Within ten (10) days after receipt of any Counterclaim, the complaining party (or parties) shall serve on BCBSA and on the responding party (or parties), a Reply to the Counterclaim. Such Reply must provide the same information required by Paragraph 1.C., above.

**2. Mediation**

To facilitate the mediation of disputes between or among BCBSA, the Plans and/or their Controlled Affiliates, the BCBSA Board has provided for Mediation under these Rules. Mediation may be pursued in lieu of or in an effort to obviate the Mandatory Dispute Resolution process, and all parties are strongly urged, but not required, to exhaust the mediation procedure provided for herein. In the event any party refuses to proceed with Mediation, the parties shall proceed immediately to Mandatory Dispute Resolution, as provided in Section 3.

A. Selection of Mediators

If all parties agree to pursue Mediation, they shall promptly attempt to agree upon: (i) the number of mediators desired, not to exceed three mediators; and (ii) the selection of experienced mediator(s) from an independent entity to mediate all disputes set forth in the Complaint and Answer (and Counterclaim and Reply, if any). In the event the parties are unable to agree upon the selection or number of mediators, both within five (5) days of the service of the Answer or Reply to Counterclaim, whichever is later, the BCBSA Corporate Secretary shall immediately refer the matter to a nationally recognized professional ADR organization (such as CPR or JAMS) for mediation by a single mediator to be selected by the ADR organization.

B. Binding Decision

Before the Mediation Hearing described below, the BCBSA Corporate Secretary shall contact the parties to determine whether they wish to be bound by any recommendation of the selected mediator(s) for resolution of the disputes. If all wish to be bound, the Corporate Secretary will send appropriate documentation to them for their signatures before the Mediation Hearing begins.

**Amended as of September 20, 2007**

**EXHIBIT 5**

C. Mediation Procedure

The Mediator(s) shall apply the mediation procedures and processes provided for herein (not the rules of the ADR organization with which they are affiliated) and shall promptly advise the parties of a scheduled Mediation Hearing date. Unless a party requests an expedited procedure, or unless all parties to the proceeding agree to one or more extensions of time, the Mediation Hearing set forth below shall be completed within forty (40) days of BCBSA's receipt of the Complaint. The selected mediator(s), unless the parties otherwise agree, shall adhere to the following procedure:

i. Each party must be represented by its CEO or other representative who has been delegated full authority to resolve the dispute. However, parties may send additional representatives as they see fit.

ii. Each party will be given one-half hour to present its case, beginning with the complaining party (or parties), followed by the other party or parties. The parties are free to structure their presentations as they see fit, using oral statements or direct examination of witnesses. However, neither cross-examination nor questioning of opposing representatives will be permitted. At the close of each presentation, the selected mediator(s) will be given an opportunity to ask questions of the presenters and witnesses. All parties must be present throughout the Mediation Hearing. The selected mediator(s) may extend the time allowed for each party's presentation at the Mediation Hearing. The selected mediator(s) may meet in executive session, outside the presence of the parties, or may meet with the parties separately, to discuss the controversy.

iii. After the close of the presentations, the parties will attempt to negotiate a settlement of the dispute. If the parties desire, the selected mediator(s), or any one or more of the selected mediators, will sit in on the negotiations.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 5 of 23

iv. After the close of the presentations, the selected mediator(s) may meet privately to agree upon a recommendation for resolution of the dispute which would be submitted to the parties for their consideration and approval. If the parties have previously agreed to be bound by the results of this procedure, this recommendation shall be binding upon the parties.

v. The purpose of the Mediation Hearing is to assist the parties to settle their grievances short of mandatory dispute resolution. As a result, the Mediation Hearing has been designed to be as informal as possible. Rules of evidence shall not apply. There will be no transcript of the proceedings, and no party may make a tape recording of the Mediation Hearing.

vi. In order to facilitate a free and open discussion, the Mediation proceeding shall remain confidential. A "Stipulation to Confidentiality" which prohibits future use of settlement offers, all position papers or other statements furnished to the selected mediator(s), and decisions or recommendations in any Mediation proceeding shall be executed by each party.

vii. Upon request of the selected mediator(s), or one of the parties, BCBSA staff may also submit documentation at any time during the proceedings.

D. Notice of Termination of Mediation

If the Mediation cannot be completed within the prescribed or agreed time period due to the lack of cooperation of any party, as determined by the selected mediator(s), or if the Mediation does not result in a final resolution of all disputes at the Mediation Hearing or within ten (10) days after the Mediation Hearing, any party or any one of the selected mediators shall so notify the BCBSA Corporate Secretary, who shall promptly issue a Notice of Termination of Mediation to all parties, to the selected mediator(s), and to the MDR Administrator. Such notice shall serve to bring the Mediation to an end and to initiate Mandatory Dispute Resolution. Upon agreement of all parties and the mediator(s), the Mediation process may continue at the same time the MDR process is invoked. In such case, the Notice of Termination of Mediation described above serves to initiate the MDR proceeding, but does not terminate mediation proceedings, which may proceed simultaneous with the MDR proceeding.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 6 of 23

**3. Mandatory Dispute Resolution (MDR)**

If any party elects not to first pursue Mediation, or if a Notice of Termination of Mediation is issued as set forth in Paragraph 2.D., above, then the unresolved disputes set forth in any Complaint and Answer (and Counterclaim and Reply, if any) shall be subject to mandatory binding arbitration (herein referred to as "MDR").

A. MDR Administrator

The Administrator for purposes of Mandatory Arbitration shall be an independent nationally recognized entity such as CPR or JAMS, specializing in alternative dispute resolution. In the event the parties pursued Mediation with CPR, JAMS or a similar organization, that organization also shall serve as the MDR Administrator, unless all parties notify the BCBSA Corporate Secretary in writing within two (2) days of receiving the Notice of Termination of Mediation that they wish to pursue MDR with another nationally recognized organization serving as MDR Administrator.

In the event the parties (i) did not pursue Mediation, (ii) pursued mediation with a Mediator not affiliated with an ADR organization that offers a panel of arbitrators, or (iii) all parties that pursued Mediation notified the BCBSA Corporate Secretary that they wish to have an MDR Administrator that is different from the organization with which their mediator was affiliated, they shall promptly attempt to agree on a nationally recognized ADR entity that supplies a panel of arbitrators. If they reach such agreement within five (5) days of the Notice of Termination of Mediation or receipt of the Answer or Reply to Counterclaim (whichever is later), the parties shall promptly inform the BCBSA Corporate Secretary of their agreed upon ADR organization. In the event the parties are unable to reach agreement on an MDR Administrator within that timeframe, the BCBSA Corporate Secretary shall immediately refer the matter to CPR, JAMS or a similar organization for MDR.

Any person who served as a Mediator shall not serve as an arbitrator for the same or similar dispute for purposes of MDR.

B. Rules for MDR

The rules controlling all aspects of MDR shall be exclusively those provided for herein. The rules promulgated or otherwise used by the MDR Administrator organization shall not apply.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 7 of 23

C. Initial Conference

Within seven (7) days after a Notice of Termination has issued or the matter has otherwise been referred to an MDR Administrator, or within five (5) days after the time for filing and serving the Answer or Reply to any Counterclaim (whichever is later) if the parties elect first not to mediate, the parties shall confer with the Administrator to discuss selecting a dispute resolution panel ("the Panel"). This conference (the “Initial Conference”) may be by telephone. The parties are encouraged to agree to the composition of the Panel and to present that agreement to the Administrator at the Initial Conference. If the parties do not agree on the composition of the Panel by the time of the Initial Conference, or by any extension thereof agreed to by all parties and the Administrator, then the Panel Selection Process set forth in subparagraph D, below, shall be followed.

D. Panel Selection Process

The Administrator shall designate, prior to the Initial Conference, at least seven potential arbitrators. Each party shall be permitted to strike any designee for cause and the Administrator shall determine the sufficiency thereof in its sole discretion. The Administrator will designate a replacement for any designee so stricken. Each party shall then be permitted one peremptory strike from the list of designees. The Administrator shall set the dates for exercising all strikes, which shall be set to encourage the prompt selection of arbitrators.

After the parties exercise any designee strikes for cause and their peremptory strike against any designee of their choice, the parties shall each rank the remaining panel members in order of preference and provide the Administrator, without serving on any other party, their ranked list. The Administrator shall not disclose any party’s ranked list to members of the panel or to other parties.

From the remaining designees, and after considering opportunities to maximize, so far as possible, the collectively stated arbitrator preferences provided by the parties on their ranked lists, the Administrator shall select a three member Panel. The Panel Selection Process shall be completed no later than ten (10) days after the Initial Conference.

Each Arbitrator shall be compensated at his or her normal hourly rate or, in the absence of an established rate, at a reasonable hourly rate to be promptly fixed by the Administrator for all time spent in connection with the proceedings and shall be reimbursed for any travel and other reasonable expenses.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 8 of 23

E. Duties Of The Arbitrators

The Panel shall promptly designate a Presiding Arbitrator for the purposes reflected below, but shall retain the power to review and modify any ruling or other action of said Presiding Arbitrator. Each Arbitrator shall be an independent Arbitrator, shall be governed by the Code of Ethics for Arbitrators in Commercial Disputes and shall at or prior to the commencement of any Arbitration Hearing take an oath to that effect. Each Arbitrator shall promptly disclose in writing to the Panel and to the parties any circumstances, whenever arising, that might cause doubt as to such Arbitrator's compliance, or ability to comply, with said Code of Ethics, and, absent resignation by such Arbitrator, the remaining Arbitrators shall determine in their sole discretion whether the circumstances so disclosed constitute grounds for disqualification and for replacement. With respect to such circumstances arising or coming to the attention of a party after an Arbitrator's selection, a party may likewise request the Arbitrator's resignation or a determination as to disqualification by the remaining Arbitrators. With respect to a sole Arbitrator, the determination as to disqualification shall be made by the Administrator.

There shall be no ex parte communication between the parties or their counsel and any member of the Panel.

F. Panel's Jurisdiction And Authority

The Panel's jurisdiction and authority shall extend to all disputes between or among the Plans, their Controlled Affiliates, and/or BCBSA, except for those disputes excepted from these MMDR procedures as set forth in the License Agreements.

With the exception of punitive or treble damages, the Panel shall have full authority to award the relief it deems appropriate to resolve the parties' disputes, including monetary awards and injunctions, mandatory or prohibitory. The Panel has no authority to award punitive or treble damages except that the Panel may allocate or assess responsibility for punitive or treble damages assessed by another tribunal. Subject to the above limitations, the Panel may, by way of example, but not of limitation:

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 9 of 23

i. interpret or construe the meaning of any terms, phrase or provision in any license between BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.

ii. determine whether BCBSA, a Plan or a Controlled Affiliate has violated the terms or conditions of any license between the BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.

iii. decide challenges as to its own jurisdiction.

iv. issue such orders for interim relief as it deems appropriate pending Hearing and Award in any Arbitration.

It is understood that the Panel is expected to resolve issues based on governing principles of law, preserving to the maximum extent legally possible the continued integrity of the Licensed Marks and the BLUE CROSS/BLUE SHIELD system. The Panel shall apply federal law to all issues which, if asserted in the United States District Court, would give rise to federal question jurisdiction, 28 U.S.C. § 1331. The Panel shall apply Illinois law to all issues involving interpretation, performance or construction of any License Agreement or Controlled Affiliate License Agreement unless the agreement otherwise provides. As to other issues, the Panel shall choose the applicable law based on conflicts of law principles of the State of Illinois.

G. Administrative Conference

Within five (5) days of the Panel being selected, the Presiding Arbitrator shall confer with the parties and the other members of the Panel and shall schedule, in writing, a conference in which the parties and the Panel shall participate (the "Administrative Conference"). The Administrative Conference shall take place no later than fifteen (15) days after the Panel is selected. At the Administrative Conference the parties and the Panel shall discuss the scheduling of the Arbitration Hearing and any other matter appropriate to be considered, including but not limited to: any written discovery in the form of requests for production of documents or requests to admit facts; the identity of any witness whose deposition a party may desire and a showing of exceptional good cause for the taking of any such deposition; the desirability of bifurcation or other separation of the issues; the need for and the type of record of conferences and hearings, including the need for transcripts; the need for expert witnesses and

**Amended as of September 20, 2007**

**EXHIBIT 5**

how expert testimony should be presented; the appropriateness of motions to dismiss and/or for full or partial summary judgment; consideration of stipulations; the desirability of presenting any direct testimony in writing; and the necessity for any on-site inspection by the Panel. If the parties agree, the Administrative Conference may be by telephone.

H. Discovery

i. ***Requests for Production of Documents***: All requests for the production of documents must be served no later than five (5) days after the date of the Initial Conference. Within twenty (20) days after receipt of a request for production of documents, a party shall (a) serve responses and objections to the request, (b) produce all responsive, non-privileged documents to the requesting party, and (c) to the extent any responsive documents are withheld on the grounds of attorney-client privilege or work product, produce a log identifying such documents in the manner specified in Fed. R. Civ. P. 26(b)(5). If, after reviewing a privilege log, the requesting party believes attorney-client privilege or work product protection was improperly claimed by the producing party with respect to any document, the requesting party may ask the Presiding Arbitrator to conduct an in-camera inspection of the same. With respect to documentary and other discovery produced in any MDR proceeding by BCBSA, the fact that a party's CEO or other senior officers may serve on the BCBSA Board of Directors, BCBSA Board Committees or other BCBSA work groups, task forces and the like, shall not be a basis for defeating an otherwise valid claim of attorney-client privilege or work product protection over such documentary or other discovery materials by BCBSA.

ii. ***Requests for Admissions***: Requests for Admissions may be served up to twenty-one (21) days prior to the discovery cut-off set by the Presiding Arbitrator. A party served with Requests For Admissions must respond within twenty (20) days of receipt of said request. The good faith use of and response to Requests for Admissions is encouraged, and the Panel shall have full discretion, with reference to the Federal Rules of Civil Procedure, in awarding appropriate sanctions with respect to abuse of the procedure.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 11 of 23

iii. ***Depositions****:* As a general rule, the parties will not be permitted to take party or non-party deposition testimony for discovery purposes. The Presiding Arbitrator, in his or her sole discretion, shall have the authority to permit a party to take such deposition testimony upon a showing of exceptional good cause. The parties will be permitted to take de bene esse deposition[1] testimony to the fullest extent permitted by law of any witness who cannot be compelled to testify at the Arbitration Hearing. No deposition, for discovery purposes or otherwise, shall exceed three (3) hours, excluding objections and colloquy of counsel. Depositions may be recorded in any manner recognized by the Federal Rules of Civil Procedure and the parties shall specify in each notice of deposition or request for permission to take deposition testimony the manner in which such deposition shall be recorded.

iv. ***Expert witness(es)***: If a party intends to present the testimony of an expert witness during the oral hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)
A. ten (10) days prior to the discovery cut-off set by the Presiding Arbitrator. If a party intends to present the testimony of a rebuttal expert witness during the Arbitration Hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)(B) within twenty (20) days after the date on which the written statement of the expert witness whose testimony is to be rebutted was produced.

v. ***Discovery cut-off****:* The Presiding Arbitrator shall determine the date on which the discovery period will end, but the discovery period shall not exceed thirty (30) days from the date of the Administrative Conference without the agreement of all parties.

**Amended as of September 20, 2007**

---

[1] As used in these Rules, "de bene esse deposition" means a deposition that is not taken for discovery purposes, but is taken for the purpose of reading part or all of the deposition transcript into the record at the Arbitration Hearing, to the extent permitted by the Panel, because the witness cannot be compelled to testify at the Arbitration Hearing or has exercised a right provided under these Rules to provide deposition testimony in lieu of testimony at the Arbitration Hearing.

**EXHIBIT 5**

Page 12 of 23

vi. ***Additional discovery***: Any additional discovery will be at the discretion of the Presiding Arbitrator.

vii. ***Discovery Disputes****:* Any discovery disputes shall be raised by motion to the Presiding Arbitrator, who is authorized to resolve all such disputes, and whose resolution will be binding on the parties unless modified by the Arbitration Panel. Prior to raising any discovery dispute with the Presiding Arbitrator, the parties shall meet and confer, telephonically or in person, in an attempt to resolve or narrow the dispute. If a party refuses to comply with a decision resolving a discovery dispute, the Panel, in keeping with Fed. R. Civ. P. 37, may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for resolution adversely to that party.

viii. ***Extensions****:* The time for responding to discovery requests may be extended by the Presiding Arbitrator for good and sufficient cause shown. Any request for such an extension shall be made in writing.

I. Panel Suggested Settlement/Mediation

At any point during the proceedings, the Panel at the request of any party or on its own initiative, may suggest that the parties explore settlement and that they do so at or before the conclusion of the Arbitration Hearing, and the Panel shall give such assistance in settlement negotiations as the parties may request and the Panel may deem appropriate. Alternatively, the Panel may direct the parties to endeavor to mediate their disputes as provided above, or to explore a mini-trial proceeding, or to have an independent party render a neutral evaluation of the parties' respective positions. The Panel shall enter such sanctions as it deems appropriate with respect to any party failing to pursue in good faith such Mediation or other alternate dispute resolution methods.

**Amended as of September 20, 2007**

**EXHIBIT 5**

J. Subpoenas on Third Parties

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq*., and subject to Paragraph 3.G(iii) above, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan or any officer, employee or director of a third party Blue Plan, to compel deposition testimony or the production of documents, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena.

K. Arbitration Hearing

An Arbitration Hearing will be held within thirty (30) days after the Administrative Conference if no discovery is taken, or within thirty (30) days after the close of discovery, unless all parties and the Panel agree to extend the Arbitration Hearing date, or unless the parties agree in writing to waive the Arbitration Hearing. The parties may mutually agree on the location of the Arbitration Hearing. If the parties fail to agree, the Arbitration Hearing shall be held in Chicago, Illinois, or at such other location determined by the Presiding Arbitrator to be most convenient to the participants. The Panel will determine the date(s) and time(s) of the Arbitration Hearing(s) after consultation with all parties and shall provide reasonable notice thereof to all parties or their representatives.

L. Arbitration Hearing Memoranda

Twenty (20) days prior to the Arbitration Hearing, each party shall submit to the other party (or parties) and to the Panel an Arbitration Hearing Memorandum which sets forth the applicable law and any argument as to any relevant issue. The Arbitration Hearing Memorandum will supplement, and not repeat, the allegations, information and documents contained in or with the Complaint, Answer, Counterclaim and Reply, if any. Ten (10) days prior to the Arbitration Hearing, each party shall submit to each other party a list of all expert and fact witnesses (but not including rebuttal fact witness) that such party intends to have testify at the Arbitration Hearing and a brief summary of the testimony each such witness is expected to give. In addition, no later than five (5) days prior to the Arbitration, each party may submit to each other party and to the Panel a Response Arbitration Hearing Memorandum which sets forth any response to another party's Arbitration Hearing Memorandum.

**Amended as of September 20, 2007**

**EXHIBIT 5**

M. Notice For Testimony

Ten (10) days prior to the Arbitration Hearing, any party may serve a Notice on any other party (or parties) requesting the attendance at the Arbitration Hearing of any officer, employee or director of the other party (or parties) for the purpose of providing noncumulative testimony. If a party fails to produce one of its officers, employees or directors whose noncumulative testimony during the Arbitration Hearing is reasonably requested by an adverse party, the Panel may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for mandatory dispute resolution adversely to that party; provided, however, that a party may refuse to produce a director to testify if, within two (2) days of receiving a notice requesting the attendance of such director at the Arbitration Hearing, the party agrees to make the director available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. This Rule may not be used for the purpose of burdening or harassing any party, and the Presiding Arbitrator may impose such orders as are appropriate so as to prevent or remedy any such burden or harassment.

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq.*, twenty (20) days or more prior to the Arbitration Hearing, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan, BCBSA or any officer, employee or director of a third party Blue Plan or BCBSA for the purpose of providing noncummulative testimony at the Arbitration Hearing, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena; provided however, that a director of a third party Blue Plan or BCBSA may refuse to testify if, within two (2) days of receiving a subpoena requesting the attendance of such director at the Arbitration Hearing, the director agrees to make him/herself available for a de bene esse deposition at a mutually convenient time at any location within fifty
(50) miles of the director's primary residence chosen by the party requesting the director's testimony. Each Blue Plan agrees to waive, on its own behalf and on behalf of its directors and officers, any objection it otherwise might have to any such subpoena based on service, venue or extraterritoriality.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 15 of 23

N. Arbitration Hearing Procedures

i. ***Attendance at Arbitration Hearing***: Any person having a direct interest in the proceeding is entitled to attend the Arbitration Hearing. The Presiding Arbitrator shall otherwise have the power to require the exclusion of any witness, other than a party or other essential person, during the testimony of any other witness. It shall be discretionary with the Presiding Arbitrator to determine the propriety of the attendance of any other person.

ii. ***Confidentiality***: The Panel and all parties shall maintain the privacy of the Arbitration Proceeding. The parties and the Panel shall treat the Arbitration Hearing and any discovery or other proceedings or events related thereto, including any award resulting therefrom, as confidential except as otherwise necessary in connection with a judicial challenge to or enforcement of an award or unless otherwise required by law.

iii. ***Stenographic Record***: Any party, or if the parties do not object, the Panel, may request that a stenographic or other record be made of any Arbitration Hearing or portion thereof. The costs of the recording and/or of preparing the transcript shall be borne by the requesting party and by any party who receives a copy thereof. If the Panel requests a recording and/or a transcript, the costs thereof shall be borne equally by the parties.

iv. ***Oaths***: The Panel may require witnesses to testify under oath or affirmation administered by any duly qualified person and, if requested by any party, shall do so.

v. ***Order of Arbitration Hearing***: An Arbitration Hearing shall be opened by the recording of the date, time, and place of the Arbitration Hearing, and the presence of the Panel, the parties, and their representatives, if any. The Panel may, at the beginning of the Arbitration Hearing, ask for statements clarifying the issues involved.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Unless otherwise agreed, the complaining party (or parties) shall then present evidence to support their claim(s). The respondent(s) shall then present evidence supporting their defenses and Counterclaims, if any. The complaining party (or parties) shall then present evidence supporting defenses to the Counterclaims, if any, and rebuttal.

Witnesses for each party shall submit to questions by adverse parties and/or the Panel.

The Panel has the discretion to vary these procedures, but shall afford a full and equal opportunity to all parties for the presentation of any material and relevant evidence.

vi. ***Evidence***: The parties may offer such evidence as is relevant and material to the dispute and shall produce such evidence as the Panel may deem necessary to an understanding and resolution of the dispute. Unless good cause is shown, as determined by the Panel or agreed to by all other parties, no party shall be permitted to offer evidence at the Arbitration Hearing which was not disclosed prior to the Arbitration Hearing by that party. The Panel may receive and consider the evidence of witnesses by affidavit upon such terms as the Panel deems appropriate.

The Panel shall be the judge of the relevance and materiality of the evidence offered, and conformity to legal rules of evidence, other than enforcement of the attorney-client privilege and the work product protection, shall not be necessary. The Federal Rules of Evidence shall be considered by the Panel in conducting the Arbitration Hearing but those rules shall not be controlling. All evidence shall be taken in the presence of the Panel and all of the parties, except where any party is in default or has waived the right to be present.

Settlement offers by any party in connection with Mediation or MDR proceedings, decisions or recommendations of the selected mediators, and a party's position papers or statements furnished to the selected mediators shall not be admissible evidence or considered by the Panel without the consent of all parties.

**EXHIBIT 5**

Page 17 of 23

vii. ***Closing of Arbitration Hearing***: The Presiding Arbitrator shall specifically inquire of all parties whether they have any further proofs to offer or witnesses to be heard. Upon receiving negative replies or if he or she is satisfied that the record is complete, the Presiding Arbitrator shall declare the Arbitration Hearing closed with an appropriate notation made on the record. Subject to being reopened as provided below, the time within which the Panel is required to make the award shall commence to run, in the absence of contrary agreement by the parties, upon the closing of the Arbitration Hearing.

With respect to complex disputes, the Panel may, in its sole discretion, defer the closing of the Arbitration Hearing for a period of up to thirty (30) days after the presentation of proofs in order to permit the parties to submit post-hearing briefs and argument, as the Panel deems appropriate, prior to making an award.

For good cause, the Arbitration Hearing may be reopened for up to thirty (30) days on the Panel's initiative, or upon application of a party, at any time before the award is made

O. Awards

An Award must be in writing and shall be made promptly by the Panel and, unless otherwise agreed by the parties or specified by law, no later than thirty (30) days from the date of closing the Arbitration Hearing. If all parties so request, the Award shall contain findings of fact and conclusions of law. The Award, and all other rulings and determinations by the Panel, may be by a majority vote.

Parties shall accept as legal delivery of the Award the placing of the Award or a true copy thereof in the mail addressed to a party or its representative at its last known address or personal service of the Award on a party or its representative.

Awards are binding only on the parties to the Arbitration and are not binding on any non-parties to the Arbitration and may not be used or cited as precedent in any other proceeding.

**Amended as of September 20, 2007**

**EXHIBIT 5**

After the expiration of twenty (20) days from initial delivery, the Award (with corrections, if any) shall be final and binding on the parties, and the parties shall undertake to carry out the Award without delay.

Proceedings to confirm, modify or vacate an Award shall be conducted in conformity with and controlled by the Federal Arbitration Act. 9 U.S.C. § 1, *et seq*.

P. Return of Documents

Within sixty (60) days after the Award and the conclusion of any judicial proceedings with respect thereto, each party and the Panel shall return any documents produced by any other party, including all copies thereof. If a party receives a discovery request in any other proceeding which would require it to produce any documents produced to it by any other party in a proceeding hereunder, it shall not produce such documents without first notifying the producing party and giving said party reasonable time to respond, if appropriate, to the discovery request.

**4. Miscellaneous**

A. Expedited Procedures

Any party to a Mediation may direct a request for an expedited Mediation Hearing to the Chairman of the Mediation Committee, to the selected Mediators, and to all other parties at any time. The Chairman of the Mediation Committee, or at his or her direction, the then selected Mediators, shall grant any request which is supported by good and sufficient reasons. If such a request is granted, the Mediation shall be completed within as short a period as practicable, as determined by the Chairman of the Mediation Committee or, at his or her direction, the then selected Mediators.

Any party to an Arbitration may direct a request for expedited proceedings to the Administrator, to the Panel, and to all other parties at any time. The Administrator, or the Presiding Arbitrator if the Panel has been selected, shall grant any such request which is supported by good and sufficient reasons. If such a request is granted, the Arbitration shall be completed within as short a time as practicable, as determined by the Administrator and/or the Presiding Arbitrator.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 19 of 23

B. Temporary or Preliminary Injunctive Relief

Any party may seek temporary or preliminary injunctive relief with the filing of a Complaint or at any time thereafter. If such relief is sought prior to the time that an Arbitration Panel has been selected, then the Administrator shall select a single Arbitrator who is a lawyer who has no interest in the subject matter of the dispute, and no connection to any of the parties, to hear and determine the request for temporary or preliminary injunction. If such relief is sought after the time that an Arbitration Panel has been selected, then the Arbitration Panel will hear and determine the request. The request for temporary or preliminary injunctive relief will be determined with reference to the temporary or preliminary injunction standards set forth in Fed. R. Civ. P. 65.

C. Defaults and Proceedings in the Absence of a Party

Whenever a party fails to comply with the MDR Rules in a manner deemed material by the Panel, the Panel shall fix a reasonable time for compliance and, if the party does not comply within said period, the Panel may enter an Order of default or afford such other relief as it deems appropriate.
Arbitration may proceed in the event of a default or in the absence of any party who, after due notice, fails to be present or fails to obtain an extension. An Award shall not be made solely on the default or absence of a party, but the Panel shall require the party who is present to submit such evidence as the Panel may require for the making of findings, determinations, conclusions, and Awards.

D. Notice

Each party shall be deemed to have consented that any papers, notices, or process necessary or proper for the initiation or continuation of a proceeding under these rules or for any court action in connection therewith may be served on a party by mail addressed to the party or its representative at its last known address or by personal service, in or outside the state where the MDR proceeding is to be held.

The Corporate Secretary and the parties may also use facsimile transmission, telex, telegram, or other written forms of electronic communication to give the notices required by these rules.

**EXHIBIT 5**

Page 20 of 23

E. Expenses

The expenses of witnesses shall be paid by the party causing or requesting the appearance of such witnesses. All expenses of the MDR proceeding, including compensation, required travel and other reasonable expenses of the Panel, and the cost of any proof produced at the direct request of the Panel, shall be borne equally by the parties and shall be paid periodically on a timely basis, unless they agree otherwise or unless the Panel in the Award assesses such expenses, or any part thereof against any party (or parties). In exceptional cases, the Panel may award reasonable attorneys' fees as an item of expense, and the Panel shall promptly determine the amount of such fees based on affidavits or such other proofs as the Panel deems sufficient.

F. Disqualification or Disability of A Panel Member

In the event that any Arbitrator of a Panel with more than one Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the remaining Panel member(s):

i. shall designate a replacement, subject to the right of any party to challenge such replacement for cause.

ii. shall decide the extent to which previously held hearings shall be repeated.

If the remaining Panel members consider the proceedings to have progressed to a stage as to make replacement impracticable, the parties may agree, as an alternative to the recommencement of the Mandatory Dispute Resolution process, to resolution of the dispute by the remaining Panel members.

In the event that a single Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the Administrator shall appoint a successor, subject to the right of any party to challenge such successor for cause, and the successor shall decide the extent to which previously held proceedings shall be repeated.

**EXHIBIT 5**

G. Extensions of Time

Subject to the provisions of Paragraph 3.H.(viii.), any time limit set forth in these Rules may be extended upon agreement of the parties and approval of: (1) the Mediator if the proceeding is then in Mediation; (2) the Administrator if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (3) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected.

H. Intervention

The Plans, their Controlled Affiliates, and BCBSA, to the extent subject to MMDR pursuant to their License Agreements, shall have the right to move to intervene in any pending Arbitration. A written motion for intervention shall be made to: (1) the Administrator, if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (2) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected. The written motion for intervention shall be delivered to the BCBSA Corporate Secretary (which shall also constitute service on the BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) which are parties to the proceeding. Any party to the proceeding can submit written objections to the motion to intervene. The motion for intervention shall be granted upon good cause shown. Intervention also may be allowed by stipulation of the parties to the Arbitration proceeding. Intervention shall be allowed upon such terms as the Arbitration Panel decides.

I. BCBSA Assistance in Resolution of Disputes

The resources and personnel of the BCBSA may be requested by any member Plan at any time to try to resolve disputes with another Plan.

J. Neutral Evaluation

The parties can voluntarily agree at any time to have an independent party render a neutral evaluation of the parties' respective positions.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 22 of 23

K. Recovery of Attorney Fees and Expenses

i. Motions to Compel

Nothwithstanding any other provisions of these Rules, any Party subject to the License Agreements (for purposes of this Section K and all of its sub- sections only hereinafter referred to collectively and individually as a "Party") that initiates a court action or administrative proceeding solely to compel adherence to these Rules shall not be determined to have violated these Rules by initiating such action or proceeding.

ii. Recovery of Fees, Expenses and Costs

The Arbitration Panel may, in its sole discretion, award a Party its reasonable attorneys' fees, expenses and costs associated with a filing to compel adherence to these Rules and/or reasonable attorneys' fees, expenses and costs incurred in responding to an action filed in violation of these Rules; provided, however, that neither fees, expenses, nor costs shall be awarded by the Arbitration Panel if the Party from which the award is sought can demonstrate to the Arbitration panel, in its sole discretion, that it did not violate these Rules or that it had reasonable grounds for believing that its action did not violate these Rules.

iii. Requests for Reimbursement

For purposes of this Section K, any Party may request reimbursement of fees, expenses and/or costs by submitting said request in writing to the Arbitration Panel at any time before an award is delivered pursuant Paragraph to 3.O above with a copy to the Party from which reimbursement is sought, explaining why it is entitled to such reimbursement. The Party from which reimbursement is sought shall have twenty (20) days to submit a response to such request to the Arbitration Panel with a copy to the Party seeking reimbursement.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 23 of 23

L. Calculation of Time and Deadlines

In computing any period of time prescribed or allowed under these rules, the day of the act or event from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, in which event the period runs until the end of the next day which is not one of the aforementioned days. When the period of time prescribed is less than six (6) days, intermediate Saturdays, Sundays and legal holidays shall be excluded in the computation. As used in this rule, “legal holiday” includes New Year’s Day, Martin Luther King, Jr. Day, Washington’s Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day and any other day appointed as a holiday by the President or the Congress of the United States.

**Amended as of September 20, 2007**

**BLUE SHIELD LICENSE AGREEMENT**
**(Includes revisions, if any, adopted by Member Plans through their September 17, 2020 meeting)**

This agreement by and between Blue Cross and Blue Shield Association ("BCBSA") and The Blue Shield Plan, known as _____ (the "Plan").

**Preamble**

WHEREAS, the Plan and/or its predecessor(s) in interest (collectively the "Plan") had the right to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") for health care plans in its service area, which was essentially local in nature;

WHEREAS, the Plan was desirous of assuring nationwide protection of the Licensed Marks, maintaining uniform quality controls among Plans, facilitating the provision of cost effective health care services to the public and otherwise benefiting the public;

WHEREAS, to better attain such ends, the Plan and the predecessor of BCBSA executed the Agreement(s) Relating to the Collective Service Mark "Blue Shield"; and

WHEREAS, BCBSA and the Plan desire to supercede said Agreement(s) to reflect their current practices and to assure the continued integrity of the Licensed Marks and of the BLUE SHIELD system;

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

**Agreement**

1. BCBSA hereby grants to the Plan, upon the terms and conditions of this License Agreement ("Agreement" or "Primary License Agreement"), the right to use BLUE SHIELD in its trade and/or corporate name (the "Licensed Name"), and the right to use the Licensed Marks, in the sale, marketing and administration of health care plans and related services in the Service Area set forth and defined in paragraph 5 below. As used herein, health care plans and related services shall include acting as a nonprofit health care plan, a for-profit health care plan, or mutual health insurer operating on a not-for-profit or for-profit basis, under state law; financing access to health care services; when working with a bank that holds the relevant license to use the Licensed Name and Marks, offering: (i) tax-favored savings accounts for medical expenses and means for accessing such accounts, such as debit cards or checks, that are provided solely to support access to such tax-favored savings accounts, all pursuant to such license, or (ii) prepaid rewards cards that are provided for completion of a wellness program, all pursuant to such license; providing health care management and administration; administering, but not underwriting, non-health portions of Workers' Compensation Insurance; delivering health care services, except hospital services (as defined in the Guidelines to Membership Standards Applicable to Regular Members); and performing the Eligibility and Enrollment functions of HR administration for all benefit plans offered by a group account to its members, including benefit plans not provided by the Plan, provided that the Plan has contracted to provide Health Coverage under the Licensed Marks to the account (as the terms "Health Coverage", "Eligibility" and "Enrollment" are defined in Exhibit 4, Paragraph 2.t.).

2. The Plan may use the Licensed Marks and Name in connection with the offering of: i) health care plans and related services in the Service Area through Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1 hereto (the "Controlled Affiliate License Agreement"); and ii) insurance coverages offered by life insurers under the applicable law in the Service Area, other than those which the Plan may offer in its own name, provided through Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1A hereto (the "Controlled Affiliate License Agreement Applicable to Life Insurance Companies") or the Agreement attached as Exhibit 1A1 hereto (the "Controlled Affiliate Trademark License Agreement for Life and Disability Insurance Products") and further provided that the offering of such services does not and will not dilute or tarnish the unique value of the Licensed Marks and Name; and iii) administration and underwriting of Workers' Compensation Insurance Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1 hereto (the "Controlled Affiliate License"); and iv) regional Medicare Advantage PPO Products in cooperation with one or more other Plans through jointly-held Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1B hereto (the "Controlled Affiliate License Agreement Applicable to Regional Medicare Advantage PPO Products"); and v) regional Medicare Part D Prescription Drug Plan products in cooperation with one or more other Plans through jointly-held Controlled Affiliates, provided that each such Controlled Affiliate is separately licensed to use the Licensed Marks and Name under the terms and conditions contained in the Agreement attached as Exhibit 1C hereto (the "Controlled Affiliate License Agreement Applicable to Regional Medicare Part D Prescription Drug Plan Products"). As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner that it is subject to the bona fide control of a Plan or Plans and, if the entity meets the standards of Paragraph 2a.B but not Paragraph 2a.A, the entity, its owners, and persons with

**Amended as of September 19, 2014**

authority to select or appoint members or board members, other than a Plan or Plans, have received written approval of BCBSA. Absent written approval by BCBSA of an alternative method of control, bona fide control shall have the meaning set forth in Paragraphs 2a. and 2b.

2a. With respect to the Controlled Affiliate Licenses authorized in clauses i) through iii) of Paragraph 2, bona fide control shall mean that a Plan (the "Sponsoring Plan") authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to this Primary License Agreement with BCBSA must have:

A. The legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof; (b) to exercise control over the policy and operations of the Controlled Affiliate; (c) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur. In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate, provided that in instances where the Sponsoring Plan formed a publicly traded Controlled Affiliate Licensee and such publicly traded Controlled Affiliate Licensee owns and controls other Controlled Affiliate Licensees, the Sponsoring Plan directly or indirectly shall own and control more than 50% of any Controlled Affiliate that is indirectly owned and controlled by the publicly traded Controlled Affiliate Licensee; or

B. The legal authority directly or indirectly through wholly-owned subsidiaries (a) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; (c) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan. Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by the Sponsoring Plan before the Controlled Affiliate can:

1. Change its legal and/or trade name;

2. Change the geographic area in which it operates;

3. Change any of the types of businesses in which it engages;

4. Create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business;

5. Sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced;

6. Make any loans or advances except in the ordinary course of business;

**Amended as of March 26, 2015**

7. Enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners of the Controlled Affiliate or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate);

8. Conduct any business other than under the Licensed Marks and Name;

9. Take any action that the Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks or Names.

In addition, the Sponsoring Plan directly or indirectly through wholly owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate, provided that in instances where the Sponsoring Plan formed a publicly traded Controlled Affiliate Licensee and such publicly traded Controlled Affiliate Licensee owns and controls other Controlled Affiliate Licensees, the Sponsoring Plan directly or indirectly shall own and control at least 50% of any Controlled Affiliate that is indirectly owned and controlled by the publicly traded Controlled Affiliate Licensee; or

C. With respect to a Controlled Affiliate that is 100% controlled by Plans including the Sponsoring Plan and which offers solely Medicaid, Medicare Advantage PPO, Medicare Advantage HMO and/or Special Need Plans products and services, the legal authority by the Sponsoring Plan together with such other Plans (a) to select all members of the Controlled Affiliate's governing body; (b) to prevent any change in the articles of incorporation, bylaws, or other establishing or governing documents of the Controlled Affiliate; (c) to exercise control over the policy and operations of the Controlled Affiliate. In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such 100% control and ownership by Plans shall be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute the "Addendum to Controlled Affiliate License" attached as Exhibit B-1 to Exhibit 1 attached hereto; or

**Amended as of June 20, 2019**

D. With respect to a Controlled Affiliate that is 100% controlled by a Sponsoring Plan which on a Blue-branded basis, offers solely a Basic Medicare Part D Prescription Drug product, the legal authority by the Sponsoring Plan (a) to select all members of the Controlled Affiliate's governing body; (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate; (c) to exercise control over the policy and operations of the Controlled Affiliate. In addition, the Sponsoring Plan shall own 100% of any for-profit Controlled Affiliate. Such 100% control and ownership by the Plan shall be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and Participating Plan as defined on the Controlled Affiliate License Agreement shall execute the "Addendum to Controlled Affiliate License" attached as Exhibit B-2 to Exhibit 1 attached hereto.

E. With respect to a Controlled Affiliate that operates as a clinic, the legal authority by the Sponsoring Plan to exercise control over the policy and operations of the Controlled Affiliate as defined in Exhibit 1, Standard 1(E) and the Guidelines to Administer Standard 1 (E). In addition, if the clinic is for-profit, the Sponsoring Plan shall own at least 50% of the Controlled Affiliate and prevent any change in the articles of incorporation, bylaws or other establishing documents of the Controlled Affiliate with which the Sponsoring Plan does not concur.

2b. With respect to the Controlled Affiliate License Agreements authorized in clauses iv) and v) of Paragraph 2, bona fide control shall mean that the Controlled Affiliate is organized and operated in such a manner that it meets the following requirements:

A. The Controlled Affiliate is owned or controlled by two or more Plans authorized to use the Licensed Marks pursuant to this License Agreement with BCBSA (for purposes of this subparagraph A. through subparagraph C., the "Controlling Plans"); and

**Amended as of June 20, 2019**

-2a-

B. Each Controlling Plan is authorized pursuant to this Agreement to use the Licensed Marks in a geographic area in the Region (as that term is defined in such Controlled Affiliate License Agreements) and every
geographic area in the Region is so licensed to at least one of the Controlling Plans; and

C. The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries (a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur; and (c) to exercise control over the policy and operations of the Controlled Affiliate. Notwithstanding anything to the contrary in (a) through (c) of this subparagraph E., the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

1. Change its legal and/or trade names;

2. Change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

3. Change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

4. Take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly- owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

**Amended as of June 20, 2019**

(the next page is 3)

3. With respect to a Controlled Affiliate that is not licensed to use the Licensed Marks and Name, the Plan may, in communications that contain the Licensed Marks or Name, indicate its corporate relationship to the Affiliate and permit such Affiliate to indicate its corporate relationship to the Plan, solely in the circumstances, style and manner specified by BCBSA from time-to-time in regulations of general application consistent with the avoidance of confusion or mistake or the dilution or tarnishment of the Licensed Marks and Name. No rights are hereby created in any Controlled Affiliate to use the Licensed Marks or Name in its own name or otherwise.

4. The Plan recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Plan further recognizes that its actions within its Service Area may affect the value of the Licensed Marks and Name nationwide. The Plan agrees (a) to maintain in good standing its membership in BCBSA; (b) promptly to pay its dues to BCBSA, said dues to represent the royalties for this License Agreement; (c) materially to comply with all applicable laws; (d) to comply with the Membership Standards Applicable to Regular Members of BCBSA, a current copy of which is attached as Exhibit 2 hereto; and (e) reasonably to permit BCBSA, upon a written, good faith request and during reasonable business hours, to inspect the Plan's books and records necessary to ascertain compliance herewith. As to other Plans and third parties, BCBSA shall maintain the confidentiality of all documents and information furnished by the Plan pursuant hereto, or pursuant to the Membership Standards, and clearly designated by the Plan as containing proprietary information of the Plan.

5. The rights hereby granted are exclusive to the Plan within the geographical area(s) served by the Plan on June 30, 1972, and/or as to which the Plan has been granted a subsequent license, which is hereby defined as the "Service Area," except that BCBSA reserves the right to use the Licensed Marks in said Service Area, and except to the extent that said Service Area may overlap areas served by one or more other licensed Blue Shield Plans as of said date or subsequent license, as to which overlapping areas the rights hereby granted are nonexclusive as to such other Plan or Plans only.

**Amended as of June 19, 2014**

-3-

6. Except as expressly provided by BCBSA with respect to National Accounts, Government Programs and certain other necessary and collateral uses, the current rules and regulations governing which are attached as Exhibit 3 and Exhibit 4 hereto, and are contained in other documents referenced herein, or as expressly provided herein, the Plan may not use the Licensed Marks and Name outside the Service Area or in connection with other goods and services, nor may the Plan use the Licensed Marks or Name in a manner which is intended to transfer in the Service Area the goodwill associated therewith to another mark or name. Nothing herein shall be construed to prevent the Plan from engaging in lawful activity anywhere under other marks and names not confusingly similar to the Licensed Marks and Name, provided that engaging in such activity does and will not dilute or tarnish the unique value of the Licensed Marks and Name. In addition to any and all remedies available hereunder, BCBSA may impose monetary fines on the Plan for the Plan's use of the Licensed Marks and Names outside the Service Area, and provided that the procedure used in imposing a fine is consistent with procedures specifically prescribed by BCBSA from time to time in regulations of general application. In the case of regional Medicare Advantage PPO and regional Medicare Part D Prescription Drug Plan products offered by consenting and participating Plans in a region that includes the Service Areas, or portions thereof, of more than one Plan, such fine may be imposed jointly on the consenting and participating Plans for use of the Licensed Marks and Name in any geographic area of the region in which a Plan having exclusive rights to the Licensed Marks and Name does not consent to and participate in such offering, provided that the basis for imposition of such fine is consistent with rules specifically prescribed by BCBSA from time to time in regulations of general application.

7. The Plan agrees that it will display the Licensed Marks and Name only in such form, style and manner as shall be specifically prescribed by BCBSA from time-to-time in regulations of general application in order to prevent impairment of the distinctiveness of the Licensed Marks and Name and the goodwill pertaining thereto.
The Plan shall cause to appear on all materials on or in connection with which the Licensed Marks or Name are used such legends, markings and notices as BCBSA may reasonably request in order to give appropriate notice of service mark or other proprietary rights therein or pertaining thereto.

8. BCBSA agrees that: (a) it will not grant any other license effective during the term of this License Agreement for the use of the Licensed Marks or Name which is inconsistent with the rights granted to the Plan hereunder; and (b) it will not itself use the Licensed Marks in derogation of the rights of the Plan or in a manner to deprive the Plan of the full benefits of this License Agreement, provided that BCBSA shall have the right to use the Licensed Marks in conjunction with any national offering under the Federal Employees Health Benefits Program in the manner set forth in Exhibit 4, Paragraph 4 (including subparagraphs) to this License Agreement. The Plan agrees that it will not attack the title of BCBSA in and to the Licensed Marks or Name or attack the validity of the Licensed Marks or of this License Agreement. The Plan further agrees that all use by it of the Licensed Marks and Name or any similar mark or name shall inure to the benefit of BCBSA, and the Plan shall cooperate with BCBSA in effectuating the assignment to BCBSA of any service mark or trademark registrations of the Licensed Marks or any similar mark or name held by the Plan or a Controlled Affiliate of the Plan, all or any portion of which registration consists of the Licensed Marks.

**Amended as of November 16, 2006**

9. (a). Should the Plan fail to comply with the provisions of paragraphs 2-4, 6, 7 and/or 12, and not cure such failure within thirty (30) days of receiving written notice thereof (or commence curing such failure within such thirty day period and continue diligent efforts to complete the curing of such failure if such curing cannot reasonably be completed within such thirty day period), BCBSA shall have the right to issue a notice that the Plan is in a state of noncompliance. Except as to the termination of a Plan's License Agreement or the merger of two or more Plans, disputes as to noncompliance, and all other disputes between or among BCBSA, the Plan, other Plans and/or Controlled Affiliates, shall be submitted promptly to mediation and mandatory dispute resolution pursuant to the rules and regulations of BCBSA, a current copy of which is attached as Exhibit 5 hereto, and shall be timely presented and resolved. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. If a state of noncompliance as aforesaid is undisputed by the Plan or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the License Agreement. Except, however, as provided in paragraphs 9(d)(iii), 15(a)(i)-(viii), and 15(a)(x) below, no Plan's license to use the Licensed Marks and Name may be finally terminated for any reason without the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans.

(b). Notwithstanding any other provision of this License Agreement, a Plan's license to use the Licensed Marks and Name may be forthwith terminated by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to Member Plans for: (i) failure to comply with any minimum capital or liquidity requirement under the Membership Standard on Financial Responsibility; or (ii) impending financial insolvency; or (iii) the pendency of any action instituted against the Plan seeking its dissolution or liquidation or its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property
of business, unless this License Agreement has been earlier terminated
under paragraph 15(a); or (iv) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans and/or the Licensed Marks.

**Amended as of March 16, 2006**

(c). To the extent not otherwise provided therein, neither: (i) the Membership Standards Applicable to Regular Members of BCBSA; nor (ii) the rules and regulations governing Government Programs and certain other uses; nor (iii) the rules and regulations governing mediation and mandatory dispute resolution, may be amended unless and until each such amendment is first adopted by the affirmative vote of threefourths of the Plans and of threefourths of the total then current weighted vote of all the Plans. The rules and regulations governing National Accounts and other national programs required by the Membership Standards Applicable to Regular Members of BCBSA (Exhibit 2) are contained, in addition to those set forth in Exhibit 3, in the following documents, as amended from time to time: (1) the Inter-Plan Programs Policies and Provisions; (2) Inter-Plan Medicare Advantage Program Policies and Provisions. The voting requirements specified in rules and regulations governing such national programs may not be amended unless and until each such amendment is first adopted by the affirmative vote of three-fourths of the Plans and of three-fourths of the total then current weighted vote of all the Plans.

**Amended as of November 21, 2014**

-4a-

(d). The Plan may operate as a for-profit company on the following conditions:

(i) The Plan shall discharge all responsibilities which it has to the Association and to other Plans by virtue of this Agreement and the Plan's membership in BCBSA.

(ii) The Plan shall not use the licensed Marks and Name, or any derivative thereof, as part of its legal name or any symbol used to identify the Plan in any securities market. The Plan shall use the Licensed Marks and Name as part of its trade name within its service area for the sale, marketing and administration of health care and related services in the service area.

(iii) The Plan's license to use the Licensed Marks and Name shall automatically terminate effective: (a) thirty days after the Plan knows, or there is an SEC filing indicating that, any Institutional Investor, has become the Beneficial Owner of securities representing 10% or more of the voting power of the Plan ("Excess Institutional Voter"), unless such Excess Institutional Voter shall cease to be an Excess Institutional Voter prior to such automatic termination becoming effective; (b) thirty days after the Plan knows, or there is an SEC filing indicating that, any Noninstitutional Investor has become the Beneficial Owner of securities representing 5% or more of the voting power of the Plan ("Excess Noninstitutional Voter") unless such Excess Noninstitutional Voter shall cease to be an Excess Noninstitutional Voter prior to such automatic termination becoming effective; (c) thirty days after the Plan knows, or there is an SEC filing indicating that, any Person has become the Beneficial Owner of 20% or more of the Plan's then outstanding common stock or other equity securities which (either by themselves or in combination) represent an ownership interest of 20% or more pursuant to determinations made under paragraph 9(d)(iv) below ("Excess Owner"), unless such Excess Owner shall cease to be an Excess Owner prior to such automatic termination becoming effective; (d) ten business days after individuals who at the time the Plan went public constituted the Board of Directors of the Plan (together with any new directors whose election to the Board was approved by a vote of 2/3 of the directors then still in office who were directors at the time the Plan went public or whose election or nomination was previously so approved) (the "Continuing Directors") cease for any reason to constitute a majority of the Board of Directors; or (e) ten business days after the Plan consolidates with or merges with or into any person or conveys, assigns, transfers or sells all or substantially all of its assets to any person other than a merger in which the Plan is the surviving entity and immediately after which merger, no person is an Excess Institutional Voter, an Excess Noninstitutional Voter or an Excess Owner: provided that, if requested by the affected Plan in a writing received by BCBSA prior to such automatic termination

**Amended as of September 17, 1997**

becoming effective, the provisions of this paragraph 9(d)(iii) may be waived, in whole or in part, upon the affirmative vote of a majority of the disinterested Plans and a majority of the total then current weighted vote of the disinterested Plans. Any waiver so granted may be conditioned upon such additional requirements (including but not limited to imposing new and independent grounds for termination of this License) as shall be approved by the affirmative vote of a majority of the disinterested Plans and a majority of the total then current weighted vote of the disinterested Plans. If a timely waiver request is received, no automatic termination shall become effective until the later of: (1) the conclusion of the applicable time period specified in paragraphs 9(d)(iii)(a)-(d) above, or (2) the conclusion of the first Member Plan meeting after receipt of such a waiver request.

In the event that the Plan's license to use the Licensed Marks and Name is terminated pursuant to this Paragraph 9(d)(iii), the license may be reinstated in BCBSA's sole discretion if, within 30 days of the date of such termination, the Plan demonstrates that the Person referred to in clause (a), (b) or (c) of the preceding paragraph is no longer an Excess Institutional Voter, an Excess Noninstitutional Voter or an Excess Owner.

(iv) The Plan shall not issue any class or series of security other than (i) shares of common stock having identical terms or options or derivatives of such common stock, (ii) non-voting, non-convertible debt securities or (iii) such other securities as the Plan may approve, provided that BCBSA receives notice at least thirty days prior to the issuance of such securities, including a description of the terms for such securities, and BCBSA shall have the authority to determine how such other securities will be counted in determining whether any Person is an Excess Institutional Voter, Excess Noninstitutional Voter or an Excess Owner.

(v) For purposes of paragraph 9(d)(iii), the following definitions shall apply:

(a) "Affiliate" and "Associate" shall have the respective meanings ascribed to such terms in Rule 12b-2 of the General Rules and Regulations under the Securities Exchange Act of 1934, as amended and in effect on November 17, 1993 (the "Exchange Act").

(b) A Person shall be deemed the "Beneficial Owner" of and shall be deemed to "beneficially own" any securities:

**Amended as of September 17, 1997**

-5a-

(i) which such Person or any of such Person's Affiliates or Associates beneficially owns, directly or indirectly;

(ii) which such Person or any of such Person's Affiliates or Associates has (A) the right to acquire (whether such right is exercisable immediately or only after the passage of time) pursuant to any agreement, arrangement or understanding, or upon the exercise of conversion rights, exchange rights, warrants or options, or otherwise; or (B) the right to vote pursuant to any agreement, arrangement or understanding; provided, however, that a Person shall not be deemed the Beneficial Owner of, or to beneficially own, any security if the agreement, arrangement or understanding to vote such security (1) arises solely from a revocable proxy or consent given to such Person in response to a public proxy or consent solicitation made pursuant to, and in accordance with, the applicable rules and regulations promulgated under the Exchange Act and (2) is not also then reportable on Schedule 13D under the Exchange Act (or any comparable or successor report); or

(iii) which are beneficially owned, directly or indirectly, by any other Person (or any Affiliate or Associate thereof) with which such Person (or any of such Person's Affiliates or Associates) has any agreement, arrangement or understanding (other than customary agreements with and between underwriters and selling group members with respect to a bona fide public offering of securities) relating to the acquisition, holding, voting (except to the extent contemplated by the proviso to (b)(ii)(B) above) or disposing of any securities of the Plan.

Notwithstanding anything in this definition of Beneficial Ownership to the contrary, the phrase "then outstanding," when used with reference to a Person's Beneficial Ownership of securities of the Plan, shall mean the number of such securities then issued and outstanding together with the number of such securities not then actually issued and outstanding which such Person would be deemed to own beneficially hereunder.

(c) A Person shall be deemed an “Institutional Investor” if (but only if) such Person (i) is an entity or group identified in the SEC’s Rule 13d-1(b)(1)(ii) as constituted on June 1, 1997, and (ii) every filing made by such Person with the SEC under Regulation 13D-G (or any successor Regulation) with respect to such Person’s Beneficial Ownership of Plan securities shall have contained a certification identical to the one required by item 10 of SEC Schedule 13G as constituted on June 1, 1997.

(d) “Noninstitutional Investor” means any Person who is not an Institutional Investor.

(e) Person" shall mean any individual, firm, partnership, corporation, trust, association, joint venture or other entity, and shall include any successor (by merger or otherwise) of such entity.

**Amended as of September 17, 1997**

-5b-

(The next page is page 6)

10. This License Agreement shall remain in effect: (a) until terminated as provided herein; or (b) until this and all such other License Agreements are terminated by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans; (c) until terminated by the Plan upon eighteen (18) months written notice to BCBSA or upon a shorter notice period approved by BCBSA in writing at its sole discretion.

11. Except as otherwise provided in paragraph 15 below or by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans, or unless this and all such other License Agreements are simultaneously terminated by force of law, the termination of this License Agreement for any reason whatsoever shall cause the reversion to BCBSA of all rights in and to the Licensed Marks and Name, and the Plan agrees that it will promptly discontinue all use of the Licensed Marks and Name, will not use them thereafter, and will promptly, upon written notice from BCBSA, change its corporate name so as to eliminate the Licensed Name therefrom.

12. The license hereby granted to Plan to use the Licensed Marks and Name is and shall be personal to the Plan so licensed and shall not be assignable by any act of the Plan, directly or indirectly, without the written consent of BCBSA. Said license shall not be assignable by operation of law, nor shall Plan mortgage or part with possession or control of this license or any right hereunder, and the Plan shall have no right to grant any sublicense to use the Licensed Marks and Name.

13. BCBSA shall maintain appropriate service mark registrations of the Licensed Marks and BCBSA shall take such lawful steps and proceedings as may be necessary or proper to prevent use of the Licensed Marks by any person who is not authorized to use the same. Any actions or proceedings undertaken by BCBSA under the provisions of this paragraph shall be at BCBSA's sole cost and expense. BCBSA shall have the sole right to determine whether or not any legal action shall be taken on account of unauthorized use of the Licensed Marks, such right not to be unreasonably exercised. The Plan shall report any unlawful usage of the Licensed Marks to BCBSA in writing and agrees, free of charge, to cooperate fully with BCBSA's program of enforcing and protecting the service mark rights, trade name rights and other rights in the Licensed Marks.

14. The Plan hereby agrees to save, defend, indemnify and hold BCBSA And any other Plan(s) harmless from and against all claims, damages, liabilities and Costs of every kind, nature and description which may arise as a result of the activities of the Plan or of any hospital, medical group, clinic or other provider of health services that is owned or controlled directly or indirectly by Plan. BCBSA hereby agrees to save, defend, indemnify and hold the Plan and any other Plan(s) harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise exclusively and directly as a result of the activities of BCBSA.

**Amended as of June 21, 2012**

15. (a). This Agreement shall automatically terminate upon the occurrence of any of the following events: (i) a voluntary petition shall be filed by the Plan or by BCBSA seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against the Plan or BCBSA seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by the Plan or BCBSA or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Plan or BCBSA respectively, or (iii) an order for relief is entered against the Plan or BCBSA in any case under the bankruptcy laws of the United States, or the Plan or BCBSA is adjudged bankrupt or insolvent (as that term is defined in the Uniform Commercial Code as enacted in the state of Illinois) by any court of competent jurisdiction, or (iv) the Plan or BCBSA makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of the Plan or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by the Plan or BCBSA seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against the Plan or BCBSA seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by the Plan or BCBSA or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Plan or BCBSA respectively, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association’s Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of the Plan's or BCBSA's property or business is appointed, or the Plan or BCBSA is ordered dissolved or liquidated, or (ix) the Plan shall fail to pay its dues and shall not cure such failure within thirty (30) days of receiving written notice thereof, or (x) if, due to regulatory action, the Plan together with any applicable Controlled Affiliate becomes unable to do business using the Names and Marks in any State or portion thereof included in its Service Area, provided that: (i) automatic termination shall not occur prior to the exhaustion by any such Plan of its rights to appeal or challenge such regulatory action; and (ii) in the event the Plan is licensed to do business using the Names and Marks in multiple States or portions of States, the termination of its License Agreement shall be solely limited to the State(s) or portions thereof in which the regulatory action applies. By not appealing or challenging such regulatory action within the time prescribed by law or regulation, and in any event no later than 120 days after such action is taken, a Plan shall be deemed to have exhausted its rights to appeal or challenge, and automatic termination shall proceed.

Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Plan's or BCBSA's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 15(a)(vii) and (viii) of this Agreement.

**Amended as of March 26, 2015**

-7a-

(b). BCBSA, or the Plans (as provided and in addition to the rights conferred in Paragraph 10(b) above), may terminate this Agreement immediately upon written notice upon the occurrence of either of the following events: (a) the Plan or BCBSA becomes insolvent (as that term is defined in the Uniform Commercial Code enacted in the state of Illinois), or (b) any final judgment against the Plan or BCBSA remains unsatisfied or unbonded of record for a period of sixty (60) days or longer.

(c). If this License Agreement is terminated as to BCBSA for any reason stated in subparagraphs 15(a) and (b) above, the ownership of the Licensed Marks shall revert to each of the Plans.

(d). Upon termination of this License Agreement or any Controlled Affiliate License Agreement of a Larger Controlled Affiliate, as defined in Exhibit 1 to this License Agreement, the following conditions shall apply, except that, in the event of a partial termination of this Agreement pursuant to Paragraph 15 (a)(x)(ii) of this Agreement, the notices, national account listing, payment and audit right listed below shall be applicable solely with respect to the geographic area for which the Plan's license to use the Licensed Names and Marks is terminated:

(i) The terminated entity shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the terminated entity or its Controlled Affiliates under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA, subject to any conflicting state law and state regulatory requirements. This notice shall be mailed within 15 days after termination or, if termination is pursuant to paragraph 10(d) of this Agreement, within 15 days after the written notice to BCBSA described in paragraph 10(d).

(ii) The terminated entity shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the terminated entity is involved (in a Control, Participating or Servicing capacity), identifying the national account and the terminated entity's role therein. For those accounts where the terminated entity is the Control Plan, the Plan must also indicate the Participating and Servicing Plans in the national account syndicate.

**Amended as of June 16, 2005**

(iii) Unless the cause of termination is an event stated in paragraph 15(a) or (b) above respecting BCBSA, the Plan and its Licensed Controlled Affiliates shall be jointly liable for payment to BCBSA of an amount equal to the Re-Establishment Fee (described below) multiplied by the number of Licensed Enrollees of the terminated entity and its Licensed Controlled Affiliates;

provided that if any other Plan is permitted by BCBSA to use marks or names licensed by BCBSA in the Service Area established by this Agreement, the Re-Establishment Fee shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the terminated entity and its Licensed Controlled Affiliates and the denominator of which is the total number of Licensed Enrollees in the Service Area. The Re-Establishment Fee shall be indexed to a base fee of $80. The Re-Establishment Fee through December 31, 2005 shall be $80. The Re-Establishment Fee for calendar years after December 31, 2005 shall be adjusted on January 1 of each calendar year up to and including January 1, 2010 and shall be the base fee multiplied by 100% plus the cumulative percentage increase or decrease in the Plans' gross administrative expense (standard BCBSA definition) per Licensed Enrollee since December 31, 2004. The adjustment shall end on January 1, 2011, at which time the Re-Establishment Fee shall be fixed at the then-current amount and no longer automatically adjusted. For example, if the Plans' gross administrative expense per Licensed Enrollee was $278.60, $285.00 and $290.00 for calendar year end 2004, 2005 and 2006, respectively, the January 1, 2007 Re-Establishment Fee would be $83.27 (100% of the base fee plus $1.84 for calendar year 2005 and $1.43 for calendar year 2006). Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (a) the end of the last fiscal year of the terminated entity which ended prior to termination or (b) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph (d)(iii) shall be due only

**Amended as of June 16, 2005**

-8a-

to the extent that, in BCBSA's opinion, it does not cause the net worth of the Plan to fall below 100% of the Health Risk-Based Capital formula or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this sub paragraph by the affirmative vote of three-fourths of the Plans and three-fourths of the
total then current weighted vote of all the Plans), measured as of the date of termination and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plan or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. At least 50% of the Re-Establishment Fee shall be awarded to the Plan (or Plans) that receive the new license(s) for the service area(s) at issue; provided, however, that such award shall not become due or payable until all disputes, if any, regarding the amount of and BCBSA's right to such Re-Establishment Fee have been finally resolved; and provided further that the award shall be based on the final amount actually received by BCBSA. The Board of Directors shall adopt a resolution which it may amend from time to time that shall govern BCBSA's use of its portion of the award. In the event that the terminated entity's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Plan (and/or its Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph only to the extent that such payments exceed the amounts due to BCBSA pursuant to subparagraph 15(d)(vi) and any costs associated with reestablishing the Service Area, including any payments made by BCBSA to a Plan or Plans (or their Licensed Controlled Affiliates) for purposes of replacing the terminated entity.

(iv) The terminated entity shall comply with all financial settlement procedures set forth in BCBSA's License Termination Contingency Plan, as amended from time to time and shall work diligently and in good faith with

**Amended as of June 16, 2005**

-8b-

BCBSA, any Alternative Control Licensee or Replacement Licensee and any existing or potential new account for Blue-branded products and services to minimize the disruption of termination, and honor, to the fullest extent possible, the desire of accounts to continue to receive or obtain Blue-branded products and services through a new Licensee ("Transition"). Such diligence and good faith on the part of the terminated entity shall include, but not be limited to: (a) working cooperatively with BCBSA to protect the
Names and Marks from potential harm; (b) cooperating with BCBSA's use of the Names and Marks in the terminated entity's former service area during the termination and Transition; (c) transmitting, upon the request of an existing Blue account or of BCBSA with
consent and on behalf of an existing Blue account, all member and account-data relating to the Federal Employee Program to BCBSA, and all member and account data relating to other programs to an Alternative Control Licensee or Replacement Licensee; (d) working with BCBSA and the Alternative Control or Replacement Licensee with respect to potential new Blue accounts headquartered in the terminated entity's former service area; (e) continuing to service Blue accounts during the Transition; (f) continuing to comply with National Programs, Federal Employee Program and NASCO policies and procedures and all voluntary BCBSA programs, policies and performance standards, such as Away From Home Care, including being responsible for payment of all penalties for non-compliance duly levied in conformity with the License Agreements, Membership Standards, or the Federal Employee Program agreements, that may arise during the Transition; (g) maintaining and providing access to its provider networks, as defined by Federal Employee Program agreements and National Account Program Policies and Provisions, and Inter-Plan Programs Policies and Provisions, and making those networks and discounts available to members and providers who participate in National Programs and the Federal Employee Program during the Transition; (h) maintaining its technical connections and processing capabilities during the Transition; and (i) working diligently to conclude all financial settlements and account reconciliations as negotiated in the termination transition agreement.

**Amended as of November 16, 2006**

-8c-

(v) Notwithstanding any other provision in this Agreement, BCBSA shall have the right, with the approval of its Board of Directors, to assess additional fines against the terminated entity during the Transition in the event it fails to maintain and provide access to provider networks as defined by Federal Employee Program agreements, National Account Program Policies and Provisions, and Inter-Plans Programs Policies and
Provisions, and/or pass on applicable discounts. Such
fines shall be in addition to any other assessments,
fees or liquidated damages payable herein, or under existing policies and programs and shall be imposed to make whole BCBSA and/or the Plans. Terminated entity shall pay any such fines to BCBSA no later than 30 days after they are approved by the Board of Directors.

(vi) BCBSA shall have the right to examine and audit and/or hire at terminated entity's expense a third-party auditor to examine and audit the books and records of the terminated entity and its Licensed Controlled Affiliates to verify compliance with the terms and requirements of this paragraph 15(d).

(vii) Subsequent to termination of this Agreement, the terminated entity and its affiliates, agents, and employees shall have an ongoing and continuing obligation to protect all BCBSA and Blue Licensee data that was acquired or accessed during the period this Agreement was in force, including but not limited to all confidential processes, pricing, provider, discount and other strategic and competitively sensitive information ("Blue Information") from disclosure, and shall not, either alone or with another entity, disclose such Blue Information or use it in any manner to compete without the express written permission of BCBSA.

(viii) As to a breach of 15 (d) (i), (ii), (iii), (iv), (vi), or (vii) the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 15 (d) (i), (ii), (iv), (vi), or (vii) by the Plan, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

**Amended as of November 16, 2006**

-8d-

(ix) In the event that the terminated entity's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Plan and its Licensed Controlled Affiliates shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

(e). BCBSA shall be entitled to enjoin the Plan or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this License Agreement unless the License Agreement has been terminated pursuant to paragraph 10 (d) of this Agreement upon the required six (6) month written notice.

(f). BCBSA acknowledges that it is not the owner of assets of the Plan.

**Amended as of June 16, 2006**

16. This Agreement supersedes any and all other agreements between the parties with respect to the subject matter herein, and contains all of the covenants and agreements of the parties as to the licensing of the Licensed Marks and Name. This Agreement may be amended only by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

17. If any provision or any part of any provision of this Agreement is judicially declared unlawful, each and every other provision, or any part of any provision, shall continue in full force and effect notwithstanding such judicial declaration.

18. No waiver by BCBSA or the Plan of any breach or default in performance on the part of BCBSA or the Plan or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

19a. All notices provided for hereunder shall be in writing and shall be sent in duplicate by regular mail to BCBSA or the Plan at the address currently published for each by BCBSA and shall be marked respectively to the attention of the President and, if any, the General Counsel, of BCBSA or the Plan.

19b. Except as provided in paragraphs 9(b), 9(d)(iii), 15(a), and 15(b) above, this Agreement may be terminated for a breach only upon at least 30 days' written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to the Member Plans.

19c. For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-six (36) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

**Amended as of June 16, 2006**

(The next page is page 9)

20. Nothing herein contained shall be construed to constitute the parties hereto as partners or joint venturers, or either as the agent of the other, and Plan shall have no right to bind or obligate BCBSA in any way, nor shall it represent that it has any right to do so. BCBSA shall have no liability to third parties with respect to any aspect of the business, activities, operations, products, or services of the Plan.

21. This Agreement shall be governed, construed and interpreted in accordance with the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

**BLUE CROSS AND BLUE SHIELD ASSOCIATION**

**EXHIBIT 1**

**BLUE SHIELD**
**CONTROLLED AFFILIATE LICENSE AGREEMENT**
**(Includes revisions adopted by Member Plans through their September 17, 2020 meeting)**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Shield Plan, known as _____ ("Plan" or "Sponsoring Plan"), which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, Plan and Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name");

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

**1. GRANT OF LICENSE**

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with: (i) health care plans and related services, as defined in BCBSA's License Agreement with Plan, and administering the non-health portion of workers' compensation insurance, and (ii) underwriting the indemnity portion of workers' compensation insurance, provided that Controlled Affiliate's total premium revenue comprises less than 15 percent of the Sponsoring Plan's net subscription revenue.

This grant of rights is non-exclusive and is limited to the Service Area served by the Plan. Subject to Paragraph 3A(3) of this Agreement, Controlled Affiliate may use the Licensed Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Service Area under any name or mark; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market, unless such Controlled Affiliate is a not-for-profit company which may use the Licensed Marks and Name, or an approved derivative therefor, to identify itself in debt securities markets. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

**Amended as of March 26, 2015**

**2. QUALITY CONTROL**

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by Plan or by BCBSA) a report or reports to Plan and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that Plan and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that the Sponsoring Plan has:

(1) The legal authority directly or indirectly through wholly-owned subsidiaries:

(a) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; and

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan does not concur; and

(c) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by the Sponsoring Plan before the Controlled Affiliate can:

(i) change its legal and/or trade names;

(ii) change the geographic area in which it operates;

(iii) change any of the type(s) of businesses in which it engages;

**Amended as of September 19, 2014**

(iv) create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business;

(v) sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced;

(vi) make any loans or advances except in the ordinary course of business;

(vii) enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate);

(viii) conduct any business other than under the Licensed Marks and Name;

(ix) take any action that Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Sponsoring Plan directly or indirectly through wholly owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate, provided that in instances where the Sponsoring Plan formed a publicly traded Controlled Affiliate Licensee and such publicly traded Controlled Affiliate Licensee owns and controls other Controlled Affiliate Licensees, the Sponsoring Plan directly or indirectly shall own and control at least 50% of any Controlled Affiliate that is indirectly owned and controlled by the publicly traded Controlled Affiliate Licensee.

Or

(2) The legal authority directly or indirectly through wholly-owned subsidiaries;

(a) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof and to:

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; and

c) to exercise control over the policy and operations of the Controlled Affiliate.

**Amended as of March 26, 2015**

-3-

In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate, provided that in instances where the Sponsoring Plan formed a publicly traded Controlled Affiliate Licensee and such publicly traded Controlled Affiliate Licensee owns and controls other Controlled Affiliate Licensees, the Sponsoring Plan directly or indirectly shall own and control more than 50% of any Controlled Affiliate that is indirectly owned and controlled by the publicly traded Controlled Affiliate Licensee.

Or

(3) With respect to a Controlled Affiliate that is 100% controlled by Plans including the Sponsoring Plan and which offers solely Medicaid, Medicare Advantage PPO, Medicare Advantage HMO and/or Special Need Plans products and services, the Sponsoring Plan has the legal authority together with such other Plans:

(a) to select all members of the Controlled Affiliate's governing body; and

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate; and

(c) to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such control and ownership by Plans must be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute a separate Addendum to Controlled Affiliate License Agreement attached hereto as Exhibit B-1 for each product noted in Paragraph 2E(3) that is licensed to use the Marks.

Or

(4) With respect to a Controlled Affiliate that is 100% controlled by a Sponsoring Plan which on a Blue-branded basis offers solely a Basic Medicare Part D Prescription Drug product, the Sponsoring Plan has the legal authority:

(a) to select all members of the Controlled Affiliate's governing body; and

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate; and

(c) to exercise control over the policy and operations of the Controlled Affiliate.

**Amended June 20, 2019**

In addition, the Sponsoring Plan shall own 100% of any for-profit Controlled Affiliate. Such 100% control and ownership by Sponsoring Plan must be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA, Further, the Participating Plan as defined in Exhibit B-2 and the Sponsoring Plan shall execute the Addendum to Controlled Affiliate License Agreement attached hereto as Exhibit B-2.

Or

(5) With respect to a Controlled Affiliate that is operating as a clinic, absent an alternative method of control approved in writing by BCBSA, the Sponsoring Plan shall have bonafide operational control over the Controlled Affiliate as specified in Exhibit A, Standard 1 (E) and the Guidelines to Administer Standard 1 (E). In addition, if the clinic is for-profit, the Sponsoring Plan shall own at least 50% of the Controlled Affiliate and prevent any change in the articles of incorporation, bylaws or other establishing documents of the Controlled Affiliate with which it does not concur.

**3. FOR-PROFIT, PUBLICLY TRADED LICENSEES**

A. The Controlled Affiliate may operate as a for-profit publicly traded company on the following conditions:

(1) The Controlled Affiliate shall discharge all responsibilities which it has to the Association and to other Plans by virtue of this Agreement.

(2) The Controlled Affiliate shall provide 90 days advance written notice to BCBSA prior to the initial filing with the SEC.

(3) The Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of its legal name or any symbol used to identify the Controlled Affiliate in any securities market. The Controlled Affiliate shall use the Licensed Marks and Name as part of its trade name within its service area for the sale, marketing and administration of health care and related services in the service area.

(4) The Controlled Affiliate's license to use the Licensed Marks and Name shall automatically terminate effective: (a) thirty days after the Controlled Affiliate knows, or there is an SEC filing indicating that, any Institutional Investor, has become the Beneficial Owner of securities representing 10% or more of the voting power of the Controlled Affiliate ("Excess Institutional Voter"), unless such Excess Institutional Voter shall cease to be an Excess Institutional Voter prior to such automatic termination becoming effective; (b) thirty days after the Controlled Affiliate knows, or there is an SEC filing indicating that, any Noninstitutional Investor, other than a Plan or Plans or Controlled Affiliate licensee or licensees has become the Beneficial Owner of securities representing 5% or more of the voting power of the Controlled Affiliate ("Excess Noninstitutional Voter") unless such Excess Noninstitutional Voter shall cease to be an Excess Noninstitutional Voter prior to such automatic termination becoming effective; (c) thirty days after

**Amended as of June 29, 2019**

the Controlled Affiliate knows, or there is an SEC filing indicating that, any Person has become the Beneficial Owner, other than a Plan or Plans or Controlled Affiliate licensee or licensees, of 20% or more of the Controlled Affiliate's then outstanding common stock or other equity securities which (either by themselves or in combination) represent an ownership interest of 20% or more pursuant to determinations made under Paragraph 3A(4) below ("Excess Owner"), unless such Excess Owner shall cease to be an Excess Owner prior to such automatic termination becoming effective; (d) ten business days after individuals who at the time the Controlled Affiliate went public constituted the Board of Directors of the Controlled Affiliate (together with any new directors whose election to the Board was approved by a vote of 2/3 of the directors then still in office who were directors at the time the Controlled Affiliate went public or whose election or nomination was previously so approved) (the "Continuing Directors") cease for any reason to constitute a majority of the Board of Directors; or (e) ten business days after the Controlled Affiliate consolidates with or merges with or into any person or conveys, assigns, transfers or sells all or substantially all of its assets to any person other than a merger in which the Sponsoring Plan is the surviving entity and immediately after which merger, no person is an Excess Institutional Voter, an Excess Noninstitutional Voter or an Excess Owner: provided that, if requested by the affected Controlled Affiliate in a writing received by BCBSA prior to such automatic termination becoming effective, the provision of this paragraph 3A(4) may be waived, in whole or in part, upon the affirmative vote of a majority of the disinterested Plans and a majority of the total then current weighted vote of the disinterested Plans. Any waiver so granted may be conditioned upon such additional requirements (including but not limited to imposing new and independent grounds for termination of this License) as shall be approved by the affirmative vote of a majority of the disinterested Plans and a majority of the total then current weighted vote of the disinterested Plans. If a timely waiver request is received, no automatic termination shall become effective until the later of: (1) the conclusion of the applicable time period specified in paragraphs 3A(4)(a)-(d) above, or (2) the conclusion of the first Member Plan meeting after receipt of such a waiver request.

In the event that the Controlled Affiliate's license, or any other license, to use the Licensed Marks and Name is terminated pursuant to Paragraph 3A(4), the license may be reinstated in BCBSA's sole discretion if, within 30 days of the date of such termination, the Controlled Affiliate demonstrates that the Person referred to in clause (a), (b) or (c) of the preceding paragraph is no longer an Excess Institutional Voter, an Excess Noninstitutional Voter or an Excess Owner.

(5) The Controlled Affiliate shall not issue any class or series of security other than (i) shares of common stock having identical terms or options or derivatives of such common stock, (ii) non-voting, non-convertible debt securities, or (iii) such other securities as the Controlled Affiliate may approve, provided that BCBSA receives notice at least thirty days prior to the issuance of such securities, including a description of the terms for such securities, and BCBSA shall have the authority to determine how such other securities will be counted in determining whether any Person is an Excess Institutional Voter, Excess Noninstitutional Voter or an Excess Owner. **Amended as of March 26, 2015**

(6) For purposes of paragraph 3(A) above, the following definitions shall apply:

(i) "Affiliate" and "Associate" shall have the respective meanings ascribed to such terms in Rule 12b-2 of the General Rules and Regulations under the Securities Exchange Act of 1934, as amended and in effect on November 17, 1993 (the "Exchange Act").

(ii) A Person shall be deemed the "Beneficial Owner" of and shall be deemed to "beneficially own" any securities:

(1) which such Person or any of such Person's Affiliates or Associates beneficially owns, directly or indirectly;

(2) which such Person or any of such Person's Affiliates or Associates has (A) the right to acquire (whether such right is exercisable immediately or only after the passage of time) pursuant to any agreement, arrangement or understanding, or upon the exercise of conversion rights, exchange rights, warrants or options, or otherwise; or (B) the right to vote pursuant to any agreement, arrangement or understanding; provided, however, that a Person shall not be deemed the Beneficial Owner of, or to beneficially own, any security if the agreement, arrangement or understanding to vote such security (1) arises solely from a revocable proxy or consent given to such Person in response to a public proxy or consent solicitation made pursuant to, and in accordance with, the applicable rules and regulations promulgated under the Exchange Act and (2) is not also then reportable on Schedule 13D under the Exchange Act (or any comparable or successor report); or

(3) which are beneficially owned, directly or indirectly, by any other Person (or any Affiliate or Associate thereof) with which such Person (or any of such Person's Affiliates or Associates) has any agreement, arrangement or understanding (other than customary agreements with and between underwriters and selling group members with respect to a bona fide public offering of securities) relating to the acquisition, holding, voting (except to the extent contemplated by the proviso to (ii)2(B) above) or disposing of any securities of the Controlled Affiliate.

Notwithstanding anything in this definition of Beneficial Ownership to the contrary, the phrase "then outstanding", when used with reference to a Person's Beneficial Ownership of securities of the Controlled Affiliate, shall mean the number of such securities then issued and outstanding together with the number of such securities not then actually issued and outstanding which such Person would be deemed to own beneficially hereunder.

**Amended as of March 26, 2015**

(iii) A Person shall be deemed an "Institutional Investor" if (but only if) such Person (i) is an entity or group identified in the SEC's Rule 13d-1(b)(1)(ii) as constituted on June 1, 1997, and (ii) every filing made by such Person with the SEC under Regulation 13D-G (or any successor Regulation) with respect to such Person's Beneficial Ownership of Plan securities shall have contained a certification identical to the one required by item 1 of SEC Schedule 13G as constituted on June 1, 1997.

(iv) "Noninstitutional Investor" means any Person who is not an Institutional Investor.

(v) "Person" shall mean any individual, firm, partnership, corporation, trust, association, joint venture or other entity, and shall include any successor (by merger or otherwise) of such entity.

**4. SERVICE MARK USE**

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within its Service Area may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Service Area the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. If Controlled Affiliate meets the standards of 2E(1) but not 2E(2) above and any of Controlled Affiliate's advertising or promotional material is reasonably determined by BCBSA and/or the Plan to be in contravention of rules and regulations governing the use of the Licensed Marks and Name, Controlled Affiliate shall for ninety (90) days thereafter obtain prior approval from BCBSA of advertising and promotional efforts using the Licensed Marks and Name, approval or disapproval thereof to be forthcoming within five (5) business days of receipt of same by BCBSA or its designee.
In all advertising and promotional efforts, Controlled Affiliate shall observe the Service Area limitations applicable to Plan.

**Amended as of March 26, 2015**

E. Notwithstanding any other provision in the Plan's License Agreement with BCBSA or in this Agreement, Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name.

**5. SUBLICENSING AND ASSIGNMENT**

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

**6. INFRINGEMENT**

Controlled Affiliate shall promptly notify Plan and Plan shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that

may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require Plan or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to Plan and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

**7. LIABILITY INDEMNIFICATION**

Controlled Affiliate and Plan hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to: (i) Controlled Affiliate's rendering of services under the Licensed Marks and Name; or (ii) the activities of any hospital, medical group, clinic or other provider of health services that is owned or controlled directly or indirectly by Plan or Controlled Affiliate.

**8. LICENSE TERM**

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) the Plan ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Cross License Agreement the Plan ceases to be authorized to use the Licensed Names and Marks in the geographic area served by the Controlled Affiliate provided, however, that if the Controlled Affiliate is serving more than one State or portions thereof, the termination of this Agreement shall be

**Amended as of March 26, 2015**

limited to the State(s) or portions thereof in which the Plan's license to use the Licensed Marks and Names is terminated. By not appealing or challenging such regulatory action
within the time prescribed by law or regulation, and in any event no later than 120 days after such action is taken, a Plan shall be deemed to have exhausted its rights to appeal or challenge, and automatic termination shall proceed.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Plan or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Plan advising of the specific matters at issue and granting the Plan an opportunity to be heard and to present its response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial
insolvency; or (4) for a Smaller Controlled Affiliate (as defined in Exhibit A), failure to comply with any of the applicable requirements of Standards 2, 3, 4, 5 or 7 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph
8(E); or (6) failure by a Controlled Affiliate that meets the standards of 2E(1) but not 2E(2) above to obtain BCBSA's written consent to a change in the identity of any owner, in the extent of ownership, or in the identity of any person or entity with the authority to select or appoint members or board members, provided that as to publicly traded Controlled Affiliates this provision shall apply only if the change affects a person or entity that owns at least 5% of the Controlled Affiliate's stock before or after the change; or (7) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans, any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 8(B), 8(C) or 8(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Plan shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 8(B), 8(C) or 8(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between BCBSA, the Plan and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute

**Amended as of March 26, 2015**

resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided
in Paragraphs 8(B) and 8(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall
immediately terminate without any further action by any party or entity in the event that:

(1) Controlled Affiliate shall no longer comply with item 2(E) above;

(2) Appropriate dues, royalties and other payments for Controlled
Affiliate pursuant to paragraph 10 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be
filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of
the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate
is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to

**Amended as of March 26, 2015**

constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 8(E)(3)(vii) and (viii) of this Agreement.

(4) The for-profit, publicly traded Controlled Affiliate is terminated pursuant to Paragraph 3A(4) of this Agreement. In which case, the licenses of any controlled Affiliates directly or indirectly owned by the terminated for profit, publicly traded Controlled Affiliate also shall immediately terminate as provided for in paragraph 3A(4) of this Agreement

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 8(b) hereof, or in the event the Controlled Affiliate is a Larger Controlled Affiliate (as defined in Exhibit A), upon termination of this Agreement, the provisions of Paragraph 8.G. shall not apply and the following provisions shall apply, except that, in the event of a partial termination of this Agreement pursuant to Paragraph 8(B)(ii) of this Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the geographic area for which the Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA, subject to any conflicting state law and state regulatory requirements. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

**Amended as of March 26, 2015**

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan shall be jointly liable for payment to BCBSA of an amount equal to the Re-Establishment Fee (described below) multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any other Plan is permitted by BCBSA to use marks or names licensed by BCBSA in the Service Area established by this Agreement, the Re-Establishment Fee shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates and the denominator of which is the total number of Licensed Enrollees in the Service Area.

The Re-Establishment Fee shall be indexed to a base fee of $80. The Re-Establishment Fee through December 31, 2005 shall be $80. The Re-Establishment Fee for calendar years after December 31, 2005 shall be adjusted on January 1 of each calendar year up to and including January 1, 2010 and shall be the base fee multiplied by 100% plus the cumulative percentage increase or decrease in the Plans' gross administrative expense (standard BCBSA definition) per Licensed Enrollee since December 31, 2004. The adjustment shall end on January 1, 2011, at which time the Re-Establishment Fee shall be fixed at the then-current amount and no longer automatically adjusted. For example, if the Plans' gross administrative expense per Licensed Enrollee was $278.60, $285.00 and $290.00 for calendar year end 2004, 2005 and 2006, respectively, the January 1, 2007 Re-Establishment Fee would be $83.27 (100% of base fee plus $1.84 for calendar year 2005 and $1.43 for calendar year 2006. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Plan or any other Licensed Controlled Affiliates of the Plan to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this sub paragraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. At least 50% of the Re-Establishment Fee shall be awarded to the Plan (or Plans) that receive the new license(s) for the service area(s) at issue; provided, however, that such award shall not become due or payable until all disputes, if any, regarding the amount of and BCBSA's right to such Re-Establishment Fee have been finally resolved; and provided

**Amended as of March 26, 2015**

further that the award shall be based on the final amount actually received by BCBSA. The Board of Directors shall adopt a resolution which it may amend from time to time that shall govern BCBSA's use of its portion of the award. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Plan or its other Licensed Controlled Affiliates, as the
case may be) for payments made under this subparagraph 8.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 8.M. and any cost associated with reestablishing the Service Area, including any payments made by BCBSA to a Plan or Plans (or their Licensed Controlled Affiliates) for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to examine and audit and/or hire at
terminated entity's expense a third party auditor to examine and audit the books and records of the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan to verify compliance with this paragraph 8.H.

(5) Subsequent to termination of this Agreement, the terminated entity
and its affiliates, agents, and employees shall have an ongoing and continuing obligation to protect all BCBSA and Blue Licensee data that was acquired or accessed during the period this Agreement was in force, including but not limited to all confidential processes, pricing, provider, discount and other strategic and competitively sensitive information ("Blue Information") from disclosure, and shall not, either alone or with another entity, disclose such Blue Information or use it in any manner to compete without the express written permission of BCBSA.

(6) As to a breach of 8.H.(1), (2), (3), (4) or (5) the parties agree that
the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 8.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. This Agreement shall remain in effect until terminated by the
Controlled Affiliate or the Plan upon not less than eighteen (18) months written notice to the Association or upon a shorter notice period approved by BCBSA in writing at its sole discretion, or until terminated as otherwise provided herein. The Plan's right to terminate without cause upon such notice is unfettered and may be exercised in the Plan's sole discretion.

J. In the event the Controlled Affiliate is a Smaller Controlled Affiliate
(as defined in Exhibit A), the Controlled Affiliate agrees to be jointly liable for the amount described in H.3.and M. hereof upon termination of the BCBSA license agreement of any Larger Controlled Affiliate of the Plan.

K. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless the Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of the Plan's license agreement upon the required 18 months written notice.

**Amended as March 26, 2015**

L. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

M. In the event that the Plan has more than 50 percent voting control of the Controlled Affiliate under Paragraph 2(E)(2) above and is a Larger Controlled Affiliate (as defined in Exhibit A), then the vote called for in Paragraphs 8(C) and 8(D)
above shall require the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans.

N. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Plan, and any other Licensed Controlled Affiliates of the Plan shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

**9. DISPUTE RESOLUTION**

The parties agree that any disputes between them or between or among either of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Shield and Blue Shield Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

**10. LICENSE FEE**

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit C.

**11. JOINT VENTURE**

Nothing contained in the Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between Plan and Controlled Affiliate or between either and BCBSA.

**12. NOTICES AND CORRESPONDENCE**

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

**Amended as of March 26, 2015**

**13. COMPLETE AGREEMENT**

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

**14. SEVERABILITY**

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

**15. NONWAIVER**

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

**15A. VOTING**

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question.

Notwithstanding the foregoing provision, if there are thirty-six (36) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

**Amended as of March 26, 2015**

THIS PAGE IS INTENTIONALLY BLANK.

**16. GOVERNING LAW**

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

**17. HEADINGS**

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

**EXHIBIT A**

**CONTROLLED AFFILIATE LICENSE STANDARDS**
**September 2020**
**PREAMBLE**

For purposes of definition:

- A "smaller Controlled Affiliate:" (1) comprises less than fifteen percent (15%) of Sponsoring Plan's and its licensed Controlled Affiliates' total member enrollment (as reported on the BCBSA Quarterly Enrollment Report, excluding rider and freestanding coverage, and treating an entity seeking licensure as licensed);* or (2) underwrites the indemnity portion of workers' compensation insurance and has total premium revenue less than 15 percent of the Sponsoring Plan's net subscription revenue.

- A "larger Controlled Affiliate" comprises fifteen percent (15%) or more of Sponsoring Plan's and its licensed Controlled Affiliates' total member enrollment (as reported on the BCBSA Quarterly Enrollment Report, excluding rider and freestanding coverage, and treating an entity seeking licensure as licensed.)*

Changes in Controlled Affiliate status:

If **any** Controlled Affiliate's status changes regarding: its Plan ownership level, its risk acceptance or direct delivery of medical care, the Controlled Affiliate shall notify BCBSA within thirty (30) days of such occurrence in writing and come into compliance with the applicable standards within six (6) months.

If a smaller Controlled Affiliate's health and workers' compensation administration business reaches or surpasses fifteen percent (15%) of the total member enrollment of the Sponsoring Plan and licensed Controlled Affiliates, the Controlled Affiliate shall:

**Amended as of September 19, 2014**

**EXHIBIT A (continued)**

1. Within thirty (30) days, notify BCBSA of this fact in writing, including evidence that the Controlled Affiliate meets the minimum liquidity and capital (BCBSA "Health Risk-Based Capital (HRBC)" as defined by the NAIC and state-established minimum reserve) requirements of the larger Controlled Affiliate Financial Responsibility standard; and

2. Within six (6) months after reaching or surpassing the fifteen percent (15%) threshold, demonstrate compliance with all license requirements for a larger Controlled Affiliate.

If a Controlled Affiliate that underwrites the indemnity portion of workers' compensation insurance receives a change in rating or proposed change in rating, the Controlled Affiliate shall notify BCBSA within 30 days of notification by the external rating agency.

*For purposes of this calculation,

The numerator equals:

Applicant Controlled Affiliate's member enrollment, as defined in BCBSA's Quarterly Enrollment Report (excluding rider and freestanding coverage).

The denominator equals:

Numerator PLUS Sponsoring Plan and all other licensed Controlled Affiliates' member enrollment, as reported in BCBSA's Quarterly Enrollment Report (excluding rider and freestanding coverage).

**Amended as of September 19, 2014**

**EXHIBIT A (continued)**

## STANDARDS FOR LICENSED CONTROLLED AFFILIATES

Each licensed controlled affiliate shall be subject to certain standards as determined below:

**Amended as of June 20, 2019**

**EXHIBIT A (continued)**

**Standard 1 - Organization and Governance**

1A.) The Standard for more than 50% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA has the legal authority, directly or indirectly through wholly-owned subsidiaries: 1) to select members of the Controlled Affiliate's governing body having more than 50% voting control thereof; and 2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; and 3) to exercise control over the policy and operations of the Controlled Affiliate. In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own more than 50% of any for-profit Controlled Affiliate.

1B.) The Standard for 50% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA has the legal authority, directly or indirectly through wholly-owned subsidiaries:

1) to select members of the Controlled Affiliate's governing body having not less than 50% voting control thereof; and

2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Sponsoring Plan do not concur; and

3) to exercise control over the policy and operations of the Controlled Affiliate at least equal to that exercised by persons or entities (jointly or individually) other than the Sponsoring Plan.

**Amended September 19, 2014**

**EXHIBIT A (continued)**

Notwithstanding anything to the contrary in 1) through 3) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by the Sponsoring Plan before the Controlled Affiliate can:

- change the geographic area in which it operates
- change its legal and/or trade names
- change any of the types of businesses in which it engages
- create, or become liable for by way of guarantee, any indebtedness, other than indebtedness arising in the ordinary course of business
- sell any assets, except for sales in the ordinary course of business or sales of equipment no longer useful or being replaced
- make any loans or advances except in the ordinary course of business
- enter into any arrangement or agreement with any party directly or indirectly affiliated with any of the owners or persons or entities with the authority to select or appoint members or board members of the Controlled Affiliate, other than the Sponsoring Plan or other Plans (excluding owners of stock holdings of under 5% in a publicly traded Controlled Affiliate)
- conduct any business other than under the Licensed Marks and Name
- take any action that the Sponsoring Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Sponsoring Plan directly or indirectly through wholly-owned subsidiaries shall own at least 50% of any for-profit Controlled Affiliate.

**Amended September 27, 2018**

1C.) The Standard for a Controlled Affiliate that offers solely Medicaid, Medicare Advantage PPO, Medicare Advantage HMO and/or Special Need Plans products and service and has100% Plan control but less than 50% Sponsoring Plan Control:

A Controlled Affiliate shall be organized and operated in such a manner that (i) it offers solely Medicaid, Medicare Advantage PPO, Medicare Advantage HMO and/or Special Need Plans products and services; and (ii) a Plan authorized to use the Licensed Marks in the Service Area of the Controlled Affiliate pursuant to the separate Primary License Agreement with BCBSA (the "Sponsoring Plan,) has the legal authority together with Other Plans:

1) to select all members of the Controlled Affiliate's governing body; and

2) to prevent any change in the articles of incorporation, bylaws, or other establishing or governing documents of the Controlled Affiliate; and

3) to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan and such other Plans shall own 100% of any for-profit Controlled Affiliate, with the Sponsoring Plan and such other Plans each having an ownership interest. Such 100% control and ownership by Plans shall be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA. Further, the Sponsoring Plan and such other Plans shall execute the Addendum to Controlled Affiliate License.

1D). The Standard for a Controlled Affiliate that on a Blue-branded basis, only offers a Basic Medicare Part D Prescription Drug product and has 100% Plan control is:

A Controlled Affiliate shall be organized and operated in such a manner that (i) on a Blue-branded basis, it only offers a Basic Medicare Part D Prescription Drug product; and (ii) the Sponsoring Plan has the legal authority:

1) to select all members of the Controlled Affiliate's governing body; and

2) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate; and

3) to exercise control over the policy and operations of the Controlled Affiliate.

In addition, the Sponsoring Plan shall own 100% of any for-profit Controlled Affiliate. Such 100% control and ownership by Sponsoring Plan must be direct or, if indirect, solely through affiliates that are licensed to use marks owned by BCBSA.

Further, the Sponsoring Plan and Participating Plan shall execute the Addendum to Controlled Affiliate License.

1E). The Standard for a Controlled Affiliate that operates as a Clinic and the Sponsoring Plan has control of the Clinic is:

A Controlled Affiliate shall be organized in such a manner that it operates as a Clinic and Sponsoring Plan exercises operational control over the Controlled Affiliate.

In addition, if the Clinic is for-profit, the Sponsoring Plan shall own at least 50% of the Controlled Affiliate and prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate.

**Amended June 20, 2019**

**EXHIBIT A (continued)**

**Standard 2 - Financial Responsibility**

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers. If a risk-assuming Controlled Affiliate ceases operations for any reason, Blue Cross and/or Blue Cross Plan coverage will be offered to all Controlled Affiliate subscribers without exclusions, limitations or conditions based on health status. If a nonrisk-assuming Controlled Affiliate ceases operations for any reason, Sponsoring Plan will provide for services to its customers.
The requirements of the preceding two sentences shall apply to all lines of business unless a line of business is specially exempted from the requirement(s) by the BCBSA Board of Directors.

**Standard 3 - State Licensure/Certification**

3A.) The Standard for a Controlled Affiliate that employs, owns or contracts on a substantially exclusive basis for medical services is:

A Controlled Affiliate shall maintain unimpaired licensure or certification for its medical care providers to operate under applicable state laws.

3B.) The Standard for a Controlled Affiliate that does not employ, own or contract on a substantially exclusive basis for medical services is:

A Controlled Affiliate shall maintain unimpaired licensure or certification to operate under applicable state laws.

3C.) The Standard for a Controlled Affiliate that operates as a Clinic as defined in Standard 1(E) is:

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

**Standard 4 - Certain Disclosures**

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of 1) the structure of the Blue Cross and Blue Shield System; and 2) the independent nature of every licensee; and 3) the Controlled Affiliate's financial condition.

**Amended as of June 20, 2019**

**EXHIBIT A (continued)**

**Standard 5 - Reports and Records for Certain Smaller Controlled Affiliates**

For a smaller Controlled Affiliate that does not underwrite the indemnity portion of workers' compensation insurance, the Standard is:

A Controlled Affiliate and/or its Sponsoring licensed Plan shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

**Standard 6 - Other Standards for Larger Controlled Affiliates**

Standards 6(A) - (I) that follow apply to larger Controlled Affiliates.

Standard 6(A): Board of Directors

A Controlled Affiliate Governing Board shall act in the interest of its Corporation in providing cost-effective health care services to its customers. A Controlled Affiliate shall maintain a governing Board, which shall control the Controlled Affiliate, composed of a majority of persons other than providers of health care services, who shall be known as public members. A public member shall not be an employee of or have a financial interest in a health care provider, nor be a member of a profession which provides health care services.

Standard 6(B): Responsiveness to Customers

A Controlled Affiliate shall be operated in a manner responsive to customer needs and requirements.

Standard 6(C): Participation in National Programs

A Controlled Affiliate shall effectively and efficiently participate in each national program as from time to time may be adopted by the Member Plans for the purposes of providing portability of membership between the licensees and ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's Service Area.

**Amended as of September 19, 2014**

**EXHIBIT A (continued)**

Standard 6(C): Participation in National Programs (continued)

Such programs are applicable to licensees, and include:

1. BlueCard Program;
2. InterPlan Teleprocessing System (ITS);
3. National Account Programs;
4. Business Associate Agreement for Blue Cross and Blue Shield Licensees, effective April 14, 2003; and
5. Inter-Plan Medicare Advantage Program.

Standard 6(D): Financial Performance Requirements

In addition to requirements under the national programs listed in
Standard 6C: Participation in National Programs, a Controlled Affiliate shall take such action as required to ensure its financial performance in programs and contracts of an inter-licensee nature or where BCBSA is a party.

Standard 6(E): Cooperation with Plan Performance Response Process

A Controlled Affiliate shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Plan Performance Response Process and in addressing Controlled Affiliate performance problems identified thereunder.

Standard 6(F): Independent Financial Rating

A Controlled Affiliate shall obtain a rating of its financial strength from an independent rating agency approved by BCBSA's Board of Directors for such purpose.

Standard 6(G): Local and National Best Efforts

Notwithstanding any other provision in the Plan's License Agreement with BCBSA or in this License Agreement, during each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Shield Mark.

**Amended as of November 21, 2014**

**EXHIBIT A (continued)**

Standard 6(H): Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 6(I): Reports and Records

A Controlled Affiliate shall furnish to BCBSA on a timely and accurate basis reports and records relating to compliance with these Standards and the License Agreements between BCBSA and Controlled Affiliate. Such reports and records are the following:

A) BCBSA Controlled Affiliate Licensure Information Request; and

B) Triennial trade name and service mark usage material, including disclosure material; and

C) Changes in the ownership and governance of the Controlled Affiliate, including changes in its charter, articles of incorporation, or bylaws, changes in a Controlled Affiliate's Board composition, or changes in the identity of the Controlled Affiliate's Principal Officers, and changes in risk acceptance, contract growth, or direct delivery of medical care; and

D) Semi-annual “Health Risk-Based Capital (HRBC) Report” as defined by the NAIC, Annual Certified Audit Report, Insurance Department Examination Report, Annual Statement filed with State Insurance Department (with all attachments), and

**Amended as of November 17, 2011**

**EXHIBIT A (continued)**

Standard 6(J): Control by Unlicensed Entities Prohibited

No Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled Affiliate thereof to obtain control of the Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services.

**Standard 7 - Other Standards for Risk-Assuming Workers' Compensation Controlled Affiliates**

Standards 7(A) - (E) that follow apply to Controlled Affiliates that underwrite the indemnity portion of workers' compensation insurance.

Standard 7 (A): Financial Responsibility

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

Standard 7(B): Reports and Records

A Controlled Affiliate shall furnish, on a timely and accurate basis, reports and records relating to compliance with these Standards and the License Agreements between BCBSA and the Controlled Affiliate. Such reports and records are the following:

A. BCBSA Controlled Affiliate Licensure Information Request; and

B. Triennial trade name and service mark usage materials, including disclosure materials; and

C. Annual Certified Audit Report, Annual Statement as filed with the State Insurance Department (with all attachments), Annual NAIC's Risk-Based Capital Worksheets for Property and Casualty Insurers; and

D. Quarterly Estimated Risk-Based Capital for Property and Casualty Insurers, Insurance Department Examination Report; and

**Amended as of November 17, 2011**

**EXHIBIT A (continued)**

E. Notification of all changes and proposed changes to independent ratings within 30 days of receipt and submission of a copy of all rating reports; and

F. Changes in the ownership and governance of the Controlled Affiliate including changes in its charter, articles of incorporation, or bylaws, changes in a Controlled Affiliate's Board composition, Plan control, state license status, operating area, the Controlled Affiliate's Principal Officers or direct delivery of medical care.

Standard 7(C): Loss Prevention

A Controlled Affiliate shall apply loss prevention protocol to both new and existing business.

Standard 7(D): Claims Administration

A Controlled Affiliate shall maintain an effective claims administration process that includes all the necessary functions to assure prompt and proper resolution of medical and indemnity claims.

Standard 7(E): Disability and Provider Management

A Controlled Affiliate shall arrange for the provision of appropriate and necessary medical and rehabilitative services to facilitate early intervention by medical professionals and timely and appropriate return to work.

**Amended as of November 16, 2000**

**EXHIBIT A (continued)**

**Standard 8 - Cooperation with Controlled Affiliate License Performance Response Process Protocol**

A Controlled Affiliate and its Sponsoring Plan shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Controlled Affiliate License Performance Response Process Protocol (ALPRPP) and in addressing Controlled Affiliate compliance problems identified thereunder.

**Standard 9(A) - Participation in National Programs by Smaller Controlled Affiliates that were former Primary Licensees**

A smaller controlled affiliate that formerly was a Primary Licensee shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's service area and be subject to certain relevant financial and reporting requirements.

A. National program requirements include:
   - BlueCard Program;
   - Inter-Plan Teleprocessing System (ITS);
   - National Account Programs.

B. Financial Requirements include:
   - Standard 6(D): Financial Performance Requirements and Standard 6(H): Financial Responsibility; or
   - A financial guarantee covering the Controlled Affiliate's Inter-Plan Programs obligations in a form, and from a guarantor, acceptable to BCBSA.

**Amended as of November 21, 2014**

**EXHIBIT A (continued)**

**Standard 9(A) - Participation in National Programs by Smaller Controlled Affiliates that were former Primary Licensees**

C. Reporting requirements include:

a. The Semi-annual Health Risk-Based Capital (HRBC) Report.

**Amended as of June 13, 2002**

**Exhibit A (continued)**

**Standard 9(B) - Participation in National Programs by Smaller Controlled Affiliates**

A smaller controlled affiliate shall participate in national programs in accordance with BlueCard and other relevant Policies and Provisions shall effectively and efficiently participate in national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the controlled affiliate's service area and be subject to certain relevant financial and reporting requirements.

A. National program requirements include:

- BlueCard Program;
- Inter-Plan Teleprocessing System (ITS);
- National Account Programs.

B. Financial Requirements include:

- Standard 6(D): Financial Performance Requirements and Standard 6(H): Financial Responsibility; or
- A financial guarantee covering the Controlled Affiliate's Inter-Plan Programs obligations in a form, and from a guarantor, acceptable to BCBSA.

**Amended as of June 20, 2013**

**EXHIBIT A (continued)**

**Standard 10 - Participation in Inter-Plan Medicare Advantage Program**

A smaller controlled affiliate for which this standard applies pursuant to the Preamble section of Exhibit A of the Controlled Affiliate License Agreement shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the controlled affiliate's service area.

National program requirements include:

A. Inter-Plan Medicare Advantage Program.

**Standard 11: Participation in Master Business Associate Agreement by Smaller Controlled Affiliate Licensees**

**Effective April 14, 2003, all smaller controlled affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.**

**Amended as of September 19, 2014**

**EXHIBIT B-1**

**ADDENDUM TO CONTROLLED AFFILIATE LICENSE TO BE EXECUTED BY CONTROLLED AFFILIATES LICENSED UNDER CONTROLLED AFFILIATE LICENSE STANDARD 1C.**

**ADDENDUM TO CONTROLLED AFFILIATE LICENSE**

This Addendum is made to that certain Blue Shield Controlled Affiliate License Agreement executed by and among Blue Cross and Blue Shield Association ("Licensor"), _____ ("Controlled Affiliate Licensee") and _____("Sponsoring Plan") dated the _____ day of _____ , _____ ("Agreement"). The parties to this Addendum are Licensor, Controlled Affiliate Licensee, Sponsoring Plan, and the undersigned other Plans ('Other Plans"). This Addendum is made and shall be deemed effective as of the date of the Agreement.

WHEREAS, the Sponsoring Plan asserts that it can serve the Medicaid, Medicare Advantage PPO, Medicare Advantage HMO and/or Special Need Plans market in its Service Area more efficiently and with less risk through an enterprise jointly owned and controlled with other Plans than through a wholly owned and Controlled Affiliate Licensee;

WHEREAS, in such circumstance Controlled Affiliate License Standard 1C permits the licensing of a Controlled Affiliate that is less than 50% owned and controlled by the Sponsoring Plan but which is 100% owned and controlled by Plans including the Sponsoring Plan, subject to certain conditions;

WHEREAS, one such condition is that the Sponsoring Plan and all such other owning and controlling Plans enter into this Addendum;

NOW THEREFORE, for good and valuable consideration, including the promises and covenants set forth herein, the parties agree as follows:

1. This Addendum is limited to [identify product name].

2. The Sponsoring Plan shall participate operationally in Controlled Affiliate's business that is conducted under the Licensed Marks. The parties understand that participation may take many forms, one of which should be providing a network of providers in the Service Area of the Controlled Affiliate for the Medicaid, Medicare Advantage PPO, Medicare Advantage HMO and/or Special Need Plans services being offered under the Agreement and being involved in network development and provider engagement functions.

3. Each of the Other Plans agrees that (i) it will cooperate fully with the Sponsoring Plan and BCBSA as needed to enable Sponsoring Plan and Controlled Affiliate Licensee to meet their obligations to Licensor under the Agreement and all associated rules and regulations of Licensor, including the Brand Regulations, (ii) it

will not take any action, either individually or jointly with any of the Other Plans, that would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement, and (iii) it will not fail to take any action, either individually or jointly with any of the Other Plans, where such failure would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement.

4. Each of the Other Plans acknowledges that it has reviewed the Agreement and understands that Sponsoring Plan has the right to terminate the Agreement without cause upon notice as provided in Paragraph 8 of the Agreement, and that such right is unfettered and may be exercised by Sponsoring Plan in its sole discretion.

WHEREFORE, by signing below the parties agree to be bound to the terms stated herein.

BLUE CROSS BLUE SHIELD ASSOCIATION

**ADDENDUM TO CONTROLLED AFFILIATE LICENSE TO BE EXECUTED BY CONTROLLED AFFILIATES LICENSED UNDER CONTROLLED AFFILIATE LICENSE STANDARD 1D.**

**ADDENDUM TO CONTROLLED AFFILIATE LICENSE**

This Addendum is made to that certain Blue Shield Controlled Affiliate License Agreement executed by and among Blue Cross and Blue Shield Association ("Licensor"), _____ ("Controlled Affiliate Licensee"), _____("Sponsoring Plan") and _____ ("Participating Plan") dated the _____ day of _____ , _____ ("Agreement").

WHEREAS, the Participating Plan is defined as the Plan that holds the Primary License with BCBSA to use the Service Marks in the Service Area where the Controlled Affiliate will use the Service Marks;

WHEREAS, the Participating Plan asserts that it can offer a lower cost Basic Medicare Part D Prescription Drug Plan product more efficiently in the Participating Plan's Service Area through the Controlled Affiliate Licensee;

WHEREAS, the Controlled Affiliate shall only use the Service Marks inside of the Participating Plan(s) Service Area subject to each Participating Plan signing a separate Addendum;

WHEREAS, in such circumstance Controlled Affiliate License Standard 1D permits the licensing of a Controlled Affiliate that is 100% owned and controlled by a Sponsoring Plan, subject to certain conditions;

WHEREAS, one such condition is that the Sponsoring Plan, Controlled Affiliate and the Participating Plan enter into this Addendum;

NOW THEREFORE, for good and valuable consideration, including the promises and covenants set forth herein, the parties agree as follows:

1. The Participating Plan shall participate in Controlled Affiliate's business that is conducted under the Licensed Marks. The parties understand that the Participating Plan shall conduct sales support and marketing of the Controlled Affiliate's Basic Medicare Part D Prescription Drug Plan product offered in the Participating Plan's Service Area. Any other form of participation shall require BCBSA's written approval.

2. Participating Plan agrees that (i) it will cooperate fully with the Sponsoring Plan and BCBSA as needed to enable Sponsoring Plan and

Controlled Affiliate Licensee to meet their obligations to Licensor under the Agreement and all associated rules and regulations of Licensor, including the Brand Regulations, (ii) it will not take any action that would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement, and (iii) it will not fail to take any action, either individually or jointly with the Sponsoring Plan or Controlled Affiliate Licensee, where such failure would cause Sponsoring Plan or Controlled Affiliate Licensee to violate the Agreement.

3. The Controlled Affiliate Licensee shall only use the Licensed Marks authorized by the Participating Plan in connection with the Basic Medicare Part D Prescription Drug Plan product offered in the Participating Plan's Service Area.

4. The Sponsoring Plan and Controlled Affiliate acknowledge that it has reviewed the Agreement and understands that Participating Plan has the right to terminate this Agreement: (i) immediately upon the expiration or termination of the Plan Participation Agreement by and between Participating Plan and Controlled Affiliate upon written notice to the Sponsoring Plan, Controlled Affiliate Licensee and Licensor, or (ii) without cause upon 18 months written notice to the Sponsoring Plan, Controlled Affiliate Licensee and Licensor, and that such right is unfettered and may be exercised by Participating Plan in its sole discretion. In the event that Participating Plan and Controlled Affiliate fail to execute the Plan Participation Agreement by _____(Date), Participating Plan may terminate this Agreement immediately upon notice to Sponsoring Plan, Controlled Affiliate Licensee and Licensor.

5. This Agreement and all of Controlled Affiliate Licensee's rights hereunder shall immediately terminate without any further action by any party or entity in the event that the Sponsoring Plan or Participating Plan ceases to be authorized to use the Licensed Marks and Name.

WHEREFORE, by signing below the parties agree to be bound to the terms stated herein.

By: _____ **Amended March 17, 2016**

**EXHIBIT C**
ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENT

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

**FOR RISK PRODUCTS:**

For Controlled Affiliates not underwriting the indemnity portion of workers' compensation insurance:

An amount equal to its pro rata share of Sponsoring Plan's dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on health care plans and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by Sponsoring Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

For Controlled Affiliates underwriting the indemnity portion of workers' compensation insurance:

An amount equal to 0.35 percent of the gross revenue per annum of Controlled Affiliate arising from products using the marks; plus, an annual fee of $5,000 per license for a Controlled Affiliate subject to Standard 7.

**Amended as of September, 19, 2014**

**EXHIBIT C (continued)**

**FOR NONRISK PRODUCTS:**

For third-party administrative business, an amount equal to its pro rata share of Sponsoring Plan's dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on health care plans and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by Sponsoring Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

For non-third party administrative business (e.g., case management, provider networks, etc.), an amount equal to 0.24 percent of the gross revenue per annum of Controlled Affiliate arising from products using the marks; plus:

1) An annual fee of $5,000 per license for a Controlled Affiliate subject to Standard 6 D.

2) An annual fee of $2,000 per license for all other Controlled Affiliates.

The foregoing shall be reduced by one-half where both a BLUE CROSS® and BLUE SHIELD® License are issued to the same Controlled Affiliate. In the event that any license period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

**Amended as of September 19, 2014**

EXHIBIT 1A

**CONTROLLED AFFILIATE LICENSE AGREEMENT**
**APPLICABLE TO LIFE INSURANCE COMPANIES**
**(Includes revisions adopted by Member Plans through their September 17, 2020 meeting)**

This agreement by and among Blue Cross and Blue Shield Association ("BCBSA") _____("Controlled Affiliate"), a Controlled Affiliate of the Blue Shield Plan(s), known as _____("Plan").
WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, the Plan and the Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name");

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

**1. GRANT OF LICENSE**

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to the Controlled Affiliate the exclusive right to use the licensed Marks and Names in connection with and only in connection with those life insurance and related services authorized by applicable state law, other than health care plans and related services (as defined in the Plan's License Agreements with BCBSA) which services are not separately licensed to Controlled Affiliate by BCBSA, in the Service Area served by the Plan, except that BCBSA reserves the right to use the Licensed Marks and Name in said Service Area, and except to the extent that said Service Area may overlap the area or areas served by one or more other licensed Blue Shield Plans as of the date of this License as to which overlapping areas the rights hereby granted are non-exclusive as to such other Plan or Plans and their respective Licensed Controlled Affiliates only. Controlled Affiliate cannot use the Licensed Marks or Name outside the Service Area or in its legal or trade name; provided, however, that if and only for so long as Controlled Affiliate also holds a Blue Shield Affiliate License Agreement applicable to health care plans and related services, Controlled Affiliate may use the Licensed Marks and Name in its legal and trade name according to the terms of such license agreement.

**Amended as of June 12, 2003**

**2. QUALITY CONTROL**

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in relation to the sale, marketing and rendering of authorized products and further agrees to be bound by the conditions regarding quality control shown in Exhibit A as it may be amended by BCBSA from timetotime.

B. Controlled Affiliate agrees that Plan and/or BCBSA may, from timetotime, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by Plan or by BCBSA) a report to Plan and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of Exhibit A.

D. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner that it is subject to the bona fide control of a Plan or Plans. Absent written approval by BCBSA of an alternative method of control, bona fide control shall mean the legal authority, directly or indirectly through whollyowned subsidiaries: (a) to select members of the Controlled Affiliate's governing body having not less than 51% voting control thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Plan or Plans shall own at least 51% of any forprofit Controlled Affiliate. If the Controlled Affiliate is a mutual company, the Plan or its designee(s) shall have and maintain, in lieu of the requirements of items (a) and (c) above, proxies representing 51% of the votes at any meeting of the policyholders and shall demonstrate that there is no reason to believe this such proxies shall be revoked by sufficient policyholders to reduce such percentage below 51%.

**3. SERVICE MARK USE**

Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks, and shall comply with such rules (applicable to all Controlled Affiliates licensed to use the Marks) relative to service mark use, as are issued from timetotime by BCBSA. If there is any public reference to the affiliation between the Plan and the Controlled Affiliate, all of the Controlled Affiliate's licensed services in the Service Area of the Plan shall be rendered under the Licensed Marks. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks by Controlled Affiliate shall inure to the benefit of BCBSA. -2-

**4. SUBLICENSING AND ASSIGNMENT**

Controlled Affiliate shall not sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the option of Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

**5. INFRINGEMENTS**

Controlled Affiliate shall promptly notify Plan and BCBSA of any suspected acts of infringement, unfair competition or passing off which may occur in relation to the Licensed Marks. Controlled Affiliate shall not be entitled to require Plan or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to Plan and BCBSA, free of charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks by BCBSA.

**6. LIABILITY INDEMNIFICATION**

Controlled Affiliate hereby agrees to save, defend, indemnify and hold Plan and BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of Controlled Affiliate's rendering of health care services under the Licensed Marks.

**7. LICENSE TERM**

The license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods upon evidence satisfactory to the Plan and BCBSA that Controlled Affiliate meets the then applicable quality control standards, unless one of the parties hereto notifies the other party of the termination hereof at least sixty (60) days prior to expiration of any license period.

This Agreement may be terminated by the Plan or by BCBSA for cause at any time provided that Controlled Affiliate has been given a reasonable opportunity to cure and shall not effect such a cure within thirty (30) days of receiving written notice of the intent to terminate (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period). By way of example and not for purposes of limitation, Controlled Affiliate's failure to abide by the quality control provisions of Paragraph 2, above, shall be considered a proper ground for cancellation of this Agreement.

This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

A. Controlled Affiliate shall no longer comply with Standard No. 1 (Organization and Governance) of Exhibit A or, following an opportunity to cure, with the remaining quality control provisions of Exhibit A, as it may be amended from time-to-time; or

B. Plan ceases to be authorized to use the Licensed Marks; or

C. Appropriate dues for Controlled Affiliate pursuant to item 8 hereof, which are the royalties for this License Agreement are more than sixty (60) days in arrears to BCBSA.

Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks including any use in its trade name.

In the event of any disagreement between Plan and BCBSA as to whether grounds exist for termination or as to any other term or condition hereof, the decision of BCBSA shall control, subject to provisions for mediation or mandatory dispute resolution in effect between the parties.

Upon termination of this Agreement, Licensed Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of the Blue Cross and Blue Shield Association and provide instruction on how the customer can contact the Blue Cross and Blue Shield Association or a designated licensee to obtain further information on securing coverage. The written notification required by this paragraph shall be in writing and in a form approved by the Association. The Association shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

**8. DUES**

Controlled Affiliate will pay to BCBSA a fee for this license in accordance with the following formula:

An annual fee of five thousand dollars ($5,000) per license, plus

.05% of gross revenue per year from branded group products, plus

.5% of gross revenue per year from branded individual products plus

.14% of gross revenue per year from branded individual annuity products.

The foregoing percentages shall be reduced by one-half where both a BLUE CROSS® and BLUE SHIELD® license are issued to the same entity. In the event that any License period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Plan will promptly and timely transmit to BCBSA all dues owed by Controlled Affiliate as determined by the above formula and if Plan shall fail to do so, Controlled Affiliate shall pay such dues directly.

**9. JOINT VENTURE**

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between Plan and Controlled Affiliate or between either and BCBSA.

**9A. VOTING**

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with
0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-six (36) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

**10. NOTICES AND CORRESPONDENCE**

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

**Amended as of November 20, 1997**

**11. COMPLETE AGREEMENT**

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by a writing executed by all parties.

**12. SEVERABILITY**

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such finding shall in no way effect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

**13. NONWAIVER**

No waiver by BCBSA of any breach or default in performance on the part of the Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

**14. GOVERNING LAW**

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

**Amended as of June 16, 2005**

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

**EXHIBIT A**
CONTROLLED AFFILIATE LICENSE STANDARDS
LIFE INSURANCE COMPANIES
Page 1 of 2

**PREAMBLE**

The standards for licensing Life Insurance Companies (Life and Health Insurance companies, as defined by state statute) are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote of all Plans. Each Licensed Plan is required to use a standard controlled affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Life Insurance Company maintains compliance with the license standards.

An organization meeting the following standards shall be eligible for a license to use the Licensed Marks within the service area of its sponsoring Licensed Plan to the extent and the manner authorized under the Controlled Affiliate License applicable to Life Insurance Companies and the principal license to the Plan.

**Standard 1 - Organization and Governance**

The LIC shall be organized and operated in such a manner that it is controlled by a licensed Plan or Plans which have, directly or indirectly: 1) not less than 51% of the voting control of the LIC; and 2) the legal ability to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the LIC with which it does not concur; and 3) operational control of the LIC.

If the LIC is a mutual company, the Plan or its designee(s) shall have and maintain, in lieu of the requirements of items 1 and 2 above, proxies representing at least 51% of the votes at any policyholder meeting and shall demonstrate that there is no reason to believe such proxies shall be revoked by sufficient policyholders to reduce such percentage below 51%.

**Standard 2 - State Licensure**

The LIC must maintain unimpaired licensure or certificate of authority to operate under applicable state laws as a life and health insurance company in each state in which the LIC does business.

**EXHIBIT A**
CONTROLLED AFFILIATE LICENSE STANDARDS
LIFE INSURANCE COMPANIES
Page 2 of 2

**Standard 3 - Records and Examination**

The LIC and its sponsoring licensed Plan(s) shall maintain and furnish, on a timely and accurate basis, such records and reports regarding the LIC as may be required in order to establish compliance with the license agreement. The LIC and its sponsoring licensed Plan(s) shall permit BCBSA to examine the affairs of the LIC and shall agree that BCBSA's board may submit a written report to the chief executive officer(s) and the board(s) of directors of the sponsoring Plan(s).

**Standard 4 - Mediation**

The LIC and its sponsoring Plan(s) shall agree to use the then-current BCBSA mediation and mandatory dispute resolution processes, in lieu of a legal action between or among another licensed controlled affiliate, a licensed Plan or BCBSA.

**Standard 5 - Financial Responsibility**

The LIC shall maintain adequate financial resources to protect its customers and meet its business obligations.

**Standard 6 - Cooperation with Affiliate License Performance Response Process Protocol**

The LIC and its Sponsoring Plan(s) shall cooperate with BCBSA’s Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Affiliate License Performance Response Process Protocol (ALPRPP) and in addressing LIC compliance problems identified thereunder.

-2-

Exhibit 1A1

**CONTROLLED AFFILIATE**
**TRADEMARK LICENSE AGREEMENT**
**FOR LIFE AND DISABILTY INSURANCE PRODUCTS**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____, ("Life and Disability Controlled Affiliate") which is a company offering life and disability insurance products owned and controlled by _____, _____, _____ ( individually, "Sponsoring Plan" and when referred to collectively, "Sponsoring Plans").

Whereas, BCBSA is the owner of the BLUE CROSS and BLUE SHIELD word and design service marks and any derivatives thereof ("Licensed Marks");

Whereas, each Sponsoring Plan is licensed separately by BCBSA to use one or more of the Licensed Marks in a particular Service Area;

Whereas, the Sponsoring Plans and the Life and Disability Controlled Affiliate desire that the latter be entitled to use the appropriate Licensed Marks in connection with life and disability insurance products in some or all of such Sponsoring Plans' Service Areas and in the Service Areas of other Regular Member Plans, as defined in the BCBSA By-laws, ("Blue Plans") consistent with the terms of this Agreement.

NOW, THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

**1. GRANT OF LICENSE**

a. Subject to the terms and conditions of this Agreement, BCBSA hereby grants to the Life and Disability Controlled Affiliate the limited right to use the Licensed Marks in connection with and only in connection with the following life and disability insurance products authorized by state law: (1) Group: Term Life, Long Term Disability, Whole Life, Benefit Life, Universal Life; (2) Individual: Term Life, Whole Life, Dependent Life, Spouse Life; (3) Other: Disability Income, Short Term Disability, Long Term Disability, Income Replacement; and (4) such other life and disability products approved by BCBSA in writing ("Licensed Products") in the Service Areas served by the Sponsoring Plans or in the Service Area or Areas of one or more other licensed Blue Plans, provided that such Blue Plans have consented to such use as authorized by this Agreement. Life and Disability Controlled Affiliate may not use the Licensed Marks in its legal or trade name.

b. Notwithstanding that the license granted to Life and Disability Controlled Affiliate is a license to use all of the Licensed Marks, Life and Disability Controlled Affiliate may only use those of the Licensed Marks in the Service Area of a Sponsoring Plan or other consenting Blue Plan as described below that such Plan is authorized to use as a Blue Plan pursuant to its separate license agreements with BCBSA.

c. Life and Disability Controlled Affiliate may use the Licensed Marks in the Service Areas of Sponsoring Plans or in the Service Area of a Blue Plan that is not a signatory to this Agreement only after such Sponsoring Plan(s) or non-signatory Blue Plan consents to such use by executing a written consent in substantially the same form as the Consent Agreement attached as Exhibit B.

d. The following provisions apply with respect to Consent Agreements once such agreements have been fully and properly executed:

i. All sales, marketing and advertising materials developed by and proposed for use by Life and Disability Controlled Affiliate in the Service Area of Sponsoring Plan or consenting Blue Plan (hereinafter, such consenting Sponsoring Plan or consenting Blue Plan collectively referred to "Consenting Plan(s)") must clearly identify the Consenting Plan (for example, a statement on such materials that reads "This product is offered with the cooperation of Blue Cross and/or Blue Shield of [Geography]");

ii. To the extent the Consenting Plan has separate divisions or other Affiliates that use the Licensed Marks in distinct geographic areas within its Service Area, consent obtained under this Agreement may be limited to one or more of such specific geographic areas as specified by the Consenting Plan in its signed Consent Agreement. For purposes of this entire Agreement, all references to the Service Area of a Sponsoring Plan, Blue Plan or Consenting Plan may include the entire Service Area or a distinct geographic area within such Service Area as specified in this Section 1 D (2);

iii. Where BCBSA has licensed two or more Blue Plans to use the same Licensed Marks in the same Service Area, in addition to the requirements set forth in Section D (1) above, the sales, marketing and advertising materials referenced in such section above must be communicated to the Consenting Plan's existing and prospective accounts through or with the approval of such Consenting Plan, and the personnel of such Consenting Plan must actively participate in all sales and marketing activities conducted by Life and Disability Controlled Affiliate in the same Service Area, including participating in meetings (whether in-person or via telephone, video or internet conference) with both existing and prospective accounts of the Consenting Plan;

iv.Life and Disability Controlled Affiliate shall be entitled to use in a Service Area only those Licensed Marks that the Consenting Plan has been granted by BCBSA the license to use under its Blue Plan license agreements (for example, if a Consenting Plan is licensed to use only the Blue Cross Marks in its Service Area, the materials used by Life and Disability Controlled Affiliate in that Service Area may only contain or reference the Blue Cross Marks and not the Blue Shield Marks).

v.If a Consent Agreement is terminated, Life and Disability Controlled Affiliate shall, unless BCBSA and the Consenting Plan agree in their sole discretion to a phase out in writing, immediately (i) cease all use of the Licensed Marks, including in connection with any and all sales and marketing of the Licensed Products in the Service Area where consent has been terminated, and (ii) notify its customers that it is no longer a licensee and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in form approved by BCBSA.

**2. QUALITY CONTROL**

A. Life and Disability Controlled Affiliate agrees to use the Licensed Marks only in relation to the sale, marketing and administration of the Licensed Products and further agrees to be bound by the conditions regarding quality control shown in Exhibit A and the Guidelines to Administer the Standards for Trademark License Agreement for Life and Disability Insurance Products attached thereto.

B. Life and Disability Controlled Affiliate agrees that BCBSA may, from timetotime, upon reasonable notice, review and inspect the manner and method of Life and Disability Controlled Affiliate's rendering of service and use of the Licensed Marks.

C. Life and Disability Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by BCBSA) a report to BCBSA demonstrating Life and Disability Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of Exhibit A.

D. As used herein, a Life and Disability Controlled Affiliate is defined as: An entity organized and operated in such a manner that it is 100% owned and controlled by Sponsoring Plans. Absent written approval by BCBSA of an alternative method of control, control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Life and Disability Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to exercise operational control with respect to the governance -3-

thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Sponsoring Plan or Plans shall own at least 100% of any for profit Life and Disability Controlled Affiliate.

**3. SERVICE MARK USE**

Life and Disability Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and shall ensure all uses of the Licensed Marks comply with the BCBSA Brand Regulations, as amended by BCBSA from time to time. Life and Disability Controlled Affiliate recognizes and agrees that all use of the Licensed Marks by Life and Disability Controlled Affiliate shall inure to the benefit of BCBSA.

**4. SUBLICENSING AND ASSIGNMENT**

The license hereby granted to Life and Disability Controlled Affiliate to use the Licensed Marks is and shall be personal to Life and Disability Controlled Affiliate and shall not be assignable by any act of the Life and Disability Controlled Affiliate, directly or indirectly, without the written consent of BCBSA. Said license shall not be assignable by operation of law, nor shall Life and Disability Controlled Affiliate mortgage or part with possession or control of this license or any right hereunder, and the Life and Disability Controlled Affiliate shall have no right to grant any sublicense to use the Licensed Marks.

**5. INFRINGEMENTS**

Life and Disability Controlled Affiliate shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off which may occur in relation to the Licensed Marks. Life and Disability Controlled Affiliate shall not be entitled to require BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Life and Disability Controlled Affiliate agrees to render to BCBSA, free of charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks by BCBSA. BCBSA shall have sole control of the defense and resolution of any claim of infringement brought or threatened by others.

**6. LIABILITY INDEMNIFICATION**

Life and Disability Controlled Affiliate hereby agrees to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description which may arise as a result of Life and Disability Controlled Affiliate's conduct.

**7. LICENSE TERM**

A. The license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods, unless either BCBSA or Life and Disability Controlled Affiliate notifies the other party in writing of the termination hereof at least sixty (60) days prior to expiration of any license period.

B. This Agreement may be terminated by BCBSA for cause at any time provided that Life and Disability Controlled Affiliate has been given a reasonable opportunity to cure and shall not effect such a cure within thirty (30) days of receiving written notice of the intent to terminate (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period). By way of example and not for purposes of limitation, Life and Disability Controlled Affiliate's failure to abide by the conditions regarding use of the Licensed Marks set forth in Section 1 of this Agreement or the quality control provisions of Section 2 (other than with respect to Section 2 D which is subject to immediate termination as stated in Section 7 C (1) below) shall be considered proper grounds for termination of this Agreement.

C. This Agreement and all of Life and Disability Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

(i)Life and Disability Controlled Affiliate shall no longer comply with Section 2 D (or Standard No. 1 (Organization and Governance) of Exhibit A); or

(ii)Any Sponsoring Plan ceases to be authorized to use the Licensed Marks; or

(iii)Appropriate fees for Life and Disability Controlled Affiliate pursuant to Section 8 of this Agreement are more than sixty (60) days in arrears to BCBSA.

Upon termination of this Agreement for cause or otherwise, Life and Disability Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks.

In the event of any disagreement between Life and Disability Controlled Affiliate and BCBSA as to whether grounds exist for termination or as to any other term or condition hereof, the decision of BCBSA shall control, subject to provisions for mediation or mandatory dispute resolution in effect between the parties.

Upon termination of this Agreement, Licensed Life and Disability Controlled Affiliate shall immediately notify all of its customers that it is no longer a licensee of BCBSA and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

**8. ROYALTIES**

Life and Disability Controlled Affiliate will pay to BCBSA a fee for this license in accordance with the following formula:

- An annual fee of five thousand dollars ($5,000) per license, plus
- .05% of gross revenue per year from group products sold under the Licensed Marks, plus
- .5% of gross revenue per year from individual products sold under the Licensed Marks

In the event that any license period is greater or less than one (1) year, any amounts due shall be prorated. Royalties under this formula will be calculated, billed and paid in arrears.

Life and Disability Controlled Affiliate will promptly and timely transmit to BCBSA all fees owed by Life and Disability Controlled Affiliate as determined by the above formula.

**9. JOINT VENTURE**

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between any Sponsoring Plan and Life and Disability Controlled Affiliate or between among them and/or BCBSA.

**10. VOTING**

For all provisions of this Agreement referring to voting, the term ‘Plans’ shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the

Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with 0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-six (36) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

**11. NOTICES AND CORRESPONDENCE**

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

**12. COMPLETE AGREEMENT**

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by: (a) a writing signed by all parties; or (b) a writing approved by the affirmative vote of three-fourths of the Blue Plans and three-fourths of the total then current weighted vote of all the Blue Plans as officially recorded by the BCBSA Corporate Secretary. Upon such adoption by the Blue Plans, this Agreement and all other Trademark License Agreements for Life and Disability Insurance Products then in effect shall simultaneously be amended.

**13. SEVERABILITY**

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such finding shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

**14. NONWAIVER**

No waiver by BCBSA of any breach or default in performance on the part of the Life and Disability Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

**15. GOVERNING LAW**

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed, effective as of the date of last signature written below.

**EXHIBIT A**

**LICENSE STANDARDS APPLICABLE TO TRADEMARK LICENSE AGREEMENT FOR LIFE AND DISABILITY INSURANCE PRODUCTS**
**Page 1 of 2**

**Standard 1 - Organization and Governance**

Any Life and Disability Controlled Affiliate licensed under the Trademark License Agreement for Life and Disability Insurance Products ("licensee") shall be organized and operated in such a manner that it is an entity organized and operated in such a manner that it is 100% owned and controlled by Sponsoring Plans. Absent written approval by BCBSA of an alternative method of control, control shall mean the legal authority, directly or indirectly through wholly-owned subsidiaries: (a) to select members of the Life and Disability Controlled Affiliate's governing body having not less than 100% voting control thereof; (b) to exercise operational control with respect to the governance thereof; and (c) to prevent any change in its articles of incorporation, bylaws or other governing documents deemed inappropriate. In addition, a Sponsoring Plan or Plans shall own at least 100% of any for profit Life and Disability Controlled Affiliate.

**Standard 2 - State Licensure**

The licensee must maintain unimpaired licensure or certificate of authority to operate under applicable state laws as a life company in each state in which the licensee does business.

**Standard 3 - Records and Examination**

The licensee shall maintain and furnish, on a timely and accurate basis, such records and reports regarding the licensee as may be required in order to establish compliance with the Agreement. The licensee shall permit BCBSA to examine the affairs of the licensee and shall agree that BCBSA's board may submit a written report to the chief executive officer(s) and the board(s) of directors of the Sponsoring Plan(s).

**Standard 4 - Mediation**

The licensee, its Sponsoring Plan(s) and all consenting Blue Plans shall agree to use the then-current BCBSA mediation and mandatory dispute resolution processes, in lieu of a legal action between or among another licensed Life and Disability Controlled Affiliate, a Sponsoring Plan and or consenting Blue Plan or BCBSA.

**EXHIBIT A**
**LICENSE STANDARDS APPLICABLE TO TRADEMARK LICENSE AGREEMENT FOR LIFE AND DISABILITY INSURANCE PRODUCTS**
**Page 2 of 2**

**Standard 5 - Financial Responsibility**

The licensee shall maintain adequate financial resources to protect its customers and meet its business obligations.

**Standard 6 - Cooperation with BCBSA Governance**

The licensee shall cooperate with BCBSA's Board of Directors and its Brand Enhancement & Protection Committee in the administration of and in addressing licensee compliance problems that may be identified in connection with the operation or administration of the Trademark License Agreement for Life and Disability Insurance Products.

**EXHIBIT B**
**CONSENT AGREEMENT**

This Consent Agreement is made and entered into by and among the undersigned Blue Plan, and _____ ("Life and Disability Controlled Affiliate"), and the Blue Cross and Blue Shield Association ("BCBSA") and shall be deemed effective on _____ ("Effective Date").

Whereas, BCBSA owns the Blue Cross and Blue Shield word and design service marks and any derivative mark thereof (the "Brands");

Whereas, the undersigned Blue Plan is licensed to use one or more of the Brands within a specific geographic area ("Service Area");

Whereas Life and Disability Controlled Affiliate is licensed by BCBSA to use one or more of the Brands to offer life and disability insurance products ("Products") as defined and authorized in the Trademark License Agreement for Life and Disability Insurance Products ("Life and Disability License Agreement");

Whereas neither the Blue Plan nor its affiliates offer the Products under any of the Brands in such Blue Plan's Service Area or portion thereof where Blue Plan has consented to sale of the Products by Life and Disability Controlled Affiliate; and

Whereas BCBSA and the undersigned Blue Plan desire to consent to Life and Disability Controlled Affiliate's use of the Brands in Blue Plan's Service Area consistent with the terms of the Life and Disability License Agreement and this Consent Agreement.

Now, therefore, in consideration of the obligations and conditions stated in this Agreement, Blue Plan, Life and Disability Controlled Affiliate and BCBSA agree as follows:

1. Life and Disability Controlled Affiliate may market, sell, administer and underwrite the Products in Blue Plan's Service Area under the Brands licensed to Blue Plan in such Service Area subject to the terms of this Consent Agreement, the Life and Disability License Agreement and Blue Plan's license agreement(s) with BCBSA. Life and Disability Controlled Affiliate's rights under the Brands to offer the Products under the Brands are limited to offering the Products only under the Brand(s) licensed to the consenting Blue Plan.

2. Life and Disability Controlled Affiliate shall work with the undersigned Blue Plan to develop a written sales and marketing agreement that
identifies the relationship between it and Blue Plan for the sales, marketing and customer service for the Products. The term of the sales and marketing agreement shall be the same as the term of this Consent Agreement.

3. All sales, marketing and advertising materials developed by and proposed for use by Life and Disability Controlled Affiliate in a consenting Blue Plan's Service Area must clearly identify the consenting Blue Plan (for example, a statement on such materials that reads "This product is offered with the cooperation of Blue Cross and/or Blue Shield of [Geography]");

4. Life and Disability Controlled Affiliate may use the Brands to sell the Products in the following Service Area or portion thereof as designated by Blue Plan:

_____

5. If two or more Blue Plans to use the same Licensed Marks in the same Service Area, Life and Disability Controlled Affiliate shall work with the consenting Blue Plan in the following manner: (a) the sales, marketing and advertising materials must be communicated to the consenting Blue Plan's existing and prospective accounts through or with the approval of such Blue Plan, and (b) the personnel of such Blue Plan must actively participate in all sales and marketing activities conducted by Life and Disability Controlled Affiliate in the same Service Area, including participating in meetings (whether in-person or via telephone, video or internet conference) with both existing and prospective accounts of the consenting Blue Plan;

6. Life and Disability Controlled Affiliate shall be entitled to use in a Service Area only those Licensed Marks that the consenting Blue Plan has been granted by BCBSA the license to use under its license agreement (for example, if a consenting Blue Plan is licensed to use only the Blue Cross Marks in its Service Area, the materials used by Life and Disability Controlled Affiliate in that Service Area may only contain or reference the Blue Cross Marks and not the Blue Shield Marks).

7. If this Consent Agreement is terminated, Life and Disability Controlled Affiliate shall, unless each BCBSA and the Blue Plan agree in their sole discretion to a phase out in writing, immediately (i) cease all use of the Licensed Marks, including in connection with any and all sales and marketing of the Licensed Products in the Service Area where consent has been terminated, and (ii) notify its customers that it is no longer a licensee of BCBSA and provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in form approved by BCBSA.

8. The term of this Consent Agreement shall be one year from the Effective Date. Unless either Blue Plan or Life and Disability Controlled Affiliate provides the other party with written notice of its desire not to renew this Consent Agreement at least 60 days prior to expiration of the term or any extended term or unless terminated as provided in Paragraph 9 below, this Consent Agreement shall automatically renew for subsequent one year periods.

9. This Consent Agreement may be terminated as follows:

   a. Upon mutual written consent of Life and Disability Controlled Affiliate and Blue Plan;

   b. By Blue Plan or Life and Disability Controlled Affiliate upon 60 days advance written notice to the non-terminating party and BCBSA; or

   c. By Blue Plan immediately if Life and Disability Controlled Affiliate does not comply with this Consent Agreement or the sales protocol agreement.

10. This Consent Agreement shall automatically terminate if Blue Plan's primary licensee agreement terminates for any reason or if the Life and Disability License Agreement terminates for any reason.

Exhibit 1B

**BLUE SHIELD**
**CONTROLLED AFFILIATE LICENSE AGREEMENT**
**APPLICABLE TO REGIONAL MEDICARE ADVANTAGE PPO PRODUCTS**
**(Adopted by Member Plans at their September 17, 2020)**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as _____ ("Controlling Plans"), each of which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, under the Medicare Modernization Act, companies may apply to and be awarded a contract by the Centers for Medicare and Medicaid Services ("CMS") to offer Medicare Advantage PPO products in geographic regions designated by CMS (hereafter "regional MAPPO products").

