Eligible Employee may otherwise be eligible to receive upon termination of employment under any employment agreement, severance plan, practice, policy or program of the Employer or an Affiliate.

2.3 Maximum Severance Pay . Notwithstanding any other provisions to the contrary, benefits paid hereunder (a) shall not exceed two times the lesser of (i) the Eligible Employee's Compensation (as defined in this Section 2.3) during the calendar year immediately preceding the Eligible Employee's Involuntary Termination

or (ii) the maximum amount that may be taken into account under a qualified plan pursuant to Section 401(a)(17) of the Code for the calendar year in which the Eligible Employee's Involuntary Termination occurs and (b) shall be paid in full within twenty-four (24) months after the date the Eligible Employee's Involuntary Termination occurs. In the event that any Severance Pay payable to an Eligible Employee would exceed the twenty-four (24) month period provided in the foregoing sentence if the Severance Pay continued to be paid in accordance with the Employer's regular payroll practice, any Severance Pay that would otherwise exceed the twenty-four (24) month time period will be paid to the Eligible Employee in a lump sum on the last regular payroll date within the twenty-four (24) month period. For purposes of this Section 2.3, "Compensation" shall mean the Eligible Employee's total annualized compensation, based upon the annual rate of pay for services provided to the Employer for the calendar year preceding the calendar year in which the Eligible Employee's Involuntary Termination occurs, adjusted for any increase in such preceding calendar year that was expected to continue indefinitely if the Eligible Employee had not had an Involuntary Termination.

2.4 Cessation of Severance Pay Upon Reemployment . If an Eligible Employee who had an Involuntary Termination and who is receiving Severance Pay thereafter accepts reemployment with any Employer during the Severance Period, such Employee's Severance Pay shall cease on the Rehire Date and any remaining Severance Pay shall be forfeited.

2.5 Cessation of Severance Pay After Commencement of Payments . If an Eligible Employee is deemed to have an Involuntary Termination and begins to receive Severance Pay under the Plan and the Employer or the Plan Administrator becomes aware of facts and circumstances that, had the Employer known same at the time of the Eligible Employee's termination of employment, would have affected the Employer's determination as to whether such Employee's termination was an Involuntary Termination, the Plan Administrator may suspend any future Severance Pay payments to the Eligible Employee while the Employer investigates the facts and circumstances and finalizes such investigation, and, if the Employer determines that the Eligible Employee should have been terminated for Cause, such Eligible Employee's Severance Pay shall cease as of the suspension date, any remaining Severance Pay shall be forfeited and any Severance Pay that has been paid shall be subject to repayment by the Eligible Employee.

2.6 Impact of Debt on Severance Pay . In the event an Eligible Employee is indebted to the Company or Employer (determined in the sole discretion of the Company or Employer, as applicable), the Plan Administrator reserves the right to reduce, offset, withhold, and/or forfeit the Severance Pay otherwise payable under the Plan.

2.7 Employee Benefits . As of the date of an Eligible Employee's Involuntary Termination, the Eligible Employee's active participation in any benefit plan, program, or policy sponsored or subsidized by the Employer shall cease, unless otherwise continued pursuant to the terms of such plan, program or policy.

2.8 Awards . Any award or grant made to the Eligible Employee under any stock option, stock purchase, or stock appreciation rights plan of the Company or Employer shall be administered and interpreted in accordance with the terms of the applicable plan documents.

2.9 Paid Time Off . Any pay for accrued paid time off shall be determined under the terms of the Employer's applicable policies.

2.10 Benefits Not Vested . No one under any circumstance is automatically entitled to Severance Pay and benefits described in Section 2.1 of the Plan. Notwithstanding anything in the Plan to the contrary, the Plan Administrator reserves the right, at its sole discretion, to increase, decrease, or eliminate Severance Pay and benefits under the Plan.

2.11 Bonuses . Whether any bonuses are payable to an Eligible Employee shall be determined based on the terms of any applicable bonus program, plan, or policy.

ARTICLE 3
ADMINISTRATION OF THE PLAN

3.1 Control and Administration . Notwithstanding any other provision in the Plan, and to the full extent permitted under ERISA and the Internal Revenue Code, the Plan Administrator shall have the exclusive right, power and final authority, in its sole and absolute discretion, to administer, apply, construe and interpret the terms of the Plan and all related plan documents and all facts surrounding claims for benefits under the Plan and shall determine all questions arising in the administration, interpretation and application of the Plan, including, but not limited to, those concerning eligibility for benefits. Accordingly, benefits under the Plan shall be paid only if the Plan Administrator decides in its discretion that an Eligible Employee is entitled to benefits, and the Plan Administrator shall decide all questions regarding the form, amount and duration of benefits. The Plan Administrator may consult with attorneys, consultants and other persons for advice, counsel and reports to make determinations under the Plan, and the Plan Administrator may delegate its administrative duties and responsibilities to persons or entities of its choice, in all cases who may be employees of the Company. All determinations of the Plan Administrator shall be conclusive and binding on all parties. The Plan Administrator shall be the named fiduciary of the Plan for purposes of ERISA.

3.2 Claim Procedures .

(a) Procedure for Granting or Denying Claims . An Eligible Employee, or his or her duly authorized representative, may file a claim for payment of benefits under the Plan within 30 days after termination of employment. Such a claim must be made in writing and be delivered to the Plan Administrator, in person or by mail, postage paid. Within 90 days after receipt of such claim, the Plan Administrator shall notify the claimant of the granting or denying, in whole or in part, of such claim, unless special circumstances require an extension of time for processing the claim. In no event may the extension exceed 90 days from the end of the initial 90-day period. If such extension is necessary, the claimant will be given a written notice to this effect prior to the expiration of the initial 90-day period. The Plan Administrator shall have full discretion to deny or grant a claim in whole or in part.

(b) Requirement for Notice of Claim Denial . The Plan Administrator shall provide to every claimant who is denied a claim for benefits a written or electronic notice setting forth in a manner calculated to be understood by the claimant:

(i) The specific reason or reasons for the denial;

(ii) Specific reference to pertinent Plan provisions on which the denial is based;

(iii) A description of any additional material or information necessary for the claimant to perfect the claim and an explanation of why such material is necessary; and

(iv) An explanation of the Plan's claim review procedures and the time limits applicable to such procedures, including a statement of the claimant's right to bring a civil action under Section 502(a) of ERISA following an adverse determination on review.

(c) Right to Appeal on Claim Denial . Within 60 days after receipt by the claimant of written or electronic notification of the denial (in whole or in part) of his or her claim, the claimant or his or her duly authorized representative may make a written application to the Plan Administrator, in person or by certified mail, postage prepaid, to be afforded a full and fair review of such denial. The claimant or his or her duly authorized representative may submit written comments, documents, records, and other information relating to the claim for benefits. Moreover, the claimant or his or her duly authorized representative shall be provided, upon request and free of charge, reasonable access to, and copies of, all documents, records, and other information relevant to the claimant's claim for benefits.

(d) Disposition of Disputed Claims . Upon receipt of a request for review, the Plan Administrator shall make a decision on the claim. The review shall take into account all comments, documents, records, and other information submitted by the claimant relating to the claim, without regard to whether such information was submitted or considered in the initial benefit determination. The decision on review shall be made not later than 60 days after the Plan Administrator's receipt of a request for a review, unless special circumstances require an extension of time for processing, in which case a decision shall be rendered not later than 120 days after receipt of the request for review. If an extension is necessary, the claimant shall be given written notice of the extension prior to the expiration of the initial 60-day period.

The Plan Administrator shall provide the claimant or his or her duly authorized representative with written or electronic notification of the Plan's determination on review. In the case of an adverse determination, the notification shall set forth, in a manner calculated to be understood by the claimant, the specific reason or reasons for the decision as well as specific references to the Plan provisions on which the decision was based. The decision shall also include a statement that the claimant is entitled to receive, upon request and free of charge, reasonable access to, and copies of, all documents, records, and other information relevant to the claimant's claim for benefits. Moreover, the decision shall contain a statement of the claimant's right to bring an action under Section 502(a) of ERISA.

3.3 Conditions to Legal Action. No legal action may be commenced or maintained against the Plan, the Company or any Employer prior to the claimant's exhaustion of the claims procedures set forth in Section 3.2 of the Plan. In addition, no legal action may be commenced against the Plan more than ninety (90) days after the Plan Administrator's final claim determination on review pursuant to Section 3.2(d) of the Plan. Any legal action must be conducted in the United States District Court for Rhode Island.

3.4 Named Fiduciary . The Plan Administrator of the Plan shall be the Named Fiduciary of the Plan for purposes of ERISA Section 402(a)(1).

ARTICLE 4
MISCELLANEOUS

4.1 Amendment or Termination . The Plan may be amended, terminated, withdrawn or suspended at any time in writing by the Management Planning and Development Committee of the Company or any individual designated by such Committee to take such actions.

4.2 Choice of Law . The validity, interpretation, construction and performance of the obligations created under the Plan shall be governed by ERISA, and to the extent not preempted by federal law, the laws of the State of Rhode Island without regard to its conflicts of law principles.

4.3 Validity . The invalidity or unenforceability of any provision of the Plan shall not affect the validity or enforceability of any other provision of the Plan, which shall remain in full force and effect.

4.4 Plan Exclusive Source of Rights . The Plan contains all of the terms and conditions with respect to the benefits provided hereunder, and no Eligible Employee or former Eligible Employee may rely on any other communication or representation, whether oral or written, of the Employer or any of its subsidiaries, or any officer or Eligible Employee thereof, as creating any right or obligation not expressly provided by the Plan.

4.5 Nonassignability . No benefit which shall be payable under the Plan to any Eligible Employee shall be subject in any manner to anticipation, alienation, sale, transfer, assignment, pledge, encumbrance, or charge (except as required by law), and any attempt to anticipate, alienate, sell, transfer, assign, pledge, encumber, or charge a benefit shall be null and void. No benefit shall in any manner be liable for, or subject to, the debts, contracts, liabilities, engagements, or torts of any Eligible Employee. No benefit shall be subject to legal attachment or legal process for, or against, the Eligible Employee and the same shall not be recognized under the Plan. Notwithstanding

the preceding sentence, the Employer retains the discretion, in accordance with federal and/or state laws, to reduce the amount of benefits payable under the Plan to any Eligible Employee to recover any amounts that the Eligible Employee owes to the Employer.

4.6 No Employment Rights . The Plan shall not give any Eligible Employee any right or claim except to the extent that the right is specifically provided under the terms of the Plan. The establishment of the Plan shall not be construed (a) to give any Eligible Employee a right to continue in the employ of the Employer or (b) to interfere with the right of the Employer to terminate the employment of any Eligible Employee at any time.

4.7 Headings. Article and section headings are for convenience only and the language of the Plan itself will be controlling.

4.8 Gender and Numbers . Masculine pronouns include the feminine as well as the neuter genders, and the singular shall include the plural, unless indicated otherwise by the context.

4.9 Code Section 409A . The benefits provided under the terms of the Plan are intended to fall within the short-term deferral exception, the separation pay exception or another exception to the application of Section 409A of the Code and the applicable guidance issued thereunder. In furtherance of this intent, the Plan shall be interpreted, operated and administered in a manner consistent with this intention. To the extent the benefits provided under the Plan become subject to Code Section 409A and applicable guidance issued thereunder, the Plan shall be construed, and benefits paid hereunder, as necessary to comply with Section 409A of the Code and such guidance. Further, to the extent that an Eligible Employee becomes entitled to receive Severance Pay under the terms of the Plan, and, at the time of the Eligible Employee's Involuntary Termination, he or she is a "specified employee" within the meaning of Treasury Regulation Section 1.409A- 1(i), any portion of Severance Pay payable to such Eligible Employee that is subject to Code Section 409A and applicable guidance thereunder shall be delayed until the date that is the earlier of (i) the Eligible Employee's death or (ii) six months following the date of the Eligible Employee's Involuntary Termination, at which time the payments that were delayed for such six month period shall be paid in a lump sum on the date of the next occurring regular payroll date of the Employer, and any remaining payments shall be paid according to the original schedule provided herein. In addition, each payment of a salary continuation stream of installment payments hereunder shall be a separate payment for purposes of Section 409A of the Code.

4.10 Funding . The Plan is not funded, and Severance Pay and benefits under the Plan are paid from the general assets of the Employer.

4.11 Plan Year. The Plan's records shall be maintained on the basis of the calendar year.

IN WITNESS WHEREOF, the Management Planning and Development Committee of the Company, or its duly authorized delegate, has amended the Plan as of the Effective Date pursuant to the execution hereof on its behalf by a duly authorized officer on .

CVS HEALTH CORPORATION

By: /s/ Lisa G. Bisaccia
Title: Executive Vice President and Chief Human Resources Officer, CVS Pharmacy, Inc.

Exhibit 10.38

CVS Health Corporation
Performance-Based Restricted Stock Unit Program

I. Objectives and Summary

The objective of the CVS Health Corporation (the "Company") Performance-Based Restricted Stock Unit Plan ("PBRS Plan") is to reward eligible participants for their role in achieving the Company's Earnings before Interest and Taxes ("EBIT") target and to encourage continued employment with the Company and its subsidiaries. PBRS Awards are generally delivered as restricted stock units ("RSUs") and are based on actual results measured against pre-established targets.

II. Administration

The PBRS Plan shall be administered by the Management Planning and Development Committee (the "Committee") of the Board of Directors, or its designee, under the provisions of the 2017 Incentive Compensation Plan or any successor plan (the "ICP"). The Committee shall have full and final authority, in each case, subject to and consistent with the provisions of the ICP and the PBRS Plan, to construe and interpret rules and regulations for the administration of the PBRS Plan, correct defects, supply omissions or reconcile inconsistencies therein, and to make all other decisions and determinations as the Committee may deem necessary or advisable for the administration of the PBRS Plan. Capitalized terms not otherwise defined herein shall have the meaning assigned to such terms in the ICP. In the event of a conflict between the ICP and the PBRS Plan, the provisions of the ICP shall control.

III. PBRS Plan Year

The "PBRS Plan Year" commences on January 1 and ends on December 31 of each year, unless otherwise approved by the Committee. All dates in this document occur during the current PBRS Plan Year unless otherwise stated.

IV. Eligibility

A. Eligible Employees

The Chief Executive Officer (the "CEO") or the CEO's designee determines those employees of the Company and its subsidiaries who are eligible to participate in the PBRS Plan ("Eligible Employees"). In general, Eligible Employees are those employees who are (i) officers of CVS Pharmacy, Inc. who are Vice Presidents or above, and (ii) senior officers of other subsidiaries who have been designated as Eligible Employees by the CEO or his or her designee. Generally, Business Planning Committee ("BPC") members are not eligible to participate, unless otherwise named as an Eligible Employee by the Committee.

B. Newly-Hired Eligible Employees

A newly-hired employee satisfying the requirements set forth in Paragraph IV.A is an Eligible Employee and may receive a PBRS Award for the PBRS Plan Year in which he or she is hired provided he or she is hired on or before November 1 and remains in an Eligible Employee position through December 31 of the PBRS Plan Year.

C. Participants

Unless the Committee is required to make such determinations under applicable law or the ICP, the CEO or the CEO's designee shall determine which Eligible Employees will receive an award under the PBRS Plan (a "PBRS Award"). All such determinations, whether by the CEO, the CEO's designee, or the Committee, with respect to a PBRS ("Plan Year") shall be made no later than the last business day of February immediately

following the PBRS Plan Year (the "PBRS Award Date"). Each Eligible Employee who receives a PBRS Award is a "Participant". No Eligible Employee has any right to receive a PBRS Award, regardless of whether such Eligible Employee is employed on the last day of the PBRS Plan Year, and the determination of whether an Eligible Employee will be a Participant shall be made in the sole discretion of the CEO, the CEO's designee or the Committee, as the case may be.

D. Status Changes

(i) **Promotions** . An employee who is promoted on or before November 1 of the PBRS Plan Year to a position satisfying the requirements set forth on Paragraph IV.A is an Eligible Employee and may receive a PBRS Award for the year in which the promotion occurs.

(ii) **Demotions:** An Eligible Employee who is demoted after November 1 of the PBRS Plan Year to a position not satisfying the requirements set forth on Paragraph IV.A will remain an Eligible Employee and may receive a PBRS Award provided such demotion is not the result of voluntarily transfer to a lower level position, is not related to unsatisfactory performance, and is not as a result of a violation of a Company policy or Code of Ethics.

(iii) **Termination of Employment**

a) **In General.** Except as provided in sub-paragraph (b) below, if for any reason the employment of an Eligible Employee with the Company and any subsidiary of the Company terminates during a PBRS Plan Year, the Eligible Employee will not receive a PBRS Award for that PBRS Plan Year.

b) **Death or Disability** . If an Eligible Employee dies or commences a long-term disability (as defined in the either Company's long-term disability plan or by the Social Security Administrator, as determined by the "Committee") during a PBRS Plan Year, the Eligible Employee may receive a PBRS Award at the same time PBRS Awards are made to other Participants. Such PBRS Award will be pro-rated for the number of full months (a partial month will be counted as a full month) during which the Eligible Employee was an active employee based on a full calendar year and will (unless otherwise determined by the CEO or the Committee) be paid in cash based on the Eligible Earnings of the Eligible Employee as of the time of death or commencement of long-term disability. PBRS Awards with respect to deceased Eligible Employees shall be paid to the Eligible Employee's Beneficiary.

The decision to pay a pro rata or full award to an Eligible Employee who terminates employment with the Company and its subsidiaries prior to the PBRS Award Date for any reason other than death or long-term disability, as defined above in this section, will be at the sole discretion of the CEO or the Committee (as the case may be).

V. PBRS Funding

A. Consolidated Company Funding

PBRS funding is based on consolidated Company performance, measured by Earnings before Interest and Taxes (EBIT), and modified by customer service and client satisfaction measurements. Achievement of the Company's EBIT target and modifiers will determine the total funding (the "Total Pool").

EBIT may be adjusted by the financial adjustments as approved by the Committee prior to the end of the first fiscal quarter of the Plan Year (the "Financial Adjustments"). If EBIT is below the minimum performance threshold, no formulaic funding will be made available for awards, regardless of PBRS modifier metrics performance, and there shall be no awards paid under the PBRS.

B. Total Pool Funding

After the minimum threshold for EBIT has been achieved, performance of PBRS modifiers to target will be calculated for the Plan Year. The Total Pool for all business units will be fully based (100%) on consolidated Company performance.

The CEO may, for any reason and in his or her sole discretion, adjust the funding of the Total Pool based on (a) input from senior Company executives regarding their assessment of the overall performance of the Company; and (b) assessment of the achievement of Plan Year performance goals. In no case, however, can the CEO or the Committee increase Total Pool funding due to the results of the PBRS modifiers.

C. Individual Performance

The Total Pool will be available for award to Eligible Employee's under the PBRS, taking into account the individual contribution of each Eligible Employee. The award, if any, for an Eligible Employee shall be determined in the sole discretion of the Company, which shall be final, binding and conclusive as to all parties having an interest therein.

VI. Plan Payout

A. Target PBRS Award

The target PBRS award for each Employee is 25% of "Eligible Earnings" (defined below) while in a PBRS Eligible position for the PBRS Plan Year. Eligible Earnings will be multiplied by the 25% target opportunity of the Eligible Participant.

Eligible Earnings include reoccurring items such as pay earned for hours worked, paid time off (e.g. vacation, sick, holiday, funeral, jury duty, military) but will exclude one-time payments such as annual cash incentives, commissions and similar payments, and earnings associated with equity releases and stock option exercises.

B. PBRS Award Determination and Vesting

After the achievement of at least threshold for Operating Profit has been confirmed, performance of modifiers compared to target for the Plan Year will be calculated. The Total Pool for all business units will be fully based (100%) on consolidated Company performance.

The approved PBRS Award is generally payable in RSUs. The number of RSUs that the Participant will receive is equal to the PBRS Award divided by the closing price of Company common stock on the PBRS Award Date.

C. Vesting

The RSUs issued in respect of any PBRS Award will vest in accordance with and subject to the terms and conditions of the ICP and the applicable agreement for each PBRS Award. PBRS Awards unvested as of a Participant's termination of employment shall be governed by the terms and conditions of the applicable agreement for each PBRS Award and the PBRS Plan in effect at the time of grant of each award.

VII. Plan Administration

A. Employment Rights

The PBRS Plan does not create any express or implied contract of employment between the Company and an Eligible Employee or any other person. Both the Company and an Eligible Employee (whether or not a Participant) retain the right to terminate the employment relationship at any time and for any reason.

B. Rights are Non-Assignable

Neither a Participant nor any beneficiary nor any other person shall have any right to assign the right to receive payments hereunder, in whole or in part, which payments are non-assignable and non-transferable, whether voluntarily or involuntarily.

C. Change in Control

In the event of a Change in Control, the PBRS Plan shall remain in full force and effect. Any modifications to or dissolution of the PBRS Plan by the acquiring entity may only occur prospectively and will not affect entitlements, awards or eligibility before the date of the Change in Control.

D. Plan Amendment/Modification/Termination

The Company retains the right to amend, modify, or terminate the PBRS Plan for any reason and at any time on or before December 31 of the PBRS Plan Year, with or without notice to Eligible Employees or any other person. No representative of the Company or its subsidiaries has the authority to modify the terms of that PBRS Plan without written consent of the Chief Human Resources Officer or his or her designee.

E. Withholding

The Company may provide for the withholding from any benefits payable under the PBRS Plan all federal, state, city or other taxes as shall be required pursuant to any law or governmental regulation or ruling.

F. Section 409A of the Code

The Company intends that the PBRS Plan not violate any applicable provision of, or result in any additional tax or penalty under, Section 409A of the Internal Revenue Code of 1986 (the "Code"), as amended, and the regulations and guidance thereunder (collectively, "Section 409A") and that to the extent any provisions of the PBRS Plan do not comply with Section 409A the Company will make such changes as it deems reasonable in order to comply with Section 409A. In all events, the provisions of CVS Health Corporation's Universal 409A Definitions Document are hereby incorporated by reference and, notwithstanding any other provision of the Plan or any Award to the contrary, to the extent required to avoid a violation of the applicable rules under Section 409A by reason of Section 409A(a)(2)(B)(i) of the Code, payment of any amounts subject to Section 409A shall be delayed until the first business day of the seventh month immediately following the date of termination of employment. For purposes of any provision of the PBRS Plan providing for the payment of any amounts or benefits in connection with a termination of employment, references to an Eligible Employee's "termination of employment" (and corollary terms) shall be construed to refer to the Eligible Employee's "separation from service" with the Company as determined under Section 409A.

G. Request for Plan Interpretation

Any dispute or request for interpretation of any provision in the PBRS Plan must be submitted to the appropriate Human Resources Business Partner by the Eligible Employee or his or her manager in writing.

H. Compliance with Applicable Regulations

In order to be eligible to receive a PBRS Award under the PBRS Plan, a Participant must comply with all applicable state and federal regulations and Company policies.

I. Governing Law

The validity, construction and effect of the PBRS Plan, and any rules and regulations under the Plan shall be determined in accordance with Delaware law, without giving effect to principles of conflicts of laws, and applicable federal law.

J. Recoupment

Except as may be specifically provided in the PBRS Award, each PBRS Award under the PBRS Plan shall be subject to the terms of the Company's Recoupment Policy as it exists from time to time, which may require the Participant to immediately repay to the Company the value of any pre-tax economic benefit that he or she may derive under the PBRS Plan.

Exhibit 10.39

CVS HEALTH CORPORATION
NONQUALIFIED STOCK OPTION AGREEMENT

GRANT DATE: [_____]

1. **GRANT OF AWARD** . Pursuant and subject to the provisions of the 2017 Incentive Compensation Plan of CVS Health Corporation (the " **ICP** "), on the date set forth above (the " **Grant Date** "), CVS Health Corporation (the " **Company"**) has granted and hereby evidences the Grant to the person named below (the " **Participant** "), subject to the terms and conditions set forth or incorporated in this Nonqualified Stock Option Agreement (" **Agreement** "), the right, and option, to purchase from the Company the aggregate number of shares of Common Stock ($.01 par value) of the Company (" **Shares** ") set forth below, at the purchase price indicated below (the " **Option** "), such Option to be exercised as hereinafter provided. The ICP is hereby made a part hereof and Participant agrees to be bound by all the provisions of the ICP. Capitalized terms not otherwise defined herein shall have the meaning assigned to such term(s) in the ICP. The Option is a nonqualified option as defined in the ICP.

Participant:	**[_____]**
Employee ID:	**[_____]**
Shares:	**[_____]**
Option Price:	**[_____]**

2. **TERM OF OPTION** **.** The term of this Option shall be for a period of seven (7) years from the Grant Date, subject to the earlier termination of the Option, as set forth in the ICP and in this Agreement. No portion of the Option shall be exercisable after the term of the Option.

3. **EXERCISE OF OPTION** **.** (a) The Option, subject to the provisions of the ICP, shall be exercised by submitting a request to exercise to the Company's stock option administrator, in accordance with the Company's current exercise policies and procedures, specifying the number of Shares to be purchased, which number may not be less than one hundred (100) Shares (unless the number of Shares purchased is the total balance which is then exercisable). An exercise by Participant of all or part of this Option shall be effected through the Company's "cashless exercise" procedures. Otherwise, at the time of exercise, Participant shall tender to the Company cash or cash equivalent for the aggregate option price of the Shares Participant has elected to purchase or certificates for Shares of Common Stock of the Company owned by Participant for at least six (6) months with a fair market value at least equal to the aggregate option price of the Shares Participant has elected to purchase, or a combination of the foregoing.

(b) Prior to its expiration or termination and except as otherwise provided herein, the Option will become vested in accordance with the vesting schedule set forth below, each date on which vesting occurs a " **Vesting Date** ", and any vested Option will be exercisable by Participant prior to the expiration of its term so long as Participant has maintained continuous employment with the Company or a subsidiary of the Company from the Grant Date through the exercise date:

(i) 25% of the Option shall vest on the 1st anniversary of the Grant Date.
(ii) 25% of the Option shall vest on the 2nd anniversary of the Grant Date.
(iii) 25% of the Option shall vest on the 3rd anniversary of the Grant Date.
(iv) 25% of the Option shall vest on the 4th anniversary of the Grant Date.

4. **TAXES .** Upon a cashless exercise of the Option the Company shall withhold from the proceeds of the exercise of the Option any required taxes. If the Option is exercised other than through a cashless exercise Company shall have the right to require Participant to pay the amount of any withholding taxes immediately, upon notification from the Company, before the proceeds from the exercise of the Option are delivered to Participant. Furthermore, the Company may elect to deduct such taxes from any other amounts then payable to Participant in cash or in Shares or from any other amounts payable any time thereafter to Participant to the extent allowed under applicable law.

5. **NON-TRANSFERABILITY .** The Option shall not be transferable by Participant other than by will or by the laws of descent and distribution, and during Participant's lifetime shall be exercised only by the Participant during the continuance of Participant's employment with the Company and any of its subsidiaries.

6. **FORFEITURE OF OPTION UPON TERMINATION OF EMPLOYMENT** . Unless otherwise provided for in the ICP or in this Agreement, as of the date on which Participant's employment with the Company and its subsidiaries terminates, the Option, to the extent unexercised as of the employment termination date, shall be forfeited immediately in its entirety, provided that, if the Participant's employment with the Company and its subsidiaries terminates without Cause, the Option, to the extent vested and unexercised, shall be exercisable at any time on or before the ninetieth (90 th) day immediately following the employment termination date and, to the extent unvested, shall be forfeited immediately.

7. **TERMINATION OF PARTICIPANT'S EMPLOYMENT WITHOUT CAUSE.** In the event that Participant's employment with the Company and its subsidiaries is terminated without Cause and Participant receives severance pay following Participant's employment pursuant to a written agreement, vesting of the Option shall continue through the end of the severance period set forth in the agreement providing for such severance pay. To the extent vested, the Option shall be exercisable at any time during the severance period and on or before the ninetieth (90th) day following the last day of the severance period, as long as no government regulations or rules are violated by such continued vesting or exercise period; provided, however, that in no event will the Option be exercisable beyond its original term. Any portion of the Option not vested as of the last day of the severance period shall be forfeited as of the last day of the severance period. In the event that Participant returns to employment with the Company or any subsidiary prior to the expiration of the severance period, Participant shall be treated as if his or her employment with the Company or any subsidiary of the Company had continued through the severance period for purposes of determining eligibility for continued vesting.

8. **RETIREMENT OF PARTICIPANT .** In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of a Qualified Retirement, Participant (a) shall continue to vest in the Option, to the extent unvested as of the retirement date, for a period of three (3) years following Participant's retirement date and (b) may exercise the Option, to the extent vested, at any time within the period of three (3) years following Participant's retirement date, but not beyond the original term of the Option, in both cases as long as no government regulations or rules are violated by such continued vesting or exercise period. To the extent unvested or unexercised at the end of the three (3) year period following Participant's retirement date, the Option shall be forfeited. In the event Participant's termination of employment qualifies as a Qualified Retirement and Participant also enters into a severance agreement with the Company, the terms of this Section 8 shall apply with respect to the vesting and exercise of the Option as of the Participant's employment termination date. " **Qualified Retirement** " shall mean termination of employment on or after attainment of age fifty-five (55) with at least ten (10) years of continuous service, or attainment of age sixty (60) with at least five (5) years of continuous service, provided that: (i) if Participant elects to terminate his or her employment voluntarily, Participant has provided the Company with at least twelve (12) months advance notice, in accordance with the provisions of Section 13 below, of his or her retirement date or such other term of advance notice as is determined by the Chief Human Resources Officer of the Company; or (ii) if the Company elects to terminate Participant's employment, such termination is without cause. A Participant shall also be deemed to have experienced a Qualified Retirement if the Company elects to terminate Participant's employment without Cause and Participant shall meet the age and service requirement set forth above during the severance period set forth in a severance agreement with the Company.

9. DISABILITY OF PARTICIPANT . In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of total and permanent disability (as defined in the Company's Long-Term Disability Plan, or, if not defined in such Plan, as defined by the Social Security Administration), the Option shall vest as of the employment termination date on a pro-rata basis as follows: the Option shall vest with respect to a total number of Shares as of the employment termination date (which is the last day that Participant is employed by the Company and any subsidiary of the Company) equal to (i) the number of Shares subject to the Option on the Grant Date *multiplied* by the following fraction: (A) the numerator shall be the whole number of months elapsed as of the employment termination date since the Grant Date and (B) the denominator shall be forty-eight (48), *minus* (ii) the number of Shares with respect to which the Option vested prior to the employment termination date (whether or not the Option was previously exercised). For purposes of this calculation, the number of months in the numerator in sub-section (A) above shall include any partial month in which Participant has worked. For example, if the time elapsed between the Grant Date and the employment termination date is eight months and five days, the numerator in sub-section (A) above shall be nine **.** The Option may be exercised to the extent vested at any time within one (1) year of Participant's employment termination date but not beyond the original term of the Option. The prorated Option shall vest on the Participant's employment termination date.

10. DEATH OF PARTICIPANT . In the event of Participant's death while Participant is employed with the Company and any subsidiary of the Company, the Option shall immediately vest in full, and the Option shall remain exercisable for a period of one (1) year after Participant's death, or until the Option expiration date, whichever occurs first, by Participant's Beneficiary. At the end of said one (1)-year time period, all rights with respect to any Option that is unexercised shall terminate and the Option shall be cancelled.

11 . TRANSFER OF EMPLOYMENT . Transfer of Participant's employment from the Company to a subsidiary of the Company, among or between subsidiaries of the Company, or from a subsidiary of the Company to the Company shall not be treated as termination of employment.

12. REQUIRED ACCEPTANCE OF AWARD. The Option may not be exercised unless and until the Company has received the Participant's acceptance of the terms and conditions set forth herein. Acceptance shall be submitted electronically as required by the Company.

13. NOTICE . Any notice required to be given hereunder to the Company shall be in writing. If by regular mail, any required notice shall be addressed to: CVS Health Corporation, Attention: Senior Director, Executive Compensation, One CVS Drive, Woonsocket, RI 02895. If by electronic mail, any notice required shall be sent to: equityadministration@cvshealth.com, with "Retirement Notice" in the subject line. Any notice required to be given hereunder to Participant shall be addressed to Participant at his or her address as shown on the records of the Company, subject to the right of either party hereafter to designate in writing to the other some other address.

14. RECOUPMENT OF OPTION AWARD . The Option subject to this Agreement under the ICP shall be subject to the terms of the Company's Recoupment Policy as it exists from time to time, which may require the Participant to immediately repay to the Company the value of any pre-tax economic benefit that he or she may derive from the Award. By accepting this Award, Participant acknowledges that a copy of the Company's Recoupment Policy has been made available for the Participant's reference.

15. COMMITTEE AUTHORITY . The Committee shall have the authority, in its sole discretion, to make any interpretations, determinations, and/or take any administrative actions with respect to the ICP and this Agreement, including whether any post-termination payments to Participant shall be deemed severance pay, the duration of any severance period, and/or whether a termination was without cause.

16. GOVERNING LAW . This Nonqualified Stock Option Agreement and the Option evidenced hereby shall be governed by the laws of Delaware, without giving effect to principles of conflict of laws.

17. ACKNOWLEDGEMENT. This Agreement shall be fully effective only upon the Participant's formal acceptance of the terms and conditions set forth above as required by the Company.

Executive Vice President, Chief Human Resources Officer
CVS Health Corporation

Exhibit 10.40

CVS HEALTH CORPORATION
RESTRICTED STOCK UNIT AGREEMENT - ANNUAL GRANT

GRANT DATE : **[_____]**

1. Pursuant and subject to the provisions of the 2017 Incentive Compensation Plan of CVS Health Corporation (the " **ICP** "), on the date set forth above (the " **Grant Date** "), CVS Health Corporation (the " **Company** ") has awarded and hereby evidences the Restricted Stock Unit (" **RSU** ") award (the " **Award** ") to the person named below (the " **Participant** "), subject to the terms and conditions set forth and incorporated in this Restricted Stock Unit agreement (the " **Agreement** "). The ICP is hereby made a part hereof and Participant agrees to be bound by all the provisions of the ICP. Capitalized terms not otherwise defined herein shall have the meaning assigned to such term(s) in the ICP. On the Grant Date specified above, the Fair Market Value (the "FMV"), which is the Closing Price of the Company's common stock on the Grant Date, of each RSU equals **[_____]** .

Participant:	**[_____]**
Employee ID:	**[_____]**
RSUs (#):	**[_____]**

2. Each RSU represents a right to a future payment of one share (" **Share** ") of Common Stock ($0.01 par value) of the Company, subject to required tax withholding.

3. (a) To the extent dividends are paid on Shares while the RSUs remain outstanding, subject to Section 5(b), a cash amount equivalent to the dividends paid (such cash amount, a "Dividend Equivalent") with respect to the number of Shares covered by the RSUs shall accrue. Any accrued Dividend Equivalent shall be payable only upon vesting of the underlying RSUs. To the extent that the underlying RSUs do not vest hereunder, any related accrued Dividend Equivalent shall be forfeited.

   (b) Participant hereby agrees that the Company may withhold from the Dividend Equivalents, referred to in Paragraph 3(a) above, amounts sufficient to satisfy the applicable tax withholding in respect of such Dividend Equivalents.

4. Subject to the terms and conditions of the ICP and this Agreement and subject to Participant's continued employment, Participant shall be entitled to receive (and the Company shall deliver to Participant) (a) the Shares on the Vesting Date set forth herein, or as soon as administratively practicable, but within 30 days thereafter, unless delivery of the Shares has been deferred in accordance with Section 5 below (the date of such delivery of the Shares being hereafter referred to as the " **Settlement Date** ") and (b) the Dividend Equivalents on the Vesting Date(s) set forth herein, or as soon as administratively practicable but within 30 days thereafter. The " **Vesting Date** ," except as otherwise provided in Section 7, shall be the fourth anniversary of the Grant Date.

5. (a) In accordance with rules promulgated by the Management Planning and Development Committee of the Board of Directors (the " **Committee** "), Participant, to the extent eligible under the CVS Health Deferred Stock Compensation Plan, may elect to defer delivery of Shares in settlement of RSUs covered by this Agreement. Any such deferred delivery date elected by Participant shall become the Settlement Date for purposes of this RSU Agreement.

(b) Notwithstanding Section 3(a), to the extent dividends are paid on such deferred Shares following the Vesting Date and prior to the Settlement Date, Participant shall be entitled to receive a number of additional deferred Shares equal to: (x) the amount of dividend per Share as declared by the Company's Board of Directors on the Company's common stock multiplied by (y) the number of deferred Shares held by Participant on the record date of such dividend, divided by (z) the FMV of a Share on such dividend payment date.

6. On the Settlement Date the number of Shares to be delivered by the Company to Participant shall be reduced by the smallest number of Shares having a FMV at least equal to the dollar amount of federal, state and local tax withholding required to be withheld by the Company with respect to such RSUs on such date.

7. (a) Except as provided in Paragraphs 7 (b) - (f) below, if, for any reason, Participant's employment with the Company and any subsidiary of the Company terminates, all RSUs not then vested in accordance with Section 4 above shall be immediately forfeited.

(a) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of death, RSUs not then vested in accordance with Section 4 will become immediately vested and the Vesting Date shall be the date of death.

(b) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of a "Qualified Retirement", RSUs shall vest on a pro-rata basis as of the Participant's retirement date, which is the last day that the Participant is employed by the Company and any subsidiary of the Company, as follows: the total number of RSUs vesting as of the retirement date shall be equal to (i) the number of RSUs granted on the Grant Date multiplied by the following fraction: (A) the numerator shall be the whole number of months elapsed as of the retirement date since the Grant Date and (B) the denominator shall be forty-eight (48). For purposes of this calculation, the number of months in the numerator in sub-section (A) above shall include any partial month in which Participant has worked. For example, if the time elapsed between the Grant Date and the retirement date is eight months and five days, the numerator in sub-section (A) above shall be nine. " **Qualified Retirement** " shall mean termination of employment on or after attainment of age fifty-five (55) with at least ten (10) years of continuous service, or attainment of age sixty (60) with at least five (5) years of continuous service, provided that: (i) if Participant elects to terminate his or her employment voluntarily, Participant has provided the Company with at least twelve (12) months advance notice, in accordance with the provisions of Section 10 below, of his or her retirement date or such other term of advance notice as is determined by the Chief Human Resources Officer of the Company; or (ii) if the Company elects to terminate Participant's employment, such termination is without cause. A Participant shall also be deemed to have experienced a Qualified Retirement if the Company elects to terminate Participant's employment without Cause and Participant shall meet the age and service requirement set forth above during the severance period set forth in a severance agreement with the Company. In the event Participant's termination of employment qualifies as a Qualified Retirement and Participant also enters into a severance agreement with the Company, the terms of this Section 7(c) or the terms of Section 7(e), whichever provides for greater benefits to Participant, shall be applied with respect to the vesting of RSUs that are unvested as of the employment termination date. Any Shares represented by the pro-rated RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section 4 of this RSU Agreement.

(d) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of total and permanent disability (as defined in the Company's Long-Term Disability Plan, or, if not defined in such Plan, as defined by the Social Security Administration), the RSUs shall vest as of the employment termination date on a pro rata basis as follows: the total number of RSUs vested as of the termination date, which is the last date that the Participant is employed by the Company and any subsidiary of the Company, shall be equal to the number of RSUs granted on the Grant Date multiplied by

the following fraction: (A) the numerator shall be the whole number of months elapsed as of Participant's termination date since the Grant Date and (B) the denominator shall be forty-eight (48). For purposes of this calculation, the number of months in the numerator in sub-section (A) above shall include any partial month in which Participant has worked. For example, if the time elapsed between the Grant Date and the termination date is eight months and five days, the numerator in sub-section (A) above shall be nine. Any Shares represented by RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section 4 of this RSU Agreement.

(e) In the event Participant's employment with the Company and any subsidiary of the Company terminates and Participant receives severance pay, RSUs not vested at the time of Participant's employment termination date but scheduled to vest during the severance period specified in the agreement providing for severance pay shall continue to vest during the severance period and settle in accordance with the original schedule set forth in Section 4 of this RSU Agreement. All RSUs not scheduled to vest during the specified severance period shall be forfeited as of the last day of the Participant's severance period. In the event that Participant returns to employment with the Company or any subsidiary prior to the expiration of the severance period specified in a severance agreement with the Company, Participant shall be treated as if his or her employment with the Company or any subsidiary of the Company had continued through the severance period for purposes of determining eligibility for continued vesting. In the event Participant's termination of employment qualifies as a Qualified Retirement the terms of this Section 7(e) or the terms of Section 7(c), whichever provides for greater benefits to Participant, shall be applied with respect to the vesting of RSUs that are unvested as of the employment termination date. During any severance period, Participant is eligible to accrue Dividend Equivalents on outstanding RSUs as described in Paragraph 3(a) above.

(f) Notwithstanding the above, (i) the provisions of Section 10 of the ICP shall apply in the event of a Change in Control (as defined in such Section 10) and (ii) the provisions of Section 7(e)(iv) of the ICP shall apply.

(g) For purposes of this Section 7, transfer of Participant's employment from the Company to a subsidiary of the Company, transfer among or between subsidiaries of the Company, or transfer from a subsidiary of the Company to the Company shall not be treated as a termination of employment.

(h) Participant will be responsible for any applicable withholding or other taxes that may become due as a result of RSUs that vest as of Participant's employment termination date or thereafter.

8. An RSU does not represent an equity interest in the Company and carries no voting rights. Participant shall have no rights of a shareholder with respect to the RSUs until the Shares have been delivered to Participant.

9. Neither the execution and delivery hereof nor the granting of the Award evidenced hereby shall constitute or be evidence of any agreement or understanding, express or implied, on the part of the Company or its subsidiaries to employ Participant for any specific period.

10. Any notice required to be given hereunder to the Company shall be in writing. If by regular mail, any required notice shall be addressed to: CVS Health Corporation, Attention: Senior Director, Executive Compensation, One CVS Drive, Woonsocket, RI 02895. If by electronic mail, any notice required shall be sent to: equityadministration@cvshealth.com, with "Retirement Notice" in the subject line. Any notice required to be given hereunder to Participant shall be addressed to such Participant at the address shown on the records of the Company, subject to the right of either party hereafter to designate, in writing, to the other, some other address.

11. All decisions and interpretations made by the Board of Directors or the Committee with regard to any question arising hereunder or under the ICP shall be binding and conclusive on all persons. In the event of any inconsistency between the terms hereof and the provisions of the ICP, the ICP shall govern.

12. The award of RSUs pursuant to this Agreement is expressly subject to and contingent upon the requirement that the Participant shall have fully executed and delivered to the Company the Restrictive Covenant Agreement, that may be required and provided by the Company. The applicable agreement containing the restrictive covenants that the Company may require in connection with this award is hereafter referred to as the "Restrictive Covenant Agreement".

    If the Company intends to require Participant to execute and deliver a new Restrictive Covenant Agreement in connection with the grant hereunder, the Company shall provide such new Restrictive Covenant Agreement to Participant and Participant agrees to execute and deliver such new Restrictive Covenant Agreement by the deadline set forth by the Company. If Participant is currently subject to a Restrictive Covenant Agreement and the Company does not require Participant to execute and deliver a new Restrictive Covenant Agreement, then by accepting the award of RSUs, pursuant to this Agreement. Participant affirms his or her Restrictive Covenant Agreement and intent to be bound by the restrictions in the Restrictive Covenant Agreement and to comply with all of its provisions.

    Participant agrees that failure to execute and return the new Restrictive Covenant Agreement, if required, by the deadline set forth by the Company shall result in the immediate and irrevocable forfeiture of the RSU Award hereunder and any right to receive dividend equivalents or Shares with respect thereto. Further, if Participant violates any provision of the applicable Restrictive Covenant Agreement, any unvested RSUs will be immediately and irrevocably forfeited, and no payment of any kind, including Dividend Equivalents or Shares, shall be payable with respect thereto. This Section shall not constitute the Company's exclusive remedy for Participant's violation of the Restrictive Covenant Agreement. The Company reserves all rights to seek all available legal or equitable remedies in the event of Participant's violation or threatened violation of the Restrictive Covenant Agreement, including injunctive relief.

13. By accepting this Award, Participant acknowledges that a copy of the ICP has been made available by the Company for Participant's reference and agrees to be bound by the terms and conditions set forth in this Agreement and the ICP as in effect from time to time.

14. By accepting this Award, Participant further acknowledges that the Federal securities laws and/or Company's policies regarding trading in its securities may limit or restrict Participant's right to trade Shares, including without limitation, sales of Shares acquired in connection with RSUs. Participant agrees to comply with such Federal securities law requirements and Company policies, as such laws and policies may be amended from time to time.

15. The Company intends that this Agreement not violate any applicable provision of, or result in any additional tax or penalty under, Section 409A of the Internal Revenue Code of 1986 (the "Code"), as amended, and that to the extent any provisions of this Agreement do not comply with Code Section 409A the Company will make such changes in order to comply with Code Section 409A to the extent it considers reasonable. In all events, the provisions of CVS Health Corporation's 409A Universal Definitions Document are hereby incorporated by reference and to the extent required to avoid a violation of the applicable rules under Section 409A by reason of Section 409A(a)(2)(B)(i) of the Code, payment of any amounts subject to Section 409A of the Code shall be delayed until the first business day of the seventh month immediately following the employment termination date. For purposes of any provision of this Agreement providing for the payment of any amounts or benefits upon or following a termination of employment, references to the "termination of employment" (and corollary terms) shall be construed to refer to "separation from service" (within the meaning of Treas. Reg. Section 1.409A-1(h)). Notwithstanding the foregoing, the Company makes no representations as to the tax treatment or consequences of any payment made hereunder, and Participant, by accepting this Award, acknowledges that Participant shall be solely responsible for same.

16. The Award subject to this RSU Agreement under the ICP shall be subject to the terms of the Company's Recoupment Policy as it exists from time to time, which may require the Participant to immediately repay

to the Company the value of any pre-tax economic benefit that he or she may derive from the Award. By accepting this Award, Participant acknowledges that the Company's Recoupment Policy has been made available for the Participant's reference.

17. This Agreement shall be governed by the laws of Delaware, without giving effect to its choice of law provisions.

18. This Agreement shall be fully effective only upon the Participant's formal acceptance of the terms and conditions set forth above as required by the Company.

CVS Health Corporation

Exhibit 10.41

CVS HEALTH CORPORATION
PERFORMANCE-BASED RESTRICTED STOCK UNIT AGREEMENT

GRANT DATE : **[_____]**

1. Pursuant and subject to the provisions of the 2017 Incentive Compensation Plan of CVS Health Corporation (the " **ICP** "), on the date set forth above (the " **Grant Date** "), the CVS Health Corporation (the " **Company** ") has awarded and hereby evidences the Performance-Based Restricted Stock (" **PBRS** ") unit award (the " **Award** ") to the person named below (the " **Participant** "), subject to the terms and conditions set forth and incorporated in this PBRS Agreement (the " **PBRS Agreement** "), the Restricted Stock Units (" **RSUs** ") set forth below. The ICP is hereby made a part hereof and Participant agrees to be bound by all the provisions of the ICP. Capitalized terms not otherwise defined herein shall have the meaning assigned to such term(s) in the ICP. On the Grant Date specified above, the Fair Market Value (the " **FMV** ") of a share of Stock equals **[_____]** , which is the closing price on such date.

Participant	**[_____]**
Employee Number	**[_____]**
RSUs (#)	**[_____]**

2. Each RSU represents a right to a future payment of one share (" **Share** ") of Common Stock ($0.01 par value) of the Company, subject to required tax withholding.

3. (a) To the extent dividends are paid on Shares while the RSUs remain outstanding, subject to Paragraph 5(b), a cash amount equivalent to the dividends paid (such cash amount, a "Dividend Equivalent") with respect to the number of Shares covered by the RSUs shall accrue. Any accrued Dividend Equivalent shall be payable only upon vesting of the underlying RSUs. To the extent that the underlying RSUs do not vest hereunder, any related accrued Dividend Equivalent shall be forfeited.

   (b) Participant hereby agrees that the Company may withhold from the Dividend Equivalents, referred to in Paragraph 3(a) above, amounts sufficient to satisfy the applicable tax withholding in respect of such Dividend Equivalents.

4. Subject to the terms and conditions of the ICP and this PBRS Agreement, and subject to Participant's continued employment, Participant shall be entitled to receive (and the Company shall deliver to Participant) (a) the Shares on the Vesting Date(s) set forth herein, or as soon as administratively practicable thereafter, but within 30 days, thereafter unless delivery of the Shares has been deferred in accordance with Paragraph 5 below (the date of such delivery of the Shares being hereafter referred to as the "Settlement Date") and (b) the Dividend Equivalents on the Vesting Date(s) set forth herein, or as soon as administratively practicable but within 30 days thereafter. Each "Vesting Date," except as otherwise provided in Paragraph 7, shall be in accordance with the schedule set forth below:

   (a) one-third (1/3) of the RSUs on the first anniversary of the Grant Date;
   (a) one-third (1/3) of the RSUs on the second anniversary of the Grant Date; and
   (b) one-third (1/3) of the RSUs on the third anniversary of the Grant Date.

5. (a) In accordance with rules promulgated by the Management Planning and Development Committee of the Board of Directors (the " **Committee** "), Participant, to the extent eligible under the CVS Health Deferred Stock Compensation Plan, may elect to defer delivery of Shares in settlement of RSUs covered by this PBRS Agreement. Any such deferred delivery date elected by Participant shall become the Settlement Date for purposes of this PBRS Agreement.

   (b) Notwithstanding Paragraph 3(a), to the extent dividends are paid on such deferred Shares following the Vesting Date and prior to the Settlement Date, Participant shall be entitled to receive a number of additional deferred Shares equal to: (x) the amount of dividend per Share as declared by the Company's Board of Directors on the Company's common stock multiplied by (y) the number of deferred Shares held by Participant on the record date of such dividend, divided by (z) the FMV of a Share on such dividend payment date.

6. On the Settlement Date the number of Shares to be delivered by the Company to Participant shall be reduced by the smallest number of Shares having a FMV at least equal to the dollar amount of Federal, state and local tax withholding required to be withheld by the Company with respect to such RSUs on such date.

7. (a) Except as provided in Paragraphs 7 (b) - (f) below, if, for any reason, Participant's employment with the Company and any subsidiary of the Company terminates, all RSUs not then vested in accordance with Paragraph 4 above, shall be immediately forfeited.

   (a) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of death, RSUs not then vested in accordance with Paragraph 4 will become immediately vested and Vesting Date shall be the date of death.

   (c) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of a "Qualified Retirement", RSUs will become immediately vested as of Participant's retirement date, which is the last day that the Participant is employed by the Company and any subsidiary of the Company. The Vesting Date shall be the effective date of the Participant's termination of employment. " **Qualified Retirement** " shall mean a Participant's termination of employment on or after attainment of age fifty-five (55) with at least ten (10) years of continuous service, or attainment of age sixty (60) with at least five (5) years of continuous service, provided that: (i) if Participant elects to terminate his or her employment voluntarily, Participant has provided the Company with at least twelve (12) months advance notice, in accordance with the provisions of Section 9 below, of the date of his or her termination of employment or such other term of advance notice as is determined by the Chief Human Resources Officer of the Company; or (ii) if the Company elects to terminate Participant's employment, such termination is without cause. A Participant shall also be deemed to have experienced a Qualified Retirement if the Company elects to terminate Participant's employment without Cause and Participant shall meet the age and service requirement set forth above as of during the severance period set forth in a severance agreement with the Company. In the event Participant's termination of employment qualifies as a Qualified Retirement and Participant also enters into a severance agreement with the Company, the terms of this Section 6(c) or the terms of Section 6(e), whichever provides for greater benefits to Participant, shall be applied with respect to the vesting of RSUs that are unvested as of the employment termination date. Any Shares represented by RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section 4 of this PBRS Agreement.

   (d) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of total and permanent disability (as defined in the Company's Long-Term Disability Plan, or, if not defined in such Plan, as defined by the Social Security Administration), the RSUs shall vest as of the employment termination date on a pro rata basis as follows: the total number of RSUs vesting as of the termination date, which is the last day that the Participant is employed by the Company and any subsidiary of the Company shall be equal to (i) the number of RSUs granted on the Grant Date multiplied by the following fraction: (A) the numerator shall be the whole number of months elapsed as of the

termination date since the Grant Date and (B) the denominator shall be thirty-six (36) *minus* (ii) the number of RSUs that had vested prior to the termination date. For purposes of this calculation, the number of months in the numerator in sub-section (A) above shall include any partial month in which Participant has worked. For example, if the time elapsed between the Grant Date and the termination date is eight months and five days, the numerator in sub-section (A) above shall be nine. The Vesting Date shall be the effective date of the Participant's termination of employment. Any Shares represented by RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section 4 of this PBRS Agreement.

(e) In the event Participant's employment with the Company and any subsidiary of the Company terminates and Participant receives severance pay, RSUs not vested at the time of Participant's employment termination date but scheduled to vest during the severance period specified in the agreement providing for severance pay shall continue to vest during the severance period and settle in accordance with the original schedule set forth in Section 4 of this PBRS Agreement. All RSUs not scheduled to vest during the specified severance period shall be forfeited as of the last day of the Participant's severance period. In the event that Participant returns to employment with the Company or any subsidiary prior to the expiration of the severance period specified in a severance agreement with the Company, Participant shall be treated as if his or her employment with the Company or any subsidiary of the Company had continued through the severance period for purposes of determining eligibility for continued vesting. In the event Participant's termination of employment qualifies as a Qualified Retirement the terms of this Section 6(e) or the terms of Section 6(c), whichever provides for greater benefits to Participant, shall be applied with respect to the vesting of RSUs that are unvested as of the employment termination date. During any severance period, Participant is eligible to accrue Dividend Equivalents on outstanding RSUs as described in Paragraph 3(a) above.

(f) Notwithstanding the above, (i) the provisions of Section 10 of the ICP shall apply in the event of a Change in Control (as defined in such Section 10) and (ii) the provisions of Section 7(e)(iv) of the ICP shall apply.

(g) For purposes of this Section 7, transfer of Participant's employment from the Company to a subsidiary of the Company, transfer among or between subsidiaries of the Company, or transfer from a subsidiary of the Company to the Company shall not be treated as termination of employment.

(h) Participant will be responsible for any applicable withholding or other taxes that become due as a result of RSUs that vest as of Participant's employment termination date or thereafter.

8. An RSU does not represent an equity interest in the Company and carries no voting rights. Participant shall have no rights of a shareholder with respect to the RSUs until the Shares have been delivered to Participant.

9. Neither the execution and delivery hereof nor the granting of the award evidenced hereby shall constitute or be evidence of any agreement or understanding, express or implied, on the part of the Company or its subsidiaries to employ Participant for any specific period.

10. Any notice required to be given hereunder to the Company shall be in writing. If by regular mail, any required notice shall be addressed to: CVS Health Corporation, Attention: Senior Director, Executive Compensation, One CVS Drive, Woonsocket, RI 02895. If by electronic mail, any notice required shall be sent to: equityadministration@cvshealth.com, with "Retirement Notice" in the subject line. Any notice required to be given hereunder to Participant shall be addressed to such Participant at the address shown on the records of the Company, subject to the right of either party hereafter to designate, in writing, to the other, some other address.

11. All decisions and interpretations made by the Board of Directors or the Committee with regard to any question arising hereunder or under the ICP shall be binding and conclusive on all persons. In the event of any inconsistency between the terms hereof and the provisions of the ICP, the ICP shall govern.

12. By accepting this Award, Participant acknowledges that a copy of the ICP has been made available for the Participant's reference, and agrees to be bound by the terms and conditions set forth in this Agreement and the ICP as in effect from time to time.

13. By accepting this Award, Participant further acknowledges that the Federal securities laws and/or Company's policies regarding trading in its securities may limit or restrict Participant's right to buy or sell Shares, including without limitation, sales of Shares acquired in connection with RSUs. Participant agrees to comply with such Federal securities law requirements and Company policies as such laws and policies may be amended from time to time.

14. The company intends that this Agreement not violate any applicable provision of, or result in any additional tax or penalty under, Section 409A of the Internal Revenue Code of 1986 (the "Code"), as amended, and the regulations and guidance thereunder (collectively, "Section 409A") and that to the extent any provisions of this PBRS Agreement do not comply with Section 409A the Company will make such changes as it deems reasonable in order to comply with Section 409A. In all events, the provisions of CVS Health Corporation's 409A Universal Definitions Document are hereby incorporated by reference and, notwithstanding any other provision of the Plan or this PBRS Agreement to the contrary, to the extent required to avoid a violation of the applicable rules under Section 409A by reason of Section 409A(a)(2)(B)(i) of the Code, payment of any amounts subject to Section 409A shall be delayed until the first business day of the seventh month immediately following the date of termination of employment. For purposes of any provision of this PBRS Agreement providing for the payment of any amounts or benefits upon or following a termination of employment, references to the "termination of employment" (and corollary terms) shall be construed to refer to "separation from service" as determined under Section 409A.

15. The Award subject to this PBRS Agreement under the Plan and ICP shall be subject to the terms of the Company's Recoupment Policy as it exists from time to time, which may require the Participant to immediately repay to the Company the value of any pre-tax economic benefit that he or she may derive from the Award. By accepting this Award, Participant acknowledges that the Company's Recoupment Policy has been made available for Participant's reference.
16. This Agreement shall be governed by the laws of Delaware, without giving effect to its choice of law provisions.

17. This Agreement shall be fully effective only upon the Participant's formal acceptance of the terms and conditions set forth above as required by the Company.

Executive Vice President, Chief Human Resources Officer
CVS Health Corporation

Exhibit 10.42

PARTNERSHIP EQUITY PROGRAM
Participant Purchased RSUs, Company Matching RSUs
and Company Matching Option Agreement

AGREEMENT, by and between CVS Health Corporation, a Delaware corporation (the "Company"), and _____ ("Participant"), effective on _____ , herein after known as the "Grant Date" (this "Agreement") **.**

WHEREAS, Participant has been selected as an Eligible Participant to invest under the Company's Partnership Equity Program (the "PEP") and has elected in the Participant's Election Form to invest $ _____ in the PEP, subject to the terms and conditions set forth in the PEP and in this Agreement;

WHEREAS, the Company desires to provide Participant with written evidence acknowledging Participant's investment under the PEP through Participant Purchased RSUs and the corresponding grant of Company Matching RSUs and a Company Matching Option under the PEP.

WHEREAS, the provisions of the PEP and the Company's 2017 Incentive Compensation Plan (the "ICP") are hereby incorporated by reference and shall have the same force and effect as though fully set forth herein; Participant hereby acknowledges that a copy of the PEP and the ICP have been made available to Participant and agrees to be bound by such provisions (as presently in effect or hereafter amended); if any provision of this Agreement is inconsistent with a provision of the PEP or the ICP, the terms of the PEP and/or the ICP, or any successor thereto, shall control; capitalized terms used in this Agreement but not defined herein shall have the same meanings as in the PEP or the ICP, as the case may be; and on the Grant Date specified above, the Fair Market Value (the "FMV") of a share of CVS Health Common Stock ("Stock") equals $ ____ which is the closing price on such date.

NOW, THEREFORE, in consideration of the mutual covenants contained herein and other good and valuable consideration, the parties hereto agree as follows:

I. PARTICIPANT PURCHASED RSUs AND COMPANY MATCHING RSUs

(A) **Participant Purchased RSUs** . The Company has received from Participant a completed Participant Election Form authorizing the Company to apply designated compensation of $_____ to the purchase of _____ Participant Purchased RSUs on the Grant Date under the PEP, and the Company has accordingly credited Participant's Account under the PEP with the Participant Purchased RSUs. Except as provided under Section III of this Agreement, the Participant Purchased RSUs (including any Participant Purchased RSUs credited to Participant pursuant to Section I(C)(ii)) shall be fully vested as of the Grant Date and shall settle on the fifth (5 th) anniversary of the Grant Date.

(B) **Crediting of Company Matching RSUs** . As of the Grant Date, the Company hereby awards the Participant, subject to the terms and conditions set forth and incorporated in this Agreement and the PEP, _____ Company Matching RSUs.

(C) **Additional Transactions in Participant Accounts** .

(i) Each Participant Purchased RSU and Company Matching RSU represents a right to a future payment of one share of Stock, subject to applicable tax withholding.

(ii) To the extent that dividends are declared and paid on shares of Stock while the Participant Purchased RSUs and Company Matching RSUs remain outstanding and prior to a Settlement Date (as defined below), the Company shall credit to Participant's Purchased RSU account and Company Matching RSU account (as applicable) an additional number of Participant Purchased RSUs and Company Matching RSUs calculated by multiplying (a) the amount of dividend per share of Stock approved by the Company's Board of Directors by (b) the number of Participant Purchased RSUs and Company Matching RSUs held by Participant on the dividend record date, and dividing the product by (c) the FMV of a share of Stock on such dividend payment date.

(iii) Provided, however, that if such dividend is paid prior to the Vesting Date of Participant Purchased RSUs and/or the Company Matching RSUs, as set forth in Section I (D) below, Participant shall not be entitled to any

payment in respect of such dividend unless Participant is still employed by the Company on such dividend payment date.

(iv) Participant hereby agrees that, prior to the Settlement Date, the Company may withhold from the dividend equivalent amounts described to in Section I(C)(ii) amounts sufficient to satisfy the applicable tax withholding in respect of such dividend equivalent payments, as applicable.

(D) Vesting of Company Matching RSUs . Subject to the terms and conditions of the PEP and this Agreement, and to Participant's continued employment through such date, the Company Matching RSUs, and the dividend equivalent amounts attributed to same, shall vest on the fifth (5 th) anniversary of the Grant Date.

(E) Settlement of Company Matching RSU.

(i) A "Settlement Date" shall mean the date shares of Stock are delivered to Participant pursuant to the PEP and this Agreement.

(ii) Within fifteen (15) days following the earliest of the fifth (5 th) anniversary of the Grant Date, Participant's death, or termination of employment without Cause within the two-year period following a Change in Control, Participant shall be entitled to receive and the Company shall deliver to Participant the total number of shares of Stock (giving effect to Sections I(C)(ii) and I(C)(iv)) underlying the Company Matching RSUs on the Vesting Date set forth herein, or as soon as administratively practicable, but within 30 days thereafter, unless delivery of the Shares has been deferred in accordance with Section I(E)(iii) below (the date of such delivery of the Shares being hereafter referred to as the " **Settlement Date** "). Notwithstanding the foregoing, no shares of Stock shall be delivered upon termination of employment unless such termination of employment is considered a "separation from service" (within the meaning given of Treasury Regulation §1.409A-1(h) or successor guidance thereto).

(iii) Subject to the rules promulgated by the Committee, the terms of the CVS Health Deferred Stock Compensation Plan and Section 409A, Participant may elect to defer settlement of Participant Purchased RSUs or Company Matching RSUs covered by this Agreement.

II. COMPANY MATCHING OPTION

(A) Grant of Option . The Company hereby awards and evidences the grant to Participant, subject to the terms and conditions incorporated in this Agreement, the right, and option, to purchase from the Company _____ shares of Stock, with an exercise price per share of Stock equal to the FMV of a share of Stock on the Grant Date, such Company Matching Option to be exercised as hereinafter provided. The Company Matching Option is a nonqualified option as defined in the ICP.

(B) Term of Company Matching Option . The term of this Company Matching Option shall be for a period of ten (10) years from the Grant Date, subject to the earlier termination of the Company Matching Option, as set forth in the ICP and in this Agreement.

(C) Vesting and Exercise of Company Matching Option

(i) Prior to its expiration or termination, and except as otherwise provided herein, the Company Matching Option shall vest and may be exercised by Participant, provided Participant has maintained continuous employment with the Company or a subsidiary of the Company from the Grant Date until the applicable vesting date, within the following time limitations:

a. On or after three (3) years from the Grant Date, the Company Matching Option shall be vested and may be exercised as to one-third (1/3) of the shares of Stock subject to the Company Matching Option;

b. On or after four (4) years from the Grant Date, the Company Matching Option shall be vested and may be exercised as to an aggregate of two-thirds (2/3) of the shares of Stock subject to the Company Matching Option; and

c. On or after five (5) years from the Grant Date, the Company Matching Option shall be vested and may be exercised as to all of the shares of Stock subject to the Company Matching Option.

(ii) The Company Matching Option, subject to the provisions of the ICP, shall be exercised by submitting a request to exercise to the Company's stock option administrator, in accordance with the Company's current exercise policies and procedures, specifying the number of shares of Stock to be purchased, which number may not be less than one hundred (100) shares of Stock (unless the number of shares of Stock purchased is the total balance which is then exercisable). An exercise by Participant of all or part of this Company

Matching Option shall be effected through the Company's "cashless exercise" procedures. Otherwise, at the time of exercise, Participant shall tender to the Company cash or cash equivalent for the aggregate exercise price of the shares of Stock Participant has elected to purchase or certificates for shares of Stock of the Company already owned by Participant for at least six (6) months with an aggregate FMV at least equal to the aggregate exercise price of the shares of Stock Participant has elected to purchase, or a combination of the foregoing.

(D) **Company Matching Option Expiration** . The Company Matching Option shall be exercisable only as provided above and shall expire at the close of business on the tenth (10 th) anniversary of its Grant Date or such earlier expiration date as described in Section III below.

III. TERMINATION OF EMPLOYMENT AND CHANGE IN CONTROL

(A)

(i) If Participant's employment with the Company and its subsidiaries terminates within 24 months of the grant date as a result of the Participant's voluntary termination of employment or involuntary termination by the Company or any subsidiary for Cause, the Participant Purchased RSUs shall be immediately forfeited as of the termination date .

(ii) Except as provided in Section III (B)-(F) below, if, for any reason, Participant's employment with the Company and any subsidiary of the Company terminates, all Company Matching RSUs and the Company Matching Option to the extent not vested as of the termination date in accordance with Sections I(D) and II(C)(i) above shall be immediately forfeited as of the termination date. To the extent vested and unexercised as of the termination date, the Company Matching Option shall be exercisable on or before the ninetieth (90 th) day following the termination date, as long as no government regulations or rules are violated by such exercise period; provided, however, that the Company Matching Option shall not be exercisable beyond its original term.

(B) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of death, Company Matching RSUs and the Company Matching Option not then vested in accordance with Section I(D) and Section II(C)(i), respectively, will become immediately vested and the Vesting Date will be the date of death. Participant Purchased RSUs and Company Matching RSU shall settle as of the date of death and the Company Matching Option shall be exercisable by the Participant's Beneficiary during the twelve (12) month period following the date of death, as long as no government regulations or rules are violated by such accelerated vesting or exercise period; provided, however, that no Company Matching Option will be exercisable beyond its original term.

(C) In the event Participant's employment with the Company and any subsidiary of the Company terminates by reason of total and permanent disability (as defined in the Company's Long-Term Disability Plan, or, if not defined in such plan, as defined by the Social Security Administration), the Company Matching RSUs and the Company Matching Option shall vest on a pro rata basis as follows:

(i) the total number of Company Matching RSUs vested as of Participant's employment termination date (which is the last day that the Participant is employed by the Company or any subsidiary of the Company) shall be equal to the number of Company Matching RSUs granted on the Grant Date multiplied by the following fraction: (A) the numerator shall be the whole number of months elapsed since the Grant Date and (B) the denominator shall be sixty (60). For purposes of this calculation, the number of months in the numerator in sub-section (A) above shall include any partial month in which Participant has worked. For example, if the time elapsed between the Grant Date and the Separation Date is eight months and five days, the numerator in sub-section (A) above shall be nine. Participant will be responsible for any applicable withholding taxes that may become due as of Participant's employment termination date. Any Shares represented by RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section I(D) of this PEP Agreement.

(ii) the total number of Company Matching Option vested as of Participant's employment termination date with respect to the number of shares of Stock subject to the Company Matching Options, shall be equal to the number of Company Matching Options granted on the Grant Date multiplied by the following fraction: (A) the numerator shall be the whole number of months elapsed since the Grant Date and (B) the denominator shall be sixty (60). For purposes of this calculation, the number of months in the numerator in sub-section (A) above shall include any partial month in which Participant has worked. For example, if the time elapsed

between the Grant Date and the Separation Date is eight months and five days, the numerator in sub-section (A) above shall be nine.

(iii) the vested portion of the Company Matching Option shall be exercisable during the twelve (12) month period following Participant's employment termination date, as long as no government regulations or rules are violated by such accelerated vesting or exercise period; provided, however, that the Company Matching Option shall not be exercisable beyond its original term.

(D) **Involuntary Termination with Severance.** In the event that Participant's employment with the Company and any subsidiary of the Company terminates and Participant receives severance pay pursuant to a written agreement in the form required by the Company, Participant's Company Matching RSUs and the Company Matching Option to the extent not vested at the time of the Participant's employment termination date but scheduled to vest during the severance period specified in the agreement providing for severance pay shall continue to vest during the severance period and settle in accordance with the schedule set forth in Section I(D) and Section II(C)(i), respectively, of this Agreement. Participant will be responsible for any applicable withholding taxes that may become due as of Participant's employment termination date. All Company Matching RSUs and the Company Matching Option to the extent not scheduled to vest during the specified severance period shall be forfeited as of the Participant's employment termination date. Any Shares represented by RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section I(D) of this PEP Agreement. During any severance period, Participant is eligible to receive dividend equivalents on outstanding RSUs as described in Paragraph I(C)(ii) above. To the extent vested, the Company Matching Option shall be exercisable on or before the ninetieth (90 th) day following the last day of the severance period, as long as no government regulations or rules are violated by such continued vesting or exercise period; provided, however, that the Company Matching Option shall not be exercisable beyond its original term.

(E) **Retirement** . " **Qualified Retirement** " shall mean termination of employment on or after attainment of age fifty-five (55) with at least ten (10) years of continuous service, or attainment of age sixty (60) with at least five (5) years of continuous service, provided that: (i) if Participant elects to terminate his or her employment voluntarily, Participant has provided the Company with at least twelve (12) months advance notice of his or her retirement date or such other term of advance notice as is determined by the Chief Human Resources Officer of the Company; or (ii) if the Company elects to terminate Participant's employment, then such termination is without cause.