WHEREAS, some of the CMS-designated regions include the Service Areas, or portions thereof, of more than one Plan.

WHEREAS, the Controlling Plans and Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name") to offer regional MAPPO products in a region that includes the Service Areas, or portions thereof, of more than one Controlling Plan;

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

**1. GRANT OF LICENSE**

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with the sale, marketing and administration of regional MAPPO products and related services.

This grant of rights is non-exclusive and is limited to the following states: _____ (the "Region"). Controlled Affiliate may use the Licensed

Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Region under any name or mark except business conducted in the Service Area of a Controlling Plan provided that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks and Name in connection with health care plans and related services in the Service Area of such Controlling Plan; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

**2. QUALITY CONTROL**

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by the Controlling Plans or by BCBSA) a report or reports to the Controlling Plans and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that the Controlling Plans and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

(3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:

(a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;

(c) to exercise control over the policy and operations of the Controlled Affiliate; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

(i)change its legal and/or trade names;

(ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

**3. SERVICE MARK USE**

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within the Region may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Region the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name in connection with the sale, marketing and administration of regional MAPPO products and related services.

**4. SUBLICENSING AND ASSIGNMENT**

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of any Controlling Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

**5. INFRINGEMENT**

Controlled Affiliate shall promptly notify the Controlling Plans and the Controlling Plans shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require the Controlling Plans or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to the Controlling Plans and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

**6. LIABILITY INDEMNIFICATION**

Controlled Affiliate and the Controlling Plans hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to Controlled Affiliate's rendering of services under the Licensed Marks and Name.

**7. LICENSE TERM**

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) any one of the Controlling Plans ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Shield License Agreement any one of the Controlling Plans ceases to be authorized to use the Licensed Names and Marks in the Region.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Controlling Plans or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Controlling Plans advising of the specific matters at issue and granting the Controlling Plans an opportunity to be heard and to present their response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this

Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or (4) failure to comply with any of the applicable requirements of Standards 2, 3, 4, or 5 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(E); or (6) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans (including the Controlling Plans), any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Controlling Plans shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between or among BCBSA, any of the Controlling Plans and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

(1) Controlled Affiliate shall no longer comply with item 2(E) above;

(2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or

proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(E)(3)(vii) and (viii) of this Agreement.

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name, except to the extent that it continues to be authorized to use the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers to whom it provides products or services under the Licensed Marks pursuant to this Agreement that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this
paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall

have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(B) hereof, upon termination of this Agreement the provisions of Paragraph 7(G) shall not apply and the following provisions shall apply, except that, in the event that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks in the Service Area of a Controlling Plan and termination of this Agreement is due to a partial termination of such Controlling Plan's license pursuant to Paragraph 15(a)(x)(ii) of the Blue Shield License Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the Region and the geographic area for which the Controlling Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for payment to BCBSA of an amount equal to $25 multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any Plan other than a Controlling Plan is permitted by BCBSA to use marks or names licensed by BCBSA in a geographic area in the Region, the payment for Licensed Enrollees in such geographic area shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Controlling Plans, and

any other Licensed Controlled Affiliates of the Controlling Plans in such geographic area and the denominator of which is the total number of Licensed Enrollees in such geographic area. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the

foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Controlling Plans or any other Licensed Controlled Affiliates of the Controlling Plans to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this subparagraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans (including the Controlling Plans) or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license
termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. In the event that the Controlled Affiliate's license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Controlling Plans or their other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.K. and any costs associated with reestablishing the terminated Controlling Plan's Service Area or the Region, including any payments made by BCBSA to a Plan or Plans (including the other Controlling Plans), or their Licensed Controlled Affiliates, for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to audit the books and records of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans to verify compliance with this paragraph 7.H.

(5) As to a breach of 7.H.(1), (2), (3) or (4), the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless a Controlling Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of such Controlling Plan's license agreement upon the required 6 month written notice.

J. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

K. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Controlling Plans, and any other

Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

**8. DISPUTE RESOLUTION**

The parties agree that any disputes between or among them or between or among any of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Shield and Blue Shield Marks and Name are subject to the

Mediation and Mandatory Dispute Resolution process attached to and made a part of each Controlling Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

**9. LICENSE FEE**

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit B.

**10. JOINT VENTURE**

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between the Controlling Plans and Controlled Affiliate or between either and BCBSA.

**11. NOTICES AND CORRESPONDENCE**

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last

known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

**12. COMPLETE AGREEMENT**

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

**13. SEVERABILITY**

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

**14. NONWAIVER**

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

**14A. VOTING**

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with
0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-six (36) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

**15. GOVERNING LAW**

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

**16. HEADINGS**

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

**EXHIBIT A**
**CONTROLLED AFFILIATE LICENSE STANDARDS**
**APPLICABLE TO REGIONAL MEDICARE**
**ADVANTAGE PPO PRODUCTS**
**September 2020**

**PREAMBLE**

The standards for licensing Controlled Affiliates for Medicare Advantage PPO Products are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote. Each Controlling Plan is required to use a standard Controlled Affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Controlled Affiliate maintains compliance with the license standards.

**Standard 1 - Organization and Governance**

A Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

(3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:

(a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;

(b) prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;

(c) exercise control over the policy and operations of the Controlled Affiliate; and

**EXHIBIT A (continued)**
Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

(i) change its legal and/or trade names;

(ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

**Standard 2 - Financial Responsibility**

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

**Standard 3 - State Licensure/Certification**

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

**EXHIBIT A (continued)**
**Standard 4 - Certain Disclosures**

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of:

a. the structure of the Blue Cross and Blue Shield System; and
b. the independent nature of every licensee.

**Standard 5 - Reports and Records for Controlled Affiliates**

A Controlled Affiliate and/or its Controlling Plans shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

**Standard 6 - Best Efforts**

During each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Shield Marks.

**Standard 7 - Participation in Certain National Programs**

A Controlled Affiliate shall effectively and efficiently participate in certain national programs from time to time as may be adopted by Member Plans for the purposes of providing ease of claims processing for customers receiving benefits outside of the Controlled Affiliate's service area.

National program requirements include:

a. Inter-Plan Teleprocessing System (ITS); and

b. Inter-Plan Medicare Advantage Program.

**Standard 8 - Participation in Master Business Associate Agreement**

Controlled Affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

**Amended as of November 15, 2007**

**EXHIBIT B**

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENTS
APPLICABLE TO REGIONAL MEDICARE ADVANTAGE PPO PRODUCTS**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

An amount equal to its pro rata share of each Controlling Plan dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on regional MAPPO products and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by each Controlling Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

**Amended as of June 14, 2007**

Exhibit 1C

**BLUE SHIELD**
**CONTROLLED AFFILIATE LICENSE AGREEMENT**
**APPLICABLE TO REGIONAL MEDICARE PART D PRESCRIPTION DRUG PLAN PRODUCTS**
**(Adopted by Member Plans at their September 17, 2020 meeting)**

This Agreement by and among Blue Cross and Blue Shield Association ("BCBSA") and _____ ("Controlled Affiliate"), a Controlled Affiliate of the Blue Cross Plan(s), known as _____ ("Controlling Plans"), each of which is also a Party signatory hereto.

WHEREAS, BCBSA is the owner of the BLUE SHIELD and BLUE SHIELD Design service marks;

WHEREAS, under the Medicare Modernization Act, companies may apply to and be awarded a contract by the Centers for Medicare and Medicaid Services ("CMS") to offer Medicare Part D Prescription Drug Plan products in geographic regions designated by CMS (hereafter "regional PDP products").

WHEREAS, some of the CMS-designated regions include the Service Areas, or portions thereof, of more than one Plan.

WHEREAS, the Controlling Plans and Controlled Affiliate desire that the latter be entitled to use the BLUE SHIELD and BLUE SHIELD Design service marks (collectively the "Licensed Marks") as service marks and be entitled to use the term BLUE SHIELD in a trade name ("Licensed Name") to offer regional PDP products in a region that includes the Service Areas, or portions thereof, of more than one Controlling Plan;

NOW THEREFORE, in consideration of the foregoing and the mutual agreements hereinafter set forth and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

**1. GRANT OF LICENSE**

Subject to the terms and conditions of this Agreement, BCBSA hereby grants to Controlled Affiliate the right to use the Licensed Marks and Name in connection with, and only in connection with the sale, marketing and administration of regional PDP products and related services.

This grant of rights is non-exclusive and is limited to the following states: _____ (the "Region"). Controlled Affiliate may use the Licensed

Marks and Name in its legal name on the following conditions: (i) the legal name must be approved in advance, in writing, by BCBSA; (ii) Controlled Affiliate shall not do business outside the Region under any name or mark except business conducted in the Service Area of a Controlling Plan provided that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks and Name in connection with health care plans and related services in the Service Area of such Controlling Plan; and (iii) Controlled Affiliate shall not use the Licensed Marks and Name, or any derivative thereof, as part of any name or symbol used to identify itself in any securities market. Controlled Affiliate may use the Licensed Marks and Name in its Trade Name only with the prior, written, consent of BCBSA.

**2. QUALITY CONTROL**

A. Controlled Affiliate agrees to use the Licensed Marks and Name only in connection with the licensed services and further agrees to be bound by the conditions regarding quality control shown in attached Exhibit A as they may be amended by BCBSA from time-to-time.

B. Controlled Affiliate agrees to comply with all applicable federal, state and local laws.

C. Controlled Affiliate agrees that it will provide on an annual basis (or more often if reasonably required by the Controlling Plans or by BCBSA) a report or reports to the Controlling Plans and BCBSA demonstrating Controlled Affiliate's compliance with the requirements of this Agreement including but not limited to the quality control provisions of this paragraph and the attached Exhibit A.

D. Controlled Affiliate agrees that the Controlling Plans and/or BCBSA may, from time-to-time, upon reasonable notice, review and inspect the manner and method of Controlled Affiliate's rendering of service and use of the Licensed Marks and Name.

E. As used herein, a Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

(3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:

(a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;

(b) to prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;

(c) to exercise control over the policy and operations of the Controlled Affiliate; and

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

(i) change its legal and/or trade names;

(ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

**3. SERVICE MARK USE**

A. Controlled Affiliate recognizes the importance of a comprehensive national network of independent BCBSA licensees which are committed to strengthening the Licensed Marks and Name. The Controlled Affiliate further recognizes that its actions within the Region may affect the value of the Licensed Marks and Name nationwide.

B. Controlled Affiliate shall at all times make proper service mark use of the Licensed Marks and Name, including but not limited to use of such symbols or words as BCBSA shall specify to protect the Licensed Marks and Name and shall comply with such rules (generally applicable to Controlled Affiliates licensed to use the Licensed Marks and Name) relative to service mark use, as are issued from time-to-time by BCBSA. Controlled Affiliate recognizes and agrees that all use of the Licensed Marks and Name by Controlled Affiliate shall inure to the benefit of BCBSA.

C. Controlled Affiliate may not directly or indirectly use the Licensed Marks and Name in a manner that transfers or is intended to transfer in the Region the goodwill associated therewith to another mark or name, nor may Controlled Affiliate engage in activity that may dilute or tarnish the unique value of the Licensed Marks and Name.

D. Controlled Affiliate shall use its best efforts to promote and build the value of the Licensed Marks and Name in connection with the sale, marketing and administration of regional PDP products and related services.

**4. SUBLICENSING AND ASSIGNMENT**

Controlled Affiliate shall not, directly or indirectly, sublicense, transfer, hypothecate, sell, encumber or mortgage, by operation of law or otherwise, the rights granted hereunder and any such act shall be voidable at the sole option of any Controlling Plan or BCBSA. This Agreement and all rights and duties hereunder are personal to Controlled Affiliate.

**5. INFRINGEMENT**

Controlled Affiliate shall promptly notify the Controlling Plans and the Controlling Plans shall promptly notify BCBSA of any suspected acts of infringement, unfair competition or passing off that may occur in relation to the Licensed Marks and Name. Controlled Affiliate shall not be entitled to require the Controlling Plans or BCBSA to take any actions or institute any proceedings to prevent infringement, unfair competition or passing off by third parties. Controlled Affiliate agrees to render to the Controlling Plans and BCBSA, without charge, all reasonable assistance in connection with any matter pertaining to the protection of the Licensed Marks and Name by BCBSA.

**6. LIABILITY INDEMNIFICATION**

Controlled Affiliate and the Controlling Plans hereby agree to save, defend, indemnify and hold BCBSA harmless from and against all claims, damages, liabilities and costs of every kind, nature and description (except those arising solely as a result of BCBSA's negligence) that may arise as a result of or related to Controlled Affiliate's rendering of services under the Licensed Marks and Name.

**7. LICENSE TERM**

A. Except as otherwise provided herein, the license granted by this Agreement shall remain in effect for a period of one (1) year and shall be automatically extended for additional one (1) year periods unless terminated pursuant to the provisions herein.

B. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that: (i) any one of the Controlling Plans ceases to be authorized to use the Licensed Marks and Name; or (ii) pursuant to Paragraph 15(a)(x) of the Blue Shield License Agreement any one of the Controlling Plans ceases to be authorized to use the Licensed Names and Marks in the Region.

C. Notwithstanding any other provision of this Agreement, this license to use the Licensed Marks and Name may be forthwith terminated by the Controlling Plans or the affirmative vote of the majority of the Board of Directors of BCBSA present and voting at a special meeting expressly called by BCBSA for the purpose on ten (10) days written notice to the Controlling Plans advising of the specific matters at issue and granting the Controlling Plans an opportunity to be heard and to present their response to the Board for: (1) failure to comply with any applicable minimum capital or liquidity requirement under the quality control standards of this Agreement; or (2) failure to comply with the "Organization and Governance" quality control standard of this Agreement; or (3) impending financial insolvency; or (4) failure to comply with any of the applicable requirements of Standards 2, 3, 4, or 5 of attached Exhibit A; or (5) the pendency of any action instituted against the Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business or seeking the declaration or establishment of a trust for any of its property or business, unless this Controlled Affiliate License Agreement has been earlier terminated under paragraph 7(E); or (6) such other reason as is determined in good faith immediately and irreparably to threaten the integrity and reputation of BCBSA, the Plans (including the Controlling Plans), any other licensee including Controlled Affiliate and/or the Licensed Marks and Name.

D. Except as otherwise provided in Paragraphs 7(B), 7(C) or 7(E) herein, should Controlled Affiliate fail to comply with the provisions of this Agreement and not cure such failure within thirty (30) days of receiving written notice thereof (or commence a cure within such thirty day period and continue diligent efforts to

complete the cure if such curing cannot reasonably be completed within such thirty day period) BCBSA or the Controlling Plans shall have the right to issue a notice that the Controlled Affiliate is in a state of noncompliance. If a state of noncompliance as aforesaid is undisputed by the Controlled Affiliate or is found to exist by a mandatory dispute resolution panel and is uncured as provided above, BCBSA shall have the right to seek judicial enforcement of the Agreement or to issue a notice of termination thereof. Notwithstanding any other provisions of this Agreement, any disputes as to the termination of this License pursuant to Paragraphs 7(B), 7(C) or 7(E) of this Agreement shall not be subject to mediation and mandatory dispute resolution. All other disputes between or among BCBSA, any of the Controlling Plans and/or Controlled Affiliate shall be submitted promptly to mediation and mandatory dispute resolution. The mandatory dispute resolution panel shall have authority to issue orders for specific performance and assess monetary penalties. Except, however, as provided in Paragraphs 7(B) and 7(E) of this Agreement, this license to use the Licensed Marks and Name may not be finally terminated for any reason without the affirmative vote of a majority of the present and voting members of the Board of Directors of BCBSA.

E. This Agreement and all of Controlled Affiliate's rights hereunder shall immediately terminate without any further action by any party or entity in the event that:

(1) Controlled Affiliate shall no longer comply with item 2(E) above;

(2) Appropriate dues, royalties and other payments for Controlled Affiliate pursuant to paragraph 9 hereof, which are the royalties for this License Agreement, are more than sixty (60) days in arrears to BCBSA; or

(3) Any of the following events occur: (i) a voluntary petition shall be filed by Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief, or (ii) an involuntary petition or proceeding shall be filed against Controlled Affiliate seeking bankruptcy, reorganization, arrangement with creditors or other relief under the bankruptcy laws of the United States or any other law governing insolvency or debtor relief and such petition or proceeding is consented to or acquiesced in by Controlled Affiliate or is not dismissed within sixty (60) days of the date upon which the petition or other document commencing the proceeding is served upon the Controlled Affiliate, or (iii) an order for relief is entered against Controlled Affiliate in any case under the bankruptcy laws of the United States, or Controlled Affiliate is adjudged bankrupt or insolvent as those terms are defined in the Uniform Commercial Code as enacted in the State of Illinois by any court of competent jurisdiction, or (iv) Controlled Affiliate makes a general assignment of its assets for the benefit of creditors, or (v) any government or any government official, office, agency, branch, or unit assumes control of Controlled Affiliate or delinquency proceedings (voluntary or involuntary) are instituted, or (vi) an action is brought by Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim

trustee, receiver or other custodian for any of its property or business, or (vii) an action is instituted by any governmental entity or officer against Controlled Affiliate seeking its dissolution or liquidation of its assets or seeking the appointment of a trustee, interim trustee, receiver or other custodian for any of its property or business and such action is consented to or acquiesced in by Controlled Affiliate or is not dismissed within one hundred thirty (130) days of the date upon which the pleading or other document commencing the action is served upon the Controlled Affiliate, provided that if the action is stayed or its prosecution is enjoined, the one hundred thirty (130) day period is tolled for the duration of the stay or injunction, and provided further, that the Association's Board of Directors may toll or extend the 130 day period at any time prior to its expiration, or (viii) a trustee, interim trustee, receiver or other custodian for any of Controlled Affiliate's property or business is appointed or the Controlled Affiliate is ordered dissolved or liquidated. Notwithstanding any other provision of this Agreement, a declaration or a request for declaration of the existence of a trust over any of the Controlled Affiliate's property or business shall not in itself be deemed to constitute or seek appointment of a trustee, interim trustee, receiver or other custodian for purposes of subparagraphs 7(E)(3)(vii) and (viii) of this Agreement.

F. Upon termination of this Agreement for cause or otherwise, Controlled Affiliate agrees that it shall immediately discontinue all use of the Licensed Marks and Name, including any use in its trade name, except to the extent that it continues to be authorized to use the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan.

G. Upon termination of this Agreement, Controlled Affiliate shall immediately notify all of its customers to whom it provides products or services under the Licensed Marks pursuant to this Agreement that it is no longer a licensee of BCBSA and, if directed by the Association's Board of Directors, shall provide instruction on how the customer can contact BCBSA or a designated licensee to obtain further information on securing coverage. The notification required by this paragraph shall be in writing and in a form approved by BCBSA. The BCBSA shall have the right to audit the terminated entity's books and records to verify compliance with this paragraph.

H. In the event this Agreement terminates pursuant to 7(B) hereof, upon termination of this Agreement the provisions of Paragraph 7(G) shall not apply and the following provisions shall apply, except that, in the event that Controlled Affiliate is separately licensed by BCBSA to use the Licensed Marks in the Service Area of a Controlling Plan and termination of this Agreement is due to a partial termination of such Controlling Plan's license pursuant to Paragraph 15(a)(x)(ii) of the Blue Shield License Agreement, the notices, national account listing, payment, and audit right listed below shall be applicable solely with respect to the Region and the geographic area for which the Controlling Plan's license to use the Licensed Names and Marks is terminated:

(1) The Controlled Affiliate shall send a notice through the U.S. mails, with first class postage affixed, to all individual and group customers, providers, brokers and agents of products or services sold, marketed, underwritten or administered by the Controlled Affiliate under the Licensed Marks and Name. The form and content of the notice shall be specified by BCBSA and shall, at a minimum, notify the recipient of the termination of the license, the consequences thereof, and instructions for obtaining alternate products or services licensed by BCBSA. This notice shall be mailed within 15 days after termination.

(2) The Controlled Affiliate shall deliver to BCBSA within five days of a request by BCBSA a listing of national accounts in which the Controlled Affiliate is involved (in a control, participating or servicing capacity), identifying the national account and the Controlled Affiliate's role therein.

(3) Unless the cause of termination is an event respecting BCBSA stated in paragraph 15(a) or (b) of the Plan's license agreement with BCBSA to use the Licensed Marks and Name, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for payment to BCBSA of an amount equal to $25 multiplied by the number of Licensed Enrollees of the Controlled Affiliate; provided that if any Plan other than a Controlling Plan is permitted by BCBSA to use marks or names licensed by BCBSA in a geographic area in the Region, the payment for Licensed Enrollees in such geographic area shall be multiplied by a fraction, the numerator of which is the number of Licensed Enrollees of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans in such geographic area and the denominator of which is the total number of Licensed Enrollees in such geographic area. Licensed Enrollee means each and every person and covered dependent who is enrolled as an individual or member of a group receiving products or services sold, marketed or administered under marks or names licensed by BCBSA as determined at the earlier of (i) the end of the last fiscal year of the terminated entity which ended prior to termination or (ii) the fiscal year which ended before any transactions causing the termination began. Notwithstanding the foregoing, the amount payable pursuant to this subparagraph H. (3) shall be due only to the extent that, in BCBSA's opinion, it does not cause the net worth of the Controlled Affiliate, the Controlling Plans or any other Licensed Controlled Affiliates of the Controlling Plans to fall below 100% of the Health Risk-Based Capital formula, or its equivalent under any successor formula, as set forth in the applicable financial responsibility standards established by BCBSA (provided such equivalent is approved for purposes of this subparagraph by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans); measured as of the date of termination, and adjusted for the value of any transactions not made in the ordinary course of business. This payment shall not be due in connection with transactions exclusively by or among Plans (including the Controlling Plans) or their affiliates, including reorganizations, combinations or mergers, where the BCBSA Board of Directors determines that the license

termination does not result in a material diminution in the number of Licensed Enrollees or the extent of their coverage. In the event that the Controlled Affiliate's
license is reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, BCBSA shall reimburse the Controlled Affiliate (and/or the Controlling Plans or their other Licensed Controlled Affiliates, as the case may be) for payments made under this subparagraph 7.H.(3) only to the extent that such payments exceed the amounts due to BCBSA pursuant to paragraph 7.K. and any costs associated with reestablishing the terminated Controlling Plan's Service Area or the Region, including any payments made by BCBSA to a Plan or Plans (including the other Controlling Plans), or their Licensed Controlled Affiliates, for purposes of replacing the Controlled Affiliate.

(4) BCBSA shall have the right to audit the books and records of the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans to verify compliance with this paragraph 7.H.

(5) As to a breach of 7.H.(1), (2), (3) or (4), the parties agree that the obligations are immediately enforceable in a court of competent jurisdiction. As to a breach of 7.H.(1), (2) or (4) by the Controlled Affiliate, the parties agree there is no adequate remedy at law and BCBSA is entitled to obtain specific performance.

I. BCBSA shall be entitled to enjoin the Controlled Affiliate or any related party in a court of competent jurisdiction from entry into any transaction which would result in a termination of this Agreement unless a Controlling Plan's license from BCBSA to use the Licensed Marks and Names has been terminated pursuant to 10(d) of such Controlling Plan's license agreement upon the required 6 month written notice.

J. BCBSA acknowledges that it is not the owner of assets of the Controlled Affiliate.

K. In the event this Agreement terminates and is subsequently reinstated by BCBSA or is deemed to have remained in effect without interruption by a court of competent jurisdiction, the Controlled Affiliate, the Controlling Plans, and any other Licensed Controlled Affiliates of the Controlling Plans shall be jointly liable for reimbursing BCBSA the reasonable costs incurred by BCBSA in connection with the termination and the reinstatement or court action, and any associated legal proceedings, including but not limited to: outside legal fees, consulting fees, public relations fees, advertising costs, and costs incurred to develop, lease or establish an interim provider network. Any amount due to BCBSA under this subparagraph may be waived in whole or in part by the BCBSA Board of Directors in its sole discretion.

**8. DISPUTE RESOLUTION**

The parties agree that any disputes between or among them or between or among any of them and one or more Plans or Controlled Affiliates of Plans that use in any manner the Blue Shield and Blue Shield Marks and Name are subject to the Mediation and Mandatory Dispute Resolution process attached to and made a part of each Controlling Plan's License from BCBSA to use the Licensed Marks and Name as Exhibit 5 as amended from time-to-time, which documents are incorporated herein by reference as though fully set forth herein.

**9. LICENSE FEE**

Controlled Affiliate will pay to BCBSA a fee for this License determined pursuant to the formula(s) set forth in Exhibit B.

**10. JOINT VENTURE**

Nothing contained in this Agreement shall be construed as creating a joint venture, partnership, agency or employment relationship between the Controlling Plans and Controlled Affiliate or between either and BCBSA.

**11. NOTICES AND CORRESPONDENCE**

Notices regarding the subject matter of this Agreement or breach or termination thereof shall be in writing and shall be addressed in duplicate to the last known address of each other party, marked respectively to the attention of its President and, if any, its General Counsel.

**12. COMPLETE AGREEMENT**

This Agreement contains the complete understandings of the parties in relation to the subject matter hereof. This Agreement may only be amended by the affirmative vote of three-fourths of the Plans and three-fourths of the total then current weighted vote of all the Plans as officially recorded by the BCBSA Corporate Secretary.

**13. SEVERABILITY**

If any term of this Agreement is held to be unlawful by a court of competent jurisdiction, such findings shall in no way affect the remaining obligations of the parties hereunder and the court may substitute a lawful term or condition for any unlawful term or condition so long as the effect of such substitution is to provide the parties with the benefits of this Agreement.

**14. NONWAIVER**

No waiver by BCBSA of any breach or default in performance on the part of Controlled Affiliate or any other licensee of any of the terms, covenants or conditions of this Agreement shall constitute a waiver of any subsequent breach or default in performance of said terms, covenants or conditions.

**14A. VOTING**

For all provisions of this Agreement referring to voting, the term 'Plans' shall mean all entities licensed under the Blue Cross License Agreement and/or the Blue Shield License Agreement, and in all votes of the Plans under this Agreement the Plans shall vote together. For weighted votes of the Plans, the Plan shall have a number of votes equal to the number of weighted votes (if any) that it holds as a Blue Cross Plan plus the number of weighted votes (if any) that it holds as a Blue Shield Plan. For all other votes of the Plans, the Plan shall have one vote. For all questions requiring an affirmative three-fourths weighted vote of the Plans, the
requirement shall be deemed satisfied with a lesser weighted vote unless the greater of: (i) 6/52 or more of the Plans (rounded to the nearest whole number, with
0.5 or multiples thereof being rounded to the next higher whole number) fail to cast weighted votes in favor of the question; or (ii) three (3) of the Plans fail to cast weighted votes in favor of the question. Notwithstanding the foregoing provision, if there are thirty-six (36) Plans, the requirement of an affirmative three-fourths weighted vote shall be deemed satisfied with a lesser weighted vote unless four (4) or more Plans fail to cast weighted votes in favor of the question.

**15. GOVERNING LAW**

This Agreement shall be governed by, and construed and interpreted in accordance with, the laws of the State of Illinois.

**16. HEADINGS**

The headings inserted in this agreement are for convenience only and shall have no bearing on the interpretation hereof.

IN WITNESS WHEREOF, the parties have caused this License Agreement to be executed and effective as of the date of last signature written below.

**EXHIBIT A**
**CONTROLLED AFFILIATE LICENSE STANDARDS**
**APPLICABLE TO REGIONAL MEDICARE**
**PART D PRESCRIPTION DRUG PLAN PRODUCTS**
**September 2020**

**PREAMBLE**

The standards for licensing Controlled Affiliates for Medicare Part D Prescription Drug Plan Products are established by BCBSA and are subject to change from time-to-time upon the affirmative vote of three-fourths (3/4) of the Plans and three-fourths (3/4) of the total weighted vote. Each Controlling Plan is required to use a standard Controlled Affiliate license form provided by BCBSA and to cooperate fully in assuring that the licensed Controlled Affiliate maintains compliance with the license standards.

**Standard 1 - Organization and Governance**

A Controlled Affiliate is defined as an entity organized and operated in such a manner, that it meets the following requirements:

(1) Controlled Affiliate is owned or controlled by two or more Controlling Plans;

(2) Each Controlling Plan is authorized pursuant to a separate Blue Shield License Agreement to use the Licensed Marks in a geographic area in the Region and every geographic area in the Region is so licensed to at least one of the Controlling Plans; and

(3) The Controlling Plans must have the legal authority directly or indirectly through wholly-owned subsidiaries:

(a) to select members of the Controlled Affiliate's governing body having not less than 100% voting control thereof;

(b) prevent any change in the articles of incorporation, bylaws or other establishing or governing documents of the Controlled Affiliate with which the Controlling Plans do not concur;

(c) exercise control over the policy and operations of the Controlled Affiliate; and

**EXHIBIT A (continued)**

Notwithstanding anything to the contrary in (a) through (c) hereof, the Controlled Affiliate's establishing or governing documents must also require written approval by each of the Controlling Plans before the Controlled Affiliate can:

(i) change its legal and/or trade names;

(ii) change the geographic area in which it operates (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iii) change any of the type(s) of businesses in which it engages (except such approval shall not be required with respect to business of the Controlled Affiliate conducted under the Licensed Marks within the Service Area of one of the Controlling Plans pursuant to a separate controlled affiliate license agreement with BCBSA sponsored by such Controlling Plan);

(iv) take any action that any Controlling Plan or BCBSA reasonably believes will adversely affect the Licensed Marks and Name.

In addition, the Controlling Plans directly or indirectly through wholly-owned subsidiaries shall own 100% of any for-profit Controlled Affiliate.

**Standard 2 - Financial Responsibility**

A Controlled Affiliate shall be operated in a manner that provides reasonable financial assurance that it can fulfill all of its contractual obligations to its customers.

**Standard 3 - State Licensure/Certification**

A Controlled Affiliate shall maintain appropriate and unimpaired licensure and certifications.

**EXHIBIT A (continued)**

**Standard 4 - Certain Disclosures**

A Controlled Affiliate shall make adequate disclosure in contracting with third parties and in disseminating public statements of:

a. the structure of the Blue Cross and Blue Shield System; and
b. the independent nature of every licensee.

**Standard 5 - Reports and Records for Controlled Affiliates**

A Controlled Affiliate and/or its Controlling Plans shall furnish, on a timely and accurate basis, reports and records relating to these Standards and the License Agreements between BCBSA and Controlled Affiliate.

**Standard 6 - Best Efforts**

During each year, a Controlled Affiliate shall use its best efforts to promote and build the value of the Blue Shield Marks.

**Standard 7 - Participation in Master Business Associate Agreement**

Controlled Affiliates shall comply with the terms of the Business Associate Agreement for Blue Cross and Blue Shield Licensees to the extent they perform the functions of a business associate or subcontractor to a business associate, as defined by the Business Associate Agreement.

**EXHIBIT B**

**ROYALTY FORMULA FOR SECTION 9 OF THE
CONTROLLED AFFILIATE LICENSE AGREEMENTS
APPLICABLE TO REGIONAL MEDICARE PART D PRESCRIPTION DRUG PLAN PRODUCTS**

Controlled Affiliate will pay BCBSA a fee for this license in accordance with the following formula:

An amount equal to its pro rata share of each Controlling Plan dues payable to BCBSA computed with the addition of the Controlled Affiliate's members using the Marks on regional PDP products and related services as reported on the Quarterly Enrollment Report with BCBSA. The payment by each Controlling Plan of its dues to BCBSA, including that portion described in this paragraph, will satisfy the requirement of this paragraph, and no separate payment will be necessary.

**Amended as of June 14, 2007**

**EXHIBIT 2**

**Membership Standards**
Page 1 of 5

Preamble

The Membership Standards apply to all organizations seeking to become or to continue as Regular Members of the Blue Cross and Blue Shield Association. Any organization seeking to become a Regular Member must be found to be in substantial compliance with all Membership Standards at the time membership is granted and the organization must be found to be in substantial compliance with all Membership Standards for a period of two (2) years preceding the date of its application. If Membership is sought by an entity which controls or is controlled by one or more Plans, such compliance shall be determined on the basis of compliance by such Plan or Plans.

The Regular Member Plans shall have authority to interpret these Standards.

A Regular Member Plan that operates as a “Shell Holding Company” is defined as an entity that assumes no underwriting risk and has less than 1% of the consolidated enterprise assets (excludes investments in subsidiaries) and less than 5% of the consolidated enterprise net general and administrative expenses.

A Regular Member Plan that operates as a “Hybrid Holding Company” is defined as an entity that assumes no underwriting risk and has either more than 1% of the consolidated enterprise assets (excludes investments in subsidiaries) or more than 5% of the consolidated enterprise net general and administrative expenses.

Standard 1: A Plan shall maintain a governing Board, which shall control the Plan and ensure that the Plan follows appropriate practices of corporate governance. A Plan's Board shall not be controlled by any special interest group, shall make an annual determination that a majority of its directors are independent, and shall act in the best interest of its Corporation and its customers. The Board shall be composed of a majority of persons other than providers of health care services, who shall be known as public members. A public member shall not be an employee of or have a financial interest in a health care provider, nor be a member of a profession which provides health care services.

**Amended as of March 15, 2007**

**EXHIBIT 2**
**Membership Standards**
Page 2 of 5

Standard 2: A Plan shall furnish to the Association on a timely and accurate basis reports and records relating to compliance with these Standards and the License Agreements between the Association and the Plans. Such reports and records are the following:

A. BCBSA Membership Information Request;

B. Triennial trade name and service mark usage material, including disclosure material under Standard 7;

C. Changes in the governance of the Plan, including changes in a Plan's Charter, Articles of Incorporation, or Bylaws, changes in a Plan's Board composition, or changes in the identity of the Plan's Principal Officers;

D. Quarterly Financial Report, Semi-annual "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC, Annual Budget, Annual Certified Audit Report, Insurance Department Examination Report, Annual Statement filed with State Insurance Department (with all attachments), Plan, Subsidiary and Affiliate Report; and

- Plans that are a Shell Holding Company as defined in the Preamble hereto are required to furnish only a calendar year-end "Health Risk-Based Capital (HRBC) Report" as defined by the NAIC.

**Amended as of November 17,2011**

**EXHIBIT 2**

**Membership Standards**
Page 3 of 5

E. Quarterly Enrollment Report, Quarterly Member Touchpoint Measures Index (MTM) through 12/31/2011, and Semi-annual MTM Index starting 1/1/2012 and thereafter.

- For purposes of MTM reporting only, a Plan shall file a separate MTM report for each Geographic Market.

Standard 3: A Plan shall be operated in a manner that provides reasonable financial assurance that it can fulfill its contractual obligations to its customers.

Standard 4: A Plan shall be operated in a manner responsive to customer needs and requirements.

Standard 5: A Plan shall effectively and efficiently participate in each national program as from time to time may be adopted by the Member Plans for the purposes of providing portability of membership between the Plans and ease of claims processing for customers receiving benefits outside of the Plan's Service Area.

Such programs are applicable to Blue Cross and Blue Shield Plans, and include:

A. Inter-Plan Teleprocessing System (ITS);
B. BlueCard Program;
C. National Account Programs;
D. Business Associate Agreement for Blue Cross and Blue Shield Licensees, effective April 14, 2003; and
E. Inter-Plan Medicare Advantage Program.

**Amended as of November 21, 2014**

**EXHIBIT 2**
**Membership Standards**
Page 4 of 5

Standard 6: In addition to requirements under the national programs listed in Standard 5: Participation in National Programs, a Plan shall take such action as required to ensure its financial performance in programs and contracts of an inter-Plan nature or where the Association is a party.

Standard 7: A Plan shall make adequate disclosure in contracting with third parties and in disseminating public statements of (i) the structure of the Blue Cross and Blue Shield System, (ii) the independent nature of every Plan, and (iii) the Plan's financial condition.

Standard 8: A Plan shall cooperate with the Association's Board of Directors and its Brand Enhancement & Protection Committee in the administration of the Plan Performance Response Process and in addressing Plan performance problems identified thereunder.

Standard 9: A Plan shall obtain a rating of its financial strength from an independent rating agency approved by the Association's Board of Directors for such purpose.

Standard 10: Notwithstanding any other provision in this License Agreement, during each year, a Plan and its Controlled Affiliate(s) engaged in providing licensable services (excluding Life Insurance and Charitable Foundation Services) shall use their best efforts to promote and build the value of the Blue Shield Marks.

Standard 11: Neither a Plan nor any Larger Controlled Affiliate shall cause or permit an entity other than a Plan or a Licensed Controlled Affiliate thereof to obtain control of the Plan or Larger Controlled Affiliate or to acquire a substantial portion of its assets related to licensable services.

**Amended as of June 16, 2005**

**EXHIBIT 2**

**Membership Standards**
Page 5 of 5

Standard 12: No provider network, or portion thereof, shall be rented or otherwise made available to a National Competitor if the Licensed Marks or Names are used in any way with such network.

A provider network may be rented or otherwise made available, provided there is no use of the Licensed Marks or Names with respect to the network being rented.

Standard 13: Each Plan shall operate in a manner to reasonably: 1) protect the security and confidentiality of Personally Identifiable Information (PII) and Protected Health Information (PHI); 2) protect the Brands from reputational damage; and 3) cooperate with BCBSA and other Plans if a data security incident or data breach occurs.

**Amended as of June 18, 2015**

**EXHIBIT 3**

**GUIDELINES WITH RESPECT TO USE OF
LICENSED NAME AND MARKS IN CONNECTION WITH NATIONAL ACCOUNTS**

Page 1 of 3

1. The strength of the Blue Cross/Blue Shield National Accounts mechanism, and the continued provision of cost effective, quality health care benefits to National Accounts, are predicated on locally managed provider networks coordinated on a national scale in a manner consistent with effective service to National Account customers and consistent with the preservation of the integrity of the Blue Cross/Blue Shield system and the Licensed Marks. These guidelines shall be interpreted in keeping with such ends.

2. A National Account is an entity with employee and/or retiree locations in more than one Plan's Service Area. Unless otherwise agreed, a National Account is deemed located in the Service Area in which the corporate headquarters of the National Account is located. A local plant, office or division headquarters of an entity may be deemed a separate National Account when that local plant, office or division headquarters 1) has employee locations in more than one Service Area, and 2) has independent health benefit decision-making authority for the employees working at such local plant, office or division headquarters and for employees working at other locations outside the Service Area. In such a case, the local plant, office or division headquarters is a National Account that is deemed located in the Service Area in which such local plant, office or division headquarters is located. The Control Plan of a National Account is the Plan in whose Service Area the National Account is located. A participating ("Par") Plan is a Plan in whose Service Area the National Account has employee and/or retiree locations, but in which the National Account is not located. In the event that a National Account parent company consolidates health benefit-decision making for itself and its wholly-owned subsidiary companies, the parent company and the subsidiary companies shall be considered one National Account. The Control Plan for such a National Account shall be the Plan in whose Service Area the parent company headquarters is located.

3. The National Account Guidelines enunciated herein below shall be applicable only with respect to the business of new National Accounts acquired after January 1, 1991.

4. Control Plans shall utilize National Account identification cards complying with then currently effective BCBSA graphic standards in connection with all National Accounts business to facilitate administration thereof, to minimize subscriber and provider confusion, and to reflect a commitment to cooperation among Plans.

**Amended as of June 12, 2003**

**Exhibit 3**
Page 2 of 3

5. Disputes among Plans and/or BCBSA as to the interpretation or implementation of these Guidelines or as to other National Accounts issues shall be submitted to mediation and mandatory dispute resolution as provided in the License Agreement. For two years from the effective date of the License Agreement, however, such disputes shall be subject to mediation only, with the results of such mediation to be collected and reported in order to establish more definitive operating parameters for National Accounts business and to serve as ground rules for future binding dispute resolution.

6. The Control Plan may use the BlueCard Program (as defined by IPPC) to deliver benefits to employees and non-Medicare eligible retirees in a Participating Plan's service area if an alternative arrangement with the Participating Plan cannot be negotiated. The Participating Plan's minimum servicing requirement for those employees and non-Medicare retirees in its service area is to deliver benefits using the BlueCard Program. Account delivery is subject to the policies, provisions and procedures of the BlueCard Program.

7. For provider payments in a Participating Plan's area (on non-BlueCard claims), payment to the provider may be made by the Participating Plan or the Control Plan at the Participating Plan's option. If the Participating Plan elects to pay the provider, it may not withhold payment of a claim verified by the Control Plan or its designated processor, and payment must be in conformity with service criteria established by the Board of Directors of BCBSA (or an authorized committee thereof) to assure prompt payment, good service and minimum confusion with providers and subscribers. The Control Plan, at the Participating Plan's request, will also assure that measures are taken to protect the confidentiality of the data pertaining to provider reimbursement levels and profiles.

**Amended as of June 14, 1996**

**Exhibit 3**
Page 3 of 3

8. The Control Plan, in its financial agreements with a National Account, is expected to reasonably reflect the aggregate amount of differentials passed along to the Control Plan by all Participating Plans in a National Account.

9. Other than in contracting with health care providers or soliciting such contracts in areas contiguous to a Plan's Service Area in order to serve its subscribers or those of its licensed Controlled Affiliate residing or working in its Service Area, a Control Plan may not use the Licensed Marks and/or Name, as a tag line or otherwise, to negotiate directly with providers outside its Service Area.

**Amended as of March 13, 2003**

**Exhibit 4**
**GOVERNMENT PROGRAMS AND CERTAIN OTHER USES**

Page 1 of 14

1. A Plan and its licensed Controlled Affiliate may use the Licensed Marks and Name in bidding on and executing a contract to serve a Government Program, and in thereafter communicating with the Government concerning the Program. With respect, however, to such contracts entered into after the 1st day of January, 1991, the Licensed Marks and Name will not be used in communications or transactions with beneficiaries or providers in the Government Program located outside a Plan's Service Area, unless the Plan can demonstrate to the satisfaction of BCBSA's governing body that such a restriction on use of the Licensed Marks and Name will jeopardize its ability to procure the contract for the Government Program. As to both existing and future contracts for Government Programs, Plans will discontinue use of the Licensed Marks and Name as to beneficiaries and Providers outside their Service Area as expeditiously as circumstances reasonably permit. Effective January 1, 1995, except as provided in the first sentence above, all use by a Plan of the Licensed Marks and Name in Government Programs outside of the Plan's Service Area shall be discontinued. Incidental communications outside a Plan's Service Area with resident or former resident beneficiaries of the Plan, and other categories of necessary incidental communications approved by BCBSA, are not prohibited. For purposes of this Paragraph 1, the term “Government Programs” shall mean Medicare Part A, Medicare Part B and other non-risk government programs.

2. In connection with activity otherwise in furtherance of the License Agreement, a Plan and its Controlled Affiliates that are licensed to use the Licensed Marks and Name in its Service Area pursuant to the Controlled Affiliate License Agreements authorized in clauses a) through c) of Paragraph 2 of the Plan’s License Agreement with BCBSA may use the Licensed Marks and Name outside the Plan’s Service Area in the following circumstances which are deemed legitimate and necessary and not likely to cause consumer confusion:

2.1 Common Business Communications

a. sending letterhead, envelopes, and similar items solely for administrative purposes (e.g., not for purposes of marketing, advertising, promoting, selling or soliciting the sale of health care plans and related services);

b. distributing business cards other than in marketing and selling;

c. advertising in publications or electronic media solely to persons for employment;

**Amended as of June 19, 2014**

**EXHIBIT 4**

2.2 Marketing Spillover

a. advertising in print, electronic or other media which serve, as a substantial market, the Service Area of the Plan or licensed Controlled Affiliate, provided that no Plan or Controlled Affiliate may advertise outside its Service Area on the national broadcast and cable networks and that advertisements in national print media are limited to the smallest regional edition encompassing the Service Area;

b. advertising by direct mail where the addressee's zip code plus 4 includes, at least in part, the Plan's Service Area or that of a licensed Controlled Affiliate;

2.3 Provider Contracting

a. contracting with health care providers or soliciting such contracts in areas contiguous to the Plan's Service Area in order to serve its subscribers or those of such licensed Controlled Affiliates residing or working in its service area;

b. issuing a small sign containing the legal name or trade name of the Plan or such licensed Controlled Affiliates for display by a provider to identify the latter as a participating provider of the Plan or Controlled Affiliate;

c. negotiating case-specific reimbursement rates with a provider that does not have a contract applicable to a specific member’s services rendered or to be rendered with the Licensee (or any of the Licensees in the case of overlapping Service Areas) in whose Service Area the health care provider is located, so long as

(1) the Licensee engaging in the negotiations complies with all applicable Inter-Plan Programs Policies and Provisions and Brand Regulations related to case-specific rate negotiations, and

(2) the Licensee (or all Licensees in the case of overlapping Service Areas) in whose Service Area the health care provider is located provides consent before negotiations commence.

**Amended as of January 22, 2019**

**EXHIBIT 4**

d. contracting with a pharmacy management organization ("Pharmacy Intermediary") to gain access to a national or regional pharmacy network to provide self-administered prescription drugs to deliver a pharmacy benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Pharmacy Intermediary may not use the Licensed Marks or Name in contracting with the pharmacy providers in such network;

**Amended as of January 22, 2019**

**EXHIBIT 4**

e. contracting with the corporate owner of a national or regional retail pharmacy chain to gain access to the pharmacies in the chain to provide self-administered prescription drugs to deliver a pharmacy benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided that (1) the Plan and the Controlled Affiliate may
not contract directly with pharmacists or pharmacy stores outside the Plan's Service Area, and (2) neither the Plan's or the Controlled Affiliate's name nor the Licensed Marks or Name may be posted or otherwise displayed at or by any pharmacy store outside the Plan's Service Area;

f. contracting with a dental management organization ("Dental Intermediary") to gain access to a national or regional dental network to deliver a routine dental benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Dental Intermediary may not use the Licensed Marks or Name in contracting with the dental providers in such network;

g. contracting with a vision management organization ("Vision Intermediary") to gain access to a national or regional vision network to deliver a routine vision benefit for all of the Plan's or licensed Controlled Affiliate's members nationwide, provided, however, that the Vision Intermediary may not use the Licensed Marks or Name in contracting with the vision providers in such network;

h. contracting with an independent clinical laboratory for analysis and clinical assessment of specimens that are collected within the Plan's Service Area;

i. contracting with a durable medical equipment or home medical equipment company for durable medical equipment and supplies and home medical equipment and supplies that are shipped to a location within the Plan's Service Area;

j. contracting with a specialty pharmaceutical company for non-routine biological therapeutics that are ordered by a health care professional located within the Plan's Service Area;

k. contracting with a company that operates provider sites in the Plan's Service Area, provided that the contract is solely for services rendered at a site (e.g., hospital, mobile van) that is within the Plan's Service Area;

**EXHIBIT 4**

Page 5 of 14

l. contracting with a company that makes health care professionals available in the Plan's Service Area (e.g., traveling home health nurse), provided that the contract is solely for services rendered by health care professionals who are located within the Plan's Service Area.

m. Permitting Control/Home Plans' ability to resolve members' service issues requiring outreach to out-of-area providers as set forth in the Inter-Plan Programs and Inter-Plan Medicare Advantage Program Policies.

2.4 Services to National Accounts

a. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee (as those terms are defined in the Inter-Plan Programs Policies and Provisions ("IP Policies")) to offer Blue-branded Health Coverage to the National Account, offering Blue-branded Health and Wellness Programs to all members of the National Account, including members who have not enrolled in the Blue-branded Health Coverage ("non-Blue Health Coverage members"), provided that:

(i) the Plan and/or Licensed Controlled Affiliate has no contact or interaction with providers outside of the Plan's Service Area, except as specifically provided in the IP Policies and in 2.4(b); and

(ii) if in accordance with IP Policies another Licensee is soliciting or servicing under the Brands a local plant, office or division of the account that is outside of the Plan's Service Area, the Plan and/or licensed Controlled Affiliate may not offer Blue-branded Health and Wellness Programs to any employees working at such local plant, office or division without the consent of such other Licensee; and

(iii) if the Plan and/or licensed Controlled Affiliate provides an information card to the non-Blue Health Coverage members, the card may not display the Symbols in the masthead, must contain a prominent disclosure conveying that it is not a health insurance card, and otherwise must be designed so that it is dissimilar to a Blue member identification card.

**Amended as of September 17, 2020**

**EXHIBIT 4**

Page 6 of 14

2.4 Services to National Accounts (continued)

For purposes of this subparagraph a, the following definitions apply:

**"Health and Wellness Program"** shall mean a program that includes at least one of the following elements or a related element:

- Health Risk Assessment and/or Preventive Screenings
- Exercise and Fitness Programs
- Health and Wellness Events (e.g., attendance at a health fair, a 5K walk)
- Nutrition and Weight Management
- Health Education (e.g., smoking cessation classes)
- Prenatal and Parenting Education
- Disease or Chronic Condition Management

The above listing is intended to represent examples of the types of programs that may be offered, and other programs, including those offered through different media such as the internet or telephonically, may also be deemed Health and Wellness programs.

**"Health Coverage"** shall mean providing or administering medical, surgical, hospital, major medical, or catastrophic coverage, or any HMO, PPO, POS or other managed care plan for the foregoing services.

b. as part of a Health and Wellness Program that is otherwise compliant with Brand Regulation 4.11.4(a), contracting with a health and wellness organization to gain access to providers to deliver a discrete health and wellness event ("Event") held at a National Account's worksite outside of the Licensee's Service Area, provided that:

(i) the services delivered at the Event are limited to fingerstick screenings for cholesterol and glucose, seasonal flu immunizations, blood pressure measurements, body mass index measurements, and other routine screenings, immunizations and measurements; and

(ii) neither such services nor their costs are applied as claims against any benefit plan; and

(iii) the Event is presented during one or more limited periods during a benefit year and is available to all employees at the worksite.

**Amended as of March 26, 2015**

**EXHIBIT 4**

c. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee to offer Blue-branded Health Coverage to the National Account, performing the Eligibility and Enrollment functions of HR administration for all benefit plans offered by the National Account to its members, including benefit plans that are not underwritten or administered by the Plan, provided that:

(i) in performing such functions, the Plan and/or licensed Controlled Affiliate does not use the Brands in any communications with health care providers outside of the Plan's Service Area, and otherwise limits its use of the Brands outside of the Service Area to communications with the account's members, the other benefit plan providers with which the account has contracted and other reasonably necessary communications to perform such functions; and

(ii) if in accordance with IP Policies another Licensee is soliciting or servicing under the Brands a local plant, office or division of the account that is outside of the Plan's Service Area, the Plan and/or licensed Controlled Affiliate may not perform Eligibility and Enrollment functions for employees working at such local plant, office or division without the consent of such other Licensee;

d. in conjunction with contracting with a National Account as Control Licensee or Alternate Control Licensee to perform or investigate fraud, waste and abuse investigation activities for a non-participating provider in a Par/Host Plan's service area, as long as the Control/Home Plan is given permission to do so by the Par/Host Plan and specific conditions are met in accordance with Inter-Plan Programs and Inter-Plan Medicare Advantage Program policies.

For purposes of this subparagraph b, the following definitions apply:

"Health Coverage" has the meaning set forth in subparagraph 2.4.a.

**Amended as of September 27, 2018**

**EXHIBIT 4**

"Eligibility" means services that manage the account's eligibility data and determine or process determinations relating to eligibility for benefit plans offered by the account to its employees, including such services as:

- monitoring and auditing data to ensure that only entitled individuals are enrolled in each such benefit plan;
- review of eligibility documentation (e.g. marriage licenses, birth certificates, student status verification letters, employment records);
- identification of key member segments such as over-age dependents, part-time employees, employees reaching certain milestones (e.g. Medicare-eligible, retirees);
- termination of coverage for those individuals found to be ineligible for coverage under a benefit plan, and, if applicable, generation of a COBRA event; and
- management of "hour-banking" for union environments in which union members can bank hours to remain eligible for benefits.

"Enrollment" means services that enroll eligible individuals and their spouses/dependents or terminate or change their enrollment in the account's benefit plans on an ongoing basis and during open enrollment periods, including such services as:

- the coordination of each step in open enrollment process from project planning and system set-up to the generation of confirmation statements;
- ongoing enrollment support for new hires and changes due to life events and work status adjustments;
- evidence of insurability (EOI) administration for life and disability coverage;
- transmission of eligibility/enrollment information to the account's benefit plan providers;
- review and reconciliation of error reports received from the account's benefit plan providers; and
- transmission of information to the account's payroll system (e.g., benefit deductions, employee demographic data).

**Amended as of March 26, 2015**

**EXHIBIT 4**

Page 9 of 14

2.5 Knowledge Sharing

a. submitting scholarly articles authored or co-authored by the Plan or Controlled Affiliate or its respective employees for publication in peer-reviewed journals;

b. permitting an internal representative of the Licensee (e.g., officer, employee) to speak or present at a conference or symposium outside of the Licensee's Service Area regarding either (i) healthcare financing, administration, delivery or policy, or (ii) topics within the representative's functional discipline or expertise at the Licensee, for which the event sponsor will issue communications to promote, administer, and/or recap the event that will identify the Licensee's representative as a participant. The communications outside of the Licensee's Service Area that mention the Licensee's representative shall be limited to materials and digital media provided to attendees, on-site signage, advertising in relevant trade publications, direct mail and email to attendees and prospective attendees, and the sponsor's website, Participation in any conference or symposium outside of the Licensee's Service Area may not be for the purpose of marketing or selling products or services.

If the Licensee's representative wishes to use the Brands in any manner, including use in his/her title, when participating as a speaker or presenter outside of the Licensee's Service Area about a topic that is not related to healthcare financing, administration, delivery, or policy, or to topics within the representative's functional discipline or expertise at the Licensee, the Licensee must notify BCBSA and receive prior approval from BCBSA before participating.

**Amended as of March 26, 2015**

**EXHIBIT 4**

2.6 Other Uses

a. entering into a license agreement between and among BCBSA, the Plan and a debit card issuer located outside the Plan's Service Area, and entering into a corresponding operating agreement or agreements, in order to offer a debit card bearing the Licensed Marks and Name to eligible persons as defined by the aforementioned license agreement;

b. appearing in communications issued by an independent third party to recognize outstanding performance of the Plan or Controlled Affiliate or a member of the Plan's or Controlled Affiliate's senior management as part of an established program of the third party for which the Plan has provided information to be considered for the recognition, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;

c. to identify itself as being a joint sponsor of an event, program or activity along with other Plans or such Plans' licensed Controlled Affiliates, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time;

d. hosting meetings or events (collectively, "events") in Washington, D.C. or a Plan's State Capitol related to policy and business issues in the Licensee's Service Area, or hosting events in conjunction with the assemblies or conventions of national political parties. Such events may not involve marketing or selling products or services. Use of the Brands outside the Licensee's Service Area in connection with such events shall be limited to materials and digital media provided to attendees and prospective attendees and onsite signage. For any such events in Washington, D.C. that are open to attendees other than government officials or their staffs, or are briefings open to all Congressional staff, or are otherwise likely to receive media coverage, the Licensee is required to provide advance notice to BCBSA. For events hosted outside of Washington, D.C. in conjunction with the assemblies or conventions of national political parties, the Licensee is required to provide advance notice to BCGSA and to the local Plan(s);

**Amended as of March 26, 2015**

**EXHIBIT 4**

Page 11 of 14

e. permitting an affiliate that is not licensed to use the Licensed Marks to identify its corporate relationship with the Plan, provided that such use complies with regulations of general application specifically prescribed by BCBSA from time to time.

3. In connection with activity otherwise in furtherance of the License Agreement, a Controlled Affiliate that is licensed to use the Licensed Marks and Name pursuant to a Controlled Affiliate License Agreement authorized in clauses d) or e) of Paragraph 2 of the Plan's License Agreement with BCBSA may use the Licensed Marks and Name outside the Region (as that term is defined in such respective Controlled Affiliate License Agreements) in the following circumstances which are deemed legitimate and necessary and not likely to cause consumer confusion:

a. sending letterhead, envelopes, and similar items solely for administrative purposes (e.g., not for purposes of marketing, advertising, promoting, selling or soliciting the sale of health care plans and related services);

b. distributing business cards other than in marketing and selling;

c. contracting with health care providers or soliciting such contracts in areas contiguous to the Region in order to serve its subscribers residing in the Region, provided that the Controlled Affiliate may not use the names of any of its Controlling Plans in connection with such contracting unless the provider is located in a geographic area that is also contiguous to such Controlling Plan's Service Area;

d. issuing a small sign containing the legal name or trade name of the Controlled Affiliate for display by a provider to identify the latter as a participating provider of the Controlled Affiliate, provided that the Controlled Affiliate may not use the names of any of its Controlling Plans on such signs unless the provider is located in a geographic area that is also contiguous to such Controlling Plan's Service Area;

advertising in publications or electronic media solely to persons for employment;

**Amended as of March 26, 2015**

**EXHIBIT 4**

f. advertising in print, electronic or other media which serve, as a substantial market, the Region, provided that the Controlled Affiliate may not advertise outside its Region on the national broadcast and cable networks and that advertisements in national print media are limited to the smallest regional edition encompassing the Region, and provided further that any such advertising by the Controlled Affiliate may not reference the name of any of its Controlling Plans unless the respective Controlling Plan is authorized under paragraph 2 of this Exhibit 4 to advertise in such media;

g. advertising by direct mail where the addressee's zip code plus 4 includes, at least in part, the Region, provided that such advertising by the Controlled Affiliate may not reference the name of any of its Controlling Plans unless the respective Controlling Plan is authorized under paragraph 2 of this Exhibit 4 to send direct mail to such zip code plus 4.

h. [Intentionally left blank, pending review by the Inter-Plan Programs Committee of the applicability of the case management rule to such Controlled Affiliates.]

i. contracting with a pharmacy management organization (“Pharmacy Intermediary”) to gain access to a national or regional pharmacy network to provide self-administered prescription drugs to deliver a pharmacy benefit for the Controlled Affiliate’s regional Medicare Advantage PPO or regional Medicare Part D Prescription Drug members enrolled under the Licensed Marks pursuant to such respective Controlled Affiliate License Agreements, provided, however, that the Pharmacy Intermediary may not use the Licensed Marks or Name in contracting with the pharmacy providers in such network;

j. contracting with the corporate owner of a national or regional retail pharmacy chain to gain access to the pharmacies in the chain to provide self-administered prescription drugs to deliver a pharmacy benefit to the Controlled Affiliate’s regional Medicare Advantage PPO
or regional Medicare Part D Prescription Drug members enrolled under the Licensed Marks pursuant to such respective

**EXHIBIT 4**

Page 13 of 14

Controlled Affiliate License Agreements, provided that (1) the Controlled Affiliate may not contract directly with pharmacists or pharmacy stores outside the Region, and (2) neither the Controlled Affiliate's name nor the Licensed Marks or Name may be posted or otherwise displayed at or by any pharmacy store outside the Region;

k. contracting with a dental management organization ("Dental Intermediary") to gain access to a national or regional dental network to deliver a routine dental benefit for the Controlled Affiliate's regional Medicare Advantage PPO members enrolled under the Licensed Marks pursuant to such Controlled Affiliate License Agreement, provided, however, that the Dental Intermediary may not use the Licensed Marks or Name in contracting with the dental providers in such network;

l. contracting with a vision management organization ("Vision Intermediary") to gain access to a national or regional vision network to deliver a routine vision benefit for the Controlled Affiliate's regional Medicare Advantage members enrolled under the Licensed Marks pursuant to such Controlled Affiliate License Agreement, provided, however, that the Vision Intermediary may not use the Licensed Marks or Name in contracting with the vision providers in such network;

m. contracting with an independent clinical laboratory for analysis and clinical assessment of specimens that are collected within the Controlled Affiliate's Region;

n. contracting with a durable medical equipment or home medical equipment company for durable medical equipment and supplies and home medical equipment and supplies that are shipped to a location within the Controlled Affiliate's Region;

o. contracting with a specialty pharmaceutical company for non-routine biological therapeutics that are ordered by a health care professional located within the Region;

p. contracting with a company that operates provider sites in the Region, provided that the contract is solely for services rendered at a site (e.g., hospital, mobile van) that is within the Region;

**EXHIBIT 4**

q. contracting with a company that makes health care professionals available in the Region (e.g., traveling home health nurse), provided that the contract is solely for services rendered by health care professionals who are located within the Region.

4. BCBSA shall retain the right to use the Licensed Marks in conjunction with the Federal Employee Program and with any other national offering made to federal employees pursuant to the Federal Employees Health Benefits Program (FEHBP), including the right to license such use to its vendors, but only in the following manner.

   a. the Licensed Marks may only be used by BCBSA with the term "Federal Employee Program", "Federal", "FEP", or similar language identifying the program as a benefit program for federal employees;

   b. the Licensed Marks may not be used by BCBSA with the name(s) of a specific Plan or Plans and;

   c. any use by BCBSA in conjunction with a new national FEHBP program proposed after the enactment of this amendment will require the approval of the BCBSA Board of Directors.

5. Where required by applicable state or local law or regulation, a Plan or its licensed Controlled Affiliate may submit documents that contain the Brands to, and file forms that contain the Brands with, state or local regulators in a state not included in its Service Area, provided that it gives reasonable advance notice to the local Plan of its intent to submit such documents or file such forms. Notwithstanding, in no event may a Plan or its licensed Controlled Affiliate use the Brands to register, or to obtain or maintain a license, a certificate of authority, or an equivalent document authorizing it to act as a risk-bearing entity or third party administrator in a state not included in its Service Area. If the local Plan advises BCBSA that it believes its License Agreement has been or would be violated by any submission or filing, BCBSA shall determine whether such submission or filing is required by state or local law or regulation and violates the License Agreement, subject to the Plan's or licensed Controlled Affiliate's rights to obtain an independent review of such determination under Paragraph 9(a) and Exhibit 5 of its License Agreement or Paragraph 8 of the Controlled Affiliate License. For purposes of this paragraph, "local Plan" is defined as each Plan whose Service Area includes all or part of the state in which the foregoing applicable state or local law or regulation has been enacted.

**Amended as of March 26, 2015**

**EXHIBIT 5**

Page 1 of 23

**MEDIATION AND MANDATORY DISPUTE RESOLUTION (MMDR) RULES**

The Blue Cross and Blue Shield Plans ("Plans") and the Blue Cross Blue Shield Association ("BCBSA") recognize and acknowledge that the Blue Cross and Blue Shield system is a unique nonprofit and for-profit system offering cost effective health care financing and services. The Plans and BCBSA desire to utilize Mediation and Mandatory Dispute Resolution ("MMDR") to avoid expensive and time-consuming litigation that may otherwise occur in the federal and state judicial systems. Even MMDR should be viewed, however, as methods of last resort, all other procedures for dispute resolution having failed. Except as otherwise provided in the License Agreements, the Plans, their Controlled Affiliates and BCBSA agree to submit all disputes to MMDR pursuant to these Rules and in lieu of litigation.

**1. Initiation of Proceedings**

A. Pre-MMDR Efforts

Before filing a Complaint to invoke the MMDR process, the CEO of a complaining party, or his/her designated representative, shall undertake good faith efforts with the other side(s) to try to resolve any dispute.

B. Complaint

To commence a proceeding, the complaining party (or parties) shall provide by certified mail, return receipt requested, a written Complaint to the BCBSA Corporate Secretary (which shall also constitute service on BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) named therein. The Complaint shall contain:

i. identification of the complaining party (or parties) requesting the proceeding;

ii. identification of the respondent(s);

iii. identification of any other persons or entities who are interested in a resolution of the dispute;

iv. a full statement describing the nature of the dispute;

v. identification of all of the issues that are being submitted for resolution;

**Amended as of November 21, 1996**

**EXHIBIT 5**
Page 2 of 23

vi. the remedy sought;

vii. a statement as to whether the complaining party (or parties) elect(s) first to pursue Mediation;

viii. any request, if applicable, that the matter be handled on an expedited basis and the reasons therefor; and

ix. a statement signed by the CEO of the complaining party affirming that the CEO has undertaken efforts, or has directed efforts to be undertaken, to resolve the dispute before resorting to the MMDR process.

The complaining party (or parties) shall file and serve with the Complaint copies of all documents which the party (or parties) intend(s) to offer at the Arbitration Hearing and a statement identifying the witnesses the party (or parties) intend(s) to present at the Hearing, along with a summary of each witness' expected testimony.

C. Answer

Within twenty (20) days after receipt of the Complaint, each respondent shall serve on BCBSA and on the complaining party (or parties):

i. a full Answer to the aforesaid Complaint;

ii. a statement of any Counterclaims against the complaining party (or parties), providing with respect thereto the information specified in Paragraph 1.B., above;

iii. a statement as to whether the respondent elects to first pursue Mediation; and

iv. any request, if applicable, that the matter be handled on an expedited basis and the reasons therefor.

The respondent(s) shall file and serve with the Answer or by the date of the Initial Conference set forth in Paragraph 3.C., below, copies of all documents which the respondent(s) intend(s) to offer at the Arbitration Hearing and a statement identifying the witnesses the party (or parties) intend(s) to present at the Hearing, along with a summary of each witness' expected testimony.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 3 of 23

D. Reply To Counterclaim

Within ten (10) days after receipt of any Counterclaim, the complaining party (or parties) shall serve on BCBSA and on the responding party (or parties) a Reply to the Counterclaim. Such Reply must provide the same information required by Paragraph 1.C., above.

**2. Mediation**

To facilitate the mediation of disputes between or among BCBSA, the Plans and/or their Controlled Affiliates, the BCBSA Board has provided for Mediation under these Rules. Mediation may be pursued in lieu of or in an effort to obviate the Mandatory Dispute Resolution process, and all parties are strongly urged, but not required, to exhaust the mediation procedure provided for herein. In the event any party refuses to proceed with Mediation, the parties shall proceed immediately to Mandatory Dispute Resolution, as provided in Section 3.

A. Selection of Mediators

If all parties agree to pursue Mediation, they shall promptly attempt to agree upon: (i) the number of mediators desired, not to exceed three mediators; and (ii) the selection of experienced mediator(s) from an independent entity to mediate all disputes set forth in the Complaint and Answer (and Counterclaim and Reply, if any). In the event the parties are unable to agree upon the selection or number of mediators, both within five (5) days of the service of the Answer or Reply to Counterclaim, whichever is later, the BCBSA Corporate Secretary shall immediately refer the matter to a nationally recognized professional ADR organization (such as CPR or JAMS) for mediation by a single mediator to be selected by the ADR organization.

B. Binding Decision

Before the Mediation Hearing described below, the BCBSA Corporate Secretary shall contact the parties to determine whether they wish to be bound by any recommendation of the selected mediator(s) for resolution of the disputes. If all wish to be bound, the Corporate Secretary will send appropriate documentation to them for their signatures before the Mediation Hearing begins.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 4 of 23

C. Mediation Procedure

The Mediator(s) shall apply the mediation procedures and processes provided for herein (not the rules of the ADR organization with which they are affiliated) and shall promptly advise the parties of a scheduled Mediation Hearing date. Unless a party requests an expedited procedure, or unless all parties to the proceeding agree to one or more extensions of time, the Mediation Hearing set forth below shall be completed within forty (40) days of BCBSA's receipt of the Complaint. The selected mediator(s), unless the parties otherwise agree, shall adhere to the following procedure:

i. Each party must be represented by its CEO or other representative who has been delegated full authority to resolve the dispute. However, parties may send additional representatives as they see fit.

ii. Each party will be given one-half hour to present its case, beginning with the complaining party (or parties), followed by the other party or parties. The parties are free to structure their presentations as they see fit, using oral statements or direct examination of witnesses. However, neither cross-examination nor questioning of opposing representatives will be permitted. At the close of each presentation, the selected mediator(s) will be given an opportunity to ask questions of the presenters and witnesses. All parties must be present throughout the Mediation Hearing. The selected mediator(s) may extend the time allowed for each party's presentation at the Mediation Hearing. The selected mediator(s) may meet in executive session, outside the presence of the parties, or may meet with the parties separately, to discuss the controversy.

iii. After the close of the presentations, the parties will attempt to negotiate a settlement of the dispute. If the parties desire, the selected mediators, or any one or more of the selected mediator(s), will sit in on the negotiations.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 5 of 23

iv. After the close of the presentations, the selected mediator(s) may meet privately to agree upon a recommendation for resolution of the dispute which would be submitted to the parties for their consideration and approval. If the parties have previously agreed to be bound by the results of this procedure, this recommendation shall be binding upon the parties.

v. The purpose of the Mediation Hearing is to assist the parties to settle their grievances short of mandatory dispute resolution. As a result, the Mediation Hearing has been designed to be as informal as possible. Rules of evidence shall not apply. There will be no transcript of the proceedings, and no party may make a tape recording of the Mediation Hearing.

vi. In order to facilitate a free and open discussion, the Mediation proceeding shall remain confidential. A "Stipulation to Confidentiality" which prohibits future use of settlement offers, all position papers or other statements furnished to the selected mediator(s), and decisions or recommendations in any Mediation proceeding shall be executed by each party.

vii. Upon request of the selected mediator(s), or one of the parties, BCBSA staff may also submit documentation at any time during the proceedings.

D. Notice of Termination of Mediation

If the Mediation cannot be completed within the prescribed or agreed time period due to the lack of cooperation of any party, as determined by the selected mediator(s), or if the Mediation does not result in a final resolution of all disputes at the Mediation Hearing or within ten (10) days after the Mediation Hearing, any party or any one of the selected mediator(s) shall so notify the BCBSA Corporate Secretary, who shall promptly issue a Notice of Termination of Mediation to all parties, to the selected mediator(s), and to the MDR Administrator. Such notice shall serve to bring the Mediation to an end and to initiate Mandatory Dispute Resolution. Upon agreement of all parties and the mediator(s), the Mediation process may continue at the same time the MDR process is invoked. In such case, the Notice of Termination of Mediation described above serves to initiate the MDR proceeding, but does not terminate mediation proceedings, which may proceed simultaneous with the MDR proceeding.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 6 of 23

**3. Mandatory Dispute Resolution (MDR)**

If any party elects not to first pursue Mediation, or if a Notice of Termination of Mediation is issued as set forth in Paragraph 2.D., above, then the unresolved disputes set forth in any Complaint and Answer (and Counterclaim and Reply, if any) shall be subject to mandatory binding arbitration (herein referred to as "MDR").

A. MDR Administrator

The Administrator for purposes of Mandatory Arbitration shall be an independent nationally recognized entity such as CPR or JAMS, specializing in alternative dispute resolution. In the event the parties pursued Mediation with CPR, JAMS or a similar organization, that organization also shall serve as the MDR Administrator, unless all parties notify the BCBSA Corporate Secretary in writing within two (2) days of receiving the Notice of Termination of Mediation that they wish to pursue MDR with another nationally recognized organization serving as MDR Administrator.

In the event the parties (i) did not pursue Mediation, (ii) pursued mediation with a Mediator not affiliated with an ADR organization that offers a panel of arbitrators, or (iii) all parties that pursued Mediation notified the BCBSA Corporate Secretary that they wish to have an MDR Administrator that is different from the organization with which their mediator was affiliated, they shall promptly attempt to agree on a nationally recognized ADR entity that supplies a panel of arbitrators. If they reach such agreement within five (5) days of the Notice of Termination of Mediation or receipt of the Answer or Reply to Counterclaim (whichever is later), the parties shall promptly inform the BCBSA Corporate Secretary of their agreed upon ADR organization. In the event the parties are unable to reach agreement on an MDR Administrator within that timeframe, the BCBSA Corporate Secretary shall immediately refer the matter to CPR, JAMS or a similar organization for MDR.

Any person who served as a Mediator shall not serve as an arbitrator for the same or similar dispute for purposes of MDR.

B. Rules for MDR

The rules controlling all aspects of MDR shall be exclusively those provided for herein. The rules promulgated or otherwise used by the MDR Administrator organization shall not apply.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 7 of 23

C. Initial Conference

Within seven (7) days after a Notice of Termination has issued, or the matter has otherwise been referred to an MDR Administrator, or within five (5) days after the time for filing and serving the Answer or Reply to any Counterclaim (whichever is later) if the parties elect first not to mediate, the parties shall confer with the Administrator to discuss selecting a dispute resolution panel ("the Panel"). This conference (the “Initial Conference”) may be by telephone. The parties are encouraged to agree to the composition of the Panel and to present that agreement to the Administrator at the Initial Conference. If the parties do not agree on the composition of the Panel by the time of the Initial Conference, or by any extension thereof agreed to by all parties and the Administrator, then the Panel Selection Process set forth in subparagraph D, below, shall be followed.

D. Panel Selection Process

The Administrator shall designate, prior to the Initial Conference, at least seven potential arbitrators. Each party shall be permitted to strike any designee for cause and the Administrator shall determine the sufficiency thereof in its sole discretion. The Administrator will designate a replacement for any designee so stricken. Each party shall then be permitted one peremptory strike from the list of designees. The Administrator shall set the dates for exercising all strikes, which shall be set to encourage the prompt selection of arbitrators.

After the parties exercise any designee strikes for cause and their peremptory strike against any designee of their choice, the parties shall each rank the remaining panel members in order of preference and provide the Administrator, without serving on any other party, their ranked list. The Administrator shall not disclose any party’s ranked list to members of the panel or to other parties.

From the remaining designees, and after considering opportunities to maximize, so far as possible, the collectively stated arbitrator preferences provided by the parties on their ranked lists, the Administrator shall select a three member Panel. The Panel Selection Process shall be completed no later than ten (10) days after the Initial Conference.

Each Arbitrator shall be compensated at his or her normal hourly rate or, in the absence of an established rate, at a reasonable hourly rate to be promptly fixed by the Administrator for all time spent in connection with the proceedings and shall be reimbursed for any travel and other reasonable expenses.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 8 of 23

E. Duties Of The Arbitrators

The Panel shall promptly designate a Presiding Arbitrator for the purposes reflected below, but shall retain the power to review and modify any ruling or other action of said Presiding Arbitrator. Each Arbitrator shall be an independent Arbitrator, shall be governed by the Code of Ethics for Arbitrators in Commercial Disputes, and shall at or prior to the commencement of any Arbitration Hearing take an oath to that effect. Each Arbitrator shall promptly disclose in writing to the Panel and to the parties any circumstances, whenever arising, that might cause doubt as to such Arbitrator's compliance, or ability to comply, with said Code of Ethics, and, absent resignation by such Arbitrator, the remaining Arbitrators shall determine in their sole discretion whether the circumstances so disclosed constitute grounds for disqualification and for replacement. With respect to such circumstances arising or coming to the attention of a party after an Arbitrator's selection, a party may likewise request the Arbitrator's resignation or a determination as to disqualification by the remaining Arbitrators. With respect to a sole Arbitrator, the determination as to disqualification shall be made by the Administrator.

There shall be no ex parte communication between the parties or their counsel and any member of the Panel.

F. Panel's Jurisdiction And Authority

The Panel's jurisdiction and authority shall extend to all disputes between or among the Plans, their Controlled Affiliates, and/or BCBSA, except for those disputes excepted from these MMDR procedures as set forth in the License Agreements.

With the exception of punitive or treble damages, the Panel shall have full authority to award the relief it deems appropriate to resolve the parties' disputes, including monetary awards and injunctions, mandatory or prohibitory. The Panel has no authority to award punitive or treble damages except that the Panel may allocate or assess responsibility for punitive or treble damages assessed by another tribunal. Subject to the above limitations, the Panel may, by way of example, but not of limitation:

**Amended as of September 20, 2007**

**EXHIBIT 5**

i. interpret or construe the meaning of any terms, phrase or provision in any license between BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.

ii. determine whether BCBSA, a Plan or a Controlled Affiliate has violated the terms or conditions of any license between the BCBSA and a Plan or a Controlled Affiliate relating to the use of the BLUE CROSS® or BLUE SHIELD® service marks.

iii. decide challenges as to its own jurisdiction.

iv. issue such orders for interim relief as it deems appropriate pending Hearing and Award in any Arbitration.

It is understood that the Panel is expected to resolve issues based on governing principles of law, preserving to the maximum extent legally possible the continued integrity of the Licensed Marks and the BLUE CROSS/BLUE SHIELD system. The Panel shall apply federal law to all issues which, if asserted in the United States District Court, would give rise to federal question jurisdiction, 28 U.S.C. § 1331. The Panel shall apply Illinois law to all issues involving interpretation, performance or construction of any License Agreement or Controlled Affiliate License Agreement unless the agreement otherwise provides. As to other issues, the Panel shall choose the applicable law based on conflicts of law principles of the State of Illinois.

G. Administrative Conference

Within five (5) days of the Panel being selected, the Presiding Arbitrator shall confer with the parties and the other members of the Panel and shall schedule, in writing, a conference in which the parties and the Panel shall participate (the “Administrative Conference”). The Administrative Conference shall take place no later than fifteen (15) days after the Panel is selected. At the Administrative Conference the parties and the Panel shall discuss the scheduling of the Arbitration Hearing and any other matter appropriate to be considered, including but not limited to: any written discovery in the form of requests for production of documents or requests to admit facts; the identity of any witness whose deposition a party may desire and a showing of exceptional good cause for the taking

**Amended as of September 20, 2007**

**EXHIBIT 5**

of any such deposition; the desirability of bifurcation or other separation of the issues; the need for and the type of record of conferences and hearings, including the need for transcripts; the need for expert witnesses and how expert testimony should be presented; the appropriateness of motions to dismiss and/or for full or partial summary judgment; consideration of stipulations; the desirability of presenting any direct testimony in writing; and the necessity for any on-site inspection by the Panel. If the parties agree, the Administrative Conference may be by telephone.

H. Discovery

i. ***Requests for Production of Documents***: All requests for the production of documents must be served no later than five (5) days after the date of the Initial Conference. Within twenty (20) days after receipt of a request for production of documents, a party shall (a) serve responses and objections to the request, (b) produce all responsive, non-privileged documents to the requesting party, and (c) to the extent any responsive documents are withheld on the grounds of attorney-client privilege or work product, produce a log identifying such documents in the manner specified in Fed. R. Civ. P. 26(b)(5). If, after reviewing a privilege log, the requesting party believes attorney-client privilege or work product protection was improperly claimed by the producing party with respect to any document, the requesting party may ask the Presiding Arbitrator to conduct an in-camera inspection of the same. With respect to documentary and other discovery produced in any MDR proceeding by BCBSA, the fact that a party's CEO or other senior officers may serve on the BCBSA Board of Directors, BCBSA Board Committees or other BCBSA work groups, task forces and the like, shall not be a basis for defeating an otherwise valid claim of attorney-client privilege or work product protection over such documentary or other discovery materials by BCBSA.

ii. ***Requests for Admissions***: Requests for Admissions may be served up to twenty-one (21) days prior to the discovery cut-off set by the Presiding Arbitrator. A party served with Requests For Admissions must respond within twenty (20) days of receipt of said request. The good faith use of and response to Requests for Admissions is encouraged, and the Panel shall have full discretion, with reference to the Federal Rules of Civil Procedure, in awarding appropriate sanctions with respect to abuse of the procedure.

**Amended as of September 20, 2007**

**EXHIBIT 5**

iii. ***Depositions:*** As a general rule, the parties will not be permitted to take party or non-party deposition testimony for discovery purposes. The Presiding Arbitrator, in his or her sole discretion, shall have the authority to permit a party to take such deposition testimony upon a showing of exceptional good cause. The parties will be permitted to take de bene esse deposition[1] testimony to the fullest extent permitted by law of any witness who cannot be compelled to testify at the Arbitration Hearing. No deposition, for discovery purposes or otherwise, shall exceed three (3) hours, excluding objections and colloquy of counsel. Depositions may be recorded in any manner recognized by the Federal Rules of Civil Procedure and the parties shall specify in each notice of deposition or request for permission to take deposition testimony the manner in which such deposition shall be recorded.

iv. ***Expert witness(es)***: If a party intends to present the testimony of an expert witness during the oral hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)(B) ten (10) days prior to the discovery cut-off set by the Presiding Arbitrator. If a party intends to present the testimony of a rebuttal expert witness during the Arbitration Hearing, it shall provide all other parties with a written statement setting forth the information required to be provided by Fed. R. Civ. P. 26(a)(2)(B) within twenty (20) days after the date on which the written statement of the expert witness whose testimony is to be rebutted was produced.

v. ***Discovery cut-off****:* The Presiding Arbitrator shall determine the date on which the discovery period will end, but the discovery period shall not exceed thirty (30) days from the date of the Administrative Conference without the agreement of all parties.

**Amended as of September 20, 2007**

[1] As used in these Rules, "de bene esse deposition" means a deposition that is not taken for discovery purposes, but is taken for the purpose of reading part or all of the deposition transcript into the record at the Arbitration Hearing, to the extent permitted by the Panel, because the witness cannot be compelled to testify at the Arbitration Hearing or has exercised a right provided under these Rules to provide deposition testimony in lieu of testimony at the Arbitration Hearing.

**EXHIBIT 5**
Page 12 of 23

vi. ***Additional discovery***: Any additional discovery will be at the discretion of the Presiding Arbitrator.

vii. ***Discovery Disputes:*** Any discovery disputes shall be raised by motion to the Presiding Arbitrator, who is authorized to resolve all such disputes, and whose resolution will be binding on the parties unless modified by the Arbitration Panel. Prior to raising any discovery dispute with the Presiding Arbitrator, the parties shall meet and confer, telephonically or in person, in an attempt to resolve or narrow the dispute. If a party refuses to comply with a decision resolving a discovery dispute, the Panel, in keeping with Fed. R. Civ. P. 37, may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for resolution adversely to that party.

viii. ***Extensions:*** The time for responding to discovery requests may be extended by the Presiding Arbitrator for good and sufficient cause shown. Any request for such an extension shall be made in writing.

I. Panel Suggested Settlement/Mediation

At any point during the proceedings, the Panel at the request of any party or on its own initiative, may suggest that the parties explore settlement and that they do so at or before the conclusion of the Arbitration Hearing, and the Panel shall give such assistance in settlement negotiations as the parties may request and the Panel may deem appropriate. Alternatively, the Panel may direct the parties to endeavor to mediate their disputes as provided above, or to explore a mini-trial proceeding, or to have an independent party render a neutral evaluation of the parties' respective positions. The Panel shall enter such sanctions as it deems appropriate with respect to any party failing to pursue in good faith such Mediation or other alternate dispute resolution methods.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 13 of 23

J. Subpoenas on Third Parties

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq*., and subject to Paragraph 3.G(iii) above, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan or any officer, employee or director of a third party Blue Plan, to compel deposition testimony or the production of documents, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena.

K. Arbitration Hearing

An Arbitration Hearing will be held within thirty (30) days after the Administrative Conference if no discovery is taken, or within thirty (30) days after the close of discovery, unless all parties and the Panel agree to extend the Arbitration Hearing date, or unless the parties agree in writing to waive the Arbitration Hearing. The parties may mutually agree on the location of the Arbitration Hearing. If the parties fail to agree, the Arbitration Hearing shall be held in Chicago, Illinois, or at such other location determined by the Presiding Arbitrator to be most convenient to the participants. The Panel will determine the date(s) and time(s) of the Arbitration Hearing(s) after consultation with all parties and shall provide reasonable notice thereof to all parties or their representatives.

L. Arbitration Hearing Memoranda

Twenty (20) days prior to the Arbitration Hearing, each party shall submit to the other party (or parties) and to the Panel an Arbitration Hearing Memorandum which sets forth the applicable law and any argument as to any relevant issue. The Arbitration Hearing Memorandum will supplement, and not repeat, the allegations, information and documents contained in or with the Complaint, Answer, Counterclaim and Reply, if any. Ten (10) days prior to the Arbitration Hearing, each party shall submit to each other party a list of all expert and fact witnesses (but not including rebuttal fact witness) that such party intends to have testify at the Arbitration Hearing and a brief summary of the testimony each such witness is expected to give. In addition, no later than five (5) days prior to the Arbitration, each party may submit to each other party and to the Panel a Response Arbitration Hearing Memorandum which sets forth any response to another party's Arbitration Hearing Memorandum.

**Amended as of September 20, 2007**

**EXHIBIT 5**

M. Notice For Testimony

Ten (10) days prior to the Arbitration Hearing, any party may serve a Notice on any other party (or parties) requesting the attendance at the Arbitration Hearing of any officer, employee or director of the other party (or parties) for the purpose of providing noncumulative testimony. If a party fails to produce one of its officers, employees or directors whose noncumulative testimony during the Arbitration Hearing is reasonably requested by an adverse party, the Panel may refuse to allow that party to support or oppose designated claims or defenses, prohibit that party from introducing designated matters into evidence or, in extreme cases, decide an issue submitted for mandatory dispute resolution adversely to that party; provided, however, that a party may refuse to produce a director to testify if, within two (2) days of receiving a notice requesting the attendance of such director at the Arbitration Hearing, the party agrees to make the director available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. This Rule may not be used for the purpose of burdening or harassing any party, and the Presiding Arbitrator may impose such orders as are appropriate so as to prevent or remedy any such burden or harassment.

Pursuant to, and consistent with, the Federal Arbitration Act, 9 U.S.C. § 9 *et seq.*, twenty (20) days or more prior to the Arbitration Hearing, a party may request the issuance of a subpoena on any third party, including but not limited to any third party Blue Plan, BCBSA or any officer, employee or director of a third party Blue Plan or BCBSA for the purpose of providing noncumulative testimony at the Arbitration Hearing, and, if good and sufficient cause is shown, the Panel shall issue such a subpoena; provided however, that a director of a third party Blue Plan or BCBSA may refuse to testify if, within two (2) days of receiving a subpoena requesting the attendance of such director at the Arbitration Hearing, the director agrees to make him/herself available for a de bene esse deposition at a mutually convenient time at any location within fifty (50) miles of the director's primary residence chosen by the party requesting the director's testimony. Each Blue Plan agrees to waive, on its own behalf and on behalf of its directors and officers, any objection it otherwise might have to any such subpoena based on service, venue or extraterritoriality.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Page 15 of 23

N. Arbitration Hearing Procedures

i. ***Attendance at Arbitration Hearing***: Any person having a direct interest in the proceeding is entitled to attend the Arbitration Hearing. The Presiding Arbitrator shall otherwise have the power to require the exclusion of any witness, other than a party or other essential person, during the testimony of any other witness. It shall be discretionary with the Presiding Arbitrator to determine the propriety of the attendance of any other person.

ii. ***Confidentiality***: The Panel and all parties shall maintain the privacy of the Arbitration Proceeding. The parties and the Panel shall treat the Arbitration Hearing and any discovery or other proceedings or events related thereto, including any award resulting therefrom, as confidential except as otherwise necessary in connection with a judicial challenge to or enforcement of an award or unless otherwise required by law.

iii. ***Stenographic Record***: Any party, or if the parties do not object, the Panel, may request that a stenographic or other record be made of any Arbitration Hearing or portion thereof. The costs of the recording and/or of preparing the transcript shall be borne by the requesting party and by any party who receives a copy thereof. If the Panel requests a recording and/or a transcript, the costs thereof shall be borne equally by the parties.

iv. ***Oaths***: The Panel may require witnesses to testify under oath or affirmation administered by any duly qualified person and, if requested by any party, shall do so.

v. ***Order of Arbitration Hearing***: An Arbitration Hearing shall be opened by the recording of the date, time, and place of the Arbitration Hearing, and the presence of the Panel, the parties, and their representatives, if any. The Panel may, at the beginning of the Arbitration Hearing, ask for statements clarifying the issues involved.

**Amended as of September 20, 2007**

**EXHIBIT 5**

Unless otherwise agreed, the complaining party (or parties) shall then present evidence to support their claim(s). The respondent(s) shall then present evidence supporting their defenses and Counterclaims, if any. The complaining party (or parties) shall then present evidence supporting defenses to the Counterclaims, if any, and rebuttal.

Witnesses for each party shall submit to questions by adverse parties and/or the Panel.

The Panel has the discretion to vary these procedures, but shall afford a full and equal opportunity to all parties for the presentation of any material and relevant evidence.

vi. ***Evidence***: The parties may offer such evidence as is relevant and material to the dispute and shall produce such evidence as the Panel may deem necessary to an understanding and resolution of the dispute. Unless good cause is shown, as determined by the Panel or agreed to by all other parties, no party shall be permitted to offer evidence at the Arbitration Hearing which was not disclosed prior to the Arbitration Hearing by that party. The Panel may receive and consider the evidence of witnesses by affidavit upon such terms as the Panel deems appropriate.

The Panel shall be the judge of the relevance and materiality of the evidence offered, and conformity to legal rules of evidence, other than enforcement of the attorney-client privilege and the work product protection, shall not be necessary. The Federal Rules of Evidence shall be considered by the Panel in conducting the Arbitration Hearing but those rules shall not be controlling. All evidence shall be taken in the presence of the Panel and all of the parties, except where any party is in default or has waived the right to be present.

Settlement offers by any party in connection with Mediation or MDR proceedings, decisions or recommendations of the selected mediators, and a party's position papers or statements furnished to the selected mediators shall not be admissible evidence or considered by the Panel without the consent of all parties.

**EXHIBIT 5**

Page 17 of 23

vii. ***Closing of Arbitration Hearing***: The Presiding Arbitrator shall specifically inquire of all parties whether they have any further proofs to offer or witnesses to be heard. Upon receiving negative replies or if he or she is satisfied that the record is complete, the Presiding Arbitrator shall declare the Arbitration Hearing closed with an appropriate notation made on the record. Subject to being reopened as provided below, the time within which the Panel is required to make the award shall commence to run, in the absence of contrary agreement by the parties, upon the closing of the Arbitration Hearing.

With respect to complex disputes, the Panel may, in its sole discretion, defer the closing of the Arbitration Hearing for a period of up to thirty (30) days after the presentation of proofs in order to permit the parties to submit post-hearing briefs and argument, as the Panel deems appropriate, prior to making an award.

For good cause, the Arbitration Hearing may be reopened for up to thirty (30) days on the Panel's initiative, or upon application of a party, at any time before the award is made

O. Awards

An Award must be in writing and shall be made promptly by the Panel and, unless otherwise agreed by the parties or specified by law, no later than thirty (30) days from the date of closing the Arbitration Hearing. If all parties so request, the Award shall contain findings of fact and conclusions of law. The Award, and all other rulings and determinations by the Panel, may be by a majority vote.

Parties shall accept as legal delivery of the Award the placing of the Award or a true copy thereof in the mail addressed to a party or its representative at its last known address or personal service of the Award on a party or its representative.

Awards are binding only on the parties to the Arbitration and are not binding on any non-parties to the Arbitration and may not be used or cited as precedent in any other proceeding.

**Amended as of September 20, 2007**

**EXHIBIT 5**

After the expiration of twenty (20) days from initial delivery, the Award (with corrections, if any) shall be final and binding on the parties, and the parties shall undertake to carry out the Award without delay.

Proceedings to confirm, modify or vacate an Award shall be conducted in conformity with and controlled by the Federal Arbitration Act. 9 U.S.C. § 1, *et seq*.

P. Return of Documents

Within sixty (60) days after the Award and the conclusion of any judicial proceedings with respect thereto, each party and the Panel shall return any documents produced by any other party, including all copies thereof. If a party receives a discovery request in any other proceeding which would require it to produce any documents produced to it by any other party in a proceeding hereunder, it shall not produce such documents without first notifying the producing party and giving said party reasonable time to respond, if appropriate, to the discovery request.

**4. Miscellaneous**

A. Expedited Procedures

Any party to a Mediation may direct a request for an expedited Mediation Hearing to the Chairman of the Mediation Committee, to the selected Mediators, and to all other parties at any time. The Chairman of the Mediation Committee, or at his or her direction, the then selected Mediators, shall grant any request which is supported by good and sufficient reasons. If such a request is granted, the Mediation shall be completed within as short a period as practicable, as determined by the Chairman of the Mediation Committee or, at his or her direction, the then selected Mediators.

Any party to an Arbitration may direct a request for expedited proceedings to the Administrator, to the Panel, and to all other parties at any time. The Administrator, or the Presiding Arbitrator if the Panel has been selected, shall grant any such request which is supported by good and sufficient reasons. If such a request is granted, the Arbitration shall be completed within as short a time as practicable, as determined by the Administrator and/or the Presiding Arbitrator.

**Amended as of September 20, 2007**

**EXHIBIT 5**

B. Temporary or Preliminary Injunctive Relief

Any party may seek temporary or preliminary injunctive relief with the filing of a Complaint or at any time thereafter. If such relief is sought prior to the time that an Arbitration Panel has been selected, then the Administrator shall select a single Arbitrator who is a lawyer who has no interest in the subject matter of the dispute, and no connection to any of the parties, to hear and determine the request for temporary or preliminary injunction. If such relief is sought after the time that an Arbitration Panel has been selected, then the Arbitration Panel will hear and determine the request. The request for temporary or preliminary injunctive relief will be determined with reference to the temporary or preliminary injunction standards set forth in Fed. R. Civ. P. 65.

C. Defaults and Proceedings in the Absence of a Party

Whenever a party fails to comply with the MDR Rules in a manner deemed material by the Panel, the Panel shall fix a reasonable time for compliance and, if the party does not comply within said period, the Panel may enter an Order of default or afford such other relief as it deems appropriate. Arbitration may proceed in the event of a default or in the absence of any party who, after due notice, fails to be present or fails to obtain an extension. An Award shall not be made solely on the default or absence of a party, but the Panel shall require the party who is present to submit such evidence as the Panel may require for the making of findings, determinations, conclusions, and Awards.

D. Notice

Each party shall be deemed to have consented that any papers, notices, or process necessary or proper for the initiation or continuation of a proceeding under these rules or for any court action in connection therewith may be served on a party by mail addressed to the party or its representative at its last known address or by personal service, in or outside the state where the MDR proceeding is to be held.

The Corporate Secretary and the parties may also use facsimile transmission, telex, telegram, or other written forms of electronic communication to give the notices required by these rules.

**EXHIBIT 5**

Page 20 of 23

E. Expenses

The expenses of witnesses shall be paid by the party causing or requesting the appearance of such witnesses. All expenses of the MDR proceeding, including compensation, required travel and other reasonable expenses of the Panel, and the cost of any proof produced at the direct request of the Panel, shall be borne equally by the parties and shall be paid periodically on a timely basis, unless they agree otherwise or unless the Panel in the Award assesses such expenses, or any part thereof against any party (or parties). In exceptional cases, the Panel may award reasonable attorneys' fees as an item of expense, and the Panel shall promptly determine the amount of such fees based on affidavits or such other proofs as the Panel deems sufficient.

F. Disqualification or Disability of A Panel Member

In the event that any Arbitrator of a Panel with more than one Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the remaining Panel member(s):

i. shall designate a replacement, subject to the right of any party to challenge such replacement for cause.

ii. shall decide the extent to which previously held hearings shall be repeated.

If the remaining Panel members consider the proceedings to have progressed to a stage as to make replacement impracticable, the parties may agree, as an alternative to the recommencement of the Mandatory Dispute Resolution process, to resolution of the dispute by the remaining Panel members.

In the event that a single Arbitrator should become disqualified, resign, die, or refuse or be unable to perform or discharge his or her duties after the commencement of MDR but prior to the rendition of an Award, and the parties are unable to agree upon a replacement, the Administrator shall appoint a successor, subject to the right of any party to challenge such successor for cause, and the successor shall decide the extent to which previously held proceedings shall be repeated.

**EXHIBIT 5**

G. Extensions of Time

Subject to the provisions of Paragraph 3.H.(viii), any time limit set forth in these Rules may be extended upon agreement of the parties and approval of: (1) the Mediator if the proceeding is then in Mediation; (2) the Administrator if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (3) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected.

H. Intervention

The Plans, their Controlled Affiliates, and BCBSA, to the extent subject to MMDR pursuant to their License Agreements, shall have the right to move to intervene in any pending Arbitration. A written motion for intervention shall be made to: (1) the Administrator, if the proceeding is in Arbitration, but no Arbitration Panel has been selected; or (2) the Arbitration Panel, if the proceeding is in Arbitration and the Arbitration Panel has been selected. The written motion for intervention shall be delivered to the BCBSA Corporate Secretary (which shall also constitute service on the BCBSA if it is a respondent) and to any Plan(s) and/or Controlled Affiliate(s) which are parties to the proceeding. Any party to the proceeding can submit written objections to the motion to intervene. The motion for intervention shall be granted upon good cause shown. Intervention also may be allowed by stipulation of the parties to the Arbitration proceeding. Intervention shall be allowed upon such terms as the Arbitration Panel decides.

I. BCBSA Assistance In Resolution of Disputes

The resources and personnel of the BCBSA may be requested by any member Plan at any time to try to resolve disputes with another Plan.

J. Neutral Evaluation

The parties can voluntarily agree at any time to have an independent party render a neutral evaluation of the parties' respective positions.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 22 of 23

K. Recovery of Attorney Fees and Expenses

i. Motions to Compel

Nothwithstanding any other provisions of these Rules, any Party subject to the License Agreements (for purposes of this Section K and all of its sub-sections only hereinafter referred to collectively and individually as a "Party") that initiates a court action or administrative proceeding solely to compel adherence to these Rules shall not be determined to have violated these Rules by initiating such action or proceeding.

ii Recovery of Fees, Expenses and Costs

The Arbitration Panel may, in its sole discretion, award a Party its reasonable attorneys' fees, expenses and costs associated with a filing to compel adherence to these Rules and/or reasonable attorneys' fees, expenses and costs incurred in responding to an action filed in violation of these Rules; provided, however, that neither fees, expenses, nor costs shall be awarded by the Arbitration Panel if the Party from which the award is sought can demonstrate to the Arbitration panel, in its sole discretion, that it did not violate these Rules or that it had reasonable grounds for believing that its action did not violate these Rules.

iii Requests for Reimbursement

For purposes of this Section K, any Party may request reimbursement of fees, expenses and/or costs by submitting said request in writing to the Arbitration Panel at any time before an award is delivered pursuant to Paragraph 3.O above, with a copy to the Party from which reimbursement is sought, explaining why it is entitled to such reimbursement. The Party from which reimbursement is sought shall have twenty (20) days to submit a response to such request to the Arbitration Panel with a copy to the Party seeking reimbursement.

**Amended as of September 20, 2007**

**EXHIBIT 5**
Page 23 of 23

L. Calculation of Time and Deadlines

In computing any period of time prescribed or allowed under these rules, the day of the act or event from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, in which event the period runs until the end of the next day which is not one of the aforementioned days. When the period of time prescribed is less than six (6) days, intermediate Saturdays, Sundays and legal holidays shall be excluded in the computation. As used in this rule, "legal holiday" includes New Year's Day, Martin Luther King, Jr. Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day and any other day appointed as a holiday by the President or the Congress of the United States.

**Amended as of September 20, 2007**

**Exhibit 31.1**

**CERTIFICATION PURSUANT TO
RULE 13a-14(a) AND RULE 15d-14(a) OF THE EXCHANGE ACT RULES,
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Gail K. Boudreaux, certify that:

1. I have reviewed this report on Form 10-K of Anthem, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

## Building Community and Rebuilding Homes

Healthy Blue sponsored Rebuilding Together's Second Annual Build and Boil event. This event is a fundraiser, a community party, and a volunteer opportunity, bringing people from all over New Orleans together. The Build and Boil event supports Rebuilding Together's mission to improve the quality of life for low-income homeowners in New Orleans, especially homeowners who are elderly, disabled, veterans, or single heads of households with minor children. With Healthy Blue's help, this event raised over $28,000, boiled almost 1,000 pounds of crawfish for the community, and aided five local homeowners.

## Protecting Our Community from COVID-19

Along with local organizations like 100 Black Women, Healthy Blue collaborated with Walgreens to make vaccines accessible to every eligible patient in our community. Healthy Blue hosted a mobile health equity clinic at the Capital Area Transit System terminal, giving transit riders twelve and older the opportunity to receive the vaccine. As an added incentive to vaccinate, Healthy Blue arranged for the first 100 families to the event to receive fresh produce and protein boxes from Top Box Louisiana.

## Proposer Organization and Experience

Healthy Blue

## Encouraging Healthy Lifestyles Through the Bike Library Program

The SWLA Center for Health Services (SWLA Center) rolled out a new bike fleet funded by Healthy Blue. The bike library launched in July of 2019 and consists of 20 bikes and safety helmets. It is a great opportunity for families to spend a few hours outside to make the first steps toward a healthier lifestyle. Community members visit the Fitness Center at the SWLA Center in Lake Charles to check out a bike and then hit the road. Bikes are free of charge to the community, and they are intended for short-term recreational rides. On June 29, 2021, a local high school track team took advantage of the guided bike ride. Healthy Blue and SWLA Center remain committed the communities they serve.

Proposer Organization

Healthy Blue

## 2.6.2 Proposer Organization and Experience

### 2.6.2.1.1 Healthy Blue's Organizational History and Parent Companies

Community Care Health Plan of Louisiana, Inc., dba Healthy Blue (Healthy Blue) is proud to be a long-standing, trusted partner to Louisiana Department of Health (LDH) in serving Healthy Louisiana enrollees (members) since the inception of the managed Medicaid program in 2012. Healthy Blue has reviewed all components of the RFP, including Attachment A, Model Contract, associated RFP Questions and Answers, and RFP Addenda, and will comply with all provisions.

Over the years, we have worked with LDH, our provider network, members, and community partners to advance and expand Healthy Louisiana. [redacted] Figure 2.6.2.1.1-1 highlights our history in serving Louisiana.

In 2017, we rebranded as Healthy Blue, representing a formal joint venture between Anthem Partnership Holding Company, LLC, a subsidiary of one of the nation's leading Medicaid managed care organizations, Anthem, Inc. (Anthem), and Blue Cross and Blue Shield of Louisiana (BCBSLA), the largest, most trusted choice for healthcare in Louisiana. ***Anthem's strong operating model*** supports us with nationally recognized expertise in health plan operations to drive better health outcomes. We also tap into the local ***experience and longevity of BCBSLA***, a trusted healthcare partner in Louisiana for more than 85 years. As Healthy Blue, we have direct access to the operational and fiscal support, experience, and best practices of our two parent companies.

Providers and members alike know the Blue brands mean quality and the pursuit to improve the health and lives of Louisianians. Since our rebrand in September 2017, members have continued to choose Healthy Blue; ***we have had 48 consecutive months of positive market share gain and have increased our market share from 16.14% to 19.71%***.

**Our Organizational Structure.** Healthy Blue maintains autonomy and decision-making for the Louisiana Medicaid business and is solely responsible for the management of this Contract. Healthy Blue's Chief Executive Officer, Christy Valentine, MD, MBA, leads our health plan operations and staff, enabling agility and local decision-making to deliver on our mission and organizational goals.

Our team is supported by experts from both parent companies to implement innovations in Louisiana. [redacted]

*Figure 2.6.2.1.1-1. Healthy Blue's Organizational History*

**HIGHLIGHTS OF OUR HISTORY SERVING MEDICAID IN LOUISIANA**

| | |
|---|---|
| 2021 | Hosted Inaugural Symposium on Racial and Health Equity in Louisiana with Louisiana Public Health Institute |
| 2020 | Achieved #1 (Adult) and #2 (Child) in CAHPS Surveys; Launched Healthy Blue Dual Advantage (D-SNP) |
| 2019 | Launched SDOH Provider Incentive Program to address member needs |
| 2018 | Added 7,600 members through our first Open Enrollment as Healthy Blue |
| 2017 | First Louisiana Medicaid MCO awarded NCQA Multicultural Health Care Distinction |
| 2016 | Welcomed nearly 53,000 Medicaid Expansion beneficiaries at program launch |
| 2015 | Supported the carve-in of Behavioral Health Managed Care |
| 2014 | Successfully secured a Contract Award to continue serving our Members as a Bayou Health MCO |
| 2013 | First Louisiana Medicaid MCO to earn NCQA accreditation |
| 2012 | Began providing care to Bayou Health enrollees at start of initial Medicaid Managed Care Contract |

#### Organizational Goals

[redacted]

we are encouraging healthcare system transformation by bringing BCBSLA's Quality Blue Primary Care, a population health and quality improvement program that rewards doctors for getting better results for patients, to Medicaid providers and members. We also deliver on our commitments by: promoting quality and advancing data-driven, evidence-based practices; delivering holistic, high-value care that addresses physical, behavioral, and social needs; supporting providers by simplifying processes and incentivizing value; bridging community resources to focus on the well-being of whole communities; maximizing the health of our members by tackling the root causes of health disparities; and fostering an organizational culture modeled on continuous process improvement, agility,

and performance. Healthy Blue's diverse staff champion our mission and goals every day. We listen, learn, and develop solutions to meet evolving member needs, bolstering our providers and the healthcare infrastructure to meet those needs across all parishes. For example, at the onset of the COVID-19 pandemic when Non-Emergency Medical Transportation (NEMT) providers saw single-rider trip requests increase and revenues drop, ***Healthy Blue was the first MCO to offer NEMT providers financial support to continue providing services to Healthy Louisiana members.***

> *Healthy Blue has led the pack of MCOs in supporting the transportation providers and the members they transport by increasing rates, implementing incentive programs, and giving providers over 40,000 masks and 1,500 bottles of hand sanitizer during the COVID-19 pandemic. Their partnership and collaboration have been invaluable and show that their focus is on helping the people in their care and the people that serve them.*
>

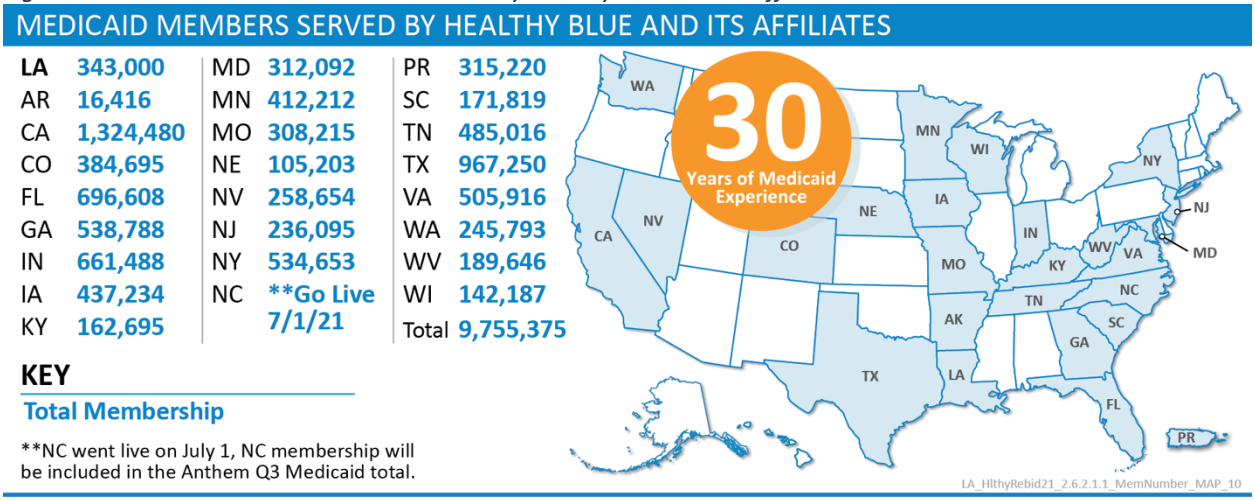
## Relevance of Medicaid Managed Care to Our Mission

As an MCO dedicated to serving Healthy Louisiana, ***Medicaid is at the core of what we do***. We address our members' most challenging healthcare issues and social needs through a population health approach supported by health information technology and advanced data analytics. Across every parish, we bring the right resources to support our members, recognizing the diversity and unique challenges of our population.

## Medicaid Members Served by Healthy Blue's Affiliates and States Where We Currently Serve

Healthy Blue's Medicaid health plan affiliates serve 9.7 million members in 25 markets for Medicaid and other state-sponsored programs, as shown in Figure 2.6.2.1.1-2. Our 26th Medicaid market, Ohio, is expected to go-live January 5, 2022.

*Figure 2.6.2.1.1-2. Medicaid Members Served by Healthy Blue and Its Affiliates*



## 2.6.2.1.2 Current Medicaid Managed Care Contracts

Collectively, Healthy Blue's parent organizations and affiliates have served members in Medicaid managed care for more than 30 years and currently serve Medicaid members in 25 markets, including more than 7.6 million TANF members in 23 markets, more than 415,000 CHIP members in 19 markets, and more than 1.7 million Medicaid expansion members in 15 markets. In addition to our Contract in Louisiana, our affiliates have current Medicaid managed care contracts in 11 states with Medicaid populations equal to or greater than 1.5 million enrollees: California, Florida, Georgia, Indiana, New Jersey, New York, North Carolina, Tennessee, Texas, Virginia, and Washington.

## 2.6.2.1.3 Instances of Non-compliance

Please refer to Attachment 2.6.2.1.3, which identifies all instances of non-compliance the Proposer, parent organizations, and affiliates have incurred as part of Medicaid managed care contracts within the past seven years.

## 2.6.2.1.4 Terminated or Non-renewed Contract

Within the last 10 years, neither Healthy Blue nor our affiliate health plans have ever had a Medicaid managed care contract involuntarily terminated or not renewed for non-performance or poor performance or terminated on a voluntary basis prior to the Contract end date.

[redacted]

# 2.6.2.2

Proposed Staff Qualifications and Organizational Structure

**CONFIDENTIAL**

Healthy Blue

## 2.6.2.2 Staff Qualifications and Organizational Structure

At Healthy Blue, we put people first. From executive leadership to frontline staff, we bring a long history of experience and expertise. Our employees are committed to every person in every parish, as we are extensions of the communities we serve. Our diverse team of Louisiana-based leaders and employees passionately apply their energy and knowledge to address the significant health issues facing residents, focusing on the whole person, and helping enrollees (members) access services and supports they need.

## 2.6.2.2.1 Process for Identifying Key Personnel and Management Structure and Organization

Healthy Blue delivers innovative solutions and locally focused programs that improve outcomes for Healthy Louisiana, as well as Louisianians and communities across the state. In addition to our joint venture value, our organizational support structure facilitates the sharing of best practices among affiliates in 24 markets. The Healthy Blue team collaborates directly with our affiliate health plans to bring operational excellence and tested innovations to Louisiana that have been successfully implemented in other areas.

### Process for Identifying Key Personnel

Our process for identifying staff includes comprehensive, well-structured recruitment, standard protocols such as criminal background checks, and techniques such as motivation-based interviewing to make sure we hire passionate and dynamic leaders. Our key personnel are top-level executives who reflect the diverse populations we serve, know and understand the needs of Louisiana's local communities, and bring extensive Medicaid experience and deep knowledge of the State's delivery system.

We select designated key personnel based on demonstrated, relevant healthcare experience, leadership and management skills, and a record of accomplishment of meaningful contributions. ***All key personnel positions are currently staffed; there are no vacancies.***

Key personnel are top-tier managed care executives with thorough understanding of their respective operational areas and bring an average of 16 years of healthcare experience. We know success depends on qualified, stable staffing at all organizational levels, as well as flexible policies and procedures to scale resources as circumstances dictate and replace personnel quickly and efficiently. We use our centralized recruiting system to post job opportunities internally and externally. We draw from a variety of recruitment sources and activities to attract qualified candidates with requisite skills through referrals, job search networks, social media campaigns, and partnerships with diversity organizations, among other sourcing. Steps to stay proactive in the face of expected or unanticipated staffing needs include:

- As an established and trusted LDH partner, our employees know Louisiana, and we understand the labor market. While we work to acquire additional permanent, qualified staff, we deploy additional resources quickly by identifying backup staff.
- Our succession-planning program helps identify possible successors within the organization for key management positions, as well as from our affiliates, parent companies, and communities. Healthy Blue has made succession planning an integral part of our culture. Leaders are required to have succession plans that list potential successors, rate each on readiness, and document steps necessary to further prepare potential successors.
- Reallocating work assignments and mobilizing backups quickly to provide needed services.
- Identifying employees through affiliates and national staff across the nation who may provide backup and temporarily fill vacant positions.

When an employee resigns, we mobilize and begin sourcing a qualified replacement. We maintain a strong succession-planning program, developing employees through mentorship and training to assume vacated roles. Healthy Blue's Contract Compliance Officer, Kim Chope, will notify LDH of any changes to key staff identified in our proposal as part of our Readiness Review. Our Contract Compliance Officer will notify LDH in writing as early as practicable (but no later than five business days) within our receipt of a key staff member's notice of resignation or upon Healthy Blue's decision to terminate a key staff member. Healthy Blue will obtain advance written approval from LDH prior to hiring new key staff members.

### Management and Organizational Structure

[redacted]

[redacted]

## 2.6.2.2.2 Key Personnel Name, Résumé, and Role

Healthy Blue's key personnel, who represent the communities we serve, provide critical guidance and leadership. Our key personnel carry out day-to-day organizational management and fully own decisions on all aspects of service delivery. They shape strategic actions to enhance our position as thought leaders for the Healthy Louisiana program and drive innovation that improves the quality of healthcare we administer. Our dedicated key personnel team is embedded in the communities we serve with deep roots in Louisiana. The following biographies highlight our key personnel for Healthy Blue, each of whom meets Contract requirements. ***These individuals are 100% dedicated to the key personnel role for Louisiana Medicaid, with no outside responsibilities***. We provide résumés as Attachment 2.6.2.2.2-1: Key Personnel Résumés.

### PROMOTING RACIAL AND HEALTH EQUITY FOR ALL

In March 2021, Healthy Blue's Health Equity Administrator, Karen Kosinski, led the First Annual Racial and Health Equity Symposium along with the Louisiana Public Health Institute. This event highlighted local Louisiana partners involved in equity work in education, incarceration, employment, healthcare, and housing. More than 500 individuals throughout the state and country participated.

LA_HlthyRebid21_2.6.2.2_Kosinski_COB_02

### Christy Valentine, MD, MBA
### Chief Executive Officer

Dr. Valentine, a native New Orleanian, is responsible for improving lives and communities through collaboration with partners across Louisiana. Dr. Valentine spent nearly 13 years in private practice in New Orleans, specializing in pediatrics and internal medicine, dedicated to providing quality care by optimizing community health.

### Dexter Trivett, MBA
### Chief Operating Officer

Dexter leads operations with primary responsibility for developing and implementing our strategic vision, goals, objectives, policies, and decision-making. Dexter routinely meets face to face with LDH, medical and NEMT provider associations, and community organizations across the state to foster collaborative partnerships and advance strategic initiatives.

### Raymond Poliquit, MD
### Chief Medical Officer

Dr. Poliquit is a board-certified pediatrician who has more than 25 years of experience as a practicing physician and 9 years with Healthy Blue. He is licensed by the Louisiana State Board of Medical Examiners and is a Fellow of the American Academy of Pediatrics.

### Dr. Cheryll Bowers-Stephens, MD, MBA
### Behavioral Health Medical Director

Dr. Bowers-Stephens, born in Louisiana and raised in New Orleans, is a board-certified in psychiatry and child and adolescent psychiatry. A 25-year health care veteran, she has strong and vast experience with population health. As the former Commissioner of Mental Health, she laid the foundation for Louisiana's public mental health system transformation.

### Christine Coleman, MBA
### Chief Financial Officer

Christine, a native New Orleanian with over 15 years of healthcare finance experience, oversees the team responsible for delivering all finance and actuarial services, including budgeting and forecasting support, trend evaluation, and industry competitive analysis and strategic analysis to impact leadership decision-making, improve efficiency, and drive innovation.

### Mykayla Jones, PharmD
### Pharmacy Director

Mykayla, a native Louisianian, oversees Healthy Blue's pharmacy benefits responsibilities, including regular meetings with LDH, and clinical pharmacy programs for medical benefit drugs. She has nearly 20 years of pharmacy experience and assists in member monitoring and management related to utilization of prescription drugs through data coordination.

LA_HlthyRebid21_GroupSL_63_SL_05

**Kimberly Chope**
**Contract Compliance Officer**

Kim has 25 years of managed care experience focused on regulatory compliance, program development, and State Medicaid program growth. For the past 9 years, Kim has led the development and implementation of policies, procedures, and standards to make sure Healthy Blue complies with federal, State, and Contract requirements.

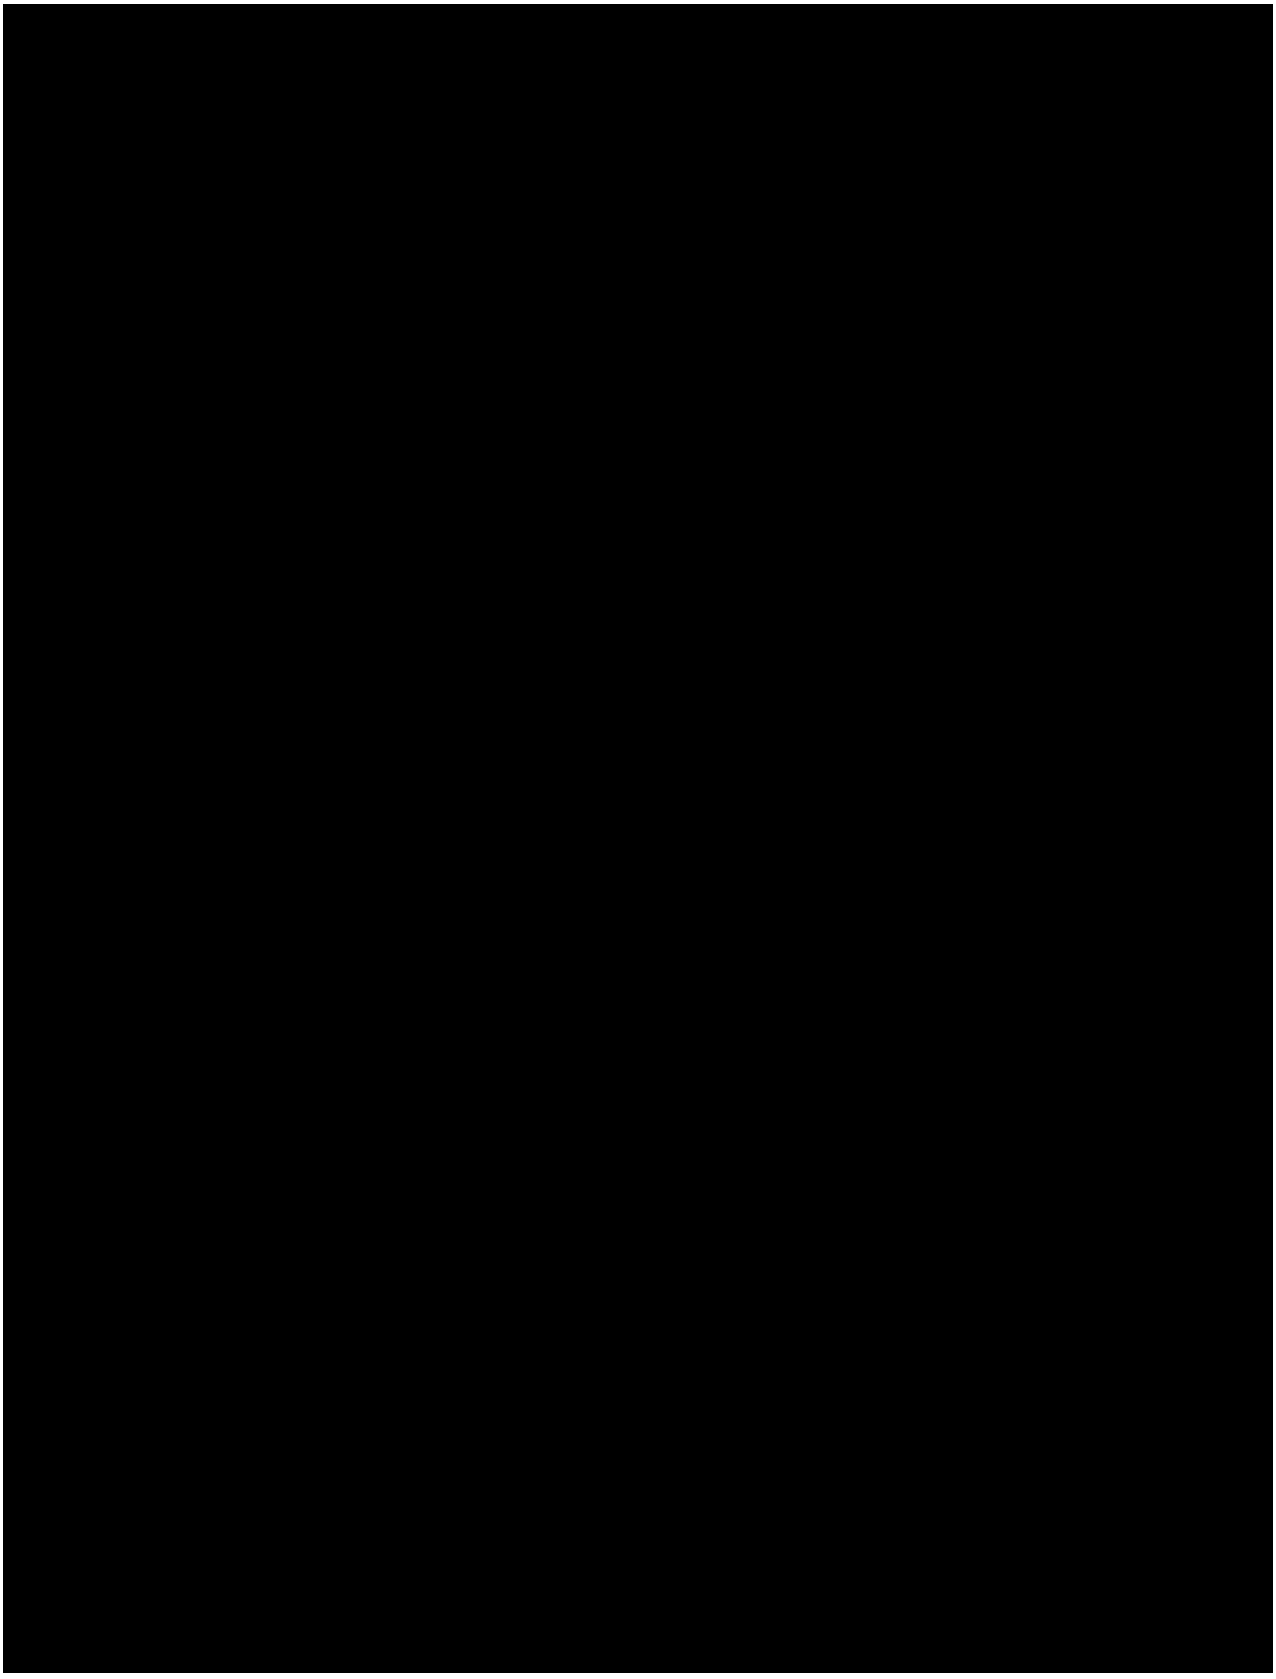
**Karen Kosinski, MPH, MSW**
**Health Equity Administrator**

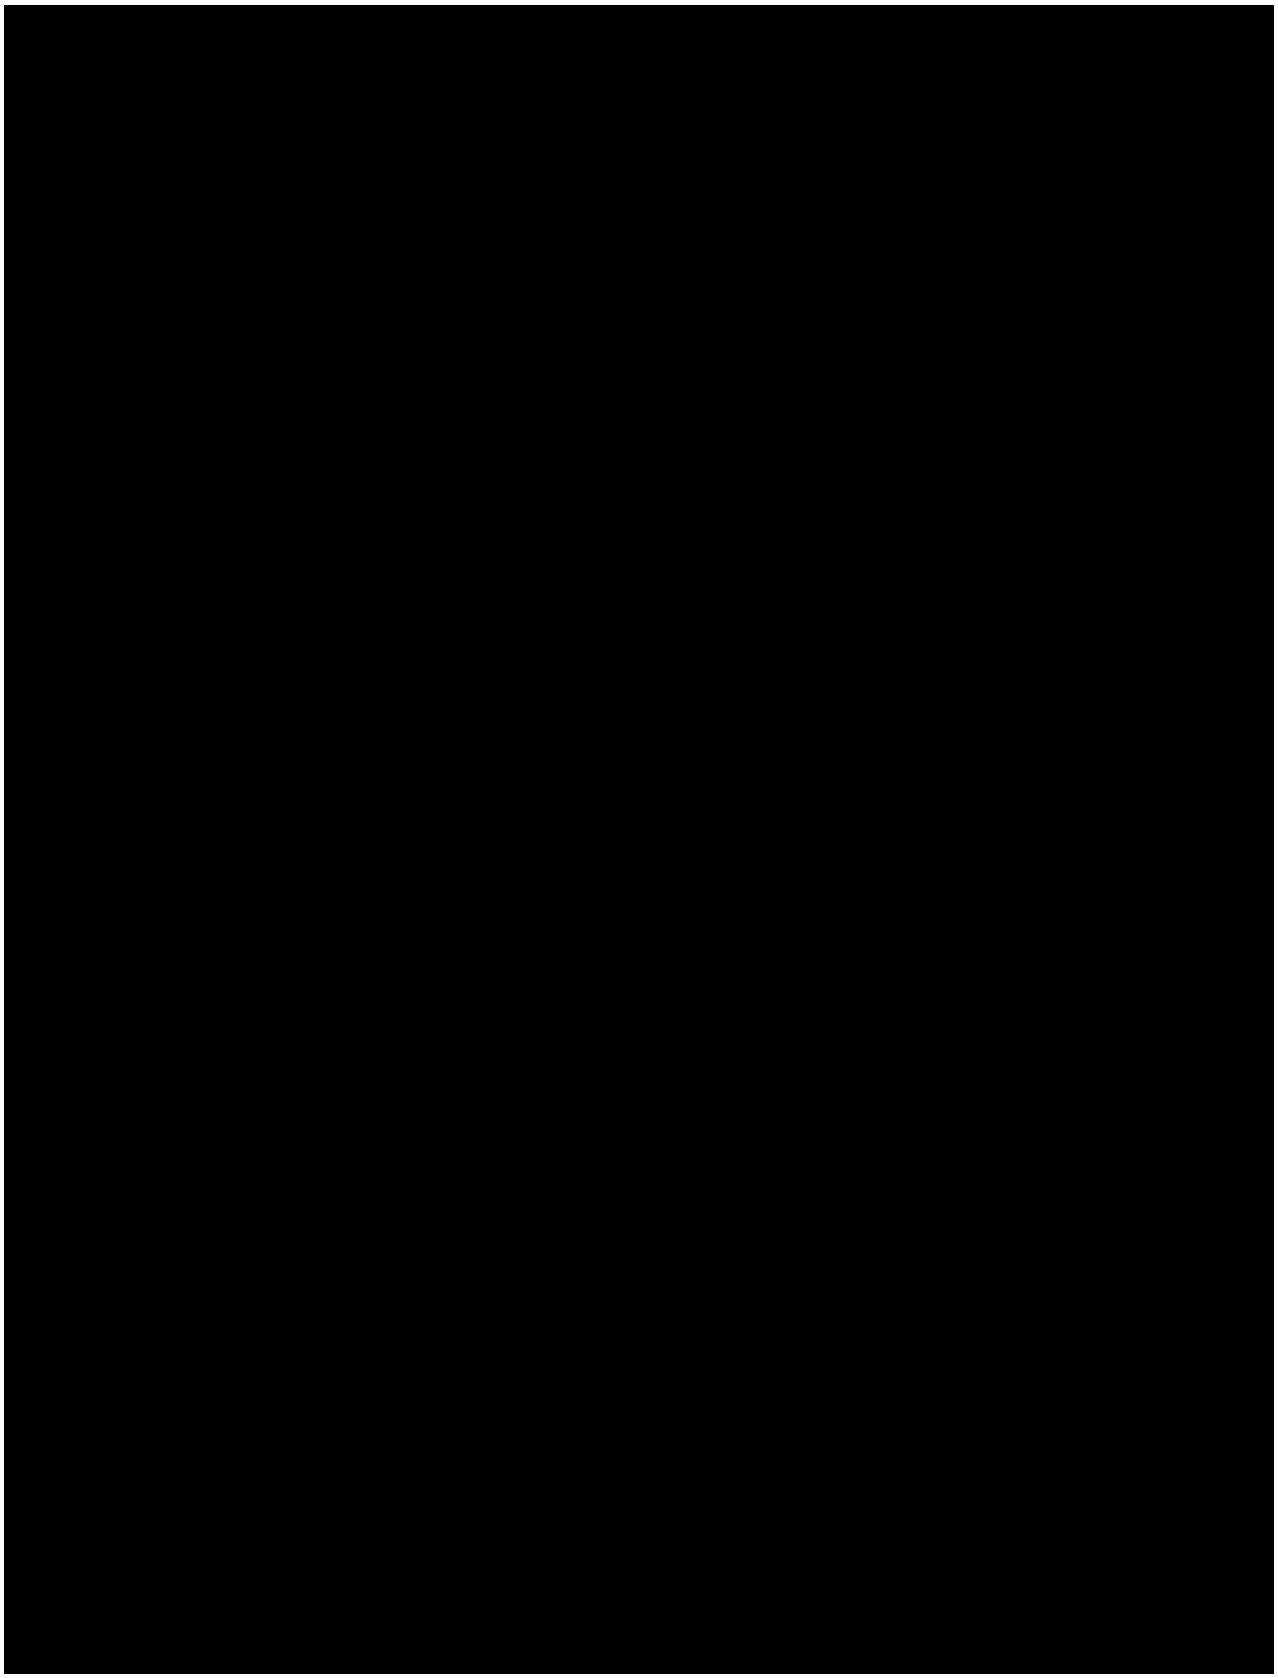
Karen has 15 years of experience developing innovative solutions to address social determinants of health and health disparities. Joining Healthy Blue in 2015, she pioneered our Permanent Supportive Housing program and leads our Health Equity Task Force. Karen has a Master of Public Health and a Master of Social Work from Tulane University.

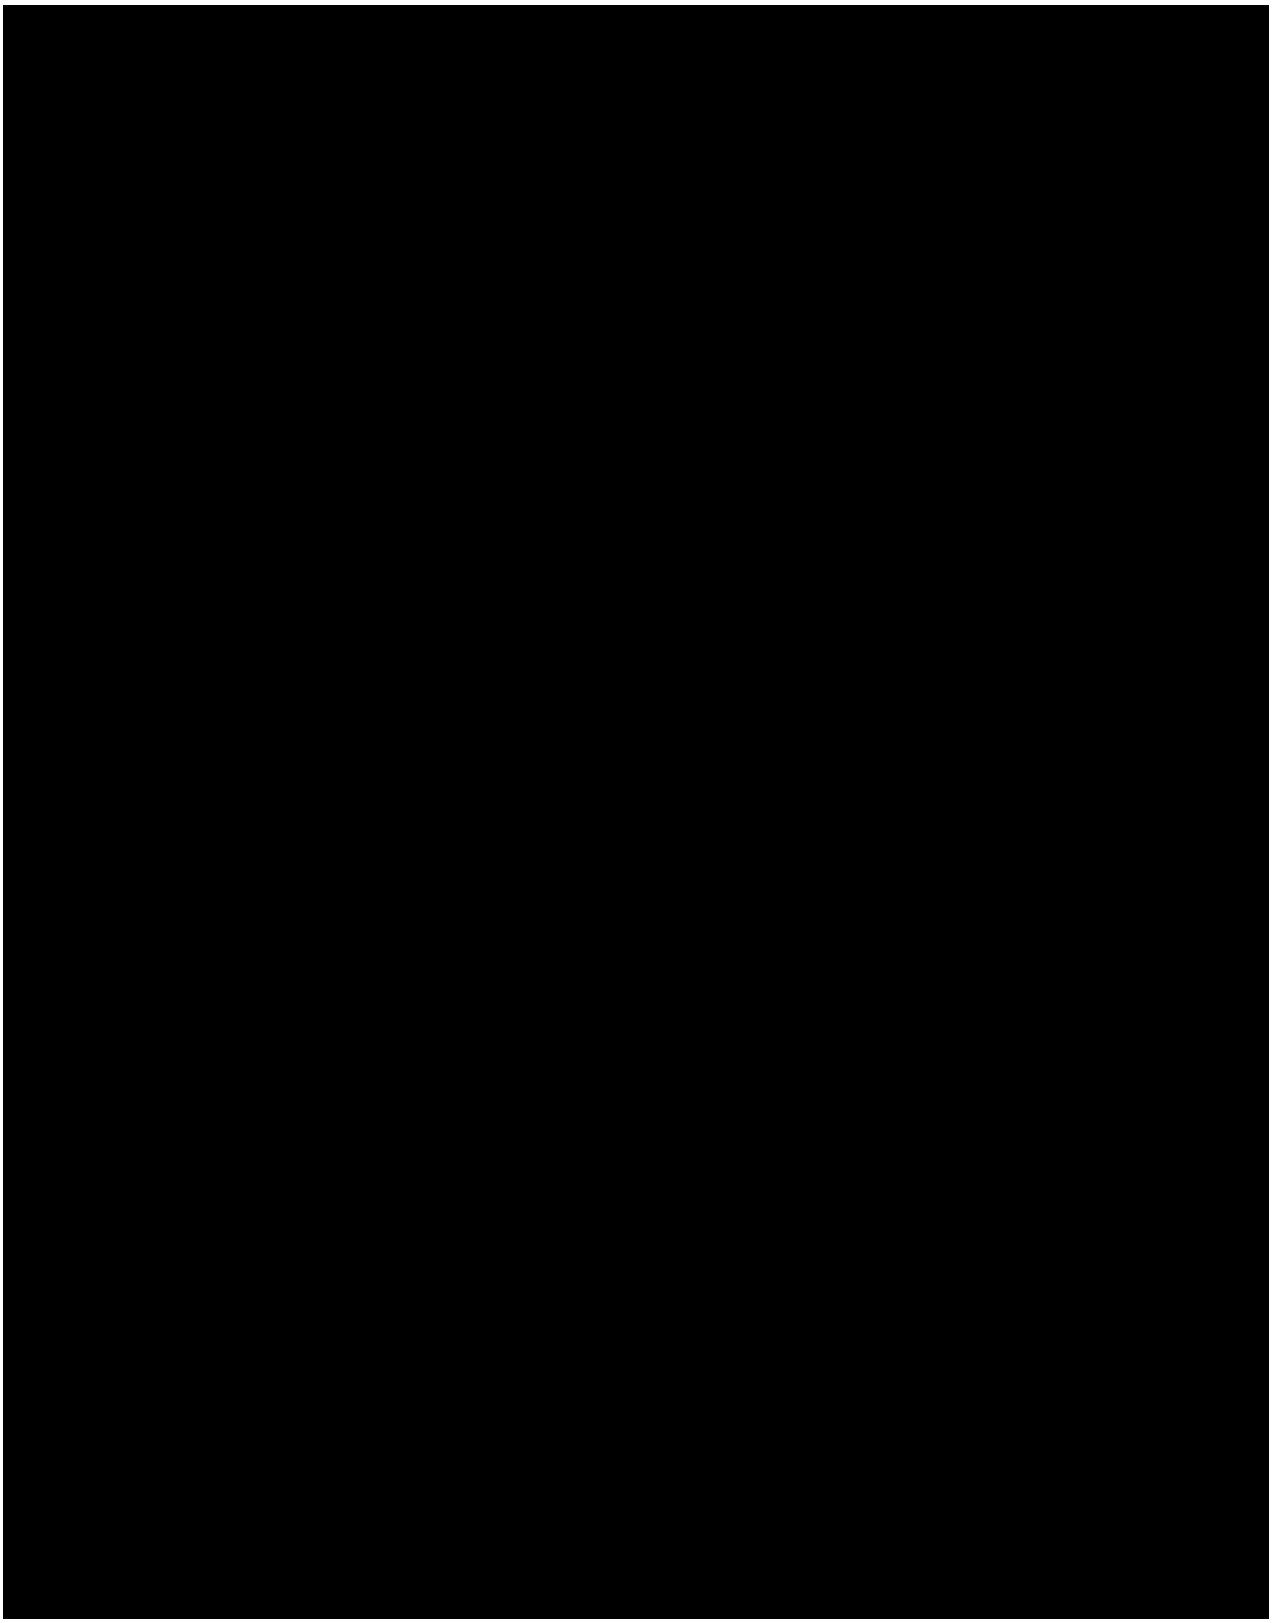
LA_HlthyRebid21_GroupSL2_63_SL_02

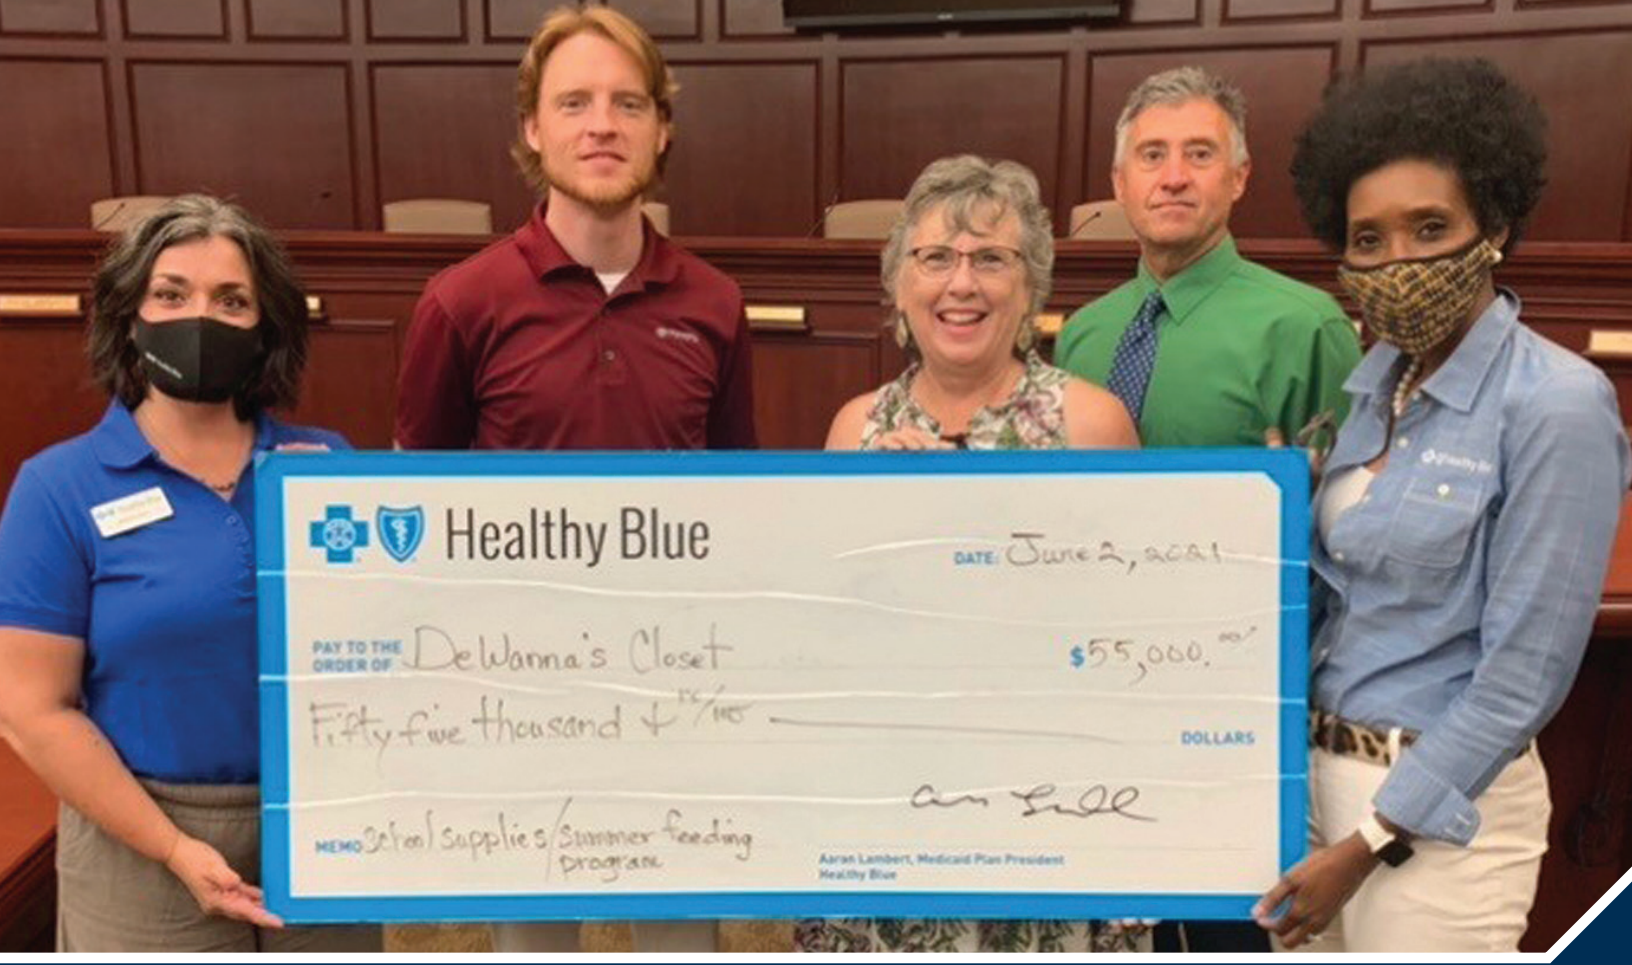
## 2.6.2.2.3 Operating Structure Leadership and Key Teams

[redacted]









**Working with DeWanna's Closet to Address Food Insecurity Among Youth**

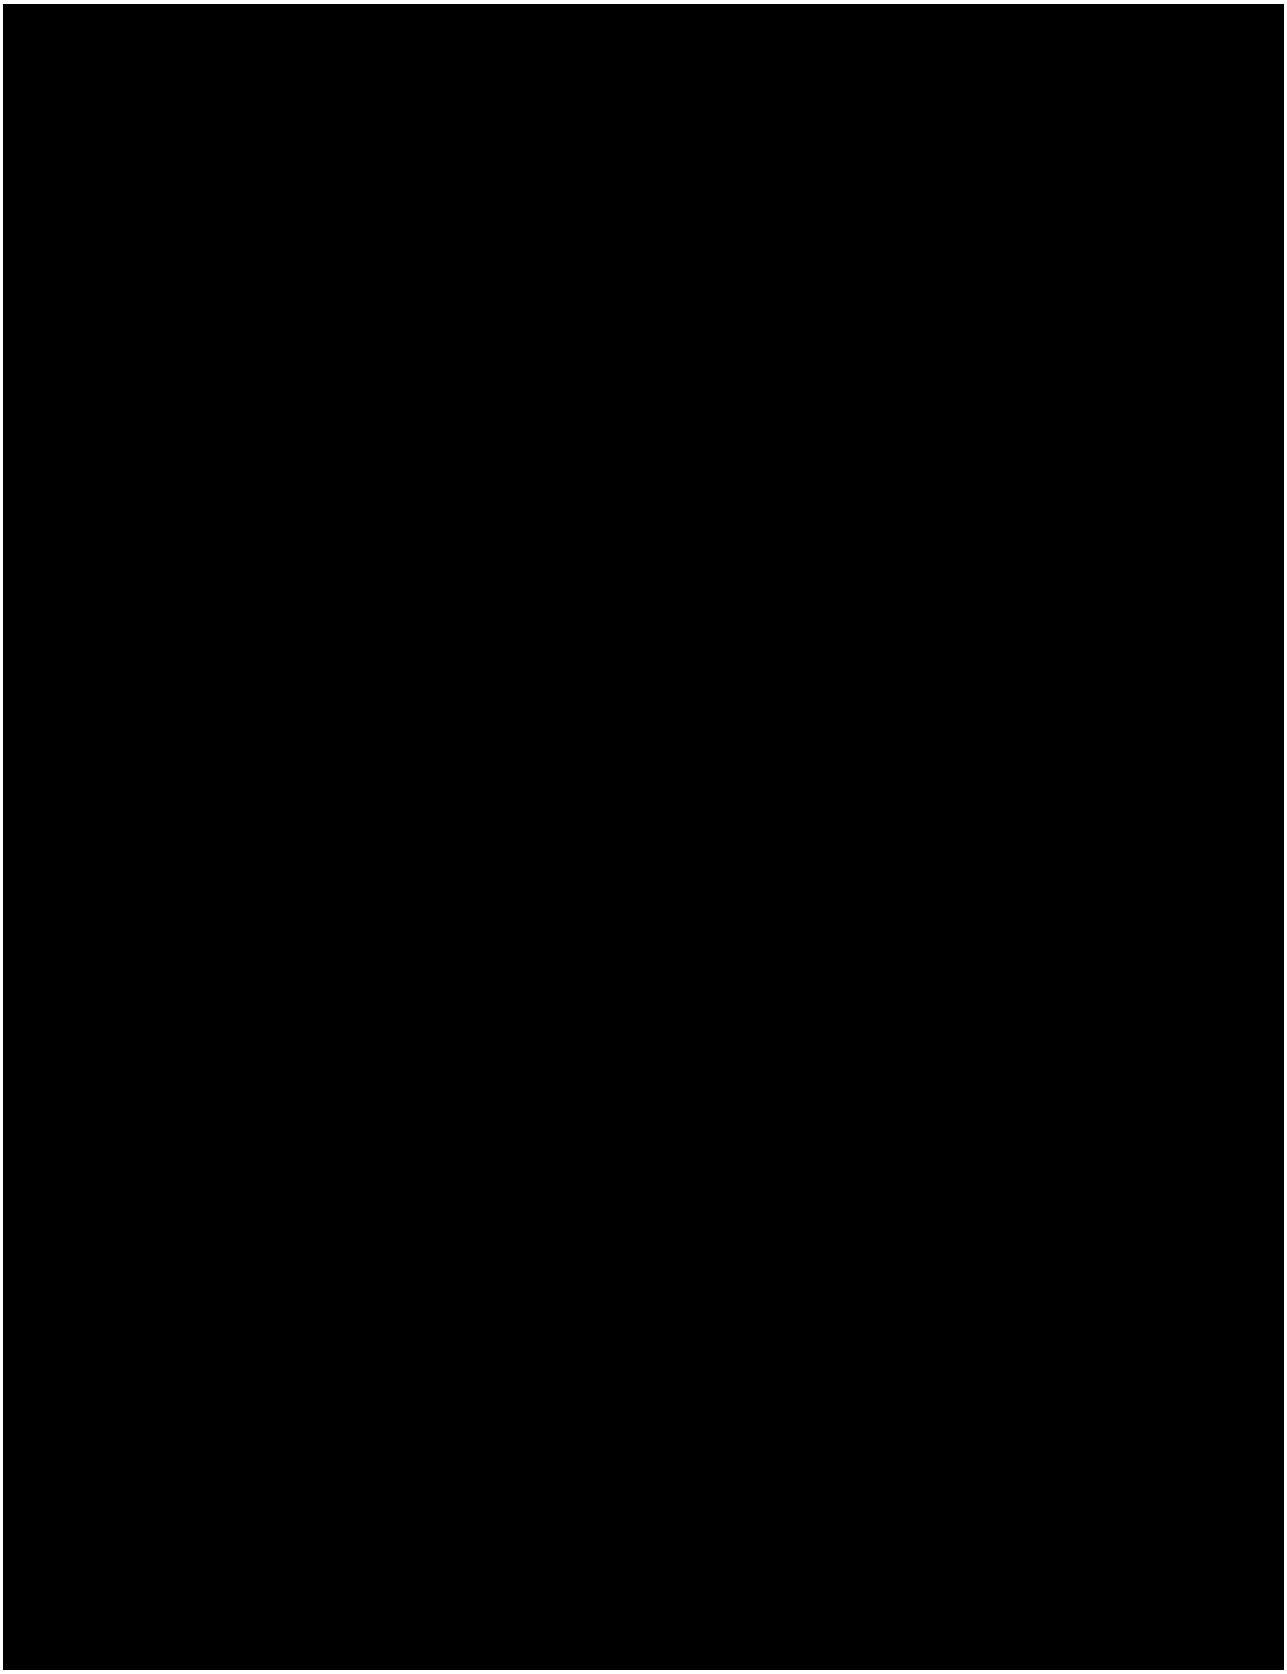
DeWanna's Closet (DC) understands that food insecurity can wreak havoc on a community, especially our youth. DC wanted to start a weekend food program for school-aged kids, and Healthy Blue's grant has given them the jumpstart to pursue the endeavor. Educators within Calcasieu Parish Schools identify students whom they feel may lack consistent nutrition over the weekend. The educators make a confidential referral to DC, who will prepare and supply a nutritional food package that the students can easily transfer from school to home.