(i) In the event Participant's termination of employment qualifies as a Qualified Retirement, Participant may exercise the Company Matching Option to the extent vested as of Participant's retirement date at any time within two (2) years after Participant's retirement date, but not beyond the original term of the Company Matching Option. To the extent unvested as of the retirement date, the Company Matching Option shall be forfeited. The Committee shall have the authority in its sole discretion to make any interpretations, determinations, and/or take any administrative actions with respect to whether Participant has experienced a Qualified Retirement.

(ii) Company Matching RSUs that are unvested as of the Participant's retirement date are forfeited as of the retirement date.

(iii) In the event Participant's termination of employment qualifies as a Qualified Retirement and Participant also enters into a severance agreement with the Company, each portion of a Participant's Company Matching RSU or Company Matching Option under this Award shall be entitled to the more favorable treatment explicitly applicable to such portion of the Participant's Company Matching RSU or Company Matching Option under the provisions of Section XIII(F) of the PEP with respect to the vesting and settlement of the Company Matching RSUs and the Company Matching Option.

Any Shares represented by RSUs that vest under this section shall settle on the Settlement Date that would have applied under the original schedule set forth in Section I(D) of this PEP Agreement.

(F) The provisions of Section 10 of the ICP, or any successor thereto, shall apply in the event of a Change in Control.

(G) For purposes of this Section III, transfer of employment by Participant from the Company to a subsidiary of the Company, transfer among or between subsidiaries of the Company, transfer from a subsidiary of the Company to the Company or any other continuation of employment with the Company or a subsidiary of the Company after termination by a related entity shall not be treated as termination of employment.

IV. NON-COMPETITION. The grant of RSUs pursuant to this Agreement is expressly subject to and contingent upon the requirement that the Participant shall have fully executed and delivered to the Company the CVS Health Corporation

Restrictive Covenant Agreement provided by the Company; provided that the Company in its sole discretion may waive such requirement if Participant is currently a party to another agreement with the Company setting forth restrictive covenants, such as non-competition, non-disclosure, and/or non-solicitation obligations. The applicable agreement containing the restrictive covenants the Company requires in connection with this Award, whether previously executed or required to be executed in connection with this Award, is hereafter referred to as the "Restrictive Covenant Agreement".

If the Company intends to require Participant to execute and deliver a new Restrictive Covenant Agreement in connection with the Award hereunder, the Company shall provide such Restrictive Covenant Agreement to Participant and Participant agrees to execute and deliver such agreement by the deadline set forth by the Company, which shall be no less than ten days from the date it is provided to Participant. If Participant is currently subject to a Restrictive Covenant Agreement, Participant hereby affirms his or her agreement and intent to be bound by the restrictions in the Restrictive Covenant Agreement and to comply with all of its provisions.

Participant agrees that failure to execute and return the Restrictive Covenant Agreement by the deadline set forth by the Company, if required, shall result in the immediate and irrevocable forfeiture of the RSU Award hereunder and any right to receive dividend equivalents or Shares with respect thereto. Further, if Participant violates any provision of the applicable Restrictive Covenant Agreement, any unvested RSUs will be immediately and irrevocably forfeited, and no payment of any kind, including dividend equivalents or Shares, shall be payable with respect thereto. This Section shall not constitute the Company's exclusive remedy for Participant's violation of the Restrictive Covenant Agreement, and the Company may seek all available legal or equitable remedies in the event of Participant's violation or threatened violation of the Restrictive Covenant Agreement, including injunctive relief.

V. MISCELLANEOUS .

(A) Withholding Tax . Participant may be subject to withholding taxes as a result of the exercise of the Company Matching Option or settlement of Participant Purchased RSUs or Company Matching RSUs. The number of shares of Stock to be delivered by the Company to Participant shall be reduced by the smallest number of shares of Stock having a FMV at least equal to the dollar amount of federal, state or local tax withholding required to be withheld by the Company with respect to such exercise or settlement. Any shares of Stock so withheld or tendered will be valued as of the date they are withheld or tendered. Participant shall remit to the Company in cash, promptly when the amount of such tax obligations become determinable, all applicable federal, state, local and any foreign withholding taxes that result from each exercise of the Company Matching Option.

(B) Recoupment. This Award under the ICP shall be subject to the terms of the Company's Recoupment Policy as it exists from time to time, which may require Participant to immediately repay to the Company the value of any pre-tax economic benefit that he or she may derive from the Award. By accepting this Award, Participant acknowledges that the Company's Recoupment Policy has been made available for Participant's reference.

(C) Certain Terms and Conditions of the PEP . Participant acknowledges and agrees that the terms and conditions of the PEP preclude all transfers of Participant Purchased RSUs, all Company Matching RSUs, and the Company Matching Option, except in limited circumstances in the event of Participant's death, impose a risk of forfeiture on Participant Purchased RSUs, Company Matching RSUs and the Company Matching Option, relieve the Company of certain obligations unless and until laws and regulations have been complied with, provide for adjustments to Participant Purchased RSUs, Company Matching RSUs, and the Company Matching Option upon the occurrence of certain events, and specify the state law which shall govern this Agreement, without giving effect to principles of conflict of laws.

(D) Binding Agreement . This Agreement shall be binding upon the heirs, executors, administrators, and successors of the parties. In particular, Participant's heirs, executors, administrators, and successors shall be subject to the terms and conditions of the PEP, ICP and this Agreement, and the Company may require any such person to execute an agreement or other documents acknowledging and agreeing to such terms and conditions as a condition precedent to any transfer of rights hereunder or shares of Stock issuable under the PEP, including upon exercise of the Company Matching Option, into the name of any such person.

(E) Integration Clause; Amendments to Agreement . This Agreement, together with the PEP and the ICP, constitutes the entire Agreement between the parties with respect to the PEP, and supersedes any prior agreements or documents with respect thereto. This Agreement may be amended, but no amendment or other change which may impose any additional obligation upon the Company or materially impair the rights of Participant under the PEP shall be valid unless contained in a writing signed by the party to be bound thereby.

(F) Employment . Neither the execution and delivery hereof nor the granting of the Company Matching RSUs or

the Company Matching Option evidenced hereby shall constitute or be evidence of any agreement or understanding, expressed or implied, on the part of the Company or its subsidiaries to employ Participant for any specific period.

(G) **Required Acceptance of Award.** Acceptance may be submitted either electronically, if available, or in writing. The Company Matching Option may not be exercised unless and until the Company has received acceptance by the Participant of the terms and conditions set forth herein.

(H) **Company Matching RSUs.** Neither a Company Matching RSU nor a Participant Purchased RSU represents an equity interest in the Company and neither carries any voting rights. Except as otherwise specifically provided herein, Participant shall have no rights of a shareholder with respect to the RSUs until the related shares of Stock have been delivered to Participant.

(I) **Section 409A.** The Company intends that this Agreement not violate any applicable provision of, or result in any additional tax or penalty under, Section 409A of the Internal Revenue Code of 1986 (the "Code"), as amended, and that to the extent any provisions of this Agreement do not comply with Code Section 409A the Company will make such changes in order to comply with Code Section 409A to the extent it considers reasonable. In all events, the provisions of CVS Health Corporation's 409A Universal Definitions Document are hereby incorporated by reference and to the extent required to avoid a violation of the applicable rules under Section 409A by reason of Section 409A(a)(2)(B)(i) of the Code, payment of any amounts subject to Section 409A of the Code shall be delayed until the first business day of the seventh month immediately following the employment termination date. For purposes of any provision of this Agreement providing for the payment of any amounts or benefits upon or following a termination of employment, references to the "termination of employment" (and corollary terms) shall be construed to refer to "separation from service" (within the meaning of Treas. Reg. Section 1.409A-1(h)). Notwithstanding the foregoing, the Company makes no representations as to the tax treatment or consequences of any payment made hereunder, and Participant, by accepting this Award, acknowledges that Participant shall be solely responsible for same.

(J) **Notices** . Any notice required to be given hereunder to the Company shall be in writing. If by regular mail, any required notice shall be addressed to: CVS Health Corporation, Attention: Senior Director, Executive Compensation, One CVS Drive, Woonsocket, RI 02895. If by electronic mail, any notice required shall be sent to: equityadministration@cvshealth.com, with "Retirement Notice" in the subject line. Any notice required to be given hereunder to Participant shall be addressed to such Participant at the address shown on the records of the Company, subject to the right of either party hereafter to designate, in writing, to the other, some other address.

(K) **ACKNOWLEDGEMENT.** This Agreement shall be fully effective only upon the Participant's formal acceptance of the terms and conditions set forth above as required by the Company.

AETNA INC.
2010 STOCK INCENTIVE PLAN

MARKET STOCK UNIT TERMS OF AWARD

Pursuant to its 2010 Stock Incentive Plan (the "Plan"), Aetna Inc. (the "Company") hereby grants Market Stock Units on the terms and conditions hereinafter set forth. The number of Market Stock Units awarded is included in the website of the designated broker, currently UBS Financial Services, Inc., and in the Notice of the Market Stock Unit Grant Acknowledgement and Acceptance Form. All capitalized terms used herein which are not otherwise defined herein shall have the meaning specified in the Plan.

ARTICLE I

DEFINITIONS

(a) "Affiliate" means an entity at least a majority of the total voting power of the then-outstanding voting securities of which is held, directly or indirectly, by the Company and/or one or more other Affiliates.

(b) "Board" means the Board of Directors of Aetna Inc.

(c) "Change in Control" means the happening of any of the following:

(i) When any "person" as defined in Section 3(a)(9) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and as used in Sections 13(d) and 14(d) thereof, including a "group" as defined in Section 13(d) of the Exchange Act but excluding the Company and any Subsidiary thereof and any employee benefit plan sponsored or maintained by the Company or any Subsidiary (including any trustee of such plan acting as trustee), directly or indirectly, becomes the "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act, as amended from time to time), of securities of the Company representing 20 percent or more of the combined voting power of the Company's then outstanding securities;

(ii) When, during any period of 24 consecutive months, the individuals who, at the beginning of such period, constitute the Board (the "Incumbent Directors") cease for any reason other than death to constitute at least a majority thereof, provided that a director who was not a director at the beginning of such 24-month period shall be deemed to have satisfied such 24-month requirement (and be an Incumbent Director) if such director was elected by, or on the recommendation of or with the approval of, at least two-thirds of the directors who then qualified as Incumbent Directors either actually (because they were directors at the beginning of such 24-month period) or by prior operation of this paragraph (ii); or

(iii) The occurrence of a transaction requiring stockholder approval for the acquisition of the Company by an entity other than the Company or a Subsidiary through purchase of assets, or by merger, or otherwise.

Notwithstanding the foregoing, in no event shall a “Change in Control” be deemed to have occurred (i) as a result of the formation of a Holding Company, or (ii) with respect to Grantee, if Grantee is part of a “group,” within the meaning of Section 13(d)(3) of the Exchange Act as in effect on the effective date, which consummates the Change in Control transaction. In addition, for purposes of the definition of “Change in Control” a person engaged in business as an underwriter of securities shall not be deemed to be the “Beneficial Owner” of, or to “beneficially own,” any securities acquired through such person’s participation in good faith in a firm commitment underwriting until the expiration of forty days after the date of such acquisition.

(d) "Committee" means the Board's Committee on Compensation and Organization or any successor thereto.

(e) "Common Stock" means the Company's Common Shares, $.01 par value per share.

(f) "Company" means Aetna Inc.

(g) "Effective Date" means the date of grant of this award of Market Stock Units.

(h) “Fair Market Value" means the closing price of the Common Stock as reported by the Consolidated Tape of the New York Stock Exchange Listed Shares on the date such value is to be determined, or, if no shares were traded on such date, on the next day on which the Common Stock is traded.

(i) “Fundamental Corporate Event” shall mean any stock dividend, extraordinary cash dividend, recapitalization, reorganization, merger, consolidation, split-up, spin-off, combination, exchange of shares, warrants or rights offering to purchase Common Stock at a price substantially below fair market value, or similar event.

(j) "Grantee" means the person to whom this award has been granted.

(k) “Holding Company” means an entity that becomes a holding company for the Company or its businesses as a part of any reorganization, merger, consolidation or other transaction, provided that the outstanding shares of common stock of such entity and the combined voting power of the then outstanding voting securities of such entity entitled to vote generally in the election of directors is, immediately after such reorganization, merger, consolidation or other transaction, beneficially owned, directly or indirectly, by all or substantially all of the individuals and entities who were the beneficial owners, respectively, of the voting stock outstanding immediately prior to such reorganization, merger, consolidation or other transaction in substantially the same proportions as their ownership, immediately prior to such reorganization, merger, consolidation or other transaction, of such outstanding voting stock.

(l) "Long Term Disability" means long-term disability as defined under the terms of the Company's applicable long-term disability plans or policies.

(m) “Net Shares” means the number of shares of Common Stock which will be deposited in a brokerage account in the Grantee’s name at the Company’s designated broker after shares have been withheld to satisfy applicable tax and withholding requirements upon vesting of the Market Stock Units.

(n) "Performance Period" means the [ ] month period following the Effective Date.

(o) "Market Stock Units" means the number of units awarded that will convert to a number of shares of Common Stock based on the operation of Article II of this Agreement, or such other amount as may result by operation of Article III of this Agreement.

(p) "Plan" means the Aetna Inc. 2010 Stock Incentive Plan.

(q) "Retirement" means the termination of employment of a Grantee from active service with the Company, a Subsidiary or Affiliate provided the Grantee's age and completed years of service total 65 or more points at termination of employment.

(r) "Section 162(m)" means Section 162(m) of the Internal Revenue Code of 1986, as amended, and the regulation issued thereunder, as may be amended from time to time.

(s) "Section 409A" means Section 409A of the Internal Revenue Code of 1986, as amended, and the regulation issued thereunder, as may be amended from time to time.

(t) "Shares of Stock" or "Stock" means the Common Stock.

(u) "Subsidiary" means an entity of which, at the time such subsidiary status is to be determined, at least 50% of the total combined voting power of all classes of stock of such entity is held by the Company and/or one or more other subsidiaries.

(v) "Successor" means the legal representative of the estate of a deceased Grantee or the person or persons who shall acquire the right to the Market Stock Units by bequest or inheritance or by reason of the death of the Grantee.

(w) "Vest Date" means the date on which this award of Market Stock Units shall vest in accordance with the terms of this Agreement and in the Notice of Market Stock Unit Grant.

(x) "Vest Date Fair Market Value" means the average closing price of the Common Stock as reported by the Consolidated Tape of the New York Stock Exchange Listed Shares for the 29 trading days prior to the Vest Date and the Vest Date, or, if no shares were traded on such Vest Date, for the 30 trading days prior to the Vest Date.

ARTICLE II

PERFORMANCE PERIOD & AWARD CONVERSION

Subject to the terms of this Agreement, the Market Stock Units will vest, as of the Vest Date, in accordance with the terms of the Plan and this Terms of Award Agreement, or on such earlier date as provided in Article IV. On the Vest Date the Grantee shall vest in a number of shares of Common Stock for each vested Market Stock Unit based on the formula below, net of applicable taxes and withholding. Such Net Shares will be delivered to the Company's designated broker, in a brokerage account established in the Grantee's name after the Vest Date. To the extent Section 162(m) is applicable to a Grantee, for shares to vest the Committee must also determine that the performance goal set forth on Exhibit A is met. If the Committee determines that the performance goal is not met at the minimum level, as applicable, no shares will vest.

The number of shares of Common Stock that each Market Stock Unit will convert and be awarded to you on the Vest Date, net of applicable taxes, shall be determined in accordance with the following formula:

(Number of Market Stock Units granted)

Multiplied by

((the Vest Date Fair Market Value) divided by (the Grant Date Fair Market Value))

Up to a maximum of 1.5 shares of Common Stock per Market Stock Unit.

Any social security calculation or other adjustments discovered after the payment of Net Shares will be settled in cash, not in Common Stock.

ARTICLE III

CAPITAL CHANGES

In the event that the Committee shall determine that any Fundamental Corporate Event affects the Common Stock such that an adjustment is required to preserve, or to prevent enlargement of, the benefits or potential benefits made available under this Plan, then the Committee shall, in such manner as the Committee may deem equitable, adjust the number and kind of shares subject to the award of Market Stock Units. Additionally, the Committee may make provision for cash payment to a Grantee or the Successor of the Grantee to the extent permitted under Section 409A. However, the number of Market Stock Units shall always be a whole number.

ARTICLE IV

CHANGE IN CONTROL

Notwithstanding any other provision of this Agreement to the contrary, upon the occurrence of a Change in Control, the Market Stock Units not previously forfeited pursuant to this Terms of Award Agreement shall become immediately vested and convert to a number of shares of Common Stock based on the formula in Article II but such formula shall use the Fair Market Value on the date on which the Change in Control occurs rather than the Vest Date Fair Market Value. Net Shares will be payable on the Vest Date, provided however, if within the 24 month period following the Change in Control the Company terminates Grantee's employment without cause, the Net Shares will become payable as of such termination of employment date. If an award is considered deferred compensation subject to Section 409A, the award will vest but the Change in Control will not accelerate the payment of the Market Stock Units unless the Change in Control also meets the definition of change in control set forth in Treasury Regulation Section 1.409A-3(i)(5).

ARTICLE V

TERMINATION OF EMPLOYMENT

(a) Except as provided in (c) below, if, during the Performance Period, Grantee shall cease to be employed by the Company, its Subsidiaries or Affiliates, for reason of death, Long-term Disability, Retirement or involuntary termination of employment by the Company, the portion of the Market Stock Units that may vest on the Vest Date, if any, shall be calculated in accordance with the following formula: (i) the number of completed months employed commencing on the first day of the Performance Period divided by the number of months in the Performance Period; multiplied by (ii) the number of Market Stock Units that otherwise would have vested under the term of this Agreement had the Grantee remained actively employed through the Vest Date.

(b) Except as provided in (a) above, any Market Stock Unit not vested as of the date Grantee terminates employment shall be forfeited at the time of cessation of employment; provided, however, that if Grantee's employment is terminated by the Company other than for cause and Grantee has not previously, or does not subsequently, vest to any portion of the Market Stock Unit in accordance with its terms, then upon the forfeiture of the entire Market Stock Unit, the Company will pay Grantee an amount equal to the value of a single share of Common Stock, whether or not the forfeited Market Stock Unit related to more than a single share of Common Stock, calculated as of the cessation of employment, if requested by Grantee, within 30 days of such cessation of employment.

(c) No Market Stock Unit will vest after the Company has terminated the employment of the Grantee for cause, unless the Committee, in its sole discretion, deems a payment to be warranted under the particular circumstances. In addition, the Market Stock Units will not vest if Grantee has willfully engaged in gross misconduct or other serious impropriety which the Company determines is likely to be damaging or detrimental to the Company, any Subsidiary or Affiliate.

(d) Employment for purposes of determining the vesting rights of the Grantee and the expiration of the grant under this Article V shall mean continuous active full-time salaried employment with the Company, a Subsidiary or an Affiliate, except that the period during which the Grantee is on vacation, sick leave, or other pre-approved leave of absence (provided there is no actual termination of employment), shall not interrupt the continuous employment of the Grantee. Employment shall also include service with Aetna Foundation, Inc. Notwithstanding any period during which Grantee receives salary continuation or severance shall <u>not</u> be considered as part of the continuous employment of the Grantee.

ARTICLE VI

EMPLOYEE COVENANTS

(a) As consideration for this grant of Market Stock Units, without prior written consent of the Company:

(i) Grantee will not (except to the extent required by an order of a court having competent jurisdiction or under subpoena from an appropriate government agency) use or disclose to any third person, whether during or subsequent to Grantee's employment, any trade secrets, confidential information and proprietary materials, which may include, but are not limited to, the following categories of information and materials: customer lists and identities; provider lists and identities; employee lists and identities; product development and related information; marketing plans and related

information; sales plans and related information; premium or other pricing information; operating policies and manuals; research; payment rates; methodologies; procedures; contractual forms; business plans; financial records; computer programs; database; or other financial, commercial, business or technical information related to the Company or any Subsidiary or Affiliate unless such information has been previously disclosed to the public by the Company or has become public knowledge other than by a breach of this Agreement; provided, however, that this limitation shall not apply to any such use or disclosure made while Grantee is employed by the Company, any Subsidiary or Affiliate if such disclosure occurred in connection with the performance of Grantee's job as an employee of the Company, any Subsidiary or Affiliate;

(ii) Grantee will not, during and for a period of 12 months or 24 months for executive tier employees (the executive tier status determined as of the effective date of this grant) following Grantee's termination of Employment, directly or indirectly induce or attempt to induce any employee to be employed or perform services elsewhere;

(iii) Grantee will not, during and for a period of 12 months or 24 months for executive tier employees (the executive tier status determined as of the effective date of this grant) following Grantee's termination of Employment, directly or indirectly, induce or attempt to induce any agent or agency, broker, supplier or health care provider of the Company or any Subsidiary to cease or curtail providing services to the Company or any Subsidiary; and

(iv) Grantee will not, during and for a period of 12 months or 24 months for executive tier employees (the executive tier status determined as of the effective date of this grant) following Grantee's termination of Employment, directly or indirectly solicit or attempt to solicit the trade of any individual or entity which, at the time of such solicitation, is a customer of the Company, any Subsidiary or Affiliate, or which the Company, any Subsidiary or Affiliate is undertaking reasonable steps to procure as a customer at the time of or immediately preceding termination of Employment; provided, however, that this limitation shall only apply to any product or service which is in competition with a product or service of the Company, any Subsidiary or Affiliate and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved.

In addition:

(v) Following the termination of Grantee's Employment, Grantee shall provide assistance to and shall cooperate with the Company or a Subsidiary or Affiliate, upon its reasonable request and without additional compensation, with respect to matters within the scope of Grantee's duties and responsibilities during Employment, provided that any reasonable out-of-pocket expenses Grantee incurs in connection with any assistance Grantee has been requested to provide under this provision for items including, but not limited to, transportation, meals, lodging and telephone, shall be reimbursed by the Company. The Company agrees and acknowledges that it shall, to the maximum extent possible under the then prevailing circumstances, coordinate, or cause a Subsidiary or Affiliate to coordinate, any such request with Grantee's other commitments and responsibilities to minimize the degree to which such request interferes with such commitments and responsibilities; and

(vi) Grantee shall promptly notify the Company's General Counsel if Grantee is contacted by a regulatory or self-regulatory agency with respect to matters pertaining to the Company or by an

attorney or other individual who informs the Grantee that he/she has filed, intends to file, or is considering filing a claim or complaint against the Company.

(vii) Grantee acknowledges that all original works of authorship that are created by Grantee (solely or jointly with others) within the scope of Grantee's employment which are protectable by copyright are "works made for hire" as that term is defined in the United States Copyright Act (17 U.S.C., Section 101). Grantee further acknowledges that while employed by the Company, Grantee may develop ideas, inventions, discoveries, innovations, procedures, methods, know-how or other works which relate to the Company's current or are reasonably expected to relate to the Company's future business that may be patentable or subject to trade secret protection. Grantee agrees that all such works of authorship, ideas, inventions, discoveries, innovations, procedures, methods, know-how and other works shall belong exclusively to the Company, and the Grantee hereby assigns all right, title, and interest therein to the Company.

To the extent any of the foregoing works may be patentable, Grantee agrees that the Company may file and prosecute any application for patents for such works and that the Grantee will, on request, execute assignments to the Company relating to (and take all such further steps as may be reasonably necessary to perfect the Company's sole and exclusive ownership of) any such application and any patents resulting therefrom.

(b) If any provision of Article VI (a) is determined by a court of competent jurisdiction not to be enforceable in the manner set forth herein, the Company and Grantee agree that it is the intention of the parties that such provision should be enforceable to the maximum extent possible under applicable law and that such court shall reform such provision to make it enforceable in accordance with the intent of the parties.

(c) Grantee acknowledges that a material part of the inducement for the Company to grant the Market Stock Units is Grantee's covenants set forth in Article VI (a) and that the covenants and obligations of Grantee with respect to nondisclosure, non-solicitation and cooperation relate to special, unique and extraordinary matters and that a violation of any of the terms of such covenants and obligations will cause the Company irreparable injury for which adequate remedies are not available at law. Therefore, Grantee agrees that, if Grantee shall breach any of those covenants or obligations, Grantee shall not be entitled to vest in the Market Stock or be entitled to retain any income therefrom and the Company shall be entitled to an injunction, restraining order or such other equitable relief (without the requirement to post bond) restraining Grantee from committing any violation of the covenants and obligations contained in Article VI. The Company also shall be entitled to recover any attorneys' fees, costs, and expenses it incurs in connection with any judicial proceeding arising out of Grantee's breach of this Agreement. The remedies in the preceding sentences are cumulative and are in addition to any other rights and remedies the Company may have at law or in equity as a court or arbitrator shall reasonably determine.

(d) Employment Dispute Arbitration Program - <u>Mandatory Binding Arbitration of Employment Disputes.</u>

(i) Except as otherwise specified in this Agreement, the Grantee and the Company agree that all employment-related legal disputes between them will be submitted to and resolved by binding arbitration, and neither the Grantee nor the Company will file or participate as an individual party or member of a class in a lawsuit in any court against the other with respect to such matters. This shall apply to claims brought on or after the date the Grantee accepts this Agreement, even if the facts and circumstances relating to the claim occurred prior to that date and regardless of whether the Grantee or the Company previously filed a complaint/charge with a government agency concerning the claim.

For purposes of Article VI (d) of this Agreement, "the Company" includes Aetna Inc., its Subsidiaries and Affiliates, their predecessors, successors and assigns, and those acting as representatives or agents of those entities. THE GRANTEE UNDERSTANDS THAT, WITH RESPECT TO CLAIMS SUBJECT TO THE ARBITRATION REQUIREMENT, ARBITRATION REPLACES THE RIGHT OF THE GRANTEE AND THE COMPANY TO SUE OR PARTICIPATE IN A LAWSUIT. THE GRANTEE ALSO UNDERSTANDS THAT IN ARBITRATION, A DISPUTE IS RESOLVED BY AN ARBITRATOR INSTEAD OF A JUDGE OR JURY, AND THE DECISION OF THE ARBITRATOR IS FINAL AND BINDING.

(ii) THE GRANTEE UNDERSTANDS THAT THE ARBITRATION PROVISIONS OF THIS AGREEMENT AFFECT THE LEGAL RIGHTS OF THE GRANTEE AND THE COMPANY AND ACKNOWLEDGES THAT THE GRANTEE HAS BEEN ADVISED TO, AND HAS BEEN GIVEN THE OPPORTUNITY TO, OBTAIN LEGAL ADVICE BEFORE SIGNING THIS AGREEMENT.

(iii) Article VI (d) of this Agreement does not apply to workers' compensation claims, unemployment compensation claims, and claims under the Employee Retirement Income Security Act of 1974 ("ERISA") for employee benefits. A dispute as to whether Article VI (d) of this Agreement applies must be submitted to the binding arbitration process set forth in this Agreement.

(iv) The Grantee and/or the Company may seek emergency or temporary injunctive relief from a court (including with respect to claims arising out of Article VI (a) in accordance with applicable law). However, except as provided in Article VI (c) of this Agreement, after the court has issued a ruling concerning the emergency or temporary injunctive relief, the Grantee and the Company shall be required to submit the dispute to binding arbitration pursuant to this Agreement.

(v) Unless otherwise agreed, the arbitration will be administered by the American Arbitration Association (the "AAA") and will be conducted pursuant to the AAA's Employment Arbitration Rules and Mediation Procedures (the "Rules"), as modified in this Agreement, in effect at the time the request for arbitration is filed. The AAA's Rules are available on the AAA's website at www.adr.org. THE GRANTEE ACKNOWLEDGES THAT THE COMPANY HAS ENCOURAGED THE GRANTEE TO READ THESE RULES PROMPTLY AND CAREFULLY AND THAT THE GRANTEE HAS BEEN AFFORDED SUFFICIENT OPPORTUNITY TO DO SO.

(vi) If the Company initiates a request for arbitration, the Company will pay all of the administrative fees and costs charged by the AAA, including the arbitrator's compensation and charges for hearing room rentals, etc. If the Grantee initiates a request for arbitration or submits a counterclaim to the Company's request for arbitration, the Grantee shall be required to contribute One Hundred Dollars ($100.00) to those administrative fees and costs, payable to the AAA at the time the Grantee's request for arbitration or counterclaim is submitted. The Company may increase the contribution amount in the future without amending this Agreement, but not to exceed the maximum permitted under the AAA rules then in effect. In all cases, the Grantee and the Company shall be responsible for payment of any fees assessed by the arbitrator as a result of that party's delay, request for postponement, failure to comply with the arbitrator's rulings and for other similar reasons.

(vii) The Grantee and the Company may choose to be represented by legal counsel in the arbitration process and shall be responsible for their own legal fees, expenses and costs. However, the

arbitrator shall have the same authority as a court to order the Grantee or the Company to pay some or all of the other's legal fees, expenses and costs, in accordance with applicable law.

(viii) Unless otherwise agreed, there shall be a single arbitrator, selected by the Grantee and the Company from a list of qualified neutrals furnished by the AAA. If the Grantee and the Company cannot agree on an arbitrator, one will be selected by the AAA.

(ix) Unless otherwise agreed, the arbitration hearing will take place in the city where the Grantee works or last worked for the Company. If the Grantee and the Company disagree as to the proper locale, the AAA will decide.

(x) The Grantee and the Company shall be entitled to conduct limited pre-hearing discovery. Each may take the deposition of one person and anyone designated by the other as an expert witness. The party taking the deposition shall be responsible for all associated costs, such as the cost of a court reporter and the cost of an original transcript. Each party also has the right to submit one set of ten written questions (including subparts) to the other party, which must be answered under oath, and to request and obtain all documents on which the other party relies in support of its answers to the written questions. Additional discovery may be permitted by the arbitrator upon a showing that it is necessary for that party to have a fair opportunity to present a claim or defense.

(xi) The arbitrator shall apply the same substantive law that would apply if the matter were heard by a court and shall have the authority to order the same remedies (but no others) as would be available in a court proceeding. The time limits for requesting arbitration or submitting a counterclaim and the administrative prerequisites for filing an arbitration claim or counterclaim are the same as they would be in a court proceeding. The arbitrator shall consider and decide any dispositive motions (motions seeking a decision on some or all of the claims or counterclaims without an arbitration hearing) filed by any party.

(xii) All proceedings, including the arbitration hearing and decision, are private and confidential, unless otherwise required by law. Arbitration decisions may not be published or publicized without the consent of both the Grantee and the Company.

(xiii) Unless otherwise agreed, the arbitrator's decision will be in writing with a brief summary of the arbitrator's opinion.

(xiv) The arbitrator's decision is final and binding on the Grantee and the Company. After the arbitrator's decision is issued, the Grantee or the Company may obtain an order of judgment from a court and may obtain a court order enforcing the decision. The arbitrator's decision may be appealed to the courts only under the limited circumstances provided by law.

(xv) If the Grantee previously signed an agreement, including but not limited to an employment agreement, containing arbitration provisions, those provisions are superseded by the arbitration provisions of this Agreement.

(xvi) If any provision of Article VI (d) is found to be void or otherwise unenforceable, in whole or in part, this shall not affect the validity of the remainder of Article VI (d) and the remainder of the Agreement. All other provisions shall remain in full force and effect.

(e) Except as provided in connection with mandatory binding arbitration of employment disputes, Grantee hereby submits to the exclusive jurisdiction of the courts of the State of Connecticut and the United States District Court for the District of Connecticut with respect to any action relating to this Agreement, and agrees that (i) the sole and exclusive appropriate venue for any suit or proceeding relating to this Agreement shall be in such court, and (ii) hereby waives any and all objections and defenses based on forum, venue or personal or subject matter jurisdiction as they may relate to a suit or proceeding brought before such court in accordance with the Agreement.

For purposes of this Article VI, the term "Employment" shall refer to active employment with the Company, any Subsidiary or Affiliate, and shall not include salary continuation or severance periods.

ARTICLE VII

OTHER TERMS

(a) Nothing in this Agreement shall interfere with or limit in any way the right of the Company or any Subsidiary or Affiliate to terminate the Grantee's employment at any time. Neither the execution and delivery hereof nor the granting of the Award shall constitute or be evidence of any agreement or understanding, express or implied, on the part of the Company or any of its Subsidiaries to employ or continue the employment of the Grantee for any period.

(b) Until the Market Stock Units have become vested, Grantee shall not have any rights as a stockholder (including the right to payment of dividends) by virtue of this grant of Market Stock Units.

(c) During the Performance Period, the Market Stock Units shall be nontransferable and non-assignable except by will or the laws of descent and distribution.

(d) The award, when vested, will be settled on a net basis. Prior to issuing any Common Shares, the Company will withhold an amount sufficient to satisfy federal, state, local, social security and Medicare withholding tax requirements relating to award. Any social security calculation or other adjustments discovered after net share payment will be settled in cash, not in Shares of Common Stock. Vesting will result in taxable compensation reportable on the Grantee's W-2 in year of vesting.

(e) The Company may from time to time adopt stock ownership requirements applicable to Grantees who are senior managers of the Company. In connection with and for the purpose of implementing those ownership requirements, the Company may adopt certain restrictions on the ability of a Grantee to sell shares issued under this Agreement when such ownership requirements have not been satisfied. Any such restriction on sale will be communicated generally to affected Grantees and the restriction may be modified by the Company from time to time, at its discretion. Neither the Company nor its Board of Directors shall have any obligation or liability to a Grantee in connection with any such restriction.

(f) This Market Stock Unit is an unfunded obligation of the Company and nothing in this Agreement shall be construed to create any claim against particular assets or require the Company to segregate or otherwise set aside any assets or create any fund to meet its obligations hereunder.

(g) Anything herein to the contrary notwithstanding, a Grantee whose Market Stock Units have been forfeited as a result of termination of employment due to U.S. Military Service and who is later re-employed (in a full-time active status) after discharge within the time period set in 38 U.S.C. Section 4312 will be eligible to have the forfeited Market Stock Units reinstated as follows: (i) if such Grantee is re-employed during the Performance Period, all forfeited Market Stock Units shall be reinstated; or (ii) if such Grantee is re-employed after the Performance Period, a cash payment will be made to the Grantee, minus applicable taxes, for the value of the forfeited Market Stock Units on the Vest Date pursuant to procedures established by the Company for this purpose.

(h) It is the intention of the Company and Grantee that this Agreement not result in unfavorable tax consequences to Grantee under Section 409A and the Agreement shall be interpreted as to so comply. Notwithstanding anything to the contrary herein, the Company and Grantee agree to the provisions set forth below in order to comply with the requirements of Section 409A.

(i) If Grantee is a "specified employee" (within the meaning of Section 409A) with respect to the Company, any non-qualified deferred compensation otherwise payable to or in respect of Grantee in connection with Grantee's termination of employment shall be delayed until the earliest date upon which such amounts may be paid without being subject to taxation under Section 409A. Any amount, the payment or benefit of which is delayed by application of the preceding sentence, shall be paid as soon as possible following the expiration of such period.

(ii) Unless deferred pursuant to this agreement, all payments shall be paid to Grantee, to the extent earned, in no event later than the last day of the "applicable 2 ½ month period," as such term is defined in Treasury Regulation Section 1.409A-1(b)(4)(i)(A) with respect to such payment's treatment as a "short-term deferral" for purposes of Section 409A.

(iii) The Company and Grantee agree to cooperate in good faith in an effort to comply with Section 409A. Under no circumstances shall the Company be responsible for any taxes, penalties, interest or other losses or expenses incurred by the Grantee due to any failure to comply with Section 409A.

(i) This Agreement is subject to the 2010 Stock Incentive Plan heretofore adopted by the Company and approved by its shareholders. The terms and provisions of the Plan (including any subsequent amendments thereto) are hereby incorporated herein by reference. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern and prevail.

(j) At such times and upon such terms and conditions as the Company shall determine, the Company may permit eligible Grantees to elect to defer the distribution of an Award otherwise payable to the Grantee under this Agreement until termination of the Grantee's Employment or such other date Company shall permit.

(k) This Agreement is made under and shall be governed by and construed in accordance with the laws of the State of Connecticut, without giving effect to its choice of law provisions.

Exhibit 10.46

AETNA INC.
2010 STOCK INCENTIVE PLAN

PERFORMANCE STOCK UNIT TERMS OF AWARD

Performance Period: [ ] through [ ]
Units Awarded: [ ]
Performance Metric: [ ]
Vesting Period - [ ] month period following the Effective Date (Date of Grant)

Pursuant to its 2010 Stock Incentive Plan (the "Plan"), Aetna Inc. (the "Company") hereby grants Performance Stock Units (PSUs) on the terms and conditions hereinafter set forth. The number of Performance Stock Units awarded is included in the website of the designated broker, currently UBS Financial Services, Inc., and in the Notice of the Performance Stock Unit Grant Acknowledgement and Acceptance Form. All capitalized terms used herein which are not otherwise defined herein shall have the meaning specified in the Plan.

ARTICLE I

DEFINITIONS

(a) "Affiliate" means an entity at least a majority of the total voting power of the then-outstanding voting securities of which is held, directly or indirectly, by the Company and/or one or more other Affiliates.

(b) "Board" means the Board of Directors of Aetna Inc.

(c) "Change in Control" means the happening of any of the following:

(i) When any "person" as defined in Section 3(a)(9) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and as used in Sections 13(d) and 14(d) thereof, including a "group" as defined in Section 13(d) of the Exchange Act but excluding the Company and any Subsidiary thereof and any employee benefit plan sponsored or maintained by the Company or any Subsidiary (including any trustee of such plan acting as trustee), directly or indirectly, becomes the "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act, as amended from time to time), of securities of the Company representing 20 percent or more of the combined voting power of the Company's then outstanding securities;

(ii) When, during any period of 24 consecutive months, the individuals who, at the beginning of such period, constitute the Board (the "Incumbent Directors") cease for any reason other than death to constitute at least a majority thereof, provided that a director who was not a director at the beginning of such 24-month period shall be deemed to have satisfied such 24-month requirement (and be an Incumbent Director) if such director was elected by, or on the recommendation of or with the approval of, at least two-thirds of the directors who then qualified as Incumbent Directors either actually (because they were directors at the beginning of such 24-month period) or by prior operation of this paragraph (ii); or

(iii) The occurrence of a transaction requiring stockholder approval for the acquisition of the Company by an entity other than the Company or a Subsidiary through purchase of assets, or by merger, or otherwise.

Notwithstanding the foregoing, in no event shall a “Change in Control” be deemed to have occurred (i) as a result of the formation of a Holding Company, or (ii) with respect to Grantee, if Grantee is part of a “group,” within the meaning of Section 13(d)(3) of the Exchange Act as in effect on the effective date, which consummates the Change in Control transaction. In addition, for purposes of the definition of “Change in Control” a person engaged in business as an underwriter of securities shall not be deemed to be the “Beneficial Owner” of, or to “beneficially own,” any securities acquired through such person’s participation in good faith in a firm commitment underwriting until the expiration of forty days after the date of such acquisition.

(d) "Committee" means the Board's Committee on Compensation and Organization or any successor thereto.

(e) "Common Stock" means the Company's Common Shares, $.01 par value per share.

(f) "Company" means Aetna Inc.

(g) "Effective Date" means the date of grant of this award of Performance Stock Units.

(h) “Fair Market Value" means the closing price of the Common Stock as reported by the Consolidated Tape of the New York Stock Exchange Listed Shares on the date such value is to be determined, or, if no shares were traded on such date, on the next day on which the Common Stock is traded.

(i) “Fundamental Corporate Event” shall mean any stock dividend, extraordinary cash dividend, recapitalization, reorganization, merger, consolidation, split-up, spin-off, combination, exchange of shares, warrants or rights offering to purchase Common Stock at a price substantially below fair market value, or similar event.

(j) "Grantee" means the person to whom this award has been granted.

(k) “Holding Company” means an entity that becomes a holding company for the Company or its businesses as a part of any reorganization, merger, consolidation or other transaction, provided that the outstanding shares of common stock of such entity and the combined voting power of the then outstanding voting securities of such entity entitled to vote generally in the election of directors is, immediately after such reorganization, merger, consolidation or other transaction, beneficially owned, directly or indirectly, by all or substantially all of the individuals and entities who were the beneficial owners, respectively, of the voting stock outstanding immediately prior to such reorganization, merger, consolidation or other transaction in substantially the same proportions as their ownership, immediately prior to such reorganization, merger, consolidation or other transaction, of such outstanding voting stock.

(l) "Long Term Disability" means long-term disability as defined under the terms of the Company's applicable long-term disability plans or policies.

(m) “Net Shares” means the number of shares of Common Stock which will be deposited in a brokerage account in the Grantee’s name at the Company’s designated broker after shares have been withheld to satisfy applicable tax and withholding requirements upon vesting of the Performance Stock Units.

(n) “Performance Period” means the [ ] month performance period ending [date]. The Performance Period shall run from [date] to [date].

(o) “Performance Stock Units” means the number of shares of Common Stock represented by the number of units awarded or such other amount as may result by operation of Article III of this Agreement.

(p) “Plan” means the Aetna Inc. 2010 Stock Incentive Plan.

(q) "Retirement" means the termination of employment of a Grantee from active service with the Company, any Subsidiary or Affiliate provided the Grantee’s age and completed years of service total 65 or more points at termination of employment.

(r) “Section 409A” means Section 409A of the Internal Revenue Code of 1986, as amended, and the regulation issued thereunder, as may be amended from time to time.

(s) “Shares of Stock” or “Stock” means the Common Stock.

(t) "Subsidiary" means an entity of which, at the time such subsidiary status is to be determined, at least 50% of the total combined voting power of all classes of stock of such entity is held by the Company and/or one or more other subsidiaries.

(u) "Successor" means the legal representative of the estate of a deceased Grantee or the person or persons who shall acquire the right to the Performance Stock Units by bequest or inheritance or by reason of the death of the Grantee.

(v) “Vest Date” means the last day of the Vesting Period and is the date on which this award of Performance Stock Units shall vest in accordance with the terms of this Agreement and in the Notice of Performance Stock Unit Grant, if at all.

(w) “Vesting Period” means the period beginning on the Effective Date and ending thirty-six months thereafter.

ARTICLE II

VESTING PERIOD

Subject to the terms of this Agreement, the Performance Stock Units will vest, as of the Vest Date, in accordance with the terms of the Plan and this Terms of Award Agreement, or on such earlier date as provided in Article IV. If the Committee determines that the performance goal set forth on Exhibit A is met, on the Vest Date, the Grantee shall vest to one share of Common Stock for each vested Performance Stock Unit net of applicable taxes and withholding (or such greater or lessor amount based on performance, as set forth on Exhibit A). Such Net Shares will be delivered to the Company's designated broker, in a brokerage account established in the Grantee's name after the Vest Date. If the Committee determines that the performance goal set forth on Exhibit A is not met at the minimum level, no shares will vest.

Any social security calculation or other adjustments discovered after the payment of Net Shares will be settled in cash not in Common Stock.

ARTICLE III

CAPITAL CHANGES

In the event that the Committee shall determine that any Fundamental Corporate Event affects the Common Stock such that an adjustment is required to preserve, or to prevent enlargement of, the benefits or potential benefits made available under this Plan, then the Committee shall, in such manner as the Committee may deem equitable, adjust the number and kind of shares subject to the award of Performance Stock Units. Additionally, the Committee may make provision for cash payment to a Grantee or the Successor of the Grantee. However, the number of Performance Stock Units shall always be a whole number.

ARTICLE IV

CHANGE IN CONTROL

Notwithstanding any other provision of this Agreement to the contrary, upon the occurrence of a Change in Control, the Performance Stock Units not previously forfeited pursuant to this Terms of Award Agreement shall become immediately vested at a level which equals the greater of the number of Performance Stock Units that would have vested (x) at target-level 100% vesting, or (y) based on the Company's actual year-to-date performance level using the date on which the Change in Control occurs as the end of the Vesting Period. Net Shares will be payable on the Vest Date, provided however, if within the 24 month period following the Change in Control the Company terminates Grantee's employment without cause, the Net Shares will become payable as of such termination of employment date. If an award is considered deferred compensation subject to Section 409A, the award will vest but the Change in Control will not accelerate the payment of the deferred Performance Stock Units unless the Change in Control also meets the definition of change in control set forth in Treasury Regulation Section 1.409A-3(i)(5).

ARTICLE V

TERMINATION OF EMPLOYMENT

(a) Except as provided in (c) below, if, during the Vesting Period, Grantee shall cease to be employed by the Company, any Subsidiaries or Affiliates, for reason of death, Long-term Disability, Retirement or involuntary termination of employment by the Company, the portion of the Performance Stock Units that may vest on the Vest Date, if any, shall be calculated in accordance with the following formula: (i) the number of completed months employed during the Vesting period divided by the number of months in the Vesting Period; multiplied by (ii) the number of Performance Stock Units, that otherwise would have vested. For purposes of this calculation, a month is complete on the day in the month that corresponds to the Effective Date of the grant (e.g., February 12 to March 12).

(b) Except as provided in (a) above, any Performance Stock Unit not vested as of the date Grantee terminates employment shall be forfeited at the time of cessation of employment; provided, however, that if Grantee's employment is terminated by the Company other than for cause and Grantee has not previously, or does not subsequently, vest to any portion of the Performance Stock Unit in accordance with its terms, then upon the forfeiture of the entire Performance Stock Unit, the Company will pay Grantee an amount equal to the value of a single share of Common Stock, whether or not the forfeited Performance Stock Unit related to more than a single share of Common Stock, calculated as of the cessation of employment, if requested by Grantee, within 30 days of such cessation of employment.

(c) No Performance Stock Unit will vest after the Company has terminated the employment of the Grantee for cause, unless the Committee, in its sole discretion, deems a payment to be warranted under the particular circumstances. In addition, the Performance Stock Units will not vest if Grantee has willfully engaged in gross misconduct or other serious impropriety which the Company determines is likely to be damaging or detrimental to the Company, any Subsidiary or Affiliate.

(d) Employment for purposes of determining the vesting rights of the Grantee and the expiration of the grant under this Article V shall mean continuous active full-time salaried employment with the Company, any Subsidiary or Affiliate, except that the period during which the Grantee is on vacation, sick leave, or other pre-approved leave of absence (provided there is no actual termination of employment), shall not interrupt the continuous employment of the Grantee. Employment shall also include service with Aetna Foundation, Inc. Notwithstanding any period during which Grantee receives salary continuation or severance shall not be considered as part of the continuous employment of the Grantee.

ARTICLE VI

EMPLOYEE COVENANTS

(a) As consideration for this grant of Performance Stock Units, without prior written consent of the Company:

(i) Grantee will not (except to the extent required by an order of a court having competent jurisdiction or under subpoena from an appropriate government agency) use or disclose to any third person, whether during or subsequent to Grantee's employment, any trade secrets, confidential information and proprietary materials, which may include, but are not limited to, the following categories of information and materials: customer lists and identities; provider lists and identities; employee lists and identities; product development and related information; marketing plans and related information; sales plans and related information; premium or other pricing information; operating policies and manuals; research; payment rates; methodologies; procedures; contractual forms; business plans; financial records; computer programs; database; or other financial, commercial, business or technical information related to the Company, any Subsidiary or Affiliate unless such information has been previously disclosed to the public by the Company or has become public knowledge other than by a breach of this Agreement ("Confidential Information"); provided, however, that this limitation shall not apply to any such use or disclosure made while Grantee is employed by the Company, any Subsidiary or Affiliate if such disclosure occurred in connection with the performance of Grantee's job as an employee of the Company, any Subsidiary or Affiliate;

(ii) Grantee will not, during and for a period of twelve (12) months following Grantee's termination of employment, directly or indirectly, (x) engage in the ownership (except less than 1% of the outstanding capital stock of any publicly traded company) of or, (y) become an employee of, or (z) act as a consultant or contractor to, any competitor of the Company ("Competitor") in any market in the United States where Company, Affiliate or Subsidiary does business.

a. For purposes of this paragraph "Competitor" shall mean any entity, organization, person or corporation that is involved in the same business as Company, Subsidiary or Affiliate, but in the case of (y) and (z), only to the extent such work, consulting or other activity on behalf of other entity, organization, person or corporation

i. is materially similar to the duties and/or functions that Grantee performed for the Company, Subsidiary or Affiliate in the last 12 months or involves duties and/or functions for Competitor about which Grantee has Confidential Information in the last 12 months. Notwithstanding

1. with respect to sales functions for the Company, Subsidiary or Affiliate that are regionally based or whose focus is geographically limited, the restriction shall only apply where such work, consulting or other activity on behalf of a Competitor overlaps in whole or in part the same geographic area in which the Grantee worked for Company, Subsidiary or Affiliate in the last 12 months;

2. with respect to corporate staff functions, the restriction shall only apply where Competitor is substantially engaged in the business of health insurance, managed health care, population health management, or related products or services.

b. Notwithstanding, if Grantee's employment is terminated by the Company, Subsidiary or Affiliate other than for cause, the length of the noncompetition covenant in this paragraph shall not exceed the length of the severance and/or salary continuation benefits paid by the Company, Subsidiary or Affiliate to Grantee.

c. Grantee acknowledges and agrees that these restrictions:

i. are necessary to protect the Confidential Information and goodwill of the Company, Subsidiary or Affiliate;

ii. are appropriately tailored and limited in time and geographic scope to do so; and

iii. do not impair or limit the Grantee's ability to earn a living.

(iii) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly induce or attempt to induce any employee of the Company, any Subsidiary or Affiliate to be employed or perform services elsewhere;

(iv) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly, induce or attempt to induce any agent or agency, broker, supplier or health care provider of the Company, any Subsidiary or Affiliate to cease or curtail providing services to the Company, any Subsidiary or Affiliate; and

(v) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly solicit or attempt to solicit the trade of any individual or entity which, at the time of such solicitation, is a customer of the Company, any Subsidiary or Affiliate, or which the Company, any Subsidiary or Affiliate is undertaking reasonable steps to procure as a customer at the time of or immediately preceding termination of Employment; provided, however, that this limitation shall only apply to any product or service which is in competition with a product or service of the Company, any Subsidiary or Affiliate and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved.

(vi) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, for himself or herself or on behalf of or in cooperation with any other person or entity, consult with or in any manner provide advice to, any individual or entity which is a customer of the Company or any Subsidiary or Affiliate of the Company, provided, however, that this limitation shall apply only to consultation or advice relating to any product or service of the Company, or any Subsidiary or Affiliate, or which is in competition with any product or service of the Company, or any Subsidiary or Affiliate, and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved, or about which Grantee has Confidential Information.

In addition:

(vii) Following the termination of Grantee's Employment, Grantee shall provide assistance to and shall cooperate with the Company, any Subsidiary or Affiliate, upon its reasonable request and without additional compensation, with respect to matters within the scope of Grantee's duties and responsibilities during Employment, provided that any reasonable out-of-pocket expenses Grantee incurs in connection with any assistance Grantee has been requested to provide under this provision for items including, but not limited to, transportation, meals, lodging and telephone, shall be reimbursed by the Company. The Company agrees and acknowledges that it shall, to the maximum extent possible under the then prevailing circumstances, coordinate, or cause a Subsidiary or Affiliate to coordinate, any such request with Grantee's other commitments and responsibilities to minimize the degree to which such request interferes with such commitments and responsibilities; and

(viii) Grantee shall promptly notify the Company's General Counsel if Grantee is contacted by a regulatory or self-regulatory agency with respect to matters pertaining to the Company or by an attorney or other individual who informs the Grantee that he/she has filed, intends to file, or is considering filing a claim or complaint against the Company.

(ix) Grantee acknowledges that all original works of authorship that are created by Grantee (solely or jointly with others) within the scope of Grantee's employment and relating in any way to the business or contemplated business, products, activities, research or development of the Company, any Subsidiary or Affiliate, or resulting from any work performed by the Grantee for the Company, any Subsidiary or Affiliate (in each case, regardless of when or where the work product is prepared or whose equipment or other resources is used in preparing the same) which are protectable by copyright are "works made for hire" as that term is defined in the United States Copyright Act (17 U.S.C., Section 101). To the extent that the foregoing does not apply, the Grantee hereby irrevocably assigns to the Company, and its successors and assigns, for no additional consideration, the Grantee's entire right, title and interest in and to all such works of authorship. Grantee further acknowledges that while employed by the Company, any Subsidiary or Affiliate, Grantee may develop ideas, inventions, discoveries, innovations, procedures, methods, know-how or other works which relate to the Company's current or are reasonably expected to relate to the Company's future business (in each case, regardless of when or where the work product is prepared or whose equipment or other resources is used in preparing the same) that may be patentable or subject to trade secret protection. Grantee agrees that all such works of authorship, ideas, inventions, discoveries, innovations, procedures, methods, know-how and other works shall belong exclusively to the Company, and the Grantee hereby assigns all right, title, and interest therein to the Company.

To the extent any of the foregoing works may be patentable, Grantee agrees that the Company may file and prosecute any application for patents for such works and that the Grantee will, on request, execute assignments to the Company relating to (and take all such further steps as may be reasonably necessary to perfect the Company's sole and exclusive ownership of) any such application and any patents resulting there from.

(b) If any provision of Article VI (a) is determined by a court of competent jurisdiction not to be enforceable in the manner set forth herein, the Company and Grantee agree that it is the intention of the parties that such provision should be enforceable to the maximum extent possible under applicable law and that such court shall reform such provision to make it enforceable in accordance with the intent of the parties.

(c) Grantee acknowledges that a material part of the inducement for the Company to grant the Performance Stock Units is Grantee's covenants set forth in Article VI (a) and that the covenants and obligations of Grantee with respect to nondisclosure, non-solicitation and cooperation relate to special, unique and extraordinary matters and that a violation of any of the terms of such covenants and obligations will cause the Company irreparable injury for which adequate remedies are not available at law. Therefore, Grantee agrees that, if Grantee shall breach any of those covenants or obligations, Grantee shall not be entitled to vest in the Performance Stock or be entitled to retain any income therefrom and the Company shall be entitled to an injunction, restraining order or such other equitable relief (without the requirement to post bond) restraining Grantee from committing any violation of the covenants and obligations contained in Article VI. The Company also shall be entitled to recover any attorneys' fees, costs, and expenses it incurs in connection with any judicial proceeding arising out of Grantee's breach of this Agreement. The remedies in the preceding sentences are cumulative and are in addition to any other rights and remedies the Company may have at law or in equity as a court or arbitrator shall reasonably determine.

(d) The Restrictive Covenants set forth in this Article VI shall supplement and do not supersede the restrictions agreed to by Grantee in any other agreement or contract.

(e) Employment Dispute Arbitration Program - <u>Mandatory Binding Arbitration of Employment Disputes.</u>

(i) Except as otherwise specified in this Agreement, the Grantee and the Company agree that all employment-related legal disputes between them will be submitted to and resolved by binding arbitration, and neither the Grantee nor the Company will file or participate as an individual party or member of a class in a lawsuit in any court against the other with respect to such matters. This shall apply to claims brought on or after the date the Grantee accepts this Agreement, even if the facts and circumstances relating to the claim occurred prior to that date and regardless of whether the Grantee or the Company previously filed a complaint/charge with a government agency concerning the claim.

For purposes of Article VI (e) of this Agreement, "the Company" includes Aetna Inc., its Subsidiaries and Affiliates, their predecessors, successors and assigns, and those acting as representatives or agents of those entities. THE GRANTEE UNDERSTANDS THAT, WITH RESPECT TO CLAIMS SUBJECT TO THE ARBITRATION REQUIREMENT, ARBITRATION REPLACES THE RIGHT OF THE GRANTEE AND THE COMPANY TO SUE OR PARTICIPATE IN A LAWSUIT. THE GRANTEE ALSO UNDERSTANDS THAT IN ARBITRATION, A DISPUTE IS RESOLVED BY AN ARBITRATOR INSTEAD OF A JUDGE OR JURY, AND THE DECISION OF THE ARBITRATOR IS FINAL AND BINDING.

(ii) THE GRANTEE UNDERSTANDS THAT THE ARBITRATION PROVISIONS OF THIS AGREEMENT AFFECT THE LEGAL RIGHTS OF THE GRANTEE AND THE COMPANY AND ACKNOWLEDGES THAT THE GRANTEE HAS BEEN ADVISED TO, AND HAS BEEN GIVEN THE OPPORTUNITY TO, OBTAIN LEGAL ADVICE BEFORE SIGNING THIS AGREEMENT.

(iii) Article VI (e) of this Agreement does not apply to workers' compensation claims, unemployment compensation claims, and claims under the Employee Retirement Income Security Act of 1974 ("ERISA") for employee benefits. A dispute as to whether Article VI (e) of this Agreement applies must be submitted to the binding arbitration process set forth in this Agreement.

(iv) The Grantee and/or the Company may seek emergency or temporary injunctive relief from a court (including with respect to claims arising out of Article VI (a) in accordance with applicable law). However, except as provided in Article VI (c) of this Agreement, after the court has issued a ruling concerning the emergency or temporary injunctive relief, the Grantee and the Company shall be required to submit the dispute to binding arbitration pursuant to this Agreement .

(v) Unless otherwise agreed, the arbitration will be administered by the American Arbitration Association (the "AAA") and will be conducted pursuant to the AAA's Employment Arbitration Rules and Mediation Procedures (the "Rules"), as modified in this Agreement, in effect at the time the request for arbitration is filed. The AAA's Rules are available on the AAA's website at www.adr.org . THE GRANTEE ACKNOWLEDGES THAT THE COMPANY HAS ENCOURAGED THE GRANTEE TO READ THESE RULES PROMPTLY AND CAREFULLY AND THAT THE GRANTEE HAS BEEN AFFORDED SUFFICIENT OPPORTUNITY TO DO SO.

(vi) If the Company initiates a request for arbitration, the Company will pay all of the administrative fees and costs charged by the AAA, including the arbitrator's compensation and charges for hearing room rentals, etc. If the Grantee initiates a request for arbitration or submits a counterclaim to the Company's request for arbitration, the Grantee shall be required to contribute One Hundred Dollars ($100.00) to those administrative fees and costs, payable to the AAA at the time the Grantee's request for arbitration or counterclaim is submitted. The Company may increase the contribution amount in the future without amending this Agreement, but not to exceed the maximum permitted under the AAA rules then in effect. In all cases, the Grantee and the Company shall be responsible for payment of any fees assessed by the arbitrator as a result of that party's delay, request for postponement, failure to comply with the arbitrator's rulings and for other similar reasons.

(vii) The Grantee and the Company may choose to be represented by legal counsel in the arbitration process and shall be responsible for their own legal fees, expenses and costs. However, the arbitrator shall have the same authority as a court to order the Grantee or the Company to pay some or all of the other's legal fees, expenses and costs, in accordance with applicable law.

(viii) Unless otherwise agreed, there shall be a single arbitrator, selected by the Grantee and the Company from a list of qualified neutrals furnished by the AAA. If the Grantee and the Company cannot agree on an arbitrator, one will be selected by the AAA.

(ix) Unless otherwise agreed, the arbitration hearing will take place in the city where the Grantee works or last worked for the Company. If the Grantee and the Company disagree as to the proper locale, the AAA will decide.

(x) The Grantee and the Company shall be entitled to conduct limited pre-hearing discovery. Each may take the deposition of one person and anyone designated by the other as an expert witness. The party taking the deposition shall be responsible for all associated costs, such as the cost of a

court reporter and the cost of an original transcript. Each party also has the right to submit one set of ten written questions (including subparts) to the other party, which must be answered under oath, and to request and obtain all documents on which the other party relies in support of its answers to the written questions. Additional discovery may be permitted by the arbitrator upon a showing that it is necessary for that party to have a fair opportunity to present a claim or defense.

(xi) The arbitrator shall apply the same substantive law that would apply if the matter were heard by a court and shall have the authority to order the same remedies (but no others) as would be available in a court proceeding. The time limits for requesting arbitration or submitting a counterclaim and the administrative prerequisites for filing an arbitration claim or counterclaim are the same as they would be in a court proceeding. The arbitrator shall consider and decide any dispositive motions (motions seeking a decision on some or all of the claims or counterclaims without an arbitration hearing) filed by any party.

(xii) All proceedings, including the arbitration hearing and decision, are private and confidential, unless otherwise required by law. Arbitration decisions may not be published or publicized without the consent of both the Grantee and the Company.

(xiii) Unless otherwise agreed, the arbitrator's decision will be in writing with a brief summary of the arbitrator's opinion.

(xiv) The arbitrator's decision is final and binding on the Grantee and the Company. After the arbitrator's decision is issued, the Grantee or the Company may obtain an order of judgment from a court and may obtain a court order enforcing the decision. The arbitrator's decision may be appealed to the courts only under the limited circumstances provided by law.

(xv) If the Grantee previously signed an agreement, including but not limited to an employment agreement, containing arbitration provisions, those provisions are superseded by the arbitration provisions of this Agreement.

(xvi) If any provision of Article VI (e) is found to be void or otherwise unenforceable, in whole or in part, this shall not affect the validity of the remainder of Article VI (e) and the remainder of the Agreement. All other provisions shall remain in full force and effect.

(f) Except as provided in connection with mandatory binding arbitration of employment disputes, Grantee hereby submits to the exclusive jurisdiction of the courts of the State of Connecticut and the United States District Court for the District of Connecticut with respect to any action relating to this Agreement, and agrees that (i) the sole and exclusive appropriate venue for any suit or proceeding relating to this Agreement shall be in such court, and (ii) hereby waives any and all objections and defenses based on forum, venue or personal or subject matter jurisdiction as they may relate to a suit or proceeding brought before such court in accordance with the Agreement.

For purposes of this Article VI, the term "Employment" shall refer to active employment with the Company, any Subsidiary or Affiliate, and shall not include salary continuation or severance periods.

ARTICLE VII

OTHER TERMS

(a) Nothing in this Agreement shall interfere with or limit in any way the right of the Company, any Subsidiary or Affiliate to terminate the Grantee's employment at any time. Neither the execution and delivery hereof nor the granting of the Award shall constitute or be evidence of any agreement or understanding, express or implied, on the part of the Company or any of its Subsidiaries to employ or continue the employment of the Grantee for any period.

(b) Until the Performance Stock Units have become vested, Grantee shall not have any rights as a stockholder (including the right to payment of dividends) by virtue of this grant of Performance Stock Units.

(c) During the Vesting Period, the Performance Stock Units shall be nontransferable and non-assignable except by will or the laws of descent and distribution.

(d) The award, when vested, will be settled on a net basis. Prior to issuing any Common Shares, the Company will withhold an amount sufficient to satisfy federal, state, local, social security and Medicare withholding tax requirements relating to award. Any social security calculation or other adjustments discovered after net share payment will be settled in cash, not in Shares of Common Stock. Vesting will result in taxable compensation reportable on the Grantee's W-2 in year of vesting.

(e) The Company may from time to time adopt stock ownership requirements applicable to Grantees who are senior managers of the Company. In connection with and for the purpose of implementing those ownership requirements, the Company may adopt certain restrictions on the ability of a Grantee to sell shares issued under this Agreement when such ownership requirements have not been satisfied. Any such restriction on sale will be communicated generally to affected Grantees and the restriction may be modified by the Company from time to time, at its discretion. Neither the Company nor its Board of Directors shall have any obligation or liability to a Grantee in connection with any such restriction.

(f) This Performance Stock Unit is an unfunded obligation of the Company and nothing in this Agreement shall be construed to create any claim against particular assets or require the Company to segregate or otherwise set aside any assets or create any fund to meet its obligations hereunder.

(g) Anything herein to the contrary notwithstanding, a Grantee whose Performance Stock Units have been forfeited as a result of termination of employment due to U.S. Military Service and who is later re-employed (in a full-time active status) after discharge within the time period set in 38 U.S.C. Section 4312 will be eligible to have the forfeited Performance Stock Units reinstated as follows: (i) if such Grantee is re-employed during the Vesting Period, all forfeited Performance Stock Units shall be reinstated; or (ii) if such Grantee is re-employed after the Vesting Period, a cash payment will be made to the Grantee, minus applicable taxes, for the value of the forfeited Performance Stock Units on the Vest Date pursuant to procedures established by the Company for this purpose.

(h) It is the intention of the Company and Grantee that this Agreement not result in unfavorable tax consequences to Grantee under Section 409A and the Agreement shall be interpreted as to so comply. Notwithstanding anything to the contrary herein, the Company and Grantee agree to the provisions set forth below in order to comply with the requirements of Section 409A.

(i) If Grantee is a "specified employee" (within the meaning of Section 409A) with respect to the Company, any non-qualified deferred compensation otherwise payable to or in respect of Grantee in connection with Grantee's termination of employment shall be delayed until the earliest date upon which such amounts may be paid without being subject to taxation under Section 409A. Any amount, the payment or benefit of which is delayed by application of the preceding sentence, shall be paid as soon as possible following the expiration of such period.

(ii) Unless deferred pursuant to this agreement, all payments shall be paid to Grantee, to the extent earned, in no event later than the last day of the "applicable 2 ½ month period," as such term is defined in Treasury Regulation Section 1.409A-1(b)(4)(i)(A) with respect to such payment's treatment as a "short-term deferral" for purposes of Section 409A.

(iii) The Company and Grantee agree to cooperate in good faith in an effort to comply with Section 409A. Under no circumstances shall the Company be responsible for any taxes, penalties, interest or other losses or expenses incurred by the Grantee due to any failure to comply with Section 409A.

(i) This Agreement is subject to the 2010 Stock Incentive Plan heretofore adopted by the Company and approved by its shareholders. The terms and provisions of the Plan (including any subsequent amendments thereto) are hereby incorporated herein by reference. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern and prevail.

(j) At such times and upon such terms and conditions as the Company shall determine, the Company may permit eligible Grantees to elect to defer the distribution of an Award otherwise payable to the Grantee under this Agreement until termination of the Grantee's Employment or such other date Company shall permit.

(k) This Agreement is made under and shall be governed by and construed in accordance with the laws of the State of Connecticut, without giving effect to its choice of law provisions.

Exhibit 10.47

aetna®

AETNA INC.
2010 STOCK INCENTIVE PLAN

EXECUTIVE RESTRICTED STOCK UNIT TERMS OF AWARD

Pursuant to its 2010 Stock Incentive Plan (the "Plan"), Aetna Inc. (the "Company") hereby grants Restricted Stock Units on the terms and conditions hereinafter set forth. The number of Restricted Stock Units awarded and vesting information are included in the website of the designated broker, currently UBS Financial Services, Inc., and in the Notice of the Restricted Stock Unit Acknowledgement and Acceptance Form, if applicable. All capitalized terms used herein which are not otherwise defined herein shall have the meaning specified in the Plan.

ARTICLE I

DEFINITIONS

(a) "Affiliate" means an entity at least a majority of the total voting power of the then-outstanding voting securities of which is held, directly or indirectly, by the Company and/or one or more other Affiliates.

(b) "Board" means the Board of Directors of Aetna Inc.

(c) "Change in Control" means the happening of any of the following:

(i) When any "person" as defined in Section 3(a)(9) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and as used in Sections 13(d) and 14(d) thereof, including a "group" as defined in Section 13(d) of the Exchange Act but excluding the Company and any Subsidiary thereof and any employee benefit plan sponsored or maintained by the Company or any Subsidiary (including any trustee of such plan acting as trustee), directly or indirectly, becomes the "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act, as amended from time to time), of securities of the Company representing 20 percent or more of the combined voting power of the Company's then outstanding securities;

(ii) When, during any period of 24 consecutive months, the individuals who, at the beginning of such period, constitute the Board (the "Incumbent Directors") cease for any reason other than death to constitute at least a majority thereof, provided that a director who was not a director at the beginning of such 24-month period shall be deemed to have satisfied such 24-month requirement (and be an Incumbent Director) if such director was elected by, or on the recommendation of or with the approval of, at least two-thirds of the directors who then qualified as Incumbent Directors either actually (because they were directors at the beginning of such 24-month period) or by prior operation of this paragraph (ii); or

(iii) The occurrence of a transaction requiring stockholder approval for the acquisition of the Company by an entity other than the Company or a Subsidiary through purchase of assets, or by merger, or otherwise.

Notwithstanding the foregoing, in no event shall a “Change in Control” be deemed to have occurred (i) as a result of the formation of a Holding Company, or (ii) with respect to Grantee, if Grantee is part of a “group,” within the meaning of Section 13(d)(3) of the Exchange Act as in effect on the effective date, which consummates the Change in Control transaction. In addition, for purposes of the definition of “Change in Control” a person engaged in business as an underwriter of securities shall not be deemed to be the “Beneficial Owner” of, or to “beneficially own,” any securities acquired through such person’s participation in good faith in a firm commitment underwriting until the expiration of forty days after the date of such acquisition.

(d) "Committee" means the Board's Committee on Compensation and Organization or any successor thereto.

(e) "Common Stock" means the Company's Common Shares, $.01 par value per share.

(f) "Company" means Aetna Inc.

(g) "Effective Date" means the date of grant of this award of Restricted Stock Units.

(h) “Fair Market Value" means the closing price of the Common Stock as reported by the Consolidated Tape of the New York Stock Exchange Listed Shares on the date such value is to be determined, or, if no shares were traded on such date, on the next day on which the Common Stock is traded.

(i) “Fundamental Corporate Event” shall mean any stock dividend, extraordinary cash dividend, recapitalization, reorganization, merger, consolidation, split-up, spin-off, combination, exchange of shares, warrants or rights offering to purchase Common Stock at a price substantially below fair market value, or similar event.

(j) "Grantee" means the person to whom this award has been granted.

(k) “Holding Company” means an entity that becomes a holding company for the Company or its businesses as a part of any reorganization, merger, consolidation or other transaction, provided that the outstanding shares of common stock of such entity and the combined voting power of the then outstanding voting securities of such entity entitled to vote generally in the election of directors is, immediately after such reorganization, merger, consolidation or other transaction, beneficially owned, directly or indirectly, by all or substantially all of the individuals and entities who were the beneficial owners, respectively, of the voting stock outstanding immediately prior to such reorganization, merger, consolidation or other transaction in substantially the same proportions as their ownership, immediately prior to such reorganization, merger, consolidation or other transaction, of such outstanding voting stock.