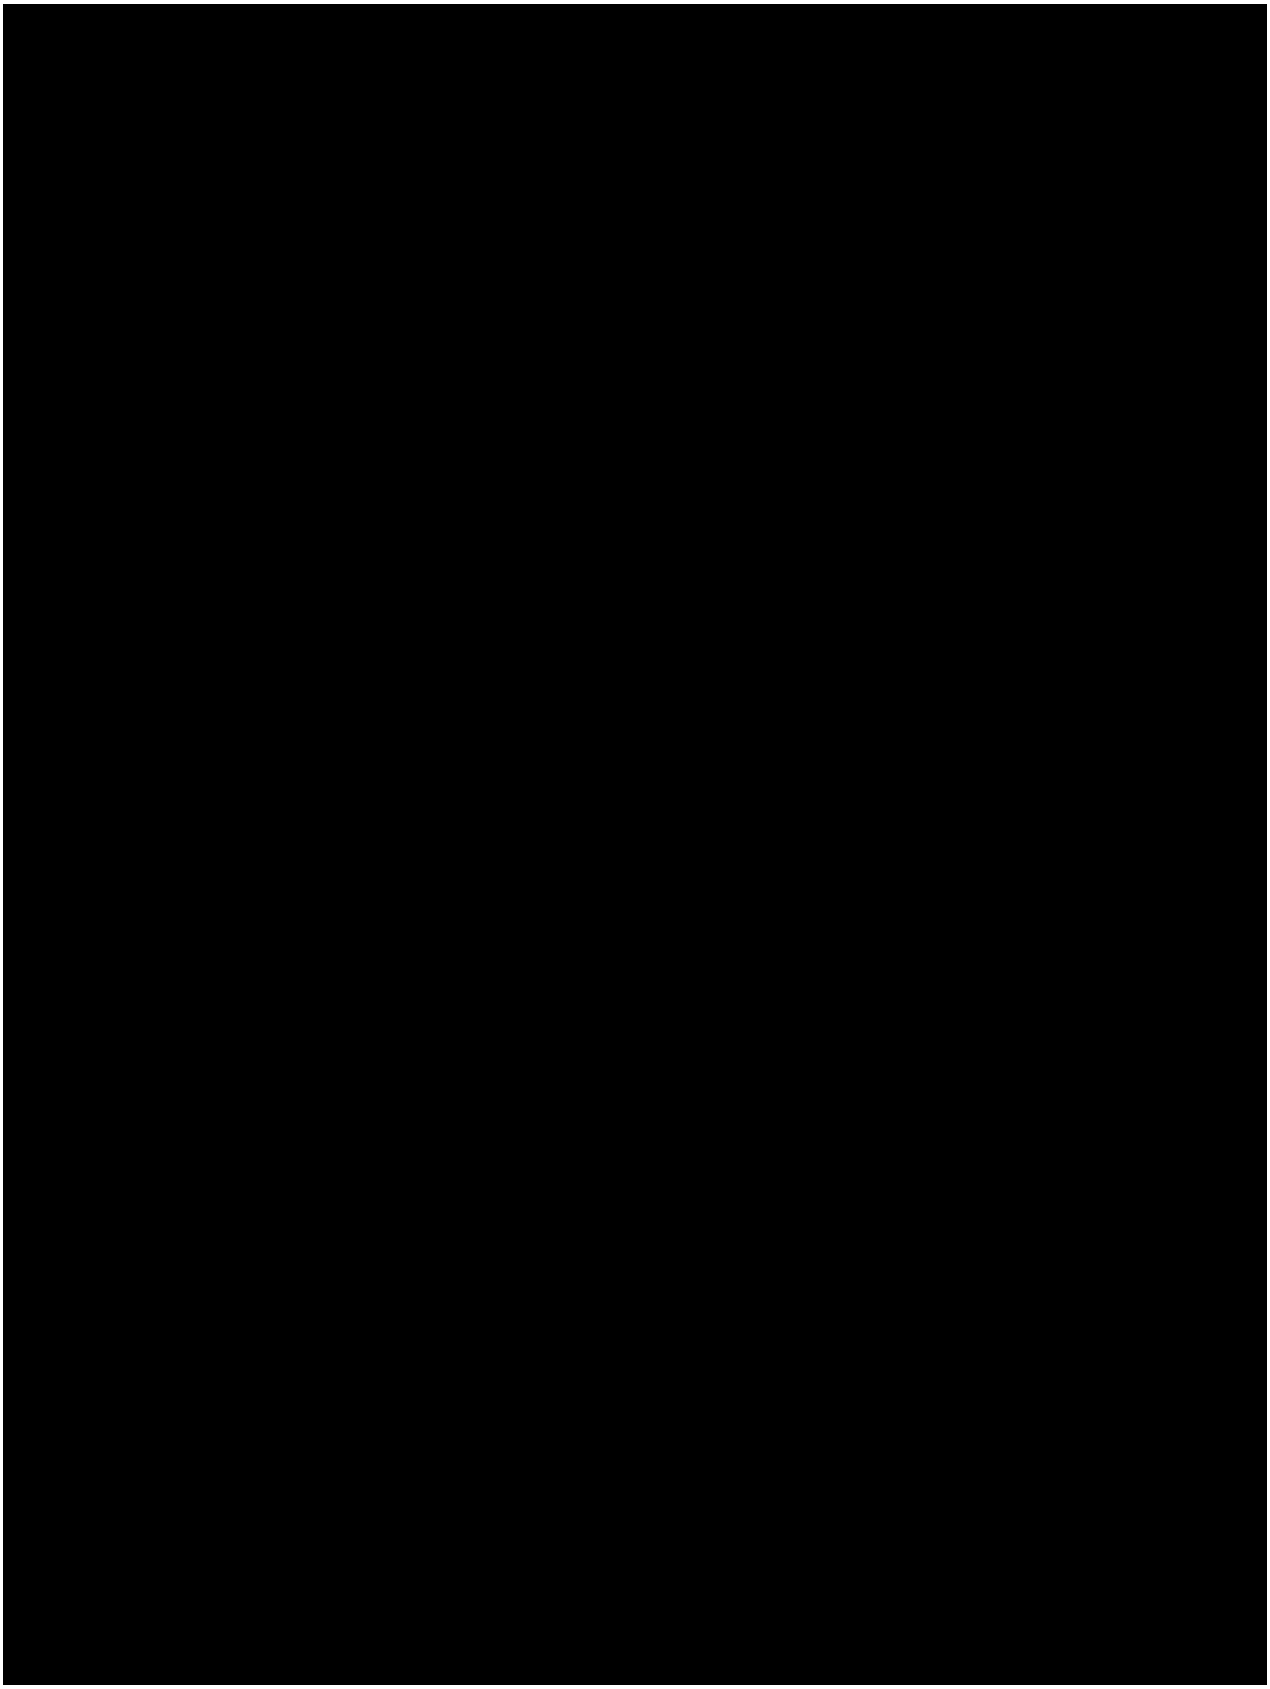
# 2.6.3

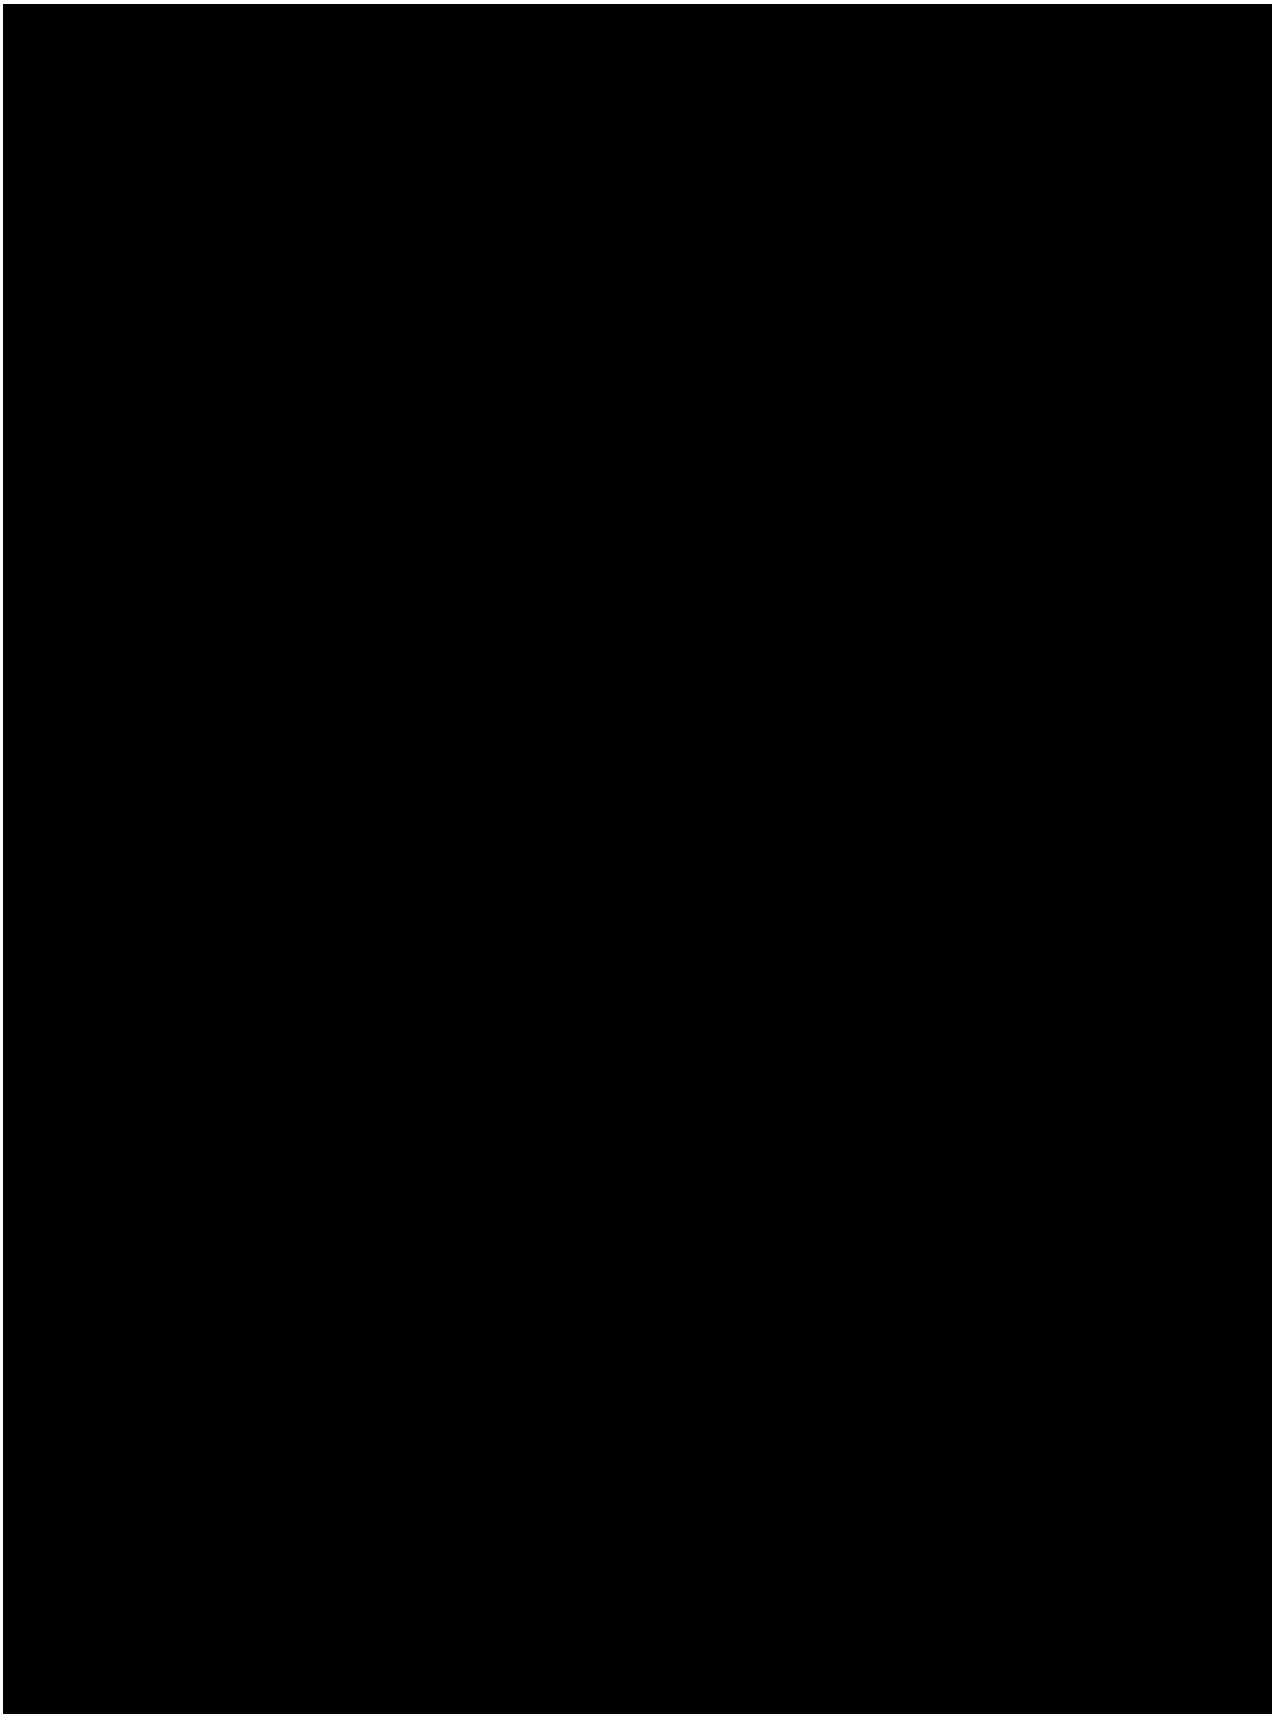
Enrollee Value-added Benefits

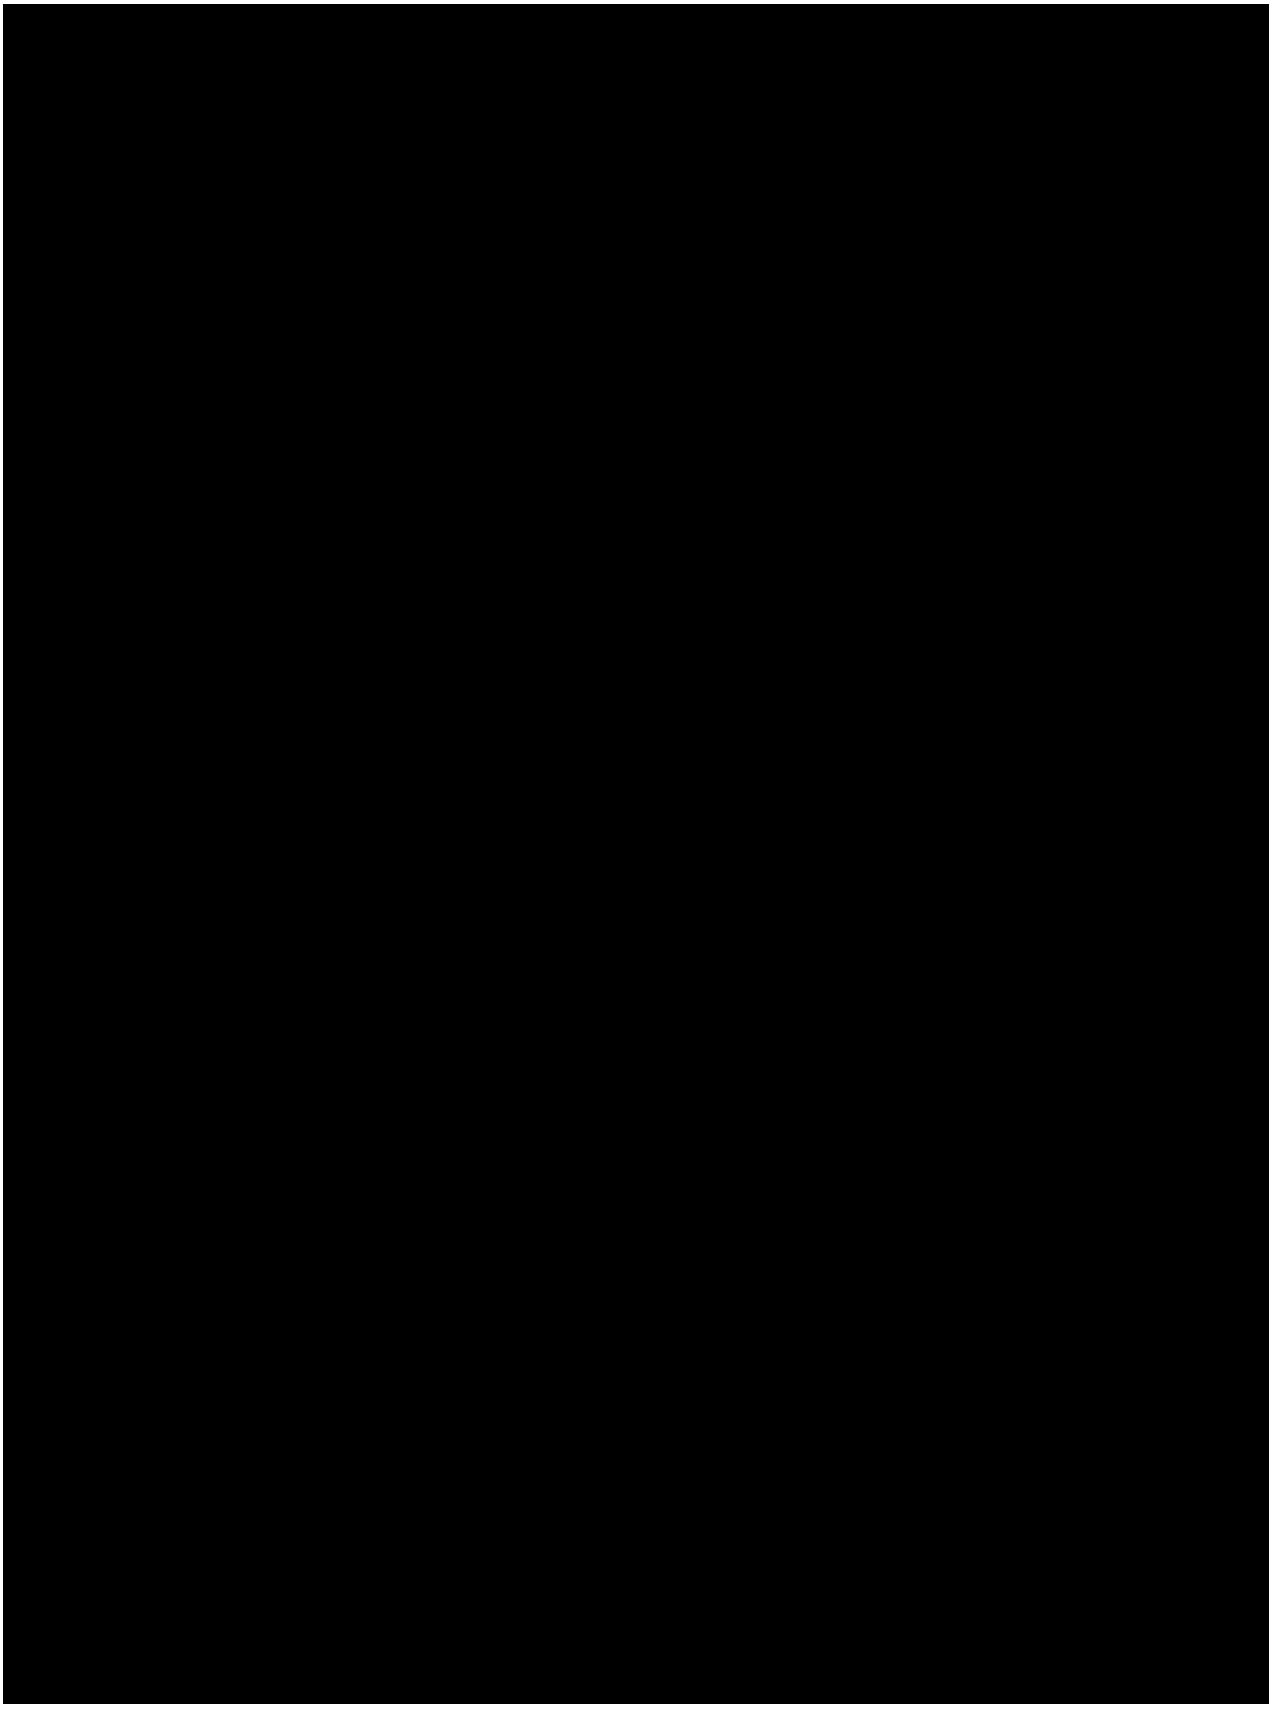
Healthy Blue

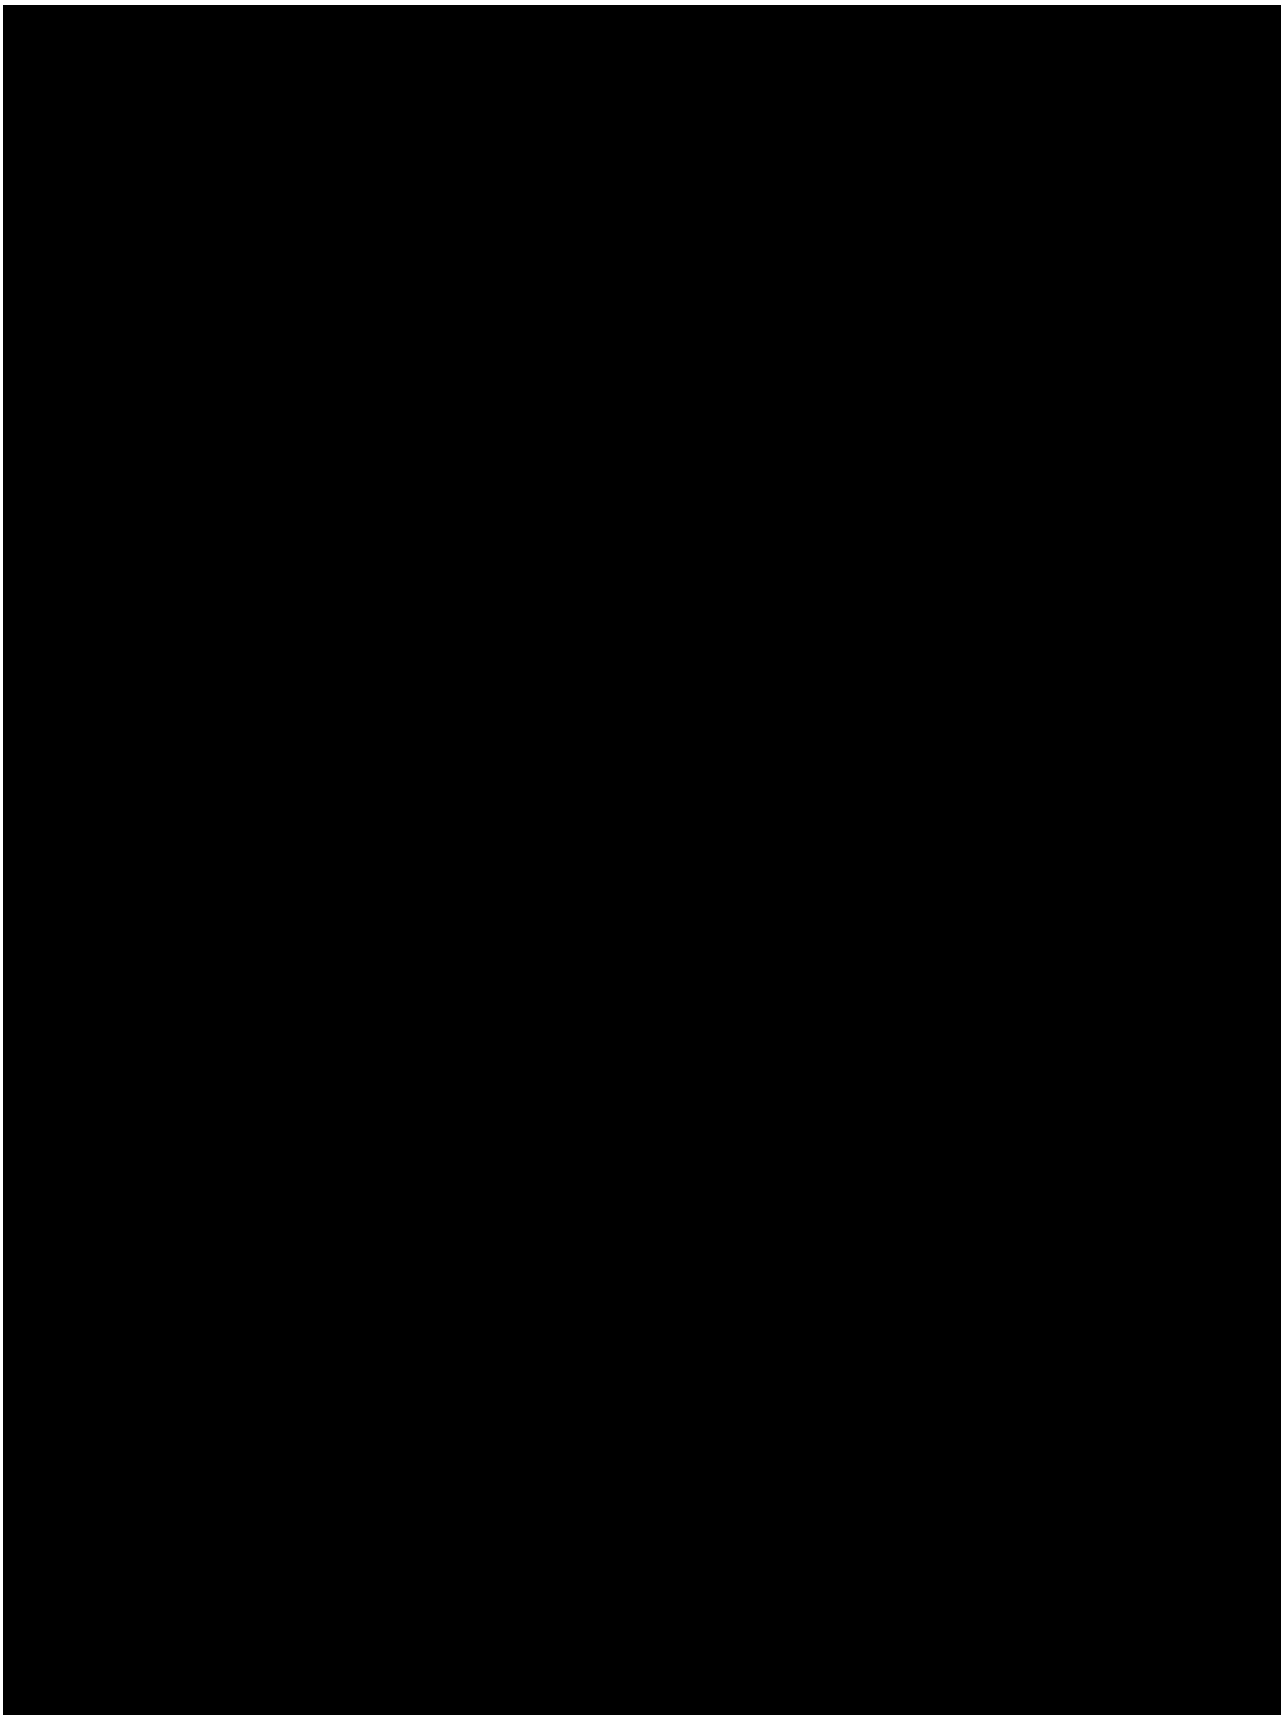
## 2.6.3 Enrollee Value-added Benefits

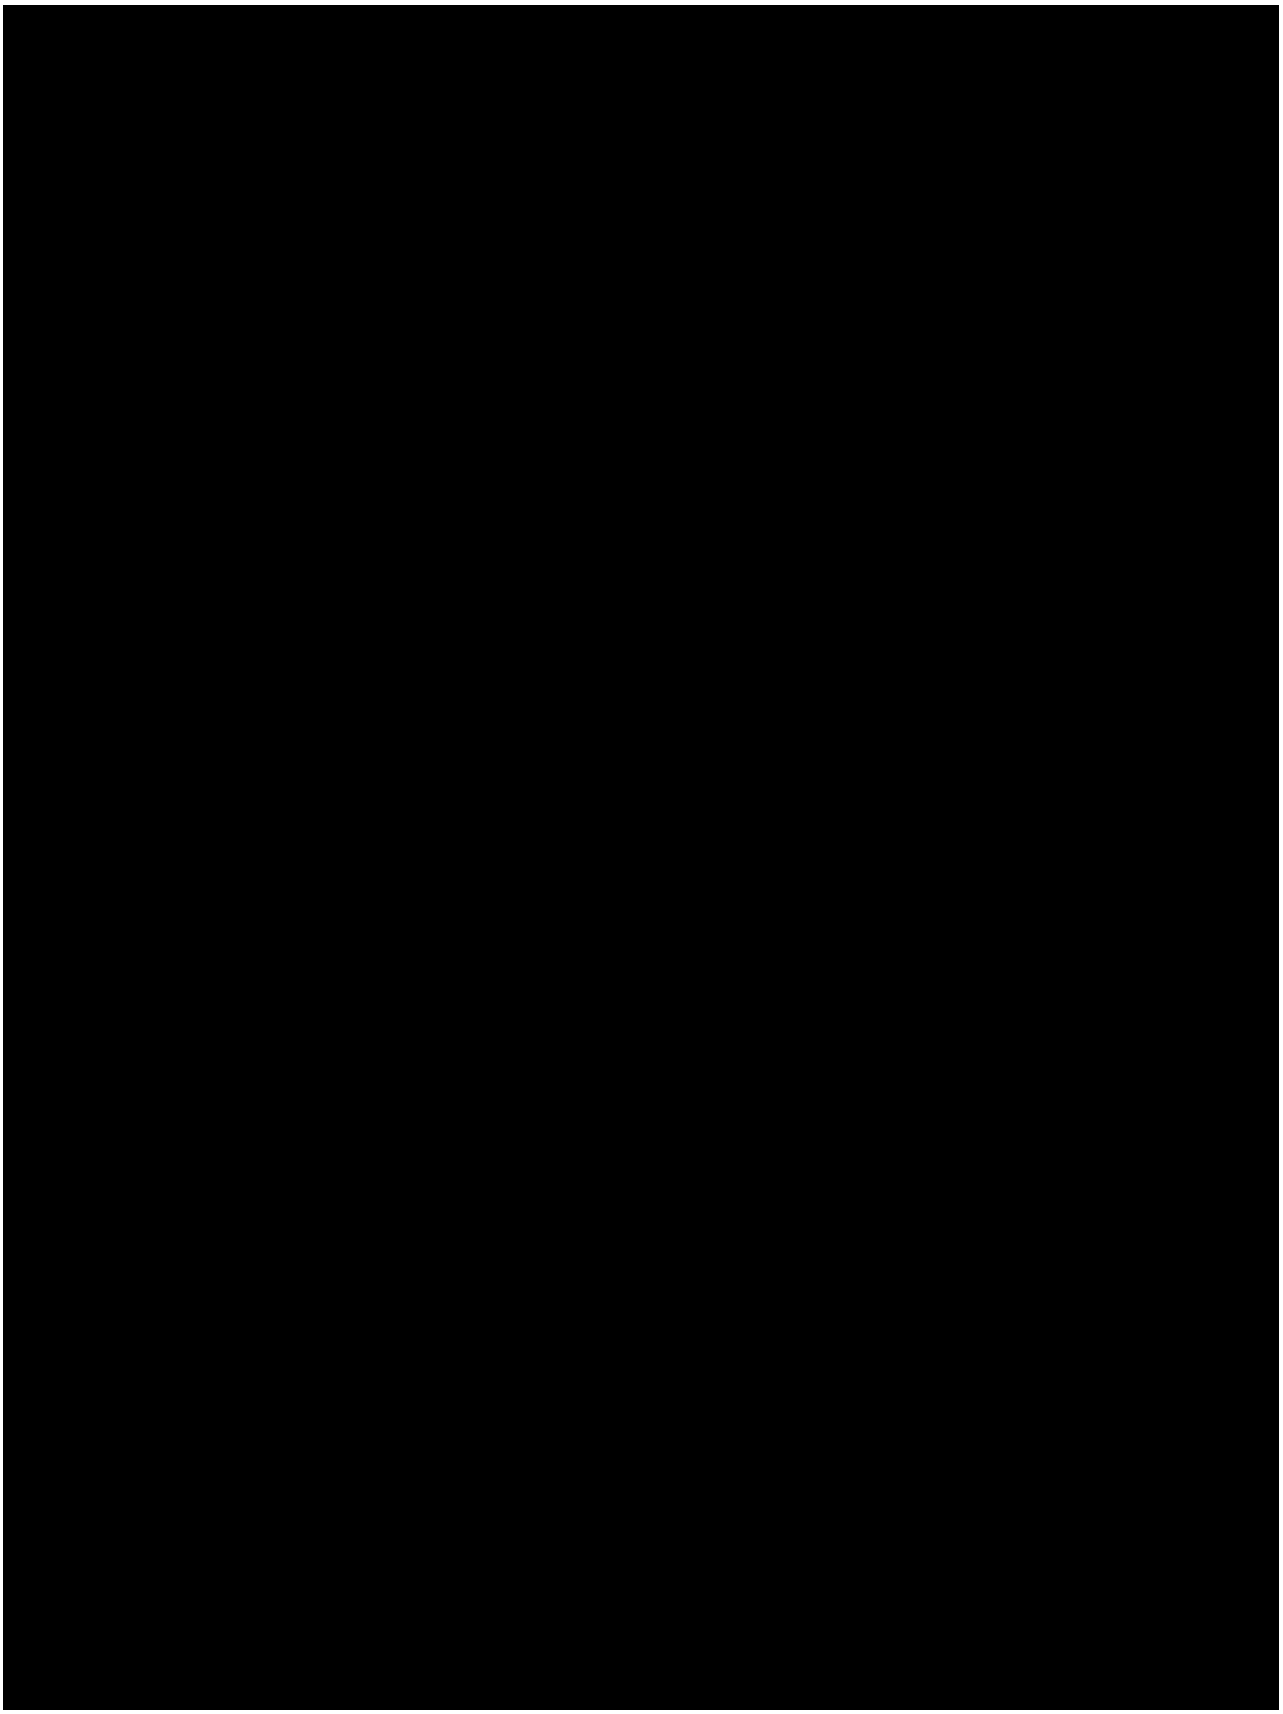


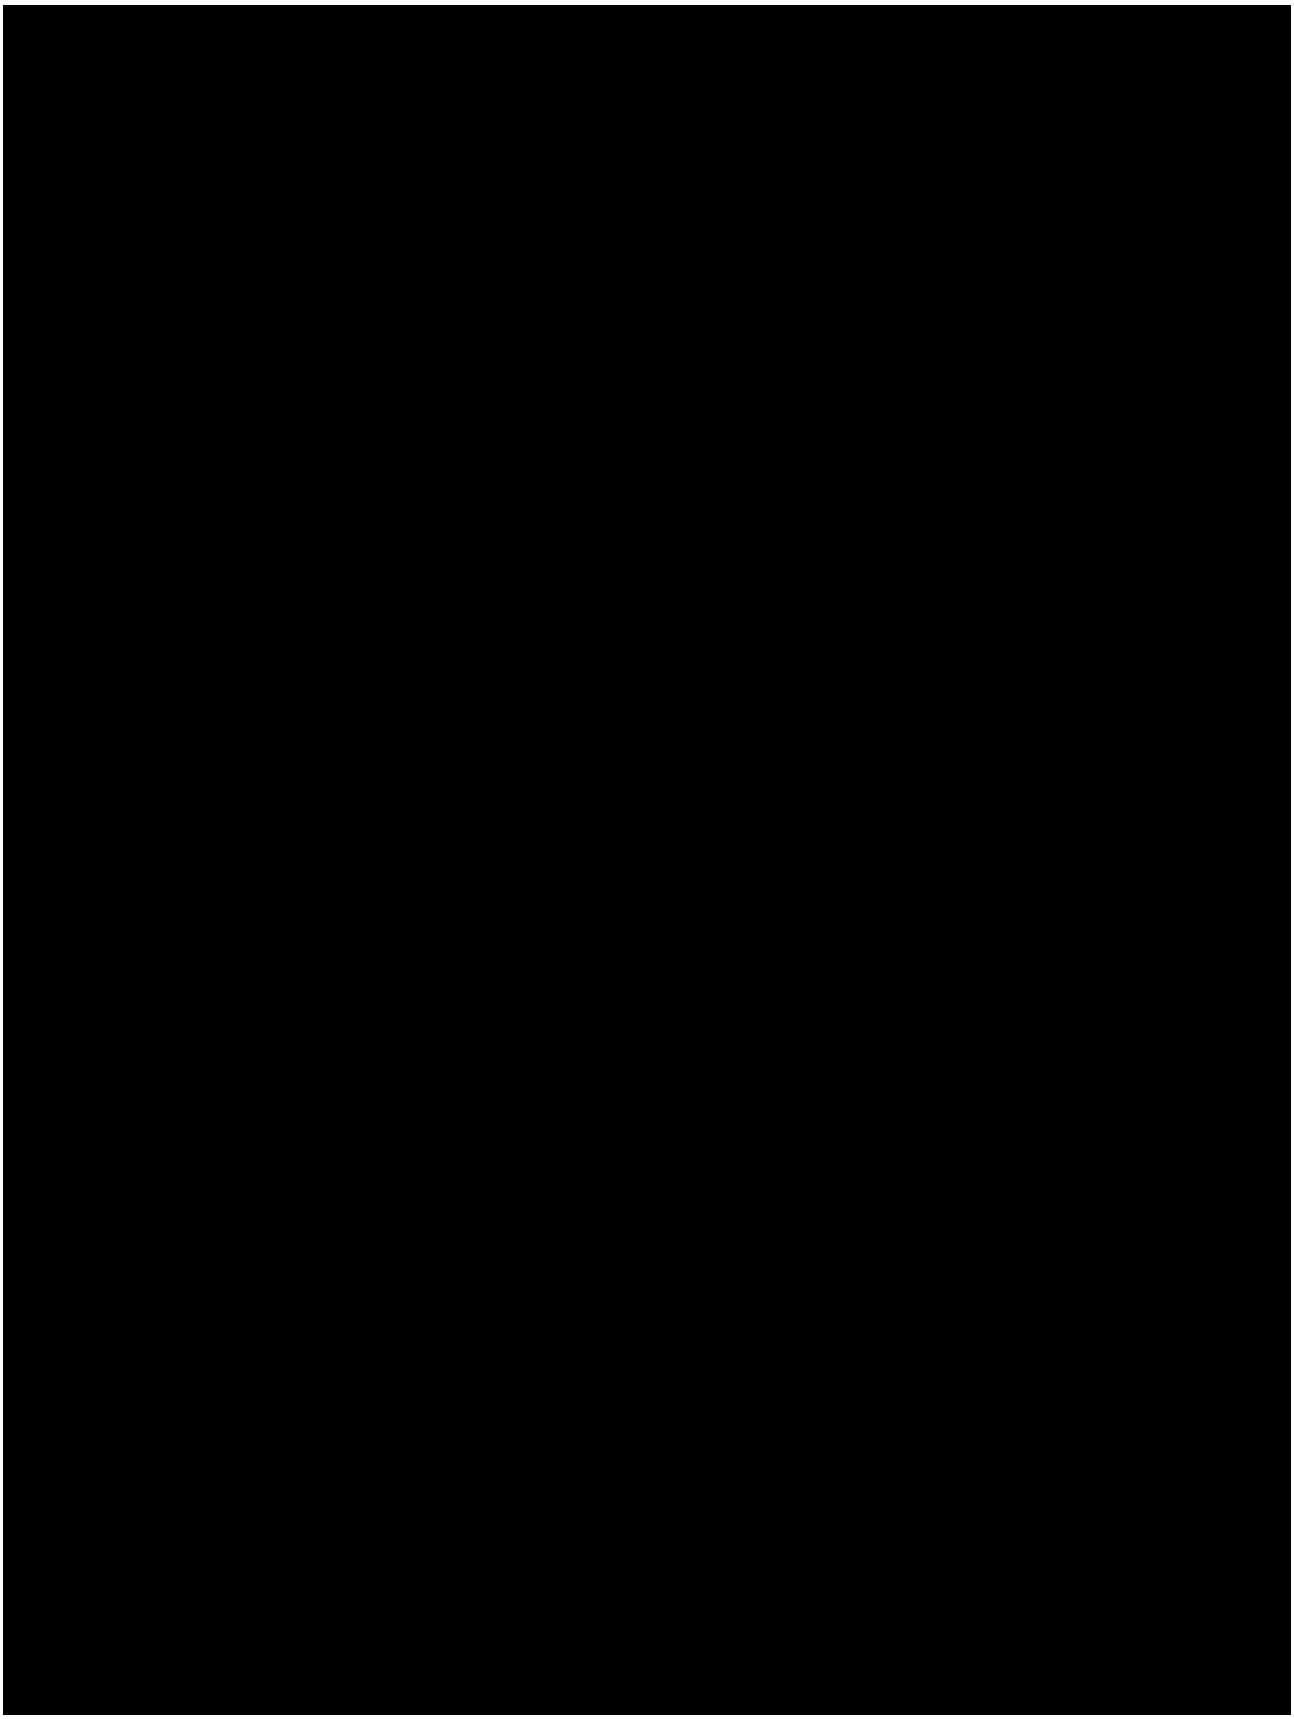


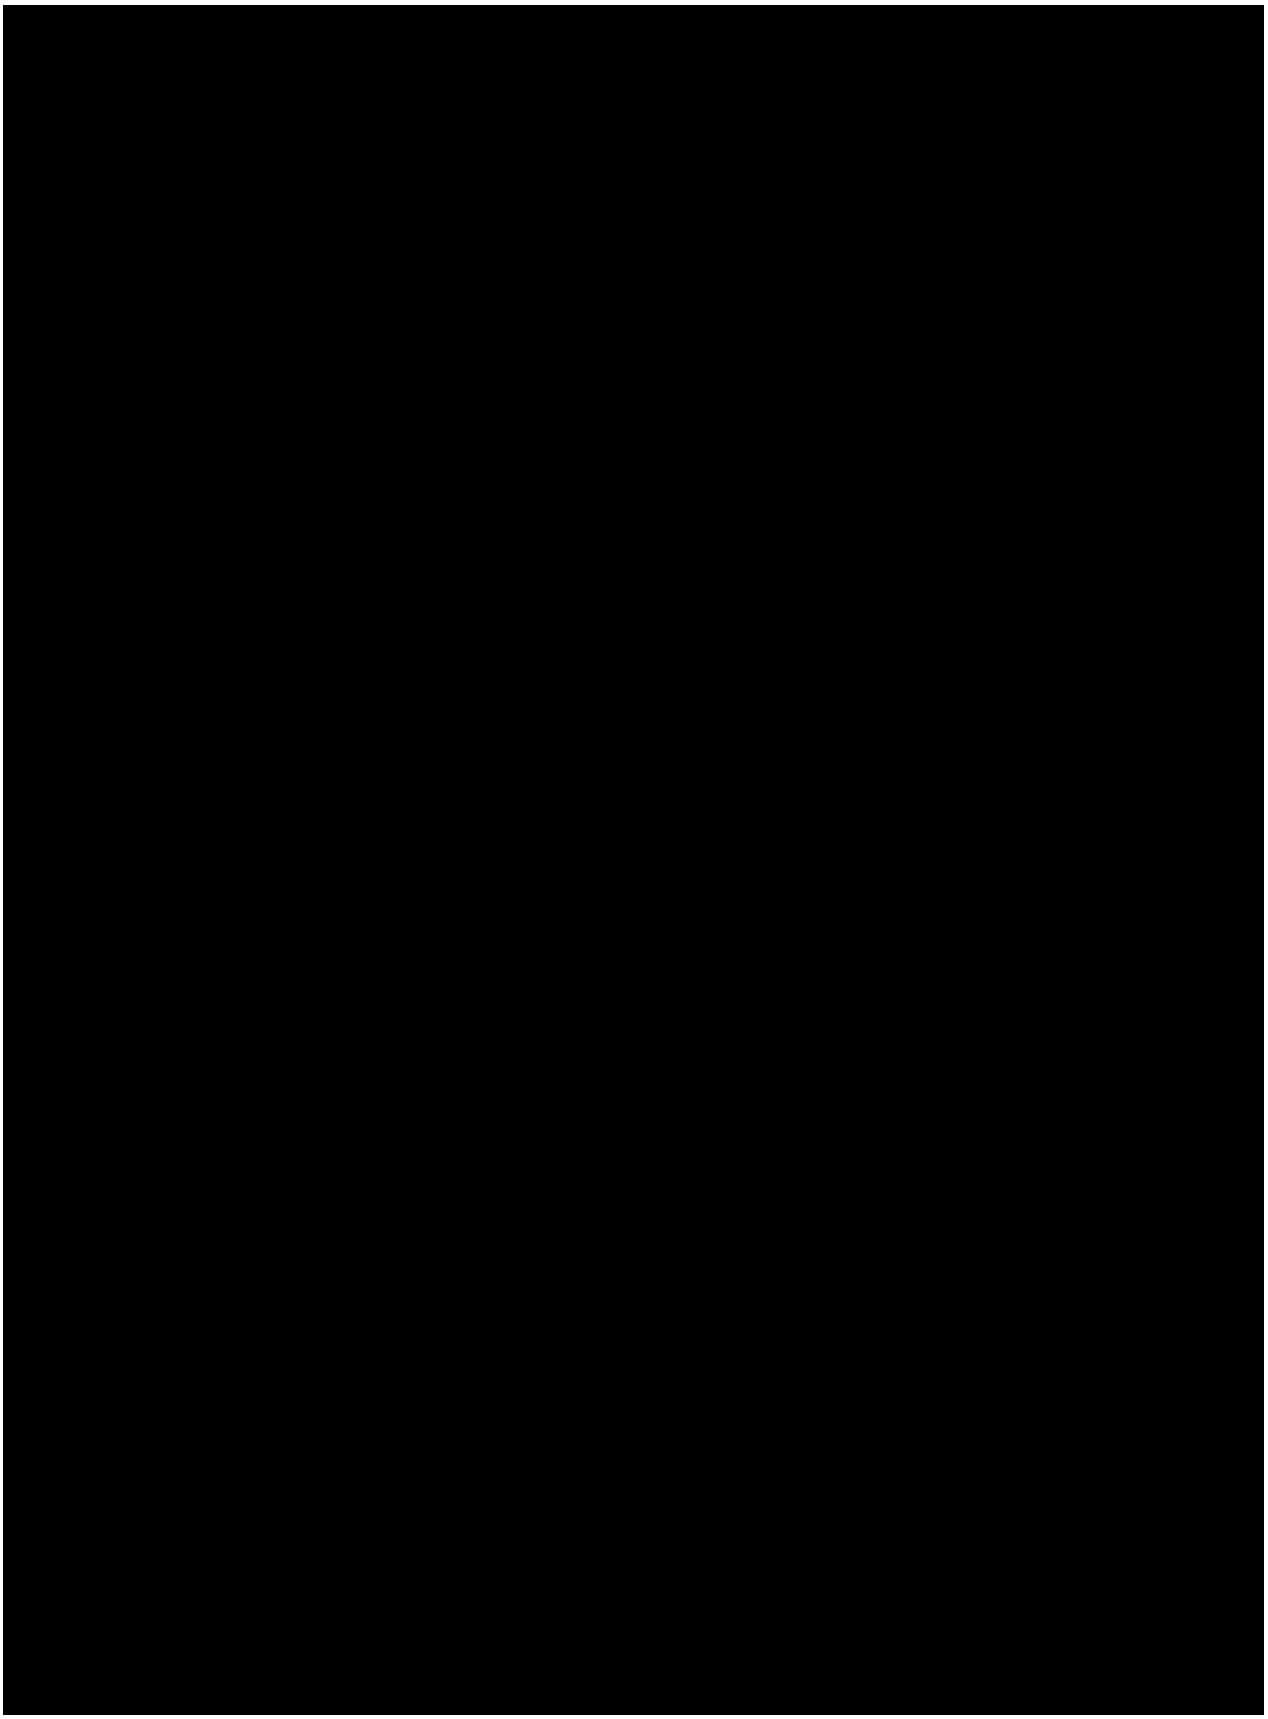


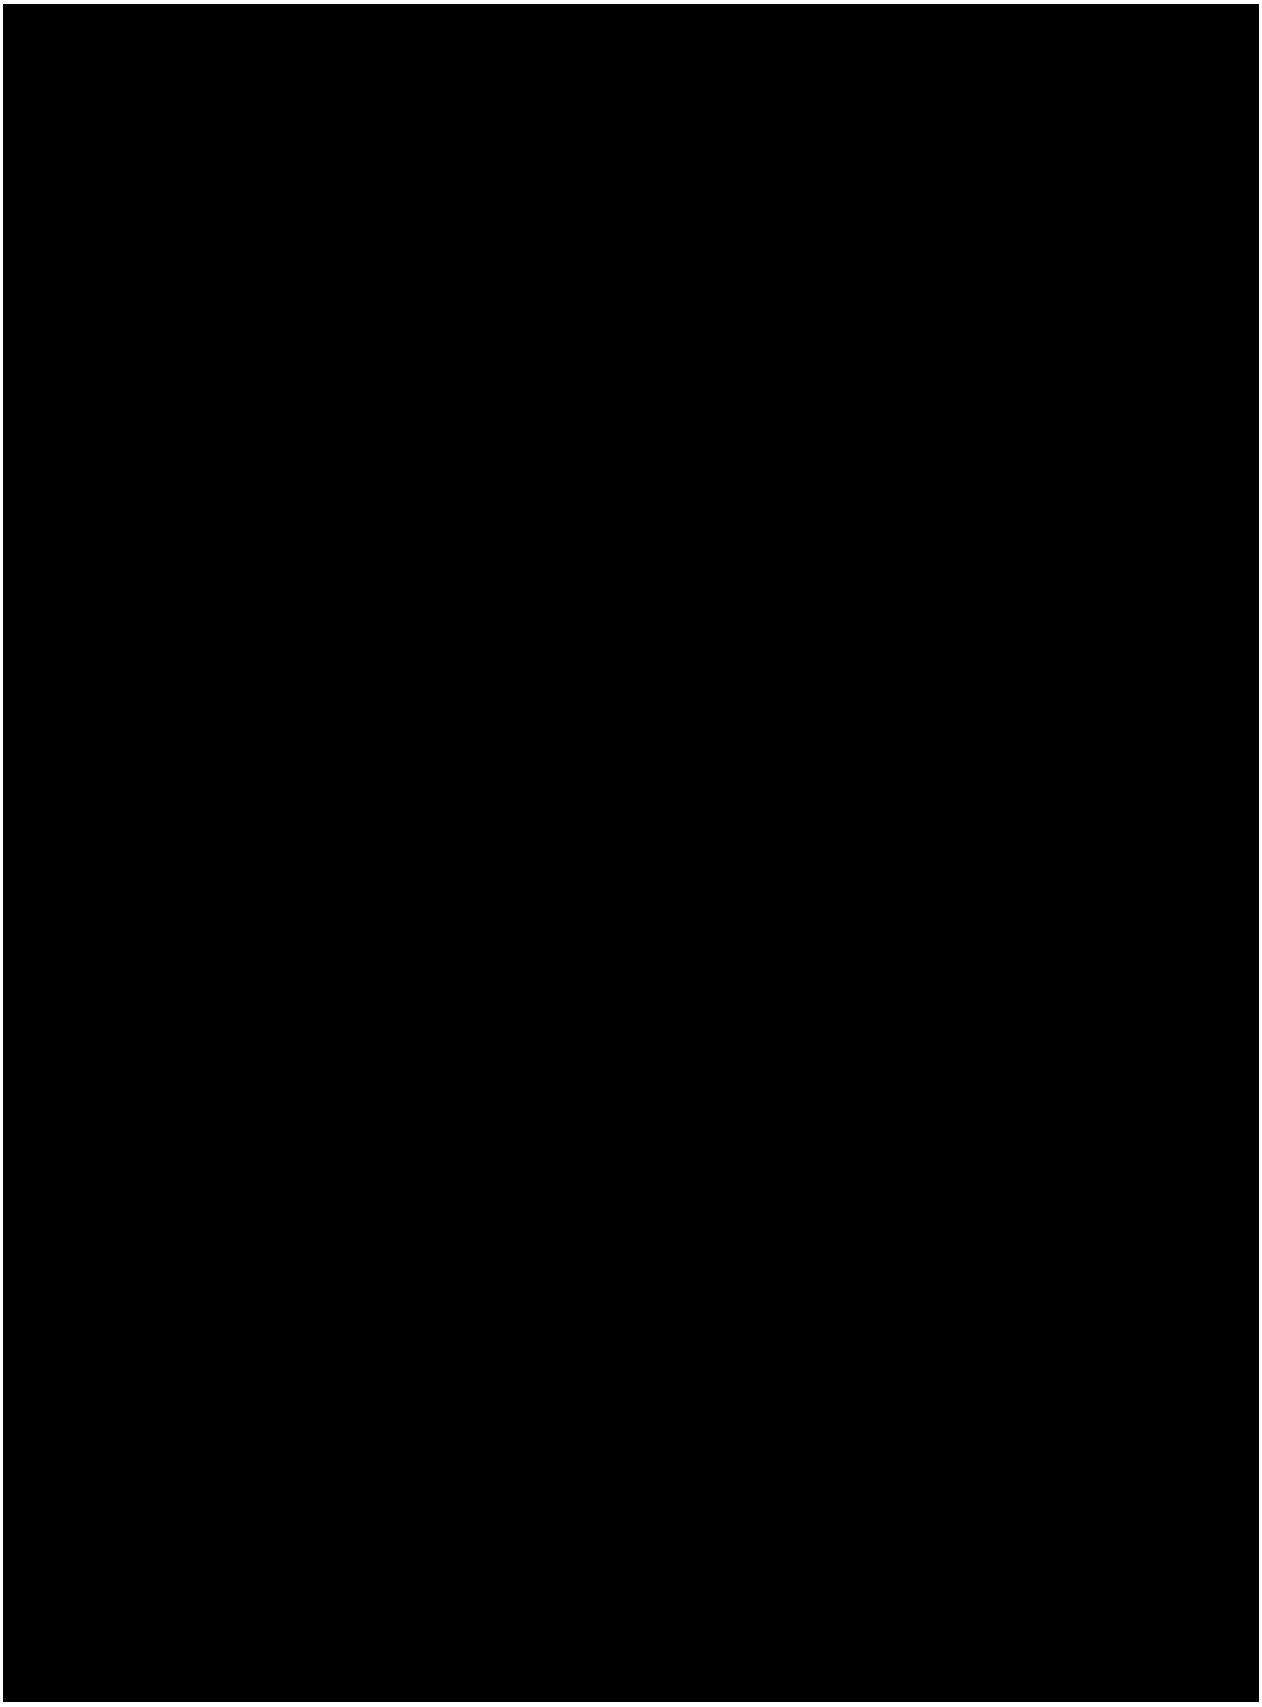


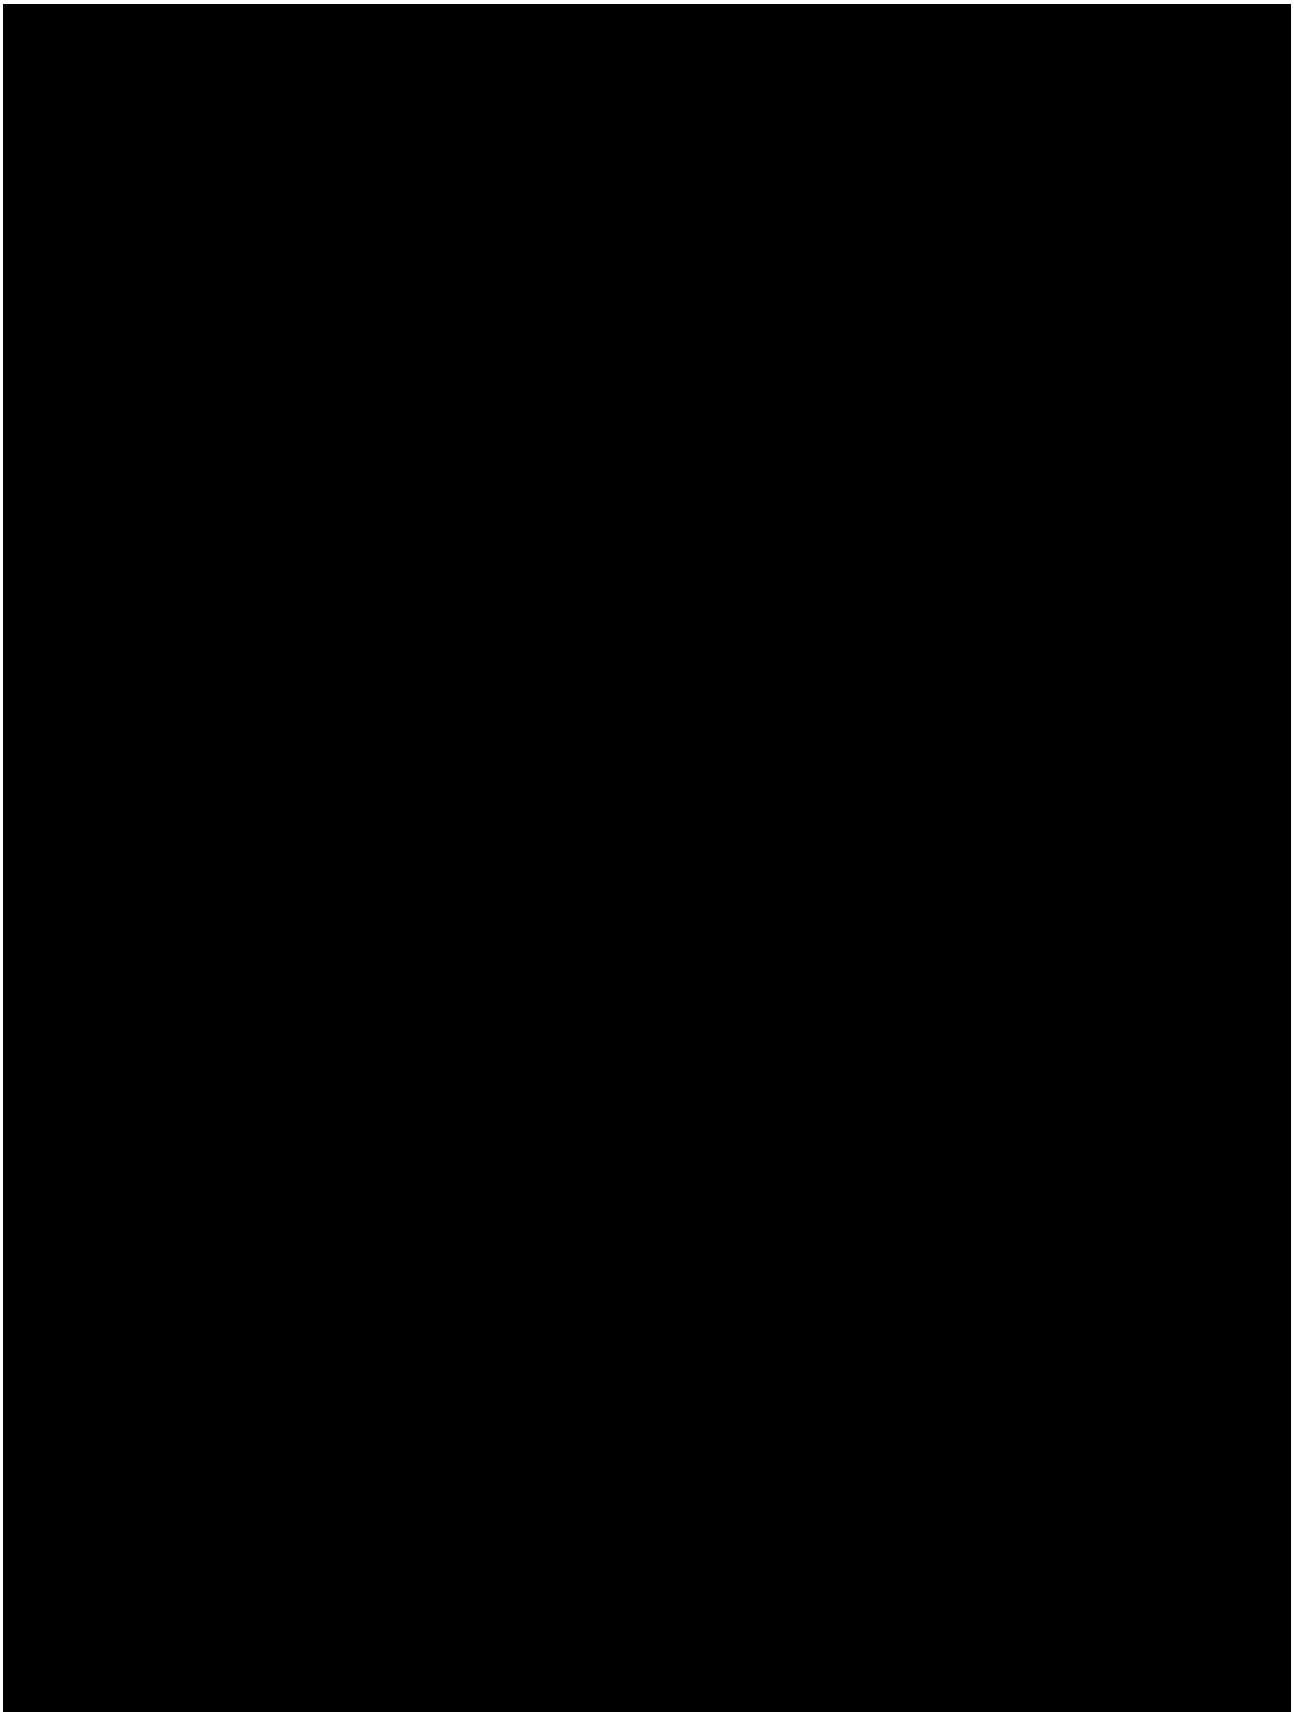


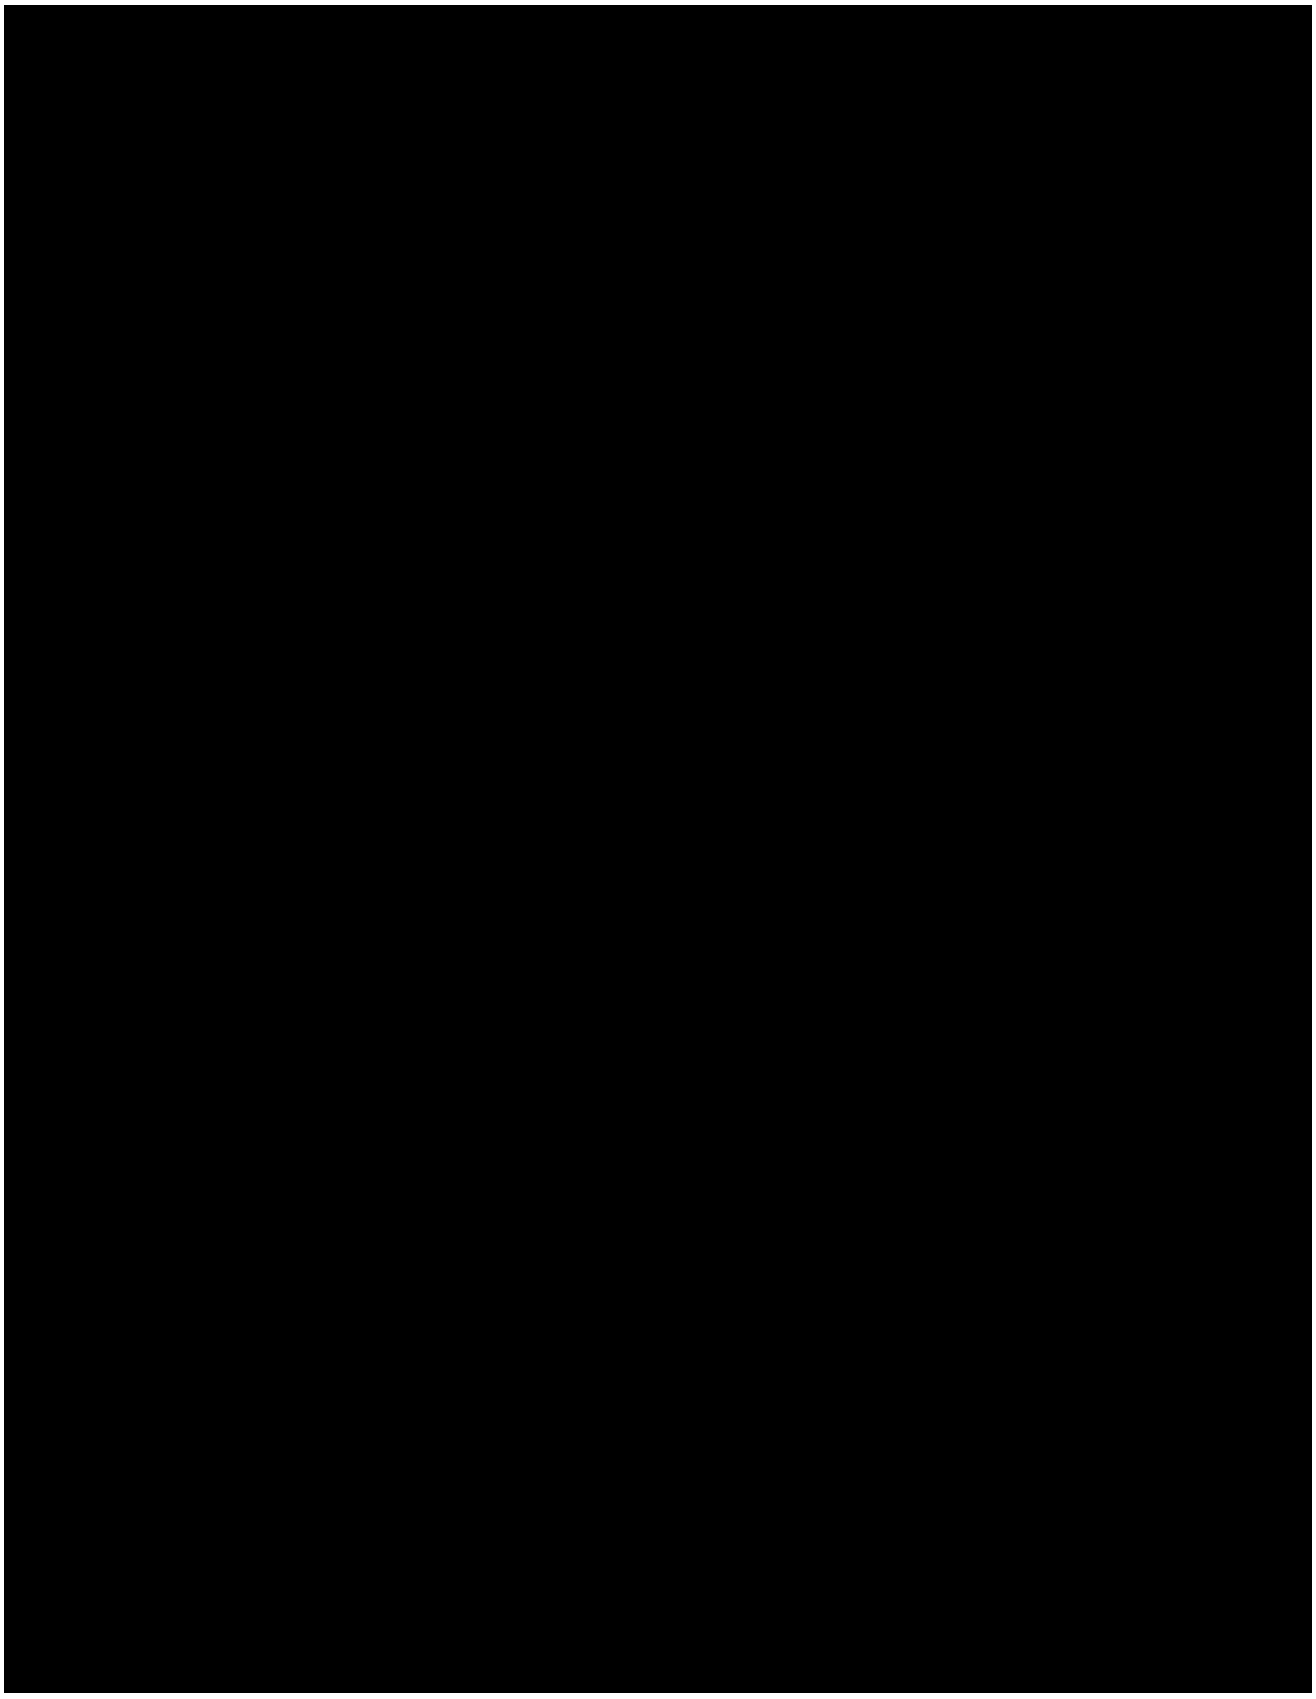


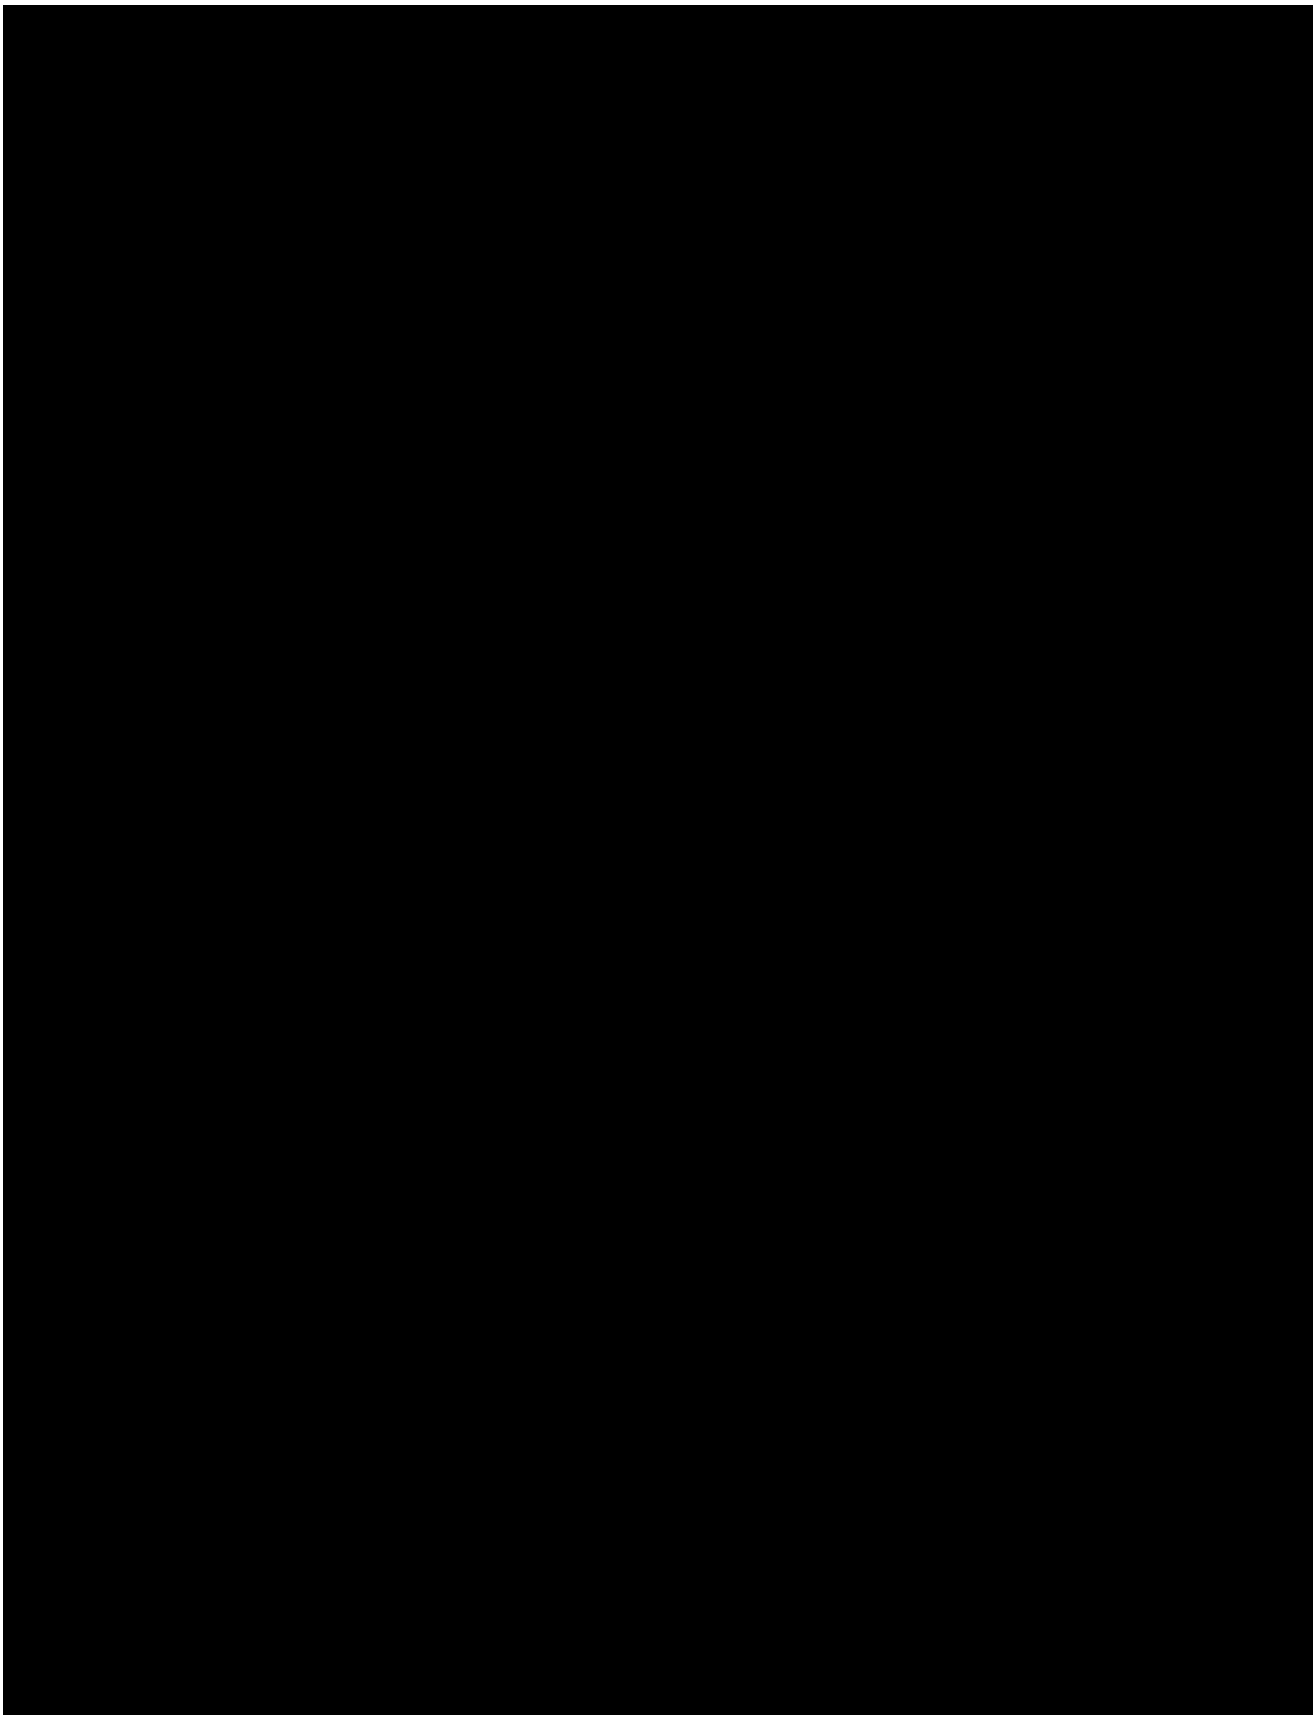


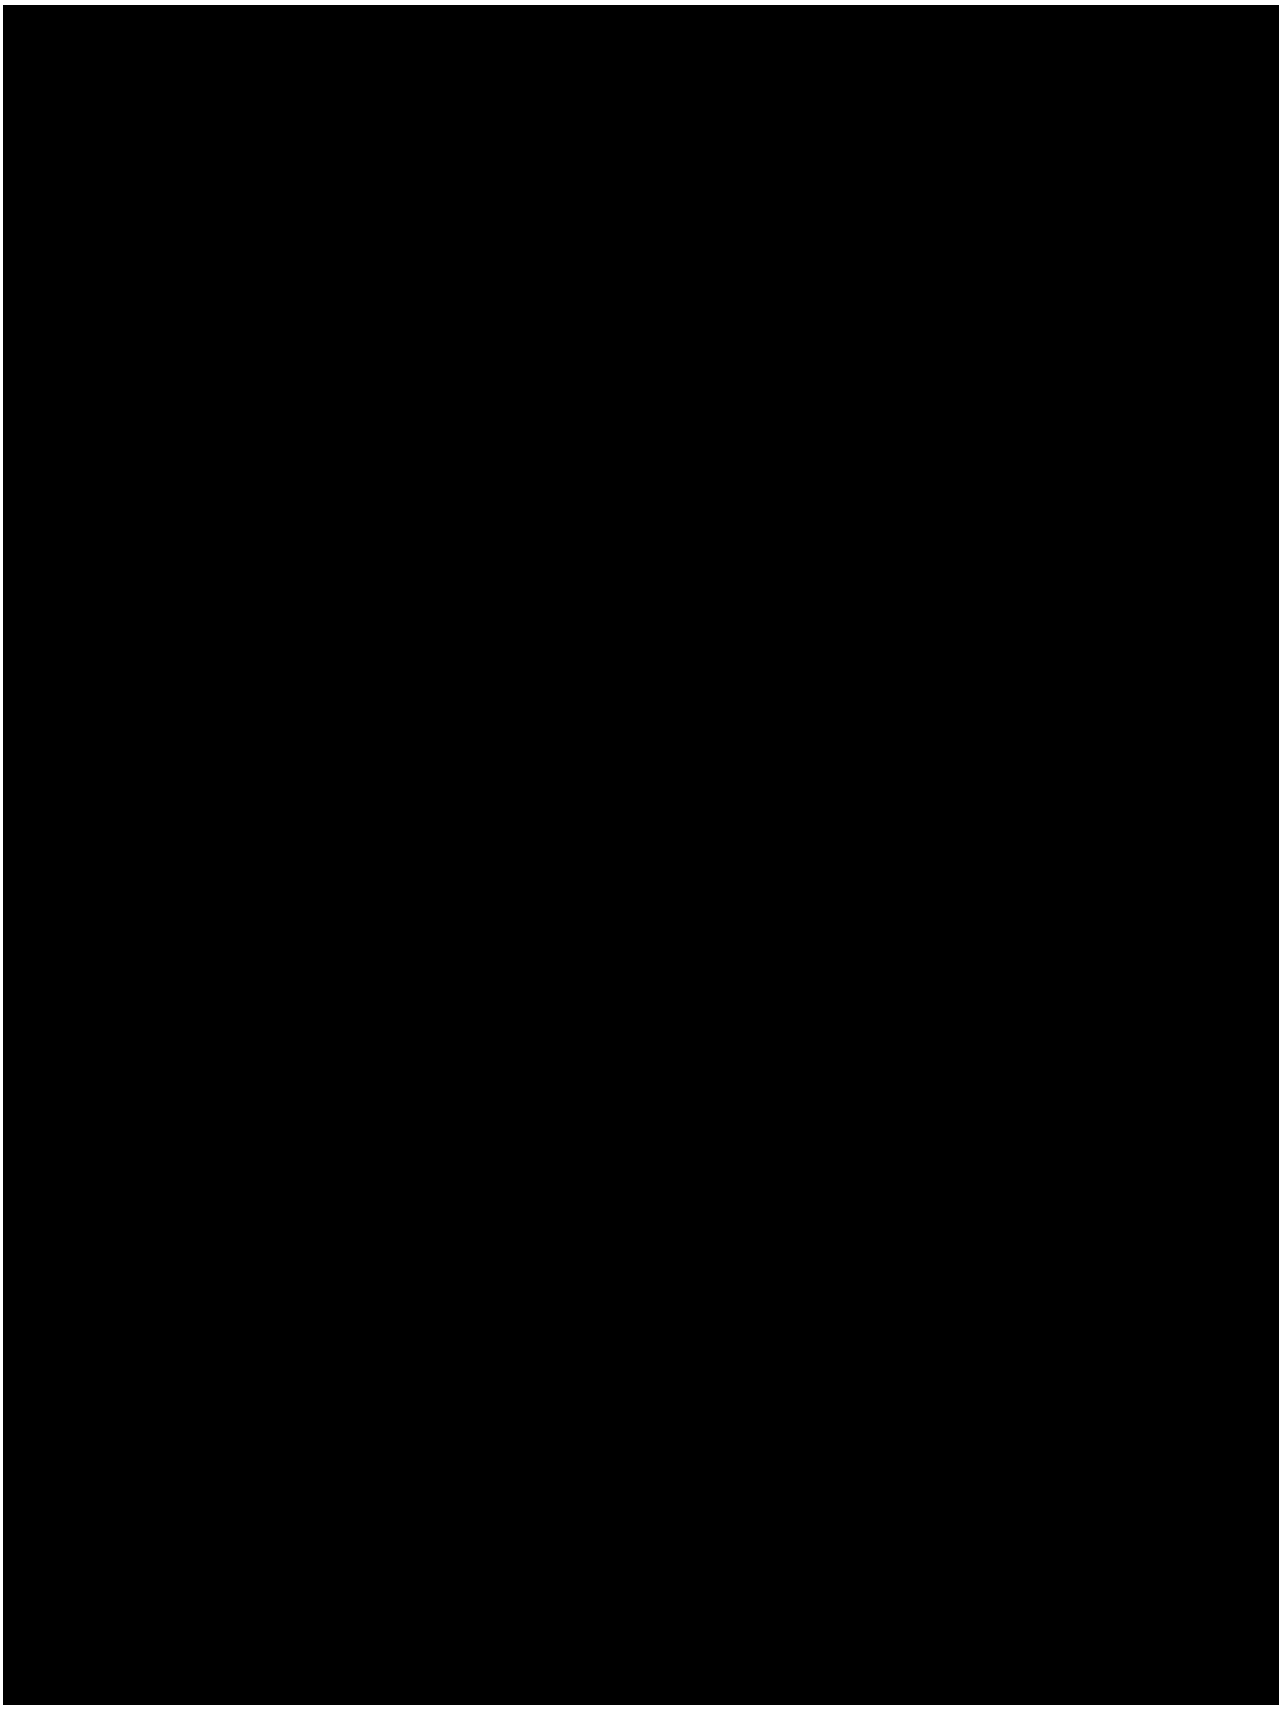


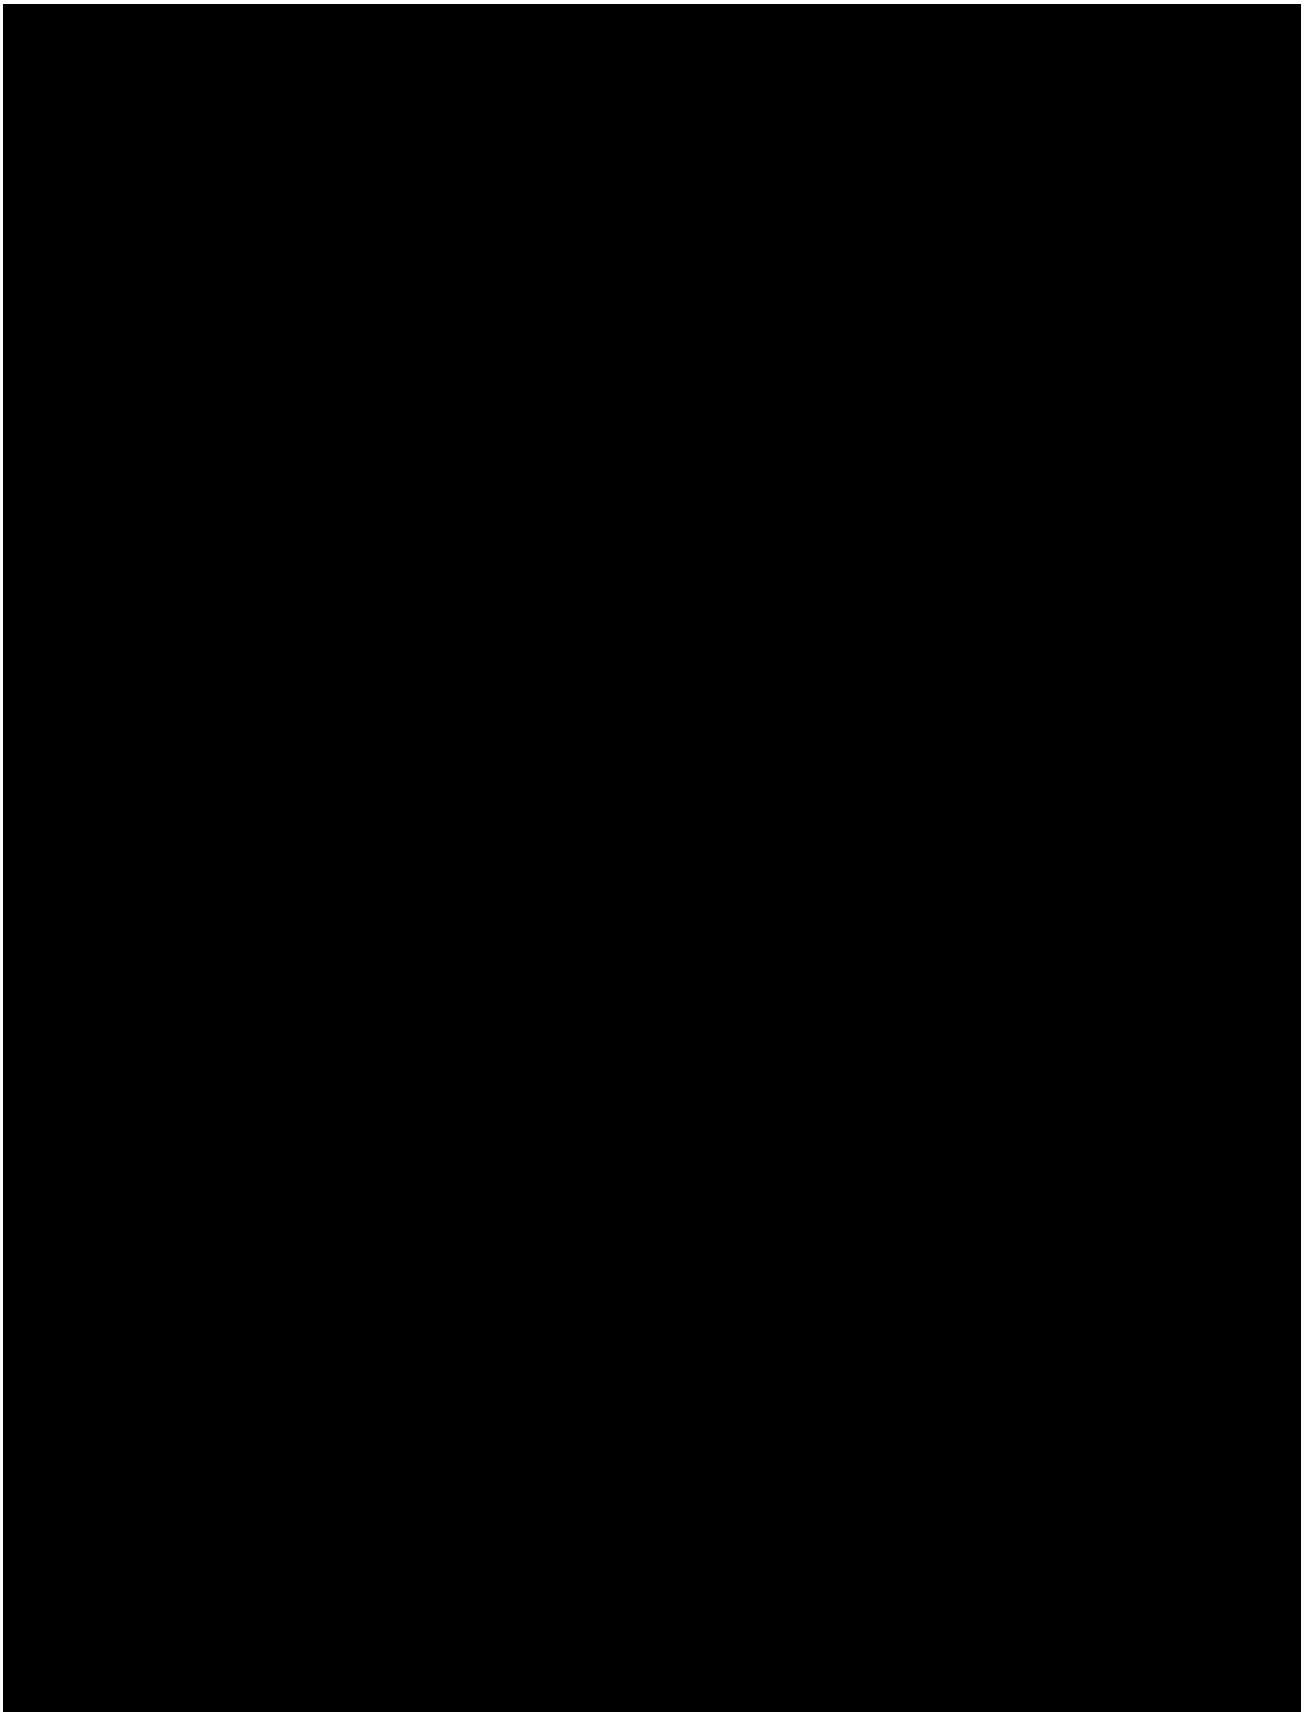


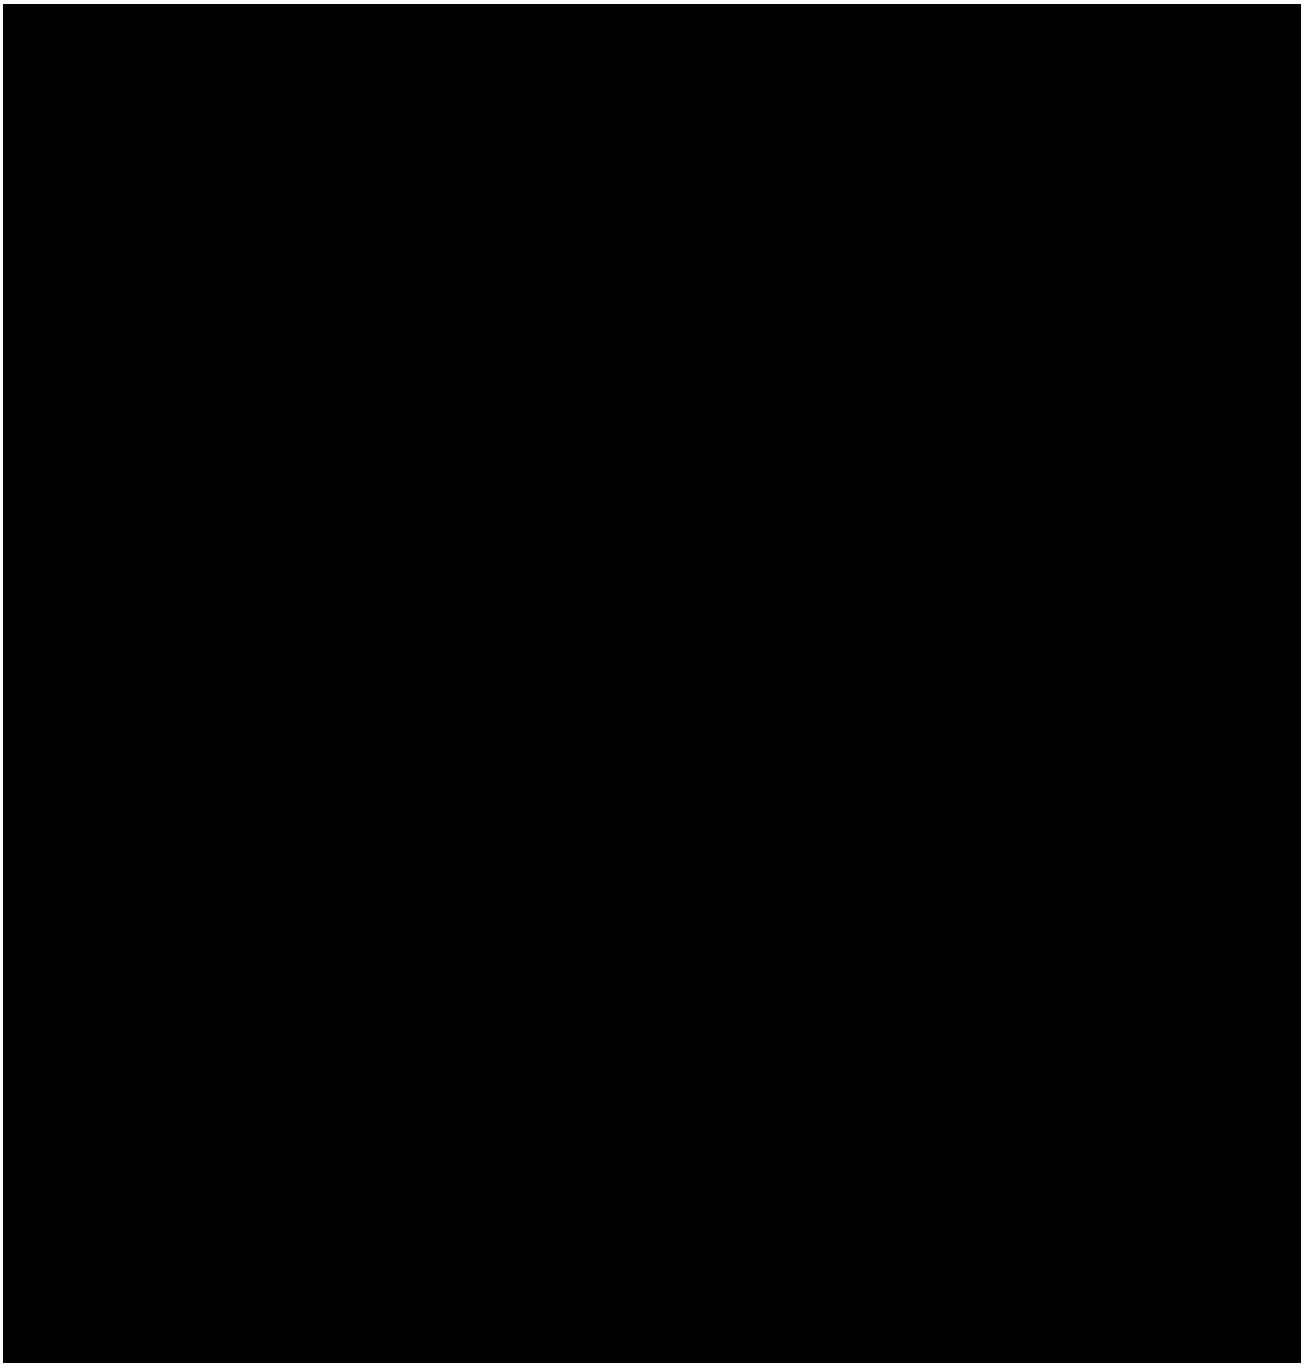












**Working with Christian Service of Shreveport to Offer Vaccinations to the Community**

Christian Service of Shreveport is a transitional home for men and women that operates a daily soup kitchen and assists with rent, utilities, and other services. Healthy Blue's partnership with them was established in 2013, and together, we host an annual health fair on-site. This year, however, due to the low vaccination rates in Louisiana, we partnered with David Raines Community Health Centers on Wednesday, July 21, to offer vaccinations at their facility.

# 2.6.4

Population Health

Healthy Blue

## 2.6.4 Population Health

### 2.6.4.1 Healthy Blue's Approach to Population Health

At Healthy Blue, improving population health with person-centered solutions is at the heart of everything we do. Throughout our more than nine years serving Louisianians in Medicaid, our population health program has evolved to respond to the vast and constantly changing factors that impact individuals' and communities' health and wellness. We are excited to share our new **Elevate | Population Health** program, focused on promoting prevention, improving the health of all Louisianians, and building resilient communities. Our approach, in alignment with the Louisiana MCO Manual, seeks to maintain and improve the health status of our Healthy Blue population through prevention strategies, while also methodically identifying sub-populations with complex needs, including social determinants of health (SDOH) barriers. In this way, **Elevate | Population Health** also strives to reduce health disparities among identified sub-populations.

**Elevate | Population Health** gets us to the root of what our enrollees (members) need, whether it be physical healthcare, behavioral healthcare, transportation, [redacted] to improve the overall health status of our membership as a whole. We are proud of our comprehensive approach to population health, which focuses on evidenced-based decision-making, community participation, continuous quality improvement, and sharing lessons learned and suggested behavioral changes. Our program is designed to support members with preventive health practices guided by the CDC's "Six Ways to Spend Smarter for Healthier People" with a focus on prevention including controlling high blood pressure and asthma, tobacco cessation, and preventing Type 2 Diabetes. Our new and enhanced programs and capabilities, described throughout this section, combined with our experience, passion, and sheer determination will ***elevate the health of all Louisianians***.

**WE ARE COMMITTED TO LOUISIANA**

Healthy Blue and our parent organizations support the health of our communities:

- **$13M** focused on health disparities work, including racial and health equity symposiums and learning labs, mental health first aid trainings, including **$830K** in active maternal health disparity grants
- **$5M** in disaster relief by our parent companies to support our communities impacted by Hurricanes Laura and Delta
- **$5M** in supplemental payments to assist NEMT providers with increased expenses to assure safe member access to care during the pandemic
- **$4.8M** to support food banks and food pantries across the state, including **$1.3M** in active healthy eating grants designed to address food insecurity across Louisiana
- **$717K** to support Mary Bird Perkins Cancer Center's Prevention on the Go, including a grant to create a Louisiana Delta Cancer Screening Campaign

LA_HlthyRebid21_CommittedToLA_COB_03

Our population health strategies are supported across our organization, from leadership to frontline staff. Our strategies support the vision and mission of LDH to improve population health and address health equity by reducing disparities, maximizing health, and addressing SDOH. Healthy Blue's senior leadership has been instrumental in establishing the State's population health strategies and bring their wealth of experience to support our population health strategy, starting with our Chief Executive Officer, Christy Valentine, MD, MBA, who assures all Healthy Blue operations, programs, and strategic partnerships align with our priorities and drives our targeted outcomes. Rhonesia Simmons, MD, MBA, our Population Health Administrator, oversees all population health activities. Karen Kosinski, MPH, MSW, our Health Equity Administrator; Christin Cantavespri, our Quality Management Coordinator; and Lisa Arceneaux-Tropez, Ph.D., our Population Health Liaison provide direct support to Dr. Simmons in execution of all population health initiatives. Brenda Tompkins, our Case Management Administrator and Medical Management Coordinator; Cheryll Bowers-Stephens, MD, MBA, our Behavioral Health Medical Director; Raymond Poliquit, MD, our Chief Medical Officer; Peter Lambousy, our Enrollee Services Manager; and Randy Guillory, our Provider Services Manager; each contribute to and are accountable for population health improvements in each of the priority areas.

Our approach is a collaborative framework focused on the development of innovative solutions to address member needs of our members and their communities. Grounded in a model of continuous evaluation and improvement, and with a goal of constantly addressing health equity, our [redacted]

## Identifying Population Health Needs

Data and analysis are the foundation of **Elevate | Population Health**. Upon this foundation of data, we establish baselines and identify targets for health improvements that drive targeted interventions, implemented by specialized teams to improve our members' overall health and well-being.

which allows us to act quickly to support new, high-risk members who have immediate care and service needs and risk drivers identified through predictive modeling algorithms, to engage members, providers, and stakeholders in our shared communities.

Using Healthy Blue HI, Elli, and other analytic tools, we conduct a full population analysis annually. Our 2021 analysis revealed key opportunities for improvement. Our data findings were also consistent with State-level data, resulting in our four priority focus areas directly aligned with the State's goals and priorities for population health:

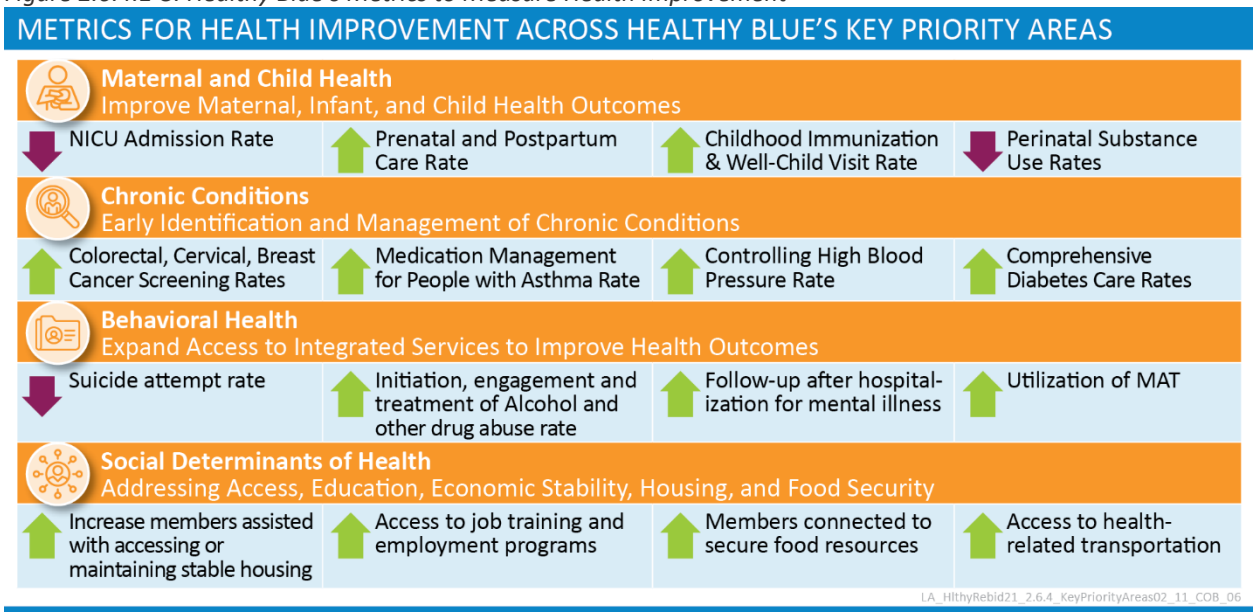
- **Elevate | Maternal and Child Health.** Assuring a strong start for our families. We recognize Well-Child and Immunization rates have declined year-over-year (YOY) as impacted by COVID-19. According to CDC data, Louisiana ranks the second highest in the US for cesarean delivery rate, preterm birth rate, and low birthweight rate. The March of Dimes LA report card cited LA as an "F" for maternal child health. America's Health Rankings (AHR) ranks Louisiana 49th in percent of low birthweight infants (2019). Healthy People 2020 (CDC) cites immunizations as an emerging issue of concern with need for healthcare infrastructure to respond to diverse and varying needs.
- **Elevate | Chronic Chronic Condition Management.** Improving access to and use of services for many of our priority populations. AHR noted the percentage of females with multiple chronic conditions increased from 11.9% to 16.6% (a 40% increase) from 2011 to 2019. Analysis of our membership showed that diabetes, coronary artery disease, COPD, congestive heart failure, cancer, and asthma were among our membership's top 10 diagnoses. In addition, our analysis showed poorer diabetes HbA1c control for Black and African American members.
- **Elevate | Behavioral Health (BH).** Expanding access to integrated services to improve health outcomes. Louisiana has experienced a YOY decline in rates for BH follow-up. AHR lists Louisiana as second (18.5%) for frequent mental distress. CDC data indicates a 47.6% increase in drug overdose deaths in Louisiana between December 2019 and December 2020 (a 29.4% increase). Five of the top 10 inpatient diagnoses among Healthy Blue members are related to mental health or substance use disorder. Additionally, antidepressant medication management and initiation and engagement of alcohol and other drug or dependence treatment are lower among Black members, and inpatient BH admissions is higher than among other populations.
- **Elevate | Social Determinants of Health.** AHR ranks Louisiana 48th in food insecurity, 50th in cumulative adverse social and economic factors, 46th in unemployment, and 49th in student homelessness. Healthy Blue's data shows that the highest spend per Louisiana Medicaid member is for: (1) members experiencing homelessness; (2) members experiencing economic problems; and (3) members experiencing work problems.

## 2.6.4.1.1 Establishing Baseline Measures and Targets for Health Improvement

Once we identify a trend or opportunity to improve, our comprehensive approach to identifying baseline health outcome measures and targets for health improvement builds on a robust integration of member and population-level data like those in Attachment H, including HEDIS®, CAHPS®, inpatient days per 1,000, and other Louisiana and nationally recognized measures and benchmarks. We have experience with industry-accepted quality, utilization, and other health measures that enables us to compare our performance and trends over time.

For example, we may use YOY trends for utilization measures or prior year HEDIS data to measure improvements in HEDIS outcomes. Using this approach, as shown in Figure 2.6.4.1-3, we have identified targets for health improvement across the four priority areas.

*Figure 2.6.4.1-3. Healthy Blue's Metrics to Measure Health Improvement*



[redacted]

**Establishing Baselines and Targets for Health Improvement – In Action.** National and local data, and LDH's goals demonstrated that maternal and child health needs to be a top priority for population health. A drill-down into the data demonstrated significant opportunities to decrease:

- **Preterm Birth Rate.** Our performance measures, which provide our baseline, show an increase in preterm birth rate from 22.16% in 2019 to 22.86% in 2020. To establish our benchmark, we used the March of Dimes 2020 goal to reduce preterm birth rates to 8.1% and a goal to reduce to 5.5% by 2030.
- **Low Birth Weight.** While low birth weight measures are showing a YOY decrease from 13.65% in 2019 to 11.75% in 2020, significant opportunity remains for further reduction. Using the US DHHS Healthy People 2020 goal as our benchmark, we set the commitment to reduce the low birth weight rate to 7.8%.

## 2.6.4.1.2 Measuring Population Health Status and Identifying Sub-populations

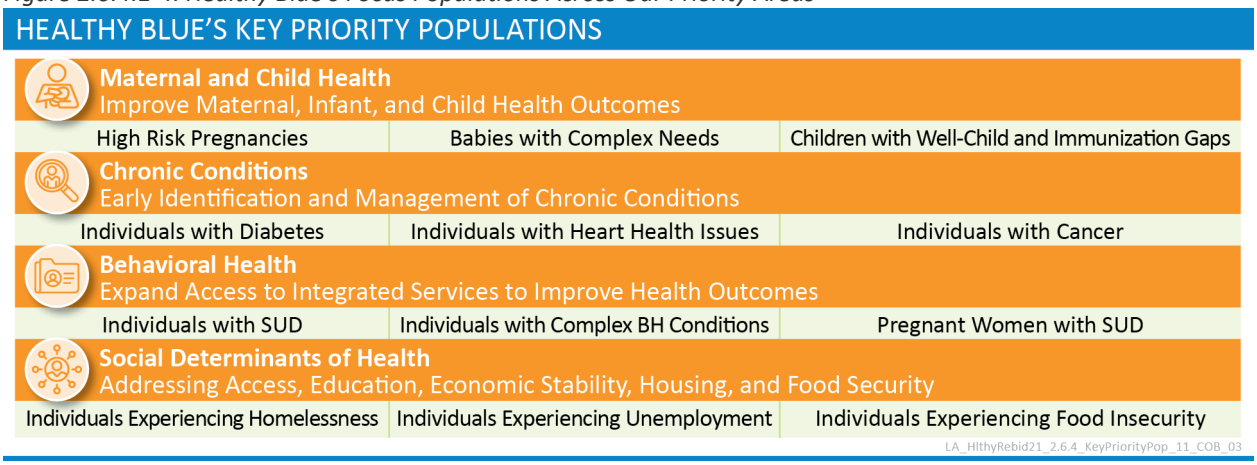
Our Population Health Administrator, Dr. Simmons, measures population health status on an ongoing basis, using Healthy Blue HI as the foundation to continually monitor member and population data to guide improvements. Our **Elevate | Population Health** analysis is reviewed in-depth, annually, to identify emerging trends, adjust measures, and prioritize specific sub-populations for optimal success. Dr. Simmons regularly assesses population health status by:

- Analyzing member demographics including a breakdown by parish, acuity and risk level, cohort, gender, race, ethnicity, and age
- Analyzing claims data to identify utilization trends, top diagnoses, and top non-medical risk factors
- Summarizing state- and national-level health data and conducting appropriate comparisons
- Comparing all findings against LDH's population health goals
- Our overall population health status analysis is supported by Healthy Blue HI, which gives us the flexibility to analyze health data by subpopulation, including most current clinical, behavioral including gaps in care. We use a combination of predictive modeling, claims and pharmacy data, laboratory results, referrals, Utilization Management data, and health and social risk factor assessment results to identify Population Health cohorts.

Our criteria and thresholds for member stratification are based on algorithms that identify various types of high- or emerging-risk populations through the analysis of diverse sets of demographics, claims data, ADT data, and individual, external, and community-level data on social risk factors. Our algorithms inform, develop, and assess population health strategies at the individual level (care management has a key tool for member outreach), community level (community-based organization [CBO] support and neighborhood initiatives), and parish and state level (community

investment, collaboration, coordination, and data sharing). Some examples of algorithms include our Chronic Illness Intensity ($CI^3$) Scores, readmission risk assessment surveys, emerging risk (ERM), and low intensity Emergency Room (LIER) utilization risk. We complete a re-stratification of our membership every month. This approach allowed us to identify priority populations across our four priority areas as shown in Figure 2.6.4.1-4.

*Figure 2.6.4.1-4. Healthy Blue's Focus Populations Across Our Priority Areas*



- Our "hot spotting" tools help us take the stratification data further to look at populations by region, parish, or even zip code. Our Interactive Analytic Insights and Community Health Management Hub (Hub) help us identify care gaps and social barriers, and to develop strategies specific to member needs by geographic location.
- Our approach to evaluating health status and identifying sub-populations allows us to develop interventions that address population health across all levels of need. By stratifying our membership and addressing sub-populations, we keep healthy communities healthy, and focus our resources on the members, communities, and populations that need additional support to improve population health trends.

**Measuring Health Status and Identifying Sub-Populations — In Action.** Once we identified the targets for maternal and child health improvement, we conducted a deep dive in those areas to identify the sub-populations. According to a 2019 report from the March of Dimes, Black women in Louisiana experienced preterm births at 16%, a higher rate than any other ethnicity. Our Healthy Blue analysis revealed similar and additional disparities between January 2019 and April 2020:

- Preterm birth for Healthy Blue's Black members occurred at the rate of [redacted]
- Black women experienced severe maternal morbidity at a rate of [redacted]
- Black women experienced low birth weight deliveries at a rate of [redacted]
- We established these rates as our baseline and set the goal to ***eliminate the disparity*** across these three.

## 2.6.4.1.3 Identifying Key Determinants of Health and Strategies to Reduce Disparities

**Elevate | Population Health** focuses on identifying the root cause of a health outcome, inclusive of social, cultural, medical, and other factors that may exist. We understand that members will likely have multiple and differing key determinants of health, so our approach assures we address the populations' changing needs. When we identify a trend, we identify other contributing factors – for example, transportation as a barrier to receiving prenatal care. We also engage community partners for feedback, sharing information about our data and discussing barriers that may exist before taking action. Our framework to address health disparities, highlighted in Figure 2.6.4.1-5, builds on our population health approach and constantly evaluates our initiatives to make sure our strategies impact the key determinants of health.

[redacted]

Healthy Blue is dedicated to eliminating health disparities and advancing health equity. In line with LDH's Health Equity Plan mantra, "Nothing about us, without us," we listen to members, providers, and community partners, and let their experience guide our work. Our strategies for addressing disparities are a key component to our **Elevate | Population Health** approach, and we are proud to have been one of the first Louisiana MCOs awarded NCQA Multicultural Health Care Distinction in 2017. Healthy Blue's experience with members, providers, and other stakeholders provides insight into members' and communities' specific cultural and health needs. We complement their direct input with data from our advanced analytics tools, and leverage the following strategies:
**Focused and Dedicated Staff to Reduce Disparities.** Karen Kosinski, our Health Equity Administrator, will oversee efforts to reduce health disparities. We train all member-facing employees and providers in cultural competency and overcoming implicit biases.

**Our Health Equity Task Force.** We recently established a Health Equity Task Force, which will take both a data-driven and community-based approach to identifying and addressing Louisiana-specific health disparities. The Task Force evaluates individual and community needs, cultural influences, experiences, and competencies to identify and address drivers of health. The Task Force is chaired by Karen Kosinski, our Health Equity Administrator, and is comprised of other Healthy Blue employees and community members with diverse backgrounds and cultures who are committed to advancing health equity. Informing the work of, and under the guidance of our Population Health Workgroup, the Healthy Equity Task Force assures that our interventions are designed with the end in mind.

**Our Population Health Workgroup**, including employees from our Care Management, Quality Management (QM), Analytics, and Enrollee and Provider Services teams — conducts a comprehensive review of disparity data. This group, led by Dr. Simmons, reviews population health data and identifies areas for improvement. Through these reviews and member listening sessions, we identify disparities in outcomes among members and specific sub-populations that may benefit from targeted interventions.

Using these strategies, we have developed and will continue to develop interventions specifically designed to reduce health disparities, some examples include:

[redacted]

**Supporting Members Who Identify as LGBTQ+.** In the first quarter of 2022, we will enhance our LGBTQ+ provider training opportunities to our network providers that, upon provider completion, will result in an indicator added to our online provider directory designating the provider's status as a Healthy Blue LGBTQ+ ally. Additionally, our parent company, Anthem, Inc., is in the process of developing an LGBTQ+ Center of Excellence model, as well as member engagement strategies to assure our members easily access the best healthcare for their needs.

**Addressing Health Disparities — In Action.** Within our focus on maternal and child health, we identified multiple health disparities that exist among our Black and African American Members and set the goal to eliminate those disparities. To accomplish this, we conducted both a root cause analysis and participated in listening sessions to make sure that we consider all contributing factors, beyond those measures identified as target key measures. These contributing factors include pre- and postnatal care, well-child visits, and other key determinants of health including hypertension, diabetes during pregnancy, nutrition, and social determinants. To accomplish this goal and address all key determinants of health, we have developed several targeted interventions, including but not limited to:

[redacted]

## 2.6.4.1.4 Integrated Initiatives that Represent a Comprehensive Approach to Population Health

Over the past nine years, Healthy Blue has demonstrated the ability to develop integrated initiatives that address populations' physical, behavioral, and social needs. ***As a fully integrated health plan, every program we develop centers on whole-person care from initiation.*** Our population health strategy brings all health plan functions together to develop initiatives that comprehensively address the entire population. Examples of our integrated initiatives across our four priority areas are included in Figure 2.6.4.1-6, and represent a comprehensive approach to population health. Under the leadership of Dr. Simmons, a cross-functional Population Health Workgroup representing Health Equity, QM, UM, Care Management, Pharmacy, Network/Provider and Member Services focuses on whole-member health, including BH and physical health, reviews data, identifies areas for improvement, and develops, adapts, and deploys targeted initiatives. ***Everything we do, from member engagement to value-based purchasing programs, to value-added benefit (VAB) design and deployment, is specifically designed to elevate the health of Louisianians.*** We know that our success improving member health depends on streamlined, methodical, and comprehensive collaboration, and recognize that integrated, whole-person care cannot stop at the health plan, but must be incorporated through the community with innovated strategies at the delivery of care practice level.

**COMING IN 2021:**
**CONCIERGE CARE FOR MEMBERS WITH CHRONIC HEART FAILURE**

Healthy Blue is pleased to introduce Concierge Care, a dynamic, person-centered member-facing app that helps to connect members to our care management team. Through this evidence-based program, care managers will be able to interact and collaborate with members, providing highly personalized educational content, bi-directional chat and supporting members to manage their symptom.

LA_HlthyRebid21_ConciergeCare21_COB_03

[redacted]

## 2.6.4.1.5 Additional Population Health Considerations

Healthy Blue, with affiliates operating Medicaid managed care programs in 24 other markets, benefits from the best practices and lessons learned across a broad spectrum of populations and geographies, as well as the long-standing local experience and expertise of BCBSLA. The major consideration we would like to present includes our lessons learned from the COVID-19 pandemic. A recent Louisiana Public Health Institute (LPHI) assessment found that BH needs worsened since the start of the pandemic. The most impacted groups, according to the assessment, are communities of color and people experiencing unstable housing. The COVID-19 pandemic exacerbated the

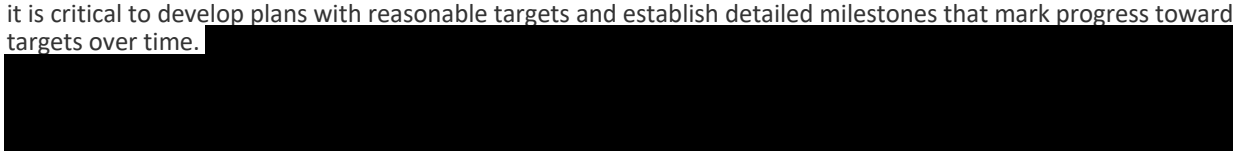
shortcomings of care delivery nationwide, including Louisiana. The already challenged clinical workforce was further depleted, with problems obtaining personal protective equipment and support staff temporarily laid off or unemployed. However, it has also served as a catalyst for transformation, which was quickly implemented across the state, far faster than it would have occurred pre-pandemic. Louisiana adjusted with new care pathways, roles, sites of service and covered services. Members responded by embracing telehealth and digital tools. ***Healthy Blue proactively responded to the COVID-19*** pandemic through the use of BCBSLA's Healthy Blue-specific tracker, and through the creation of unique predictive modeling tools that absorb public information regarding COVID-19 risk attributes, COVID-19 trends, and member risk factors to prioritize members for targeted outreach. As one example, we have reached out to almost 400 providers, alerting them of members on their panels with gaps in care that have not been vaccinated or have only completed one shot. For engaged VBP providers, the Provider Care Management System (PCMS) portal displayed all members who had tested positive, including those using an external lab, along with risk stratification. It was well-received and appreciated by the provider community as the first tool from an MCO (~90 days after declaration of public health emergency).

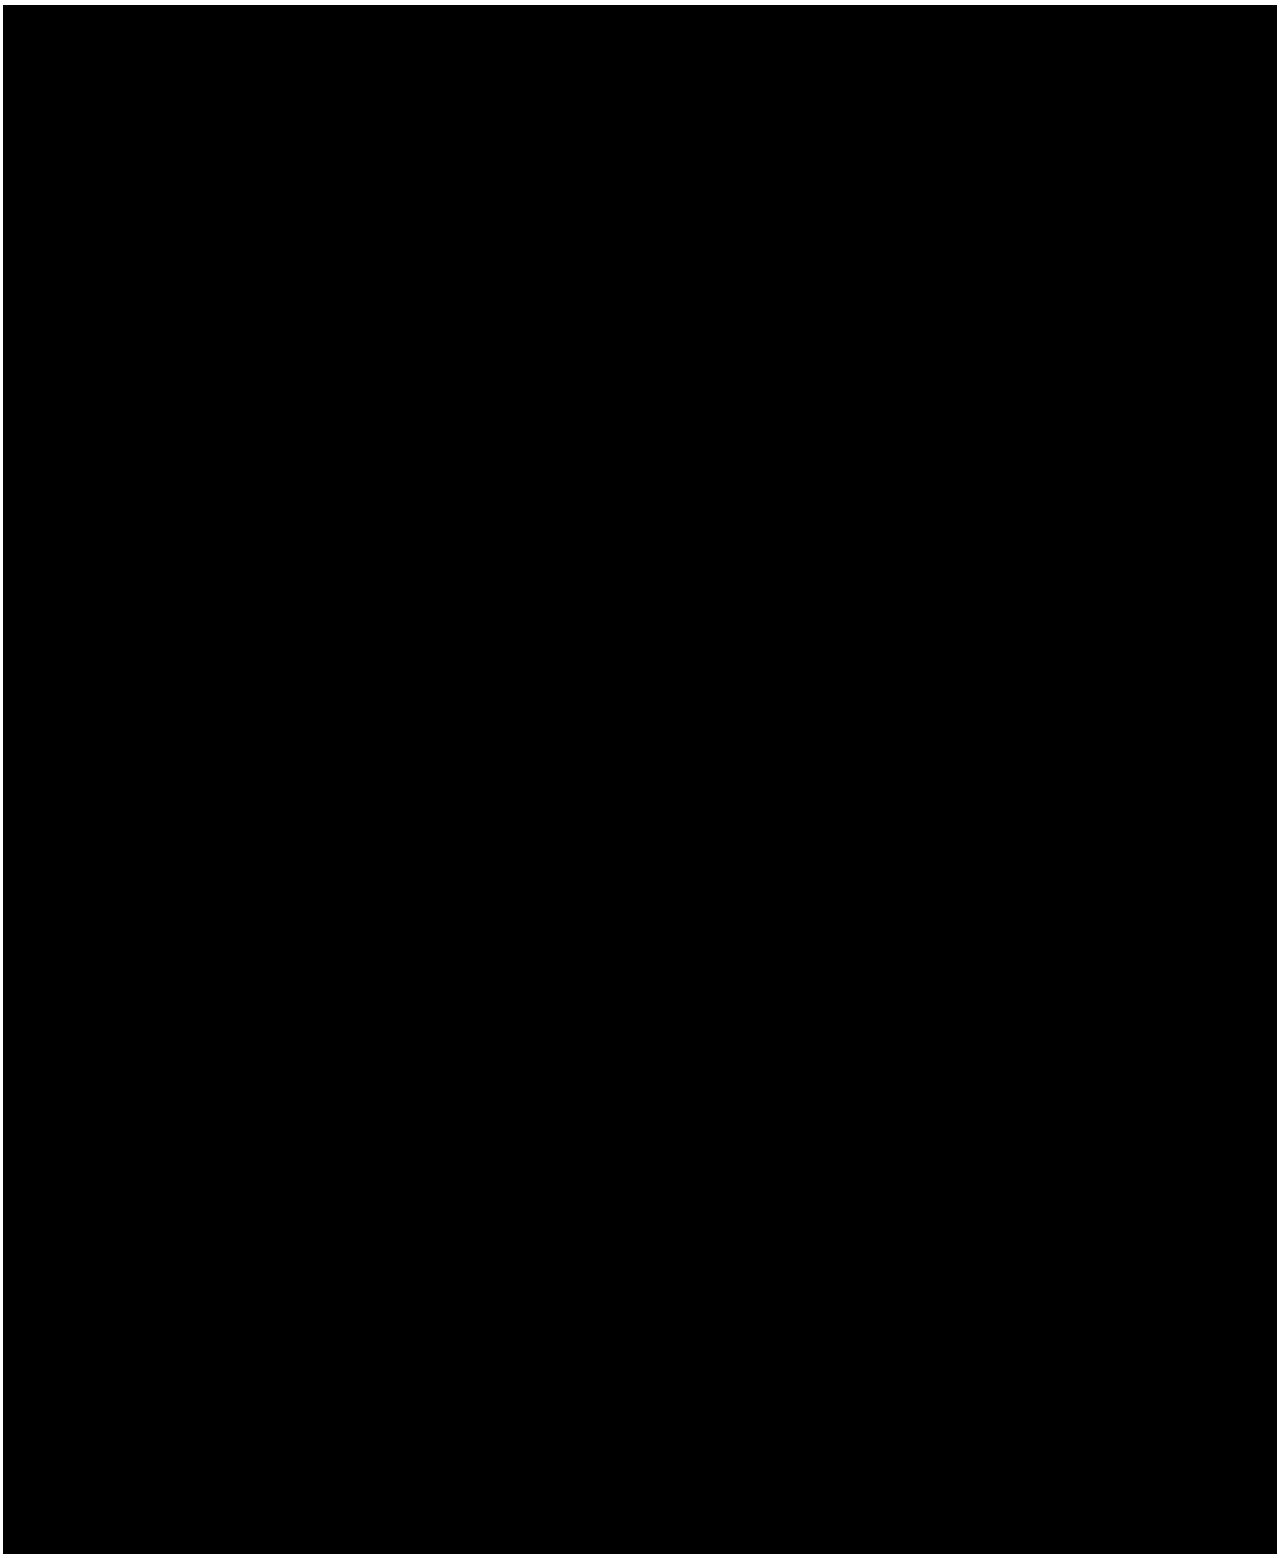
Throughout the COVID-19 pandemic, we have also created solutions to bring telehealth to members, including supporting telehealth delivered by our network providers. We went beyond traditional telehealth services, especially for individuals experiencing BH challenges. Healthy Blue's "lessons learned" from 2020 include:

- Continued evolution of predictive modeling and analytics tools to incorporate improved data sets identified upon member enrollment, such as race and ethnicity identifiers as well as SDOH risk drivers, to improve focused interventions to reduce health disparities
- Realignment of care models to incorporate care coordination extender resources, including CHWs, Community Paramedics, Doulas, Patient Navigators, to meet members where they are and extend the reach of providers and MCOs
- Continued the provision and implementation of digital strategies and solutions to support increased member access to telehealth and telemedicine

## 2.6.4.2 Milestones and Timeframes to Addressing Population Health

As an incumbent with more than nine years of Medicaid experience in Louisiana, and with the support of our two parent organizations, BCBSLA and Anthem, Inc., we are uniquely positioned to continue to build on our existing population health approach to meet the evolving needs of LDH and the communities we serve. To meet our goals, it is critical to develop plans with reasonable targets and establish detailed milestones that mark progress toward targets over time.





[redacted]

## 2.6.4.3 Experience and Approach to Addressing SDOH Needs

Healthy Blue has long recognized that SDOH needs can exacerbate physical or BH. Considering all factors that influence health is a key component of our **Elevate | Population Health** framework. By understanding our members' most important needs and helping to connect them to resources, we can more effectively help them to meet their health goals. SDOH is integrated in all that we do – through our population health approach, provider and community-based partnerships, and QM activities, we have continuously worked to help identify and address these barriers and continue to develop our understanding and strategies to support our communities' needs.

Healthy Blue gathers member-level SDOH information through multiple sources, both on an individual- and community-level, including capturing SDOH through:

- Social Determinant Screeners and health needs assessments
- Z-code submissions, via claims for all members, including new members
- Predictive models, incorporating individual and community-level SDOH data
- Risk stratification tools allow us to pinpoint the SDOH and clinical needs of our members to identify areas of greatest need for population-based interventions through targeted programs

We have an exhaustive "no wrong door" approach to collecting SDOH data, continuously seeking to expand our capacity to identify and capture this information via CHWs, providers, navigators, CBOs, and members [redacted] We continue to capture SDOH issues from provider, member and stakeholder feedback through focus groups, advisory bodies, listening sessions and our Member Advisory Council (Health Education Advisory Committee).

[redacted]

## 2.6.4.4 Coordinating with CBOs and OPH to Improve Population Health

Healthy Blue understands that population health initiatives must be designed, implemented, and executed in conjunction with the communities we serve. We take a local, active, and purposeful approach to investing in health priorities that address community needs and population health risk factors across Louisiana parishes. Our **Elevate | Population Health** approach listens to providers, members, families, CBOs, faith-based organizations (FBOs), OPH, and community partners, and lets their experience guide our work. We gather feedback through committees, workgroups, joint operating committees, and one-on-one interactions. These partnerships provide us with insight on how we can collaborate to address important issues for Louisiana to develop specific responses, such as increasing food security-focused CBOs during the pandemic based on surging needs. For example, based on our long-standing relationship with the YWCA of Baton Rouge as well as specific data on the community, we know there are ongoing needs in pockets of East Baton Rouge, such as in the rural community of Merrydale. To address these needs, Healthy Blue has invested more than $50,000 to the YWCA of Baton Rouge to advance education, income stability, and healthy living for women, children, and families. More recently, we focused our funding on several targeted initiatives to support the workforce and close the poverty gap in East Baton Rouge, including creating a resource group of Certified Childcare Development Assistants, providing tuition assistance and implementing a workforce training program.

## Contracting with CBOs

We take a collaborative approach in working with CBOs across Louisiana, jointly developing Memorandums of Understanding (MOUs) as needed to clarify roles, support, and sharing of information to coordinate population health strategies. We recognize their depth of understanding of members and incorporate their input throughout our organization and the service delivery system. We partner with CBOs that align with our population health goals and meet our communities' needs. Next, we describe two additional successful programs developed to support CBO activities across Louisiana.

[redacted]

[redacted] Administered through an MOU, we provided funding to these CBOs to cover the cost of administering their programs and increase resource bandwidth, with a mutual agreement that these CBOs would provide Healthy Blue with outcomes data so we can understand the impact of our contributions. [redacted]

### PARTNERING TO ADDRESS MEDICATION ADHERENCE

According to the Network for Excellence in Health Innovation, medication non-adherence is a leader driver in high healthcare cost, adding up to $290 billion annually. To that end, Ochsner/LSU Health Shreveport in Monroe and Healthy Blue will work on a collaborative effort to provide prescription delivery services to rural communities in the following parishes: Morehouse, Lincoln, Jackson, Ouachita, Richland, East Carroll, and West Carroll.

LA_HlthyRebid21_2.6.6_MedAdherence_COB_02

## Teaming Up with the Louisiana Public Health Institute to Address Racial Disparities

Louisiana, and especially New Orleans, was hit hard and early by the COVID-19 pandemic. In response to COVID-19's disproportionate effect on the African American community, Governor John Bel Edwards launched the Governor's Health Equity Task Force to better understand and address the inequities causing these disparate and troubling health outcomes. To address health equity concerns statewide, Healthy Blue partnered with LPHI to conduct a virtual Inaugural Louisiana Racial and Health Equity Symposium in March of 2021. This symposium aimed to create momentum among our state leaders and drive forward intentional action to address the health and racial inequities that continue to impact the social well-being and health of our communities. National experts, local community leaders, and health professionals shared insights and information on national and local efforts that are promoting health and racial equity and addressing SDOH; 567 people from 19 states participated in this event.

[redacted]

## Partnering with the Louisiana Office of Public Health

[redacted]

## Creating Bike- and Pedestrian-friendly Communities Through the Stroll into Safety Program

The Stroll into Safety program educates children, caregivers, and community members about the importance of pedestrian and bicyclist skills, the rules of the road, personal safety, and improving health and environmental conditions. This program is designed to bring attention to bike and pedestrian safety issues in the Greater Baton Rouge Area to create safer and more bike- and pedestrian-friendly communities. The program offers classroom presentations, bike rodeos, safety towns, community education events, and bike/pedestrian school events.

## 2.6.5 Health Equity

Healthy Blue shares LDH's goal for every Louisianian to have the opportunity to reach their full health potential, without disadvantage because of social position or other socially determined circumstances. We will address health equity by reducing identified disparities, improving population health, and addressing priority social determinants of health (SDOH). We actively engage our enrollees (members), community-based organizations (CBOs), providers, and other stakeholders in designing, implementing, and evaluating health equity and health disparity initiatives. Further, we embrace the LDH Community Engagement Framework of working to better understand and serve Louisiana's people, populations, and communities, assuring programs are equitably supporting the wellness of all and especially the most vulnerable of this state, and working to provide better quality services and make better use of resources.

Our member-centric **Elevate | Population Health** program facilitates the implementation of data-driven, disparities-focused, and evidence-based health improvement efforts. We use individual and community-level data to proactively identify the health equity issues facing our Healthy Blue members. Equipped with this information, we work with our providers, community partners, and other stakeholders to develop and implement effective interventions to address disparities. The principles of equity, diversity, and inclusion drive our processes, policies, and systems, and we strive in our community work to embody the spirit of "nothing about us, without us."

### 2.6.5.1 Our Management Techniques, Policies, Procedures, and Initiatives

***Health equity is a driving force across our organization*** (see Figure 2.6.5.1-1), influencing everything from staff recruitment and retention to member communications to care coordination.

[redacted]

Our commitment to health equity is evident within our organization and the communities we serve. Earlier this year, ***Healthy Blue established an Office of Health Equity, naming Karen Kosinski, MPH, MSW, Health Equity Administrator***. This new office provides an organizational focus for cross-departmental and community-level collaboration on health equity and will leverage the resources and commitment shared by Healthy Blue's two parent companies. BCBSLA, in conjunction with the Blue Cross Blue Shield Association, has announced a national health equity strategy to confront the nation's crisis in racial health disparities, and Anthem has made a $50 million, 5-year racial equity pledge to directly impact the structural racism and inequities laid bare by COVID-19. In addition, we have established a Healthy Blue ***Population Health Council*** and a ***Health Equity Task Force*** to assure efforts to address the state's most intractable health challenges occur in collaboration with multidisciplinary experts, stakeholders, and members. Our approach to identifying and addressing health disparities is illustrated in Figure 2.6.5.1-2.

We recognize that increasing health equity and eliminating health disparities requires a comprehensive and coordinated effort with MCOs, providers, CBOs, and other partners. [redacted]

One example of our health equity approach at work is our strategy to ***increase colorectal cancer screening rates*** among Healthy Blue members (Figure 2.6.5.1-3). We identified a significant disparity for our members compared to the statewide average, and an even more pronounced disparity for our members in more rural parishes, including Regions 7 and 8.

In conjunction with members, providers, and other stakeholders, we are developing a ***comprehensive Health Equity Plan*** as part of our Population Health Strategic Plan. We will use this same approach and will align with the Louisiana Medicaid Managed Care Quality Strategy and the LDH Health Equity Plan, addressing the cultural, socioeconomic, racial, and regional disparities in healthcare among our members. The Health Equity Plan will also address the digital divide and other infrastructure challenges as well as ongoing challenges faced by populations impacted by disaster and significant subpopulations such as the LGBTQ+ community, tribal communities, and Vietnamese Americans.

## LPHI Partnership to Improve Health Equity

Healthy Blue has also launched more broadly focused initiatives to address health disparities, such as our partnership with the Louisiana Public Health Institute (LPHI). In March 2021, LPHI and Healthy Blue hosted the first annual Symposium on Racial and Health Equity in Louisiana. The theme of the symposium was Achieving Racial Equity, and we brought together leaders from across the state — including

> *This was one of the most realistic and straightforward conferences that I have ever attended. This was a breath of fresh air, and I thank everyone for taking the time to share such a wealth of knowledge.*
>
> **LPHI Symposium Participant**
>
> LA_HlthyRebid21_2.6.5_LPHISym02_68_TST_02

Dr. Kathleen Kennedy, Xavier University College of Pharmacy Professor and Dean, and Dr. Eboni Price-Haywood, Ochsner Xavier Institute for Health Equity and Research Medical Director — to address topics including Systematic Racism and Implicit Bias in Public Health; the Poverty Cycle, Economic Development and Health; and Education, Criminal Justice, and Mental Health. To build upon the enthusiastic response to this symposium, ***we launched a series of Racial Equity Learning Labs to increase understanding of health equity, social justice, and SDOH while building collective community strategies to create equitable practices, policies, and procedures***. Planning for the second symposium (April 2022) is also underway.

## 2.6.5.2 Staffing Strategies to Reflect Medicaid Demographics

Diversity is a key value at Healthy Blue, and we strive to develop a workforce that reflects the demographic characteristics of our members. [redacted]

**Recruitment.** Healthy Blue deploys several strategies to recruit diverse employees. We perform workforce diversity reviews with leadership and Talent Acquisition staff to develop diverse candidate slates and interview teams. We have a recruitment pipeline through Xavier University, one of Louisiana's Historically Black Colleges and Universities, and a new tuition sponsorship for minority students entering medical school at LSUHSC New Orleans.

**Retention.** Through our internal Business Resource Groups, employees of diverse racial and ethnic backgrounds, ability, and sexual identity contribute their perspectives and experiences, strengthening programming, building visibility and inclusiveness, and enhancing employee cohesion. One of our parent companies, Anthem, is ranked by Forbes as one of "America's Best Employers for Diversity."

**Promotion.** Healthy Blue maintains organizational goals for promoting and hiring employees who are female and/or people of color at the director level and above. Promotion of diverse and talented employees is also personified by our health plan's leadership, including Christy Valentine, MD, MBA, CEO; Christine Coleman, CFO; Cheryll Bowers-Stephens, MD, MBA, Behavioral Health (BH) Medical Director; Raymond Poliquit, MD, Chief Medical Officer; Mykayla Jones, Pharmacy Director; and Rhonesia Simmons, MD, MBA, Population Health Administrator.

## 2.6.5.3 Providing Culturally and Linguistically Appropriate Services to Members

Healthy Blue understands the critical role that race, culture and ethnicity play in the health of individuals, and that members are most likely to access care and follow treatment plans when healthcare systems and services are culturally competent and linguistically accessible. To this end, we have developed policies, procedures, and practices that adhere to the National Standards for Culturally and Linguistically Appropriate Services (CLAS) in Health and Health Care. ***In fact, we were the first Medicaid MCO in Louisiana to receive the NCQA Distinction in Multicultural Health Care.*** [redacted] Annually, our Healthy Blue Board of Directors and multiple Quality committees review our CLAS and Health Disparities Evaluation. Going forward, our Health Equity Plan will include these and other elements.

### Assuring Internal Cultural and Linguistic Appropriateness

Healthy Blue provides services to remove culture, language, and ability barriers to healthcare. For individuals contacting us via our Member Services Line, 24/7 Nurse Line, or 24/7 BH Crisis Line, we offer oral interpretation in more than 200 languages. In 2020, we completed 5,430 requests for oral interpreter services to support our members. Members with hearing impairment are provided access to a TTY number. We develop written materials in plain language and in compliance with applicable reading level requirements, and translate these materials upon member request. Documents not translated up-front contain a Language Assistance program notice to assist members in obtaining non-English versions. Members with hearing and/or visual impairments can request materials in alternative formats such as Braille, audio, and large print. We provide instructions to members through our member handbook, member website, and from our Member Services Representatives. We communicate with our members in their stated preferred mode, so they receive information in their desired format.

Some of our methods for providing and monitoring high-quality cultural and linguistic services include:

- Requiring all employees to receive cultural competency training upon hire and at least annually thereafter, in addition to other health equity-focused training discussed in Section 2.6.5.4
- Following our Collateral Materials Approval Process (CMAP) process so that a multidisciplinary team of subject matter experts, regulatory and compliance staff, and legal counsel reviews all materials for accuracy, cultural sensitivity, and compliance with all relevant federal and LDH requirements
- Requiring all interpreters and translators employed by our interpretation and translation vendors, including sign language vendors, to be certified
- Seeking input from our member committees on new member materials, including those tailored to diverse populations

### Assuring Provider Cultural and Linguistic Appropriateness

It is important for providers to have the knowledge, capabilities, resources, and tools to offer equitable and culturally competent care to our increasingly diverse members. We provide cultural competency training during provider orientation and on an ongoing basis in a variety of formats (webinars, resources in the provider portal, and individual and group training). Additional information about provider training in cultural competency is referenced in Section 2.6.5.4.

In addition, we regularly assess the capacity of our provider network to meet the needs of our diverse membership. For instance, through surveying providers regarding language capability, we know our network providers speak a total of 39 different languages, including sign language. We educate our providers on the free oral interpretation services available to members to facilitate their communication. To make certain our members are receiving CLAS from network providers, we investigate, track, and follow up on 100% of provider-related member grievances about language, culture, or potential discrimination.

## 2.6.5.4 Capacity to Develop, Administer, and Monitor Health Equity Training

Healthy Blue promotes an organizational culture of health equity and offers health equity training tailored to its employees, contractors, and network providers. Our training curriculum is informed by member feedback, cognitive science, and our growing understanding of how social, economic, and environmental factors influence health.

### Building a Health Equity Training Program for Employees and Contractors

Through our training program, we build skills and knowledge related to health equity and cultural competency. For instance, all Healthy Blue staff and contractors must participate in the ***Becoming Culturally Competent*** training upon hire and must complete an annual refresher course thereafter. This training addresses topics such as cultural responsiveness, government regulations, language resources, health-related beliefs, health disparities, and variations in social comfort factors. Additionally, we recently engaged Rev. Dr. Starsky Wilson, the President and CEO of the Children's Defense Fund, to create a virtual presentation for our staff called ***Elevating Equity***. This program was designed to create spaces for us to examine race and make sure our staff receive both the skills and tools to elevate race equity. All Healthy Blue staff will be participating in this program. ***All Healthy Blue employee health equity and cultural competency training is tracked for completion via our online learning management system.***

Our member-facing teams receive additional mandatory training regarding providing culturally competent service to Healthy Blue members. Topics include identification of quality of care issues, social drivers and health disparities, LGBTQ+ issues and concerns, mental health (MH), substance use disorder (SUD), trauma-informed care, and adverse childhood experiences. ***Anthem has also created a customized training series on acknowledging and overcoming implicit bias*****.** This multi-week training series includes DECIDE: The Neuroscience of Breaking Bias and The Neuroscience of Bias: Practical Mitigation Strategies for Leaders.

We provide many other employee tools and resources to support an inclusive workplace and the provision of culturally competent services to members. Our Diversity and Inclusion Toolbox is an all-in-one training resource that combines research-based strategies and practical tools to help develop inclusive leadership skills and promote behaviors that are the foundation of an inclusive culture. It features material on mitigating unconscious bias, inclusion of people with disabilities, and religious diversity in the workplace.

### Supporting Providers in Health Equity

Network providers are key allies in promoting health equity. We offer cultural competency and health equity training and resources as part of our provider orientation program, on-demand through our Healthy Blue Training Academy, in monthly newsletters, and through our Provider Manual. Additionally, our parent company, Anthem, has established MyDiversePatients.com. This free resource for our providers offers training and continuing medical education units with the common goal of expanding the way we think about healthcare to make sure more people have the opportunity to make the choices that lead to healthy, longer lives, regardless of their diverse backgrounds. Topics include creating an LGBTQ+-friendly practice, reducing healthcare stereotypes, and promoting birth equity. Healthy Blue promotes the use of this resource and our "Caring for Diverse Populations" toolkit to providers to help support the needs of diverse patients. [redacted]

## 2.6.5.5 Healthy Blue Engages Communities and Providers to Reduce Disparities

Healthy Blue works with community organizations, members, providers, and other key partners on data-driven improvement projects that address disparities in healthcare, social resources, and health equity. This collaboration provides insights for member and provider engagement strategies within our **Elevate | Population Health** program.

### Engaging Community Members and Providers in Addressing Health Disparities

Healthy Blue systematically seeks input from a variety of stakeholders and partners, including populations experiencing disparities, on their most pressing health concerns, and we gather feedback and recommendations on activities and initiatives meant to address these challenges. For instance, our ***Health Education Advisory Committee (HEAC)*** is a forum in which our members provide input on our health policies, initiatives, materials, and activities. We also hold community

listening sessions, focus groups, health summits, and other activities meant to gather input on our services and efforts to improve health disparities. [redacted]

Our ***Provider Advisory Committee (PAC)*** provides an opportunity for Healthy Blue to hear from providers regarding clinical and administrative issues and related practices and policies. It is also a forum for Healthy Blue to gather information and insight from providers regarding community-level factors influencing the health of our members, particularly those experiencing health disparities. In addition, our Provider Experience staff gather input from providers on emerging concerns or issues related to community-level health challenges and disparities.

[redacted]

### Healthy Blue Health Equity Task Force

As part of our overarching **Elevate | Population Health** strategy, we are establishing a Health Equity Task Force, which will take both a data-driven and community-based approach to identifying and addressing Louisiana-specific health disparities. The Task Force will incorporate foundational principles of the Community Engagement Framework and Community-based Participatory Research, making sure that racially, culturally, and situationally diverse members are equitably involved alongside Healthy Blue staff in the planning, implementation and evaluation of equity initiatives. Chaired by Karen Kosinski, our Health Equity Administrator, and comprised of other Healthy Blue employees, providers, and members of the community with diverse backgrounds and cultures, the Task Force will evaluate individual and community needs, cultural influences, experiences, and competencies, to identify and address drivers of health. To place special focus on disparities in maternal and child health, we will be adding a Maternal and Child Health Equity Advisory Group as a subcommittee to the Task Force (see Section 2.6.5.11 for details). This task force's charter is to develop and monitor Healthy Blue's strategic initiatives and approaches to activate practices, protocols, and resources that equitably and effectively support the wellness and well-being of all people, populations, and communities served by LDH consistent with LDH's Health Equity Plan.

## 2.6.5.6 Using Community Health Workers, Peer Support Specialists, and Doulas

Healthy Blue uses trusted lay and peer workers — such as Community Health Workers (CHWs), Peer Support Specialists, and Doulas — to engage members and their families across the state, as described next.

### Engaging Members with Community Health Workers

Healthy Blue uses CHWs and other clinical extenders today, and we are increasing the size of this workforce to broaden our reach. Our CHWs are trained in techniques like motivational interviewing by the Louisiana Community Health Outreach Network, live and work in culturally diverse neighborhoods, engage members in care management programs, and help connect them to health and social resources within their communities.

In addition, these CHWs identify and address communities' most pressing social and health priorities: ethnic and racial disparities, maternal and child health, services for justice-involved individuals of all ages, housing insecurity, domestic violence, employment and education programs, technology access, and food insecurity. The experience of our CHWs in the field informs our population health framework and supports quality Performance Improvement Projects with direct member support. We encourage our community partners throughout Louisiana to hire and train CHWs by providing funding through our parent company, BCBSLA. ***Through these grants, more than 50 CHWs have been trained and hired through community-based non-profit organizations since 2019.***

### Utilizing Peer Support Specialists to Support Member Engagement

Our Peer Support Specialists use personal, lived MH and SUD experience to engage members, connect them with SDOH supports, and connect them to case management. They provide non-clinical, strengths-based support and link members to tools and resources to help them create a roadmap to achieving their goals. Peer Support Specialists also support our members through our HOPE (High Outreach for Patient Engagement) program. Peer Support Specialists work with members and facility providers to coordinate discharge planning, educate, and support members to use healthcare resources and address SDOH. [redacted]

[redacted]

## 2.6.5.7 Engaging Members, CHWs, and CBOs to Improve Access and Reduce Health Disparities

Healthy Blue recognizes the value of engaging members, trusted messengers, and CBOs in health improvement efforts. As mentioned, we use advisory groups, focus groups, and listening sessions to gather input and feedback from members and stakeholders. Other means of engagement include:

- **Member Engagement Through Lay Workers.** [redacted] achieving, and maintaining healthy behaviors, and attaining their health goals. Our lay workers are also a rich source of first-hand information about the strengths, needs, and concerns of our members, including the challenges imposed by lack of transportation, housing instability, childcare, and employment.
- **Community Partnerships with CBOs.** We value our longstanding relationships with many CBOs and continuously look for opportunities to partner with these trusted sources of services and support on our shared goals. Throughout the COVID-19 pandemic, we have partnered with a variety of [redacted] to improve COVID-19 vaccination rates among individuals and families experiencing homelessness. In addition, we have worked with CBOs to offer a range of other COVID-19-related services, including but not limited to COVID-19 testing, crisis counseling and intervention services, virtual programming, and support services for members suffering from isolation, BH services for youth and adults, and distribution of packaged meals.

### Plans for Community Partnerships, Actions, Timelines, and Evaluation Plan

Healthy Blue is expanding community engagement following these action steps, timelines, and evaluation plans:

- [redacted]
- [redacted]

## 2.6.5.8 Collecting and Using RELD Is Integral to Culturally Competent Care

Delivering culturally and linguistically appropriate member services requires a detailed knowledge of our member characteristics related, at a minimum, to race, ethnicity, language, and disability (RELD), and place of residence (geography). Annually, we conduct a population analysis which considers the cultural and socioeconomic characteristics and needs of our membership. This analysis brings together internal and external data that we continuously review to inform our **Elevate | Population Health** strategy and our health equity priorities and to identify baseline measures and set targets so that we can adjust programs as needed to improve care and services.

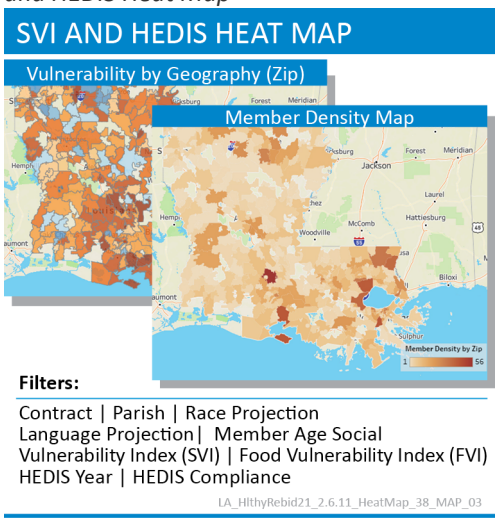
[redacted]

On a population basis, we use RELD and geographic data for various purposes: to inform graphics development (photographic images that mirror members in documents like our member handbook), network development, and language abilities as hiring preferences for bilingual outreach staff in selected geographic areas. To support our providers and members, we use RELD data to offer providers a listing of their assigned members by race, ethnicity, and preferred language to help these providers tailor services to their members' cultural and linguistic needs.

## 2.6.5.9 Putting RELD and Geographic Data to Work in Reducing Disparities

As described in Section 2.6.5.8, we use RELD and geographic data to enhance our ability to provide culturally competent and linguistically accessible services. [redacted]

*Figure 2.6.5.9-1. Geographical Variation in SVI and HEDIS Heat Map*



Healthy Blue has successfully used mapping to identify areas of need and opportunities for community-level interventions to improve health. This capability alerted us to rural disparities in colorectal cancer screening and informed the multi-faceted strategy described in Section 2.6.5.1. This data has also supported our efforts to address maternal and child health disparities in Black women, described in Sections 2.6.5.11 and 2.6.5.13. Similar analyses will guide future interventions and community reinvestment.

## 2.6.5.10 – 2.6.5.10.9 Healthy Blue Identifies and Addresses Inequities

Healthy Blue is committed to actively participating in LDH's efforts to reduce health disparities, address social risk factors, and achieve health equity. Statewide data clearly indicate disparities among Black residents related to birth outcomes such as infant mortality (11.1 deaths per 1,000 births among Black members compared to 5.7 for White members), low birthweight (15.9% low birthweight among all Black member births compared to 7.6% for Whites), and preterm births (16.8% preterm births among all Black member births compared to 11.0% among Whites) (CDC, 2021). For these and other conditions, we generate and analyze information on utilization, clinical indicators, outcome measures, geography (including rural/urban), and related social factors.

## Data Stratification and Analysis

[redacted]

[redacted]

## 2.6.5.11 Improving Pregnancy Outcomes for Black Members and Their Newborns

Black women and children suffer significant disparities relating to pregnancy, postpartum care, and birth outcomes. We are committed to working with LDH, other stakeholders, and members to reverse these longstanding inequities. We understand that this work must address complex and overlapping factors, including access to healthcare, structural racism, and associated social and economic inequities. Figure 2.6.5.11-1 outlines our process to identify and eliminate disparities in maternal health for Black women. We then discuss two key elements in our approach: using data to identify disparities and leveraging community input to address identified disparities.

[redacted]

### Leveraging Data to Identify Inequities and Target Resources

Healthy Blue routinely evaluates clinical utilization and outcome data to identify health disparities by factors such as race, ethnicity, and geography, and we have processes to develop evidence-based approaches to remediate identified disparities and monitor the impact of tailored interventions. For pregnancy, postpartum, and perinatal outcomes, we examine a variety of measures: premature delivery, miscarriage, still birth, low birthweight, gestational

diabetes, late entry into prenatal care, C-section, postpartum contraceptive care, postpartum visit, and infant health and development. Claims, utilization, and outcome data are supplemented by non-clinical data through SDOH review, listening sessions, member and provider satisfaction surveys, and grievances and appeals.

[redacted]

### Garnering Community Input to Effectively Address Inequities

By gathering community input, Healthy Blue creates strategies and action plans that align with community needs, concerns, and strengths, heightening the likelihood of effective intervention in challenging areas such as improving maternal and infant birth outcomes among Black women and children.

[redacted]

To specifically address maternal and child health disparities among Black members, we will be developing an ongoing ***Maternal and Child Health Equity Advisory Group*** that will serve as a subcommittee of our new Health Equity Task Force. The Maternal and Child Health Equity Advisory Group will include affected individuals, such as Black female members of reproductive age, representatives of organizations that serve our Black communities (for example, the Urban League), representatives of related tasks forces and coalitions (for example, the Southwest Louisiana Safe Sleep Task Force), and providers of perinatal care. This forum allows us to listen to and follow our members' and community partners' lead and will provide input regarding all aspects of the initiative's design, including activities, and evaluation methods.

## 2.6.5.12 Using Member and Family Feedback to Improve Services

Healthy Blue uses multiple methods and venues to solicit feedback from members and their families. We conduct listening sessions and focus groups, and we administer surveys and convene groups such as our HEAC and Health Equity Task Force, among other means. In each case, there is a built-in workflow by which member feedback is formally reviewed and acted upon. For instance, during our HEAC meetings we request member input on community engagement strategies, service needs, resource gaps, and potential solutions for addressing barriers to care. We document feedback in meeting minutes and share these with our Quality Management Committee for follow-up. Our goal in seeking member input and feedback is to meaningfully include our members and the communities we serve in the design, planning, and implementation of our services in the spirit of "nothing about us, without us."

### Examples of Leveraging Member Input

**Community Engagement.** Healthy Blue participates in community Back-to-School supply drives. During these events we solicit feedback from participants regarding the usefulness of the information and materials provided during the event. At one event, we received feedback that some of the distributed school supplies did not align with supplies required by schools. We stepped in to identify and secure supplies on school lists and tailored and distributed kits appropriate for elementary, middle, and high school children.

[redacted]

**Collaboration with CBOs.** To make certain that our members are accessing timely, high-quality services from our CBO partners — particularly those partners to whom we make SDOH referrals — we will have our Care Management staff survey a sample of those members who are referred to CBO partners. We will inquire about access to the CBO's services, including linguistic and cultural access, timeliness of receipt of services, and quality of services. This information will be used to enhance the services our members receive from local CBOs.

[redacted]

**Member Satisfaction.** CAHPS® data offers high-level feedback on provider performance, and we augment this data by reviewing member grievances and complaints to confirm we are responsive to members' needs and concerns. We review 100% of member grievances alleging discrimination or culturally inappropriate care and, as indicated, work with providers to address deficiencies, including directing providers to training opportunities.

## 2.6.5.13 Improving Pregnancy and Birth Outcomes for Black Members

Black women and children suffer disparities related to pregnancy and birth outcomes in Louisiana. [redacted]

Healthy Blue is committed to eliminating these and other pregnancy and birth outcome disparities. ***Between 2017 and 2019, we have seen maternal health disparities between Black and White members decrease in the areas of prenatal and postpartum care, initiation of 17-P (medicine to prevent preterm birth), and well-child visits in the first 15 months of life***, and we aim to build upon this progress to fully eliminate the differences. We have selected ***multiple outcome measures*** to track our progress: preterm births, low birthweight, low-risk, first-time mother C-section rate, early elective delivery, prenatal care, postpartum care, and well-child visits.

### Activities to Improve Pregnancy and Birth Outcomes Among Black Members

We present, examples of strategies we intend to employ in addressing disparities experienced by our Black members related to maternal and birth outcomes. A full overview of our strategy is presented in Figure 2.6.5.11-1. Detailed descriptions of project-related goals, objectives, action steps, and timelines will be included in the Health Equity Plan, which will be provided to LDH prior to readiness review.

[redacted]

[redacted]

## 2.6.5.14 – 2.6.5.14.2 Decreasing Disparities in Preventive Care for Youth

Initiating prevention-focused care early in life offers the best opportunity for our members to achieve optimal health and wellness. We track a variety of measures to assure members are off to a good start and will continue to engage members, families, and providers in addressing disparities in selected preventive care services.

### Well-Child Visits and Vaccination Rates for Children and Adolescents

Healthy Blue employs multiple methods to maximize well-child visits and vaccination rates among children and adolescents. [redacted] ***In 2019 and 2020, we launched seven campaigns to target members for well-child and immunization gap closure. For our entire membership, well baby visits improved from the 33rd to the 50th percentile in 2019.*** We will continue to work directly with parents, children, adolescents, and providers in the development of activities, initiatives, and interventions intended to remediate disparities in the receipt of well-child visits and childhood and adolescent immunizations. Specifically, we will be building upon our experience in working with adolescents in developing Total Teen Takeover, an awareness event regarding physical and mental health. This event was planned by teens interested in creating a safe space to talk about suicide. The popular event is now in its fifth year and has the support of the City of Baton Rouge. Our Healthy Blue Behavioral Health Consumer and Family Liaison, Christopher Wallace, will be reaching out to youth advocacy and youth empowerment groups — particularly those well regarded by Black youth — across the state to participate on our HEAC as an initial step in engaging youth in these healthcare issues. Further, via listening sessions and focus groups, we will add the voice and perspective of parents and providers to specific action steps to improve immunization rates and well-child visits among Black youth.

### Preventive Dental Services for Children and Adolescents

We understand the importance of oral health in overall well-being. Nationally, 49.1% of Medicaid members ages 1 — 20 years received preventive dental care. For Louisiana Medicaid, this rate was 49.6% — slightly above the national median (CMS, 2019). As a complement to the carved-out dental benefit for children, Healthy Blue is collaborating with its provider network to promote the use of fluoride varnish for children and adolescents. We will increase our efforts to educate providers about the Smile for Life program, the importance of oral health to overall population health, and the opportunity to be reimbursed for application of fluoride varnish during a routine visit.

To decrease disparities in preventive dental services utilization, Healthy Blue will be working with children, adolescents, parents, and providers to identify the proximate and root causes of identified disparities. As referenced previously, our Healthy Blue BH Consumer and Family Liaison, Christopher Wallace, will be reaching out to youth advocacy and empowerment groups to collect input on increasing the use of dental care among underserved groups and communities. We will also be conducting listening sessions and focus groups with parents and providers to identify their perceived barriers. At the same time, we will continue educating parents and guardians about the benefits of good oral health and how to access dental care through the State's other vendors.

## Supporting Back-to-school Efforts by Donating School Supply Kits

Healthy Blue will donate more than 6,000 school supply kits this summer to youth across the state to support back-to-school efforts and learning. Since 2016, Healthy Blue has donated more than 30,000 school supply kits to local youth in Louisiana.

# 2.6.6

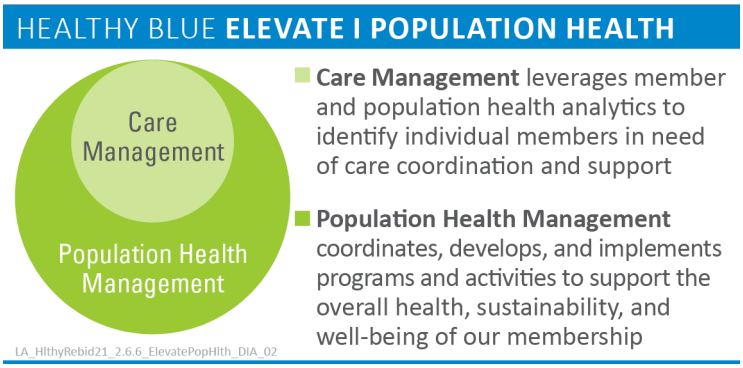
Care Management

Healthy Blue

## 2.6.6 Care Management

Care management is a key component of Healthy Blue's **Elevate | Population Health** model, which supports the needs of all of our enrollees (members) while decreasing health risks and costs. Through **Elevate | Population Health**, we align care coordination, case management programs, and community resources to reduce health disparities and manage member health from end to end through a coordinated system that centers the member with the provider and community. Through our team-based, person-centered approach, we provide care management and culturally responsive supports to all members, helping them more effectively manage health conditions, eliminating duplication of services and ultimately improving health outcomes. ***Our care management program drives our efforts to improve the health of our members, address health equity, and build resilient communities.***

**Integrated, Whole-person Approach.** Our integrated care management approach — implemented in Louisiana in 2015 when behavioral health (BH) services were first carved into Medicaid MCO contracts — centers on the individual needs of our members, their families/caregivers, and the community to improve access and navigation of services. It is evidence-based, incorporating lessons learned from our experience partnering with providers and LDH to address the unmet needs of people suffering from health disparities, including those related to maternal and child health, chronic conditions, physical health (PH) and BH. Our fully integrated Care Management team includes community-based care coordination staff who work in conjunction with licensed clinical staff to assist members with their clinical needs, as well as their social determinants of health (SDOH). We partner with providers and State agencies through robust data-sharing and multidisciplinary care teams (MDT) to support community-based care management and prevent duplication of services. Our integrated approach is supported by Healthy Blue's fully integrated care management system, providing our care management staff ready access to all member utilization data, case management activity, assessment results (health needs assessments [HNAs], comprehensive assessments, SDOH assessments, and home environment assessments), and Plans of Care (POCs) in an organized format. ***This integrated view into our members' clinical and SDOH history is also shared with providers through our care management platform, Health Intech.***



**Continuous Improvement.** We regularly evaluate our care management program structure, processes, and resources as part of **Elevate | Population Health**. At least annually, we perform a detailed analysis of the covered member populations or subpopulations to identify characteristics or needs where care coordination could be instrumental in assisting members. Improvements are implemented throughout the year to accommodate identified needs that are not met by existing programs or urgent clinical trends. This process includes adjustments to outreach mechanisms, member education, and enhancements to care management. Throughout our more than nine years serving Louisiana Medicaid, our approach has continued to evolve as factors impacting the health and wellness of individuals and their communities are vast and constantly changing, as evidenced by the recent COVID-19 pandemic. We have continued to adapt our approach, from enhancing predictive models and building new tools to identify emerging risks, including COVID-19, to pivoting member outreach efforts with a focus on improving statewide vaccination rates through improved access and education, [redacted]

[redacted]

**Meeting Care Management Requirements.** As an incumbent MCO serving the Healthy Louisiana program, Healthy Blue has a longstanding compliant care management program. We have reviewed and will meet all requirements contained in Model Contract, Section 2.7.

From initial enrollment, we use State-provided member data, results from HNAs, and predictive modeling to initially identify members who may benefit from care management. ***We take a "no wrong door" approach to accepting referrals from members, providers, and a wide range of internal and external sources.*** Using data, we stratify members into tiered risk levels for outreach and engagement according to their service needs, including care coordination, transitional case management, case management, and complex case management. Upon

engagement, a dedicated Case Manager works side-by-side in coordination with the MDT to help members navigate the complicated care delivery system when they are most in need of services, improving care coordination through an individualized, integrated POC.

### 2.6.6.1 Process for Successfully Completing HNAs Within Required Timeframes

The HNA serves as the voice of the member and helps us identify which members may benefit from care management programs and interventions. We are driven to make sure ***ALL*** members receive this essential screening, to support prompt identification of members with complex or Special Health Care Needs (SHCNs) into care management tiers for additional outreach. ***Every member will receive a minimum of nine outreach attempts to support completing the HNA, with attempts at various times of the day and week using various formats.***

We recognize the cultural diversity of our population and provide culturally and linguistically sensitive support to members who need assistance completing HNAs due to language barriers, literacy level, or hearing or visual challenges. We offer language supports to members in multiple formats, including written materials in Spanish and translation to a member's primary language. We arrange no-cost oral interpretation services for members and caregivers through trained interpreters competent in more than 200 languages. We provide individual assistance to members with difficulty reading through our Outreach Care Specialists, who will conduct the HNA over the phone. For members who are blind or have vision challenges, the HNA is available in large print, and braille and auditory translations are provided as needed. For members who are deaf or hard of hearing, we communicate via Telecommunications Relay Services (TDD/TTY services and 7-1-1) and use our website chat function. We also arrange in-person American Sign Language interpretation as needed.

We offer convenient options to complete HNAs, including multiple formats, incentives, and outreach efforts that maximize every member interaction to support completion within 90 calendar days of the member's enrollment date. All HNAs are conducted with the consent of the member or guardian/caregiver, and we comply with Model Contract, Sections 2.7.2.4 and 3.1.15 regarding HNAs and comprehensive screenings. Because members have diverse needs and preferences, we employ various methods of outreach:

- Existing modes to complete HNAs via mail, welcome calls, Healthy Blue Case Manager interactions, and Healthy Blue's secure member web portal
- [redacted]
- In-person outreach conducted by Healthy Blue or provider partners to assist members in completing HNAs in the community

**Existing Modes for Completing HNAs.** We engage members and encourage them to complete their HNA upon initial enrollment in Healthy Blue. Each member or caregiver receives a printed copy of the HNA in a welcome packet within a week of enrollment. Our trained, culturally competent welcome call center staff make at least three attempts to contact members telephonically to welcome them to Healthy Blue and assist them with completing the HNA. Members can also access the HNA "on demand" via our secure member portal and via a link in member written materials. Healthy Blue team members can also email members a link to the HNA based on their preference.

[redacted]

**In-person Outreach.** We use a variety of personnel in the community to assist members with completing HNAs. Outreach Care Specialists, members of our Care Management team, are available to meet with members where they are, including homes and hospitals in Louisiana, to help them complete the HNA. Other members of our Care Management team also engage members across the state, including our Community Health Workers (CHWs),

Housing Specialist, Permanent Supportive Housing Liaison, Quality and Outreach Care Specialists, Grievance/Appeals Representatives, Employment Specialist, Case Managers, and Peer Support Specialists. These individuals leverage every interaction with members to encourage and support HNA completion. All Healthy Blue team members who interact with members are trained to identify members' unmet SDOH needs, such as housing, food, transportation, and interpersonal safety, and route each member to a Case Manager for further assessment of chronic or specific conditions and development of an individualized POC. They are also trained to identify indicators of tobacco use and problem gaming, in accordance with the Model Contract.

**Continuous Improvement.** As a key component of our care management approach, we will regularly evaluate and refine our HNA process to monitor completion rates by modality, member cohorts (age, race, ethnicity), and geography to continue to improve HNA completion rates.

### Storing and Sharing HNA Data

All completed HNAs are stored in Healthy Blue Health Intech, our secure bidirectional and integrated care management system. Through this, we share and communicate with providers and members of the MDT, including the member's PCP, about assessments, care plans, and similar member health milestones.

### Ongoing Assessment of Member Needs

We continually assess member needs through our analytics and predictive models, but value the HNA, understanding it is the best means to identify what is most important to the member now. In addition to conducting the HNA upon enrollment with Healthy Blue, HNAs may also be conducted any time a member experiences a transition or has contact with Member Services Representatives, 24/7 Nurse Line Nurses, or 24/7 BH Crisis Line staff, has serial emergency encounters, is hospitalized, or when pharmacy use indicates that needs are not being adequately addressed. A member can also use our secure member portal to update their HNA at any time; updates may trigger a new member risk score and lead to additional care management outreach to assist the member.

## 2.6.6.2 Identifying Individuals Who Can Potentially Benefit from Case Management

We continually identify members who may benefit from care management, including care coordination and case management, beginning with enrollment data and supplemented with information from our proactive, comprehensive tools, including:

- HNAs and assessments, including comprehensive assessments, SDOH assessments, and home environment assessments
- Predictive modeling and analytics
- Referral sources that take a "No Wrong Door" approach

### HNAs and Additional Assessments

HNAs help us to discern which members may benefit from care coordination or case management programs and interventions by identifying each member's medical, behavioral, or social needs. We also use HNA results to identify members who qualify with SHCNs or who are pregnant. Additional assessments conducted by our Care Management team can help identify any ongoing special conditions members have that may require case management, interventions, or monitoring. Through assessments, Healthy Blue Case Managers learn about the member's needs in detail. Case Managers note any cognitive or physical limitations, evaluate risk behaviors, and assess psychosocial and environmental needs to develop a person-centered POC and interventions.

### Predictive Modeling: Proven and Innovative Predictive Analytics

**Data Sources That Inform Our Predictive Modeling.** Healthy Blue HI supports the integration and transformation of data from multiple sources into actionable data used for predictive analytics. We leverage data from internal and external sources consisting of population cohorts, demographics, pharmacy and lab data, behavioral or physical factors, and environmental or social factors. Examples include:

- **Internal Sources.** Utilization (claims, encounter, and authorization data), demographic factors, and diagnostic information; HNAs; comprehensive assessments, including SDOH, caregiver and condition specific; and diagnostic information.
- **External Sources.** Louisiana Medicaid Benefit enrollment (834) files; real-time admit, discharge, transfer (ADT) data; immunization registries; and Department of Justice (DOJ) files for justice-involved members.

Predictive analytics support early identification of members through predictive modeling. Using the data described previously, we identify vulnerable populations and emerging trends, including combining race, ethnicity, and cultural information to address issues of disparity and health equity.

[redacted]

Next, we include more detail about three of the tools identified previously.

[redacted]

**Elli™ Data Analysis.** In early 2019, Healthy Blue was among the first Medicaid MCOs in Louisiana to implement Elli, a population analytics platform that incorporates Louisiana-specific encounter data. Elli reports hospital and provider information, and historical utilization information; and maps socioeconomic data to clinical data to support a 360° view of our members. The platform provides actionable data on our newest members, which allows us to act quickly to support new, high-risk members who have immediate care and service needs.

[redacted]

## Referral Sources for a "No Wrong Door" Way to Identify Need for Intervention

Access to care management is not limited to data analysis and stratification. Our proactive approach guarantees access to case management through a broad range of referral sources, including:

- **Self-referrals.** Members, as well as their families/caregivers, can refer themselves for case management by contacting the Member Services Line or working with any Healthy Blue team member to seek help with services or clinical concerns. Members can also self-refer by contacting the dedicated Case Management Louisiana email inbox. This information is available on the member portal and member handbook.
- **Member Interactions with Healthy Blue Outreach Personnel.** All Healthy Blue staff who interact with members are trained to recognize the need for referral. CHWs, Peer Support Specialists, Outreach Care Specialists, Quality Specialists, Grievance/Appeals Representatives, 24-hour Nurse Line Nurses, and 24-hour BH Crisis line staff are examples of the types of employees who work in the communities frequently that help

refer members for case management assessment. Our Tribal Liaison also works directly with tribes to support coordination with case management.

- **Network Providers.** Network providers are educated on how to refer members to Healthy Blue case management. Provider Experience Consultants engage directly with providers to educate on how and when to refer members, including a secure email inbox, a fax form located on the provider portal, or a one-touch referral function in the secure provider portal Availity, which is integrated with Health Intech.
- **Discharge Planning Staff.** Healthy Blue Care Management staff coordinating discharge planning have real-time access to EPIC and can use this to proactively refer members for case management. Referrals are also received during integrated rounds while members are still in acute settings so there is no delay in discharge.
- **Permanent Supportive Housing (PSH) Providers.** PSH providers are educated to refer any members in PSH services who may benefit from case management, especially when the need is related to maintaining stable housing.
- **State Staff.** We receive referrals from State personnel, such as from the Office of Behavioral Health, Office for Citizens with Developmental Disabilities, and Department of Children and Family Services. Each State agency or program has its own dedicated point of contact at Healthy Blue, streamlining case management referrals.
- **Community-based Organizations (CBOs).** Organizations that serve a wide range of member needs and populations work with our Community Engagement team to refer members to case management, such as newly pregnant or homeless members.
- **School System Employees.** We work with our Department of Education Liaison and schools in Northwestern Louisiana, Baton Rouge, and New Orleans to identify youth who may benefit from case management.

## 2.6.6.3 Engaging Enrollees Who May Potentially Benefit from Case Management

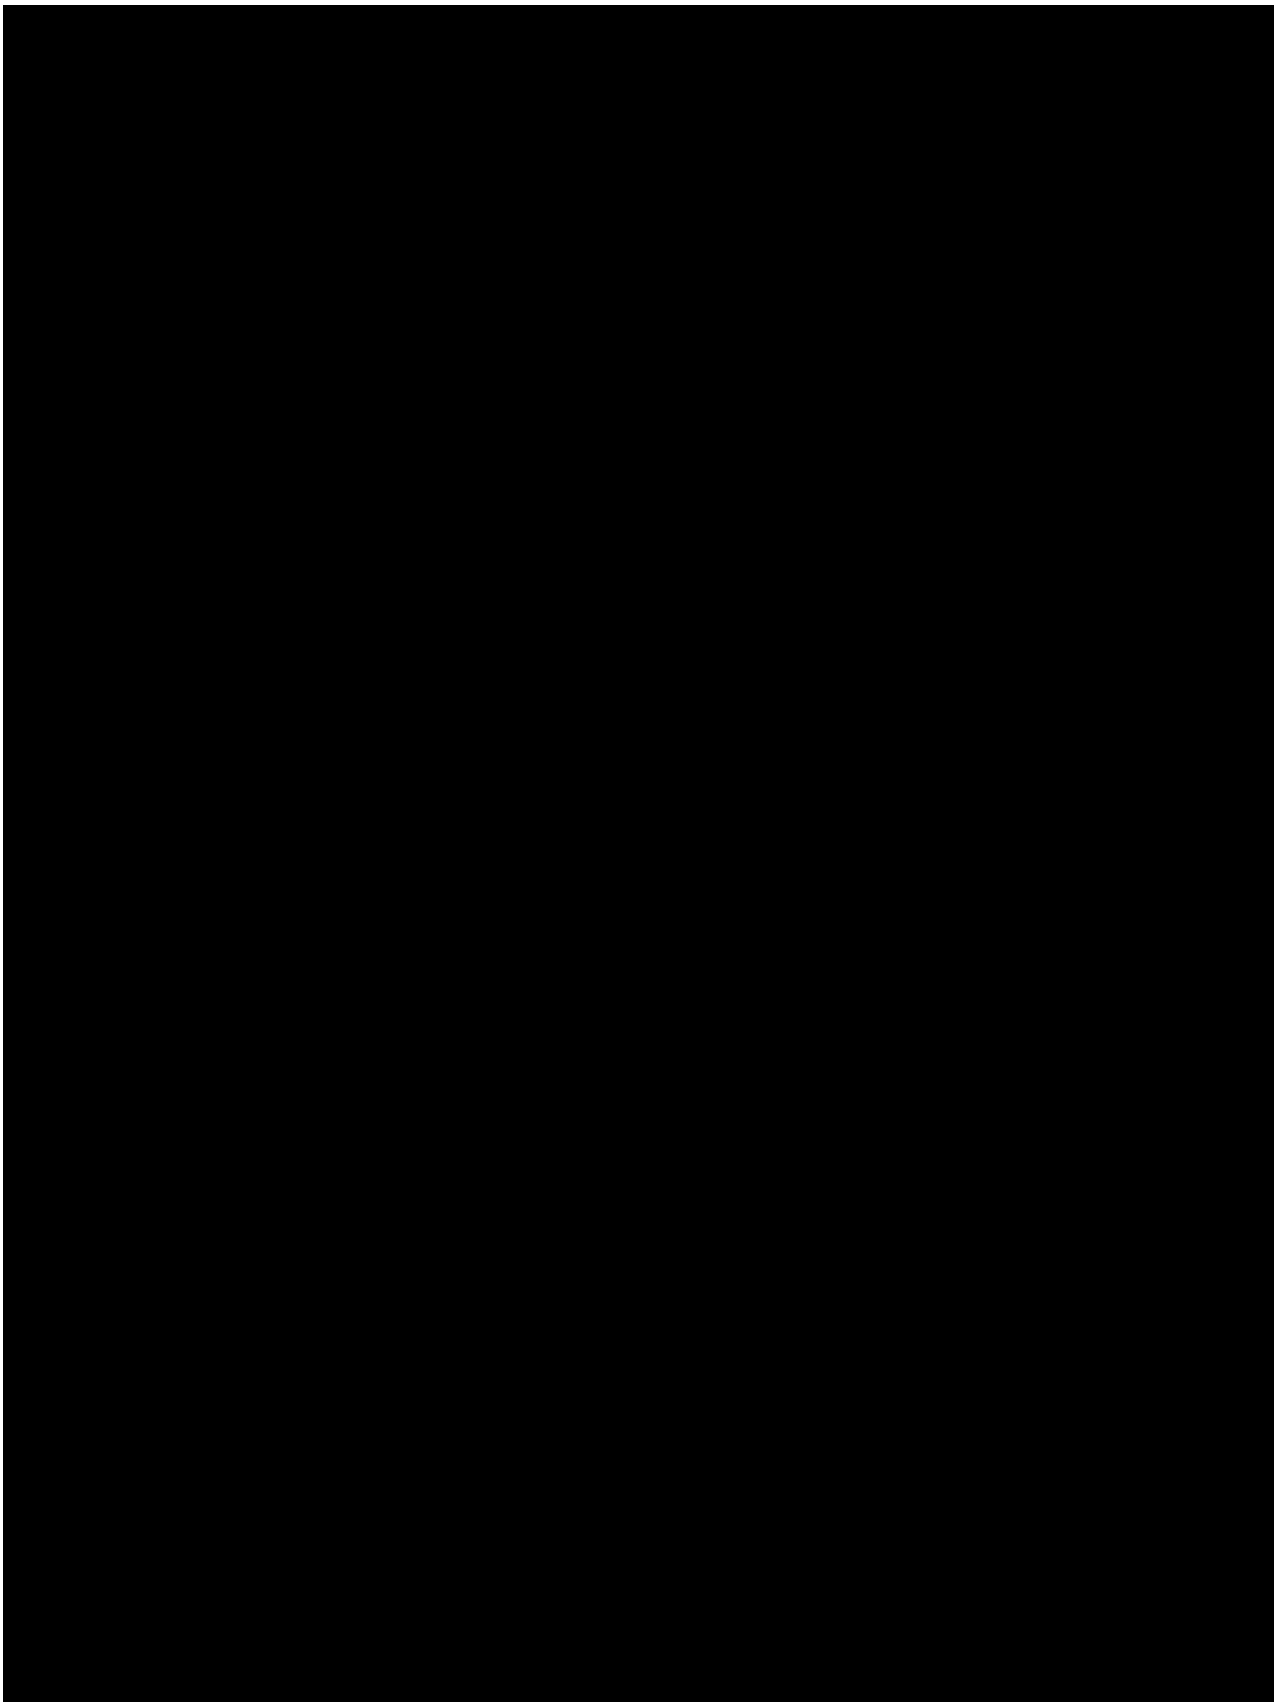
Our outreach and engagement strategies meet members where they are in their health journey, connecting them to benefits, services, and resources that will best meet their individual needs and goals, paying close attention to any health disparities or inequities that need to be overcome. To improve engagement, our whole-person care management approach accounts for member physical, behavioral, and social needs, while recognizing and addressing their cultural differences. We learn all members' preferred method of communication and note it for all outreach. Healthy Blue team members are trained to explore cultural preferences throughout engagement activities to incorporate member feedback and their understanding of their conditions throughout engagement, communication, and care planning activities.

**Engagement Is Aligned with Member Need.** We align our outreach and engagement strategy to each member's case management tier (see Figure 2.6.6.3-1). We transition from a "lighter touch" to more intense outreach depending on level of need. **Elevate | Population Health** addresses the needs of our members from a population perspective, aligning our programs, outreach methods, interventions, and staff based on member circumstance, service needs, and tier level. Our MDT, consisting of Medical Directors, BH Medical Directors, Nurses, Licensed Mental Health Professionals, Outreach Care Specialists, CHWs, Peer Support Specialists, Housing Specialist, PSH Liaison, Pharmacy Specialists, and support members in all tiered risk levels and in transition. Once the member is engaged, these staff members coordinate and work with the member's providers, Home and Community Based Services, and State staff to make sure a comprehensive person-centered POC is created and implemented.

We use ***multiple modes of outreach (telephonic, provider-led, community partner-led, outbound calls, digital, at a facility, in shelters, at community events, in the home) to customize our engagement strategies for each population***. We maintain a strong community presence at places like homeless shelters, faith-based settings, schools, community organizations, Women, Infants, and Children (WIC) locations, and via the Ryan White Foundation. This increases community visibility for Healthy Blue to engage with our members, but for us to provide hesitant members, or members unsure of how to access the healthcare system, easy access to active engagement. ***Members can reach out to us for engagement at any time and in any way through our 24/7 Nurse Line. All Care Management staff provide their cell phone numbers to members at every contact.***

[redacted]

Table 2.6.6.3-1 includes special considerations and engagement based on our experience working in Louisiana. The table is not limited to these considerations as we constantly evaluate and assess how to best meet member needs, tailoring them or building new engagement strategies as necessary.



## 2.6.6.4 Identifying the Appropriate Tier of Case Management for Enrollees Using Objective Measures and Criteria, Support Provided, and Individual Plan of Care

Effective risk stratification is key to **Elevate | Population Health** and care management. We use stratification to determine the intensity for member outreach, align appropriate care management resources, and prioritize interventions based on the member's unique needs. As part of an organization with more than 30 years of Medicaid experience using data for risk stratification, we use a suite of analytical tools to support early identification of members. This helps us effectively allocate resources to meet the individual member needs. We continuously screen members for the presence of new risk factors, mining data monthly through Health Intech to identify and prioritize members for outreach. We also share this information with providers. Figure 2.6.6.4-1 displays the multiple factors we consider to identify the appropriate tier of case management.

*Figure 2.6.6.4-1. Objective Measures and Criteria to Identify the Appropriate Tier of Case Management*

## Tier Identification Through Objective Measures and Criteria

Our person-centered program recognizes member risk levels are influenced by a wide array of factors, including diagnosis, treatment history, family and other supports, and unmet social needs. Our stratification process blends rigorous and well-honed predictive modeling tools with a thorough analysis of diverse sets of demographics; claims data; ADT and electronic health record (EHR) data; data available from screenings and assessments; and information shared by members, providers, external care managers, and others providing member services and support.

[redacted]

**Valuing Clinical Team Judgment.** While risk stratification helps to predict a member's needs, we understand it does not replace the clinical judgment of trained and licensed clinicians. We deploy a whole-person approach that recognizes each member's risk is affected by more than a diagnosis. We consider acuity level, self-management skills, healthcare system navigation skills, natural supports (personal relationships such as family, caregivers, and close friends), unmet social needs, geographic location, and more to identify the appropriate level of support needed. Clinicians, including Case Managers, may change a member's stratification level based on additional information received during the HNA, or from assessments, information sources, and data analytics, as well as from discussion with our Medical Directors and Healthy Blue Integrated Rounds. ***Using the results from risk stratification and following LDH level of service criteria, augmented by the clinical judgment of our licensed Case Managers, we place members in Tiers 1, 2, or 3 and further prioritize needs within those levels of service.***

[redacted]

**Ongoing Risk Stratification.** In recognition that risk scores are dynamic and changes in a member's condition or risks can increase or lower their risk score, Healthy Blue produces updated risk scores each month. With this updated score, we alert Case Managers to any changes that may trigger outreach to the member or a reassessment. As members' individualized needs change, our integrated case management processes adapt to the level of support they need, including face-to-face interaction for anyone needing in-person assistance.

## Types of Support Tailored According to Member Need per Tier

All members are provided with tools and supports in accordance with their needs. Each member receives:

- Care coordination and assistance in navigating the healthcare system
- Proactive educational campaigns and resources on available benefits, including VABs
- Disease-specific education and self-management support tools
- Health promotion events and materials and referrals to community resources
- Support from a CHW, Navigator, or Peer Support Specialist with member consent

For members identified for care management, we may reduce or substitute the frequency and/or method of contact upon request of the member or member's representative. Table 2.6.6.4-1 reflects the objective measures and criteria, types of support, and care planning provided for each tier.

*Table 2.6.6.4-1. Matching Members to the Appropriate Level of Support*

| Objective Measure and Criteria | Types of Supports | Care Planning |
|---|---|---|
| **High-risk Tier** | | |
| **High utilizer members with two or more unplanned inpatient admissions or ED visits in the last six months**<br><br>**Members with physical, BH, or SDOH needs at risk for readmission, inpatient admission, unnecessary ED visits, or institutionalization**<br><br>**CI[3] Grouping of 4, including members with SHCN, SPMI, catastrophic illness, and high-risk OB and NICU** | ▪ High-touch, integrated coordination delivering individualized care approaches to prevent exacerbation of conditions or complications<br>▪ Coordination of services, including SDOH to address individual needs<br>▪ Engagement upon identification<br>▪ Face-to-face or telephonic (based on member preference) support from a Case Manager and CHW, Outreach Care Specialist, Peer Support Specialist, or licensed addiction counselor, as needed<br>▪ Remote monitoring, telehealth, VABs, and member incentives | ▪ Plan of care completed within 30 calendar days<br>▪ Home assessment and SDOH prioritized<br>▪ MDT meetings occur at least monthly, in person<br>▪ Monthly updates to POC and formal in-person reassessment quarterly |
| **Medium-risk Tier** | | |
| **Defined emerging risk profiles, medium STORK score. Members at risk for readmission and ED utilization, with identified gaps in care**<br><br>**Members who have had an unplanned inpatient admission or inappropriate ED visit within the last six months**<br><br>**CI[3] Grouping of 3, including members with SHCN, BH, physical health, OB and NICU, and DOJ** | ▪ Coordination of services, including SDOH to address individual needs to improve chronic condition management and promote health<br>▪ Engagement upon identification<br>▪ Face-to-face or telephonic (based on member preference) support from a Case Manager and CHW, Outreach Care Specialist, Peer Support Specialist, or licensed addiction counselor, as needed | ▪ POC completed in person within 30 calendar days<br>▪ Home assessment and SDOH prioritized<br>▪ MDT meetings to occur at least monthly in member's preferred setting<br>▪ Quarterly updates to POC or upon change in member condition or upon request from member or MDT<br>▪ Monthly updates to POC<br>▪ Formal in-person reassessment quarterly |
| **Low-risk Tier** | | |
| **Healthy low-risk populations, adults and children, preconception women**<br><br>**Members with well-controlled complex or comorbid conditions, who would benefit from short term care coordination or interventions**<br><br>**CI[3] Grouping of 2, including members with: SCHN, HIV, Hepatitis C, PASRR, PDN, PDHC, PCS, Emerging Risk, BCBSLA Blue Models, Concierge Care** | ▪ Wellness and prevention services focused on care coordination managing SDOH, self-directed care and achieving optimal health through education and training in healthy living<br>▪ Engagement upon identification<br>▪ Face-to-face or telephonic (based on member preference) support from a Case Manager and CHW, Outreach Care Specialist, Peer Support Specialist, or licensed addiction counselor, as needed | ▪ POC completed in person within 90 calendar days then quarterly thereafter or more as required base on member needs and preferences<br>▪ Home assessment and SDOH prioritized<br>▪ Annual plan of care updates<br>▪ In-person reassessment annually<br>▪ Digital engagement via member app/text /IVR/email<br>▪ Educational content for specific member conditions |
| **Transitional Tier** | | |
| **Members transitioning between institutional and community settings, including: inpatient hospitals, nursing facilities, PRTFs, TGHs, Intermediate Care Facility for Individuals with Intellectual Disabilities** | ▪ Coordination of services, including SDOH to address individual needs to improve chronic condition management and promote health<br>▪ Engagement upon identification | ▪ Engagement prior to discharge including transition POC development<br>▪ Coordination across MDT to assure communication between the discharging facility and member's |

| Objective Measure and Criteria | Types of Supports | Care Planning |
|---|---|---|
| **(ICF/IIDs), residential SUD, incarceration, and PSH** | ▪ Face-to-face and telephonic outreach and engagement by UM and Case Manager<br>▪ Support from Housing Specialist and/or PSH Liaison for members identified as homeless or with housing instability at time of transition<br>▪ CSoC screening<br>▪ Face-to-face or telephonic (based on member preference) support from a Case Manager and CHW, Outreach Care Specialist, Peer Support Specialist, or licensed addiction counselor, as needed | PCP and BH providers regarding treatment plan and transition POC<br>▪ Make sure aftercare services are in place within 30 days prior to discharge from PRTF, TGH, or ICF/IID<br>▪ Follow-up within five business days post-discharge |

## Developing a Person-centered Individualized Plan of Care

After the member has agreed to participate in case management, our Case Manager coordinates with the member and their support system to identify a date and time to complete the comprehensive assessment and create the member's POC. Our POC development process is person-centered, supporting the member and providers involved in the member's care to establish goals and interventions to achieve short and long-term goals. Our integrated Care Management team supports members through assessment and care planning, supporting their cultural and linguistic needs, and assuring their involvement as well as their MDT throughout the processes.

**Integrated Care Management Team.** Our Louisiana-based Care Management team has local knowledge of the providers and systems of care available to coordinate our response to members' needs. We have seen firsthand the impact that low health literacy, lack of access, and unmet social needs have on our members' health and ability to engage the services and supports that promote optimal health. Our approach addresses members' needs for acute care, inpatient, outpatient, and BH and social support services in a seamlessly integrated infrastructure. Our clinical staff work hand-in-hand and communicate frequently every day to discuss member care. Our licensed, board-certified Medical Directors conduct twice-weekly integrated rounds with UM and Case Managers to develop and implement solutions and interventions using evidence-based approaches to address the comprehensive PH, BH, and social support needs of each member enrolled in care management.

**Comprehensive Assessment and Care Planning.** Our comprehensive assessment tool has hierarchy and branching logic that probes more than 20 potential clinical areas for risk factors and includes specialized, evidence-based assessment modules for specific conditions and populations. Using this tool, the Case Manager will review the member's PH and BH history, diagnoses, unmet social and ongoing clinical needs (including dental), current or past substance use, medications, and formal/informal caregiver supports. We use assessment tools appropriate for adults and children, BH concerns, and specific conditions. Through a comprehensive assessment, the Case Manager learns about the member's needs in detail. Case Managers note any cognitive or physical limitations, evaluate risk behaviors, and assess psychosocial and environmental needs to develop a person-centered POC at the required tier of service.

Our Case Managers encourage each member to participate in planning for community integration and self-advocacy. The POC clearly outlines the member's relevant history, health status, support system, and wellness goals, and communicates the role each person, provider or service plays in helping the individual achieve those goals, along with personal details such as crisis plans to facilitate a focused, individualized response at any level of care. It identifies all members of the interdisciplinary team and their contact information. It notes the times and dates for face-to-face visits with the member. It describes clearly how barriers will be addressed and when. The POC is organized around evidence-based clinical practice guidelines, which the Case Manager supports by confirming that the member is keeping appointments, completing appropriate screenings or lab work, and engaging in self-care activities as outlined in the plan.

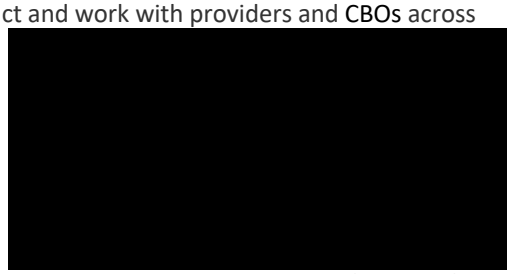
The assessment and POC will be completed within 30 days for members stratified to Tier 2 and Tier 3, and 90 days for those stratified to Tier 1. We also obtain treatment plans from providers to assure all member needs are addressed. Upon completion of the POC, the member and their representative can request a printed copy or view an electronic copy via the secure member portal. Providers can access the POC via the provider portal.

**Multidisciplinary Care Team (MDT).** The member's Case Manager, providers, specialists, pharmacy, CHWs, caregivers, family members, and State support staff are included as part of the member's MDT for coordination.

Feedback and external treatment plans are incorporated into the member's POC to assure care coordination and prevent duplication of services.

## 2.6.6.5 Coordinating with Providers and State Staff That May Provide Case Management Support to Enrollees and Not Duplicating Services

Healthy Blue has a proven history of close coordination with multiple Louisiana State agencies. In addition to working closely with LDH and the Office of Public Health, we also regularly coordinate with personnel from the Office of Aging and Adult Services, Office for Citizens with Developmental Disabilities, Office of Behavioral Health, Louisiana's CSoC, the Department of Children and Family Services, Department of Education, Department of Health, and Office of Juvenile Justice. On the provider side, we contract and work with providers and CBOs across Louisiana who serve as provider partners or who take on the role of provider-led case management.



We based our processes for coordinating with providers and State staff on feedback and lessons learned through our more than nine years of participation in Louisiana Medicaid. We designed our processes ***to assure continuity of care, regardless of whether services are provided through managed care, fee-for-service, other LDH contractors, or community and social support providers.***

To coordinate across the continuum of care, as part of the case management process, our Case Managers decrease the potential for duplication of services and fragmentation of care by:

- Identifying services a member is currently receiving, the providers who deliver the services, and any State staff who may be providing case management support for our members.
- Contacting providers and State staff (support staff with justice-involved member, DOJ, and coordinators who work with Waiver and Chisolm class) to coordinate assessments and become active participants in the member's MDT.
- Incorporating State or provider-created care and treatment plans into our information management systems.
- Providing multiple resources for State staff and providers to communicate with our case management team, including a secure, dedicated email inbox, a one-touch referral function in the provider portal that feeds to case management team, and a dedicated phone line to the care management team that is available to providers and members. Each agency also has the contact information of a single point of contact within Healthy Blue assigned to coordinate efforts with that agency or program.

### Coordinating Case Management with State Staff

We value the relationships we have built working with State agencies and programs to serve Louisiana members. We adapt our process for coordinating case management with State staff based on each agency or program's needs and preferences. At a minimum, our process includes:

- **Point of Contact.** Within Healthy Blue, we provide a dedicated point of contact for each agency or program we work with to facilitate smooth collaboration and planning efforts.
- **Agency-specific Coordination Procedures.** Our dedicated point of contact for each agency or program works with State staff to establish procedures for coordinating case management. As part of this process, we develop workflows, coordinate on referrals, and detail communications preferences and frequency.
- **Initial Outreach.** When a member is identified as receiving case coordination from the State, and with permission from the member, our Case Manager initiates contact with State coordinators or appropriate staff based on the established coordination procedures. We discuss next steps, coordinate efforts for the member's MDT meetings, share existing care plans (with member permission for sensitive diagnoses), and collaborate on care planning.
- **Ongoing Collaboration.** We coordinate efforts with State staff from initial identification of State case management through care planning, provision of integrated, whole-person services, and follow-up. With member permission, we share assessments and care plans with our State partners. If a State POC exists, we incorporate it into our own POC. We invite personnel from the agency or program to participate in MDT meetings, where all providers and participants in a member's care share updates and information regarding the member's goals and progress. We include State staff and all members of the MDT in post-discharge planning to further assure continuity of care and coordination of services.

### Coordinating Case Management with Providers

One of our Care Management team's key functions is to facilitate information sharing. We act as a bridge between participants in a member's MDT, getting input from all providers involved in a member's care, and incorporating each provider's treatment plan into the member's plan of care. We share existing plans, risk assessments, and data. If we identify risks or potential risks to a member's health or safety, we notify and engage providers in a

timely basis. Our team coordinates efforts for the member's MDT meetings and collaborates on care planning, including status of service outcomes and coordinating any discharge planning activities.

**Coordination with Providers via Health Intech.** Our care management system connects the entire community of preferred support, helping to minimize duplication of services while facilitating communication, collaboration, and information sharing among providers. For members in case management, our Case Managers encourage providers to share relevant test results and records among the member's care team, reducing test and procedure replication. With member permission, Case Managers share test results with the care team. Providers can upload test results, assessments, and care plans that integrate into Health Intech via the secure provider portal (Availity) for shared care planning and prevention of duplicate services. They can view test results and services provided by other providers and reach out to discuss service history and questions.

## Our IT Platform and Communication Strategies Reduce Duplication of Services

Because our focus is on sharing actionable information and insights with partners, we have a robust and flexible infrastructure and suite of capabilities to transfer, analyze, and visualize data compliant with all applicable privacy laws and regulations and safeguarded through business associate agreements. We have accessible data for providers and community partners, including advanced dashboards and customized reporting capabilities to use in population health goal setting and measurements. We have all clinical and social data and file transfer capabilities, such as Health Level 7 (HL7) transactions and SFTP, and actively participate in secure data exchange.

Case Managers have access to members' utilization history and, through Health Intech, can view upcoming procedures providers have entered in the EHR. Data-sharing agreements similarly allow our Care Management team to access hospital electronic medical records and confirm providers have obtained test results from hospitalizations. Our prior authorization process, aligned with practice guidelines and evidence-based practices, checks previous utilization to avoid duplication of services. If a Case Manager sees an upcoming procedure that was already performed, they will alert the appropriate providers.

## 2.6.6.6 Establishing a Delegated Case Management Program

We are committed to supporting provider-led case management, recognizing that members are more comfortable engaging with trusted providers to oversee their care and service needs. Provider-led case management goes hand-in-hand with VBP and our population health framework and is a natural next step in the evolution of person-centered care coordination. Healthy Blue has experience in the design and implementation of transformational VBP initiatives in conjunction with our provider partners. Our affiliates effectively delegate case management in other Medicaid markets and across other product lines, including Medicare.

**Delegated Case Management Program.** Healthy Blue will build upon the national experience of our affiliates to design, implement, support, monitor, and report on provider-led case management programs. We will establish programmatic criteria that align with LDH's goal to reimburse case management services in settings where members already access care and avoid duplication of MCO case management. Our delegated case management program will include:

- **Regulatory Compliance and Program Alignment.** We will require that all case management delegation activities conform to NCQA, State, and federal requirements. We will also require provider-led case management to align with Healthy Blue's care management program, including use of objective criteria to stratify members into appropriate tiers as identified in the Model Contract.
- **Eligibility Criteria for Members.** Our program criteria will clarify when a member is eligible for delegated case management rather than Healthy Blue case management, primarily based upon member attribution and engagement with the delegated provider.
- **Minimum Provider Qualifications.** We select qualified providers to lead case management across our affiliate Medicaid plans and lines of business. We will leverage this experience to establish provider qualifications for each tier of case management services for our Louisiana members and use the approach described next to identify qualified providers for our program.

- **Reimbursement.** We will negotiate provider reimbursement for conducting initial assessments and developing the member's plan of care that is conducive to the member's tier of case management. [redacted] risk, and balancing quality targets with LDH Contract requirements.
- **Oversight and Monitoring.** Our oversight and monitoring of provider qualifications and operations will begin prior to formal delegation of case management and take place on an ongoing basis. At any time that we delegate case management, we will have a written plan in place for monitoring and oversight of performance, including provisions for assessing provider compliance, corrective actions we take when a provider is not compliant, and guidelines for when termination may be appropriate.

## Identifying Providers for Delegation

To identify qualified providers (physicians, advanced practice registered nurses, and physician assistants) for purposes of delegating and making payment for case management services, we will:

- Build on the strengths and successes of our existing relationships with PCPs, OB-GYNs, and BH providers, working with those providers who have demonstrated success meeting VBP program performance metrics
- Consult with our Network Management and Clinical team members, program specialists, and the Quality Management team to identify potential providers equipped to lead case management
- Use data, analytics, and information gathered from our experience with providers in Louisiana to identify potential providers for participation

## Selecting Qualified Providers

We set clear expectations for our subcontractors through our Delegation Oversight Management program and established policies and procedures. Prior to formal delegation of case management, Healthy Blue will conduct a pre-delegation audit to verify each provider's qualifications and ability to deliver case management services for each tier of case management in compliance with LDH, federal, and NCQA requirements. Specifically, we will work with providers to make sure they have established policies, procedures, systems, staff, program description, effectiveness measurement (satisfaction survey), and experience in annual and ongoing evaluation processes, including capture and analysis of member feedback and grievances. The provider must also be able to transfer information to Healthy Blue, accept referrals from Healthy Blue, and track required case management activities. Delegation will include a requirement to access Healthy Blue's Health Intech care management system via the secure provider portal to make sure case management activities are completed in accordance with the Model Contract and respective tiered risk levels.

If the provider is prepared to meet contractual requirements related to all case management activities as described in the Model Contract and NCQA case management delegation standards, we will:

- Conduct a formal file audit
- Assess and document how the provider will meet each LDH case management requirement
- Evaluate qualifications of staff who will conduct case management activities
- Document provider agreement to follow case management standards and timeframes in a formal delegation agreement
- Complete formal pre-delegation audits and submit these and draft delegation contracts to LDH for approval

**Monitoring and Oversight of Providers.** Throughout delegation, we will perform regular audits to verify continued compliance with LDH Contract requirements. At a minimum, oversight will be maintained through monthly, quarterly, and annual reports, file reviews, meetings, and audits of all activities delegated to the provider. These audits, conducted by subject matter experts, follow a standard quarterly schedule, but can be initiated more often as needed. Auditors use auditing tools that include mechanisms for LDH reporting and for ongoing review of data.

## Next Steps: Pathway to Provider-led Case Management

We believe the most effective pathway to establishing a provider-led case management model compliant with LDH Contract and respective reporting requirements will initially include a Healthy Blue trained Case Manager co-managed by a provider and Healthy Blue, located in the provider's office. This Case Manager would access and use ***Health Intech*** for all case management activities, including HNAs, assessments, care planning, and monitoring to support and assure compliance with LDH reporting and oversight activities. Our Medicaid health plan affiliates in other markets have achieved success with similar models, connecting provider-led care coordination staff to Health Intech while successfully meeting State and accreditation requirements.

## Sponsoring Total Teen Takeover to Give Teen Voices a Platform

Healthy Blue sponsors Total Teen Takeover, a celebration for the graduates of an eight-week mentoring and workforce development program for young people. Through the program, youth can connect with mentors, explore potential careers, earn industry-recognized certifications, and reinvest in their community through service learning projects. Total Teen Takeover, now in its sixth year, provides a platform to teens to discuss topics important to them, ranging from depression and bullying to mentoring and workforce development. The teens involved are part of an advisory board to help Healthy Blue and our community partners select dynamic and engaging speakers for the event.

## 2.6.7 Case Scenarios – Meeting the Individualized Needs of All Members

Our approach to meeting the needs of Louisianians is grounded in our population health model. **Elevate | Population Health** is our holistic approach to improving health outcomes and increasing health equity for all members, especially those with high risk, such as the members in the Case Scenarios. Weaving together powerful data analytics, local provider and stakeholder engagement and collaboration, cross-system coordination, and member-tailored interventions, **Elevate | Population Health** guides our approach to innovation to make sure everything we do supports our members and communities to improve health outcomes. By engaging providers and community organizations as partners in care, we build on the strengths of each other, improving the health of Louisiana's communities, while also meeting each member's unique needs to make sure that ***no member is left behind***.

## 2.6.7.1 Ensuring the Member's Access to Care and Improving His Health

### JOHN – FIVE-YEAR-OLD BOY AND HIS CAREGIVER

We recognize the priority of supporting the caregiver in engaging John in the follow-up care and services he needs to address his multiple medical conditions and behavioral problems, including obesity, excessive sleepiness, enuresis, compulsive eating behaviors, and behavioral problems at school. Case Manager, Emma, supports the family's needs by working with John's PCP and helping his caregiver access available specialty services and programs, including CSoC.

LA_HlthyRebid21_2.6.7.1_John_COB_11_03

Healthy Blue understands the unique needs of John and children like him across the state. Our goal is to be a positive influence in John's life by improving his health, addressing his family's social needs, and giving him the best opportunity to do well in school. Our case management program assures at-risk members like John have access to the services they need, including appropriate MCO Covered Services, services not on the fee-schedule, and the resources designed to support them throughout their care with Healthy Blue. Upon identification, our case management processes support John and his caregiver in accessing the right providers, at the right time, and in the right location to meet his immediate, short-, and long-term needs. This includes education about the Coordinated System of Care (CSoC) program and a referral to CSoC if John's caregiver is interested. Further, we will arrange for and assure access to specialists in the family's area (psychiatrist, neurologist, otolaryngologist, and nutritionist) and his caregiver's access to the services, supports, and resources needed to meet the family's immediate, short-, and long-term goals. This includes transportation, after-hours and weekend appointments, and health literacy support to promote the caregiver's understanding of John's needs, and other social determinants of health (SDOH) identified during our SDOH assessment.

## 2.6.7.1.1 Comprehensive Systems that Support John's Identification

Healthy Blue has a comprehensive process in place, including integrated data systems, provider notifications, and community contacts, to identify John as high risk, which triggers a notification to our Case Management team. Our data system includes Healthy Blue's Health Intech platform that provides a holistic view of the member's healthcare and is accessible to our staff as well as providers through our secure portal, enabling a "***no wrong door***" approach for referrals from internal staff, providers, and State entities.

We also identify members by received clinical for authorization requests, direct member/caregiver referrals, and community sources, such as John's school. The multiple systems and processes to identify John provides detailed information for our case management team to understand that he is experiencing ongoing medical and behavioral health (BH) issues and requires immediate outreach, including:

- **Data Vehicles for Identification.** To identify John, we use reporting and monitoring processes that trigger a notification to our Case Management team. Our predictive modeling process that identifies John as having emerging or high-risk needs based on his diagnoses or underutilization of EPSDT and preventive services; and his diagnoses of excessive sleepiness, enuresis, and compulsive eating behaviors included on the PCP's claims. This information is captured in Healthy Blue's Special Health Care Needs report.
- **Healthy Blue Staff for Identification.** This may include a variety of staff with opportunities to identify John, such as Member Services Representatives who conduct new member welcome calls and may receive concerning information from his parent/caregiver; staff who complete the health needs assessment (HNA) with members; Utilization Management staff who, upon review of the PCP's authorization request for a sleep study, identify his age as concerning and reach out to the PCP for more information — which may trigger additional screening, such as for adverse childhood experiences (ACEs) or the PHQ-9 for depression; Provider Experience Consultants who meet face-to-face with providers regularly in the community, as well as virtually during the COVID-19 pandemic,

### IMMEDIATE RESPONSE – WITHIN 48 HOURS

- Pediatric Case Manager, Emma, reaches out to John's caregiver to conduct the health needs assessment over the phone
- Emma communicates with John's PCP to follow up on any new recommendations for care based on the most recent well-child visit
- Emma discusses the CSoC program with John's caregivers to access wraparound services

LA_HlthyRebid21_2.6.7.1_48Hours_11_COB_03

which includes gathering information on members who have missed appointments and do not participate in recommended services; and co-located staff, such as our Integrated Collaborative Care Model (ICCM).

- **Network Providers.** Providers, including but not limited to those who participate in our Value-Based Payment (VBP) programs, are educated on how to refer members with similar conditions as John's to Healthy Blue's case management. Providers in certain VBP arrangements have enhanced reporting requirements, which would identify the member in a timely manner. [redacted]

  Education and other child serving agencies. Additionally, ***Healthy Blue serves as a preferred health plan for Department of Child and Family Services (DCFS) referrals and works with the Department of Education (DOE) and local school districts, including Northwestern Louisiana, Baton Rouge, and New Orleans, to identify youth as Healthy Blue members and contact us for support and case management.***

Upon identifying John, he is referred to our case management team within 48 hours for assignment of a Louisiana-licensed Pediatric Case Manager, Emma, who has expertise in BH conditions along with experience in motivational interviewing, trauma-informed care, and ACEs. Emma also receives consultative support from a Pediatric Registered Nurse (RN) Case Manager who understands the management of chronic conditions in children. The integrated team will reach out to his caregiver to engage, conduct a screening and assessment, and help develop a Plan of Care (POC) that identifies and addresses John's holistic needs, services and providers, gaps in care, and the SDOH-related services and resources necessary to improve his overall access to care. If his caregivers chooses to participate in the CSoC program, our Care Management team would coordinate services not provided by the CSoC Waiver.

## 2.6.7.1.2 Ensuring Coverage for All Medicaid-coverable, Medically Necessary, and Non-covered Services for John's Holistic Care

***Our process for making sure John and his caregivers have what they need starts and ends with him.*** Once John is identified, we put him and his caregiver at the center of our assessment and care planning processes. Healthy Blue assures John accesses the services and supports he needs regardless of Medicaid benefits. Our Medical Directors' decisions are based on medical necessity, SDOH needs, and recommendations from John's providers. Upon review of EPSDT requirements, benefits, and coverage, we authorize and reimburse provider-requested services. This includes working with out-of-network (OON) providers through single case agreements (SCAs) and accessing community-based resources, as well as Healthy Blue's value-added benefits (VABs) and in lieu of services (ILOS) to assure a holistic response to John's needs. The family is regularly attending appointments with John's PCP, so Emma supports and encourages this relationship while also exploring, through conversations with the family, what barriers may exist to receiving care from other medical professionals.

[redacted]

### Engaging the Member and Caregiver

Emma uses empathetic techniques to begin developing a relationship with the family, such as reflective listening and demonstrating an understanding of their circumstances. During the call, Emma first verifies John's and his caregiver's well-being and then shares information on the role of a Case Manager. She explains the benefits, services, and supports available to address John's and his caregiver's need and supports John's caregiver in completing the HNA to identify any changes in his needs and any urgent or emergent needs requiring intervention. Emma works with John's caregiver to schedule an in-person meeting at their preferred location and time to complete a person-centered assessment and POC. If unable to reach John's caregiver initially, Emma will continue to reach out for a minimum of 90 days. This includes reaching out telephonically on different days and at different times, as well as texting, emailing, and mailing requests, depending on the amount of contact information we have for John. Emma also contacts his identified providers to obtain additional contact information and engages a Community Health Worker (CHW) or ICCM Navigator, as appropriate, to go to John's last known address or to increase our telephonic outreach and written notifications that encourage response from the caregiver depending upon the COVID-19 protocol outlined by the State.

### Completing the Person-centered Assessment and Individualized Plan of Care

Emma, with telephonic/audio visual RN support, meets with John and his caregiver at the time and location that is best for the family to complete a holistic, person-centered assessment, which includes supporting them in sharing information about their PH, BH, and SDOH needs. During the assessment, Emma encourages John and his caregiver to share information about their strengths, short- and long-term goals, preferences, and what services they have

participated in and how those have worked for them. Understanding the importance of the PCP relationship, Emma discusses John's PCP and identifies the drivers behind continual attendance, such as the PCP's approach, appointment availability, or location. This conversation may result in identifying SDOH needs or the provider's attributes that keep them coming back and how we can replicate what is important to them.

Recognizing several of John's symptoms may be interconnected, they discuss why the PCP has made certain recommendations for additional services, including neurology, otolaryngology, and pediatric psychiatry services. Together they identify the barriers the caregiver has encountered in taking John to scheduled appointments, such as transportation, scheduling conflicts, or distance from the family home. They also discuss the impact of COVID-19 on his participation in care and the family's well-being, such as experiencing isolation, depression, and poor eating.

Led by the John's caregiver, Emma incorporates the family's needs, goals, strengths, preferences, and selection of providers and resources to meet their needs into John's individualized POC. They discuss John's PCP and Emma makes sure his caregiver is aware of the provider's after-hours and weekend availability and how Emma can help them develop positive relationships with the specialty providers John needs. This may include Emma attending appointments with the family or engaging a CHW to further support the caregiver and assist in locating additional community resources. They also talk about the availability of telehealth services for John's medical and pediatric psychiatric services.

**SHORT-TERM NEEDS – WITHIN 14 DAYS**

- Led by John's caregiver, Emma assesses John's and his caregiver's needs and completes a holistic, integrated plan of care
- Emma assists John's caregiver with scheduling follow-up specialist appointments and calling to arrange Non-Emergency Medical Transportation if needed
- Emma discusses the CSoC waiver program with John's caregiver and will warm transfer for screening and assessment to access wraparound services
- Emma refers John's caregiver to community supports such as Families Helping Families for additional support and information

LA_HlthyRebid21_2.6.7.1_14Days_11_COB_04

Meeting the family where they are, Emma in collaboration with the Pediatric RN, supports the caregiver in understanding common causes of obesity, such as diet and exercise, but is also clear that John's weight can also be impacted by family, psychological, and socioeconomic factors, and in rare cases a physical condition related to childhood syndromes. Emma reinforces that it is important to first rule out any immediate medical and safety issues, such as high blood pressure, high cholesterol, and diabetes, while simultaneously addressing any BH needs that may be contributing to his obesity. Emma also talks with the caregiver about the benefits of engaging a nutritionist who can help the family learn healthy eating habits and how to plan healthy meals.

Emma using motivational interviewing techniques develops an open non- judgmental relationship with John's caregiver and his family. She continually assesses readiness for change while understanding and addressing the barriers that prevent John and his family from accessing care. At any point that Emma suspects child abuse or neglect in accordance with Healthy Blue's Policy as a mandated reporter she would report to child protection while maintaining her trusted relationship. Of course through Healthy Blues DCFS Liaison, Emma would work with DCFS to assist with other supports such as the Supplemental Nutrition Assistance Program (SNAP) and Family Independence Temporary Assistance Program. Regardless of the level of involvement of DCFS, Emma will be there to support John and his family in getting the care that they need to reach John and the family's full health potential.

To start, Emma helps the caregiver schedule a follow-up appointment with John's pediatrician for a physical exam and blood work to determine his current risk, potential medication needs, and revisit any follow-up recommendations for specialists, such as a neurologist and otolaryngologist. Due to COVID-19, Emma talks to the PCP about facilitating a call to the caregiver's selected specialists from his office, during which the PCP can share John's history and health status. Emma arranges for transportation if needed and offers to attend appointments.

***While addressing John's physical issues, the Case Management team knows the importance of simultaneously addressing his BH and social needs.*** Emma helps the caregiver understand his symptoms, such as enuresis and aggressiveness at school, may also be related to BH needs. They talk about his childhood experiences, including childbirth complications, any previous diagnoses and participation in services, and family history. If the caregiver indicates John may have experienced trauma, Emma makes sure the selection of his providers includes those trained in trauma-informed care and asks the PCP to complete an ACEs screening. Emma discusses the CSoC Waiver program to determine whether the caregiver is interested, and if so is prepared to do a warm transfer to Magellan (as Louisiana's CSoC provider) for screening and assessment to gain access to these wraparound services. The warm handoff means Emma will teleconference in a Magellan contact while John's caregiver is on the line, so that the screening and eligibility process is seamless.

Emma may also work with the caregiver to obtain a qualified healthcare professional (Pediatric Neurologist, Developmental Pediatrician, Pediatric Psychiatrist) to complete a Comprehensive Diagnostic Evaluation that will determine if John would benefit from specialized BH services to address his eating, sleep routines, and aggression, such as a referral to Applied Behavior Analysis services, Parent Child Interaction Therapy (PCIT) or other evidence-based practices, such as the Triple P – Positive Parenting Program. Emma also helps the caregiver identify and share concerns about John's conditions and care. If the caregiver is feeling overwhelmed by John's current behaviors, navigating the healthcare system, or fear for his future needs, they will talk about the types of services available, including individual therapy, support groups, respite for John's caregiver through organizations such as Families Helping Families or Family Voices, engaging a CHW for system navigation, and online resources, such as Parent to Parent USA.

John's behavioral treatment includes the provider working with him and his caregiver to develop a behavior plan that addresses self-management, coping skills, and techniques to use in his daily life, as well as working with the caregiver to learn or improve skills to manage John's behavior. Emma assures that John's behavior plan is incorporated into his POC, as well as shared with the school for incorporation into his daily routine or individual education plan, if appropriate. They also talk about pediatric psychiatric services to evaluate potential recommendations based on his behaviors. If Emma is unable to locate an in-network provider in John's area who has specialized expertise and training aligned with his needs, such as a pediatric psychiatrist, we will assure the services are accessed through OON providers (through an SCA) or via telehealth services due to COVID-19. Emma assists the caregiver in scheduling appointments and arranges transportation as needed.

If Emma identifies any SDOH needs during the assessment, she discusses with the caregiver community-based resources and incentives that encourage participation, They also talk about the role of our usings, and food programs, including applying for SNAP and

As part of John's POC, Emma works with the provider to develop a crisis plan that supports the caregiver in addressing any escalating behaviors in the home. The crisis plan includes when and how the caregiver should reach out for support, such as his behavioral provider, family members, or Healthy Blue's 24/7 BH Crisis Line. Emma also works with the our integrated multidisciplinary care management team to review the family's needs in case rounds to identify and address barriers to care and resources based on John's age and history of PH and BH conditions; inconsistent participation in needed specialty care; assessment results that identify PH, BH, and SDOH needs; and current health status, including an increase in his weight and falling asleep during his appointment. Emma also works with the caregiver to develop a multidisciplinary care team (MDT) that comprises John and his caregiver, Emma, the PCP and other specialists, and natural supports, such as family, friends, and teachers. The MDT is also supported by our integrated case management team, including Medical Directors, our Pediatric Psychologist who

specializes in BH for children up to age five, PH and BH clinicians, and Liaisons, such as DCFS, DOE, and Office for Citizens with Developmental Disabilities (OCDD), which may include consideration for an OCDD Statement of approval level of care evaluation for the Children's Choice Waiver, if appropriate.

## 2.6.7.1.3 Assisting John's Caregiver with Referral Adherence

As described in Table 2.6.7.1.3-1, Emma recognizes there may be several reasons the caregiver does not make sure John participates in services recommended by the PCP and works to identify solutions with the caregiver.

*Table 2.6.7.1.3-1. Assisting John's Caregiver with Referral Adherence*

| Potential Adherence Needs Mitigation Strategies |
|---|
| **Gap in Health Literacy That Prevents Full Understanding of John's Conditions and Needs** |
| ▪ Attending appointments with the family to assure the caregiver understands providers' recommendations for John's participation in care, such as the importance of attending follow-up appointments<br>▪ Connecting the caregiver and John to community-based organizations (CBOs), such as Families Helping Families and the Louisiana Council's Advocacy Network for additional support and information<br>▪ Providing the caregiver with information on John's conditions, such as through brochures in the caregiver's preferred language and format and through Healthy Blue's member portal |
| **Distrust in or Feeling Overwhelmed by the Healthcare System** |
| ▪ Using an empathic listening and interviewing style to elicit information about reasons and experiences for mistrust or feeling overwhelmed, validating feelings when possible, and identifying solutions going forward<br>▪ Encouraging the caregiver to allow a family member, friend, or Emma to participate in appointments<br>▪ Working with providers (PCP, pediatric psychiatrist) to arrange telehealth appointments<br>▪ Reaching out to the caregiver following appointments to answer any questions and identify recommendations |
| **SDOH That Create Barriers to Attending Appointments** |
| ▪ Addressing SDOH that may create stress and anxiety that prevent the caregiver from engaging, which may include engaging with our CHW or Navigator for assistance in applying for public benefits, such as SSI, SNAP, and the Housing Choice Voucher program and locating additional resources and support<br>▪ Scheduling appointments on a day and at a time that is convenient for the family, including after-hours and weekends, and arranging transportation to and from all appointments |
| **Lack of Providers That Meet Cultural, Language, and Insurance Needs** |
| ▪ Working with Healthy Blue's Provider Services department to assure all network providers that meet the family's needs and preferences are identified to provide family choice<br>▪ Arranging for translation or interpretation services during appointments, if needed<br>▪ Executing SCAs with OON providers that meet the family's needs and preferences |

Emma identifies opportunities to support and encourage the caregiver to follow up with and participate in John's recommended treatment. This includes:

- Following up with the caregiver and providers (PCP, pediatric psychiatrist, and specialists) after scheduled appointments to verify attendance and participation, as well as identify any additional recommendations for John's care
- Scheduling routine MDT meetings, led by the caregiver with support from Emma, at least monthly or more often based on John's needs, which includes inviting the family's natural supports, CBOs, and treating providers to participate, address needs, and update the POC
- Developing a contact plan, based on the caregiver's preferences, which includes in-person contact at the location and time of the caregiver's choice at least monthly, as well as frequent telephonic contact based on the family's needs. During these contacts, Emma reviews John's POC, behavior plan, and crisis plan with the caregiver to assess the effectiveness of his services and supports and capture additional needs and services in his POC

Emma monitors John's participation in services by following up with the caregiver, PCP, and specialists, as well as monitoring provider and pharmacy claims data, prior authorization requests, and appointments. Emma recognizes that John's needs will fluctuate as he engages in care and reviews his well-being monthly to assure progress; address any new, unmet, or undiagnosed needs; and make any adjustments to his POC.

**LONG-TERM NEEDS – BEYOND 30 DAYS**

- Upon request and with consent, Emma supports the family by attending appointments
- Emma follows up with the family and John's PCP to monitor on-going progress and determine if additional specialists are needed

LA_HlthyRebid21_2.6.7.1_30Days_11_COB_02

## 2.6.7.2 Promoting Member Health and Well-being Through a Local Approach

### JAMES – 14-YEAR-OLD BOY AND HIS FAMILY

As a DCFS preferred health plan, Healthy Blue supports James and his family in addressing his needs through our person-centered **Elevate | Population Health** approach, which includes local population health analysis to identify and prioritize health priorities and disparities and overcome access challenges in his community. Our Case Manager, Shawna, who is a licensed mental health professional, supported by our integrated Case Management team, including Medical Directors and PH and BH clinicians, has experience in Bunkie and will meet James and his family where they are with early and proactive identification of their needs and goals, removing barriers, and connecting them to the providers and services they need.

LA_HlthyRebid21_2.6.7.2_James-Scenario_11_COB_02

Healthy Blue is sensitive to the challenges that youth with co-occurring neurocognitive difficulties and behavioral health conditions and their families face. Our goal is to maintain these youth in the most integrated setting possible with the supports and services that are tailored to the child and family's individual needs. We have worked to enhance our provider network and care management teams to be equipped to support members and their families with these challenges through systemic collaboration with child serving agencies (OYD and DCFS), the Office of Citizens with Developmental Disabilities, the Office of Behavioral Health, and the Department of Education through individualized multidisciplinary care team (MDT) meetings and wraparound services through the Coordinated System of Care (CSoC). James and his family have had involvement of the law enforcement due to comorbid conditions such as moderate neurocognitive issues ADHD, PTSD, oppositional defiant disorder, and mood dysregulation disorder and episodic aggression at school. Our goal, with consent from family, would be to connect this member to wraparound services and have the member evaluated with a Child and Adolescent psychiatrist, Developmental Pediatrician, or Child Psychologist who has experience with youth that have co-occurring neurocognitive issues and behavioral health (BH) conditions for diagnostic clarification and completion of a CDE for consideration of Applied Behavior Analysis (ABA) Services. Other community-based options would be Family in Needs of Services, more evidenced based mental health rehabilitation such as Multisystemic Therapy (MST), and connection to our peer Navigation program along with case management from the health plan. Our Healthy Blue Behavioral Health Consumer and Family Organizations for Children, Youth and Adults Liaison would work to create an individualized system of care for this family. Of note, our Psychiatric Residential Treatment Facilities (PRTFs) have been willing to receive consultation from the Office for Citizens with Development Disabilities (OCDD) community support teams or other ABA providers and have expertise in trauma-informed care.

Using our Healthy Blue Health Intech platform, we can identify the member, James, as a part of a vulnerable population at risk of adverse outcomes and needing additional supports to navigate his complex needs. Our predictive modeling process assigns James initially to Transitional Case Management with graduation to Intensive Case Management (Tier 3) to focus on his immediate Special Health Care Needs (SHCN). Our approach focuses on his needs using a holistic approach that supports James' entire family. We work to engage James with providers trained in trauma-informed care and understand the importance of Louisiana's CSoC philosophy, values, and approach. We understand James' previous mental health episodes have impacted family members, so we make sure to demonstrate this understanding in our approach to support the whole family. This includes making sure the family has the wraparound services they need to prevent out-of-home placement. This may include step-down alternatives for his transition, adjustments to his current in-home services and supports, therapeutic interventions such as ABA therapy, medication management, and in-school and family supports, including crisis planning.

## 2.6.7.2.1 Assessments and Access to Specialty and Evidence-based Treatment

Regardless of whether James is new or currently enrolled with Healthy Blue, our systems and reports will identify him as having SHCN based on his diagnoses and claims data. With a focus on safety and well-being for him and his family, we recognize his recent behaviors are complex and urgent. Healthy Blue's Case Management team receives training and regularly uses Health Intech, our information platform, to share across systems and combine member data and information such as real-time ADT feeds, screening and assessment results, plans of care (POCs), longitudinal member health records, and clinical data for use by our Case Managers in their engagement, assessment, and care planning efforts.

We also use Elli™, a risk intelligence solution that delivers population analytics and individual profiles for members who may have received services from other MCOs, incorporates Louisiana-specific encounter data, and maps socioeconomic to clinical data to support a holistic view of members. Our case management team assigns James to our Case Manager, Shawna, who is a licensed mental health professional and has experience with youth at risk for out-of-home placement.

### IMMEDIATE NEEDS – WITHIN 24 HOURS

- Shawna reaches out to James' mother to schedule an assessment with James and her in the hospital
- Shawna reassures the hospital that she is working with the family to develop a safe transition plan from the hospital
- Working with our Utilization Management team, Shawna makes sure James' continued stay is temporarily authorized

LA_HlthyRebid21_2.6.7.2_24Hours_11_COB_01

## Reaching Out to and Engaging James and His Family

Shawna reviews all available information in Health Intech prior to contacting James' mother to explain the role of the Case Manager, obtain consent to work with her son and family, and complete the health needs assessment. During the discussion, Shawna discusses specific concerns the mother has about bringing her son home by using

reflective listening techniques, such as, "I understand you are not ready for your son to come home right now because you are afraid it may be unsafe for you and your other children." She makes sure James' mother understands all the services and supports that would be available to her once she is ready for James to come home and that we would help to identify the best setting to meet James needs. Collaboratively, they discuss his neurocognitive issues and that with the right supports he may be able to function relatively independently in the future. Shawna shares information with the mother about the types of services and supports available to James, herself, and to her other children. Examples include MST, therapeutic group homes, PRTF to prepare him and the family for his return, individual and family therapy, intensive in-home behavior management, and respite services that provide a break for his caregivers and his family.

Shawna (with the mother's approval) arranges a time with James' mother, the facility staff, and the Community Psychiatric Support and Treatment (CPST) worker the following day to meet with James and his MDT to complete a holistic, person-centered assessment and develop a POC. The CPST worker offers insight on any of James' prior history that may be useful in developing his POC. If needed, Shawna will engage our Healthy Blue Liaisons (including our Consumer Advocate, Department of Education, or Local Government Liaison) or other community-based organizations (CBOs), such as Families Helping Families, to identify and implement necessary holistic services. If we have difficulty connecting with James' mother, we will prioritize our outreach efforts by coordinating a MDT with representatives from the child serving agencies, CSoC, state agencies treatment team and family to craft an individualized plan to meet the family's needs. This would be done within a person-centered planning framework.

## Conducting James' Assessment in the Hospital

Shawna collaborates with the facility to discuss James' current discharge plan, their potential referral to DCFS, and to develop a holistic POC to assure all James' needed services are identified and in place prior to his discharge. Shawna communicates to them that we are developing a safe plan to transition James and requests additional time. She contacts our utilization management team to make sure James' stay continues to be authorized.

By conducting the assessment in the facility with James, his family, and the facility staff, Shawna gathers a current assessment of James' comorbid conditions and the treatments that led to his inpatient stabilization. Shawna uses her clinical and person-centered communication skills to encourage his mother to describe how James' conditions impact the family and they discuss potential short- and long-term goals to support living together safely and comfortably. She works with the facility staff, CPST, and his mother to gather an accurate and updated history including his age of diagnosis; precipitating factors; providers seen; services he received; and his prescribed medications and medication adherence while hospitalized, in residential treatment, and at home. For example, they talk about the CPST services James is receiving in the home and the family's perception of its effectiveness in addressing his escalating behaviors.

Using her clinical experience, knowledge of evidence-based practices, and multiple engagement approaches (such as motivational interviewing or cognitive reframing) Shawna talks to James about what his goals are, what makes him happy, and how his family can support him to achieve his goals. Shawna and James' mother talk about her concerns related to the well-being of the family and maintaining her job. Shawna asks James' mother about any potential social determinants of health barriers that may impact her ability to follow through with the recommendations from James' providers, such as participating in frequent visits, taking medications as prescribed, transportation to appointments, health literacy needs, and time constraints related to her job and other children.

Shawna confirms that the provider completes of the Child and Adolescent Level of Care/Service Intensity Utilization System (CALOCUS-CASII) to determine the evidence-based practices, intensity of services, and the most integrated setting to meet James' needs. Care pathways may include the options described in Table 2.6.7.2-1.

*Table 2.6.7.2-1. Potential Care Pathways for the Member and Family*

| |
|---|
| **Option #1. In-home and Community-based Services and Supports** |
| **After receiving information about the services and supports available, if James' mother feels that she is ready for him to come home, there are multiple in-home and community-based services for her and her family.** |
| ▪ CSoC provides services and supports to James, his mother, and siblings. This includes mentoring, coaching, and skills development; youth peer support for self-management; coping skills; healthy family interactions; and respite care opportunities. Shawna collaborates with the CSoC coordinator to meet James' holistic needs.<br>▪ James can increase his current CPST services, preserving the established relationship with his CPST worker, to support a safe transition home, provide structure, and offer therapeutic interventions such as Cognitive Behavioral Therapy or Cognitive Processing Therapy for his PTSD and behavior management.<br>▪ Evidence-based interventions for young adults experiencing behavioral challenges can include MST, Functional Family Therapy (FFT), and ABA from community providers, such as Care Tec in Bunkie that also provides diagnostic evaluations and multidisciplinary BH services, [redacted] |
| **Option #2. Step-down Alternatives for Transition** |
| **After talking to James' mother about her options in the home, Shawna acknowledged her continued fear about the safety of her other children and offered temporary alternative placements that prevent abandonment and DCFS involvement and give time to prepare for James' safe return home.** |
| ▪ ***Natural supports***, such as family members or friends who can provide a safe environment for James while he participates in services, including individual and family services to prepare him for returning home.<br>▪ ***A therapeutic group home*** near the family's home, such as New Roads, which can provide a step-down opportunity for James and his family to develop individual and family behavioral and relational skills.<br>▪ [redacted]<br>▪ ***PRTF*** with Medical Director Review and approval; we identify a PRTF, such as Methodist PRTF, that can provide inpatient-type care in a structured, residential setting for members whose needs are not being met in other settings, such as at home or school. |
| **Option #3. DCFS Custody and Support for Member Transition Back into the Home of Origin** |
| **After learning more about her options, James' mother decides not to pick up James from the facility.** |
| ▪ ***HOMEBUILDERS® (Intensive Family Preservation Service***), which targets improving parenting skills, family functioning, parent/caregiver and children's behavior and emotion management skills, and increasing the safety of all family members for children and youth to live safely at home.<br>▪ ***Functional Family Therapy – Child Welfare (FFT-CW®)*** engages James and his family by assessing relationships and patterns, implementing individualized and family behavior plans that support positive interactions, addresses precipitation factors and stressful situations, and reducing behaviors through crisis planning. |

## 2.6.7.2.2 Meeting James' and His Family's Service Needs

Shawna knows that extending a hospital stay may not be in a member's best interest, so she works with James' mother to develop a plan for his safe and successful discharge, which includes identifying and coordinating appointments with PH and BH providers that specialize in caring for members with multiple BH diagnoses and cognitive decline (such as a pediatric psychiatrist and neurologist). Shawna works with the hospital to ask them for more time to develop a safe transition plan. Healthy Blue's integrated case management team, composed of our Medical Directors, Care Management team, and Utilization Management clinicians, assure continued authorization for his hospital stay and identify any additional resources for a lower level of care and family supports. We identify the most appropriate providers based on his needs, which may include out-of-network or ultimately an out-of-state provider through single-case agreements.

Our OCDD Liaison will request a consultation from OCDD's outpatient behavioral support team that specializes in meeting the needs of youth with comorbid I/DD and BH illnesses. As part of his care planning, we develop a crisis plan and an agreement with the hospital to be his inpatient provider in a crisis.

Once his outpatient care team is identified, we will have regular child and family team meetings to discuss concerns and problem solve as they come up with James and his mom as part of these meetings.

Shawna and James' mother identify his MDT participants to develop a POC. The MDT may include participants such as his pediatrician; specialty provider representatives, such as his therapy and behavioral management providers (CPST, CSoC, ABA, MST); Psychiatrist; and natural supports like family, friends, church members, and school partners. The MDT works together to educate James' mother about resources available and care pathway she chooses for James.

Regardless of James' living environment, his care pathway options include the identification, engagement, initiation, coordination, and monitoring of the following to support him in the selected environment:

- Physical health services, including EPSDT visits with his pediatrician and neurological provider and follow up evaluation to determine if there are any changes in his neurocognitive functioning — this includes consultation with Healthy Blue's clinical team to determine whether neuropsychological testing is needed to identify neurological causes of comorbid behaviors and for treatment recommendations specific to his neurocognitive disorder
- BH services, such as continuing in CPST or engaging services, CSoC, ABA, HOMEBUILDERS, FFT-CW, or other services based on his care pathway — emotional and behavioral management, interpersonal and social skills development, and self-care and daily living skills; evaluation by OCDD if appropriate; and family therapy to improve communication and resolve conflicts
- Medication management through collaboration with PCP and psychiatric services including education about the importance of adherence
- Alternatives for preventable emergency department or hospital use as a response to escalating behaviors, such as telehealth, tristate agreement, our Integrated Collaborative Care Model, telemedicine kiosks, and iPads®
- School-based coordination in preparation for his return to school to assure his Individualized Education Plan (IEP) meets his needs and that he has a behavior plan to assist with self-management and aggression
- Respite services that can offer a break for the caregiver and social interactions for James

- Resources for James' mother through community-based programs (such as Families Helping Families) to provide emotional, educational, and referral support through peer-based support that fosters independence
- Services and resources for the other children in the home, such as assuring they are participating in EPSDT and wellness care, reaching out to their pediatrician to complete an adverse childhood experiences (ACEs) screening, and determining if trauma-informed play therapy is appropriate for their needs to prevent future challenges associated with trauma

**SHORT-TERM NEEDS – WITHIN 7 DAYS**

- Shawna works with Healthy Blue's Provider Services department to identify step-down options for James' transition from the hospital
- Led by James and his mother, Shawna engages the family's multidisciplinary care team to assist them in choosing services and supports for their needs

LA_HlthyRebid21_2.6.7.2_7Days_11_COB_02

As part of the POC development, Shawna supports the team to review and update the crisis plan, should James return home. The crisis plan includes the types of events that precipitate escalating behaviors and the resources available to family members to prevent or deal with escalation, such as contacting Healthy Blue's BH Crisis Line or Crisis Intervention providers. Our UM team, Medical Directors, and Psychologists review pre-authorization requests from providers for ongoing crisis intervention.

Regardless of James' care pathway and prior to discharge transition from the hospital, Shawna verifies that all services are in place prior to his discharge and follows up with the family or placement caregiver and providers to make sure services have been initiated. Shawna schedules follow up and ongoing appointments, and arranges for transportation, if needed. This includes follow up appointments within seven days following discharge with James' pediatrician, neurologist, and psychiatrist for evaluation and to review any medication changes that occurred while he was in the hospital. Shawna makes sure all prescriptions are filled and his caregiver understands the importance of medication adherence prior to his transition.

If James discharges from the hospital to an out-of-home step-down placement, Shawna supports James and his mother in developing a discharge plan for his return home, which also includes input from others involved in his care. That may include his PCP, placement team, specialty providers (psychiatrist, neurologist), therapists (CSoC, ABA, MST), and others, such as DCFS, the Healthy Blue Liaisons, and Healthy Blue's Medical Directors. The discharge planning process is initiated upon James' admittance and includes telephonic and face-to-face contacts with him to identify his progress and any gaps in care, his mother's and sibling's progress in services, and the services needed in the home to support a safe transition to prevent further hospitalizations and out-of-home placement.

**LONG-TERM NEEDS – WITHIN 14 DAYS**

- James transitions safely to a step-down facility to address his behavioral needs prior to returning home
- Shawna arranges for trauma-informed therapeutic services for James' mom and siblings
- Shawna begins working with the step-down facility to develop a discharge plan for James to return home

LA_HlthyRebid21_2.6.7.2_14Days_11_COB_01

When James is ready to return home, Shawna assures all services identified on his discharge plan are in place prior to and initiated upon transition. Shawna assists in scheduling needed appointments, follows up with the family and provider to assure his attendance, and reviews claims data to monitor participation in services. This may include continued behavior management and therapy in the home, such as CPST or ABA that includes family participation, further psychiatric or neuropsychiatric testing and evaluation, respite, and follow up medical and pediatric psychiatric appointments.

The family and Shawna develop a contact plan that includes the frequency and modality (in-person, telephonic, text) of communication based on James' needs and the family's preferences to monitor signs of relapse, identify gaps in care, and coordinate additional services or strengthen existing services if there are signs James may be exhibiting an increase in behaviors. Shawna continues to participate in Healthy Blue's clinical rounds to identify any additional services and supports that can assist with his success in the home and community.

As a result of James' treatment, he has received the tools for self-management and coping skills that he can use in the home, school, and community, and how to interact with his family in a non-aggressive manner and what to do if he feels his anger level escalating. James' mother understands more about his conditions, the importance of follow through with services and structure in the home, and how to respond to James in a healthy, positive way.

Shawna remains involved with James and his family for as long as they prefer, while making sure the family continues to make progress and encouraging their independence from case management, including stepping down the intensity of case management services and contacts as his behaviors improve. This may include scheduling James' and his family's appointments and assuring their attendance and participation; identifying and accessing community resources for supports; referring to James' crisis plan to avoid using the ER; and leveraging natural supports to meet James' and his family's needs, including tutoring through the school and spending time with James or his siblings to give everyone a break, if needed.

## 2.6.7.3 Improving Health Outcomes for Louisiana's Children and Mothers

### ISABELLA – 17-YEAR-OLD AND HER NEWBORN BABY

Addressing potential language and communication barriers is essential in developing a trusting relationship with Isabella that will support the identification of and access to care, services, and supports needed for her and her baby born with hydranencephaly, an incurable condition. Our trauma-informed approach includes immediate response and is sensitive to her young age, the trauma and grief related to her child's poor prognosis, her history of sexual assault, and her cultural norms, beliefs, and values, such as Hispanic end-of-life rituals that emphasize family members caring for loved ones rather than professional caregivers. Based on Isabella's and her baby's needs, our case management team assigns Brigitte, our OB nurse who has experience working with moms who deliver babies with complicated conditions

LA_HlthyRebid21_2.6.7.3_Isabella_11_COB_04

Engagement with members with Special Health Care Needs (SHCN) often begins by assigning a Case Manager, who not only is able to communicate with the member, but also demonstrates understanding of and compassion for members in difficult, crisis, and life-altering situations, such as this member. Healthy Blue's **Elevate | Advancing Maternal and Child Health** approach provides a comprehensive suite of culturally competent solutions dedicated to identifying, promoting, and supporting the health of our pregnant members and their babies and provides a framework for meeting the State's goal of improving the low birth rate racial gap, low birth rates overall, infant mortality, teen pregnancy, and other health outcomes for children and mothers in Louisiana.

The timing in this case, where the birth of an infant with a terminal condition occurs soon after the mother's arrival in New Orleans and enrollment in Medicaid, creates the need for our immediate engagement and skilled, holistic case management. Our adherence to the National Standards for Culturally and Linguistically Appropriate Services assures we are well-equipped with trauma-informed and culturally competent staff, network providers, and community partners to wrap around Isabella and her medically complex daughter. We make sure language, health literacy, and cultural norms are respected and never an impediment to accessing needed health services or engaging in healthcare.

## 2.6.7.3.1 Assuring Holistic Care for Isabella and Her Infant

Based on the scenario as presented, Healthy Blue would reach out immediately to Isabella upon her initial enrollment; however, as things unfolded quickly, we urgently engage upon receiving the real-time admit, discharge, transfer notification of the NICU admission of her baby, and include Isabella and her baby on our daily NICU clinical rounds to assure we meet their holistic needs. Our NICU rounds are conducted by a multidisciplinary case management team comprising our Neonatologist; Pediatric Psychologist; OB, pediatric, physical health (PH), and behavioral health (BH) clinicians, and our NICU nurse. The NICU nurse receives real-time communications of changes in the infant's condition and Isabella's needs, assures Isabella is screened for PTSD, and provides case management support to assure a safe transition from the hospital for Isabella and her baby.

While Isabella's infant is stable as of the recent discharge from the hospital following the PCP visit, we know she and her baby will need significant ongoing care and support. Both Isabella and her baby girl have high-risk needs and are assigned to Tier 3 Intensive Case Management — Isabella because of her age, recent pregnancy, birth of a child with complex healthcare needs, and previous trauma; the infant because of her SHCN and incurable condition.

### Engaging Isabella by Meeting her Language, Cultural, and Literacy Needs and Preferences

Our priority is understanding and meeting Isabella's health and emotional well-being, her infant's conditions, and what Isabella's priorities are for her and her child. We will meet Isabella where she is by aligning care, services, and supports to her priorities. This includes helping her understand the entirety of her baby's health conditions and needs, having a safe environment for Isabella to care for her baby, addressing grief and trauma associated with her infant's prognosis, her sexual assault history, and engaging Isabella in postpartum care.

Given that Isabella and her family speak only Spanish, we immediately engage CulturaLink, which provides comprehensive translation and interpretation services to assist our OB Case Manager in understanding Isabella's preferences for the way we communicate and interact with her and her family.

### IMMEDIATE RESPONSE – WITHIN 24 HOURS

- OB Case Manager, Brigitte, arranges for CulturaLink to provider translation and interpretation services in Spanish
- Brigitte meets with Isabella to begin establishing rapport, help her understand her baby's condition, and screen her for PTSD
- Brigitte assures Children's Hospital New Orleans Pediatric Palliative Care is part of the care team that arranges for services in the family home
- Brigitte also connects the family to a community-based organization, such as Catholic Charities Archdiocese of New Orleans (Hispanic Apostolate Services), to help address end-of-life wishes

LA_HlthyRebid21_2.6.7.3_24Hours_11_COB_01

Once we understand the family's preferences, we make sure we honor those throughout Isabella's and her baby's care with Healthy Blue. Recognizing Isabella nor her brother and father can read or write in English or Spanish, we use a high-touch approach. Our OB Case Manager talks with Isabella and her family face-to-face as appropriate and walks through information in concert with the interpreter service, so that they understand things like medical forms (consent, do-not-resuscitate [DNR]) and educational materials (member handbook, condition-specific information, member website).

We track Isabella's communication needs in Healthy Blue's case management system, Health Intech, which captures all of Isabella's healthcare information, to assure ongoing interactions will occur based on her preference, including provider appointments (in-person, telehealth), Case Manager contacts, screening and assessments, and interactions with other health plan staff (Community Health Worker [CHW], Member Services Representatives, 24/7 Nurse Line, BH Crisis Line).

While all Healthy Blue Case Managers are currently trained in cultural competency and health equity, they will also be trained in language, culture, and diversity specific to each parish across the State. In this situation, the assigned Case Manager will also have experience working with families navigating the realities of an infant with medical complexities and poor prognosis and trained in motivational interviewing, trauma-informed care, and adverse childhood experiences (ACEs), and will engage our CHW who works with immigrant populations in New Orleans.

## Outreach to and Engagement

Based on Isabella's and her baby's needs, our case management team assigns Brigitte, our OB nurse who has experience working with moms who deliver babies with complicated conditions. Brigitte knows that Isabella's young age, trauma, language needs, and cultural considerations contribute to the urgent need for engaging her in care and case management. Brigitte is skilled at using open-ended questions and reflective listening to encourage members and their family to share their expectations, preferences, and cultural norms for participating in care. Brigitte recognizes that Isabella's family culture and dynamics may affect her comfort level in sharing her personal and healthcare history in the presence of family members – which may also be affected by other factors, such as the reasons for and length of separation or whether her father is aware of her sexual assault. Brigitte talks to Isabella about whether she has any family members, friends, or community-based resource to support her in her care, such as from a faith-based organization of her choosing.

We know our members speak many different languages and have varying levels of literacy – this should never be a barrier to care. We recognize that limited interpretation services, as well as shame associated with limited reading abilities, often play an important role in how members interact with healthcare providers. In this case, Brigitte also recognizes the possibility of stigma or shame Isabella may be experiencing about her pregnancy and sexual assault, as well as the possible difficulties in discussing death and dying for Isabella and her family based on their cultural, social, or religious beliefs. These issues coupled with her young age and ability to understand the nuances of a healthcare system, can be intimidating, difficult to navigate, and may affect her engagement in care.

Using language line services or an interpreter who speaks Spanish, Brigitte uses motivational interviewing and a trauma-informed approach to connect with Isabella, begins establishing rapport, and helps her understand the seriousness of her baby's condition, her right to make medical decisions for her baby, the role of hospice, and the purpose of palliative care and advance directives, including a DNR order. Together, they also explore Isabella's cultural preferences to understand how she wants to engage in care planning, as well as how her cultural preferences may impact her understanding of her baby's needs, her own needs, and her ability or desire to communicate and interact with providers.

Brigitte first helps Isabella understand that given her age and that she has just given birth, Isabella has the right to make decisions for her baby's care. To support Isabella in identifying what she needs and prefers in caring for her baby at home, Brigitte shares information about the importance of and types of care and support available to her and her baby. This includes OB-GYN postpartum care for Isabella,

### SHORT-TERM NEEDS – WITHIN 72 HOURS

- Brigitte supports Isabella in completing a holistic assessment and developing a plan of care for her and her baby
- Isabella schedules post-partum care with her OB-GYN and Brigitte arranges for trauma-informed therapy to address Isabella's grief and PTSD needs
- With Isabella's permission, Brigitte engages a Healthy Blue CHW to assist in identifying additional resources
- Through Healthy Blue's home visiting program, we can arrange for home visits from Nurse-Family Partnership

LA_HlthyRebid21_2.6.7.3_72Hours_11_COB_02

neonatal or neurological services for her baby, palliative care, hospice services, PCP, therapy to address grief and PTSD concerns, medications, durable medical equipment (DME) for the baby, in-home skilled nursing, and system navigation supports. This also includes evidence-based practices, including Peer Support and engagement of family support organizations, such as Families Helping Families and social support organizations that support immigrants in the New Orleans area, such as Hispanic Apostolate Community Services or Honduran Family Association, depending on where Isabella is from.

The hospice nurse and Brigitte work together to support Isabella in understanding her baby's needs, prognosis, and services provided by hospice and assist her in selecting a pediatric hospice provider in New Orleans. For example, Children's Hospital New Orleans Pediatric Palliative Care is a family-centered interdisciplinary program that cares for the body, mind, and spirit of children with serious illness and their families. As an integral part of Isabella and her baby's care team, this type of program would gently provide information on the symptoms the baby may experience (initially or in a few months), such as seizures, myoclonus, and respiratory problems; the palliative care available for her baby; and the average life expectancy for babies with hydranencephaly. They also support her in understanding how she can provide comfort and care to her child, such as holding and cuddling with her baby, diapering, and understanding medication times and doses – this may include pictures or color-coding instructions based on Isabella's needs and preferences, as well as support from in-home skilled nursing services.

Given the wealth of needs for Isabella and her baby, and the multitude of resources available to meet those needs, Brigitte understands that the information may be overwhelming for Isabella. Throughout her care, Brigitte considers this in her discussions with Isabella, making sure to help pace and manage the community of supports being offered, so that Isabella fully understands the options available to make informed choices.

## Assessment and Care Planning

Adhering to the principles of person-centered assessment, care planning, and trauma-informed care, Brigitte supports Isabella in completing a holistic assessment for her and her baby that informs the development of an integrated Plan of Care (POC) reflecting both their needs and Isabella's preferences for care and providers. Based on Isabella's preferences, Brigitte may engage her father and brother in the assessment process, where Brigitte helps them understand Isabella's goals for her baby, their opportunity to support her in her choices, and their help in supporting Isabella through critical events, such as the baby's worsening condition or death.
To complete the person-centered assessment, Brigitte engages Isabella in sharing information about her personal, medical, and social history, including:

- ***Current and past healthcare history***, including any prenatal care she has had, previous diagnoses, member and familial pregnancy and childbirth history (low birth weight, premature delivery, infant mortality), PH (high blood pressure, diabetes), mental health, substance use, injury, and medication history
- ***Cultural and immigration history***, including how long she has been separated from her father and brother and what is important to her, such as cultural values, customs, and spiritual beliefs
- ***Relationship history***, such as Isabella's familial history (mother, father, brother, other potential siblings), domestic or relational violence, ACEs, and natural supports, including family, friends, and teachers – if possible, Brigitte encourages Isabella in sharing information about the father of her baby, as well as her sexual assault and the affect it has had on her; they discuss the types of supports available to her, such as trauma-informed individual therapy and support through the New Orleans Family Justice Center that offers counseling, healing activities, and legal services
- ***Social determinants of health (SDOH) needs***, including current housing situation, food security, transportation, financial, and educational and employment needs

Based on Isabella's responses, Brigitte makes sure she understands all the services available to her and her baby and works with her to develop POC that includes services, such as:

- Selecting and scheduling follow-up appointments with a female OB/GYN with trauma-informed training in the New Orleans area for follow-up OB care and family planning that includes birth spacing/interconception choices, such as long-acting reversible contraception, and referring the member for genetic testing
- Understanding the emotional impact of Isabella's experiences, which may include guilt for the possibility of having done something that may have caused this and thoughts of not having a healthy baby in the future
- Identifying the services and supports that will help Isabella care for her baby's needs at home, such as:
  - Selecting a hospice physician trained in pediatric palliation, who is trained in hydranencephaly and can act as her infant's PCP, based on Isabella's preference, to assure continuity of care and minimize the stress of multiple appointments — if unavailable in Healthy Blue's provider network, we will execute a single case agreement to make sure her baby receives the care she needs
  - Assuring hospice is arranged in the family home at the intensity directed by the infant's specialist to monitor the baby and arrange for Isabella's counseling to address grief and PTSD issues related to her child's prognosis and her sexual assault

  - In-home skilled nursing that includes monitoring the baby's well-being, managing medications, providing education for Isabella in taking care of her child, making sure she and her family members understand and follow the POC during difficult situations, such as during a seizure
  - Arranging and assuring ongoing authorization for any DME that may be needed, such as respiratory support (such a breathing tube or oxygen)
  - [redacted]
  - Identifying resources for Isabella to address her legal status if needed, such as Louisiana Council's Advocacy Network (LaCAN), the Child Neurology Foundation, or other programs for legal aid, such as Catholic Charities Hispanic Apostolate Community Services and pro bono legal services through Loyola and Tulane Universities
- Engaging with Green & Healthy Homes (GHHI) through our Healthy Home VAB, to conduct an in-person environment assessment of the family's house to assure Isabella and her baby have returned to a safe environment
- Addressing SDOH by helping the family apply for social programs, such as Women, Infants, and Children (WIC) (formula), Supplemental Nutrition Assistance Program (SNAP) (healthy foods), and Supplemental Security Income (SSI) through the Compassionate Allowance Initiative that speeds up the process for families with children with SHCN
- Identifying community-based organizations, such as Catholic Charities Archdiocese of New Orleans and Families Helping Families of Greater New Orleans that offer information, referrals, and one-on-one support for parents and Junior League Diaper Bank for diapers

Through the care planning process, Brigitte helps Isabella understand that her needs are integrated into her baby's POC and that should her eligibility for benefits change due to her legal status, Brigitte will continue to support her in caring for her baby and connect her to the services and community-based supports that will continue to meet her needs. Care planning also includes incorporating additional needs for the family, such as assisting in scheduling appointments, arranging transportation, legal supports for immigration status if needed, and pursuing educational or employment opportunities. Throughout their care with Healthy Blue, Brigitte works with Isabella on understanding her child has an incurable condition and the community-based resources that will provide for additional needs and promote independence and well-being when her benefits change, including hospice care for the baby and emotional support for Isabella, such as the Nurse Family Partnership and Families Helping Families.

[redacted]

## 2.6.7.3.2 Addressing Language and Cultural Barriers to Assure Access to Care

Upon enrollment, our employees with direct contact with the member and family (including Case Managers, CHWs, and Member Services Representatives) and providers work to assure the linguistic, health literacy, and cultural needs are consistently met to assure their access to the most appropriate providers, services, and supports for their needs. In this case, Brigitte incorporates cultural competency practices — such as honoring Isabella's beliefs, being sensitive to cultural diversity, and adopting attitudes and communication styles that respect her cultural background.

### Addressing Isabella's Language Barriers

We tailor our member materials and outreach efforts to the specific needs of the family, including their preferred language and form of communication. We use language line and translator services, such as Voiance Language (for telephonic translation services) and CulturaLink (for in-person services). As previously noted, given that Isabella and her family need ongoing communication in a non-written form, we engage oral interpretation services through a local organization, such as CulturaLink, to walk through member materials verbally in conjunction with Brigitte and to attend provider appointments, as needed and desired by Isabella. Brigitte works with the family to identify providers who speak their language and are trained in trauma-informed care.

**LONG-TERM NEEDS – DURING THE FIRST 30 DAYS**

- Isabella and her family learn how to care for her baby in her home with support from hospice and in-skilled nursing
- The CHW connects Isabella with legal aid services through Hispanic Apostolate Community Services to address her legal needs
- Isabella understands her child's prognosis and works with hospice to make sure she knows her options and follows her POC when her baby's condition worsens

LA_HlthyRebid21_2.6.7.3_30Days_11_COB_01

### Meeting Isabella's Cultural Needs

Although language is part of delivering culturally competent care, it is just one part. All Healthy Blue employees and network providers participate in cultural competency and implicit bias training initially and annually. Using the language line or a translator if needed, Brigitte works with Isabella and her family to identify what is important to them and their culture. This includes honoring their beliefs about end-of-life including spirituality, expressions of grief, family decision-making about the infant's care, and response to her prognosis.

As part of onboarding and ongoing training for all Healthy Blue Case Managers, Brigitte:

- Assesses core cross-cultural issues, including Isabella's cultural and spiritual values – this is incredibly important in the context of a very young woman who has not only experienced sexual assault and uprooted herself to live in New Orleans, but is facing the reality of her baby's prognosis
- Helps Isabella and her family to explore the meaning of her baby's health needs and prognosis and makes sure that the treatment recommended by the provider is compatible with their values and cultural practices
- Seeks to understand the social context in which Isabella and her infant live, including family involvement in decision-making and care planning – works with Isabella to determine what level of involvement she wants her family to have in receiving information and decision-making
- Uses motivational interviewing techniques to encourage adherence to her chosen goals and POC

We also make sure Isabella has the ongoing support of an expert network of providers, who can provide the care she and her baby need with an eye toward her overall history and cultural context. Brigitte works with one of Healthy Blue's Outreach Care Specialists, who lives in the New Orleans area, to make sure Isabella has local providers and services that are consistent with her linguistic needs.

Brigitte continues to support Isabella in caring for her baby at home through frequent multidisciplinary care team (MDT) meetings and in-person and telephonic contact, based on Isabella's preferences, to identify any new, unmet, or undiagnosed needs, including SDOH needs. Brigitte makes sure that all services requiring authorization are approved on an ongoing basis, including the CHW and Peer Support Specialists, and works with Isabella to address her immigration status needs if appropriate, and engages community-based resources to assure Isabella's needs are met in the community should her benefits change.

## 2.6.7.4 Local and Community-based Approach to Support Mario in the Community

Healthy Blue takes a person-centered, community-based approach to supporting members with biopsychosocial needs. We understand that people living with mental illness and substance use challenges have high rates of medical morbidity and mortality, largely due to significant disparities in access to high-quality care.

## 2.6.7.4.1 Addressing Mario's Holistic Needs

Meeting Mario's holistic care needs requires a comprehensive person-centered approach to identify his needs early on and assure timely outreach and engagement to begin developing a trusting relationship. Healthy Blue addresses these challenges through our person-centered **Elevate | Population Health** approach, which includes local population health analysis to identify and prioritize health priorities and disparities, and overcome challenges in our communities.

### Identifying Mario's Care Needs

Using our Health Intech data analytic capabilities and robust data collection, we can identify Mario as a part of a vulnerable population at risk of adverse outcomes and needing additional supports to navigate his complex needs. Our predictive modeling process assigns Mario to Intensive Case Management Tier 3. Our approach focuses on his specialized needs using a holistic approach that supports Mario. Based on Mario's comorbid physical health (PH) conditions, schizophrenia diagnosis, substance use disorder (SUD), and emergency department (ED) utilization, we identify Mario as having Special Health Care Needs (SHCN). In Mario's case, we would learn about his situation early on through the following:

- Predictive modeling that identifies risk of emergency department (ROED)
- Real-time admit, discharge, transfer feed
- SCHN and ED utilization reports
- Referral from the My Choice Louisiana transition coordinator who will follow Mario for up to one year after discharge from a nursing facility
- Communication with the Office of Behavioral Health or Office of Aging and Adult Services (OAAS) through our My Choices Liaison — as part of the Department of Justice Compliance Agreement, the State identifies Mario's risk based on serious mental illness, multiple ER presentations, and potential homelessness

**MARIO – 49-YEAR-OLD MALE**

We recognize that substance use can impact a member's ability to engage in the services they need, as demonstrated for Mario, the member in this scenario. The exacerbation of already complex PH and BH conditions — including inappropriate behaviors — led to his inability to maintain housing and may create additional barriers to locating and connecting Mario to needed care and services. Regardless of Mario's condition, pain issues, substance use, environmental issues, or funding stream, our Case Manager, Jeff, a licensed mental health professional with substance use expertise, coordinates Mario's benefits to make sure we identify and address all gaps in car.

LA_HlthyRebid21_2.6.7.4-5_Mario-Scenario_11_COB_03

Mario's assigned Case Manager, Jeff, identifies if Mario has behavioral health (BH)-only coverage and if so, connects Mario to other coverage options to make sure his PH needs are being met and coordinates with those providers (with Mario's consent). Jeff is a licensed mental health professional with substance use expertise and is a part of our Case Management team composed of our Medical Directors, PH, BH, Housing Specialist, Permanent Supportive Housing Liaison, Psychiatrist, [redacted] eff facilitates monthly in-person meetings with Mario's multidisciplinary care team (MDT) that is made up of participants of Mario's choosing, such as family, friends, providers (including services not covered under the BH-only product), and supports assessment and care planning processes.

Building trust with Mario, and our care management team, occurs by meeting Mario where he is in his desire and goals for improving his health, recovery, and quality of life. Regardless of whether Mario lives in Jefferson Parish and uses Ochsner, Orleans Parish and uses University Medical Center, or in Rapides Parish and uses Christus St. Francis Cabrini Hospital, Healthy Blue will wrap Mario in the services and supports he needs to remain in the community-based environment of his choosing.

### Reaching Out to and Engaging Mario in Care

Because Mario denies any substance use concerns and does not remember his behaviors, Jeff recognizes the potential challenges associated with connecting with him and that he may be unwilling to participate in services and supports. Healthy Blue's Member Engagement Strategy maximizes how we connect with Mario — who may be difficult to reach and engage. Jeff reaches out to Mario telephonically to schedule an in-person visit — if they connect with Mario, they will complete the health needs assessment to better understand his needs. If unsuccessful in our initial outreach, we engage a Community Health Worker (CHW) or Access Navigator,

**IMMEDIATE NEEDS – WITHIN 72 HOURS**

- Recognizing the importance of Mario's challenges that may affect engagement, Jeff and other Healthy Blue staff reach out to Mario frequently
- Working with Mario, Jeff schedules an appointment with a neurologist in Mario's area for evaluation
- With Mario's permission, Jeff engages a Peer Support to meet Mario where he is in his recovery and support him in participating in substance use services

LA_HlthyRebid21_2.6.7.4-5_72Hours_11_COB_01

who specializes in navigating social determinants of health to go to Mario's last known address to provide him with information about Healthy Blue that may encourage him to engage with his case manager. Jeff reaches out to Mario's OAAS transition coordinator to gather more information — leveraging a relationship that has been developing and supporting Mario since his discharge.

[redacted]

Once Jeff contacts Mario, we provide him with information in his preferred language, verbally and in writing, about the role of the Healthy Blue Case Manager. He explains the benefits, services, and programs available to Mario to address his physical and behavioral health conditions and symptoms, to maintain his housing, and to prevent potential future legal involvement. Jeff shares information about the role of Peer Support, who can offer Mario emotional support and share personal experiences and knowledge that may encourage him to engage in care — which can occur through the Local Governing Entities (LGEs) as a covered benefit telephonically, through Healthy Blue telephonically, or through our Healthy Blue CHWs. We ask Mario if he would like for a Peer Support Specialist or Transition Coordinator to attend their in-person meeting. If Mario has a guardian, Jeff assures they are involved in his care.

## Developing Mario's Multidisciplinary Team

Based on the information Mario has shared, Jeff works with him to identify the individuals in his life he would like to participate on his MDT, which helps with his care planning to assure his holistic needs are met. Jeff supports Mario to identify key participants such as his PCP, specialists (BH providers and a psychiatrist), Peer Support Specialist, the Healthy Blue Housing Specialist, Permanent Supportive Housing Liaison, and any natural supports he identified, such as family, friends, and neighbors. They talk about Healthy Blue's Case Management team, including our Medical Directors, [redacted] and case management clinicians who will monitor his progress, identify any cognitive issues, address any gaps in care, and identify additional resources to meet Mario's needs. The team monitors and watches for claims that may indicate escalation in needs, such as ED visits and lack of medication refills.

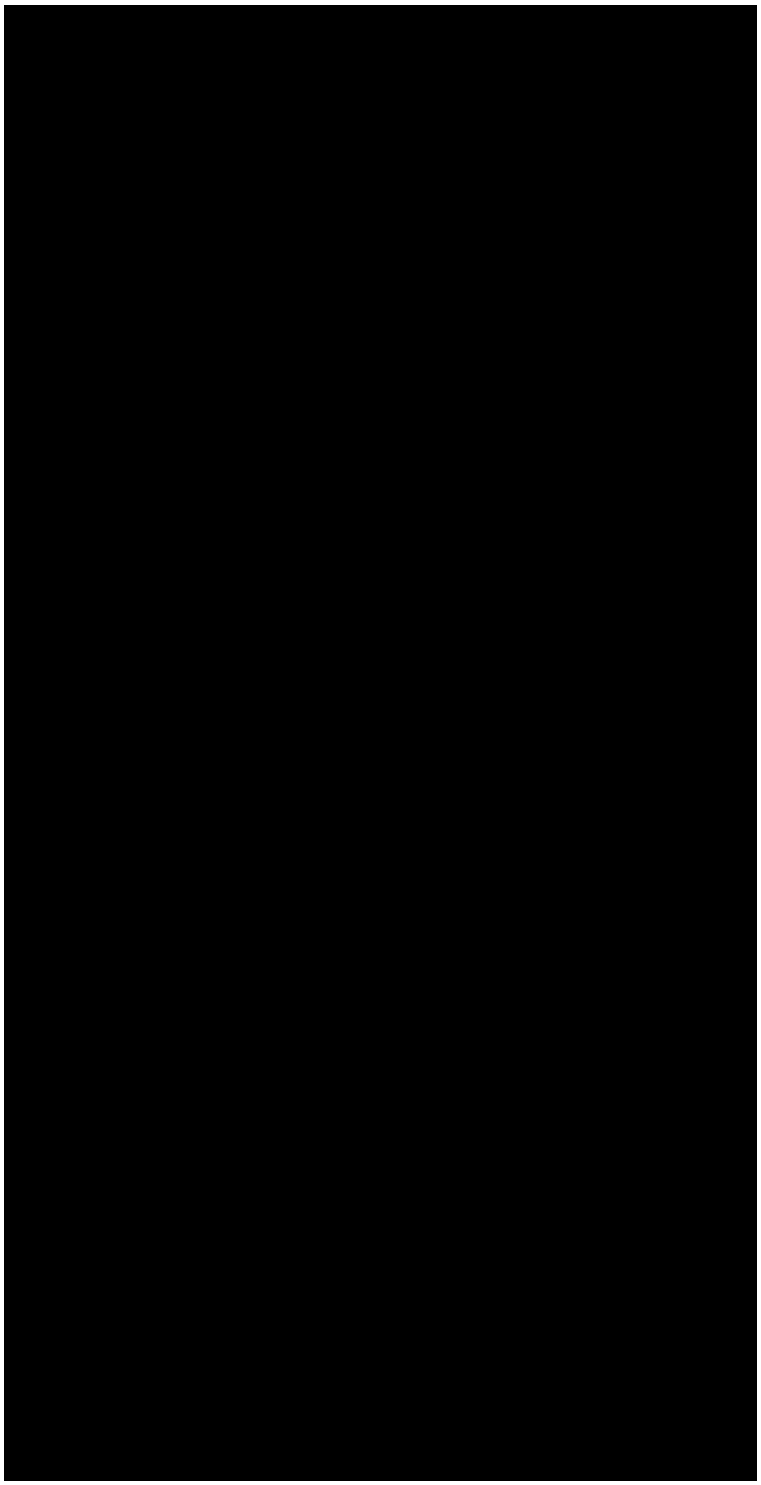
## Completing the Person-centered Assessment and Addressing Mario's Care Needs

Jeff and a Peer Support Specialist meet with Mario in his home to complete the assessment to further discuss his conditions, needs, short- and long-term goals, and preferences for his healthcare services and supports. This includes addressing any social determinants of health barriers to care and his current home environment.

**Pain Management.** During the assessment, Jeff and Mario talk about the escalating pain he is experiencing and how it may be related to several of his conditions, such as his neuropathy, recent falls, and wheelchair-related lack of movement or exercise. They discuss the services he uses to address his increasing pain, including whether his ER use is in lieu of him engaging with other providers, such as his PCP or selecting a pain specialist to determine the source of his pain and evaluate his medication needs.

Jeff shares information on alternatives to pain medications, such as seeing a pain specialist for evaluation and recommendations, physical therapy, [redacted]

**Brain Injury.** Mario tells Jeff about his brain injury and how he feels it impacts his life, goals, and functioning. They also talk about how his brain injury may be contributing to his memory challenges and ask him if he has seen a neurologist or is willing to do so to rule out any emerging complications. If he does not have a neurologist and there is not one available neurologist in his area, Jeff will work with our Provider Services team to identify potential specialists and engage them in our single case agreement process.



**Behavioral Health (Serious Mental Illness and SUD).** Jeff asks Mario about his understanding of symptoms and behaviors that may be related to his schizophrenia, and learns his level of participation in treatments and his medications adherence. Due to 42 CFR, Jeff and the Peer Support Specialist are not allowed to discuss Mario's SUD until Mario openly states that he uses and has an issue. Therefore, Jeff and the Peer Support Specialist uses motivational interviewing to ask open-ended questions to hopefully elicit to his recent behaviors such as yelling, using profanities, and appearing nude in common areas. If and when Mario admits to his substance use, motivational interviewing techniques will be used to encourage him to talk about his past his understanding of how his alcohol use may be contributing to some of his recent behaviors such as yelling, using profanities, and appearing nude in common areas. Jeff uses motivational interviewing techniques to encourage him to talk about his past and present alcohol use, whether he has participated in previous treatment for substance use, and if he thinks his alcohol use may be contributing to his memory issues.

They discuss the types of substance use services available to Mario when and if he is ready to participate. This includes detoxification (detox) services, Medication Assisted Treatment (MAT), intensive outpatient programs (IOP) in his area, Assertive Community Treatment (ACT) services, telehealth for serious mental illness (SMI) and SUD services, and inpatient programs. Mario is receptive to the evidence-based Peer Support Services offered by the LGEs and Human Services Districts throughout the state, which assists members with their recovery from mental illness or substance use by connecting them with Certified Peer Support Specialists. They discuss community-based supports such as 12-step meetings and faith-based organizations offering SUD support.

**Safe and Stable Housing.** Jeff talks with Mario about his right to live in the community rather than returning to the nursing facility and what services and supports he needs to remain independently housed. This includes how his current services are working to support him in his apartment, what else he may need, and whether he wants to return to a more structured environment. Jeff encourages Mario to share information on his current housing, whether it is meeting his needs, reasons for his previous evictions, and any concerns about another potential eviction due to his behaviors. They discuss his recent legal involvement due to his behavior, previous apartment issues, and potential eviction from his current housing. Potential solutions may mean involving the landlord as well as PH and BH providers on his MDT, requesting additional time from his landlord while Mario engages in treatment, and connecting him with community-based legal services that can help him resolve his pending legal issues.

Together they discuss his options should he be evicted for a third time, which includes:

- [redacted]
- ***Nursing Facility level of care*** if Mario feels as though he would like to return to a more structured environment with wraparound services
- ***Permanent Supportive Housing (PSH) program*** will support him in living successfully in the community. PSH qualifies as a community-based setting, where Mario can remain on the Home and Community Based Services Waiver that provides services in the home and in the community, such as personal assistance, adult day care, home modifications, therapy services (physical, occupational), and housing stabilization services, including monitoring from Healthy Blue's PSH Liaison. This option may not be an immediate solution, but submitting an application is the first step to securing a waitlist position.

**In-home Services.** Jeff and Mario discuss the services he is receiving in the home such as cooking and shopping and his participation in home care educational activities focused on increasing his independence. This includes talking about the options to increase in-home care to further assist with his activities of daily living and instrumental activities of daily living (ADLs/IADLs). With Mario's consent, Jeff arranges an environmental assessment to identify the types of environmental factors that may be contributing to his falls, such as needed durable medical equipment (DME), such as shower rails, kitchen grab bars, and minor home modifications to accommodate his wheelchair. They also talk about expanding his Personal Care Services to include other needs, such as bathing and dressing, transportation, and financial needs. Jeff asks Mario if he can collaborate with his home care therapy team to discuss additional home modification recommendations and supports using adaptations or other DME.

**SHORT-TERM NEEDS – WITHIN 14 DAYS**

- Jeff engages Mario's current property owner and Housing Specialist on his MDT and in the care planning process to incorporate ways in which to preserve his current housing
- Jeff develops a backup plan with Mario for other options should he lose his current housing, such as Permanent Supportive Housing
- Jeff assures Mario's access to Healthy Blue's Chronic Pain Management program
- Jeff arranges an environmental assessment to arrange for needed DME to prevent falls
- Jeff increases in-home supports with activities of daily living that can prevent potential injuries from falls

LA_HlthyRebid21_2.6.7.4-5_14Days_11_COB_02

## Developing Mario's Plan of Care

Led by Mario, his MDT collaborates to develop a POC that includes his strengths, goals, and preferences to meet his current biopsychosocial needs. Jeff and Mario collaboratively develop a contact plan, based on his preferences, such as frequency and modality (face-to-face, telephonic, and text messaging). Regardless of Mario's choices for providers and services identified on his POC, Jeff schedules appointments, arranges for adaptive transportation, and reaches out to in-home providers to assure services are scheduled and initiated, such as DME, home modifications, and additional home care services.

**Behavioral Health Conditions (SMI and SUD).** If Mario discloses his substance use, Mario's Plan of Care (POC) will address his goals regarding his alcohol consumption. They discuss the availability of IOPs, inpatient services, and recovery-based supports in his area. Jeff helps Mario to reschedule an appointment with his existing psychiatrist or choose one in his area that is trained in trauma and can evaluate his level of functioning and address any schizophrenia medication needs.

**Safe and Stable Housing.** As part of our care planning process, we make sure to address Mario's housing needs and develop a tenancy plan to maintain or secure safe and stable housing. Our approach focuses on Mario's housing preferences and safety, and considers all options with a focus on stabilization in his current environment. As an option, Mario considers transitioning to supportive housing that is more structured and has intensive housing supportive services as part of his POC. This type of transition may include additional supports, such as ACT, that provide community-based mental healthcare for individuals experiencing serious mental illness that interferes with their ability to live in the community, attend appointments with professionals in clinics and hospitals, and manage mental health symptoms.

**Physical Health Conditions (Brain Injury and Pain Management).** If Mario has a neurologist, Jeff reviews claims history and reaches out to identify his level of participation and current medications. If not, Jeff helps him select a specialist in his area, supports him in scheduling an appointment, and arranges for adaptive transportation that can accommodate his wheelchair, if needed. Jeff schedules an appointment with Mario's PCP for a comprehensive evaluation of his current symptoms and differential diagnosis, which may result in a referral to other specialists such as an endocrinologist or neuropsychologist. We incorporate services and supports to help manage his pain, such as the neurologist and a pain specialist of his choosing to address his escalating pain, who

may also refer him to a pain clinic or physical therapy to offer Mario a variety of pain management options. Jeff provides education to Mario about appropriate ER use and preventive care to better manage his conditions and pain such as attending appointments with his PCP or pain specialist, and participating in physical therapy. He also provides alternatives to using the ER such as using an urgent care clinic in his area, engaging in telehealth visits, or visiting providers with extended evening or weekend hours.

**Legal Issues.** Jeff and Mario decide to include the Healthy Blue Judicial Liaison to address his recent legal issues and incorporate social interaction into Mario's POC such as participating in an adult day program like the Friendship Club House through the National Alliance on Mental Illness. Together, they identify additional resources, such as transportation to appointments and Aunt Bertha that can help Mario identifies resources in his area that support any additional needs he mentions or that may arise going forward.