(l) "Long Term Disability" means long-term disability as defined under the terms of the Company's applicable long-term disability plans or policies.

(m) “Net Shares” means the number of shares of Common Stock which will be deposited in a brokerage account in the Grantee’s name at the Company’s designated broker after shares have been withheld to satisfy applicable tax and withholding requirements upon vesting of the Restricted Stock Units.

(n) “Plan” means the Aetna Inc. 2010 Stock Incentive Plan.

(o) “Restricted Period” means the period during which this award of Restricted Stock Units is not vested.

(p) “Restricted Stock Units” means the number of shares of Common Stock represented by the number of units awarded or such other amount as may result by operation of Article III of this Agreement.

(q) "Retirement" means the termination of employment of a Grantee from active service with the Company, any Subsidiary or Affiliate provided the Grantee’s age and completed years of service total 65 or more points at termination of employment.

(r) “Section 409A” means Section 409A of the Internal Revenue Code of 1986, as amended, and the regulation issued thereunder, as may be amended from time to time.

(s) “Shares of Stock” or “Stock” means the Common Stock.

(t) "Subsidiary" means an entity of which, at the time such subsidiary status is to be determined, at least 50% of the total combined voting power of all classes of stock of such entity is held by the Company and/or one or more other subsidiaries.

(u) "Successor" means the legal representative of the estate of a deceased Grantee or the person or persons who shall acquire the right to the Restricted Stock Units by bequest or inheritance or by reason of the death of the Grantee.

(v) “Vest Date” means the date on which this award of Restricted Stock Units shall vest in accordance with the terms of this Agreement and as set forth on the website of the designated broker and in the Notice of Restricted Stock Unit Grant, if applicable.

ARTICLE II

RESTRICTED PERIOD

Subject to the terms of this Agreement, the Restricted Stock Units will vest in installments on the Vest Date in accordance with the terms of the Plan and this Terms of Award Agreement, or on such date as provided in Article IV or V. On the Vest Date, the Grantee shall vest to one share of Common Stock for each vested Restricted Stock Unit net of applicable taxes and withholding. Such Net Shares will be delivered to the Company’s designated broker, in a brokerage account established in the Grantee’s name.

ARTICLE III

CAPITAL CHANGES

In the event that the Committee shall determine that any Fundamental Corporate Event affects the Common Stock such that an adjustment is required to preserve, or to prevent enlargement of, the benefits or potential benefits made available under this Plan, then the Committee shall, in such manner as the Committee may deem equitable, adjust the number and kind of shares subject to the award of Restricted Stock Units. Additionally, the Committee may make provision for cash payment to a Grantee or the Successor of the Grantee to the extent permitted under Section 409A. However, the number of Restricted Stock Units shall always be a whole number.

ARTICLE IV

CHANGE IN CONTROL

Upon the occurrence of (i) a Change in Control, and (ii) within 24 months thereafter the Company terminates Grantee's Employment without cause, all RSUs, whether or not vested, shall become immediately vested and become payable, provided, however, that, as set forth in the Plan, to the extent the RSUs are considered deferred compensation subject to Section 409A, unless the Change in Control also satisfies the definition of "change in control" under Section 409A, payment shall not be so accelerated but shall occur upon the scheduled Vest Date(s) under Article II.

ARTICLE V

TERMINATION OF EMPLOYMENT

(a) Except as provided in (f) below, if the Grantee shall die during the Restricted Period, the unvested Restricted Stock Units shall become immediately vested and Net Shares, if any, will be deposited with the Company's designated broker in a brokerage account established in Grantee's name.

(b) Except as provided in (f) below, if the Grantee shall begin to receive Long Term Disability benefits during the Restricted Period, the unvested Restricted Stock Units shall continue to vest and Net Shares, if any, will be deposited with the Company's designated broker in a brokerage account established in Grantee's name on the scheduled Vest Date(s) under Article II.

(c) Except as provided in (f) below, if, during the restricted period, Grantee shall cease to be employed by the Company, any Subsidiaries or Affiliates during the Restricted Period, for reason of Retirement or involuntary termination of employment by the Company, a portion of the Restricted Stock Units shall vest in accordance with the following formula: (i) the number of completed months employed after the Effective Date divided by the number of full months in the restricted period; multiplied by (ii) number of Restricted Stock Units, minus any vested Restricted Stock Units. For purposes of this calculation, a month is complete on the day in the following month that corresponds to the Effective Date (e.g., February 13 to March 13). Net shares, if any, will be deposited with the Company's designated broker in a brokerage account established in Grantee's name on the next scheduled Vest Date under Article II and, applicable taxes and withholding will be applied based on the Fair Market Value on that date.

(d) Except as provided in (e) and (f) below, if the Grantee shall, for a reason other than death, Long-Term Disability, Retirement or involuntary termination of employment by the Company, cease to be employed by the Company, any Subsidiaries or Affiliates during the Restricted Period, any unvested Restricted Stock Units shall be forfeited at the time of cessation of employment.

(e) Except as provided in (a) or (b) or (c) above, any Restricted Stock Unit not vested as of the date Grantee terminates employment shall be forfeited at the time of cessation of employment; provided, however, that if Grantee's employment is terminated by the Company other than for cause and Grantee has not previously, or does not subsequently, vest to any portion of the Restricted Stock Unit in accordance with its terms, then upon the forfeiture of the entire Restricted Stock Unit, the Company will pay Grantee an amount equal to the value of a single share of Common Stock, whether or not the forfeited Restricted Stock Unit related to more than a single share of Common Stock, calculated as of the cessation of employment, if requested by Grantee, within 30 days of such cessation of employment.

(f) No Restricted Stock Unit will vest after the Company has terminated the employment of the Grantee for cause, unless the Committee, in its sole discretion, deems a payment to be warranted under the particular circumstances. In addition, the Restricted Stock Units will not vest if Grantee has willfully engaged in gross misconduct or other serious impropriety which the Company determines is likely to be damaging or detrimental to the Company, any Subsidiary or Affiliate.

(g) Employment for purposes of determining the vesting rights of the Grantee and the expiration of the grant under this Article V shall mean continuous full-time salaried employment with the Company, any Subsidiary or an Affiliate, except that the period during which the Grantee is on vacation, sick leave, or other pre-approved leave of absence (provided there is no actual termination of employment), or in receipt of salary continuation or severance pay shall not interrupt the continuous employment of the Grantee. Employment shall also include service with Aetna Foundation, Inc.

ARTICLE VI

EMPLOYEE COVENANTS

(a) As consideration for this grant of Restricted Stock Units, without prior written consent of the Company:

(i) Grantee will not (except to the extent required by an order of a court having competent jurisdiction or under subpoena from an appropriate government agency) use or disclose to any third person, whether during or subsequent to Grantee's employment, any trade secrets, confidential information and proprietary materials, which may include, but are not limited to, the following categories of information and materials: customer lists and identities; provider lists and identities; employee lists and identities; product development and related information; marketing plans and related information; sales plans and related information; premium or other pricing information; operating policies and manuals; research; payment rates; methodologies; procedures; contractual forms; business plans; financial records; computer programs; database; or other financial, commercial, business or technical information related to the Company, any Subsidiary or Affiliate unless such information has been previously disclosed to the public by the Company or has become public knowledge other than by a breach of this Agreement ("Confidential Information"); provided, however, that this limitation shall not apply to any such use or disclosure made while Grantee is

employed by the Company, any Subsidiary or Affiliate if such disclosure occurred in connection with the performance of Grantee's job as an employee of the Company, any Subsidiary or Affiliate;

(ii) Grantee will not, during and for a period of twelve (12) months following Grantee's termination of employment, directly or indirectly, (x) engage in the ownership (except less than 1% of the outstanding capital stock of any publicly traded company) of or, (y) become an employee of, or (z) act as a consultant or contractor to, any competitor of the Company ("Competitor") in any market in the United States where Company, Affiliate or Subsidiary does business.

a. For purposes of this paragraph "Competitor" shall mean any entity, organization, person or corporation that is involved in the same business as Company, Subsidiary or Affiliate, but in the case of (y) and (z), only to the extent such work, consulting or other activity on behalf of other entity, organization, person or corporation

i. is materially similar to the duties and/or functions that Grantee performed for the Company, Subsidiary or Affiliate in the last 12 months or involves duties and/or functions for Competitor about which Grantee has Confidential Information in the last 12 months. Notwithstanding

1. with respect to sales functions for the Company, Subsidiary or Affiliate that are regionally based or whose focus is geographically limited, the restriction shall only apply where such work, consulting or other activity on behalf of a Competitor overlaps in whole or in part the same geographic area in which the Grantee worked for Company, Subsidiary or Affiliate in the last 12 months;

2. with respect to corporate staff functions, the restriction shall only apply where Competitor is substantially engaged in the business of health insurance, managed health care, population health management, or related products or services.

b. Notwithstanding, if Grantee's employment is terminated by the Company, Subsidiary or Affiliate other than for cause, the length of the noncompetition covenant in this paragraph shall not exceed the length of the severance and/or salary continuation benefits paid by the Company, Subsidiary or Affiliate to Grantee.

c. Grantee acknowledges and agrees that these restrictions:

i. are necessary to protect the Confidential Information and goodwill of the Company, Subsidiary or Affiliate;

ii. are appropriately tailored and limited in time and geographic scope to do so; and

iii. do not impair or limit the Grantee's ability to earn a living.

(iii) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly induce or attempt to induce any employee of the Company, any Subsidiary or Affiliate to be employed or perform services elsewhere;

(iv) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly, induce or attempt to induce any agent or agency, broker, supplier or health care provider of the Company, any Subsidiary or Affiliate to cease or curtail providing services to the Company, any Subsidiary or Affiliate; and

(v) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly solicit or attempt to solicit the trade of any individual or entity which, at the time of such solicitation, is a customer of the Company, any Subsidiary or Affiliate, or which the Company, any Subsidiary or Affiliate is undertaking reasonable steps to procure as a customer at the time of or immediately preceding termination of Employment; provided, however, that this limitation shall only apply to any product or service which is in competition with a product or service of the Company, any Subsidiary or Affiliate and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved.

(vi) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, for himself or herself or on behalf of or in cooperation with any other person or entity, consult with or in any manner provide advice to, any individual or entity which is a customer of the Company or any Subsidiary or Affiliate of the Company, provided, however, that this limitation shall apply only to consultation or advice relating to any product or service of the Company, or any Subsidiary or Affiliate, or which is in competition with any product or service of the Company, or any Subsidiary or Affiliate, and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved, or about which Grantee has Confidential Information

In addition:

(vii) Following the termination of Grantee's Employment, Grantee shall provide assistance to and shall cooperate with the Company, any Subsidiary or Affiliate, upon its reasonable request and without additional compensation, with respect to matters within the scope of Grantee's duties and responsibilities during Employment, provided that any reasonable out-of-pocket expenses Grantee incurs in connection with any assistance Grantee has been requested to provide under this provision for items including, but not limited to, transportation, meals, lodging and telephone, shall be reimbursed by the Company. The Company agrees and acknowledges that it shall, to the maximum extent possible under the then prevailing circumstances, coordinate, or cause a Subsidiary or Affiliate to coordinate, any such request with Grantee's other commitments and responsibilities to minimize the degree to which such request interferes with such commitments and responsibilities; and

(viii) Grantee shall promptly notify the Company's General Counsel if Grantee is contacted by a regulatory or self-regulatory agency with respect to matters pertaining to the Company or by an attorney or other individual who informs the Grantee that he/she has filed, intends to file, or is considering filing a claim or complaint against the Company .

(ix) Grantee acknowledges that all original works of authorship that are created by Grantee (solely or jointly with others) within the scope of Grantee's employment and relating in any way to the business or contemplated business, products, activities, research or development of the Company, any Subsidiary or Affiliate, or resulting from any work performed by the Grantee for the Company, any Subsidiary or Affiliate (in each case, regardless of when or where the work product is prepared or whose equipment or other resources is used in preparing the same) which are protectable by copyright are "works made for hire" as that term is defined in the United States Copyright Act (17 U.S.C., Section 101). To the extent that the foregoing does not apply, the Grantee hereby irrevocably assigns to the Company, and its successors and assigns, for no additional consideration, the Grantee's entire right, title and interest in and to all such works of authorship. Grantee further acknowledges that while employed by the Company, any Subsidiary or Affiliate, Grantee may develop ideas, inventions, discoveries, innovations, procedures, methods, know-how or other works which relate to the Company's current or are reasonably expected to relate to the Company's future business (in each case, regardless of when or where the work product is prepared or whose equipment or other resources is used in preparing the same) that may be patentable or subject to trade secret protection. Grantee agrees that all such works of authorship, ideas, inventions, discoveries, innovations, procedures, methods, know-how and other works shall belong exclusively to the Company, and the Grantee hereby assigns all right, title, and interest therein to the Company.

To the extent any of the foregoing works may be patentable, Grantee agrees that the Company may file and prosecute any application for patents for such works and that the Grantee will, on request, execute assignments to the Company relating to (and take all such further steps as may be reasonably necessary to perfect the Company's sole and exclusive ownership of) any such application and any patents resulting therefrom.

(b) If any provision of Article VI (a) is determined by a court of competent jurisdiction not to be enforceable in the manner set forth herein, the Company and Grantee agree that it is the intention of the parties that such provision should be enforceable to the maximum extent possible under applicable law and that such court shall reform such provision to make it enforceable in accordance with the intent of the parties.

(c) Grantee acknowledges that a material part of the inducement for the Company to grant the Restricted Stock Units is Grantee's covenants set forth in Article VI (a) and that the covenants and obligations of Grantee with respect to nondisclosure, non-solicitation and cooperation relate to special, unique and extraordinary matters and that a violation of any of the terms of such covenants and obligations will cause the Company irreparable injury for which adequate remedies are not available at law. Therefore, Grantee agrees that, if Grantee shall breach any of those covenants or obligations, Grantee shall not be entitled to vest in the Restricted Stock or be entitled to retain any income therefrom and the Company shall be entitled to an injunction, restraining order or such other equitable relief (without the requirement to post bond) restraining Grantee from committing any violation of the covenants and obligations contained in Article VI. The Company also shall be entitled to recover any attorneys' fees, costs, and expenses it incurs in connection with any judicial proceeding arising out of Grantee's breach of this Agreement. The remedies in the preceding sentences are cumulative and are in addition to any other rights and remedies the Company may have at law or in equity as a court or arbitrator shall reasonably determine.

(d) The Restrictive Covenants set forth in this Article VI shall supplement and do not supersede the restrictions agreed to by Grantee in any other agreement or contract.

(e) Employment Dispute Arbitration Program - Mandatory Binding Arbitration of Employment Disputes.

(i) Except as otherwise specified in this Agreement, the Grantee and the Company agree that all employment-related legal disputes between them will be submitted to and resolved by binding arbitration, and neither the Grantee nor the Company will file or participate as an individual party or member of a class in a lawsuit in any court against the other with respect to such matters. This shall apply to claims brought on or after the date the Grantee accepts this Agreement, even if the facts and circumstances relating to the claim occurred prior to that date and regardless of whether the Grantee or the Company previously filed a complaint/charge with a government agency concerning the claim.

For purposes of Article VI (e) of this Agreement, "the Company" includes Aetna Inc., its Subsidiaries and Affiliates, their predecessors, successors and assigns, and those acting as representatives or agents of those entities. THE GRANTEE UNDERSTANDS THAT, WITH RESPECT TO CLAIMS SUBJECT TO THE ARBITRATION REQUIREMENT, ARBITRATION REPLACES THE RIGHT OF THE GRANTEE AND THE COMPANY TO SUE OR PARTICIPATE IN A LAWSUIT. THE GRANTEE ALSO UNDERSTANDS THAT IN ARBITRATION, A DISPUTE IS RESOLVED BY AN ARBITRATOR INSTEAD OF A JUDGE OR JURY, AND THE DECISION OF THE ARBITRATOR IS FINAL AND BINDING.

(ii) THE GRANTEE UNDERSTANDS THAT THE ARBITRATION PROVISIONS OF THIS AGREEMENT AFFECT THE LEGAL RIGHTS OF THE GRANTEE AND THE COMPANY AND ACKNOWLEDGES THAT THE GRANTEE HAS BEEN ADVISED TO, AND HAS BEEN GIVEN THE OPPORTUNITY TO, OBTAIN LEGAL ADVICE BEFORE SIGNING THIS AGREEMENT.

(iii) Article VI (e) of this Agreement does not apply to workers' compensation claims, unemployment compensation claims, and claims under the Employee Retirement Income Security Act of 1974 ("ERISA") for employee benefits. A dispute as to whether Article VI (e) of this Agreement applies must be submitted to the binding arbitration process set forth in this Agreement.

(iv) The Grantee and/or the Company may seek emergency or temporary injunctive relief from a court (including with respect to claims arising out of Article VI (a) in accordance with applicable law). However, except as provided in Article VI (c) of this Agreement, after the court has issued a ruling concerning the emergency or temporary injunctive relief, the Grantee and the Company shall be required to submit the dispute to binding arbitration pursuant to this Agreement .

(v) Unless otherwise agreed, the arbitration will be administered by the American Arbitration Association (the "AAA") and will be conducted pursuant to the AAA's Employment Arbitration Rules and Mediation Procedures (the "Rules"), as modified in this Agreement, in effect at the time the request for arbitration is filed. The AAA's Rules are available on the AAA's website at www.adr.org. THE GRANTEE ACKNOWLEDGES THAT THE COMPANY HAS ENCOURAGED THE GRANTEE TO READ THESE RULES PROMPTLY AND CAREFULLY AND THAT THE GRANTEE HAS BEEN AFFORDED SUFFICIENT OPPORTUNITY TO DO SO.

(vi) If the Company initiates a request for arbitration, the Company will pay all of the administrative fees and costs charged by the AAA, including the arbitrator's compensation and charges for hearing room rentals, etc. If the Grantee initiates a request for arbitration or submits a counterclaim to the Company's request for arbitration, the Grantee shall be required to contribute One Hundred Dollars ($100.00) to those administrative fees and costs, payable to the AAA at the time the Grantee's request for arbitration or counterclaim is submitted. The Company may increase the contribution amount in the future without amending this Agreement, but not to exceed the maximum permitted under the AAA rules then in effect. In all cases, the Grantee and the Company shall be responsible for payment of any fees assessed by the arbitrator as a result of that party's delay, request for postponement, failure to comply with the arbitrator's rulings and for other similar reasons.

(vii) The Grantee and the Company may choose to be represented by legal counsel in the arbitration process and shall be responsible for their own legal fees, expenses and costs. However, the arbitrator shall have the same authority as a court to order the Grantee or the Company to pay some or all of the other's legal fees, expenses and costs, in accordance with applicable law.

(viii) Unless otherwise agreed, there shall be a single arbitrator, selected by the Grantee and the Company from a list of qualified neutrals furnished by the AAA. If the Grantee and the Company cannot agree on an arbitrator, one will be selected by the AAA.

(ix) Unless otherwise agreed, the arbitration hearing will take place in the city where the Grantee works or last worked for the Company. If the Grantee and the Company disagree as to the proper locale, the AAA will decide.

(x) The Grantee and the Company shall be entitled to conduct limited pre-hearing discovery. Each may take the deposition of one person and anyone designated by the other as an expert witness. The party taking the deposition shall be responsible for all associated costs, such as the cost of a court reporter and the cost of an original transcript. Each party also has the right to submit one set of ten written questions (including subparts) to the other party, which must be answered under oath, and to request and obtain all documents on which the other party relies in support of its answers to the written questions. Additional discovery may be permitted by the arbitrator upon a showing that it is necessary for that party to have a fair opportunity to present a claim or defense.

(xi) The arbitrator shall apply the same substantive law that would apply if the matter were heard by a court and shall have the authority to order the same remedies (but no others) as would be available in a court proceeding. The time limits for requesting arbitration or submitting a counterclaim and the administrative prerequisites for filing an arbitration claim or counterclaim are the same as they would be in a court proceeding. The arbitrator shall consider and decide any dispositive motions (motions seeking a decision on some or all of the claims or counterclaims without an arbitration hearing) filed by any party.

(xii) All proceedings, including the arbitration hearing and decision, are private and confidential, unless otherwise required by law. Arbitration decisions may not be published or publicized without the consent of both the Grantee and the Company.

(xiii) Unless otherwise agreed, the arbitrator's decision will be in writing with a brief summary of the arbitrator's opinion.

(xiv) The arbitrator's decision is final and binding on the Grantee and the Company. After the arbitrator's decision is issued, the Grantee or the Company may obtain an order of judgment from a court and may obtain a court order enforcing the decision. The arbitrator's decision may be appealed to the courts only under the limited circumstances provided by law.

(xv) If the Grantee previously signed an agreement, including but not limited to an employment agreement, containing arbitration provisions, those provisions are superseded by the arbitration provisions of this Agreement.

(xvi) If any provision of Article VI (e) is found to be void or otherwise unenforceable, in whole or in part, this shall not affect the validity of the remainder of Article VI (e) and the remainder of the Agreement. All other provisions shall remain in full force and effect.

(f) Except as provided in connection with mandatory binding arbitration of employment disputes, Grantee hereby submits to the exclusive jurisdiction of the courts of the State of Connecticut and the United States District Court for the District of Connecticut with respect to any action relating to this Agreement, and agrees that (i) the sole and exclusive appropriate venue for any suit or proceeding relating to this Agreement shall be in such court, and (ii) hereby waives any and all objections and defenses based on forum, venue or personal or subject matter jurisdiction as they may relate to a suit or proceeding brought before such court in accordance with the Agreement.

For purposes of this Article VI, the term "Employment" shall refer to active employment with the Company, any Subsidiary or Affiliate, and shall not include salary continuation or severance periods.

ARTICLE VII

OTHER TERMS

(a) Nothing in this Agreement shall interfere with or limit in any way the right of the Company, any Subsidiary or Affiliate to terminate the Grantee's employment at any time. Neither the execution and delivery hereof nor the granting of the Award shall constitute or be evidence of any agreement or understanding, express or implied, on the part of the Company or any of its Subsidiaries to employ or continue the employment of the Grantee for any period.

(b) Until the Restricted Stock Units have become vested, Grantee shall not have any rights as a stockholder (including the right to payment of dividends) by virtue of this grant of Restricted Stock Units.

(c) During the Restricted Period, the Restricted Stock Units shall be nontransferable and non-assignable except by will or the laws of descent and distribution.

(d) The award will be settled on a net basis. Prior to issuing any Common Shares, the Company will withhold an amount sufficient to satisfy federal, state, local, social security and Medicare withholding tax requirements relating to award. Any social security calculation or other adjustments discovered after net share payment will be settled in cash, not in Shares of Common Stock. Vesting will result in taxable compensation reportable on the Grantee's W-2 in year of vesting.

(e) The Company may from time to time adopt stock ownership requirements applicable to Grantees who are senior managers of the Company. In connection with and for the purpose of implementing those ownership requirements, the Company may adopt certain restrictions on the ability of a Grantee to sell shares issued under this Agreement when such ownership requirements have not been satisfied. Any such restriction on sale will be communicated generally to affected Grantees and the restriction may be modified by the Company from time to time, at its discretion. Neither the Company nor its Board of Directors shall have any obligation or liability to a Grantee in connection with any such restriction.

(f) This Restricted Stock Unit is an unfunded obligation of the Company and nothing in this Agreement shall be construed to create any claim against particular assets or require the Company to segregate or otherwise set aside any assets or create any fund to meet its obligations hereunder.

(g) Anything herein to the contrary notwithstanding, a Grantee whose Restricted Stock Units have been forfeited as a result of termination of employment due to U.S. Military Service and who is later re-employed (in a full-time active status) after discharge within the time period set in 38 U.S.C. Section 4312 will be eligible to have the forfeited Restricted Stock Units reinstated as follows: (i) if such Grantee is re-employed during the Restricted Period, all forfeited Restricted Stock Units shall be reinstated; or (ii) if such Grantee is re-employed after the Restricted Period, a cash payment will be made to the Grantee, minus applicable taxes, for the value of the forfeited Restricted Stock Units on the Vest Date pursuant to procedures established by the Company for this purpose.

(h) If any provision of this Agreement would cause Grantee to incur any additional tax or interest under Section 409A, the Company may reform such provision (including an amendment retroactive to the Effective Date to the extent permissible) to comply with Section 409A.

(i) If the Company reasonably anticipates that the Company's tax deduction with respect to the payment upon vesting of the Restricted Stock Units would be limited or eliminated by application of Section 162(m) of the Internal Revenue Code, the Company may elect, in accordance with Section 409A, to delay the payment of such Restricted Stock Units to the earliest date in which the Company anticipates that its tax deduction for such payment will not be limited or eliminated.

(j) This Agreement is subject to the 2010 Stock Incentive Plan heretofore adopted by the Company and approved by its shareholders. The terms and provisions of the Plan (including any subsequent amendments thereto) are hereby incorporated herein by reference. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern and prevail.

(k) Voluntary Deferral. At such times and upon such terms and conditions as the Company shall determine in accordance with the terms of the Plan and Section 409A, the Company may permit eligible Grantees to elect to defer the distribution of an Award otherwise payable to the Grantee under this Agreement until termination of the Grantee's Employment or such other date Company shall permit.

(l) This Agreement is made under and shall be governed by and construed in accordance with the laws of the State of Connecticut, without giving effect to its choice of law provisions.

I have read the Restricted Stock Unit Agreement. I accept the Restricted Stock Unit award and agree to be bound by all of its terms and conditions, including mandatory binding arbitration of employment related disputes and, if applicable, any other provisions of Article VI.

Exhibit 10.48

AETNA INC.
2010 STOCK INCENTIVE PLAN

STOCK APPRECIATION RIGHT TERMS OF AWARD

Pursuant to its 2010 Stock Incentive Plan, Aetna Inc. has granted a stock appreciation right on shares of Aetna Inc. Common Stock. The number of shares represented by this right, the Grant Price and vesting information are included on the website of the designated broker, currently UBS Financial Services, Inc., and in the Notice of Stock Appreciation Right Grant, if applicable. The Stock Appreciation Right is issued on the terms and conditions hereinafter set forth.

ARTICLE I

DEFINITIONS

(a) "Affiliate" means an entity at least a majority of the total voting power of the then-outstanding voting securities of which is held, directly or indirectly, by the Company and/or one or more other Affiliates.

(b) "Board" means the Board of Directors of Aetna Inc.

(c) “Change in Control” means the happening of any of the following:

(i) When any “person” as defined in Section 3(a)(9) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”) and as used in Sections 13(d) and 14(d) thereof, including a “group” as defined in Section 13(d) of the Exchange Act but excluding the Company and any Subsidiary thereof and any employee benefit plan sponsored or maintained by the Company or any Subsidiary (including any trustee of such plan acting as trustee), directly or indirectly, becomes the “beneficial owner” (as defined in Rule 13d-3 under the Exchange Act, as amended from time to time), of securities of the Company representing 20 percent or more of the combined voting power of the Company’s then outstanding securities;

(ii) When, during any period of 24 consecutive months, the individuals who, at the beginning of such period, constitute the Board (the “Incumbent Directors”) cease for any reason other than death to constitute at least a majority thereof, provided that a director who was not a director at the beginning of such 24-month period shall be deemed to have satisfied such 24-month requirement (and be an Incumbent Director) if such director was elected by, or on the recommendation of or with the approval of, at least two-thirds of the directors who then qualified as Incumbent Directors either actually (because they were directors at the beginning of such 24-month period) or by prior operation of this paragraph (ii); or

(iii) The occurrence of a transaction requiring stockholder approval for the acquisition of the Company by an entity other than the Company or a Subsidiary through purchase of assets, or by merger, or otherwise.

Notwithstanding the foregoing, in no event shall a “Change in Control” be deemed to have occurred (i) as a result of the formation of a Holding Company, or (ii) with respect to Grantee, if Grantee is part of a “group,” within the meaning of Section 13(d)(3) of the Exchange Act as in effect on the effective date, which consummates the Change in Control transaction. In addition, for purposes of the definition of “Change in Control” a person engaged in business as an underwriter of securities shall not be deemed to be the “beneficial owner” of, or to “beneficially own,” any securities acquired through such person’s participation in good faith in a firm commitment underwriting until the expiration of forty days after the date of such acquisition.

(d) "Committee" means the Board's Committee on Compensation and Organization or any successor thereto.

(e) "Common Stock" means shares of the Company's Common Stock, $.01 par value per share.

(f) "Company" means Aetna Inc.

(g) "Effective Date” means the date of grant of this Stock Appreciation Right, as approved by the Committee.

(h) “Exercise Date” means the date the Grantee has notified the designated broker to exercise all or a portion of the Stock Appreciation Right.

(i) "Fair Market Value" means the closing price of the Common Stock as reported by the Consolidated Tape of the New York Stock Exchange Listed Shares on the date such value is to be determined, or, if no shares were traded on such day, on the next day on which the Common Stock is traded.

(j) “Fundamental Corporate Event” shall mean any stock dividend, extraordinary cash dividend, recapitalization, reorganization, merger, consolidation, split-up, spin-off, combination, exchange of shares, warrants or rights offering to purchase Common Stock at a price substantially below fair market value, or similar event.

(k) “Grantee” means the person to whom this Stock Appreciation Right has been granted.

(l) “Grant Price” means the dollar amount per share of Common Stock that is the basis for determining the appreciation in value of the Common Stock.

(m) “Holding Company” means an entity that becomes a holding company for the Company or its businesses as a part of any reorganization, merger, consolidation or other transaction, provided that the outstanding shares of common stock of such entity and the combined voting power of the then outstanding voting securities of such entity entitled to vote generally in the election of directors is, immediately after such reorganization, merger, consolidation or other transaction, beneficially owned, directly or indirectly, by all or substantially all of the individuals and entities who were the beneficial owners, respectively of the voting stock outstanding immediately prior to such reorganization, merger, consolidation or other transaction in substantially the same proportions as

their ownership, immediately prior to such reorganization, merger, consolidation or other transaction, of such outstanding voting stock.

(n) "Long Term Disability" means long-term disability as defined under the terms of the Company's applicable long-term disability plans or policies.

(o) "Plan" means the Aetna Inc. 2010 Stock Incentive Plan.

(p) "Retirement" means the termination of employment of a Grantee from active service with the Company, a Subsidiary or Affiliate provided the Grantee's age and completed years of service total 65 or more points at termination of employment.

(q) "SAR" means Stock Appreciation Right.

(r) "Shares Granted" means the number of shares of Common Stock represented by the Stock Appreciation Right, or such other amount as may result by operation of Article IV of this Agreement.

(s) "Shares of Stock" or "Stock" means the Common Stock.

(t) "Stock Appreciation Right" or "SAR" means the right granted herein to be paid the excess, as of the Exercise Date, of (i) the Fair Market Value of the shares of Common Stock associated with this Stock Appreciation Right (or the portion thereof that is surrendered on exercise) over (ii) the Grant Price of such Stock Appreciation Right.

(u) "Stock Appreciation Rights Vested" means number of Stock Appreciation Rights exercisable on any given date.

(v) "Subsidiary" means any entity of which, at the time such subsidiary status is to be determined, at least 50% of the total combined voting power of all classes of stock in such entity is held by the Company and/or one or more other subsidiaries.

(w) "Successor" means the legal representative of the estate of a deceased Grantee or the person or persons who shall acquire the right to exercise a SAR by bequest or inheritance or by reason of the death of the Grantee.

(x) "Term" means the period during which the SAR granted hereby may be exercised.

(y) "Vest Date" means the date on which a portion of the SAR becomes exercisable pursuant to the Terms of the Award and, as set forth on the website of the designated broker and in the Notice of Stock Appreciation Right Grant, if applicable.

ARTICLE II

TERM OF SAR AND EXERCISE

(a) Subject to the terms of this Agreement, the term of the SAR shall commence on the first Vest Date and shall terminate, unless sooner terminated by the terms of the Plan or this Terms of Award Agreement, at:

(i) The close of the Company's business on the day preceding the tenth anniversary of the Effective Date, if the Company is open for business on such day; or

(ii) The close of the Company's business on the next preceding day that the Company is open for business.

(b) The SAR is exercisable in installments, each installment to become exercisable as of the Vest Date in accordance with the terms of the Plan and this Terms of Award Agreement. Once an installment is vested, it may be exercised in whole or in part only during the Term of the SAR.

ARTICLE III

METHOD OF SAR EXERCISE

In order to exercise this SAR, Grantee must comply with procedures adopted by the Company from time to time. Under current procedures, the Grantee must exercise the SAR through the Company’s designated broker.

In addition, if the Grantee has been notified that he or she must consult with a member of the Company's Law and Regulatory Affairs Unit prior to engaging in transactions in Aetna stock, Grantee must consult with Law prior to exercising the SAR.

Upon exercise of the SAR, payment (net of federal, state, local, social security and medicare taxes, if applicable) shall be paid in Common Stock. The resulting shares of Common Stock will be deposited in a brokerage account established in Grantee’s name at the designated broker.

ARTICLE IV

CAPITAL CHANGES

In the event that the Committee shall determine that any Fundamental Corporate Event affects the Common Stock such that an adjustment is required to preserve, or to prevent enlargement of, the benefits or potential benefits made available under this SAR or the Plan, then the Committee may, in such manner as the Committee may deem equitable, adjust the (i) the number and kind of shares subject to the SAR or (ii) the SAR Grant Price. Additionally, the Committee may make provision for a cash payment to a Grantee or the Successor of the Grantee to the extent permitted under Section 409A. However, the number of Shares of Stock subject to the SAR shall always be a whole number.

ARTICLE V

CHANGE IN CONTROL

Upon the occurrence of (i) a Change in Control, and (ii) within 24 months thereafter, the Company terminates Grantee's Employment without cause, all SARs, whether or not vested, shall become immediately vested and become payable in accordance with the terms of this Agreement.

ARTICLE VI
TERMINATION OF SAR

(a) Except as provided in (d) below, if the Grantee shall die or begin to receive Long Term Disability benefits after the Effective Date, the SAR shall become vested and immediately exercisable and the Grantee or Successor of the Grantee may exercise the SAR until the earlier of:

(i) The expiration of the Term of the SAR; or

(ii) A period not to exceed five years following such death or commencement of Long Term Disability benefits.

(b) Except as provided in (e) below, if Grantee shall, for reason of Retirement, cease to be employed by the Company, its Subsidiaries or Affiliates after the Effective Date, the Grantee will become immediately vested and may immediately exercise any SAR that would have otherwise become vested within one year from the Grantee's termination of employment, and the Grantee or Successor of the Grantee may exercise a vested SAR until the earlier of:

(i) The expiration of the Term of the SAR; or

(ii) A period not to exceed five years following such cessation of employment.

(c) Except as provided in (d) and (e) below, if the Grantee shall, for a reason other than death, Long Term Disability or Retirement, cease to be employed by the Company, its Subsidiaries or Affiliates during the Term of the SAR, the Grantee may exercise a vested SAR until the earlier of:

(i) The expiration of the term of the SAR; or

(ii) A period not to exceed ninety days following such cessation of employment.

(d) Except as provided in (a) or (b) above, any SAR, or portion of a SAR that has not become vested and exercisable at the time of cessation of employment shall terminate immediately upon such cessation of employment and may not be exercised thereafter. Provided, however, if Grantee's employment is terminated by the Company other than for cause and Grantee has not previously, or does not subsequently, vest to any portion of the SAR in accordance with its terms, then upon the forfeiture of the entire SAR, the Company shall pay Grantee an amount equal to the SAR value on a single share of Common Stock, whether or not the forfeited SAR related to more than a single share of Common Stock, calculated as of the date of termination of employment under the same

method as the Company calculates its SAR expense charge for purposes of its financial statement reporting, if requested by Grantee, within 30 days of such cessation of employment.

(e) No SAR may vest or be exercised after the Company has terminated the employment of the Grantee for cause, except that the Committee may, in its sole discretion, permit the exercise of a vested SAR for a period of up to ninety days in cases where the Committee shall determine such exercise period is warranted under the particular circumstances. In addition, the Company may terminate the SAR if Grantee has willfully engaged in gross misconduct or other serious impropriety which the Company determines is likely to be damaging or detrimental to the Company, any Subsidiary or Affiliate.

(f) Employment for purposes of determining the vesting rights of the Grantee and expiration date of the grant under this Article VI shall mean continuous full-time salaried employment with the Company, a Subsidiary or an Affiliate, except that the period during which the Grantee is on vacation, sick leave, or other pre-approved leave of absence (provided there is no actual termination of employment), or in receipt of salary continuation or severance pay shall not interrupt the continuous employment of the Grantee. Employment shall also include service with Aetna Foundation, Inc.

(g) Except as otherwise herein provided, exercise of the SAR, whether by the Grantee or the Successor of the Grantee, shall be subject to all terms and conditions of this Agreement.

ARTICLE VII
OTHER TERMS

(a) Grantee understands that the Grantee shall not have any rights as stockholder by virtue of the grant of an SAR but only with respect to shares of Common Stock actually issued to the Grantee in accordance with the terms hereof.

(b) Anything herein to the contrary notwithstanding, the Company may postpone the exercise of the SAR or any portion thereof for such time as the Committee in its discretion may deem necessary, in order to permit the Company with reasonable diligence (i) to effect or maintain registration under the Securities Act of 1933, as amended, of the Plan or the shares of Common Stock issuable upon the exercise of the SAR or (ii) to determine that the Plan and such shares are exempt from registration; and the Company shall not be obligated by virtue of this Agreement or any provision of the Plan to recognize the exercise of the SAR or to sell or issue shares of Common Stock in violation of said Act or of the law of any government having jurisdiction thereof. Any such postponement shall not extend the Term of the SAR; and neither the Company nor its Board shall have any obligation or liability to the Grantee, or to the Grantee's Successor, with respect to any shares of Common Stock as to which the SAR shall lapse because of such postponement.

(c) The SAR shall be nontransferable and nonassignable except by will and by the laws of descent and distribution. During the Grantee's lifetime, the SAR may be exercised only by the Grantee.

(d) The SAR is not an incentive stock option as described in the Internal Revenue Code of 1986, as amended, Section 422A (b).

(e) This Agreement is subject to the 2010 Stock Incentive Plan heretofore adopted by the Company and approved by its shareholders. The terms and provisions of the Plan (including any subsequent amendments thereto) are hereby incorporated herein by reference. In the event of a conflict between any term or provision contained herein and a term or provision of the Plan, the applicable terms and provisions of the Plan will govern and prevail.

(f) Anything herein to the contrary notwithstanding, a Grantee whose SAR has been forfeited as a result of termination of employment due to U.S. Military Service and who is later re-employed (in a full-time active status) after discharge within the time period set in 38 U.S.C. Section 4312 will be eligible to have the forfeited SAR reinstated for the original Term pursuant to procedures established by the Company for this purpose.

(g) Nothing in this Agreement shall interfere with a limit in anyway the right of the Company or any Subsidiary or Affiliate to terminate the Grantee's employment at any time. Neither the execution and delivery of this Agreement nor the granting of the SAR shall constitute or be evidence of any agreement or understanding, express or implied, on the part of the Company or any of its Subsidiaries to employ Grantee for any period.

(h) This SAR is an unfunded obligation of the Company and nothing in this Agreement shall be construed to create any claim against particular assets or require the Company to segregate or otherwise set aside any assets or create any fund to meet its obligations hereunder.

(i) The Company shall have the power to withhold, an amount sufficient to satisfy Federal, state and local, social security and medicare withholding tax requirements, if applicable. Any social security calculation or other adjustments discovered after the net share payment will be settled in cash, not in Common Stock.

(j) The Company may from time to time adopt stock ownership requirements applicable to Grantees who are senior managers of the Company. In connection with and for the purpose of implementing those ownership requirements, the Company may adopt certain restrictions on the ability of a Grantee to sell shares issued under this Agreement when such ownership requirements have not been satisfied. Any such restriction on sale will be communicated generally to affected Grantees and the restriction may be modified by the Company from time to time, at its discretion. Neither the Company nor its Board of Directors shall have any obligation or liability to a Grantee in connections with any such restriction.

(k) This Agreement is made under and shall be governed by and construed in accordance with the laws of the State of Connecticut, without giving effect to its choice of law provisions.

ARTICLE VIII

EMPLOYEE COVENANTS

(a) As consideration for the grant of the SAR, without prior written consent of the Company:

(i) Grantee will not (except to the extent required by an order of a court having competent jurisdiction or under subpoena from an appropriate government agency) use or disclose to any third person, whether during or subsequent to Grantee's Employment, any trade secrets, confidential information and proprietary materials, which may include, but are not limited to, the following categories of information and materials: customer lists and identities; provider lists and identities; employee lists and identities; product development and related information; marketing plans and related information; sales plans and related information; premium or other pricing information; operating policies and manuals; research; payment rates; methodologies; procedures; contractual forms; business plans; financial records; computer programs; database; or other financial, commercial, business or technical information related to the Company, any Subsidiary or Affiliate unless such information has been previously disclosed to the public by the Company or has become public knowledge other than by a breach of this Agreement ("Confidential Information"); provided, however, that this limitation shall not apply to any such use or disclosure made while Grantee is employed by the Company, any Subsidiary or Affiliate if such disclosure occurred in connection with the performance of Grantee's job as an employee of the Company, any Subsidiary or Affiliate;

(ii) Grantee will not, during and for a period of twelve (12) months following Grantee's termination of employment, directly or indirectly, (x) engage in the ownership (except less than 1% of the outstanding capital stock of any publicly traded company) of or, (y) become an employee of, or (z) act as a consultant or contractor to, any competitor of the Company ("Competitor") in any market in the United States where Company, Affiliate or Subsidiary does business.

a. For purposes of this paragraph "Competitor" shall mean any entity, organization, person or corporation that is involved in the same business as Company, Subsidiary or Affiliate, but in the case of (y) and (z), only to the extent such work, consulting or other activity on behalf of other entity, organization, person or corporation

i. is materially similar to the duties and/or functions that Grantee performed for the Company, Subsidiary or Affiliate in the last 12 months or involves duties and/or functions for Competitor about which Grantee has Confidential Information in the last 12 months. Notwithstanding

1. with respect to sales functions for the Company, Subsidiary or Affiliate that are regionally based or whose focus is geographically limited, the restriction shall only apply where such work, consulting or other activity on behalf of a Competitor overlaps in whole or in part the same geographic area in which the Grantee worked for Company, Subsidiary or Affiliate in the last 12 months;

2. with respect to corporate staff functions, the restriction shall only apply where Competitor is substantially engaged in the business of health insurance, managed health care, population health management, or related products or services.

b. Notwithstanding, if Grantee's employment is terminated by the Company, Subsidiary or Affiliate other than for cause, the length of the noncompetition covenant in this paragraph shall not exceed the length of the severance and/or salary continuation benefits paid by the Company, Subsidiary or Affiliate to Grantee.

c. Grantee acknowledges and agrees that these restrictions:

i. are necessary to protect the Confidential Information and goodwill of the Company, Subsidiary or Affiliate;

ii. are appropriately tailored and limited in time and geographic scope to do so; and

iii. do not impair or limit the Grantee's ability to earn a living.

(iii) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly induce or attempt to induce any employee of the Company, and Subsidiary or Affiliate to be employed or perform services elsewhere;

(iv) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly, induce or attempt to induce any agent or agency, broker, supplier or health care provider of the Company, any Subsidiary or Affiliate to cease or curtail providing services to the Company, any Subsidiary or Affiliate; and

(v) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, directly or indirectly solicit or attempt to solicit the trade of any individual or entity which, at the time of such solicitation, is a customer of the Company, any Subsidiary or Affiliate, or which the Company, any Subsidiary or Affiliate is undertaking reasonable steps to procure as a customer at the time of or immediately preceding termination of Employment; provided, however, that this limitation shall only apply to any product or service which is in competition with a product or service of the Company, any Subsidiary or Affiliate and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved

(vi) Grantee will not, during and for a period of 24 months following Grantee's termination of Employment, for himself or herself or on behalf of or in cooperation with any other person or entity, consult with or in any manner provide advice to, any individual or entity which is a customer of the Company or any Subsidiary or Affiliate of the Company, provided, however, that this limitation shall apply only to consultation or advice relating to any product or service of the Company, or any Subsidiary or Affiliate, or which is in competition with any product or service of the Company, or any Subsidiary or Affiliate, and shall apply only with respect to a customer or prospective customer with whom the Grantee has been directly or indirectly involved, or about which Grantee has Confidential Information.

In addition:

(vii) Following the termination of Grantee's Employment, Grantee shall provide assistance to and shall cooperate with the Company, any Subsidiary or Affiliate, upon its reasonable request and without additional compensation, with respect to matters within the scope of Grantee's duties and responsibilities during Employment, provided that any reasonable out-of-pocket expenses Grantee incurs in connection with any assistance Grantee has been requested to provide under this provision for items including, but not limited to, transportation, meals, lodging and telephone, shall be reimbursed by the Company. The Company agrees and acknowledges that it shall, to the maximum extent possible under the then prevailing circumstances, coordinate, or cause a Subsidiary or Affiliate to coordinate, any such request with Grantee's other commitments and responsibilities to minimize the degree to which such request interferes with such commitments and responsibilities; and

(viii) Grantee shall promptly notify the Company's General Counsel if Grantee is contacted by a regulatory or self-regulatory agency with respect to matters pertaining to the Company or by an attorney or other individual who informs the Grantee that he/she has filed, intends to file, or is considering filing a claim or complaint against the Company.

(ix) Grantee acknowledges that all original works of authorship that are created by Grantee (solely or jointly with others) within the scope of Grantee's employment and relating in any way to the business or contemplated business, products, activities, research or development of the Company, any Subsidiary or Affiliate, or resulting from any work performed by the Grantee for the Company, any Subsidiary or Affiliate (in each case, regardless of when or where the work product is prepared or whose equipment or other resources is used in preparing the same) which are protectable by copyright are "works made for hire" as that term is defined in the United States Copyright Act (17 U.S.C., Section 101). To the extent that the foregoing does not apply, the Grantee hereby irrevocably assigns to the Company, and its successors and assigns, for no additional consideration, the Grantee's entire right, title and interest in and to all such works of authorship. Grantee further acknowledges that while employed by the Company, any Subsidiary or Affiliate, Grantee may develop ideas, inventions, discoveries, innovations, procedures, methods, know-how or other works which relate to the Company's current or are reasonably expected to relate to the Company's future business (in each case, regardless of when or where the work product is prepared or whose equipment or other resources is used in preparing the same) that may be patentable or subject to trade secret protection. Grantee agrees that all such works of authorship, ideas, inventions, discoveries, innovations, procedures, methods, know-how and other works shall belong exclusively to the Company and the Grantee hereby assigns all right, title and interest therein to the Company.

To the extent any of the foregoing works may be patentable, Grantee agrees that the Company may file and prosecute any application for patents for such works and that the Grantee will, on request, execute assignments to the Company relating to (and take all such further steps as may be reasonably necessary to perfect the Company's sole and exclusive ownership of) any such application and any patents resulting therefrom.

(b) If any provision of Article VIII (a) is determined by a court of competent jurisdiction not to be enforceable in the manner set forth herein, the Company and Grantee agree that it is the intention of the parties that such provision should be enforceable to the maximum extent possible under applicable law and that such court shall reform such provision to make it enforceable in accordance with the intent of the parties.

(c) Grantee acknowledges that a material part of the inducement for the Company to grant the SAR is Grantee's covenants set forth in Article VIII(a) and that the covenants and obligations of Grantee with respect to nondisclosure, nonsolicitation, cooperation and intellectual property rights relate to special, unique and extraordinary matters and that a violation of any of the terms of such covenants and obligations will cause the Company irreparable injury for which adequate remedies are not available at law. Therefore, Grantee agrees that, if Grantee shall breach any of those covenants or obligations, Grantee shall not be entitled to exercise the SAR or be entitled to retain any income therefrom and the Company shall be entitled to an injunction, restraining order or such other equitable relief (without the requirement to post bond) restraining Grantee from committing any violation of the covenants and obligations contained in Article VIII. The Company also shall be entitled to recover any attorneys' fees, costs, and expenses it incurs in connection with any judicial proceeding arising out of Grantee's breach of this Agreement. The remedies in the preceding sentences are cumulative and are in addition to any other rights and remedies the Company may have at law or in equity as a court or arbitrator shall reasonably determine..

(d) The Restrictive Covenants set forth in this Article VIII shall supplement and do not supersede the restrictions agreed to by Grantee in any other agreement or contact.

(e) Employment Dispute Arbitration Program - Mandatory Binding Arbitration of Employment Disputes.

(i) Except as otherwise specified in this Agreement, the Grantee and the Company agree that all employment-related legal disputes between them will be submitted to and resolved by binding arbitration, and neither the Grantee nor the Company will file or participate as an individual party or member of a class in a lawsuit in any court against the other with respect to such matters. This shall apply to claims brought on or after the date the Grantee accepts this Agreement, even if the facts and circumstances relating to the claim occurred prior to that date and regardless of whether Grantee or the Company previously filed a complaint/charge with a government agency concerning the claim.

For purposes of Article VIII (e) of this Agreement, "the Company" includes Aetna Inc., its Subsidiaries and Affiliates, their predecessors, successors and assigns, and those acting as representatives or agents of those entities. THE GRANTEE UNDERSTANDS THAT, WITH RESPECT TO CLAIMS SUBJECT TO THE ARBITRATION REQUIREMENT, ARBITRATION REPLACES THE RIGHT OF THE GRANTEE AND THE COMPANY TO SUE OR PARTICIPATE IN A LAWSUIT. THE GRANTEE ALSO UNDERSTANDS THAT IN ARBITRATION, A DISPUTE IS RESOLVED BY AN ARBITRATOR INSTEAD OF A JUDGE OR JURY, AND THE DECISION OF THE ARBITRATOR IS FINAL AND BINDING.

(ii) THE GRANTEE UNDERSTANDS THAT THE ARBITRATION PROVISIONS OF THIS AGREEMENT AFFECT THE LEGAL RIGHTS OF THE GRANTEE AND THE COMPANY AND ACKNOWLEDGES THAT THE GRANTEE HAS BEEN ADVISED TO, AND HAS BEEN GIVEN THE OPPORTUNITY TO, OBTAIN LEGAL ADVICE BEFORE SIGNING THIS AGREEMENT.

(iii) Article VIII (e) of this Agreement does not apply to workers' compensation claims, unemployment compensation claims, and claims under the Employee Retirement Income Security Act of 1974 ("ERISA") for employee benefits. A dispute as to whether Article VIII (e) of this Agreement applies must be submitted to the binding arbitration process set forth in this Agreement.

(iv) The Grantee and/or the Company may seek emergency or temporary injunctive relief from a court (including with respect to claims arising out of Article VIII (a) in accordance with applicable law). However, except as provided in Article VIII (c) of this Agreement, after the court has issued a ruling concerning the emergency or temporary injunctive relief, the Grantee and the Company shall be required to submit the dispute to binding arbitration pursuant to this Agreement.

(v) Unless otherwise agreed, the arbitration will be administered by the American Arbitration Association (the "AAA") and will be conducted pursuant to the AAA's Employment Arbitration Rules and Mediation Procedures (the "Rules"), as modified in this Agreement, in effect at the time the request for arbitration is filed. The AAA's Rules are available on the AAA's website at www.adr.org . THE GRANTEE ACKNOWLEDGES THAT THE COMPANY HAS ENCOURAGED THE GRANTEE TO READ THESE RULES PROMPTLY AND CAREFULLY AND THAT THE GRANTEE HAS BEEN AFFORDED SUFFICIENT OPPORTUNITY TO DO SO.

(vi) If the Company initiates a request for arbitration, the Company will pay all of the administrative fees and costs charged by the AAA, including the arbitrator's compensation and charges for hearing room rentals, etc. If the Grantee initiates a request for arbitration or submits a counterclaim to the Company's request for arbitration, the Grantee shall be required to contribute One Hundred Dollars ($100.00) to those administrative fees and costs, payable to the AAA at the time the Grantee's request for arbitration or counterclaim is submitted. The Company may increase the contribution amount in the future without amending this Agreement, but not to exceed the maximum permitted under the AAA rules then in effect. In all cases, the Grantee and the Company shall be responsible for payment of any fees assessed by the arbitrator as a result of that party's delay, request for postponement, failure to comply with the arbitrator's rulings and for other similar reasons.

(vii) The Grantee and the Company may choose to be represented by legal counsel in the arbitration process and shall be responsible for their own legal fees, expenses and costs. However, the arbitrator shall have the same authority as a court to order the Grantee or the Company to pay some or all of the other's legal fees, expenses and costs, in accordance with applicable law.

(viii) Unless otherwise agreed, there shall be a single arbitrator, selected by the Grantee and the Company from a list of qualified neutrals furnished by the AAA. If the Grantee and the Company cannot agree on an arbitrator, one will be selected by the AAA.

(ix) Unless otherwise agreed, the arbitration hearing will take place in the city where the Grantee works or last worked for the Company. If the Grantee and the Company disagree as to the proper locale, the AAA will decide.

(x) The Grantee and the Company shall be entitled to conduct limited pre-hearing discovery. Each may take the deposition of one person and anyone designated by the other as an expert witness. The party taking the deposition shall be responsible for all associated costs, such as the cost of a court reporter and the cost of an original transcript. Each party also has the right to submit one set of ten written questions (including subparts) to the other party, which must be answered under oath, and to request and obtain all documents on which the other party relies in support of its answers to the written questions. Additional discovery may be permitted by the arbitrator upon a showing that it is necessary for that party to have a fair opportunity to present a claim or defense.

(xi) The arbitrator shall apply the same substantive law that would apply if the matter were heard by a court and shall have the authority to order the same remedies (but no others) as would be available in a court proceeding. The time limits for requesting arbitration or submitting a counterclaim and the administrative prerequisites for filing an arbitration claim or counterclaim are the same as they would be in a court proceeding. The arbitrator shall consider and decide any dispositive motions (motions seeking a decision on some or all of the claims or counterclaims without an arbitration hearing) filed by any party.

(xii) All proceedings, including the arbitration hearing and decision, are private and confidential, unless otherwise required by law. Arbitration decisions may not be published or publicized without the consent of both the Grantee and the Company.

(xiii) Unless otherwise agreed, the arbitrator's decision will be in writing with a brief summary of the arbitrator's opinion.

(xiv) The arbitrator's decision is final and binding on the Grantee and the Company. After the arbitrator's decision is issued, the Grantee or the Company may obtain an order of judgment from a court and may obtain a court order enforcing the decision. The arbitrator's decision may be appealed to the courts only under the limited circumstances provided by law.

(xv) If the Grantee previously signed an agreement, including but not limited to an employment agreement, containing arbitration provisions, those provisions are superseded by the arbitration provisions of this Agreement.

(xvi) If any provision of Article VIII (e) is found to be void or otherwise unenforceable, in whole or in part, this shall not affect the validity of the remainder of Article VIII (e) and the remainder of the Agreement. All other provisions shall remain in full force and effect.

(f) Except as provided in connection with mandatory binding arbitration of employment disputes, Grantee hereby submits to the exclusive jurisdiction of the courts of the State of Connecticut and the United States District Court for the District of Connecticut with respect to any action relating to this Agreement, and agrees that (i) the sole and exclusive appropriate venue for any suit or proceeding relating to this Agreement shall be in such court, and (ii) hereby waives any and all objections and defenses based on forum, venue or personal or subject matter jurisdiction as they may relate to a suit or proceeding brought before such court in accordance with the Agreement.

For purposes of this Article VIII, the term "Employment" shall refer to active employment with the Company, any Subsidiary or Affiliate, and shall not include salary continuation or severance periods.

I have read the Stock Appreciation Right Agreement. I accept the Stock Appreciation Right award and agree to be bound by all of its terms and conditions including mandatory binding arbitration of employment related disputes and, if applicable, any other provisions of Article VIII.

Exhibit 13.1

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the audited consolidated financial statements and Cautionary Statement Concerning Forward-Looking Statements that are included in this Annual Report.

Overview of Business

CVS Health Corporation, together with its subsidiaries (collectively, "CVS Health," the "Company," "we," "our" or "us"), is the nation's premier health innovation company helping people on their path to better health. Whether in one of its pharmacies or through its health services and plans, CVS Health is pioneering a bold new approach to total health by making quality care more affordable, accessible, simple and seamless. CVS Health is community-based and locally focused, engaging consumers with the care they need when and where they need it. The Company has more than 9,900 retail locations, approximately 1,100 walk-in medical clinics, a leading pharmacy benefits manager with approximately 92 million plan members, a dedicated senior pharmacy care business serving more than one million patients per year, expanding specialty pharmacy services, and a leading stand-alone Medicare Part D prescription drug plan. CVS Health also serves an estimated 38 million people through traditional, voluntary and consumer-directed health insurance products and related services, including rapidly expanding Medicare Advantage offerings. The Company believes its innovative health care model increases access to quality care, delivers better health outcomes and lowers overall health care costs.

On November 28, 2018 (the "Aetna Acquisition Date"), the Company acquired Aetna Inc. ("Aetna") for a combination of cash and CVS Health stock (the "Aetna Acquisition"). The Company acquired Aetna to help improve the consumer health care experience by combining Aetna's health care benefits products and services with CVS Health's more than 9,900 retail locations, approximately 1,100 walk-in medical clinics and integrated pharmacy capabilities with the goal of becoming the new, trusted front door to health care. Under the terms of the merger agreement, Aetna shareholders received $145.00 in cash and 0.8378 CVS Health shares for each Aetna share. The transaction valued Aetna at approximately $212 per share or approximately $70 billion. Including the assumption of Aetna's debt, the total value of the transaction was approximately $78 billion. The Company financed the cash portion of the purchase price through a combination of cash on hand and by issuing approximately $45 billion of new debt, including senior notes and term loans (see "Liquidity and Capital Resources" later in this document). The consolidated financial statements for the year ended December 31, 2018 reflect Aetna's results subsequent to the Aetna Acquisition Date.

On October 10, 2018, the Company and Aetna entered into a consent decree with the United States Department of Justice (the "DOJ") that allowed the Company's proposed acquisition of Aetna to proceed, provided Aetna agreed to sell its individual standalone Medicare Part D prescription drug plans. As part of the agreement reached with the DOJ, Aetna entered into a purchase agreement with a subsidiary of WellCare Health Plans, Inc. for the divestiture of Aetna's standalone Medicare Part D prescription drug plans effective December 31, 2018. On November 30, 2018, Aetna completed the sale of its standalone Medicare Part D prescription drug plans. Aetna's standalone Medicare Part D prescription drug plans had an aggregate of approximately 2.3 million members as of December 31, 2018. Aetna will provide administrative services to, and will retain the financial results of, the divested plans through 2019.

As a result of the Aetna Acquisition, the Company added the Health Care Benefits segment, which is the equivalent of the former Aetna Health Care segment. Certain aspects of Aetna's operations, including products for which the Company no longer solicits or accepts new customers, such as large case pensions and long-term care insurance products, are included in the Company's Corporate/Other segment. The Company now has four reportable segments: Pharmacy Services, Retail/LTC, Health Care Benefits and Corporate/Other.

Overview of the Pharmacy Services Segment

The Pharmacy Services segment provides a full range of pharmacy benefit management ("PBM") solutions, including plan design offerings and administration, formulary management, retail pharmacy network management services, mail order pharmacy, specialty pharmacy and infusion services, Medicare Part D services, clinical services, disease management services and medical spend management. The Pharmacy Services segment's clients are primarily employers, insurance companies, unions, government employee groups, health plans, Medicare Part D prescription drug plans ("PDPs"), Medicaid managed care plans, plans offered on public health insurance exchanges and private health insurance exchanges, other sponsors of health benefit plans and individuals throughout the United States. In addition, the Company is a national provider of drug benefits to eligible beneficiaries under the Medicare Part D prescription drug program. The Pharmacy Services segment operates retail specialty pharmacy stores, specialty mail order pharmacies, mail order dispensing pharmacies, compounding pharmacies and

branches for infusion and enteral nutrition services. During the year ended December 31, 2018, the Company's PBM filled or managed approximately 1.9 billion prescriptions on a 30-day equivalent basis.

Overview of the Retail/LTC Segment

The Retail/LTC segment sells prescription drugs and a wide assortment of general merchandise, including over-the-counter drugs, beauty products, cosmetics and personal care products, provides health care services through its MinuteClinic ® walk-in medical clinics and conducts long-term care ("LTC") pharmacy operations, which distribute prescription drugs and provide related pharmacy consulting and other ancillary services to chronic care facilities and other care settings. Prior to January 2, 2018, the Retail/LTC segment also provided commercialization services under the name RxCrossroads ® . The Company divested its RxCrossroads subsidiary on January 2, 2018. As of December 31, 2018, the Retail/LTC segment operated more than 9,900 retail locations, over 1,100 MinuteClinic ® locations as well as online retail pharmacy websites, LTC pharmacies and onsite pharmacies. During the year ended December 31, 2018, the Retail/LTC segment filled approximately 1.3 billion prescriptions on a 30-day equivalent basis. In December 2018, the Company held approximately 26% of the United States retail pharmacy market.

Overview of the Health Care Benefits Segment

The Health Care Benefits segment is one of the nation's leading diversified health care benefits providers, serving an estimated 38 million people as of December 31, 2018 . The Health Care Benefits segment has the information and resources to help members, in consultation with their health care professionals, make better informed decisions about their health care. The Health Care Benefits segment offers a broad range of traditional, voluntary and consumer-directed health insurance products and related services, including medical, pharmacy, dental, behavioral health, medical management capabilities, Medicare Advantage and Medicare Supplement plans, PDPs, Medicaid health care management services, workers' compensation administrative services and health information technology products and services. The Health Care Benefits segment's customers include employer groups, individuals, college students, part-time and hourly workers, health plans, health care providers ("providers"), governmental units, government-sponsored plans, labor groups and expatriates.

Overview of the Corporate/Other Segment

The Company presents the remainder of its financial results in the Corporate/Other segment, which consists of:

- Management and administrative expenses to support the overall operations of the Company, which include certain aspects of executive management and the corporate relations, legal, compliance, human resources, information technology and finance departments; and
- Products for which the Company no longer solicits or accepts new customers such as large case pensions and long-term care insurance products.

Results of Operations

Summary of Consolidated Financial Results

	Year Ended December 31,			Change			
				2018 vs. 2017		2017 vs. 2016

Commentary - 2018 compared to 2017

Revenues

- Total revenues increased $9.8 billion or 5.3% in 2018 compared to 2017 . The increase in total revenues was due to a 2.7% increase in Pharmacy Services segment revenue, a 5.8% increase in Retail/LTC segment revenue and the impact of the Aetna Acquisition (primarily reflected in the Health Care Benefits segment) which occurred in November 2018.
- Please see “Segment Analysis” later in this document for additional information about the revenues of the Company’s segments.

Operating expenses (including goodwill impairments)

- Operating expenses increased $8.5 billion or 44.9% in 2018 compared to 2017 . The increase in operating expenses was primarily due to higher operating expenses in the Retail/LTC segment including increased goodwill impairment charges in 2018, the impact of the Aetna Acquisition and an increase in acquisition-related transaction and integration costs. The increase was partially offset by a lack of charges associated with store closures in 2018.
- Operating expenses as a percentage of total revenues was 14.1% in 2018 , an increase of 380 basis points compared to 2017 . The increase in operating expenses as a percentage of total revenues in 2018 was primarily due to the goodwill impairment charges in the Retail/LTC segment in 2018.
- Please see “Segment Analysis” later in this document for additional information about the operating expenses of the Company’s segments.

Operating income

- Operating income decreased $5.5 billion or 57.8% in 2018 compared to 2017 . The decrease was primarily due to the increase in operating expenses described above, continued price compression in the Pharmacy Services segment and reimbursement pressure in the Retail/LTC segment. The decrease was partially offset by increased prescription volume, improved purchasing economics and the addition of Aetna.
- Please see “Segment Analysis” later in this document for additional information about the operating income of the Company’s segments.

Interest expense

- Interest expense increased $1.6 billion during 2018 , primarily due to financing activity associated with the Aetna Acquisition. See Note 8 ‘‘Borrowings and Credit Agreements’’ to the consolidated financial statements for additional information.

Other expense (income)

- Other expense decreased $212 million during 2018, primarily due to 2017 reflecting a $187 million loss on settlement of the Company’s defined benefit pension plans.

Income tax provision

- The Tax Cuts and Jobs Act (the “TCJA”) was enacted on December 22, 2017. Among numerous changes to existing tax laws, the TCJA permanently reduced the federal corporate income tax rate from 35% to 21% effective January 1, 2018. The Company completed its assessment of the TCJA’s final impact in December 2018 and recorded an additional tax benefit of approximately $100 million .
- The Company’s effective income tax rate was 142.4% in 2018 compared to 19.8% in 2017 . The increase in the effective income tax rate was primarily due to the goodwill impairment charges in the Retail/LTC segment in 2018, the majority of which are not deductible for income tax purposes, and an income tax benefit of $1.5 billion in 2017 which reflected the remeasurement of the Company’s net deferred income tax liabilities as a result of the enactment of the TCJA. The increase was partially offset by a lower federal corporate income tax rate in 2018 compared to the prior year as a result of the enactment of the TCJA, which reduced the corporate income tax rate in 2018 to 21% from 35% in 2017.

Loss from discontinued operations

- In connection with certain business dispositions completed between 1991 and 1997, the Company retained guarantees on store lease obligations for a number of former subsidiaries, including Linens ‘n Things, which filed for bankruptcy in 2008, and Bob’s stores, which filed for bankruptcy in 2016. The Company’s loss from discontinued operations includes lease-related costs required to satisfy its Linens ‘n Things and Bob’s Stores lease guarantees.
- The Company incurred a loss from discontinued operations, net of tax, of $8 million in 2017 . Results from discontinued operations were immaterial in 2018.
- See “Discontinued Operations” in Note 1 ‘‘Significant Accounting Policies’’ to the consolidated financial statements for additional information about discontinued operations and Note 16 ‘‘Commitments and Contingencies’’ to the consolidated financial statements for additional information about the Company’s lease guarantees.

Commentary - 2017 compared to 2016

Revenues

- Total revenues increased $7.2 billion or 4.1% in 2017 compared to 2016 . The increase in total revenues was due to a 8.9% increase in Pharmacy Services segment revenue, partially offset by a 2.1% decrease in Retail/LTC segment revenue.
- The increase in generic dispensing rates in 2017 negatively affected both the Pharmacy Services and Retail/LTC segment revenues in 2017 compared to 2016 .
- Please see “Segment Analysis” later in this document for additional information about the revenues of the Company’s segments.

Operating expenses (including goodwill impairments)

- Operating expenses increased $542 million , or 2.9% , in 2017 compared to 2016 . The increase in operating expenses primarily relates to (i) higher operating expenses in the Retail/LTC segment including an increase of $181 million in charges associated with the closure of retail stores in connection with the Company’s enterprise streamlining initiative and a $181 million goodwill impairment charge related to the RxCrossroads reporting unit; and (ii) higher operating expenses

in the Pharmacy Services segment due to 2016 reflecting the favorable impact of a reversal of an accrual of $85 million in connection with a legal settlement. The increase was partially offset by lower acquisition-related transaction and integration costs due to the bulk of the integration costs related to the acquisition of Omnicare, Inc. ("Omnicare") being incurred in 2016.

- Operating expenses as a percentage of total revenues was 10.3% in 2017 , a decline of 10 basis points compared to 2016 . The decline in operating expenses as a percentage of total revenues in 2017 was primarily due expense leverage from revenue growth.
- Please see "Segment Analysis" later in this document for additional information about the operating expenses of the Company's segments.

Operating income

- Operating income decreased $848 million or 8.2% in 2017 compared to 2016 . The decrease was primarily driven by the previously announced restricted networks that excluded CVS Pharmacy, continued price compression in the Pharmacy Services segment, reimbursement pressure in the Retail/LTC segment and the increased operating expenses described above.
- Please see "Segment Analysis" later in this document for additional information about the operating income of the Company's segments.

Interest expense

- Interest expense decreased $16 million during 2017 , primarily due to the Company's debt issuance and debt tender offers that occurred in 2016 which resulted in overall more favorable interest rates on the Company's long-term debt. See Note 8 ''Borrowings and Credit Agreements'' to the consolidated financial statements for additional information.

Other expense (income)

- Other expense increased $180 million during 2017 , primarily due to 2017 reflecting a $187 million loss on settlement of the Company's defined benefit pension plans.

Loss on early extinguishment of debt

- The loss on early extinguishment of debt of $643 million in 2016 relates to the redemption of approximately $4.2 billion aggregate principal amount of certain of the Company's senior notes (see Note 8 ''Borrowings and Credit Agreements'' to the consolidated financial statements). As a result of the redemption, the Company paid a premium of $583 million in excess of the debt principal, wrote off $54 million of unamortized deferred financing costs and incurred $6 million in fees.

Income tax provision

- The Company's effective income tax rate was 19.8% in 2017 compared to 38.4% in 2016 . The decrease in the effective income tax rate was primarily due to the provisional impact of the TCJA, including the revaluation of net deferred tax liabilities.
- As the result of the reduction of the corporate income tax rate under the TCJA, the Company estimated the revaluation of its net deferred tax liabilities and recorded a provisional noncash income tax benefit of approximately $1.5 billion in 2017.

Loss from discontinued operations

- Please see the *Commentary - 2018 compared to 2017* section above for additional information about the Company's discontinued operations.
- The Company incurred losses from discontinued operations, net of tax, of $8 million and $1 million in 2017 and 2016 , respectively.

Outlook for 2019

The Company expects 2019 to be a transition year as it integrates the Aetna Acquisition and focuses on key pillars of its growth strategy. The Company believes that it is on track to exceed its 2020 target for synergies from the Aetna Acquisition. The Company also expects that the following challenges may have a disproportionate adverse impact on, and reduce, the operating income of its Pharmacy Services and Retail/LTC segments in 2019 compared to 2018:

- Ongoing pharmacy reimbursement pressure in the Pharmacy Services and Retail/LTC segments and reductions in the traditional offsets to those pressures, including a declining benefit from the introduction of new multi-source generic prescription drugs and lower benefits from generic dispensing rate increases;
- The reimbursement pressure in the Pharmacy Services segment is projected to be exacerbated by the cumulative effect on rebate guarantees of lower brand name drug price inflation and a modest 2019 selling season; and
- The Retail/LTC segment is projected to be impacted by structural and Company specific challenges in the long-term care space as well as the annualization of the Company's 2018 investment of a portion of the savings from the TCJA in wages and benefits.

The Company is taking specific actions designed to address these challenges and position it well in 2020 and beyond. These actions include new product and service initiatives in its Pharmacy Services and Retail/LTC segments, introducing a new PBM client contracting model, accelerating the action plan designed to improve the performance of the LTC business and initiating a new enterprise cost reduction effort. The Company also is continuing to evaluate its assets and the roles they play in enabling the Company's core strategies.

The Company's current expectations described above are forward-looking statements. Please see "Cautionary Statement Concerning Forward-Looking Statements" below for information regarding important factors that may cause the Company's actual results to differ from those currently projected and/or otherwise materially affect the Company.

Segment Analysis

The Company has three operating segments, Pharmacy Services, Retail/LTC and Health Care Benefits, as well as a Corporate/Other segment. The Company evaluates the performance of its operating segments based on operating income (loss) and operating income (loss) before the effect of (i) nonrecurring charges or gains and (ii) certain intersegment activities. The following is a reconciliation of the Company's segments total revenues and operating income (loss) to the consolidated financial statements:

In millions	**Pharmacy Services [1][2]**	**Retail/LTC [2]**	**Health Care Benefits [2]**	**Corporate/ Other**	**Intersegment Eliminations [2]**	**Consolidated Totals**
2018						
Total revenues [3]	$ 134,128	$ 83,989	$ 5,549	$ 606	$ (29,693)	$ 194,579
Operating income (loss) [4][5]	4,699	620	276	(805)	(769)	4,021
2017						
Total revenues [7]	130,601	79,398	—	16	(25,229)	184,786
Operating income (loss) [4][5][7]	4,657	6,558	—	(936)	(741)	9,538
2016						
Total revenues [7]	119,965	81,100	—	18	(23,537)	177,546
Operating income (loss) [4][5][6][7]	4,570	7,437	—	(900)	(721)	10,386

(1) Total revenues of the Pharmacy Services segment include approximately $11.4 billion , $10.8 billion and $10.5 billion of Retail Co-Payments for 2018 , 2017 and 2016 , respectively. See Note 1 ''Significant Accounting Policies'' to the consolidated financial statements for additional information about Retail Co-Payments.

(2) Intersegment eliminations relate to intersegment revenue generating activities that occur between the Pharmacy Services segment and the Retail/LTC segment for 2018, 2017 and 2016. Effective November 28, 2018, intersegment eliminations also relate to intersegment revenue generating activities that occur between the Health Care Benefits segment, the Pharmacy Services segment and/or the Retail/LTC segment.

(3) Corporate/Other segment revenues for 2018 include interest income of $536 million related to the proceeds of the $40 billion principal amount of unsecured floating rate notes and unsecured fixed rate senior notes the Company issued on March 9, 2018 (collectively, the "2018 Notes"). This amount is for the period prior to the close of the Aetna Acquisition, which occurred on November 28, 2018.

(4) Retail/LTC segment operating income for 2018 , 2017 and 2016 includes $7 million , $34 million and $281 million , respectively, of acquisition-related integration costs. The integration costs in 2018 and 2017 are related to the acquisition of Omnicare. The integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacy and clinic businesses of Target Corporation ("Target"). Retail/LTC segment operating income for 2018 and 2017 also includes goodwill impairment charges of $6.1 billion related to the LTC reporting unit and $181 million related to the RxCrossroads reporting unit, respectively. In addition, Retail/LTC segment operating income for 2017 and 2016 includes $215 million and $34 million , respectively, of charges associated with store rationalization and asset impairment charges in connection with planned store closures related to the Company's enterprise streamlining initiative. Retail/LTC segment operating income for 2018 also includes a $43 million loss on impairment of long-lived assets primarily related to the impairment of property and equipment and an $86 million loss on the divestiture of the Company's RxCrossroads subsidiary.

(5) Corporate/Other segment operating loss for 2018 , 2017 and 2016 includes $485 million , $40 million and $10 million, respectively, of divestiture and acquisition-related transaction and integration costs included in operating expenses in the consolidated statements of operations. The transaction and integration costs in 2018 are related to the acquisitions of Aetna and Omnicare. The transaction and integration costs in 2017 are related to the acquisitions of Aetna and Omnicare and the divestiture of RxCrossroads. The integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacy and clinic businesses of Target.

(6) Pharmacy Services segment operating income for 2016 includes the reversal of an accrual of $88 million in connection with a legal settlement.

(7) Amounts revised to reflect the reclassification of interest income from interest expense, net to net investment income within total revenues to conform with insurance company presentation which increased total revenues and operating income by $21 million and $20 million in 2017 and 2016 , respectively.

Pharmacy Services Segment

The following table summarizes the Pharmacy Services segment's performance for the respective periods:

	Year Ended December 31,			Change			
				2018 vs. 2017		2017 vs. 2016	
In millions	**2018**	**2017**	**2016**	**$**	**%**	**$**	**%**
Revenues:							
Products	$ 130,264	$ 126,770	$ 116,639	$ 3,494	2.8 %	$ 10,131	8.7%
Premiums	3,361	3,558	3,069	(197)	(5.5)%	489	15.9%
Services	490	268	255	222	82.8 %	13	5.1%
Net investment income [1]	13	5	2	8	160.0 %	3	150.0%

Cost of products sold	125,107	121,799	111,949	3,308	2.7 %	9,850	8.8%
Benefit costs	2,805	2,810	2,179	(5)	(0.2)%	631	29.0%
Operating expenses [2]	1,517	1,335	1,267	182	13.6 %	68	5.4%
Operating expenses % of revenues	1.1%	1.0%	1.1%				
Operating income [1]	$ 4,699	$ 4,657	$ 4,570	$ 42	0.9 %	$ 87	1.9%
Operating income % of revenues	3.5%	3.6%	3.8%				
Revenues (by distribution channel): [8]							
Pharmacy network [3][4]	$ 83,261	$ 80,891	$ 73,686	$ 2,370	2.9 %	$ 7,205	9.8%
Mail choice [5]	46,934	45,709	42,783	1,225	2.7 %	2,926	6.8%
Other [4]	3,920	3,996	3,494	(76)	(1.9)%	502	14.4%
Pharmacy claims processed: [6][7]							
Total	1,889.8	1,781.9	1,639.2	107.9	6.1 %	142.7	8.7%
Pharmacy network [3]	1,601.4	1,516.7	1,387.7	84.7	5.6 %	129	9.3%
Mail choice [5]	288.4	265.2	251.5	23.2	8.7 %	13.7	5.4%
Generic dispensing rate: [6][7]							
Total	87.3%	87.0%	85.9%				
Pharmacy network [3]	87.9%	87.7%	86.7%				
Mail choice [5]	83.9%	83.1%	81.4%				
Mail choice penetration rate [6][7]	15.3%	14.9%	15.3%				

(1) Amounts revised to reflect the reclassification of interest income from interest expense, net to net investment income within revenues to conform with insurance company presentation which increased both net investment income and operating income by $5 million and $2 million in 2017 and 2016 , respectively.
(2) Pharmacy Services segment operating expenses in 2016 include the reversal of an accrual of $88 million in connection with a legal settlement.
(3) Pharmacy network revenues, pharmacy network claims processed and pharmacy network generic dispensing rate do not include Maintenance Choice ® activity, which is included within the mail choice category. Pharmacy network is defined as claims filled at retail and specialty retail pharmacies, including the Company's retail pharmacies and LTC pharmacies, but excluding Maintenance Choice activity.
(4) Amounts revised for 2017 and 2016 to reflect the reclassification of Medicare Part D premium revenues from pharmacy network revenues to other revenues.
(5) Mail choice is defined as claims filled at a Pharmacy Services mail facility, which includes specialty mail claims inclusive of Specialty Connect ® claims picked up at a CVS Pharmacy retail store, as well as prescriptions filled at the Company's retail pharmacies under the Maintenance Choice program, which permits eligible client plan members to fill their maintenance prescriptions through mail order delivery or at a CVS Pharmacy retail store for the same price as mail order..
(6) Includes the adjustment to convert 90-day prescriptions to the equivalent of three 30-day prescriptions. This adjustment reflects the fact that these prescriptions include approximately three times the amount of product days supplied compared to a normal prescription.
(7) The pharmacy claims processed, generic dispensing rate and mail choice penetration rate in 2016 have been revised to convert 90-day prescriptions to the equivalent of three 30-day prescriptions.
(8) Excludes net investment income.

Commentary - 2018 compared to 2017

Revenues

- Total revenues increased $3.5 billion , or 2.7% , to $134.1 billion in 2018 compared to 2017. The increase was primarily due to increased total pharmacy claims volume, partially offset by continued client pricing pressures.
- As you review the Pharmacy Services segment's performance in this area, you should consider the following important information about the business:
  - The Company's mail choice claims processed, on a 30-day equivalent basis, increased 8.7% to 288.4 million claims in 2018 compared to 265.2 million claims in 2017 . The increase in mail choice claims was primarily driven by the continued adoption of Maintenance Choice offerings and an increase in specialty pharmacy claims.
  - During 2018 , the average revenue per mail choice claim, on a 30-day equivalent basis, decreased by 5.6% compared to 2017 as a result of price compression.
  - The Company's pharmacy network claims processed, on a 30-day equivalent basis, increased 5.6% to approximately 1.6 billion claims in 2018 compared to approximately 1.5 billion claims in 2017 . The increase in the pharmacy network claim volume was primarily due to net new business.
  - During 2018 , the average revenue per pharmacy network claim processed, on a 30-day equivalent basis, decreased 2.7% compared to 2017 as a result of continued price compression.
  - The Company's total generic dispensing rate increased to 87.3% in 2018 compared to 87.0% in 2017 . The continued increase in the Company's generic dispensing rate was primarily due to the impact of new generic drug introductions and the Company's ongoing efforts to encourage plan members to use generic drugs when they are available and clinically appropriate. The Company believes its generic dispensing rate will continue to increase in future periods, albeit at a slower pace. This increase will be affected by, among other things, the number of new brand and generic drug introductions and the Company's success at encouraging plan members to utilize generic drugs when they are available and clinically appropriate.

Operating expenses

- Operating expenses in the Pharmacy Services segment include selling, general and administrative expenses, depreciation and amortization related to selling, general and administrative activities and administrative payroll, employee benefits and occupancy costs.
- Operating expenses increased $182 million , or 13.6% , in 2018 compared to 2017 . The year over year increase in operating expenses was primarily due to:
  - Growth in the business, including acquisitions; and
  - The reinstatement of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010' s (as amended, collectively, the "ACA's") health insurer fee ("HIF") in 2018;
  - Partially offset by the realization of partially reserved receivables in 2017 which reduced operating expenses.
- Operating expenses as a percentage of total revenues remained relatively consistent at 1.1% and 1.0% in 2018 and 2017 , respectively.

Operating income

- Operating income increased $42 million , or 0.9% , to $4.7 billion in 2018 compared to 2017 . The increase in operating income was primarily due to increased claims volume and improved purchasing economics, partially offset by continued price compression and the increased operating expenses described above.
- As you review the Pharmacy Services segment's performance in this area, you should consider the following important information about the business:
  - The Company's efforts to (i) retain existing clients, (ii) obtain new business and (iii) maintain or improve the rebates and/or discounts the Company receives from manufacturers, wholesalers and retail pharmacies continue to have an impact on operating income. In particular, competitive pressures in the PBM industry have caused the Company and other PBMs to continue to share with clients a larger portion of rebates and/or discounts received from pharmaceutical manufacturers. In addition, marketplace dynamics and regulatory changes have limited the Company's ability to offer plan sponsors pricing that includes retail network "differential" or "spread," and the Company expects these trends to continue. The "differential" or "spread" is any difference between the drug price charged to plan sponsors, including Medicare Part D plan sponsors, by a PBM and the price paid for the drug by the PBM to the dispensing provider.

Commentary - 2017 compared to 2016

Revenues

- Total revenues increased $10.6 billion , or 8.9% , to $130.6 billion in 2017 compared to 2016 . The increase was primarily due to growth in pharmacy network and specialty pharmacy volume as well as brand name drug price inflation, partially offset by continued price compression and increased generic dispensing.
- As you review the Pharmacy Services segment's performance in this area, you should consider the following important information about the business:
  - The Company's mail choice claims processed, on a 30-day equivalent basis, increased 5.4% to 265.2 million claims in 2017 compared to 251.5 million claims in 2016 .
  - During 2017 , the Company's average revenue per mail choice claim, on a 30-day equivalent basis, increased by 1.7% compared to 2016 . The increase was primarily due to growth in specialty pharmacy and brand name drug price inflation.
  - The Company's pharmacy network claims processed, on a 30-day equivalent basis, increased 9.3% to approximately 1.5 billion claims in 2017 compared to approximately 1.4 billion claims in 2016 . The increase was primarily due to increased volume from net new business.
  - During 2017 , the average revenue per pharmacy network claim processed remained flat on a 30-day equivalent basis.
  - The Company's total generic dispensing rate increased to 87.0% in 2017 compared to 85.9% in 2016 . The increase in the Company's generic dispensing rate was primarily due to the impact of new generic drug introductions, and the Company's ongoing efforts to encourage plan members to use generic drugs when they are available and clinically appropriate.

Operating expenses

- Operating expenses increased $68 million , or 5.4% , in 2017 compared to 2016 . The year over year increase in operating expenses was primarily due to an $88 million reversal of an accrual in connection with a legal settlement in 2016 and an increase in costs associated with the growth of the business. The increase was partially offset by the realization of partially reserved receivables in 2017 which reduced operating expenses.
- Operating expenses as a percentage of revenues remained relatively consistent at 1.0% and 1.1% of revenues in 2017 and 2016 , respectively.

Operating income

- Operating income increased $87 million , or 1.9% , to $4.7 billion in 2017 compared to 2016 . The increase in operating income was primarily due to growth in specialty pharmacy, higher generic dispensing and favorable purchasing economics, partially offset by price compression and the increased operating expenses described above.

Retail/LTC Segment

The following table summarizes the Retail/LTC segment's performance for the respective periods:

	Year Ended December 31,			Change			
				2018 vs. 2017		2017 vs. 2016	
In millions	**2018**	**2017**	**2016**	**$**	**%**	**$**	**%**
Revenues							
Products	$ 83,175	$ 78,522	$ 80,275	$ 4,653	5.9 %	$ (1,753)	(2.2)%

Same store sales increase (decrease): [8]							
Total	6.0%	(2.6)%	1.9 %				
Pharmacy	7.9%	(2.6)%	3.2 %				
Front Store	0.5%	(2.6)%	(1.5)%				
Prescription volume [7]	9.1%	0.4 %	3.6 %				
Generic dispensing rate	87.5%	87.3 %	85.7 %				

(1) Cost of products sold and operating income for 2017 include $2 million of acquisition-related integration costs related to the acquisition of Omnicare.
(2) Operating expenses and operating income in 2018, 2017 and 2016 include $7 million , $32 million and $235 million , respectively, of acquisition-related integration costs. In 2018 and 2017 , the integration costs related to the acquisition of Omnicare. In 2016 , the integration costs related to the acquisitions of Omnicare and the pharmacy and clinic businesses of Target.
(3) Operating expenses and operating income for 2018 and 2017 include goodwill impairment charges of $6.1 billion related to the LTC reporting unit and $181 million related to the RxCrossroads reporting unit, respectively.
(4) Operating expenses and operating income for 2017 and 2016 include $215 million and $34 million , respectively, of charges associated with store rationalization and asset impairment charges in connection with planned store closures related to the Company's enterprise streamlining initiative.
(5) Operating expenses and operating income for 2018 include a $43 million loss on impairment of long-lived assets primarily related to the impairment of property and equipment.
(6) Operating expenses and operating income for 2018 include an $86 million loss on the divestiture of the Company's RxCrossroads subsidiary.
(7) Includes the adjustment to convert 90-day, non-specialty prescriptions to the equivalent of three 30-day prescriptions. This adjustment reflects the fact that these prescriptions include approximately three times the amount of product days supplied compared to a normal prescription.
(8) Same store sales and prescription volume exclude revenues from MinuteClinic, and revenue and prescriptions from stores in Brazil, LTC operations and commercialization services.

Commentary - 2018 compared to 2017

Revenues

- Total revenues increased approximately $4.6 billion , or 5.8% , to $84.0 billion in 2018 compared to 2017 . The increase was primarily driven by increased prescription volume and brand name drug price inflation, partially offset by continued reimbursement pressure and the impact of recent generic introductions.
- As you review the Retail/LTC segment's performance in this area, you should consider the following important information about the business:
    - Front store same store sales increased 0.5% in 2018 compared to 2017 . Front store sales in 2018 continued to benefit from increases in health product sales.
    - Pharmacy same store sales increased 7.9% in 2018 compared to 2017 . The increase was driven by the 9.1% increase in pharmacy same store prescription volumes on a 30-day equivalent basis due to (i) continued adoption of patient care programs, (ii) collaborations with PBMs, and (iii) the Company's preferred status in a number of Medicare Part D networks during 2018. The increase was also due to the impact of year over year brand name drug price inflation that occurred primarily in the first three months of 2018.
    - Pharmacy revenue continues to be adversely affected by the conversion of brand name drugs to equivalent generic drugs, which typically have a lower selling price. The generic dispensing rate grew to 87.5% in 2018 compared to 87.3% in 2017 . In addition, pharmacy revenue growth has also been negatively affected by continued reimbursement pressure.
    - 2017 revenues include approximately $0.4 billion related to the Company's RxCrossroads subsidiary which was sold on January 2, 2018.
    - Pharmacy revenue growth has been adversely affected by industry challenges in the LTC business, such as continuing lower occupancy rates at skilled nursing facilities, as well as the deteriorating financial health of many skilled nursing facilities which resulted in a number of customer bankruptcies in 2018.
    - Pharmacy revenue in 2018 continued to benefit from the Company's ability to attract and retain managed care customers and the increased use of pharmaceuticals by an aging population as the first line of defense for health care.

Operating expenses (including goodwill impairments)

- Operating expenses in the Retail/LTC segment include store payroll, store employee benefits, store occupancy costs, selling expenses, advertising expenses, depreciation and amortization expense and certain administrative expenses.
- Operating expenses increased $6.7 billion , or 39.9% , in 2018 compared to 2017 . The increase in operating expenses in 2018 was primarily due to:
    - A goodwill impairment charge of $6.1 billion in 2018 in the LTC reporting unit (see Note 5 ‘‘Goodwill and Other Intangibles’’ to the consolidated financial statements), as compared to a $181 million goodwill impairment charge in the RxCrossroads reporting unit recorded in 2017 in connection with the upcoming sale of RxCrossroads. See the discussion of goodwill under “Critical Accounting Policies” later in this document;
    - An $86 million pre-tax loss on the sale of the RxCrossroads subsidiary in 2018;
    - A $43 million impairment of long-lived assets in 2018; and
    - An increase in operating expenses due to (i) the investment of a portion of the savings from the TCJA in wages and benefits, (ii) increased prescription volume described previously, (iii) incremental costs associated with operating more stores and (iv) other investments in the business to drive revenue growth;
    - Partially offset by lower operating expenses as a result of a lack of charges associated with store closures in 2018, for which the Company incurred $215 million in connection with its enterprise streamlining initiative in 2017; and
    - A decrease in hurricane-related expenses of $25 million in 2018 compared to 2017 .
- Operating expenses as a percentage of total revenues were 27.9% in 2018 compared to 21.1% in 2017 . The increase in operating expenses as a percentage of total revenues was driven by the increased goodwill impairment charges in 2018.

Operating income

- Operating income decreased $5.9 billion , or 90.5% , to approximately $620 million in 2018 compared to 2017 . The decrease in operating income was driven primarily by the increased operating expenses described above.

- As you review the Retail/LTC segment's performance in this area, you should consider the following important information about the business:
    - The Company's pharmacy operating income has been adversely affected by the efforts of managed care organizations, PBMs and governmental and other third-party payors to reduce their prescription drug costs, including the use of restrictive networks, as well as changes in the mix of business within the pharmacy portion of the Retail/LTC Segment. If the reimbursement pressure accelerates, the Company may not be able grow revenues, and its operating income could be adversely affected.
    - The increased use of generic drugs has positively impacted the Company's operating income but has resulted in third-party payors augmenting their efforts to reduce reimbursement payments to retail pharmacies for prescriptions. This trend, which the Company expects to continue, reduces the benefit the Company realizes from brand to generic product conversions.

Commentary - 2017 compared to 2016

Revenues

- Total revenues decreased approximately $1.7 billion , or 2.1% , to $79.4 billion in 2017 compared to 2016 . The decrease was primarily due to a decline in same store sales as a result of the previously-announced marketplace changes that restrict CVS Pharmacy from participating in certain networks.
- As you review the Retail/LTC segment's performance in this area, you should consider the following important information about the business:
    - Front store same store sales declined 2.6% in 2017 compared to 2016 and were negatively impacted approximately 30 basis points due to the absence of leap day in 2017 . The decrease was primarily driven by softer customer traffic and efforts to rationalize promotional strategies, partially offset by an increase in basket size.
    - Pharmacy same store sales declined 2.6% in 2017 compared to 2016 . Pharmacy same store sales were negatively impacted by approximately 390 basis points due to recent generic introductions. Same store prescription volumes increased 0.4% , despite the approximately 420 basis point negative impact from previously-discussed marketplace changes that restrict CVS Pharmacy from participating in certain networks.
    - Pharmacy revenue continues to be negatively impacted by the conversion of brand name drugs to equivalent generic drugs, which typically have a lower selling price. The generic dispensing rate grew to 87.3% in 2017 compared to 85.7% in 2016 . In addition, pharmacy revenue growth has also been negatively affected by the mix of drugs sold, continued reimbursement pressure and the lack of significant new brand name drug introductions.
    - Pharmacy revenue in 2017 continued to benefit from the Company's ability to attract and retain managed care customers, and the increased use of pharmaceuticals by an aging population as the first line of defense for health care.

Operating expenses (including goodwill impairment)

- Operating expenses increased $450 million , or 2.8% in 2017 . The increase in operating expenses in 2017 was due primarily to:
    - An increase of $181 million in charges associated with the closure of retail stores in connection with the Company's enterprise streamlining initiative;
    - A goodwill impairment charge of $181 million related to the RxCrossroads reporting unit, which was subsequently sold on January 2, 2018;
    - Hurricane related costs of $55 million; and
    - Costs associated with new store openings
- Operating expenses as a percentage of total revenues were 21.1% in 2017 compared to 20.1% in 2016 . The increase in 2017 was primarily due to a decline in expense leverage with the loss of business from the previously discussed marketplace changes that restrict CVS Pharmacy from participating in certain networks.

Operating income

- Operating income decreased $879 million , or 11.8% , to approximately $6.6 billion in 2017 compared to 2016 . The decrease in operating income was driven primarily by the increased operating expenses described above and reimbursement pressure.

Health Care Benefits Segment

On November 28, 2018, the Company completed the Aetna Acquisition. The Health Care Benefits segment is the equivalent of the former Aetna Health Care segment.

The following table summarizes the Health Care Benefits segment's performance for the period from November 28, 2018 to December 31, 2018:

In millions	
Revenues:	
Products	$ 164
Premiums	4,819
Services	521
Net investment income	45
Total revenues	5,549
Cost of products sold	147
Benefit costs	3,873
Operating expenses	1,253
Operating income	$ 276

Revenues and operating income for the Health Care Benefits segment include results for the period from November 28, 2018 to December 31, 2018 and therefore are not directly comparable to the former Aetna Health Care segment results for the fourth quarter of 2017.

Health Care Benefits segment medical membership as of December 31, 2018 was as follows:

In thousands	**Insured**	**ASC [1]**	**Total**
Medical membership:			
Commercial	3,871	13,888	17,759
Medicare Advantage	1,758	—	1,758
Medicare Supplement	793	—	793
Medicaid	1,128	663	1,791
Total medical membership	7,550	14,551	22,101

(1) Represents self-insured membership under Administrative Services Contracts.

Medical Membership
Medical membership as of December 31, 2018 remained relatively consistent compared with December 31, 2017, reflecting decreases in Commercial insured and Medicaid products, largely offset by increases in Commercial ASC and Medicare products.

Corporate/Other Segment

Commentary - 2018 compared to 2017

Revenues
- Revenues in 2018 reflect (i) revenues associated with products for which the Company no longer solicits or accepts new customers, such as large case pensions and long-term care insurance products, that were acquired in the Aetna Acquisition and (ii) interest income related to the $40 billion of senior notes issued on March 9, 2018 to partially fund the Aetna Acquisition.

Operating expenses

- Operating expenses within the Corporate/Other segment include executive management, corporate relations, legal, compliance, human resources, information technology, finance related costs and acquisition-related transaction and integration costs. After the Aetna Acquisition Date, such operating expenses also include operating costs to support the large case pensions and long-term care insurance products acquired in the Aetna Acquisition.
- Operating expenses increased $437 million , or 45.9% , in 2018 compared to 2017 . The increase was primarily driven by an increase in acquisition-related transaction and integration costs of $454 million in 2018.

Commentary - 2017 compared to 2016

Operating expenses

- Operating expenses within the Corporate/Other segment include executive management, corporate relations, legal, compliance, human resources, information technology, finance related costs and acquisition-related transaction and integration costs.
- Operating expenses increased $34 million , or 3.7% , in 2017 compared to 2016 . The increase was due to (i) ongoing investments in strategic initiatives, (ii) increased employee benefit costs and (iii) increased divestiture and acquisition-related costs, primarily related to $34 million of transaction costs in 2017 associated with the Aetna Acquisition.

Liquidity and Capital Resources

Cash Flows

The Company maintains a level of liquidity sufficient to allow it to meet its cash needs in the short-term. Over the long term, the Company manages its cash and capital structure to maximize shareholder return, maintain its financial condition and maintain flexibility for future strategic initiatives. The Company continuously assesses its regulatory capital requirements, working capital needs, debt and leverage levels, debt maturity schedule, capital expenditure requirements, dividend payouts, potential share repurchases and future investments or acquisitions. The Company believes its operating cash flows, commercial paper program, credit facilities, sale-leaseback program, as well as any potential future borrowings, will be sufficient to fund these future payments and long-term initiatives.

The net change in cash, cash equivalents and restricted cash for the years ended December 31, 2018 , 2017 and 2016 is as follows:

				Change			
	Year Ended December 31,			2018 vs. 2017		2017 vs. 2016	
In millions	**2018**	**2017**	**2016**	**$**	**%**	**$**	**%**
Net cash provided by operating activities	$ 8,865	$ 8,007	$ 10,141	$ 858	11 %	$ (2,134)	(21)%
Net cash used in investing activities	(43,285)	(2,877)	(2,470)	(40,408)	1,405 %	(407)	16 %
Net cash provided by (used in) financing activities	36,819	(6,751)	(6,761)	43,570	(645)%	10	— %
Effect of exchange rate changes on cash, cash equivalents and restricted cash	(4)	1	2	(5)	(500)%	(1)	(50)%
Net increase (decrease) in cash, cash equivalents and restricted cash	$ 2,395	$ (1,620)	$ 912	$ 4,015	(248)%	$ (2,532)	(278)%

Commentary - 2018 compared to 2017

- *Net cash provided by operating activities* increased by $858 million in 2018 due primarily to the timing of client payments and the timing of payments for the Company's Medicare Part D operations.
- *Net cash used in investing activities* increased by $40.4 billion in 2018 largely driven by the Aetna Acquisition in November 2018. In addition, cash used in investing activities reflected the following activity:
    - Gross capital expenditures remained relatively consistent at approximately $2.0 billion and $1.9 billion in 2018 and 2017 , respectively. During 2018 , approximately 21% of the Company's total capital expenditures were for new store construction, 32% were for store, fulfillment and support facilities expansion and improvements and 47% were for technology and other corporate initiatives.
    - The Company did not complete any sale-leaseback transactions in 2018 compared to $265 million in 2017 . Under the sale-leaseback transactions, the properties generally are sold at net book value, which generally approximates fair value, and the resulting leases generally qualify and are accounted for as operating leases. The specific timing and amount of future sale-leaseback transactions will vary depending on future market conditions and other factors.
- *Net cash provided by financing activities* was $36.8 billion in 2018 compared to net cash used in financing activities of $6.8 billion in 2017 . The cash provided by financing activities in 2018 primarily related to long-term borrowings to partially fund the Aetna Acquisition.

Commentary - 2017 compared to 2016

- *Net cash provided by operating activities* decreased by $2.1 billion , in 2017 due primarily to the timing of payments for the Company's Medicare Part D operations.
- *Net cash used in investing activities* increased by $407 million in 2017 largely driven by an increase in acquisition activity as compared to 2016 . In addition, cash used in investing activities reflected the following activity:
    - Gross capital expenditures in 2017 totaled approximately $1.9 billion , a decrease of $306 million compared to prior year. The decrease in 2017 capital expenditures is due to the Target integration being completed in 2016. During 2017 , approximately 25% of the Company's total capital expenditures were for new store construction, 30% were for store, fulfillment and support facilities expansion and improvements and 45% were for technology and other corporate initiatives.
    - Proceeds from sale-leaseback transactions totaled $265 million in 2017 compared to $230 million in 2016 .
- *Net cash used in financing activities* was $6.8 billion in both 2017 and 2016 as net borrowings and net payments to shareholders were relatively flat in both years.

Included in net cash used in investing activities for the years ended December 31, 2018 , 2017 and 2016 was the following store development activity [(1)] :

	2018	2017	2016
Total stores (beginning of year)	9,846	9,750	9,665
New and acquired stores [(2)]	148	179	132
Closed stores [(2)]	(27)	(83)	(47)
Total stores (end of year)	9,967	9,846	9,750
Relocated stores [(2)]	34	30	50

(1) Includes retail drugstores, certain onsite pharmacy stores, retail specialty pharmacy stores and pharmacies within Target stores.
(2) Relocated stores are not included in new and acquired stores or closed stores totals.

Short-term Borrowings

Commercial Paper and Back-up Credit Facilities
The Company had approximately $720 million and $1.3 billion of commercial paper outstanding at weighted average interest rates of 2.8% and 2.0% as of December 31, 2018 and 2017 , respectively. In connection with its commercial paper program, the Company maintains a $1.75 billion 364-day unsecured back-up revolving credit facility, which expires on May 16, 2019, a $1.25 billion , five-year unsecured back-up revolving credit facility, which expires on July 1, 2020, a $1.0 billion , five-year

unsecured back-up revolving credit facility, which expires on May 18, 2022, and a $2.0 billion , five-year unsecured back-up revolving credit facility, which expires on May 17, 2023. The credit facilities allow for borrowings at various rates that are dependent, in part, on the Company's public debt ratings and require the Company to pay a weighted average quarterly facility fee of approximately .03% , regardless of usage. As of December 31, 2018 and 2017 , there were no borrowings outstanding under any of the back-up credit facilities.

Bridge Loan Facility
On December 3, 2017, in connection with the Aetna Acquisition, the Company entered into a $49.0 billion unsecured bridge loan facility commitment. The Company paid $221 million in fees upon entering into the agreement. The fees were capitalized in other current assets and were amortized as interest expense over the period the bridge loan facility commitment was outstanding. The bridge loan facility commitment was reduced to $44.0 billion on December 15, 2017 upon the Company entering into a $5.0 billion term loan agreement. The Company recorded $56 million of amortization of the bridge loan facility fees during the year ended December 31, 2017, which was recorded in interest expense in the consolidated statements of operations.

On March 9, 2018, the Company issued unsecured senior notes with an aggregate principal amount of $40.0 billion (see "Long-term Borrowings - 2018 Notes" below). At this time, the bridge loan facility commitment was reduced to $4.0 billion , and the Company paid $8 million in fees to retain the bridge loan facility commitment through the Aetna Acquisition Date. Those fees were capitalized in other current assets and were amortized as interest expense over the period the bridge loan facility commitment was outstanding. The Company recorded $173 million of amortization of the bridge loan facility commitment fees during the year ended December 31, 2018 , which was recorded in interest expense in the consolidated statement of operations. On October 26, 2018, the Company entered into a $4.0 billion unsecured 364-day bridge term loan agreement to formalize the bridge loan facility discussed above. On November 28, 2018, in connection with the Aetna Acquisition, the $4.0 billion unsecured 364-day bridge term loan agreement terminated.

Federal Home Loan Bank of Boston
Since the Aetna Acquisition Date, a subsidiary of the Company is a member of the Federal Home Loan Bank of Boston (the "FHLBB"). As a member, the subsidiary has the ability to obtain cash advances, subject to certain minimum collateral requirements. The maximum borrowing capacity available from the FHLBB as of December 31, 2018 was approximately $790 million . As of December 31, 2018 , there were no outstanding advances from the FHLBB.

Long-term Borrowings

2018 Notes
On March 9, 2018, the Company issued an aggregate of $40.0 billion in principal amount of the 2018 Notes for total proceeds of approximately $39.4 billion, net of discounts and underwriting fees. The net proceeds of the 2018 Notes were used to fund a portion of the Aetna Acquisition. The 2018 Notes are comprised of the following:

In millions		
3.125% senior notes due March 2020	$	2,000
Floating rate notes due March 2020		1,000
3.35% senior notes due March 2021		3,000
Floating rate notes due March 2021		1,000
3.7% senior notes due March 2023		6,000
4.1% senior notes due March 2025		5,000
4.3% senior notes due March 2028		9,000
4.78% senior notes due March 2038		5,000
5.05% senior notes due March 2048		8,000
Total debt principal	$	40,000

Term Loan Agreement
On December 15, 2017, in connection with the Aetna Acquisition, the Company entered into a $5.0 billion term loan agreement. The term loan facility under the term loan agreement consists of a $3.0 billion three-year tranche and a $2.0 billion five-year tranche. The term loan agreement allows for borrowings at various rates that are dependent, in part, on the Company's debt ratings. In connection with the Aetna Acquisition, the Company borrowed $5.0 billion (a $3.0 billion three-year tranche

and a $2.0 billion five-year tranche) under the term loan agreement in November 2018. The Company terminated the $2.0 billion five-year tranche in December 2018 with the repayment of the borrowing. As of December 31, 2018, the Company had $3.0 billion outstanding under the three-year tranche of the term loan agreement.

Aetna Related Debt
Upon the closing of the Aetna Acquisition, the Company assumed long-term debt with a fair value of $8.1 billion with stated interest rates ranging from 2.2% to 6.75%.

2016 Notes
On May 16, 2016, the Company issued $1.75 billion aggregate principal amount of 2.125% unsecured senior notes due June 1, 2021 and $1.75 billion aggregate principal amount of 2.875% unsecured senior notes due June 1, 2026 (collectively, the " 2016 Notes ") for total proceeds of approximately $3.5 billion , net of discounts and underwriting fees. The 2016 Notes may be redeemed, in whole at any time, or in part from time to time, at the Company's option at a defined redemption price plus accrued and unpaid interest to the redemption date. The net proceeds of the 2016 Notes were used for general corporate purposes and to repay certain corporate debt.

Early Extinguishment of Long-Term Debt
On May 16, 2016, the Company announced tender offers for (i) any and all of its 5.75% senior notes due 2017, its 6.60% senior notes due 2019 and its 4.75% senior notes due 2020 (collectively, the "Any and All Notes") and (ii) up to $1.5 billion aggregate principal amount of the 4.75% Senior Notes due 2022 issued by its wholly-owned subsidiary Omnicare, the 5.00% Senior Notes due 2024 issued by Omnicare, its 3.875% Senior Notes due 2025, its 6.25% Senior Notes due 2027, its 4.875% Senior Notes due 2035, its 6.125% Senior Notes due 2039 and its 5.75% Senior Notes due 2041 (collectively, the "Maximum Tender Offer Notes" and together with the Any and All Notes, the "Notes"). On May 31, 2016, the Company increased the aggregate principal amount of the tender offers for the Maximum Tender Offer Notes to $2.25 billion. The Company purchased approximately $835 million aggregate principal amount of the Any and All Notes and $2.25 billion aggregate principal amount of the Maximum Tender Offer Notes pursuant to the tender offers, which expired on June 13, 2016. In connection with the purchase of the Notes, the Company paid a premium of $486 million in excess of the debt principal, wrote off $50 million of unamortized deferred financing costs and incurred $6 million in fees, for a total loss on early extinguishment of long-term debt of $542 million, which was recorded in income from continuing operations in the consolidated statement of operations for the year ended December 31, 2016.

On June 27, 2016, the Company notified the holders of the remaining Any and All Notes that the Company was exercising its option to redeem the outstanding Any and All Notes pursuant to the terms of the Any and All Notes and the Indenture dated as of August 15, 2006, between the Company and The Bank of New York Mellon Trust Company, N.A. Approximately $1.1 billion aggregate principal amount of Any and All Notes was redeemed on July 27, 2016. In connection with that redemption, the Company paid a premium of $97 million in excess of the debt principal and wrote off $4 million of unamortized deferred financing costs, for a total loss on early extinguishment of long-term debt of $101 million, which was recorded in income from continuing operations in the consolidated statement of operations for the year ended December 31, 2016.

See Note 8 ''Borrowings and Credit Agreements'' and Note 12 ''Shareholders' Equity'' to the consolidated financial statements for additional information about debt issuances, debt repayments, share repurchases and dividend payments.

Derivative Financial Instruments

The Company uses derivative financial instruments in order to manage interest rate and foreign exchange risk and credit exposure. The Company's use of these derivatives is generally limited to hedging risk and has principally consisted of using interest rate swaps, treasury rate locks, forward contracts, futures contracts, warrants, put options and credit default swaps. As of December 31, 2018 and 2017, the Company had outstanding derivative financial instruments (see Note 1 ''Significant Accounting Policies'' to the consolidated financial statements).

Debt Covenants

The Company's back-up revolving credit facilities, unsecured senior notes, unsecured floating rate notes and term loan agreement (see Note 8 ''Borrowings and Credit Agreements'' to the consolidated financial statements) contain customary restrictive financial and operating covenants. These covenants do not include an acceleration of the Company's debt maturities in the event of a downgrade in the Company's credit ratings. The covenants do not materially affect the Company's financial or operating flexibility. As of December 31, 2018 , the Company was in compliance with all of its debt covenants.

Debt Ratings

As of December 31, 2018 , the Company's long-term debt was rated " Baa2 " by Moody's and " BBB " by Standard & Poor's ("S&P"), and its commercial paper program was rated " P-2 " by Moody's and " A-2 " by S&P. In December 2017, subsequent to the announcement of the proposed acquisition of Aetna, Moody's changed the outlook on the Company's long-term debt to "Under Review" from "Stable." Similarly, S&P placed the Company's long-term debt outlook on "Watch Negative" from "Stable." Upon the issuance of the 2018 Notes on March 9, 2018, S&P lowered its corporate credit rating on the Company's long-term debt to "BBB" from "BBB+" and changed the outlook from "Watch Negative" to "Stable." On November 27, 2018, S&P lowered its rating on the long-term debt of Aetna to "BBB" from "A." On November 28, 2018, upon the completion of the Aetna Acquisition, Moody's lowered its rating on CVS Health Corporation's long-term debt to " Baa2 " from "Baa1." Additionally, Moody's changed the outlook on CVS Health Corporation's long-term debt to "Negative" from "Under Review" and changed the outlook on the long-term debt of Aetna to "Negative" from "Stable." In assessing the Company's credit strength, the Company believes that both Moody's and S&P considered, among other things, the Company's capital structure and financial policies as well as its consolidated balance sheet, its historical acquisition activity and other financial information. Although the Company currently believes its long-term debt ratings will remain investment grade, it cannot guarantee the future actions of Moody's and/or S&P. The Company's debt ratings have a direct impact on its future borrowing costs, access to capital markets and new store operating lease costs.

Share Repurchase Programs

During the year ended December 31, 2018 , the Company did not repurchase any shares of common stock. See Note 12 ''Shareholders' Equity'' to the consolidated financial statements for additional information about share repurchases for the years ended December 31, 2017 and 2016.

Quarterly Cash Dividend

In December 2015, the Company's Board of Directors (the "Board") authorized a 21% increase in our quarterly common stock cash dividend to $0.425 per share effective in 2016. This increase equated to an annual dividend rate of $1.70 per share. In December 2016, the Board authorized an 18% increase in our quarterly common stock cash dividend to $0.50 per share effective in 2017. This increase equated to an annual dividend rate of $2.00 per share. During 2018, the Company maintained its quarterly dividend of $0.50 per share and expects to maintain its quarterly dividend of $0.50 per share throughout 2019.

Off-Balance Sheet Arrangements

In connection with executing operating leases, the Company provides a guarantee of the lease payments. The Company also finances a portion of its new store development through sale-leaseback transactions, which involve selling stores to unrelated parties and then leasing the stores back under leases that generally qualify and are accounted for as operating leases. The Company does not have any retained or contingent interests in the sold stores, and does not provide any guarantees, other than a guarantee of the lease payments, in connection with the transactions. In accordance with generally accepted accounting principles, the Company's operating leases are not reflected on the consolidated balance sheets.

Between 1995 and 1997, the Company sold or spun off a number of subsidiaries, including Bob's Stores and Linens 'n Things (each of which subsequently filed for bankruptcy), and Marshalls. In many cases, when a former subsidiary leased a store, the Company provided a guarantee of the former subsidiary's lease obligations. When the subsidiaries were disposed of, the Company's guarantees remained in place, although each initial purchaser agreed to indemnify the Company for any lease obligations the Company was required to satisfy. If any of the purchasers or any of the former subsidiaries fail to make the required payments under a store lease, the Company could be required to satisfy these obligations.

As of December 31, 2018 , the Company guaranteed approximately 85 such store leases (excluding the lease guarantees related to Linens 'n Things), with the maximum remaining lease term extending through 2029. Management believes the ultimate disposition of any of the remaining lease guarantees will not have a material adverse effect on the Company's consolidated financial condition or future cash flows. Please see "Results of Operations - Summary of Consolidated Financial Results - Commentary - 2018 compared to 2017 - Loss from discontinued operations" previously in this document for further information regarding the Company's guarantee of certain Linens 'n Things' store lease obligations.

Contractual Obligations

The following table summarizes certain estimated future obligations by period under the Company's various contractual obligations at December 31, 2018 . The table below does not include future payments of claims to health care providers or pharmacies because certain terms of these payments are not determinable at December 31, 2018 (for example, the timing and volume of future services provided under fee-for-service arrangements and future membership levels for capitated arrangements).

	Payments Due by Period				
In millions	**Total**	**2019**	**2020 to 2021**	**2022 to 2023**	**Thereafter**
Operating leases	$ 27,980	$ 2,690	$ 4,943	$ 4,343	$ 16,004
Capital lease obligations	1,241	74	146	146	875
Contractual lease obligations with Target [(1)]	2,074	—	—	—	2,074
Lease obligations for discontinued operations	12	4	8	—	—
Long-term debt	72,903	1,242	16,150	12,699	42,812
Interest payments on long-term debt [(2)]	37,949	3,061	5,595	4,594	24,699
Other long-term liabilities on the consolidated balance sheet [(3)]					
Future policy benefits [(4)]	6,728	575	1,200	952	4,001
Unpaid claims [(4)]	2,742	816	644	413	869
Policyholders' funds [(4)(5)]	1,266	632	127	86	421
Other liabilities	1,705	455	911	100	239
Total	$ 154,600	$ 9,549	$ 29,724	$ 23,333	$ 91,994

(1) The Company leases pharmacy and clinic space from Target. See Note 6 ''Leases'' to the consolidated financial statements for additional information regarding the lease arrangements with Target. Amounts related to the operating and capital leases with Target are reflected within the operating leases and capital lease obligations above. Amounts due after the remaining estimated economic lives of the buildings are reflected herein assuming equivalent stores continue to operate through the term of the arrangements.

(2) Interest payments on long-term debt are calculated using outstanding balances and interest rates in effect on December 31, 2018 .

(3) Payments of other long-term liabilities exclude Separate Accounts liabilities of approximately $3.9 billion because these liabilities are supported by assets that are legally segregated and are not subject to claims that arise out of the Company's business.

(4) Total payments of future policy benefits, unpaid claims and policyholders' funds include $1.2 billion , $2.7 billion and $339 million , respectively, of reserves for contracts subject to reinsurance. The Company expects the assuming reinsurance carrier to fund these obligations and has reflected these amounts as reinsurance recoverable assets on the consolidated balance sheets.

(5) Customer funds associated with group life and health contracts of approximately $2.3 billion have been excluded from the table above because such funds may be used primarily at the customer's discretion to offset future premiums and/or for refunds, and the timing of the related cash flows cannot be determined. Additionally, net unrealized capital gains on debt and equity securities supporting experience-rated products of $10 million , before tax, have been excluded from the table above.

Restrictions on Certain Payments

In addition to general state law restrictions on payments of dividends and other distributions to shareholders applicable to all corporations, health maintenance organizations ("HMOs") and insurance companies are subject to further regulations that, among other things, may require those companies to maintain certain levels of equity (referred to as surplus) and restrict the amount of dividends and other distributions that may be paid to their equity holders. These regulations are not directly applicable to CVS Health as a holding company, since CVS Health is not an HMO or an insurance company. In addition, in connection with the Aetna Acquisition, the Company made certain undertakings that require prior regulatory approval of dividends by certain of its HMOs and insurance companies. The additional regulations and undertakings applicable to the Company's HMO and insurance company subsidiaries are not expected to affect the Company's ability to service the Company's debt, meet other financing obligations or pay dividends, or the ability of any of the Company's subsidiaries to service their debt or other financing obligations. Under applicable regulatory requirements and undertakings, at December 31, 2018 , the maximum amount of dividends that may be paid by the Company's insurance and HMO subsidiaries without prior approval by regulatory authorities was approximately $584 million in the aggregate.

The Company maintains capital levels in its operating subsidiaries at or above targeted and/or required capital levels and dividends amounts in excess of these levels to meet liquidity requirements, including the payment of interest on debt and shareholder dividends. In addition, at the Company's discretion, it uses these funds for other purposes such as funding share and debt repurchase programs, investments in new businesses and other purposes considered advisable.

As of December 31, 2018 , the Company held investments of $531 million that are not accounted for as Separate Accounts assets but are legally segregated and are not subject to claims that arise out of the Company's business. See Note 3 ''Investments'' to the consolidated financial statements for additional information on investments related to the 2012 conversion of an existing group annuity contract from a participating to a non-participating contract.

Solvency Regulation

The National Association of Insurance Commissioners (the "NAIC") utilizes risk-based capital ("RBC") standards for insurance companies that are designed to identify weakly-capitalized companies by comparing each company's adjusted surplus to its required surplus (the "RBC Ratio"). The RBC Ratio is designed to reflect the risk profile of insurance companies. Within certain ratio ranges, regulators have increasing authority to take action as the RBC Ratio decreases. There are four levels of regulatory action, ranging from requiring an insurer to submit a comprehensive financial plan for increasing its RBC to the state insurance commissioner to requiring the state insurance commissioner to place the insurer under regulatory control. At December 31, 2018 , the RBC Ratio of each of the Company's primary insurance subsidiaries was above the level that would require regulatory action. The RBC framework described above for insurers has been extended by the NAIC to health organizations, including HMOs. Although not all states had adopted these rules at December 31, 2018 , at that date, each of the Company's active HMOs had a surplus that exceeded either the applicable state net worth requirements or, where adopted, the levels that would require regulatory action under the NAIC's RBC rules. External rating agencies use their own capital models and/or RBC standards when they determine a company's rating.

Quantitative and Qualitative Disclosures About Market Risk

On November 28, 2018 the Company completed the Aetna Acquisition. As of December 31, 2018 , the Company's earnings and financial condition were exposed to interest rate risk, credit quality risk, market valuation risk, foreign currency risk and commodity risk. As of December 31, 2017, the Company had outstanding interest rate derivative instruments related to its long-term debt and believed that its exposure to interest rate risk (inherent in the Company's debt securities portfolio) was not material. We refer you to Note 1 ''Significant Accounting Policies'' to the consolidated financial statements.

Evaluation of Interest Rate and Credit Quality Risk

The Company manages interest rate risk by seeking to maintain a tight match between the durations of assets and liabilities when appropriate. The Company manages credit quality risk by seeking to maintain high average credit quality ratings and diversified sector exposure within its debt securities portfolio. In connection with its investment and risk management objectives, the Company also uses derivative financial instruments whose market value is at least partially determined by, among other things, levels of or changes in interest rates (short-term or long-term), duration, prepayment rates, equity markets or credit ratings/spreads. The Company's use of these derivatives is generally limited to hedging risk and has principally consisted of using interest rate swaps, treasury rate locks, forward contracts, futures contracts, warrants, put options and credit default swaps. These instruments, viewed separately, subject the Company to varying degrees of interest rate, equity price and credit risk. However, when used for hedging, the Company expects these instruments to reduce overall risk.

Investments

The Company's investment portfolio supported the following products at December 31, 2018 :

In millions		
Experience-rated products	$	1,063
Remaining products		17,191
Total investments	$	18,254

Investment risks associated with experience-rated products generally do not impact results of operations. The risks associated with investments supporting experience-rated pension and annuity products in the large case pensions business in the Company's Corporate/Other segment are assumed by the contract holders and not by the Company (subject to, among other things, certain minimum guarantees). Assets supporting experience-rated products may be subject to contract holder or participant withdrawals.

The debt securities in the Company's investment portfolio had an average credit quality rating of A at December 31, 2018 , with approximately $3.9 billion rated AAA at December 31, 2018 . The debt securities that were rated below investment grade (that

is, having a credit quality rating below BBB-/Baa3) were $1.1 billion at December 31, 2018 (of which 6% at December 31, 2018 , supported experience-rated products).

At December 31, 2018 , the Company held $373 million of municipal debt securities that were guaranteed by third parties, representing 2% of total investments at December 31, 2018 . These securities had an average credit quality rating of AA- at December 31, 2018 with the guarantee. These securities had an average credit quality rating of A- at December 31, 2018 without the guarantee. The Company does not have any significant concentration of investments with third party guarantors (either direct or indirect).

The Company generally classifies debt securities as available for sale, and carries them at fair value on the consolidated balance sheets. At December 31, 2018 , approximately 1% of debt securities were valued using inputs that reflect the Company's assumptions (categorized as Level 3 inputs in accordance with accounting principles generally accepted in the United States of America). See Note 4 ''Fair Value'' to the consolidated financial statements, which is incorporated by reference herein, for additional information on the methodologies and key assumptions used to determine the fair value of investments. For additional information related to investments, see Note 3 ''Investments'' to the consolidated financial statements, which is incorporated by reference herein.

The Company regularly reviews debt securities in its portfolio to determine whether a decline in fair value below the cost basis or carrying value is other-than-temporary. When a debt security is in an unrealized capital loss position, the Company monitors the duration and severity of the loss to determine if sufficient market recovery can occur within a reasonable period of time. If a decline in fair value is considered other-than-temporary, the cost basis or carrying value of the debt security is written down. The write down is then bifurcated into its credit and non-credit related components. The amount of the credit-related component is included in net income, and the amount of the non-credit related component is included in other comprehensive income/loss, unless the Company intends to sell the debt security or it is more likely than not that the Company will be required to sell the debt security prior to its anticipated recovery of the debt security's amortized cost basis. Accounting for other-than-temporary impairment ("OTTI") of debt securities is considered a critical accounting estimate. The information under the heading "Critical Accounting Policies - Other-Than-Temporary Impairment of Debt Securities" contained in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Annual Report is incorporated by reference herein.

Evaluation of Market Valuation Risks

The Company regularly evaluates its risk from market-sensitive instruments by examining, among other things, levels of or changes in interest rates (short-term or long-term), duration, prepayment rates, equity markets and/or credit ratings/spreads. The Company also regularly evaluates the appropriateness of investments relative to management-approved investment guidelines (and operates within those guidelines) and the business objectives of its portfolios.

On a quarterly basis, the Company reviews the impact of hypothetical net losses in its investment portfolio on the Company's consolidated near-term financial condition, results of operations and cash flows assuming the occurrence of certain reasonably possible changes in near-term market rates and prices. Interest rate changes (whether resulting from changes in treasury yields or credit spreads or other factors) represent the most material risk exposure category for the Company. The Company has estimated the impact on the fair value of market sensitive instruments based on the net present value of cash flows using a representative set of likely future interest rate scenarios. The assumptions used were as follows: an immediate increase of 100 basis points in interest rates (which the Company believes represents a moderately adverse scenario and is approximately equal to the historical annual volatility of interest rate movements for intermediate-term available-for-sale debt securities) and an immediate decrease of 15% in prices for domestic equity securities.

Assuming an immediate 100 basis point increase in interest rates and immediate decrease of 15% in the prices for domestic equity securities, the theoretical decline in the fair values of market sensitive instruments at December 31, 2018 is as follows:

- The fair value of long-term debt would decline by $3.9 billion ($4.9 billion pretax). Changes in the fair value of long-term debt do not impact financial condition or results of operations.
- The theoretical reduction in the fair value of investment securities partially offset by the theoretical reduction in the fair value of interest rate sensitive liabilities would result in a net decline in fair value of $364 million ($461 million pretax) related to continuing non-experience-rated products. Reductions in the fair value of investment securities would be reflected as an unrealized loss in equity, as the Company classifies these securities as available for sale. The Company does not record liabilities at fair value.

Based on overall exposure to interest rate risk and equity price risk, the Company believes that these changes in market rates and prices would not materially affect consolidated near-term financial condition, results of operations or cash flows as of December 31, 2018 .

Evaluation of Foreign Currency and Commodity Risk

As of each of December 31, 2018 and 2017 , the Company did not have any material foreign currency exchange rate or commodity derivative instruments in place and believes its exposure to foreign currency exchange rate risk and commodity price risk is not material.

Evaluation of Operational Risks

The Company also faces certain operational risks, including risks related to information security, including cybersecurity. The Company and its vendors have experienced a variety of cyber attacks, and the Company and its vendors expect to continue to experience cyber attacks going forward. Among other things, the Company has experienced automated attempts to gain access to public facing networks, brute force, SYN flood and distributed denial of service attacks, attempted malware infections, vulnerability scanning, ransomware attacks, spear-phishing campaigns, mass reconnaissance attempts, injection attempts, phishing, PHP injection and cross-site scripting. The Company also has seen an increase in attacks designed to obtain access to consumers' accounts using illegally obtained demographic information. The Company is dedicating and will continue to dedicate significant resources and incur significant expenses to maintain and update on an ongoing basis the systems and processes that are designed to mitigate the information security risks it faces and protect the security of its computer systems, software, networks and other technology assets against attempts by unauthorized parties to obtain access to confidential information, destroy data, disrupt or degrade service, sabotage systems or cause other damage. The impact of the cyber attacks the Company has experienced through December 31, 2018 has not been material to its operations or results of operations. The Board and the Audit Committee of the Board ("the Audit Committee") are regularly informed regarding the Company's information security policies, practices and status.

Critical Accounting Policies

The Company prepares the consolidated financial statements in conformity with generally accepted accounting principles, which require management to make certain estimates and apply judgment. Estimates and judgments are based on historical experience, current trends and other factors that management believes to be important at the time the consolidated financial statements are prepared. On a regular basis, the Company reviews its accounting policies and how they are applied and disclosed in the consolidated financial statements. While the Company believes the historical experience, current trends and other factors considered, support the preparation of the consolidated financial statements in conformity with generally accepted accounting principles, actual results could differ from estimates, and such differences could be material.

Significant accounting policies are discussed in Note 1 ''Significant Accounting Policies'' to the consolidated financial statements. Management believes the following accounting policies include a higher degree of judgment and/or complexity and, thus, are considered to be critical accounting policies. The Company has discussed the development and selection of these critical accounting policies with the Audit Committee, and the Audit Committee has reviewed the disclosures relating to them.

Revenue Recognition

Pharmacy Services Segment
The Pharmacy Services segment sells prescription drugs directly through its mail service dispensing pharmacies and indirectly through the Company's retail pharmacy network. The Company's pharmacy benefit arrangements are accounted for in a manner consistent with a master supply arrangement as there are no contractual minimum volumes and each prescription is considered a separate purchasing decision and distinct performance obligation transferred at a point in time. PBM services performed in connection with each prescription claim are considered part of a single performance obligation which culminates in the dispensing of prescription drugs.

The Company recognizes revenue using the gross method at the contract price negotiated with its clients when the Company has concluded it controls the prescription drug before it is transferred to the client plan members. The Company controls prescriptions dispensed indirectly through its retail pharmacy network because it has separate contractual arrangements with those pharmacies, has discretion in setting the price for the transaction and assumes primary responsibility for fulfilling the promise to provide prescription drugs to its client plan members while also performing the related PBM services.

Revenues include (i) the portion of the price the client pays directly to the Pharmacy Services segment, net of any discounts earned on brand name drugs or other discounts and refunds paid back to the client, (ii) the United States Centers for Medicare & Medicaid Services ("CMS") subsidized portion of prescription drugs dispensed to the Company's Silverscript PDP members, (iii) the price paid to the Pharmacy Services segment by client plan members for mail order prescriptions and the price paid to retail network pharmacies by client plan members for retail prescriptions ("Retail Co-Payments"), and (iv) claims based administrative fees for retail pharmacy network contracts. Sales taxes are not included in revenue.

The Company recognizes revenue when control of the prescription drugs is transferred to customers, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those prescription drugs. The Company has established the following revenue recognition policies for the Pharmacy Services segment:

- Revenues generated from prescription drugs sold by mail service dispensing pharmacies are recognized when the prescription drug is delivered to the client plan member. At the time of delivery, the Company has performed substantially all of its performance obligations under its client contracts and does not experience a significant level of returns or reshipments.
- Revenues generated from prescription drugs sold by third party pharmacies in the Company's retail pharmacy network and associated administrative fees are recognized at the Company's point-of-sale, which is when the claim is adjudicated by the Company's online claims processing system and the Company has transferred control of the prescription drug and performed all of its performance obligations.

The Company recognizes revenue using the net method for contracts under which the Company acts as an agent or does not control the prescription drug prior to transfer to the client.

The Company records revenue net of manufacturers' rebates that are earned by its clients based on their plan members' utilization of brand-name formulary drugs. The Company estimates these rebates at period-end based on actual and estimated claims data and its estimates of the manufacturers' rebates earned by its clients. The estimates are based on the best available data at period-end and recent history for the various factors that can affect the amount of rebates due to the client. The Company adjusts its rebates payable to clients to the actual amounts paid when these rebates are paid or as significant events occur. Any cumulative effect of these adjustments is recorded against revenues as identified. Adjustments generally result from contract changes with clients or manufacturers that have retroactive rebate adjustments, differences between the estimated and actual product mix subject to rebates, or whether the brand name drug was included in the applicable formulary. The effect of adjustments between estimated and actual manufacturers' rebate amounts has not been material to the Company's results of operations or financial condition.

The Company also adjusts revenues for refunds owed to clients resulting from pricing guarantees and performance against defined service and performance metrics. The inputs to these estimates are not subject to a high degree of subjectivity or volatility. The effect of adjustments between estimated and actual performance refund amounts has not been material to the Company's results of operations or financial condition.

The Pharmacy Services segment participates in the federal government's Medicare Part D program as a PDP through the Company's SilverScript subsidiary. Revenues include insurance premiums earned by the PDP, which are determined based on the PDP's annual bid and related contractual arrangements with CMS. The insurance premiums include a beneficiary premium,

which is the responsibility of the PDP member, and can be subsidized by CMS in the case of low-income members, and a direct premium paid by CMS. Premiums collected in advance are initially recorded within other insurance liabilities and are then recognized ratably as revenue over the period in which members are entitled to receive benefits.

In addition to these premiums, the Pharmacy Services segment receives additional payments each month from CMS related to catastrophic reinsurance, low-income cost sharing subsidies and coverage gap benefits. If the subsidies received differ from the amounts earned from actual prescriptions transferred, the difference is recorded in either accounts receivable, net or accrued expenses.

The Company estimates variable consideration in the form of amounts payable to, or receivable from, CMS under a risk-sharing feature of the Medicare Part D program design, referred to as the risk corridor, and adjusts revenue based on calculations of additional subsidies to be received from or owed to CMS at the end of the reporting year.

Retail/LTC Segment

Retail Pharmacy

The Company's retail drugstores recognize revenue at the time the customer takes possession of the merchandise. For pharmacy sales, each prescription claim is its own arrangement with the customer and is a performance obligation, separate and distinct from other prescription claims under other retail network arrangements. Revenues are adjusted for refunds owed to the third party payer for pricing guarantees and performance against defined value-based service and performance metrics. The inputs to these estimates are not subject to a high degree of subjectivity or volatility. The effect of adjustments between estimated and actual pricing and performance refund amounts have not been material to the Company's results of operations or financial condition.

Revenue from Company gift cards purchased by customers is deferred as a contract liability until goods or services are transferred. Any amounts not expected to be redeemed by customers (i.e., breakage) are recognized based on historical redemption patterns.

Customer returns are not material to the Company's results of operations or financial condition. Sales taxes are not included in revenue.

Loyalty Program

The Company's customer loyalty program, ExtraCare ®, is comprised of two components, ExtraSavings ™ and ExtraBucks ® Rewards. ExtraSavings are coupons that are recorded as a reduction of revenue when redeemed as the Company concluded that they do not represent a promise to the customer to deliver additional goods or services at the time of issuance because they are not tied to a specific transaction or spending level.

ExtraBucks Rewards are accumulated by customers based on their historical spending levels. Thus, the Company has determined that there is an additional performance obligation to those customers at the time of the initial transaction. The Company allocates the transaction price to the initial transaction and the ExtraBucks Rewards transaction based upon the relative standalone selling price, which considers historical redemption patterns for the rewards. Revenue allocated to ExtraBucks Rewards is recognized as those rewards are redeemed. At the end of each period, unredeemed rewards are reflected as a contract liability.

Long-term Care

Revenue is recognized when control of the promised goods or services is transferred to customers in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods or services. Each prescription claim represents a separate performance obligation of the Company, separate and distinct from other prescription claims under customer arrangements. A significant portion of the revenue from sales of pharmaceutical and medical products are reimbursed by the federal Medicare Part D program and, to a lesser extent, state Medicaid programs. The Company monitors its revenues and receivables from these reimbursement sources, as well as other third party insurance payors, and reduces revenue at the revenue recognition date to properly account for the variable consideration due to anticipated differences between billed and reimbursed amounts. Accordingly, the total revenues and receivables reported in the Company's consolidated financial statements are recorded at the amount expected to be ultimately received from these payors.

Patient co-payments associated with Medicare Part D, certain state Medicaid programs, Medicare Part B and certain third party payors typically are not collected at the time products are delivered or services are rendered, but are billed to the individuals as part of normal billing procedures and subject to normal accounts receivable collections procedures.

Walk-In Medical Clinics

For services provided by the Company's walk-in medical clinics, revenue recognition occurs for completed services provided to patients, with adjustments taken for third party payor contractual obligations and patient direct bill historical collection rates.

Health Care Benefits Segment

Health Care Benefits revenue is principally derived from insurance premiums and fees billed to customers. Revenue is recognized based on customer billings, which reflect contracted rates per employee and the number of covered employees recorded in the Company's records at the time the billings are prepared. Billings are generally sent monthly for coverage during the following month.

The Company's billings may be subsequently adjusted to reflect enrollment changes due to member terminations or other factors. These adjustments are known as retroactivity adjustments. In each period, the Company estimates the amount of future retroactivity and adjusts the recorded revenue accordingly. As information regarding actual retroactivity amounts becomes known, the Company refines its estimates and records any required adjustments to revenues in the period in which they arise. A significant difference in the actual level of retroactivity compared to estimated levels would have a significant effect on the Company's results of operations.

Additionally, premium revenue subject to the ACA's minimum medical loss ratio ("MLR") rebate requirements is recorded net of the estimated minimum MLR rebates for the current calendar year. The Company estimates minimum MLR rebates payable by projecting MLRs for certain markets, as defined by the ACA, for each state in which each of its insurance entities operates. The claims and premiums used in estimating such rebates are modified for certain adjustments allowed by the ACA and include a statistical credibility adjustment for those states with a number of members that is not statistically credible.

Furthermore, the ACA's permanent risk adjustment program transfers funds from qualified individual and small group insurance plans with below average risk scores to plans with above average risk scores. Based on the risk of the Company's qualified plan members relative to the average risk of members of other qualified plans in comparable markets, the Company estimates its ultimate risk adjustment receivable or payable for the current calendar year and reflects the pro-rata year-to-date impact as an adjustment to premium revenue. In this analysis, the Company considers the estimate of the average risk of members of other qualified plans in comparable markets the most critical assumption. The Company estimates its ultimate risk adjustment receivable or payable using management's best estimates, which are based on various data sources, including but not limited to market risk data compiled by third party sources as well as pricing and other regulatory inputs. See Note 1 ''Significant Accounting Policies'' to the consolidated financial statements for additional information on the ACA's risk adjustment program.

Other-Than-Temporary Impairments of Debt Securities

The Company regularly reviews its debt securities to determine whether a decline in fair value below the cost basis or carrying value is other-than-temporary. If a decline in fair value is considered other-than-temporary, the cost basis or carrying value of the debt security is written down. The write-down is then bifurcated into its credit and non-credit related components. The amount of the credit-related component is included in results of operations, and the amount of the non-credit related component is included in other comprehensive income, unless the Company intends to sell the debt security or it is more likely than not that it will be required to sell the debt security prior to its anticipated recovery of its amortized cost basis. The Company analyzes all facts and circumstances believed to be relevant for each investment when performing this analysis, in accordance with applicable accounting guidance.

Among the factors considered in evaluating whether a decline in fair value is other-than-temporary are whether the decline results from a change in the quality of the debt security itself, whether the decline results from a downward movement in the market as a whole, and the prospects for realizing the carrying value of the debt security based on the investment's current and short-term prospects for recovery. For unrealized losses determined to be the result of market conditions (for example, increasing interest rates and volatility due to conditions in the overall market) or industry-related events, the Company determines whether it intends to sell the debt security or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. If either case is true, the Company recognizes an OTTI, and the cost basis/carrying amount of the debt security is written down to fair value.

The risks inherent in assessing the impairment of a debt security include the risk that market factors may differ from projections and the risk that facts and circumstances factored into the Company's assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods are among the factors that may result in a current period decision to sell debt securities that were not impaired in prior reporting periods.

Vendor Allowances and Purchase Discounts

Pharmacy Services Segment
The Pharmacy Services segment receives purchase discounts on products purchased. Contractual arrangements with vendors, including manufacturers, wholesalers and retail pharmacies, normally provide for the Pharmacy Services segment to receive purchase discounts from established list prices in one, or a combination, of the following forms: (i) a direct discount at the time of purchase, (ii) a discount for the prompt payment of invoices or (iii) when products are purchased indirectly from a manufacturer (e.g., through a wholesaler or retail pharmacy), a discount (or rebate) paid subsequent to dispensing. These rebates are recognized when prescriptions are dispensed and are generally calculated and billed to manufacturers within 30 days of the end of each completed quarter. Historically, the effect of adjustments resulting from the reconciliation of rebates recognized to the amounts billed and collected has not been material to the Company's results of operations or financial condition. The Company accounts for the effect of any such differences as a change in accounting estimate in the period the reconciliation is completed. The Pharmacy Services segment also receives additional discounts under its wholesaler contracts if it exceeds contractually defined purchase volumes. In addition, the Pharmacy Services segment receives fees from pharmaceutical manufacturers for administrative services. Purchase discounts and administrative service fees are recorded as a reduction of cost of products sold.

Retail/LTC Segment
Vendor allowances received by the Retail/LTC segment reduce the carrying cost of inventory and are recognized in cost of products sold when the related inventory is sold, unless they are specifically identified as a reimbursement of incremental costs for promotional programs and/or other services provided. Amounts that are directly linked to advertising commitments are recognized as a reduction of advertising expense (included in operating expenses) when the related advertising commitment is satisfied. Any such allowances received in excess of the actual cost incurred also reduce the carrying cost of inventory. The total value of any upfront payments received from vendors that are linked to purchase commitments is initially deferred. The deferred amounts are then amortized to reduce cost of products sold over the life of the contract based upon purchase volume. The total value of any upfront payments received from vendors that are not linked to purchase commitments is also initially deferred. The deferred amounts are then amortized to reduce cost of products sold on a straight-line basis over the life of the related contract.

There have not been any material changes in the way the Company accounts for vendor allowances and purchase discounts during the past three years.

Inventory

Inventories are valued at the lower of cost or net realizable value using the weighted average cost method.

The value of ending inventory is reduced for estimated inventory losses that have occurred during the interim period between physical inventory counts. Physical inventory counts are taken on a regular basis in each store and a continuous cycle count process is the primary procedure used to validate the inventory balances on hand in each distribution center and mail facility to ensure that the amounts reflected in the accompanying consolidated financial statements are properly stated. The accounting for inventory contains uncertainty since management must use judgment to estimate the inventory losses that have occurred during the interim period between physical inventory counts. When estimating these losses, a number of factors are considered which include, but are not limited to, historical physical inventory results on a location-by-location basis and current physical inventory loss trends.

The total reserve for estimated inventory losses covered by this critical accounting policy was $328 million as of December 31, 2018 . Although management believes there is sufficient current and historical information available to record reasonable estimates for estimated inventory losses, it is possible that actual results could differ. In order to help investors assess the aggregate risk, if any, associated with the inventory-related uncertainties discussed above, a ten percent (10%) pre-tax change in estimated inventory losses, which is a reasonably likely change, would increase or decrease the total reserve for estimated inventory losses by approximately $33 million as of December 31, 2018 .

Although management believes that the estimates discussed above are reasonable and the related calculations conform to generally accepted accounting principles, actual results could differ from such estimates, and such differences could be material.