**Developing a Crisis Plan.** As part of the holistic POC, Jeff works with Mario and his MDT to develop a crisis plan that captures when and how Mario should reach out when he needs support. Resources include reaching out to family or his Peer Support Specialist, contacting the Healthy Blue 24/7 Nurse Line and 24/7 BH Crisis Line, and going to an urgent care center near his home. With Mario's approval and landlord buy-in, we also provide education to the landlord and/or property management staff about who to call as part of the crisis safety plan in the event that Mario needs assistance. This includes when his home care support team does not attend scheduled appointments, when he may feel the need to self-medicate, and when he is experiencing an increase in pain.

## Monitoring Mario's Participation and Progress

To monitor Mario's participation and progress, Jeff uses Mario's preferred contact methods and schedule, so Mario can share his progress, tell Jeff about any concerns he may have with his services or providers, and identify any services or supports Mario may still need or want. Jeff reaches out to his transition coordinator and providers following scheduled appointments to assure his attendance and identify any gaps in care or additional recommendations for additional services. Jeff monitors claims data to make sure Mario is participating, such as claims for IOP attendance, psychiatric appointments, and medication fills — this includes monitoring ER visits that may indicate substance use or potential falls in his home. Jeff participates in clinical rounds that will help identify additional resources or solutions for Mario as his needs change.

If Mario chooses to participate in inpatient SUD services, Jeff begins discharge planning upon his admission, which is led by Mario and includes his MDT and inpatient facility staff, to identify the services and supports he needs for a safe and successful transition.

If Mario has a housing voucher, he can be incarcerated or hospitalized up to 90 days before losing the voucher. Our Housing Specialist identifies the voucher program Mario is in and communicates with the voucher provider regularly. To help stabilize Mario's housing, our Housing Specialist recommends that he use representative payee services. We obtain a release of information to allow coordination with the landlord.

Jeff follows up with Mario and his transition coordinator, PH and BH providers, and his landlord to assure his behaviors are improving and his housing is no longer in jeopardy. This includes confirming that Mario is clinically improving and determining if additional services are needed – continuing to encourage and support Mario's ability to live independently in the community. We offer ongoing evaluations of how we can help him improve his likelihood of remaining in the community by increasing or adjusting the services he is receiving. Because the Healthy Blue Case Management Tier Level process is fluid based on Mario's needs, Jeff continues to follow his progress and adjusts the intensity of care, contact efforts, and case management activities based on his needs.

## 2.6.7.5 Increasing Integration to Assure Holistic and Timely Care

This member, Paulette, is experiencing several urgent and complex challenges. Healthy Blue's mission in a complex situation such as this, is to immediately engage Paulette, her family, and the NOW support coordinator to assess and assure her urgent needs and gaps in care that have led to the deterioration of her condition are immediately addressed. The response to this scenario illustrates how Healthy Blue initiates or re-engages our case management processes, highlighting a comprehensive and systematic process to establish and monitor a Plan of Care (POC) that assures Paulette's immediate care and safety and works towards achieving her health goals.

## 2.6.7.5.1 Identifying and Addressing Paulette's Complex Healthcare Needs

[redacted]

Upon receipt of Paulette's enrollment file — or through our predictive analytics or use of Elli™ data analysis, both of which quickly flag high-risk members such as Paulette — we immediately identify her poor health status. Recognizing the urgency of her diagnoses and under-utilization patterns, Healthy Blue's integrated Case Management team assigns her to Tier 3 Intensive Case Management, the highest level of case management, and assigns an experienced Case Manager, Nicole, who is a licensed registered nurse. Nicole has expertise in working with members with needs similar to Paulette's, including Special Health Care Needs (SHCN) and high-risk physical health (PH) needs that require intensive, assertive coordination of services and supports across the spectrum of care — including close collaboration with State entities, such as the Office for Citizens with Developmental Disorders (OCDD) and Office of Aging and Adult Services (OAAS), providers, and community-based organizations.

### Immediate Outreach to and Engagement with Paulette

Nicole reviews all available information in Paulette's electronic health record, any prior assessments (if Paulette is not new to case management), and reaches out, recognizing that Paulette's health needs require ongoing care and supports. Nicole successfully reaches Paulette and her mom, respectfully assesses their language preference and overall health literacy, and obtains consent to participate in case management. Nicole shares information about her role in coordinating care with Paulette's NOW support coordinator and encourages her to share how she is feeling about her current conditions, services, living environment, and needs.

On the call, they complete the health needs assessment to collect the most current information about Paulette's status, including her diagnoses, medications, services, and priority concerns about her condition and needs. Nicole quickly identifies Paulette's urgent SHCN, along with her mom's concerns. She works with Paulette to identify a time to meet face-to-face, if that is her preference; schedules an urgent appointment for the following day to address her wounds, pain, hypertension (HTN), and other needs; arranges accessible NEAT; and offers to attend the appointment with her. They also talk about her multidisciplinary care team (MDT) to make sure it is composed of participants of her choosing who will support her healthcare decisions, such as her mom, other family and friends, her PCP, and specialists.

Following their initial call, Nicole reaches out to the NOW support coordinator to gather additional information and discuss Paulette's health status, as well as the level of engagement the NOW support coordinator has with her. Nicole requests and reviews Paulette's previous screening and assessment results, Individual Nursing Service Plan and rehabilitation plan, and talks about the history of challenges associated with obtaining a new wheelchair. Healthy Blue's OCDD Liaison is also engaged to assure full communication with the State on Paulette's situation, progress, and quality of care concerns.

[redacted]

**IMMEDIATE NEEDS – WITHIN 24 HOURS**

- Nicole reaches out to Paulette and arranges an urgent appointment with her PCP to address her wounds
- Nicole arranges for the earliest in-home appointment possible with a seating and positioning specialist to address her current wheelchair needs
- Nicole assists Paulette in selecting and scheduling an appointment with a dental provider in her area who can meet her oral care needs
- With Paulette's consent, Nicole reaches out to her mother and NOW support coordinator to engage them on Paulette's multidisciplinary care team (MDCT) to assist in her assessment and care planning

LA_HlthyRebid21_2.6.7.6-7_24Hours_11_COB_04

[redacted]

[redacted]

Nicole presents Paulette's case in Healthy Blue's daily rounds with our integrated Case Management team, comprised of Medical Directors, a psychiatrist, licensed PH and behavioral health (BH) clinicians, nutritionist, and the OAAS Liaison to assure we address Paulette's needs, identify additional resources, and address any gaps in care. Nicole will also work closely with our board-certified physical medicine and rehabilitation (PMR) specialist, who consults with Healthy Blue on complex cases, to further discuss Paulette's case.

## Assessment and Care Planning with Paulette

Nicole recognizes the urgency of Paulette's current situation and closely monitors and helps coordinate all aspects of her care and safety. Once Paulette is experiencing some pain relief and is open to completing the person-centered assessment and her individualized POC, Nicole schedules a time to meet at her preference. Paulette may choose to meet telephonically, through videoconferencing, or face-to-face. With Paulette's consent, Nicole includes the individuals she has selected to participate in her care, including her NOW support coordinator. If Paulette wants her mom to attend and she is unable due to her two jobs, Nicole coordinates her to participation by phone or a video call.

## Completing the Person-centered Assessment with Paulette

Nicole meets with Paulette at her preferred location and time to complete the assessment. Nicole understands the barriers to communication associated with dysarthria, as well as other factors that may be contributing to her speech, such as tooth decay and a possible infection affecting her breathing. She deploys several techniques to communicate with Paulette, such as making sure the room is quiet, asking to sit closer to her, and making eye contact. Nicole works with Paulette to identify the ways in which it is most comfortable for her to communicate, such as speaking at a slower pace, using eye contact, nodding her head, using hand gestures, and using a communication board. Nicole discusses assistive technology solutions that may be available through Louisiana Assistive Technology Access Network with Paulette and her mom, including special-purpose computers, positioning devices, and power lifts, as well as non-traditional types of technology, such as a Ring doorbell that can provide added convenience and safety.

Having ordered Paulette's wheelchair, Nicole turns attention to her health status and well-being, prioritizing her PH concerns requiring immediate attention. This includes a social determinants of health (SDOH) assessment and functional assessment to identify pertinent issues related to Paulette's independence and ability to remain in her home, as well as a caregiver assessment for her mom. Based on Paulette's assessment results, and with her consent to request protected information, Nicole works with her identified MDT to capture current services and provider treatment plans. If Nicole has difficulty identifying providers, such as a PMR specialist or neurologist, Healthy Blue's Network Development team works to identify any provider network opportunities, such as providers open to expanding their services in other areas, or out-of-network providers to engage in a Single Case Agreement (SCA).

Nicole explains that Healthy Blue's case management team will support Paulette and her MDT through clinical rounds to assure all gaps in care are addressed. In addition, Nicole talks to Paulette about her member rights, how to ask for help when needed, and how to file a grievance or appeal related to quality of care and access to the most appropriate care. They also talk about the availability of Healthy Blue's Community Health Worker (CHW), who can help Paulette locate additional resources as her needs change. Using motivational interviewing techniques, Nicole helps Paulette voice her priorities and life goals, and together they discuss her most pressing needs, challenges, and barriers.

**Breathing, Swallowing, Dysarthria, and Speech Challenges.** Nicole talks with Paulette about her breathing and swallowing abilities and how those may be related to her speech concerns, including dysarthria, her cerebral palsy diagnosis, a possible infection, the need for speech therapy, or loss of teeth. They talk about the PCP appointment she attended and any referral recommendations, such as completion of a speech language and swallow assessment by a Speech Language Pathologist. They also discuss connecting her with a dentist who has experience in treating individuals with SHCN like hers, who can work to understand her medical history, while offering an office that is accessible and has adaptive equipment.

They talk about her Individual Family Supports through her NOW waiver that meet her daily dental needs through brushing and flossing, as well as taking her to routine appointments with a dental specialist. Nicole explains that Paulette's speech may improve through speech therapy and offers to identify a speech therapist or based on her preferences. Nicole also shares information on Healthy Blue's Adult Dental Services value-added benefit (VAB) that provides free dental care, including a complete exam, cleaning, and x-rays.

**SHORT-TERM NEEDS – WITHIN 7 DAYS**

- Nicole works with Healthy Blue's UM department to authorize an urgent request for Paulette's new wheelchair
- Paulette, Nicole, and other participants of Paulette's choosing participate on her MDT and support the assessment and care planning processes
- Nicole arranges in-home skilled nursing to treat her HTN and wound care and address her medication management
- Nicole works with our Provider Services department to engage a PMR and rehabilitation specialist (in-network or by SCA) to oversee her care

LA_HlthyRebid21_2.6.7.6-7_7Days_11_COB_05

**Skin Breakdown and Wheelchair Needs.** Nicole reassures Paulette that her new wheelchair has been ordered according to her preferences and the specifications from the seating and positioning specialist, and they review the recommendations from the PCP. This includes reducing the amount of time she is positioned in her wheelchair, using shower or tub baths instead of bed baths, improving her nutrition and caloric intake, and daily care for her wounds related to her positioning and contractures. Nicole identifies medications the PCP has prescribed, such as antibiotics, and makes sure prescriptions have been filled and that Paulette understands the directions. Nicole and Paulette discuss the lack of care and services from her Individual Support provider. With the NOW support coordinator, they identify an in-home provider who can provide supports up to 16 hours a day and some night services if needed. They also talk about the availability of in-home skilled nursing to treat her wounds and HTN.

**Cerebral Palsy, Scoliosis, Spasticity, and Hypertension Challenges.** Paulette confirms her experiences with back and hip pain, limited mobility, and other symptoms such as headaches, nosebleeds, fatigue, and confusion related to her hypertension. They talk about the recommendations for her conditions resulting from her PCP appointment, which may include physical and occupational therapy, adjustments to her baclofen, pain management, and skilled nursing, as well as NEAT for all her appointments. They also talk about what medications she is taking to control her symptoms and whether she is taking her medications as prescribed. Nicole provides information on identifying and selecting a neurologist in Paulette's area through a SCA or a PMR specialist who can treat most of her conditions associated with her cerebral palsy and scoliosis affecting her nerves, spine, joints, ligaments, muscles, and tendons, as well as oversee all her care in conjunction with the PCP. Nicole will communicate with the PMR specialist on a regular basis to make sure we arrange the right care for Paulette and her needs and address any gaps in care.

Joint appointments, telemedicine, and value-based incentives are designed to facilitate this collaborative care. Nicole assures ongoing coordination between Paulette's PCP and the PMR. Nicole talks about additional types of support available to alleviate her pain, such as Healthy Blue's Chronic Pain Management program, offered as a VAB, that provides adult chiropractic visits (to help address her scoliosis). Once Paulette is enrolled in the program, she would also be eligible for therapeutic massage, acupuncture, psychophysiological therapy, and/or epidural steroid injections, if Paulette's PCP determines that she would benefit from those evidence-based interventions. Nicole also explains that she may also receive therapeutic aids such as massagers and pain-relieving creams for increased comfort.

**Joint Contractures, Left Hip Dysplasia, and Baclofen Dose Challenges.** Paulette shares information about her neurologist and the challenges associated with appointments due to distance and transportation. Nicole explains this can be resolved by locating a PMR specialist or neurologist in her area even if the provider is out-of-network. Nicole also lets Paulette know that she is eligible to receive free accessible transportation to all her pain management appointments once she is enrolled in Healthy Blue's Chronic Pain Management Program. Feeling as though five appointments may not be sufficient to see progress before moving to a surgical procedure, they talk about her orthopedist, whether Paulette feels she was making progress in physical therapy, and her understanding of and thoughts about potential surgery. They discuss obtaining a second opinion with another orthopedist to assess her spasticity needs, as well as the potential outcomes of surgery, which may include an increase in movement and reduction in pain, but also may include a significant recovery period. They also discuss how the lack of baclofen adjustments may be contributing to Paulette's muscle stiffness and tightness, as well as talk about increasing mechanical stretching or trying alternatives to her current services.

[redacted]

**Behavioral Health Needs**. Given the history of lack of care and her current health conditions, Nicole understands Paulette may be experiencing conditions like depression, loneliness, or anxiety and completes a comprehensive BH assessment that includes screenings, such as the Patient Health Questionnaire (PHQ-9) for depression and Beck Anxiety Inventory (BAI) for anxiety. Nicole shares the types of services available to Paulette, which may include individual therapy, psychiatric services including medications, and support groups for people with chronic conditions. Nicole and Paulette discuss the availability of telehealth options to assure her access to BH providers is not dependent upon her mom's work schedule and transportation. Nicole also explains to Paulette that after she enrolls in Healthy Blue's Chronic Pain Management program, she is eligible to receive an annual Calm app subscription to help teach her mindfulness techniques to help alleviate her anxiety.

**Habilitation Service Needs.** Given Paulette attends her habilitation program five days per week and spends approximately 10 hours per day in her wheelchair only coming out for brief changes, Nicole questions whether this is the best habilitation provider for her. They talk about the relationships Paulette may have developed with her caregivers and how she feels about selecting a new provider who will assure her habilitation services are at a level that meets her needs, including being moved from her chair routinely every three hours.

**Routine and Preventive Care Needs**. They talk about the types of routine care and services in which Paulette is participating, including wellness checks, immunizations, and gynecological services. Nicole tells Paulette that one of her specialists can serve as her PCP if she prefers, thereby reducing the number of appointments to attend. They also work together to identify a gynecologist in her area, with an accessible office and examination room, who has experience with SHCN like hers.

**Environmental and SDOH Needs.** Nicole works with Paulette to complete an environmental assessment to identify the supports she already has in the home and what else she may need. This may include a Hoyer lift, bath chair, wound care supplies, and cushioned mattress. Nicole addresses her temporary wheelchair repairs and adjustments until the new one is received and connects her with accessible transportation for her appointments. This includes transportation to her NOW services, such as habilitation services and all medical appointments, as well as potentially adapting her mom's car to assist in accessible transportation. Nicole encourages Paulette to share any personal or social goals she may have, such as going to school, attending vocational rehabilitation to obtain employment, or participating in activities at a local community

center or church with other individuals her age. Nicole also talks about organizations that can provide financial options and emotional support for those affected by cerebral palsy, such as ARC of Louisiana and the Cerebral Palsy Foundation.

**Caregiver Needs and Supports.** During the person-centered assessment and care planning meeting, Nicole talks with Paulette's mom to identify any support needs she may have and how they can help reduce her stress level and make it more manageable to attend appointments. Nicole educates her on her daughter's conditions, needs, and how to ask for help or share concerns regarding her daughter's well-being and the healthcare Paulette is receiving. Nicole asks Paulette's mom if she could benefit from any respite or caregiver resources as she navigates attending appointments with Paulette and helps manage her care and services. They also talk about opportunities for Paulette's mom to be paid for caregiving, which will assist in providing additional income and may allow her to only work one job, as well as adapting her vehicle to accommodate her daughter's wheelchair through the waiver or Healthy Blue's Flex Funds to assist in Paulette attending appointments.

**LONG-TERM NEEDS – WITHIN 14 DAYS**

- Based on Paulette's preferences, the NOW service coordinator and Nicole arrange for a new Habilitation provider
- Nicole arranges for the assistive technology Paulette and Nicole identify as being needed and helpful in her home, such as power lifts and positioning devices
- Paulette and Nicole identify an orthopedist for a second opinion to assess her spasticity needs and surgery needs
- Nicole arranges for individual therapy for Paulette to address potential depression, loneliness, or anxiety

LA_HlthyRebid21_2.6.7.6-7_14Days_11_COB_01

### Developing Paulette's Person-centered Plan of Care

Led by Paulette and with input from her MDT, a person-centered POC is developed that reflects the assessment results, which includes Paulette's conditions, needs, goals, and preferences, as well as the services, supports, providers, and resources that will help her achieve her goals. Nicole works with our Case Management and UM teams to plan accordingly for the PCP to request services to make sure Paulette gets what she needs quickly. Nicole assures all services requiring authorization are approved and attends daily clinical rounds with Healthy Blue's integrated Case Management team to address any gaps in care and identify additional resources to meet her needs.

As part of the POC, Nicole works with Paulette to develop a crisis plan that incorporates what she should do in urgent situations, such as providers not showing up for scheduled appointments, equipment failure, and when she has questions, is feeling ill, or feeling overwhelmed. This may include contacting her mom, Nicole, her PMR specialist or BH provider, and Healthy Blue's Member Services Line, 24/7 Nurse Line, and 24/7 BH Crisis Line.

## 2.6.7.5.2 Improving Access to Assure Timely Service Delivery

Given the quality of care, gaps in care, provider network, and communication issues that have negatively affected Paulette's health and well-being, Nicole files a detailed report to Healthy Blue's Quality Management team for a quality of care review, which examines all medical records and Paulette's utilization history, including the dated requests for wheelchair(s) and determines if a report to adult protective services and LDH is needed.

Our quality of care review process results in the following systemic solutions:

- Assuring that all Case Managers and providers are educated on policies and procedures related to NEAT benefits and VABs for Paulette and other non-ambulatory members
- Increasing the use of telehealth and MDT team meetings for the coordination of care
- Assuring collaboration of care between Paulette's PCP with waiver service providers and integration of PMR consultants in the care of members with clinical presentations like Paulette's
- Value-based incentives to improve the quality of care for members with SHCN and training on implicit bias which may lead to health disparities in members with developmental and physical challenges

To assure Paulette has continued access to the services and supports identified on her POC, Nicole works with Paulette to develop a contact plan based on her preferences, which includes frequency and modality, such as in-person, telephonic, text, and email contact. Nicole also identifies providers who have after-hours and weekend availability, as well as telehealth capabilities to assure she has a variety of options for accessing her care.

Nicole works with Paulette and the NOW support coordinator to schedule routine MDT meetings, inviting Paulette's self-selected participants, at least every 30 days or more often to update her POC as she progresses in care, as her needs change, and based on her preferences. Nicole assists Paulette in scheduling appointments, arranges NEAT as needed, and follows up after her appointments by reaching out to Paulette and her providers to make sure she is attending appointments and identifies any additional recommendations, such as the orthopedist second opinion recommending a change in provider or a referral from her dentist to an orthodontist to address her oral needs. This also includes completing a reassessment should Paulette experience a decline in her PH or BH needs or experience changes in her caregiving or SDOH needs.

## 2.6.7.8 Reducing Complexity for Member Access to Needed Care

Healthy Blue's clinical expertise and focus on adolescent health and behavioral health (BH) through an integrated approach, as well as our case management process, robust provider network, and creativity in meeting each member where they are, provides for effective care for youth with high-risk conditions and behaviors and their families. Meeting each member's unique and urgent needs sometimes includes creating a single case agreement (SCA) with an out-of-network provider to address the member's specific person-centered treatment plan requirements.

## 2.6.7.8.1 Addressing the Acute and Chronic Components of Kyra's Care Needs

Given the seriousness of Kyra's needs, both immediate and ongoing, our Case Management team identifies her with Special Health Care Needs (SHCN), assigns a Tier 3 Intensive Case Management level, and engages a Case Manager for immediate outreach. Our Case Manager, Tina, is a licensed mental health professional with experience and training in trauma-informed care, motivational interviewing and working with youth with high-risk behaviors, including eating disorders.

Based on training and experience with this population, Tina understands that individuals who have accessed care for an eating disorder may not get the intensity or length of inpatient treatment they need to stay in recovery following discharge. If the member has not received the right treatment in the right duration with the right supports, it makes it difficult for the member and family to maintain progress long-term. Tina reviews Kyra's care and participation in services through Healthy Blue's case management system, Health Intech, which provides a holistic view of her care with Healthy Blue, and the Elli™ platform, which allows us insight into care she may have received under another MCO. Based on her review, Tina understands the member's urgent needs and reaches out immediately to Kyra and her parents to:

- Discuss Kyra's current health status and well-being.
- Support Kyra in sharing her understanding of the seriousness of her condition and her willingness to engage in the care, services, and supports she needs for recovery.
- Support Kyra's parents in their concern for and commitment to their daughter's health, safety, and recovery.
- Schedule an urgent appointment with Kyra's PCP to assess her medical needs and provide recommendations for her ongoing care.
- Offer Kyra's pediatric psychiatrist, who has an established relationship with Kyra, our free Telehealth OS solution that allows providers to have HIPAA-compliant virtual services. If the provider is unable to do so, we will educate the parents about the availability of One Telemed services, providing access through telemedicine to licensed psychologists, therapists, clinicians, dietitians, and psychiatrists with expertise in eating disorders. If Kyra and her parents prefer to change providers and work with one in-person, we will help to locate a pediatric psychiatrist between 15 to 30 miles from the family home, which may require a SCA, and arrange an urgent evaluation and recommendation for her care.
- Identify a private-pay nutritionist or dietician in their area who can engage immediately with Kyra and family to begin offering nutritional evaluation, counseling, education, and meal-planning services — for example, ***Healthy Blue negotiated an SCA with a nutritionist and a local eating disorder specialist for a member from Houma, with similar needs as Kyra upon discharge from an inpatient eating disorder program***.
- Schedule a time for Tina to meet with Kyra and her parents at a time and place of their preference.

Given the State's overall gaps in inpatient and psychiatric residential treatment facilities (PRTFs) for eating disorders, Healthy Blue's Network Development team will work to identify out-of-network providers as close to the family as possible, with whom we can engage through a SCA. This includes researching the appropriateness of and outreaching to the facility that was recommended to the family. All licensed PRTF facilities are in the Healthy Blue provider network and 100% of our members have access to a Louisiana PRTF if needed.

### KYRA – 13-YEAR-OLD AND HER FAMILY

Individuals struggling with eating disorders often need intensive specialized treatment, which can often be difficult to locate. Kyra's declining health and recent hospitalization creates an urgent need to engage the family, assess her current needs and the types of progress in previous treatments, and work with the family to determine the best option for Kyra's care, whether in-state or out-of-state.We have long-standing relationships with providers, in and outside of our network and Louisiana, and collaborate with them to develop strategies that are tailored to the individual needs of members with similar needs as Kyra, which includes an integrated approach with support from her Case Manager, Tina, to address her physical and behavioral health needs concurrently.

LA_HlthyRebid21_2.6.7.8_Kyra-Scenario_11_COB_04

### IMMEDIATE NEEDS – WITHIN 72 HOURS

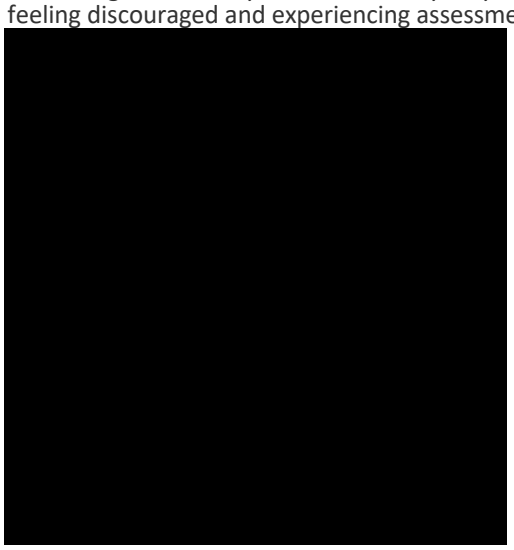
- Tina reaches out to the family to discuss Kyra's well-being
- Tina arranges a telehealth session with Kyra's pediatric psychiatrist through One Telemed
- To begin identifying treatment options and a new psychiatrist closer to the family home, Tina begins working with our Provider Services department

LA_HlthyRebid21_2.6.7.8_72Hours_11_COB_01

With consent from Kyra's family and prior to their meeting, Tina reaches out to the previous treating hospital, psychiatrist, and PCP to gather more information on her progress in care, previous assessment results, discharge plan, and participation in after-care following discharge.

## Completing Kyra's Integrated, Person-centered Assessment

Tina recognizes that Kyra and her family may have participated in several screenings and assessments and may be feeling discouraged and experiencing assessment fatigue, as well as not have the information they need to make informed decisions for their daughter's care. When meeting with the family, Tina encourages the family to share their feelings about Kyra's illness and the stress they may experience being away from her previously and potentially again.



Tina empathizes with them and reassures the family that we will work with them and her providers every step of the way to support every aspect of their daughter's treatment and recovery. Tina understands that families of individuals with eating disorders often experience a variety of feelings, such as shame, guilt, and believing that the individual has the ability to control their behaviors. As a result, she works to help them understand that anorexia is a complex illness that results from a combination of biological, psychological, and environmental factors and requires a holistic care team of BH, physical health (PH), and nutrition experts to identify and wrap the member with the services she needs.

Using motivational interviewing, Tina gathers information from the member and parents about her hospitalizations, including anything that stood out for Kyra as being significant or helpful in her progress. This may include individual and family outpatient therapy, such as Functional Family Therapy (FFT), Cognitive Behavioral Therapy (CBT), and Eye Movement Desensitization and Reprocessing (EMDR) therapy, medication adherence, and follow-up appointments with her PCP and psychiatrist. They also discuss any services her parents have engaged in, with her or on their own, such as family therapy and support groups.

Together, they work to identify and understand social, physical, genetic, and psychological factors related to her eating disorder. This includes talking about Kyra's biopsychosocial history, including pediatric care (immunizations, wellness care), major illnesses, behavioral concerns (obsessive-compulsive disorder [OCD], anxiety, and body dysmorphia), eating behaviors, school performance, extracurricular interests, and social relationships (including bullying). They talk about any adverse childhood experiences, such as family violence, divorce or separation, and emotional, physical, and sexual abuse. They also talk about the ways in which Kyra was disciplined and for what types of behaviors. The family shares any social determinants of health (SDOH) that may have affected the family while Kyra was growing up or may be experiencing currently, such as housing, food, and financial security.

**SHORT-TERM NEEDS – WITHIN 7 DAYS**

- Through an in-person meeting, Tina assesses Kyra's and her family's needs
- Tina talks with Kyra and her family about treatment options, including inpatient and outpatient services
- Led by the family, Tina develops Kyra's plan of care that includes out-of-state inpatient services

LA_HlthyRebid21_2.6.7.8_7Days_11_COB_01

## Developing Kyra's Multidisciplinary Team

During the assessment, Tina talks to the family about developing a multidisciplinary care team (MDT) that is comprised of professional and non-professional individuals of their choosing that will assist them in developing a Plan of Care (POC) that meets their needs. This includes Kyra's and her family's strengths, needs, goals, and preferences, as well as the providers and services they choose to meet their goals.

They discuss the family's natural supports who they would like to participate, such as family members, friends, and teachers. Tina, the Case Manager, shares additional options who can help with identifying and accessing providers, services, and resources, such as Kyra's pediatrician and psychiatrist, as well as others such as a therapist, nutritionist, facility staff, and Healthy Blue's Medical Director, depending upon Kyra's and the family's choices for their care pathway. This may include an intensive outpatient program (IOP) with wraparound services in the home or inpatient treatment, with a discharge plan for assuring a safe and successful transition home or a step-down opportunity before returning to make sure Kyra and her family have the tools they need.

## Developing Kyra's Holistic, Person-centered Plan of Care

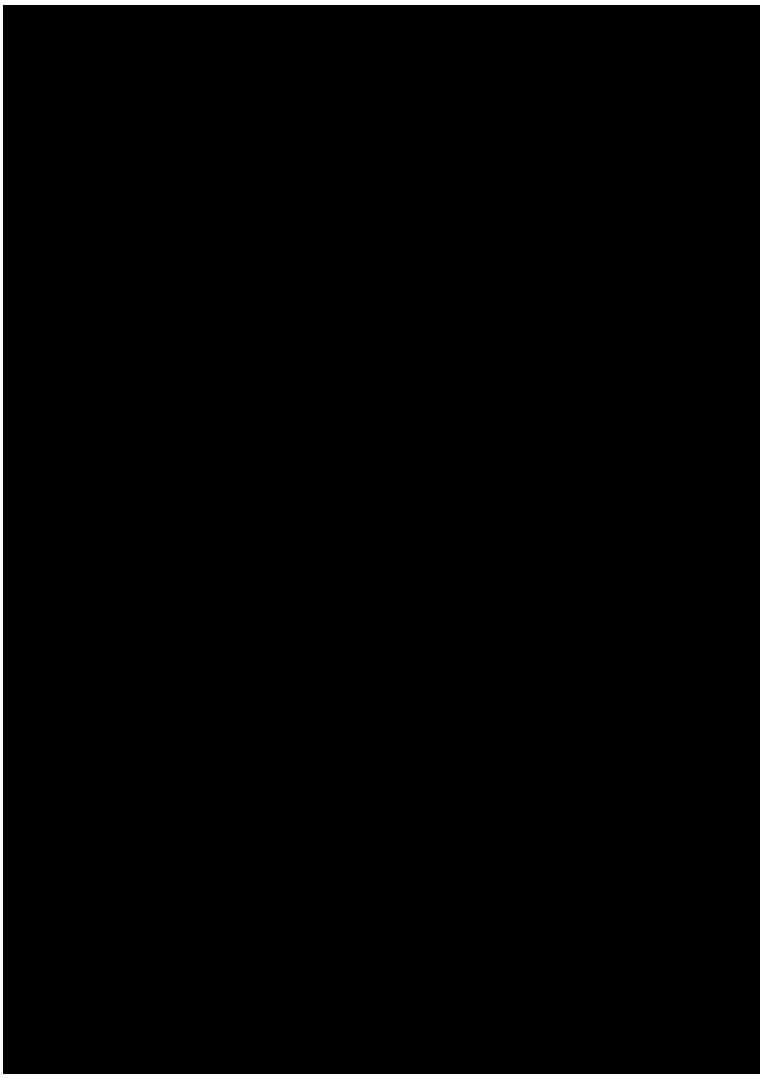
Led by the family, the MDT talks about identifying and arranging for services and supports during the process of the family determining the most appropriate environment for Kyra's care. Depending on the recommendations from her pediatrician regarding her health and safety, Kyra's care pathways may include IOP, OP with wraparound

services through Children's System of Care or inpatient care. Tina shares that while Healthy Blue will work diligently to locate in-state supports and services, if we are unable to locate in-state supports and services, we will look for out-of-state providers that are best suited to her needs, including the eating disorder center recommended to them in another state.

Regardless of the location of the member's treatment, Tina will conduct simultaneous care planning activities to assure we quickly engage her care, including:

- Assuring the pediatrician feels her acute needs are now stable and the provider has all the information needed to help drive the best chronic care Arranging for a psychiatrist with expertise in eating disorders to evaluate Kyra's needs
- Engaging a nutritionist, such as through Children's Hospital New Orleans or a Federally Qualified Health Center in the family's area and identifying opportunities for tele-nutrition services

Engaging Kyra and her and parents in evidenced-based interventions, such as FFT, CBT, or EMDR therapy. Family therapy may be helpful depending on the causes of Kyra's anorexia and how the parents are dealing with the situation. Requesting that Kyra's psychiatrist complete the Child and Adolescent Level of Care Utilization System (CALOCUS) to assist in identifying the most appropriate level of care for Kyra. Identifying additional resources for the family, such as the Ochsner Clinic Foundation, which offers online support groups for families and Kyra and nutritionist services, or the National Eating Disorder Association that can help identify providers in the area with eating disorder expertise. Working with the family to determine the best care pathway for Kyra based on her treating physicians' recommendations, such as in-state outpatient treatment with an eating disorder specialist with wraparound services in the home, inpatient, or PRTF treatment. Understanding Kyra and her parents may be hesitant to be away from one another again, Tina discusses the ways in which we can facilitate contact, through telephonic, video conferencing, and in-person visitation. Tina also talks to the family about the engagement of Healthy Blue's MDT that will review Kyra's and family's needs during daily case rounds to identify any gaps in care and support discharge planning to assure a safe and successful transition home. The MDT is comprised of our Medical Directors, Case Management and Utilization Management Clinicians, a nutritionist, and a psychiatrist who can brainstorm on ways in which we can support Kyra and her family.



## Arranging for and Monitoring Services on Kyra's Plan of Care

Depending on the recommendations from Kyra's treating physicians, Tina speaks with Kyra and her family about the two potential care pathways for her ongoing care, as described in Table 2.6.7.8-1.

*Table 2.6.7.8-1. Care Pathways for Kyra Based on Her Treating Physicians' Recommendations*

| Level of Care | Tina's Responsibilities |
|---|---|
| **Outpatient Treatment with Wraparound Services** | ▪ Arranging for her pediatrician to complete a full evaluation, including blood work to identify low levels, such as calcium, sodium, and potassium, as well as an EKG to determine Kyra's heart functioning<br>▪ Identifying and arranging a SCA with an IOP eating disorder specialty program that provides individual and group programming that will educate her on her illness, help her develop coping, self-management, and relapse prevention skills, and prepare her for returning to her home and community<br>▪ Engaging a psychiatrist with eating disorder expertise in Kyra's area that can identify and address any medication needs<br>▪ Selecting a therapist with eating disorder and CBT or FFT expertise that works with Kyra and her family to identify and understand distorted thinking that causes and perpetuates specific food and weight related behaviors<br>▪ Arranging for a nutritionist or dietician, locally or through telehealth, to assist Kyra in addressing distorted and irrational thinking about food and weight; exploring feelings related to hunger and fullness, metabolism, and body image; and learning to plan meals that addresses Kyra's lack of important nutrients, such as carbohydrates, protein, fats, vitamins, minerals, and fluids<br>▪ Addressing any SDOH through community-based resources, such as making sure the family has access to nutritious foods by registering with Supplemental Nutrition Assistance Program (SNAP) and financial resources by applying for Supplemental Security Income (SSI)<br>▪ Helping the family manage and understand Kyra's treatment plan and complications surrounding her condition, we work with Families Helping Families and offer BH peer supports when it is appropriate<br>▪ Sharing information on the Coordinated System of Care (CSoC) that may prevent out-of-home placement by providing structured, wraparound services and helping them determine if this is an appropriate alternative for Kyra and her family |
| **Inpatient Treatment** | ▪ Identifying and securing Medicaid treatment facility that specializes in the medically necessary services Kyra needs (out-of-state if in-state is not an option) — if unable to do so, working with key Healthy Blue departments to follow State policies and procedures for executing a SCA and reimbursement plan with a non-Medicaid provider<br>▪ Working with Kyra to understand where she is going and what the facility will provide for her<br>▪ Identifying and arranging the supports the family may need, such as providing transportation for Kyra and a family member accompaniment to the facility, arranging family participation in services through telehealth<br>▪ Initiating discharge planning with Kyra, parents, and facility staff upon her admittance<br>▪ Arranging for parent participation in family therapy and visitation with Kyra through video conferencing<br>▪ Participating in the facility's rounds for Kyra on a weekly basis to assure she is stable and making progress in her treatment<br>▪ Supporting the parents in preparing for their daughter's return home and continued recovery, such as engaging them in individual or couples therapy, attending support groups, and working with the nutritionist to better understand their daughter's condition, dietary, and meal-planning needs |

As part of the POC, Tina develops a crisis plan that supports the family in addressing urgent events, such as if Kyra's physical conditions worsen, including an urgent appointment with her PCP, taking her to urgent care, going to the emergency department, if appropriate, or calling Healthy Blue's 24/7 Nurse Line or BH Crisis Line. Tina also develops a contact plan with Kyra and her family that includes how often and in what modalities they will communicate (in-person, phone, text messages, and emails). Tina monitors Kyra's participation in services by reaching out to her and her family, talking to her providers, and reviewing provider claims.

If Kyra participates in treatment out-of-state, Tina works with the family and treatment center on discharge planning upon her admittance. Tina attends treatment center meetings that provide information on Kyra's participation in care and progress towards her goals, as well as develops a plan that supports a safe and successful transition home that includes wraparound services in the home to support her ongoing recovery.

Upon Kyra's completion of treatment, Tina arranges for her transportation home with a parent and follow-up appointments with her PCP for a well check and psychiatrist to address any ongoing medication needs aligned with the treatment center's recommendations.

Tina also arranges for ongoing therapeutic services, such as FFT or CBT, to continue the progress she has already made, supports the parents in making appointments, and arranges transportation if needed. Tina continually works with Kyra and her MDT to adjust her POC as her needs change and participates in clinical rounds to assure any gaps are identified and addressed.

## LONG-TERM NEEDS – WITHIN 2 WEEKS

- Tina works with our Case and Utilization Management teams to arrange for Kyra's admission and transportation to the facility
- Led by Kyra's parents, Tina arranges therapy and identifies a support group through Families Helping Families to better understand how they can support Kyra
- Upon Kyra's admittance, Tina works with the facility to arrange family visitation and participation in counseling and begins discharge planning

LA_HlthyRebid21_2.6.7.8_2Weeks_11_COB_01

## 2.6.7.9 Maximizing Member Health by Addressing Health Disparities

We recognize that sickle cell disease (SCD) is a genetic disorder that disproportionally impacts African American, Hispanic, Middle Eastern, Asian, Indian, and Mediterranean populations, which leads to additional health disparities, less access to healthcare resources, and worse health outcomes compared to other diseases. Healthy Blue works to address the challenges our members with SCD face, such as a lack of providers who specialize in SCD (particularly in rural areas); lack of provider training in implicit bias and health equity; barriers to obtaining appropriate pain treatment (often misinterpreted as drug seeking behaviors); and the use of treatments, such as hydroxyurea, that reduce the burden of the disease.

In our experiences supporting members with SCD, frequent emergency department (ED) use suggests that Alex is likely experiencing significant pain and has barriers to accessing the care needed to manage his conditions and symptoms. If Alex was enrolled with Healthy Blue, his second ED visit would have triggered a need for case management outreach through our person-centered **Elevate | Population Health** approach, which includes a comprehensive analysis to identify and prioritize health disparities and overcome challenges in our communities.

Recognizing Alex's distrust of the healthcare system, feelings of discrimination, and the role that implicit bias plays in the delivery of quality care to diverse populations, our focus on driving health equity complements our data-driven, evidence-based population health approach by addressing and eliminating racial and ethnic health disparities and improving access to resources affecting social drivers of health. In this model, we identify health disparities, determine root causes, deploy targeted interventions, assess effectiveness, and as indicated, refine our approach to optimize outcomes. In our communication with Alex, we will ask who he wants to be a part of his multidisciplinary care team (MDT) and encourage self-management of his Plan of Care (POC) and treatment goals. To meet Alex where he is, early and often, we use our Community Health Workers (CHWs) — who live, work, and are a part of the communities we serve — to engage and build a trusting relationship with him. Because he has experienced healthcare discrimination based upon his race, Alex is more likely to successfully engage with someone of the same race or similar ethnicity and/or someone who has received implicit bias training, as emphasized by our model, and has knowledge of the health disparities individuals may face across Louisiana.

### ALEX – 25-YEAR-OLD MALE

Alex has a complex medical history of sickle cell disease, acute chest syndrome, vaso-occlusive crises, avascular necrosis of the hip, and has experienced multiple strokes and suffers from chronic pain. In the past 6 months, he has had 10 emergency department visits for vaso-occlusive crises. Alex's experiences with racial discrimination, health disparities, and unstable housing and communication avenues are primary concerns that we will address early to promote his engagement in care. Healthy Blue understands and has proven experiences identifying and addressing SDOH impacting Alex's ability to access care for his physical and behavioral health needs. As we better understand the reasons and root causes of Alex's ED use, we anticipate that that there will likely be SDOH and behavioral health needs that we will need to fully understand so that we can offer support to implement the most appropriate interventions. By addressing his BH and SDOH needs, Alex's Case Manager, Sarah, can help him focus on the PH needs associated with his SCD.

LA_HlthyRebid21_2.6.7.9_Alex-Scenario_11_COB_02

## 2.6.7.9.1 Addressing Alex's Needs

Using our robust data collection and our Health Intech data analytic capabilities, we identify vulnerable populations and emerging trends, including combining race, ethnicity, and cultural information to address issues of disparity and equity. Our case management team also uses Elli, a risk intelligence solution, to review any previous service use history, such as physical health (PH) and behavioral health (BH) diagnoses, participation in mental health or substance use treatment, and prior ED visits and hospitalizations. Since Alex has 10 ED visits in six months, he will also trigger as a member with Special Health Care Needs (SHCN) and the intensity of outreach efforts increase to engage him in case management. Using the combination of internal and external information, including comprehensive data collection, and our assessment process collaboratively with Alex and his MDT, we assign Alex to Tier 3 intensive case management. The assigned Case Manager, Sarah, is a registered nurse with experience working with members with SCD and has significant cultural competency training that includes the understanding of health disparities in parishes across the State. In addition to the escalating pain and healthcare concerns, our case management approach focuses on the primary issues creating a significant barrier to care — Alex's mistrust of the healthcare system and identified health disparities, the exacerbation of SCD symptoms, and social support needs.

### IMMEDIATE NEEDS – WITHIN 72 HOURS

- Sarah reaches out to Alex and engages a CHW to go to his last known address
- Upon engagement with Alex, Sarah assesses the seriousness of his housing situation and begins developing a relationship
- Sarah provides a cell phone to Alex to improve communication and encourage his participation in care

LA_HlthyRebid21_2.6.7.9_72Hours_11_COB_01

### Reaching Out to Alex

First, our Healthy Blue team uses a person-centered and culturally sensitive approach in each of our interactions with Alex — recognizing

that each negative interaction that Alex has experienced has led to more distrust in the healthcare system. Our case management team receives comprehensive person-centered training that includes using motivational interviewing, understanding cultural biases and stereotypes, and ultimately building trust to assure a collaborative relationship with Alex. [redacted]

Given Alex's escalating conditions, Sarah knows it is essential to reach Alex soon. Due to his unstable housing, lack of a reliable phone, and distrust of the healthcare system, Healthy Blue deploys a comprehensive approach to locate and engage Alex:

- Engaging a field-based CHW or Navigator to go to Alex's last known address to connect with him — these efforts include going out on different days and different times to maximize opportunities to connect with Alex. Upon engagement, these employees will help guide Alex in navigating the healthcare system and linking him to the follow-up care that will improve his health outcomes.
- Proactively reaching out to the provider Alex last saw and the ED that Alex most commonly uses to request they notify Sara when Alex presents for services again — at which time, Healthy Blue will dispatch a CHW or Navigator to go to the provider office or ED to connect with Alex.
- Providing resources to Alex that will encourage him to engage in care, which includes providing him with a cell phone that will allow him to call his CHW or Navigator, Case Manager, providers, and others involved in his care, transportation to appointments, [redacted]
- Contacting the pharmacy where Alex obtains his medications, if he currently is taking medications, to request an alert when he presents with a prescription refill.
- Calling and sending postcards to Alex's last known address.

Our CHW reaches out to Alex in person and can complete the HNA and arrange an in-person meeting with Sarah, if she is having difficulty connecting with him. If we are only able to connect with Alex telephonically, Sarah first talks to him about his current well-being and identifies any urgent or emergent needs. If Alex is in crisis, Sarah offers to secure transportation for him to an urgent care or ED, if needed, and meet him there. If Alex is not in crisis, Sarah arranges a time and location of Alex's choice to meet in the community to complete the HNA and assessment, develop a POC, identify and schedule appointments with providers with SCD expertise, and arrange transportation if needed.

## Completing the Integrated Assessment with Alex

Sarah understands the importance of engaging Alex in a meaningful way initially to encourage his ongoing participation. This includes using active listening techniques to demonstrate his understanding and empathy for Alex's situation. Sarah encourages Alex to share his experiences with the healthcare system, including any racial or ethnic disparities, lack of providers with SCD understanding and expertise such as managing pain related to SCD, and reaction to being treated as a drug seeker. Sarah works with Alex to gather as much information as possible to understand his health literacy needs and inform his care planning, including what has worked for him, what has not worked, and when and by whom he has felt discrimination:

- **Current Medical Status.** Sarah talks to him about his current and previous symptoms and self-management skills, current and recent pain level, compliance with provider visits, recent ED use, and medication adherence.
- **Comprehensive Medical History.** Sarah realizes the complex PH needs associated with SCD and how Alex's history will help planning for his ongoing care, including:
  - Age of SCD diagnosis, onset of symptoms, and progression of symptoms
  - Family history of SCD and prognosis
  - Treatment participation as a child and treatment transition from youth to the adult system of care
  - Types of treatment providers, such as primary care, hematologist, pulmonologist, neurologist, cardiologist, retina specialist and frequency of care; stroke history and resulting complications
  - Self-care, such as adhering to medications as prescribed, receiving regular checkups, eating a healthy diet, staying hydrated, avoiding alcohol and smoking, getting adequate rest, and avoiding extreme temperatures
- **BH Needs (Mental Health and Substance Use Disorder).** Assesses and assures routine screenings for history of depression, anxiety, and self-harm ideation.

### HEALTHY BLUE RESOURCES AND INFRASTRUCTURE

In March 2021, in partnership with the Louisiana Public Health Institute, Healthy Blue hosted the first annual Symposium on Racial and Health Equity in Louisiana. The theme of the symposium was Achieving Racial Equity, and we brought together leaders from across the state to address topics including Systematic Racism and Implicit Bias in Public Health, the Poverty Cycle and Economic Development and Health, and Education, Criminal Justice, and Mental Health. To build upon the enthusiastic response to this symposium, we have launched a series of Racial Equity Learning Labs to increase understanding of health equity, social justice, and SDOH while building collective community strategies to create equitable practices, policies, and procedures that encourage and sustain diversity and positive changes.

LA_HlthyRebid21_2.6.7.9_Infrastructure-Partnership_COB_01

- **Social Determinants of Health (SDOH).** Identifies any barriers to Alex accessing needed care, such as unstable housing, food security, transportation, unemployment, economic stability, and education.
- **Community-based Resources.** Identifies necessary supports has Alex accessed through community-based organizations (CBOs), such as homeless shelters and food resources, as well as the Sickle Cell Association of South Louisiana, where he can be connected to certified sickle cell educators and receive peer support and advocacy.

[redacted]

To gather information and identify the best ways to support Alex, Sarah conducts an assessment, including the HNA (if it has not yet been completed in previous interactions with Alex) and a BH assessment. With direction from Alex, Sarah gathers information on the individuals in his life he would like to include on his MDT, who will support him in developing his POC and achieving the goals he sets for himself. This may include providers, family members, friends who allow him to stay with them, and CBOs who have provided him with resources.

## Person-centered Care Planning with Alex

Alex shares with Sarah his short- and long-term goals, which may include things like having providers that believe him when he tells them how he is feeling, learning to manage his health and pain better, obtaining permanent housing, and having lasting relationships and social interactions with family and friends. Sarah also incorporates Alex's strengths and preferences, as well as identifies needed providers with expertise in SCD in his area. The person-centered POC includes the following types of services, supports, and activities:

**Alex's SDOH Needs.** To better support Alex's engagement in the care he needs, Sarah first talks to Alex about the things that may be affecting when, how, and where he addresses his PH and any BH needs.

- **Housing Challenges.** Sarah talks to Alex about his barriers to safe and stable housing and the option of engaging Healthy Blue's Housing Specialist to determine possible housing solutions. The Housing Specialist will engage Alex in exploring and problem solving his current housing issues, including his needs, potential resources, and creative solutions, which may include reunification with family or friends, assistance with housing relocation, assistance with deposit or short-term rent through Flex Funds, or assistance with a referral to the local Continuum of Care's Coordinated Entry team for a housing assessment. Sarah may also consult with the Permanent Supportive Housing (PSH) Liaison to determine if PSH is a viable option for addressing Alex's housing needs.
- [redacted]
- **Additional SDOH Needs.** Sarah talks to Alex about other SDOH needs he may be experiencing, such as food and financial security, transportation, and employment opportunities. Sarah explains how she can assist Alex in accessing public benefits, such as applying for the Supplemental Nutrition Assistance Program (SNAP) and Supplemental Security Income (SSI) benefits if needed, as well as arranging transportation to appointments.

**Alex's PH Needs.** During the assessment and care planning process, Sarah learns more about why Alex is using the ED and works to determine and address the root cause. Sarah's priority for addressing each of Alex's PH needs are dependent upon the primary reasons he seeks emergency care. Sarah offers education, support, additional engagement opportunities to address those concerns or potential exacerbation of symptoms first. Our interventions include:

- Educating Alex on when to use the ED and other resources available to him, such as urgent care, the Healthy Blue 24/7 Nurse Line, and BH Crisis Line.
- Identifying and scheduling an appointment with a hematologist who can meet the healthy literacy and cultural needs of Alex who can act as or coordinate with his PCP; manage pain related to his vaso-occlusive crises, avascular necrosis of the hip, and chronic pain; and assure routine blood work. This may include the use of medications or other procedures, such as Adakveo® (crizanlizumab) infusion, allogeneic stem cell transplantation, or therapeutic apheresis.
- Scheduling appointments with a pulmonologist to address his history of acute chest syndrome and a neurologist to determine and address any long-term effects of his strokes.

- Making sure Alex receives education on and treatment for avascular necrosis of the hip, such as resting the joint, physiotherapy, the use of pain relief, and the availability of and complications associated with joint replacements, and bone grafts for people with SCD.

**Alex's BH Needs**. Sarah and Alex discuss any BH needs he may be experiencing, which may include depression, anxiety, and substance use that can often co-occur with individuals experiencing chronic conditions, struggling with pain, and as in this case, having experienced unfair treatment. They talk about options to support any BH needs, including trauma-informed individual therapy, Peer Support, support groups for individuals with chronic conditions, and psychiatric evaluation.

- **Offering Holistic Care and Community-based Supports to Alex.** We will connect Alex to any additional community-based supports that can better connect him in the community. In our experiences supporting members who have a distrust of the healthcare system, we will offer non-traditional supports such as alternative therapies and will cultivate a culture that encourages relationship development in a space that is culturally comfortable for Alex and can further build trusting relationships.
- Offering evidence-based non-pharmacologic alternatives to opioids for chronic pain management services through a pain management specialist and non-pharmacological alternatives,
- Engaging a nutritionist who can help educate Alex on his individualized nutritional needs based on his condition and living environment.
- Continuing the involvement of the CHW or Navigator to engage Alex to assist in locating additional community-based resources, such as the Sickle Cell Association of South Louisiana, and helping him navigate the system.
- Engaging our Member Advocate to assist Alex through the grievance and appeals process to address his history of discrimination and quality of care issues.

**Continued Engagement and Follow-up with Alex.** Sarah reminds Alex of his appointments, arranges for transportation, and participates in appointments upon Alex's request. Sarah explains the role of the Healthy Blue integrated case management team, made up of our Medical Directors, PH and BH clinicians, and other experts, such as a Nutritionist and Addictionologist. Alex's case is monitored daily through clinical rounds to assure Alex's needs are being met. This includes a reduction in ED visits, increased satisfaction with providers, improved medication adherence, and securing housing and a phone.

## 2.6.7.9.2 Systems and Policies That Support Alex Through Health Equity

Our focus on driving health equity complements our data-driven, evidence-based population health approach. We share LDH's goal to address health equity by focusing on improving population health and acknowledge that advancements in health equity can accelerate progress in addressing longstanding health disparities among groups such as African American members and rural residents. In our population health model, we identify health inequities, determine root causes, deploy targeted interventions, assess effectiveness, and as indicated, refine our approach to optimize outcomes. We promote health equity for Alex by:

- Assuring our grievance and appeals processes are culturally and linguistically appropriate to support our members in reporting racism, discrimination, and poor care quality
  - Informing Alex that we provide informational and educational materials in the language or alternative formats (audio, video, large print, braille) upon Alex's request
  - Assigning a Case Manager to Alex who is appropriate for meeting his health equity and disparity needs who has knowledge and experience working with SHCN, cultural competency training, and an in-depth knowledge of the parish challenges across Louisiana
  - Assuring Alex has access to culturally competent providers in our network that have similar ethnicity and spoken language as the populations we serve and the expertise to work with members with SHCN, even if it requires going out-of-network or using telehealth capabilities
  - Assuring our providers understand the challenges associated with pain management for individuals with SCD
  - Engaging Alex with CHWs who are trained in Peer Support principles, live and work in culturally diverse neighborhoods, engage members in case management, and connect them to resources in their communities
  - Offering and encouraging provider training on implicit bias and Health Equity
  - Reviewing and monitoring his care to identify any quality of care concerns

**LONG-TERM NEEDS – WITHIN 30 DAYS**

- Sarah provides Alex with education on appropriate use of the ED and alternatives in his community
- Alex and Sarah identify a nutritionist who can help him understand that affect of his daily diet on his conditions
- Healthy Blue's Member Advocate supports Alex in filing a grievance regarding his previous maltreatment

LA_HlthyRebid21_2.6.7.9_30Days_11_COB_01

### Healthy Blue's Health Equity Systems and Policies

Healthy Blue strives for our health plan staff and provider network to reflect the demographics of our membership. We have established policies and procedures, require staff and provider training that identifies and highlight any health disparities or discrimination indicators, and monitor quality data such as per race or location. We share LDH's goal to address health equity by focusing on improving population health and acknowledge that advancements in health equity can accelerate progress in addressing longstanding health disparities among groups, such as African Americans and rural residents. Our person-centered **Elevate | Population Health** approach incorporates health equity, cultural competence, and the influence of clinical and social factors on outcomes.

**Provider Cultural and Linguistic Appropriateness Through the Louisiana Health Equity Framework.** We understand that a diverse and culturally competent provider network can help build trust, reduce disparities, and improve health outcomes. Healthy Blue is dedicated to contracting with providers and other health professionals who value and are committed to serving a diverse population, and meet the cultural, ethnic, racial, and linguistic needs of all enrollees. To support this effort, we provide cultural competency training during provider orientation and on an ongoing basis in a variety of formats (webinars, online resources available in the provider portal, individual and group training, and more). MyDiversePatients.com — a unique collaboration between our parent company, Anthem, Inc. and Training Systems Design, Inc. — also serves as a provider resource, including trainings on topics like Reducing Healthcare Stereotype Threat and Building Trust.

**Health Equity Training Program for Employees and Contractors.** Healthy Blue has developed and implemented a variety of training programs focused on health equity. For example, all Healthy Blue staff and contractors are required to participate in the ***Becoming Culturally Competent*** training upon hire and must complete an annual refresher course thereafter. This training helps staff understand that delivering services to people of all cultures, races, ethnic backgrounds, sexual orientations, disabilities, and religions must occur in a manner that recognizes, values, affirms, and respects the worth and dignity of all. It also helps employees understand health equity is a lens that can help them rethink their interactions and the way they approach their work. Training topics such as cultural responsiveness, benefits of cultural competency, government regulations, overarching values, language resources, health-related beliefs, and cultural-specific health disparities.

# 2.6.7.10 Improving Outcomes for Pregnant Women with Substance Use Issues and Their Babies

Healthy Blue is committed to improving outcomes for pregnant women with substance use disorder (SUD) issues and their babies through a sensitive, holistic, and non-judgmental collaborative approach that begins with securing a strong rapport and trust with the member. This rapport and unconditional positive regard is crucial to engaging the member in high-quality, timely, and well-coordinated prenatal and postpartum care, specialized substance use treatment, mental healthcare, and health education. We are continually building our programs to support the member and provider, encouraging the use of evidence-based practices and tools to improve care and decrease risks associated with substance use during pregnancy.

## 2.6.7.10.1 Identifying and Engaging Nia Using Our Healthy Blue Systems

### NIA – 25-YEAR-OLD PREGNANT WOMAN

Pregnancy, coupled with mental health conditions, substance use, and high social determinants of health (SDOH) needs, can create an extremely stressful situation that may exacerbate Nia's feelings of discomfort, fear, and being overwhelmed. We recognize the importance of meeting Nia where she is and that it will take some time to earn her trust. As a result, her assigned OB Case Manager, Brianna, will be careful to use motivational interviewing techniques, such as honoring periods of silence and showing empathy through reflective listening, during interactions with her to begin developing a relationship and gather enough information to prioritize her needs and engage her in care, services, and supports for her and her baby.

LA_HlthyRebid21_2.6.7.10_Nia-Scenario_11_COB_03

Early identification is key to engaging Nia in the care she and her baby need to promote a healthy pregnancy outcome. If Nia is new to Healthy Blue, she will be identified upon enrollment through our predictive modeling process that identifies her pregnancy and multiple substance use-related emergency department (ED) visits, which trigger immediate notification to our Case Management team. We also have additional reports that may identify her, including our Special Health Care Needs (SHCN), previous preterm pregnancy, diabetes, SUD, and hypertension reports.

We may also identify her pregnancy through real-time admit, discharge, and transfer (ADT) alerts, the Notice of Pregnancy process, our SCHN report, claims data analysis, the results of the health needs assessment, and from referrals. Referrals may be both internal (Member Services staff, the 24/7 Nurse Line or Behavioral Health [BH] Crisis Line, Case Managers, and Utilization Management staff) and external (member self-referral, family members, providers, external case managers, and agencies).

Using data analytic capabilities and our robust data collection through Health Intech, we identify vulnerable populations and emerging trends, including combining race, ethnicity, and cultural information to address issues of disparities and equity. Upon notification, our Case Management team reviews service use history, such as physical health (PH) and BH diagnoses, participation in mental health or substance use treatment, ED visits and hospitalizations, medications, and previous pregnancies, including prenatal and postpartum care. Nia is assigned to Tier 3 case management and an OB Case Manager, Brianna, who has BH expertise and is experienced in trauma-informed care. Brianna has access to our integrated Case Management team for consultation, which includes our Medical Directors, PH and BH clinicians, and [redacted] to make sure pregnant moms' and their babies' needs are identified and met.

### Engaging Nia in Needed Care for Her and Her Baby

Given Nia's unstable housing situation, opioid use disorder (OUD), and serious and persistent mental health conditions (Schizoaffective Disorder/Major Depression with psychosis), Brianna mobilizes multiple avenues to reach and engage her, including using our outreach program that encourages women to seek prenatal services during the first trimester of pregnancy. Our Healthy Blue **Elevate | Advancing Maternal & Child Health** approach provides a comprehensive suite of culturally competent solutions dedicated to promoting and supporting the health of our pregnant members and their babies. Since Nia's pregnancy is high-risk due to her substance use, comorbid mental health conditions, and lack of safe and stable housing, Brianna's immediate focus is Nia's safety and connecting her with prenatal care, a BH specialist, and our Housing Specialist to address these needs quickly. This may include encouraging a fully integrated setting to maximize collaboration between providers, such as a Federally Qualified Health Center near Nia's current living situation. If multiple providers are involved in her care, we obtain consents for communication as early as possible.

[redacted]

Our Member Services Representatives and Brianna reach out to Nia telephonically at different times and on different days, three days a week for three months until we reach her. Brianna engages a Community Health Worker (CHW) with Peer Support training to go to

Nia's last known address to engage her, as well as connect with community-based organizations (CBOs) that provide holistic services for individuals with substance use issues, such as Odyssey House, Claire House, or Grace House. Brianna also reaches out to her previous providers, pharmacies where she fills medications, and the EDs she has visited to request staff alert Healthy Blue if she presents for services.

**Using Prenatal and Postpartum Programs to Engage Nia.** Brianna's priority is to work closely with Nia to develop a trusting relationship, help her understand the effects of substances on her and her baby, meet her where she is to engage in care, and provide her with information on the programs, services, supports, and resources available to her. [redacted] Based on Nia's preferences, and ongoing motivational interviewing and assessment from Brianna for readiness to change, she will also be connected to needed OUD services that will be simultaneously coordinated with her prenatal and postpartum services and includes services, such as medical assisted detox, MAT, intensive outpatient, inpatient, and Peer Support services.

**HEALTHY BLUE RESOURCES AND INFRASTRUCTURE**

Healthy Blue is committed to bringing Mindoula's StrongWell™ program that offers their Substance Exposed Pregnancy program, which has two parallel lines of services. The program focuses on specialized urgent care designed to support pregnant women with opioid use disorder and substance use disorder (OUD/SUD) in safely stabilizing their medication through Medication Assisted Treatment (MAT) and addressing SDOH needs prior to the birth of their babies. Longitudinal support through StrongWell behavioral health (BH) care teams, comprised of 24/7 tech-enabled counselors, peer advocates, nurses, and resource navigators, will work with Healthy Blue members and Case Managers to reduce the occurrences of NICU, inpatient, and ED use, keep families together, reduce long-term developmental issues, and act as a natural extension of the care and support provided to substance dependent pregnant women across the State.

LA_HlthyRebid21_2.6.7.10_Infrastructure-StrongWell_COB_02

## 2.6.7.10.2 Prioritizing and Addressing Nia's Needs

Brianna works with Nia to identify and prioritize the care and services that address her needs based on her choices for her pregnancy, addiction, and mental health needs. Understanding the risk of losing touch with Nia following their meeting, Brianna first identifies any needs that warrant emergent intervention and works with her to complete a person-centered assessment, develop her Plan of Care (POC), and arrange for services in one sitting.

### Completing the Assessment with Nia

They start by discussing Nia's safety and her current substance use, including the last time she used, what substances she is using, any symptoms she is experiencing at this time, and her readiness to change. The also talk about any symptoms Nia may be experiencing related to her BH diagnoses, such as delusions, hallucinations, episodes of depression, manic periods of high energy, self-harm ideation, and any other medications she is taking, prescribed or otherwise. Brianna supports her in identifying any natural supports and resources she has, including family, friends, and any community-based programs whose resources she accesses, such as shelters for pregnant women, soup kitchens or food pantries, and clothing assistance.

Brianna shares with Nia the risks of her opioid use on her pregnancy, including poor fetal growth, preterm birth, stillbirth, and birth defects, which may include a NICU admission for neonatal opioid withdrawal syndrome (NOWS). Brianna recognizes Nia may also have other children and talks to her about how her children and new baby can be Healthy Blue members and receive the services they need, including EPSDT, Early Steps, and dental care. They also discuss how we work closely with the Department of Children and Family Services (DCFS) to support families in the home by providing wraparound services and supports to prevent out-of-home placement. Brianna also helps Nia understand that if her baby is born exposed to substances, the hospital is required to notify DCFS to assure the baby's safety and other children who may be in the home.

### Prioritizing Nia's Needs Based on Her Assessment Results

***Working with Nia, Brianna develops an integrated, person-centered POC that prioritizes her needs, which may be fluid, occur simultaneously, or be addressed in succession based on her care pathway choice for herself and her pregnancy.*** For example, if she chooses to engage in inpatient services for her substance use, then her housing needs become secondary to other needed services. However, if she chooses to participate in outpatient treatment, addressing housing is primary, along with other SDOH, such as food security, transportation, and financial security. Brianna also works with Nia to identify people she would like to participate in her healthcare decisions through a

multidisciplinary care team (MDT), which may include natural supports, such as family, friends, and neighbors, as well as providers, Peer Support Specialists, CBOs, and CHW.

**PRIORITY ONE — Nia's Engagement in Services and Supports That Address Her Safety and Honor Her Choices.** The severity and specific needs related to her OUD, benzodiazepine use disorder, and stimulant use disorder, in addition to co-morbid schizoaffective disorder and major depression disorder with psychotic features, are unknown. Brianna works with Nia to select an OB-GYN and the appropriate BH specialists who can assess what types of substance use and mental health treatment options are the safest for her and her baby. We recognize that different BH treatment options may be recommended based on factors such as her willingness to participate, how far along she is in her pregnancy, and type, amount used, and quantity of the substances currently in her system.

**SHORT-TERM NEEDS – WITHIN 7 DAYS**

- Brianna helps Nia select an OB-GYN and schedule an appointment for a prenatal evaluation to determine her and her baby's well-being and ongoing needs
- With Nia's consent, Brianna schedules an appointment with a BH provider to assess her needs for OUD/SUD treatment, including MAT for detox and pain management
- Brianna engages a Peer Support Specialist through the LGE in Nia's area to support engagement in services

LA_HlthyRebid21_2.6.7.10_7Days_11_COB_04

In addition, Nia's current lack of stable housing creates safety concerns for her and her baby and any additional children she may have. Brianna immediately engages Healthy Blue's Housing Specialist and Permanent Supportive Housing Liaison to assist in identifying safe and stable housing options for Nia. Brianna helps Nia understand the housing options available to her, including completing and submitting applications for housing, such as for Permanent Supportive Housing (PSH), Housing Choice Voucher program, and the American Recovery Act for housing and utility services. [redacted] to that are available to her including Mental Health Rehabilitation services such as Community Psychiatric Support and Treatment, Assertive Community Treatment, Psychosocial Rehabilitation, and crisis services so that she remains in the community.

**PRIORITY TWO — Nia's Engagement in Holistic Healthcare for Her and Her Unborn Baby.** Brianna works with Nia to understand that babies of mothers who do not get prenatal care are three times more likely to have a low birth weight and five times more likely to die than those born to mothers who do get care. Helping Nia understand the importance of OB healthcare is one of Brianna's priorities. They talk about prenatal care reducing the risks during her pregnancy and increasing the chances of identifying any problems or complications before they become serious, as well as what to expect in prenatal appointments. Priority services include the following:

- **Prenatal BH Care.** Brianna shares information about the importance of monitored detoxification during pregnancy, if clinically indicated, and talks to Nia about her willingness to participate in services to assure her and her baby's safety. Brianna stresses the importance of recovery and shares information about the opportunities following detox to participate in inpatient treatment or an intensive outpatient program (IOP). If a full detox is not recommended, Brianna talks to Nia about the benefits of MAT during pregnancy, with the goal of participating in an inpatient treatment and recovery center after her baby is born. While multiple care pathways offer a variety of services to assist her in her recovery, inpatient treatment offers her a safe and structured environment to allow Nia to focus just on her, her baby, and her recovery.
  - Regardless of the setting (outpatient or inpatient), services may include individual and group counseling, OUD/SUD education, 12-step recovery programs, coping skills development, relapse management, peer support services through the Local Governing Entity (LGE) in her area, and parenting education. Based on Nia's choice, Brianna helps her identify a program and schedules an intake appointment and helps Nia select a psychiatrist in her area to evaluate her symptoms and medications that can be safely used during pregnancy. Brianna schedules appointments and arranges for transportation, as needed.
  - If Nia chooses inpatient treatment, Brianna begins discharge planning upon her admission and assures needed services are available upon her transition from the facility. This includes arranging for aftercare services that support her recovery, such as relapse prevention, follow-up appointments with her Psychiatrist, Peer Support Specialist, and making sure that SDOH needs are addressed.
- **Prenatal Care.** Brianna assists Nia in selecting a PCP or OB-GYN (who can serve as her PCP) to address any current medical issues, such as potential cardiovascular, hepatitis, gestational diabetes, and malnutrition needs. Brianna makes sure Nia's selected provider is trained in trauma-informed care and experienced in substance use and arranges a schedule of prenatal care appointments for Nia based on how far along she is in her pregnancy. Brianna helps Nia apply for Women, Infants, and Children (WIC), Supplemental Nutrition Assistance Program (SNAP), and Supplemental Security Income (SSI) as appropriate. While supporting Nia in her recovery-based services and supports, Brianna simultaneously works with her and her OB-GYN to assure

Nia receives educational materials on pregnancy and childbirth in her preferred language and at her literacy level, as well as participates in prenatal care and preparing for delivery. This includes attending appointments, nutritional counseling, taking prenatal vitamins, going to birthing classes, and finding a pediatrician.

- Healthy Blue offers a whole-person approach for chronic pain management using evidenced-based treatment modalities — specifically when decreasing opioid use. Brianna works with our integrated Case Management team to identify non-pharmacological alternatives, such as acupuncture, chiropractic care, massage therapy, epidural steroid and other pain-alleviating injections, medical hypnotherapy, osteopathic manipulative treatment, and biofeedback techniques.
- [redacted]

**PRIORITY THREE — Nia's Engagement for Holistic Healthcare for Her and Her Baby Postpartum.** Brianna helps Nia understand that her continued participation in care is essential to her well-being and that of her baby and recommends the following:

- **Postpartum BH Care.** Brianna supports Nia in continuing to participate in services with her psychiatrist, who can monitor any changes in her symptoms following birth (such as post-partum depression) and adjust or change her medications if needed. They talk about her continuing to attend her IOP or aftercare, as appropriate, to prevent relapse, including working with her Peer Support Specialist and attending 12-step and support group meetings. Brianna recognizes that depression and other BH conditions can worsen postpartum and works with Nia's OB-GYN to have an expedited postpartum visit to address any concerns. If the baby is transitioned to the NICU following birth, Brianna works with Nia and NICU staff to assure she bonds with her baby through visitation and physical touch, is assessed for PTSD, and engages in transition planning that meets the needs of her related to drug exposure, prematurity, or birth defects.
- **Postpartum PH Care.** Brianna works with Nia to identify her natural supports, such as friends, family, or the baby's father, who will be available following her delivery. If she continues to be eligible for Medicaid postpartum, we will arrange for specialized services, such as the Nurse Family Partnership, Parents as Teachers, and Healthy Blue's Postpartum Discharge program that includes in-home education and services for Nia, including ways to take care of herself, indicators of when to call her doctor, infant care and feeding, and

emotional well-being. They work together to schedule a follow-up appointment with Nia's OB-GYN to assure she is progressing in her healing and a pediatric appointment for her baby to make sure her baby is well and thriving. Brianna also talks to Nia about our Health Rewards incentives for her to participate in postpartum services that have proven to improve outcomes for mothers and babies, [redacted] If Nia is no longer eligible for Medicaid benefits postpartum, Brianna will assure her connection to community-based resources for support, such as engaging her CHW to identify resources in Nia's community that can provide follow-up care and access to family planning resources, including Long-Acting Reversible Contraception and other birth control options.

**PRIORITY FOUR — Additional SDOH Needs That May Interfere with Engagement.** In addition to addressing Nia's housing needs, Brianna works with Nia to identify additional SDOH needs that may prevent her from engaging in care. Brianna supports Nia in scheduling needed appointments and arranges transportation to those, as well as offers to attend appointments with Nia to support her in communicating her needs to her providers and understanding follow-up recommendations. [redacted]

Brianna also assists her in identifying other SDOH needs, such as food security and financial needs, and helps her complete applications to WIC, SNAP, and SSI, as appropriate. They also talk about Nia's desire to participate in job training or vocational counseling or going back to school. Brianna also discusses the roles of the CHW and purpose of Healthy Blue's [redacted] Brianna also assures Nia understands the availability of Healthy Blue's Member Services, 24/7 Nurse Line, and 24/7 BH Crisis Line representatives for additional support. [redacted]

## 2.6.7.10.3 Assuring Nia's Baby Is Connected to Pre- and Postpartum Care

**LONG-TERM NEEDS – WITHIN 14 DAYS**

- Brianna supports Nia in participating in the BH treatment of her choosing (inpatient or outpatient) and prepares for additional after-care services following treatment
- Nia selects a pediatrician in her area to provide services in preparation for and following birth of her child
- Brianna arranges for in-home services following Nia's delivery, such as our Home Visiting program or Postpartum Discharge program that include in-home education and services

LA_HlthyRebid21_2.6.7.10_14Days_11_COB_02

Connection to a pediatrician of the member's choosing prior to delivery is key to the mother's participation in ongoing care for her baby. Prior to the third trimester, the Case Manager discusses the member's options for a pediatrician to help her in taking care of her baby, which may include the need for specialists based on the baby's needs. If the member has had a positive relationship with a pediatrician in the past, the Case Manager will reach out to engage the provider, including securing a single case agreement if needed. If not, they work together to choose a pediatrician with experience treating infants with neonatal abstinence syndrome in her area and schedule an appointment prior to delivery to begin establishing a relationship and talk about Nia's history so the pediatrician is well-informed.

We will make sure that the member has the information needed to care for her infant at home, such as feeding, sleep position, and car seat safety; takes her infant to a follow-up appointment with the pediatrician; and knows who to reach out to when she needs help. If the infant is born with any challenges, the Case Manager works with the mom to develop a POC that addresses and SHCN, including identifying specialty providers with experience in treating infants with NOWS. [redacted]

Brianna helps Nia schedule appointments for the baby, arranges transportation as needed, and follows up with providers to assure she is attending and participating in services and identify any additional recommendations the pediatrician may have for the baby's care. Since the baby is at elevated risk for psychiatric and developmental disorders, Brianna regularly monitors progress for referral to Early Steps for evaluation. If Nia does not participate in services and her baby is born substance-exposed, Brianna works with her, providers, and DCFS with a goal of family reunification, if appropriate.

# 2.6.7.11 Assuring Integrated Community-based Care for Members with Co-occurring Chronic Health Conditions and Severe and Persistent Mental Illness

Healthy Blue is committed to our **Elevate | Population Health** approach that maximizes member health outcomes for members with chronic, comorbid, and complex conditions through person-centered, individualized solutions. These solutions are supported by health information technology to advance health equity and address priority social determinants of health (SDOH). We serve members with complex co-occurring physical and behavioral conditions, as seen in this case scenario, every day. Our Case Managers have integrated physical health (PH) and behavioral health (BH) care expertise, as well as experience coordinating care with providers and community-based organizations across Louisiana. We know that this member will benefit from case management support to prevent further deterioration of her health. This scenario illustrates how we will engage the member, complete the assessment and Plan of Care (POC), and monitor the POC over time to make sure we meet the member's immediate care needs and support her health goals.

## 2.6.7.11.1 Process for Understanding Maria's Use of Acute Care

### MARIA – 57-YEAR-OLD

Healthy Blue will use a person-centered, empathetic approach to understand Maria's use of ED services including, but not limited to, a comprehensive review of her life domains, which includes Maria's diabetes, hypertension and coronary artery disease, bipolar illness, SDOH needs, smoking, 5-day hospitalization, and causes of her low back pain resulting in her using the ED to seek care. This may include transportation problems, financial concerns, and family dynamics in the household, if any. Our approach includes strategic alignment to a Case Manager, Caroline, to address Maria's PH, BH, and SDOH needs concurrently through covered services, non-covered services, and community-based resources tailored to her needs.

LA_HlthyRebid21_2.6.7.11_Maria-Scenario_11_COB_08

Through Healthy Blue's care management system, Health Intech, we regularly review member utilization patterns, current risk status, pharmacy use, and results of laboratory studies and claims history. ***Our goal is to support the member face-to-face, building trust through the assessment and care planning process and capturing their voice, needs, and goals.***

### Ways in Which Healthy Blue Identifies Maria

Healthy Blue has several ways in which we will identify this member, Maria, such as predictive modeling, real-time admit, discharge, and transfer (ADT) alerts, claims analyses, and targeted reports and platforms that provide additional information key to developing a holistic view of Maria's potential needs. This includes our daily emergency department (ED) report that identifies preventable ED visits, Special Health Care Needs reports that capture diagnoses, service utilization that may indicate complex conditions, and information obtained through Elli, a population risk intelligence tool that identifies members who are most likely to benefit from care intervention and early targeting.

***While our information and resources provide valuable information, we know that engaging with Maria directly is the only way to truly understand and address her personal reasons for using the ED.*** Based on her multiple chronic conditions, as well as numerous ED visits and five-day hospitalization, Maria is referred to a community navigator, identified for Tier 3 Intensive Case Management and assigned Caroline as her Case Manager. Caroline is a registered nurse with expertise and training in trauma-informed care and BH conditions, such as bipolar disorder, anxiety, and depression. If needed, Caroline will consult internal resourced to assure culturally competent care. Caroline will work to motivate and empower Maria in learning more about managing her conditions to remain healthy and live independently. Caroline and the community navigator will work together to support Maria in addressing her goals and vision for herself as well as the improvement of her overall health status. Caroline collects and reviews the initial set of Maria's information using claims data and will note her current diagnoses, medications, and utilization history. Caroline also notes Maria's language preference if language line services are needed and makes sure that Maria receives educational materials in her preferred language and format, such as large print, audio, video, or braille, as well as arranging for language translation services to assist in provider appointments and during contact with health plan staff.

### Reaching Out to and Engaging Maria

***Engaging and assuring access for members such as Maria is what we do every day.*** Caroline calls Maria to share information about why Healthy Blue is concerned about her health and well-being, works with her to complete the health needs assessment, and arranges to complete the person-centered assessment face-to-face at the time and location of her choosing. This call serves as an important opportunity to collect the most current information about Maria's health from her perspective and helps to identify if

### PROACTIVE RESPONSE – WITHIN 72 HOURS

- Caroline's telephonic outreach to Maria, in addition to engaging a CHW to go to Maria's home, if needed
- Based on Maria's preferences, Caroline meets with her at a location and time to complete an in-person assessment and initiate care planning

LA_HlthyRebid21_2.6.7.11_72Hours_11_COB_02

## HEALTHY BLUE RESOURCES AND INFRASTRUCTURE

Our integrated healthcare approach incorporates a variety of evidence-based models to support coordination among providers, co-location, and delivery system transformation specifically designed for our members with comorbid chronic PH and BH conditions and SDOH needs. Healthy Blue's model comprises our **Elevate | Population Health** approach, innovative clinical systems, established policies and procedures for integrated case management, and collaboration with providers and community-based organizations to drive quality outcomes.

LA_HlthyRebid21_Infrastructure_COB_02

Maria is currently engaged in treatment with providers. Caroline explains that the assessment process will help to make sure she receives the right care and support to remain independent and stable in her conditions and help her to reach her healthcare goals. Caroline introduces her to the Healthy Blue Navigation program available through her primary care or specialized BH provider. If Maria is difficult to reach, Caroline engages our Community Health Worker (CHW) to go to her home to talk to her about her health and the benefits and services accessible to her through Healthy Blue. While Caroline will monitor real-time ADT alerts for any future ED events, she also reaches out to the ED most frequently used by Maria and requests that they notify Healthy Blue if and when she next presents at the ED. We also may reach Maria through our patient navigation program if she is hospitalized. Through this program, partner providers identify medium and high-risk members who have been hospitalized and provide navigation services.

We understand individuals use the ED instead of and in addition to primary care for a variety of reasons. This may include negative experiences in the healthcare system, limited access to and lack of trust in PCPs, SDOH needs such as social isolation or lack of transport, self-perceived urgency, lack of medication adherence, convenience (location, 24/7/365 availability), and persistent medical symptoms despite following the doctor's orders. To identify and understand Maria's conditions, symptoms, participation in services, and precipitating events to using the ED, Caroline uses motivational interviewing techniques to engage Maria and active listening statements, such as "I understand it is difficult for you because you experience pain on a daily basis." Caroline creates a trusting, open and frank environment to develop a relationship where Maria is given full attention feels really listened to and not judged. To assure culturally competent care for Maria, Caroline helps her voice her priorities and goals, while recognizing her cultural preferences particularly related to her health.

### Working with Maria to Assess Her Needs

Maria and Caroline work together to complete a person-centered assessment that includes multiple domains to assess her current health status, conditions, most pressing risk factors, and care needs, goals, and preferences. During this biopsychosocial assessment, Caroline builds rapport with Maria, reviewing her past medical history, including general health, chronic conditions, mental health, substance use, and psychosocial history including history of trauma, exposure to violence, and housing needs. The assessment also triggers more in-depth discussion in areas with significant impact on her health, well-being, and quality of life, such as bipolar diagnosis, diabetes, hypertension (HTN) and coronary artery diseases (CAD), and smoking history. This includes the following:

- ***PH history***, including onset of diabetes, HTN, and CAD and the symptoms Maria is currently experiencing; providers and participation in services for each diagnoses; medications and her adherence to taking them as prescribed; any PCP visits for wellness checks or preventive care; when she started experiencing lower back pain; when and why she used the ED (pain, trouble breathing, lack of medications, convenience); what her hospitalization was for and any follow-up care participation; when she started smoking, attempts to quit, and her current desire to quit; and any participation in physical activities.
- ***BH history***, such as when Maria was diagnosed with bipolar disorder; frequency of and behaviors during manic and depressive events; BH providers and participation in treatment; previous and current substance use; and medications and adherence to taking them as prescribed.
- ***Personal history***, including family member (children, siblings, parents) history of physical, mental illness, and substance use issues and diagnoses; and childhood experiences, such as adverse childhood experiences (ACEs), culture, school performance, extracurricular activities, and social interaction.
- ***SDOH needs*** that have created barriers to Maria accessing primary and specialty care, such as housing, transportation, food security, natural and social supports, health literacy and employment.

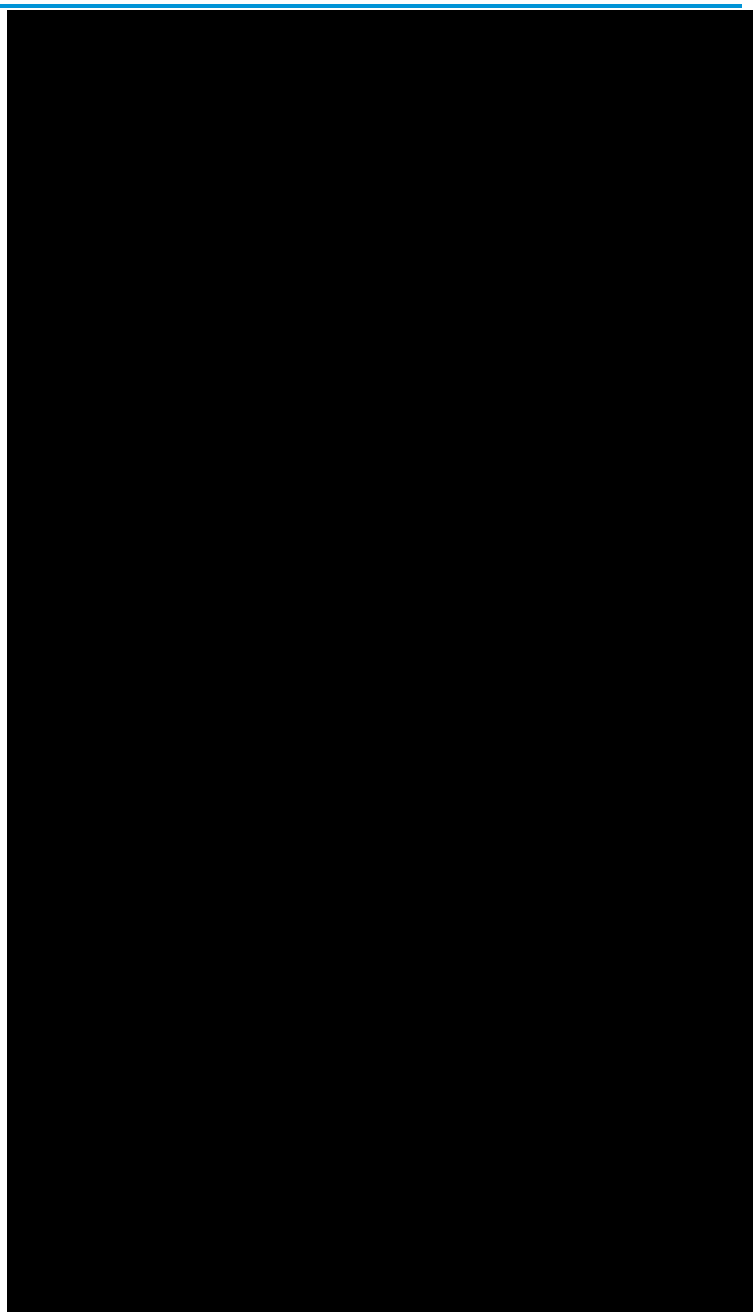
## SHORT-TERM NEEDS – WITHIN 14 DAYS

- Caroline supports Maria in selecting a PCP, scheduling an appointment, and attends the appointment with her
- Maria and Caroline work to identify and schedule appointments with specialist, including a cardiologist, endocrinologist, spine specialist, and psychiatrist
- Caroline provides Maria with information on alternatives to using the ED

LA_HlthyRebid21_2.6.7.11_14Days_11_COB_02

During this meeting, Maria and Caroline discuss the most significant conditions affecting her life right now. Together, they talk about signs and symptoms that indicate a worsening of her conditions and how to anticipate and address barriers. They discuss the relationships and communications Maria has with her treating providers and identify any family members, friends, or caregivers she would like to have involved in her care planning through her multidisciplinary care team (MDT), which includes her PCP, Specialists, Psychiatrist, and Peer Support

Specialists. Caroline and Maria also discuss the possibility of joint appointments between her PCP and specialized BH provider, as well as available crisis support, peer support services from her Local Governing Entity, and other community supports as indicated. Caroline completes a functional assessment to determine Maria's physical abilities and identify any additional needed supports. She also arranges for one of her treating physicians to complete the Level of Care Utilization System (LOCUS) to determine intensity needs for BH services and eligibility for mental health rehabilitation. Caroline also seeks to understand what is important to Maria, such as being involved with her family or church or participating in daily activities.



## 2.6.7.11.2 Addressing Maria's Identified Needs

Addressing Maria's identified needs begins by working with her to develop an integrated POC that identifies her conditions, strengths, needs, short- and long-term goals, and the providers, services, and supports she needs to improve her health and quality of life. Caroline helps Maria understand the importance of developing relationships with providers who can meet her needs and how this will improve her understanding of her conditions, self-management of her symptoms, and continuity of care. Based on her history, Caroline works with Maria to understand and consider her options for improving her medication adherence, making sure that Maria is seeing her treating providers, including her specialized BH provider, while preventing any deterioration in her diabetes and heart condition. Caroline is most concerned with supporting Maria in living in her desired location and receiving the necessary care to prevent worsening of her multiple chronic conditions. Building upon an open trusting relationship, and through motivational interviewing and brief intervention, Caroline discusses the impact of smoking on Maria's current condition to improve her readiness to change and move toward action.

### Care Planning with Maria

Given the predominance of her medical issues, Caroline shares information with Maria about how her medical conditions may be interrelated, her symptoms may be the result of one or more of her physical and BH conditions, and all may be managed by one specialist, if appropriate. A specialist, such as an endocrinologist, can also act as her PCP if she and her PCP are in agreement with this approach, making sure she receives wellness and preventive care. The specialist can also determine if she needs additional specialty care, such as a cardiologist, and identify the root of her lower back pain by referring her to a spine specialist for a physical exam and diagnostic imaging. Her diabetes can cause HTN, which may result in CAD and symptoms such as fatigue and dizziness. Caroline also identifies supports that are essential to her chronic condition management, such as obtaining a blood pressure cuff for self-monitoring her HTN.

They discuss her bipolar diagnosis, the severity of her symptoms, and how they have affected her quality of life and her engagement in recommended healthcare. They also discuss whether she has prescribed medications, who

her prescribing physician is, her current medications, medication adherence as prescribed, and side effects she has or may be experiencing. If she has a specialized BH provider, Caroline talks to her about scheduling an appointment for follow-up, and if not, Caroline helps her select a provider in her area who can evaluate her, provide her with education on her diagnosis, and manage her medications and any side effects she may experience. If one is not available in her area, Caroline talks to her about telehealth and how these needs can be met in her home or in the community through our telehealth kiosks or kits. They also discuss Maria's options for individual therapy to address any feelings of anxiety or depression she may be experiencing due to her conditions.

Caroline shares information on Healthy Blue's **Elevate | Population Health** program, [redacted]

If Maria acknowledges she would like to quit smoking, Caroline talks to Maria about smoking cessation and the types of programs available to her. This includes the State's 800 QUIT NOW program and [redacted] If Maria is still not at a place where she is viewing techniques to create the possibility of her readiness to change. Caroline engages a nutritionist as indicated to work with her on a diabetes-healthy diet through meal planning and assures she has applied for Supplemental Nutrition Assistance Program (SNAP) to make sure she has access to healthy foods.

[redacted]

## Common Issues Among Medicaid Members

Healthy Blue recognizes individuals enrolled in Medicaid programs often experience access issues to the services and supports that meet their PH, BH, and SDOH needs, which contribute to health disparities and inequities. For example, people who do not have access to grocery stores are less likely to have nutritious food, which raises their risk of health conditions like heart disease, diabetes, and obesity. We identify individual member needs based on what we know about common issues among Medicaid members, as described in Table 2.6.7.11.2-1. We use this information to inform our predictive modeling, data mining, assessment, care planning, and monitoring processes.

*Table 2.6.7.11.2-1. Common Issues Facing Individuals Enrolled in Medicaid*

| Common Issues for Adults in Medicaid |
|---|
| ▪ **Medical Issues.** Like some of Maria's chronic conditions, adults in Medicaid experience a high prevalence of heart diseases, including hypertension, heart disease, coronary artery disease, and high cholesterol. Obesity and diabetes are common comorbidities and often contribute to health disease, and members with chronic obstructive pulmonary disease often have high rates of HTN and diabetes.<br>▪ **Psychosocial/Behavioral Issues.** The most common diagnoses include major depressive disorder, anxiety disorders, bipolar disorder, and substance use disorder, which are attributed to several factors, such as genetics or brain chemistry; trauma, abuse, and ACEs, or family history of mental health issues.<br>▪ **Health Inequities and Social Conditions.** Members may experience a variety of health inequities and SDOH needs that interfere with engagement in the services they need, such as provider implicit bias and structural racism that can lead to quality of care concerns, as well as social conditions that impact: access to nutritious food; affordable, safe, and stable housing; reliable transportation; quality education; economic security; and meaningful social connections. |

We have an inclusive, innovative, and collaborative environment that promotes member access to care while decreasing racial and health disparities. Our providers are trained on the root causes of health inequities and the

concepts related to implicit bias. Our approach is aligned with LDH-defined priorities and populations, population health needs in our communities, and priority subpopulations for which we identify goals and metrics.

## 2.6.7.11.3 Supporting Maria to Increase Engagement and Adherence

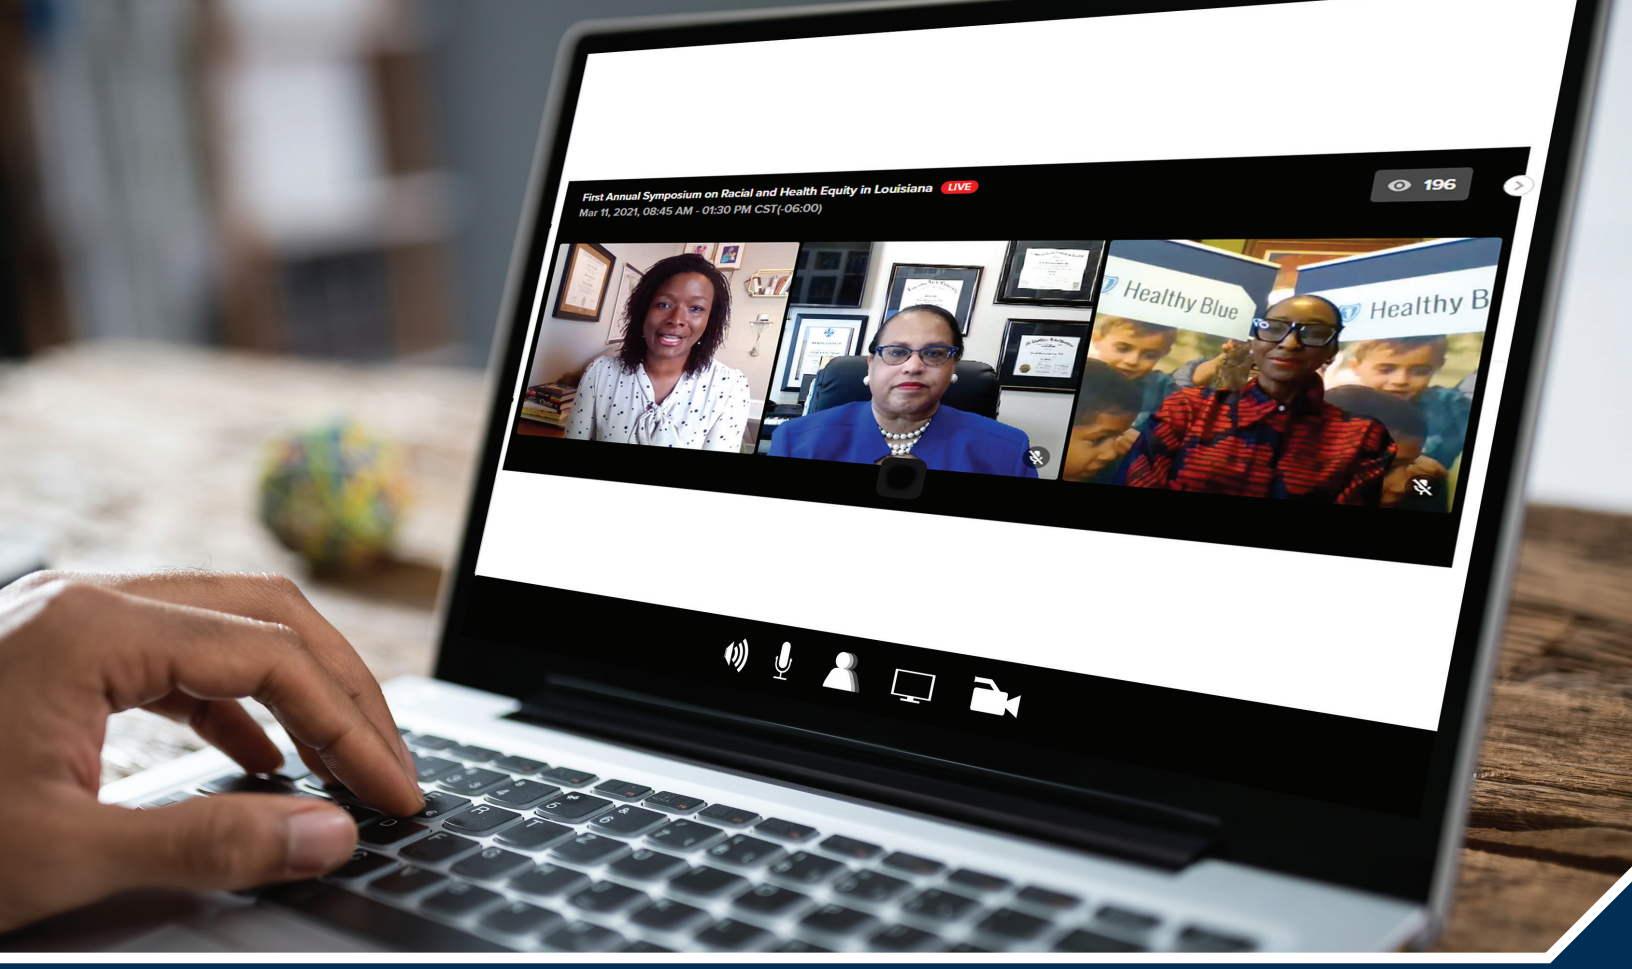
Developing positive relationships with Maria, her family, and caregivers is the primary way to increase Maria's engagement and positively influence her health and wellness. Caroline monitors Maria's participation, identifying and addressing any challenges she may encounter. ***Caroline understands that gaining control over Maria's pain and her medical and BH support needs will be key to improving her health, reducing unnecessary utilization, and improving medication and appointment adherence.*** Strategies to support Maria in the community include the following:

**LONG-TERM NEEDS – WITHIN 30 DAYS**

- Maria agrees to engaging with a Peer Support to support her in adhering to scheduled appointments and recommended care
- Caroline follows up with Maria and her providers to assure participation and progress in services
- Led by Maria and her MDT, Caroline adjusts Maria's POC as she reaches her goals and her needs change

LA_HlthyRebid21_2.6.7.11_30Days_11_COB_01

- **Community, Family, and Peer Support.** Caroline also helps Maria work with Peer Supports or other friends/family members who will help her stay compliant. Carolina and Maria's MDT receive alerts when medication refills are not filled and monitor utilization to determine if appointments were missed. Caroline helps Maria locate support groups for her chronic conditions, including her bipolar disorder. If Maria prefers in-person support groups in her community, Caroline helps her contact diabetes management support groups through her church or health department. If Maria's preference is online support groups, Caroline may refer her to a National Alliance of Mental Illness (NAMI) support group. In addition, Caroline helps Maria identify exercise and activity programs in her community or online.
- **Healthy Blue Monitoring.** During their discussion, Maria receives information and education about the services and supports available to her in her home and engages a CHW to support her in identifying additional resources, providing her with information on appropriate ED use, helping her navigate her healthcare needs, and providing her information on alternatives to using the ED. This includes accessing urgent care in her area; after-hours and weekend availability for provider appointments; community-based programs, such as church groups and health department programs; Healthy Blue's Chronic Pain Management Program and [redacted] online resources, such as Well-Ahead for Diabetes self-management, education, and resources; and Healthy Blue's Member Services Line, 24/7 Nurse Line, and 24/7 BH Crisis Line.
- **Appointment Adherence.** Case management support includes facilitating the provider/member relationship by attending initial appointments with Maria to support her in understanding and asking questions about her own healthcare. This also includes Caroline having consistent and frequent contacts with Maria and connecting with her after appointments to assess her comfort level and identify any opportunities for improvement. Understanding that telehealth can help resolve certain access barriers and prevent against unnecessary ED visits, Caroline discusses the appropriate use of these services and makes sure Maria has the proper tools to receive telemedicine from her providers. Additionally, Healthy Blue uses mobile health messaging to engage members via text message to promote healthy behaviors, such as scheduling preventive care appointments.
- [redacted]
- [redacted]



## Promoting Health and Racial Equity in Louisiana

Healthy Blue teamed up with the Louisiana Public Health Institute (LPHI) to launch the inaugural Symposium on Racial and Health Equity in March 2021 with the theme of "Partnerships in Action: Collectively Achieving Racial Equity to Improve the Health of Our Community." At the conclusion of the Symposium, LPHI and Healthy Blue offered participants the opportunity to join a coalition dedicated to ending institutional racism in Louisiana. Healthy Blue will continue this commitment by sponsoring the first Racial Equity Learning Lab later this year.

# 2.6.8

Network Management

Healthy Blue

## 2.6.8 Network Management

### 2.6.8.1 Timely Access to Culturally Competent Primary and Specialty Care Services

Healthy Blue has an established, comprehensive Medicaid network of more than 27,000 unique providers that currently serve Healthy Louisiana enrollees (members). As an MCO in Louisiana for more than nine years, we have a history of partnering with providers to offer timely access to high-quality, culturally competent care and meeting local population health needs. We also have experience meeting the geographic access requirements prescribed by LDH. Currently, 99% of our members have access to providers within the distance standards for Specialists and PCPs outlined in Attachment F, and we are actively working to meet the new, more stringent standards prior to Readiness Review. ***We will continue to build our network using our proven network management strategies that have resulted in a 29% growth in our specialty provider network and 44% growth in our behavioral health (BH) provider network since 2018.*** Where network gaps exist, we will use the strategies described throughout this section to increase provider capacity. In addition to meeting geographic access standards, we are also committed to building a network that meets members' cultural, racial, ethnic, linguistic, and accessibility needs. To do this, we are investing in strategies that promote health equity, including cultural competency training, scholarships, and Value-Based Payment (VBP) arrangements.

**HEALTHY BLUE'S COMPREHENSIVE NETWORK**

Our network includes:

- **128** hospitals
- **3,200** PCPs, including 565 pediatricians
- Over **12,000** specialists
- **563** OB-GYNs
- **2,682** Licensed BH professionals
- **424** psychiatrists
- Over **1,300** ancillary providers
- **352** FQHC/RHC locations

LA_HlthyRebid21_HBCompreNetwork_COB_02

To assure timely access to services, we contractually require providers to adhere to all appointment accessibility standards and verify compliance through quarterly audits. We also employ enhanced reimbursement strategies to promote timely access to care. [redacted]

> *MediTrans and Healthy Blue have done a great job supporting NEMTLA and its providers so they can protect themselves and the members in their care. These additional supplies will have a wonderful impact on our communities as a whole. These organizations' initiative, out-the-box thinking, and quick action have been appreciated and is unmatched throughout this pandemic.*
>
> **Eric Bradley, President**
> **NEMT Louisiana Association**
>
> LA_HlthyRebid21_Bradley_TST_01

To support and promote LDH's goals of utilizing engaged providers who are accepting and regularly serving Medicaid patients, we have conducted a claims analysis to identify providers who have not billed 25 claims in the last six months. We will be launching a targeted ***Medicaid Engagement Campaign*** in September 2021 to learn how we can support them in more actively serving Medicaid members. In accordance with our contract, we will not include providers with less than 25 billed claims in the last six months in our provider directory or network adequacy reports.

### 2.6.8.2.1 Work Plan for Readiness Review

As an incumbent MCO, Healthy Blue maintains a dynamic Network Development and Management Plan (Network Plan), executed by our Network Development team. This team is led by Randy Guillory, our Provider Services Manager, who has 30 years of experience building provider networks, including 9 years dedicated to Medicaid since the implementation of the Healthy Louisiana program in 2012. We use our Network Plan to continually monitor our network and identify gaps and contracting opportunities. Upon receipt of the RFP, we incorporated the new standards from Attachment F into our Network Plan, and we will work to fill any gaps (existing or new) via the timeline outlined in Table 2.6.8.2-1. We will monitor the success of our efforts weekly, with the goal to meet all network adequacy standards by Readiness Review. We will also seek LDH approval of all alternative strategies, such as telemedicine, to address network gaps.

*Table 2.6.8.2-1. Network Adequacy Work Plan and Timeline for Readiness Review*

| Task | Timeline |
|---|---|
| Receive RFP and review updates to Attachment F, Provider Network Standards | June 2021 |
| Conduct comprehensive network analysis, including:<br>▪ Geographic access reports using updated adequacy standards<br>▪ Claims analysis to identify providers with less than 25 claims in the last 6 months | July 2021 |
| Identify network gaps and enhancement opportunities; incorporate into network plan | July 2021 |

| Task | Timeline |
|---|---|
| Develop target list for recruitment to fill identified gaps through:<br>▪ Network comparison against other Medicaid MCO and State directories<br>▪ Network comparison against BCBSLA Commercial provider network (a recent comparison shows an 89% overlap)<br>▪ Engagement with key community stakeholders, including referring providers, provider associations, and community-based organizations (CBOs) | August 2021 |
| Initiate network outreach campaigns to close identified provider gaps | September 2021 |
| Identify alternative strategies to address gaps and obtain LDH approval | September 2021 |
| Initiate Medicaid engagement campaign for providers without 25 claims in 6 months | September 2021 |
| Obtain completed provider applications, signed contracts, and credentialing | October 2021 |
| Complete contracting, credentialing, and configuration for new providers; leverage leadership relationships to motivate non-responders to participate | Ongoing |
| Release executed contracts and provide onboarding documents, including provider manual, Quick Reference Guide and new provider orientation registration | Ongoing |
| Conduct new provider orientation within 30 days of providers joining our network | Monthly |
| Complete final network analysis, compile all documents needed for Readiness Review | November 2021 |
| Submit required Readiness Review documentation and participate in on-site meetings | December 2021 |
| Respond to LDH questions and findings and address any areas requiring corrective action | Readiness Review |
| Successfully complete Readiness Review | Anticipated April 2022 |
| Operational start date | Anticipated July 2022 |
| Network monitoring and maintenance | Ongoing |

## 2.6.8.2.2 Identification of Network Gaps

Our Network Development Team assesses network adequacy by comparing our provider network data against LDH requirements. We also consider expected member enrollment and projected utilization of services informed by member patterns, historical trends, and population health needs. Our Network Development team to identifies gaps and develops data-driven strategies to address access challenges by monitoring a comprehensive set of reports, survey results, and member utilization data, including:

- **Geographic Access Reports.** These reports identify the percentage of members in a geographic area with access to a provider within the distance standards in Attachment F; we conduct this analysis at least quarterly for BH providers and bi-annually for physical health (PH) providers.
- **Provider Ratio Reports.** We calculate provider-to-member ratios for PCPs and specialists at least quarterly using current membership numbers. ***We currently exceed 100% of the ratio requirements in Attachment F.***
- **Network Changes.** We review all network additions, deletions, and PCP capacity changes, by provider type and location monthly to identify potential impacts to network adequacy and access.
- **Access and Availability Surveys.** We conduct quarterly provider audits to measure adherence to the appointment wait time, after-hours, and telephone accessibility standards in Attachment F. ***Results from the last four quarterly reports show that 94% of audited providers adhere to these standards.*** We immediately educate non-compliant providers and use future quarterly audits to assure compliance.
- **Open Panel Reports.** We review panel status reports quarterly and LDH closed panel reports monthly to identify providers that are not accepting new enrollees, and where needed, encourage providers to re-open their panels. ***As a result of our efforts, 94% of our provider groups currently have at least one open panel.***
- **Out-of-Network Utilization and Single Case Agreements (SCAs).** We monitor out-of-network utilization and SCA requests to identify potential access gaps. Once we have an SCA in place, we encourage providers to join our network. Since 2020, we added 38 providers to our network through SCAs.
- **Member Survey Feedback.** We review annual CAHPS® member surveys to identify potential access and availability concerns. ***In 2020, Healthy Blue ranked first in the Adult CAHPS Experience Survey and second in Child Experience.*** Our Quality Management (QM) department also distributes monthly member satisfaction surveys via text, to gauge satisfaction with providers and services received.
- **Annual Provider Satisfaction Surveys.** We analyze findings from Healthy Blue and Healthy Louisiana provider satisfaction surveys to identify areas of opportunity. Surveys include key questions about quality and network adequacy. [redacted]

- **Member Grievances and Provider Complaints.** We review member grievances and provider complaints to monitor provider adherence to access and availability standards. Our representatives review, log, and categorize grievances and complaints by cause, disposition, and type, including access to care.
- **Employee Feedback.** Our local Network Development team collaborates with internal staff, including Provider Experience Consultants (PECs), Case Managers, QM staff, and Operations to identify gaps and network development opportunities. We also regularly discuss our network in cross-functional leadership groups, such as our monthly ***Network Integrity Workgroup***, which reviews our overall network to identify gaps. We have also implemented a new quarterly ***Rural Network Workgroup***, which will expand access to care by:
  - Reviewing geographic access reports specifically for rural parishes to identify opportunities for expansion
  - Discussing challenges of rural providers and developing solutions for workforce shortages
  - Identifying health needs and disparities for rural members and how we can mitigate barriers to care

## 2.6.8.2.3 Strategies to Increase Provider Capacity

Healthy Blue is committed to developing strategies that increase provider capacity. Our ongoing, comprehensive monitoring and knowledge of Louisiana communities helps us understand what drives provider capacity challenges and informs the strategies we develop to meet the needs of enrollees and address network gaps.

### Enhanced Reimbursement

Healthy Blue offers innovative provider reimbursement arrangements to increase provider capacity and expand access where the greatest needs exist, particularly in rural areas. [redacted]

[redacted] We also offer a range of VBP programs, outlined in Section 2.6.12, to incentivize network participation through enhanced reimbursement and encourage providers to adopt practice transformation strategies that achieve increased quality and health outcomes.

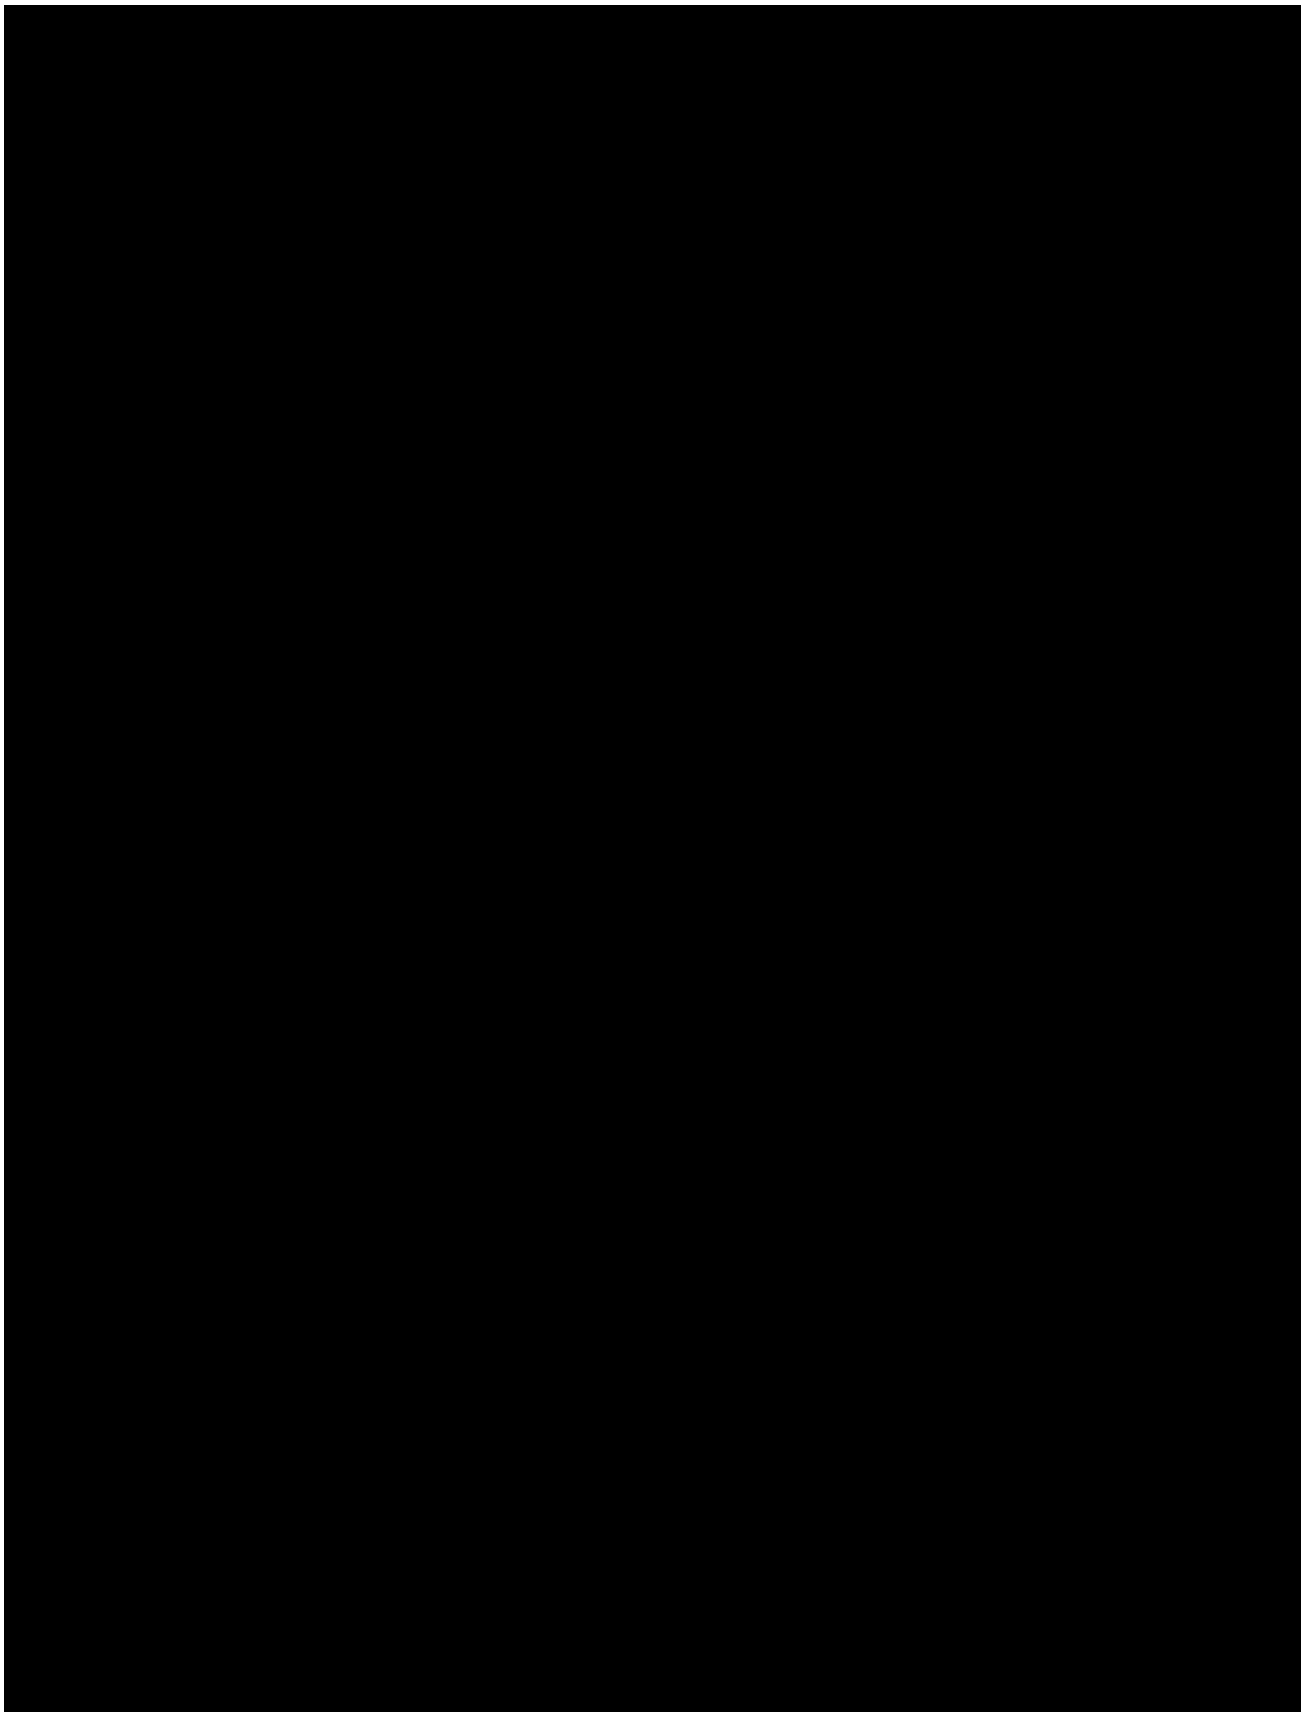
### Investing in Workforce Development

[redacted]

### Expanding Telemedicine Capabilities

COVID-19 underscored the importance of providing members with the option to connect virtually with their providers. At the beginning of the pandemic, we immediately allowed all provider types to begin conducting telehealth visits with their established patients, in accordance with LDH requirements. We also conducted outreach to identify which providers were offering virtual services and have included an indicator in our provider directory so members can easily identify these providers.

A significant component of our telemedicine strategy is providing our local, Louisiana providers with the tools they need to offer telemedicine to their existing patients. Additionally, our proposed national telemedicine vendors prioritize incorporating local, Louisiana providers within their networks. For example, when vendors like Bright Heart Health, FasPsych, and ConferMED enter a new market, they engage with providers that are already licensed and located in the state, and only divert from this process when they are unable to engage a local provider for a particular specialty type. Prior to using any national telehealth vendor, we will work with LDH to obtain written approval and make sure the implementation of these services does not supplant local, Louisiana providers, but instead fills gaps where no Louisiana providers exist. Our full proposed approach is described in Table 2.6.8.2-2.



## Mobile Services: Bringing Care to Our Members

[redacted] We also partner with Ready Responders on mobile vaccine campaigns to offer in-home vaccinations to high-risk members. In early 2021, we implemented a flu vaccination program for members with chronic conditions that would put them at severe risk if they contracted the flu who had not had a flu vaccine in the last 18 months.

## Expanding Provider Capabilities Through Evidence-based BH Training

We are investing more than $160,000 to expand BH provider capacity for evidenced-based practices in compliance with the Louisiana Behavioral Health Provider Services Manual. We have worked in conjunction with [redacted] Our funding supports the following trainings:

[redacted]

Beginning in 2022, Healthy Blue will also offer ***Matrix Model Training*** through our online Healthy Blue Training Academy. This two-day training will be available for select providers with integrated capabilities and multiple specialty types, particularly PCP and BH providers who participate in VBPs. The Matrix Model of Intensive Outpatient Treatment (IOP) is evidence-based and used to treat patients with methamphetamine, alcohol, and other SUDs. Programs that have implemented this model report significant improvement in treatment outcomes.

## 2.6.8.2.4 Significant Challenges to Developing a Complete Network

The most significant challenge to developing a complete network is the existence of *Healthcare Deserts* across Louisiana, where limited providers exist. For example, while we are contracted with 100% of hospitals in the state, parishes including East Feliciana, Grant, Plaquemines, and Tensas have no hospitals available. Rural parishes also have low populations, making it difficult for specialists to open and maintain a practice, especially with limited access to a hospital in the area. In these instances, Healthy Blue works with our provider partners, such as Franciscan Missionaries of Our Lady Health System, to open up satellite offices. We also make sure our members have access to NEMT services if they need to travel longer distances to access services. Table 2.6.8.2-3 outlines the most significant challenges and Healthy Blue's strategies to address them.

*Table 2.6.8.2-3. Healthy Blue Solutions to Louisiana Network Challenges*

| Challenges | Impacted Parishes | Healthy Blue Solutions |
|---|---|---|
| **OB-GYNs.** Many parishes have no OB-GYN providers due to lack of facilities or birthing services. | [redacted] | [redacted] |
| **MAT Prescribers.** Shortages are due to a lack of providers as well as patient limitations. | [redacted] | [redacted] |

| Challenges | Impacted Parishes | Healthy Blue Solutions |
|---|---|---|
| | [redacted] | |
| **Specialty Services.** Gaps include Allergy/Immunology, Dermatology, Endocrinology, and Hematology/Oncology due to a lack of providers in rural areas of the state. | [redacted] | [redacted] |

## 2.6.8.2.5 Monitoring Compliance to Assure Network Adequacy and Access to Care

Healthy Blue monitors access and availability at both the provider and overall network level using a wide range of data sources and tools, outlined in Table 2.6.8.2-4. Our local, highly experienced Network Development team promptly identifies gaps and assures members have access to a comprehensive provider network that meets the distance, ratio, and access standards included in Attachment F.

*Table 2.6.8.2-4. Monitoring Our Provider Network*

| Data Source or Tool | Strategies for Monitoring Provider Network Standards |
|---|---|
| **Geographic Access Reports** | ▪ Geographic overview maps display provider locations by geographic area<br>▪ Provider and member maps plot members and providers and overlay provider network against the membership base using LDH standards to identify geographic coverage<br>▪ Member accessibility summaries provide an overview of the entire analysis and detail the number and percentage of members with and without access to a PCP or specialist<br>▪ Accessibility details provide the total number of members, providers, and member-to-provider ratio for a specified demographic or geographic area |
| **Other Network Reports** | ▪ Network additions, deletions, and provider capacity changes by provider type<br>▪ PCP Panel Capacity |
| **Claims and Utilization Reports** | ▪ OON utilization and authorization requests; SCA requests<br>▪ Underutilization of services, which may indicate an access gap<br>▪ Provider referral patterns |
| **Internal Feedback** | ▪ Network Integrity Workgroup and Rural Network Workgroup<br>▪ Feedback from PECs, UM, Case Management, and Quality |
| **Stakeholder Feedback** | ▪ Member satisfaction survey results and complaints<br>▪ Provider satisfaction survey results, including referral capabilities<br>▪ Input from Provider Advisory Council and Clinical Advisory Committee<br>▪ Feedback from LDH<br>▪ Input from CBOs and provider associations |
| **Audit Results** | ▪ Quarterly Appointment Access, Availability, and After-hours audits<br>▪ Selective on-site and desktop audits for providers under targeted reviews<br>▪ QM medical record reviews |

## 2.6.8.2.6 Strategies for Recruitment and Retention Efforts

### Strategies for Recruitment

Through our locally based Network Development Consultants, we recruit local providers who understand the unique needs of our members and communities. Upon identifying a network gap, our Network Development Consultants develop a list of non-contracted providers and conduct a ***targeted outreach campaign***. In addition to identifying targets for recruitment through typical data sources, such as a comparison against other Medicaid MCO and State provider directories, we are able to leverage the established

**SUCCESSFUL PCP RECRUITMENT**

Since July 2018, we have increased the number of adult PCPs by 11% and adolescent PCPs by 27%.

LA_HlthyRebid21_PCPRecruit_COB_01

relationships we have with providers in our network to understand where they would refer a member in need of a deficient service or provider type. As described previously, we also use flexible contracting strategies, including enhanced reimbursement rates and VBP programs, to promote Medicaid participation, particularly for specialties and sub-specialties where gaps exist. Our recent contracting outcomes demonstrate that our recruitment strategies are effective. ***From January to July 2021, Healthy Blue contracted with 35 specialist groups, closing network gaps for Urban Laboratory, Rural Neurology, and Rural Urology specialties.***

In June 2021, Healthy Blue added a new functionality to the enrollment tool on our secure provider portal to improve the online enrollment experience. The new functionalities include the ability to add new providers to an already existing group, apply for and request a contract as a new group of providers or as an individual/solo provider, and a dashboard for real-time status updates on the submitted applications. ***This means providers are able to join our network and start serving our members even faster than before.*** Early feedback is extremely favorable, and we will continue to improve tools and remove administrative barriers for providers joining our networks.

## Strategies for Retention

We leverage our relationships and deep understanding of Louisiana's Medicaid provider community to inform our retention strategy. ***As a result, less than 1% of providers voluntarily terminate from our network.*** Our successful provider retention strategy includes:

**Randy Guillory**
**Provider Services Manager**

Proud Louisianian, Randy brings more 25 years of experience building provider networks to Healthy Blue. He is responsible for developing strategies to ensure members have access to high-quality, culturally competent providers across the state through effective contracting, Value-Based Payment opportunities, and collaborative provider partnerships.

LA_HlthyRebid21_2.6.8_Guillory_63_SL_03

- Our local PEC team is embedded in communities across the state, engaging providers in person and virtually to build relationships. ***Since 2020, this team conducted nearly 5,000 virtual visits.***
- Customized VBP programs that offer financial rewards for high-quality, cost-effective care, and the right level of support to help providers achieve success in these programs.
- On-demand technical assistance to help providers succeed, such as proactively contacting providers if we identify possible submission errors through ongoing claims review.
- [redacted]
- Tools and resources to expand practice scope, including training and comprehensive telehealth programs.
- Practice integration solutions to increase bi-directional data exchange through our Epic Payer Platform solution, targeted to begin rolling out in 2022.
- Recognition programs like our ***Bona Fide Blue Provider Recognition program***, a non-financial provider incentive model that recognizes Louisiana providers who advance LDH priorities with superior performance. The 2021 award winners include Access Health Louisiana — *Innovator Award*, DePaul (Daughters of Charity) — *Social Determinants of Health Award*, and Sulphur Pediatrics (aka Pediatric Center of Southwest Louisiana) — *Loyalty Award*.

## 2.6.8.2.7 Meeting the Multilingual, Multicultural, and Disability Needs of Enrollees

Healthy Blue is committed to assuring our network is able to meet the multilingual, multicultural, and disability needs of members. As a testament of this commitment, in 2017, we received NCQA's Multicultural Health Care Distinction, which is awarded to organizations that engage in efforts to improve Culturally and Linguistically Appropriate Services and reduce healthcare disparities.

We contractually require providers to deliver culturally competent services to members, including those with limited English proficiency, and diverse cultural and ethnic backgrounds and abilities. We support providers in offering inclusive care through various trainings and educate them on our cultural competency and Americans with Disabilities Act (ADA) compliance requirements through our new provider orientation and in our provider manual, as well as through ongoing training and communications. We regularly assess providers' capabilities to assure they reflect the diversity of members and communities. For instance, we know that our providers speak 39 different languages, including sign language, addressing all identified languages spoken by members.

### Provider Directory Enhancement

In addition to languages spoken by providers and their virtual/telehealth capabilities, we capture accommodation of special access needs. This information is required on provider credentialing applications, entered in our database, and used to produce and update our provider directory. Our online provider directory allows users to filter results

according to ADA Accessibility (Wheelchair Accessible, Parking, Restroom, Basic Access) and we are making expanded filtering options available later this year to denote additional accessibility details (Building Exterior, Building Interior, Exam Room, Exam Table). We also encourage providers to submit their race and ethnicity, with the goal to make this data available to members in the provider directory in October 2021. In the first quarter of 2022, we will expand our offering of LGBTQ+ training opportunities to our providers that, upon completion, will result in an indicator added to our online provider directory designating Healthy Blue LGBTQ+ ally status.

## Racial Equity Provider Forums

Healthy Blue equips providers with needed tools to support diverse members and promotes open discourse about trauma, racial injustice, and inequities that affect the health and well-being of the communities we serve. In early 2021, we launched a quarterly Racial Equity Series for PCPs, mental health, and SUD providers. Our Racial Equity Series features virtual discussions with a diverse panel of respected healthcare professionals, helping providers share experiences and learn about racial equity and allyship.

## Health Equity VBP Enhancement

[redacted]

## Accommodating Members with Disabilities

Our providers are held to high standards when it comes to accessibility and are required to deliver services that are culturally appropriate to all members, including those with physical or cognitive disabilities. Healthy Blue makes sure providers in our network are compliant with Title II and III of the ADA and Section 504 requiring that medical care providers offer individuals with disabilities full and equitable access to their healthcare and service facilities. Providers are asked to certify their compliance as part of their application to join our network. During on-site visits, our PEC performs spot checks to verify provider facilities are accessible and compliant. If we receive feedback from members about provider accessibility, we will educate the provider on requirements and, if necessary, assist the member in finding a provider committed to delivering equitable care.

[redacted]

We have been actively engaged with the Office of Citizens with Developmental Disability and are aware of concerns related to members with intellectual/development disabilities (I/DD). [redacted] Based on this understanding, we have designed our network to include providers with the training and specialization to meet the needs of members with developmental disabilities, including Applied Behavioral Analysts (ABA). We are contracted with the majority of available ABA providers in Louisiana, who currently provide these valuable services at more than 600 practice locations.

## Cultural Competency Training and Resources

It is important for providers to have the knowledge, resources, and tools to offer culturally competent care. Our Healthy Blue Training Academy helps support providers by offering cultural competency training in a variety of formats, including webinars and online courses. Our "Caring for Diverse Populations" toolkit contains information, tips, and resources regarding language, interpreter services, and cross-cultural issues and helps providers assess their level of competency. Healthy Blue also promotes the use of MyDiversePatients.com, a website offering free trainings on topics including how to create an LGBT+-Friendly Practice, Equity in Asthma Care, Breast Cancer Screening for African American Women and Promoting Birth Equity.

[redacted]

## ACEs Provider Champions

We are partnering with providers to address adverse childhood experiences (ACEs) in Louisiana through our ACEs Provider Champions model. Our ACEs Provider Champions are providers who deliver high-quality, culturally sensitive care to members, and offer informal guidance and insight into how best address ACEs and care for their patients. Our ACEs Provider Champions include DePaul Community Health Centers — New Orleans Parish; Louisiana Primary Care Association Accountable Care Organization — Shreveport area schools supported by David Raines Community Health Center; and Capital Area Human Services District — East Baton Rouge Parish Schools. ACE Provider Champions support the greatest volume of school-based clinics for screening that will occur once the children return to on-site school (after the pandemic) and believe post-pandemic testing is key.

[redacted]

## 2.6.8.2.8 Terminating Providers Without Cause, Minimize Impact on Enrollees

In rare instances, we may terminate a provider from our network without cause. We do not do this during the 45 calendar days prior to start of the enrollment period through the last calendar day of the enrollment period. We also obtain written approval from LDH if the provider is in a health professional shortage area. Once we receive approval, we notify the provider in writing, via certified mail, of our termination and appeal procedures. We give hospitals and provider groups 90 days' prior notice of contract termination without cause and comply with reporting requirements of State licensing agencies, the National Practitioner Data Bank, the Federal Healthcare Quality Improvement Act, and other organizations as required by law. In accordance with Model Contract 2.9.9.8, we will:

- Conduct a claims analysis to identify all members that received services from the provider within the last 18 months, and include it in our notification to LDH
- Input disenrollment requests resulting from termination into the member enrollment web-based system within five business days

## Minimizing Negative Impact on Enrollees

**Members are our first priority.** Healthy Blue is committed to connecting members with the services they need when they need them, and in the setting they choose. In the case of a provider termination without cause, we provide members a written notice 30 calendar days prior to the effective date of termination, using an LDH approved notification template. Notice of the provider termination will go to each member who received care from the provider within the last 18 months. The notice includes a pre-paid envelope and explains the process to select another provider and change MCOs, should the member choose to do so. Members can change PCPs by calling the Member Services Line or by going online. ***Additionally, we will personally reach out by phone to notify each affected member of the change and help them find a new provider.*** Medically necessary care from that provider may continue through completion of treatment or until the member selects another treating provider, up to 90 days or until the member is reasonably transferred without interruption of care.

## Building Community and Rebuilding Homes

Healthy Blue sponsored Rebuilding Together's Second Annual Build and Boil event. This event is a fundraiser, a community party, and a volunteer opportunity, bringing people from all over New Orleans together. The Build and Boil event supports Rebuilding Together's mission to improve the quality of life for low-income homeowners in New Orleans, especially homeowners who are elderly, disabled, veterans, or single heads of households with minor children. With Healthy Blue's help, this event raised over $28,000, boiled almost 1,000 pounds of crawfish for the community, and aided five local homeowners.

## 2.6.9 Provider Support

Healthy Blue has more than nine years of experience supporting more than 27,000 unique providers. Through this experience, we have learned that timely communication, accurate claims payment and a comprehensive training and education program are essential to building collaborative relationships with providers and empowering them to meet the needs of our enrollees (members). Our approach to supporting providers is detailed throughout this response and included in our Provider Support Plan, a new element of our Quality Assessment and Performance Improvement plan. We will update this plan at least annually in accordance with Model Contract, Section 2.16.16.2.

> *In my opinion, the Healthy Blue leadership team has always been open to ideas and conversations that work toward improving the quality of care to their membership in a cost-effective manner. As a provider, our thought and concerns are taken seriously. I have found that when problems arise, regardless of what they may be — claims, credentialing, membership, or any other issue — they have a team of individuals that are diligent about following them to a resolution. We have a good relationship with the Healthy Blue team of executives, Randy, Yvette, and Nick, and look forward to many more years of working together*
>
> **Greg W. Ivey, Chief Operating Officer**
> **The Pediatric Center of SWLA**
>
> LA_HlthyRebid21_ 2.69_Ivey_TST_01

Our Provider Support approach begins with our Network Development team, who is responsible for building our network and supporting providers throughout the contracting and credentialing process. Once providers join our network, our Provider Experience team serves as the primary resource for communication, training, and resolving any issues that may arise. Our local Network Development and Provider Experience Consultant (PEC) teams report to our Provider Services Manager, Randy Guillory, and are 100% dedicated to Louisiana Medicaid. Together, these teams execute our proactive provider support strategies. ***Each employee on these teams is a local Louisiana resident that lives in the communities we serve***, which further enhances our ability to support our providers.

We recognize how critical it is to meet providers' core servicing needs such as timely claims payment, maintaining accurate provider demographic information, and communicating important updates and changes. Through open feedback and communication with our providers, we continuously evaluate our strategies to assure that every provider has the level of support they need to meet contractual operational requirements and advance the State's population health management and quality goals. In March 2021, we made significant enhancements to our Provider Experience model as a result of our 2020 Provider Satisfaction Survey to better support our providers through tailored communication, improving our team's provider issue resolution and response times, and enhanced provider practice performance reporting. In this enhanced model, each provider is assigned a PEC who is directly responsible for:

- **Providing Customized Onboarding, Ongoing Training, and Technical Assistance.** This is tailored to each provider's specific needs. We know our providers have a range of capabilities and we tailor our support appropriately. For example, in 2020, we hand-delivered contracts to providers that were not comfortable signing contracts electronically.
- **Educating Providers on Relevant Program Requirements and Updates and Responding to All Inquiries Within 24 to 48 Hours.** We monitor staff response times and take appropriate corrective action if service level agreements are not met. ***These performance reports are routinely shared with Healthy Blue's Leadership team.***
- **Sharing Performance Data to Promote Quality of Care and Effective Cost Management.** PECs meet with providers regularly to review performance data and educate them on the tools available, detailed in this response, to help them achieve their cost and quality goals.
- **Provide Navigation Assistance for Operational Issues.** PECs directly connect providers to our Provider Issue Resolution (PIR) Unit, a fully dedicated team that resolves claim escalations. The PIR is required to update providers every 10 days until their issue is resolved, and PECs monitor adherence with this policy.

Our PECs educate providers on claims and encounters submission as part of our new provider orientation and offer providers individualized training as needed on an ongoing basis. We also monitor weekly Claims Denials reports to identify providers that may require assistance, which is further detailed in Section 2.6.9.3. This comprehensive approach to training, in combination with significant configuration improvements and claims system enhancements, has contributed to an increase in auto adjudication [redacted] ***Additionally, beginning in July 2021, we started making claims payments daily, which will further reduce TAT.***

**SUPPORTING PROVIDERS THROUGH TIMELY CLAIMS PROCESSING**

So far in 2021, our average claims turnaround time is six business days.

LA_HlthyRebid21_TimelyClaimsP_COB_04

A further distinction of Healthy Blue is our relationship with BCBSLA Commercial and Medicare Provider Support teams. ***We work together to support providers with multiple touchpoints in the field, in a highly personalized manner.*** To ease administrative burden, if a provider question or concern related to Healthy Blue comes up during an interaction with BCBSLA, a seamless referral is made to Healthy Blue's Provider Experience team to assist the provider, and vice versa. In addition, ***leadership from both companies conduct joint provider meetings and***

***participate in mutual forums like health fairs that offer individualized discussions to deepen and solidify our network relationships.***

## 2.6.9.1 Provider Relations Staffing

[redacted] These Representatives are available Monday through Friday from 7 a.m. to 7 p.m. CT. We provide additional details about our comprehensive provider engagement strategy and staff in Table 2.6.9.10-1.

Our staffing model is designed to assure all providers receive the highest level of service and support. Our teams are fully integrated, and consultants are trained to support all provider types including physical health (PH) and behavioral health (BH), allowing multi-specialty providers a single point of contact. To assure providers have timely and adequate responses to all inquiries, questions, and concerns, we consider several factors to determine adequate staffing, including:

- Number and location of providers, including whether the locations are urban or rural
- Projected new providers per year, including those undergoing contract negotiation or credentialing
- Estimated number of visits required per provider, based on established meeting frequency goals. These goals are developed based on provider type, member volume, and services rendered, and generally include:
  - Monthly meetings with large hospitals systems and PCP groups, including Joint Operations Committee meetings
  - Quarterly meetings with licensed BH professionals, OB-GYNs, and high-volume specialists
  - Semi-annual or annual visits for other provider types, as needed
- Other required meetings, including quarterly Provider Advisory Council (PAC) meetings and monthly orientation opportunities
- Upcoming operational updates that require proactive outreach and education
- Estimated number of ad hoc meetings to provide issue resolution, education on new policies, and address the specialized needs of our smaller, rural providers
- Number of providers participating in our Value-Based Payment (VBP) programs and opportunities to advance along the Alternative Payment Method continuum
- Anticipated provider call volume based on historical and forecasted data
- Feedback from providers received through various channels, including satisfaction surveys and the PAC, as well as 1:1 provider visits
- State priorities and requirements

Annually, our Provider Services Manager conducts an analysis to determine whether current staffing levels are adequate to meet provider needs. If the analysis indicates that we have staffing opportunities, we have processes in place to quickly recruit, hire, and train qualified professionals. For example, based on feedback from our providers related to increased training needs, ***we are in the process of adding*** [redacted] ***to our Provider Experience team***. These Training Specialists will assist PECs with developing, executing, and tracking our overall Provider Education program.

> *Healthy Blue has done a superb job in strengthening the partnership between our organizations, providing consistent communications, and addressing [routine complexities and issues that come up with all MCOs]. Our provider representative, Bryson Blount, his manager Nick Daigle, and the rest of the Healthy Blue team have set a great example of how an MCO and a larger provider group such as ours can work together collaboratively to improve healthcare delivery to the Medicaid patients of Louisiana…Bryson is the gatekeeper for all issues that come up in the partnership. He has a standing issues log where he records all reported issues, provides status updates on the elements, and maintains a traceable resolution status for previously closed issues. This level of organization and documentation is not easy, but it provides an immense benefit to all parties and keeps our monthly conversations on track and efficient.*
>
> **Director of Compliance and Contracts**
> **LSU Healthcare Network**
>
> LA_HlthyRebid21_LSU_TST_01

## 2.6.9.2 Provider Communications and Education

### Communications with Providers

We know our providers have a range of capabilities and communication preferences. As a result, we offer a wide range of communication approaches to meet their needs, including in-person, online, routine, and ad hoc options. As noted in Section 2.6.9.1, we have developed meeting frequency goals based on provider type, member volume, and services rendered. While these standards guide our general approach to meeting frequency, we will meet one-on-one with providers at any time upon request or if we identify a need. While the COVID-19 pandemic required that we make all provider meetings virtual, under normal circumstances, we conduct these meetings in-person or virtually based on the provider's preference. ***Since 2020, our PECs have conducted nearly 5,000 virtual visits with providers.***

In addition to provider meetings, Healthy Blue communicates with providers through multiple communication channels, including our provider website, secure provider portal, and weekly and ad hoc e-blasts, as well as more traditional communication methods like fax blasts and mailings. Through these channels, we disseminate information to our providers quickly and efficiently, providing immediate access to important, actionable information and connecting them with the tools and resources they need to deliver appropriate care and drive quality outcomes. Based on feedback from providers, we recently redesigned our provider website to make it easier to navigate and find the resources they need. Additionally, providers registered for our secure portal through Availity can use the new Provider Chat functionality to get immediate answers to questions about claims submission, prior authorization, and appeals. ***Across our organization, providers have indicated they were able to resolve their issue through Provider Chat more than 85% of the time.***

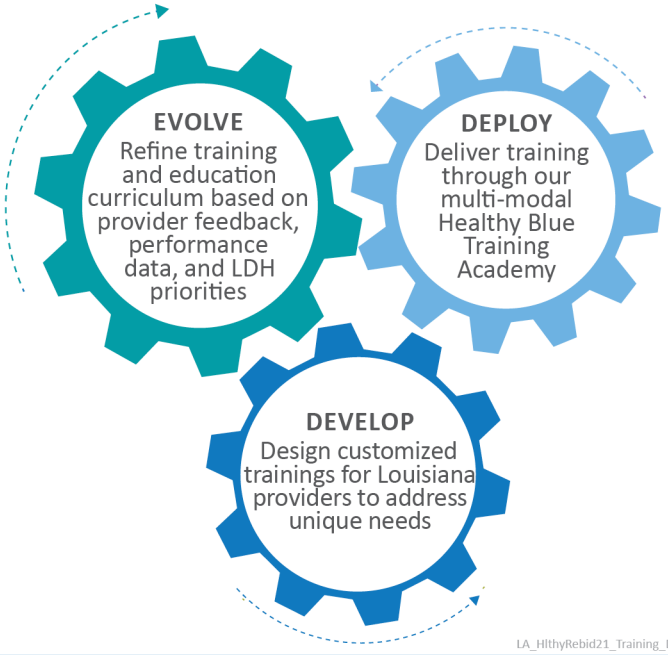
**Proactive Provider Communication.** We understand the importance of having processes in place to provide proactive provider education and training prior to any operational changes taking effect. We have recently made enhancements to this process to better meet the needs of our providers. Our Provider Experience team meets bi-weekly with our Operations leadership to discuss any upcoming operational changes, such as updates to claims payment processes that may impact providers. We then develop the necessary provider outreach campaigns to make sure providers have the training and education they need at least 30 days prior to the change taking effect.

## Strategies to Shape Our Provider Education Program

The key elements that shape our Provider Education program are provider feedback, performance data, and LDH priorities and goals. We regularly engage with our providers to understand their challenges and unique needs. For example, we learned that one of the biggest challenges providers were experiencing during the COVID-19 pandemic was billing for telehealth services. As a result, we developed training materials and provided one-on-one support to educate providers on these processes. We also monitor data, such as claims denials, provider call reasons, and member complaints, to identify trends that may indicate a need for targeted education. Additionally, we develop education on topics that align with LDH priorities, such as PH/BH integrated care and health screenings like Screening, Brief Intervention, and Referral to Treatment (SBIRT).

Our Provider Education program is delivered through our Healthy Blue Training Academy, a dynamic education and training platform that offers a wide array of expert-developed, customized trainings specific to the needs of Louisiana providers. Through the Academy, providers can attend live webinars conducted by our PECs, including monthly orientations and trainings on specific administrative topics including billing and reimbursement. We also offer regular trainings on clinical topics that are relevant to our members and seek to advance population health goals. For instance, in August 2021 we held a webinar on Hepatitis C and how it can be exacerbated by drug and alcohol abuse. Each live training webinar event offers continuing medical education credit for providers and continuing education units for other certified health professionals. Providers also have access to on-demand web-based trainings, the Provider Manual, newsletters, bulletins, and weekly e-updates through the Academy.

HEALTHY BLUE'S APPROACH TO TRAINING AND EDUCATION



We are investing new resources in our Academy by adding the functionality and resources provided by the Elsevier Performance Manager learning management system (Elsevier). Elsevier is a premier health science information platform that offers web-based learning and allows providers to register for courses with specialized content that meet their needs and interests. Elsevier also includes mechanisms for tracking, monitoring, alerting, and reporting compliance and completion of trainings to make sure our providers are successful in fulfilling their contract requirements and meeting members' needs. The learning management system enables the incorporation of additional proprietary competency-based content developed by local, regional, or national experts.

In addition to the webinars and courses available to providers online through the Academy, our Provider Education program also includes ***individual, customized training sessions whenever needs are identified, either through proactive monitoring of provider performance or upon request.*** As detailed previously, every provider is assigned a PEC that is responsible for understanding their needs and making sure our education program meets those needs. We also monitor reports to identify providers that might require additional training. This process is described further in Section 2.6.9.3. and will be further enhanced by the addition of [redacted] In addition to the offerings available via the Academy, PECs also provide education through seminars conducted in partnership with local provider associations, such as the Louisiana Medical Group Management Association.

**Cultural Competency.** One of the primary goals of our Provider Education program is making sure providers have the knowledge, resources, and tools to offer culturally competent care. Our Healthy Blue Training Academy helps support providers by offering cultural competency training in a variety of formats, including webinars, online courses through our provider portal, and individual training as needed. Our "Caring for Diverse Populations" toolkit contains information, tips, and resources regarding language, interpreter services, and cross-cultural issues and helps providers assess their level of competency. Healthy Blue also promotes the use of MyDiversePatients.com, a website that offers free training and resources for providers to help support the needs of their diverse patients along with continuing education (CE) credit. Available trainings include Creating a LGBT-Friendly Practice, Equity in Asthma Care, Breast Cancer Screening for African American Women and Promoting Birth Equity.

**Specialized Education for BH Providers.** We also offer specialized training for various provider types. For instance, we are investing more than $160,000 dollars to expand BH provider capacity through evidence-based trainings, including Parent-Child Interaction Therapy (PCIT). Through Elsevier, Healthy Blue will offer an extensive library of training opportunities and topics based on person-centered principles. Trainings will include independent living philosophy, principles of self-determination, medical versus social models, the value of self-advocacy, self-direction, disability literacy, and more. Healthy Blue has collaborated with top national organizations such as DirectCourse, Association of People Supporting Employment First (APSE), OMNI Behavioral Health, and the American Academy of Developmental Medicine and Dentistry to provide access to this curriculum.

[redacted]

Healthy Blue's provider education strategy also includes partnering with expert organizations to deliver timely education, including evidence-based practices, that improve quality of care, such as our recent Racial Equity Series and our Healthy Equity Symposium, Mental Health First aid training and Learning Labs in partnership with the Louisiana Public Health Institute. Following each educational session, we seek provider feedback through post-forum surveys that we use to enhance our curriculum and Academy for the future. Additional enhancements based on specific feedback that are currently in design include on-demand videos that highlight processes for completing administrative tasks and cover critical topics such as, cultural competency, health equity, trauma-informed care, and utilization of Medication Assisted Treatment to treat opioid use disorder, delivered by trusted Healthy Blue leaders.

## 2.6.9.3 Providers with High Claims Denial Rates

### Supporting Providers with High Claims Denial Rates

To support providers with high claims denial rates, we have established processes that ***comply with Act 710 of the 2018 regular session of the Louisiana Legislature requiring reporting of data on provider claims from Medicaid MCOs***. Healthy Blue is focused on identifying claims denials as early as possible and determining the root cause to correct any system issues. We review our Denied Claims Report weekly to identify providers with a high volume or high dollar value of denied claims. By the end of third quarter 2021, we are adding three additional analysts that will double the amount of proactive claims analyses being conducted. If we identify that the denials are due to provider error, the provider's assigned PEC will work conduct outreach to schedule the necessary claims training. If the claims issue is more complex, the training will be conducted by Provider Claims Educator, who is a certified medical coder. If the denials are due to a configuration issue, we will immediately engage our Reimbursement team to initiate a request to update our systems. If claims deny or reimbursement is impacted for multiple providers due to a system error, configuration fixes are implemented immediately, and providers are notified through our provider portal and e-blast notification within the five-business day State requirement or sooner.

[redacted]

[redacted]

### Provider Escalation Claim Model

In addition to the provider experience resources and processes described previously, ***we launched our new Provider Escalation Claim Model in May 2021*** that allows for greater tracking, trending and monitoring of provider claim denials and enhances the provider communication process to proactively deliver updates on statuses. The PIR team works with the Provider Experience team to support a ***centralized Provider Claim Escalation Model*** that is integrated to support PH and BH providers. It also allows us to more efficiently complete root cause analyses and identify additional providers potentially impacted so that we can conduct proactive outreach and provider education to minimize future denials. This model includes:

- A ***single channel*** for the PEC to submit a claim escalation on behalf of the provider
- A ***standardized escalation process***, including an update every 10 days until resolution; quicker updates are available when required to meet member providers needs
- Enhanced ***transparency*** into the escalation progress
- Identification of ***root causes*** and trends to use for future opportunities
- Enhanced ***reporting*** including an executive dashboard
- Identification and resolution **o**f ***global issues*** that impact multiple providers

## 2.6.9.4 Resolving Provider Disputes in a Timely Manner

### Evaluating and Resolving Provider Disputes

Healthy Blue offers providers a "no wrong door" approach with many avenues to voice a concern or file a dispute, including by phone call, email, through our provider portal, in writing, during visits with our PECs, or through our Provider Services call center. Our call center team intently listens to all provider concerns and whenever possible can **adjust claims in real-time** and resolve issues in a timely and accurate manner. ***Using the collective information gathered at all levels of the dispute process, we perform root cause and trending analysis to minimize future disputes*.**

All employees who may have contact with providers are trained on the appropriate processes for accepting, evaluating, and submitting provider disputes, whether they are verbal or written. All issues that result from an in-person visit with a PEC are documented in our Provider Relationship Management (PRM) tool, a web-based application that allows our PECs and local leadership to track and trend information. Additionally, disputes are recorded and tracked in our centralized provider grievance and appeals system. In the event a provider becomes dissatisfied with our resolution efforts, our team of dedicated local complaint resolution experts will be engaged. This team is responsible for acknowledging all formal complaints by telephone within 24 business hours of receipt, and via email within two business days of receipt. The acknowledgement includes direct contact information for one local point of contact responsible for assisting the provider with follow-up questions related to the complaint and outlining the steps that will be taken to resolve the complaint. We conduct thorough research into each provider complaint using applicable statutory, regulatory, contractual, and provider contract provisions. Final resolution is communicated to the provider within one business day of completion and includes the opportunity to notify us if they are dissatisfied with the outcome. [redacted]

[redacted]

### Disputes Specific to Automatic Assignment Policy and Assignment of an Individual Enrollee

Providers can access their panel of assigned members at any time via the secure portal through Availity. Additionally, our CDT Consultants meet with VBP providers monthly and review their attributed membership. Should providers wish to dispute our assignment policy or assignment of an individual member, they can submit these disputes in writing through their PEC, CDT consultant, or by calling the Provider Services Line. Once received, we will work with the provider to address their dispute within 15 calendar days, as required by the Model Contract, Section 2.9.11.3.3. We will educate providers on this process during orientation, on our website, through regular provider communications, and consistently during monthly provider meetings.

## 2.6.9.5 Delivery System and Payment Reform Strategies

We support providers across the delivery system — partnering with physicians, facilities, and non-traditional provider types — ***to accelerate the shift from volume-based care to patient-centered, value-based care that improves member access, promotes healthy lifestyles, effectively manages costs, and aligns as a key principle of our population health strategy and LDH goals and objectives***.

Our strategy to support providers includes VBP programs for payment reform, with progression opportunities based on the provider's capabilities and goals, as well as information and data sharing that we make available to all providers, regardless of whether they are enrolled in a VBP program. We also focus on delivery system reform for support and development of providers in the delivery of integrated care, supporting cross system collaboration, and advancing evidence-based practices. We support providers to improve quality and reduce costs with a combination of clinical, financial, and operations data that facilitates proper care coordination. These initiatives offer further insight into the needs of our populations so that services can be better planned, coordinated, and delivered, thereby improving member engagement.

Our VBP providers receive consultation, program management, identification of performance improvement opportunities, and help in developing action plans from our ***CDT Consultants***. Our CDT Consultants are VBP experts who serve as the provider's navigator and performance coach. In 2021, we transitioned three nurses who have direct quality management (QM) experience to be a part of the CDT team to achieve higher focus of quality and drive outcomes for VBP programs and providers. Our CDT Consultants offer technical assistance that includes ***coaching, practice transformation consultation, and assistance*** using and interpreting our reporting tools. Our ***integrated data solutions, member dashboards, and scorecards*** help providers improve performance and manage care more effectively. They help providers understand population health data-sharing tools that identify practice-centric opportunities, solutions, and external learning opportunities.

### CDT SUPPORT RESULTS IN QUALITY IMPROVEMENT

In 2019, providers receiving support from our CDT consultants had year-over-year improvement for 11 of 12 quality measures, including:

- **16.2%** improvement in medication management for asthma
- **6.72%** improvement in well-child visits for children 12–21 years old
- **6.66%** improvement in cervical cancer screening

LA_HlthyRebid21_CDTSupports_COB_01

## 2.6.9.6 Support PCPs in Delivery System Reform

### Supporting Primary Care Providers in Delivery System Reform

Healthy Blue understands that primary care providers play a critical role in delivery system reform, and ongoing partnership is critical to our **Elevate | Population Health** strategy. Healthy Blue is dedicated to supporting primary care providers, including direct financial investment in the provider development pipeline. [redacted]

**Patient-Centered Medical Home (PCMH) NCQA Recognition**. We support delivery system reform by providing financial support to providers who obtain PCMH NCQA recognition. PCMHs transform the delivery system through improved quality and reduction in healthcare costs. We educate providers one-to-one through Provider Experience site visits and personal outreach about the benefits of NCQA recognition. Healthy Blue also has a dedicated PCMH Senior Medical Practice Consultant who works with providers to earn or renew their NCQA recognition. We reach out to targeted PCPs, Federally Qualified Health Centers, and Rural Health Clinics to provide technical assistance toward practice transformation and becoming PCMH recognized. [redacted]

[redacted]

[redacted]

Our Provider Experience team plays a critical role in this process by helping to identify PCPs eligible for respective VBP models as well as helping to identify those providers ready to progress into more advanced models. For instance, in 2021, the Provider Experience team helped to onboard new providers, including Chatters Pediatrics and Verity Health, into 3A VBP programs. Provider Experience, along with our CDT and QM teams, also substantiated the ability to usher forth the first Negotiated Risk/Shared Savings 3B arrangement with Sulphur Pediatric for 2022, which is expected to result in high-quality, efficient, cost-effective healthcare practices.

### Practice Coaching

Healthy Blue's collaborative team of PECs, CDT Consultants, and clinical and quality leaders work with PCPs to improve patient access and communication and coordination of care, resulting in more engaging patient relationships. Our team assists providers by delivering and disseminating patient profiles, predictive modeling analysis, risk stratification data, and clinical intervention alerts that enable physicians to identify and build individualized care plans for their highest-risk patients, all while assuring that all patients receive care that meets evidence-based preventive, acute, and chronic care guidelines.

[redacted]

Our cross-functional team of Maternal Child Health/EPSDT Coordinator, Medical Directors, Health Promotion Representatives, and HEDIS® and quality experts also work with PCPs to promote population health priorities. For example, our PECs link PCPs to our QM Clinical Staff, who are available to help with care reporting related to chronic conditions such as diabetes and conduct member classes at PCP locations related to diabetes prevention and living with diabetes. Similarly, our Maternal Child Health/EPSDT Coordinator is available to meet face-to-face with providers to discuss best practices and areas for improvement, and develop provider-specific quality improvement goals related to maternal and infant health. Our Health Promotions Representatives are also available to assist PCPs with addressing gaps in care with a focus on well child treatments.

## 2.6.9.7 Support BH and Specialty Providers in Delivery System Reform

Healthy Blue understands the role that BH and specialty providers play in delivery system reform. We have implemented several innovative strategies that seek to transform the care delivery system by improving quality of care, advancing health equity, and more effectively managing costs. Our BH and specialty VBP programs support LDH's goal to decrease fragmentation and increase integration as part of delivery system reform across providers and care settings, particularly for members with BH and OB needs.

[redacted]We work to improve cross-agency coordination to make sure members have a greater awareness of and access to mental health, substance use disorder (SUD), and PH care services. For instance, through [redacted]

[redacted]

**Education and Administrative Supports.** We offer integrated PH and BH service management and tools, such as evidence-based screenings and virtual specialty consultations, to help identify members' holistic needs, make timely referral to services, and effectively coordinate clinical care. BH Medical Director, Cheryll Bowers-Stephens, MD, MBA, works with the CDT team to develop and deliver high impact field interventions, supporting content development and practice transformation embedded capabilities improving provider performance. Additionally, our integrated PEC team effectively focuses on helping providers promote a holistic approach to integrated PH and BH care. For example, PECs offer education on referring members with untreated PH issues to their PCP for examination, as well as their responsibility to send the PCP quarterly reports on members' BH status. Our online Coordination of Care form helps BH providers share information with PCPs and other specialists when a member enters BH treatment. This form provides the physician with a better understanding of the member's BH treatment needs. We encourage the use of this form during our interactions with providers and ask that they incorporate it into each member's treatment plan.

## 2.6.9.8 Sharing Provider Performance Data

Our strategies to share actionable provider performance data is an integral component of our Provider Support Plan. Healthy Blue endeavors to reduce provider administrative burden by offering consistent, easy-to-use data and reporting tools and we share member-specific clinical data with all providers using our integrated member dashboard, accessed via the provider portal. In addition, providers have access to our array of performance monitoring and reporting solutions, including our Provider Care Management System available to VBP providers, VBP provider scorecards, and reconciliation reports. These tools allow providers to compare their performance to peers and established benchmarks, and help providers improve quality and manage care more effectively. We outline these data-sharing tools further in Section 2.6.12.6 of our VBP response.

We view every interaction with our providers as an opportunity to share performance data, and tailor our strategies to share this data based on the needs of every provider practice. Our PECs train each provider on how to access performance data during provider onboarding, and we monitor provider performance to identify opportunities for additional education and training opportunities on an ongoing basis.

## 2.6.9.9 Provider Engagement Model

Our locally based integrated Provider Experience team employs a high-touch provider engagement model, with significant emphasis on proactive and local provider engagement. Our approach is based on our experience in Louisiana and includes minimizing administrative burden and providing quick responses to provider inquiries and issues. We tailor our engagement strategies to each individual provider based on their unique capabilities, and further increase engagement through:

- Implementing provider incentive programs that reward providers for delivering quality care

- Minimizing administrative burden, including electronic submission of claims and authorization requests
- Delivering sound reimbursement practices, including prompt and accurate claims payment
- Offering proactive, comprehensive provider education in a variety of venues and participation methods from face-to-face meetings and workshops to webinars and online tutorials
- Assisting at the point of care by providing member utilization data to identify gaps in care and to assure that the member receives all appropriate services
- Streamlining utilization management practice, including electronic submission of authorization requests
- Facilitating a quarterly PAC, where we seek input and feedback from trusted providers on a variety of topics, including service delivery, clinical policies, operations, member access, and VBP

Our approach includes PECs as main points of contact to support provider coordination and engagement with other departments, functional areas, subject matter experts, and resources of our parent companies to emphasize relationship development with our providers. Our fully integrated PECs manage all provider types including PH and BH, allowing multi-specialty providers a single point of contact and will track each interaction with providers in our PRM tool. Our PRM allows us to monitor provider engagement and produce metrics for measuring provider engagement and related improvements in our Provider Support Plan.

## 2.6.9.10 Staff for Provider Engagement

Our team brings longevity and consistency to our providers; members of our leadership team have been with Healthy Blue since implementation of the Healthy Louisiana program in 2012. Provider engagement begins with the members of our Network Development team, who are responsible for onboarding our providers. Once they have joined our network, providers are supported by our comprehensive provider engagement model, as outlined in in Table 2.6.9.10-1.

[redacted]

## 2.6.9.11 The Presence of Local Provider Field Representatives and Their Role

Healthy Blue's [redacted] PECs are located across Louisiana and cover all LDH-designated regions. These highly seasoned professionals are led by our Manager of Provider Experience, Nick Daigle, and have proficiency in cultivating and maintaining meaningful relationships with Louisiana providers. We strategically hire staff that understand the communities where our providers work and live. For instance, [redacted] PECs that support Regions 7 and 8 were born and raised in those regions and understand the challenges providers may experience associated with the more rural landscape.

**Nick Daigle**
**Manager Provider Experience**

Nick, a native Louisianian, has 25 years of Louisiana healthcare experience. He has overseen Healthy Blue's integrated PH/BH Provider Experience team since the Louisiana Medicaid Managed Care Program was implemented in 2012. His team is responsible for easing provider burden and allowing them to provide members with the best care possible.

LA_HlthyRebid21_2.6.9_Daigle_63_SL_02

Our PECs are the primary face and local touchpoint for our providers, and they are able to proactively answer and resolve contract questions, reimbursement disputes, non-routine claim issues, billing questions, and more. They are committed to providing excellent customer service and make regularly scheduled and as-needed visits to provider offices to offer technical assistance and guidance related to resolution of issues. PECs are also responsible for identifying training opportunities for providers at both the individual level and for the larger provider community. Prior to the pandemic, the Provider Experience team hosted and attended in-person events across the state, including statewide "Road Shows" when they recognized the need for training around a topic that affects many of our providers. This team will resume these activities prior to the start of the new contract, either virtually or in-person, depending on the status of the COVID-19 pandemic.

## 2.6.9.12 Tracking Interactions with Providers (Electronic, Physical, and Telephonic)

Healthy Blue's Provider Engagement staff listed in Section 2.6.9.10 track each interaction with our providers--electronic, physical and telephonic, including scheduled and ad hoc interactions — in our PRM tool. As mentioned earlier, all issues that result from an in-person visit with a PEC are documented in our web-based application that allows our PECs and local leadership to track and trend information. The PRM tool allows us to monitor provider engagement and identify trending provider needs across the state. Additionally, prior to every provider visit, our PECs develop an agenda and materials that they distribute to the provider in advance of the scheduled meeting. We use a Provider Experience Visit Checklist, loaded into our PRM, for each provider visit that documents all information discussed during the PEC's visit, including the information listed in Table 2.6.9.12-1.

*Table 2.6.9.12-1. Provider Relations Checklist Overview*

| Operations | Any Operational and Contracting Issues |
|---|---|
| **Delivery System Reform** | VBP program performance and opportunities for future programs |
| **Provider Training** | Current training, completion status for required training, upcoming educational opportunities and requirements, and provider educational needs |
| **Claims** | Review of claims summary, payment, and denial trends as applicable. The PEC utilizes data from internal accounts receivables financial review, the Internal Resolution Unit Provider Experience Report, Detailed Summary Report, Demographic Detail Report, Claims Detail by Tax Identification Number and Date of Service, and Appeals and Grievance Report |
| **Action Plans** | Ledger of outstanding action items and new actions identified during visit |

Provider signatures are required on each checklist to confirm their participation in the visit and acknowledge their agreement to any follow-up action items identified. Following the visit, a written follow-up is sent to the provider with a survey link requesting feedback on the provider satisfaction with the visit; information is entered into our PRM; and the PEC initiates internal meetings as appropriate, assigns action items, and assures deliverables are met and action items are closed based on the provider's needs identified during the visit.

## 2.6.9.13 Data to Identify Specific Training Needs

We use multiple tools and reports to collect and analyze data to identify special training needs. We monitor performance data, such as claims denials, Provider Call Center interactions, and complaints to identify trends or patterns that are indicative of the need for provider training. If the issue impacts a specific provider or provider type, we personally engage the provider(s) involved to discuss the issue and develop an action plan, including the implementation of additional training.

Additionally, our Provider Experience model assures every Louisiana provider has a dedicated PEC responsible for obtaining feedback on their individual training needs and delivering on-site or virtual training sessions as needed. ***Since 2020, our Provider Experience team has conducted more than 5,000 virtual provider visits, assessing individual provider needs and providing education and training on Healthy Blue processes.*** We also obtain provider feedback through our PAC meetings and provider surveys. Based on this feedback, we develop and customize training and education to enhance provider skills and continue to refine training based on feedback.

Our QM oversight process includes review of quality data (for example, HEDIS measures) to identify gaps and provider practice patterns for training opportunities. For instance, we reviewed ADHD medication utilization to identify outlier providers and offered to all PCPs and pediatricians an interactive e-learning experience for providers based on *Caring for Children with ADHD: A Resource Toolkit for Clinicians*, a collaborative project between the Louisiana Chapter of the American Academy of Pediatrics, and the Louisiana Department of Health.

## 2.6.9.14 Measure the Overall Satisfaction of Network Providers

Our annual Healthy Blue provider satisfaction survey (PSAT) process includes an objective review of activities and systems that assesses quality of care and service This NCQA-approved survey is fielded annually in the summer and targets a randomized sample of various provider types (PCPs, specialists, BH specialists, and OBs), prioritizing high-volume providers in each region or parish. Providers complete the survey online or in hard copy. Our PECs encourage non-responders to complete the survey during their regular interactions to reach an appropriate sample size for analysis. All completed surveys are processed to produce detailed summaries of results and are compared to prior years' metrics to identify upward and downward trends, and areas of opportunity to act upon. We gauge satisfaction with Healthy Blue in the following areas:

- Overall satisfaction
- Claims processing and provider reimbursement
- Chronic Condition Management
- Rating of Plan manuals
- Loyalty
- Utilization Management
- Satisfaction with services
- Satisfaction with information exchange

[redacted]

We review results of our annual PSAT and the annual Healthy Louisiana provider satisfaction survey, identify areas of opportunity, create action plans, and initiate a workgroup to drive improvement of scores through specific, measurable actions. ***We conduct ongoing quality assurance by offering providers the opportunity to fill out a provider satisfaction survey after each web-based, telephonic, or in-person interaction with one of our PECs.***

> *We appreciate the organization and willingness to get us the information that we need. We also appreciate the frequent communications throughout COVID when other plans were resistant to meeting and communicating.*
>
> **Satisfaction Survey Feedback**
>
> LA_HlthyRebid21_Unsolicited_TST_02

In 2021, Healthy Blue conducted a Provider Listening Tour to solicit candid feedback from providers to identify where enhancements could be made to improve the overall provider experience. Between March and May 2021, we contracted with an independent external consultant to conduct 12 provider interviews to investigate how well Healthy Blue performs compared to other Healthy Louisiana MCOs. We learned our providers were largely satisfied with the services and support delivered by Healthy Blue. Additionally, we identified areas of opportunity: timely response to provider inquiries, COVID-19 strategies, and virtual access to specialists. We incorporated this feedback into our Provider Support Plan and are making enhancements to our provider support offerings. For instance, we are implementing ConferMED, which expands virtual access to specialists through e-consultations. Oversight of the Provider Support Plan will be conducted by QM Committee.

## 2.6.9.15 Provider Training

Healthy Blue providers have access to a comprehensive Provider Education program as outlined in Section 2.6.9.2. This program begins with provider orientation, which is the foundation for long-term collaboration between Healthy Blue and our providers. In accordance with Model Contract Section 2.10.7, we offer orientation training to providers that join our network within 30 days, either through monthly webinars, 1:1 training, or our soon-to-launch Provider Pathways Digital Orientation. Orientation topics include administrative requirements, like claims submission and prior authorization, cultural competency, and Louisiana Medicaid Managed Care Program requirements. A high-level overview is included in Table 2.6.9.15-1.

*Table 2.6.9.15-1. Healthy Blue's Provider Training Topics at a Glance*

| New Provider Orientation | |
|---|---|
| ▪ Intro to Healthy Blue | ▪ Quality Program and HEDIS Measures |
| ▪ Provider Experience Team | ▪ EPSDT Services |
| ▪ Healthy Louisiana Program Requirements | ▪ Privacy/Confidentiality of PHI |
| ▪ Benefits and Covered Services | ▪ Appointment Access and Availability Standards |
| ▪ Enrollment and Credentialing Process | ▪ Value-added Benefits and Social Supports |
| ▪ Authorization Procedures and Guidelines | ▪ Social Determinants of Health |
| ▪ PH and BH Integration | ▪ Mental Health (MH) and SUD Protocols/Resources |
| ▪ IPAT | ▪ VBP Programs |
| ▪ Billing Procedures and Claims Submissions | ▪ Member and Provider Satisfaction Surveys |
| ▪ Provider Manual, Web Portal, and Resources | ▪ Pharmacy Program |
| ▪ Grievances and Appeals, Dispute Resolution | ▪ Fraud, Waste, and Abuse |

| Cultural Competency Training | |
|---|---|
| ▪ Healthy Blue Cultural Competency Plan<br>▪ Cultural Competency Assessment Tools<br>▪ Understanding and Increasing Awareness of Multilingual, Multicultural, and Disability Needs of Individuals<br>▪ Review of the 15 National Standards for Culturally and Linguistic Appropriate Services (CLAS)<br>▪ Culture and the Impact of Healthcare<br>▪ Social Determinants of Health (SDOH) | ▪ Expectations for Providers and Staff (Including Mandate to Continually Expand Cultural Competency Knowledge and Skills)<br>▪ Compliance and Physical Access Requirements and ADA Accessibility Standards for Members, Including Those with Physical and Cognitive Disabilities<br>▪ My Diverse Patient Trainings<br>▪ Adverse Childhood Experiences (ACEs) Training<br>▪ Racial Equity |
| **BH Training** | |
| ▪ Screening for Identifying and Coordinating BH Disorders<br>▪ Community MH Program and Trainings Related to Suicide Risk, Prevention, and Post-intervention | ▪ Supporting Integrated Care at Pediatric Practice Level<br>▪ Members with Co-occurring MH and SUD<br>▪ Referring Members to BH Specialists |

In addition to the training topics listed in Table 2.6.9.15-1, we offer a wide variety of helpful and informative training topics that offer CE through our Healthy Blue provider training page, accessible through the Academy. These live and on-demand trainings focus on subjects such as clinical patient care; coding and documentation; reimbursement, billing and claims; and quality and practice improvements. For example, we offer trainings on our quality monitoring tools, customized for different provider types, on at least a monthly basis. In June 2021, we offered this training for ASAM/OTP providers, and in July 2021, we offered this training for Applied Behavioral Analysis services. We also deliver additional monthly trainings on topics that are determined by various factors, including changes to operational or program requirements, current events (such as the COVID-19 pandemic), provider needs, and LDH priorities. Examples of clinical, quality, and administrative trainings we have offered or will be offering in 2021 are included next.

- **SBIRT.** April and May 2021
- **Pediatric Preventive Screenings.** June 2021
- **Hepatitis C and Drug/Alcohol Abuse.** July and August 2021
- **Person-centered Planning.** September 2021
- **Cultural Competency and SDOH.** December 2021
- **Recognizing Signs of Abuse, Neglect, Extortion, or Exploitation.** December 2021
- **CPT Changes for 2021.** March 2021
- **Complete and Accurate Diagnosis Coding.** June 2021
- **Correct Coding and Denial Awareness.** July 2021

We incorporate convenient, on-demand access and multi-modality delivery channels into our training to maximize participation, reduce administrative burden, and promote enhanced service quality to our members. Additionally, when we recognize the need for training around a topic that affects many of our providers, we deploy group training in the form of statewide “Road Shows.” Most recently, we hosted several virtual seminars across Louisiana to discuss how accurate ICD-10-CM coding can help providers meet HEDIS measures and close care gaps.

We also offer specialized training for various provider types to meet the needs of members; for example, BH providers receive specialized training related to fail first/step-therapy, approved prescribing caps, Child and Adolescent Needs and Strengths, Level of Care Utilization System, and Office of Behavioral Health standardized training for non-licensed providers. In collaboration with the LSU School of Public Health, Auburn University, and MCOs, we developed and recently implemented PCIT training; PCIT is an evidence-based treatment modality for young children and their families. In addition, we partnered with Tulane University to develop and deploy trauma-informed care and PTSD training for providers.

Healthy Blue strives to engage the provider community by developing thoughtful and intuitive training topics to assist providers as they care for our members. We will continue to actively seek input from our providers to confirm that the training that we offer provides them with the support they need to meet our member’s population health needs and achieve their cost and quality goals.

## Protecting Our Community from COVID-19

Along with local organizations like 100 Black Women, Healthy Blue collaborated with Walgreens to make vaccines accessible to every eligible patient in our community. Healthy Blue hosted a mobile health equity clinic at the Capital Area Transit System terminal, giving transit riders twelve and older the opportunity to receive the vaccine. As an added incentive to vaccinate, Healthy Blue arranged for the first 100 families to the event to receive fresh produce and protein boxes from Top Box Louisiana.

# 2.6.10

## Utilization Management

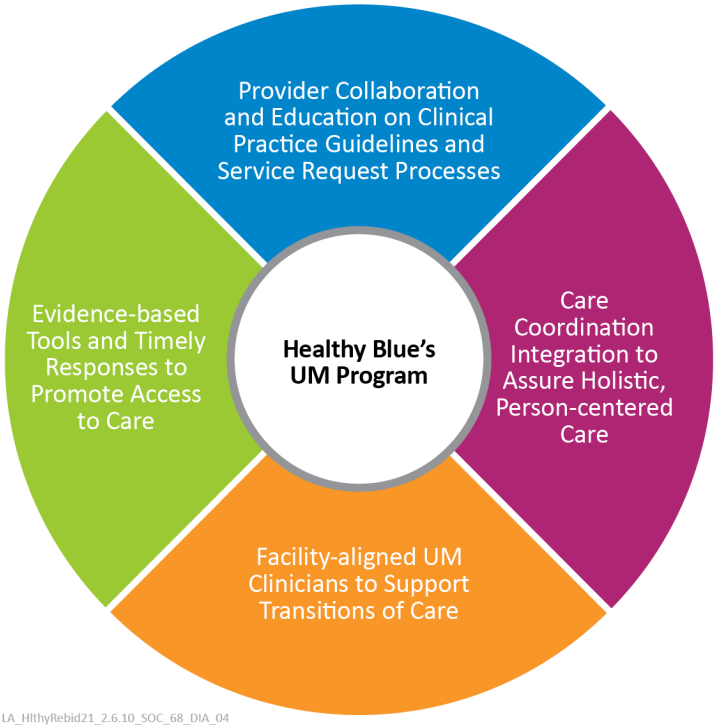
Healthy Blue

# 2.6.10 Utilization Management

## 2.6.10.1 Satisfying Requirements for Authorization of Services

Healthy Blue's utilization management (UM) program is integrated with and supports our **Elevate I Population Health** approach, which is aligned with LDH's goals to advance evidence-based practices, healthcare service excellence, high-value care, and enrollee (member) health. During our more than nine years' experience with Louisiana Medicaid, we have continually refined our UM approach. Our integrated UM leadership, under the direction of Chief Medical Officer, Dr. Raymond Poliquit and Behavioral Health (BH) Medical Director, Dr. Cheryll Bowers-Stephens, has built collaborative relationships with providers and implemented processes to reduce provider burden while assuring quality care for members. Dr. Poliquit has more than 25 years of clinical experience as a practicing board-certified pediatrician in Louisiana and Fellow of the American Academy of Pediatrics. Dr. Bowers-Stephens is board-certified in both psychiatry and child and adolescent psychiatry and recognized as a subject matter expert on integration of physical and BH, having worked with the Department of Health, Office of Mental Health, and LSU School of Public Health in a variety of roles and positions for the last 20 years. Healthy Blue's UM program assures ***each member gets appropriate individualized supports and medically necessary care, where and when they need it***. We continually consider not only members' medical or behavioral conditions when making medical necessity decisions, but home environments; family and caregiver supports and resources; and social challenges, as well as any uniqueness of healthcare in the member's community.

HEALTHY BLUE'S UM PROGRAM PROMOTES TIMELY ACCESS TO NEEDED CARE



### Policies, Procedures, Systems, and Staff Guide Consistent Service Authorization

Healthy Blue's comprehensive UM policies and procedures, systems, and experienced staff guide accurate and consistent application of clinical criteria for service authorization and concurrent and post service reviews in accordance with our Contract with LDH. We will continue to submit our UM program policies and procedures to LDH or its designee for review and approval prior to making any substantive changes.

We align UM clinicians to key hospital systems, facilities, and high-volume providers, such as University Medical Center and Ochsner LSU Health Shreveport, providing them a single point of contact who builds rapport and facilitates open and consistent communication. Our streamlined processes support providers in timely, cost-effective service delivery. Our UM processes include technology solutions and non-clinical staff who support intake of authorization requests and help obtain missing clinical information to streamline the review process for our clinical reviewers. Our qualified, experienced UM clinicians review, document, and approve requested services in a timely manner to minimize any disruption in services. ***During our most recent NCQA Health Plan Accreditation Survey, we achieved a perfect score for elements of our UM Program and Policies, and a rating of High in all elements of file review.***

### Integrated Service Authorization System

***Healthy Blue's Health Intech*** platform supports timely service authorization decisions for physical and BH services. Designed for efficiency and accuracy, service authorization requests are processed, routed, and date and time stamped for all steps taken in the review process. The rationale for decision-making as well as the name and credentials of staff making the decision are documented. Additional features of ***Health Intech*** include:

- Clinical decision support tools integrated with clinical guidelines
- Digital Nurse Assistant tool quickly links UM reviewers to clinical information submitted by providers
- Automated routing of authorization requests to the appropriate internal team
- Automated business rules integrated with authorization requirements support near real-time approvals

Healthy Blue implemented our Interactive Care Reviewer (ICR) solution in 2021 to further reduce provider burden. ***ICR is a fully automated, web-based decision support tool providers can access 24/7 to submit prior authorization (PA) requests and offers immediate approval of requests that meet established criteria.*** If immediate authorization cannot be granted, providers are given tracking information and notified when the review is complete. If a service does not require PA, providers receive immediate notification. Providers can sign up for email notifications at the time of submission, which provides automated notifications. At any time, providers can view the decision and associated written communications from their ICR Dashboard.

## Service Authorization Requests from Authorization to Approval

We use service authorization as a tool to assure members receive the most appropriate and highest quality care. Our service authorization workflows, policies, and processes for timely authorization decisions accommodate the clinical urgency and necessity of any situation. Figure 2.6.10.1-1 illustrates our service authorization process.

***Our UM clinicians are available 24/7 to assist providers with urgent and emergent requests.*** Healthy Blue takes a "no wrong door" approach to authorization requests. Providers can submit requests by telephone, fax, and through our provider portal; members can submit requests verbally or in writing. We offer providers electronic access to Healthy Blue clinical guidelines and service authorization criteria.

Our UM approach confirms members are safely treated in the right place, at the right time, in the most integrated setting. When we receive an authorization request, our UM reviewer enters the clinical information into our Health Intech, verifies eligibility, and evaluates the clinical information against appropriate medical necessity guidelines. Using clinical decision support tools, requests are reviewed against benefits and services defined in the Model Contract, Section 2.4. Our Medical Directors, UM leadership, and UM reviewers work collectively to verify that PA, concurrent, and retrospective review decisions are based on medical necessity and appropriateness in setting, contract provisions, and covered services. ***Our goal is to always seek to improve health outcomes, reduce the likelihood of low-value care, unnecessary, and inefficient services, and to safeguard member safety.***

To meet members' whole-person needs, our UM team closely collaborates with providers and other Healthy Blue teams including Care Management, Provider Services, and Pharmacy. During daily rounds, our UM staff and Medical Directors review authorization requests and identify additional information needed. ***To best address the specialized***

***needs of our youngest members and in alignment with our population health approach, we added a neonatologist to lead integrated NICU rounds, complete NICU reviews, and facilitate peer-to-peer consultations.***

If the UM reviewer is unable to ascertain sufficient information to determine medical necessity, the request is routed to a licensed Medical Director, who makes consistent medical necessity decisions in accordance with State and NCQA standards. The Medical Director discusses service options with the treating provider and consults with a qualified external physician reviewer specializing in the services requested, as indicated, prior to making a decision. At any time, providers can request a peer-to-peer consultation to discuss the case, potential treatment, or alternatives. ***Any decision to deny a request or authorize a service in an amount, duration, or scope that is less than requested is made by a Healthy Blue licensed Medical Director or designee after an evaluation of clinical history, health needs, and social determinants of health (SDOH).*** Initial and concurrent inpatient psychiatric hospital utilization reviews are completed by Licensed Mental Health Professionals (LMHPs) or psychiatrists.

**REDUCING PROVIDER ADMINISTRATIVE BURDEN**

For facilities that have granted us access to their EMR system, we can access their EMRs to streamline PA requests to support safe member transitions. This eliminates the need for the provider to gather information or package medical records to submit, reducing the amount of time spent on submitting PAs. In addition, if Healthy Blue has access to EPIC, we can access specific medical records directly, further reducing the administrative burden.

LA_HlthyRebid21_2.6.10.1_AdminBurden2_COB_03

For any adverse determination or partial adverse determination, we promptly notify the member and provider verbally and in writing. Each denial notice is written in member-accessible language and outlines the reasons a requested service is not medically necessary, factors considered, and additional actions available, including the ability to submit an appeal. Our member denial letters are compliant with State requirements, including Chisholm, HB 424 of the 2019 Legislative Session, as well as NCQA standards. Member notices include fair hearing and ombudsman information. After an adverse determination, members or their authorized/legal representative have 60 calendar days to file an oral or written appeal. To be sure all considerations are made, we include an Informal Reconsideration process that allows the member (or provider or agent on behalf of a member) a reasonable opportunity to present evidence and allegations of fact or law in person as well as in writing following the denial.

**REDUCING PROVIDER ADMINISTRATIVE BURDEN**

Our Gold Card Program will waive PA requirements for providers who consistently meet or exceed PA performance and quality criteria. This will allow these providers to "bypass" the PA process.

LA_HlthyRebid21_2.6.10.1_AdminBurden_COB_02

## Meeting CSoC and PRTF Requirements

Our population health focus supports our young members in receiving timely and appropriate services.

**Psychiatric Residential Treatment Facility (PRTF).** We complete PRTF prescreening within 24 hours. In consultation with the member's parent, guardian, or referring party, we identify a facility with availability. Prior to admission, the multidisciplinary care team reviews other community-based options that meet the child's overall life-domain needs. When there is an admission, on-site concurrent review LMHPs immediately begin planning for discharge. With the facility, they assess member progress and anticipated needs at discharge; work with the facility to verify medical necessity of continued stays; and coordinate discharge planning to facilitate a safe transition. For youth transitioning from a secure setting to a PRTF, we coordinate completion of a Certificate of Need prior to admission in accordance with contractual directives. Once admitted, recertification of the stay occurs every 60 calendar days.

**Coordinated System of Care (CSoC).** We complete the initial CSoC waiver service screening for children and youth when a member is identified as at risk for hospitalization and resides in a home or community setting as well as at least 90 days prior to an expected discharge from a residential service. Should the member screen positive, we refer the parent to the CSoC BH administrator via a warm telephonic transfer. After screenings, we inform, describe, and educate families about specialized services and how to contact the CSoC BH administrator. We collaborate with the CSoC BH administrator on the outcomes of those who are enrolled in CSoC services in our weekly "CSoC collaborative rounds."

## 2.6.10.2 Satisfying Requirements for Utilization Management

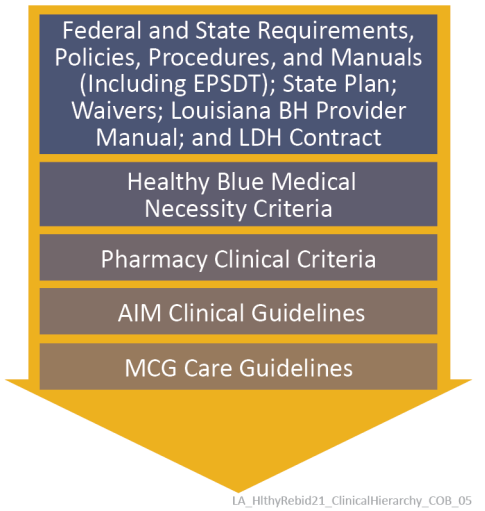
Our UM program prioritizes individual member needs and assesses the availability of services within local delivery systems. We employ an integrated and holistic UM approach that addresses physical health and BH conditions, as well as SDOH, to drive clinically appropriate, safe, and efficient healthcare services in response to each member's unique needs, experiences, and situations. Our UM program is a critical component of our ability to impact healthcare disparities through appropriate authorization and management of services to achieve health equity across communities. Through our comprehensive, effective service authorization processes and our sophisticated utilization monitoring capabilities, we identify opportunities to intervene, ***so members receive the right services, in the right setting, at the right time for them***.

UM is a key component of our care management program. It helps to support the appropriate provision of care, coordinated benefits, and proactively identifies the acuity (risk) level of members, which results in referrals to care management. UM and care management work together to make sure all member care needs are met. ***Healthy Blue's strategies are based on measurable outcomes that promote accountability, evidence-based practices, and fully integrated whole-person care*.**

## 2.6.10.2.1 Proposed Criteria and Application of Criteria

Our UM program aligns our service authorization criteria in accordance with the Model Contract and assures compliance with LDH's definition of medically necessary services. Our UM team applies criteria based upon a defined hierarchy. We first review all relevant LDH, state, and federal rules and guidelines. Where these criteria are silent, we apply Healthy Blue policies and guidelines. Our clinical criteria and guidelines assure both the appropriateness of treatment and appropriate site of treatment. Healthy Blue's criteria and guidelines are no more restrictive than Medicaid fee-for-service requirements.

### CLINICAL CRITERIA HIERARCHY



LA_HlthyRebid21_ClinicalHierarchy_COB_05

As an example of how we apply criteria for specialized services, we use our subcontractor, AIM Specialty Health, to review and authorize selected diagnostic imaging services using their Advanced Imaging Clinical Appropriateness Guidelines. Prevention of unnecessary radiation is a patient safety issue; this arrangement makes sure members receive services that are safe, effective, and consistent with current evidence-based practices.

Our UM reviewers leverage state manuals for specialty BH services, such as Mental Health Rehabilitation (MHR), Applied Behavior Analysis, and addiction services. We also consider clinical practice guidelines (CPGs) such as those from the American Academy of Pediatrics, American College of Obstetricians and Gynecologists, and American Psychiatric Association. During the UM process, our reviewers consider members' individualized needs, including age, complex variables, SDOH, cultural needs, progress of treatment, home, and safety as well as availability of services in our provider network within a member's geographic area.

***We annually review and adopt criteria in our locally based Medical Advisory Committee, which includes participating Louisiana licensed providers in various specialties such as obstetrics and gynecology, psychiatry, otolaryngology, and family medicine.*** Under the direction of our Chief Medical Officer, our locally based UM Committee monitors consistent application of service authorization criteria, and reviews results of all audits and utilization trends, UM program effectiveness, and provider experience results.

### Assuring Consistent Application of Criteria

Healthy Blue implements multiple strategies to make sure staff consistently and correctly apply criteria and make appropriate medical necessity decisions.

### HEALTHY BLUE SUPPORTS COLLABORATIVE CRITERIA DEVELOPMENT

Healthy Blue's UM leadership partnered with LDH to provide feedback on development of criteria for ABA therapy. Through our leadership with the Louisiana Managed Medicaid Association, we led work with other MCOs to develop vitamin D guidelines and respiratory viral panel screening guidelines.

LA_HlthyRebid21_2.6.10.2.1_CollCritDev_COB_04

**Inter-rater Reliability (IRR).** We conduct monthly IRR rounds and annual IRR reviews to monitor application of criteria for consistency and accuracy. [redacted] If a staff member scores below the expected threshold of 90%, pendent authorization decisions and provide retraining. Privileges are reinstated following re-testing and demonstrated improvement.

**Performance Improvement Enhancement (PIE) Audits.** These audits support consistent application of criteria for authorization decisions. [redacted]

**Integrated Rounds.** Through daily, weekly, and bi-weekly integrated rounds, our UM reviewers and Medical Directors discuss cases and criteria, including the review of criteria application. Where appropriate, our Case Managers, Pharmacy Director, Peer Support Specialists, and Specialty Liaisons (for example, Tribal and Health Related Social Needs) are involved in confirming all member needs are addressed.

**UM Staff Training.** To assure consistent application of UM policies and criteria, clinicians complete rigorous training prior to and concurrent with processing authorization requests. Training consists of ***three weeks in classroom and four to six weeks preceptor training*** that includes skill practice scenarios with checkpoints, quick reference guides, identification of available tools and resources, and error and warning messages to help guide reviewers. Specific training modules for general topics include:

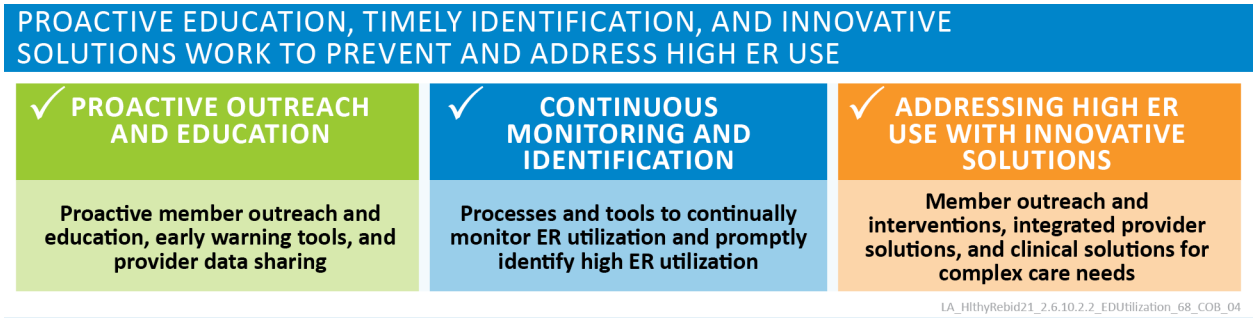
- Overview of Medicaid and Medicare
- Treating the whole person (physical health and BH)
- Legal and ethical issues and HIPAA compliance
- Day in the life of an UM clinician and understanding authorizations
- Review of medical policies and clinical UM guidelines, including making appropriate clinical decisions

We supplement these general topics with ***in-depth, micro-learning training exercises*** for:

- Systems
- Inpatient daily census
- Emergent and planned inpatient admissions
- Initial length of stay
- Concurrent reviews
- LDH authorization timeframes
- Discharge planning
- Person-centered and trauma-informed care
- Pharmacy authorizations
- Preparing for rounds
- EPSDT and Chisholm compliance
- Applied Behavioral Analysis therapy

## 2.6.10.2.2 Process for Monitoring and Addressing High ER Utilization

We identify and address high emergency room (ER) utilization through continuous data collecting and mining, monitoring to identify trends and opportunities, and developing member and provider targeted solutions. Our approach to addressing high ER utilization begins with proactive member outreach and education about appropriate use of ERs and alternative resources and sharing timely member utilization data with providers to encourage preventive care to prevent members from needing emergency services.



To help guide our efforts to monitor and address high ER utilization, in 2021 we conducted a comprehensive analysis of ER use across Louisiana to identify trends. Within our membership, we identified the New Orleans and Lafayette regions as the first and second highest drivers for ER visits, respectively, and the Northshore region showed the highest increase in ER visits. Young adult members (18-21 years of age) drive most ER visits and 60% of ER visits are by women. To directly address these utilization trends, Healthy Blue implemented several initiatives to equip members with the information needed to make appropriate decisions about where and how, while providers were given information and data to guide members accordingly.

### Monitoring Emergency Room Utilization

[redacted]

- [redacted]

[redacted]

## Addressing High ER Utilization

Healthy Blue uses a tiered approach to address ER utilization, beginning with outreach to new members. We connect them their PCP and let them know where nearby urgent care centers are located. If they have not seen their PCP within three months of joining Healthy Blue, we text them to remind them of the importance of connecting with their PCP (if the member has consented to text messaging as a form of communication). If appropriate, we engage members in care coordination or Tier 1 case management. Our ER Readmission Task Force is a multidisciplinary committee leveraging a Critical Incidents dashboard with metrics indicating who might present to the ER after suicide attempt, with suicide ideation, or with substance use disorder (SUD) during pregnancy. We use multiple strategies to reach members at risk for ER use and engage them in our care management programs.

**Member Engagement Solutions.** Members with high ER utilization can benefit from care management, education, and outreach to guide appropriate ER use and encourage preventive care.

*Care Management.* Using screening tools that identify members with three or more ER visits in a six-month period, including those in transition between settings, Case Managers provide supports that help to prevent the need for emergency services. Case Managers reach out to members to discuss precipitating circumstances for ER visits and to complete a health needs assessment, assess for care gaps, and make sure members are linked to a PCP and BH provider, as applicable, while evaluating for any new or evolving care needs.

**Member Outreach Campaigns.** We use a post-ER redirect texting campaign to reach out to members following an ER visit to make sure they are connected to a PCP and educate them about appropriate ER use and resources available when they need emergency or urgent services.

[redacted]

[redacted]

**Member Incentives.** Through our Healthy Rewards program, we offer members incentives for accessing care in the most appropriate care setting by encouraging preventive care and chronic condition management; we also offer value-added benefits (VABs) to augment covered services. [redacted]

**Community Paramedicine.** [redacted]

**Navigator 2.0 Program.** This initiative generalizes and expands Healthy Blue's Access Navigator program, which is based upon the evidence-based Harold P. Freeman Model, to assist members with both physical and BH disorders who are at high risk of ER use and hospital readmission. [redacted]

**Partnering with Providers.** We work closely with providers to drive appropriate ER use. We implement multiple strategies to educate providers on patterns of member ER use and reward providers for appropriate ER use and enhanced access to ER alternatives. We facilitate regular Joint Operating Committee meetings with providers such as Franciscan Missionaries of Our Lady Health System and Ochsner Health to address needs and share data. Our UM and Care Management teams participate in regionally based, multi-provider Readmission Coalition Meetings hosted by Louisiana Hospital Association Research and Education Foundation, Louisiana Nursing Home Association, and HomeCare Association of Louisiana regionally. In several regions, we will be combining efforts with eQHealth Solutions, working as Quality Insights, the Medicare QIN-QIO for Louisiana, where obvious synergy and overlapping missions exist. We encourage all area hospitals, nursing homes, home health, hospice, insurers, pre-hospital, pharmacy providers, and physicians to attend with the purpose of keeping patients and residents in appropriate care settings by building inter-provider relationships and sharing best practices surrounding readmission prevention.

### PROVIDERS REPORT HIGH SATISFACTION WITH HEALTHY BLUE'S UM PROCESSES

According to the most recent LDH Provider Satisfaction Survey results, BH providers ranked Healthy Blue highest among MCOs for our:

- Process of obtaining pre-certification, referral, and authorization information
- Peer-to-peer review process

LA_HlthyRebid2_2.6.10_HighStatisf_COB_02

**Information Sharing.** We share data with providers on ER usage rates through the Availity provider portal for their attributed members and partner with them to address members with high ER use. As noted earlier in our response, network providers will be able to access real-time ADT data through Availity.

[redacted]

**Telehealth.** To improve access to services during the COVID-19 pandemic, we educate members on the availability of telehealth through their PCPs and other providers, while simultaneously equipping providers with the tools needed to successfully offer virtual visits. This includes the Telehealth OS platform, which offers providers HIPAA-compliant access to telehealth services at no cost. Telehealth OS is payer agnostic so providers can use the platform to conduct telehealth appointments for any of their patients, not just Healthy Blue members. [redacted]

[redacted] ***These innovative solutions will increase access to care, eliminate language barriers, and improve health equity.***

**Expanding Access to Integrated Care in Underserved Communities.** Healthy Blue is exploring a partnership with Cityblock that would expand access to integrated care by bringing in additional providers into underserved communities and providing integrated trust-based, person-centered care to members at highest need. Cityblock members in other markets have experienced positive outcomes, including reductions in unnecessary ED visits and inpatient admissions, which we anticipate would be replicated in Louisiana.

**Complex Situations Call for Multifaceted Clinical Solutions.** As part of Healthy Blue's population health approach, our clinical solutions address disparate use of ER services among members with innovative programs specifically designed for subpopulations.

**Sickle Cell Disease.** Our Data Analytics team uses diagnosis and claims data to identify missed care opportunities. When the team examined ER use by members with sickle cell disease, they found a high rate of ER use was associated with poor access to, or use of, primary or urgent care settings for pain management. By connecting members with a provider and establishing an ER diversion program with an interdisciplinary team approach, we support planned access to care that eliminated potentially long and uncomfortable waits in the ER. [redacted]

**Substance Use Disorder (SUD).** When we see indicators of potential SUD (including obtaining prescriptions from numerous physicians or pharmacies without providers' knowledge or obtaining or dispersing prescriptions by fraudulent actions) that could lead to high ER use, we reach out to the member and their providers, gather information, and help arrange an evidence-based best practice Screening, Brief Intervention, and Referral to Treatment. [redacted] with an overdose diagnosis as well as SUD diagnoses from similar services and across populations to compare utilization rates of members with similar diagnoses and acuity.

### INNOVATIVE SOLUTIONS FOR OUR YOUTH

We take a focused approach when a Healthy Blue youth or DCFS member goes to the ER experiencing a BH crisis. Upon notification, our UM Manager engages with the Case Manager to confer on the case. If the facility is in the LHIN, we are notified electronically. Our BH Liaison, part of our youth-focused case management team, deploys a Case Manager to assist based on the presenting issue. The Case Manager contacts the hospital representative to assist with identifying the best placement option and contacts the parent or guardian, introduces their role, provides their contact information, and begins the collaborative process of transitioning the child to the right setting, at the right time, and in the safest manner.

LA_HlthyRebid21_2.6.10_InnovateSol_COB_01

**Medication Therapy Management (MTM).** Healthy Blue offers MTM for members managing multiple chronic disease states and medications to improve health outcomes and reduce ER use. [redacted]

We look forward to continuing to bring meaningful, member-centric solutions to address inappropriate and high ER utilization and improve the health and well-being of Louisianians.

## 2.6.10.2.3 Process for PASRR and Concurrent Reviews

We recognize the role we play in the prescreening of nursing facility services and continued stay reviews. These screening mechanisms assist both the MCO and LDH with assessing availability of member services, assuring consistent application of medical necessity criteria for level of care determinations, promoting consultation with the requesting provider, collaboration between agencies, and the ability to arrange for another level of care if appropriate. Our LDH-informed policies and processes comply with requirements as identified within the MCO Manual and Model Contract regarding prescreening and concurrent reviews.

### Pre-Admission Screening and Resident Review (PASRR) Process

We receive referrals from the Office of Behavioral Health (OBH) to assess the appropriateness of nursing facility placement and the need for, and facilitation of, BH services. Healthy Blue will complete and submit completed PASRR Level II evaluations within four business days of receipt of the referral; we track and monitor all PASRRs through an internal tracker to assure timely completion. We keep all records of completed PASRRs.

Using the criteria set forth in 42 C.F.R. Part 483, Subpart C and the PASRR Level II standardized evaluation form provided by LDH, Healthy Blue conducts PASRR Level II evaluations of members upon referral from LDH to determine the need for nursing facility services or the need for specialized services to address mental health conditions while the member is in a nursing facility. In compliance with 42 C.F.R. §483.130, we monitor members in nursing facilities who have been through the PASRR process, who are identified with serious mental illness, and those receiving specialized services. We defer to State findings on PASRR Level II. In compliance with 42 C.F.R. §483.120 and the DOJ Agreement, we report all PASRR specialized BH services to LDH on a quarterly basis, and all PASRR Level II evaluations will be repeated upon request by OBH for continued stay.

### Concurrent Review Process

We conduct concurrent review for inpatient and residential services and continued stay review for nursing facility services when the provider and member determine treatment should continue beyond initial authorization and make decisions within one calendar day. In coordination with the provider, the UM reviewer engages care management and discharge planning for placement, medications, and authorizations as needed. In performing concurrent and continued stay reviews, UM reviewers assess individual member progress and needs during the episode of care and coordinate before discharge to facilitate the member's smooth transition between levels of care or to home, and to prevent delays in discharge caused by unanticipated care needs. Healthy Blue will not deny continuation of higher-level services, such as inpatient hospital or PRTF, for failure to meet medical necessity criteria unless we can provide the service through a provider at a lower level of care.

## 2.6.10.2.4 Complying with Mental Health Parity Requirements

Our practices for PA, standards for medical necessity determination, and network policy and procedures comply with the Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA) and 42 C.F.R. Part 438 Subpart K. We post our criteria for medical necessity determinations for mental health and SUD benefits to our website and provide them in hard copy to members, potential members, and providers upon request. Healthy Blue participates in Anthem's Parity Governance Committee, which reports to the Medical Compliance Committee as well as other clinical committees regarding overall parity compliance. Anthem's Parity Governance Committee activity supports Healthy Blue's efforts and provides us oversight and guidance in sustaining MHPAEA compliance.

Healthy Blue's integrated physical health and BH policies and procedures assure parity. ***We perform BH services in house, affording us an additional layer of oversight and internal controls to assure mental health parity.***

We examine parity across both clinical and operational areas including, but not limited to, population health management, UM, network access, benefits, and claims. In accordance with requirements, we apply and monitor parity for all populations across four classifications: inpatient, outpatient, emergency care, and prescription drugs. For services in each classification, we assess and confirm that mental health or SUD and medical or surgery standards (both written and operational) are comparable along the following dimensions:

- **Benefit Limitations.** We confirm the number of mental health or SUD benefits covered per year are on par with the number of comparable medical or surgical benefits covered per year
- **Financial Requirements.** We confirm that a member is not required to try less expensive treatments before pursuing treatment suggested by a doctor or because they have not failed a lower level of care; any risk sharing with providers for mental health/SUD services is comparable to medical or surgical services
- **UM Requirements.** We confirm that our PA requirements and medical necessity criteria for mental health or SUD benefits are not more restrictive than those for comparable medical or surgical benefits
- **Network Adequacy.** We confirm our provider networks for mental health and SUD are not narrower, and provide out-of-network coverage for mental health and SUD benefits comparable to medical and surgical benefits

We self-monitor and conduct an analysis if there is a complaint or concern regarding parity compliance, or when there is a change in service limits, UM workflows and processes, or covered services. To assure our self-monitoring tools are appropriate, we draw upon the experience of our affiliates in other markets.

All our UM clinicians are trained on parity as part of orientation and we reinforce requirements and any changes in annual trainings. Our staff training and provider manual include our triage process to help staff and providers determine the urgency of a member's mental health/SUD or medical/surgical need in compliance with MHPAEA.

## 2.6.10.2.5 Identifying and Mitigating Over-utilization

As part of **Elevate I Population Health**, we closely monitor utilization to help assure timely and effective interventions to achieve optimal member outcomes. Monitoring over-utilization helps us to identify opportunities to reduce the use of tests and procedures that add no value to member care and outcomes and to help assure timely and effective interventions to achieve optimal member outcomes. Through our quality management (QM) and UM programs, we use a comprehensive review process to help realize our shared goals with LDH of assuring access to care, improving member health, assuring delivery of quality care to members, and reducing complexity and administrative burden for providers and members.

### Identifying Over-utilization

Healthy Blue uses analytical tools and reports to identify over-utilization on a proactive and retrospective basis, including predictive modeling and data analysis of ER use and rapid hospital readmission. When indicated, we may seek additional quality of care guidance and identification of potential fraud, waste, and abuse (FWA). Our Coordinated Services Program within Program Integrity addresses overuse or misuse of services, including avoiding duplication of services, unnecessary use of medical services, FWA, and excessive use of prescribed drugs.

Our process to identify over-utilization involves an interdisciplinary team of our CMO, BH Medical Director, Pharmacy Director, Director of Care Management, Population Health Administrator, Health Equity Administrator, and QM and UM staff. ***Health Intech*** integrates data from multiple data sources, combining quantitative and qualitative information including health outcomes, care experience, demographics, health conditions, medications, behavioral or physical factors, and environmental and social factors. The team reviews customized dashboards and reports that allow them to drill down for views into specific metrics and trends.

Our monitoring of utilization data and trends is iterative; at each step, we review data through a broader lens and include a broader audience as we interpret data. We monitor data daily, bi-weekly, monthly, and annually.

**Daily Monitoring.** Healthy Blue generates standard and ad hoc reports to analyze utilization and identify trends. We assess variations by condition, service, provider type, and facility. We review hospital census reports in detail of members who are receiving inpatient care.

[redacted] When we identify priate. We work collaboratively with acute and post-acute facilities to improve processes to reduce length of stay and readmission and to streamline the discharge process. We lead collaborative, quarterly Joint Operating Committee meetings with network facilities to review utilization trends, including over-utilization.

**Ongoing Monitoring.** Throughout the year, we continually monitor utilization patterns to identify areas where member health could improve by a proactive modification of their use of physical and BH services. We mine data to identify over-utilization for individual members or population spikes in use of a service compared to prior periods or expected use.

### Targeting Categories of Over-utilization

Through our monitoring efforts to identify over-utilization, we identify targeted categories for mitigation. Table 2.6.10.2-1 includes examples of these along with our mitigation strategies and lessons learned.

*Table 2.6.10.2.5-1. Targeting Specific Areas of Over-utilization*

| Area of Over-utilization | Mitigation Strategies | Lessons Learned |
|---|---|---|
| **Pain Management** | ▪ Evidence-based pain management requires a multidisciplinary approach<br>▪ Improve access to providers<br>▪ Use predictive modeling to identify opportunities to leverage our pain management value-added benefit | ▪ Healthy Blue continues to recruit quality providers for in-network pain management services.<br>▪ Lack of adequate pain management services directly results in overuse of opioids, increase in addiction, and increase in BH spend.<br>▪ Case management results in coordinated, timely, cost-effective, integrated service delivery. |

| Area of Over-utilization | Mitigation Strategies | Lessons Learned |
|---|---|---|
| **Mental Health Rehabilitation (MHR)** | ▪ Provide orientation and monitoring to providers for enhanced clinical outcomes<br>▪ Refer as appropriate to Special Investigation Unit<br>▪ Refer MHR requests to Medical Director for review | ▪ Members may appropriately receive traditional outpatient services vs. MHR supports.<br>▪ Proactive referral of members to other evidence-based services (for example, Functional Family Therapy, Multi-Systemic Therapy, Trauma Focused-Cognitive Behavioral Therapy) is beneficial and effective.<br>▪ Case management plays a critical role regardless of whether members continue to receive MHR. |

## Strategies to Mitigate Over-utilization

Healthy Blue's comprehensive UM approach includes targeted strategies to mitigate over-utilization and improve appropriate use of healthcare services. We describe a sample of them next.

## Engaging with Members

**Resilience through Intervention, Support, and Education (RISE).** Our innovative RISE program for members at risk of opioid or alcohol-related negative health outcomes supports members at risk of high or over-utilization. Field-based Case Managers coordinate member physical and BH needs, as well as SDOH and health literacy needs. In collaboration with UM staff and facility providers, Case Managers coordinate discharge planning and educate and empower members to effectively use healthcare resources and address SDOH to mitigate over-utilization. For example, they conduct medication reconciliation to strengthen post-discharge adherence. During the second

[redacted]

## Partnering with Providers

We mitigate over-utilization by continually educating providers on CPGs and evidence-based practices. Our provider team subsequently monitors provider performance for six months to align practice patterns with norms.

**VBP.** Our VBP program includes metrics outside of "traditional" primary care-focused measures, and is offered to [redacted] — all specifically developed to address our **Elevate I Population Health** approach and enhance the fiscal ability of providers to transform care delivery. [redacted]

## Pharmaceutical Utilization Programs

**Retrospective Drug Utilization Review (RDUR).** Our RDUR program analyzes historical drug utilization data and identifies opportunities to encourage clinically appropriate utilization while promoting medication compliance and safety. The program also monitors for polypharmacy patterns that warrant further investigation or coordination of care. Our pharmacy partner's Clinical Pharmacy Care Center is staffed with pharmacists and nationally certified pharmacy technicians who can prompt member outreach or education in cases of atypical medication utilization. ***From 2019 to 2020, we saw a decrease in ER visits by 25.95% for members we successfully engaged through pharmacy retrospective programs.*** Current programs include:

**BH Polypharmacy Program.** Our current provider outreach program monitors and drives appropriate use of BH medications for identified members with multiple prescribers and multiple psychotropic medications to address polypharmacy issues and inappropriate prescribing of psychotropic medications for children under the age of six and adults over age 65. [redacted]

**Opioid Management.** Our current Opioid Management program mitigates over-utilization by preventing, identifying, and treating inappropriate opioid use; supporting non-pharmaceutical methods for managing acute

and chronic pain; detecting and referring providers who may be committing FWA; helping reduce misuse of opioid treatment by identifying outlier prescribing patterns; and assisting members in gaining access to more clinically appropriate treatment. [redacted]

We will continue to work with LDH, as well as the single Pharmacy Benefits Manager (PBM), on clinical pharmacy program development and expansion to optimize members' outcomes.

**Lock-in Program.** Members with identified over-utilization or suspected patterns of FWA, [redacted] are referred to our ***Lock-In program***, which restricts members to receiving services for an initial period of 24 months from designated providers, including a pharmacy and a PCP or primary controlled substance provider. By limiting members identified as potentially misusing or fraudulently obtaining services, we aim to reduce related ER and physician visits. To make sure members still have access to services, members are allowed up to two specialists referred by their primary prescriber. In 2020, we saw a 25.32% decrease in the number of controlled substance prescriptions. We will coordinate lock-in with LDH and the single PBM.

## 2.6.10.3 Historical Experience with UM of Comparable Populations

***Healthy Blue has been providing UM services for Louisiana's Medicaid program since 2012.*** Our history and commitment to Louisianians guides our daily work and enforces our efforts to facilitate the right care, in the right place, at the right time. We are further supported by our parent companies, BCBSLA, and Anthem. BCBSLA brings more than 85 years of experience working with Louisiana communities and managing care with local resources. ***Healthy Blue and our affiliate Medicaid health plans have coordinated Medicaid and state-sponsored plan benefits for comparable populations for more than 30 years and currently serve more than 9.7 million Medicaid members across 25 markets.*** With our combined bench of national experience and local expertise, we bring a wealth of best practices and a depth to UM.

As best practices have been identified across our many affiliate and parent organizations, we have brought these to Louisiana, such as our Outpatient Integrated Rounds. Through these, we customize solutions to meet members and providers where they are, allowing us to better develop targeted initiatives that provide better healthcare. For example, we identified utilization trends of over-and under-utilization for a complex subpopulation, children receiving Pediatric Day Healthcare (PDHC) services. Our UM team worked with our Care Management team to develop our PDHC program to assure receipt of the right services in the right place at the right time and preserve and maintain functionality, prevent death or prolong life, treat disease, and ameliorate disability or other adverse health conditions. Healthy Blue was recognized for this best practice program and now assists other MCOs in the state with similar programs.

### 2.6.10.3.1 Challenges with High Utilization and Increasing Medical Trends

As described earlier, we use our robust systems and tools to continually monitor utilization and medical trends. Challenges we have faced in Louisiana related to high utilization and increasing medical trends and our strategies to overcome them are included in Table 2.6.10.3-1.

[redacted]

[redacted]

## 2.6.10.3.2 Initiatives Undertaken to Manage High Utilization

Healthy Blue has long utilized our experience identifying and addressing high utilization.

### Linking Members to Care Management

With **Elevate | Population Health** as our core, Healthy Blue's UM program facilitates the delivery of appropriate medical, BH, and pharmacy services, minimizing the likelihood of high utilization and low-value care through application of evidence-informed guidelines. We use UM data to identify high utilization and members with underlying clinical needs, SDOH barriers, and uncontrolled chronic conditions. UM clinicians work proactively to educate and refer members who are high utilizers of services, including ER and pharmacy, to our care management program as appropriate.

We know individualized outreach, ideally in person, is more effective for members who may not have reliable access to housing or means of communication and who are often high utilizers of healthcare services. With our new SDOH tableau dashboard, we can better map member's social needs and our VBP models and telehealth platforms encourage appropriate utilization.

### Reducing Readmission Risk with Comprehensive Discharge Planning and Integration

Effective discharge management and follow-up care is crucial to reducing readmissions. As an initiative to facilitate members recovering in the most integrated setting, we connect them to the care, support, and resources they need ***prior to discharge*** and make sure they clearly understand their discharge plan, risks, and medication directions to prevent a return to the hospital. Our discharge planning team maintains and supports open lines of communication and collaboration with hospital staff from the member's admission through discharge. In early 2021, we added ***two dedicated, experienced discharge coordination nurses to our discharge planning team specifically to assess for the appropriate level of care***. Our discharge coordination nurses present cases at rounds within three days of member's hospital admission, working continuously throughout the stay with our UM reviewer, Case Managers, hospital staff, and discharge planners to assess needs and coordinate care. Each member's case is individualized by the presenting symptoms and intensity of services needed, and the discharge coordination nurses work closely with all parties for safe transitions.

## 2.6.10.3.3 Initiatives to Address Use of Low Value Care

Healthy Blue supports the goals of *Choosing Wisely,* a nationally recognized campaign, in our efforts to reduce unnecessary spending in low value care and strive toward evidence-based, cost-effective, and member-centered care. Healthy Blue designs every process to drive high-value, efficient care and minimize wasteful spending. We realize that changing healthcare culture and member expectations is a slow process, but we make every effort to educate and review CPGs with providers (and members, by request), to adopt best practices promoted by experts, and continually analyze data to produce optimal outcomes.

Healthy Blue has identified promising solutions involving partnerships with providers. These partnerships have the potential to address waste, decrease spending and provider burden, and, most importantly, improve outcomes for members. With a focus on improved communication and information sharing with providers, including education campaigns, faxes, seminars, newsletters, an example of one solution follows.

**ENGAGING PROVIDERS TO ADDRESS LOW VALUE CARE**

Healthy Blue's QM team engages and educates providers on best practices for metrics such as imaging studies for low back pain. We have seen an over 5 percentage point improvement in that metric since 2018.

LA_HlthyRebid2_2.6.10_LowValueCare_COB_01

**Reducing Low Value Imaging.** In a retrospective analysis of claims data in conjunction with population data to quantify service trends for some of the early ***Choosing Wisely*** recommendations, physicians from our parent organization discovered significant decreases in the use of imaging for headaches (from 14.9% to 13.4%) and for cardiac imaging (from 10.8% to 9.7%). We applied the lessons learned from this study in developing our precertification list and CPGs.

Healthy Blue continually evaluates initiatives to address use of low-value care. We are currently developing initiatives for implementation in 2022, including: [redacted] There are benefits and risks associated with CT scans. For example, CT test results might lead to unnecessary, invasive follow-up tests (which may present additional risks) and increased radiation exposure, which can increase the

possibility of cancer induction. EEGs have very low diagnostic yield in patients with uncomplicated syncopation and no clinical features of, or risk factors for, arrhythmia, carotid stenosis, heart murmurs, or seizures.

## 2.6.10.3.4 Initiatives to Address Long-term Stays in ERs

While educating members on appropriate ER use, Healthy Blue engages in prevention and support for members experiencing a mental health condition and SUD. We understand that BH crises frequently result in ER use, but they are not the kind of crises for which many ERs are equipped. Not all ERs have psychiatrists or child psychiatrists available for consult when a member presents in a high state of acuity or agitation, so we contract with network psychiatrists for ER psychiatric evaluations. When a member presents at the ER with BH needs, Case Managers work with the ER to find availability in an appropriate setting as soon as possible. If the ER can find an available mental health/SUD bed, we begin the authorization process. When they are not able to locate a bed, the Case Manager assists the ER in finding a facility. ***If we are unable to find an in-network facility, we direct them to the closest out-of-network facility.***

**Identifying Members in the ER.** By receiving real-time ADT alerts, we identify members in the ER to quickly dispatch interventions, including transition to appropriate mental health and SUD services.

**BH Service Availability.** We maintain open lines of communication with providers to confirm availability of beds in the community for members in the ER who need BH care. We will facilitate development of a ***Community Open Beds Dashboard*** in collaboration with hospitals, BH facilities, the other plans, and LDH to provide transparency in BH service availability across the community so we can quickly move members out of the ER.

Table 2.6.10.3-2 describes strategies we have implemented to address long-term stays in ERs.

[redacted]

## 2.6.10.3.5 Initiatives to Support Providers with High PA Denial Rates

Healthy Blue minimizes provider burden and delivers the right tools and supports that allow providers to focus on delivering high quality, timely care to members. We recognize PA denials impact members directly and can delay critical healthcare services. Currently, our denial rate [redacted] Moreover, our 2019/2020 provider satisfaction survey results showed 86.4% of providers rated our process of obtaining a precertification, referral, or authorization as favorable — the highest among LDH MCOs. Our initiatives include identifying trends so we can support providers to reduce PA denials and simplify PA processes.

We proactively identify trends in provider PA denials. For example, when we noticed an increase in denial rates for Slidell Memorial, our Joint Operating Committee met in person to review and consider factors contributing to the increase. We reviewed denial trends and provided education and guidance for complete clinical submissions. Our meeting and interventions reduced the PA denial rate for the provider and improved the provider experience and member outcomes.

Using UM trend reports and dashboards, such as our weekly internal Denied Claims Report, we monitor providers and services to identify the ratio of approvals and denials and proactively conduct root cause analyses of providers with a

high volume or high dollar value of denied claims. This helps us understand whether issues are the result of systemic processes or provider education.

We monitor overturn rates on appeals, and when we see a large percentage of overturns for a particular provider or for a particular type of review or diagnosis, we review the history to identify contributing factors and implement appropriate corrective actions, such as educating the provider on proper documentation and submission of initial authorization requests.

We implement the following initiatives for providers with high denial rates:

- Our UM team conducts root cause analysis of the PA denials. This may identify a pattern that indicates a provider is not aware of CPGs for specialized services, such as MRIs or CT scans.
- Our locally based Provider Experience Consultants and Network Education Representatives meet with the provider to review our findings, provide education, and assist them in resubmitting requests. We review our tools to facilitate submission, such our Prior Authorization Look Up Tool (PLUTO), accessible 24/7 through our provider website, portal, or provider telephone line to determine whether a specific code requires PA.
- Following our intervention, we monitor the provider's PA submissions for continued issues through our weekly internal Denied Claims Report and work with the provider as needed.

QM staff monitor and report PA denial trends to Healthy Blue leadership, as well as provider interventions undertaken to address high PA denials.

## PROVIDING ONE-ON-ONE SUPPORT TO ADDRESS HIGH DENIAL RATES

Upon identification of an unusually high volume of denials for NICU members at Our Lady of Lourdes Women's & Children's Hospital, our UM staff promptly reached out to the hospital to offer assistance. We scheduled meetings with the hospital, during which our Medical Director and UM nurses worked collaboratively with the hospital's neonatologist and UM staff to identify root causes and provide education on interpreting MCG Care Guidelines. The outcome was positive and the majority of the denials were overturned.

LA_HlthyRebid2_2.6.10_OneOnOne_COB_01

## Encouraging Healthy Lifestyles Through the Bike Library Program

The SWLA Center for Health Services (SWLA Center) rolled out a new bike fleet funded by Healthy Blue. The bike library launched in July of 2019 and consists of 20 bikes and safety helmets. It is a great opportunity for families to spend a few hours outside to make the first steps toward a healthier lifestyle. Community members visit the Fitness Center at the SWLA Center in Lake Charles to check out a bike and then hit the road. Bikes are free of charge to the community, and they are intended for short-term recreational rides. On June 29, 2021, a local high school track team took advantage of the guided bike ride. Healthy Blue and SWLA Center remain committed to the communities they serve.

Healthy Blue

## 2.6.11 Quality

### 2.6.11.1 Healthy Blue's Commitment to Quality Improvement

Healthy Blue brings a deep understanding of the State of Louisiana, the needs of its people, and innovative, evidence-based strategies to advance health equity and quality results. Quality Management and Quality Improvement (QM/QI) methods are an essential part of how Healthy Blue meets the needs of our enrollees (members), providers, and community partners to achieve LDH's goals and objectives. Our member-centered and data-driven QM/QI strategies benefit from our parent company BCBSLA's more than 85 years of local presence, our parent company Anthem's 30 years of Medicaid managed care experience, as well as our nine years serving Louisiana Medicaid. In that time, we have been continuously measuring, evaluating, and refining our program in alignment with the State's Quality Strategy and incentivized measures. [redacted]

#### A Culture of Quality

Quality is embedded in our organizational mission, embraced within our workplace culture, and is at the heart of everything we do. Every employee at Healthy Blue is a quality champion, practicing continuous quality improvement (CQI) and supporting innovation for quality excellence. We offer quality trainings to all Healthy Blue staff and bring our expertise to community, provider, and State collaborations. Healthy Blue listens to the voice of the community and our quality improvement programs achieve results that are important to Louisiana members. Our commitment is evidenced by our capabilities and results, summarized in Figure 2.6.11.1-1.

[redacted]

Quality Improvement is also intertwined with our population health philosophy. [redacted]

#### Our Approach to Quality Improvement

Healthy Blue's QM/QI approach and QAPI program align with LDH priorities, goals, and objectives. We develop member-centered, provider-supportive, and locally-focused strategies and Performance Improvement Projects (PIPs) that comply with the current LDH Contract; State and federal laws and regulations; Louisiana Department of Insurance requirements; and industry standards, including measures and standards defined by NCQA, the Joint Commission, the Agency for Healthcare Research and Quality, and others as specified in Attachment H. We have reviewed the Model Contract and remain fully committed to meeting and exceeding quality program contract requirements.

Our data-driven and NCQA-accredited QM/QI strategies are based on more than nine years of experience measuring, evaluating, and refining our Medicaid program. We continuously assess quality data, membership, utilization patterns, and year-over-year performance measures to develop innovative strategies that improve health outcomes for members, support network providers with delivering quality care, and drive health plan performance. [redacted]

#### Member-centered Strategies

Addressing member needs is at the heart of what we do. Our strategies reflect our passion and willingness to serve. We advance the State's Medicaid Quality Strategy and drive improvements in whole-person health through:

**Member Outreach and Education.** Our QM teams employ focused outreach and education strategies to maximize member health. We use members' preferred method of outreach (telephone, digital, mail, in-person) to

close care gaps and promote well-being. [redacted]

As part of our Community Outreach Strategy, we are growing our CHW program, taking our outreach and engagement approach to the next level. CHWs are a valuable resource in building trusting relationships with members, identifying and eliminating barriers in accessing care through engagement and education, and helping members reach their goals. [redacted]

**School-based Health Centers.** Beginning in 2018, QM Health Promotion staff increased engagement and collaboration with School Health Advisory Councils to support student wellness, nutrition, and physical fitness, while reducing the amount of time children are absent from school. We host school Health Fairs where we provide education on important issues for school-age children, including wellness screens. [redacted]

## Provider Support Strategies

Healthy Blue partners with providers on our common interests to improve access to services, ease administrative burden, provide holistic care, and promote healthy lifestyles for members. Our Provider Experience Consultants provide tools, resources, and support members need to succeed.

**Provider Training.** Our Healthy Blue Training Academy offers an extensive library of on-demand training and continuing education opportunities, including quality-based virtual classes and Learning Experiences through MyDiversePatients.com, many of which offer continuing medical education (CME) credits and continuing education units (CEUs). We also collaborate with other MCOs to develop and deploy unified provider trainings aligned with the State's quality priorities, such as behavioral health (BH) Provider Monitoring Training

**Provider Performance Reporting.** We distribute Care Gap reports monthly to PCPs that identify members due or overdue for preventive services, including well-child visits. [redacted]

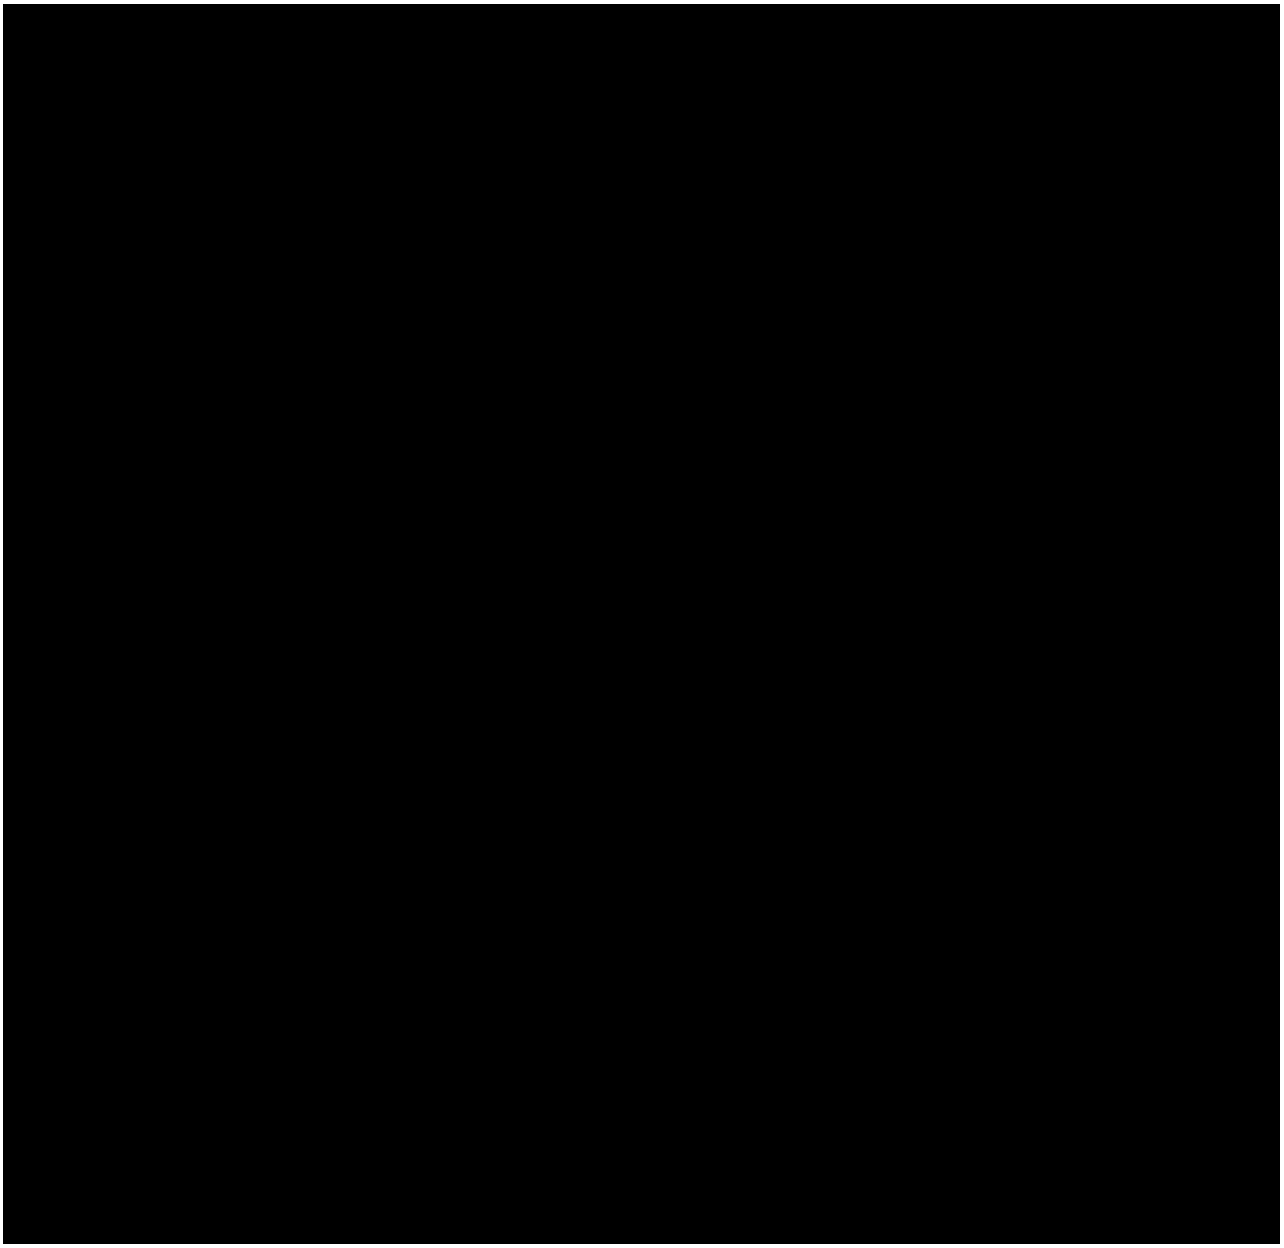
## Local Impact

We have established strong, local community ties, partnering to make meaningful change with our investments, developing solutions with Louisiana locals, and meeting members where they are. Our tenure in Louisiana gives Healthy Blue deep local knowledge of LDH quality priorities and how we can continue to improve outcomes and advance population health for members.

[redacted]

## Strategies Advancing Louisiana Medicaid's Quality Priorities

Healthy Blue will continue to advance all Louisiana Medicaid Quality goals and objectives, as outlined in Attachment H, through the implementation of the quality improvement strategies listed in Table 2.6.11.1-1. We will assign a goal for all the LDH-defined quality performance measures and track progress over time.



[redacted]

We will continue to track and monitor our performance against these quality performance measures and implement CQI to drive improvement.

## Achievements and Innovations for Incentivized Measures

[redacted]

## Care Following Acute Behavioral Health Events

Healthy Blue's intensive Case Managers and mobile crisis providers interface and coordinate care with hospitals and EDs every day. Our integrated care management team contacts members with high cost, acute BH events to support follow-up appointments after hospitalization or ED visit for mental illness or substance use disorder (SUD).

[redacted]

## Maternal, Child, and Adolescent Health

[redacted]We work with expectant mothers and providers to assure appropriate use of C-sections, supporting members to achieve the best possible birth outcomes and improving health equity. [redacted] Doulas have been shown to reduce C-sections for full-term births by as much as 56% (Kozhimannil et al., 2016). [redacted]

[redacted]***Healthy Blue's results for Immunizations for Adolescents exceeded the 75th percentile for HEDIS RY 2020. Childhood Immunization Status (Combo 3) increased 8.3% between HEDIS RY 2018 and 2020.***

## Cancer Screening

Healthy Blue supports consistent cancer screening, diagnosis, and treatment best practices. ***Our cervical cancer screening rates rose 13.5% and colorectal cancer screening rates rose 12.6% between HEDIS RY 2018 and 2020.*** Our initiatives emphasize committed action from statewide partners to better align policies, programs, and practices among all who diagnose and treat cancer. We actively participate in the TACL collaborative to align our strategy and goals to improve screenings. [redacted]

## Management of Hypertension, Diabetes, and HIV/AIDS

By incentivizing provider interventions focused on prevention, Healthy Blue is decreasing risk factors for cardiovascular disease and diabetes such as unhealthy diet, physical inactivity, obesity, and blood pressure management. ***Controlling High Blood Pressure results have improved 48.1% between HEDIS RY 2018 and 2020.*** [redacted]

[redacted]

[redacted] ***The measure of HIV Viral Load Suppression improved 9.3% over three years.*** Healthy Blue also monitors members who are not virus-suppressed and collaborates with providers to determine opportunities to better assist these members. [redacted] As part of ongoing provider education, we have promoted use of Pre-exposure Prophylaxis (PrEP) to minimize new HIV infections for specific high-risk members.

## 2.6.11.2.1 Assessing Utilization to Identify Improvement Opportunities

[redacted]

### Utilization Assessments in Action

Healthy Blue responds to trends in over- and under-utilization, including variations from benchmarks, as part of our QAPI program. For example, we are closely monitoring the impact of COVID-19 on child and adolescent immunization rates. In the last 18 months, we observed a decrease in Louisiana on par with other parts of the country. [redacted] Regular utilization assessments highlight opportunities to assist members using high levels of services with managing uncontrolled chronic illnesses in more appropriate settings. ***With support from Healthy Blue's Chronic Condition Management programs and care management, we have successfully reduced ED utilization for individuals with Adult Major Depressive Disorder by 5.3%, SUD by 4.58%, and Child/Adolescent Major Depressive Disorder by 3.38%.***

## 2.6.11.2.2 Incentives for Providers to Optimize Delivery

Healthy Blue partners with physicians and facilities to drive a shift from volume-based care to patient-centered, value-based care. We continue to advance health outcomes and align with LDH quality strategy via custom, VBP models for providers of all sizes with improved quality performance rewards.

We emphasize provider progression along the payment model continuum and support their readiness to take on risk. [redacted] r Negotiated Risk Shared Savings (NRSS) program includes quality measures that align directly with LDH Model Contract performance measures. VBP models and incentive programs include:

- [redacted]

- [redacted]

## 2.6.11.2.2 Incentives for Members to Receive High-quality Care

[redacted]

## 2.6.11.2.3 Strategies to Meet the Needs of Super-utilizers and Reduce PPEs

We will continue to work with LDH, providers, and other MCOs to drive innovation through evidence-based interventions and strategies that reduce potentially preventable events (PPEs) and emphasize super-utilizers. Healthy Blue uses person-centered models that address members' social barriers to care to reduce ED use for low-acuity conditions and minimize PPEs like acute care readmissions. [redacted]

### Appropriate Emergency Room Utilization (AERU)

[redacted]

[redacted]

### Enhanced Inpatient Member Interaction Program (EIMI)

[redacted]

### Integrated Collaborative Care Model (ICCM)

[redacted]

### Social Determinants of Health Provider Incentive Program (SDOHPIP)

Numerous data sources and Healthy Blue's own experience in Louisiana indicate broad and deep SDOH needs for our membership. We understand the effects of poverty, stress, food insecurity, limited education, and unemployment on care utilization and health outcomes. Healthy Blue has developed a provider incentive program focused on SDOH screening and referrals. [redacted] Providers frequently connect members to Capital Area Agency on Aging, Food Bank of Central Louisiana (FBCENLA), Louisiana Housing Corporation, Top Box Food, and Food Bank of Greater Baton Rouge.

### Ready Responders

[redacted]

## 2.6.11.3 Cross-functional Support for QAPI Program Improves Health

At Healthy Blue, quality is everyone's responsibility and not confined to a single department. Quality improvement initiatives are a visible priority of leadership that bring cross-functional participation across the health plan to maximize impact and success. Our QAPI program applies rigorous clinical initiatives that use the Plan Do Study Act process and includes the following functions for PIPs and other internal QI projects:

- Analyzing gaps in service delivery and quality of care based upon integrated data and information from multiple sources, including member grievances, medical record reviews, claims history, ED visits, hospitalizations, immunization records, prescriptions, and lab results, and ADT data from health information exchanges and electronic health records (EHRs)
- Identifying underlying reasons for variations in provision of care using root cause analysis and other QI tools to fully understand underlying reasons for the variation
- Implementing improvement strategies based on analytical findings from root cause analysis to address the concern and prevent recurrence

Opioid use disorder (OUD) and neonatal abstinence syndrome (NAS) have been rising nationally, as well as in Louisiana. Healthy Blue recognized that it was critical to reduce opioid use among women of childbearing age (primary prevention) and connect pregnant women with OUD to evidence-based treatment options (secondary and tertiary prevention). With components of physical health (PH), BH, SDOH, the provider network, and quality measures, the complexity of this problem warranted an organization-wide initiative.

## 2.6.11.3.1 Analysis of Gaps and Opportunities for Improvement

A study by Yazdy et al. in 2015 found that 21.6% of pregnant women fill at least one opioid prescription during their pregnancy. Healthy Blue's analytics track and trend perinatal substance misuse monthly. At the start of 2019, we observed perinatal substance misuse occurring at the rate of 67.9 per 100,000 Healthy Blue members. Healthy Blue's complex care management team concentrates on members with the most serious health conditions, many of whom are opioid-exposed infants in NICUs. [redacted] but this alarming data, combined with our nurses' daily experiences, emphasized the importance of NAS prevention. We saw opportunities to reduce overall opioid prescribing, increase initiation of OUD treatment, and improve members' therapy regimen adherence, once engaged. This data, corroborated by our Medical Advisory Committee (MAC), prompted our strategy enhancement.

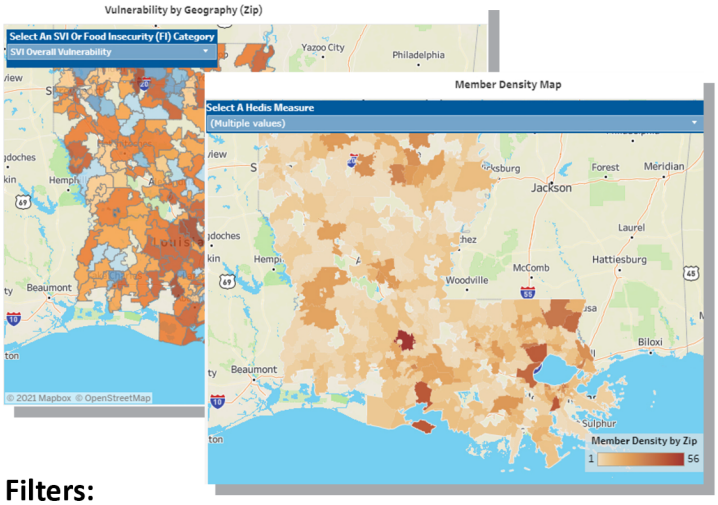
## 2.6.11.3.2 Identifying the Underlying Reasons

Healthy Blue uses a multifactorial approach to assess root causes of variation and barriers to improvement in our clinical initiatives and PIPs, such as Ishikawa diagrams, "The 5 Whys" root cause analysis method, and geospatial analysis. Evidence supports MAT as one of the most effective strategies for OUD recovery, yet we found a lack of access to MAT among members. Using the 5 Whys, we arrived at several root causes for non-adherence to MAT and other OUD therapy: 1) lack of provider awareness of resources like MAT and outpatient treatment for members with OUD, 2) lack of access to safe and effective substance use withdrawal management, due to stigma and bias against pharmacotherapy, and 3) limited pharmacological availability of buprenorphine/naloxone for members.

In applying a health equity lens to this issue, we also considered disparities in access to OUD treatment. Members in rural areas and those lacking transportation or support with caregiving responsibilities have additional barriers to achieving and sustaining recovery. [redacted]

*Figure 2.6.11.3-1. Geographical Variation in Opioid-related Measures*

SVI AND HEDIS HEAT MAP



**Filters:**

LA_HlthyRebid21_2.6.11_HeatMap_38_MAP_02

[redacted]

## 2.6.11.3.3 Improvement Strategies Based on Findings

Healthy Blue's comprehensive OUD and NAS program has been repeatedly enhanced from mid-2019 to today. In RY 2020 our HEDIS rate for Initiation and Engagement of Alcohol & Other Drug Dependence Treatment, initiation surpassed NCQA's 90th percentile. Healthy Blue's model is based on a proven program that reduced NAS-related metrics by 20% in our West Virginia affiliate plan, where the opioid epidemic is the worst in the nation. By February 2021, occurrences of perinatal substance misuse among Healthy Blue members had dropped to 45 per 100,000, a decrease of more than 33% from two years prior. Our strategies are described next.

[redacted]

Broad strategies that respond to disparities in OUD treatment access for all members in Louisiana include:

- [redacted]

Figure 2.6.11.3-2 highlights continued improvement in MAT access from our organization-wide initiative.

## 2.6.11.4 Healthy Blue's Approach to Quality Management and Improvement

Healthy Blue takes a member-centered, provider-collaborative, data-driven approach to QM/QI.

### 2.6.11.4.1 QM/QI Program and Goals for a Healthier Louisiana

QM/QI programs play a significant role in optimizing plan performance and member outcomes as part of **Elevate | Population Health**. As such, Healthy Blue maintains a QAPI program structure that:

- Supports a thriving culture of CQI
- Reinforces clear accountability and inclusive participation from all types of stakeholders
- Blends local and national resources to advance LDH's goals and objectives

Healthy Blue maintains and updates our QAPI Program Description annually, as well as our Work Plan throughout the year. We also monitor a monthly quality dashboard as part of our CQI approach. Together, these provide a blueprint for operations and document our objectives, scope of planned activities, processes, systems, and strategies for assessing and improving quality of care and services. Our QM Work Plan activities align with LDH established goals and measures as well as contractual, accreditation, and regulatory requirements. Our annual QM Program Evaluation documents our performance relative to established objectives, activities, and LDH goals, including Quality Performance Measures. We use findings of every evaluation within a CQI framework to refine current programs and inform new and better solutions.

Healthy Blue adjusts our quality-related goals each year. Our goal is to exceed the NCQA 50th percentile for all HEDIS and CAHPS performance measures, aiming to achieve the 66th or 75th once we attain our initial goal. For Non-HEDIS metrics, we evaluate local and national benchmarks to assure reasonable targets and make improvements. We have defined 13 priority areas within Elevate | Population Health based on our local experience and epidemiological data from trusted sources such as the March of Dimes Report Card and the LDH Medicaid Managed Care Quality Dashboard. We assigned metrics to monitor progress in important outcomes, such as reducing incidence of low birth weight, increasing participation in SUD treatment, and improving diabetes control.

Healthy Blue's QM/QI program fosters local decision-making while benefiting from the knowledge and perspective of our national team. Synchronized quality committees, depicted in Figure 2.6.11.4-1, support this work.

*Table 2.6.11.4-1. Schedule of Healthy Blue's Quality Management Activities*

| QM Activity | Frequency | Deliverables |
|---|---|---|
| **Measure and Report on Quality Performance** | Annually | Report of QI activities, new and improved activities |
| **Operate Comprehensive QAPI Program** | Annually | QAPI Program Description, Work Plan, and Provider Support Plan |
| **Evaluate QAPI Program** | Annually | QAPI Evaluation |
| **QAPI Committee/Subcommittee Meetings Including Enrollee Advisory Council** | Quarterly | Signed and dated minutes |
| **Participate in LDH Quality Committee** | Monthly | PIP updates, current performance measure indicator rates |
| **HEDIS Measurement** | Annually | Audited HEDIS results, stratified by population |
| **CAHPS Measurement** | Annually | Results and description of survey process |
| **Administrative Encounter Data** | Weekly | Reconciliation Reports to source data, Compliance & Executive check for accuracy & completeness |
| **Performance Improvement Projects** | Proposal before initiation, status reports ongoing | PIP Proposal, status, and final results |
| **Maintain NCQA Accreditation** | Within 10 calendar days of receipt of the final Accreditation report | Final Accreditation Report, including accreditation status, results, expiration |

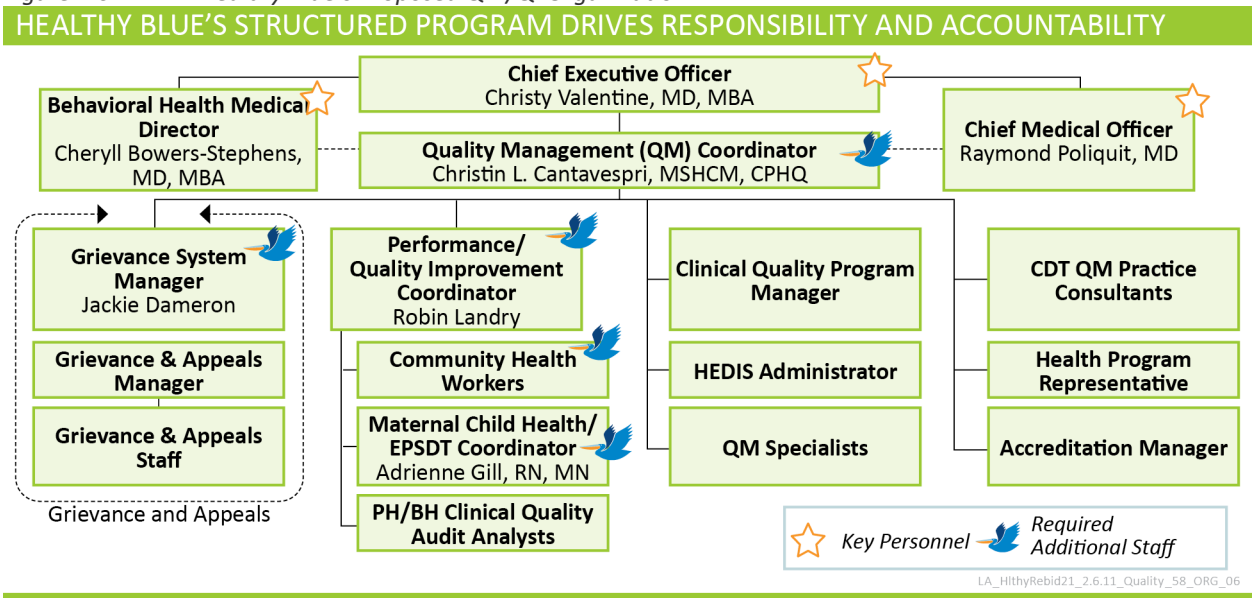
| QM Activity | Frequency | Deliverables |
|---|---|---|
| **Support EBPs for BH Providers and Quality Monitoring** | Readiness Review, quarterly monitoring | Fidelity & Provider Monitoring Plan, on-site review, and members interviews |
| **Additional Reports Requested by LDH or External Quality Review Organization (EQRO)** | Within 60 calendar days of request or as outlined in MCO Manual | Ad hoc |

## 2.6.11.4.2 QM/QI Organization and Local Leadership

We have the organizational infrastructure to provide effective monitoring, reporting, and analysis, and act on opportunities to improve clinical care and services. Our Louisiana-based QM Director, Christin Cantavespri, who serves as the QM Coordinator, manages and oversees QAPI activities and keeps our goals on target. Christin is a Louisiana native, a well-recognized leader among Louisiana MCOs, and has a master's degree in Healthcare Administration and a Certified Professional in Health Care Quality credential. Her direct reporting relationship to CEO Dr. Christy Valentine demonstrates the priority Healthy Blue places on quality results and enables close collaboration with other health plan leaders. The Chief Medical Officer, BH Medical Director, Population Health Administrator, Health Equity Administrator, and other clinical leaders help shape the QAPI program. Healthy Blue's QM/QI team is fully resourced with well-qualified staff and cutting-edge systems to continue meeting and exceeding all requirements.

Figure 2.6.11.4-2 includes an organizational chart of our QM/QI department and staff dedicated to and responsible for administering our QM/QI program. The most recent EQRO audit found zero deficiencies in our structure.

*Figure 2.6.11.4-2. Healthy Blue's Proposed QM/QI Organization*



## 2.6.11.4.3 HEDIS Performance Measurement and Reporting

Healthy Blue uses a sophisticated information technology and data infrastructure to drive high-quality member outcomes. Our continued ability to participate in all HEDIS-related measurement and reporting initiatives is evidenced by our long-standing NCQA accreditation. We follow Medicaid management best practices, utilizing a proven approach verified by national audit firms. [redacted] ***In our many years of participating in Louisiana's Medicaid managed care program, Healthy Blue has always submitted HEDIS data accurately and on time.***

In addition to our staffing resources (such as our HEDIS Administrator and QM Specialists) dedicated to supporting our HEDIS performance measurement and reporting activities, data-driven initiatives, and support to LDH we have a dedicated, internal HEDIS Task Force charged with optimizing HEDIS results and guiding our efforts to attain a 5.0 NCQA health plan rating. The Task Force meets every two weeks and performs activities such as: 1) reviewing critical measures and current status to drive improvement; 2) conducting strategic planning and initiating program

development; 3) assigning tasks, business owners, and timelines; 4) identifying root causes and developing solutions to barriers and gaps; and 5) ongoing monitoring on progress of interventions and relationship to goals.

[redacted]

## 2.6.11.4.4 Successful Quality Improvement in Action

Healthy Blue's multi-pronged approach to diabetes exemplifies our recent success in improving quality. ***Between HEDIS RY 2019 and 2020, our rates for Comprehensive Diabetes Care: HbA1c Test and HbA1c Control improved 2.6% and 1.3%, respectively.*** A centerpiece of that approach is our relationship with Pennington Research Center's Diabetes program, which prevents diabetes for people who are at risk, as well as reverses effects of type 2 diabetes in those already diagnosed. We identified adult members who struggled with their weight, were told by their doctor they were diabetic or pre-diabetic, and were ready to change habits, such as diet, exercise, sleep, and stress management for program referral. Additionally, we located members with between two and thirteen ER visits in 2019 and 2020, indicating poor health management. ***In 2020, Healthy Blue successfully enrolled 67 members into Pennington's program.***

[redacted] Healthy Blue also offers a diabetes lifestyle coach who teaches classes in St. John Parish and Jefferson Parish and a nurse practitioner program to assist African American members in controlling hypertension and diabetes. [redacted]

## 2.6.11.4.5 Future Quality Improvement Initiatives

Healthy Blue identifies quality improvement needs via ongoing data monitoring and develops targeted programs in response. Our QM team tracks and trends our HEDIS and State-specified measures through monthly reports, which we share with other Healthy Blue departments and QM committees. Recent experience indicates the need to continue to improve quality across the board, but we will bring extra focus to three areas:

**Continued COVID-19 Recovery and Immunization Efforts.** [redacted]

**Increased Access to Screenings in Underserved Areas.** [redacted]

**Tobacco Cessation and Anti-vaping.** [redacted]

For designated measures, we evaluate data trends against national benchmarks and internal goals to assess effectiveness, and determine if we should adapt, adopt, or expand interventions. We implement successful programs on a larger scale through an expansion plan and refine or replace unsuccessful interventions.

## 2.6.11.5 Clinical Practice Guidelines Bring Rigor to Care Delivery

Healthy Blue promotes use of a comprehensive portfolio of evidence-based, preventive health, and clinical practice guidelines (CPGs) that span more than 49 conditions and diseases. Guidelines keep providers informed about scientific advances, bring rigor to consistent care delivery, and positively impact health outcomes. We take a local approach to reviewing and approving CPGs for Louisiana. CPGs are not a substitute for the professional judgment of health professionals, and we do not use CPGs for medical necessity reviews. We have provided a list of our CPGs as Attachment 2.6.11.5-1 and a sample as Attachment 2.6.11.5-2.

## 2.6.11.5.1 Adopting and Disseminating CPGs

We adopt CPGs both locally in Louisiana and through our national Medical Policy & Technology Assessment Committee (MPTAC). MPTAC is a multidisciplinary group that includes practicing physicians and academics from various specialties, clinical practices, and geographies. Our Medical Directors request specific guidelines or topics to be considered for approval on the CPG list. In addition, external providers can request that a guideline be considered, such as in QMC meetings.

**HEALTHY BLUE DEVELOPS MAC-APPROVED CPG TOOL**

Healthy Blue developed a ***CPG tool*** for schizophrenia which was constructed using input and approval of our Medical Advisory Committee. We use this CPG to monitor members with complex behavioral health needs who are receiving services, such as Assertive Community Treatment (ACT).

LA_HlthyRebid21_2.6.11_CPGTool_59_COB_02

CPGs are then reviewed by the CPG Workgroup, which includes both PH and BH Medical Directors, and presented to our national Medicaid division committees for review and approval. Healthy Blue's QM Coordinator coordinates with our local MAC to review and approve adopted/revised CPGs and make sure they are consistent with and appropriate for Medicaid members. Our Medical Directors, most of whom live and work in Louisiana, review all guidelines annually. Currently, there are several BH CPGs that were adopted locally by our Louisiana MAC. To assure consistency, the MAC and MPTAC review provider and member education materials, benefit plans, and coverage parameters annually against guidelines.

[redacted]

**HEALTHY BLUE ENGAGES THE PROVIDER COMMUNITY THROUGH WORKGROUPS AND TRAININGS**

Healthy Blue gathers ***provider community input*** through avenues such as the LDH and MCO & Provider Collaborative Workgroups. Healthy Blue also offers provider ***trainings*** on quality service delivery such as managing complex BH health needs in addition to physical health needs.

LA_HlthyRebid21_2.6.11_WorkgroupTrain_59_COB_01

[redacted]

## 2.6.11.5.2 Incorporating Scientific Evidence and Expert Opinions into CPGs

[redacted]

## 2.6.11.5.3 Evaluating and Encouraging Provider Use of CPGs and EBPs

We measure performance annually against CPGs and Preventive Health Guidelines, including BH guidelines, using specialized audit tools. We employ various tools and strategies to promote adherence to CPGs and increase high-value care. Our provider agreements require compliance with CPGs, which we reinforce through ongoing monitoring, educational outreach, and financial rewards for providers who meet targets and quality goals. Our provider-centric approach features local PH and BH Clinical Quality Audit Analysts, who help providers interpret quality data, educate on CPG expectations, and review medical record keeping confirming accurate evidence of compliance. Healthy Blue's audit tools are currently on our provider website for providers to improve compliance as well as an interactive course they may complete to earn CME credit. We may also incorporate CPG monitoring as a PIP intervention. Table 2.6.11.5-1 describes select strategies to improve compliance.

## 2.6.11.5.4 Ongoing Evaluation of CPGs

Board-certified and credentialed network providers, our Chief Medical Officer and BH Medical Director review, revise, and approve CPGs at least every two years using evidence-based literature from medical specialty societies (US Preventive Services Task Force and similar entities), assuring they remain consistent with the latest scientific standards.

## 2.6.11.6 NCQA Health Insurance Plan Ratings for Medicaid Contracts

Healthy Blue is providing the completed Quality Response Template as Attachment 2.6.11.6-1 with the most current NCQA ratings for our health plan and affiliate Medicaid health plans across the country.

## 2.6.11.7 Healthy Blue Is Accredited by NCQA

Our health plan has been continuously accredited by NCQA since 2016. We are highly invested in the disciplined quality approach promoted by NCQA standards, as evidenced by our additional accreditation for our Population Health Management Program, Managed Behavioral Healthcare Organization, and Multicultural Healthcare Distinction. Attachment 2.6.11.7-1 includes proof of Healthy Blue's NCQA accreditation, valid through 2023.

## 2.6.11.8 NCQA-accredited Behavioral Health Services

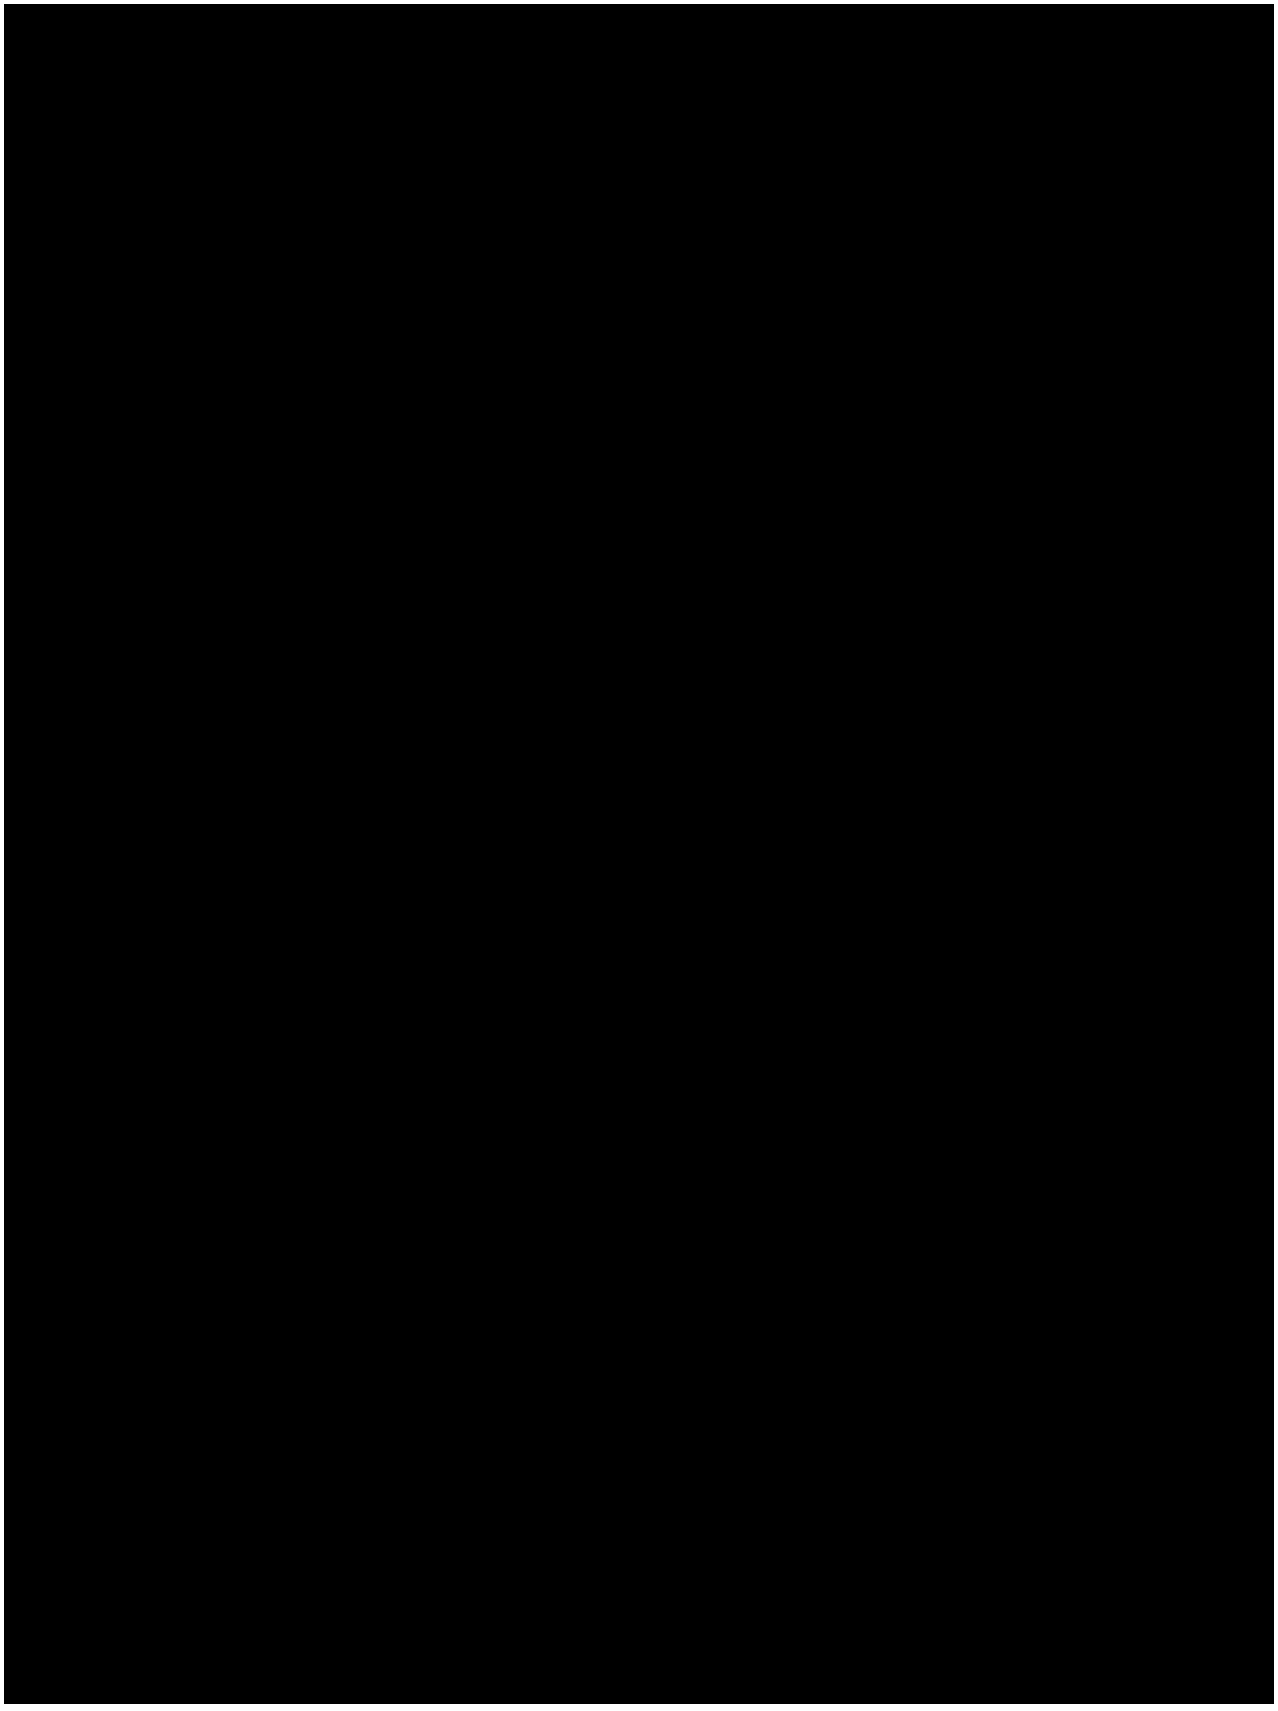
Through our relationship with parent company, Anthem, Healthy Blue delivers integrated and NCQA-accredited BH services. Anthem holds Managed Behavioral Healthcare Organization accreditation from NCQA and achieved a 100% score on review of the standards in 2020. We are providing evidence of accreditation as Attachment 2.6.11.8-1.