Goodwill and Identifiable Intangible Assets

Identifiable intangible assets
Identifiable intangible assets consist primarily of trademarks, trade names, customer contracts/relationships, covenants not to compete, technology, provider networks, value of business acquired and favorable leases. These intangible assets arise primarily from the determination of their respective fair market values at the date of acquisition. Amounts assigned to identifiable intangible assets, and their related useful lives, are derived from established valuation techniques and management estimates.

Recoverability of definite-lived intangible assets
The Company evaluates the recoverability of definite-lived intangible assets whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. These long-lived assets are grouped and evaluated for impairment at the lowest level at which individual cash flows can be identified. When evaluating these long-lived assets for potential impairment, the Company first compares the carrying amount of the asset group to the asset group's estimated future cash flows (undiscounted and without interest charges). If the estimated future cash flows are less than that carrying amount of the asset group, an impairment loss calculation is prepared. The impairment loss calculation compares the carrying amount of the asset group to the asset group's estimated future cash flows (discounted and with interest charges). If required, an impairment loss is recorded for the portion of the asset group's carrying value that exceeds the asset group's estimated future cash flows (discounted and with interest charges).

The long-lived asset impairment loss calculation contains uncertainty since management must use judgment to estimate each asset group's future sales, profitability and cash flows. When preparing these estimates, the Company considers historical results and current operating trends and consolidated sales, profitability and cash flow results and forecasts. These estimates can be affected by a number of factors including, but not limited to, general economic and regulatory conditions, efforts of third party organizations to reduce their prescription drug costs and/or increased member co-payments, the continued efforts of competitors to gain market share and consumer spending patterns.

There were no material impairment losses for definite-lived intangible assets recognized in any of the three years ended December 31, 2018, 2017 or 2016.

Recoverability of indefinitely-lived intangible assets
Indefinitely-lived intangible assets are subject to annual impairment reviews, or more frequent reviews if events or circumstances indicate that their carrying value may not be recoverable. Indefinitely-lived intangible assets are tested by comparing the estimated fair value of the asset to its carrying value. If the carrying value of the asset exceeds its estimated fair value, an impairment loss is recognized and the asset is written down to its estimated fair value.

The indefinitely-lived intangible asset impairment loss calculation contains uncertainty since management must use judgment to estimate fair value based on the assumption that, in lieu of ownership of an intangible asset, the Company would be willing to pay a royalty in order to utilize the benefits of the asset. Fair value is estimated by discounting the hypothetical royalty payments to their present value over the estimated economic life of the asset. These estimates can be affected by a number of factors including, but not limited to, general economic conditions, availability of market information as well as the profitability of the Company.

There were no material impairment losses recognized on indefinitely-lived intangible assets recognized in any of the three years ended December 31, 2018, 2017 or 2016.

Recoverability of goodwill
Goodwill represents the excess of amounts paid for acquisitions over the fair value of the net identifiable assets acquired. Goodwill is subject to annual impairment reviews, or more frequent reviews if events or circumstances indicate that the carrying value may not be recoverable. Goodwill is tested for impairment on a reporting unit basis. The impairment test is calculated by comparing the reporting unit's fair value with its net book value (or carrying amount), including goodwill. The fair value of the reporting units is estimated using a combination of a discounted cash flow method and a market multiple method. If the net book value (carrying amount) of the reporting unit exceeds its fair value, the reporting unit's goodwill is considered to be impaired and an impairment is recognized in an amount equal to the excess.

The determination of the fair value of the reporting units requires the Company to make significant assumptions and estimates. These assumptions and estimates primarily include, but are not limited to, the selection of appropriate peer group companies; control premiums and valuation multiples appropriate for acquisitions in the industries in which the Company competes;

discount rates; terminal growth rates; and forecasts of revenue, operating income, depreciation and amortization, capital expenditures and future working capital requirements. When determining these assumptions and preparing these estimates, the Company considers each reporting unit's historical results and current operating trends; consolidated revenues, profitability and cash flow results and forecasts; and industry trends. These estimates can be affected by a number of factors including, but not limited to, general economic and regulatory conditions, market capitalization, efforts of customers and payers to reduce costs including their prescription drug costs and/or increase member co-payments, the continued efforts of competitors to gain market share and consumer spending patterns.

2018 goodwill impairment tests
As discussed in Note 5 ''Goodwill and Other Intangibles'' to the consolidated financial statements, during 2018, the LTC reporting unit continued to experience industry wide challenges that have impacted management's ability to grow the business at the rate that was originally estimated when the Company acquired Omnicare and when the 2017 annual goodwill impairment test was performed. These challenges include lower client retention rates, lower occupancy rates in skilled nursing facilities, the deteriorating financial health of numerous skilled nursing facility customers which resulted in a number of customer bankruptcies in 2018, and continued facility reimbursement pressures. In June 2018, LTC management submitted its initial budget for 2019 and updated the 2018 annual forecast which showed a projected deterioration in the financial results for the remainder of 2018 and in 2019, which also caused management to update its long-term forecast beyond 2019. Based on these updated projections, management determined that there were indicators that the LTC reporting unit's goodwill may be impaired and, accordingly, management performed an interim goodwill impairment test as of June 30, 2018. The results of that interim impairment test showed that the fair value of the LTC reporting unit was lower than the carrying value, resulting in a $3.9 billion pre-tax goodwill impairment charge in the second quarter of 2018. The fair value of the LTC reporting unit was determined using a combination of a discounted cash flow method and a market multiple method. In addition to the lower financial projections, higher risk-free interest rates and lower market multiples of peer group companies contributed to the amount of the second quarter 2018 goodwill impairment charge.

During the third quarter of 2018, the Company performed its required annual impairment tests of goodwill. The results of these impairment tests indicated that there was no impairment of goodwill. The results of the annual goodwill impairment tests showed the fair values of the Pharmacy Services and Retail Pharmacy reporting units exceeded their carrying values by significant margins and the fair value of the LTC reporting unit exceeded its carrying value by approximately 2%.

During the fourth quarter of 2018, the LTC reporting unit missed its forecast primarily due to operational issues and customer liquidity issues, including one significant customer bankruptcy. Additionally, LTC management submitted an updated final budget for 2019 which showed significant additional deterioration in the projected financial results for 2019 compared to the analyses performed in the second and third quarters of 2018 primarily due to continued industry and operational challenges, which also caused management to make further updates to its long-term forecast beyond 2019. The updated projections continue to reflect industry wide challenges including lower occupancy rates in skilled nursing facilities, the significant deterioration in the financial health of numerous skilled nursing facility customers and continued facility reimbursement pressures. Based on these updated projections, management determined that there were indicators that the LTC reporting unit's goodwill may be impaired and, accordingly, an interim goodwill impairment test was performed during the fourth quarter of 2018. The results of that impairment test showed that the fair value of the LTC reporting unit was lower than the carrying value, resulting in an additional $2.2 billion goodwill impairment charge in the fourth quarter of 2018. In addition to the lower financial projections, lower market multiples of peer group companies also contributed to the amount of the fourth quarter 2018 goodwill impairment charge. The fair value of the LTC reporting unit was determined using a methodology consistent with the methodology described above for the analyses performed during the second and third quarters of 2018.

As of December 31, 2018 , the remaining goodwill balance in the LTC reporting unit is approximately $431 million .

Although the Company believes the financial projections used to determine the fair value of the LTC reporting unit in the fourth quarter of 2018 are reasonable and achievable, the LTC reporting unit may continue to face challenges that may affect the Company's ability to grow its business at the rate estimated when such goodwill impairment test was performed. These challenges and some of the key assumptions included in the Company's financial projections to determine the estimated fair value of the LTC reporting unit include client retention rates, occupancy rates in skilled nursing facilities, the financial health of skilled nursing facility customers, facility reimbursement pressures, the Company's ability to execute its senior living initiative, the Company's ability to make acquisitions and integrate those businesses into its LTC operations in an orderly manner, as well as the Company's ability to extract cost savings from labor productivity and other initiatives. The Company has made a number of additions and changes to its LTC management team to better respond to these challenges. The estimated fair value of the LTC reporting unit also is dependent on earnings multiples of market participants in the pharmacy industry, as well as the risk-free interest rate environment, which impacts the discount rate used in the discounted cash flow valuation method. If the Company

does not achieve its forecasts, it is reasonably possible in the near term that the goodwill of the LTC reporting unit could be deemed to be impaired again by a material amount.

2017 and 2016 goodwill impairment tests
The Company recorded $181 million in goodwill impairment charges in 2017 related to the RxCrossroads reporting unit. During the third quarter of 2017, the Company performed its required annual impairment test of goodwill. The goodwill impairment tests showed that the fair values of the Pharmacy Services and Retail Pharmacy reporting units exceeded their carrying values by significant margins and the fair values of the LTC and RxCrossroads reporting units exceeded their carrying values by approximately 1% and 6%, respectively. On January 2, 2018, the Company sold its RxCrossroads reporting unit to McKesson Corporation for $725 million .

The Company did not record any goodwill impairment charges during 2016 .

Health Care Costs Payable

At December 31, 2018 , 80% of health care costs payable are estimates of the ultimate cost of (i) services rendered to members but not yet reported to the Company and (ii) claims which have been reported to the Company but not yet paid (collectively, "IBNR"). Health care costs payable also include an estimate of the cost of services that will continue to be rendered after the financial statement date if the Company is obligated to pay for such services in accordance with contractual or regulatory requirements. The remainder of health care costs payable is primarily comprised of pharmacy and capitation payables, other amounts due to providers pursuant to risk sharing agreements and accruals for state assessments. The Company develops its estimate of IBNR using actuarial principles and assumptions that consider numerous factors. See Note 1 ''Significant Accounting Policies'' to the consolidated financial statements for additional information on the Company's reserving methodology.

The Company has considered the pattern of changes in its completion factors when determining the completion factors used in its estimates of IBNR as of December 31, 2018 . However, based on historical claim experience, it is reasonably possible that the Company's estimated weighted average completion factors may vary by plus or minus 16 basis points from the Company's assumed rates, which could impact health care costs payable by approximately plus or minus $194 million pretax.

Management considers historical health care cost trend rates together with its knowledge of recent events that may impact current trends when developing estimates of current health care cost trend rates. When establishing reserves as of December 31, 2018 , the Company increased its assumed health care cost trend rates for the most recent three months by 3.5% from health care cost trend rates recently observed. However, based on historical claim experience, it is reasonably possible that the Company's estimated health care cost trend rates may vary by plus or minus 3.5% from the assumed rates, which could impact health care costs payable by plus or minus $299 million pretax.

Income Taxes

Income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are established for any temporary differences between financial and tax reporting bases and are adjusted as needed to reflect changes in the enacted tax rates expected to be in effect when the temporary differences reverse. Such adjustments are recorded in the period in which changes in tax laws are enacted, regardless of when they are effective. Deferred tax assets are reduced, if necessary, by a valuation allowance to the extent future realization of those losses, deductions or other tax benefits is sufficiently uncertain. Significant judgment is required in determining the provision for income taxes and the related taxes payable and deferred tax assets and liabilities since, in the ordinary course of business, there are transactions and calculations where the ultimate tax outcome is uncertain. Additionally, the Company's tax returns are subject to audit by various domestic and foreign tax authorities that could result in material adjustments based on differing interpretations of the tax laws. Although management believes that its estimates are reasonable and are based on the best available information at the time the provision is prepared, actual results could differ from these estimates resulting in a final tax outcome that may be materially different from that which is reflected in the consolidated financial statements.

The tax benefit from an uncertain tax position is recognized only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the consolidated financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement. Interest and/or penalties related to uncertain tax positions are recognized in the income tax provision. Significant judgment is required in determining uncertain tax positions. The Company has established

accruals for uncertain tax positions using its judgment and adjusts these accruals, as warranted, due to changing facts and circumstances.

Business Combinations

The Company accounts for business combinations using the acquisition method of accounting which requires that the assets acquired and liabilities assumed be recorded at the date of the acquisition at their respective fair values. The excess of purchase price over the fair value of assets acquired and liabilities assumed is recorded as goodwill. Determining the fair value of identifiable assets, particularly intangible assets, and liabilities acquired also requires management to make estimates, which are based on all available information and in some cases assumptions with respect to the timing and amount of future revenues and expenses associated with an asset. The most critical assumptions used in determining the fair value of intangible assets include customer attrition, membership growth and revenue growth. In determining the estimated fair value for intangible assets, the Company typically utilizes the income approach, which discounts the projected future net cash flow using an appropriate discount rate that reflects the risks associated with such projected future cash flows. Determining the useful life of an intangible asset also requires judgment, as different types of intangible assets will have different useful lives and certain assets are considered to have indefinite useful lives.

New Accounting Pronouncements

See Note 1 ‘‘Significant Accounting Policies’’ to the consolidated financial statements for a description of new accounting pronouncements applicable to the Company.

Holders of Common Stock

As of February 19, 2019, there were 27,266 registered holders of the Company’s common stock according to the records maintained by the Company’s transfer agent.

Cautionary Statement Concerning Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the “Reform Act”) provides a safe harbor for forward-looking statements made by or on behalf of the Company. In addition, the Company and its representatives may, from time to time, make written or verbal forward-looking statements, including statements contained in the Company’s filings with the United States Securities and Exchange Commission (the “SEC”) and in its reports to stockholders, press releases, webcasts, conference calls, meetings and other communications. Generally, the inclusion of the words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “project,” “should,” “will” and similar expressions identify statements that constitute forward-looking statements. All statements addressing operating performance of CVS Health Corporation or any subsidiary, events or developments that the Company projects, expects or anticipates will occur in the future, including statements relating to corporate strategy; revenue growth; adjusted revenue growth, earnings or earnings per common share growth; adjusted operating income or adjusted earnings per common share growth; free cash flow; debt ratings; inventory levels; inventory turn and loss rates; store development; relocations and new market entries; retail pharmacy business, sales results and/or trends and operations; PBM business, sales results and/or trends and operations; specialty pharmacy business, sales trends and operations; LTC pharmacy business, sales results and/or trends and operations; Health Care Benefits business, sales results and/or trends, medical cost trends, medical membership growth, medical benefit ratios and operations; the Company’s ability to attract or retain customers and clients; Medicare Part D competitive bidding, enrollment and operations; new product development; and the impact of industry and regulatory developments, as well as statements expressing optimism or pessimism about future results of operations or events, are forward-looking statements within the meaning of the Reform Act.

The forward-looking statements are and will be based upon management’s then-current views and assumptions regarding future events and operating performance, and are applicable only as of the dates of such statements. The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

By their nature, all forward-looking statements involve risks and uncertainties. Actual results may differ materially from those contemplated by the forward-looking statements for a number of reasons as described in the Company's SEC filings, including those set forth in the Risk Factors section within the CVS Health Corporation's 2018 Annual Report on Form 10-K, and including, but not limited to:

- *Risks to our brand and reputation, the Aetna Acquisition, data governance risks, effectiveness of our talent management and alignment of talent to our business needs, and potential changes in public policy, laws and regulations present overarching risks to our enterprise in 2019 and beyond.*
- *Our brand and reputation are two of our most important assets; negative public perception of the industries in which we operate, or of our industries' or our practices, can adversely affect our businesses, results of operations, cash flows and prospects.*
- *Data governance failures can adversely affect our reputation, businesses and prospects. Our use and disclosure of members', customers' and other constituents' sensitive information is subject to complex regulations at multiple levels. We would be adversely affected if we or our business associates or other vendors fail to adequately protect members', customers' or other constituents' sensitive information.*
- *We face significant competition in attracting and retaining talented employees. Further, managing succession for, and retention of, key executives is critical to our success, and our failure to do so could adversely affect our future performance.*
- *We are subject to potential changes in public policy, laws and regulations, including reform of the United States health care system, that can adversely affect the markets for our products and services and our businesses, operations, results of operations, cash flows and prospects.*
- *Our enterprise strategy may not be an effective response to the changing dynamics in the industries in which we operate, or we may not be able to implement our strategy and related strategic projects.*
- *Efforts to reduce reimbursement levels and alter health care financing practices could adversely affect our businesses.*
- *Gross margins in the industries in which we operate may decline.*
- *Our results of operations are affected by the health of the economy in general and in the geographies we serve.*
- *We operate in a highly competitive business environment. Competitive and economic pressures may limit our ability to increase pricing to reflect higher costs or may force us to accept lower margins. If customers elect to self-insure, reduce benefits or adversely renegotiate or amend their agreements with us, our revenues and results of operations will be adversely affected. We may not be able to obtain appropriate pricing on new or renewal business.*
- *We may lose clients and/or fail to win new business. If we fail to compete effectively in the geographies and product areas in which we operate, including maintaining or increasing membership in our Health Care Benefits segment, our results of operations, financial condition and cash flows could be materially and adversely affected.*
- *We are exposed to risks relating to the solvency of our customers and of other insurers.*
- *We face risks relating to the market availability, pricing, suppliers and safety profiles of prescription drugs that we purchase and sell.*
- *We face risks related to the frequency and rate of the introduction and pricing of generic drugs and brand name prescription drug products.*
- *Possible changes in industry pricing benchmarks and drug pricing generally can adversely affect our PBM business.*
- *Product liability, product recall or personal injury issues could damage our reputation.*
- *We face challenges in growing our Medicare Advantage and Medicare Part D membership.*
- *We face challenges in growing our Medicaid membership, and expanding our Medicaid membership exposes us to additional risks.*
- *A change in our Health Care Benefits product mix may adversely affect our profit margins.*
- *We may not be able to accurately forecast health care and other benefit costs, which could adversely affect our Health Care Benefits segment's results of operations. There can be no assurance that the future health care and other benefit costs of our Insured Health Care Benefits products will not exceed our projections.*
- *A number of factors, many of which are beyond our control, contribute to rising health care and other benefit costs. If we are unable to satisfactorily manage our health care and other benefit costs, our Health Care Benefits segment's results of operations and competitiveness will be adversely affected.*
- *The reserves we hold for expected claims in our Insured Health Care Benefits products are based on estimates that involve an extensive degree of judgment and are inherently variable. Any reserve, including a premium deficiency reserve, may be insufficient. If actual claims exceed our estimates, our results of operations could be materially adversely affected, and our ability to take timely corrective actions to limit future costs may be limited.*
- *Extreme events, or the threat of extreme events, could materially increase our health care (including behavioral health) costs. We cannot predict whether or when any such events will occur.*
- *Legislative and regulatory changes could create significant challenges to our Medicare Advantage and Medicare Part D revenues and results of operations, and proposed changes to these programs could create significant additional challenges.*

Entitlement program reform, if it occurs, could have a material adverse effect on our businesses, operations and/or results of operations.

- *We may not be able to obtain adequate premium rate increases in our Insured Health Care Benefits products, which would have an adverse effect on our revenues, MBRs and results of operations and could magnify the adverse impact of increases in health care and other benefit costs and of ACA assessments, fees and taxes.*
- *Minimum MLR rebate requirements limit the level of margin we can earn in our Insured Health Care Benefits products while leaving us exposed to higher than expected medical costs. Challenges to our minimum MLR rebate methodology and/or reports could adversely affect our results of operations.*
- *Our business activities are highly regulated. Our Pharmacy Services, Medicare Advantage, Medicare Part D, Medicaid, dual eligible, dual eligible special needs plan, small group and certain other products are subject to particularly extensive and complex regulations. If we fail to comply with applicable laws and regulations, we could be subject to significant adverse regulatory actions or suffer brand and reputational harm which may have a material adverse effect on our businesses. Compliance with existing and future laws, regulations and/or judicial decisions may reduce our profitability and limit our growth.*
- *If our compliance or other systems and processes fail or are deemed inadequate, we may suffer brand and reputational harm and become subject to regulatory actions or litigation which could adversely affect our businesses, results of operations, cash flows and/or financial condition.*
- *Our litigation and regulatory risk profile are changing as a result of the Aetna Acquisition and as we offer new products and services and expand in business areas beyond our historical core businesses of Retail/LTC and Pharmacy Services.*
- *We routinely are subject to litigation and other adverse legal proceedings, including class actions and qui tam actions. Many of these proceedings seek substantial damages which may not be covered by insurance. These proceedings may be costly to defend, result in changes in our business practices, harm our brand and reputation and adversely affect our businesses and results of operations.*
- *We frequently are subject to regular and special governmental audits, investigations and reviews that could result in changes to our business practices and also could result in material refunds, fines, penalties, civil liabilities, criminal liabilities and other sanctions.*
- *We are subject to retroactive adjustments to and/or withholding of certain premiums and fees, including as a result of CMS RADV audits. We generally rely on health care providers to appropriately code claim submissions and document their medical records. If these records do not appropriately support our risk adjusted premiums, we may be required to refund premium payments to CMS and/or pay fines and penalties under the False Claims Act.*
- *Programs funded in whole or in part by the U.S. federal government account for a significant portion of our revenues. The U.S. federal government and our other government customers may reduce funding for health care or other programs, cancel or decline to renew contracts with us, or make changes that adversely affect the number of persons eligible for certain programs, the services provided to enrollees in such programs, our premiums and our administrative and health care and other benefit costs, any of which could have a material adverse effect on our businesses, results of operations and cash flows. In addition, an extended federal government shutdown or a delay by Congress in raising the federal government's debt ceiling could lead to a delay, reduction, suspension or cancellation of federal government spending and a significant increase in interest rates that could, in turn, have a material adverse effect on our businesses, results of operations and cash flows.*
- *Our results of operations may be adversely affected by changes in laws and policies governing employers and by union organizing activity.*
- *We must develop and maintain a relevant omni-channel experience for our retail customers.*
- *We must maintain and improve our relationships with our retail and specialty pharmacy customers and increase the demand for our products and services, including proprietary brands. If we fail to develop new products, differentiate our products from those of our competitors or demonstrate the value of our products to our customers and members, our ability to retain or grow our customer base may be adversely affected.*
- *In order to be competitive in the increasingly consumer-oriented marketplace for our health care products and services, we will need to develop and deploy consumer-friendly products and services and make investments in consumer engagement, reduce our cost structure and compete successfully with new entrants into our businesses. If we are unsuccessful, our future growth and profitability may be adversely affected.*
- *Our results of operations may be adversely affected if we are unable to contract with manufacturers, providers, suppliers and vendors on competitive terms and develop and maintain attractive networks with high quality providers.*
- *If our service providers fail to meet their contractual obligations to us or to comply with applicable laws or regulations, we may be exposed to brand and reputational harm, litigation or regulatory action. This risk is particularly high in our Medicare, Medicaid, dual eligible and dual eligible special needs plan programs.*
- *Continuing consolidation and integration among providers and other suppliers may increase our medical and other covered benefits costs, make it difficult for us to compete in certain geographies and create new competitors.*

- *We may experience increased medical and other benefit costs, litigation risk and customer and member dissatisfaction when providers that do not have contracts with us render services to our Health Care Benefits members.*
- *Customers, particularly large sophisticated customers, expect us to implement their contracts and onboard their employees and members efficiently and effectively. Failure to do so could adversely affect our reputation, businesses, results of operations, cash flows and prospects. If we or our vendors fail to provide our customers with quality service that meets their expectations, our ability to retain and grow our membership and customer base will be adversely affected.*
- *We are subject to payment-related risks that could increase our operating costs, expose us to fraud or theft, subject us to potential liability and disrupt our business operations.*
- *Our and our vendors' operations are subject to a variety of business continuity hazards and risks, any of which could interrupt our operations or otherwise adversely affect our performance and results of operations.*
- *We and our vendors have experienced cyber attacks. We can provide no assurance that we or our vendors will be able to detect, prevent or contain the effects of such attacks or other information security (including cybersecurity) risks or threats in the future.*
- *The failure or disruption of our information technology systems or the failure of our information technology infrastructure to support our businesses could adversely affect our reputation, businesses, results of operations and cash flows.*
- *Our business success and results of operations depend in part on effective information technology systems and on continuing to develop and implement improvements in technology. Pursuing multiple initiatives simultaneously could make this continued development and implementation significantly more challenging.*
- *Sales of our products and services are dependent on our ability to attract and motivate internal sales personnel and independent third-party brokers, consultants and agents. New distribution channels create new disintermediation risk. We may be subject to penalties or other regulatory actions as a result of the marketing practices of brokers and agents selling our products.*
- *We also face other risks that could adversely affect our businesses, results of operations, financial condition and/or cash flows, which include:*
  - *Failure of our corporate governance policies or procedures, for example significant financial decisions being made at an inappropriate level in our organization;*
  - *Inappropriate application of accounting principles or a significant failure of internal control over financial reporting, which could lead to a restatement of our results of operations and/or a deterioration in the soundness and accuracy of our reported results of operations; and*
  - *Failure to adequately manage our run-off businesses and/or our regulatory and financial exposure to businesses we have sold, including Aetna's divested standalone Medicare Part D, domestic group life insurance, group disability insurance and absence management businesses.*
- *Goodwill and other intangible assets could, in the future, become impaired.*
- *We would be adversely affected if we do not effectively deploy our capital. Downgrades or potential downgrades in our credit ratings, should they occur, could adversely affect our brand and reputation, businesses, cash flows, financial condition and results of operations.*
- *Adverse conditions in the U.S. and global capital markets can significantly and adversely affect the value of our investments in debt and equity securities, mortgage loans, alternative investments and other investments, our results of operations and/or our financial condition.*
- *We have limited experience in the insurance and managed health care industry, which may hinder our ability to achieve our objectives as a combined company.*
- *The Aetna Acquisition may not be accretive, and may be dilutive, to our earnings per share, which may adversely affect our stock price.*
- *We may fail to successfully combine the businesses and operations of CVS Health and Aetna to realize the anticipated benefits and cost savings of the Aetna Acquisition within the anticipated timeframe or at all, which could adversely affect our stock price.*
- *Our future results may be adversely impacted if we do not effectively manage our expanded operations following completion of the Aetna Acquisition.*
- *We may have difficulty attracting, motivating and retaining executives and other key employees following completion of the Aetna Acquisition.*
- *The Aetna integration process could disrupt our ongoing businesses and/or operations.*
- *Our indebtedness following completion of the Aetna Acquisition is substantially greater than our indebtedness on a stand-alone basis and greater than the combined indebtedness of CVS Health and Aetna existing prior to the announcement of the transaction. This increased level of indebtedness could adversely affect our business flexibility and increase our borrowing costs.*
- *We will continue to incur significant integration-related costs in connection with the Aetna Acquisition.*

- *We expect to continue to pursue acquisitions, joint ventures, strategic alliances and other inorganic growth opportunities, which may be unsuccessful, cause us to assume unanticipated liabilities, disrupt our existing businesses, be dilutive or lead us to assume significant debt, among other things.*
- *We may be unable to successfully integrate companies we acquire.*
- *As a result of our expanded international operations, we face political, legal and compliance, operational, regulatory, economic and other risks that we do not face or are more significant than in our domestic operations.*

The foregoing list is not exhaustive. There can be no assurance that the Company has correctly identified all the risks that affect it. Additional risks and uncertainties not presently known to the Company or that the Company currently believes to be immaterial also may adversely affect the Company's businesses. Should any risks or uncertainties develop into actual events, these developments could have a material adverse effect on the Company's businesses, results of operations, cash flows and/or financial condition. For these reasons, you are cautioned not to place undue reliance on the Company's forward-looking statements.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial r eporting. The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the Company's consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's consolidated financial statements. In order to ensure the Company's internal control over financial reporting is effective, management regularly assesses such control and did so most recently for its financial reporting as of December 31, 2018 .

Management conducted an assessment of the effectiveness of the Company's internal control over financial reporting based on the criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework). This evaluation included review of the documentation, evaluation of the design effectiveness and testing of the operating effectiveness of controls. The Company ' s system of internal control over financial reporting is enhanced by periodic reviews by the Company's internal auditors, written policies and procedures and a written Code of Conduct adopted by the Company's Board of Directors, applicable to all employees of the Company. In addition, the Company has an internal Disclosure Committee, comprised of management from each functional area within the Company, which performs a separate review of disclosure controls and procedures. There are inherent limitations in the effectiveness of any system of internal control over financial reporting.

On November 28, 2018, the Company completed its acquisition of Aetna Inc. ("Aetna"). Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2018 excludes Aetna from that assessment as permitted under SEC rules. Aetna's operations are included in the Company's consolidated financial statements for the period from November 28, 2018 to December 31, 2018 and represented 21% of the Company's consolidated total assets as of December 31, 2018 and 3% of the Company's consolidated total revenues for the year ended December 31, 2018.

Based on management's assessment, management concluded that the Company's internal control over financial reporting is effective and provides reasonable assurance that assets are safeguarded and that the financial records are reliable for preparing financial statements as of December 31, 2018 .

Ernst & Young LLP, the Company's independent registered public accounting firm, is appointed by the Board of Directors and ratified by the Company's shareholders. They were engaged to render an opinion regarding the fair presentation of the Company ' s consolidated financial statements as well as conducting an audit of internal control over financial reporting. Their accompanying reports are based upon audits conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States).

February 28, 2019

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of CVS Health Corporation

Opinion on Internal Control over Financial Reporting

We have audited CVS Health Corporation's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, CVS Health Corporation (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on the COSO criteria.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Aetna Inc., which is included in the 2018 consolidated financial statements of the Company and constituted 21% of total assets as of December 31, 2018 and 3% of revenues for the year then ended. Our audit of internal control over financial reporting of the Company also did not include an evaluation of the internal control over financial reporting of Aetna Inc.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and our report dated February 28, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to Consolidated Financial Statements

1. Significant Accounting Policies

Description of business

CVS Health Corporation, together with its subsidiaries (collectively, "CVS Health," the "Company," "we," "our" or "us"), is the nation's premier health innovation company helping people on their path to better health. Whether in one of its pharmacies or through its health services and plans, CVS Health is pioneering a bold new approach to total health by making quality care more affordable, accessible, simple and seamless. CVS Health is community-based and locally focused, engaging consumers with the care they need when and where they need it. The Company has more than 9,900 retail locations, approximately 1,100 walk-in medical clinics, a leading pharmacy benefits manager with approximately 92 million plan members, a dedicated senior pharmacy care business serving more than one million patients per year, expanding specialty pharmacy services, and a leading stand-alone Medicare Part D prescription drug plan. CVS Health also serves an estimated 38 million people through traditional, voluntary and consumer-directed health insurance products and related services, including rapidly expanding Medicare Advantage offerings. The Company believes its innovative health care model increases access to quality care, delivers better health outcomes and lowers overall health care costs.

On November 28, 2018 (the "Aetna Acquisition Date"), the Company acquired Aetna Inc. ("Aetna"). As a result of the acquisition of Aetna (the "Aetna Acquisition"), the Company added the Health Care Benefits segment, which is the equivalent of the former Aetna Health Care segment. The Company now has four reportable segments: Pharmacy Services, Retail/LTC, Health Care Benefits and Corporate/Other, which are described below. The consolidated financial statements for the year ended December 31, 2018 reflect Aetna's results subsequent to the Aetna Acquisition Date.

Pharmacy Services Segment ("PSS")
PSS provides a full range of pharmacy benefit management ("PBM") solutions, including plan design offerings and administration, formulary management, retail pharmacy network management services, mail order pharmacy, specialty pharmacy and infusion services, Medicare Part D services, clinical services, disease management services and medical spend management. PSS' clients are primarily employers, insurance companies, unions, government employee groups, health plans, Medicare Part D prescription drug plans ("PDPs"), Medicaid managed care plans, plans offered on public health insurance exchanges ("Public Exchanges") and private health insurance exchanges, other sponsors of health benefit plans and individuals throughout the United States. In addition, the Company is a national provider of drug benefits to eligible beneficiaries under the Medicare Part D prescription drug program. PSS operates retail specialty pharmacy stores, specialty mail order pharmacies, mail order dispensing pharmacies, compounding pharmacies and branches for infusion and enteral nutrition services.

Retail/LTC Segment ("RLS")
RLS sells prescription drugs and a wide assortment of general merchandise, including over-the-counter drugs, beauty products, cosmetics and personal care products, provides health care services through its MinuteClinic ® walk-in medical clinics and conducts long-term care ("LTC") pharmacy operations, which distribute prescription drugs and provide related pharmacy consulting and other ancillary services to chronic care facilities and other care settings. Prior to January 2, 2018, RLS also provided commercialization services under the name RxCrossroads ® . The Company divested its RxCrossroads subsidiary on January 2, 2018. As of December 31, 2018, RLS operated more than 9,900 retail locations, over 1,100 MinuteClinic ® locations as well as online retail pharmacy websites, LTC pharmacies and onsite pharmacies.

Health Care Benefits Segment ("HCBS")
HCBS is one of the nation's leading diversified health care benefits providers, serving an estimated 38 million people as of December 31, 2018 . HCBS has the information and resources to help members, in consultation with their health care professionals, make better informed decisions about their health care. HCBS offers a broad range of traditional, voluntary and consumer-directed health insurance products and related services, including medical, pharmacy, dental, behavioral health, medical management capabilities, Medicare Advantage and Medicare Supplement plans, PDPs, Medicaid health care management services, workers' compensation administrative services and health information technology products and services. HCBS' customers include employer groups, individuals, college students, part-time and hourly workers, health plans, health care providers ("providers"), governmental units, government-sponsored plans, labor groups and expatriates. The Company refers to insurance products (where it assumes all or a majority of the risk for medical and dental care costs) as "Insured" and administrative services contract products (where the plan sponsor assumes all or a majority of the risk of medical and dental care costs) as "ASC."

Corporate/Other Segment
The Company presents the remainder of its financial results in the Corporate/Other segment, which consists of:

- Management and administrative expenses to support the overall operations of the Company, which include certain aspects of executive management and the corporate relations, legal, compliance, human resources, information technology and finance departments; and
- Products for which the Company no longer solicits or accepts new customers such as its large case pensions and long-term care insurance products.

Basis of Presentation

The accompanying consolidated financial statements of CVS Health Corporation and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries and variable interest entities ("VIEs") for which the Company is the primary beneficiary. All material intercompany balances and transactions have been eliminated.

Reclassifications

Certain prior year amounts have been reclassified to conform with the current year presentation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Cash and cash equivalents

Cash and cash equivalents consist of cash and temporary investments with maturities of three months or less when purchased. The Company invests in short-term money market funds, commercial paper and time deposits, as well as other debt securities that are classified as cash equivalents within the accompanying consolidated balance sheets, as these funds are highly liquid and readily convertible to known amounts of cash.

Restricted cash

As of December 31, 2018 and 2017 , the Company had $230 million and $190 million , respectively, of restricted cash held in a trust in an insurance captive to satisfy collateral requirements associated with the assignment of certain insurance policies. Such amounts are included in other assets on the consolidated balance sheets. Additionally, as of December 31, 2018 and 2017 , the Company had $6 million and $14 million , respectively, of restricted cash held in escrow accounts in connection with certain recent acquisitions. Such amounts are included in other current assets on the consolidated balance sheets.

Investments

Debt Securities
Debt securities consist primarily of United States Treasury and agency securities, mortgage-backed securities, corporate and foreign bonds and other debt securities. Debt securities are classified as either current or long-term investments based on their contractual maturities unless the Company intends to sell an investment within the next twelve months, in which case it is classified as current within the consolidated balance sheets. Debt securities are classified as available for sale and are carried at fair value. See Note 4 ''Fair Value'' for additional information on how the Company estimates the fair value of these investments.

The cost for mortgage-backed and other asset-backed securities is adjusted for unamortized premiums and discounts, which are amortized using the interest method over the estimated remaining term of the securities, adjusted for anticipated prepayments.

Debt securities are regularly reviewed to determine whether a decline in fair value below the cost basis or carrying value is other-than-temporary. When a debt security is in an unrealized capital loss position, the Company monitors the duration and severity of the loss to determine if sufficient market recovery can occur within a reasonable period of time. If a decline in the

fair value of a debt security is considered other-than-temporary, the cost basis or carrying value of the debt security is written down. The write-down is then bifurcated into its credit and non-credit related components. The amount of the credit-related component is included in net income, and the amount of the non-credit related component is included in other comprehensive income/loss, unless the Company intends to sell the debt security or it is more likely than not that the Company will be required to sell the debt security prior to its anticipated recovery of the debt security's amortized cost basis. Interest is not accrued on debt securities when management believes the collection of interest is unlikely.

Equity Securities
Equity securities with readily available fair values are measured at fair value with changes in fair value recognized in net income.

Mortgage Loans
Mortgage loan investments on the consolidated balance sheets are valued at the unpaid principal balance, net of impairment reserves. A mortgage loan may be impaired when it is a problem loan (i.e., more than 60 days delinquent, in bankruptcy or in process of foreclosure), a potential problem loan (i.e., high probability of default) or a restructured loan. For impaired loans, a specific impairment reserve is established for the difference between the recorded investment in the loan and the estimated fair value of the collateral. The Company applies its loan impairment policy individually to all loans in its portfolio.

The impairment evaluation described above also considers characteristics and risk factors attributable to the aggregate portfolio. An additional allowance for loan losses is established if it is probable that there will be a credit loss on a group of similar mortgage loans. The following characteristics and risk factors are considered when evaluating if a credit loss is probable on a group of similar mortgage loans: loan-to-value ratios, property type (e.g., office, retail, apartment, industrial), geographic location, vacancy rates and property condition.

Full or partial impairments of loans are recorded at the time an event occurs affecting the legal status of the loan, typically at the time of foreclosure or upon a loan modification giving rise to forgiveness of debt. Interest income on a potential problem loan or restructured loan is accrued to the extent it is deemed to be collectible and the loan continues to perform under its original or restructured terms. Interest income on problem loans is recognized on a cash basis. Cash payments on loans in the process of foreclosure are treated as a return of principal. Mortgage loans with a maturity date or a committed prepayment date within twelve months are classified as current on the consolidated balance sheets.

Other Investments
Other investments consist primarily of the following:

- Private equity and hedge fund limited partnerships are accounted for using the equity method of accounting. Under this method, the carrying value of the investments are based on the value of the Company's equity ownership of the underlying investment funds provided by the general partner or manager of the investments, the financial statements of which generally are audited. As a result of the timing of the receipt of the valuation information provided by the fund managers, these investments are generally reported on up to a three month lag. The Company reviews investments for impairment at least quarterly and monitors their performance throughout the year through discussions with the administrators, managers and/or general partners. If the Company becomes aware of an impairment of a limited partnership's investments through its review or prior to receiving the limited partnership's financial statements at the financial statement date, an impairment will be recognized by recording a reduction in the carrying value of the limited partnership with a corresponding charge to net investment income.
- Investment real estate, which is carried on the consolidated balance sheets at depreciated cost, including capital additions, net of write-downs for other-than-temporary declines in fair value. Depreciation is calculated using the straight-line method based on the estimated useful life of each asset. If any real estate investment is considered held-for-sale, it is carried at the lower of its carrying value or fair value less estimated selling costs. The Company generally estimates fair value using a discounted future cash flow analysis in conjunction with comparable sales information. At the time of the sale, the difference between the sales price and the carrying value is recorded as a realized capital gain or loss.
- Privately-placed equity securities, which are carried on the consolidated balance sheets at cost less impairments, plus or minus subsequent adjustments for observable price changes. Additionally, as a member of the Federal Home Loan Bank of Boston ("FHLBB"), a subsidiary of the Company is required to purchase and hold shares of the FHLBB. These shares are restricted and carried at cost.

Net Investment Income
Net investment income on the Company's investments is recorded when earned and is reflected in net income in the consolidated results of operations (other than net investment income on assets supporting experience-rated products). Experience-rated products are products in the large case pensions business where the contract holder, not the Company, assumes investment and other risks, subject to, among other things, minimum guarantees provided by the Company. The effect of investment performance on experience-rated products is allocated to contract holders' accounts daily, based on the underlying investment experience and, therefore, does not impact the Company's net income in the consolidated results of operations (as long as the contract's minimum guarantees are not triggered). Net investment income on assets supporting large case pensions' experience-rated products is included in net investment income in the consolidated statements of operations and is credited to contract holders' accounts through a charge to benefit costs.

Realized capital gains and losses on investments (other than realized capital gains and losses on investments supporting experience-rated products) are included as a component of net investment income in the consolidated statements of operations. Realized capital gains and losses are determined on a specific identification basis. Purchases and sales of debt and equity securities and alternative investments are reflected on the trade date. Purchases and sales of mortgage loans and investment real estate are reflected on the closing date.

Realized capital gains and losses on investments supporting large case pensions' experience-rated products are not included in realized capital gains and losses in the consolidated statements of operations and instead are credited directly to contract holders' accounts. The contract holders' accounts are reflected in policyholders' funds on the consolidated balance sheets.

Unrealized capital gains and losses on investments (other than unrealized capital gains and losses on investments supporting experience-rated products) are reflected in shareholders' equity, net of tax, as a component of accumulated other comprehensive income. Unrealized capital gains and losses on investments supporting large case pensions' experience-rated products are credited directly to contract holders' accounts, which are reflected in policyholders' funds on the consolidated balance sheets.

Derivative Financial Instruments

The Company uses derivative financial instruments in order to manage interest rate and foreign exchange risk and credit exposure. The Company's use of these derivatives is generally limited to hedging risk and has principally consisted of using interest rate swaps, treasury rate locks, forward contracts, futures contracts, warrants, put options and credit default swaps.

Accounts Receivable

Accounts receivable are stated net of allowances for doubtful accounts, customer credit allowances, contractual allowances and estimated terminations. Accounts receivable, net consists of the following at December 31 :

In millions	**2018**	**2017**
Trade receivables	$ 6,896	$ 7,895
Vendor and manufacturer receivables	7,655	5,109
Premium receivables	2,259	31
Other receivables	821	146
Total accounts receivable, net	$ 17,631	$ 13,181

The activity in the allowance for doubtful accounts receivable for the years ended December 31 is as follows:

In millions	**2018**	**2017**	**2016**
Beginning balance	$ 307	$ 286	$ 161
Additions charged to bad debt expense	256	177	221
Write-offs charged to allowance	(70)	(156)	(96)
Ending balance	$ 493	$ 307	$ 286

Inventories

Inventories are valued at the lower of cost or net realizable value using the weighted average cost method. Physical inventory counts are taken on a regular basis in each retail store and LTC pharmacy and a continuous cycle count process is the primary procedure used to validate the inventory balances on hand in each distribution center and mail facility to ensure that the amounts reflected in the accompanying consolidated financial statements are properly stated. During the interim period between physical inventory counts, the Company accrues for anticipated physical inventory losses on a location-by-location basis based on historical results and current trends.

Reinsurance Recoverables

The Company utilizes reinsurance agreements primarily to reduce its required capital and to facilitate the acquisition or disposition of certain insurance contracts. Ceded reinsurance agreements permit the Company to recover a portion of its losses from reinsurers, although they do not discharge the Company's primary liability as the direct insurer of the risks reinsured. Failure of reinsurers to indemnify the Company could result in losses; however, the Company does not expect charges for unrecoverable reinsurance to have a material effect on its consolidated results of operations or financial condition. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of its reinsurers. At December 31, 2018 , the Company's reinsurance recoverables consisted primarily of amounts due from third parties that are rated consistent with companies that are considered to have the ability to meet their obligations. Reinsurance recoverables are recorded as other current assets or other assets on the consolidated balance sheets.

Health Care Contract Acquisition Costs

Insurance products included in the Health Care Benefits and Pharmacy Services segments are cancelable by either the customer or the member monthly upon written notice. Acquisition costs related to prepaid health care and health indemnity contracts are generally expensed as incurred. Acquisition costs for certain long-duration insurance contracts are deferred and are recorded as other current assets or other assets on the consolidated balance sheets and are amortized over the estimated life of the contracts. The amortization of deferred acquisition costs is recorded in operating expenses in the consolidated statements of operations. At December 31, 2018 , the balance of deferred acquisition costs was $22 million , comprised primarily of commissions paid on Medicare Supplement products within the Health Care Benefits segment.

Property and Equipment

Property and equipment is reported at historical cost, net of accumulated depreciation. Property, equipment and improvements to leased premises are depreciated using the straight-line method over the estimated useful lives of the assets, or when applicable, the term of the lease, whichever is shorter. Estimated useful lives generally range from 5 to 40 years for buildings, building improvements and leasehold improvements and 3 to 10 years for fixtures, equipment and internally developed software. Repair and maintenance costs are charged directly to expense as incurred. Major renewals or replacements that substantially extend the useful life of an asset are capitalized and depreciated. Application development stage costs for significant internally developed software projects are capitalized and depreciated.

Property and equipment consists of the following at December 31 :

In millions	2018	2017
Land	$ 1,872	$ 1,707
Building and improvements	3,785	3,343
Fixtures and equipment	13,028	11,963
Leashold improvements	5,384	4,793
Software	2,800	2,484
Total property and equipment	26,869	24,290
Accumulated depreciation and amortization	(15,520)	(13,998)
Property and equipment, net	$ 11,349	$ 10,292

The amount of property and equipment under capital leases at December 31 is as follows:

In millions	**2018**	**2017**
Property and equipment under capital leases	$ 582	$ 588
Accumulated amortization of property and equipment under capital leases	(163)	(140)
Property and equipment under capital leases, net	$ 419	$ 448

Depreciation expense (which includes the amortization of property and equipment under capital leases) totaled $1.7 billion in each of the years ended December 31, 2018 , 2017 and 2016 .

Goodwill

The Company accounts for business combinations using the acquisition method of accounting, which requires the excess cost of an acquisition over the fair value of net assets acquired and identifiable intangible assets to be recorded as goodwill. Goodwill is not amortized, but is subject to impairment reviews annually, or more frequently if necessary. When evaluating goodwill for potential impairment, the Company compares the fair value of its reporting units to their respective carrying amounts. The Company estimates the fair value of its reporting units using a combination of a discounted cash flow method and a market multiple method. If the carrying amount of a reporting unit exceeds its estimated fair value, an impairment loss is recognized in an amount equal to that excess. See Note 5 ‘‘Goodwill and Other Intangibles’’ for additional information about goodwill and goodwill impairments.

Intangible Assets

The Company’s definite-lived intangible assets are amortized over their estimated useful-life based upon the pattern of future cash flows attributable to the asset. Other than value of business acquired (“VOBA”), definite-lived intangible assets are amortized using the straight-line method. VOBA is amortized over the expected life of the acquired contracts in proportion to estimated premiums. The Company groups and evaluates definite-lived intangible assets for impairment at the lowest level at which individual cash flows can be identified whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. If indicators of impairment are present, the Company first compares the carrying amount of the asset group to the estimated future cash flows associated with the asset group (undiscounted and without interest charges). If the estimated future cash flows used in this analysis are less than the carrying amount of the asset group, an impairment loss calculation is prepared. The impairment loss calculation compares the carrying amount of the asset group to the asset group’s estimated future cash flows (discounted and with interest charges). If required, an impairment loss is recorded for the portion of the asset group’s carrying value that exceeds the asset group’s estimated future cash flows (discounted and with interest charges). There were no material impairment losses recognized on definite-lived intangible assets in any of the three years ended December 31, 2018 , 2017 or 2016 .

Indefinitely-lived intangible assets are not amortized but are tested for impairment annually, or more frequently if necessary. Indefinitely-lived intangible assets are tested for impairment by comparing the estimated fair value of the asset to its carrying value. The Company estimates the fair value of its indefinitely-lived trademarks using the relief from royalty method under the income approach. If the carrying value of the asset exceeds its estimated fair value, an impairment loss is recognized, and the asset is written down to its estimated fair value. There were no impairment losses recognized on indefinitely-lived intangible assets in any of the three years ended December 31, 2018 , 2017 or 2016 .

See Note 5 ‘‘Goodwill and Other Intangibles’’ for additional information about intangible assets.

Separate Accounts

Separate Accounts assets and liabilities related to large case pensions products represent funds maintained to meet specific objectives of contract holders who bear the investment risk. These assets and liabilities are carried at fair value. Net investment income (including net realized capital gains and losses) accrue directly to such contract holders. The assets of each account are legally segregated and are not subject to claims arising from the Company’s other businesses. Deposits, withdrawals and net investment income (including net realized and net unrealized capital gains and losses) on Separate Accounts assets are not reflected in the consolidated statements of operations or cash flows. Management fees charged to contract holders are included in services revenue and recognized over the period earned.

Health Care Costs Payable

Health care costs payable consist principally of unpaid fee-for-service medical, dental and pharmacy claims, capitation costs, other amounts due to health care providers pursuant to risk-sharing arrangements primarily related to the Health Care Benefits segment's Insured Commercial, Medicare and Medicaid products and accruals for state assessments. Unpaid health care claims include an estimate of payments the Company will make for (i) services rendered to the Company's Insured members but not yet reported to the Company and (ii) claims which have been reported to the Company but not yet paid, each as of the financial statement date (collectively, "IBNR"). Health care costs payable also include an estimate of the cost of services that will continue to be rendered after the financial statement date if the Company is obligated to pay for such services in accordance with contractual or regulatory requirements. Such estimates are developed using actuarial principles and assumptions which consider, among other things, historical and projected claim submission and processing patterns, assumed and historical medical cost trends, historical utilization of medical services, claim inventory levels, changes in Insured membership and product mix, seasonality and other relevant factors. The Company reflects changes in these estimates in benefit costs in the consolidated results of operations in the period they are determined. Capitation costs represent contractual monthly fees paid to participating physicians and other medical providers for providing medical care, regardless of the volume of medical services provided to the Insured member. Amounts due under risk-sharing arrangements are based on the terms of the underlying contracts with the providers and consider claims experience under the contracts through the financial statement date.

The Company develops its estimate of IBNR using actuarial principles and assumptions that consider numerous factors. Of those factors, the Company considers the analysis of historical and projected claim payment patterns (including claims submission and processing patterns) and the assumed health care cost trend rate (the year-over-year change in per member per month health care costs) to be the most critical assumptions. In developing its IBNR estimate, the Company consistently applies these actuarial principles and assumptions each period, with consideration to the variability of related factors. There have been no significant changes to the methodologies or assumptions used to develop the Company's estimate of IBNR from the Aetna Acquisition Date through December 31, 2018 .

The Company analyzes historical claim payment patterns by comparing claim incurred dates (i.e., the date services were provided) to claim payment dates to estimate "completion factors." The Company uses completion factors predominantly to estimate the ultimate cost of claims incurred more than three months before the financial statement date. The Company estimates completion factors by aggregating claim data based on the month of service and month of claim payment and estimating the percentage of claims incurred for a given month that are complete by each month thereafter. For any given month, substantially all claims are paid within six months of the date of service, but it can take up to 48 months or longer after the date of service before all of the claims are completely resolved and paid. These historically-derived completion factors are then applied to claims paid through the financial statement date to estimate the ultimate claim cost for a given month's incurred claim activity. The difference between the estimated ultimate claim cost and the claims paid through the financial statement date represents the Company's estimate of claims remaining to be paid as of the financial statement date and is included in the Company's health care costs payable. The completion factors the Company uses reflect judgments and possible adjustments based on data such as claim inventory levels, claim submission and processing patterns and, to a lesser extent, other factors such as changes in health care cost trend rates, changes in Insured membership and changes in product mix. If claims are submitted or processed on a faster (slower) pace than prior periods, the actual claims may be more (less) complete than originally estimated using the Company's completion factors, which may result in reserves that are higher (lower) than the ultimate cost of claims.

Because claims incurred within three months before the financial statement date are less mature, the Company uses a combination of historically-derived completion factors and the assumed health care cost trend rate to estimate the ultimate cost of claims incurred for these months. The Company applies its actuarial judgment and places a greater emphasis on the assumed health care cost trend rate for the most recent claim incurred dates as these months may be influenced by seasonal patterns and changes in membership and product mix.

The Company's health care cost trend rate is affected by changes in per member utilization of medical services as well as changes in the unit cost of such services. Many factors influence the health care cost trend rate, including the Company's ability to manage benefit costs through product design, negotiation of favorable provider contracts and medical management programs, as well as the mix of the Company's business. The health status of the Company's Insured members, aging of the population and other demographic characteristics, advances in medical technology and other factors continue to contribute to rising per member utilization and unit costs. Changes in health care practices, inflation, new technologies, increases in the cost of prescription drugs (including specialty pharmacy drugs), direct-to-consumer marketing by pharmaceutical companies, clusters of high-cost cases, claim intensity, changes in the regulatory environment, health care provider or member fraud and numerous other factors also contribute to the cost of health care and the Company's health care cost trend rate.

For each reporting period, the Company uses an extensive degree of judgment in the process of estimating its health care costs payable. As a result, considerable variability and uncertainty is inherent in such estimates, particularly with respect to claims with claim incurred dates of three months or less before the financial statement date; and the adequacy of such estimates is highly sensitive to changes in assumed completion factors and the assumed health care cost trend rates. For each reporting period the Company recognizes the actuarial best estimate of health care costs payable considering the potential volatility in assumed completion factors and health care cost trend rates, as well as other factors. The Company believes its estimate of health care costs payable is reasonable and adequate to cover its obligations at December 31, 2018 ; however, actual claim payments may differ from the Company's estimates. A worsening (or improvement) of the Company's health care cost trend rates or changes in completion factors from those that the Company assumed in estimating health care costs payable at December 31, 2018 would cause these estimates to change in the near term, and such a change could be material.

Each quarter, the Company re-examines previously established health care costs payable estimates based on actual claim payments for prior periods and other changes in facts and circumstances. Given the extensive degree of judgment in this estimate, it is possible that the Company's estimates of health care costs payable could develop either favorably (that is, its actual benefit costs for the period were less than estimated) or unfavorably. The changes in the Company's estimate of health care costs payable may relate to a prior quarter, prior year or earlier periods. For a roll forward of the Company's health care costs payable, see Note 7 "Health Care Costs Payable." The Company's reserving practice is to consistently recognize the actuarial best estimate of its ultimate liability for health care costs payable.

Other Insurance Liabilities

Unpaid claims
Unpaid claims consist primarily of reserves associated with certain short-duration group disability and term life insurance contracts, including an estimate for IBNR as of the financial statement date. Reserves associated with certain short-duration group disability and term life insurance contracts are based upon the Company's estimate of the present value of future benefits, which is based on assumed investment yields and assumptions regarding mortality, morbidity and recoveries from the United States Social Security Administration. The Company develops its estimate of IBNR using actuarial principles and assumptions which consider, among other things, contractual requirements, claim incidence rates, claim recovery rates, seasonality and other relevant factors. The Company discounts certain claim liabilities related to group long-term disability and life insurance waiver of premium contracts. The discount rates generally reflect the Company's expected investment returns for the investments supporting all incurral years of these liabilities. The discount rates for retrospectively-rated contracts are set at contractually specified levels. The Company's estimates of unpaid claims are subject to change due to changes in the underlying experience of the insurance contracts, changes in investment yields or other factors, and these changes are recorded in current and future benefits in the consolidated statements of operations in the period they are determined. The Company estimates its reserve for claims IBNR for life products largely based on completion factors. The completion factors used are based on the Company's historical experience and reflect judgments and possible adjustments based on data such as claim inventory levels, claim payment patterns, changes in business volume and other factors. If claims are submitted or processed on a faster (slower) pace than historical periods, the actual claims may be more (less) complete than originally estimated using completion factors, which may result in reserves that are higher (lower) than required to cover future life benefit payments. There have been no significant changes to the methodologies or assumptions used to develop the Company's estimate of IBNR from the Aetna Acquisition Date through December 31, 2018 . As of December 31, 2018 , unpaid claims balances of $816 million and $1.9 billion were recorded in other insurance liabilities and other long-term insurance liabilities, respectively.

Substantially all life and disability insurance liabilities have been fully ceded to unrelated third parties through indemnity reinsurance agreements; however, the Company remains directly obligated to the policyholders.

Future policy benefits
Future policy benefits consist primarily of reserves for limited payment pension and annuity contracts, long-duration group life and long-term care insurance contracts. Reserves for limited payment pension and annuity contracts are computed using actuarial principles that consider, among other things, assumptions reflecting anticipated mortality, retirement, expense and interest rate experience. Such assumptions generally vary by plan, year of issue and policy duration. Assumed interest rates on such contracts ranged from 3.5% to 11.3% from the Aetna Acquisition Date through December 31, 2018 . The Company periodically reviews mortality assumptions against both industry standards and its experience. Reserves for long-duration long-term care contracts represent the Company's estimate of the present value of future benefits to be paid to or on behalf of policyholders less the present value of future net premiums. The assumed interest rate on such contracts was 5.1% from the Aetna Acquisition Date through December 31, 2018 . The Company's estimate of the present value of future benefits under such contracts is based upon mortality, morbidity and interest rate assumptions. As of December 31, 2018 , future policy benefits

balances of $536 million and $6.2 billion were recorded in other insurance liabilities and other long-term insurance liabilities, respectively.

Premium Deficiency Reserves

The Company evaluates its insurance contracts to determine if it is probable that a loss will be incurred. A premium deficiency loss is recognized when it is probable that expected future claims, including maintenance costs (for example, direct costs such as claim processing costs), will exceed existing reserves plus anticipated future premiums and reinsurance recoveries. Anticipated investment income is considered in the calculation of premium deficiency losses for short-duration contracts. For purposes of determining premium deficiency losses, contracts are grouped consistent with the Company's method of acquiring, servicing and measuring the profitability of such contracts. The Company established a premium deficiency reserve of $16 million as of December 31, 2018 related to Medicaid products in the Health Care Benefits segment.

Policyholders' Funds

Policyholders' funds consist primarily of reserves for pension and annuity investment contracts and customer funds associated with certain health contracts. Reserves for such contracts are equal to cumulative deposits less withdrawals and charges plus credited interest thereon, net of experience-rated adjustments. From the Aetna Acquisition Date through December 31, 2018 , interest rates for pension and annuity investment contracts ranged from 3.5% to 13.4% . Reserves for contracts subject to experience rating reflect the Company's rights as well as the rights of policyholders and plan participants. The Company also holds funds for health savings accounts ("HSAs") on behalf of members associated with high deductible health plans. These amounts are held to pay for qualified health care expenses incurred by these members. The HSA balances were approximately $2.1 billion at December 31, 2018 and are reflected in other current assets with a corresponding liability in policyholder funds.

Policyholders' Funds liabilities that are expected to be paid within twelve months from the balance sheet date are classified as current on the consolidated balance sheets. Policyholders' Funds liabilities that are expected to be paid greater than twelve months from the balance sheet date are included in other long-term liabilities on the consolidated balance sheets.

Self-Insurance Liabilities

The Company is self-insured for certain losses related to general liability, workers' compensation and auto liability. The Company obtains third party insurance coverage to limit exposure from these claims. The Company is also self-insured for certain losses related to health and medical liabilities. The Company's self-insurance accruals, which include reported claims and claims incurred but not reported, are calculated using standard insurance industry actuarial assumptions and the Company's historical claims experience. At December 31, 2018 and 2017 , self-insurance liabilities totaled $865 million and $696 million , respectively, and were recorded as accrued expenses on the consolidated balance sheets.

Facility Opening and Closing Costs

New facility opening costs, other than capital expenditures, are charged directly to expense when incurred. When the Company closes a facility, the present value of estimated unrecoverable costs, including the remaining lease obligation less estimated sublease income and the book value of abandoned property and equipment, are charged to expense.

In December 2016, the Company announced an enterprise streamlining initiative designed to reduce costs and enhance operating efficiencies to allow the Company to be more competitive in the current health care environment. During the year ended December 31, 2017 , in connection with that enterprise streamlining initiative, the Company closed 71 retail stores and recorded charges of $215 million within operating expenses in the Retail/LTC segment. The charges are primarily comprised of provisions for the present value of noncancelable lease obligations. The noncancelable lease obligations associated with stores closed during the year ended December 31, 2017 extend through the year 2039. During the year ended December 31, 2018 , the Company did not recognize any significant charges related to facility closing costs.

The long-term portion of the lease obligations associated with all outstanding facility closings was $269 million and $306 million as of December 31, 2018 and 2017 , respectively, and was recorded in other long-term liabilities on the consolidated balance sheets.

Contingent Consideration

In December 2015, the Company acquired the pharmacy and clinic businesses of Target for approximately $1.9 billion , plus contingent consideration of up to $60 million based on future prescription growth over a three year period through December 31, 2019. As of December 31, 2018, no liability for any potential contingent consideration has been recorded based on historical and projected prescription growth through 2019.

Redeemable Noncontrolling Interest

As a result of the acquisition of Omnicare, Inc. ("Omnicare") in 2015, the Company obtained a 73% ownership interest in a limited liability company ("LLC"). Due to the change in control in Omnicare, the noncontrolling member of the LLC had the contractual right to put its membership interest to the Company at fair value. Consequently, the noncontrolling interest in the LLC was recorded as a redeemable noncontrolling interest at fair value. During 2016, the noncontrolling member of the LLC exercised its option to sell its ownership interest and the Company purchased the noncontrolling interest in the LLC for approximately $39 million .

Below is a summary of the changes in redeemable noncontrolling interest for the year ended December 31, 2016 :

In millions		
Beginning balance	$	39
Net income attributable to noncontrolling interest		1
Distributions		(2)
Purchase of noncontrolling interest		(39)
Reclassification to capital surplus in connection with purchase of noncontrolling interest		1
Ending balance	$	—

Foreign Currency Translation and Transactions

For local currency functional currency, (i) assets and liabilities are translated at end-of-period exchange rates, (ii) revenues and expenses are translated at average exchange rates in effect during the period and (iii) equity is translated at historical exchange rates. The resulting cumulative translation adjustments are included as a component of accumulated other comprehensive income (loss).

For U.S. dollar functional currency locations, foreign currency assets and liabilities are remeasured into U.S. dollars at end-of-period exchange rates, except for nonmonetary balance sheet accounts which are remeasured at historical exchange rates. Revenue and expense are remeasured at average exchange rates in effect during each period, except for those expenses related to the nonmonetary balance sheet amounts which are remeasured at historical exchange rates. Gains or losses from foreign currency remeasurement are included in income.

Gains and losses from foreign currency transactions and the effects of foreign currency remeasurements were not material in any of the periods presented.

Revenue Recognition

The following is a discussion of the Company's revenue recognition policies by segment under the new revenue recognition accounting standard. See "New accounting pronouncements recently adopted - Revenue from Contracts with Customers" below for further discussion regarding the adoption of the new revenue recognition accounting standard. The new revenue recognition accounting standard does not relate to contracts within the scope of *Accounting Standards Codification 944 Financial Services - Insurance* . As a result, the majority of revenues within the Health Care Benefits segment and certain revenues within the Pharmacy Services segment are not within the scope of the new accounting standard.

Pharmacy Services Segment
PSS sells prescription drugs directly through its mail service dispensing pharmacies and indirectly through the Company's retail pharmacy network. The Company's pharmacy benefit arrangements are accounted for in a manner consistent with a master supply arrangement as there are no contractual minimum volumes and each prescription is considered a separate purchasing decision and distinct performance obligation transferred at a point in time. PBM services performed in connection with each

prescription claim are considered part of a single performance obligation which culminates in the dispensing of prescription drugs.

The Company recognizes revenue using the gross method at the contract price negotiated with its clients when the Company has concluded it controls the prescription drug before it is transferred to the client plan members. The Company controls prescriptions dispensed indirectly through its retail pharmacy network because it has separate contractual arrangements with those pharmacies, has discretion in setting the price for the transaction and assumes primary responsibility for fulfilling the promise to provide prescription drugs to its client plan members while also performing the related PBM services.

Revenues include (i) the portion of the price the client pays directly to PSS, net of any discounts earned on brand name drugs or other discounts and refunds paid back to the client (see "Drug Discounts" and "Guarantees" below), (ii) the United States Centers for Medicare & Medicaid Services ("CMS") subsidized portion of prescription drugs dispensed to the Company's Silverscript PDP members, (iii) the price paid to PSS by client plan members for mail order prescriptions and the price paid to retail network pharmacies by client plan members for retail prescriptions ("Retail Co-Payments"), and (iv) claims based administrative fees for retail pharmacy network contracts. Sales taxes are not included in revenue.

The Company recognizes revenue when control of the prescription drugs is transferred to customers, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those prescription drugs. The following revenue recognition policies have been established for PSS:

- Revenues generated from prescription drugs sold by mail service dispensing pharmacies are recognized when the prescription drug is delivered to the client plan member. At the time of delivery, the Company has performed substantially all of its performance obligations under its client contracts and does not experience a significant level of returns or reshipments.
- Revenues generated from prescription drugs sold by third party pharmacies in the Company's retail pharmacy network and associated administrative fees are recognized at the Company's point-of-sale, which is when the claim is adjudicated by the Company's online claims processing system and the Company has transferred control of the prescription drug and performed all of its performance obligations.

For contracts under which PSS acts as an agent or does not control the prescription drugs prior to transfer to the client, revenue is recognized using the net method.

Drug discounts

PSS records revenue net of manufacturers' rebates earned by its clients based on their plan members' utilization of brand-name formulary drugs. PSS estimates these rebates at period-end based on actual and estimated claims data and its estimates of the manufacturers' rebates earned by its clients. The estimates are based on the best available data at period-end and recent history for the various factors that can affect the amount of rebates due to the client. PSS adjusts its rebates payable to clients to the actual amounts paid when these rebates are paid or as significant events occur. Any cumulative effect of these adjustments is recorded against revenues as identified. Adjustments generally result from contract changes with clients or manufacturers that have retroactive rebate adjustments, differences between the estimated and actual product mix subject to rebates, or whether the brand name drug was included in the applicable formulary. The effect of adjustments between estimated and actual manufacturers' rebate amounts has not been material to the Company's results of operations or financial condition.

Guarantees

PSS also adjusts revenues for refunds owed to the client resulting from pricing guarantees and performance against defined service and performance metrics. The inputs to these estimates are not subject to a high degree of subjectivity or volatility. The effect of adjustments between estimated and actual pricing and performance refund amounts has not been material to the Company's results of operations or financial condition.

Medicare Part D

PSS' revenues include insurance premiums earned by the PDP, which are determined based on the PDP's annual bid and related contractual arrangements with CMS. The insurance premiums include a beneficiary premium, which is the responsibility of the PDP member, and can be subsidized by CMS in the case of low-income members, and a direct premium paid by CMS. Premiums collected in advance are initially recorded within other insurance liabilities and are then recognized ratably as revenue over the period in which members are entitled to receive benefits.

PSS' revenues also include a risk-sharing feature of the Medicare Part D program design referred to as the risk corridor. The Company estimates variable consideration in the form of amounts payable to, or receivable from, CMS under the risk corridor,

and adjusts revenue based on calculations of additional subsidies to be received from or owed to CMS at the end of the reporting year.

In addition to Medicare Part D premiums, PSS receives additional payments each month from CMS related to catastrophic reinsurance, low-income cost sharing subsidies and coverage gap benefits. If the subsidies received differ from the amounts earned from actual prescriptions transferred, the difference is recorded in either accounts receivable, net or accrued expenses.

Retail/LTC Segment

Retail Pharmacy

The Company's retail drugstores recognize revenue at the time the customer takes possession of the merchandise. For pharmacy sales, each prescription claim is its own arrangement with the customer and is a performance obligation, separate and distinct from other prescription claims under other retail network arrangements. Revenues are adjusted for refunds owed to the third party payer for pricing guarantees and performance against defined value-based service and performance metrics. The inputs to these estimates are not subject to a high degree of subjectivity or volatility. The effect of adjustments between estimated and actual pricing and performance refund amounts has not been material to the Company's results of operations or financial condition.

Revenue from Company gift cards purchased by customers is deferred as a contract liability until goods or services are transferred. Any amounts not expected to be redeemed by customers (i.e., breakage) are recognized based on historical redemption patterns.

Customer returns are not material to the Company's results of operations or financial condition. Sales taxes are not included in revenue.

Loyalty Program

The Company's customer loyalty program, ExtraCare ®, is comprised of two components, ExtraSavings ™ and ExtraBucks ® Rewards. ExtraSavings are coupons that are recorded as a reduction of revenue when redeemed as the Company concluded that they do not represent a promise to the customer to deliver additional goods or services at the time of issuance because they are not tied to a specific transaction or spending level.

ExtraBucks Rewards are accumulated by customers based on their historical spending levels. Thus, the Company has determined that there is an additional performance obligation to those customers at the time of the initial transaction. The Company allocates the transaction price to the initial transaction and the ExtraBucks Rewards transaction based upon the relative standalone selling price, which considers historical redemption patterns for the rewards. Revenue allocated to ExtraBucks Rewards is recognized as those rewards are redeemed. At the end of each period, unredeemed rewards are reflected as a contract liability.

Long-term Care

Revenue is recognized when control of the promised goods or services is transferred to customers in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods or services. Each prescription claim represents a separate performance obligation of the Company, separate and distinct from other prescription claims under customer arrangements. A significant portion of the revenue from sales of pharmaceutical and medical products are reimbursed by the federal Medicare Part D program and, to a lesser extent, state Medicaid programs. The Company monitors its revenues and receivables from these reimbursement sources, as well as other third party insurance payors, and reduces revenue at the revenue recognition date to properly account for the variable consideration due to anticipated differences between billed and reimbursed amounts. Accordingly, the total revenues and receivables reported in the Company's consolidated financial statements are recorded at the amount expected to be ultimately received from these payors.

Patient co-payments associated with Medicare Part D, certain state Medicaid programs, Medicare Part B and certain third party payors are typically not collected at the time products are delivered or services are rendered, but are billed to the individuals as part of normal billing procedures and subject to normal accounts receivable collections procedures.

Walk-In Medical Clinics

For services provided by the Company's walk-in medical clinics, revenue recognition occurs for completed services provided to patients, with adjustments taken for third party payor contractual obligations and patient direct bill historical collection rates.

Health Care Benefits Segment

Premium Revenue

HCBS premiums are recognized as income in the month in which the enrollee is entitled to receive health care services. Premiums are reported net of an allowance for estimated terminations and uncollectible amounts. Additionally, premium revenue subject to the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010's (as amended, collectively, the "ACA's") minimum medical loss ratio ("MLR") rebate requirements is recorded net of the estimated minimum MLR rebates for the current calendar year. Premiums related to unexpired contractual coverage periods (unearned premiums) are reported as other insurance liabilities on the consolidated balance sheets and recognized as revenue when earned.

Some of the Company's contracts allow for premiums to be adjusted to reflect actual experience or the relative health status of Insured members. Such adjustments are reasonably estimable at the outset of the contract, and adjustments to those estimates are made based on actual experience of the customer emerging under the contract and the terms of the underlying contract.

Services and Product Revenue

HCBS services and product revenue relates to contracts that can include various combinations of products, services, or series of services, which are generally capable of being distinct and accounted for as separate performance obligations. HCBS' services and product revenue consists of the following components:

- ASC fees are received in exchange for performing certain claim processing and member services for HCBS' ASC medical members. ASC fee revenue is recognized over the period the service is provided. Some of the administrative services contracts include guarantees with respect to certain functions, such as customer service response time, claim processing accuracy and claim processing turnaround time, as well as certain guarantees that a plan sponsor's benefit claim experience will fall within a certain range. With any of these guarantees, HCBS is financially at risk if the conditions of the arrangements are not met, although the maximum amount at risk is typically limited to a percentage of the fees otherwise payable to the Company by the customer involved. Each period HCBS estimates obligations under the terms of these guarantees and records its estimate as an offset to service revenues.
- Workers' compensation administrative services consist of fee-based managed care services. Workers' compensation administrative services revenue is recognized once the service is provided.
- Specialty and home delivery pharmacy product revenue is recognized when the prescription is delivered to an ASC member. Specialty and home delivery pharmacy product revenue reflects the price of the prescription on a gross basis (ASC member co-payments and plan sponsor reimbursements).

Accounting for Medicare Part D

HCBS offers Medicare Part D prescription drug insurance coverage under contracts with the CMS. HCBS' revenue recognition policy for Medicare Part D is consistent with the policy detailed in the " *Medicare Part D"* section of PSS' revenue recognition policy described above.

Disaggregation of Revenue
The following table disaggregates the Company's revenue by major source in each segment for the year ended December 31, 2018 :

In millions	**Pharmacy Services**	**Retail/ LTC**	**Health Care Benefits**	**Corporate/ Other**	**Intersegment Eliminations**	**Consolidated Totals**
Major goods/services lines:						
Pharmacy	$ 130,195	$ 64,179	$ 164	$ —	$ (29,693)	$ 164,845
Front Store	—	19,055	—	—	—	19,055
Premiums	3,361	—	4,819	4	—	8,184
Net investment income	13	—	45	602	—	660
Other	559	755	521	—	—	1,835
Total	$ 134,128	$ 83,989	$ 5,549	$ 606	$ (29,693)	$ 194,579

Pharmacy Services distribution channel:	
Mail choice [1]	$ 46,934
Pharmacy network [2]	83,261
Other	3,933
Total	$ 134,128

(1) Pharmacy Services mail choice is defined as claims filled at a Pharmacy Services mail facility, which includes specialty mail claims inclusive of Specialty Connect ® claims picked up at a CVS Pharmacy retail store, as well as prescriptions filled at the Company's retail pharmacies under the Maintenance Choice ® program, which permits eligible client plan members to fill their maintenance prescriptions through mail order delivery or at a CVS Pharmacy retail store for the same price as mail order.
(2) Pharmacy Services pharmacy network is defined as claims filled at retail and specialty retail pharmacies, including the Company's retail pharmacies and LTC pharmacies, but excluding Maintenance Choice activity, which is included within the mail choice category.

Contract Balances
Contract liabilities primarily represent the Company's obligation to transfer additional goods or services to a customer for which the Company has received consideration, for example ExtraBucks ® Rewards and unredeemed Company gift cards. The consideration received remains a contract liability until goods or services have been provided to the customer. In addition, the Company recognizes breakage on Company gift cards based on historical redemption patterns.

The following table provides information about receivables and contract liabilities from contracts with customers as of December 31:

In millions	**2018**	**2017**
Trade receivables (included in accounts receivable, net)	$ 6,896	$ 7,895
Contract liabilities (included in accrued expenses)	67	53

During the year ended December 31, 2018 , the contract liabilities balance includes increases related to customers' earnings in ExtraBucks Rewards or issuances of Company gift cards and decreases for revenues recognized during the period as a result of the redemption of ExtraBucks Rewards or Company gift cards and breakage of Company gift cards. Below is a summary of such changes:

In millions	
Balance at December 31, 2017	$ 53
Adoption of ASU 2014-09	17
Loyalty program earnings and gift card issuances	332
Redemption and breakage	(335)
Balance at December 31, 2018	$ 67

Cost of products sold

The Company accounts for cost of products sold as follows:

Pharmacy Services Segment
PSS' cost of products sold includes: (i) the cost of prescription drugs sold during the reporting period directly through its mail service dispensing pharmacies and indirectly through its retail pharmacy network, (ii) shipping and handling costs, and (iii) the operating costs of its mail service dispensing pharmacies and client service operations and related information technology support costs including depreciation and amortization. The cost of prescription drugs sold component of cost of products sold includes: (i) the cost of the prescription drugs purchased from manufacturers or distributors and shipped to members in clients' benefit plans from PSS' mail service dispensing pharmacies, net of any volume-related or other discounts (see "Vendor allowances and purchase discounts" below) and (ii) the cost of prescription drugs sold (including Retail Co-Payments) through PSS' retail pharmacy network under contracts where it is the principal, net of any volume-related or other discounts.

Retail/LTC Segment
RLS' cost of products sold includes: the cost of merchandise sold during the reporting period, including prescription drug costs, and the related purchasing costs, warehousing and delivery costs (including depreciation and amortization) and actual and estimated inventory losses.

Health Care Benefits Segment
HCBS' cost of products sold includes the cost of the prescription and certain administrative costs incurred for dispensing the prescription to ASC members by HCBS' specialty and home delivery pharmacy operations.

See Note 17 ''Segment Reporting'' for additional information about the cost of products sold of the Company's segments.

Vendor allowances and purchase discounts

The Company accounts for vendor allowances and purchase discounts as follows:

Pharmacy Services Segment
PSS receives purchase discounts on products purchased. PSS' contractual arrangements with vendors, including manufacturers, wholesalers and retail pharmacies, normally provide for PSS to receive purchase discounts from established list prices in one, or a combination, of the following forms: (i) a direct discount at the time of purchase, (ii) a discount for the prompt payment of invoices, or (iii) when products are purchased indirectly from a manufacturer (e.g., through a wholesaler or retail pharmacy), a discount (or rebate) paid subsequent to dispensing. These rebates are recognized when prescriptions are dispensed and are generally calculated and billed to manufacturers within 30 days after the end of each completed quarter. Historically, the effect of adjustments resulting from the reconciliation of rebates recognized to the amounts billed and collected has not been material to PSS' results of operations. PSS accounts for the effect of any such differences as a change in accounting estimate in the period the reconciliation is completed. PSS also receives additional discounts under its wholesaler contracts if it exceeds contractually defined annual purchase volumes. In addition, PSS receives fees from pharmaceutical manufacturers for administrative services. Purchase discounts and administrative service fees are recorded as a reduction of "cost of products sold".

Retail/LTC Segment
Vendor allowances received by RLS reduce the carrying cost of inventory and are recognized in cost of products sold when the related inventory is sold, unless they are specifically identified as a reimbursement of incremental costs for promotional programs and/or other services provided. Amounts that are directly linked to advertising commitments are recognized as a reduction of advertising expense (included in operating expenses) when the related advertising commitment is satisfied. Any such allowances received in excess of the actual cost incurred also reduce the carrying cost of inventory. The total value of any upfront payments received from vendors that are linked to purchase commitments is initially deferred. The deferred amounts are then amortized to reduce cost of products sold over the life of the contract based upon purchase volume. The total value of any upfront payments received from vendors that are not linked to purchase commitments also is initially deferred. The deferred amounts are then amortized to reduce cost of products sold on a straight-line basis over the life of the related contract. The total amortization of these upfront payments was not material to the Company's consolidated financial statements in any of the periods presented.

Health Care Reform

Health Insurer Fee
Since January 1, 2014, the ACA imposes an annual premium-based health insurer fee ("HIF") for each calendar year payable in September which is not deductible for tax purposes. The Company is required to estimate a liability for the HIF at the beginning of the calendar year in which the fee is payable with a corresponding deferred asset that is amortized ratably to operating expenses over the calendar year. The Company records the liability for the health insurer fee in accrued expenses and records the deferred asset in other current assets. In 2018 and 2016, operating expenses include $157 million and $56 million , respectively, related to the Company's share of the HIF. There was no expense related to the HIF in 2017 and there will be no expense for HIF in 2019, since the HIF was suspended for each of those periods.

Risk Adjustment
The ACA established a permanent risk adjustment program to transfer funds from qualified individual and small group insurance plans with below average risk scores to plans with above average risk scores. Based on the risk of the Company's qualified plan members relative to the average risk of members of other qualified plans in comparable markets, the Company estimates its ultimate risk adjustment receivable (recorded in accounts receivable) or payable (recorded in accrued expenses) for the current calendar year and reflects the pro-rata year-to-date impact as an adjustment to premium revenue.

Advertising costs

Advertising costs are expensed when the related advertising takes place. Advertising costs, net of vendor funding (included in operating expenses), were $364 million , $230 million and $216 million in 2018 , 2017 and 2016 , respectively.

Stock-based compensation

Stock-based compensation is measured at the grant date based on the fair value of the award and is recognized as an expense over the applicable requisite service period of the stock award (generally 3 to 5 years) using the straight-line method.

Income taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the consolidated financial statements. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the consolidated financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year or years in which the differences are expected to reverse. The effect of a change in the tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date of such change.

The Tax Cuts and Jobs Act (the "TCJA") was enacted on December 22, 2017. Among numerous changes to existing tax laws, the TCJA permanently reduced the federal corporate income tax rate from 35% to 21% effective January 1, 2018. The effects of changes in tax rates on deferred tax balances are required to be taken into consideration in the period in which the changes are enacted, regardless of when they are effective. As a result of the reduction of the corporate income tax rate under the TCJA, the Company estimated the revaluation of its net deferred tax liabilities and recorded a provisional noncash income tax benefit of approximately $1.5 billion for year ended December 31, 2017. The Company completed its assessment of the TCJA's final impact in December 2018 and recorded an additional tax benefit of approximately $100 million in the year ended December 31, 2018.

The Company recognizes deferred tax assets to the extent that it believes these assets are more likely than not to be realized. In making such a determination, the Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies, and recent results of operations. The Company establishes a valuation allowance when it does not consider it more likely than not that a deferred tax asset will be recovered.

The Company records uncertain tax positions on the basis of a two-step process whereby (1) the Company determines whether it is more likely than not that the tax positions will be sustained on the basis of the technical merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, the Company recognizes the largest amount of tax benefit that is more than 50% likely to be realized upon ultimate settlement with the related tax authority.

Interest and/or penalties related to uncertain tax positions are recognized in the income tax provision.

Measurement of Defined Benefit Pension and Other Postretirement Employee Benefit ("OPEB") Plans

The Company sponsors defined benefit pension plans ("pension plans") and OPEB plans for its employees and retirees. The Company recognizes the funded status of its pension plans and OPEB plans on the consolidated balance sheets based on the year-end measurements of plan assets and benefit obligations. When the fair value of plan assets are in excess of the plans benefit obligations, the amounts are reported in other current assets and other assets. When the fair value of benefit obligations are in excess of plan assets, the amounts are reported in accrued expenses and other long-term liabilities based on the amount by which the actuarial present value of benefits payable in the next twelve months included in the benefit obligation exceeds the fair value of plan assets. Nearly all of the Company's net benefit costs for the Company's defined benefit pension and postretirement plans do not contain a service cost component as most of these defined benefit plans have been frozen for an extended period of time. Non-service components of pension and postretirement benefit cost are included in other expense (income) in the consolidated statements of operations.

Earnings per common share

Earnings per share is computed using the two-class method. The Company calculates basic earnings per share based on the weighted average number of common shares outstanding for the period. See Note 14 ''Earnings Per Share'' for additional information.

Shares held in trust

The Company maintains grantor trusts, which held approximately one million shares of its common stock at December 31, 2018 and 2017 , respectively. These shares are designated for use under various employee compensation plans. Since the Company holds these shares, they are excluded from the computation of basic and diluted shares outstanding.

Variable Interest Entities

The Company has investments in (i) a generic pharmaceutical sourcing entity, (ii) certain hedge fund and private equity investments and (iii) real estate partnerships that are considered VIE's. The Company does not have a future obligation to fund losses or debts on behalf of these investments; however, it may voluntarily contribute funds. In evaluating whether the Company is the primary beneficiary of a VIE, the Company considers several factors, including whether the Company has (a) the power to direct the activities that most significantly impact the VIE's economic performance and (b) the obligation to absorb losses and the right to receive benefits that could potentially be significant to the VIE.

Variable Interest Entities - Primary Beneficiary
In 2014, the Company and Cardinal Health, Inc. ("Cardinal") established Red Oak Sourcing, LLC ("Red Oak"), a generic pharmaceutical sourcing entity in which the Company and Cardinal each own 50% . The Red Oak arrangement has an initial term of 10 years. Under this arrangement, the Company and Cardinal contributed their sourcing and supply chain expertise to Red Oak and agreed to source and negotiate generic pharmaceutical supply contracts for both companies through Red Oak; however, Red Oak does not own or hold inventory on behalf of either company. No physical assets (e.g., property and equipment) were contributed to Red Oak by either company, and minimal funding was provided to capitalize Red Oak. The Company has determined that it is the primary beneficiary of this VIE because it has the ability to direct the activities of Red Oak. Consequently, the Company consolidates Red Oak in its consolidated financial statements within the Retail/LTC segment.

Cardinal is required to pay the Company 39 quarterly payments beginning in October 2014. As milestones are met, the quarterly payments increase. The Company received from Cardinal approximately $183 million during each of the years ended December 31, 2018 and 2017 and $163 million during the year ended December 31, 2016 . The payments reduce the Company's carrying value of inventory and are recognized in cost of products sold when the related inventory is sold. Revenues associated with Red Oak expenses reimbursed by Cardinal for the years ended December 31, 2018 , 2017 and 2016 , as well as amounts due to or due from Cardinal at December 31, 2018 and 2017 were immaterial.

Variable Interest Entities - Other Variable Interest Holder
In November 2018, the Company completed the Aetna Acquisition. Aetna has involvement with VIEs where the Company has determined that it is not the primary beneficiary, consisting of the following:

- *Hedge fund and private equity investments* - The Company invests in hedge fund and private equity investments in order to generate investment returns for its investment portfolio supporting its insurance businesses.

- *Real estate partnerships* - The Company invests in various real estate partnerships, including those that construct, own and manage low-income housing developments. For the low income housing development investments, substantially all of the projected benefits to the Company are from tax credits and other tax benefits.

The Company is not the primary beneficiary of these investments because the nature of the Company's involvement with the activities of these VIEs does not give the Company the power to direct the activities that most significantly impact their economic performance. The Company records the amount of its investment in these VIEs as long-term investments on the consolidated balance sheet and recognizes its share of each VIE's income or losses in earnings. The Company's maximum exposure to loss from these VIEs is limited to its investment balances as disclosed below and the risk of recapture of previously recognized tax credits related to the real estate partnerships, which the Company does not consider significant.

The total amount of other variable interest holder VIE assets included in long-term investments on the consolidated balance sheet at December 31, 2018 was as follows:

In millions		
Hedge fund investments	$	270
Private equity investments		524
Real estate partnerships		275
Total	$	1,069

Related Party Transactions

The Company has an equity method investment in SureScripts, LLC ("SureScripts"), which operates a clinical health information network. PSS and RLS utilize this clinical health information network in providing services to their respective client plan members and retail customers. The Company expensed fees for the use of this network of approximately $45 million , $35 million and $39 million in the years ended December 31, 2018 , 2017 and 2016 , respectively. The Company's investment in and equity in the earnings of SureScripts for all periods presented is immaterial.

The Company has an equity method investment in Heartland Healthcare Services ("Heartland"). Heartland operates several LTC pharmacies in four states. Heartland paid the Company approximately $135 million , $139 million and $140 million for pharmaceutical inventory purchases during the years ended December 31, 2018 , 2017 and 2016 , respectively. Additionally, the Company performs certain collection functions for Heartland and then passes those customer cash collections back to Heartland. The Company's investment in and equity in the earnings of Heartland for all periods presented is immaterial.

Discontinued Operations

In connection with certain business dispositions completed between 1991 and 1997, the Company retained guarantees on store lease obligations for a number of former subsidiaries, including Bob's Stores and Linens 'n Things each of which subsequently filed for bankruptcy. The Company's loss from discontinued operations primarily includes lease-related costs which the Company believes it will likely be required to satisfy pursuant to its lease guarantees. See "Lease Guarantees" in Note 16 ''Commitments and Contingencies'' for more information.

Results from discontinued operations were immaterial for the year ended December 31, 2018. Below is a summary of the results of discontinued operations for the years ended December 31 , 2017 and 2016:

In millions	**2017**	**2016**
Loss from discontinued operations	$ (13)	$ (2)
Income tax benefit	5	1
Loss from discontinued operations, net of tax	$ (8)	$ (1)

New accounting pronouncements recently adopted

Revenue from Contracts with Customers
In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers* (Topic 606) ("Topic 606"). ASU 2014-09 outlines a single comprehensive model for

companies to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. In March 2016, the FASB issued ASU 2016-08, *Principal Versus Agent Considerations (Reporting* Revenue *Gross Versus Net)* which amends the principal-versus-agent implementation guidance and in April 2016 the FASB issued ASU 2016-10, *Identifying Performance Obligations and Licensing,* which amends the guidance in those areas in the new revenue recognition standard.

The Company adopted the new standard as of January 1, 2018 using the modified retrospective method and applied the new standard to all contracts. Therefore, the comparative financial information has not been restated and continues to be reported under the accounting standards in effect for the applicable period. While the adoption of the new standard did not result in any material adjustments to the Company's revenue or net income, one difference was identified between the previous accounting guidance and the new accounting guidance in RLS related to the accounting for the Company's ExtraBucks ® Rewards customer loyalty program. This program was previously accounted for under a cost deferral method, while under the new standard this program is accounted for under a revenue deferral method. The cumulative effect of applying the new guidance to all contracts was recorded as an adjustment to retained earnings as of the adoption date.

As a result of applying the modified retrospective method to adopt the new standard, the following adjustments were made to accounts on the consolidated balance sheet as of January 1, 2018:

		Impact of Change in Accounting Policy	
In millions	**As Reported December 31, 2017**	**Adjustments**	**Adjusted January 1, 2018**
Consolidated Balance Sheet:			
Accrued expenses	$ 6,581	$ 17	$ 6,598
Deferred income taxes	2,996	(4)	2,992
Total liabilities	57,436	13	57,449
Retained earnings	43,556	(13)	43,543
Total CVS Health shareholders' equity	37,691	(13)	37,678
Total shareholders' equity	37,695	(13)	37,682

The following tables compare the reported consolidated balance sheet, statements of operations, and statement of cash flows amounts to the pro forma amounts had the previous revenue accounting guidance remained in effect:

		Impact of Change in Accounting Policy	
In millions	**As Reported As of/For the Year Ended December 31, 2018**	**Adjustments**	**Balances Without Adoption of Topic 606**
Consolidated Statement of Operations:			
Revenues:			
Products	$ 183,910	$ 3	$ 183,913
Total revenues	194,579	3	194,582
Operating costs:			
Cost of products sold	156,447	2	156,449
Total operating costs	190,558	2	190,560
Operating income	4,021	1	4,022
Income before income tax provision	1,406	1	1,407
Income tax provision	2,002	—	2,002
Loss from continuing operations	(596)	1	(595)
Net loss	(596)	1	(595)
Net loss attributable to CVS Health	(594)	1	(593)
Consolidated Balance Sheet:			
Accrued expenses	10,711	(18)	10,693
Total current liabilities	44,009	(18)	43,991
Deferred income taxes	7,677	4	7,681
Total liabilities	137,913	(14)	137,899
Retained earnings	40,911	14	40,925
Total CVS Health shareholders' equity	58,225	14	58,239
Total shareholders' equity	58,543	14	58,557
Consolidated Statement of Cash Flow:			
Reconciliation of net loss to net cash provided by operating activities:			
Net loss	(596)	1	(595)
Other liabilities	165	(1)	164

Recognition and Measurement of Financial Assets and Financial Liabilities
In January 2016, the FASB issued ASU 2016-01, *Financial Instruments - Overall* (Subtopic 825-10): *Recognition and Measurement of Financial Assets and Financial Liabilities* . This ASU requires equity investments, except those under the equity method of accounting or those that result in the consolidation of an investee, to be measured at fair value with changes in fair value recognized in net income. However, an entity may choose to measure equity investments that do not have readily determinable fair values at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or similar investment of the same issuer. This simplifies the impairment assessment of equity investments previously held at cost. Entities are required to apply the guidance retrospectively, with the exception of the amendments related to equity investments without readily determinable fair values, which must be applied on a prospective basis. Effective January 1, 2018, the Company adopted this new accounting guidance. The adoption of this new guidance did not have a material impact on the Company's financial condition or results of operations.

Classification of Certain Cash Receipts and Cash Payments in the Consolidated Statements of Cash Flows
In August 2016, the FASB issued ASU 2016-15, *Classification of Certain Cash Receipts and Cash Payments* . This ASU is intended to add or clarify guidance on the classification of certain cash receipts and payments in the statement of cash flows and

to eliminate the diversity in practice related to such classifications. Effective January 1, 2018, the Company adopted this new accounting guidance. The adoption of this new guidance did not have a material impact on the Company's financial condition or results of operations.

Statement of Cash Flows - Restricted Cash
In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows* , which amends Accounting Standard Codification Topic 230. This ASU requires entities to show the changes in the total of cash, cash equivalents, restricted cash and restricted cash equivalents in the statement of cash flows. As a result, entities no longer are required to present transfers between cash and cash equivalents and restricted cash and restricted cash equivalents in the statement of cash flows. When cash, cash equivalents, restricted cash and restricted cash equivalents are presented in more than one line item on the balance sheet, the new guidance requires a reconciliation of the totals in the statement of cash flows to the related captions in the balance sheet. Entities will also have to disclose the nature of their restricted cash and restricted cash equivalent balances. The guidance is required to be applied retrospectively. Effective January 1, 2018, the Company adopted this new accounting guidance.

The following is a reconciliation of cash and cash equivalents on the consolidated balance sheets as of December 31 to total cash, cash equivalents and restricted cash in the consolidated statements of cash flows:

In millions	**2018**	**2017**	**2016**
Cash and cash equivalents	$ 4,059	$ 1,696	$ 3,371
Restricted cash (included in other current assets)	6	14	—
Restricted cash (included in other assets)	230	190	149
Total cash, cash equivalents and restricted cash at the end of the period in the statement of cash flows	$ 4,295	$ 1,900	$ 3,520

See "Restricted cash" above for further discussion of the nature of the Company's restricted cash and restricted cash equivalent balances.

The following is a reconciliation of the effect on the relevant line items in the consolidated statement of cash flows for the years ended December 31, 2017 and 2016 as a result of adopting this new accounting guidance:

In millions	**As Previously Reported**	**Adjustments**	**As Revised**
Year Ended December 31, 2017			
Acquisitions (net of cash acquired)	$ (1,236)	$ 55	$ (1,181)
Net cash used in investing activities	(2,932)	55	(2,877)
Net decrease in cash, cash equivalents and restricted cash [(1)]	(1,675)	55	(1,620)
Cash, cash equivalents and restricted cash at the beginning of the period [(1)]	3,371	149	3,520
Cash, cash equivalents and restricted cash at the end of the period [(1)]	1,696	204	1,900
Year Ended December 31, 2016			
Acquisitions (net of cash acquired)	(524)	—	(524)
Net cash used in investing activities	(2,470)	—	(2,470)
Net decrease in cash, cash equivalents and restricted cash [(1)]	912	—	912
Cash, cash equivalents and restricted cash at the beginning of the period [(1)]	2,459	149	2,608
Cash, cash equivalents and restricted cash at the end of the period [(1)]	3,371	149	3,520

(1) Prior to the adoption of ASU 2016-18, these financial statement captions excluded restricted cash. The financial statement captions have been renamed to reflect the inclusion of restricted cash subsequent to the adoption of ASU 2016-18 on January 1, 2018.

Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income
In February 2018, the FASB issued ASU 2018-02, *Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income ("ASU 2018-02")* . This ASU permits entities to reclassify tax effects stranded in accumulated other comprehensive income as a result of the TCJA to retained

earnings. The guidance states that because the adjustment of deferred income taxes due to the reduction of the historical corporate income tax rate to the newly enacted corporate income tax rate was required to be included in income from continuing operations, the tax effects of items within accumulated other comprehensive income ("stranded tax effects") are not reflected at the appropriate tax rate. During the first quarter of 2018, the Company elected to early adopt this new standard and decreased accumulated other comprehensive income and increased retained earnings in the period of adoption by $7 million due to the change in the United States federal corporate income tax rate enacted in December 2017. See Note 13 ''Other Comprehensive Income (Loss)'' for the impact of the adoption of this guidance on accumulated other comprehensive income for the year ended December 31, 2018 .

New accounting pronouncements not yet adopted

Leases
In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842). Lessees will be required to recognize a right-of-use asset and a lease liability for virtually all of their leases (other than leases that meet the definition of a short-term lease). The liability will be equal to the present value of future lease payments. The asset will be based on the liability, subject to adjustment, such as for initial direct costs. For income statement purposes, a dual model was retained, requiring leases to be classified as either operating or finance leases. Operating leases will result in straight-line expense (similar to current operating leases) while finance leases will result in a front-loaded expense pattern (similar to current capital leases). Lessor accounting is similar to the current model, but updated to align with certain changes to the lessee model (e.g., certain definitions, such as initial direct costs, have been updated) and the new revenue recognition standard. The Company adopted this new accounting guidance on January 1, 2019 on a modified retrospective basis. The adoption of this new guidance resulted in an increase in both assets and liabilities of approximately $20 billion as of January 1, 2019. The adoption of this new guidance is not expected to have a material impact on the Company's results of operations or cash flows.

Accounting for Interest Associated with the Purchase of Callable Debt Securities
In March 2017, the FASB issued ASU 2017-08, *Accounting for Interest Associated with the Purchase of Callable Debt Securities (* Topic 310 *).* Under this ASU, premiums on callable debt securities are amortized to the earliest call date rather than to the contractual maturity date. Callable debt securities held at a discount will continue to be amortized to the contractual maturity date. The Company adopted this new accounting guidance on January 1, 2019 on a modified retrospective basis and recorded an immaterial cumulative effect adjustment from accumulated other comprehensive income to retained earnings on the consolidated balance sheet.

Measurement of Credit Losses on Financial Instruments
In June 2016, the FASB issued ASU 2016-13, *Financial Instruments - Credit Losses* (Topic 326). This ASU requires the use of a forward-looking expected loss impairment model for trade and other receivables, held-to-maturity debt securities, loans and other instruments. The ASU also requires impairments and recoveries for available-for-sale debt securities to be recorded through an allowance account and revises certain disclosure requirements. The standard is effective for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The Company is currently evaluating the effect that implementation of this standard will have on the Company's consolidated results of operations, cash flows, financial condition and related disclosures.

Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract
In August 2018, the FASB issued ASU 2018-15, *Intangibles - Goodwill and other - Internal-Use Software* (Topic 350-40): *Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Contract.* The new standard requires a customer in a cloud computing arrangement that is a service contract to follow internal-use software guidance in Topic 350-40 to determine which implementation costs to capitalize as assets. The standard is effective for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted. The Company is currently evaluating the effect the implementation of this standard will have on the Company's consolidated results of operations, cash flows, financial condition and related disclosures.

Targeted Improvements to the Accounting for Long-Duration Insurance Contracts
In August 2018, the FASB issued ASU 2018-12, *Targeted Improvements to the Accounting for Long-Duration Insurance Contracts* (Topic 944). The ASU requires the Company to review cash flow assumptions for its long-duration insurance contracts at least annually and recognize the effect of changes in future cash flow assumptions in net income. The Company is also required to update discount rate assumptions quarterly and recognize the effect of changes in these assumptions in other comprehensive income. The rate used to discount the Company's liability for future policy benefits will be based on an estimate of the yield for an upper-medium-grade fixed-income instrument. In addition, the new guidance changes the amortization method for deferred acquisition costs and requires additional disclosures regarding the long duration insurance contract

liabilities in the Company's interim and annual financial statements. The standard is effective for public companies for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. The Company is currently evaluating the effect the implementation of this standard will have on the Company's consolidated results of operations, cash flows, financial condition and related disclosures.

2. Acquisition of Aetna

On the Aetna Acquisition Date, the Company acquired 100% of the outstanding shares and voting interests of Aetna for a combination of cash and stock. Under the terms of the merger agreement, Aetna shareholders received $145.00 in cash and 0.8378 CVS Health shares for each Aetna share. The transaction valued Aetna at approximately $212 per share or approximately $70 billion . Including the assumption of Aetna's debt, the total value of the transaction was approximately $78 billion . The Company financed the cash portion of the purchase price through a combination of cash on hand and by issuing approximately $45 billion of new debt, including senior notes and term loans. Aetna is a leading health care benefits company that offers a broad range of traditional, voluntary, and consumer-directed health insurance products and related services. The majority of Aetna's operations are included in a new segment, Health Care Benefits. The Health Care Benefits segment is the equivalent of the former Aetna Health Care Segment. The remainder of Aetna's operations, including products for which the Company no longer solicits or accepts new customers, such as large case pensions and long-term care insurance products, are included in the Corporate/Other segment. The Company acquired Aetna to help improve the consumer health care experience by combining Aetna's health care benefits products and services with CVS Health's more than 9,900 retail locations, approximately 1,100 walk-in medical clinics and integrated pharmacy capabilities with the goal of becoming the new, trusted front door to health care.

The fair value of the consideration transferred on the date of acquisition consisted of the following:

In millions		
Cash	$	48,089
Common stock (274.4 million shares) [(1)]		22,117
Fair value of replacement equity awards for pre-combination services (9.9 million shares) [(2)]		367
Effective settlement of pre-existing relationship [(3)]		(807)
Total consideration transferred	$	69,766

(1) The fair value of the Company's common stock issued as consideration was calculated based on the 327.6 million Aetna common shares outstanding as of November 28, 2018 multiplied by (i) the merger agreement per share exchange ratio and (ii) the volume weighted average price of CVS Health common stock on November 28, 2018 of $80.59 .

(2) The fair value of the replacement equity awards issued by the Company was determined as of the Aetna Acquisition Date. The fair value of the awards attributed to pre-combination services of $367 million is included in the consideration transferred and the fair value of the awards attributed to post-combination services of $232 million has been, or will be, included in the Company's post-combination financial statements as compensation costs.

(3) The purchase price included $807 million of effectively settled liabilities the Company owed to Aetna from their pre-existing pharmacy services relationship.

The transaction has been accounted for using the acquisition method of accounting which requires, among other things, the assets acquired and liabilities assumed to be recognized at their fair values at the date of acquisition. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition:

In millions	
Cash and cash equivalents	$ 6,565
Accounts receivable [1]	4,089
Other current assets	3,896
Investments (current and long-term)	17,991
Goodwill	46,684
Intangible assets	23,746
Other long-term assets	8,282
Total assets acquired	111,253
Health care costs payable	5,359
Other current liabilities	10,026
Debt (current and long-term)	8,098
Deferred income taxes	4,574
Other long-term liabilities	13,101
Total liabilities assumed	41,158
Noncontrolling interests	329
Total consideration transferred	$ 69,766

(1) The fair value of premium receivables acquired is $2.4 billion , with the gross contractual amount being $2.8 billion . The Company expects $424 million of premium receivables to be uncollectible. The fair value of other receivables acquired is $1.7 billion , with the gross contractual amount being $1.8 billion . The Company expects $84 million of other receivables to be uncollectible.

The assessment of fair value is preliminary and is based on information that was available to management at the time the consolidated financial statements were prepared. The most significant open items included the valuation of certain intangible assets and investments, the accounting for income taxes and the accounting for contingencies as management is awaiting additional information to complete its assessment of these matters. Measurement period adjustments will be recorded in the period in which they are determined, as if they had been completed at the acquisition date. The finalization of the Company's purchase accounting assessment could result in changes in the valuation of assets acquired and liabilities assumed, which could be material.

Goodwill

Goodwill represents future economic benefits expected to arise from the Company's expanded presence in the health care industry, the assembled workforce acquired, expected purchasing, medical cost and revenue synergies, as well as operating efficiencies and cost savings. The preliminarily valuation of goodwill was allocated to the Company's business segments as follows:

In millions	
Health Care Benefits	$ 44,484
Pharmacy Services	1,500
Retail/LTC	700
Total goodwill	$ 46,684

Approximately $165 million of goodwill is deductible for income tax purposes.

Intangible Assets
The following table summarizes the preliminary fair values and weighted average useful lives for intangible assets acquired in the Aetna Acquisition, each of which is subject to change as the Company finalizes its purchase accounting:

In millions, except weighted average useful life		**Gross Fair Value**	**Weighted Average Useful Life (years)**
Customer relationships [(1)]	$	13,630	14.4
Standalone Medicare Part D prescription drug plan customer relationship (held for sale)		101	N/A
Technology		1,060	3.0
Provider networks [(1)]		4,200	20.0
Value of Business Acquired		590	20.0
Trademark (definite-lived)		65	5.0
Trademark (indefinitely-lived)		4,100	N/A
Total intangible assets	$	23,746	15.1

(1) The amortization period for the Company's customer relationships and provider networks includes an assumption of renewal or extension of these arrangements. At the acquisition date, the periods prior to the next renewal or extension for provider networks primarily ranged from one to three years, and the period prior to the next renewal or extension for customer relationships was one year. Any costs related to the renewal or extension of these contracts are expensed as incurred.

Deferred income taxes
The purchase price allocation includes net deferred tax liabilities of $4.6 billion , primarily relating to deferred tax liabilities established on the identifiable acquired intangible assets.

Consolidated results of operations
The Company's consolidated results of operations for the year ended December 31, 2018 , include $5.6 billion of revenues and $146 million of income before income tax provision associated with the results of operations of Aetna from the Aetna Acquisition Date to December 31, 2018 .

During the year ended December 31, 2018 and 2017 , the Company incurred transaction costs of $147 million and $34 million , respectively, associated with the Aetna Acquisition that were recorded within operating expenses.

Unaudited pro forma financial information
The following unaudited pro forma information presents a summary of the Company's combined results of operations for the years ended December 31, 2018 and 2017 as if the Aetna acquisition and the related financing transactions had occurred on January 1, 2017 . The following pro forma financial information is not necessarily indicative of the results of operations as they would have been had the acquisition been effected on the assumed date, nor is it necessarily an indication of trends in future results for a number of reasons, including, but not limited to, differences between the assumptions used to prepare the pro forma information, basic shares outstanding and dilutive equivalents, cost savings from operating efficiencies, potential synergies, and the impact of incremental costs incurred in integrating the businesses.

		Year Ended December 31,		
In millions, except per share data		**2018**		**2017**
Total revenues	$	243,398	$	236,000
Income from continuing operations		1,123		6,813
Basic earnings per share from continuing operations attributable to CVS Health	$	0.87	$	5.25
Diluted earnings per share from continuing operations attributable to CVS Health	$	0.86	$	5.21

The pro forma results for the years ended December 31, 2018 and 2017 include adjustments related to the following purchase accounting and acquisition-related items:

- Elimination of intercompany transactions between CVS Health and Aetna;

- Elimination of estimated foregone interest income associated with (i) cash assumed to have been used to partially fund the Aetna Acquisition and (ii) adjusting the amortized cost of Aetna's investment portfolio to fair value as of the completion of the Aetna Acquisition;
- Elimination of historical intangible asset, deferred acquisition cost and capitalized software amortization expense and addition of amortization expense based on the current preliminary values of identified intangible assets;
- Additional interest expense from (i) the long-term debt issued to partially fund the Aetna Acquisition and (ii) the amortization of the fair value adjustment to assumed long-term debt.
- Additional depreciation expense related to the adjustment of Aetna's property and equipment to fair value;
- Adjustments to align CVS Health's and Aetna's accounting policies;
- Elimination of transaction related costs; and
- Tax effects of the adjustments noted above.

3. Investments

On November 28, 2018, the Company completed the Aetna Acquisition. Prior to the Aetna Acquisition Date, the Company's short term investments balance was comprised of certificates of deposit with initial maturities of greater than three months when purchased that mature in less than one year from the balance sheet date. These investments totaled $111 million as of December 31, 2017 and were classified as available for sale. In addition, the Company had $112 million of additional long-term investments as of December 31, 2017 which primarily consisted of cost method and equity method investments. Since the total amount of investments prior to the Aetna Acquisition was not material to the consolidated financial statements, the Company will include additional disclosures for investments on a prospective basis starting from the Aetna Acquisition Date.

Total investments at December 31, 2018 were as follows:

In millions	**Current**	**Long-term**	**Total**
Debt securities available for sale	$ 2,359	$ 12,896	$ 15,255
Mortgage loans	145	1,216	1,361
Other investments	18	1,620	1,638
Total investments	$ 2,522	$ 15,732	$ 18,254

At December 31, 2018 , the Company held investments of $531 million related to the 2012 conversion of an existing group annuity contract from a participating to a non-participating contract. The conversion occurred prior to the Aetna Acquisition. These investments are included in the total investments of large case pensions supporting non-experience-rated products. Although these investments are not accounted for as Separate Accounts assets, they are legally segregated and are not subject to claims that arise out of the Company's business and only support future policy benefits obligations under that group annuity contract.

Debt Securities

Debt securities available for sale at December 31, 2018 were as follows:

In millions	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2018				
Debt securities:				
U.S. government securities	$ 1,662	$ 26	$ —	$ 1,688
States, municipalities and political subdivisions	2,370	30	(1)	2,399
U.S. corporate securities	6,444	61	(16)	6,489
Foreign securities	2,355	31	(3)	2,383
Residential mortgage-backed securities	567	10	—	577
Commercial mortgage-backed securities	594	11	—	605
Other asset-backed securities	1,097	3	(15)	1,085
Redeemable preferred securities	30	—	(1)	29
Total debt securities [1]	$ 15,119	$ 172	$ (36)	$ 15,255

(1) Investment risks associated with the Company's experience-rated products generally do not impact the Company's consolidated results of operations. At December 31, 2018 , debt securities with a fair value of $916 million , gross unrealized capital gains of $12 million and gross unrealized capital losses of $2 million were included in total debt securities, but support experience-rated products.

The fair value of debt securities at December 31, 2018 is shown below by contractual maturity. Actual maturities may differ from contractual maturities because securities may be restructured, called or prepaid, or the Company intends to sell a security prior to maturity.

In millions	Amortized Cost	Fair Value
Due to mature:		
Less than one year	$ 901	$ 902
One year through five years	5,489	5,521
After five years through ten years	2,973	2,999
Greater than ten years	3,498	3,566
Residential mortgage-backed securities	567	577
Commercial mortgage-backed securities	594	605
Other asset-backed securities	1,097	1,085
Total	$ 15,119	$ 15,255

Mortgage-Backed and Other Asset-Backed Securities
All of the Company's residential mortgage-backed securities at December 31, 2018 were issued by the Government National Mortgage Association, the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation and carry agency guarantees and explicit or implicit guarantees by the United States Government. At December 31, 2018 , the Company's residential mortgage-backed securities had an average credit quality rating of AAA and a weighted average duration of 4.8 years.

The Company's commercial mortgage-backed securities have underlying loans that are dispersed throughout the United States. Significant market observable inputs used to value these securities include loss severity and probability of default. At December 31, 2018 , these securities had an average credit quality rating of AAA and a weighted average duration of 6.3 years.

The Company's other asset-backed securities have a variety of underlying collateral (e.g., automobile loans, credit card receivables, home equity loans and commercial loans). Significant market observable inputs used to value these securities include the unemployment rate, loss severity and probability of default. At December 31, 2018 , these securities had an average credit quality rating of AA and a weighted average duration of 1.3 years.

Summarized below are the debt securities the Company held at December 31, 2018 that were in an unrealized capital loss position:

In millions, except number of securities	**Number of Securities**	**Fair Value**	**Unrealized Losses**
Debt securities:			
U.S. government securities	8	$ 26	$ —
States, municipalities and political subdivisions	54	86	1
U.S. corporate securities	1,399	1,431	16
Foreign securities	243	314	3
Residential mortgage-backed securities	45	1	—
Other asset-backed securities	516	528	15
Redeemable preferred securities	14	23	1
Total debt securities	2,279	$ 2,409	$ 36

Since Aetna's investment portfolio was measured at fair value as of the Aetna Acquisition Date, each of the securities in the table above were in an unrealized loss position for less than 12 months. The Company reviewed the securities in the table above and concluded that they are performing assets generating investment income to support the needs of the Company's businesses. In performing this review, the Company considered factors such as the quality of the investment security based on research performed by the Company's internal credit analysts and external rating agencies and the prospects of realizing the carrying value of the security based on the investment's current prospects for recovery. As of December 31, 2018 , the Company did not intend to sell these securities, and did not believe it was more likely than not that it would be required to sell these securities prior to anticipated recovery of their amortized cost basis.

The maturity dates for debt securities in an unrealized capital loss position at December 31, 2018 were as follows:

	Supporting experience-rated products		**Supporting remaining products**		**Total**	
In millions	**Fair Value**	**Unrealized Losses**	**Fair Value**	**Unrealized Losses**	**Fair Value**	**Unrealized Losses**
Due to mature:						
Less than one year	$ 21	$ —	$ 308	$ —	$ 329	$ —
One year through five years	36	2	557	5	593	7
After five years through ten years	47	—	492	9	539	9
Greater than ten years	49	—	370	5	419	5
Residential mortgage-backed securities	—	—	1	—	1	—
Other asset-backed securities	4	—	524	15	528	15
Total	$ 157	$ 2	$ 2,252	$ 34	$ 2,409	$ 36

Mortgage Loans

The Company's mortgage loans are collateralized by commercial real estate. From the Aetna Acquisition Date through December 31, 2018 , the Company had the following activity in its mortgage loan portfolio:

In millions	
New mortgage loans	$ 4
Mortgage loans fully-repaid	27
Mortgage loans foreclosed	—

The Company assesses mortgage loans on a regular basis for credit impairments, and annually assign a credit quality indicator to each loan. The Company's credit quality indicator is internally developed and categorizes its portfolio on a scale from 1 to 7. These indicators are based upon several factors, including current loan-to-value ratios, property condition, market trends, creditworthiness of the borrower and deal structure. The vast majority of the Company's mortgage loans fall into categories 2 to 4.

- *Category 1* - Represents loans of superior quality
- *Categories 2 to 4* - Represents loans where credit risk is minimal to acceptable; however, these loans may display some susceptibility to economic changes.
- *Categories 5 and 6* - Represents loans where credit risk is not substantial, but these loans warrant management's close attention.
- *Category 7* - Represents loans where collections are potentially at risk; if necessary, an impairment is recorded.

Based upon the most recent assessments at December 31, 2018 , the Company's mortgage loans were given the following credit quality indicators:

In millions, except credit ratings indicator		
1	$	42
2 to 4		1,301
5 and 6		18
7		—
Total	$	1,361

At December 31, 2018 scheduled mortgage loan principal repayments were as follows:

In millions		
2019	$	145
2020		109
2021		269
2022		228
2023		83
Thereafter		527
Total	$	1,361

Net Investment Income

Sources of net investment income for the year ended December 31, 2018 were as follows:

In millions		
Debt securities	$	637
Mortgage loans		6
Other investments		17
Gross investment income		660
Investment expenses		(3)
Net investment income (excluding net realized capital gains or losses)		657
Net realized capital gains		3
Net investment income [(1)]	$	660

(1) Net investment income in 2018 includes $4 million related to investments supporting experience-rated products.

The Company's net investment income was $21 million and $20 million in 2017 and 2016 , respectively, relating to interest income on debt securities. The Company did not have any material realized capital gains or losses during 2017 or 2016.

The portion of unrealized capital gains and losses recognized during the year ended December 31, 2018 related to investments in equity securities held as of December 31, 2018 was not material.

Excluding amounts related to experience-rated products, proceeds from the sale of available for sale debt securities and the related gross realized capital gains and losses from the Aetna Acquisition Date through December 31, 2018 were as follows: [1]

In millions		
Proceeds from sales	$	389
Gross realized capital gains		2
Gross realized capital losses		(2)

(1) The proceeds from sales and gross realized capital gains and losses exclude the impact of the sales of short-term debt securities which primarily relate to the Company's investments in mutual funds. These investments were excluded from the disclosed amounts because they represent an immaterial amount of aggregate gross realized capital gains or losses and have a high volume of sales activity.

4. Fair Value

The preparation of the Company's consolidated financial statements in accordance with GAAP requires certain assets and liabilities to be reflected at their fair value, and others on another basis, such as an adjusted historical cost basis. In this note, the Company provides details on the fair value of financial assets and liabilities and how it determines those fair values. The Company presents this information for those financial instruments that are measured at fair value for which the change in fair value impacts net income (loss) attributable to CVS Health or other comprehensive income separately from other financial assets and liabilities.

Financial Instruments Measured at Fair Value on the Consolidated Balance Sheets

Certain of the Company's financial instruments are measured at fair value on the consolidated balance sheets. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by GAAP. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- Level 1 – Unadjusted quoted prices for identical assets or liabilities in active markets.
- Level 2 – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- Level 3 – Developed from unobservable data, reflecting the Company's assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, the Company uses these quoted market prices to determine the fair value of financial assets and liabilities and classifies these assets and liabilities in Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, the Company estimates fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified in Level 2. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

The following is a description of the valuation methodologies used for the Company's financial assets and liabilities that are measured at fair value, including the general classification of such assets and liabilities pursuant to the valuation hierarchy.

Debt Securities – Where quoted prices are available in an active market, debt securities are classified in Level 1 of the fair value hierarchy. The Company's Level 1 debt securities consist primarily of United States Treasury securities.

The fair values of the Company's Level 2 debt securities are obtained using models, such as matrix pricing, which use quoted market prices of debt securities with similar characteristics or discounted cash flows to estimate fair value. The Company reviews these prices to ensure they are based on observable market inputs that include, but are not limited to, quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets and inputs that are observable but not prices (for example, interest rates and credit risks). The Company also reviews the

methodologies and the assumptions used to calculate prices from these observable inputs. On a quarterly basis, the Company selects a sample of its Level 2 debt securities' prices and compares them to prices provided by a secondary source. Variances over a specified threshold are identified and reviewed to confirm the price provided by the primary source represents an appropriate estimate of fair value. In addition, the Company's internal investment team consistently compares the prices obtained for select Level 2 debt securities to the team's own independent estimates of fair value for those securities. The Company obtained one price for each of its Level 2 debt securities and did not adjust any of these prices at December 31, 2018 . The Company's Level 2 debt securities were not material as of December 31, 2017 .

The Company also values certain debt securities using Level 3 inputs. For Level 3 debt securities, fair values are determined by outside brokers or, in the case of certain private placement securities, are priced internally. Outside brokers determine the value of these debt securities through a combination of their knowledge of the current pricing environment and market flows. The Company obtained one non-binding broker quote for each of these Level 3 debt securities and did not adjust any of these quotes at December 31, 2018 . The total fair value of broker quoted debt securities was $50 million at December 31, 2018 . The Company did not have any Level 3 debt securities as of December 31, 2017. Examples of these broker quoted Level 3 debt securities include certain United States and foreign corporate securities and certain of the Company's commercial mortgage-backed securities as well as other asset-backed securities. For some private placement securities, the Company's internal staff determines the value of these debt securities by analyzing spreads of corporate and sector indices as well as interest spreads of comparable public bonds. Examples of these private placement Level 3 debt securities include certain United States and foreign securities and certain tax-exempt municipal securities.

Equity Securities – The Company currently has two classifications of equity securities: those that are publicly traded and those that are privately placed. Publicly-traded equity securities are classified in Level 1 because quoted prices are available for these securities in an active market. For privately placed equity securities, there is no active market; therefore, these securities are classified in Level 3 because the Company prices these securities through an internal analysis of each investment's financial statements and cash flow projections. Significant unobservable inputs consist of earnings and revenue multiples, discount for lack of marketability and comparability adjustments. An increase or decrease in any of these unobservable inputs would result in a change in the fair value measurement, which may be significant. The Company did not have any Level 3 equity securities as of December 31, 2017.

Derivative Financial Instruments - The fair values of derivative financial instruments are determined using quoted prices in markets that are not active or inputs that are observable for the asset or liability and therefore they are classified as Level 2 in the fair value hierarchy. The fair value of these instruments are recorded in other current assets or accrued expenses, as applicable. The Company did not have any material outstanding derivative financial instruments as of December 31, 2018.

Financial assets and liabilities measured at fair value on a recurring basis on the consolidated balance sheets at December 31, 2018 and 2017 were as follows:

In millions	**Level 1**	**Level 2**	**Level 3**	**Total**
December 31, 2018				
Assets:				
Debt securities:				
U.S. government securities	$ 1,597	$ 91	$ —	$ 1,688
States, municipalities and political subdivisions	—	2,399	—	2,399
U.S. corporate securities	—	6,422	67	6,489
Foreign securities	—	2,380	3	2,383
Residential mortgage-backed securities	—	577	—	577
Commercial mortgage-backed securities	—	605	—	605
Other asset-backed securities	—	1,085	—	1,085
Redeemable preferred securities	—	22	7	29
Total debt securities	1,597	13,581	77	15,255
Equity securities	19	—	54	73
Total	$ 1,616	$ 13,581	$ 131	$ 15,328
December 31, 2017				
Assets:				
Debt securities:				
U.S. corporate securities	$ —	$ 1	$ —	$ 1
Foreign securities	—	110	—	110
Total debt securities	—	111	—	111
Equity securities	—	—	—	—
Derivative financial instruments	—	5	—	5
Total assets	$ —	$ 116	$ —	$ 116
Liabilities:				
Derivative financial instruments	$ —	$ 23	$ —	$ 23

There were no transfers between Levels 1 and 2 during the years ended December 31, 2018 and 2017 . The change in the balance of Level 3 financial assets during 2018 relates to investments acquired in the Aetna Acquisition, which occurred on November 28, 2018. There were no transfers into or out of Level 3 from November 28, 2018 to December 31, 2018.

Financial Instruments Not Measured at Fair Value on the Consolidated Balance Sheets

The carrying value and estimated fair value classified by level of fair value hierarchy for financial instruments carried on the consolidated balance sheets at adjusted cost or contract value at December 31, 2018 and 2017 were as follows:

In millions	Carrying Value	Estimated Fair Value			
		Level 1	Level 2	Level 3	Total
December 31, 2018					
Assets:					
Mortgage loans	$ 1,361	$ —	$ —	$ 1,366	$ 1,366
Equity securities [1]	140	N/A	N/A	N/A	N/A
Liabilities:					
Investment contract liabilities:					
With a fixed maturity	5	—	—	5	5
Without a fixed maturity	382	—	—	357	357
Long-term debt	72,709	71,252	—	—	71,252

In millions	Carrying Value	Estimated Fair Value			
		Level 1	Level 2	Level 3	Total
December 31, 2017					
Assets:					
Equity securities [1]	$ 47	N/A	N/A	N/A	N/A
Liabilities:					
Long-term debt	25,726	26,756	—	—	26,756

(1) It was not practical to estimate the fair value of these cost-method investments as it represents shares of unlisted companies. See Note 1 ‘‘Significant Accounting Policies’’ for additional information regarding the valuation of cost-method investments.

Separate Accounts Measured at Fair Value on the Consolidated Balance Sheets

As part of the Aetna Acquisition, the Company acquired Separate Accounts assets related to large case pensions products which represent funds maintained to meet specific objectives of contract holders. Since contract holders bear the investment risk of these assets, a corresponding Separate Accounts liability has been established equal to the assets. These assets and liabilities are carried at fair value. Net investment income and capital gains and losses accrue directly to such contract holders. The assets of each account are legally segregated and are not subject to claims arising from the Company’s other businesses. Deposits, withdrawals, net investment income and realized and unrealized capital gains and losses on Separate Accounts assets are not reflected in the consolidated statements of operations, shareholders’ equity or cash flows.

Separate Accounts assets include debt and equity securities. The valuation methodologies used for these assets are similar to the methodologies described above in this Note 4 “Fair Value.” Separate Accounts assets also include investments in common/collective trusts that are carried at fair value. Common/collective trusts invest in other investment funds otherwise known as the underlying funds. The Separate Accounts’ interests in the common/collective trust funds are based on the fair values of the investments of the underlying funds and therefore are classified in Level 2. The assets in the underlying funds primarily consist of equity securities. Investments in common/collective trust funds are valued at their respective net asset value (“NAV”) per share/unit on the valuation date.

Separate Accounts financial assets as of December 31, 2018 were as follows:

In millions	Level 1	Level 2	Level 3	Total
Debt securities	$ 782	$ 2,500	$ 4	$ 3,286
Equity securities	—	3	—	3
Common/collective trusts	—	404	—	404
Total [1]	$ 782	$ 2,907	$ 4	$ 3,693

(1) Excludes $191 million of cash and cash equivalents and accounts receivable at December 31, 2018 .

During 2018 , the Company had an immaterial amount of Level 3 Separate Accounts financial assets and an immaterial amount of gross transfers of Separate Accounts financial assets into or out of Level 3. During 2018 , there were no transfers of Separate Accounts financial assets between Levels 1 and 2. The Company held no Separate Accounts financial assets as of December 31, 2017 .

Offsetting Financial Assets and Liabilities

Subsequent to the Aetna Acquisition Date, certain financial assets and liabilities are offset in the Company's consolidated balance sheets or are subject to master netting arrangements or similar agreements with the applicable counterparty. Financial assets, including derivative assets, subject to offsetting and enforceable master netting arrangements were $13 million as of December 31, 2018.

5. Goodwill and Other Intangibles

Goodwill

Below is a summary of the changes in the carrying amount of goodwill by segment for the years ended December 31, 2018 and 2017 :

In millions	Pharmacy Services	Retail/LTC	Health Care Benefits	Total
Balance at December 31, 2016	$ 21,637	$ 16,612	$ —	$ 38,249
Acquisitions	182	203	—	385
Foreign currency translation adjustments	—	(2)	—	(2)
Impairments	—	(181)	—	(181)
Balance at December 31, 2017	21,819	16,632	—	38,451
Acquisitions	1,569	735	44,484	46,788
Foreign currency translation adjustments	—	(14)	—	(14)
Divestiture of RxCrossroads subsidiary	—	(398)	—	(398)
Impairments	—	(6,149)	—	(6,149)
Balance at December 31, 2018	$ 23,388	$ 10,806	$ 44,484	$ 78,678

Cumulative goodwill impairments as of December 31, 2018 and 2017 were $6.1 billion and $181 million , respectively.

The changes in the carrying amount of goodwill during the years ended December 31, 2018 and 2017 reflect the following activity:

Aetna Acquisition
On November 28, 2018, the Company completed the Aetna Acquisition. The majority of the preliminary valuation of goodwill associated with the Aetna Acquisition was recorded in the Health Care Benefits segment. The Company also allocated a portion of such goodwill to the Retail/LTC and Pharmacy Services segments related to the fair value of identified synergies that are expected to directly benefit those segments. See Note 2 ''Acquisition of Aetna'' for further discussion regarding the Aetna Acquisition.

LTC
During 2018, the LTC reporting unit continued to experience industry wide challenges that have impacted management's ability to grow the business at the rate that was originally estimated when the Company acquired Omnicare and when the 2017 annual goodwill impairment test was performed. These challenges include lower client retention rates, lower occupancy rates in skilled nursing facilities, the deteriorating financial health of numerous skilled nursing facility customers which resulted in a number of customer bankruptcies in 2018, and continued facility reimbursement pressures. In June 2018, LTC management submitted its initial budget for 2019 and updated the 2018 annual forecast which showed a projected deterioration in the financial results for the remainder of 2018 and in 2019, which also caused management to update its long-term forecast beyond 2019. Based on these updated projections, management determined that there were indicators that the LTC reporting unit's goodwill may be impaired and, accordingly, management performed an interim goodwill impairment test as of June 30, 2018. The results of that interim impairment test showed that the fair value of the LTC reporting unit was lower than the carrying value, resulting in a $3.9 billion pre-tax goodwill impairment charge in the second quarter of 2018. The fair value of the LTC reporting unit was determined using a combination of a discounted cash flow method and a market multiple method. In addition to the lower financial projections, higher risk-free interest rates and lower market multiples of peer group companies contributed to the amount of the second quarter 2018 goodwill impairment charge.

During the third quarter of 2018, the Company performed its required annual impairment tests of goodwill and concluded there was no impairment of goodwill or trade names.

During the fourth quarter of 2018, the LTC reporting unit missed its forecast primarily due to operational issues and customer liquidity issues, including one significant customer bankruptcy. Additionally, LTC management submitted an updated final budget for 2019 which showed significant additional deterioration in the projected financial results for 2019 compared to the analyses performed in the second and third quarters of 2018 primarily due to continued industry and operational challenges, which also caused management to make further updates to its long-term forecast beyond 2019. The updated projections continue to reflect industry wide challenges including lower occupancy rates in skilled nursing facilities, significant deterioration in the financial health of numerous skilled nursing facility customers and continued facility reimbursement pressures. Based on these updated projections, management determined that there were indicators that the LTC reporting unit's goodwill may be further impaired and, accordingly, an interim goodwill impairment test was performed during the fourth quarter of 2018. The results of that impairment test showed that the fair value of the LTC reporting unit was lower than the carrying value, resulting in an additional $2.2 billion goodwill impairment charge in the fourth quarter of 2018. In addition to the lower financial projections, lower market multiples of peer group companies also contributed to the amount of the fourth quarter 2018 goodwill impairment charge. The fair value of the LTC reporting unit was determined using a methodology consistent with the methodology described above for the analyses performed during the second and third quarters of 2018.

As of December 31, 2018 , the remaining goodwill balance in the LTC reporting unit is approximately $431 million .

RxCrossroads
During 2017, the Company began pursuing various strategic alternatives for its RxCrossroads reporting unit. In connection with this effort, the Company performed an interim goodwill impairment test in the second quarter of 2017. The results of that impairment test showed that the fair value of the RxCrossroads reporting unit was lower than the carrying value, resulting in a $135 million pre-tax goodwill impairment charge in the second quarter of 2017.

The TCJA was enacted on December 22, 2017 and reduced the United States federal corporate income tax rate from 35% to 21% effective January 1, 2018 (see Note 10 ‘‘Income Taxes’’). As a result, the RxCrossroads deferred income tax liabilities were reduced by $47 million and an income tax benefit of $47 million was recorded in the 2017 statement of operations. The reduction in the deferred income tax liabilities increased the carrying value of the RxCrossroads reporting unit by $47 million which triggered an additional goodwill impairment charge in the RxCrossroads reporting unit of $46 million during the fourth quarter of 2017.

On January 2, 2018, the Company sold its RxCrossroads subsidiary to McKesson Corporation for $725 million , at which time the remaining goodwill of this reporting unit was removed from the consolidated balance sheet.

Intangible Assets

The following table is a summary of the Company's intangible assets as of December 31 :

In millions, except weighted average life	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Life (years)
2018				
Trademarks (indefinitely-lived)	$ 10,498	$ —	$ 10,498	N/A
Customer contracts/relationships and covenants not to compete	26,213	(6,349)	19,864	14.8
Technology	1,060	(31)	1,029	3.0
Provider networks	4,200	(19)	4,181	20.0
Value of Business Acquired	590	(7)	583	20.0
Favorable leases and other	1,177	(808)	369	17.1
Total	$ 43,738	$ (7,214)	$ 36,524	15.3
2017				
Trademark (indefinitely-lived)	$ 6,398	$ —	$ 6,398	N/A
Customer contracts/relationships and covenants not to compete	12,341	(5,536)	6,805	15.3
Favorable leases and other	1,190	(763)	427	16.2
Total	$ 19,929	$ (6,299)	$ 13,630	15.4

Amortization expense for intangible assets totaled $1.0 billion , $817 million and $795 million for the years ended December 31, 2018 , 2017 and 2016 , respectively. The projected annual amortization expense for the Company's intangible assets for the next five years is as follows:

In millions	
2019	$ 2,563
2020	2,350
2021	2,253
2022	1,879
2023	1,844

6. Leases

The Company leases most of its retail and mail order dispensing pharmacy locations, and certain distribution centers and corporate offices under noncancelable operating leases, typically with initial terms of 15 to 25 years and with options that permit renewals for additional periods. The Company also leases certain equipment and other assets under noncancelable operating leases, typically with initial terms of 3 to 10 years.

In December 2015, in connection with the acquisition of the pharmacy and clinic businesses of Target, the Company entered into lease agreements with Target for the pharmacy and clinic space within Target stores. Given that the noncancelable contractual term of the pharmacy lease arrangement exceeds the remaining estimated economic life of the buildings being leased, the Company concluded for accounting purposes that the lease term was the remaining economic life of the buildings. Consequently, most of the individual Target pharmacy and clinic leases are capital leases.

Minimum rent on operating leases is expensed on a straight-line basis over the term of the lease. In addition to minimum rental payments, certain leases require additional payments based on sales volume, as well as reimbursement for real estate taxes, common area maintenance and insurance, which are expensed as incurred.

The following table is a summary of the Company's net rental expense for operating leases for the years ended December 31:

In millions	**2018**	**2017**	**2016**
Minimum rentals	$ 2,528	$ 2,455	$ 2,418
Contingent rentals	28	29	35
Rental expense	2,556	2,484	2,453
Less: sublease income	(21)	(24)	(24)
Total rental expense, net	$ 2,535	$ 2,460	$ 2,429

The following table is a summary of the future minimum lease payments under capital and operating leases as of December 31, 2018 :

In millions	**Capital Leases**	**Operating Leases [1]**
2019	$ 74	$ 2,690
2020	73	2,544
2021	73	2,399
2022	73	2,233
2023	73	2,110
Thereafter	875	16,004
Total future lease payments [2]	1,241	$ 27,980
Less: imputed interest	(599)	
Present value of capital lease obligations	$ 642	

(1) Future operating lease payments have not been reduced by minimum sublease rentals of $164 million due in the future under noncancelable subleases.
(2) The Company leases pharmacy and clinic space from Target. Amounts related to such capital and operating leases are reflected above. Amounts due in excess of the remaining estimated economic life of the buildings of approximately $2.1 billion are not reflected herein since the estimated economic life of the buildings is shorter than the contractual term of the lease arrangement.

The Company finances a portion of its store development program through sale-leaseback transactions. The properties are generally sold at net book value, which generally approximates fair value, and the resulting leases generally qualify and are accounted for as operating leases. The operating leases that resulted from these transactions are included in the above table. The Company does not have any retained or contingent interests in the stores and does not provide any guarantees, other than a guarantee of lease payments, in connection with the sale-leaseback transactions. There were no sale-leaseback transactions in 2018. Proceeds from sale-leaseback transactions totaled $265 million and $230 million in 2017 and 2016 , respectively.

7. Health Care Costs Payable

On November 28, 2018 , the Company completed the Aetna Acquisition. Prior to the Aetna Acquisition, the Company's health care costs payable balance was immaterial and related to unpaid pharmacy claims for its stand-alone Medicare Part D PDPs within the Pharmacy Services segment. Accordingly, the Company will include disclosures for health care costs payable for the year ended December 31, 2018. Since the health care costs payable liability related to the Pharmacy Services segment is immaterial, the Company's disclosures will be presented on a consolidated basis and will not be disaggregated between the Pharmacy Services and Health Care Benefits segments.

Health care costs payable consist principally of unpaid fee-for-service medical, dental and pharmacy claims, capitation costs, other amounts due to health care providers pursuant to risk-sharing arrangements and accruals for state assessments within the Health Care Benefits segment. See Note 1 ''Significant Accounting Policies'' for information on how the Company estimates IBNR reserves and health care costs payable as well as changes to those methodologies, if any. The Company's estimate of IBNR liabilities is primarily based on trend and completion factors. Claim frequency is not used in the calculation of the Company's liability. In addition, it is impracticable to disclose claim frequency information for health care claims due to the Company's inability to gather consistent claim frequency information across its multiple claims processing systems. Any claim frequency count disclosure would not be comparable across the Company's different claim processing systems and would not

be consistent from period to period based on the volume of claims processed through each system. As a result, health care claim count frequency was not included in the disclosures included below.

The following table shows the components of the change in health care costs payable during 2018:

In millions	
Health care costs payable, beginning of the period	$ 5
Less: Reinsurance recoverables	—
Health care costs payable, beginning of the period, net	5
Acquisitions, net	5,357
Add: Components of incurred health care costs	
Current year	6,594
Prior years	(42)
Total incurred health care costs [(1)]	6,552
Less: Claims paid	
Current year	6,464
Prior years	260
Total claims paid	6,724
Add: Premium deficiency reserve	16
Health care costs payable, end of period, net	5,206
Add: Reinsurance recoverables	4
Health care costs payable, end of period	$ 5,210

(1) Total incurred health care costs for the year ended December 31, 2018 in the table above exclude (i) $16 million related to a premium deficiency reserve for the 2019 coverage year related to Medicaid products, (ii) $4 million of benefit costs recorded in the Health Care Benefits segment that are included in Other Insurance Liabilities on the consolidated balance sheet and (iii) $22 million of benefit costs recorded in the Corporate/Other segment that are included in Other Insurance Liabilities on the consolidated balance sheet.

At December 31, 2018 , the Company's liabilities for IBNR plus expected development on reported claims totaled approximately $ 4.1 billion . Substantially all of the Company's liabilities for IBNR plus expected development on reported claims at December 31, 2018 related to the current calendar year.

Due to the proximity of the Aetna Acquisition Date to December 31, 2018 , the Company did not include disclosures related to incurred and paid claim development from November 28, 2018 to December 31, 2018 . The Company will begin including disclosures related to incurred and paid claim development for the year ended December 31, 2019.

8. Borrowings and Credit Agreements

The following table is a summary of the Company's borrowings as of December 31 :

In millions	**2018**	**2017**
Short-term debt

The following is a summary of the Company's required principal debt repayments due during each of the next five years and thereafter, as of December 31, 2018 :

In millions		
2019	$	1,985
2020		5,775
2021		10,427
2022		4,178
2023		8,581
Thereafter		43,319
Total	$	74,265

Short-term Borrowings

Commercial Paper and Back-up Credit Facilities
The Company had approximately $720 million and $1.3 billion of commercial paper outstanding at weighted average interest rates of 2.8% and 2.0% as of December 31, 2018 and 2017 , respectively. In connection with its commercial paper program, the Company maintains a $1.75 billion 364 -day unsecured back-up revolving credit facility, which expires on May 16, 2019, a $1.25 billion , five -year unsecured back-up revolving credit facility, which expires on July 1, 2020, a $1.0 billion , five -year unsecured back-up revolving credit facility, which expires on May 18, 2022, and a $2.0 billion , five -year unsecured back-up revolving credit facility, which expires on May 17, 2023. The credit facilities allow for borrowings at various rates that are dependent, in part, on the Company's public debt ratings and require the Company to pay a weighted average quarterly facility fee of approximately .03% , regardless of usage. As of December 31, 2018 and 2017 , there were no borrowings outstanding under any of the back-up credit facilities.

Bridge Loan Facility
On December 3, 2017, in connection with the Aetna Acquisition, the Company entered into a $49.0 billion unsecured bridge loan facility commitment. The Company paid $221 million in fees upon entering into the agreement. The fees were capitalized in other current assets and were amortized as interest expense over the period the bridge loan facility commitment was outstanding. The bridge loan facility commitment was reduced to $44.0 billion on December 15, 2017 upon the Company entering into a $5.0 billion term loan agreement. The Company recorded $56 million of amortization of the bridge loan facility fees during the year ended December 31, 2017, which was recorded in interest expense in the consolidated statements of operations.

On March 9, 2018, the Company issued an aggregate of $40.0 billion principal amount of unsecured floating rate notes and unsecured fixed rate senior notes, collectively the "2018 Notes". At this time, the bridge loan facility commitment was reduced to $4.0 billion , and the Company paid $8 million in fees to retain the bridge loan facility commitment through the Aetna Acquisition Date. Those fees were capitalized in other current assets and were amortized as interest expense over the period the bridge loan facility commitment was outstanding. The Company recorded $173 million of amortization of the bridge loan facility commitment fees during the year ended December 31, 2018 , which was recorded in interest expense in the consolidated statement of operations. On October 26, 2018, the Company entered into a $4.0 billion unsecured 364 -day bridge term loan agreement to formalize the bridge loan facility discussed above. On November 28, 2018, in connection with the Aetna Acquisition, the $4.0 billion unsecured 364 -day bridge term loan agreement terminated.

Terminated Revolving Credit Facility
On January 3, 2017, the Company entered into a $2.5 billion revolving credit facility. The credit facility allowed for borrowings at various rates that were dependent, in part, on the Company's debt ratings and required the Company to pay a weighted average quarterly facility fee of approximately 0.03% , regardless of usage. The Company terminated this credit facility in May 2017.

Federal Home Loan Bank of Boston
Since the Aetna Acquisition Date, a subsidiary of the Company is a member of the FHLBB. As a member, the subsidiary has the ability to obtain cash advances, subject to certain minimum collateral requirements. The maximum borrowing capacity available from the FHLBB as of December 31, 2018 was approximately $790 million . As of December 31, 2018 , there were no outstanding advances from the FHLBB.

Long-term Borrowings

2018 Notes
On March 9, 2018, the Company issued the 2018 Notes with an aggregate principal amount of $40.0 billion , for total proceeds of approximately $39.4 billion , net of discounts and underwriting fees. The net proceeds of the 2018 Notes were used to fund a portion of the Aetna Acquisition. The 2018 Notes are comprised of the following:

In millions		
3.125% senior notes due March 2020	$	2,000
Floating rate notes due March 2020		1,000
3.35% senior notes due March 2021		3,000
Floating rate notes due March 2021		1,000
3.7% senior notes due March 2023		6,000
4.1% senior notes due March 2025		5,000
4.3% senior notes due March 2028		9,000
4.78% senior notes due March 2038		5,000
5.05% senior notes due March 2048		8,000
Total debt principal	$	40,000

Beginning in December 2017 through March 31, 2018, the Company entered into several interest rate swap and treasury lock transactions to manage interest rate risk. These agreements were designated as cash flow hedges and were used to hedge the exposure to variability in future cash flows resulting from changes in interest rates related to the anticipated issuance of long-term debt to fund the Aetna Acquisition.