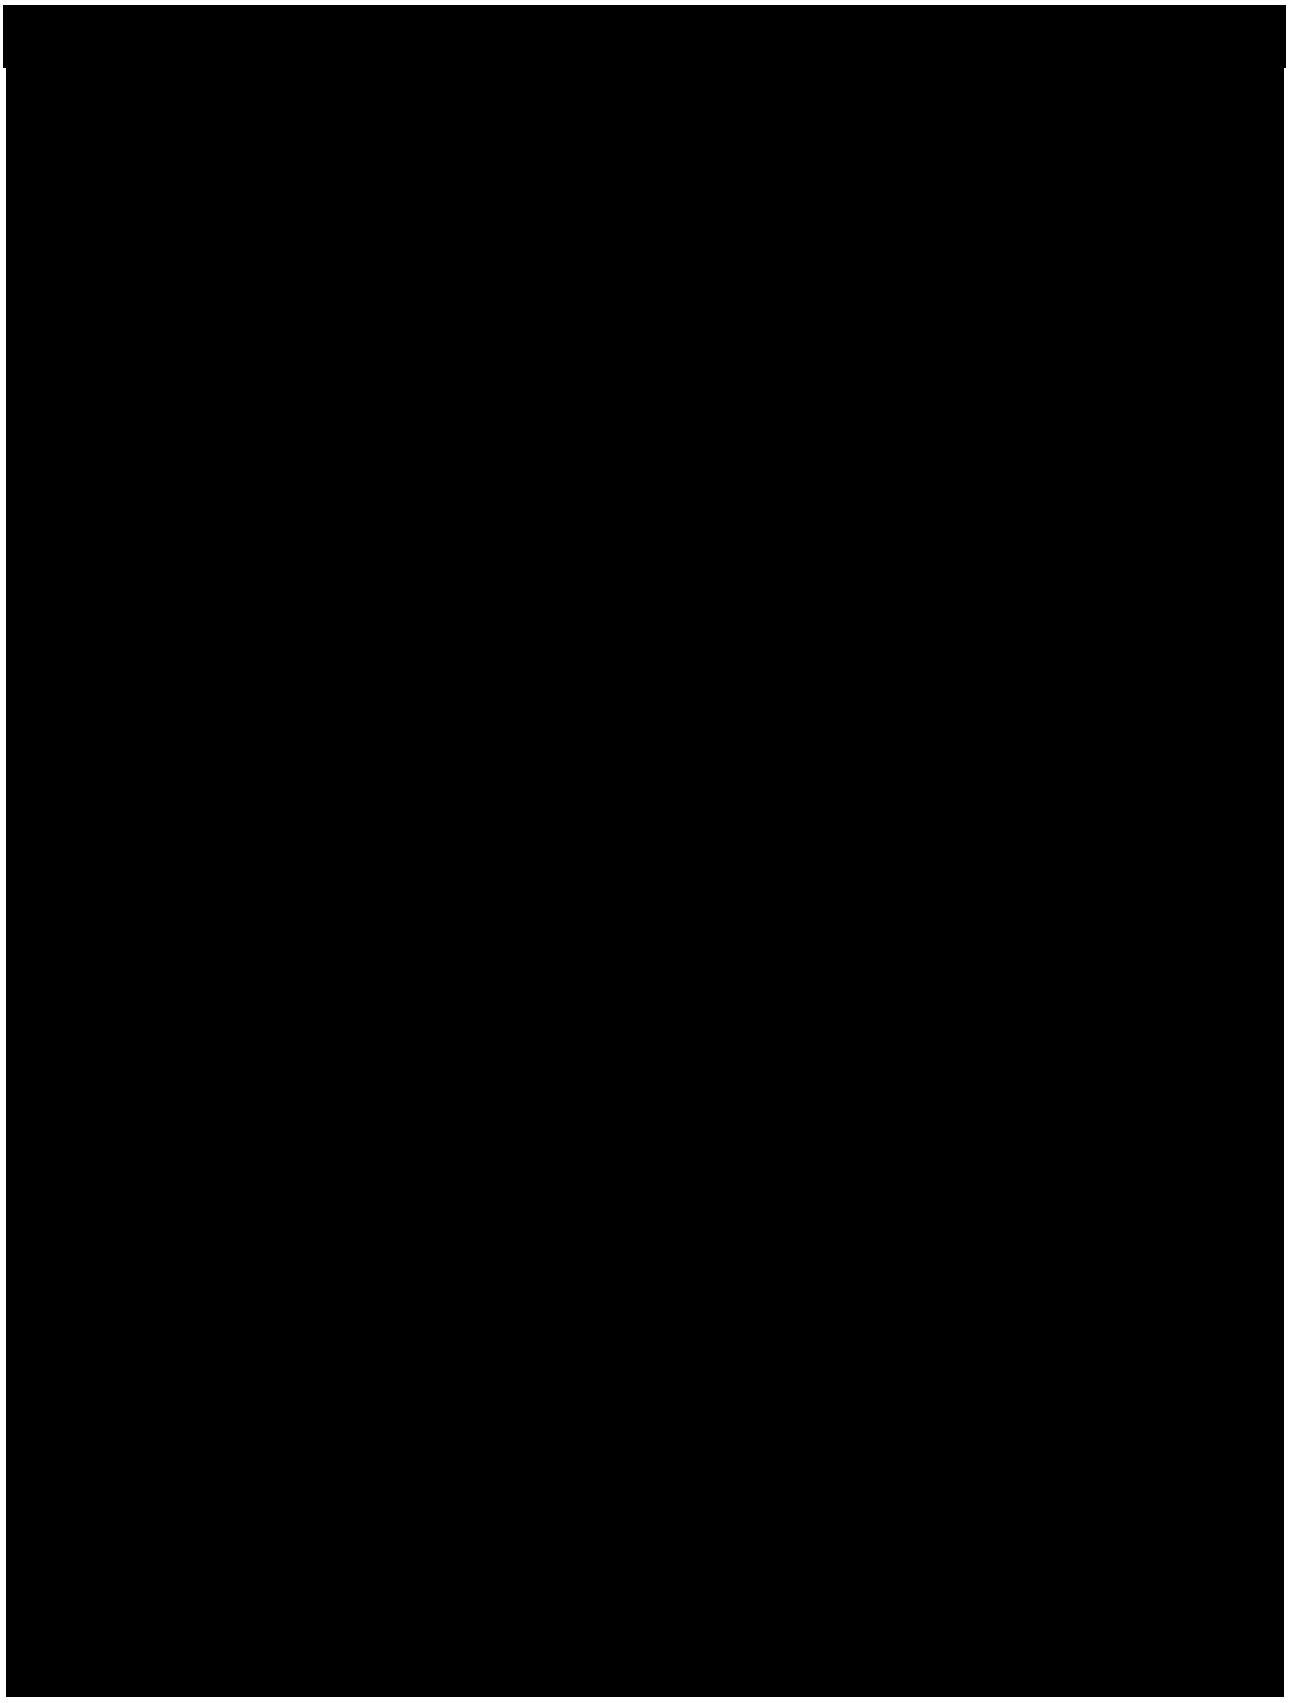
# 2.6.12

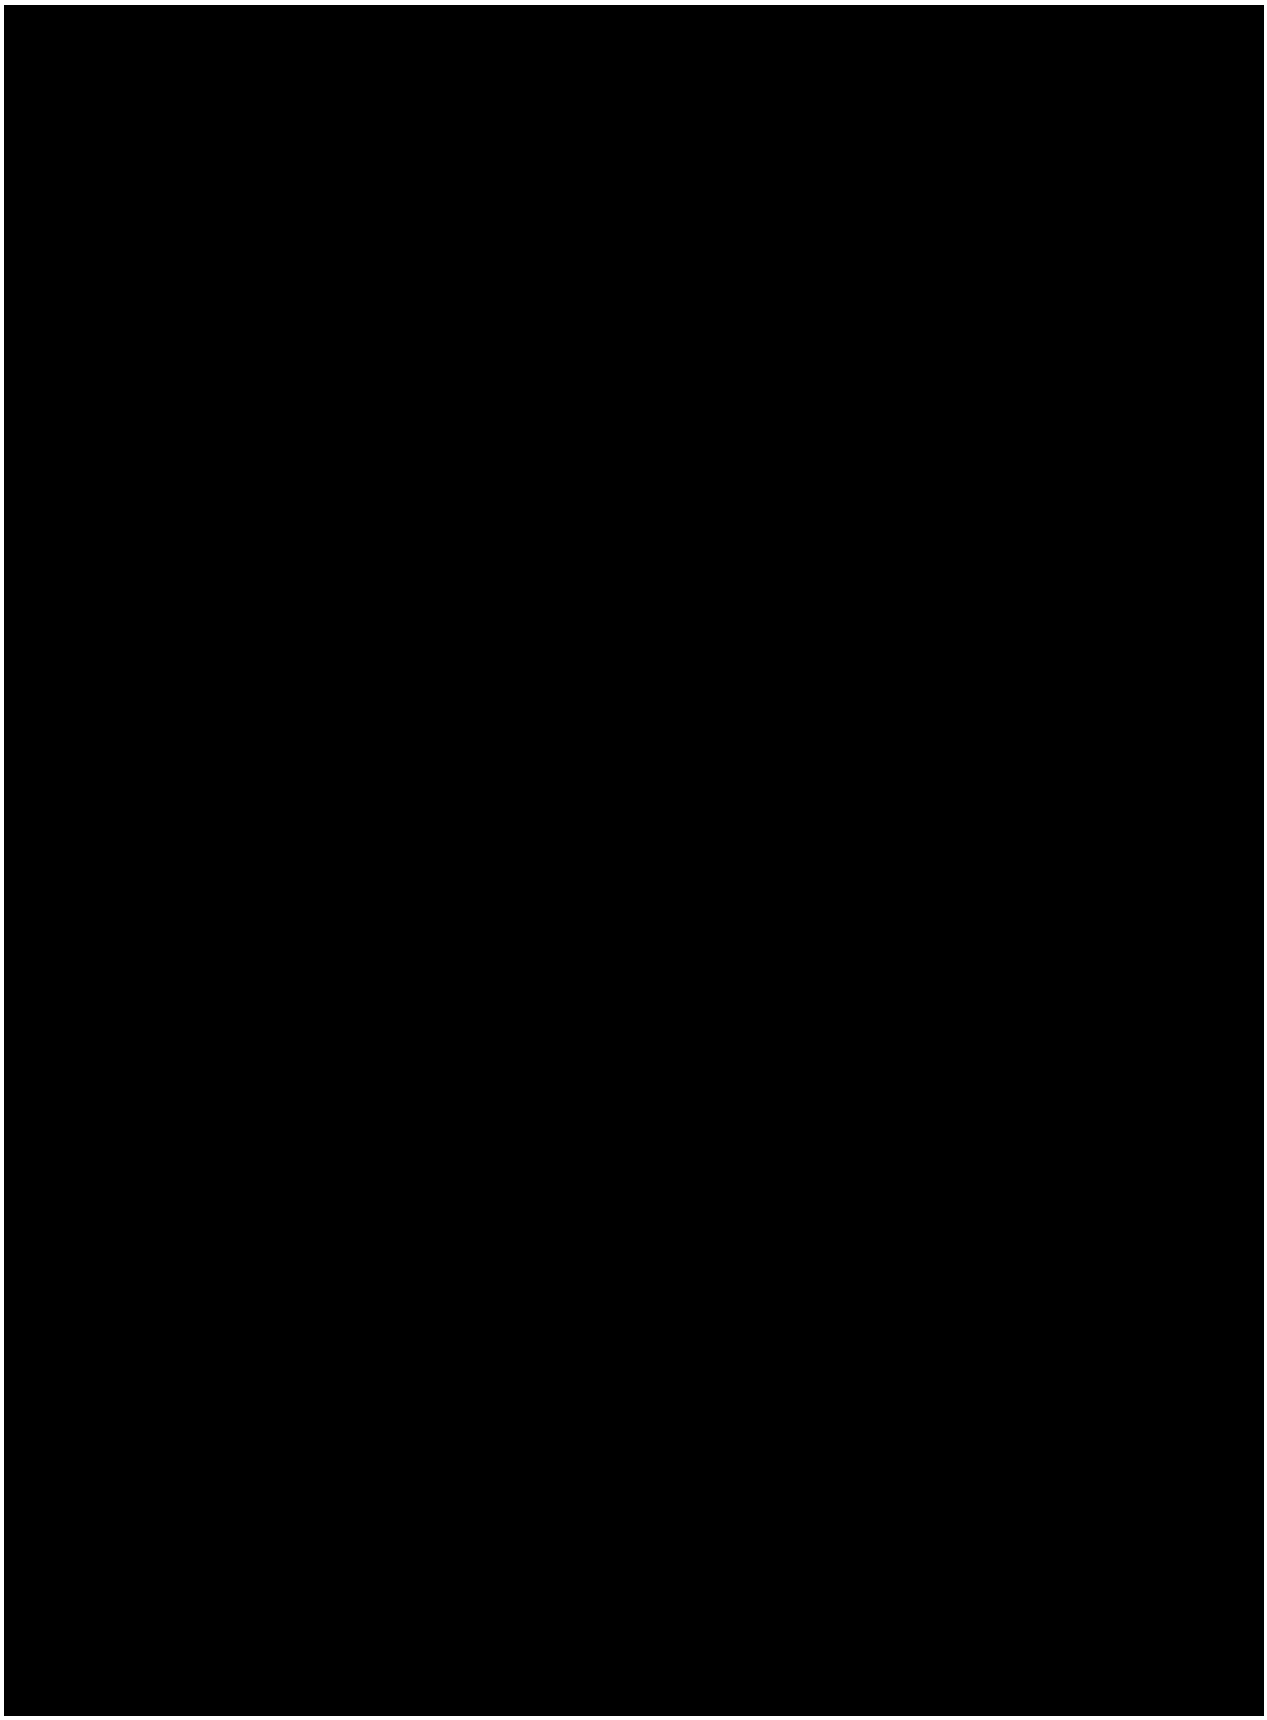
Value-Based Payment

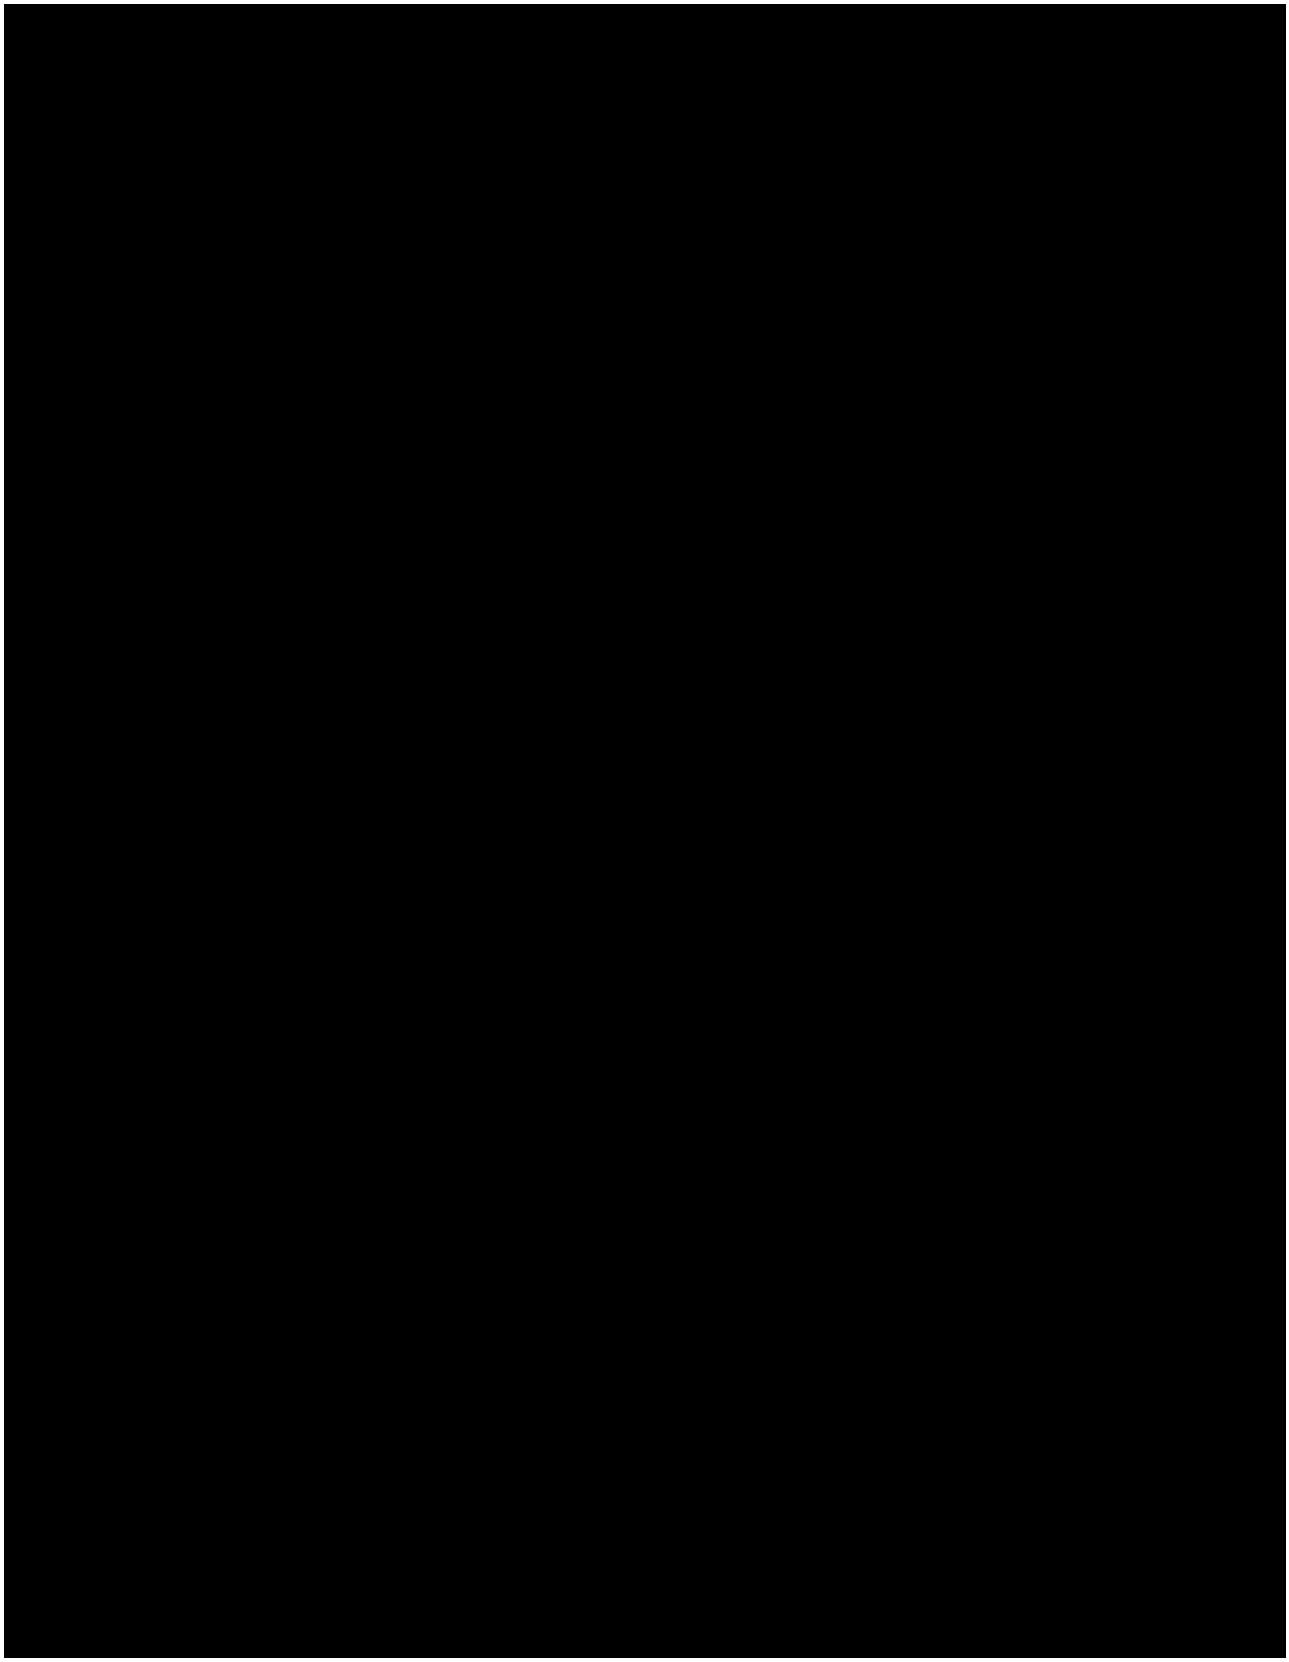
CONFIDENTIAL

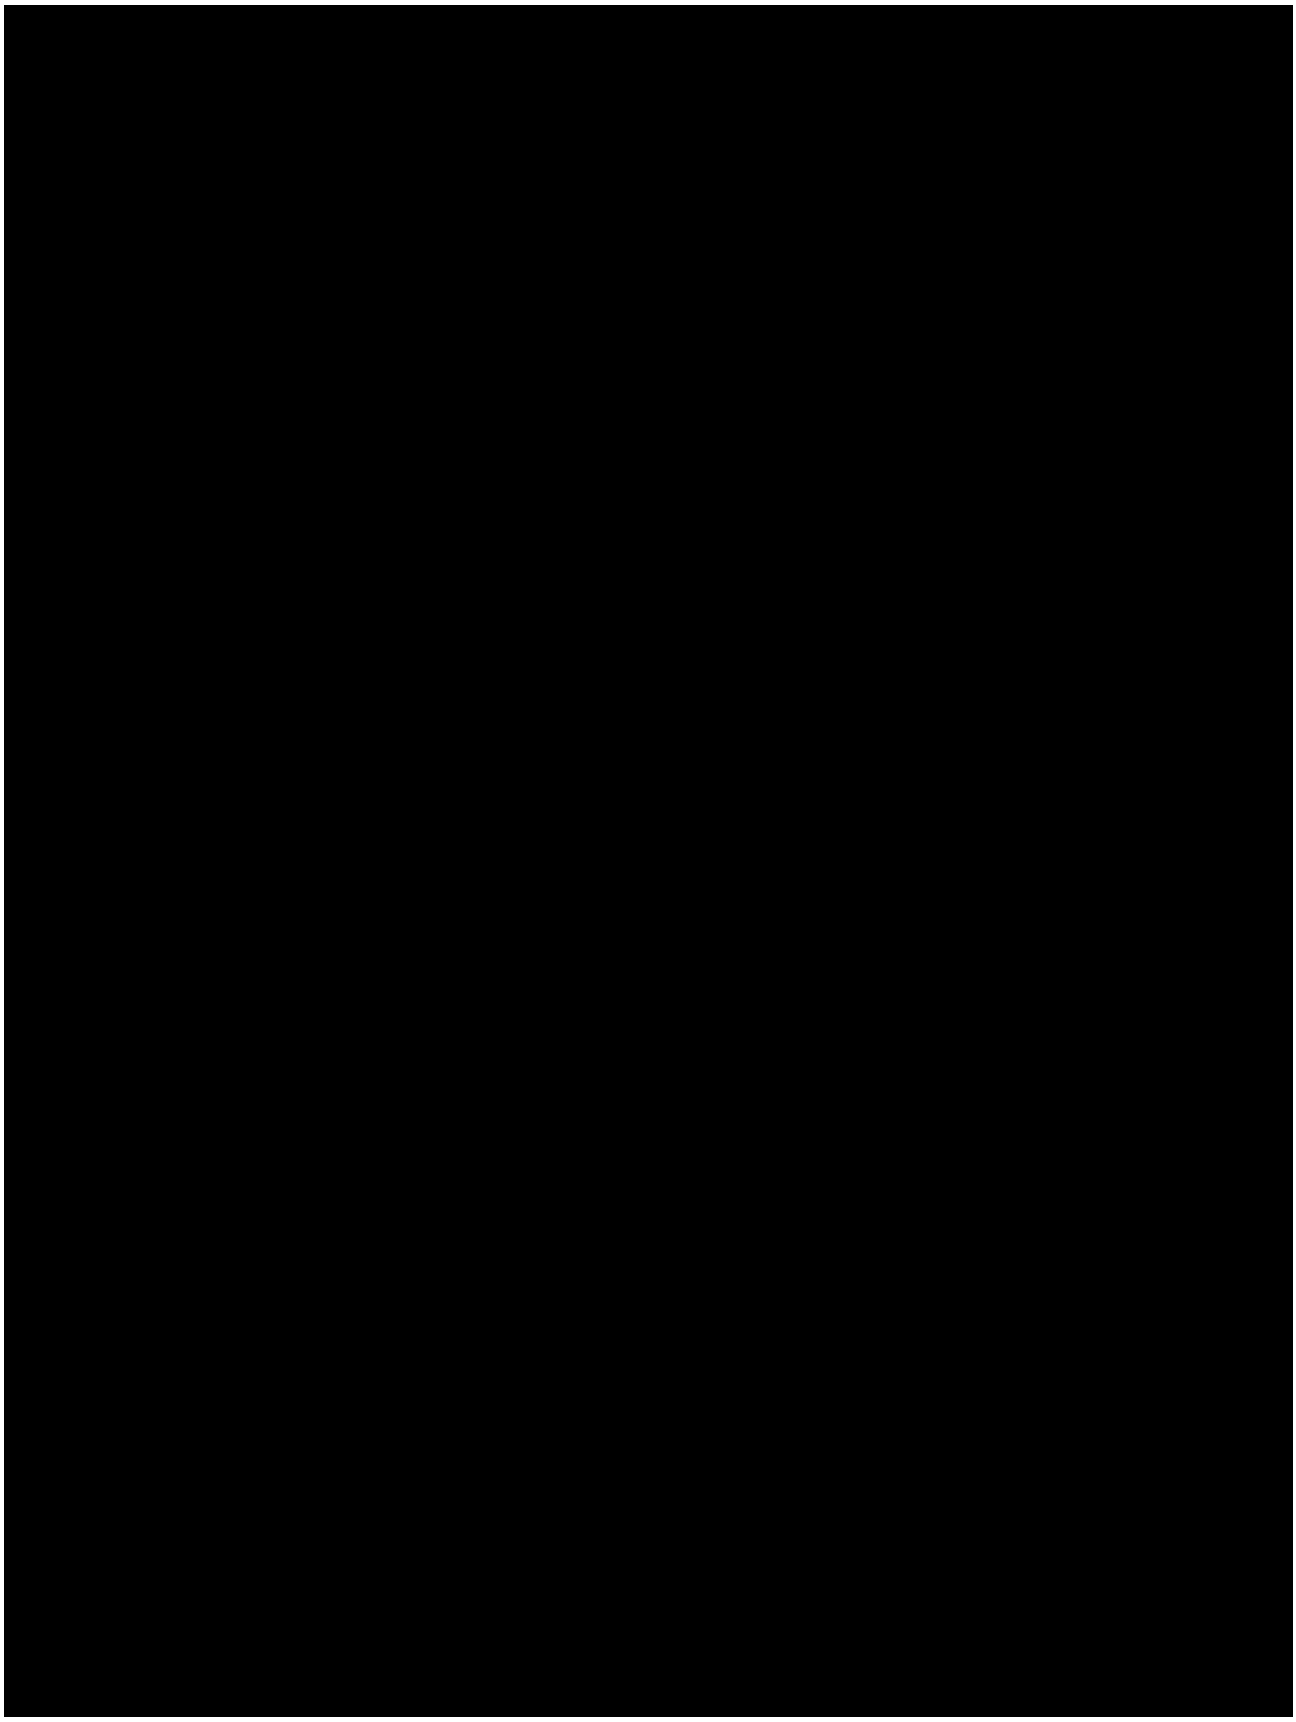
Healthy Blue

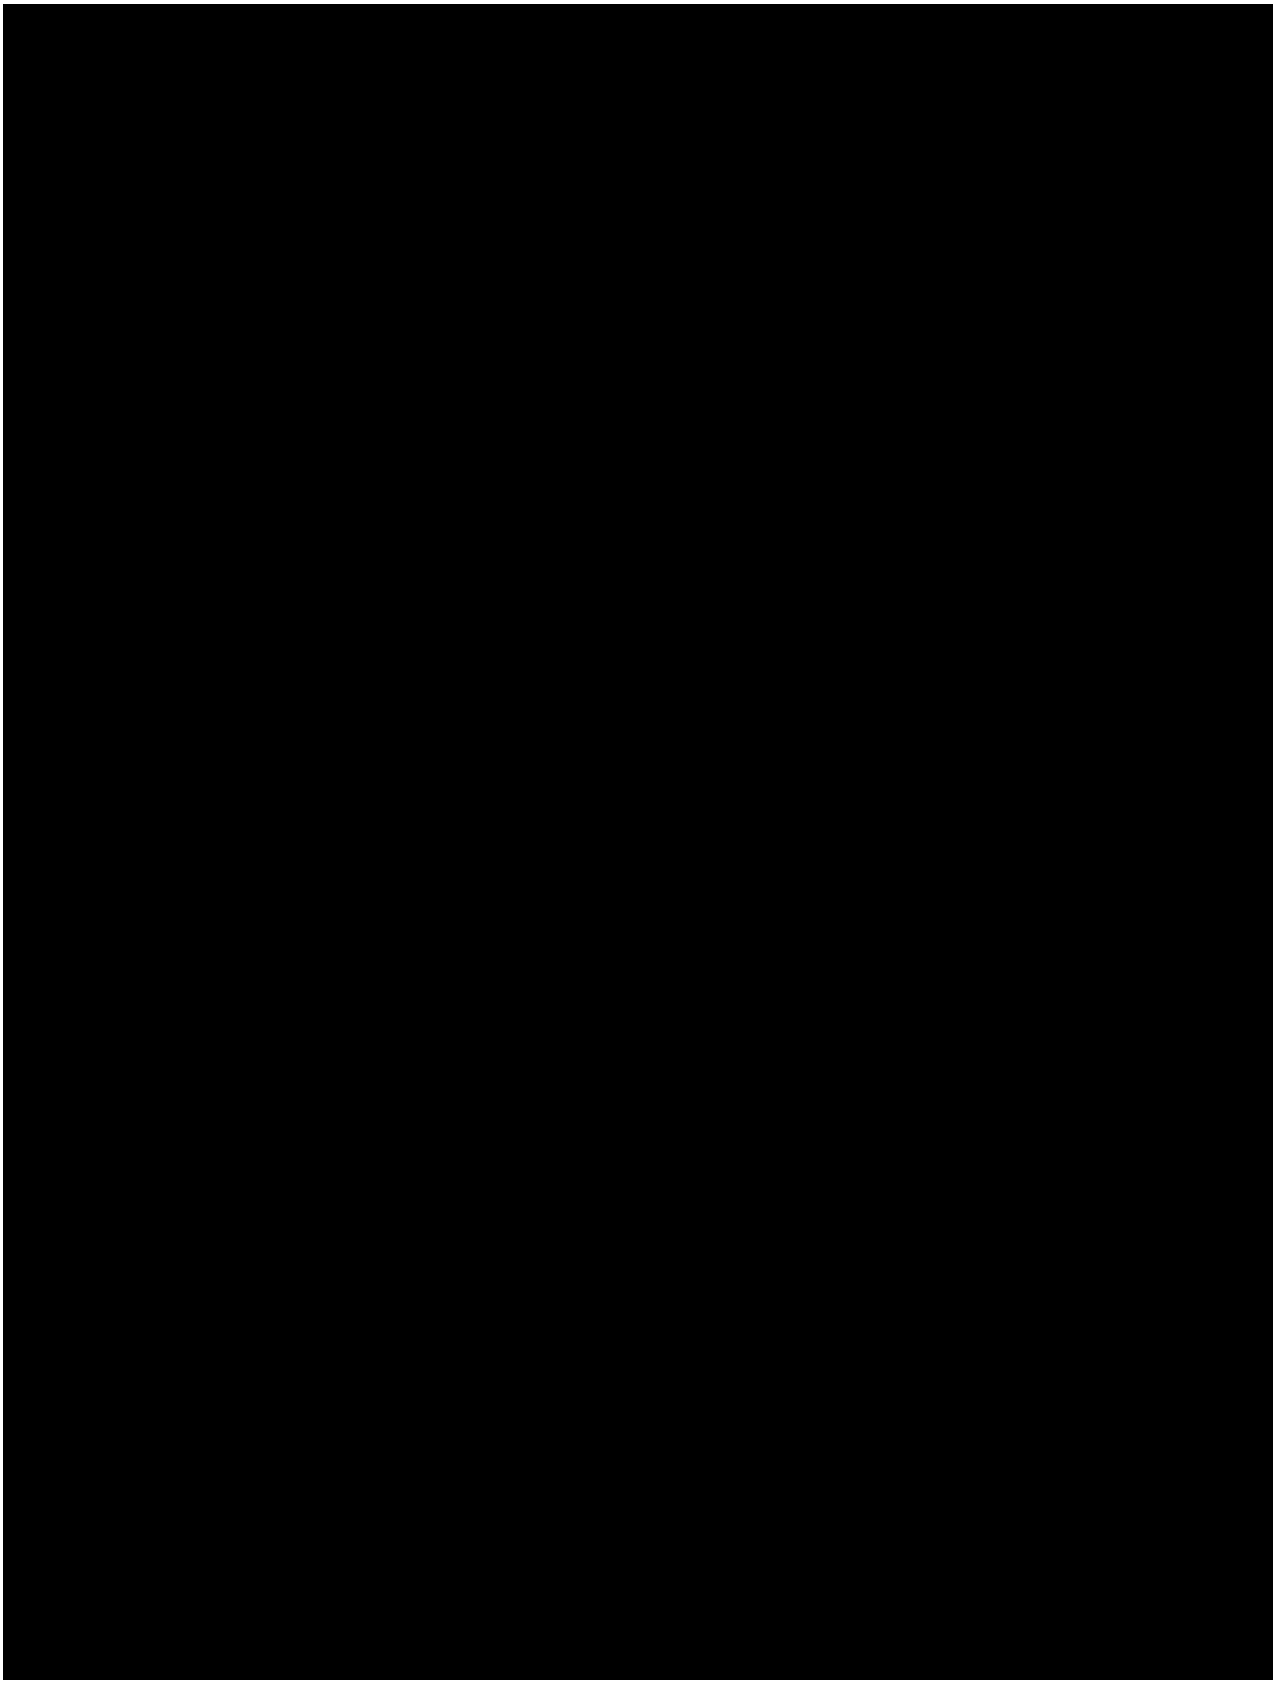


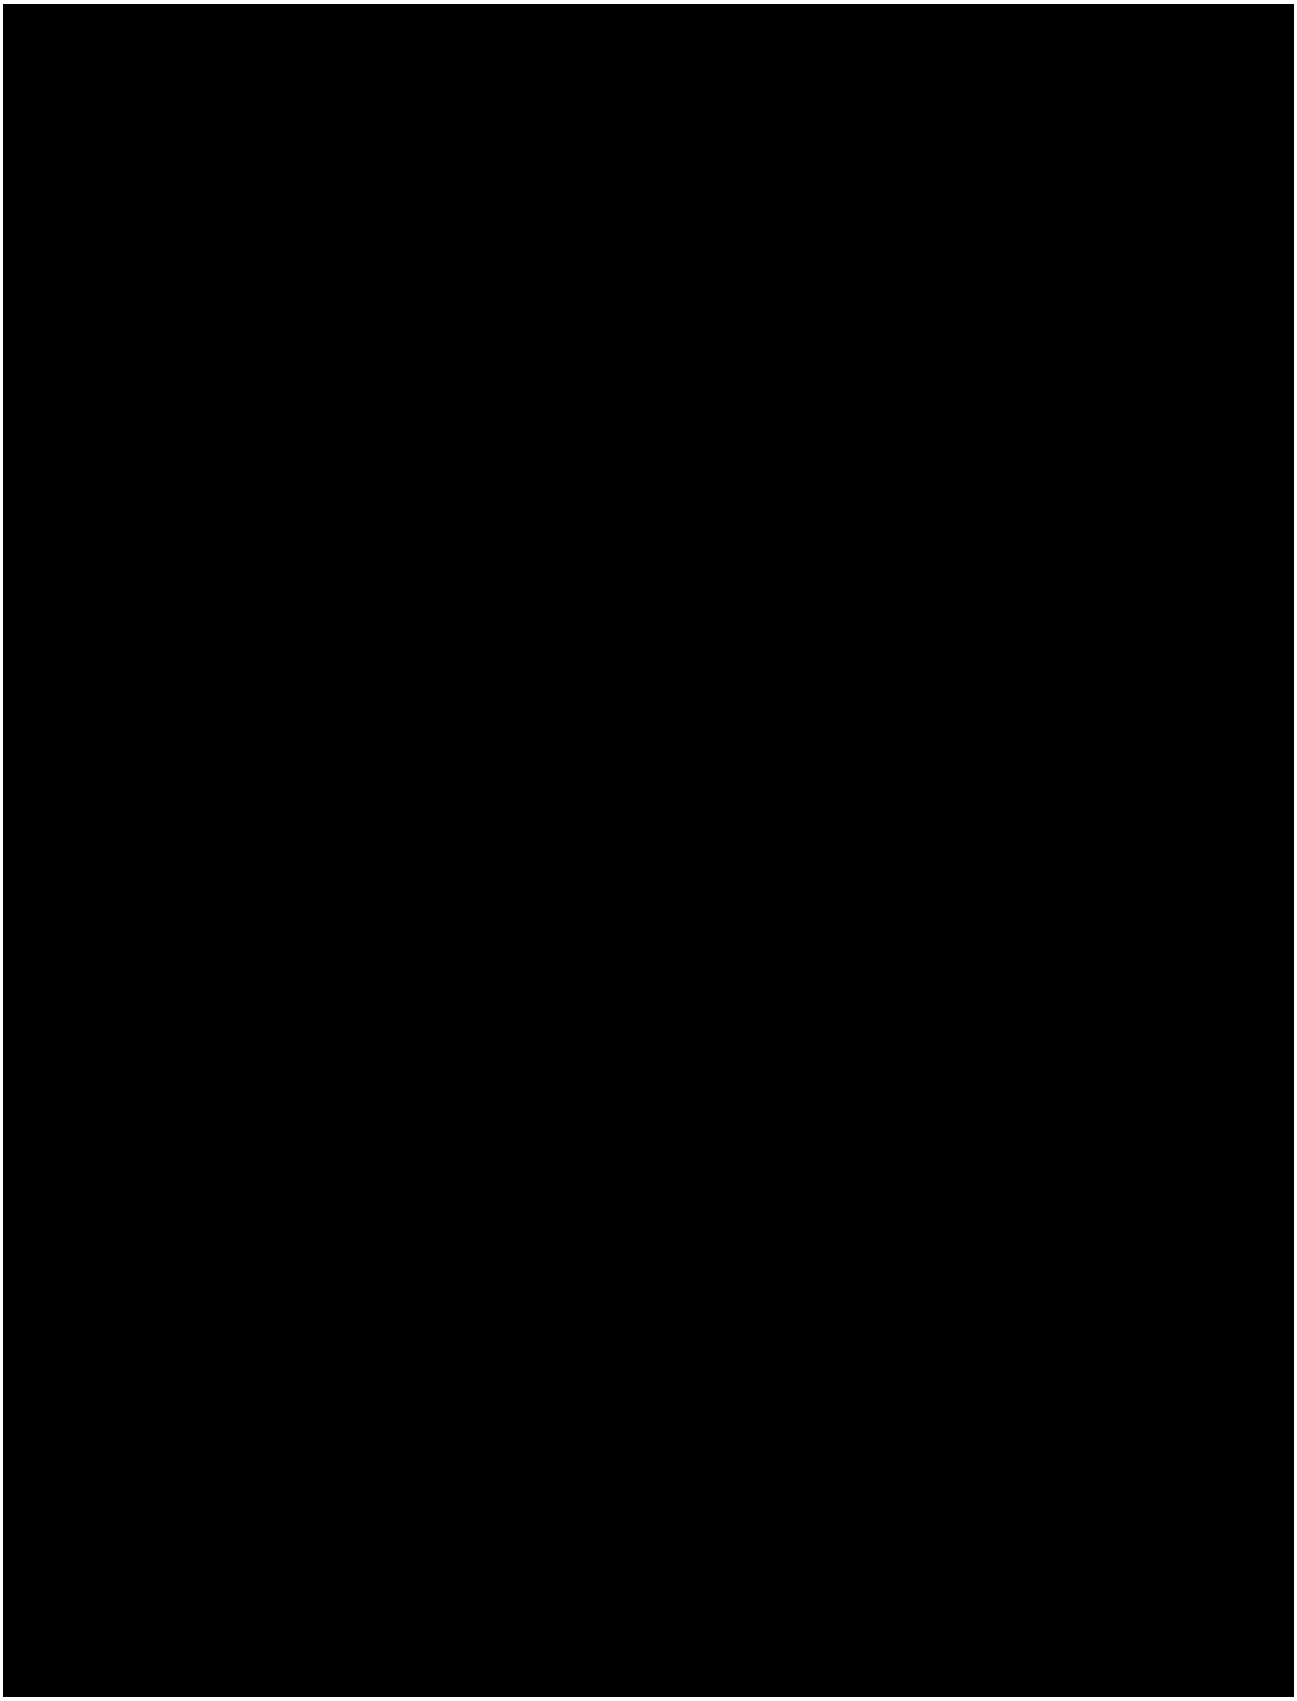


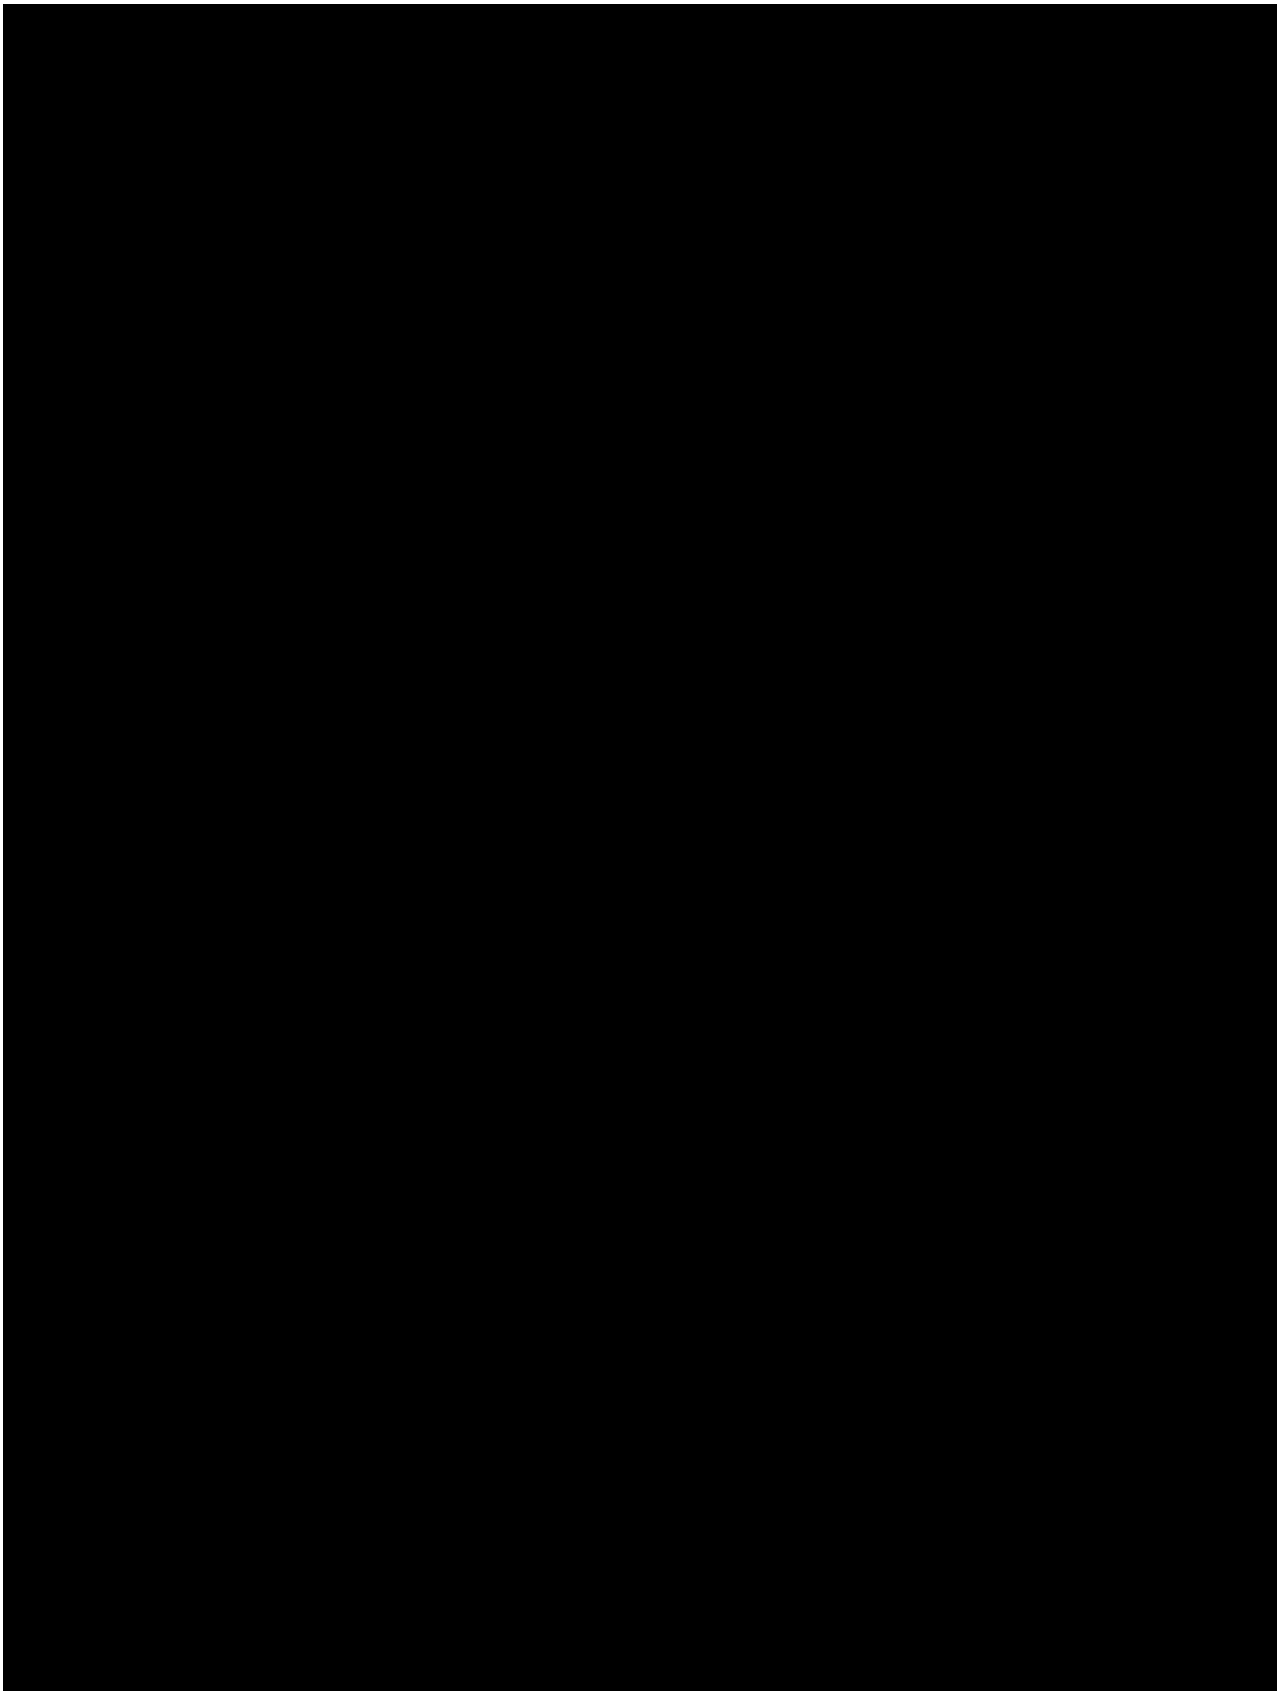


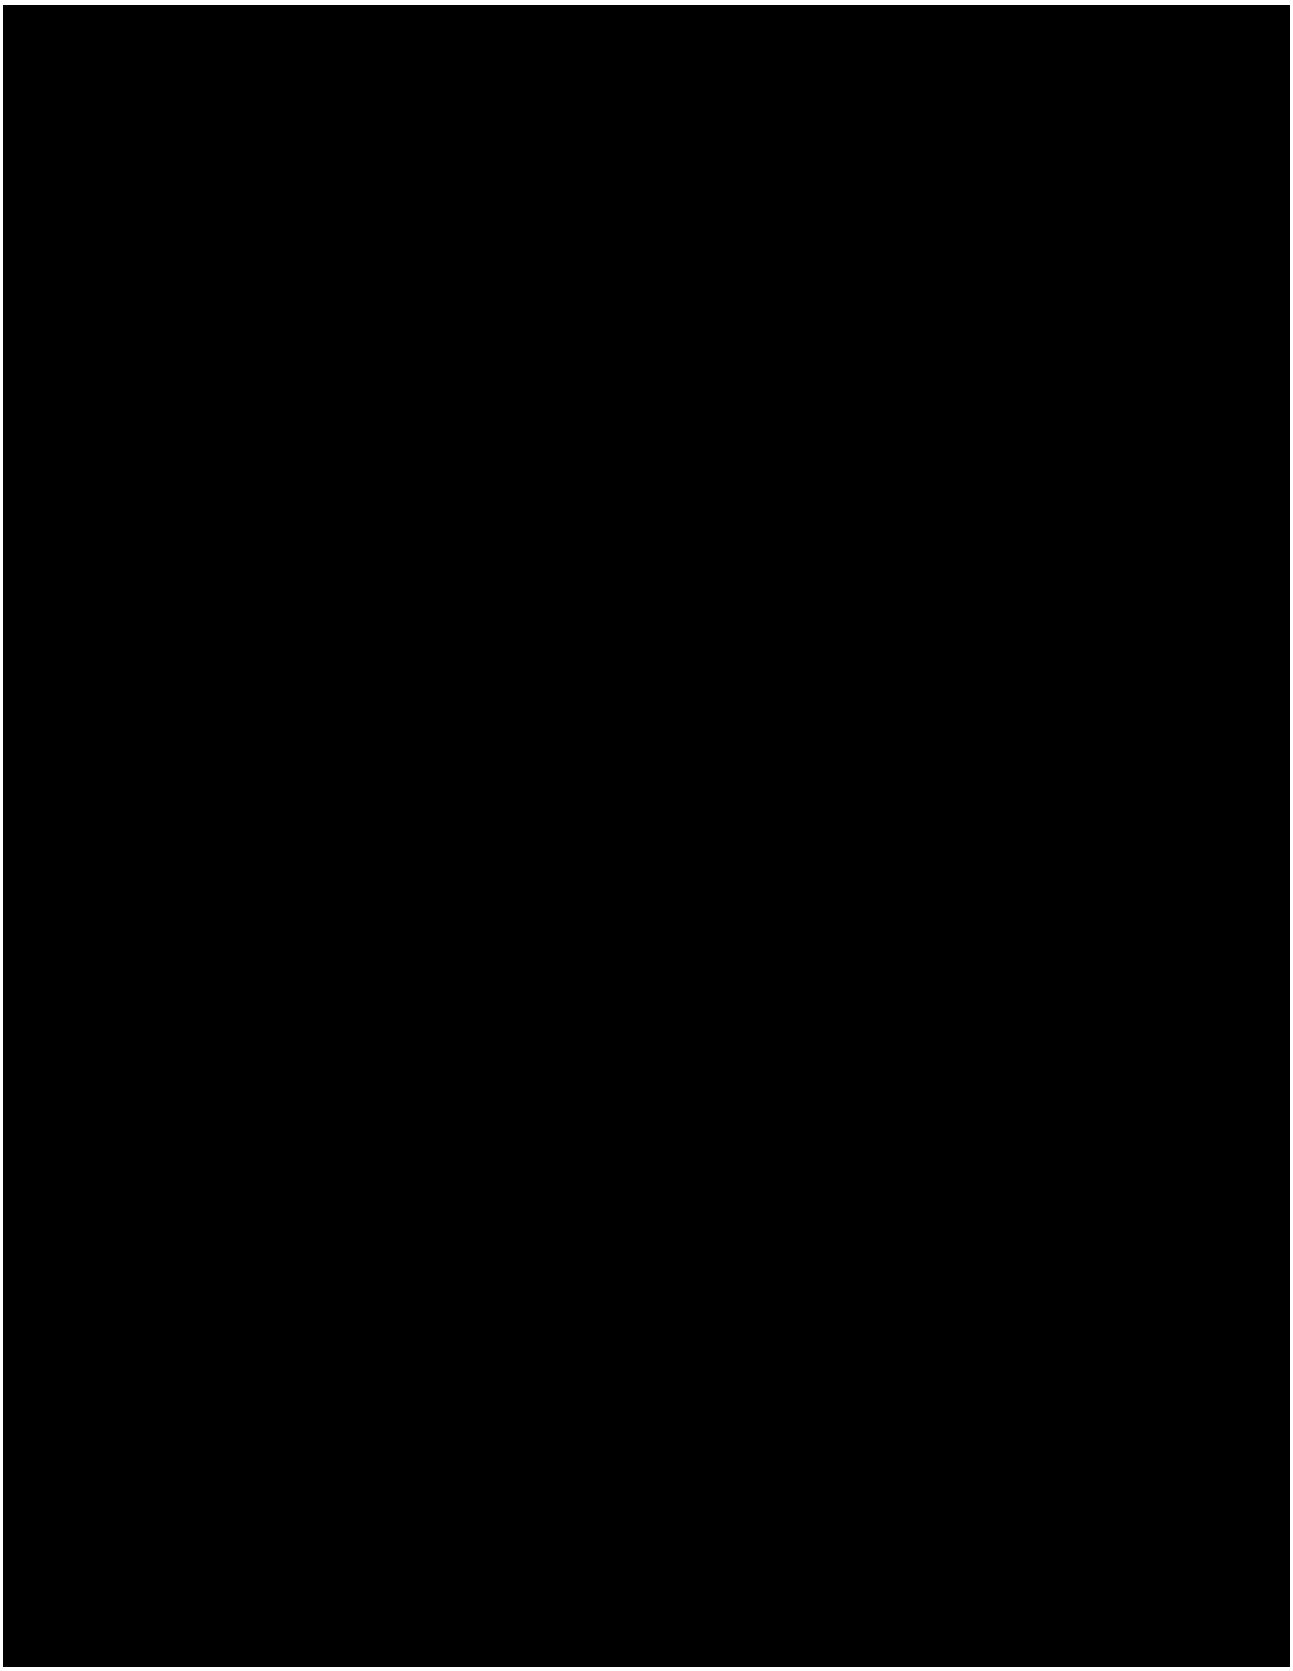


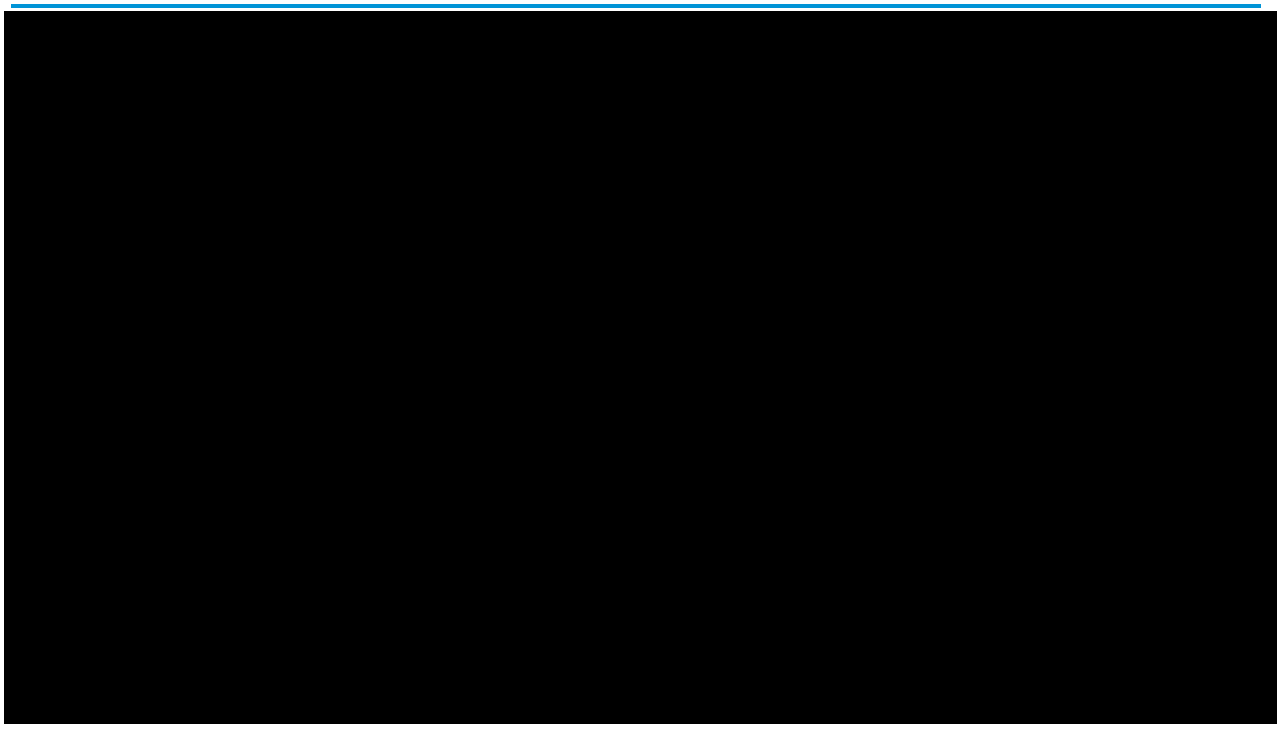












**Working with DeWanna's Closet to Address Food Insecurity Among Youth**

DeWanna's Closet (DC) understands that food insecurity can wreak havoc on a community, especially our youth. DC wanted to start a weekend food program for school-aged kids, and Healthy Blue's grant has given them the jumpstart to pursue the endeavor. Educators within Calcasieu Parish Schools identify students whom they feel may lack consistent nutrition over the weekend. The educators make a confidential referral to DC, who will prepare and supply a nutritional food package that the students can easily transfer from school to home.

# 2.6.13

## Claims Management and Systems and Technical Requirements

Healthy Blue

## 2.6.13 Claims Management and Systems and Technical Requirements

Our highly configurable Management Information System (MIS) is built on a managed Medicaid model and based on our parent company's, Anthem, Inc.'s (Anthem's), experience supporting Medicaid managed care programs in 25 markets, including Louisiana. Healthy Blue meets and often exceeds requirements outlined in Model Contract, 2.18 and 2.19, the MCO Manual, and all other accompanying manuals and guides. Our rapid configurability means we can comply with all changes within 30 days of LDH's request.

***In 2020, Healthy Blue's claims system processed more than four million Medicaid claims with 94% processed within 15 calendar days.*** We recognize claims issues create challenges for providers. As a result, we streamline processes and continue to reduce provider impact related to claims payment.

[redacted] This result is based on data reported to LDH on 167 Claims Payment Accuracy reports and 221 Claims Summary Payment reports.

Healthy Blue continually improves efficiency and the provider experience. This includes:

- [redacted]
- **Improving Initial Claims Performance and Reducing Disputes Rate.** In 2021, Healthy Blue successfully decreased our dispute rate by 12% through a combination of more accurate claims adjudication and proactive correction, reducing provider administrative burden of submitting unnecessary disputes.
- **Mitigating Provider Billing Issues.** Healthy Blue's ***Provider Experience*** team, comprised of Louisiana staff, proactively identifies billing practices resulting in claim denials and outreaches and educates providers to prevent those denials. We describe this in more detail in this response.

Our Provider Experience team offers a personal level of provider support on a range of topics, including claims submission, new requirements, changes, or corrective actions. Training is offered during orientation and through regular updates via our provider website, as well as faxes and e-blasts. Education is tailored to providers' and offered virtually or in-person. [redacted]
Additional training topics include high-level outpatient and/or inpatient evaluation and management services; modifier 25; psychotherapy service code 90837; performing therapeutic injection combined with an evaluation and management service; and high-level emergency department (ED) evaluation and management services.

[redacted]

### 2.6.13.1 Healthy Blue's Customized Claims System for Louisiana

Our MIS and supported claims processes meet all federal and LDH Contract requirements, including those in the MCO Manual and MCO System Companion Guide, and will be adjusted to meet any new requirements. Our local team monitors changes from LDH supported by industry-standard coding and reimbursement experts, and we provide ongoing feedback to LDH regarding those changes. We maintain policies and procedures that support our operations and align with the MCO Manual, MCO System Guide, and Model Contract, 2.11.6 and 2.18, including: 1) timely filing and clean claim requirements; 2) maintaining billing provider, claim receipt date, and other key data points; and 3) CAQH/CORE compliant interfaces to support electronic funds transfer (EFT) for providers.

We work closely with the program's regulatory documents, such as fee-for-service (FFS) provider manuals, informational bulletins, health plan advisories, MCO Manual, and MCO System Companion Guide. An experienced LDH partner for the past nine years, we maintain local responsibility and oversight for performance, backed by Anthem's systems and supports, to fully comply with all program requirements and State rules and statutes.

### Efficient, Flexible Claims Management Processes

Our highly efficient and accurate claims processing system supports physical and behavioral health (BH) operations, transportation, and other services, and achieves the highest degree of claims adjudication accuracy, with a [redacted]

Healthy Blue accepts standard paper and electronic claims formats used for Medicaid FFS programs and supports providers with a variety of submission options to facilitate accurate and efficient processing, including three nationally recognized electronic data interchange (EDI) clearinghouses: Change HealthCare, Availity, and Smart Data Solutions. All electronic claims files, including 837 claim submissions, 835 responses, and 999 electronic confirmations, are processed, stored, and retained in compliance with information exchange and data management requirements in the Model Contract.

## Processing Claims in Adherence to LDH Requirements

Automated workflows auto-adjudicate claims. The system assigns unique internal control numbers to track claim progress. The process includes initial HIPAA compliance and completeness validation prior to adjudication. We reject claims that fail compliance or completeness validation and notify the provider of the reason for rejection. Claims that pass front-end validation are loaded into the adjudication system and are validated to make sure key elements are present and accurate, including National Provider Identifier (NPI), covered service, member name and ID, enrollment status, and active eligibility span for service date.

**SPOTLIGHT ON**
**Louisiana Claims System Configuration**

Janel Gary has been with Healthy Blue since the initial contract implementation. She offers more than two decades of progressive expertise in health care industry claims configuration. Her problem-solving skills and comprehensive understanding of Louisiana Medicaid regulatory requirements and Healthy Blue's internal systems have allowed her to translate technical needs into customized system enhancements that increase claims processing accuracy. Her day-to-day job involves monitoring regulatory updates that would impact the configuration of our claims system and assuring that these updates are made in a timely manner.

Janel is passionate about improving the quality of services and improving our claims processes to better serve our Healthy Blue members and providers.

LA_HlthyRebid21_Gary_63_SL_02

**Verifying Claims Against Electronic Visit Verification (EVV) Data.** In accordance with Model Contract 2.19.1.19, we will comply with updated LDH EVV requirements for Personal Care Services (PCS) and home healthcare services. We will evolve our interface with the State-contracted EVV system to assure required elements validate all PCS claims during claim adjudication. This information will be accessible via the Member 360°$_{SM}$ dashboard.

The system denies claims that fail adjudication edits, notifies providers of reason for denial on the remittance advice (RA), and generates an Explanation of Benefits (EOB), as required. The RA is available electronically and on paper; identifies level of payment or denial reason using standard procedures and definitions; and includes instructions on filing a claims dispute. The Healthy Blue RA is compliant with Contract requirements, Louisiana Legislative Act 424 requirements, and all other State and federal laws and regulations.

[redacted]

## Pursuing Healthy Louisiana Claim Timeliness Standards

We have assembled a Claims Processing team that is experienced in Medicaid managed care claims processing and trained on LDH requirements, as well as the needs and challenges of Louisiana providers. Over the last nine years, we developed and refined policies and procedures for timely and accurate claims payment and monitoring. Our claims management employees and Quality Assurance department continually monitor claims processing performance and compliance through scheduled and ad hoc reports. In accordance with Model Contract 2.18.2.1.3, we comply with Healthy Louisiana claim timeliness standards, ***exceeding the required threshold of 90% clean claims processed within 15 calendar days, and processing 100% of clean claims within 30 calendar days***.

## Processes to Monitor and Manage Claims Payment Timeliness

We generate daily, weekly, monthly, and ad hoc reports to gauge processing, identify problems, and monitor quality performance. These reports detail the number of pended claims by aging category so we can react quickly. We also review claims on a daily basis that do not meet our desired standards but were compliant for payment. These lead to follow-up wherever needed, ranging from provider education to internal process changes, without negatively impacting timeliness. By working pended claims in order of receipt, we pay providers efficiently and achieve processing goals. We post resolved claims to the next payment cycle automatically. [redacted]

In alignment with Act 710, and to support LDH's submission of the Healthy Louisiana Claims Report to the Louisiana Legislature, Healthy Blue delivers management reports that summarize the number of denials by type of denial and provider. We use various formats (provider bulletins and newsletters via our provider portal, e-blasts, fax blasts, mailings, as well as in-person and virtual meetings) to educate providers on common issues. A high number of denials for a specific provider triggers one-on-one follow-up.

## Claims Payment Accuracy, Claims Summary, and Encounter Data Reporting

Healthy Blue will continue to comply with all reporting requirements, including claims payment accuracy, claims summary, and encounter data reporting per the Model Contract and MCO Manual.

### Louisiana's Health Insurance Premium Payment Program (LaHIPP)

We continue to process claims for LaHIPP participants, remitting payment for total member liability, including co-payments, co-insurance, and deductibles when a provider that accepts Medicaid as the secondary payer is used.

### Claims Analysts Trained to Understand Healthy Louisiana

Louisiana-based Claims Administrator, Annie Garnier, oversees our Claims Processing team, which includes experienced analysts with Louisiana-specific knowledge. The team analyzes claims reports for possible provider submission or system problems. For example, if we see a high number of claims pending for a specific reason, we determine if intervention is needed, review authorization rules, and/or modify a system edit. A high volume of pending or denied claims prompts additional review and often results in proactive provider outreach. Leadership reviews dashboards with key program metrics to track performance and compliance, including clean and non-clean claims percentage paid within 14 to 30, days of receipt.

### Pharmacy Claims

We currently process pharmacy claims in compliance with the Model Contract. In 2020, more than 3.6 million pharmacy claims were paid for Louisiana members. Through the Point of Sale (POS) claims processing system, all claims adjudicate in real time. Network pharmacies transmit claims electronically, following NCPDP D.0 telecommunication standards. Our online claims processing system operates 24/7 and runs a series of edits, including:

- Member Eligibility
- Rejection edits for Third Party Liability (TPL) and Coordination of Benefits (COB)
- Drug Coverage
- Step therapy, therapy duplication, and other clinical edits, as applicable
- Formulary and PDL compliance
- Benefit design edits (quantity, day supply, and refill-too-soon)
- Prospective Drug Utilization Review (ProDUR) edits

As LDH moves to a single Pharmacy Benefits Manager (PBM), we will work with the PBM to process pharmacy claims according to requirements and we will continue to oversee drug utilization and assist in coordination of member/provider needs with the single PBM.

## 2.6.13.2 Healthy Blue's Management Information System (MIS) Supports Contract Performance and Compliance

As an incumbent MCO, we have configured our systems to support Louisiana Medicaid operations under current Contract requirements. Healthy Blue's HITRUST-certified and HIPAA-compliant MIS is fully automated, meets or exceeds current program requirements, and will support new requirements outlined and state and federal laws and regulations. Our MIS supports seamless operation of all managed care functions using modular component integration, enabling flexibility and functionality to meet Louisiana's needs.

The MIS incorporates Service Oriented Architecture (SOA) component integration and is designed on the principle that all data originates from a single system of record. All changes replicate to surrounding systems and applications. This accommodates market-specific needs and innovations, enabling unique capabilities implemented for one affiliate to be leveraged for another.

### Healthy Blue Meets Model Contract Requirements

Table 2.6.13.2-1 demonstrates Healthy Blue's compliance with Model Contract 2.19.

*Table 2.6.13.2-1. Healthy Blue Meets LDH's Model Contract Requirements*

| Requirement | How Healthy Blue Complies with Model Contract Requirements |
|---|---|
| **2.19.1 General Requirements** | Our MIS accepts and processes provider claims, verifies eligibility, collects and reports encounter data, and validates prior authorizations (PAs) and pre-certifications that complies with LDH and federal reporting requirements. More information on how Healthy Blue complies with the General Requirements can be found throughout our response to Section 2.6.13.2. |
| **2.19.2 HIPAA Standards and Code Sets** | We accept and transmit HIPAA-standard transactions, including 834, 837 (I, P, and D), 835, 820, 276/277, 277CA, 271U, 270/271, 278, and 997/999 formats. We are compliant with the 5010 standard for these transactions and also support the NCPDP D.0 standard. We provide additional information in Section 2.6.13.4. |
| **2.19.3 Connectivity** | Healthy Blue has interfaces with LDH and its fiscal agents (FAs), MAXIMUS and Gainwell Technologies, and supports all LDH-mandated electronic healthcare transactions. See Section 2.6.13.4 for more information. |

| Requirement | How Healthy Blue Complies with Model Contract Requirements |
|---|---|
| **2.19.4 Hardware and Software** | We maintain hardware and software compatible with current LDH requirements, including call center, claims EDI, authorized services, and member services operations. |
| **2.19.5 Network and Back-up Capabilities** | We take strong measures to prevent security breaches. Near real-time data replication from our primary to secondary data center assures ready retrieval/recovery of data. Power protection through uninterruptible power supplies and generators assure continuous power. |
| **2.19.6 Resource Availability and Systems Changes** | [redacted] |
| **2.19.7 Systems Refresh Plan** | Healthy Blue currently provides LDH with our System Refresh Plan annually. |
| **2.19.8 Other Electronic Data Exchange** | We address electronic data exchange in response to Section 2.6.13.2. |
| **2.19.9 Electronic Messaging** | LDH-compatible electronic messaging (email) that complies with national standards for the exchange of protected health information (PHI) is available 24/7/365. |
| **2.19.10 Eligibility and Enrollment Data Exchange** | We address eligibility and enrollment data exchange in our response to Section 2.6.13.2. |
| **2.19.11 Provider Enrollment** | We use LDH-supplied provider type, specialty, and sub-specialty codes in data communications including weekly Provider Registry File and PCP Linkage files. Future integration with the new Provider Enrollment System is described in Section 2.6.13.3. |
| **2.19.12 Information Systems Availability** | We provide LDH personnel, the Louisiana Attorney General's Office, individuals authorized by LDH in writing, and CMS direct, real-time, read-only access to Healthy Blue and subcontractor data for the purpose of data mining and review, as outlined in Figure 2.6.13.2-1. This includes but is not limited to PA; claims processing; provider portal; TPL; fraud, waste, and abuse (FWA); PBM POS; PBM PA; and provider contracting and credentialing. |
| **2.19.13 Off-site Storage and Remote Back-up** | We provide for off-site storage and remote back-up of operating instructions and files, procedures, reference files, and system documentation. To prevent data loss, we use NetApp, and Sybase and Microsoft SQL Server log shipping for near real-time replication to our secondary data center. We store tape backups at a secure off-site facility. |
| **2.19.14 Records Retention** | We provide online retrieval and access to documents and files for audit and reporting purposes for 10 years in live systems and an additional four years in archival systems with audit trails maintained for more than six years. Historical encounter data submission is retained for 10 years following termination of the Contract. |
| **2.19.15 Information Security and Access Management** | Our system contains controls to maintain information integrity and exceed industry requirements. We undertake external assessments annually, such as HIPAA Security and Privacy Rule Assessment, Department of Insurance, accreditation agency and state-level cybersecurity audits, and third-party penetration testing. ***We completed a Systems and Organization Controls (SOC) Type 2 assessment in June 2021. We also achieved HITRUST certification in 2016 and recertification in 2018 and 2020.*** We create audit trails in accordance with requirements to track system modifications. We configure limits on unauthorized access attempts to lock accounts and alert security personnel. Security controls include badged access, cameras, access control systems, closed-circuit television, security staff, intercom, fire retardant, and intrusion detection. |

## 2.6.13.2.1 A System with a Proven Record in Louisiana

Healthy Blue has been using our MIS for nine years to meet the healthcare needs of more than 343,000 Louisianians enrolled through LDH programs, achieving 99.97% system uptime availability in 2020. We make sure system functionality and availability meet LDH needs and the changing environment of Medicaid managed care.

## 2.6.13.2.2 Hardware and System Architecture Specifications

Healthy Blue will continue to maintain hardware and software compatible with LDH requirements in accordance with MCO Manual 2.19.1. Reliable, secure, and easily accessible systems are critical to 1) facilitate quality care; 2) provide a platform for data use to improve outcomes and cost efficiencies; 3) deliver efficient stewardship of Louisiana taxpayers' dollars; 4) process prompt payments; and 5) communicate effectively with enrollees (members).

Security protocols assure we meet HIPAA, federal, and state standards and electronic PHI protection requirements, including: Title XIX of the Social Security Act, Medicaid Information Technology Architecture (MITA) – CMS Minimum Acceptable Risk Standards for Exchanges (MARS-E) v2.0, NIST Special Publication SP800-53 R4 Security and Privacy Controls for Federal Information Systems and Organizations, and IRS 1075 rule.

### Key System Components

Modular integration is a key design premise of our system. Components interoperate where needed but are independent to provide specialized functionality. This protects data integrity and prevents inconsistencies between systems. One example of this is the planned provider portal (Availity) integration with the State's new Provider Enrollment System. Our digital enrollment process will mirror the State's environment, making it easy to map data as it crosses over. We apply principles from our Clinical Quality Improvement processes for data integration and implementation of new systems to avoid disruption to providers or members. The high-level MIS has five key systems and platforms which are depicted in Figure 2.6.13.2-1 at the end of this section.

**Core Service Platform (CSP).** Facets, TriZetto's industry-leading, core-administration and claims platform, serves as the primary source for Healthy Blue's provider, member (including enrollment and eligibility), service authorizations, claims processing, and grievances and appeals data. Facets is fully configurable, with business rules that guide claims payments, authorization and reporting requirements, and benefit limits. Surround applications, including the Health Intech platform and data warehouses, are fully interoperable to provide care coordination, online support solutions, encounter data submission, and reporting and analytics capabilities. All updates will occur through user interface or application-specific data loads, such as enrollment files received from the State.

**Health Intech.** Health Intech serves as our primary method for aggregating and sharing member care management information from all sources in one organized format, including health needs screenings, care plans, and utilization data, such as claims history, authorizations, immunizations, labs, and chronic care management. This system fully integrates with our MIS data and gives "life" to artificial intelligence (AI) to enhance members' experience. Health Intech shares information, as applicable, with LDH, Healthy Blue staff, and providers. Improved data sharing leads to better continuity of care, and reduction in care gaps and duplication. Health Intech is fully compliant with State and federal laws, HIPAA, and the HITECH Act and includes available data from the following:

- Healthy Blue's care management and claims processing systems
- Public health systems
- Continuity of care data (claims history or other information from LDH or other MCOs)
- Other payers and providers (pharmacy, lab, diagnostic, and Electronic Medical Record [EMR] data)

**Member 360°$_{SM}$.** Our clinical data dashboard provides a holistic view of each member's utilization, care management services, and gaps in care. We integrate data and information from multiple sources, including claims history, authorizations, ED visits, hospitalizations, immunization records, prescriptions, lab results, and data from health information exchanges (HIEs) and electronic health records.

**Data Warehouse (DW).** Our DW uses SQL Server and supports operational processes, analytics, quality management/improvement, and reporting. Fed directly from the system of record, the DW delivers a comprehensive source of health information about members and includes encounter claims data for services they receive. We integrate additional information into the DW, including labs, immunization, prescription, and clinical data. The DW supports access to integrated member health information through our Health Intech platform; advanced analytics; and operational, management, and regulatory reporting process information.

**Member Website and Mobile Application.** Healthy Blue maintains a member website, as well as our award-winning mobile application and secure portal, Sydney Health (Sydney) that delivers information and self-service tools. Available 24/7/365 and in English and Spanish, Sydney Health leverages AI and data science to personalize the experience for each member. Sydney can remind members to schedule appointments and screenings and share new and existing programs and benefits specific to their conditions and interests. Sydney improves members' access to their health information and helps them be more active participants in their own health.

Key tools include Find a Doctor, a weekly updated provider directory tool; request or print a member ID card (or digital ID through the app); and secure messaging, allowing members to send and receive messages with Member Services.

**Provider Websites.** Available 24/7/365, with public and secure self-service areas, our newly revamped provider website facilitates easy navigation to actionable information and delivers timely and relevant provider communications. Providers can access: Healthy Blue policies and processes; state and federal regulatory changes; our

PA Look Up Tool (PLUTO); provider online chat; centralized PA requests and claim submissions; and provider manuals and guides. Providers can also access our Training Academy, a multi-modal training platform that encompasses a wide variety of provider education and offers continuing education opportunities. Upcoming enhancements to our Academy include on-demand videos and the ability for providers to self-report training completion.

**Supplemental Applications.** Additional integrated applications support overall functionality, including provider payment, member ID cards, EPSDT, HEDIS® scores, and document imaging. We support providers in Value-Based Payment (VBP) programs through our Provider Care Management System, which offers real-time, member-specific data. Providers may submit PA requests 24/7/365 via our fully automated, web-based Interactive Care Reviewer (ICR) tool.

Diagrams detailing hardware and architectural specifications, noted in Table 2.6.13.2-2, are provided in the Supplemental Pages at the end of this section.

*Table 2.6.13.2-2. Healthy Blue's Detailed Architectural Diagrams*

| MIS Hardware Architectural Framework | Diagram Reference |
|---|---|
| **Detailed Hardware Architecture** | Figure 2.6.13.2-2 |
| **Detailed Architectural Framework** | Figure 2.6.13.2-3 |
| **Functional System Overview** | Figure 2.6.13.2-4 |
| **Functional System Interfaces** | Figure 2.6.13.2-5 |

## 2.6.13.2.3 Essential Business Functions and Data Interfaces

Figures 2.6.13.2-4 through 2.6.13.2-16 depict Healthy Blue's essential business functions and Figure 2.6.13.2-18 depicts our data interactions. Our MIS supports requirements outlined in the MCO Manual, Model Contract, and 2021 MCO System Companion Guide including key business processes identified in Part 2. We include a high-level description of each business process and provide data and process flow diagrams as defined in the Supplemental Pages at the end of this section. Table 2.6.13.2-3 outlines Healthy Blue's data and process flow diagrams.

*Table 2.6.13.2-3. Healthy Blue's Data and Process Flow Diagrams*

| MIS Diagram/Process Flow Chart | Diagram Reference |
|---|---|
| **Member Eligibility and Enrollment Management** | Figure 2.6.13.2-6 |
| **Claims Processing** | Figure 2.6.13.2-7 |
| **Encounter Data Management** | Figure 2.6.13.2-8 |
| **Customer Service** | Figure 2.6.13.2-9 |
| **Care Management** | Figure 2.6.13.2-10 |
| **Coordination of Member Health Plan Changes** | Figures 2.6.13.2-11a & b |
| **Utilization and Quality Management** | Figure 2.6.13.2-12 |
| **Authorizations** | Figure 2.6.13.2-13 |
| **Financial Management** | Figure 2.6.13.2-14 |
| **Reporting** | Figure 2.6.13.2-15 |
| **Third Party Liability** | Figure 2.6.13.2-16 |
| **Grievance and Appeals** | Figure 2.6.13.2-17 |
| **Data Interactions** | Figure 2.6.13.2-18 |

**Member Eligibility and Enrollment Management.** Our member enrollment processes maintain the integrity of member information used by claims and finance subsystems, among others. We currently process daily and monthly HIPAA-compliant 834 enrollment data files from LDH, as shown in Figure 2.6.13.2-6. The enrollment file load process establishes begin and end dates for members under specific program eligibility categories. We capture eligibility changes promptly and accurately while maintaining historical data, enabling us to provide appropriate services and correct current and delayed claims processing.

**Claims Processing.** Our MIS tracks information on claims and encounters for covered services processed on behalf of our providers, as shown in Figure 2.6.13.2-7. We assign a unique number to each claim and capture and maintain its receipt date. A series of edits (including National Correct Coding Initiative [NCCI]) and business rules validate data on all incoming claims; the system rejects, suspends, or denies claims with invalid information. We maintain claim and line detail information with processing information, including any applicable interest payments.

**Encounters and Encounters Reporting.** Healthy Blue combines claims processed with encounters received from subcontractors for submission to LDH. Systems configuration and editing include monitoring LDH encounter edit requirements (for example, taxonomy codes), assuring adjudicated claims result in quality encounter data in accordance with the Model Contract. We outline the encounter data submission process in Figure 2.6.13.2-8.

**Customer Service.** We recognize how important is it to be available to members and providers when they need us. As shown in Figure 2.6.13.2-9, we have implemented a communications platform to route calls to an appropriate site and assure timely and quality support. We have claims-trained Provider Services Representatives who make claims adjustments in real time during calls. Our system allows load balancing across sites where all agents access the same information and the same system to deliver consistent, exemplary service.

**Care Management.** The Health Intech care management platform utilizes MIS components data to support member and service management efforts. This fully integrated platform leverages information from our care management system and CSP, as well as clinical and social determinants of health (SDOH) information collected from referrals, screenings, and assessments, as seen in Figure 2.6.13.2-10.

**Coordination of Member Health Plan Changes.** We streamline information sharing relative to care management, and coordinate sharing between MCOs. For transitioning members, our MIS extracts care management data, such as service plans, assessments, and active authorizations, and provides them to the receiving MCO. We can also load data from exiting MCOs into our systems (Figures 2.6.13.2-11a and 2.6.13.2-11b).

**Utilization and Quality Management.** Our utilization and quality management approach incorporates a full range of MIS data sources used in a bi-directional manner to identify clinical initiatives and programs directed at efficient and effective service delivery and guide continuous improvement, as seen in Figure 2.6.13.2-12.

**Authorizations.** We recognize the importance of timely authorizations to assure appropriate member care. Our MIS supports intakes, clinical review, and outbound communication of authorizations (Figure 2.6.13.2-13).

**Financial Processing.** Figure 2.6.13.2-14 details the various MIS functions that support critical financial management processes such as capitation reconciliation, FWA reviews and audits, medical loss ratio (MLR), and our financial statement and Generally Accepted Accounting Principles (GAAP).

**Reporting.** Healthy Blue collects and maintains 100% of LDH-required data, in compliance with Contract reporting requirements. Our process, shown in Figure 2.6.13.2-15, supports collection and reporting of relevant data through both regulatory and ad hoc reports. Our MIS is modular in design, providing a flexible, configurable, and scalable system that can deliver required functionality and information to support program operations.

**Third Party Liability (TPL).** A strong TPL program is critically important to lowering costs for Louisiana Medicaid. To achieve success, our TPL program employs experienced personnel; automated applications; and consistent, replicable processes. Figure 2.6.13.2-16 shows the processes for documenting Other Health Insurance (OHI) and coordinating benefits.

**Grievance and Appeals.** Our Grievance and Appeal System remains compliant with 42 CFR 438 Subpart F, Model Contract 2.19.1.2, and other applicable CMS and LDH requirements, including notice, timeliness, rights, and procedures. Figure 2.6.13.2-17 highlights how our Grievances and Appeals system manages medical necessity and provider disputes appeals. These appeals are received via mail, phone, fax, or web.

## 2.6.13.2.4 Data and Process Flows for all Key Business Processes

We have provided data and process flows for all key business processes in the supplemental pages that follow this section in Figures 2.6.13.2-1 through 2.6.13.2-18.

## 2.6.13.2.5 Support for Medicaid Management Information System Exchanges

The IT team is comprised of our Louisiana IT Director, Claims Administrator, Encounter Data Quality Coordinator, and support staff. Healthy Blue devotes skilled staff to support LDH-required data exchanges and meet operations and management needs, including: 1) on-site Louisiana data analysts and subject matter experts; 2) technical employees embedded in functional departments; 3) a dedicated Regulatory Reporting team that specifically supports Healthy Louisiana; and 4) a corporate team structure that supports Healthy Louisiana. For example, our local team leads all efforts to support Healthy Louisiana, and our corporate team receives Louisiana-specific training and supports changes, such as the new Provider Enrollment System.

**Help Desk Support.** In accordance with Model Contract 2.19.6**,** we will continue to provide Systems Help Desk services to LDH, its FI, and Enrollment Broker staff with direct access to MIS data. Our Help Desk is available 24/7/365. Our Help Desk utilizes IT Service Connect to record, track, and report all reported questions and issues.

## 2.6.13.3 Structured Management of Systems Changes to Support Operations

We will comply with requirements per Model Contract 2.19.6.3 and 2.19.7, including LDH notification and implementation timeframes for system changes and issues. All MIS changes or enhancements follow strictly defined processes and are performed by highly skilled, in-house technical staff supported by Anthem corporate resources. Next, we provide enhancements planned for the new Contract period.

- **Provider Enrollment.** Healthy Blue aims to increase digital communications (inbound and outbound) to make information available electronically to providers in a secure, easy to consume, relevant manner. This includes improvements to our digital provider enrollment and connectivity to the State's Provider Enrollment System.
- **Claims Processing.** Healthy Blue plans to introduce a new Claims Market Services team that, along with InterAct — a new operating model and tool coming in late 2021, that will give our business and partners a single point of entry for claims and configuration issues and changes. This will remove unnecessary handoffs and manual data entry and deliver improved quality and claims issues resolution for LDH and Louisiana providers.
- **UM/Service Authorization.** Health Intech will ingest admission, discharge, and transfers (ADTs) data to update PA with ADT information and create shell cases for those without PA using ADT information.
- **Care Management/Chronic Care Management.** Healthy Blue will update its Health Intech platform to include an internally developed, multi-tenant cloud platform that allows customization, including workflow and task management, without extensive programming. This highly configurable platform will support HIE and electronic health record (EHR) systems integration and improve the PA process.

[redacted]

### Coordination and Management of System Modifications

We have processes for implementing system changes and maintain separate development and testing environments, verifying we only release approved systems to production. We prioritize maintenance outside of critical business operations. If we must schedule maintenance during normal operational hours, we coordinate with LDH for approval and follow documented protocols. We create and maintain a project plan with key dates for configuration, testing, end user validation, and go-live target. LDH is notified before major changes to claims, eligibility and enrollment processing; service authorization management; and provider enrollment and data management. In accordance with Model Contract 2.19.6.3, when we execute a major conversion of a core transaction system, we notify LDH at least 90 days in advance. When a system change is subject to LDH prior written approval, we submit necessary revision(s) at least 30 days before implementation.

### Assuring Continuity of Operations Through System Change Management

Our system change management process follows a governance model with defined roles, responsibilities, and checkpoints, based on these guiding principles: 1) all changes in scope to the production IT environment are submitted and approved using an enterprise change management tool; 2) an owner is defined for each change request and requests must be consistent, detailed, and contain timely, communicated, and accessible information; 3) change requests are approved based on content, risk, and schedule; 4) changes are scheduled to minimize business impact implementation, and back-out plans are required for each request; 5) separate workflows are defined to accommodate emergency and urgent changes; 6) change management includes a protocol for resolving conflicting requests; and 7) documents attached to requests in the process tool may not contain PHI.

For system upgrades, we receive notification from the software vendor two to three months prior to scheduled releases — typically twice annually. We assign a project lead and establish a plan to track deliverables and checkpoints including impact, assessment, program modifications, testing, training, and notifications. The project lead shares release details with the technical team and designated system users, who review and complete an Impact Assessment form for their areas. The project lead holds a kick-off meeting to cover testing timeline and answer questions. The Systems Testing Group creates a test plan and establishes the required test data in Jira, which automates testing and performs defect management.

## 2.6.13.4 Ongoing Support for Data Interfaces

Healthy Blue's MIS is designed to support data interfaces with LDH's system as well as our network providers and subcontractors. We meet all HIPAA, state, and federal standards for data management and information exchange. We maintain connectivity with LDH and its FAs, MAXIMUS and Gainwell Technologies, and support all LDH-mandated electronic healthcare transactions, including X12, NCPDP, XML, and JSON formats. Our MIS also supports a CAQH/CORE compliant interface to the automated clearinghouse (ACH) that allows providers to request and receive claims payments via EFT, to comply with Model Contract 2.11.6.2.

**SPOTLIGHT**

Our Louisiana Information Technology (IT) Director, Trang Cooley, supports Healthy Blue and LDH as an integral part of all technology-based implementations and ongoing operations. Ms. Cooley is a seasoned professional with more than 12 years of IT experience in Medicaid managed care systems. She brings industry, corporate, and health plan knowledge to partner with LDH in developing new system interfaces or resolving operational or system issues. Our IT Director and representatives from key functional departments, such as enrollment and encounters, will continue as active participants in the MCO Systems Workgroup held by LDH.

LA_HlthyRebid21_2.6.13_Cooley_47_SL_02

**Supporting EHR Technology.** Through EHR connections, we receive ADT data, Continuity of Care Document Architecture (CCD-A), and other Health Level 7 (HL7) transactions. Anthem is currently working with top EHR vendors, athenahealth®, Allscripts®, and Epic® to push member insights, care gaps, and formulary changes to providers in their preferred workflow.

## Current Data Exchanges

Healthy Blue views HIE-enabled data exchange as a catalyst to improving member and provider communication. We support data exchanges with state partners, enrollment brokers, subcontractors, and providers. Our parent organization is a founding member of Da Vinci, an HL7 industry work group dedicated to promoting Application Program Interface (API) and interoperability for healthcare data exchange and administrative use cases.

Healthy Blue's data exchanges with our trading partners are fully automated and use Axway B2Bi to manage secure file exchanges through secure file transfer protocol. We validate incoming and outgoing EDI HIPAA 5010 ASC X12N transactions up to WEDI/SNIP level 7.

Our system job scheduler generates data extracts and we monitor status notifications, extract files, and error logs to verify each job executes as expected and in the appropriate format. We configure data extract changes outlined in the Louisiana MCO Systems Companion Guide and as defined by LDH. Table 2.6.13.4-1 provides a listing of inbound and outbound EDI data exchanges that we currently or will support for the Healthy Louisiana program. Figure 2.6.13.2-18 depicts our data interfaces with providers and subcontractors. Our systems hardware and software architecture is scalable and meets current and future data interface needs. We continually assess system design and architectural framework and monitor core systems closely for system availability, connectivity, and service level agreements.

*Table 2.6.13.4-1. Healthy Blue Data Exchanges*

| Interface | Format | Frequency | From | Destination |
|---|---|---|---|---|
| **Eligibility** | EDI 834 | Daily, Weekly, Monthly | MAXIMUS | Healthy Blue |
| **Eligibility** | EDI 834 | Daily | Healthy Blue | Subcontractors |
| **Institutional Encounter Data** | EDI 837I | Weekly | Healthy Blue | LDH |
| **Professional Encounter Data** | EDI 837P | Weekly | Healthy Blue | LDH |
| **Vision and Transportation Encounter Data** | EDI 837P | Monthly | Healthy Blue | LDH |
| **Dental Encounter Data** | EDI 834D | Monthly | Healthy Blue | LDH |
| **Pharmacy Claim Encounter Data** | NCPDP | Weekly | Healthy Blue | LDH |
| **Encounter Response Data** | EDI TA1/999 | Weekly | LDH | Healthy Blue |
| **Encounter Response Data** | EDI 835 | Weekly | LDH | Healthy Blue |
| **Health Care Claim Payment/Advice** | EDI 835 | Twice per week | Healthy Blue | Network Providers |
| **Premium Payment** | EDI 820 | Weekly | Healthy Blue | LDH |
| **Premium Payment – Maternity** | EDI 820 | Weekly | Healthy Blue | LDH |

**Securely Sharing Information with Providers to Support Medical Management.** We use several secure mechanisms to share information with providers to support care coordination and management, including our provider portal, secure file transfer protocol (SFTP), secure email, and the Louisiana Health Information Network (LHIN) Encounter Notification Service (ENS). Healthy Blue's subscription to LHIN-ENS through Audacious Inquiry, an industry leader in real-time clinical event notification, will allow our providers to access real-time ADT data through our secure portal, with accompanying email alerts, later in 2021. Near-real-time access to member care issues supports proactive engagement and advances the State's goal of decreasing fragmentation and increasing integration across providers and care settings for cost-effective care.

## Promoting Data Sharing and Health Information Exchange

As an incumbent, we will apply our knowledge and lessons learned to continue to advance HIE, data, and information sharing efforts, in collaboration with LHIN, providers, MCOs, subcontractors and other stakeholders. Interoperability allows us to work together seamlessly and securely and enables workflow improvements between Healthy Blue and provider systems. We will encourage all network partners to adopt certified electronic health record technology and comply and attest with corresponding meaningful use requirements and deadlines as outlined by CMS and the Office of the National Coordinator in accordance with Model Contract 2.19.3.4.

**Digitally Transforming How We Work with Providers.** We are implementing digital data solutions that improve healthcare delivery through effective administrative processes and enhanced data sharing. In collaboration with providers and technology solution companies, we are building digital data solutions that include

EMR access and transmission; ADT transmission; and bi-directional integration. We are working with technology solution partners Epic and eClinicalWorks on EMR access and transmission and bi-directional integration. ***We are also working with 26 Louisiana Health Systems over the next 18 months for ADT and EMR data transmissions.***

**EMR Access and Transmission Reduces Administrative Burden and Improves Care and Utilization Management.** Providing Healthy Blue with access to patient records and creating direct back-end data sharing reduces provider administrative burden by simplifying fulfillment of audit and compliance requirements and eliminating the need for alternative information exchange methods. EMR access and transmission includes safeguards that verify members' health plans prior to granting access to information. This promotes PA simplification and supports monitoring fulfillment of VBP agreements. We use EMR data along with other clinical and claims data for predictive analytics and quality metrics.

**ADT Transmission Solutions Provide Real-time Alerts for Inpatient and ED Admissions and Discharges.** We leverage standard HL7 ADT transmissions from facility registration systems to receive real-time alerts for member inpatient and ED admissions and discharges. Through our Clinical Data Integration Platform, our Case Managers and Care Coordinators use ADT event data in their standard workflows to partner with providers, proactively close care gaps, and assure members' safe transitions home.

**Bi-directional Integration Streamlines Workflow and Delivers Data to Promote Better Care.** Real-time workflow and data integration via existing EMR technologies streamlines and facilitates clinical data exchange at the patient and encounter level. Seamless and secure digital information exchange gives Healthy Blue and network providers access to data that improves workflow and collaboration, including:

- **Prior Authorizations.** Directly sharing PA data gives providers near real-time approval or denial of requests and reduces administrative burden by eliminating the need for phone calls, faxes, and follow-up.
- **Clinical Data Exchange.** An integrated data feed that eliminates manual record exchange, streamlines compliance and audit fulfillments, and enables deeper automation and analytics.
- **Member Insights.** Timely access to member information is a critical element in providing optimal care. Detailed patient history, including chronic conditions, lab results, medications, and medication adherence gives providers a 360-degree view of a member's health status and potential care gaps.

## Healthy Blue Focuses on Interoperability

We support interoperability in compliance with regulations released by the U.S. Department of Health and Human Services (HHS). Our project timeline includes application program interfaces (APIs) effective 7/1/2021 – Patient Access API, Provider Directory API, and Formulary AP; and effective 1/1/2022 – Payer to Payer API.

In developing these APIs, we used the CMS Integration Guides and followed standard Fast Healthcare Interoperability Resources (FHIR®) format using SMART IG/OAuth 2.0 privacy standards via OpenID Connect to return U.S. Core Data for Interoperability to members. Members use registered third-party applications, to access and view member, provider, and formulary information. These APIs give members access to their claims, and front-end encounter data available within 24 hours of adjudication. Members also have access to provider directory information on our website or hardcopy.

**Working with Christian Service of Shreveport to Offer Vaccinations to the Community**

Christian Service of Shreveport is a transitional home for men and women that operates a daily soup kitchen and assists with rent, utilities, and other services. Healthy Blue's partnership with them was established in 2013, and together, we host an annual health fair on-site. This year, however, due to the low vaccination rates in Louisiana, we partnered with David Raines Community Health Centers on Wednesday, July 21, to offer vaccinations at their facility.

# 2.6.14

Program Integrity

Healthy Blue

## 2.6.14 Program Integrity

### 2.6.14.1 Healthy Blue's FWA Program Addresses LDH's FWA Requirements

We remain committed to being good stewards of public funds and collaborating with LDH and the Medicaid Fraud Control Unit (MFCU) to support LDH Program Integrity (PI) goals and objectives. As prevention is one of the State's goals, and ***because fraud is everyone's problem***, we prioritize fraud, waste, and abuse (FWA) prevention, detection, and correction in the Healthy Louisiana program. We built our approach on more than nine years' experience in Louisiana Medicaid. Our parent companies also have extensive experience with fighting fraud — BCBSLA has more than 85 years' experience serving Louisiana and Anthem has more than 30 years of experience serving Medicaid programs across the country. This provides extensive insight into billing patterns, utilization, trends, and focus areas on the Louisiana healthcare delivery system, including tele-fraud, durable medical equipment (DME), lab schemes, and prescription drug fraud.

Healthy Blue has a ***strong record of partnership with LDH and the MFCU*** in suspected FWA investigation. In 2019 and 2020, Healthy Blue, in partnership with BCBSLA, made a total of 24 referrals to LDH, MFCU, and the Louisiana Department of Insurance (DOI). We will continue to provide MFCU investigators with information and assistance, as requested.

***To expand our reach, we hold quarterly meetings between PI staff and peers at BCBSLA who lead FWA efforts related to commercial and Medicare plans.*** At these meetings, Healthy Blue and BCBSLA share information on fraud schemes and concepts, investigative techniques, providers under investigation, best practices, and lessons learned. ***The ability to gain insight from BCBSLA, an insurer with 1.8 million Louisiana enrollees (members), expands our capacity to prevent and detect fraud. This collaboration generates leads and/or cases for the entire Louisiana Medicaid program.***

In the new Contract, we will continue to use proven strategies and tactics to combat FWA, ranging from "feet on the ground" local insight to industry leading, high-tech systems and analyses. Our FWA prevention program meets or exceeds the requirements set forth in Model Contract, Section 2.20; MCO Manual, Part 15: Program Integrity; 42 CFR § 438.608; 42 CFR Part 455 (Program Integrity: Medicaid) and 42 U.S.C. § 1320a-7, 1320c-5 and 1396a(a)(68) (Approval of Certain Projects); Louisiana Medical Assistance Program Integrity Law, La. R.S. 46:437.1 through 437.14; and Title 50 of the Louisiana Administrative Code, Part I, Subpart 5 (Provider Fraud and Recovery).

[redacted]

We will also leverage data collected through the State-contracted electronic visit verification (EVV) system to make sure Personal Care Services have been received as reported. Applicable claims will not be processed unless they pass EVV validation in compliance with federal EVV requirements in the 21st Century Cures Act.

#### Strong Compliance Program Oversight

Our Louisiana-based leadership team develops policies in consultation with our Louisiana-based Program Integrity Officer, Erica Douglas, and our Compliance Director, Hassan Gardezi. Policies play a major role in guiding health plan activities and operations. In accordance with Model Contract requirement 2.20.2.2.1, Healthy Blue maintains policies, procedures, and standards of conduct pursuant to 42 C.F.R. §438.608(a)(1) to safeguard Louisiana Medicaid program funds against unnecessary or inappropriate use of MCO Covered Services and improper payments. We monitor and review policies and procedures at least annually and publish them on an internal website accessible to all employees.

Anchored by Anthem's Standards of Ethical Business Conduct (Code), these documents serve as a resource for all employees and outline expectations that reflect federal regulations, State-specific contract provisions, and other program requirements. The Code describes our values and compliance expectations and explains our policy of non-intimidation and non-retaliation for good faith participation in the Compliance program. All staff, subsidiaries, and Healthy Blue's Board of Directors review and agree to follow the Code annually.

***We focus substantial efforts on prevention.*** While we pursue recovery of overpayments and recoup payments that stem from FWA instances, it is more efficient and cost-effective to stop erroneous payments before they are made. Our ***focus on prevention*** includes identifying outlier provider billing or coding practices and working closely with providers to drive behavior change prior to claims payment. For example, we notify LDH of any voluntary provider disclosures resulting in receipt of overpayments more than $25,000, in accordance with Model Contract, Section 2.20.7.2.

***Through collaboration with LDH and industry best practices, we have far exceeded our competitors in prevention and recoveries. In addition to our Special Investigation Unit (SIU) prepayment review (PPR) prevention savings, we aggregate preventive savings from other teams.*** [redacted]

By combining local and national resources, we:

- Identify and implement system and oversight activities to reduce instances of fraudulent activities
- Use advanced data analytics to expand detection capabilities across a broad spectrum of clinical services
- Continuously review and improve processes and tools to optimize savings for LDH, capitalizing on best practices, innovations, and insight from affiliates in 24 other markets
- Collaborate with LDH, MFCU, and other agencies to combat FWA
- Collaborate with other Medicaid MCOs and BCBSLA to identify local FWA trends and issues
- Use preventive strategies to curtail diversion of funds that could be applied to safeguarding member health and welfare

## Healthy Blue Approach to Preventing, Detecting, and Reporting FWA

We encourage individuals to report FWA suspicions and provide multiple channels to make it as easy as possible — especially for those who wish to remain anonymous. Anyone can report FWA via mail, in person, email, the toll-free national compliance hotline, or reporting links on our website. Members, providers, community members, and internal staff can report suspicions directly through our award-winning website, www.fighthealthcarefraud.com. Our dedicated reporting email address, MedicaidFraudInvestigations@HealthyBlueLA.com, is published on our website and in member and provider handbooks. We also use newsletters to remind members and providers how to report FWA suspicions.

### Controls for Preventing and Detecting Fraud and Abuse

In accordance with Model Contract, Section 2.20.2.3.2, our Compliance Plan includes controls for prevention and detection of potential or suspected FWA. Our claims processing system — from intake through payment — includes controls that prevent and detect potential or suspected FWA for all claims submitted.

Healthy Blue requires claims and encounter data submission for every service delivered to members and encourages providers to submit claims as soon as possible after dates of service. We offer multiple avenues for providers to submit claims electronically, and we also accept paper claims. We adjudicate claims nightly and make payments five days per week to deliver prompt turnaround. Through our established operational procedures, we receive and process provider claims timely and effectively. All claims, regardless of entry source (paper or electronic) or provider type (network or out-of-network), pass through the same edits and adjudication processes.

The system assigns each claim a unique internal control number to track progress from initial entry to final adjudication. At onset of the adjudication process, the claim goes through our PPR system, which is highlighted through regular edits as well as specific FWA tools and analytics that we employ. Our automated prepayment claims editing tools perform audits on submitted claims and apply correct coding edits. Our SIU prepay process assures medical record review on identified providers before payments are ever processed. We then use internal data analytics reports to identify outlier provider activity. While PPR and reports occur, surveillance and/or utilization management protocols safeguard against unnecessary or inappropriate use of Medicaid services. We reference the Louisiana Administrative Code, LDH provider handbooks and modules, Medicaid banners and bulletins, as well as benefit coverage limitations when data mining for potential FWA.

Continuing through the claims life cycle, Healthy Blue performs desk audits on post-processing claims review. Our review includes claims evaluation for upcoding, unbundling, inappropriate use of modifiers, and billing for services not performed. The SIU and its Special Workgroup Analytics Team (SWAT) use rules-based fraud detection tool STARSInformant and report findings via our proprietary data mining tools, as well as Medicaid schemes and trends across all lines of business. All credible allegations of member fraud or abuse are immediately referred to the Attorney General's office. Our Healthy Blue Medicaid provider handbook and provider agreement detail credentialing standards. We perform ongoing monitoring to verify continued compliance with our standards and look for any action that may reflect substandard conduct and competence. We review periodic reports when available through sources such as the Office of Inspector General (OIG), federal Medicare or Medicaid reports, Office of Personnel Management, licensing agencies, and our Quality Management department.

During post-payment review, we include medical records review and supporting documentation for accuracy, appropriateness of codes billed, standard documentation rules, and education to our providers when we identify abnormal billing outliers. Through our education efforts, we track providers' change of behaviors. Healthy Blue also develops new post-payment, rules-based queries through data mining operations that search everything driving overpayment capture, from duplicate payments to retroactive rate changes.

**HEALTHY BLUE'S PREPAYMENT FLEXIBILITY**

Healthy Blue has the flexibility to:

- Review 100% of all claims submitted for the codes on prepayment review
- Place specific codes or all codes on prepayment review
- Remove codes from prepayment review as providers demonstrate an acceptable pass rate

This flexibility helps reduce provider abrasion while addressing our obligation to ensure appropriate supporting documentation prior to payment.

LA_HlthyRebid21_2.6.14_PrePayFlex_52_COB_02

Our controls consist of more than pre- and post-payment reviews. We also review reports for provider profiling and credentialing aid program and payment integrity, including, but not limited to:

- Louisiana State Licensure Verification and related sanctions
- National Plan and Provider Enumeration System (NPPES)

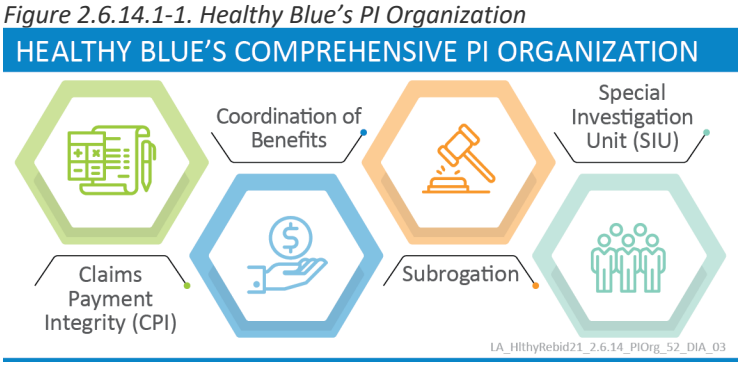
*Figure 2.6.14.1-1. Healthy Blue's PI Organization*



Provider and member materials, including the Healthy Blue Medicaid provider handbook, outline our FWA program and provide detailed reporting instructions. Our provider website also offers information on reporting FWA. Provisions for the confidential reporting of suspected FWA or PI Plan violations include:

- **Hotline.** A voice-mail box permits information to be left on a confidential hotline. We encourage members to confidentially report allegations of FWA via our toll-free number: 1-866-847-8247.
- **Email.** SIU has established an email account dedicated to referrals within the organization. All employees can reach SIU by selecting "Medicaid Fraud" from the email system global address book, and suspicions can be emailed directly to SIU at MedicaidFraudInvestigations@HealthyBlueLA.com. The email address is also provided online via our website for members, providers, employees, and the public.

**Procedures for Detecting, Reporting, and Investigating Fraud and Abuse.** We maintain detailed internal procedures for officers, directors, managers, and employees for detecting, reporting, and investigating FWA and PI Plan violations. Employees have several options available to promptly report any suspected or identified issues:

- Reporting directly to the Program Integrity Officer or Compliance Director
- Calling the SIU Fraud Hotline for confidential and anonymous reporting of allegations
- Completing an online fraud and abuse referral form located on our intranet website (preferred method)
- Reporting allegations or concerns directly on our www.fighthealthcarefraud.com website

**Reporting Confirmed or Suspected Provider Fraud and Abuse.** We will continue to promptly report preliminary investigation results and suspected and confirmed cases of FWA to LDH PI and MFCU. We have an excellent record of meeting LDH PI and federal requirements for report timeliness and quality and will continue to do so under the new Contract. We execute quality reviews on all reports before submission, generating reports in advance of LDH PI deadlines to allow adequate time for thorough reviews. We will continue to use LDH-approved report templates for routine, monthly, and quarterly PI reports. These reports identify:

- Monthly tips reports on all preliminary investigations opened during the reporting period
- Monthly Behavioral Health Providers Gain and Loss Report, which details any adverse actions for behavioral health providers during the reporting period
- Quarterly reporting on all audit and investigation activities, including provider education, PPR metrics, and identified waste and error overpayments and collections across the calendar year
- Quarterly financial reporting for tracking recoveries

We will promptly implement any new reporting requirements upon LDH PI request.

**Protecting Against Retaliation Resulting from Reporting Contractor Potential Violations or Suspected Fraud and Abuse.** Healthy Blue has a policy of non-intimidation and non-retaliation for good faith PI participation, including reporting and investigating potential issues; conducting self-evaluations, audits, and remedial actions; and reporting to appropriate officials. Any employee, regardless of seniority or status, who engages in or condones retaliatory activity is subject to corrective action, up to and including termination. All employees receive a refresher training each year on whistleblower protections and our non-retaliation policy.

## FWA Program Oversight

Healthy Blue's FWA program is part of our overall Compliance program, governed by our Compliance Plan with oversight from our Louisiana-based Compliance Director and Plan Compliance Committee.

**Compliance Program Oversight.** Our robust Compliance program; Healthy Blue Compliance Director, Hassan Gardezi; Program Integrity Officer, Erica Douglas; and the entire Compliance team supports Healthy Blue's continued success while maintaining our commitment to the highest ethical standards.

**Program Integrity and Compliance Oversight: Local, Dedicated Staff.** As an internal subject matter expert and resource regarding our contractual and regulatory obligations for Louisiana Medicaid, our Compliance Director enforces our Louisiana Medicaid Compliance Plan, which is submitted to both the Compliance Committee and LDH annually for approval. Our Compliance Plan designates staff responsible for administering action items as well as clear goals, objectives, measures, outcomes, and target dates. Our Compliance Director implements procedures for routine internal monitoring and auditing, assuring prompt response to compliance issues, as well as identifying and investigating potential compliance problems.

Our Compliance Director also chairs our Compliance Committee, which includes our SIU investigative team, CEO, and leaders from QI, UM, Care Management, Operations, Subcontractor Oversight, Community Outreach, and Provider Services. The Committee provides a forum for Healthy Blue leadership to review and discuss emerging PI issues, regulatory reporting, contract changes, potential compliance risks, and mitigation activities.

Our Program Integrity Officer, Erica Douglas, attends our Compliance Committee meeting and chairs monthly SIU case discussions that include leaders from the SIU, Operations, Provider Network Management and Contracting, Legal, and Medical Directors. The Committee reviews providers currently on prepay and active cases to discuss progress and next steps. Erica is also responsible for managing the PI Plan and reporting specifications to assure compliance with all applicable Healthy Blue, federal, and State requirements.

## Healthy Blue's PI Organization

Healthy Blue's comprehensive FWA and PI efforts rely on highly trained, experienced staff who are empowered by an integrated system of activities, processes, and controls that involve virtually every department. Our PI organization, shown in Figure 2.6.14.1-1, comprises multiple teams across the organization working together to assure appropriate payments for MCO Covered Services provided to eligible Medicaid members. These diverse teams implement and participate in our overall strategy and work in concert to execute Healthy Blue's PI plan:

- Our Claims Payment Integrity (CPI) team is responsible for two major areas: Coordination of Benefits (COB) and data mining. COB functions include identifying and validating other coverage and identifying recovery and prevention savings. Data mining functions (pre- and post-payment) include applying claim overpayment and algorithms to assure compliance and detect potential FWA.
- The COB team develops and maintains reimbursement policies and is responsible for code editing (administrative and clinical edits, correct coding, and customized FWA edits) and medical edits that apply industry-standard logic to claims coding (inappropriate code-to-code relationships).
- The Subrogation team recovers expenses when another party is liable for an accident or injury claim.
- The SIU investigates known or suspected fraudulent or abusive activities by providers, members, or employees; increases awareness of methods to detect, correct, and prevent FWA; and collaborates with regulatory agencies and law enforcement to mitigate fraud and abuse.

**Staffing Model and the SIU.** The SIU is a critical part of our PI strategy. To support the Healthy Louisiana program and in accordance with Model Contract, Section 2.20.1.10, SIU staff will include, at a minimum, one Louisiana-based staff person for every 50,000 members and our local PI Officer. [redacted] Our investigative team is located throughout the state, which enables easy and efficient provider on-site visits.

[redacted] Our Louisiana SIU team is comprised of members with the following certifications: CPC, Certified Fraud Examiners, Accredited Healthcare Fraud Investigators, CPA, Certified Professional Medical Auditor, Certified Outpatient Coder, Registered Nurse, Master of Business Administration, and Master of Arts in Counseling. All team members have a minimum of two years of healthcare-related FWA investigation experience and a Bachelor's degree, or Associate's degree with an additional two years of relevant experience. We include designated SIU staffing in our FWA plan.

In addition to our dedicated Louisiana SIU team, Healthy Blue can draw from extensive resources and expertise of Anthem's national SIU team, comprised of investigators, prepay reviewers, clinical fraud investigators, and support staff. Capabilities and experience among SIU employees are varied and diverse, which means we can leverage experience across all states and lines of business. Our SIU team maintains a close relationship with industry organizations focused on healthcare fraud and abuse prevention. SIU Staff Vice President, Bob Mays, has served on the National Health Care Anti-Fraud Association (NHCAA) Board of Directors for the past six years and currently serves as Secretary of the Board. The SIU Director, Jennifer DePaul, is the current co-chair of the NHCAA Medicaid Fraud Interest Group. Additional staffing credentials and national organization participation include the Association of Certified Fraud Examiners (ACFE) and American Association of Professional Coders (AAPC).

The SIU participates in Compliance Committee meetings, chaired by Healthy Blue's Compliance Director, to discuss high-level SIU metrics. The SIU hosts monthly meetings for health plan leadership from additional functional areas that allow the SIU team to deep dive into open cases, new trends, and schemes and provide detailed updates regarding provider responsiveness to audit activities. The SIU team uses this meeting to provide the best possible service to our providers and reduce abrasion while conducting necessary oversight and corrective actions.

**Collaborating with LDH and External Stakeholders.** Our PI structure and experienced SIU have a strong record of partnership with State and federal agencies to identify, investigate, sanction, or prosecute FWA. Our investigators participate in Managed Care PI Group meetings, biweekly Home Health Care Fraud Referral meetings, quarterly SIU meetings, as well as any additional meetings identified by LDH.

## 2.6.14.1.1 Medicaid Program Integrity Training

**Training Employees on Medicaid Program Integrity.** All employees undergo ***Do the Right Thing*** ethics and compliance training, including modules on FWA, within 30 days of hire and annually. Department-specific training (for example, claims, utilization review, and quality assurance) is provided periodically. The training explains reporting procedures and asks employees to remain vigilant about FWA indicators.

We deliver a modular FWA course through our web-based learning platform as part of our overall compliance training that meets federal, State, and local requirements. Course topics and knowledge checks include information security; reporting security concerns; employee misconduct; Medicare compliance; duplicate billing; False Claims Act and whistleblower protections; medical coding, including miscoding, upcoding, and unbundling; overutilization; member safety; and services not rendered. We update the curriculum periodically to reflect changes in FWA rules, regulations, policies, and laws. The Compliance team monitors attendance to assure all employees complete courses in accordance with Model Contract, Section 2.20.2.2.4.1.

We require SIU investigators to attend 10 hours of continuing education each year, including local events and trainings hosted by AAPC. Our investigators have access to industry-wide resources, such as the NHCAA, AAPC, Blue Cross Blue Shield Association (BCBSA), ACFE, and internal resources including Medical Directors and claims coding professionals. Training occurs through a variety of methods, including seminars, conferences, external webinars, and our internal web-based learning system.

**Healthy Blue's Fraud Squad.** In 2021, the SIU team launched a workgroup, known as the "***Fraud Squad***," that includes member- and provider-facing staff from across the organization. Quarterly workgroup meetings focus on new and emerging FWA issues and offer training on detecting and referring potential FWA. Workgroup members serve as liaisons and report back to their departments. In this manner, departments across the organization are continuously engaged and mindful of FWA.

***We have heightened our focus on prescription drug misuse by launching a quarterly pharmacy workgroup focused on opiate and stimulant prescribing and pharmacy-related FWA***, which includes data mining initiatives to identify cases of potential over-prescribing. In this workgroup, our SIU team members and pharmacy director discuss new and emerging pharmacy misuse trends and review top opioid and stimulant prescribers for the Louisiana Medicaid market.

**Training Providers and Subcontractors.** For providers and subcontractors, we offer information about FWA through multiple channels, including monthly newsletters; focused Fraud Prevention Week initiatives; provider orientation and bulletins; and well-publicized reporting channels, such as our Compliance Hotline and Healthy Blue member and provider websites that link directly to www.fighthealthcarefraud.com. Information regarding FWA is included in the member handbook, explanation of benefits (EOBs), and provider policies and procedures.

We currently employ an ***SIU Vendor Liaison*** as an educational resource and designated point of contact for subcontractors (vision, pharmacy, and transportation) regarding FWA. This individual, in concert with our SIU Manager, conducts an annual FWA roundtable with delegated vendor subcontractors. During this roundtable, the group shares examples of identification, investigation, and resolution of FWA cases and exchanges information with Healthy Blue on potentially fraudulent activity.

**Provider Education and Awareness.** Our provider manual and website include FWA reporting methods, examples (member and provider), and suggestions for prevention. Provider training, bulletins, newsletters, e-blasts, and fax blasts also offer provider education on FWA.

Through our online Healthy Blue Training Academy, we offer providers initial and ongoing FWA training sessions. Our Louisiana-based Provider Experience team often delivers in-person provider training with information tailored to address Louisiana-specific benefits and LDH requirements for all provider types. Providers receive initial training within 30 days of joining our network, and we offer additional training to individuals and groups through on-demand/online resources and direct outreach by Healthy Blue staff on an ongoing basis. FWA education includes definitions and examples; reporting and investigation procedures; possible actions and outcomes; prevention (verify member identity, provide proper documentation, and bill accurately); and where to find more information, such as the provider manual and website.

In 2020, we sent 5,025 educational letters to Healthy Blue Louisiana providers with a heavy emphasis on the top five provider education concepts, as shown in Table 2.6.14.1-1. These efforts resulted in State savings of more than $2.5 million in 2020.

Our Provider Experience team also delivers provider education through virtual or in-person meetings as needed. In May 2021, we focused provider training on areas that are high risk for fraud: “tele-fraud,” DME, COVID-19 fraud, lab schemes, “incident to” billing, and prescription drug fraud (opioids and pill mills).

## 2.6.14.1.2 How Healthy Blue Engages Enrollees in Preventing FWA

Healthy Blue uses multiple methods to engage and educate members on FWA prevention. Upon enrollment, we provide a welcome packet with a welcome newsletter; ID card that includes telephone number to report FWA; and member handbook, which highlights the www.fighthealthcarefraud.com website. We also share educational videos in both English and Spanish on Healthy Blue’s dedicated FWA web page. Members can report FWA by calling the toll-free Member Services number listed on their ID card, the website, and member handbook. In addition, members may view their claims in the member portal and detect potential FWA.

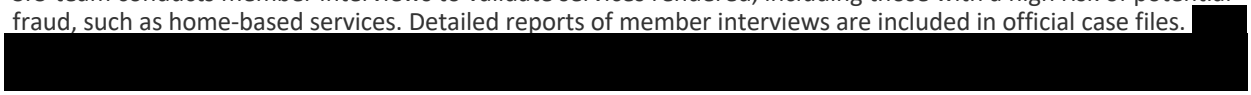
We rely on collaboration of all stakeholders to have the most meaningful impact. For example, we ran a Drug Take Back Day campaign on prescription drug safety in collaboration with local task forces. Thousands of pounds of drugs were taken back; this has a direct impact — decreasing street crime and improving the overall safety and well-being of Louisiana communities. Louisianians may also safely get rid of medications year-round. Through a partnership with BCBSLA, Louisiana Attorney General Jeff Landry’s office, National Association of Drug Diversion Investigators, and law enforcement offices, drug drop boxes are available in multiple parishes statewide.

In April 2020, BCBSLA ran a campaign to coincide with tax season, when there are higher rates of scam activity. In addition, BCBSLA’s Medicare Medical Director, Dr. Larry Simon, was featured in a content series with The Advocate in April 2020, in which he discussed how to be more aware of scams and fraud. Based on the success of the campaign, Healthy Blue is leveraging its partnership with BCBSLA to continue an ongoing tax season educational program for Healthy Blue members will be utilizing this same campaign, targeted to LA Medicaid Enrollees, in the new contract.

Healthy Blue is proud of the work we do to engage members. We distribute fraud hotline posters and conduct numerous campaigns throughout the year. For example, we held a Seniors and Lawmen Together (SALT) food and resource distribution event. Additional examples of best practices Healthy Blue will look to incorporate in the new contract includes variations of the following campaigns:

- **Elders Support Playlist on Blue Cross and Blue Shield of Louisiana YouTube Channel.** Original videos to raise awareness of FWA potential among adults 65+, who are most likely to be targeted
- **Be Wary of COVID-19 Scams.** Produced April 2020
- **How to Avoid Healthcare Fraud.** Produced April 2020 (updated Q1 2021 to address new information)
- **Avoiding Fraud.** Video produced March 2021 in partnership with FBI
- **Blue Cross Reminds Louisianians to Watch Out for Fraud and Scams.** April 2021
- **Don’t Be A Victim of Medicare Enrollment Fraud.** November 2020
- **Blue Cross Reminds Louisianians to Prevent Abuse by Disposing Safely of Prescription Drugs.** October 2020
- **Fraud Alert: Scammers Sending Fake 'HIPAA Compliance' Postcards.** August 2020

In accordance with Model Contract, Section2.20.2.2.10, we send EOBs to a sample of members with an accompanying letter asking them to notify us if they did not receive the listed service. During investigations, the SIU team conducts member interviews to validate services rendered, including those with a high risk of potential fraud, such as home-based services. Detailed reports of member interviews are included in official case files.



## 2.6.14.1.3 Sophisticated Data Analytics Help Combat FWA

We employ sophisticated and flexible data analytic algorithms for fraud prevention (proactive) and detection (reactive). We apply a customized set of data analytic algorithms across the claim lifecycle — during adjudication and pre- and post-payment. We detect irregular and inconsistent behaviors using coding software, FWA analytics, and our internal, proprietary healthcare analytics. Our data mining tools and methods enable discovery of payment integrity issues, investigative leads, and new research areas through statistical and machine learning models. Predictive modeling tools can analyze provider claims and billing practices against peers and detect instances not specifically restricted to CPT® codes.

Our Anomaly Detection is a suite of proprietary advanced models that predict and flag suspicious trends in provider billing patterns. Shown in Figure 2.6.14.1-2, these models review and analyze data to identify high-risk areas that were previously undetected. For example, the Triage team, staffed with registered nurses, CPCs, and employees with investigative experience, uses Anomaly Detection models to generate provider and concept-based leads to the SIU. Provider Education uses Anomaly Detection models as one of the sources to identify providers with aberrant billing trends and teach correct usage of coding guidelines, billing policies, and claim editing logic.

Monthly reporting and analysis support lead generation and verification related to potential provider fraud and abuse. A dashboard for the investigation team displays 13 months of rolling data and supports sorting, filtering, and drill-down analysis on parish, city, provider tax ID, and top procedure codes. Viewing a summary of any provider's billing history, including changes and peer comparisons, is a key part of the investigative process and strategy to detect and prevent provider fraud and abuse that has led to the identification of major areas of waste and abuse, like overutilization of respiratory viral panel tests, highlighted in the case study in Figure 2.6.14.1-3.

This example demonstrates how we compared Louisiana's expenditures on CPT code 87633 with Anthem's other markets to help identify abuse and raise the issue to LDH. This policy change will result in savings to the whole Louisiana Medicaid program.

### SUCCESS IN IDENTIFYING OVERPAYMENTS

Healthy Blue has identified over $1.6 million in overpayments in the first half of 2021, which exceeds overpayments identified by any other MCO.

**2021 SIU Overpayments by Plan**

*Data through 6/30/21*

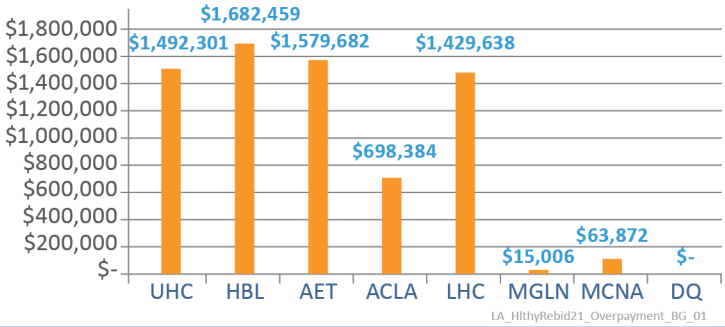


*Figure 2.6.14.1-3. Case Study on Overutilization of Respiratory Viral Panel Tests*

**HEALTHY BLUE'S DATA MINING CAPABILITIES AND ADVANCED DATA ANALYTICS LEAD TO POLICY CHANGE**

Prior to onset of the COVID-19 pandemic, Healthy Blue's SIU team discovered through data-mining that there were extreme expenditures for the Louisiana Medicaid market related to respiratory viral panel (RVP) tests, specifically code 87633. CPT® code 87633 is defined as "Infectious agent detection by nucleic acid (DNA or RNA); respiratory virus (for example, adenovirus, influenza virus, coronavirus, metapneumovirus, parainfluenza virus, respiratory syncytial virus, rhinovirus) includes multiplex reverse transcription, when performed, and multiplex amplified probe technique, multiple types of subtypes; 12-25 targets." 87633 is the highest level of RVP test, and the frequency that this code was billed far exceeded the frequency of the lower level tests — 87632 (6–11 targets) and 87631 (3–5 targets).

The RVP tests for respiratory viruses, but in Louisiana, the most frequently used brand also tests for three bacteria in addition to the viruses. Providers were billing for the highest level RVP plus the three bacteria as separate charges. Anthem, as well as many other large payers, has a clinical UM guideline stating that RVP testing in the outpatient setting is considered not medically necessary unless they are limited panels involving five targets or fewer. Testing is for individuals who are at high risk for complications of respiratory viral infection including, but not limited to, individuals who are immunocompromised (for example lung transplant recipients); the results of the testing will be used to guide or alter management.

This policy was not adopted by Healthy Blue because we are not allowed to be more restrictive than the state for our clinical guidelines.

Healthy Blue's SIU team escalated these concerns to our medical director and other plan executives, who began working with LDH to demonstrate the vast abuse of billing around RVP tests, many of which were determined through record review to not be medically necessary and were not evidenced to impact medical decision-making or patient care. Through collaboration with LDH and with other MCOs, in March 2021, LDH changed their policy on RVP tests and no longer covers 87633.

Our investigation of RVP tests began in the summer of 2019, well before the COVID-19 pandemic. In the midst of the pandemic, we saw utilization and abuse of this code increase. Many of the tests being performed (depending on the brand and complexity of the test) did not test for COVID-19 as a target. As LDH worked to make changes to stop the abuse of this code, careful consideration was given to both potential member and provider impact. LDH offered guidance to providers on which codes were appropriate to bill when testing for COVID-19.

For Healthy Blue, **this policy change will result in millions of dollars in savings**, which is just now starting to be realized.

LA_HlthyRebid21_2.6.14_DataMining_50_COB_03

## 2.6.14.1.4 Methods Healthy Blue Uses to Identify High-risk Claims

Healthy Blue defines high-risk claims as those that signal aberrant data or deviations away from the mean (for example, a high dollar claim, an unusually high claim volume, or spikes in claim submittal behavior). We use multiple methods to analyze claims based on risk populations and risk dimensions to identify potential high-risk claims and aberrant data. Our Fraud and Abuse Management System looks at the number of standard deviations away from the mean on any data point. We review providers' claim payment history to assess risk level and likelihood of an incorrect claim request.

We determine risk indicators based on several factors, including high dollars, claim volume, spikes, and trends in claim submittal behaviors. We place extra scrutiny on high-risk claims to identifying any improper payments. We review all risk-identified providers and use our risk indicators to determine what action(s) to take.

Actions may include a recovery request, placing a provider on prepay review, or if deemed potential fraud, we will open a case. This analysis is performed across the claims' lifecycle — during and post-adjudication and pre- and post-payment.

During adjudication, claims meeting identified criteria, such as high dollar claims and those that require Operations Expert review, route to specific queues for manual review and adjudication. Prior to payment, we execute more than 120 algorithms that search claims for identified concepts, including providers on PPR. Post-payment data mining algorithms, such as Anomaly Detection, identify suspicious billing patterns.

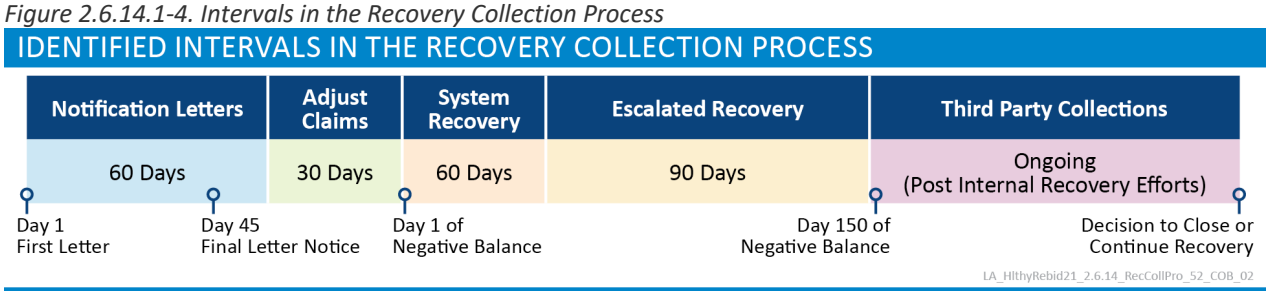
PI leverages experience from our affiliates across the country to establish concepts that define dimensions of a claim that increase risk level. Dimensions include dollar amounts and modifier/coding trends consistent with historical issues and may change and evolve as new threats and fraud schemes are identified.

## 2.6.14.1.5 Healthy Blue's Experience with Provider Recovery Collection

[redacted]

Our processes assure we only pursue one recovery concept for any overpaid claim line. If a provider is under investigation by SIU, we put a hold on other overpayment recovery efforts. Figure 2.6.14.1-4 shows a provider recovery timeline that documents actions we take at specified intervals after identification of overpayment.

*Figure 2.6.14.1-4. Intervals in the Recovery Collection Process*



Healthy Blue complies with State laws requiring encounter voids for claims identified as FWA overpayments.

If the provider submits a written response to the recovery notification letter, the sending team carefully reviews the information submitted. Within 30 days, the team determines if the facts justify recoupment and mail written notice of determination to the provider. If overturned, recovery efforts cease, and money recovered is reimbursed. If upheld, the provider may file a second appeal and recovery efforts continue. If we are unsuccessful in recovering funds or a negative balance remains after third party collection efforts, we close the case or continue recovery.

Regular reports and a monthly meeting help us monitor provider recovery collection efforts, including prior month and year-to-date dollars recovered, as well as pipeline information on cases at each phase of the recovery life cycle. We review providers and associated claims identified for recovery before provider notification. This review step confirms accuracy of overpayment and keeps leadership and Provider Services informed.

## 2.6.14.2 Healthy Blue's Capabilities to Produce Required FWA Reports

Meeting LDH reporting requirements in Model Contract, Section 2.20.5 while delivering meaningful information to support LDH review and analysis requires the right combination of capabilities, data and tools, resources, and quality controls. We report any FWA incident or notice concerning individuals or entities within three business days. Monthly reports to LDH include tips, audits, and complaints to the Compliance Director, overpayments identified and recovered, and FWA activities. We understand LDH reporting requirements and the operational commitment they require. As such, Healthy Blue will continue to:

- Promote reporting accuracy by applying consistent edits to incoming data and carefully monitor processing

- Use organized and structured databases and data warehouses to support reporting and analysis
- Provide data analytic tools companywide to format, aggregate, and report consistent and accurate data
- Leverage the reporting and data analysis experience and resources of national support services and our affiliates to expedite report deployment and create more meaningful reports

## Meeting Reporting Requirements Requires People, Tools, and Data

PI Business Analysts and technical staff support our ability to generate FWA reports. Dedicated regulatory compliance staff compile reporting metrics to assure robust and accurate report generation. Direct access to resources helps Healthy Blue respond quickly and efficiently to reporting needs and adapt to future changes. Employees have industry-leading software and tools at their disposal for data access and report development. These tools, combined with access to databases that contain demographic, service, utilization, and quality data, provide powerful reporting and analytic capabilities to meet LDH reporting needs.

**A Key Resource is the Operational Data Warehouse (ODW).** The ODW is a copy of transactional data specifically configured to support complex analytical and ad hoc queries using business intelligence tools. The ODW is an integrated repository fed directly from our Core Service Platform to deliver data quality, control, and consistency. The ODW also houses data from external sources, including encounter data from our transportation and vision subcontractors. In the new contract the ODW include encounter data from our pharmacy subcontractor. PI maintains additional systems to track specific activities, including tips, SIU investigations and PPR, provider overpayment recovery collections, and audits.

Understanding how important reporting is to LDH, we created a monthly meeting to review all PI reporting responsibilities. This meeting covers reporting changes, template questions from data contributors, and State responses on previously submitted reports. Either the primary owner or backup from each area participates in meetings (for example, Provider Education, SIU, CPI, Credentialing, Appeals, and Prepay Edits). We send an automatic alert that includes the most recent template, with completion and documentation instructions, to all primary business owners and backups 21 days prior to the State due date. Prior to submission, all contributors review and approve the final report.

## Proposed Innovations for Reporting PI Data

Healthy Blue proposes to implement a Change in Behavior savings report as a new innovation for reporting PI data. A Change in Behavior savings report will track cost-saving measures that are not currently reported in the PI 145 report. The extrapolation of savings is determined from when a behavior was noted until the end of the calendar year. For example, if a doctor started charging a higher rate than allowable in March and after education the behavior changed, the savings incurred would be from March to December. Our other Healthy Blue affiliates monitor SIU provider change in behavior due to direct SIU education, administrative actions, or further SIU contact with the provider that may influence the provider's billing behavior. After these provider interactions, we track behavior change and report cost avoidance savings quarterly. Adding Change in Behavior savings reporting is an innovative method to capture additional cost avoidance impacts, giving MCOs and LDH broader insights into all PI cost avoidance efforts in Louisiana. An example is provided in Table 2.6.14.2-1.

## Creating Bike- and Pedestrian-friendly Communities Through the Stroll into Safety Program

The Stroll into Safety program educates children, caregivers, and community members about the importance of pedestrian and bicyclist skills, the rules of the road, personal safety, and improving health and environmental conditions. This program is designed to bring attention to bike and pedestrian safety issues in the Greater Baton Rouge Area to create safer and more bike- and pedestrian-friendly communities. The program offers classroom presentations, bike rodeos, safety towns, community education events, and bike/pedestrian school events.

# 2.6.15

## Physical and Specialized Behavioral Health Integration Requirements

Healthy Blue

## 2.6.15 Physical and Specialized Behavioral Health Integration Requirements

***Healthy Blue is committed to providing our Louisiana members with the highest quality of integrated physical health (PH) and behavioral health (BH) supports, including services for both mental health and substance use disorders (SUD).*** Since 2015, Healthy Blue has successfully developed and sustained a culture that supports the values of integration, information sharing, education, and training within the context of a whole-person approach under the leadership of ***Cheryll Bowers-Stephens, MD, MBA, our Healthy Blue BH Medical Director and Raymond Poliquit, MD, FAAP, our Chief Medical Officer***. The evolution of our integrated care approach at the provider network level is illustrated in Figure 2.6.15-1.

Our approach is value-based and built upon the principles of person-centered planning, focusing on the needs and vision of members, caregivers and families, and the community. The model incorporates the move from fee-for-service reimbursement to Value-Based Payment arrangements to promote full integration at the service level (primary care and specialized BH providers). Healthy Blue has benefited from the support that our parent company, Anthem, Inc., has brought to Louisiana — support that is backed by 25 years of BH service experience across our affiliates, currently in 25 Medicaid markets with more than 9.7 million members receiving integrated BH and PH care. Healthy Blue is a fully integrated managed care organization as it relates to its organizational and operational functions; under a unified organization, Health Care Management is fully integrated. This fully integrated team is supported by clinical and administrative rounds and clinical documentation systems that present data reflecting the whole health status of members.

## 2.6.15.1 Healthy Blue's Fully Integrated Care Model

The Healthy Blue integrated model is evidence-based, incorporating practices developed over time. It also incorporates the SAMHSA-HRSA framework for levels of integrated healthcare, the biopsychosocial model for understanding a members clinical condition, the four-quadrant model for case management assignments which categorizes risk and complexity by quadrant, the Harold P. Freeman Model of Navigation for community navigation, and the University of Washington Collaborative Care model for addressing chronic conditions and BH conditions in the primary care setting. ***For more than six years, Healthy Blue has employed this integrated care model to address the needs of its members suffering from health disparities, including their needs related to comorbid chronic conditions, mental health issues, and SUD problems.*** The synergistic use of these models has resulted in a [redacted] Our Care Management team works as one united group in our **Elevate | Population Health** approach focusing on everything affecting a member, including PH, BH, and social determinants of health (SDOH), to drive quality outcomes. ***We identify, engage, and support members by breaking down barriers to focus on what is most important and impactful to the member.*** [redacted]

[redacted]

### Integrated Collaborative Care Model

[redacted] Further, ICCM incorporates the Harold P. Freeman Model of Navigation and best practices related to SDOH interventions.

[redacted]

[redacted]

## Evidence-based Practices Incorporated into the Healthy Blue Integrated Care Model

Our integrated healthcare approach incorporates a variety of evidence-based models to support coordination among providers, co-location, delivery system transformation, and other program activities in addition to the evidenced-based models noted previously. These models and practices are specifically designed for individuals with comorbid chronic PH and BH conditions, facilitating clinical Case Managers and practitioners to identify and address the individual, unique needs of each member.

**Care Management.** Our Care Management team is composed of highly qualified PH and BH clinicians and support staff (including peer support, Community Health Workers [CHWs], liaisons) who are trained and licensed (where applicable) to address members' whole health needs. The team provides fully integrated care coordination using their local knowledge of Louisiana providers, community resources, and systems of care to address member needs. The Healthy Blue integrated care teams work diligently to develop and implement solutions and interventions to address the unique PH, BH, and SDOH needs of members.

**Population Health Management of Comorbid Disorders.** We continue to offer options for any combination of the following conditions, often prevalent in our Louisiana membership: pregnancy, preconception health, and neonatal intensive care; coronary artery disease; schizophrenia; diabetes; congestive heart failure; major depression in children and adolescents; HIV/AIDS; and asthma. Our protocols, standards, and materials for these accredited programs use the NCQA model that includes keeping members healthy, managing members with emerging risk, maintaining member safety, managing multiple chronic illnesses, and evaluating outcomes across settings. Our Chronic Condition Management programs serve as an adjunct to our integrated Care Management team.

[redacted]

COMING IN 2021:
CONCIERGE CARE FOR MEMBERS WITH CHRONIC HEART FAILURE

Healthy Blue is pleased to introduce Concierge Care, a dynamic, person-centered member-facing app that helps to connect members to our care management team. Through this evidence-based program, care managers will be able to interact and collaborate with members, providing highly personalized educational content, bi-directional chat and supporting members to manage their symptom.

LA_HlthyRebid21_ConciergeCare21_COB_03

[redacted]

## Training for Mental Health Parity Compliance

Healthy Blue follows the lead of our parent organization, Anthem, by prioritizing the parity of mental health (MH) and SUD services, jointly considered BH services. Our prior authorization, medical necessity criteria, network policy, and procedures comply with the federal Mental Health Parity and Addiction Equity Act (MHPAEA) of 2008 and 42 CFR Part

438 Subpart K. Criteria for medical necessity determinations for BH benefits to any member, potential member, or provider. These policies and procedures are available on our website and by request per 42 CFR §438.236(c) and 438.915(a). We adjust services and subcontractor relationships as needed to remain in compliance with LDH parity reviews. Healthy Blue also participates in Anthem's Parity Governance Committee, which reports to the Medical Compliance Committee. This committee supports our individual health plan efforts and gives us oversight and guidance in sustaining compliance with the MHPAEA. We follow the LDH guidelines for parity and incorporate the philosophy of these guidelines to recognize BH services as equivalent to PH services as an integration touchpoint for our care management model. Our training and education curriculum for employees, providers, and stakeholders assures there are no qualitative or quantitative differences in how we apply utilization management (UM) and case management delivery of BH services, facilitating compliance with the MHPAEA.

### Training for Healthy Blue Employees

All Healthy Blue employees, clinical and non-clinical, receive training regarding our fully integrated model and how the model supports parity in healthcare. This training begins during onboarding and continues through ongoing refresher trainings and training specific to each employee role. Clinical employees receive training that is designed to promote the best clinical practices for trending BH and PH issues and support parity in the provision of services to address those issues. Our Case Managers are cross-trained in PH and BH care to facilitate a whole-person view of each member, including what barriers, such as stigma regarding BH conditions and treatment, are impacting the member's willingness and ability to access care. For example, we provided training on the person-centered approach and the biopsychosocial model to our employees to enhance their understanding of our integrated model. We take every opportunity to incorporate education and training in the day-to-day activities of our employees. When our Case Managers attend training sessions on topics such as healthcare equity, stigma, and other topics that are related to BH parity and care integration, they share what they have learned with the rest of the team in their weekly huddle sessions. [redacted]

### Training for Providers and State Agency Partners

**Healthy Blue Training Academy.** Our Academy for providers offers multimodality training to(1) advance the goals and objectives of Healthy Blue and LDH and meet the requirements of the MHPAEA; (2) support provider understanding of the issues involved in parity, similar to those topics provided to employees(3) facilitate provider support of members and delivery of equitable care. Training topics include integrated care to address member PH and BH needs; population health management, including populations with Special Health Care Needs (SCHN); SDOH; and others designed to assist provider compliance with all contract requirements and meet quality and parity standards. Screening, Brief Intervention, and Referral to Treatment (SBIRT), BH Services HEDIS® Measures, Provider Quality Monitoring, and more – with on-demand and live webinar options. In the first and second quarters of 2021, nearly 300 providers took advantage of these virtual training opportunities while being able to earn CEU's

**DCFS Staff Trauma-informed Systems Training.** This training is provided in conjunction with Southern University School of Social Work trained in person 487 DCFS child welfare professionals (line workers, supervisors, and program managers) throughout the state who serve as guardians supporting our members. This training helps to decrease the health inequities that children in state's custody may face.

**BH Evidenced-based Training.** ***We have offered PTSD and trauma-informed care training through Tulane University*** to 40 network providers. In addition, we have trained in one-and-a-half day trainings 40 providers **Peer Navigators in the Harold P. Freeman Model of Navigation and Person-centered Planning.** To date, nine providers have been certified in [redacted]

## 2.6.15.2.1 Detection and Treatment of BH Disorders

Healthy Blue engages members where they are, with early and proactive identification of member needs, removing barriers, and connecting them to benefits and services. Provider feedback shapes critical areas of focus such as integration, maternal health, adverse childhood experiences (ACEs), HIV, and rural health. Healthy Blue uses predictive analytics and person-to-person assessment of each member's needs. Our VBP programs incentivize providers to participate in the proactive identification of BH conditions, notably opioid use disorders (OUDs), using best practices to screen members and provide appropriate treatment. [redacted]

[redacted]

**SBIRT.** SBIRT is a best practice, generally administered in PCP offices, that provides a comprehensive, integrated, public health approach to screening and early intervention for individuals with risky alcohol and drug use. We make information available to providers so that they can refer to treatment after a positive screen. Our Case Managers, Community Navigators, and Member Services team are also available to assist with referrals to a comprehensive array of SUD services.

[redacted]

**Increased Capacity of Medication Assisted Treatment (MAT).** Healthy Blue has been increasing the number of available providers, including PCPs, who can provide MAT to members who present with conditions that could benefit from this treatment modality. MAT is an evidence-based treatment for certain SUDs, including OUDs. From 6/2019 to 3/2021 Methadone treatment increased from 6% to 12.9% (doubled), from 9/2016 to 3/2021 Buprenorphine increased from 12% to 19.6% (65% increase); Use of naltrexone increased more than doubled, from 0.6% in 9/2016 to 1.5%.

[redacted]

## 2.6.15.2.2 Coordination of Care for PH and BH Disorders and Care Transitions

Healthy Blue follows a framework for facilitation of transitions that is driven by the specific needs of members in targeted situations and populations. We evaluate individual member needs and deploy the resources and interventions to facilitate effective, safe transitions. Our Care Management team and Navigators work together to

facilitate successful discharge planning at the time of admission, so that members have the services and supports they need to continue the recovery that began in the hospital. Our primary goal is to prevent a return trip to the hospital by connecting members to the care, support, and resources they need to recover in the least-restrictive setting timely, and making sure they understand their discharge plan, risks, and medication directions.

[redacted]

**Supporting Individuals Who Are Justice-involved.** [redacted]

[redacted]Our designated Case Manager, who is trained in both behavioral and PH conditions, coordinates care for a member upon discharge from incarceration. The Case Manager works with supports within the prison system to make sure that the member receives all necessary services once released. The services that the member is connected with include pertinent PH and BH appointments, transportation, medication, community supports, and housing. Upon enrollment into case management services, the staff with the prison system are including in the multidisciplinary care team to assist with assessment completion and creation/ updating of the plan of care.

**Concurrent Reviews.** We conduct concurrent reviews for inpatient and residential care if the provider and member determine that treatment should continue beyond initial authorization. The Case Managers engage case coordination of complex case management and discharge planning for placement authorization and medications, as needed. Reviewers assess member progress and needs during the episode of care and coordinate before discharge to facilitate a smooth transition between levels of care or home and prevent delays in discharge caused by unanticipated care needs. If it appears that criteria are not met for continued services, we consult a Medical Director, who may meet with the provider to discuss the best supports, services, and level of care for the member.

**Post-discharge Management Program (PDM).** PDM Case Managers provide intensive support to members in care management to reduce 30-day readmission rates and to increase 7 day and 30 day follow-up rates, facilitating a smooth transition between inpatient and the home or other community setting. All members are assisted with discharge planning and follow-up to assure appropriate setup of outpatient care. Our Care Management team coordinates services such as PT/OT/SP, durable medical equipment needs, Home Health and Extended Home Health services, including setting short-term goals for transitions to the community and avoiding readmission. Contact begins prior to discharge and includes weekly calls for 30 days to be sure members complete post-discharge activities. This is essential to increasing the quality of care for our members and improving the health of our overall population.

## 2.6.15.2.3 Provider Incentives and Progress Tracking for Integration

[redacted]

[redacted]

## Assessing Provider Capacity to Integrate Care: Developing Plans to Build Capacity

We recognize that some providers may not be ready or technically capable of engaging in integrated care delivery. Therefore, continued performance improvement and accountability are rewarded for providers who progress toward advanced capabilities consistent with our vision. [redacted] Our strategy is to develop providers' integration efforts through consultative coaching, [redacted] that will enable providers to advance toward integrated care. We regularly assess providers to determine their progress, which includes self-assessments. We analyze the results, which are incorporated in reports and engage providers to address continued needs.

## Incentivizing Providers to Coordinate and Communicate

[redacted]

Healthy Blue will facilitate care compacts between PH and BH providers who are not part of interdisciplinary groups and share attributed members. Providers participating in the program who meet quality, service, engagement, access, and utilization goals will be eligible to receive incentive payments.

[redacted]

## Using VBP to Track Provider Progress and Evaluate Integration of PH and BH Care and SDOH

[redacted]

Consultative coaching with providers on how to progress and meet defined measures and key integration metrics will help us accomplish these goals. Quality measures are organized as a set, which requires a 2-point increase in composite score, year over year. This HEDIS measure set includes follow-ups after psychiatric hospitalization and ED admissions, monitoring members with comorbid cardiovascular disease and schizophrenia, antipsychotic medication adherence, pharmacotherapy for OUD, non-emergent ED utilization rate, and others.

[redacted]

[redacted]

## 2.6.15.2.4 Tools and Guidance for Providers to Facilitate and Improve Integration

[redacted]

### Scheduling Joint Appointments, Brief Assessments, Co-location, and Other Solutions

The Healthy Blue comprehensive virtual care delivery strategy includes multiple options for our PH and BH providers to coordinate care and refer their patients to services. Examples of our solutions include:

[redacted]

[redacted]

**Track Outcomes, Develop Shared Care Plans, Integrate Records, and Make and Follow Up on Referrals.** Healthy Blue Care Delivery Transformation Consultants assess the capabilities of our VBP providers and develop Transformation Action Plans to facilitate provider progress and capacity building to engage in integrated care delivery, including conducting assessments, integrating records, co-locating services, scheduling joint appointments, developing shared care plans which can be viewed and edited online, making appropriate referrals when necessary

and following up on those referrals, and tracking outcomes. Our consultants meet providers where they are and offer resources, tools, and supports to facilitate these integrated care capabilities.

## 2.6.15.2.5 Identifying Members with ED Admission and Assist with Follow-up

Outreach to members to encourage and support participation in preventive care leads to fewer avoidable ED visits. This outreach includes facilitating appropriate follow-up after an ED visit. [redacted]

### Scheduling Follow-up Care with PCPs and Appropriate BH Specialists

In addition to the identification and follow-up activities described previously for identified specialty sub-populations, Healthy Blue Intensive Case Managers and mobile crisis providers interface and coordinate care with EDs daily to identify members who require disposition assistance. We collaborate with community providers, inpatient facilities, and state agencies to facilitate disposition to an appropriate level of care, if indicated.

**Facilitating Follow-up for Children with BH Conditions.** The Healthy Blue Care Management team responds when a child member is admitted to the ED experiencing a BH crisis as soon as we are notified by the hospital, a provider, a family member, or a state partner. The Case Manager contacts the hospital representative to identify the best supports, services, and level of care recommended, and contacts the caregiver to provide contact information so we can begin transitioning the child to the new care setting. Healthy Blue recognizes the challenges Louisiana has encountered with youth waiting in ED's for appropriate services and supports. In response, Healthy Blue has implemented an ED surveillance program where our Case Managers will be alerted through an admit, discharge, and transfer (ADT) feed when our members experience an ED event.

[redacted] This service allows real-time patient care coordination for Louisiana healthcare providers and their partners and empowers subscribers to better coordinate care transition by improving communication between various providers and hospital settings. [redacted]

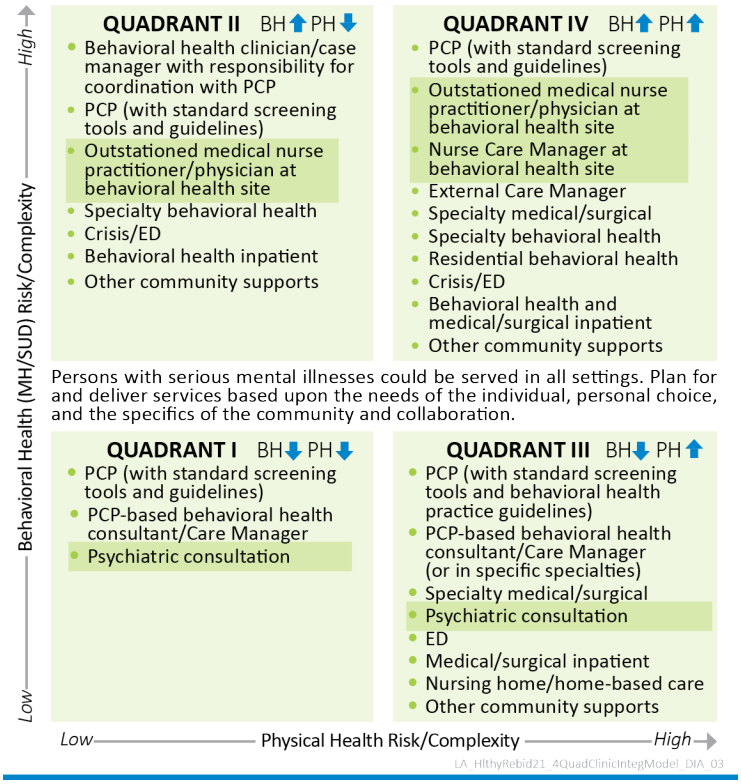
**ED Surveillance Report.** We also use the ED Surveillance Report to identify members who have visited the ED within the last 72 hours. The report is accessible daily, providing Care Management teams with timely notice for direct member outreach and engagement to follow-up care.

## 2.6.15.2.6 Continuity and Coordination of Care for Members with Specialized Medical Health Care Needs

Our fully integrated care management model is sensitive to BH issues and can readily facilitate the identification of members with co-occurring BH and PH needs who require enhanced healthcare services through [redacted] health needs assessments, or as members are screened and assessed by providers. We obtain consent after appropriate services have been identified so providers may know of a member's entire healthcare need – past, current, and emerging – so that we can provide the care each member requires. We also provide comprehensive resources and direction regarding the availability of services to providers so that they can make appropriate referrals, as indicated. Healthy Blue utilizes high-touch case management strategies through our CHWs, provider community navigator, and face-to-face case management visits to assure continuity of care from setting to setting assuring successful transition of members from nursing homes, correctional facilities, and other institutionalized care. As we identify a member who has screened positive for BH needs in primary or urgent care settings, our Care Management team members, including our field-based outreach specialists or CHWs, will coordinate with providers to support the level of care needed.

Our population health approach focuses on continuity and coordination of care for members in need of specialized services, including inpatient and outpatient care. We look at each member holistically and connect them to needed services. Healthy Blue has incorporated ***the National Council for Community Behavioral Healthcare's four-quadrant clinical integration model*** into our population health approach to assure that through our ICCM program, our providers have the infrastructure to fully support our members. [redacted]

### HEALTHY BLUE'S FOUR QUADRANT CLINICAL INTEGRATION MODEL



### Healthy Blue Emerging Risk Model to Assure Continuity and Coordination of Care

[redacted] These members are those we anticipate will have an increase in their healthcare needs and utilization within six months of identification and will need proactive outreach and case management to delay or avert onset or escalation of symptoms and comorbidities, including the need for specialized medical health services. [redacted] We proactively connect with, engage, and resolve member needs promptly, referring members who need BH services and following up to verify that care was accessed. Our model supports whole-person health by closing gaps in case, addressing social drivers of health, and educating members on prevention of high-risk factors associated with comorbid/co-occurring conditions. This model has been successful in improving member engagement.

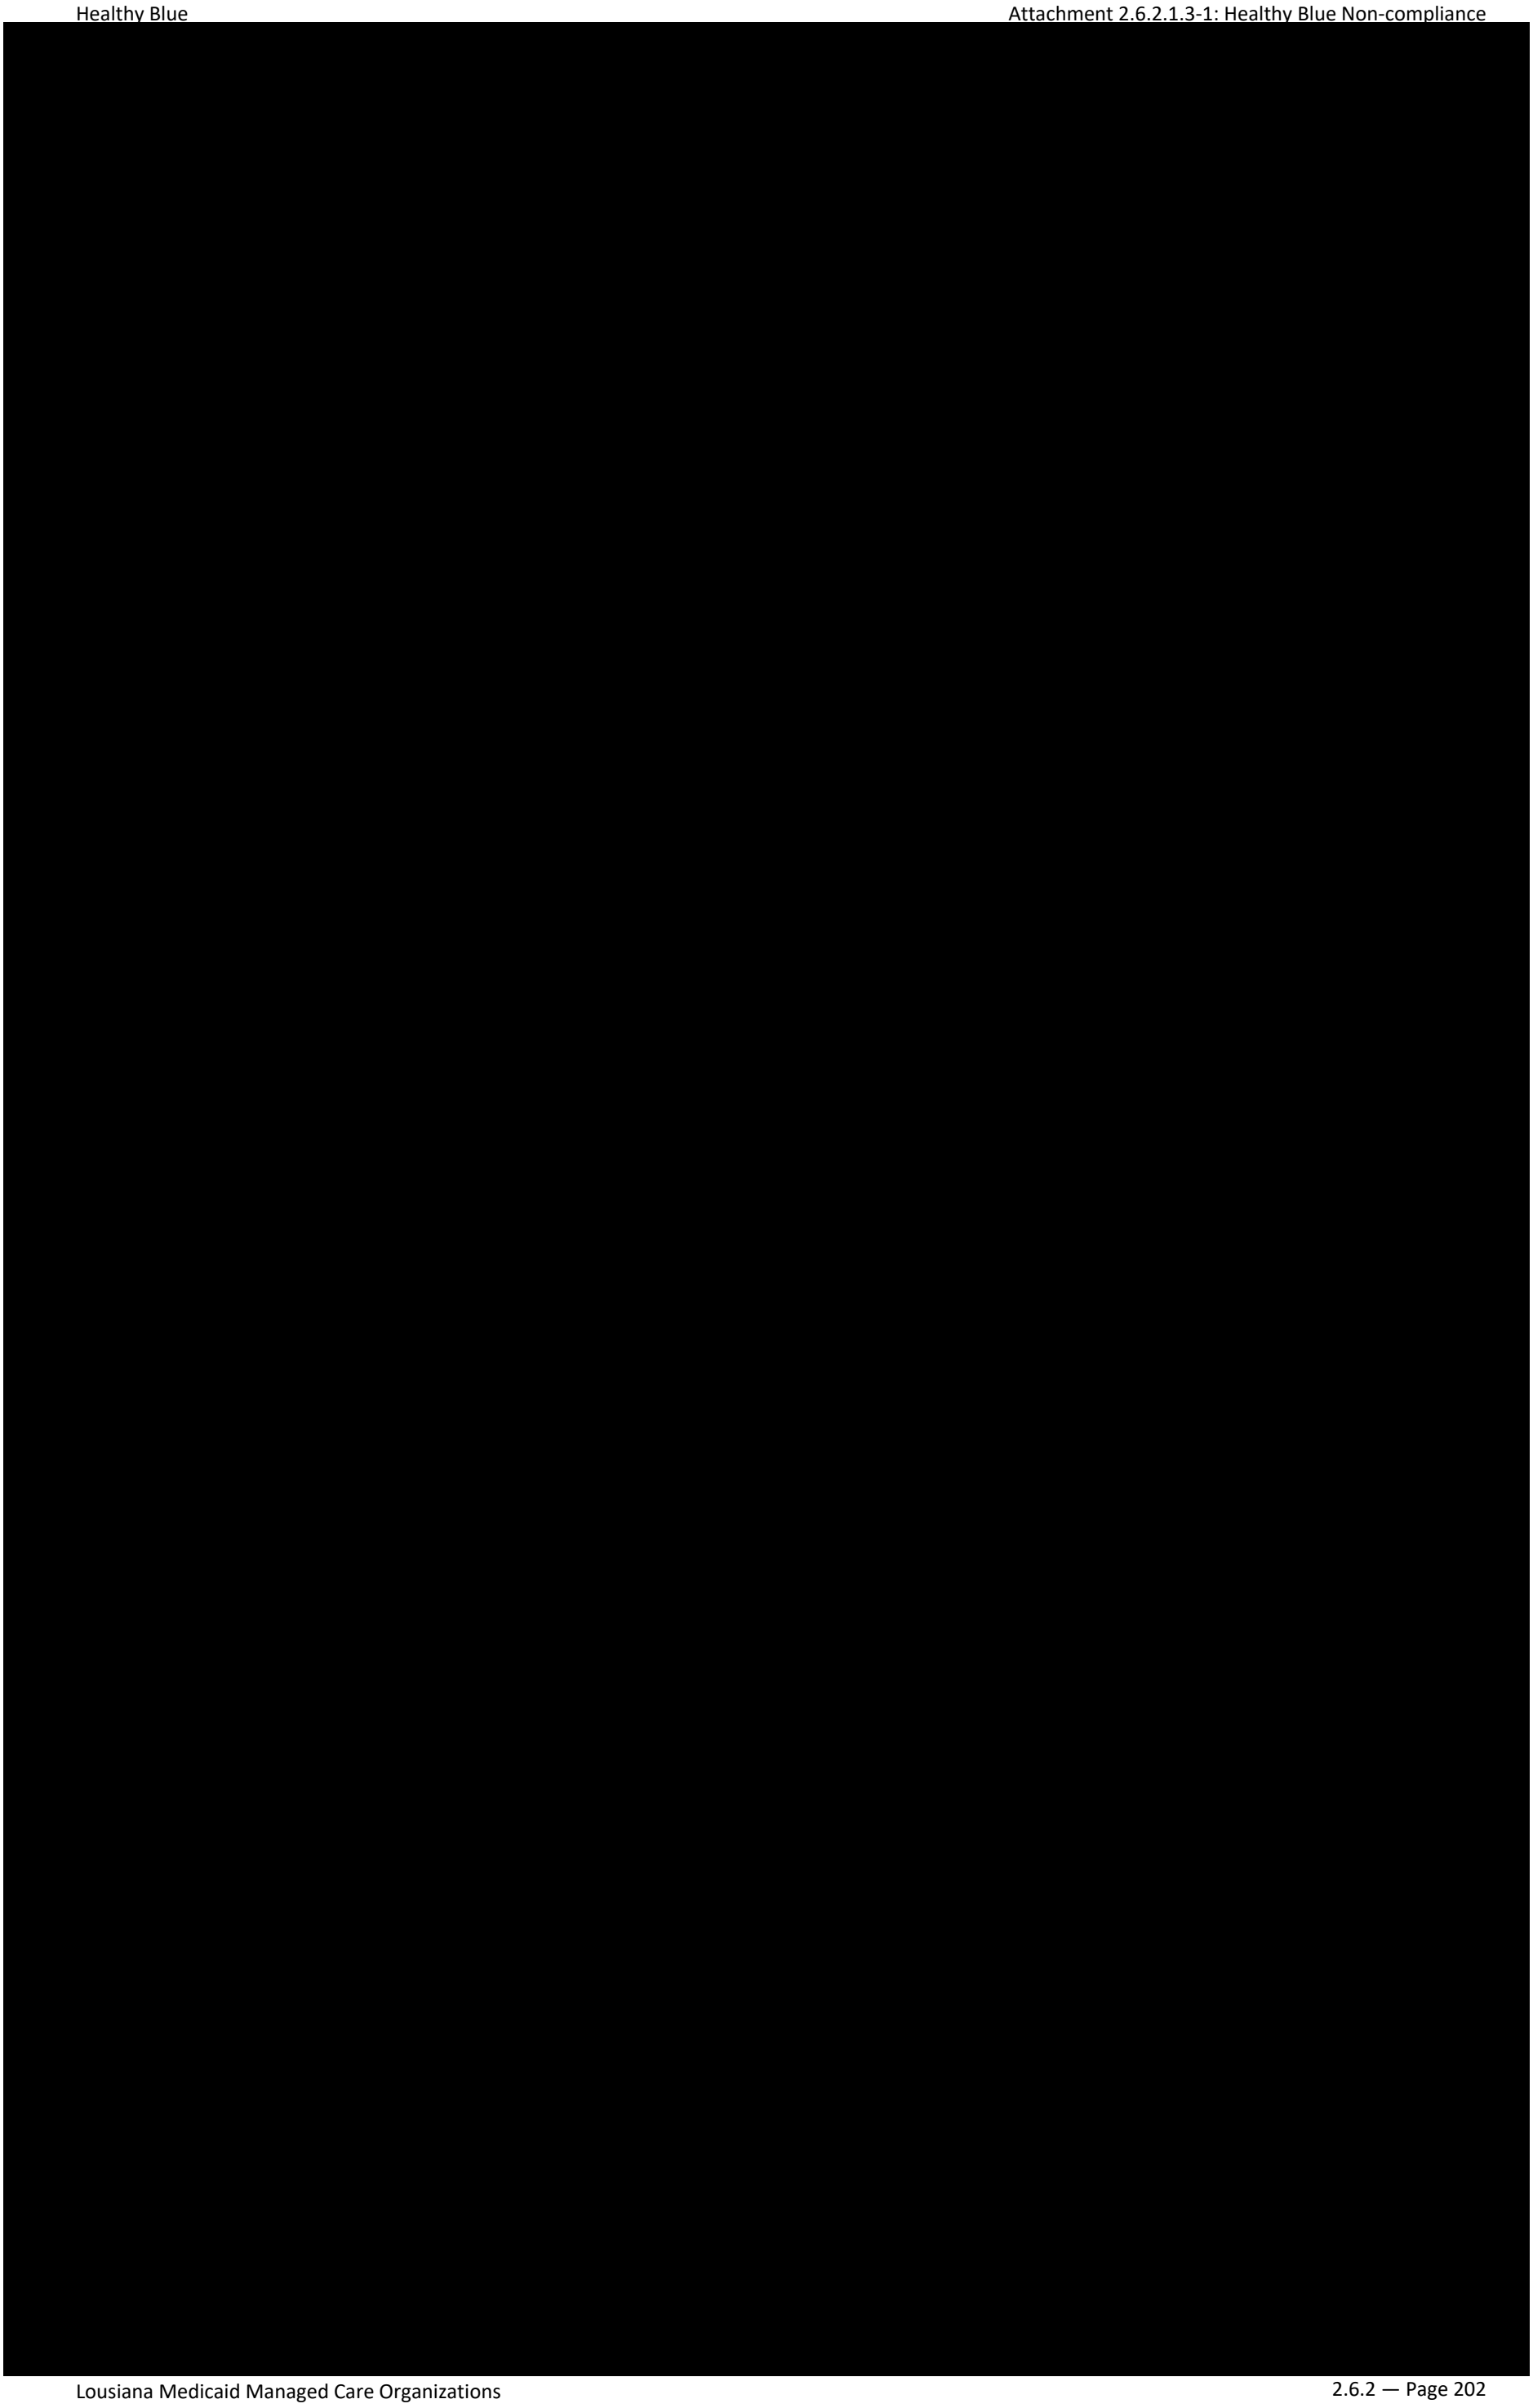
### Supporting Back-to-school Efforts by Donating School Supply Kits

Healthy Blue will donate more than 6,000 school supply kits this summer to youth across the state to support back-to-school efforts and learning. Since 2016, Healthy Blue has donated more than 30,000 school supply kits to local youth in Louisiana.