In connection with the issuance of the 2018 Notes, the Company terminated all outstanding cash flow hedges. In connection with the hedge transactions, the Company received a net amount of $446 million from the hedge counterparties upon termination, which was recorded as a gain, net of tax, of $331 million in accumulated other comprehensive income and will be reclassified as a reduction of interest expense over the life of the 2018 Notes. See Note 13 ‘‘Other Comprehensive Income (Loss)’’ for additional information. The Company expects to reclassify approximately $18 million , net of tax, in gains associated with these cash flow hedges into net income within the next 12 months.

Term Loan Agreement
On December 15, 2017, in connection with the Aetna Acquisition, the Company entered into a $5.0 billion term loan agreement. The term loan facility under the term loan agreement consists of a $3.0 billion three -year tranche and a $2.0 billion five -year tranche. The term loan agreement allows for borrowings at various rates that are dependent, in part, on the Company’s debt ratings. In connection with the Aetna Acquisition, the Company borrowed $5.0 billion (a $3.0 billion three -year tranche and a $2.0 billion five -year tranche) under term loan agreement in November 2018. The Company terminated the $2.0 billion five-year tranche in December 2018 with the repayment of the borrowing. As of December 31, 2018, the Company had $3.0 billion outstanding under the three -year tranche of the term loan agreement.

Aetna Related Debt
On the Aetna Acquisition Date, the Company assumed long-term debt with a fair value of $8.1 billion , with stated interest rates ranging from 2.2% to 6.75% . The long-term debt assumed is included in the summary of borrowings table above.

2016 Notes
On May 16, 2016, the Company issued $1.75 billion aggregate principal amount of 2.125% unsecured senior notes due June 1, 2021 and $1.75 billion aggregate principal amount of 2.875% unsecured senior notes due June 1, 2026 (collectively, the “ 2016 Notes ”) for total proceeds of approximately $3.5 billion , net of discounts and underwriting fees. The 2016 Notes may be redeemed, in whole at any time, or in part from time to time, at the Company’s option at a defined redemption price plus accrued and unpaid interest to the redemption date. The net proceeds of the 2016 Notes were used for general corporate purposes and to repay certain corporate debt.

Early Extinguishment of Long-Term Debt
On May 16, 2016, the Company announced tender offers for (i) any and all of its 5.75% senior notes due 2017, its 6.60% senior notes due 2019 and its 4.75% senior notes due 2020 (collectively, the “Any and All Notes”) and (ii) up to $1.5 billion aggregate

principal amount of the 4.75% Senior Notes due 2022 issued by its wholly-owned subsidiary Omnicare, the 5.00% Senior Notes due 2024 issued by Omnicare, its 3.875% Senior Notes due 2025, its 6.25% Senior Notes due 2027, its 4.875% Senior Notes due 2035, its 6.125% Senior Notes due 2039 and its 5.75% Senior Notes due 2041 (collectively, the "Maximum Tender Offer Notes" and together with the Any and All Notes, the "Notes"). On May 31, 2016, the Company increased the aggregate principal amount of the tender offers for the Maximum Tender Offer Notes to $2.25 billion . The Company purchased approximately $835 million aggregate principal amount of the Any and All Notes and $2.25 billion aggregate principal amount of the Maximum Tender Offer Notes pursuant to the tender offers, which expired on June 13, 2016. In connection with the purchase of the Notes, the Company paid a premium of $486 million in excess of the debt principal, wrote off $50 million of unamortized deferred financing costs and incurred $6 million in fees, for a total loss on early extinguishment of long-term debt of $542 million , which was recorded in income from continuing operations in the consolidated statement of operations for the year ended December 31, 2016.

On June 27, 2016, the Company notified the holders of the remaining Any and All Notes that the Company was exercising its option to redeem the outstanding Any and All Notes pursuant to the terms of the Any and All Notes and the Indenture dated as of August 15, 2006, between the Company and The Bank of New York Mellon Trust Company, N.A. Approximately $1.1 billion aggregate principal amount of Any and All Notes was redeemed on July 27, 2016. In connection with that redemption, the Company paid a premium of $97 million in excess of the debt principal and wrote off $4 million of unamortized deferred financing costs, for a total loss on early extinguishment of long-term debt of $101 million , which was recorded in income from continuing operations in the consolidated statement of operations for the year ended December 31, 2016.

Debt Covenants

The back-up revolving credit facilities, unsecured senior notes, unsecured floating rate notes and term loan agreement contain customary restrictive financial and operating covenants. These covenants do not include a requirement for the acceleration of the Company's debt maturities in the event of a downgrade in the Company's credit rating. The Company does not believe the restrictions contained in these covenants materially affect its financial or operating flexibility. As of December 31, 2018 , the Company was in compliance with all of its debt covenants.

9. Pension Plans and Other Postretirement Benefits

Defined Contribution Plans

As of December 31, 2018 , the Company sponsors several active 401(k) savings plans that cover all employees who meet plan eligibility requirements. The Company makes matching contributions consistent with the provisions of the respective plans.

At the participant's option, account balances, including the Company's matching contribution, can be invested without restriction among various investment options under each plan. Two of the defined contribution plans offer the Company's common stock fund as an investment option. The Company also maintains nonqualified, unfunded deferred compensation plans for certain key employees. The plans provide participants the opportunity to defer portions of their eligible compensation and for certain nonqualified plans, participants receive matching contributions equivalent to what they could have received under the CVS Health 401(k) Plan or Aetna 401(k) Plan absent certain restrictions and limitations under the Internal Revenue Code. The Company's contributions under the above defined contribution plans were $334 million , $314 million and $295 million in 2018, 2017 and 2016, respectively. The Company's contributions for the year ended December 31, 2018 include contributions to the Aetna Inc. 401(k) plan subsequent to the Aetna Acquisition Date.

Defined Benefit Pension Plans

On November 28, 2018, the Company completed the Aetna Acquisition. Aetna sponsors a tax-qualified pension plan that was frozen in 2010. Aetna also sponsors a non-qualified supplemental pension plan that was frozen in 2007. Aetna's pension plan benefit obligations and the fair value of plan assets were remeasured as of the Aetna Acquisition Date.

Prior to the Aetna Acquisition, during the year ended December 31, 2017 , the Company settled the pension obligations of its existing two tax-qualified defined benefit pension plans by irrevocably transferring pension liabilities to an insurance company through the purchase of group annuity contracts and through lump sum distributions. These purchases, funded with pension plan assets, resulted in pre-tax settlement losses of $187 million in the year ended December 31, 2017 , related to the recognition of accumulated deferred actuarial losses. The settlement losses were recorded in other expense in the consolidated statement of operations. The Company also sponsors several other defined benefit pension plans that are unfunded nonqualified supplemental retirement plans as described in the "Other Postretirement Benefits" section below.

Pension Benefit Obligations and Plan Assets
The following tables outline the change in benefit obligations and plan assets over the specified periods:

In millions	**2018**	**2017**
Change in benefit obligation:		
Benefit obligation, beginning of year	$ 131	$ 844
Acquired benefit obligations	5,685	—
Interest cost	25	20
Actuarial loss (gain)	41	(31)
Benefit payments	(41)	(35)
Settlements	—	(667)
Benefit obligation, end of year	$ 5,841	$ 131

In millions	**2018**	**2017**
Change in plan assets:		
Fair value of plan assets, beginning of year	$ —	$ 624
Fair value of plan assets acquired	5,709	—
Actual return on plan assets	(17)	32
Employer contributions	12	46
Benefit payments	(41)	(35)
Settlements	—	(667)
Fair value of plan assets, end of year	5,663	—
Funded status	$ (178)	$ (131)

The assets (liabilities) recognized on the consolidated balance sheets at December 31, 2018 and 2017 for the pension plans consisted of the following:

In millions	**2018**	**2017**
Accrued benefit assets reflected in other assets	$ 147	$ —
Accrued benefit liabilities reflected in accrued expenses	(25)	(21)
Accrued benefit liabilities reflected in other long-term liabilities	(300)	(110)
Net liabilities	$ (178)	$ (131)

Net Periodic Benefit Costs
The components of net periodic benefit cost for the years ended December 31 are shown below:

In millions	**2018**	**2017**	**2016**
Components of net periodic benefit cost:			
Interest cost	$ 25	$ 20	$ 27
Expected return on plan assets	(33)	(20)	(32)
Amortization of net actuarial loss	2	21	32
Settlement losses	—	187	—
Net periodic benefit cost	$ (6)	$ 208	$ 27

Pension Plan Assumptions
The Company uses a series of actuarial assumptions to determine its benefit obligations and net benefit costs as further detailed below.

Discount Rates - The discount rate for the acquired Aetna plans is determined using a yield curve as of the annual measurement date. Each yield curve consisted of a series of individual discount rates, with each discount rate corresponding to a single point in time, based on high-quality bonds. Projected benefit payments are discounted to the measurement date using the corresponding rate from the yield curve. The weighted average discount rate for the Aetna pension plans was 4.4% in 2018 .

The Company settled the pension obligations of its existing tax-qualified plans during 2017. The discount rates for determining plan benefit obligations (excluding the terminated qualified plan) were approximately 4.0% , 3.5% and 4.0% in 2018 , 2017 and 2016 , respectively. The discount rate for the terminated qualified plan was 3.1% in 2016.

Expected Return on Plan Assets - The expected long-term rate of return on plan assets is determined by using the plan's target allocation and return expectations based on many factors including forecasted long-term capital market real returns and the inflationary outlook on a plan by plan basis. The expected long-term rate of return for the acquired Aetna plans was 6.6% in 2018. See "Pension Plan Assets" below for additional details regarding the Aetna pension plan assets as of December 31, 2018.

The Company settled the pension obligations of its existing tax-qualified plans during 2017. The expected long-term rate of return for these plans ranged from 4.0% to 5.5% in both 2017 and 2016 .

Net Actuarial Losses/Gains - Based on the mortality experience of the acquired Aetna pension plans, in 2018 the Company utilized the RP-2014WC Mortality Table with a generation projection of future mortality improvements using Scale MP-2018 for the acquired Aetna plans.

Pension Plan Assets
As of December 31, 2017, the assets in the Company's prior qualified defined benefit pension plans had been fully liquidated to settle all plan obligations through the purchase of group annuity contracts and through lump sum distributions. On November 28, 2018, the Company completed the Aetna Acquisition. At December 31, 2018, the assets of the Aetna pension plan (the "Aetna Pension Plan") primarily include debt and equity securities held in separate accounts, as well as common/collective trusts and real estate investments. The valuation methodologies used to price these debt and equity securities and common/collective trusts are similar to the methodologies described in Note 4 "Fair Value." Assets of the Aetna pension plan also include investments in other assets that are carried at fair value. The following is a description of the valuation methodology used to price real estate investments and these additional investments, including the general classification pursuant to the fair value hierarchy.

Real Estate - Real estate investments are valued by independent third party appraisers. The appraisals comply with the Uniform Standards of Professional Appraisal Practice, which includes, among other things, the income, cost, and sales comparison approaches to estimating property value. Therefore, these investments are classified in Level 3.

Private equity and hedge fund limited partnerships - Private equity and hedge fund limited partnerships are carried at fair value which is estimated using the NAV per unit as reported by the administrator of the underlying investment fund as a practical expedient to fair value. Therefore, these investments have been excluded from the fair value table below.

Aetna Pension Plan assets with changes in fair value measured on a recurring basis at December 31, 2018 were as follows:

In millions	**Level 1**	**Level 2**	**Level 3**	**Total**
Debt securities:				
U.S. government securities	$ 511	$ 38	$ —	$ 549
States, municipalities and political subdivisions	—	147	—	147
U.S. corporate securities	—	1,671	5	1,676
Foreign securities	—	177	—	177
Residential mortgage-backed securities	—	339	—	339
Commercial mortgage-backed securities	—	70	—	70
Other asset-backed securities	—	162	—	162
Redeemable preferred securities	—	6	—	6
Total debt securities	511	2,610	5	3,126
Equity securities:				
U.S. Domestic	744	—	—	744
International	356	—	—	356
Domestic real estate	30	—	—	30
Total equity securities	1,130	—	—	1,130
Other investments:				
Real estate	—	—	425	425
Common/collective trusts (1)	—	253	—	253
Derivatives	—	2	—	2
Total other investments	—	255	425	680
Total pension investments (2)	$ 1,641	$ 2,865	$ 430	$ 4,936

(1) The assets in the underlying funds of common/collective trusts consist of $109 million of equity securities and $144 million of debt securities.
(2) Excludes $98 million of cash and cash equivalents, $465 million of private equity limited partnership investments and $164 million of hedge fund limited partnership investments as the amounts are carried at fair value.

The change in the balance of pension plan assets during 2018 relates to investments acquired in the Aetna Acquisition, which occurred on November 28, 2018. There was an immaterial amount of transfers into or out of Level 3 from November 28, 2018 to December 31, 2018.

The Aetna Pension Plan invests in a diversified mix of assets intended to maximize long-term returns while recognizing the need for adequate liquidity to meet ongoing benefit and administrative obligations. The risk of unexpected investment and actuarial outcomes is regularly evaluated. This evaluation is performed through forecasting and assessing ranges of investment outcomes over short- and long-term horizons and by assessing Aetna Pension Plan's liability characteristics. Complementary investment styles and techniques are utilized by multiple professional investment firms to further improve portfolio and operational risk characteristics. Public and private equity investments are used primarily to increase overall plan returns. Real estate investments are viewed favorably for their diversification benefits and above-average dividend generation. Fixed income investments provide diversification benefits and liability hedging attributes that are desirable, especially in falling interest rate environments.

At December 31, 2018 , target investment allocations for the Aetna Pension Plan were: 31% in equity securities, 57% in debt securities, 6% in real estate, 3% in private equity limited partnerships and 3% in hedge funds. Actual asset allocations may differ from target allocations due to tactical decisions to overweight or underweight certain assets or as a result of normal fluctuations in asset values. Asset allocations are consistent with stated investment policies and, as a general rule, periodically rebalanced back to target asset allocations. Asset allocations and investment performance are formally reviewed periodically throughout the year by the Aetna Pension Plan's Benefit Finance Committee. Forecasting of asset and liability growth is performed at least annually.

Cash Flows
The Company generally contributes to its tax-qualified pension plans based on minimum funding requirements determined under applicable federal laws and regulations. Employer contributions related to the non-qualified supplemental pension plans generally represent payments to retirees for current benefits. The Company contributed $12 million , $46 million and $25 million to the pension plans during 2018 , 2017 and 2016 , respectively. No contributions are required for the Aetna Pension Plan in 2019. The Company expects to make an immaterial amount of contributions for all other pension plans in 2019. The Company estimates the following future benefit payments, which are calculated using the same actuarial assumptions used to measure the pension plan benefit obligation as of December 31, 2018 :

In millions		
2019	$	375
2020		387
2021		411
2022		387
2023		391
2024-2028		1,916

Multiemployer Pension Plans
The Company also contributes to a number of multiemployer pension plans under the terms of collective-bargaining agreements that cover its union-represented employees. The risks of participating in these multiemployer plans are different from single-employer pension plans in the following aspects: (i) assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers, (ii) if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers, and (iii) if the Company chooses to stop participating in some of its multiemployer plans, the Company may be required to pay those plans an amount based on the underfunded status of the applicable plan, referred to as a withdrawal liability.

None of the multiemployer pension plans in which the Company participates are individually significant to the Company. Total Company contributions to multiemployer pension plans were $18 million , $17 million and $15 million in 2018 , 2017 and 2016 , respectively.

Other Postretirement Benefits

The Company provides postretirement health care and life insurance benefits to certain retirees who meet eligibility requirements. On November 28, 2018, the Company completed the Aetna Acquisition. Aetna also sponsors OPEB plans that provide certain health care and life insurance benefits for retired employees. The Company's funding policy is generally to pay covered expenses as they are incurred. For retiree medical plan accounting, the Company reviews external data and its own historical trends for health care costs to determine the health care cost trend rates. As of December 31, 2018 and 2017 , the Company's other postretirement benefits had an accumulated postretirement benefit obligation of $228 million and $25 million , respectively. Net periodic benefit costs related to these other postretirement benefits were $2 million in 2018 , and $1 million in both 2017 and 2016 .

The Company estimates the following future benefit payments, which are calculated using the same actuarial assumptions used to measure the other postretirement benefit obligation as of December 31, 2018 :

In millions		
2019	$	17
2020		17
2021		17
2022		16
2023		16
2024-2028		76

Pursuant to various collective bargaining agreements, the Company also contributes to multiemployer health and welfare plans that cover certain union-represented employees. The plans provide postretirement health care and life insurance benefits to

certain employees who meet eligibility requirements. Total Company contributions to multiemployer health and welfare plans were $58 million , $58 million and $52 million in 2018 , 2017 and 2016 , respectively.

10. Income Taxes

The income tax provision for continuing operations consisted of the following for the years ended December 31:

In millions	**2018**	**2017**	**2016**
Current:			
Federal	$ 1,480	$ 2,594	$ 2,803
State	499	464	511
	1,979	3,058	3,314
Deferred:			
Federal	22	(1,435)	5
State	1	14	(2)
	23	(1,421)	3
Total	$ 2,002	$ 1,637	$ 3,317

The TCJA was enacted on December 22, 2017. Among numerous changes to existing tax laws, the TCJA permanently reduced the federal corporate income tax rate from 35% to 21% effective on January 1, 2018. The effects of changes in tax rates on deferred tax balances are required to be taken into consideration in the period in which the changes are enacted, regardless of when they are effective. As a result of the reduction of the corporate income tax rate under the TCJA, the Company estimated the revaluation of its net deferred tax liabilities and recorded a provisional noncash income tax benefit of approximately $1.5 billion for year ended December 31, 2017. The Company completed its assessment of the TCJA's final impact in December 2018 and recorded an additional tax benefit of approximately $100 million in the year ended December 31, 2018.

The following table is a reconciliation of the statutory income tax rate to the Company's effective income tax rate for continuing operations for the years ended December 31:

	2018	**2017**	**2016**
Statutory income tax rate	21.0 %	35.0 %	35.0 %
State income taxes, net of federal tax benefit	27.7	4.1	4.1
Effect of the Tax Cuts and Jobs Act	(7.1)	(18.3)	—
Health insurer fee	2.2	—	0.2
Goodwill impairments	89.5	0.8	—
Sale of subsidiary	5.0	—	—
Other	4.1	(1.8)	(0.9)
Effective income tax rate	142.4 %	19.8 %	38.4 %

The following table is a summary of the components of the Company's deferred income tax assets and liabilities as of December 31:

In millions	**2018**	**2017**
Deferred income tax assets:		
Lease and rents	$ 277	$ 291
Inventory	28	31
Employee benefits	243	246
Allowance for doubtful accounts	243	187
Retirement benefits	130	40
Net operating loss and capital loss carryforwards	529	101
Deferred income	104	93
Insurance reserves	467	—
Investments	11	—
Other	242	18
Valuation allowance	(520)	(77)
Total deferred income tax assets	1,754	930
Deferred income tax liabilities:		
Depreciation and amortization	(9,431)	(3,926)
Total deferred income tax liabilities	(9,431)	(3,926)
Net deferred income tax liabilities	$ (7,677)	$ (2,996)

The increase in net deferred income tax liabilities is mainly due to the Aetna Acquisition. As of December 31, 2018, the Company has net operating and capital loss carryovers of approximately $529 million . The Company considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies and recent results of operations. The Company established a valuation allowance of $520 million because it does not consider it more likely than not that these deferred tax assets will be recovered.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

In millions	**2018**	**2017**	**2016**
Beginning balance	$ 344	$ 307	$ 338
Additions based on tax positions related to the current year	1	62	68
Additions based on tax positions related to prior years	324	32	70
Reductions for tax positions of prior years	(5)	(28)	(100)
Expiration of statutes of limitation	(2)	(10)	(22)
Settlements	(1)	(19)	(47)
Ending balance	$ 661	$ 344	$ 307

The increase in the balance of unrecognized tax benefits in 2018 compared to 2017 and 2016 is mainly due to the Aetna Acquisition.

The Company and most of its subsidiaries are subject to United States federal income tax as well as income tax of numerous state and local jurisdictions. The Company is a participant in the Compliance Assurance Process, which is a program made available by the Internal Revenue Service ("IRS") to certain qualifying large taxpayers, under which participants work collaboratively with the IRS to identify and resolve potential tax issues through open, cooperative and transparent interaction prior to the annual filing of their federal income tax return. The IRS has substantially completed its examinations of the Company's 2015, 2016 and 2017 consolidated United States federal income tax returns. The IRS is currently examining the Company's 2018 consolidated United States federal income tax return.

The Company and its subsidiaries are also currently under income tax examinations by a number of state and local tax authorities. As of December 31, 2018 , no examination has resulted in any proposed adjustments that would result in a material change to the Company's results of operations, financial condition or liquidity.

Substantially all material state and local income tax matters have been concluded for fiscal years through 2012. Certain state exams are likely to be concluded and certain state statutes of limitations will lapse in 2019, but the change in the balance of the Company's uncertain tax positions is projected to be immaterial. In addition, it is reasonably possible that the Company's unrecognized tax benefits could change within the next twelve months due to the anticipated conclusion of various examinations with the IRS for various years. An estimate of the range of the possible change cannot be made at this time.

The Company records interest expense related to unrecognized tax benefits and penalties in the income tax provision. The Company accrued interest expense of approximately $19 million , $11 million and $10 million in 2018 , 2017 and 2016 , respectively. The Company had approximately $80 million and $34 million accrued for interest and penalties as of December 31, 2018 and 2017 , respectively.

As of December 31, 2018 , the total amount of unrecognized tax benefits that, if recognized, would affect the Company's effective income tax rate is approximately $597 million , after considering the federal benefit of state income taxes.

11. Stock Incentive Plans

The terms of the CVS Health 2017 Incentive Compensation Plan ("ICP") provide for grants of annual incentive and long-term performance awards to executive officers and other officers and employees of the Company or any subsidiary of the Company, as well as equity compensation to outside directors of CVS Health. Payment of such annual incentive and long-term performance awards will be in cash, stock, other awards or other property, at the discretion of the Management Planning and Development Committee (the "MP&D Committee") of the Company's Board of Directors (the "Board"). The ICP allows for a maximum of 32 million shares of CVS Health common stock to be reserved and available for grants. Prior to the acquisition of Aetna in 2018, the ICP was the only compensation plan under which the Company granted stock options, restricted stock and other stock-based awards to its employees, with the exception of the Company's Employee Stock Purchase Plan ("ESPP"). As of December 31, 2018 , there were approximately 26 million shares of CVS Health common stock available for future grants under the ICP.

As of the Aetna Acquisition Date, approximately 22 million shares of Aetna common stock subject to awards outstanding under the Amended Aetna Inc. 2010 Stock Incentive Plan ("SIP") were assumed by CVS Health. In addition, in accordance with the merger agreement, shares which were available for future issuance under the SIP were converted into approximately 32 million shares of CVS Health common stock reserved and available for issuance pursuant to future awards. As of December 31, 2018 , there were approximately 32 million shares of CVS Health common stock available for future grants under the SIP.

Stock-based Compensation Expense

Stock-based compensation is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period of the stock award (generally three to five years) using the straight-line method. The following table is a summary of stock-based compensation for each of the respective periods:

In millions	**2018**	**2017**	**2016**
Stock options and stock appreciation rights ("SARs") (1)(2)	$ 70	$ 65	$ 79
Restricted stock units and performance stock units (2)	210	169	143
Total stock-based compensation	$ 280	$ 234	$ 222

(1) Includes the ESPP.
(2) Stock-based compensation for the year ended December 31, 2018 includes $14 million and $27 million associated with accelerated vesting of SARs and restricted stock replacement awards, respectively, issued to Aetna employees who were terminated subsequent to the acquisition.

ESPP

The ESPP provides for the purchase of up to 30 million shares of common stock. Under the ESPP, beginning in 2016, eligible employees could purchase common stock at the end of each six month offering period at a purchase price equal to 90% of the lower of the fair market value on the first day or the last day of the offering period. Prior to 2016, the purchase price was equal

to 85% of the lower of the fair market value on the first day or the last day of the offering period. During 2018 , approximately two million shares of common stock were purchased under the provisions of the ESPP at an average price of $61.40 per share. As of December 31, 2018 , approximately 9 million shares of common stock were available for issuance under the ESPP.

The fair value of stock-based compensation associated with the ESPP is estimated on the date of grant (the first day of the six month offering period) using the Black-Scholes option pricing model.

The following table is a summary of the assumptions used to value the ESPP awards for each of the respective periods:

	2018	2017	2016
Dividend yield [1]	1.45%	1.24%	0.88%
Expected volatility [2]	28.02%	22.70%	20.64%
Risk-free interest rate [3]	1.87%	0.86%	0.45%
Expected life (in years) [4]	0.5	0.5	0.5
Weighted-average grant date fair value	$ 12.26	$ 13.01	$ 14.98

(1) The dividend yield is calculated based on semi-annual dividends paid and the fair market value of the Company's stock at the grant date.
(2) The expected volatility is based on the historical volatility of the Company's daily stock market prices over the previous six month period.
(3) The risk-free interest rate is based on the Treasury constant maturity interest rate whose term is consistent with the expected term of ESPP purchases (i.e., six months).
(4) The expected life is based on the semi-annual purchase period.

Restricted Stock Units and Performance Stock Units

The Company's restricted stock units and performance stock units are considered nonvested share awards and require no payment from the employee. Vesting of the Company's performance stock units is dependent upon the degree to which the Company achieves its performance goals, which are set at the time of grant by the MP&D Committee. For each restricted stock unit and performance share stock granted, employees receive one share of common stock, net of taxes, at the end of the vesting period. Compensation cost is recorded based on the market price of the Company's common stock on the grant date and is recognized on a straight-line basis over the requisite service period. On November 28, 2018, the Company completed the Aetna Acquisition. All unvested Aetna performance stock unit and restricted stock unit awards as of the Aetna Acquisition Date were converted into replacement CVS Health restricted stock awards.

As of December 31, 2018 , there was $491 million of total unrecognized compensation cost related to Company restricted stock units and performance stock units that are expected to vest. These costs are expected to be recognized over a weighted-average period of 2.01 years. The total fair value of restricted shares vested during 2018 , 2017 and 2016 was $262 million , $175 million and $218 million , respectively.

The following table is a summary of the restricted stock unit and performance stock unit activity for the year ended December 31, 2018 :

Units in thousands	Units	Weighted Average Grant Date Fair Value
Unvested at beginning of year	5,014	$ 86.92
Granted	10,185	$ 73.18
Vested	(3,757)	$ 68.85
Forfeited	(437)	$ 76.92
Unvested at end of year	11,005	$ 76.18

Stock Options and SARs

All stock option grants are awarded at fair value on the date of grant. The fair value of stock options is estimated using the Black-Scholes option pricing model and stock-based compensation is recognized on a straight-line basis over the requisite

service period. Stock options granted generally become exercisable over a four -year period from the grant date. Stock options generally expire seven years after the grant date.

On November 28, 2018, the Company completed the Aetna Acquisition. All unvested Aetna SARs outstanding as of the Aetna Acquisition Date were converted into replacement CVS Health SARs. The replacement SARs granted will be settled in CVS Health common stock, net of taxes, based on the appreciation of the stock price on the exercise date over the market price on the date of grant. The fair value of SARs is estimated using the Black-Scholes option pricing model and stock-based compensation is recognized on a straight-line basis over the requisite service period. SARs generally become exercisable over a three -year period from the grant date. SARs generally expire ten years after the grant date.

The following table is a summary of stock option and SAR activity that occurred for the years ended December 31, 2018 , 2017 and 2016 :

In millions	**2018**	**2017**	**2016**
Cash received from stock options exercised (including ESPP)	$ 242	$ 329	$ 296
Payments for taxes for net share settlement of equity awards	97	71	72
Intrinsic value of stock options and SARs exercised	79	176	244
Fair value of stock options and SARs vested	324	341	298

The fair value of each stock option and SAR is estimated using the Black-Scholes option pricing model based on the following assumptions at the time of grant:

	2018	**2017**	**2016**
Dividend yield [1]	2.76%	2.56%	1.62%
Expected volatility [2]	21.27%	18.39%	17.22%
Risk-free interest rate [3]	2.77%	1.77%	1.24%
Expected life (in years) [4]	4.8	4.1	4.2
Weighted-average grant date fair value	$ 24.55	$ 9.43	$ 13.00

(1) The dividend yield is based on annual dividends paid and the fair market value of the Company's stock at the grant date.
(2) The expected volatility is estimated using the Company's historical volatility over a period equal to the expected life of each option grant after adjustments for infrequent events such as stock splits.
(3) The risk-free interest rate is selected based on yields from U.S. Treasury zero-coupon issues with a remaining term equal to the expected term of the options being valued.
(4) The expected life represents the number of years the options are expected to be outstanding from grant date based on historical option holder exercise experience.

As of December 31, 2018 , unrecognized compensation expense related to unvested stock options and SARs totaled $58 million , which the Company expects to be recognized over a weighted-average period of 1.2 years. After considering anticipated forfeitures, the Company expects approximately 11 million of the unvested stock options and SARs to vest over the requisite service period.

The following table is a summary of the Company's stock option and SAR activity for the year ended December 31, 2018

In thousands, except weighted average exercise price and remaining contractual term	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2017	20,530	$ 75.32		
Granted	7,144	$ 51.06		
Exercised	(2,993)	$ 44.62		
Forfeited	(908)	$ 86.97		
Expired	(864)	$ 81.79		
Outstanding at December 31, 2018	22,909	$ 71.15	4.08	$ 165,245
Exercisable at December 31, 2018	11,436	$ 72.69	2.23	$ 73,784
Vested at December 31, 2018 and expected to vest in the future	22,532	$ 71.18	4.05	$ 163,596

12. Shareholders' Equity

Share Repurchases

The following share repurchase programs have been authorized by the Board:

In billions Authorization Date	Authorized	Remaining as of December 31, 2018
November 2, 2016 ("2016 Repurchase Program")	$ 15.0	$ 13.9
December 15, 2014 ("2014 Repurchase Program")	10.0	—

The share Repurchase Programs, each of which was effective immediately, permit the Company to effect repurchases from time to time through a combination of open market repurchases, privately negotiated transactions, accelerated share repurchase ("ASR") transactions, and/or other derivative transactions. The 2014 Repurchase Program was completed during the second quarter of 2017. The 2016 Repurchase Program can be modified or terminated by the Board at any time.

2018 Activity
During the year ended December 31, 2018 , the Company did not repurchase any shares of common stock pursuant to the 2016 Repurchase Program.

2017 Activity
Pursuant to the authorization under the 2014 Repurchase Program, in August 2016, the Company entered into two fixed dollar ASRs with Barclays Bank PLC ("Barclays") for a total of $3.6 billion . Upon payment of the $3.6 billion purchase price in January 2017, the Company received a number of shares of its common stock equal to 80% of the $3.6 billion notional amount of the ASRs or approximately 36.1 million shares, which were placed into treasury stock in January 2017. The ASRs were accounted for as an initial treasury stock transaction for $2.9 billion and a forward contract for $0.7 billion . In April 2017, the Company received an additional 9.9 million shares of common stock, representing the remaining 20% of the $3.6 billion notional amount of the ASRs, thereby concluding the ASRs. The additional 9.9 million shares of common stock delivered to the Company by Barclays were placed into treasury stock and the forward contract was reclassified from capital surplus to treasury stock in April 2017.

During the year ended December 31, 2017, the Company repurchased an aggregate of 55.4 million shares of common stock for approximately $4.4 billion under the 2014 and 2016 Repurchase Programs.

2016 Activity
Pursuant to the authorization under the 2014 Repurchase Program, in December 2015, the Company entered into a $725 million fixed dollar ASR with Barclays. Upon payment of the $725 million purchase price in December 2015, the Company received a number of shares of its common stock equal to 80% of the $725 million notional amount of the ASR or approximately 6.2

million shares, which were placed into treasury stock in December 2015. The ASR was accounted for as an initial treasury stock transaction for $580 million and a forward contract for $145 million . The forward contract was classified as an equity instrument and was recorded within capital surplus on the consolidated balance sheet. In January 2016, the Company received an additional 1.4 million shares of common stock, representing the remaining 20% of the $725 million notional amount of the ASR, thereby concluding the ASR. The additional 1.4 million shares of common stock delivered to the Company by Barclays were placed into treasury stock and the forward contract was reclassified from capital surplus to treasury stock in January 2016.

During the year ended December 31, 2016, the Company repurchased an aggregate of 47.5 million shares of common stock for approximately $4.5 billion under the 2014 Repurchase Program.

Dividends

The quarterly cash dividend declared by the Board was $0.50 per share in 2018 and 2017. CVS Health has paid cash dividends every quarter since becoming a public company. Future dividend payments will depend on the Company's earnings, capital requirements, financial condition and other factors considered relevant by the Board.

Regulatory Requirements

On November 28, 2018, the Company completed the Aetna Acquisition. Aetna's insurance business operations are conducted through subsidiaries that principally consist of HMOs and insurance companies. The Company's HMO and insurance subsidiaries report their financial statements in accordance with accounting practices prescribed by state regulatory authorities which may differ from GAAP.

The combined statutory net income for the year ended December 31, 2018 (which includes Aetna and its subsidiaries from November 28, 2018 to December 2018) was not material. The combined statutory capital and surplus at December 31, 2018 of the Company's insurance and HMO subsidiaries was approximately $11.1 billion . From November 28, 2018 to December 31, 2018 , the Company's insurance and HMO subsidiaries paid $909 million of gross dividends to the Company.

In addition to general state law restrictions on payments of dividends and other distributions to shareholders applicable to all corporations, HMOs and insurance companies are subject to further regulations that, among other things, may require those companies to maintain certain levels of equity and restrict the amount of dividends and other distributions that may be paid to their equity holders. In addition, in connection with the Aetna Acquisition, the Company made certain undertakings that require prior regulatory approval of dividends by certain of its HMOs and insurance companies. At December 31, 2018 , these amounts were as follows:

In millions		
Estimated minimum statutory surplus required by regulators	$	5,358
Investments on deposit with regulatory bodies		630
Estimated maximum dividend distributions permitted in 2019 without prior regulatory approval		584

Noncontrolling Interests

At December 31, 2018 , noncontrolling interests were $318 million primarily related to third party interests in the Company's operating entities. The noncontrolling entities' share is included in total shareholders ' equity.

13. Other Comprehensive Income (Loss)

Shareholders' equity included the following activity in accumulated other comprehensive income (loss) in 2018 , 2017 and 2016 :

	At December 31,		
In millions	**2018**	**2017**	**2016**
Net unrealized investment gains (losses):			
Beginning of year balance	$ —	$ —	$ —
Other comprehensive income before reclassifications *($132 pretax)*	97	—	—
Amounts reclassified from accumulated other comprehensive income *($1 pretax)* (1)	—	—	—
Other comprehensive income	97	—	—
End of year balance	97	—	—
Foreign currency translation adjustments:			
Beginning of year balance	(129)	(127)	(165)
Other comprehensive income (loss)	(29)	(2)	38
Other comprehensive income (loss)	(29)	(2)	38
End of year balance	(158)	(129)	(127)
Net cash flow hedges:			
Beginning of year balance	(15)	(5)	(7)
Adoption of new accounting standard (4)	(3)	—	—
Other comprehensive income (loss) before reclassifications *($465, $(18) and $0 pretax)*	344	(11)	—
Amounts reclassified from accumulated other comprehensive loss *($(19), $2 and $3 pretax)* (2)	(14)	1	2
Other comprehensive income (loss)	330	(10)	2
End of year balance	312	(15)	(5)
Pension and OPEB plans:			
Beginning of year balance	(21)	(173)	(186)
Adoption of new accounting standard (4)	(4)	—	—
Other comprehensive loss before reclassifications *($(178), $0 and $0 pretax)*	(132)	—	—
Amounts reclassified from accumulated other comprehensive loss *($11, $249 and $21 pretax)* (3)	8	152	13
Other comprehensive income (loss)	(124)	152	13
End of year balance	(149)	(21)	(173)
Total beginning of year accumulated other comprehensive loss	(165)	(305)	(358)
Adoption of new accounting standard (4)	(7)	—	—
Total other comprehensive income	274	140	53
Total end of year accumulated other comprehensive income (loss)	$ 102	$ (165)	$ (305)

(1) Amounts reclassified from accumulated other comprehensive income for debt securities are included in net investment income within the consolidated statements of operations.
(2) Amounts reclassified from accumulated other comprehensive loss for specifically identified cash flow hedges are included within interest expense in the consolidated statements of operations.
(3) Amounts reclassified from accumulated other comprehensive loss for specifically identified pension and other postretirement benefits are included in other (income) expense in the consolidated statements of operations.
(4) See Note 1 ''Significant Accounting Policies'' for additional information on the adoption of ASU 2018-02 during the first quarter of 2018.

14. Earnings Per Share

Earnings (loss) per share is computed using the two-class method. For periods in which the Company reports net income, diluted earnings per share is determined by using the weighted average number of common and dilutive common equivalent shares outstanding during the period, unless the effect is antidilutive. Due to the loss from continuing operations attributable to CVS Health in the year ended December 31, 2018 , 3 million potentially dilutive common equivalent shares were excluded from

the calculation of diluted earnings per share, as the impact of these shares was antidilutive. In addition, options to purchase 13.2 million shares of common stock were outstanding, but were excluded from the calculation of diluted earnings per share, for the year ended December 31, 2018 because the exercise prices of the options were greater than the average market price of the common shares and, therefore, the effect would be antidilutive. For the same reason, options to purchase 10.4 million and 6.7 million shares of common stock were outstanding, but were excluded from the calculation of diluted earnings per share, for the years ended December 31, 2017 and 2016 , respectively.

The following is a reconciliation of basic and diluted earnings (loss) per share from continuing operations for the years ended December 31:

In millions, except per share amounts	**2018**	**2017**	**2016**
Numerator for earnings per share calculation:			
Income (loss) from continuing operations	$ (596)	$ 6,631	$ 5,320
Income allocated to participating securities	(3)	(24)	(27)
Net (income) loss attributable to noncontrolling interests	2	(1)	(2)
Income (loss) from continuing operations attributable to CVS Health	$ (597)	$ 6,606	$ 5,291
Denominator for earnings per share calculation:			
Weighted average shares, basic	1,044	1,020	1,073
Effect of dilutive securities	—	4	6
Weighted average shares, diluted	1,044	1,024	1,079
Earnings (loss) per share from continuing operations:			
Basic	$ (0.57)	$ 6.48	$ 4.93
Diluted	$ (0.57)	$ 6.45	$ 4.91

15. Reinsurance

The Company utilizes reinsurance agreements primarily to reduce required capital and to facilitate the acquisition or disposition of certain insurance contracts. Ceded reinsurance agreements permit the Company to recover a portion of its losses from reinsurers, although they do not discharge the Company's primary liability as the direct insurer of the risks reinsured.

On November 30, 2018, Aetna completed the sale of its standalone Medicare Part D prescription drug plans to a subsidiary of WellCare, effective December 31, 2018. In connection with that sale, subsidiaries of WellCare and Aetna entered into reinsurance agreements under which WellCare has ceded to Aetna 100% of the insurance risk related to the divested standalone Medicare Part D prescription drug plans for the 2019 PDP plan year.

In January 2019, the Company entered into two four -year reinsurance agreements with an unrelated reinsurer that allowed it to reduce required capital and provided collateralized excess of loss reinsurance coverage on a portion of the Health Care Benefits segment's group Commercial Insured business.

Reinsurance recoverables (recorded as other current assets or other assets on the consolidated balance sheets) at December 31, 2018 were as follows:

In millions	
Reinsurer	
Hartford Life and Accident Insurance Company	$ 3,470
Lincoln Life & Annuity Company of New York	424
Constitution Life	320
VOYA Retirement Insurance and Annuity Company	186
All Other	141
Total	$ 4,541

Direct, assumed and ceded premiums earned for the year ended December 31, 2018 were as follows:

In millions		
Direct	$	8,365
Assumed		38
Ceded		(219)
Net premiums	$	8,184

The impact of reinsurance on benefit costs for the year ended December 31, 2018 was as follows:

In millions		
Direct	$	6,773
Assumed		32
Ceded		(211)
Net benefit costs	$	6,594

There is not a material difference between premiums on a written basis versus an earned basis.

The Company also has various agreements with unrelated reinsurers that do not qualify for reinsurance accounting under GAAP, and consequently are accounted for using deposit accounting. These contracts were entered into to reduce the risk of catastrophic loss which in turn reduces the Company's capital and surplus requirements for certain portions of its group term life insurance and group accidental death and dismemberment insurance businesses and certain portions of the Health Care Benefits segment's Medicare Advantage and group Commercial Insured businesses. Total deposit assets and liabilities related to reinsurance agreements that do not qualify for reinsurance accounting under GAAP were not material as of December 31, 2018 .

16. Commitments and Contingencies

Guarantees

The Company has the following significant guarantee arrangements at December 31, 2018 :

- ASC Claim Funding Accounts - The Company has arrangements with certain banks for the processing of claim payments for its ASC customers. The banks maintain accounts to fund claims of the Company's ASC customers. The customer is responsible for funding the amount paid by the bank each day. In these arrangements, the Company guarantees that the banks will not sustain losses if the responsible ASC customer does not properly fund its account. The aggregate maximum exposure under these arrangements is generally limited to $250 million . The Company can limit its exposure to these guarantees by suspending the payment of claims for ASC customers that have not adequately funded the amount paid by the bank.
- Separate Accounts Assets - Certain Separate Accounts assets associated with the large case pensions business in the Corporate/Other segment represent funds maintained as a contractual requirement to fund specific pension annuities that the Company has guaranteed. Minimum contractual obligations underlying the guaranteed benefits in these Separate Accounts were approximately $1.4 billion at December 31, 2018 . See Note 1 ''Significant Accounting Policies'' for additional information on Separate Accounts. Contract holders assume all investment and mortality risk and are required to maintain Separate Accounts balances at or above a specified level. The level of required funds is a function of the risk underlying the Separate Account's investment strategy. If contract holders do not maintain the required level of Separate Accounts assets to meet the annuity guarantees, the Company would establish an additional liability. Contract holders' balances in the Separate Accounts at December 31, 2018 exceeded the value of the guaranteed benefit obligation. As a result, the Company was not required to maintain any additional liability for its related guarantees at December 31, 2018 .

Lease Guarantees

Between 1995 and 1997, the Company sold or spun off a number of subsidiaries, including Bob's Stores and Linens 'n Things, each of which subsequently filed for bankruptcy, and Marshalls. In many cases, when a former subsidiary leased a store, the Company provided a guarantee of the former subsidiary's lease obligations. When the subsidiaries were disposed of and accounted for as discontinued operations, the Company's guarantees remained in place, although each initial purchaser agreed

to indemnify the Company for any lease obligations the Company was required to satisfy. If any of the purchasers or any of the former subsidiaries fail to make the required payments under a store lease, the Company could be required to satisfy those obligations. As of December 31, 2018, the Company guaranteed approximately 85 such store leases (excluding the lease guarantees related to Linens 'n Things, which have been recorded as a liability on the consolidated balance sheet), with the maximum remaining lease term extending through 2029.

Guaranty Fund Assessments, Market Stabilization and Other Non-Voluntary Risk Sharing Pools

Under guaranty fund laws existing in all states, insurers doing business in those states can be assessed (in most states up to prescribed limits) for certain obligations of insolvent insurance companies to policyholders and claimants. The life and health insurance guaranty associations in which the Company participates that operate under these laws respond to insolvencies of long-term care insurers as well as health insurers. The Company's assessments generally are based on a formula relating to the Company's health care premiums in the state compared to the premiums of other insurers. Certain states allow assessments to be recovered over time as offsets to premium taxes. Some states have similar laws relating to HMOs and/or other payors such as not-for-profit consumer-governed health plans established under the ACA.

In 2009, the Pennsylvania Insurance Commissioner placed long-term care insurer Penn Treaty Network America Insurance Company and one of its subsidiaries (collectively, "Penn Treaty") in rehabilitation, an intermediate action before insolvency, and subsequently petitioned a state court to convert the rehabilitation into a liquidation. Penn Treaty was placed in liquidation in March 2017. During the first quarter of 2017, Aetna recorded a discounted estimated liability and expense of $231 million pretax for its estimated share of future assessments by applicable life and health guaranty associations which reflects a 3.5% discount rate. The Company did not record an asset for expected premium tax offsets for its in force business at December 31, 2018, as the amount was not material. It is reasonably possible that in the future the Company may record a liability and expense relating to other insolvencies which could have a material adverse effect on the Company's results of operations, financial condition and cash flows. While historically the Company has ultimately recovered more than half of guaranty fund assessments through statutorily permitted premium tax offsets, significant increases in assessments could lead to legislative and/or regulatory actions that may limit future offsets.

HMOs in certain states in which the Company does business are subject to assessments, including market stabilization and other risk-sharing pools, for which the Company is assessed charges based on incurred claims, demographic membership mix and other factors. The Company establishes liabilities for these assessments based on applicable laws and regulations. In certain states, the ultimate assessments the Company pays are dependent upon the Company's experience relative to other entities subject to the assessment, and the ultimate liability is not known at the financial statement date. While the ultimate amount of the assessment is dependent upon the experience of all pool participants, the Company believes it has adequate reserves to cover such assessments.

The total guaranty fund assessments liability as of December 31, 2018 was $90 million and was recorded in accrued expenses on the consolidated balance sheet.

Litigation and Regulatory Proceedings

The Company is a party to numerous legal proceedings, investigations, audits and claims arising, for the most part, in the ordinary course of its businesses, including the matters described below. The Company records accruals for outstanding legal matters when it believes it is probable that a loss will be incurred and the amount can be reasonably estimated. The Company evaluates, on a quarterly basis, developments in legal matters that could affect the amount of any accrual and developments that would make a loss contingency both probable and reasonably estimable. If a loss contingency is not both probable and estimable, the Company does not establish an accrued liability. None of the Company's accruals for outstanding legal matters are material individually or in the aggregate to the Company's financial condition.

Except as otherwise noted, the Company cannot predict with certainty the timing or outcome of the legal matters described below, and the Company is unable to reasonably estimate a possible loss or range of possible loss in excess of amounts already accrued for these matters. It is reasonably possible that the outcome of such legal matters could be material to the Company.

Usual and Customary Litigation

The Company is named as a defendant in a number of litigations that allege that the Company's retail stores overcharged for prescription drugs by not providing the correct usual and customary charge.

State of Texas ex rel. *Myron Winkelman and Stephani Martinson,* et al. *v. CVS Health Corporation* (Travis County Texas District Court). In February 2012, the Attorney General of the State of Texas issued Civil Investigative Demands ("CIDs") to the Company and subsequently has issued a series of requests for documents and information in connection with its investigation concerning the CVS Health Savings Pass program and other pricing practices with respect to claims for reimbursement from the Texas Medicaid program. In January 2017, the Travis County Court unsealed a first amended *qui tam* petition filed in April 2014. The government has intervened in this case. The amended petition alleges the Company violated the Texas Medicaid Fraud Prevention Act by submitting false claims for reimbursement to the Texas Medicaid program by, among other things, failing to use the price available to members of the CVS Health Savings Pass program as the pharmacies' usual and customary price. The amended petition was unsealed following the Company's December 2016 filing of *CVS Pharmacy, Inc. v. Charles Smith,* et al. (Travis County Texas District Court), a declaratory judgment action against the State of Texas seeking a declaration that the prices charged to members of the CVS Health Savings Pass program do not constitute usual and customary prices under the applicable Medicaid regulation. In March 2018, the Travis County Court denied the State of Texas's request for temporary injunctive relief. The Company is defending itself against these claims.

Corcoran et al. *v. CVS Health Corporation* (U.S. District Court for the Northern District of California) and *Podgorny* et al. *v. CVS Health Corporation* (U.S. District Court for the Northern District of Illinois). These putative class actions were filed against the Company in July and September 2015. The cases were consolidated in the U.S. District Court for the Northern District of California. Plaintiffs seek damages and injunctive relief under the consumer protection statutes and common laws of certain states on behalf of a class of consumers who purchased certain prescription drugs. Several third-party payors filed similar putative class actions on behalf of payors captioned *Sheet Metal Workers Local No. 20 Welfare and Benefit Fund v. CVS Health Corp.* and *Plumbers Welfare Fund, Local 130 v. CVS Health Corporation* (both pending in the U.S. District Court for the District of Rhode Island) in February and August 2016. In all of these cases the plaintiffs allege the Company overcharged for certain prescription drugs by not submitting the price available to members of the CVS Health Savings Pass program as the pharmacy's usual and customary price. In the *Corcoran* case, the U.S. District Court granted summary judgment to CVS on plaintiffs' claims in their entirety and certified certain subclasses in September 2017. The *Corcoran* plaintiffs have appealed the District Court's decision to the Ninth Circuit. The *Sheet Metal Workers* plaintiffs have amended their complaint to assert a claim under the federal Racketeer Influenced and Corrupt Organizations Act ("RICO") premised on an alleged conspiracy between the Company and other PBMs. The Company is defending itself against these claims.

State of California ex rel. *Matthew Omlansky v. CVS Caremark Corporation* (Superior Court of the State of California, County of Sacramento). In April 2016, the California Superior Court unsealed a first amended *qui tam* complaint filed in July 2013. The government has declined to intervene in this case. The relator alleges that the Company submitted false claims for payment to the California Medicaid program in connection with reimbursement for drugs available through the CVS Health Savings Pass program as well as certain other generic drugs. The case has been stayed pending the relator's appeal of the judgment against him in a similar case against another retailer. The Company is defending itself against these claims.

State of Mississippi v. CVS Health Corporation, et al. (Chancery Court of DeSoto County, Mississippi, Third Judicial District). In July 2016, the Company was served with a complaint filed on behalf of the State of Mississippi alleging that CVS retail pharmacies in Mississippi submitted false claims for reimbursement to the Mississippi Medicaid program by not submitting the price available to members of the CVS Health Savings Pass program as the pharmacy's usual and customary price. The Company has responded to the complaint, moved for judgment on the pleadings, filed a counterclaim and moved the case to Mississippi Circuit Court. The Company's motion for judgment on the pleadings remains pending. The Company is defending itself against these claims.

Manufacturer's Rebate Litigation and Investigations

The Company is named as a defendant in a number of lawsuits and is subject to a number of investigations concerning manufacturer's rebates that the Company has negotiated.

Bewley, et al. v. *CVS Health Corporation* , et al. and *Prescott* , et al. v. *CVS Health Corporation* , et al. (both pending in the U.S. District Court for the Western District of Washington). These putative class actions were filed against the Company and other PBMs and manufacturers of glucagon kits (*Bewley*) and diabetes test strips (*Prescott*) in May 2017. Both cases allege that, by contracting for rebates with the manufacturers of these diabetes products, the Company and other PBMs caused list prices for these products to increase, thereby harming certain consumers. The plaintiffs' primary claims are made under federal antitrust laws, RICO, state unfair competition and consumer protection laws and the federal Employee Retirement Income Security Act of 1974 ("ERISA"). Both of these cases have been transferred to the U.S. District Court for the District of New Jersey on defendants' motions. The Company is defending itself against these claims.

Klein , et al. v. *Prime Therapeutics* , et al. (U.S. District Court for the District of Minnesota). This putative class action was filed against the Company and other PBMs in June 2017 on behalf of ERISA plan members who purchased and paid for EpiPen or EpiPen Jr. Plaintiffs allege that the PBMs are ERISA fiduciaries to plan members and have violated ERISA by allegedly causing higher inflated prices for EpiPens through the process of negotiating increased rebates from EpiPen manufacturer Mylan. This case has been consolidated with a similar matter and is now proceeding as *In re EpiPen ERISA Litigation* . The Company is defending itself against these claims.

In April 2017, the Company received a CID from the Attorney General of Washington requesting documents and information regarding pricing and rebates for insulin products in connection with a pending investigation into unfair and deceptive acts or practices regarding insulin pricing. The Office of the Attorney General of Washington has notified the Company that information provided in response to the Washington Attorney General's CID will be shared with the Attorneys General of California, Florida, Minnesota, New Mexico, the District of Columbia and Mississippi. In July 2017, the Company received a CID from the Attorney General of Minnesota requesting documents and information regarding pricing and rebates for insulin and epinephrine products in connection with a pending investigation into unfair and deceptive acts or practices regarding insulin and epinephrine pricing. The Company has been cooperating with the government and providing documents and information in response to these CIDs.

Controlled Substances Litigation, Audits and Subpoenas

In December 2017, the U.S. Judicial Panel on Multidistrict Litigation consolidated numerous cases filed against various defendants by plaintiffs such as counties, cities, hospitals, Indian tribes and third-party payors, alleging claims generally concerning the impacts of widespread opioid abuse. The consolidated multidistrict litigation captioned *In re National Prescription Opiate Litigation* (MDL No. 2804) is pending in the U.S. District Court for the Northern District of Ohio. This multidistrict litigation presumptively includes hundreds of relevant federal court cases that name the Company as a defendant. Fewer than 100 similar cases that name the Company as a defendant in some capacity are pending in state courts. The Company is defending itself against all such claims. Additionally, the Company has received subpoenas, CIDs and/or other requests for information regarding opioids from the Attorneys General of several states. The Company has been cooperating with the government with respect to these subpoenas, CIDs and other requests for information.

The Company routinely is audited by the United States Drug Enforcement Administration ("DEA"). For several of these audits, the Company is in discussions with the DEA and U.S. Attorney's Offices concerning allegations that the Company violated certain requirements of the Controlled Substance Act.

In September 2015, the DEA served Omnicare with an administrative subpoena. The subpoena seeks documents related to controlled substance policies, procedures and practices at eight Company pharmacy locations from May 2012 to the present. In September 2017, the DEA expanded the investigation to include an additional Company pharmacy location. The Company has been cooperating with the government and providing documents and witnesses in response to this subpoena.

Prescription Processing Investigations

In October 2015, Omnicare received a CID from the U.S. Attorney's Office for the Southern District of New York requesting documents and information concerning Omnicare's cycle fill process for assisted living facilities. The Company has been cooperating with the government and providing documents and information in response to this CID. In July 2017, Omnicare also received a subpoena from the California Department of Insurance requesting documents concerning similar subject matter. The Company has been cooperating with the California Department of Insurance and providing documents and information in response to this subpoena.

In December 2016, the Company received a CID from the U.S. Attorney's Office for the Northern District of New York requesting documents and information in connection with a federal False Claims Act investigation concerning whether the Company's retail pharmacies improperly submitted certain insulin claims to Part D of the Medicare program rather than Part B of the Medicare program. The Company has been cooperating with the government and providing documents and information in response to this CID.

In May 2017, the Company received a CID from the U.S. Attorney's Office for the Southern District of New York requesting documents and information concerning possible false claims submitted to Medicare in connection with reimbursements for prescription drugs under the Medicare Part D program. The Company has been cooperating with the government and providing documents and information in response to this CID.

Provider Proceedings

The Company is named as a defendant in purported class actions and individual lawsuits arising out of its practices related to the payment of claims for services rendered to its members by health care providers with whom the Company has a contract and with whom the Company does not have a contract ("out-of-network providers"). Among other things, these lawsuits allege that the Company paid too little to its health plan members and/or providers for these services and/or otherwise allege that the Company failed to timely or appropriately pay or administer claims and benefits (including the Company's post payment audit and collection practices and reductions in payments to providers due to sequestration). Other major health insurers are the subject of similar litigation or have settled similar litigation.

On October 28, 2016, Aetna was named as a respondent in an arbitration proceeding that had commenced as a lawsuit in Florida state court on August 25, 2015. The arbitration proceeding was brought by hospitals owned by HCA Holdings, Inc. with respect to Aetna's out-of-network benefit payment and administration practices in Florida relating to services and care rendered to members in Aetna's individual Public Exchange products from 2014 through 2016. Coverage under Aetna's individual Public Exchange products in Florida was not available after December 31, 2016. On October 15, 2018, the arbitrator awarded the claimant hospitals approximately $150 million . The Company is defending itself against the claimant hospitals' claims and has appealed the arbitrator's decision.

The Company also has received subpoenas and/or requests for documents and other information from, and been investigated by, attorneys general and other state and/or federal regulators, legislators and agencies relating to, and the Company is involved in other litigation regarding, its out-of-network benefit payment and administration practices. It is reasonably possible that others could initiate additional litigation or additional regulatory action against the Company with respect to its out-of-network benefit payment and/or administration practices.

CMS Actions

CMS regularly audits the Company's performance to determine its compliance with CMS's regulations and its contracts with CMS and to assess the quality of services it provides to Medicare beneficiaries. CMS uses various payment mechanisms to allocate and adjust premium payments to the Company's and other companies' Medicare plans by considering the applicable health status of Medicare members as supported by information prepared, maintained and provided by health care providers. The Company collects claim and encounter data from providers and generally relies on providers to appropriately code their submissions to the Company and document their medical records, including the diagnosis data submitted to the Company with claims. CMS pays increased premiums to Medicare Advantage plans and Medicare PDP plans for members who have certain medical conditions identified with specific diagnosis codes. Federal regulators review and audit the providers' medical records to determine whether those records support the related diagnosis codes that determine the members' health status and the resulting risk-adjusted premium payments to the Company. In that regard, CMS has instituted risk adjustment data validation ("RADV") audits of various Medicare Advantage plans, including certain of the Company's plans, to validate coding practices and supporting medical record documentation maintained by health care providers and the resulting risk adjusted premium payments to the plans. CMS may require the Company to refund premium payments if the Company's risk adjusted premiums are not properly supported by medical record data. The Office of Inspector General (the "OIG") also is auditing the Company's risk adjustment-related data and that of other companies. The Company expects CMS and the OIG to continue these types of audits.

In 2012, CMS revised its audit methodology for RADV audits to determine refunds payable by Medicare Advantage plans for contract year 2011 and forward. Under the revised methodology, among other things, CMS will project the error rate identified in the audit sample of approximately 200 members to all risk adjusted premium payments made under the contract being audited. For contract years prior to 2011, CMS did not project sample error rates to the entire contract. As a result, the revised methodology may increase the Company's exposure to premium refunds to CMS based on incomplete medical records maintained by providers. Since 2013, CMS has selected certain of the Company's Medicare Advantage contracts for various contract years for RADV audit. The Company is currently unable to predict which of its Medicare Advantage contracts will be selected for future audit, the amounts of any retroactive refunds of, or prospective adjustments to, Medicare Advantage premium payments made to the Company, the effect of any such refunds or adjustments on the actuarial soundness of the Company's Medicare Advantage bids, or whether any RADV audit findings would require the Company to change its method of estimating future premium revenue in future bid submissions to CMS or compromise premium assumptions made in the Company's bids for prior contract years, the current contract year or future contract years. Any premium or fee refunds or adjustments resulting from regulatory audits, whether as a result of RADV, Public Exchange related or other audits by CMS, the OIG, HHS or otherwise, including audits of the Company's minimum MLR rebates, methodology and/or reports, could be material and could adversely affect the Company's results of operations, financial condition and/or cash flows.

Medicare CIDs

The Company has received CIDs from the Civil Division of the DOJ in connection with a current investigation of the Company's patient chart review processes in connection with risk adjustment data submissions under Parts C and D of the Medicare program. The Company has been cooperating with the government and providing documents and information in response to these CIDs.

Tunney Act Proceeding

On October 10, 2018, the Company and Aetna entered into a consent decree with the DOJ that allowed CVS Health's proposed acquisition of Aetna to proceed, provided Aetna agreed to sell its individual standalone Medicare Part D prescription drug plans. As permitted by the asset preservation stipulation and order dated October 25, 2018, CVS Health completed its acquisition of Aetna on November 28, 2018, and Aetna completed the sale of such plans on November 30, 2018. The consent decree remains subject to the court approval process under the Antitrust Procedures and Penalties Act, which could result in a revision in or delay in receiving approval of the consent decree. The approval process is for the limited purpose of determining whether the consent decree is in the public interest. The Company believes that the consent decree will not have a material impact on the Company's results of operations, cash flows or financial condition.

Other Legal and Regulatory Proceedings .

The Company is also a party to other legal proceedings and is subject to government investigations, inquiries and audits and has received and is cooperating with the government in response to CIDs, subpoenas or similar process from various governmental agencies requesting information, all arising in the ordinary course of its businesses. These other legal proceedings include claims of or relating to bad faith, medical malpractice, non-compliance with state and federal regulatory regimes, marketing misconduct, failure to timely or appropriately pay or administer claims and benefits, provider network structure (including the use of performance-based networks and termination of provider contracts), rescission of insurance coverage, improper disclosure or use of personal information, anticompetitive practices, general contractual matters, product liability, intellectual property litigation and employment litigation. Some of these other legal proceedings are or are purported to be class actions or derivative claims. The Company is defending itself against the claims brought in these matters.

Awards to the Company and others of certain government contracts, particularly Medicaid contracts and contracts with government customers in the Company's Commercial Health Care Benefits segment, are subject to increasingly frequent protests by unsuccessful bidders. These protests may result in awards to the Company being reversed, delayed or modified. The loss or delay in implementation of any government contract could adversely affect the Company's results of operations. The Company will continue to defend contract awards it receives.

There also continues to be a heightened level of review and/or audit by regulatory authorities of, and increased litigation regarding, the Company's and the rest of the health care and related benefits industry's business and reporting practices, including premium rate increases, utilization management, development and application of medical policies, complaint, grievance and appeal processing, information privacy, provider network structure (including provider network adequacy, the use of performance-based networks and termination of provider contracts), provider directory accuracy, calculation of minimum medical loss ratios and/or payment of related rebates, delegated arrangements, rescission of insurance coverage, limited benefit health products, student health products, pharmacy benefit management practices (including the use of narrow networks and the placement of drugs in formulary tiers), sales practices, customer service practices, vendor oversight and claim payment practices (including payments to out-of-network providers).

As a leading national health care company, the Company regularly is the subject of government actions of the types described above. These government actions may prevent or delay the Company from implementing planned premium rate increases and may result, and have resulted, in restrictions on the Company's businesses, changes to or clarifications of the Company's business practices, retroactive adjustments to premiums, refunds or other payments to members, beneficiaries, states or the federal government, withholding of premium payments to the Company by government agencies, assessments of damages, civil or criminal fines or penalties, or other sanctions, including the possible suspension or loss of licensure and/or suspension or exclusion from participation in government programs.

The Company can give no assurance, however, that its businesses, financial condition, results of operations and/or cash flows will not be materially adversely affected, or that the Company will not be required to materially change its business practices, based on: (i) future enactment of new health care or other laws or regulations; (ii) the interpretation or application of existing laws or regulations as they may relate to one or more of the Company's businesses, one or more of the industries in which the

Company competes and/or the health care industry generally; (iii) pending or future federal or state governmental investigations of one or more of the Company's businesses, one or more of the industries in which the Company competes and/or the health care industry generally; (iv) pending or future government audits, investigations or enforcement actions against the Company; (v) adverse developments in any pending *qui tam* lawsuit against the Company, whether sealed or unsealed, or in any future *qui tam* lawsuit that may be filed against the Company; or (vi) adverse developments in pending or future legal proceedings against the Company or affecting one or more of the industries in which the Company competes and/or the health care industry generally.

17. Segment Reporting

The Company currently has three operating segments, Pharmacy Services, Retail/LTC and Health Care Benefits, as well as a Corporate/Other segment. The Company's segments maintain separate financial information for which results of operations are evaluated on a regular basis by the Company's chief operating decision maker in deciding how to allocate resources and in assessing performance.

The Company evaluates its Pharmacy Services, Retail/LTC and Health Care Benefits segments' performance based on operating income (loss) and operating income (loss) before the effect of (i) nonrecurring charges or gains and (ii) certain intersegment activities. The chief operating decision maker does not use total assets by segment to make decisions regarding resources. Therefore the total asset disclosure by segment has not been included. See Note 1 ''Significant Accounting Policies'' for a description of the Pharmacy Services, Retail/LTC, Health Care Benefits and Corporate/Other segments and related significant accounting policies.

In 2018 , 2017 and 2016 , approximately 9.8% , 12.3% and 11.7% , respectively, of the Company's consolidated revenues were from Aetna, a Pharmacy Services segment client. On November 28, 2018, the Company completed the Aetna Acquisition. Subsequent to the Aetna Acquisition, transactions with Aetna will continue to be reported within the Pharmacy Services segment, but are eliminated in the Company's consolidated financial statements.

Effective for the first quarter of 2019, the Company will realign the composition of its segments to correspond with changes to its operating model. As a result of this realignment, the Company's Silverscript PDP will move from the Pharmacy Services segment to the Health Care Benefits segment. In addition, the Company will move Aetna's mail order and specialty pharmacy operations from the Health Care Benefits segment to the Pharmacy Services segment.

In millions	Pharmacy Services [1][2]	Retail/ LTC [2]	Health Care Benefits [2]	Corporate/ Other	Intersegment Eliminations [2]	Consolidated Totals
2018:						
Revenues from customers	$ 134,115	$ 83,989	$ 5,504	$ 4	$ (29,693)	$ 193,919
Net investment income [3]	13	—	45	602	—	660

Total revenues [7]	119,965	81,100	—	18	(23,537)	177,546
Operating income (loss) [4][5][6][7]	4,570	7,437	—	(900)	(721)	10,386
Depreciation and amortization	714	1,642	—	119	—	2,475
Additions to property and equipment	295	1,732	—	252	—	2,279

(1) Total revenues of PSS include approximately $11.4 billion , $10.8 billion and $10.5 billion of Retail Co-Payments for 2018 , 2017 and 2016 , respectively. See Note 1 ‘‘Significant Accounting Policies’’ for additional information about Retail Co-Payments.

(2) Intersegment eliminations relate to intersegment revenue generating activities that occur between PSS and RLS for 2018, 2017 and 2016. Effective November 28, 2018, intersegment eliminations also relate to intersegment revenue generating activities that occur between HCBS, PSS and/or RLS.

(3) Corporate/Other segment net investment income for 2018 includes interest income of $536 million related to the proceeds of the $40 billion 2018 Notes. This amount is for the period prior to the close of the Aetna Acquisition, which occurred on November 28, 2018.

(4) RLS operating income for 2018 , 2017 and 2016 includes $7 million , $34 million and $281 million , respectively, of acquisition-related integration costs. The integration costs in 2018 and 2017 are related to the acquisition of Omnicare. The integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacy and clinic businesses of Target. RLS operating income for 2018 and 2017 also includes goodwill impairment charges of $6.1 billion related to the LTC reporting unit and $181 million related to the RxCrossroads reporting unit, respectively. In addition, RLS operating income for 2017 and 2016 includes $215 million and $34 million , respectively, of charges associated with store rationalization and asset impairment charges in connection with planned store closures related to the Company’s enterprise streamlining initiative. RLS operating income for 2018 also includes a $43 million loss on impairment of long-lived assets primarily related to the impairment of property and equipment and an $86 million loss on the divestiture of the Company’s RxCrossroads subsidiary.

(5) Corporate/Other segment operating loss for 2018 , 2017 and 2016 includes $485 million , $40 million and $10 million , respectively, of divestiture and acquisition-related transaction and integration costs included in operating expenses in the consolidated statements of operations. The transaction and integration costs in 2018 are related to the acquisitions of Aetna and Omnicare. The transaction and integration costs in 2017 are related to the acquisitions of Aetna and Omnicare and the divestiture of RxCrossroads. The integration costs in 2016 are related to the acquisitions of Omnicare and the pharmacy and clinic businesses of Target.

(6) PSS operating income for 2016 includes the reversal of an accrual of $88 million in connection with a legal settlement.

(7) Amounts revised to reflect the reclassification of interest income from interest expense, net to net investment income within total revenues to conform with insurance company presentation which increased total revenues and operating income by $21 million and $20 million in 2017 and 2016, respectively.

In conjunction with the Company's implementation of a new enterprise resource planning system in the first quarter of 2018, the Company changed the manner in which certain shared functional costs are allocated to its reportable segments.

Additionally, in connection with the Aetna Acquisition on November 28, 2018, the Company reclassified interest income from interest expense, net to net investment income within revenues to conform with insurance company presentation. Segment financial information for the years ended December 31, 2017 and 2016 , have been retrospectively adjusted to reflect this change to the Company's cost allocation methodology and net investment income presentation as shown below:

	Year Ended December 31, 2017

Long-term debt	$ 71,444	$ 22,181	$ 25,615	$ 26,267	$ 11,630
Total shareholders' equity	$ 58,543	$ 37,695	$ 36,834	$ 37,203	$ 37,963
Number of stores (at end of year)	9,967	9,846	9,750	9,681	7,866

(1) Effective for the fourth quarter of 2018, interest income was reclassified from interest expense, net to net investment income within revenues to conform with insurance company presentation. Accordingly, a retrospective reclassification of $21 million, $20 million, $21 million and $15 million was made for years ended December 31, 2017, 2016, 2015 and 2014, respectively, to increase revenues and increase interest expense.

(2) On November 28, 2018, the Company acquired Aetna. Aetna's operations are included in the Company's consolidated financial statements for the period from November 28, 2018 to December 31, 2018 and the period then ended. See Note 2 ''Acquisition of Aetna'' of Notes to Consolidated Financial Statements for additional information.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of CVS Health Corporation

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of CVS Health Corporation (the Company) as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income (loss), shareholders' equity and cash flows for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 28, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2007.

Boston, Massachusetts

Certification

I, Larry J. Merlo, President and Chief Executive Officer of CVS Health Corporation, certify that:

1. I have reviewed this annual report on Form 10-K of CVS Health Corporation;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Building a better working world

Report of Independent Auditors

The Board of Directors
DentaQuest USA Insurance Company, Inc.

We have audited the accompanying statutory-basis financial statements of DentaQuest USA Insurance Company, Inc., which comprise the statutory-basis statements of admitted assets, liabilities and capital and surplus as of December 31, 2016 and 2015, and the related statutory-basis statements of income and changes in capital and surplus, and cash flow for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with accounting practices prescribed or permitted by the State of Texas Department of Insurance. Management also is responsible for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Building a better working world

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 2 to the financial statements, to meet the requirements of the State of Texas the financial statements have been prepared in conformity with accounting practices prescribed or permitted by the State of Texas Department of Insurance, which practices differ from U.S. generally accepted accounting principles. The variances between such practices and U.S. generally accepted accounting principles are described in Note 2. The effects on the accompanying financial statements of these variances are not reasonably determinable but are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the effects of the matter described in the preceding paragraph, the statutory-basis financial statements referred to above do not present fairly, in conformity with U.S. generally accepted accounting principles, the financial position of DentaQuest USA Insurance Company, Inc. at December 31, 2016 and 2015, or the results of its operations and its cash flows for the years then ended.

Opinion on Statutory-Basis of Accounting

However, in our opinion, the statutory-basis financial statements referred to above present fairly, in all material respects, the financial position of DentaQuest USA Insurance Company, Inc. at December 31, 2016 and 2015, and the results of its operations and its cash flow for the years then ended in conformity with accounting practices prescribed or permitted by the State of Texas Department of Insurance.

DentaQuest USA Insurance Company, Inc.

Notes to Statutory-Basis Financial Statements

December 31, 2016

1. Nature of Operations

DentaQuest USA Insurance Company, Inc. (the Company) is a Texas Corporation that was organized on August 31, 2005, for general business purposes, including providing dental insurance services in the State of Texas. The Company holds licenses and meets minimum requirements to provide these services. The Company owns 100% interest of DSM USA Insurance Company, Inc. (DSM USA). DSM USA is a licensed life, accident and health insurer in thirty eight states and the District of Columbia.

The Company is a wholly owned subsidiary of DentaQuest, LLC (DQ LLC or the Parent), a Delaware limited liability company. The ultimate parent of DQ LLC is DentaQuest Group, Inc. (DentaQuest), incorporated under the laws of the state of Delaware, which has its principal place of business in Boston, Massachusetts. DentaQuest is an indirect, wholly owned subsidiary of Dental Service of Massachusetts, Inc. (DSM), a not-for-profit corporation incorporated under Chapter 176E of the Massachusetts General Laws.

On August 18, 2011, DSM entered into a Corporate Guarantee (the Guarantee) of the Managed Care Contract between the Company and the Texas Health and Human Services Commission (the HHSC Contract). Pursuant to the HHSC Contract, which became operational on March 1, 2012, with an initial term through August 31, 2015, and was subsequently extended through February 28, 2019, the Company provides dental benefits on a capitated basis to approximately one-half of the participants in the Texas Medicaid program and Children's Health Insurance Program (CHIP). Pursuant to the Guarantee, DSM unconditionally guarantees the Company's performance of all of its obligations under the HHSC Contract.

The Company has foreign licenses to operate as a health insurer in nine other states. Aside from the HHSC contract, the Company has several other contracts that provide dental benefits and administrative services only (ASO) in the states of Texas, Colorado, Georgia, Tennessee and Utah. During 2016, the Company also offered dental benefits to individuals through state marketplaces both directly, in the state of Texas, and through health plans, in the states of Texas Georgia, Louisiana, Massachusetts, and New Hampshire.

In addition, the Company had two assumed reinsurance contracts to provide dental services in the states of Tennessee and Utah. The Tennessee State Children's Health Insurance Plan (SCHIP) reinsurance agreement and the Utah CHIP reinsurance agreement ended on June 30, 2015 and September 30, 2015, respectively. Effective July 1, 2015 and October 1, 2015, respectively, the Company began covering enrollees of these programs on a direct basis.

On September 18, 2013, the Company purchased Significa Insurance Group, Inc., renamed DSM USA Insurance Company, Inc. (DSM USA) for $9,483,000. DSM USA is a licensed life, accident and health insurer in thirty eight states and the District of Columbia.

2. Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the Company.

Basis of Presentation

The accompanying statutory basis financial statements have been prepared in conformity with the accounting practices prescribed or permitted by the State of Texas Department of Insurance. The State of Texas has adopted the National Association of Insurance Commissioners (NAIC) statutory accounting practices (NAIC SAP) as the basis of its statutory accounting practice. NAIC SAP is a comprehensive basis of accounting other than the accounting principles generally accepted in the United State of America (GAAP). Prescribed statutory accounting practices include a variety of publications of the NAIC, as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed. The Company has no permitted accounting practices which vary from prescribed accounting practices.

The more significant variances from GAAP are as follows:

Investments in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or fair value based on their classification according to the Company's ability and intent to hold or trade the securities.

Certain assets designated as "non-admitted," including deferred federal income taxes in excess of certain statutory limits, furniture, fixtures and equipment, leasehold improvements, prepaid expenses, premium receivable balances aged over 90 days, pledged assets, intangibles on investments in subsidiaries, and other assets not specifically identified as an admitted asset within the Statements of Statutory Accounting Principles (SSAP) are excluded from the accompanying Statutory-Basis Statements of Admitted Assets, Liabilities and Capital and Surplus and are charged directly to surplus. Under GAAP, such assets are included in the balance sheets.

Under SSAP 41, *Surplus Notes*, interest shall not be recorded as a liability nor an expense until approval for payment of such interest has been granted by the commissioner of the state of domicile. All interest, including interest in arrears, shall be expensed in the Statements of

Income and Changes in Capital and Surplus when approved for payment. Unapproved interest shall not be reported through operations, shall not be represented as an addition to the principal or notional amount of the instrument, and shall not accrue further interest (i.e., interest on interest). Under GAAP, interest is expensed when incurred. Also, under GAAP, the surplus note is classified as a liability on the balance sheet, while under SSAP 41, the note is treated as a component of surplus.

The accounts and operations of the Company's subsidiary is not consolidated with the accounts and operations of the Company, as would be required under GAAP.

Admitted assets and the statements of cash flow under statutory accounting practices present cash and short-term investments, including investments with maturities of one year or less from the date of acquisition. Under GAAP, cash equivalents include securities maturing in three months or less from acquisition date.

Under statutory accounting, a statement of comprehensive income is not provided.

Under SSAP 101, *Income Taxes*, gross deferred tax assets are admitted in an amount equal to the sum of: (a) federal income taxes paid in prior years that can be recovered through loss carry-backs for existing temporary differences not to exceed three years from the balance sheet date; (b) the lesser of: (i.) the remaining gross deferred tax assets expected to be realized in a timeframe consistent with NAIC standards; or (ii.) a percentage of surplus consistent with NAIC standards, excluding any net deferred tax assets, electronic data processing (EDP) equipment and operating software; and (c) the amount of remaining gross deferred tax assets that can be offset against existing gross deferred tax liabilities. The remaining deferred tax assets are non-admitted.

The application of SSAP 101 also requires a company to evaluate the recoverability of deferred tax assets and to establish a statutory valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Under GAAP, a deferred tax asset is recorded for the amount of gross deferred tax assets expected to be realized in future years, and a valuation allowance is established for deferred tax assets not realizable.

The Company's estimated annual fee under Section 9010 of the Federal Affordable Care Act (ACA) for the subsequent year is segregated in special surplus under NAIC SAP as of December 31. Under GAAP, the fee is accrued ratably throughout the fee year.

The effects of the foregoing variances from GAAP on the accompanying statutory-basis financial statements have not been determined, but are presumed to be material.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Business Concentrations

The Company's operations are subject to regulatory, legal, environmental and other changes that may impact the state of Texas or the geographical region. Additionally, for the years ended December 31, 2016 and 2015, the Company generated 98% and 99% of its revenues from five contracts, respectively. For the year ended December 31, 2016, the largest contract represented 86% of total revenues, and the second largest represented 7%. For the year ended December 31, 2015, the largest contract represented 87% of total revenues, and the second largest represented 7%.

Investments

Invested assets are valued in accordance with the statutory basis of valuation prescribed by the NAIC. Bonds are generally stated at amortized cost. Bonds not backed by other loans are valued under the scientific (constant yield) method. Bonds with an NAIC rating of "3" or higher are carried at the lower of amortized cost or fair value.

Securities that experience declines in fair value are regularly evaluated for other-than-temporary impairments. The decision on whether to record other-than-temporary impairments is determined in part by management's assessment of the financial condition and prospects of a particular issuer, recoverability of the particular security as well as management's assertion of its intention to sell the security, and if it is more likely than not that the securities will be sold before recovery. For such securities, realized losses are recorded in the Statutory-Basis Statements Income and Changes in Capital and Surplus in net realized investment gains.

Investment income is recorded on an accrual basis. Realized capital gains or losses are recorded using the specific identification of investments sold.

Direct Premium Revenue Recognition

The Company earns revenue from short duration contracts for which the Company bears the underwriting risk. Premiums are billed in advance of the coverage month and recognized as revenue over the coverage month. Costs of acquiring and renewing business are charged to expense as incurred.

Assumed Reinsurance Premiums

The Company earns assumed reinsurance premium revenue from short duration contracts for which the Company assumes the underwriting risk. Costs of acquiring and renewing business are charged to expense as incurred.

For uncollected premium, after the calculation of non-admitted amounts, an evaluation is made of the remaining admitted assets in accordance with SSAP 5R, *Liabilities, Contingencies, and Impairment of Assets Revised*, to determine if there is a collectability issue. If it is probable that the balance is uncollectible, any uncollectible amount is written off and charged to income in the period the determination is made.

Management Service Revenue Recognition

Management service revenues are derived from arrangements to provide claims adjudication services and other administrative and management services for dental plans. Revenue for services is earned as services are rendered. The net management service revenue is included in general and administrative expenses on the Statutory Statements of Income and Changes in Capital and Surplus.

The Company does not incur underwriting risk associated with the management services business, which is billed monthly, on either a level monthly fee or paid claims basis, using a one-month lag.

Premium Deficiency Reserve

When the expected claim payments and administrative expenses exceed the premiums to be collected for the remainder of the contract period, a premium deficiency reserve is recorded for the difference, with a corresponding charge to operations. The Company does not consider anticipated investment income in its analysis. For purposes of determining whether a premium deficiency exists, contracts are grouped in a manner consistent with the Company's method of

acquiring, servicing, and measuring the profitability of such contracts. No premium deficiency reserve was required to be recorded in either 2016 or 2015.

Premiums and Management Service Revenue Receivables

All receivables outstanding are less than 90 days past due. Items greater than 90 days past due are considered non-admitted assets.

Risk Revenue

Risk revenue represents amounts paid to the Company on a capitated basis from other insurers in exchange for the provision of services for covered members of the counterparty. Risk revenue is recognized as revenue in the month for which the Company has agreed to provide services.

Service Provider Costs

The Company utilizes an established network of dentists to provide comprehensive services to its members. The Company compensates these providers on a fee-for-service basis based upon discounted fee schedules.

The cost of dental health services provided is accrued in the period in which it is provided to a member based in part on estimates, including an accrual for dental services incurred but not reported (IBNR).

The Company estimates the IBNR using standard actuarial methodologies, including historical experience and current utilization estimates, and incorporates the information included in a report from its consulting actuary. The estimates of unpaid claims can be lesser or greater than the amounts ultimately paid. Differences between estimated IBNR and actual amounts incurred are recorded as an increase/decrease to service provider costs in the Statutory-Basis Statements of Revenue and Expenses and Changes in Capital and Surplus in the period that they become known.

Risk Share Accrual

The Company records accruals for contracts that have risk sharing arrangements with clients. These accruals limit the maximum profitability of the Company in any one contract and are repaid to the client periodically based on the contract terms.

Income Taxes

The Company is included in the federal consolidated income tax return filed by DentaQuest. The method of allocation of tax among the members of the consolidated income tax return is determined by a tax-sharing agreement and is based on separate return calculations with current credit for net losses incurred by any one of the companies to the extent those losses are used in the consolidated return. Deferred income tax assets and liabilities are recognized for the differences between the financial and income tax reporting basis of assets and liabilities based on enacted tax rates and laws. However, the admissibility of any resulting deferred tax asset is subject to certain criteria in accordance with SSAP 101.

Statutory valuation allowances are provided if, based upon the weight of the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

Cash, Cash Equivalents, and Short-Term Investments

Cash and cash equivalents include all highly liquid investments with an original maturity date of three months or less. Short-term investments consist of liquid investments and include money market funds and U.S. Treasury securities with maturity dates of one year or less at the date of acquisition. Short-term investments are carried at amortized cost.

Restricted Cash and Securities on Deposit

The Company maintains certain restricted cash and securities to meet the requirement of the Texas Department of Insurance. These securities are accordingly classified as restricted and are carried at amortized cost. See Note 10.

Furniture, Fixtures, and Equipment

The Company owns certain furniture, fixtures, and equipment and depreciates these assets using the straight-line method. Depreciation expense recorded for 2016 and 2015 amounted to $415,000 and $691,000, respectively.

Advanced Premiums

Advanced premiums represent the unearned portion of premiums received in advance for dental service to be provided to members in the future.

Affordable Care Act Recoverable

The Company has received a signed agreement from its Medicaid state customer that commits them to reimburse the Company for their portion of the annual fee under Section 9010 of the Affordable Care Act (ACA fee), including the related gross-up for the effect of federal and state income taxes. The ACA fee recoverable is reflected on the Statutory-Basis Statements of Admitted Assets, Liabilities, and Capital and Surplus as an asset, and on the Statutory-Basis Statements of Income and Changes in Capital and Surplus reducing general and administrative expenses.

3. Non-admitted Assets

Certain assets, designated as non-admitted by the NAIC SAP, have been charged against capital and surplus and are summarized as follows:

(in thousands)	**2016**	**2015**
Premiums receivable	**$ 3,313**	$ 2,901
Furniture and equipment	**357**	611
Electronic data processing equipment	**356**	482
Investment in DSM USA- licenses intangible	**3,009**	3,009
Securities on deposit	**111**	111
Total non-admitted assets	**$ 7,146**	$ 7,114

4. Furniture, Fixtures, and Equipment

The estimated useful lives, cost and accumulated depreciation of furniture, fixtures and equipment at December 31, 2016, are as follows:

(in thousands)	Lives	2016	2015
Electronic data processing equipment	3–7 years	$ 1,997	$ 1,997
Computer hardware	3–7 years	173	173
Office furniture and equipment	5–10 years	559	559
Leasehold improvements	7–15 years	695	695
		3,424	3,424
Less: Accumulated depreciation		(2,611)	(2,196)
Less: Nonadmitted assets		(713)	(1,093)
		$ 100	$ 135

5. Unpaid Service Provider Costs

Activity is summarized as follows:

(in thousands)	2016	2015
Balance at beginning of year	$ 38,333	$ 25,959
Incurred related to:		
Current year	806,857	776,438
Prior year	(980)	5,680
	805,877	782,118
Paid related to:		
Current year	763,998	738,391
Prior year	36,978	31,353
	800,976	769,744
Balance at end of year	$ 43,234	$ 38,333

The Company recognizes changes in accounting estimates for claims incurred but unpaid as more experience is acquired or as additional information is obtained. Negative amounts reported above are due to incurred claims related to prior years being settled for amounts less than was originally estimated. Positive amounts reported above are for incurred claims related to prior year's results being settled for amounts higher than was originally estimated.

The above table excludes claims adjustment expenses and changes in accrued claims adjustment expenses, which are included in general and administrative expenses.

6. Investments

At December 31, 2016 the cost, fair values and gross unrealized gains and losses of investments are as follows:

(in thousands)	2016			
	Amortized Cost/Cost	**Gross Unrealized Gains**	**Gross Unrealized Losses**	**Fair Value**
U.S. Treasury, and obligations of U.S. government and agencies	**$ 16,346**	**$ 29**	**$ (374)**	**$ 16,001**
Residential mortgage securities	**17,909**	**89**	**(185)**	**17,813**
Commercial mortgage and ABS securities	**9,433**	**29**	**(62)**	**9,400**
Industrial and miscellaneous	**16,237**	**130**	**(163)**	**16,204**
Total bonds	**$ 59,925**	**$ 277**	**$ (784)**	**$ 59,418**

At December 31, 2015 the cost, fair values and gross unrealized gains and losses of investments are as follows:

(in thousands)	2015			
	Amortized Cost/Cost	**Gross Unrealized Gains**	**Gross Unrealized Losses**	**Fair Value**
U.S. Treasury, and obligations of U.S. government and agencies	$ 21,319	$ 49	$ (79)	$ 21,289
Residential mortgage securities	14,266	102	(59)	14,309
Commercial mortgage and ABS securities	12,265	19	(164)	12,120
Industrial and miscellaneous	16,137	17	(362)	15,792
Total bonds	$ 63,987	$ 187	$ (664)	$ 63,510

The amortized cost and fair value of bonds at December 31, 2016, by contractual maturity, are shown below. Actual maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
Due in one year or less	$ 1,258	$ 1,260
Due after one year through five years	15,363	15,387
Due after five years through ten years	11,534	11,455
Due after ten years	27,167	26,760
Due after one year for mortgage-backed securities	4,603	4,556
	$ 59,925	$ 59,418

Unrealized Holding Losses

Management believes that the gross unrealized losses reflected on the Company's bond portfolio as of December 31, 2016 were primarily the result of increases in market interest rates from the time of acquisition to the current period. These decreases in value are viewed as being temporary as the Company does not intend to sell the bonds and it is not more likely than not that the Company will be required to sell the investments before recovery of their recorded values, which may be maturity.

The following table shows the Company's unrealized losses and fair value by security type. Securities in a continuous loss position for more than 12 months are immaterial as of December 31, 2016 and 2015.

(in thousands)	2016		2015	
	Under 12 Months		Under 12 Months	
	Unrealized Losses	Fair Value of Investments With Unrealized Losses	Unrealized Losses	Fair Value of Investments With Unrealized Losses
U.S. Treasury and obligations of U.S. government, and agencies	**$ (374)**	**$ 11,506**	$ (79)	$ 14,891
Residential mortgage Securities	**(185)**	**10,212**	(59)	7,025
Commercial mortgage and ABS securities	**(62)**	**1,676**	(164)	9,712
Industrial and miscellaneous	**(163)**	**2,757**	(362)	13,407
	$ (784)	**$ 26,151**	$ (664)	$ 45,035

There were 142 and 262 securities in an unrealized loss position as of December 31, 2016 and 2015, respectively.

Gross gains of $462,000 and $146,000 and gross losses of $139,000 and $118,000 were realized on sales of bonds during 2016 and 2015, respectively.

Net investment income for December 31, 2016 consisted of the following:

(in thousands)	Year Ended December 31 2016	2015
Bond income	**$ 1,427**	$ 1,346
Investment expenses	**(929)**	(175)
	$ 498	$ 1,171

Fair Value

Assets and liabilities carried at fair value are to be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data such as quoted prices, interest rates, and yield curves.

Level 3: Inputs are unobservable data points that are not corroborated by market data.

The Company used the following methods and assumptions in estimating the fair value of financial instruments as well as the general classification of such financial instruments pursuant to the above fair value hierarchy:

Bonds

At each valuation date, the Company uses various valuation techniques to estimate the fair value of its bond portfolio. The primary method for valuing the Company's securities is through independent third-party valuation service providers. The evaluation and prioritization of these valuation sources is systematic and predetermined resulting in a single price for each financial instrument. The following describes the techniques generally used to determine the fair value of the Company's bonds by asset class:

U.S. Treasury and Obligations of U.S. Government and Agencies

U.S. Treasury and obligations of U.S. government and agencies securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal Home Loan Bank, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. As the fair values of the Company's U.S. Treasury securities are based on unadjusted market prices, they are classified within Level 1. The fair value of U.S. government agency securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, reported trades, bids, offers and credit spreads. Accordingly, the fair value of U.S. government agency securities is classified within Level 2.

Residential Mortgage-Backed Securities

The Company's portfolio of residential Mortgage-Backed Securities (MBS) are originated by both agencies and non-agencies, whose cash flows come from residential debt such as mortgages, home-equity loans and sub-prime mortgages. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Commercial Mortgage-Backed Securities

The Company's portfolio of commercial MBS are originated by both agencies and non-agencies, whose cash flows come from loans on commercial properties. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Asset-Backed Securities (ABS)

ABS include mostly investment-grade bonds backed by pools of loans, primarily automobile loan receivables, originated by a variety of financial institutions. The fair value of ABS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of ABS is primarily classified within Level 2.

Industrial and Miscellaneous

Industrial and miscellaneous securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair value of corporate and other securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, new issuances, issuer ratings, reported trades of identical or comparable securities, bids, offers and credit spreads. Accordingly, the fair value of corporate and other securities is primarily classified within Level 2.

Fair Value Classification

(in thousands)	Fair Value December 31, 2016	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Bonds	$ 59,418	$ 16,001	$ 43,417	$ –
Cash equivalents	2,831	2,831	–	–
Total assets	$ 62,249	$ 18,832	$ 43,417	$ –

(in thousands)	Fair Value December 31, 2015	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Bonds	$ 63,510	$ 21,289	$ 42,221	$ –
Cash equivalents	2,935	2,935	–	–
Total assets	$ 66,445	$ 24,224	$ 42,221	$ –

At December 31, 2016 and 2015, cash equivalents measured at fair value of $2,831,000 and $2,935,000, respectively, are included in unrestricted cash, cash equivalents and short-term investments of $72,017,000 and $86,261,000, respectively, on the Statutory-Basis Statements of Admitted Assets, Liabilities, and Capital and Surplus. The cash equivalents consist of short-term money market holdings.

No transfers between levels of the fair value hierarchy occurred in 2016 and 2015. The Company recognizes transfers between levels of the fair value hierarchy on an annual basis at the end of the year.

7. Income Taxes

Components of deferred tax assets (DTAs) and deferred tax liabilities (DTLs) are as follows:

(in thousands)	2016	2015	Changes
Gross deferred tax assets	**$ 1,506**	$ 1,533	$ (27)
Statutory valuation allowance adjustment	–	–	–
Adjusted gross deferred tax assets	**1,506**	1,533	(27)
Deferred tax assets non-admitted	–	–	–
Subtotal net admitted deferred tax asset	**1,506**	1,533	(27)
Deferred tax liabilities	–	255	(255)
Net deferred tax assets	**$ 1,506**	$ 1,278	$ 228

All the Company's deferred tax assets for the years ended December 31, 2016 and 2015, are ordinary in nature.

The admission calculation components are as follows:

(in thousands)	2016	2015	Changes
a. Federal income taxes paid in prior years recoverable through loss carrybacks	**$ 1,506**	$ 1,278	$ 228
b. Adjusted gross deferred tax assets expected to be realized (excluding the amount of deferred tax assets from (a) above) after application of the threshold limitation	–	–	–
i. Adjusted Gross Deferred Tax Assets Expected to be Realized Following the Balance Sheet Date	–	–	–
ii. Adjusted Gross Tax Assets Allowed per Limitation Threshold	**18,585**	18,028	557
c. Adjusted gross deferred tax assets (excluding the amount of deferred tax assets from (a) and (b) above) offset by gross deferred tax liabilities	–	255	(255)
d. Deferred tax assets admitted as the result of application of SSAP 101.	–	–	–
Total (a) + (b) + (c)	**$ 1,506**	$ 1,533	$ (27)

Other admissibility criteria are as follows:

(in thousands, except percentages)	2016	2015
Ratio percentage used to determine recovery period and threshold limitation amount	**402%**	403%
Amount of adjusted capital and surplus used to determine recovery period and threshold limitation in 2(b) above	**$ 123,899**	$ 120,188

The Company does not currently employ tax planning strategies to recognize the admission of deferred tax assets.

Current income taxes incurred consist of the following components:

(in thousands)	2016	2015
Current income tax expense	**$ 21,561**	$ 16,775
Federal income taxes incurred	**$ 21,561**	$ 16,775

There are no temporary differences for which a deferred tax liability has not been established.

The tax effects that give rise to significant portions of deferred tax assets are as follows:

(in thousands)	2016	2015	Changes
Deferred tax assets resulting from book/ tax differences in:			
Reserves	**$ 108**	$ 92	$ 16
Unearned premium	**–**	46	(46)
Fixed asset basis	**105**	144	(39)
Premiums receivable	**1,159**	1,015	144
Reserve for Provider Receivable	**94**	197	(103)
Other deferred assets	**40**	39	1
Total net deferred tax assets	**$ 1,506**	$ 1,533	$ (27)
Non-admitted deferred tax assets	**$ –**	$ –	$ –

The tax effects that give rise to significant portions of deferred tax liabilities are as follows:

(in thousands)	2016	2015	Change
Deferred tax liabilities resulting from book/tax differences in:			
Surplus note	**$ –**	$ 255	$ (255)
Total net deferred tax liabilities	**$ –**	$ 255	$ (255)

The change in net deferred income taxes is comprised of the following:

(in thousands)	December 31 2016	2015	Change
Total gross deferred tax assets	**$ 1,506**	$ 1,533	$ (27)
Total gross deferred tax liabilities	**–**	255	(255)
Net deferred tax assets	**$ 1,506**	$ 1,278	$ 228
Tax effect of unrealized capital gains			–
Change in net deferred income taxes			$ 228

The Company's provision for federal income taxes differs from the federal statutory tax rate of 35% applied to net income before federal taxes as follows:

(in thousands)	2016
Provision computed at statutory rate	$ 16,772
Change in non-admitted assets	(11)
Affordable Care Act assessment	4,556
Amortization	16
Total	$ 21,333
Federal income taxes incurred	$ 21,561
Change in deferred income taxes	(228)
Total statutory income taxes	$ 21,333

The Company does not have any protective tax deposits under section 6603 of the Internal Revenue Code.

The Company is included in a federal consolidated tax return and files a separate Georgia tax return. The Company does not have net operating loss carryforwards as of December 31, 2016. The members of the DentaQuest federal consolidated income tax return consisted of: DentaQuest Group, Inc., DentaQuest Management, Inc., DQ Massachusetts Business Trust, Pacific Dental Network, Inc., California Dental Network, Inc., DentaQuest of Florida, Inc., DSM USA Insurance Company, Inc. and the Company.

Below is a table of the earliest tax years that remain subject to examination by major jurisdictions:

Jurisdiction	Earliest Tax Year Subject to Examination
U.S. Federal	2013
Georgia	2013

All years including and subsequent to the above years remain open to examination by the taxing authorities. The amount of federal income taxes incurred and available for recoupment in the event of future net losses is $21,561,000 and $16,775,000 at December 31, 2016 and 2015, respectively.

8. Assumed Reinsurance

Effective March 20, 2008, the Company entered into an assumed reinsurance agreement with National Guardian Life Insurance Company (NGL). NGL provides dental coverage for eligible individuals enrolled in Coverkids, Tennessee's State Children's Health Insurance Plan (SCHIP). The Company assumes 100% of the risk and also pays NGL (via the Parent) a carrier fee, and reimburses premium taxes paid by NGL to the State of Tennessee. DentaQuest of Tennessee, LLC, an affiliated company, was contracted by NGL as the third party administrator for the arrangement and performs the services related to the contract for a 5% administration fee. For the year ended December 31, 2016 and 2015, the Company recorded carrier fees including amounts for premium taxes of zero and $593,000 respectively, in connection with the Coverkids contract. For the years ended December 31, 2016 and 2015, the Company recorded administrative fee expenses of zero and $623,000 respectively, in connection with the Coverkids contract.

The NGL reinsurance agreement for Tennessee's SCHIP program ended on June 30, 2015. Effective July 1, 2015 the Company began covering enrollees of these programs on a direct basis.

Effective July 1, 2010, the Company entered into an assumed reinsurance agreement with NGL to reinsure NGL for the Children's Health Insurance Program (CHIP) in the State of Utah, Department of Health. The Company assumes 100% of the risk and also pays NGL (via the Parent) a carrier fee, and agrees to reimburse premium taxes as determined by state regulation to NGL pursuant to the contract. DQ LLC, the Parent company, was contracted by NGL as the third party administrator of the agreement, and performs the services related to the contract for a 5% administration fee. For the year ended December 31, 2015, the Company recorded carrier fees of

$15,000, in connection with the Utah CHIP contract. For the years ended December 31, 2015, the Company recorded administrative fee expenses of $25,000, in connection with the Utah CHIP contract.

The NGL reinsurance agreement for Utah's CHIP program ended on September 30, 2015. Effective October 1, 2015, the Company began covering enrollees of these programs on a direct basis.

9. Related-Party Transactions

During 2016 and 2015, the allocated costs from DQ LLC amounted to $71,333,000 and $62,212,000, respectively. These costs were for information technology, facilities and equipment, human resources services, executive and managerial support, legal services, regulatory filing and compliance services, accounting services, cash management services, actuarial and underwriting services, sales and marketing services, enrollment services, claims processing services, billing and collection services, customer services, provider relations and credentialing services, and other additional services provided by DQ LLC to the Company. As of December 31, 2016 and 2015, the Company had an amount due to DQ LLC of $4,841,000 and $14,483,000, respectively.

As a result of the significant related party transactions, the Company's financial condition and results from operations may not necessarily be indicative of the financial condition or results from operations that would have occurred if the Company had been operating on a standalone basis.

10. Restricted Cash and Securities on Deposit

On February 2, 2007, DQ LLC (formerly co-borrower with DQV and DentaQuest, as Parent Guarantor) entered into a Credit Agreement with a group of lenders for a $200,000,000 revolving line of credit to meet the capital needs of the DentaQuest companies. DQ LLC, together with all of the subsidiaries of DentaQuest, including the Company, also entered into a Guarantee and Collateral Agreement (together with the Credit Agreement, the Credit Facility).

On June 24, 2014, DQ, LLC entered into an amendment to the Credit Agreement that extended the maturity date to the earlier of June 24, 2019, or the date DQ LLC terminates the Credit Agreement with appropriate notice and repayment.

Under the laws of the State of Texas, the Company is required to maintain a minimum surplus of $1,400,000. On May 14, 2010, the State of Texas Commissioner of Insurance issued a consent

order requiring the Company to make an initial additional deposit of approximately $7,100,000 into a restricted account with the Comptroller of Public Accounts for the State of Texas to satisfy certain of its statutory obligations. As of December 31, 2011, additional deposits had been made to this restricted account and the carrying value of these restricted securities was $14,500,000 at December 31, 2011. On April 13, 2012, another consent order was issued releasing the Company from most of the requirements of the previous order. The Company was given permission to withdraw approximately $7,250,000 of the deposit. On November 20, 2014 the Company made an additional deposit in the amount of $5,183,000 to replace securities on deposit which had matured during 2016, and now. As of December 31, 2016, the Company maintained a restricted account balance of $12,637,000 with the Texas Comptroller.

The Company also has two other restricted deposits. One deposit is with the State of Georgia Office of Commissioner of Insurance in the approximate amount of $100,000 in relation to the Company's extended license in the State of Georgia. The other deposit is maintained by the Commonwealth of Massachusetts, Department of State Treasurer in the approximate amount of $101,000 in relation to the Company's extended license in the Commonwealth of Massachusetts.

11. Capital and Surplus

The Company is required to file financial statements with the Texas Department of Insurance (TDI). Under the laws of the State of Texas, the Company is required to maintain a minimum surplus of $1,400,000. The Company met the required minimum capital and surplus requirements. Regulatory limits restrict dividends without approval of state insurance regulators.

In connection with discussions with the TDI regarding the pledging of the Company's stock in relation to an affiliated credit facility, on May 18, 2010, the Company issued a 3.25% $4,000,000 surplus debenture note to Dental Service of Massachusetts, Inc. This note was approved by the Commissioner of Insurance of Texas pursuant to Sections 427.053 and 823.102 of the Texas Insurance Code. The note was amended in 2015, to change the maturity date. The amended note matured on December 31, 2016. Interest accruing on this note must be approved by TDI prior to being released. As of December 31, 2016 and 2015, there was zero and $731,000 of unapproved interest on the note, respectively. The Company paid the principal and interest on November 18, 2016 in the amount of $4,847,000. On March 8, 2016, the Company paid $18,200,000 of dividends to its sole stockholder, DentaQuest, LLC.

12. Legal Proceedings

In the normal course of business, the Company is subject to various contingencies such as market conduct examinations, guaranty fund assessments and legal matters. Management does not anticipate any significant unaccrued claims or costs to result from any known or existing contingencies as of December 31, 2016 and 2015.

The Company's subsidiary, DQ USA is the subject of a suit in United States District Court of Tennessee. This matter arises out of DQ USA's decision not to include the plaintiff in the provider network established for the TennCare Medicaid program for the State of Tennessee. The plaintiff claims that DQ USA was a state actor and violated their right to free speech, due process and equal protection by not including them in the network. The plaintiff seeks compensatory damages, punitive damages and attorneys' fees. The matter went to trial on the issue of the plaintiff's right to free speech; the other claims were dismissed. A jury found for plaintiff, including compensatory and punitive damages. The Company disputes this claim. DQ USA's post-trial motions to set the jury verdict aside are currently pending. The Company has a liability policy which provides some insurance coverage. The Company's exposure ranges from $0 to approximately $15 million. In accordance with ASC 405, the Company has accrued $4 million.

13. Subsequent Events

The Company's management evaluated subsequent events through May 30, 2017, which is the date statutory-basis financial statements were available to be issued.

In 2017, the Company will again write premiums that will be subject to an annual fee under Section 9010 of the Federal ACA. The annual fee is allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2016, the Company has written health insurance subject to the ACA assessment, and expects to conduct health insurance business in 2017. However, the federal government has suspended the ACA

assessment for 2017, so the Company estimates its portion of the annual health insurance industry fee to be zero, and will not be payable on September 30, 2017.

(in thousands)	**2016**	**2015**
ACA fee assessment payable for upcoming year	**$ –**	$ 12,924
ACA fee assessment paid	**13,019**	12,784
Premium written subject to ACA 9010 assessment	**801,956**	755,705
Total Adjusted Capital before surplus adjustment	**125,404**	121,466
Authorized Control Level before surplus adjustment	**30,824**	29,843
Total Adjusted Capital after surplus adjustment	**125,404**	108,542
Authorized Control Level after surplus adjustment	**30,824**	29,843
Would reporting the ACA assessment as of December 31, 2016, have triggered an RBC action level?	**No**	No

Report of Independent Auditors on Supplementary Information

The Board of Directors of DentaQuest USA Insurance Company, Inc.

Our audits were conducted for the purpose of forming an opinion on the statutory-basis financial statements as a whole. The accompanying supplemental investment disclosures are presented to comply with the National Association of Insurance Commissioners' Annual Statement Instructions and the National Association of Insurance Commissioners' Accounting Practices and Procedures Manual and for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the statutory-basis financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

This report is intended solely for the information and use of the Company and state insurance departments to whose jurisdiction the Company is subject and is not intended to be and should not be used by anyone other than these specified parties.

Boston Properties	Bond	310,672	0.161%

DentaQuest USA Insurance Company, Inc.

Supplementary Schedule of Investment Risk Interrogatories (continued)

3. The Company's total admitted assets held in bonds and preferred stock by NAIC rating are:

Bonds and Short-Term Investments

NAIC Rating	Amount	Percentage of Total Admitted Assets
NAIC-1	$ 53,586,430	27.767%
NAIC-2	6,165,800	3.195%
NAIC-3	98,577	0.051%
NAIC-4	74,155	0.038%
NAIC-5	-	0.000%
NAIC-6	-	0.000%
	$ 59,924,962	

4. The Company has no assets held in foreign investments greater than 2.5% of the reporting entity's total admitted assets.

5. The Company has no aggregate foreign investment exposure categories by NAIC sovereign rating greater than 2.5% of reporting entity's total admitted assets.

6. The Company has no foreign investment exposures in a single country, categories by the country's NAIC sovereign rating greater than 2.5% of reporting entity's total admitted assets.

7. The Company has no unhedged foreign currency exposure.

8. The Company has no aggregate unhedged foreign currency exposure.

9. The Company has no unhedged foreign currency exposures to a single country.

10. The Company has no non-sovereign (i.e., non-governmental) foreign issues greater than 2.5% of total admitted assets.

11. The Company has no assets held in Canadian investments that are greater than 2.5% of the reporting entity's total admitted assets.

12. The Company has no admitted assets held in investments with contractual sales restrictions.

13. The Company has no investments in equity interests.

14. The Company has no assets held in nonaffiliated, privately placed equities that are greater than 2.5% of the reporting entity's total admitted assets.

15. The Company has no assets held in general partnership interests that are greater than 2.5% of the reporting entity's total admitted assets.

16. The Company has no mortgage loans greater than 2.5% of the reporting entity's total admitted assets.

17. The Company has no aggregate mortgage loans that are greater than 2.5% of the reporting entity's total admitted assets.

18. The Company has no assets held in real estate reported that are greater than 2.5% of the reporting entity's total admitted assets, excluding home office properties.

19. The Company has no assets held in investments held in mezzanine real estate loans greater than 2.5% of the reporting entity's total admitted assets.

20. The Company had no assets subject to security lending agreements, repurchase agreements, reverse repurchase agreements, dollar repurchase agreements, or dollar reverse repurchase agreements during 2016.

21. The Company had no warrants not attached to other financial instruments, options, caps, and floors during 2016.

22. The Company had no potential exposure for collars, swaps, and forwards during 2016.

23. The Company had no potential exposure for future contracts during 2016.

Building a better working world

Report of Independent Auditors

The Board of Directors
DentaQuest USA Insurance Company, Inc.

We have audited the accompanying statutory-basis financial statements of DentaQuest USA Insurance Company, Inc., which comprise the statutory-basis statements of admitted assets, liabilities and capital and surplus as of December 31, 2017 and 2016, and the related statements of income and changes in capital and surplus, and cash flow for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with accounting practices prescribed or permitted by the State of Texas Department of Insurance. Management also is responsible for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Building a better working world

Basis for Adverse Opinion on U.S. Generally Accepted Accounting Principles

As described in Note 2, to meet the requirements of the State of Texas the financial statements have been prepared in conformity with accounting practices prescribed or permitted by the State of Texas Department of Insurance, which practices differ from U.S. generally accepted accounting principles. The variances between such practices and U.S. generally accepted accounting principles are described in Note 2. The effects on the accompanying financial statements of these variances are not reasonably determinable but are presumed to be material.

Adverse Opinion on U.S. Generally Accepted Accounting Principles

In our opinion, because of the effects of the matter described in the preceding paragraph, the statutory-basis financial statements referred to above do not present fairly, in conformity with U.S. generally accepted accounting principles, the financial position of DentaQuest USA Insurance Company, Inc. at December 31, 2017 and 2016, or the results of its operations and its cash flows for the years then ended.

Opinion on Statutory-Basis of Accounting

However, in our opinion, the statutory-basis financial statements referred to above present fairly, in all material respects, the financial position of DentaQuest USA Insurance Company, Inc. at December 31, 2017 and 2016, and the results of its operations and its cash flows for the years then ended in conformity with accounting practices prescribed or permitted by the State of Texas Department of Insurance.

DentaQuest USA Insurance Company, Inc.

Notes to Statutory-Basis Financial Statements

December 31, 2017

1. Nature of Operations

DentaQuest USA Insurance Company, Inc. (the Company) is a Texas Corporation that was organized on August 31, 2005, for general business purposes, including providing dental insurance services in the State of Texas. The Company holds licenses and meets minimum requirements to provide these services.

The Company is a wholly owned subsidiary of DentaQuest, LLC (DQ LLC or the Parent), a Delaware limited liability company. The ultimate parent of DQ LLC is DentaQuest Group, Inc. (DentaQuest), incorporated under the laws of the state of Delaware, which has its principal place of business in Boston, Massachusetts. DentaQuest is an indirect, wholly owned subsidiary of Dental Service of Massachusetts, Inc. (DSM), a not-for-profit corporation incorporated under Chapter 176E of the Massachusetts General Laws.

On August 18, 2011, DSM entered into a Corporate Guarantee (the Guarantee) of the Managed Care Contract between the Company and the Texas Health and Human Services Commission (the HHSC Contract). Pursuant to the HHSC Contract, which became operational on March 1, 2012, with an initial term through August 31, 2015, and was subsequently extended through February 28, 2019, the Company provides dental benefits on a capitated basis to approximately one-half of the participants in the Texas Medicaid program and Children's Health Insurance Program (CHIP). Pursuant to the Guarantee, DSM unconditionally guarantees the Company's performance of all of its obligations under the HHSC Contract.

The Company has foreign licenses to operate as a health insurer in nine other states. Aside from the HHSC contract, the Company has several other contracts that provide dental benefits and administrative services only (ASO) in the states of Texas, Colorado, Georgia, Tennessee and Utah. During 2017, the Company also offered dental benefits to individuals through state marketplaces both directly, in the state of Texas, and through health plans, in the states of Texas Georgia, Louisiana, Massachusetts, and New Hampshire.

On September 18, 2013, the Company purchased Significa Insurance Group, Inc., renamed DSM USA Insurance Company, Inc. (DSM USA) for $9,483,000. DSM USA is a licensed life, accident and health insurer in thirty eight states and the District of Columbia. The Company owns 100% of DSM USA Insurance Company, Inc. (DSM USA). DSM USA is a licensed life, accident and health insurer in thirty eight states and the District of Columbia.

2. Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the Company.

Basis of Presentation

The accompanying statutory basis financial statements have been prepared in conformity with the accounting practices prescribed or permitted by the State of Texas Department of Insurance. The State of Texas has adopted the National Association of Insurance Commissioners (NAIC) statutory accounting practices (NAIC SAP) as the basis of its statutory accounting practice. NAIC SAP is a comprehensive basis of accounting other than the accounting principles generally accepted in the United State of America (GAAP). Prescribed statutory accounting practices include a variety of publications of the NAIC, as well as state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed. The Company has no permitted accounting practices which vary from prescribed accounting practices.

The more significant variances from GAAP are as follows:

Investments in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or fair value based on their classification according to the Company's ability and intent to hold or trade the securities.

Certain assets designated as "non-admitted," including deferred federal income taxes in excess of certain statutory limits, furniture, fixtures and equipment, leasehold improvements, prepaid expenses, premium receivable balances aged over 90 days, pledged assets, intangibles on investments in subsidiaries, and other assets not specifically identified as an admitted asset within the Statements of Statutory Accounting Principles (SSAP) are excluded from the accompanying Statutory-Basis Statements of Admitted Assets, Liabilities and Capital and Surplus and are charged directly to surplus. Under GAAP, such assets are included in the balance sheets.

Under SSAP 41, *Surplus Notes*, interest shall not be recorded as a liability nor an expense until approval for payment of such interest has been granted by the commissioner of the state of domicile. All interest, including interest in arrears, shall be expensed in the Statements of Income and Changes in Capital and Surplus when approved for payment. Unapproved interest shall not be reported through operations, shall not be represented as an addition to the principal or notional amount of the instrument, and shall not accrue further interest (i.e., interest on interest). Under GAAP, interest is expensed when incurred. Also, under GAAP, the surplus

note is classified as a liability on the balance sheet, while under SSAP 41, the note is treated as a component of surplus. The surplus note was repaid on November 22, 2016.

The accounts and operations of the Company's subsidiary is not consolidated with the accounts and operations of the Company, as would be required under GAAP.

Admitted assets and the statements of cash flow under statutory accounting practices present cash and short-term investments, including investments with maturities of one year or less from the date of acquisition. Under GAAP, cash equivalents include securities maturing in three months or less from acquisition date.

Under statutory accounting, a statement of comprehensive income is not provided.

Under SSAP 101, *Income Taxes*, gross deferred tax assets are admitted in an amount equal to the sum of: (a) federal income taxes paid in prior years that can be recovered through loss carry-backs for existing temporary differences not to exceed three years from the balance sheet date; (b) the lesser of: (i.) the remaining gross deferred tax assets expected to be realized in a timeframe consistent with NAIC standards; or (ii.) a percentage of surplus consistent with NAIC standards, excluding any net deferred tax assets, electronic data processing (EDP) equipment and operating software; and (c) the amount of remaining gross deferred tax assets that can be offset against existing gross deferred tax liabilities. The remaining deferred tax assets are non-admitted.

The application of SSAP 101 also requires a company to evaluate the recoverability of deferred tax assets and to establish a statutory valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Under GAAP, a deferred tax asset is recorded for the amount of gross deferred tax assets expected to be realized in future years, and a valuation allowance is established for deferred tax assets not realizable.

The Company's estimated annual fee under Section 9010 of the Federal Affordable Care Act (ACA) for the subsequent year is segregated in special surplus under NAIC SAP as of December 31. Under GAAP, the fee is accrued ratably throughout the fee year.

The effects of the foregoing variances from GAAP on the accompanying statutory-basis financial statements have not been determined, but are presumed to be material.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Business Concentrations

The Company's operations are subject to regulatory, legal, environmental and other changes that may impact the state of Texas or the geographical region. Additionally, for the years ended December 31, 2017 and 2016, the Company generated 99% and 98% of its revenues from five contracts, respectively. For the year ended December 31, 2017, the largest contract represented 92% of total revenues, and the second largest represented 2%. For the year ended December 31, 2016, the largest contract represented 86% of total revenues, and the second largest represented 7%.

Investments

Invested assets are valued in accordance with the statutory basis of valuation prescribed by the NAIC. Bonds are generally stated at amortized cost. Bonds not backed by other loans are valued under the scientific (constant yield) method. Bonds with an NAIC rating of "3" or higher are carried at the lower of amortized cost or fair value.

Securities that experience declines in fair value are regularly evaluated for other-than-temporary impairments. The decision on whether to record other-than-temporary impairments is determined in part by management's assessment of the financial condition and prospects of a particular issuer, recoverability of the particular security as well as management's assertion of its intention to sell the security, and if it is more likely than not that the securities will be sold before recovery. For such securities, realized losses are recorded in the Statutory-Basis Statements Income and Changes in Capital and Surplus in net realized investment gains.

Investment income is recorded on an accrual basis. Realized capital gains or losses are recorded using the specific identification of investments sold.

Direct Premium Revenue Recognition

The Company earns revenue from short duration contracts for which the Company bears the underwriting risk. Premiums are billed in advance of the coverage month and recognized as revenue over the coverage month. Costs of acquiring and renewing business are charged to expense as incurred.

Management Service Revenue Recognition

Management service revenues are derived from arrangements to provide claims adjudication services and other administrative and management services for dental plans. Revenue for services is earned as services are rendered. The net management service revenue is included in general and administrative expenses on the Statutory Statements of Income and Changes in Capital and Surplus.

The Company does not incur underwriting risk associated with the management services business, which is billed monthly, on either a level monthly fee or paid claims basis, using a one-month lag.

Premium Deficiency Reserve

When the expected claim payments and administrative expenses exceed the premiums to be collected for the remainder of the contract period, a premium deficiency reserve is recorded for the difference, with a corresponding charge to operations. The Company does not consider anticipated investment income in its analysis. For purposes of determining whether a premium deficiency exists, contracts are grouped in a manner consistent with the Company's method of acquiring, servicing, and measuring the profitability of such contracts. No premium deficiency reserve was required to be recorded in either 2017 or 2016.

Premiums and Management Service Revenue Receivables

All receivables outstanding are less than 90 days past due. Items greater than 90 days past due are considered non-admitted assets.

Prepaid Premium Tax

Prepaid Premium Tax represents the amount estimated and paid to the states, in which the Company recognizes insurance premium revenue. This estimate is calculated based on the premiums reported to the NAIC.

Risk Revenue

Risk revenue represents amounts paid to the Company on a capitated basis from other insurers in exchange for the provision of services for covered members of the counterparty. Risk revenue is recognized as revenue in the month for which the Company has agreed to provide services.

Service Provider Costs

The Company utilizes an established network of dentists to provide comprehensive services to its members. The Company compensates these providers on a fee-for-service basis based upon discounted fee schedules.

The cost of dental health services provided is accrued in the period in which it is provided to a member based in part on estimates, including an accrual for dental services incurred but not reported (IBNR).

The Company estimates the IBNR using standard actuarial methodologies, including historical experience and current utilization estimates, and incorporates the information included in a report from its consulting actuary. The estimates of unpaid claims can be lesser or greater than the amounts ultimately paid. Differences between estimated IBNR and actual amounts incurred are recorded as an increase/decrease to service provider costs in the Statutory-Basis Statements of Revenue and Expenses and Changes in Capital and Surplus in the period that they become known.

Risk Share Accrual

The Company records accruals for contracts that have risk sharing arrangements with clients. These accruals limit the maximum profitability of the Company in any one contract and are repaid to the client periodically based on the contract terms.

Income Taxes

The Company is included in the federal consolidated income tax return filed by DentaQuest. The method of allocation of tax among the members of the consolidated income tax return is determined by a tax-sharing agreement and is based on separate return calculations with current credit for net losses incurred by any one of the companies to the extent those losses are used in the consolidated return. Deferred income tax assets and liabilities are recognized for the differences between the financial and income tax reporting basis of assets and liabilities based on enacted tax rates and laws. However, the admissibility of any resulting deferred tax asset is subject to certain criteria in accordance with SSAP 101.

Statutory valuation allowances are provided if, based upon the weight of the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

Cash, Cash Equivalents, and Short-Term Investments

Cash and cash equivalents include all highly liquid investments with an original maturity date of three months or less. Short-term investments consist of liquid investments and include money market funds and U.S. Treasury securities with maturity dates of one year or less at the date of acquisition. Short-term investments are carried at amortized cost.

Restricted Cash and Securities on Deposit

The Company maintains certain restricted cash and securities to meet the requirement of the Texas Department of Insurance. These securities are accordingly classified as restricted and are carried at amortized cost. See Note 10.

Furniture, Fixtures, and Equipment

The Company owns certain furniture, fixtures, and equipment and depreciates these assets using the straight-line method. Depreciation expense recorded for 2017 and 2016 amounted to $362,000 and $415,000, respectively.

Advanced Premiums

Advanced premiums represent the unearned portion of premiums received in advance for dental service to be provided to members in the future.

Affordable Care Act Recoverable

The Company has received a signed agreement from its Medicaid state customer that commits them to reimburse the Company for their portion of the annual fee under Section 9010 of the Affordable Care Act (ACA fee), including the related gross-up for the effect of federal and state income taxes. The ACA fee recoverable is reflected on the Statutory-Basis Statements of Admitted Assets, Liabilities, and Capital and Surplus as an asset, and on the Statutory-Basis Statements of Income and Changes in Capital and Surplus reducing general and administrative expenses.

3. Non-admitted Assets

Certain assets, designated as non-admitted by the NAIC SAP, have been charged against capital and surplus and are summarized as follows:

(in thousands)	2017	2016
Premiums receivable	**$ 4,553**	$ 3,313
Furniture and equipment	**156**	357
Electronic data processing equipment	**230**	356
Investment in DSM USA- licenses intangible	**3,009**	3,009
Securities on deposit	**111**	111
Total non-admitted assets	**$ 8,059**	$ 7,146

4. Furniture, Fixtures, and Equipment

The estimated useful lives, cost and accumulated depreciation of furniture, fixtures and equipment at December 31, 2017, are as follows:

(in thousands)	Lives	2017	2016
Electronic data processing equipment	3–7 years	**$ 1,997**	$ 1,997
Computer hardware	3–7 years	**173**	173
Office furniture and equipment	5–10 years	**559**	559
Leasehold improvements	7–15 years	**695**	695
		3,424	3,424
Less: Accumulated depreciation		**(2,973)**	(2,611)
Less: Nonadmitted assets		**(386)**	(713)
		$ 65	$ 100

The accumulated depreciation relating to Electronic data processing equipment was $1,703,000 and $1,542,000 for 2017 and 2016, respectively.

5. Unpaid Service Provider Costs

Activity is summarized as follows:

(in thousands)	**2017**	**2016**
Balance at beginning of year	**$ 43,234**	$ 38,333
Incurred related to:		
Current year	**762,803**	806,857
Prior year	**(607)**	(980)
	762,196	805,877
Paid related to:		
Current year	**724,294**	763,998
Prior year	**41,048**	36,978
	765,342	800,976
Balance at end of year	**$ 40,088**	$ 43,234

The Company recognizes changes in accounting estimates for claims incurred but unpaid as more experience is acquired or as additional information is obtained. Negative amounts reported above are due to incurred claims related to prior years being settled for amounts less than was originally estimated. Positive amounts reported above are for incurred claims related to prior year's results being settled for amounts higher than was originally estimated.

The above table excludes claims adjustment expenses and changes in accrued claims adjustment expenses, which are included in general and administrative expenses.

6. Investments

At December 31, 2017 the cost, fair values and gross unrealized gains and losses of investments are as follows:

(in thousands)	2017			
	Amortized Cost/Cost	**Gross Unrealized Gains**	**Gross Unrealized Losses**	**Fair Value**
U.S. Treasury, and obligations of U.S. government and agencies	**$ 17,789**	**$ 102**	**$ (181)**	**$ 17,710**
Residential mortgage securities	**19,517**	**77**	**(189)**	**19,405**
Commercial mortgage and ABS securities	**7,375**	**27**	**(64)**	**7,338**
Industrial and miscellaneous	**19,068**	**419**	**(50)**	**19,437**
Total bonds	**$ 63,749**	**$ 625**	**$ (484)**	**$ 63,890**

At December 31, 2016 the cost, fair values and gross unrealized gains and losses of investments are as follows:

(in thousands)	2016			
	Amortized Cost/Cost	**Gross Unrealized Gains**	**Gross Unrealized Losses**	**Fair Value**
U.S. Treasury, and obligations of U.S. government and agencies	$ 16,346	$ 29	$ (374)	$ 16,001
Residential mortgage securities	17,909	89	(185)	17,813
Commercial mortgage and ABS securities	9,433	29	(62)	9,400
Industrial and miscellaneous	16,237	130	(163)	16,204
Total bonds	$ 59,925	$ 277	$ (784)	$ 59,418

The amortized cost and fair value of bonds at December 31, 2017, by contractual maturity, are shown below. Actual maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(in thousands)	Amortized Cost	Fair Value
Due in one year or less	$ 1,192	$ 1,191
Due after one year through five years	14,792	14,831
Due after five years through ten years	7,927	7,932
Due after ten years	12,946	13,193
Due after one year for mortgage-backed securities	26,892	26,743
	$ 63,749	$ 63,890

Unrealized Holding Losses

Management believes that the gross unrealized losses reflected on the Company's bond portfolio as of December 31, 2017 were primarily the result of increases in market interest rates from the time of acquisition to the current period. These decreases in value are viewed as being temporary as the Company does not intend to sell the bonds and it is not more likely than not that the Company will be required to sell the investments before recovery of their recorded values, which may be maturity.

The following table shows the Company's unrealized losses and fair value by security type. Securities in a continuous loss position for more than 12 months are immaterial as of December 31, 2017 and 2016.

(in thousands)	2017		2016	
	Unrealized Losses	Fair Value of Investments With Unrealized Losses	Unrealized Losses	Fair Value of Investments With Unrealized Losses
U.S. Treasury and obligations of U.S. government, and agencies	**$ (181)**	**$ 13,934**	$ (374)	$ 11,506
Residential mortgage Securities	**(189)**	**12,484**	(185)	10,212
Commercial mortgage and ABS securities	**(64)**	**4,595**	(62)	1,676
Industrial and miscellaneous	**(50)**	**6,482**	(163)	2,757
	$ (484)	**$ 37,495**	$ (784)	$ 26,151

There were 217 and 142 securities in an unrealized loss position as of December 31, 2017 and 2016, respectively.

Gross gains of $135,000 and $462,000 and gross losses of $113,000 and $139,000 were realized on sales of bonds during 2017 and 2016, respectively.

Net investment income for December 31, 2017 consisted of the following:

(in thousands)	Year Ended December 31 2017	2016
Bond income	**$ 1,629**	$ 1,427
Investment expenses	**(241)**	(929)
	$ 1,388	$ 498

Fair Value

Assets and liabilities carried at fair value are to be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data such as quoted prices, interest rates, and yield curves.

Level 3: Inputs are unobservable data points that are not corroborated by market data.

The Company used the following methods and assumptions in estimating the fair value of financial instruments as well as the general classification of such financial instruments pursuant to the above fair value hierarchy:

Bonds

At each valuation date, the Company uses various valuation techniques to estimate the fair value of its bond portfolio. The primary method for valuing the Company's securities is through independent third-party valuation service providers. The evaluation and prioritization of these valuation sources is systematic and predetermined resulting in a single price for each financial

instrument. The following describes the techniques generally used to determine the fair value of the Company's bonds by asset class:

U.S. Treasury and Obligations of U.S. Government and Agencies

U.S. Treasury and obligations of U.S. government and agencies securities consist primarily of bonds issued by the U.S. Treasury and mortgage pass-through agencies such as the Federal Home Loan Bank, the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. As the fair values of the Company's U.S. Treasury securities are based on unadjusted market prices, they are classified within Level 1. The fair value of U.S. government agency securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, reported trades, bids, offers and credit spreads. Accordingly, the fair value of U.S. government agency securities is classified within Level 2.

Residential Mortgage-Backed Securities

The Company's portfolio of residential Mortgage-Backed Securities (MBS) are originated by both agencies and non-agencies, whose cash flows come from residential debt such as mortgages, home-equity loans and sub-prime mortgages. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Commercial Mortgage-Backed Securities

The Company's portfolio of commercial MBS are originated by both agencies and non-agencies, whose cash flows come from loans on commercial properties. The fair value of MBS is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of MBS is primarily classified within Level 2.

Asset-Backed Securities (ABS)

ABS include mostly investment-grade bonds backed by pools of loans, primarily automobile loan receivables, originated by a variety of financial institutions. The fair value of ABS is generally determined using observable market inputs that include quoted prices for identical or similar assets

in markets that are not active, benchmark yields, contractual cash flows, prepayment speeds, collateral performance and credit spreads. Accordingly, the fair value of ABS is primarily classified within Level 2.

Industrial and Miscellaneous

Industrial and miscellaneous securities consist primarily of investment-grade debt of a wide variety of corporate issuers and industries. The fair value of corporate and other securities is generally determined using observable market inputs that include quoted prices for identical or similar assets in markets that are not active, benchmark yields, new issuances, issuer ratings, reported trades of identical or comparable securities, bids, offers and credit spreads. Accordingly, the fair value of corporate and other securities is primarily classified within Level 2.

Fair Value Classification

(in thousands)	**Fair Value December 31, 2017**	**Quoted Prices in Active Markets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Assets				
Bonds	**$ 63,890**	**$ 17,710**	**$ 46,180**	**$ –**
Cash equivalents	**1,339**	**1,339**	**–**	**–**
Total assets	**$ 65,229**	**$ 19,049**	**$ 46,180**	**$ –**

(in thousands)	**Fair Value December 31, 2016**	**Quoted Prices in Active Markets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Assets				
Bonds	$ 59,418	$ 16,001	$ 43,417	$ –
Cash equivalents	2,831	2,831	–	–
Total assets	$ 62,249	$ 18,832	$ 43,417	$ –

At December 31, 2017 and 2016, cash equivalents measured at fair value of $1,339,000 and $2,831,000, respectively, are included in unrestricted cash, cash equivalents and short-term investments of $63,411,000 and $72,017,000, respectively, on the Statutory-Basis Statements of Admitted Assets, Liabilities, and Capital and Surplus. The cash equivalents consist of short-term money market holdings.

No transfers between levels of the fair value hierarchy occurred in 2017 and 2016. The Company recognizes transfers between levels of the fair value hierarchy on an annual basis at the end of the year.

7. Income Taxes

Components of deferred tax assets (DTAs) and deferred tax liabilities (DTLs) are as follows:

(in thousands)	2017	2016	Changes
Gross deferred tax assets	**$ 1,159**	$ 1,506	$ (347)
Statutory valuation allowance adjustment	–	–	–
Adjusted gross deferred tax assets	**1,159**	1,506	(347)
Deferred tax assets non-admitted	–	–	–
Subtotal net admitted deferred tax asset	**1,159**	1,506	(347)
Deferred tax liabilities	–	–	–
Net deferred tax assets	**$ 1,159**	$ 1,506	$ (347)

All the Company's deferred tax assets for the years ended December 31, 2017 and 2016, are ordinary in nature.

The admission calculation components are as follows:

(in thousands)	2017	2016	Changes
a. Federal income taxes paid in prior years recoverable through loss carrybacks	**$ 1,159**	$ 1,506	$ (347)
b. Adjusted gross deferred tax assets expected to be realized (excluding the amount of deferred tax assets from (a) above) after application of the threshold limitation	–	–	–
i. Adjusted Gross Deferred Tax Assets Expected to be Realized Following the Balance Sheet Date	–	–	–
ii. Adjusted Gross Tax Assets Allowed per Limitation Threshold	**17,452**	18,585	(1,133)
c. Adjusted gross deferred tax assets (excluding the amount of deferred tax assets from (a) and (b) above) offset by gross deferred tax liabilities	–	–	–
d. Deferred tax assets admitted as the result of application of SSAP 101.	–	–	–
Total (a) + (b) + (c)	**$ 1,159**	$ 1,506	$ (347)

Other admissibility criteria are as follows:

(in thousands, except percentages)	2017	2016
Ratio percentage used to determine recovery period and threshold limitation amount	**399%**	402%
Amount of adjusted capital and surplus used to determine recovery period and threshold limitation in 2(b) above	**$ 116,347**	$ 123,899

The Company does not currently employ tax planning strategies to recognize the admission of deferred tax assets.

Current income taxes incurred consist of the following components:

(in thousands)	2017	2016
Current income tax expense	**$ 10,700**	$ 21,561
Federal income taxes incurred	**$ 10,700**	$ 21,561

There are no temporary differences for which a deferred tax liability has not been established.

The tax effects that give rise to significant portions of deferred tax assets are as follows:

(in thousands)	2017	2016	Changes
Deferred tax assets resulting from book/ tax differences in:			
Reserves	**$ 73**	$ 108	$ (35)
Unearned premium	**12**	–	12
Fixed asset basis	**46**	105	(59)
Premiums receivable	**957**	1,159	(202)
Reserve for Provider Receivable	**48**	94	(46)
Other deferred assets	**23**	40	(17)
Total net deferred tax assets	**$ 1,159**	$ 1,506	$ (347)
Non-admitted deferred tax assets	**$ –**	$ –	$ –

The tax effects that give rise to significant portions of deferred tax liabilities are as follows:

(in thousands)	2017	2016	Change
Deferred tax liabilities resulting from book/tax differences in:			
Surplus note	**$ –**	$ –	$ –
Total net deferred tax liabilities	**$ –**	$ –	$ –

The change in net deferred income taxes is comprised of the following:

(in thousands)	December 31 2017	2016	Change
Total gross deferred tax assets	**$ 1,159**	$ 1,506	$ (347)
Total gross deferred tax liabilities	–	–	–
Net deferred tax assets	**$ 1,159**	$ 1,506	$ (347)
Tax effect of unrealized capital gains			–
Change in net deferred income taxes			$ (347)

The Company's provision for federal income taxes differs from the federal statutory tax rate of 35% applied to net income before federal taxes as follows:

(in thousands)	
Provision computed at statutory rate	$ 10,578
Change in non-admitted assets	(320)
Change in effective tax rate effect	773
Amortization	16
Total	$ 11,047
Federal income taxes incurred	$ 10,700
Change in deferred income taxes	347
Total statutory income taxes	$ 11,047

The Company does not have any protective tax deposits under section 6603 of the Internal Revenue Code.

With the enactment of the Tax Cuts and Jobs Act (the "Act") on December 22, 2017, the Company has used the best available information in the recording of its tax provisions reflected in the 2017 financial statements. In 2018, the Company will adjust its provisional amounts as further regulatory and IRS guidance emerges. The revaluation of deferred tax assets and liabilities from 35% to 21% resulted in the following impacts: Change in Net Unrealized Capital Gains (Losses) less Capital Gains Tax, $0, Change in Net Deferred Income Tax, $773,000, and Change in nonadmitted, ($320,000).

The Company is included in a federal consolidated tax return and files a separate Georgia tax return. The Company does not have net operating loss carryforwards as of December 31, 2017. The members of the DentaQuest federal consolidated income tax return consisted of: DentaQuest Group, Inc., DentaQuest Management, Inc., DQ Massachusetts Business Trust, Pacific Dental Network, Inc., California Dental Network, Inc., DentaQuest of Florida, Inc., DSM USA Insurance Company, Inc. and the Company.

Below is a table of the earliest tax years that remain subject to examination by major jurisdictions:

Jurisdiction	Earliest Tax Year Subject to Examination
U.S. Federal	2014
Georgia	2014

All years including and subsequent to the above years remain open to examination by the taxing authorities. The amount of federal income taxes incurred and available for recoupment in the event of future net losses is $10,700,000 and $21,561,000 at December 31, 2017 and 2016, respectively.

8. Uninsured Plans

The gain from Administrative Services Only (ASO) uninsured plans was as follows:

(in thousands)	Year Ended December 31 2017	2016
Net reimbursement for administrative expenses (including in excess of actual expenses)	**$ 21,751**	$ 19,462
Total net other expenses (including interest paid or received from plans)	**(23,584)**	(21,065)
Net (loss) gain from operations	**(1,833)**	(1,603)
Total claim payment volume	**$ 504,107**	$ 506,646

9. Related-Party Transactions

During 2017 and 2016, the allocated costs from DQ LLC amounted to $68,131,000 and $71,333,000, respectively. These costs were for information technology, facilities and equipment, human resources services, executive and managerial support, legal services, regulatory filing and compliance services, accounting services, cash management services, actuarial and underwriting services, sales and marketing services, enrollment services, claims processing services, billing and collection services, customer services, provider relations and credentialing services, and other additional services provided by DQ LLC to the Company. As of December 31, 2017 and 2016, the Company had an amount due to DQ LLC of $6,013,000 and $4,841,000, respectively.

As a result of the significant related party transactions, the Company's financial condition and results from operations may not necessarily be indicative of the financial condition or results from operations that would have occurred if the Company had been operating on a standalone basis.

10. Restricted Cash and Securities on Deposit

On February 2, 2007, DQ LLC (formerly co-borrower with DQV and DentaQuest, as Parent Guarantor) entered into a Credit Agreement with a group of lenders for a $200,000,000 revolving line of credit to meet the capital needs of the DentaQuest companies. DQ LLC, together with all of the subsidiaries of DentaQuest, including the Company, also entered into a Guarantee and Collateral Agreement (together with the Credit Agreement, the Credit Facility).

On June 24, 2014, DQ, LLC entered into an amendment to the Credit Agreement that extended the maturity date to the earlier of June 24, 2019, or the date DQ LLC terminates the Credit Agreement with appropriate notice and repayment.

Under the laws of the State of Texas, the Company is required to maintain a minimum surplus of $1,400,000. As of December 31, 2017, the Company maintained a restricted account balance of $12,433,000 with the Texas Comptroller.

The Company also has two other restricted deposits. One deposit is with the State of Georgia Office of Commissioner of Insurance in the approximate amount of $100,000 in relation to the Company's extended license in the State of Georgia. The other deposit is maintained by the Commonwealth of Massachusetts, Department of State Treasurer in the approximate amount of $101,000 in relation to the Company's extended license in the Commonwealth of Massachusetts.

11. Capital and Surplus

The Company is required to file financial statements with the Texas Department of Insurance (TDI). Under the laws of the State of Texas, the Company is required to maintain a minimum surplus of $1,400,000. The Company met the required minimum capital and surplus requirements. Regulatory limits restrict dividends without approval of state insurance regulators.

In connection with discussions with the TDI regarding the pledging of the Company's stock in relation to an affiliated credit facility, on May 18, 2010, the Company issued a 3.25% $4,000,000 surplus debenture note to Dental Service of Massachusetts, Inc. This note was approved by the Commissioner of Insurance of Texas pursuant to Sections 427.053 and 823.102 of the Texas Insurance Code. The note was amended in 2015, to change the maturity date. The amended note matured on December 31, 2016. Interest accruing on this note must be approved by TDI prior to being released. The Company paid the principal and interest on November 18, 2016 in the amount of $4,847,000. On March 8, 2016, the Company paid $18,200,000 of dividends to its sole stockholder, DentaQuest, LLC and on March 10, 2017, the Company paid $26,000,000 to DentaQuest, LLC.

12. Legal Proceedings

In the normal course of business, the Company is subject to various contingencies such as market conduct examinations, guaranty fund assessments and legal matters. Management does not anticipate any significant unaccrued claims or costs to result from any known or existing contingencies as of December 31, 2017 and 2016.

13. Subsequent Events

The Company's management evaluated subsequent events through May 31, 2018, which is the date statutory-basis financial statements were available to be issued.

On January 1, 2018, the Company will be subject to an annual fee under Section 9010 of the Federal Affordable Care Act (ACA). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2017, the Company has written health insurance subject to the ACA assessment and expects to conduct health insurance business in 2018. As of December 31, 2017, the Company has written health insurance subject to the ACA

assessment, expects to conduct health insurance business in 2018, and estimates its portion of the annual health insurance industry fee to be payable on September 30, 2018 to be $14,666,000. This amount is reflected in special surplus. The impact on risk based capital (RBC) to be 50%. Reporting the ACA assessment as of December 31, 2017, would not have triggered an RBC action level.

(in thousands)	**2017**	**2016**
ACA fee assessment payable for upcoming year	**$ 14,666**	$ –
ACA fee assessment paid	**–**	13,019
Premium written subject to ACA 9010 assessment	**803,067**	801,956
Total Adjusted Capital before surplus adjustment	**117,506**	125,404
Authorized Control Level before surplus adjustment	**29,174**	30,824
Total Adjusted Capital after surplus adjustment	**102,840**	125,404
Authorized Control Level after surplus adjustment	**29,174**	30,824
Would reporting the ACA assessment as of December 31, 2017, have triggered an RBC action level?	**No**	No

Report of Independent Auditors on Supplementary Information

The Board of Directors of DentaQuest USA Insurance Company, Inc.

Our audits were conducted for the purpose of forming an opinion on the statutory-basis financial statements as a whole. The accompanying supplemental investment disclosures are presented to comply with the National Association of Insurance Commissioners' Annual Statement Instructions and the National Association of Insurance Commissioners' Accounting Practices and Procedures Manual and for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the statutory-basis financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

This report is intended solely for the information and use of the Company and state insurance departments to whose jurisdiction the Company is subject and is not intended to be and should not be used by anyone other than these specified parties.