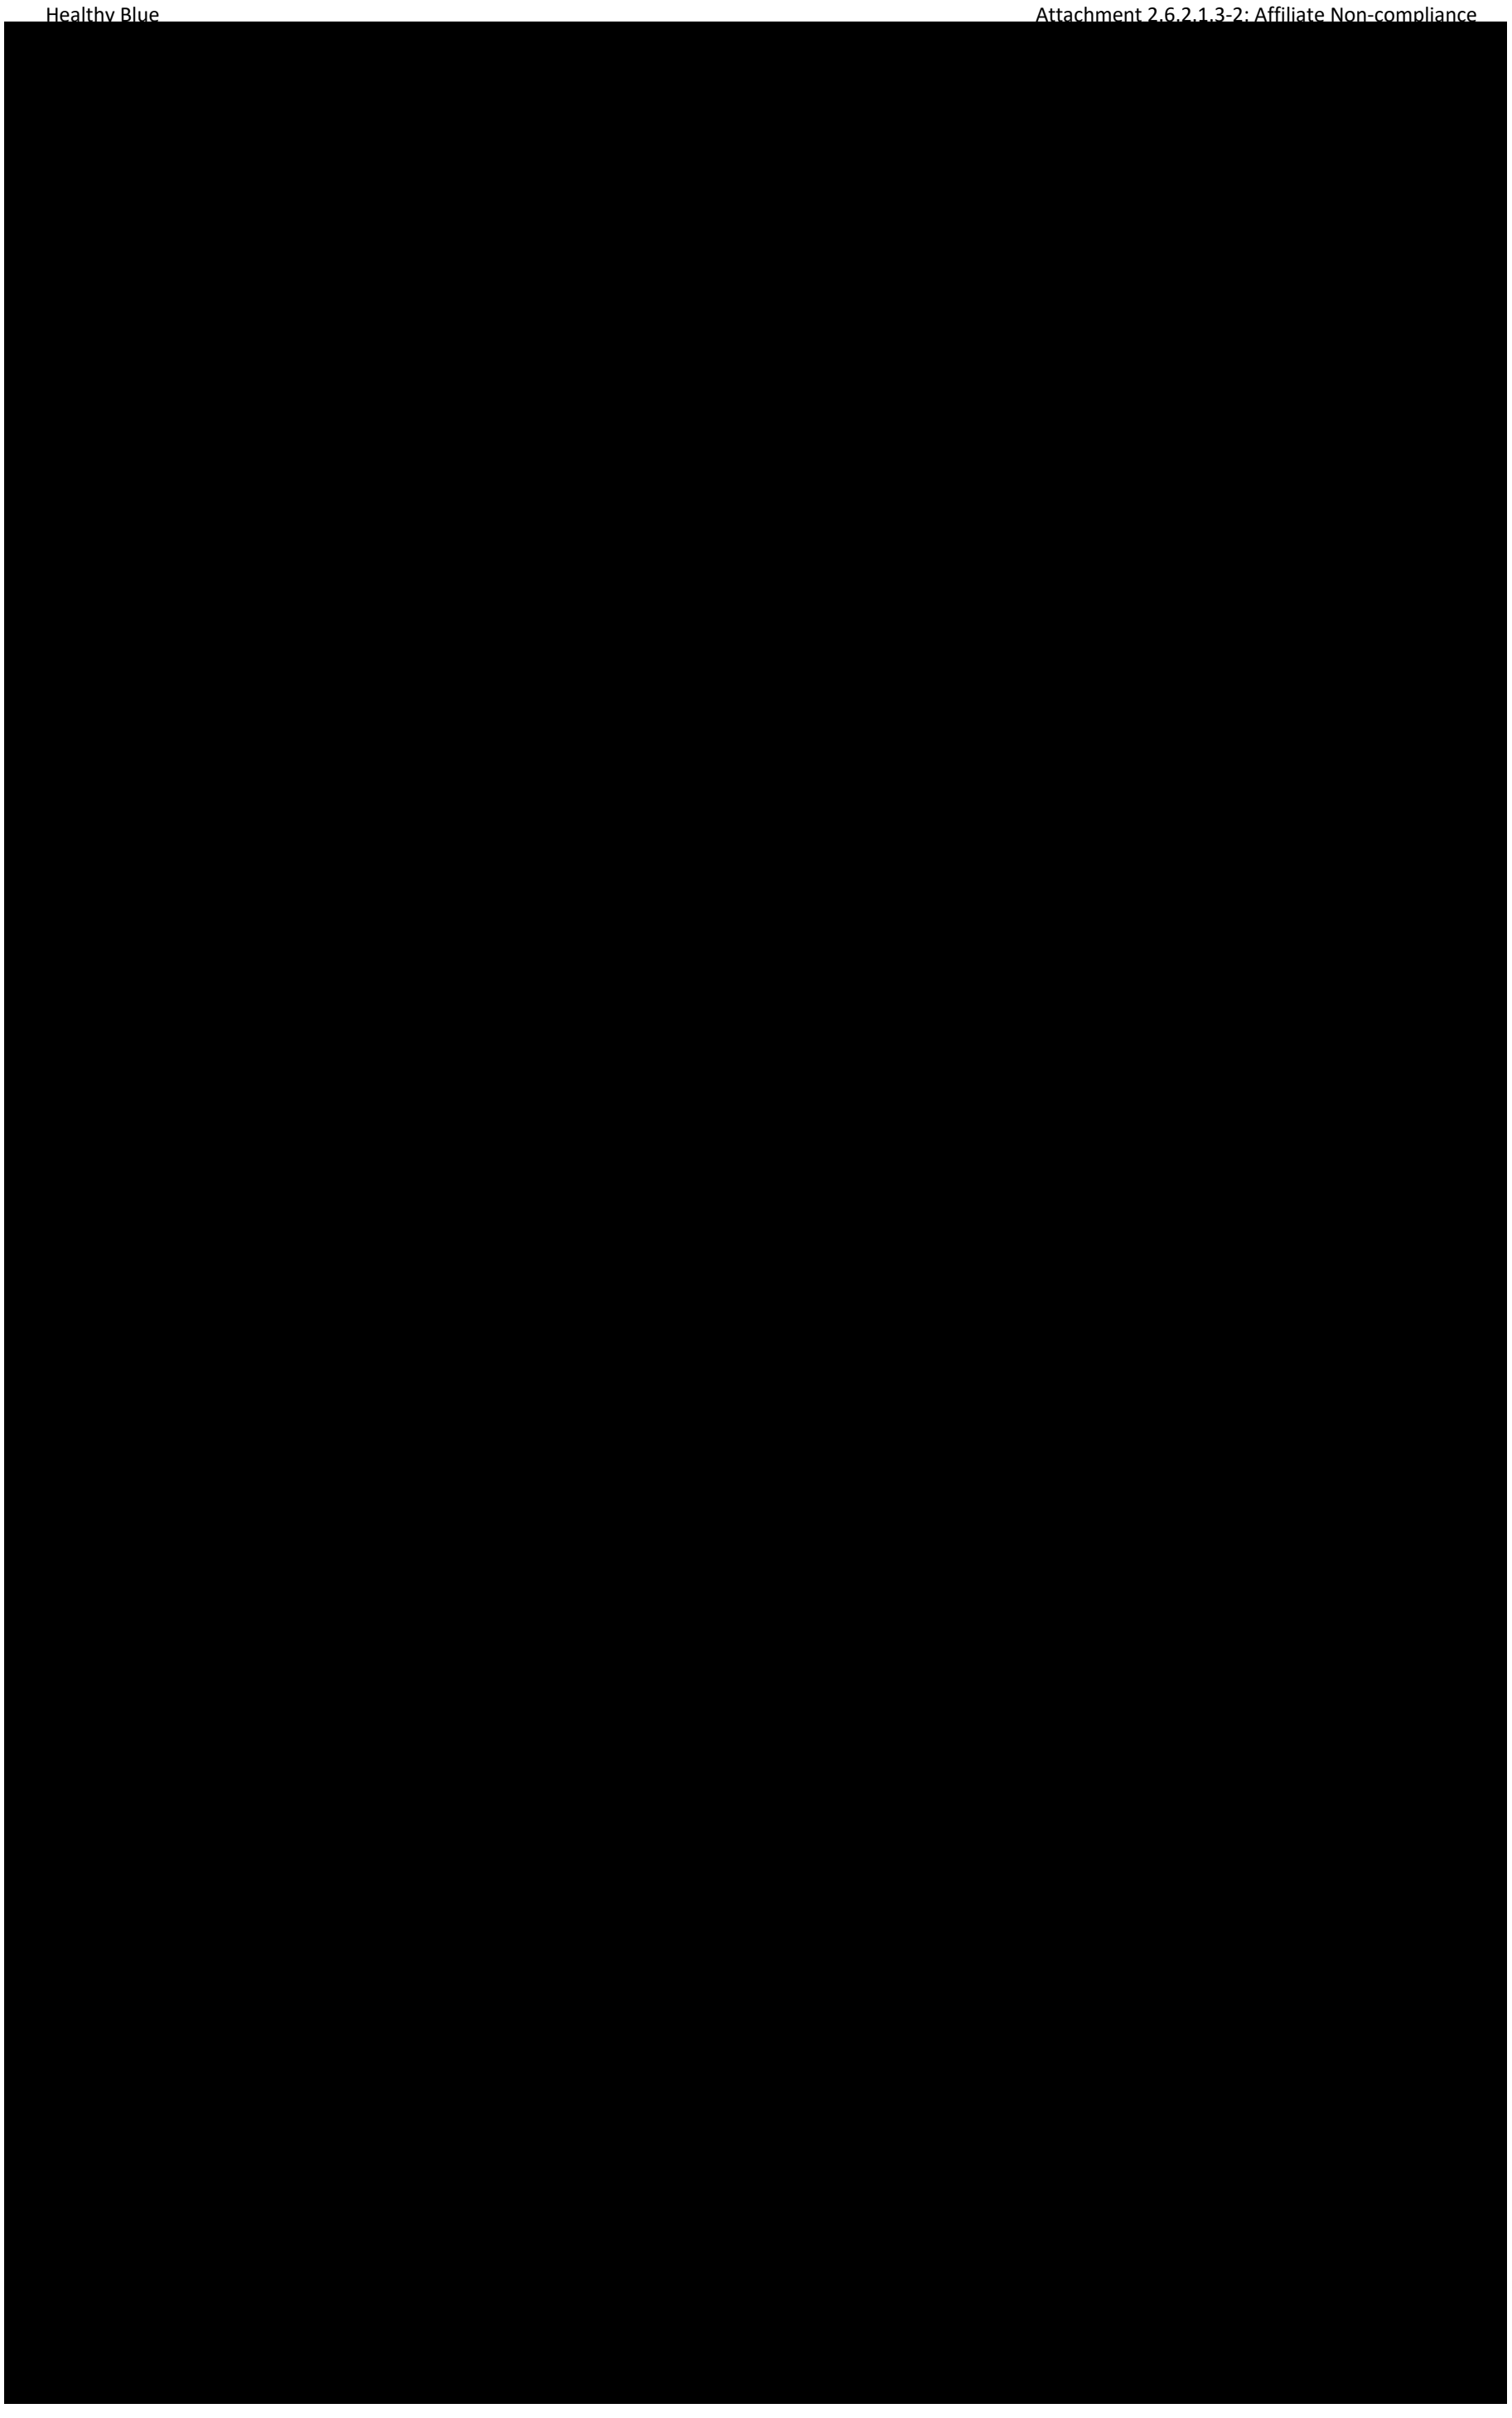
# Attachment 2.6.2.1.3

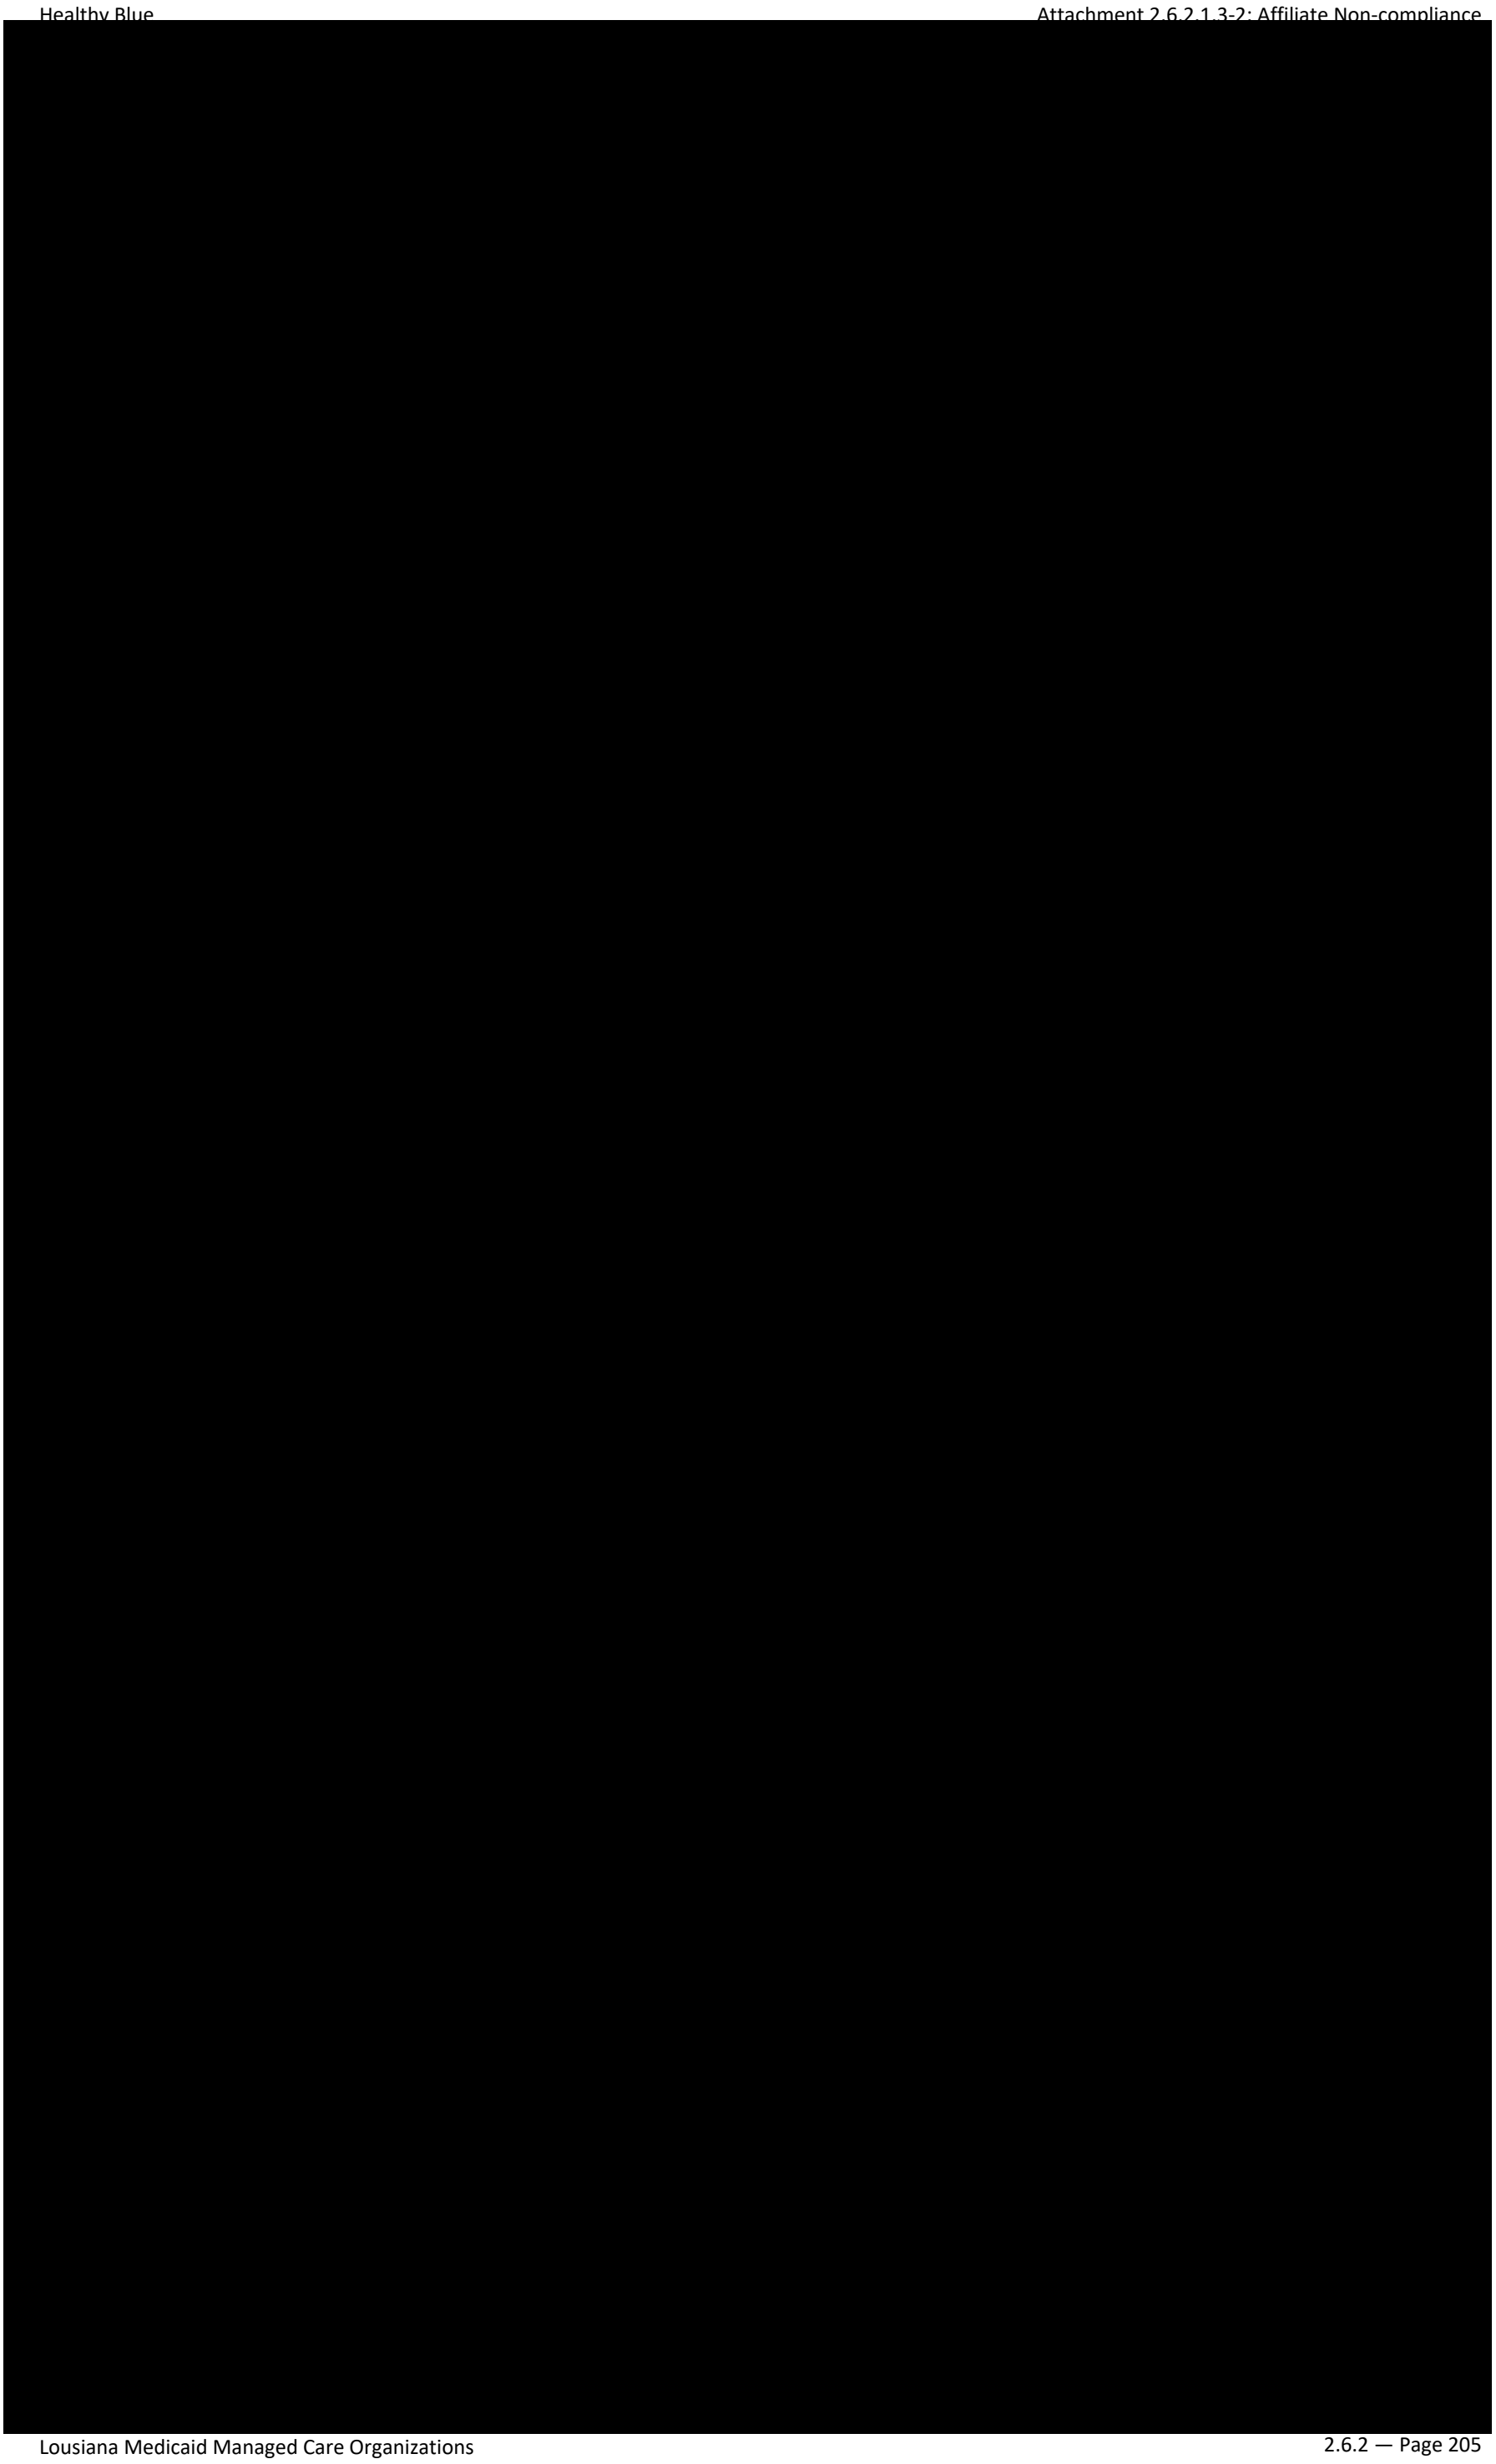
## Instances of Non-compliance

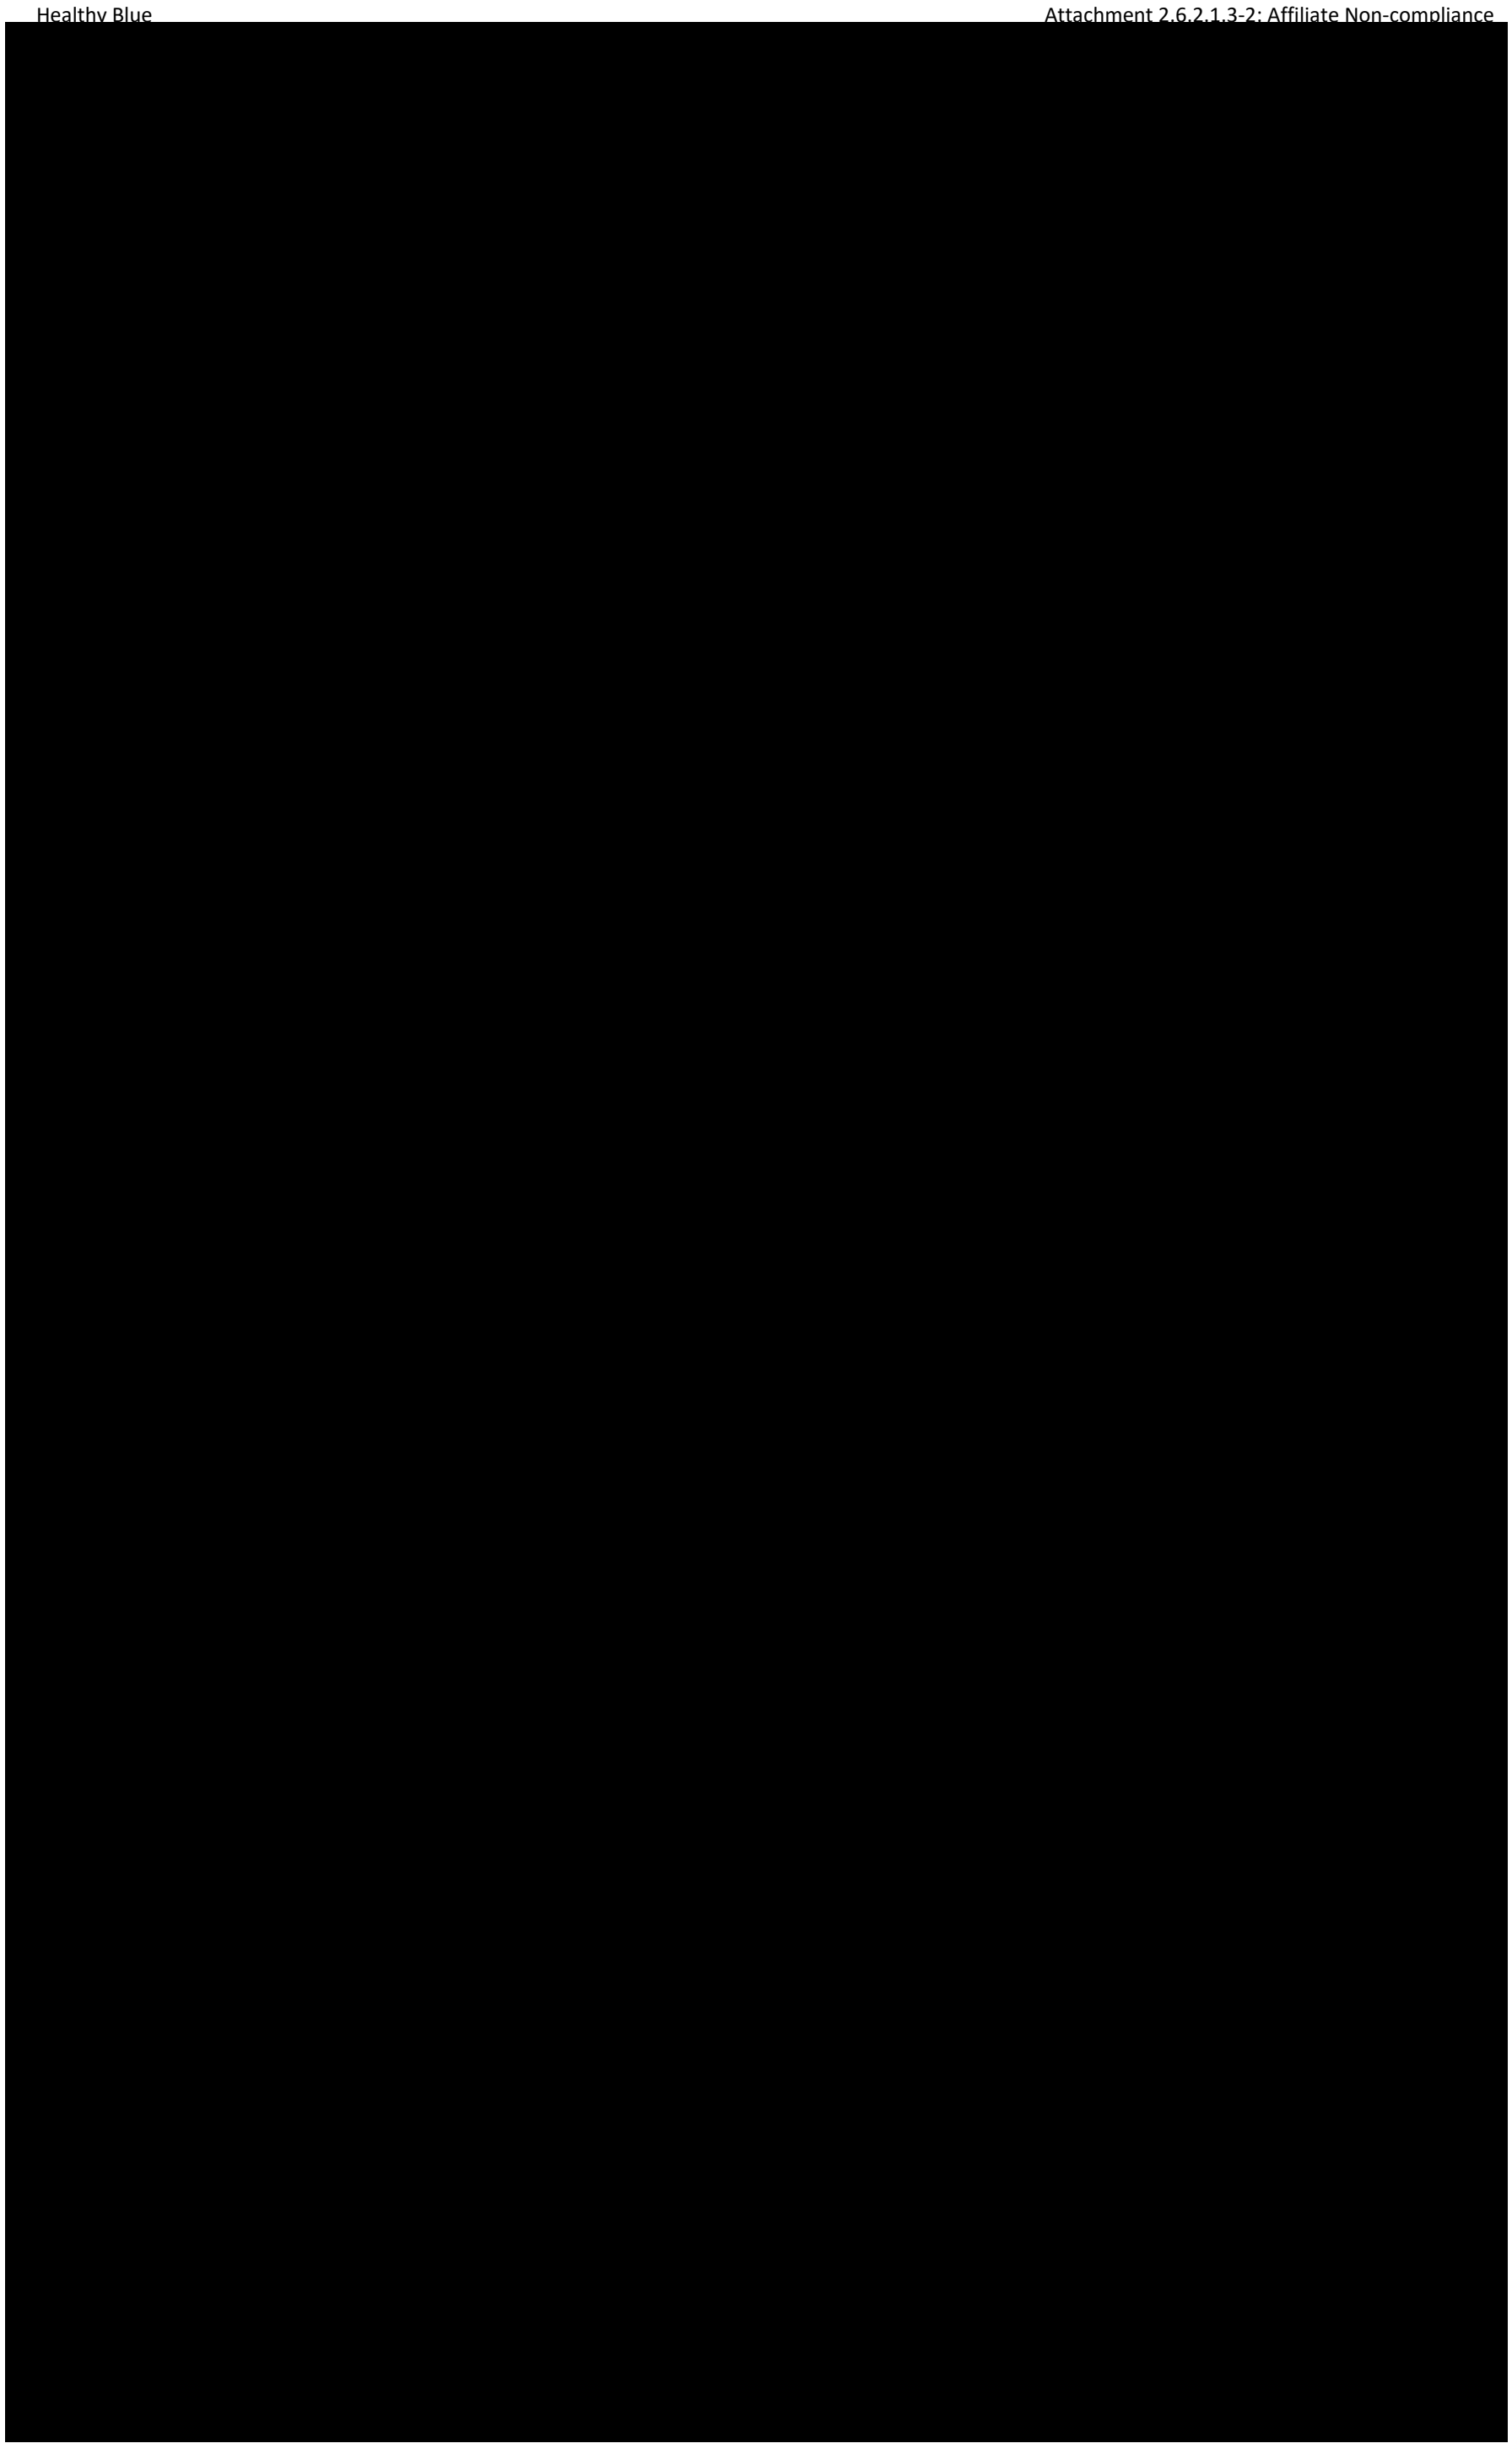
Healthy Blue

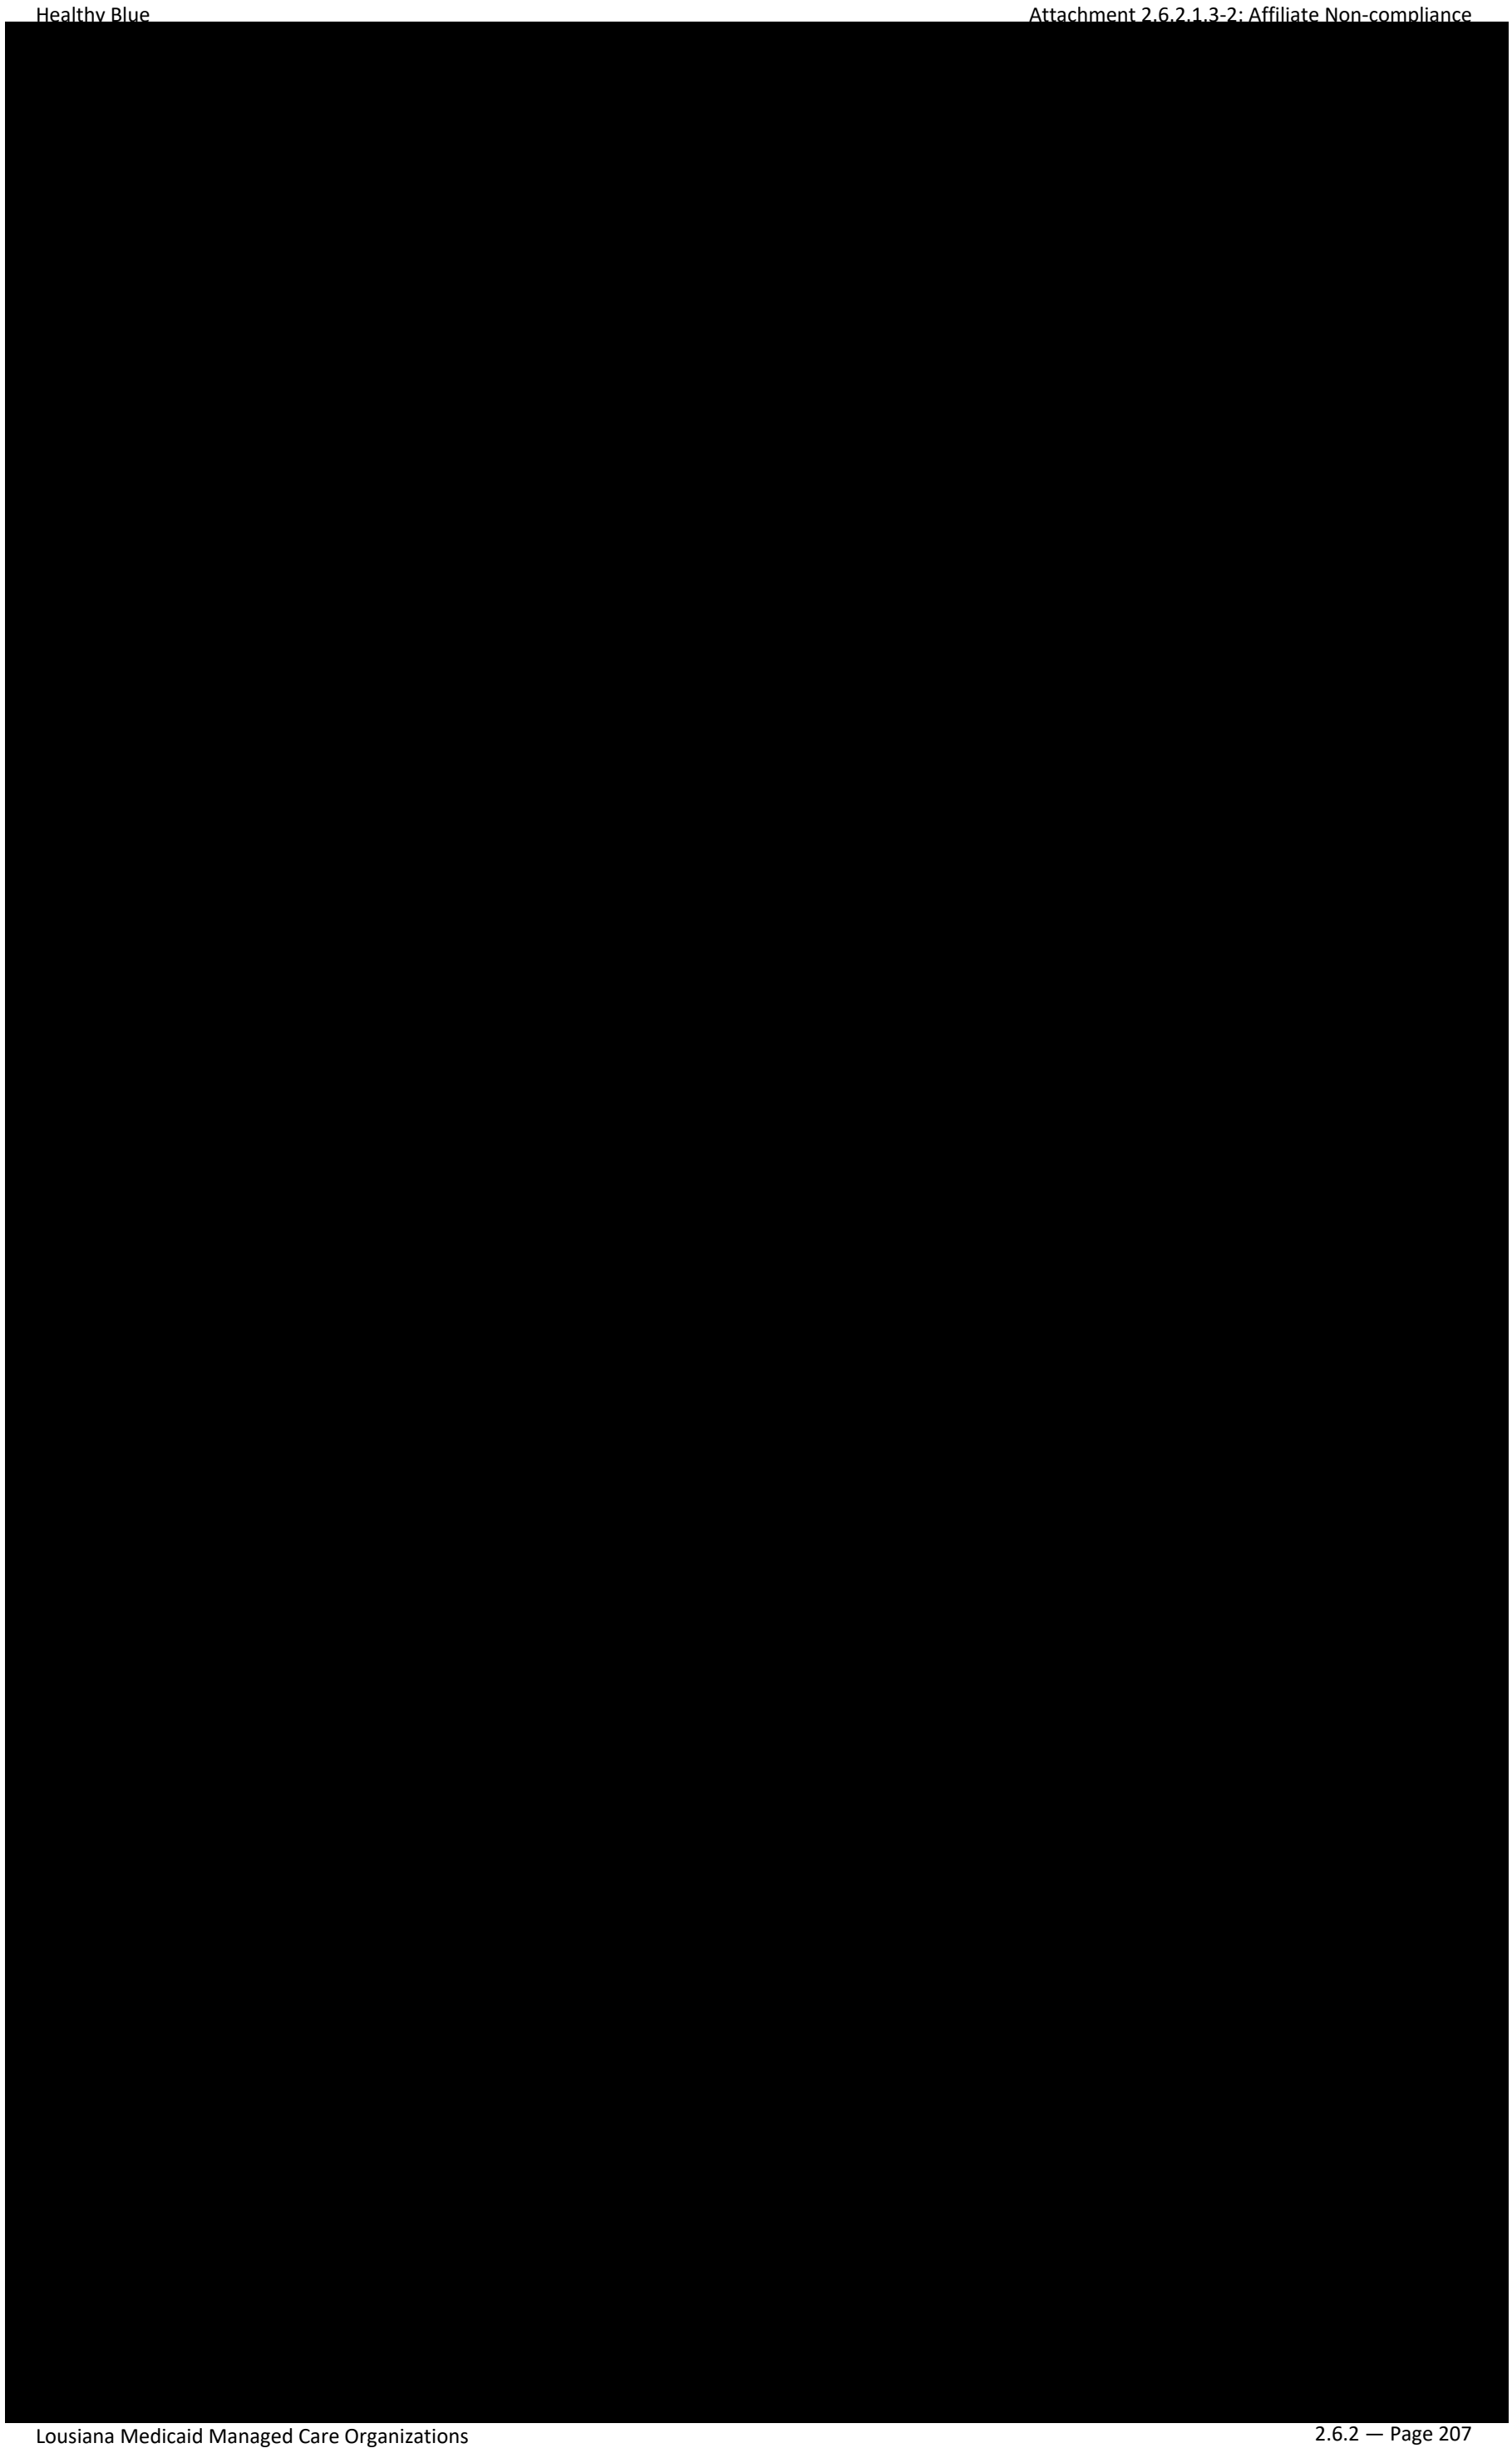


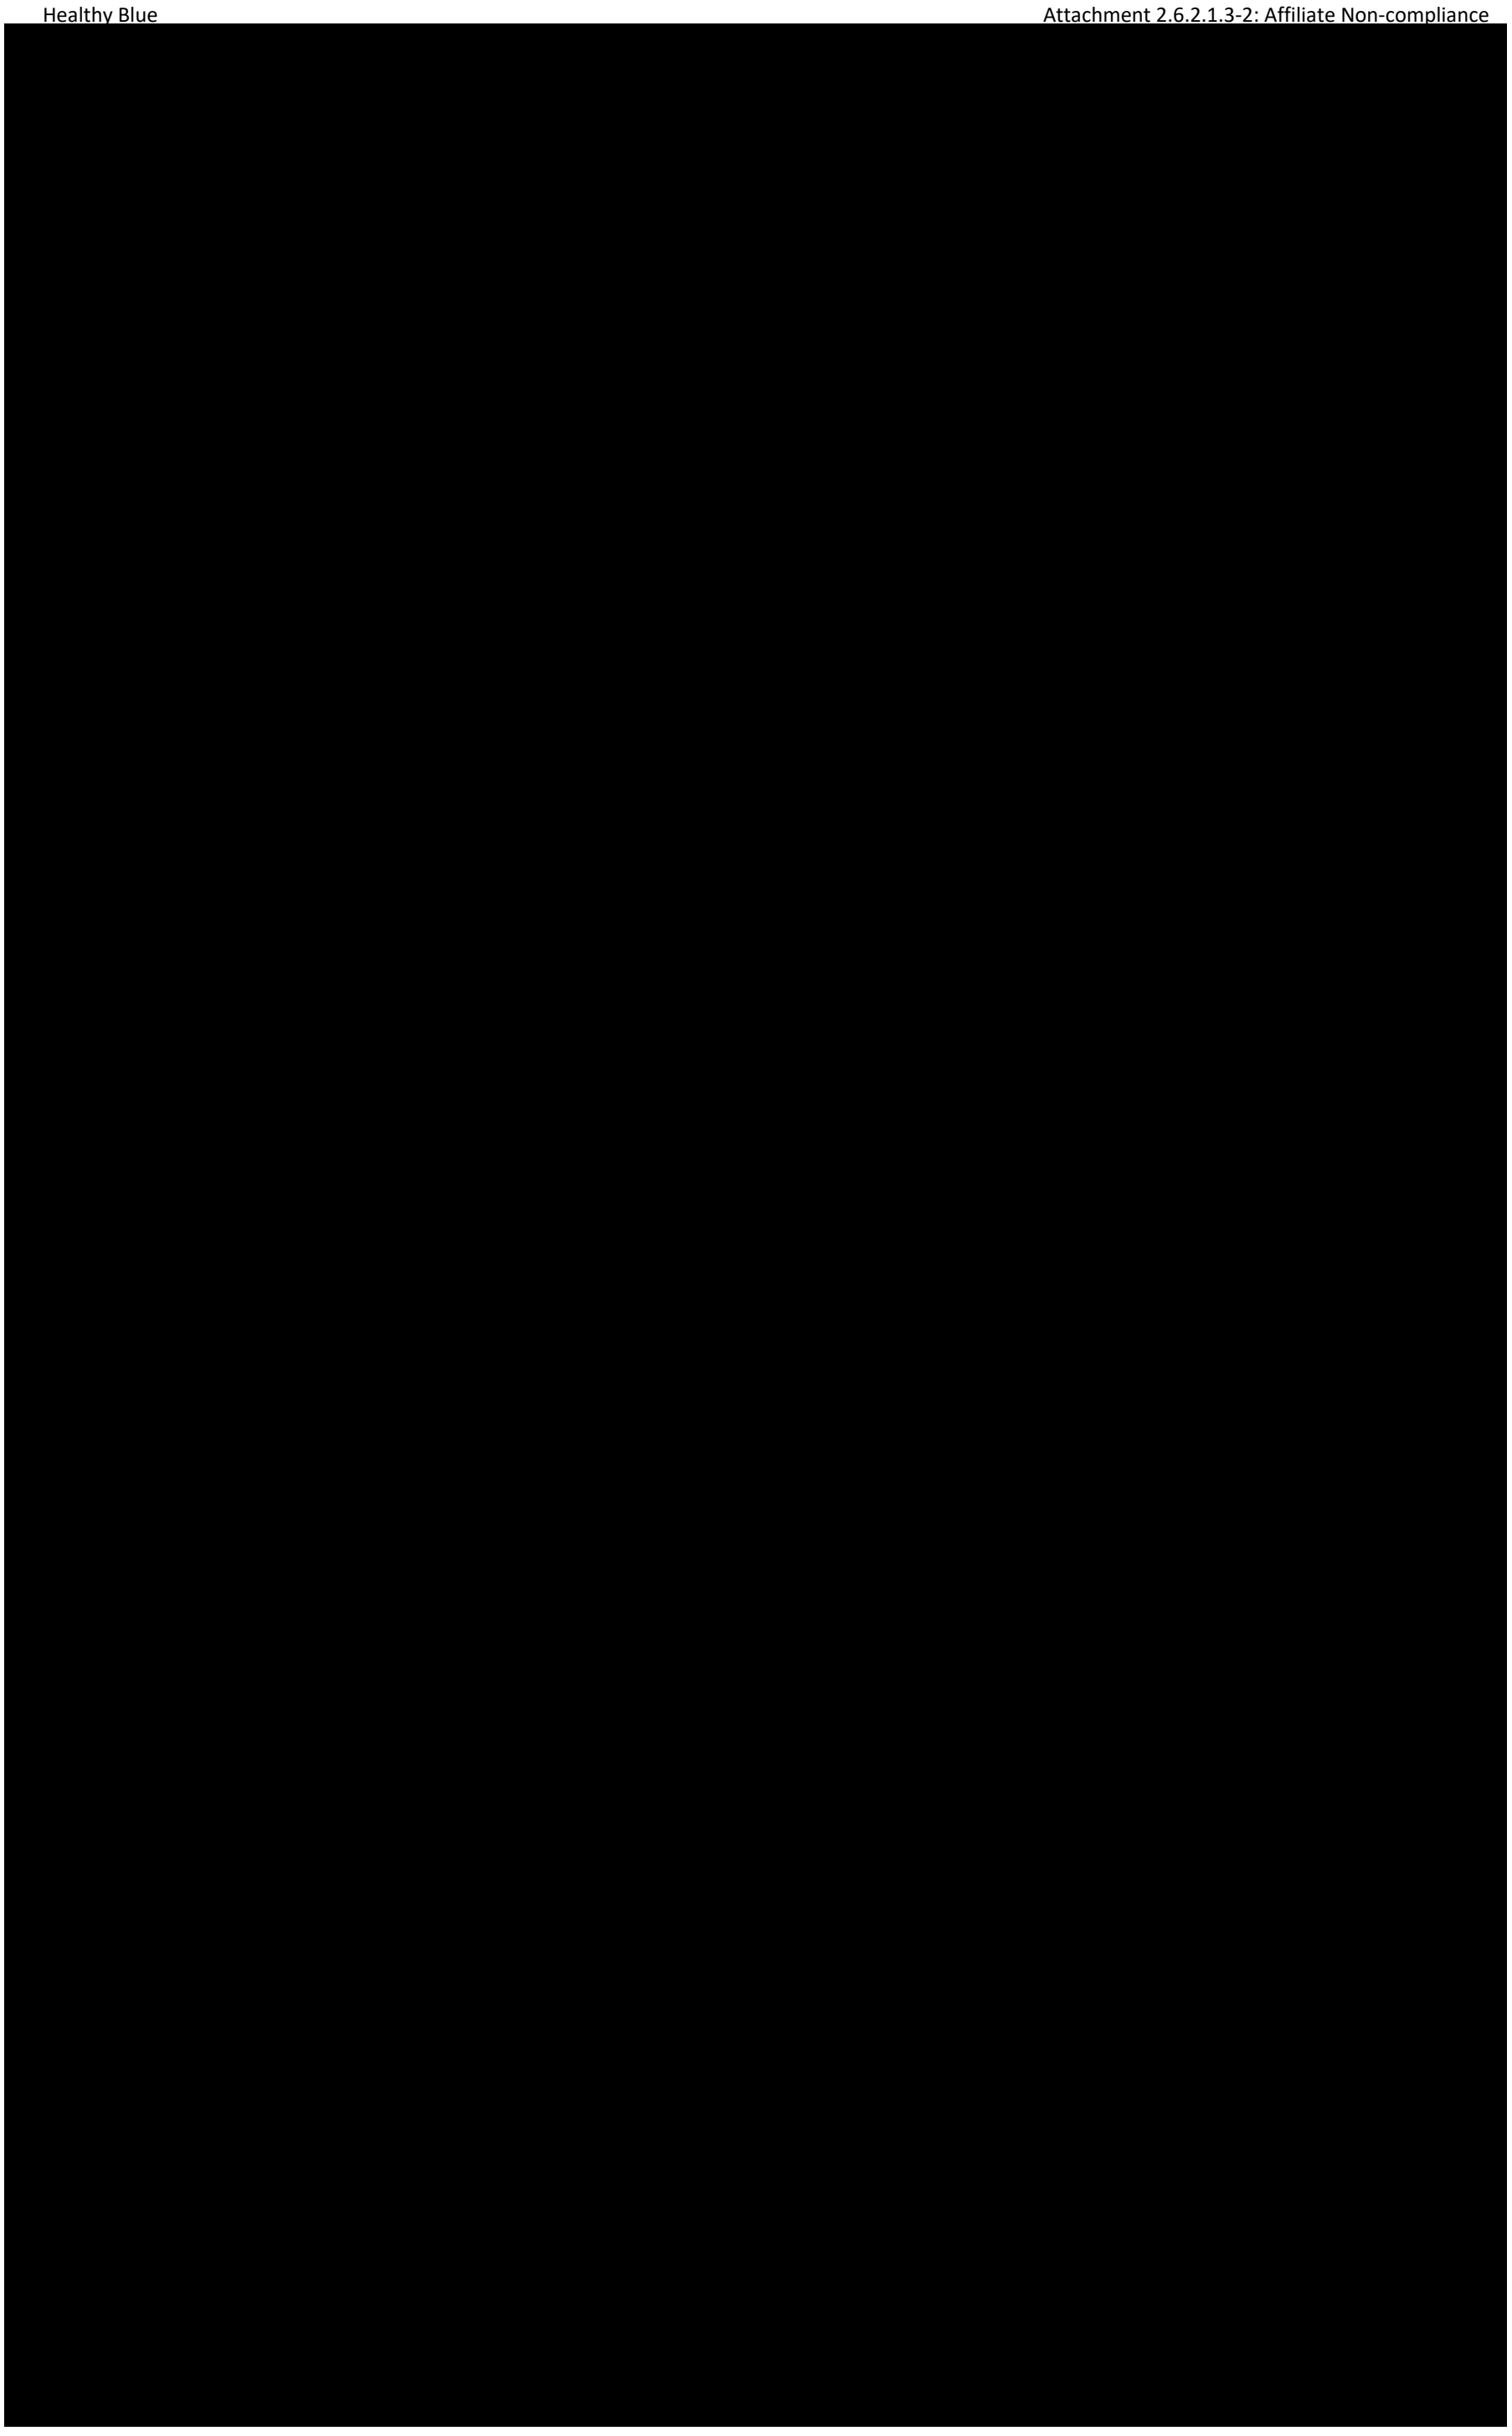
[redacted]

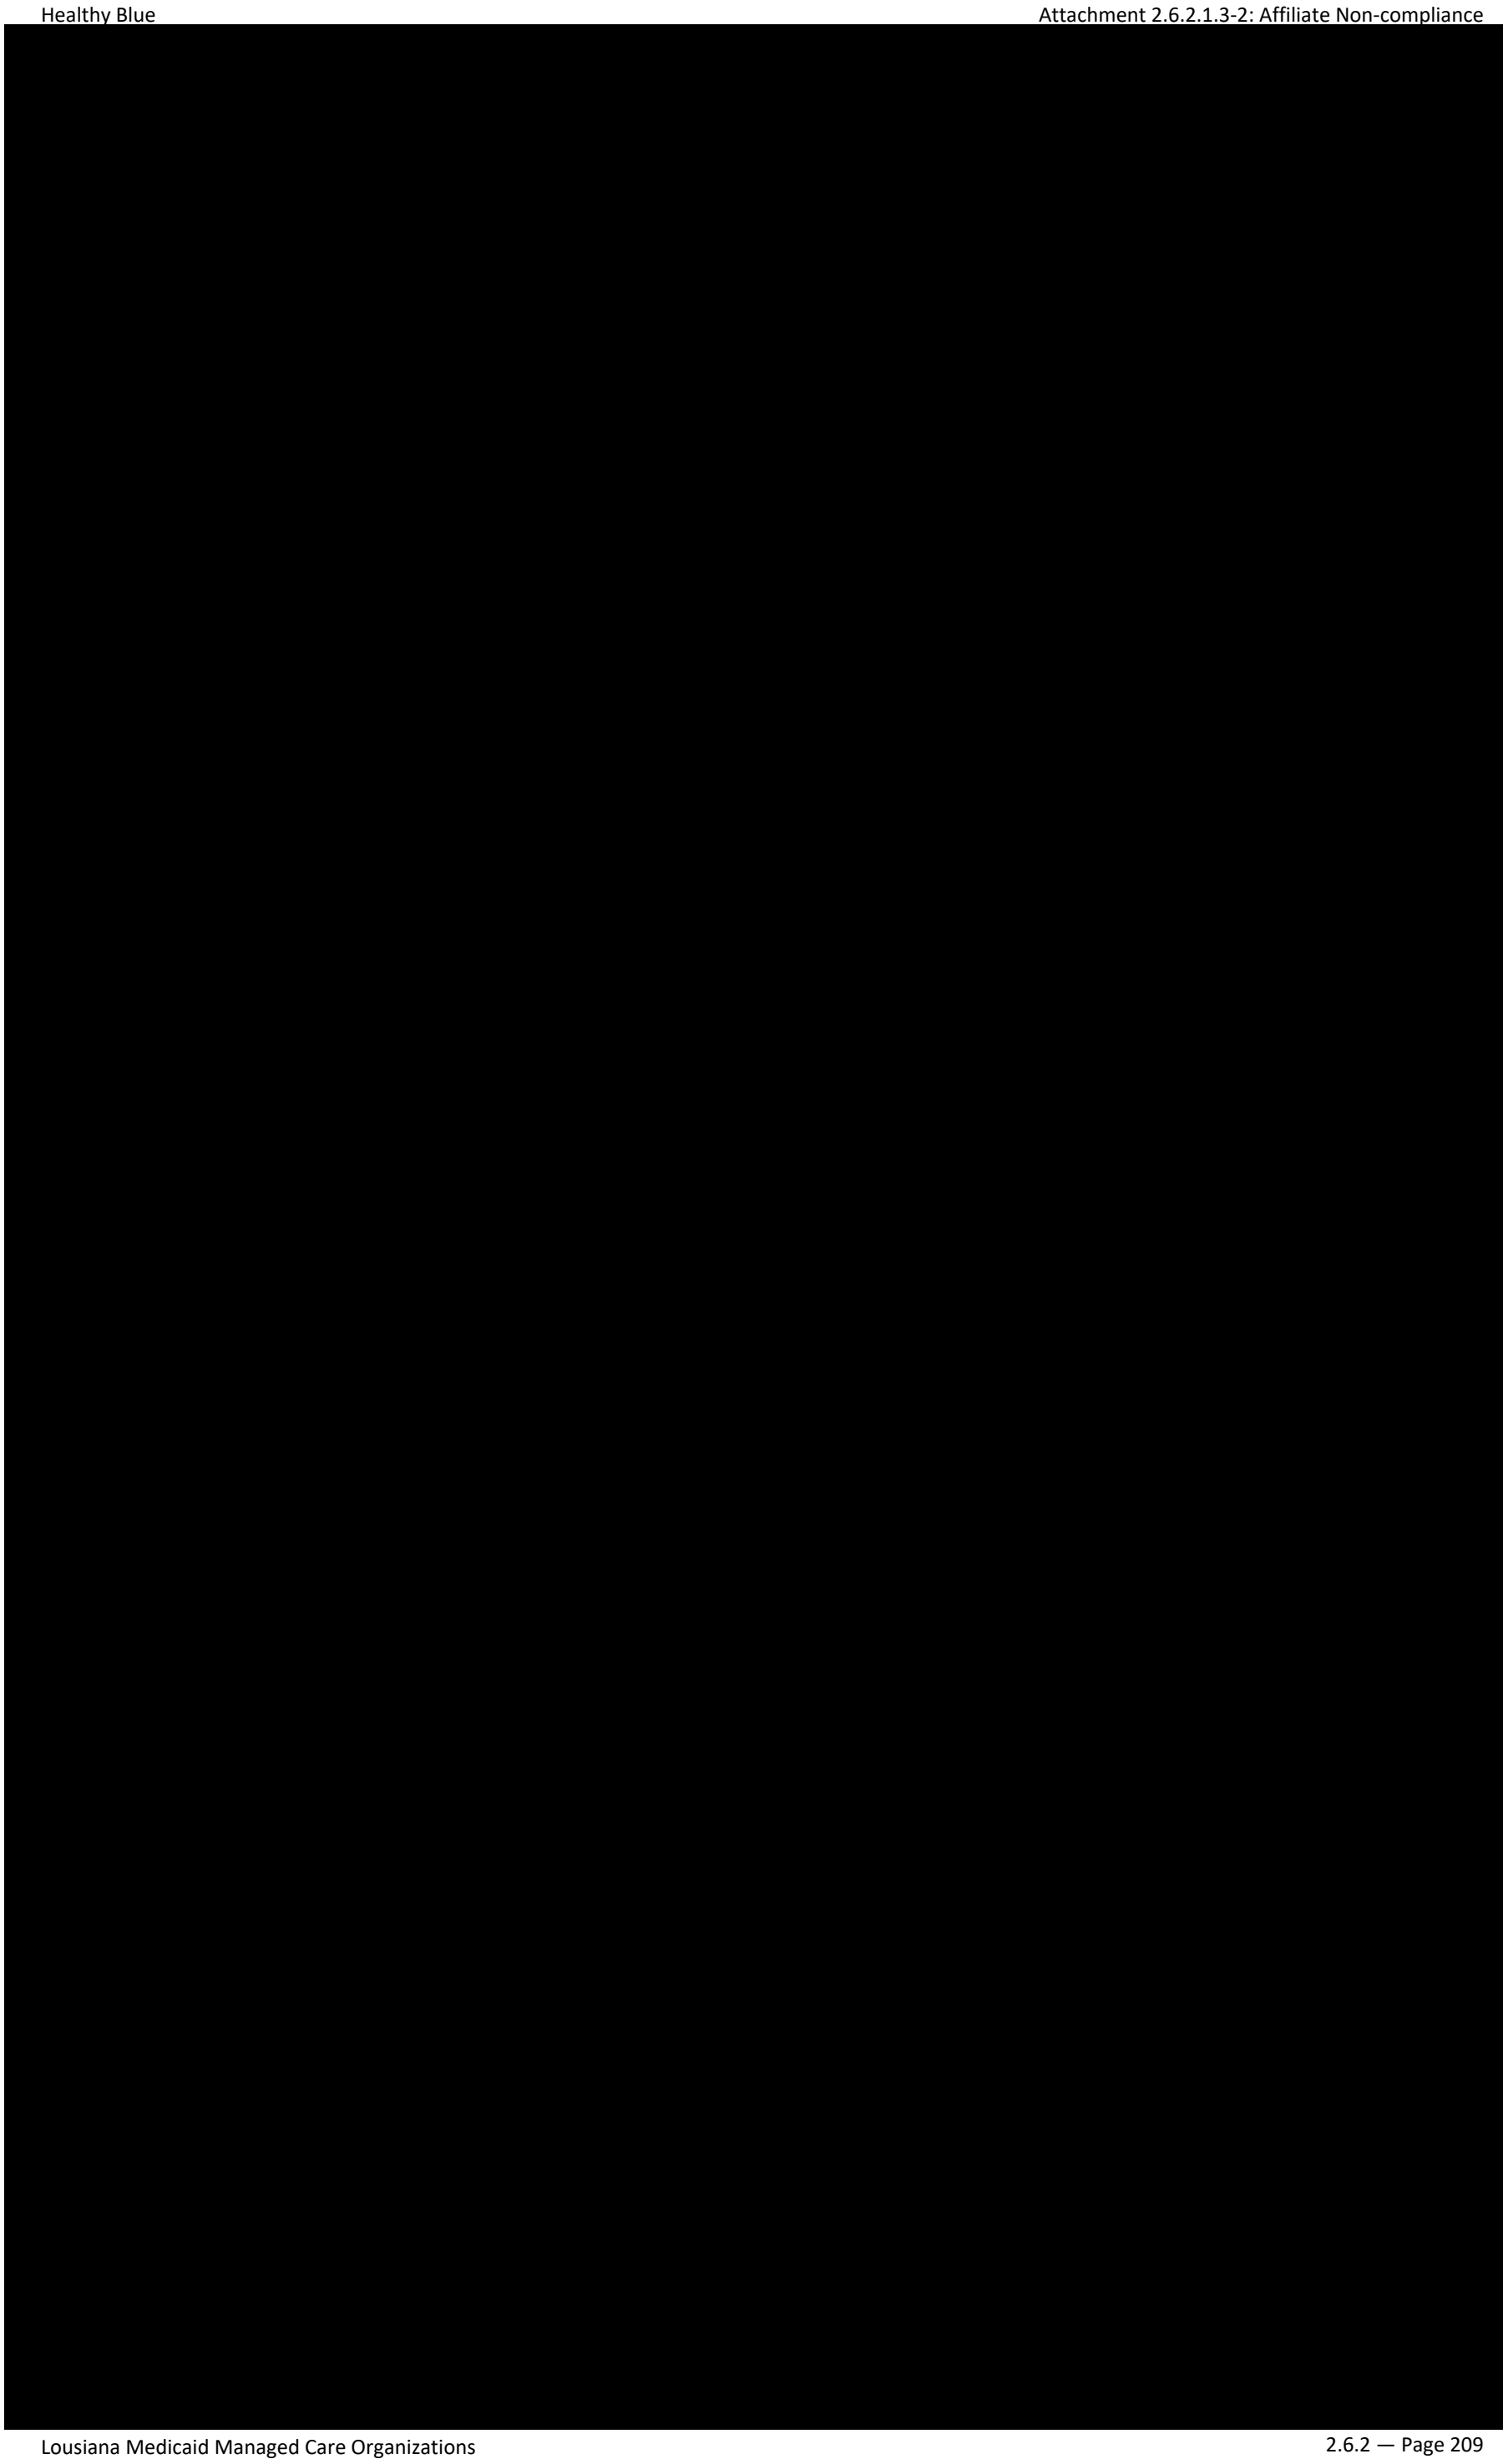


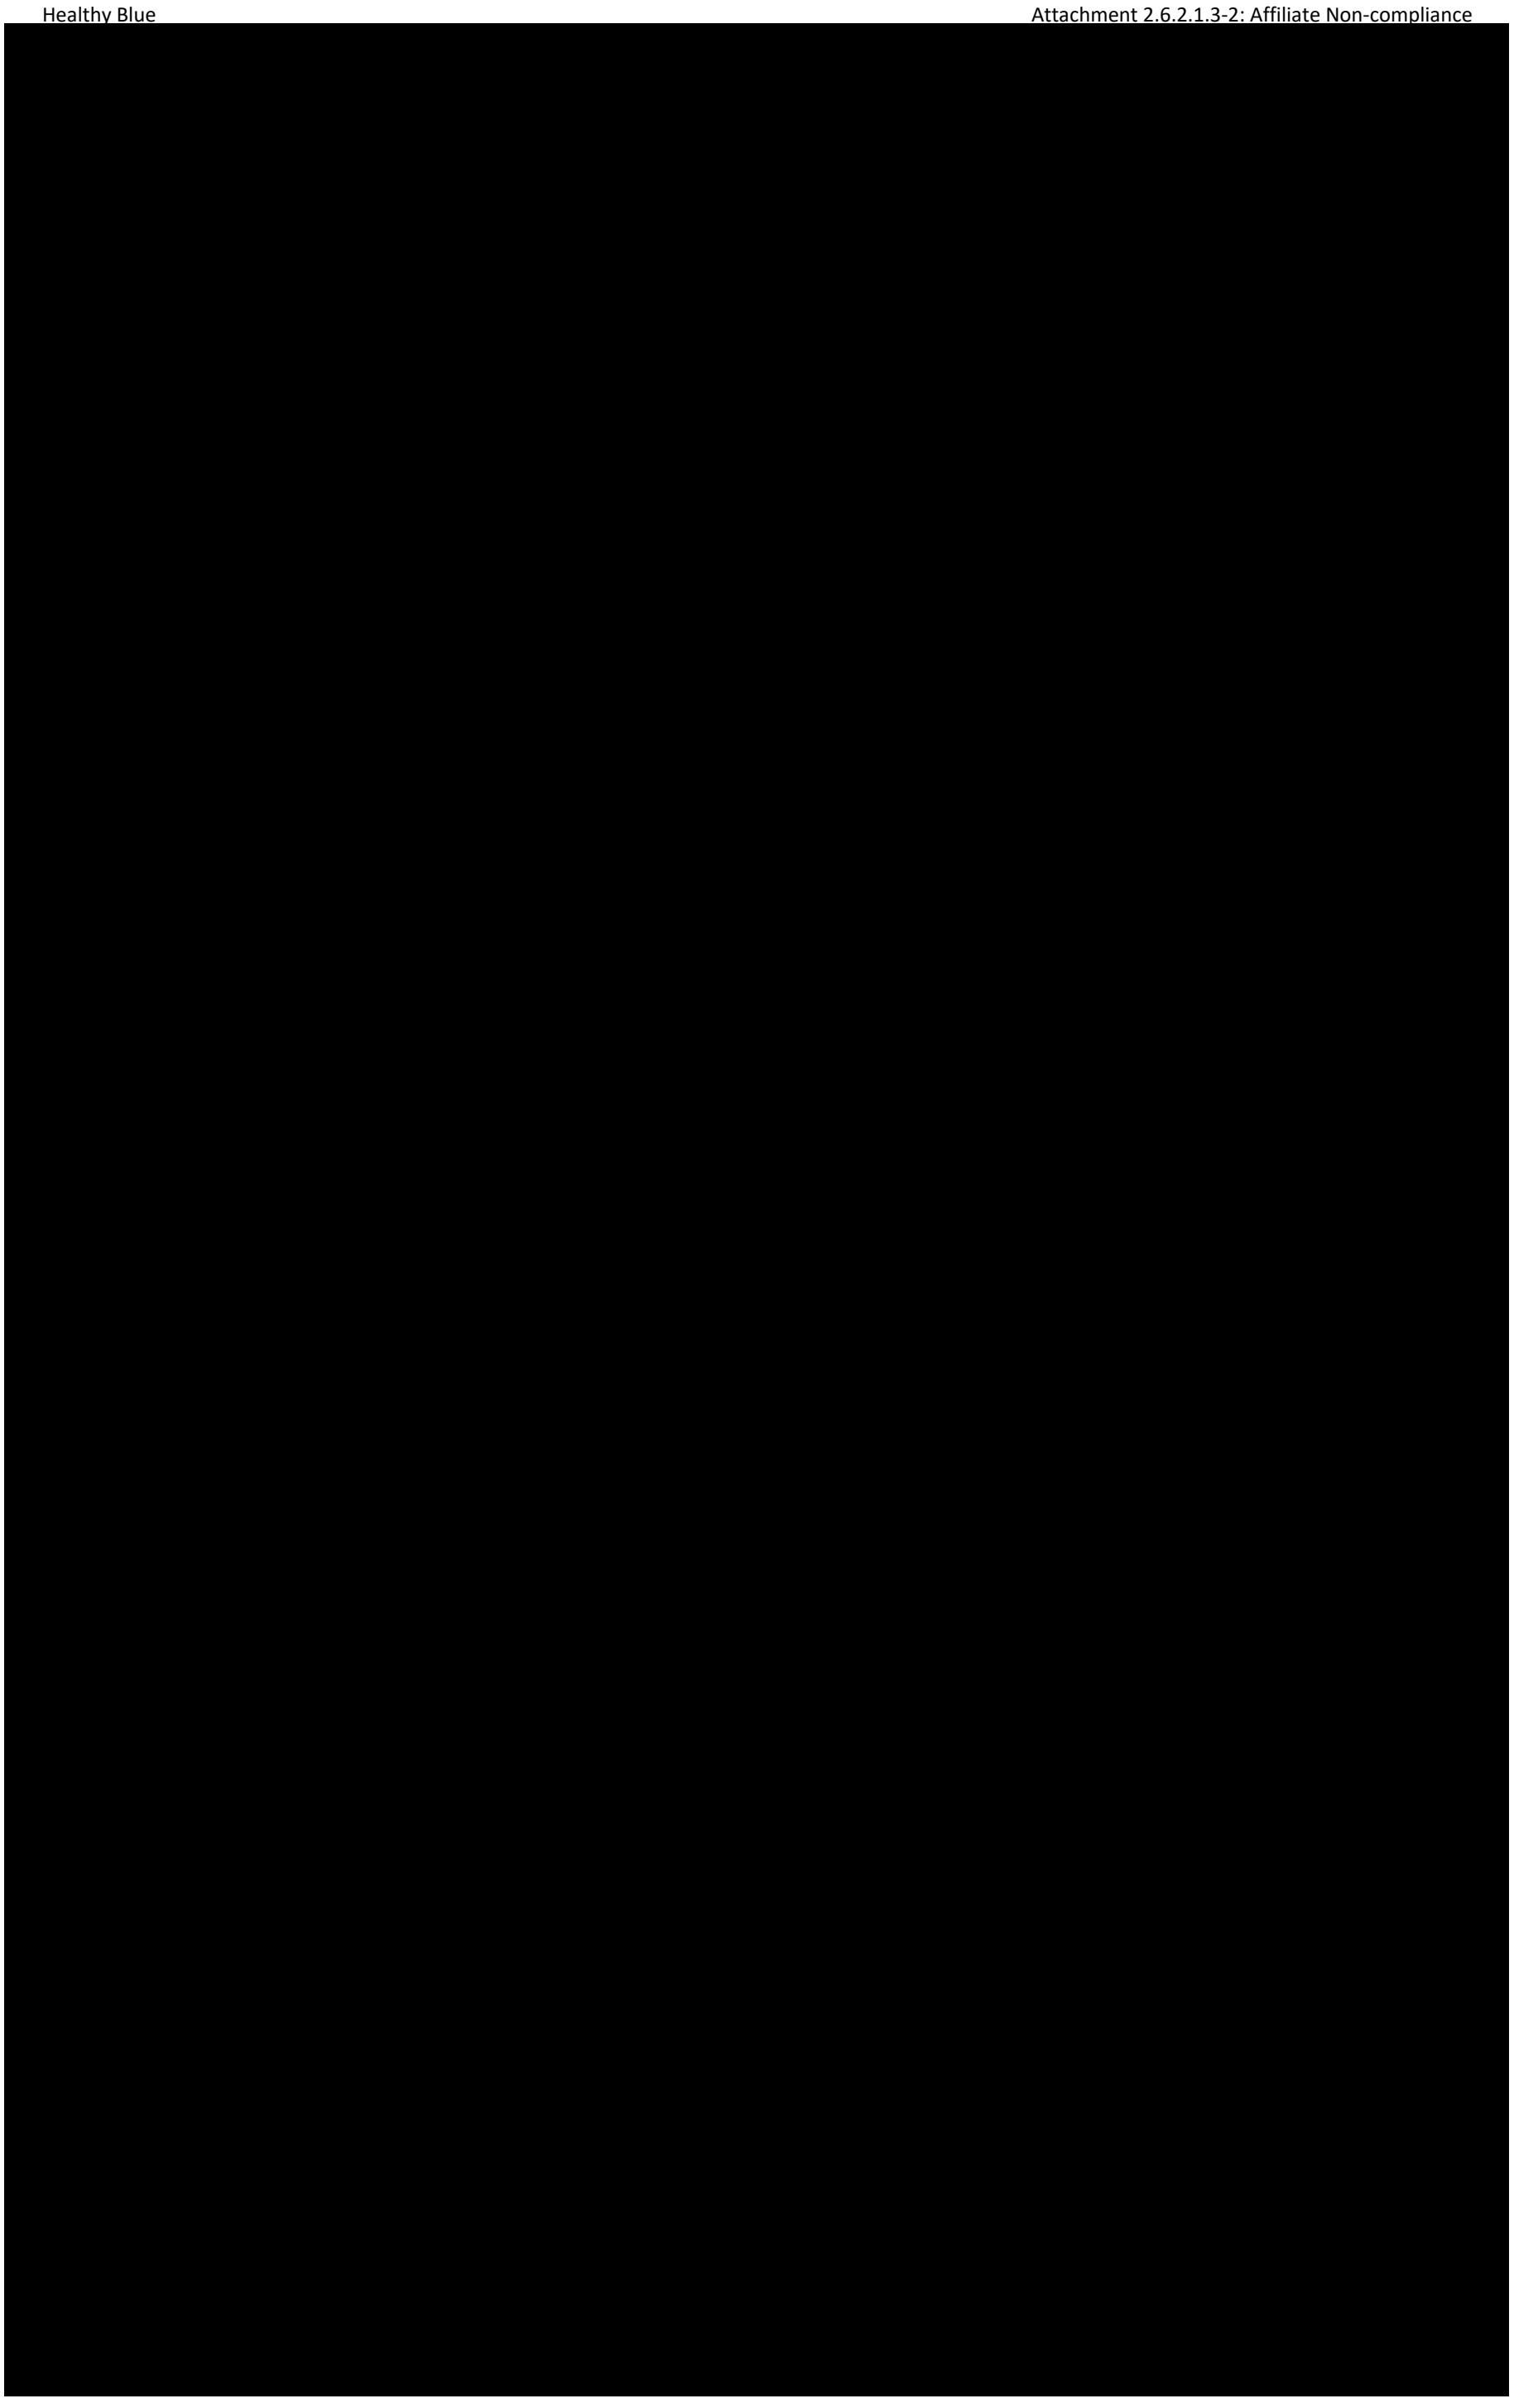


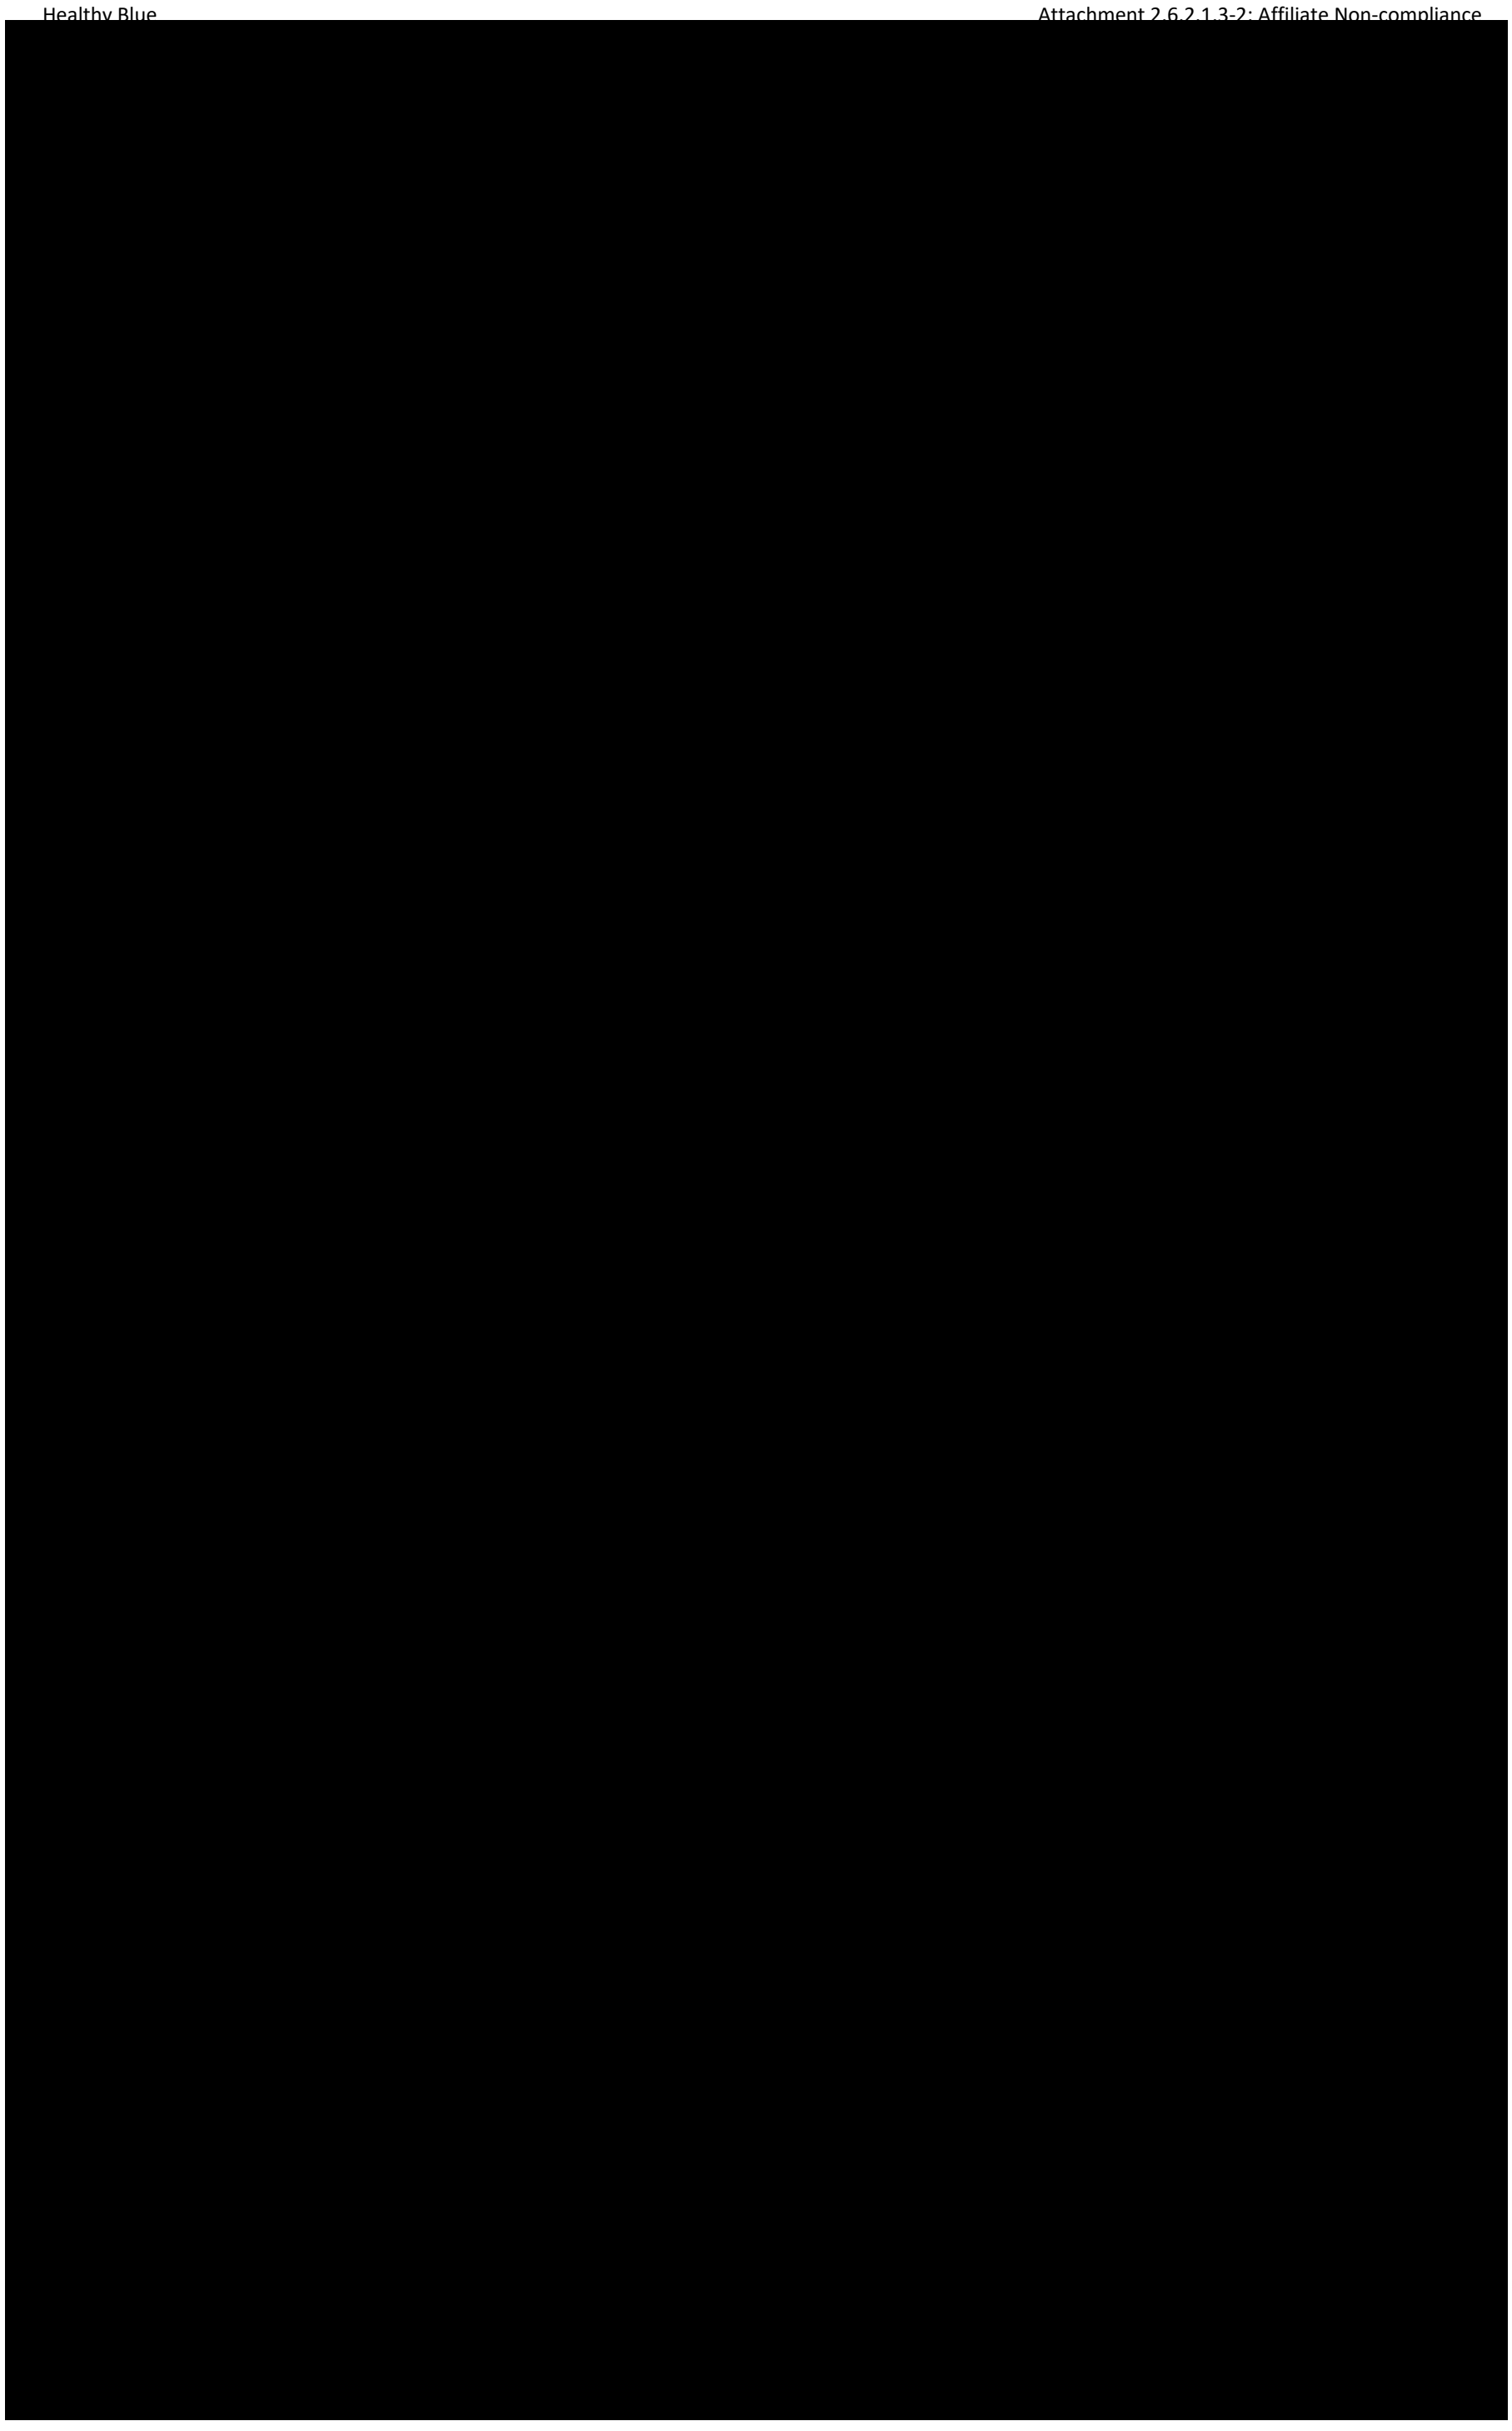


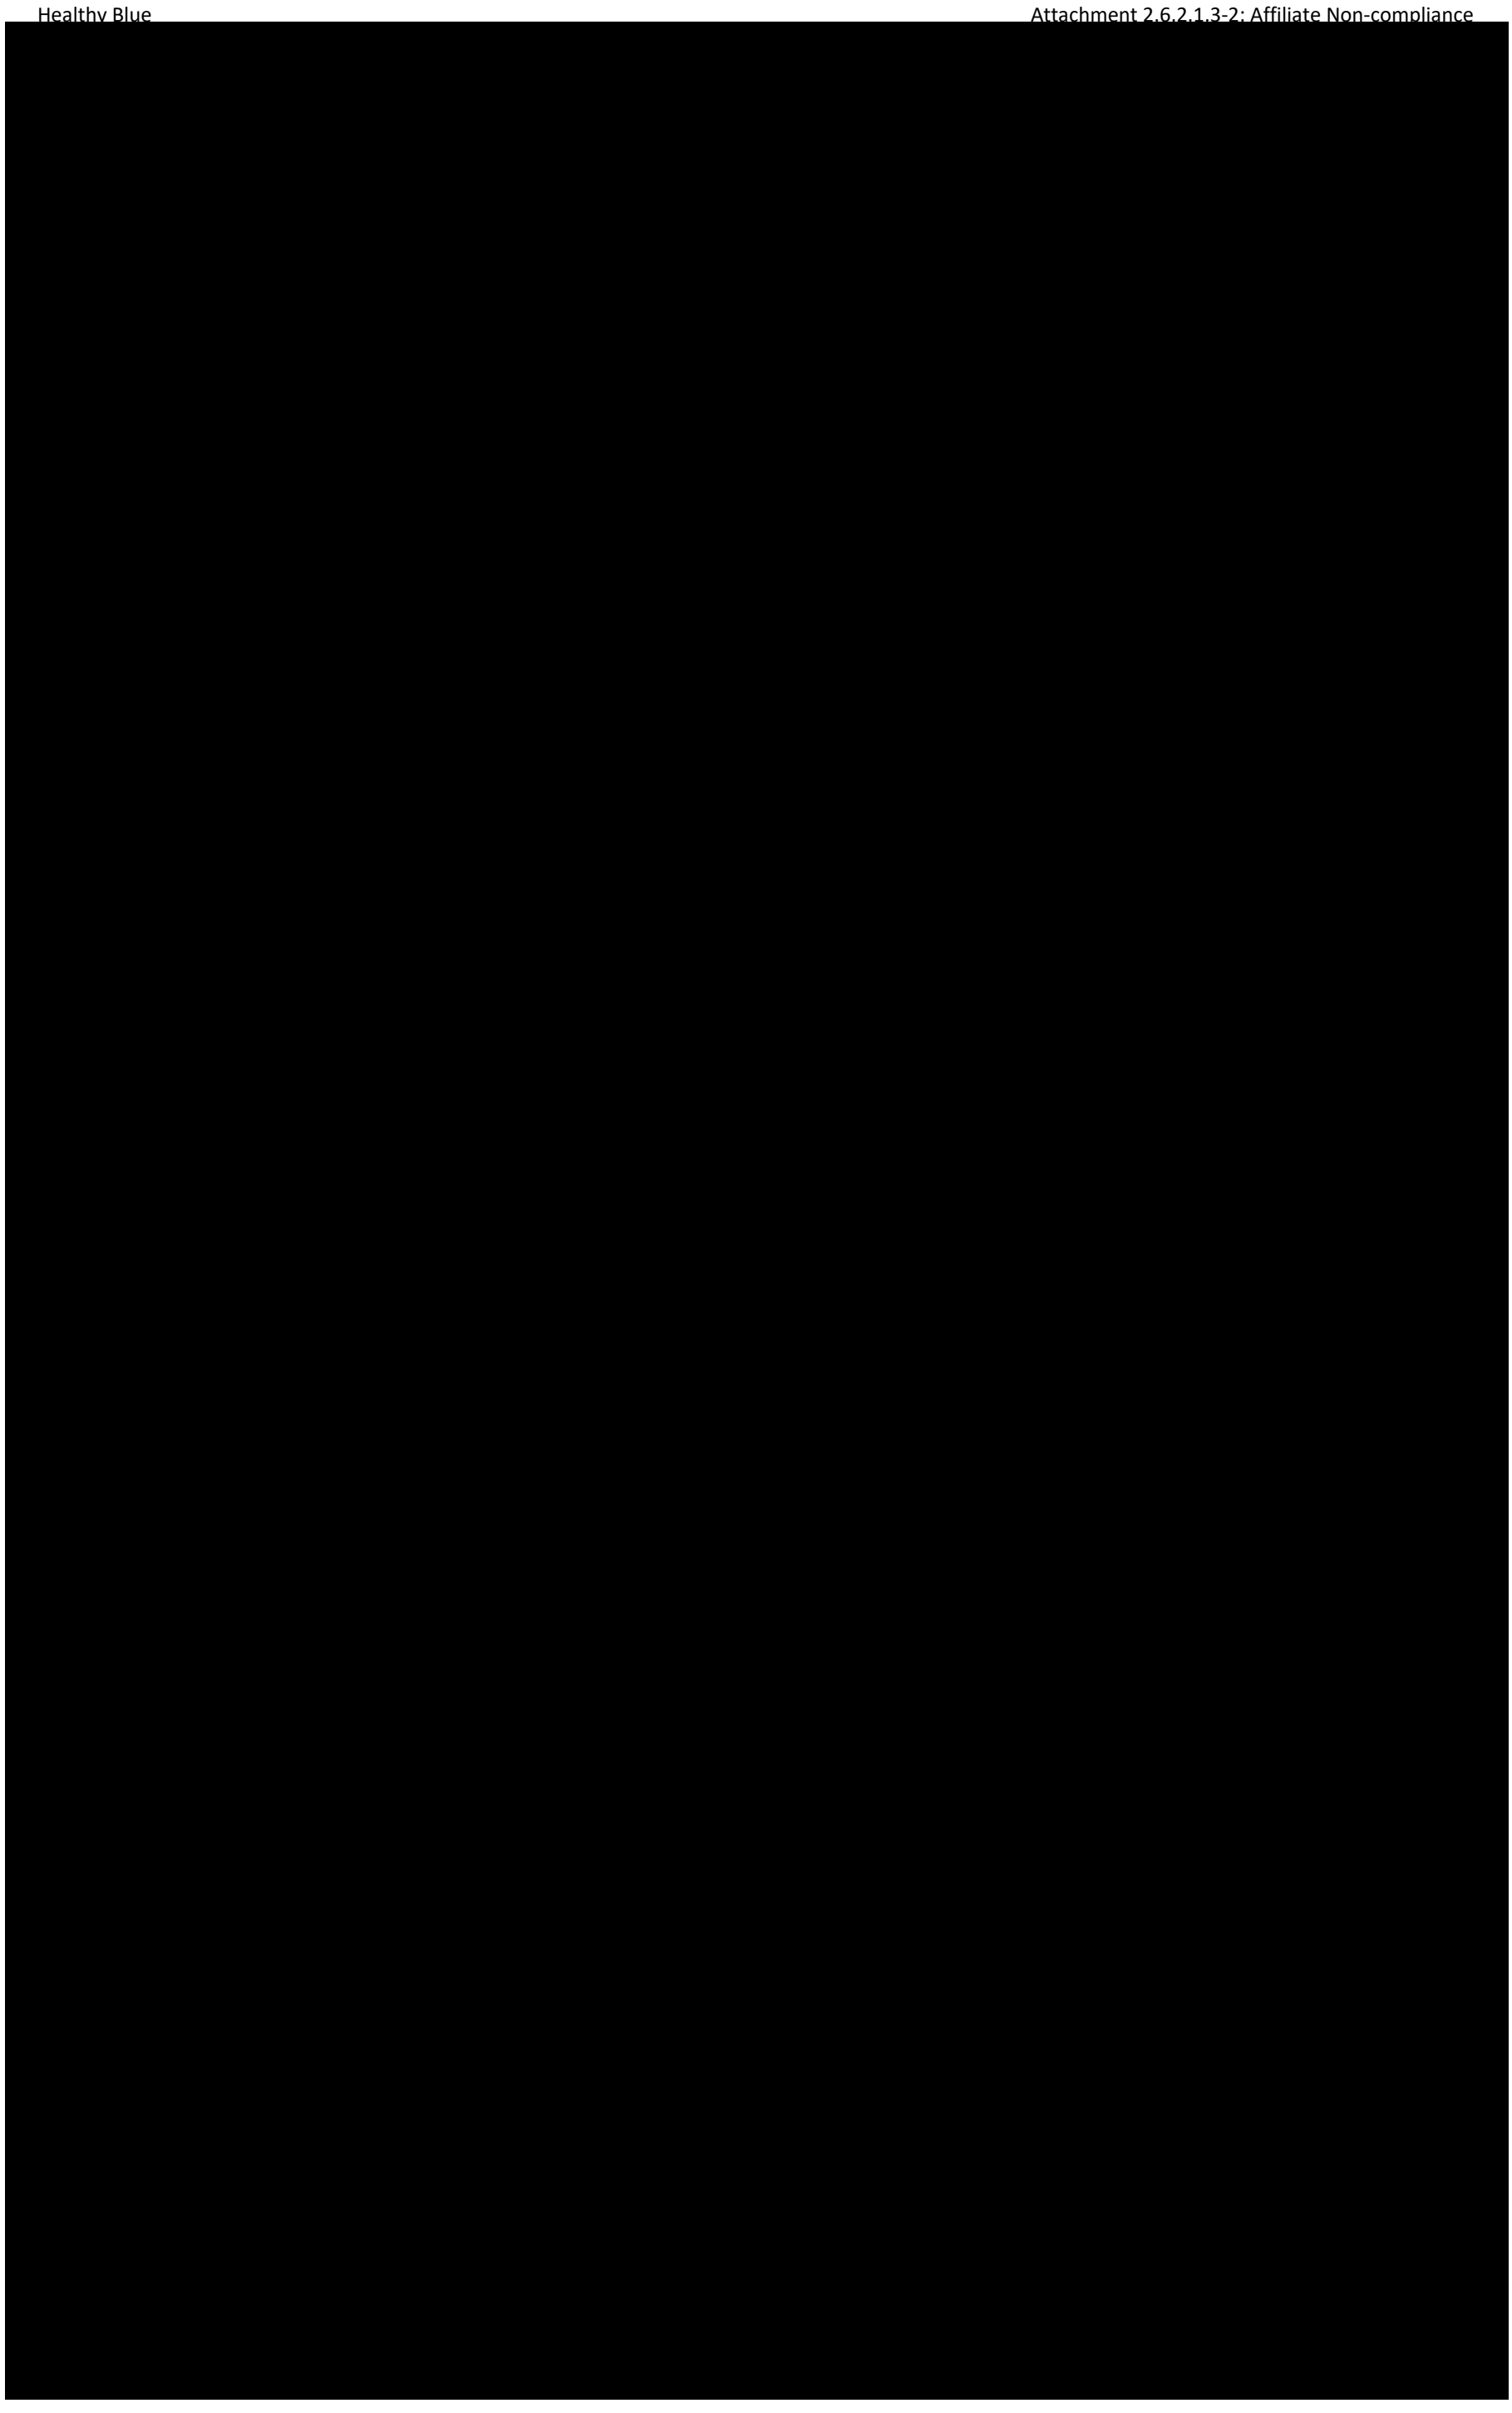


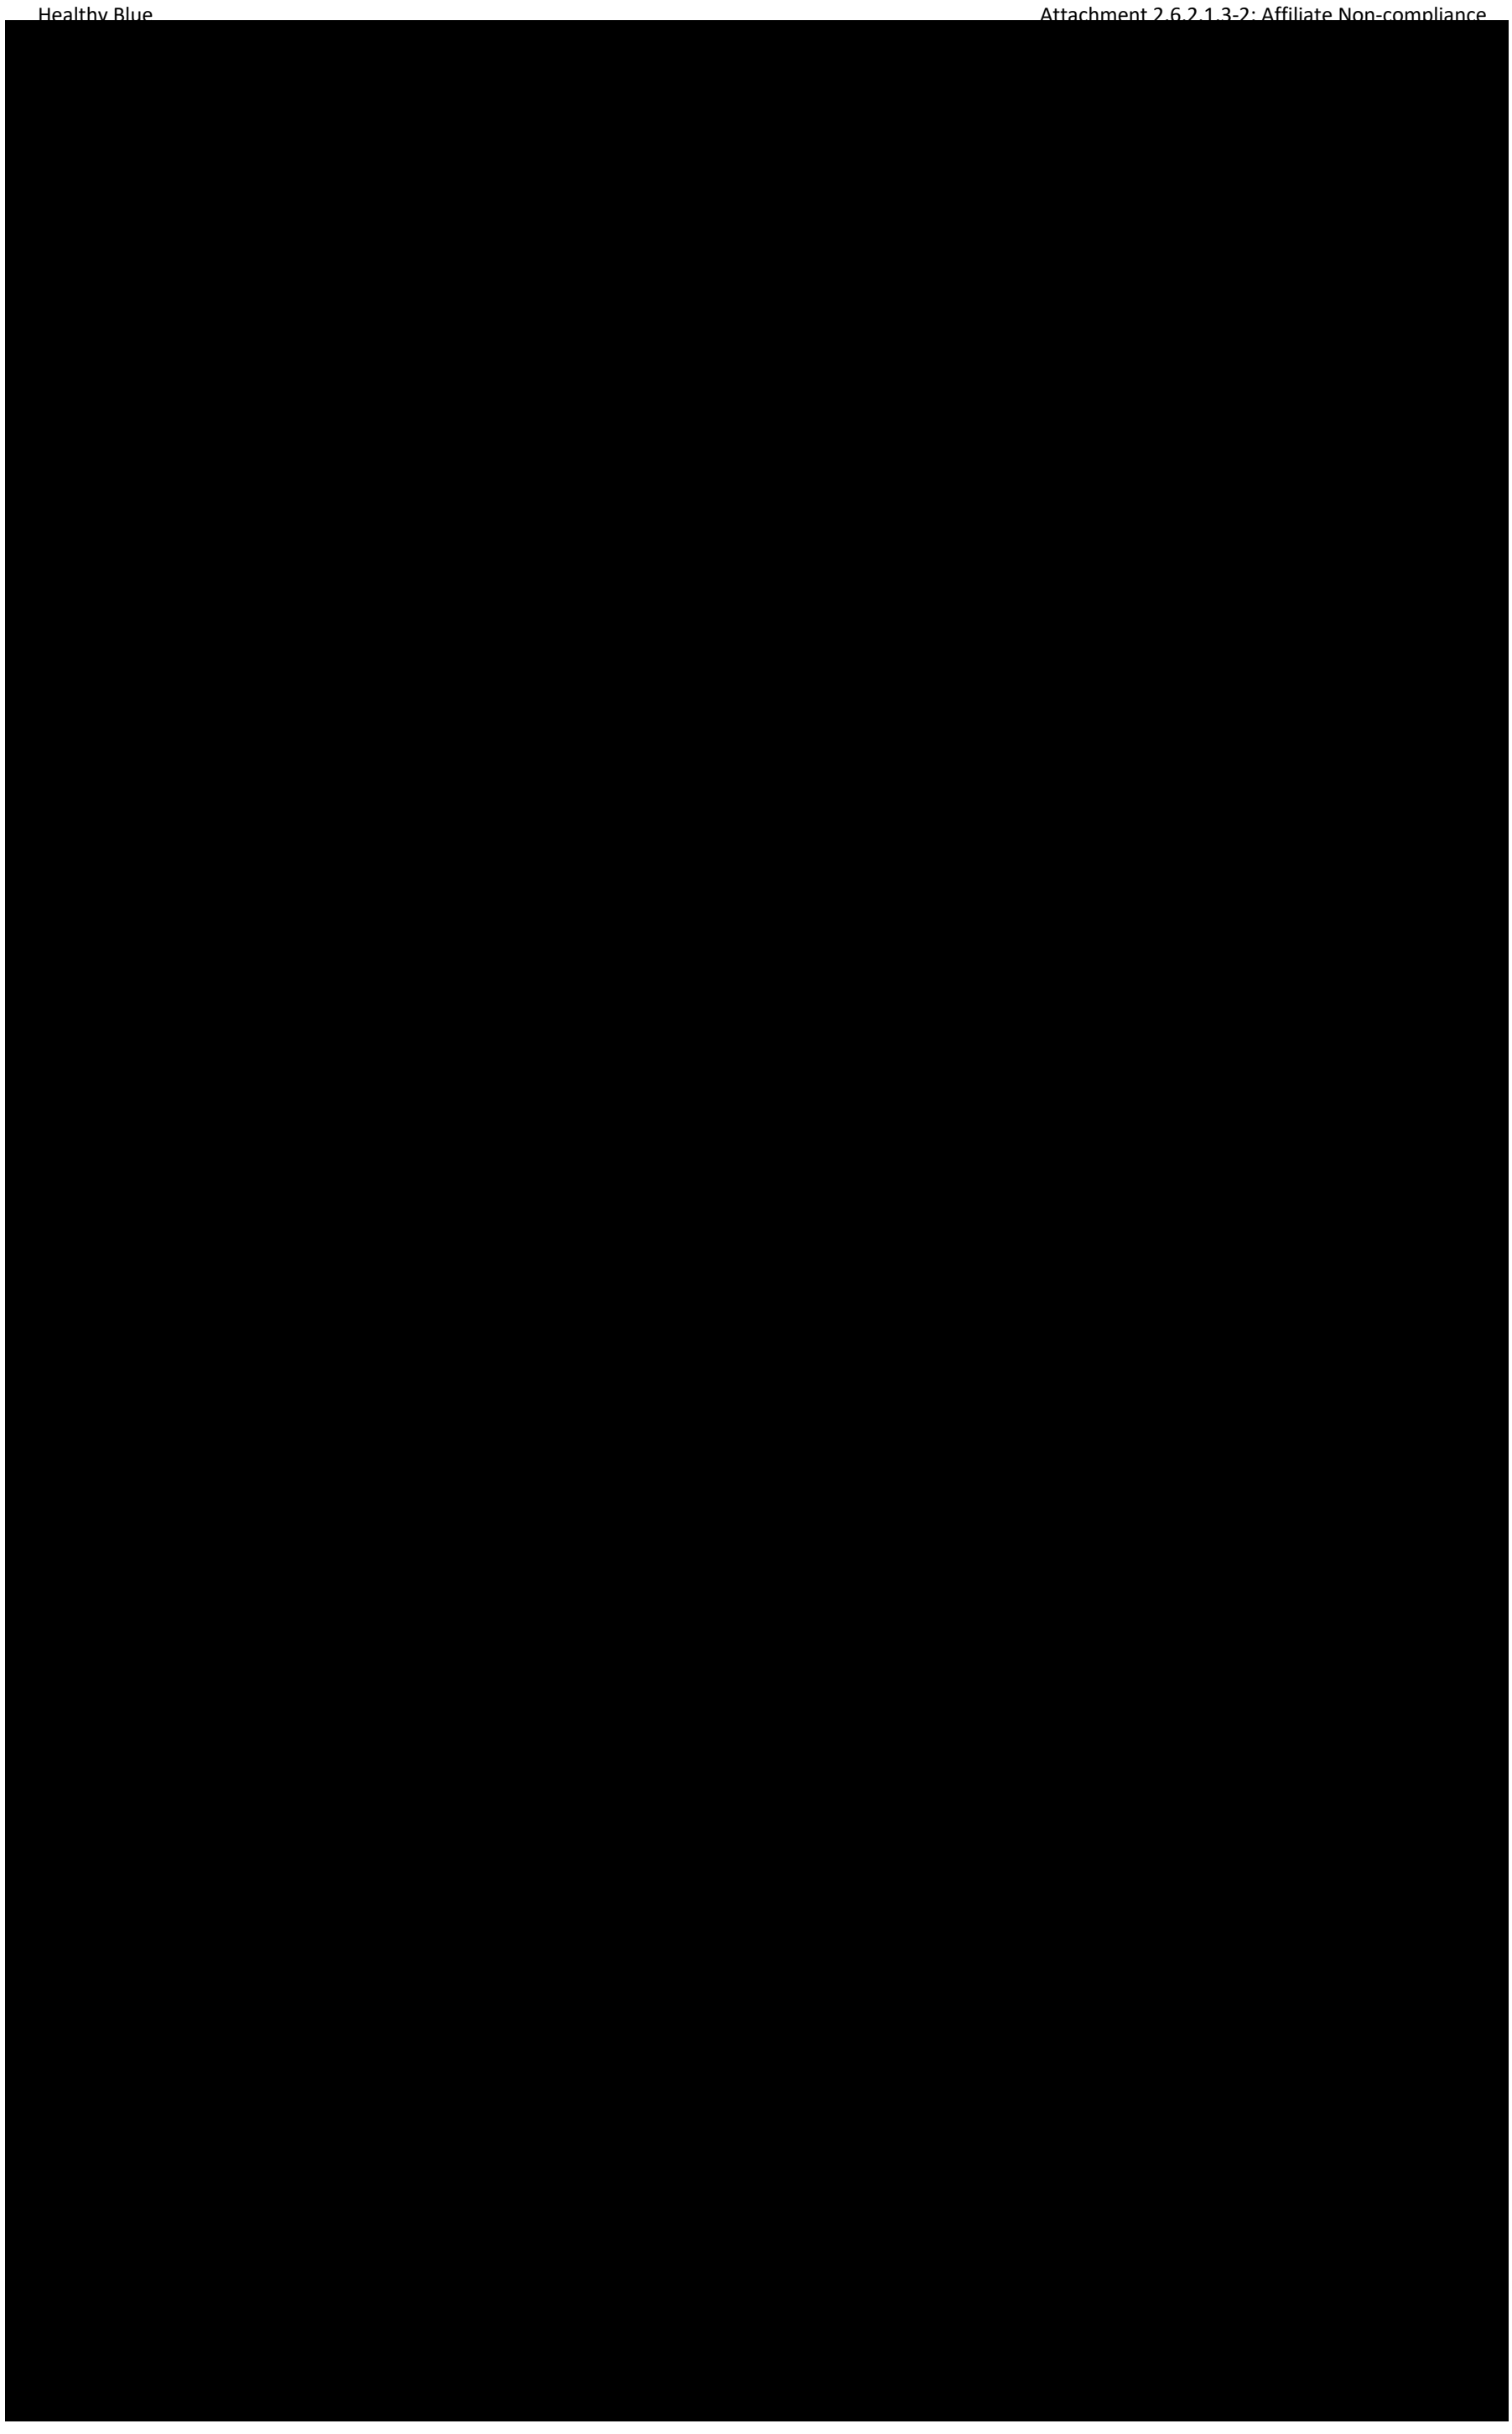


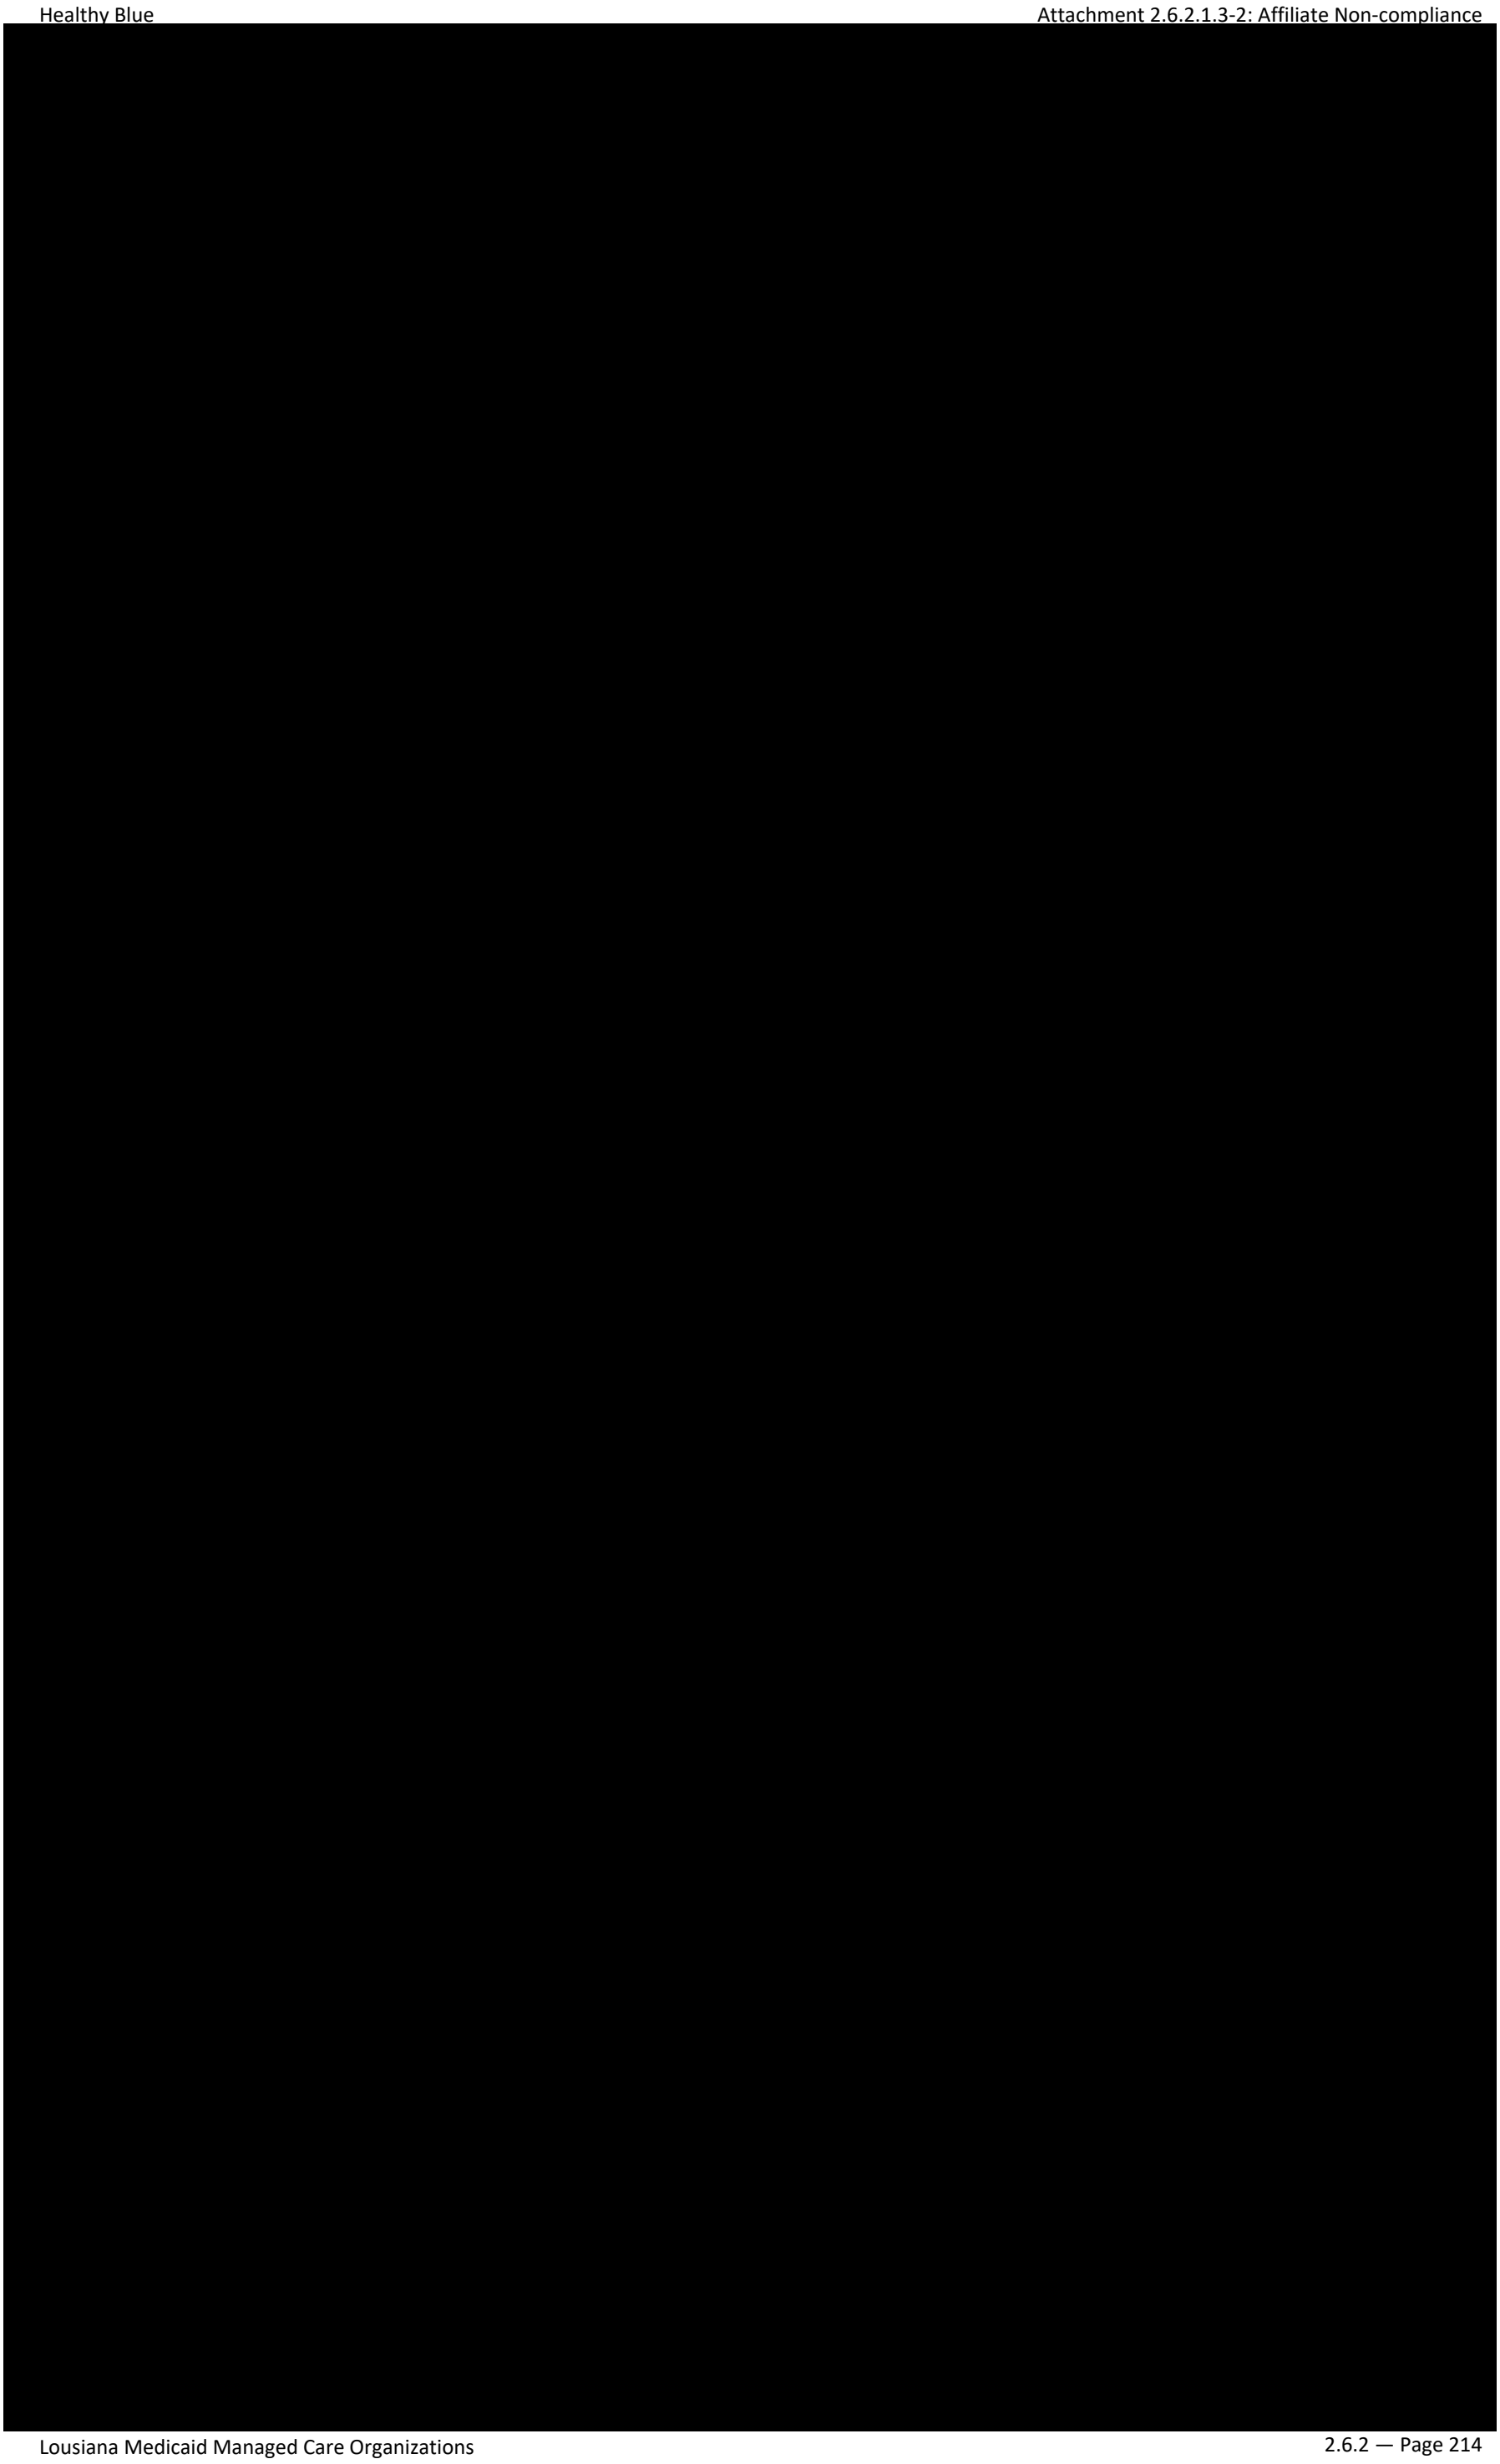


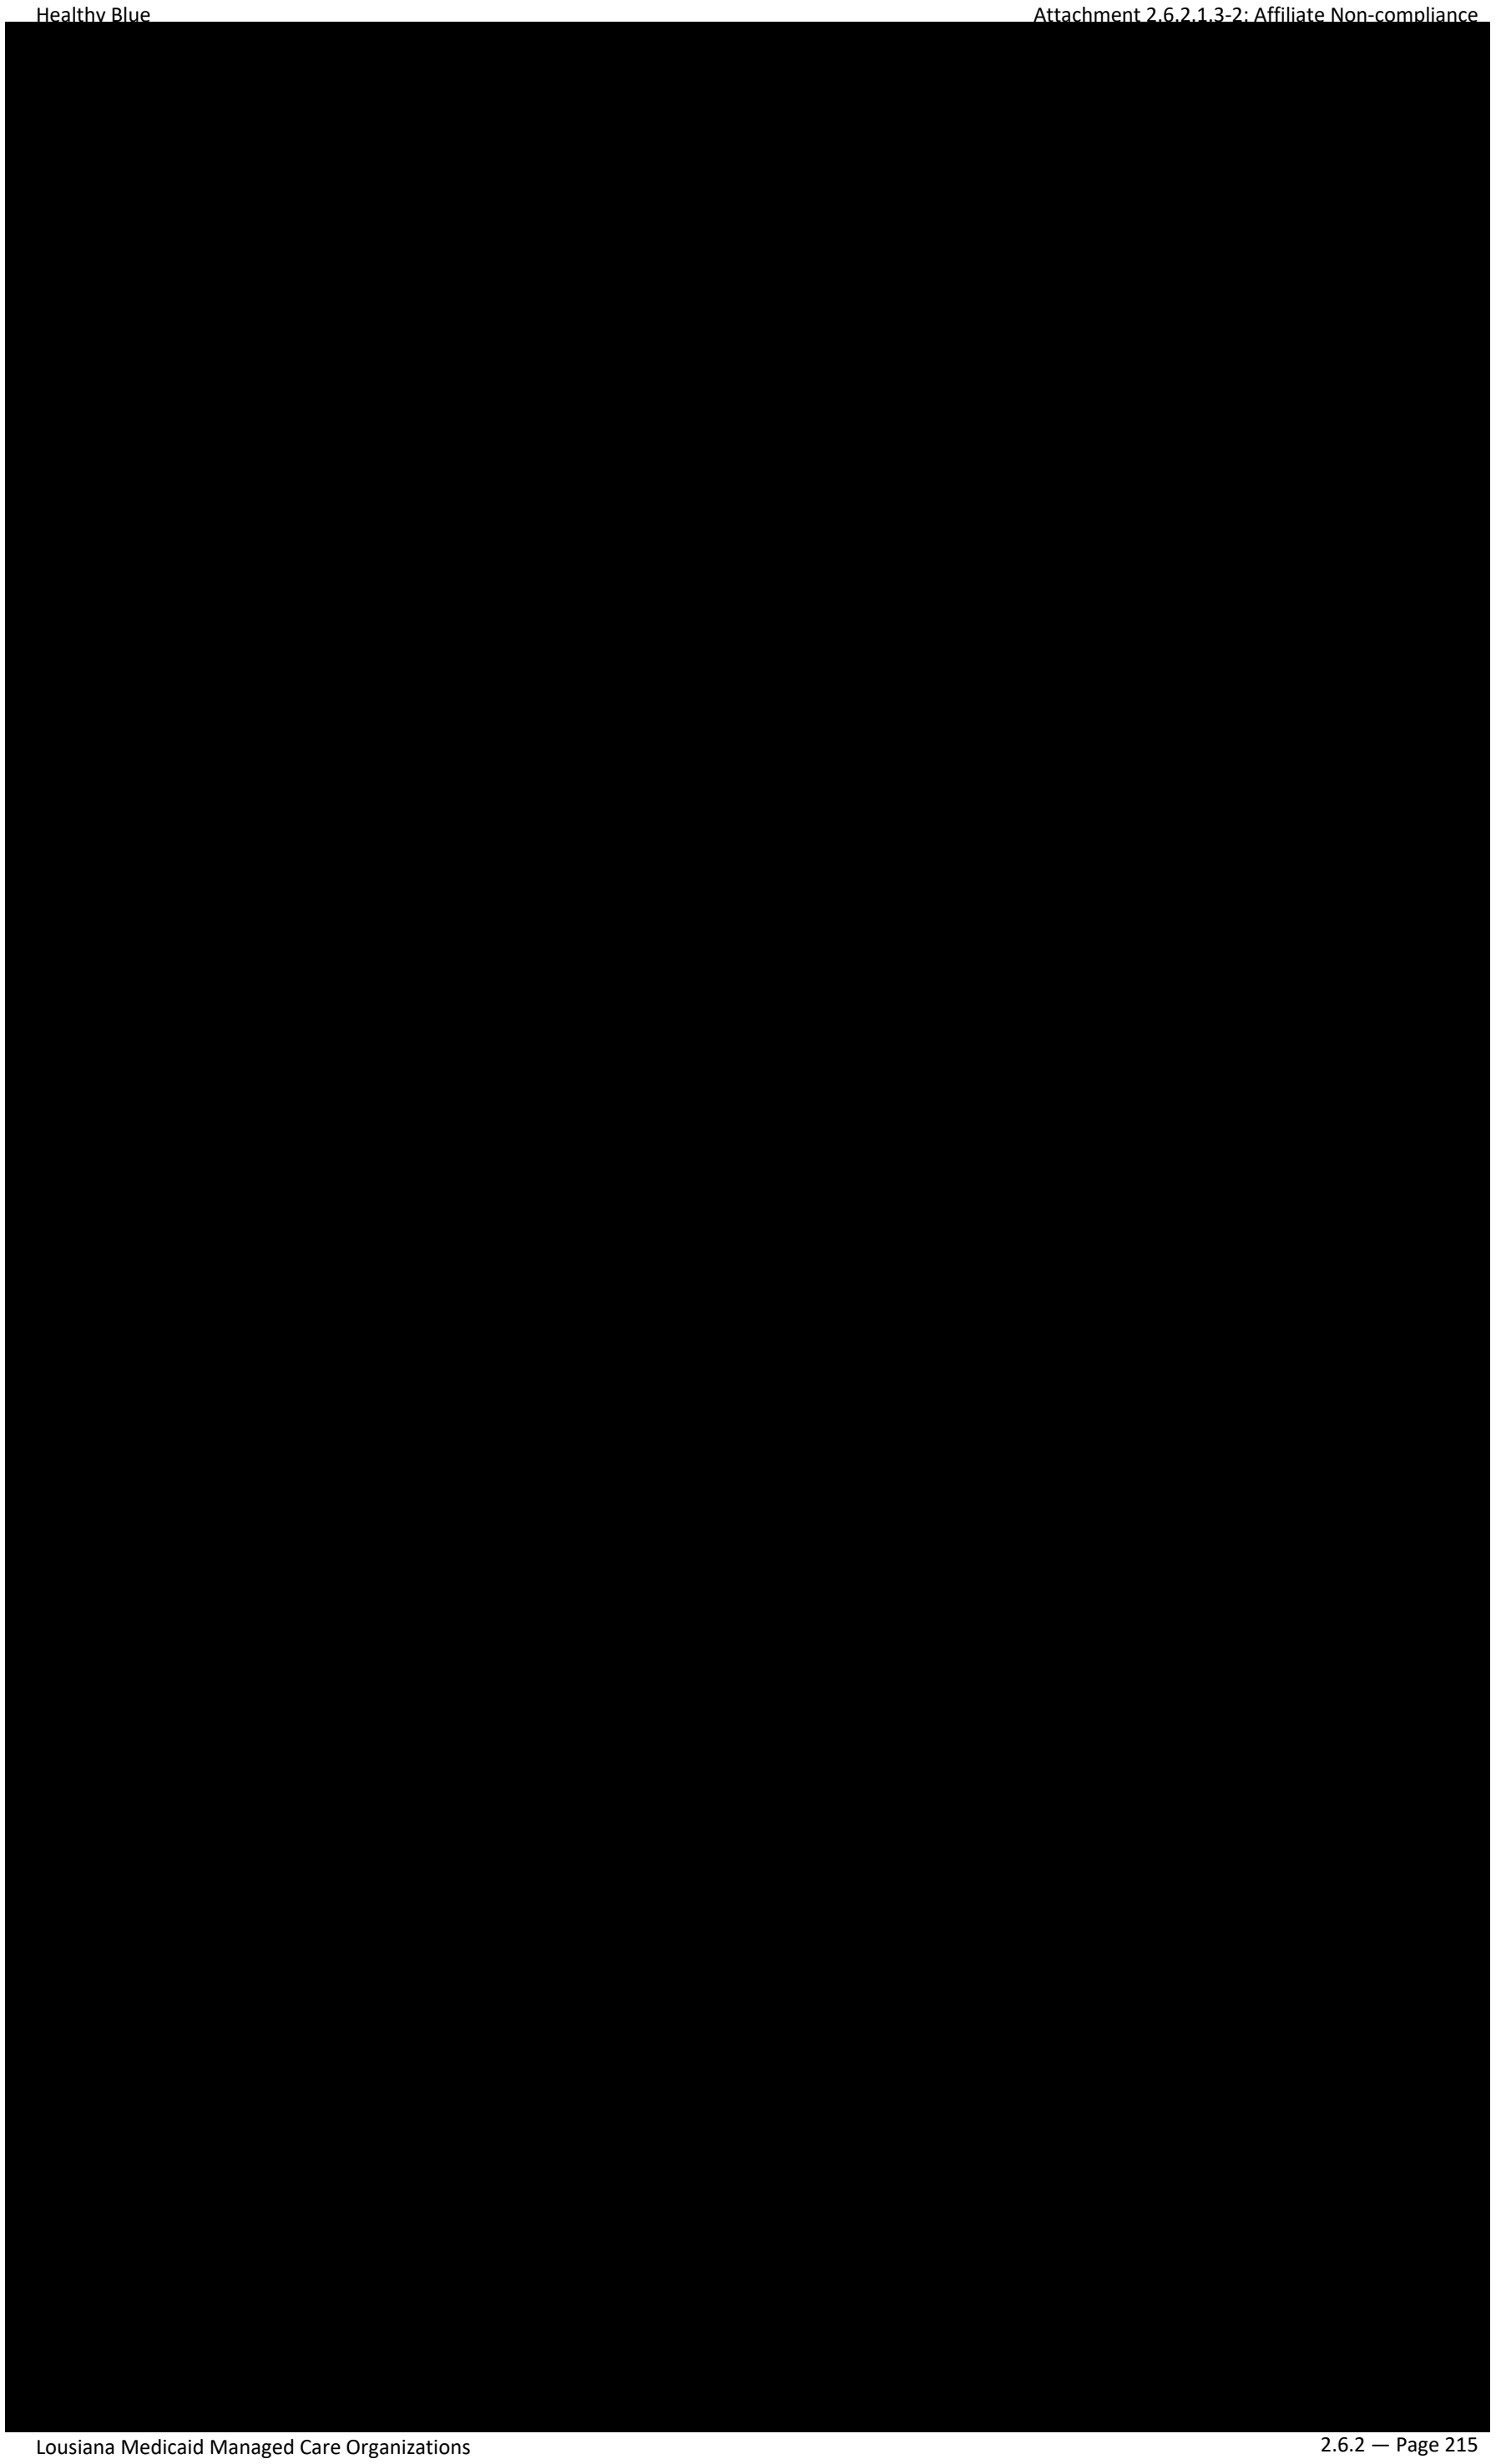


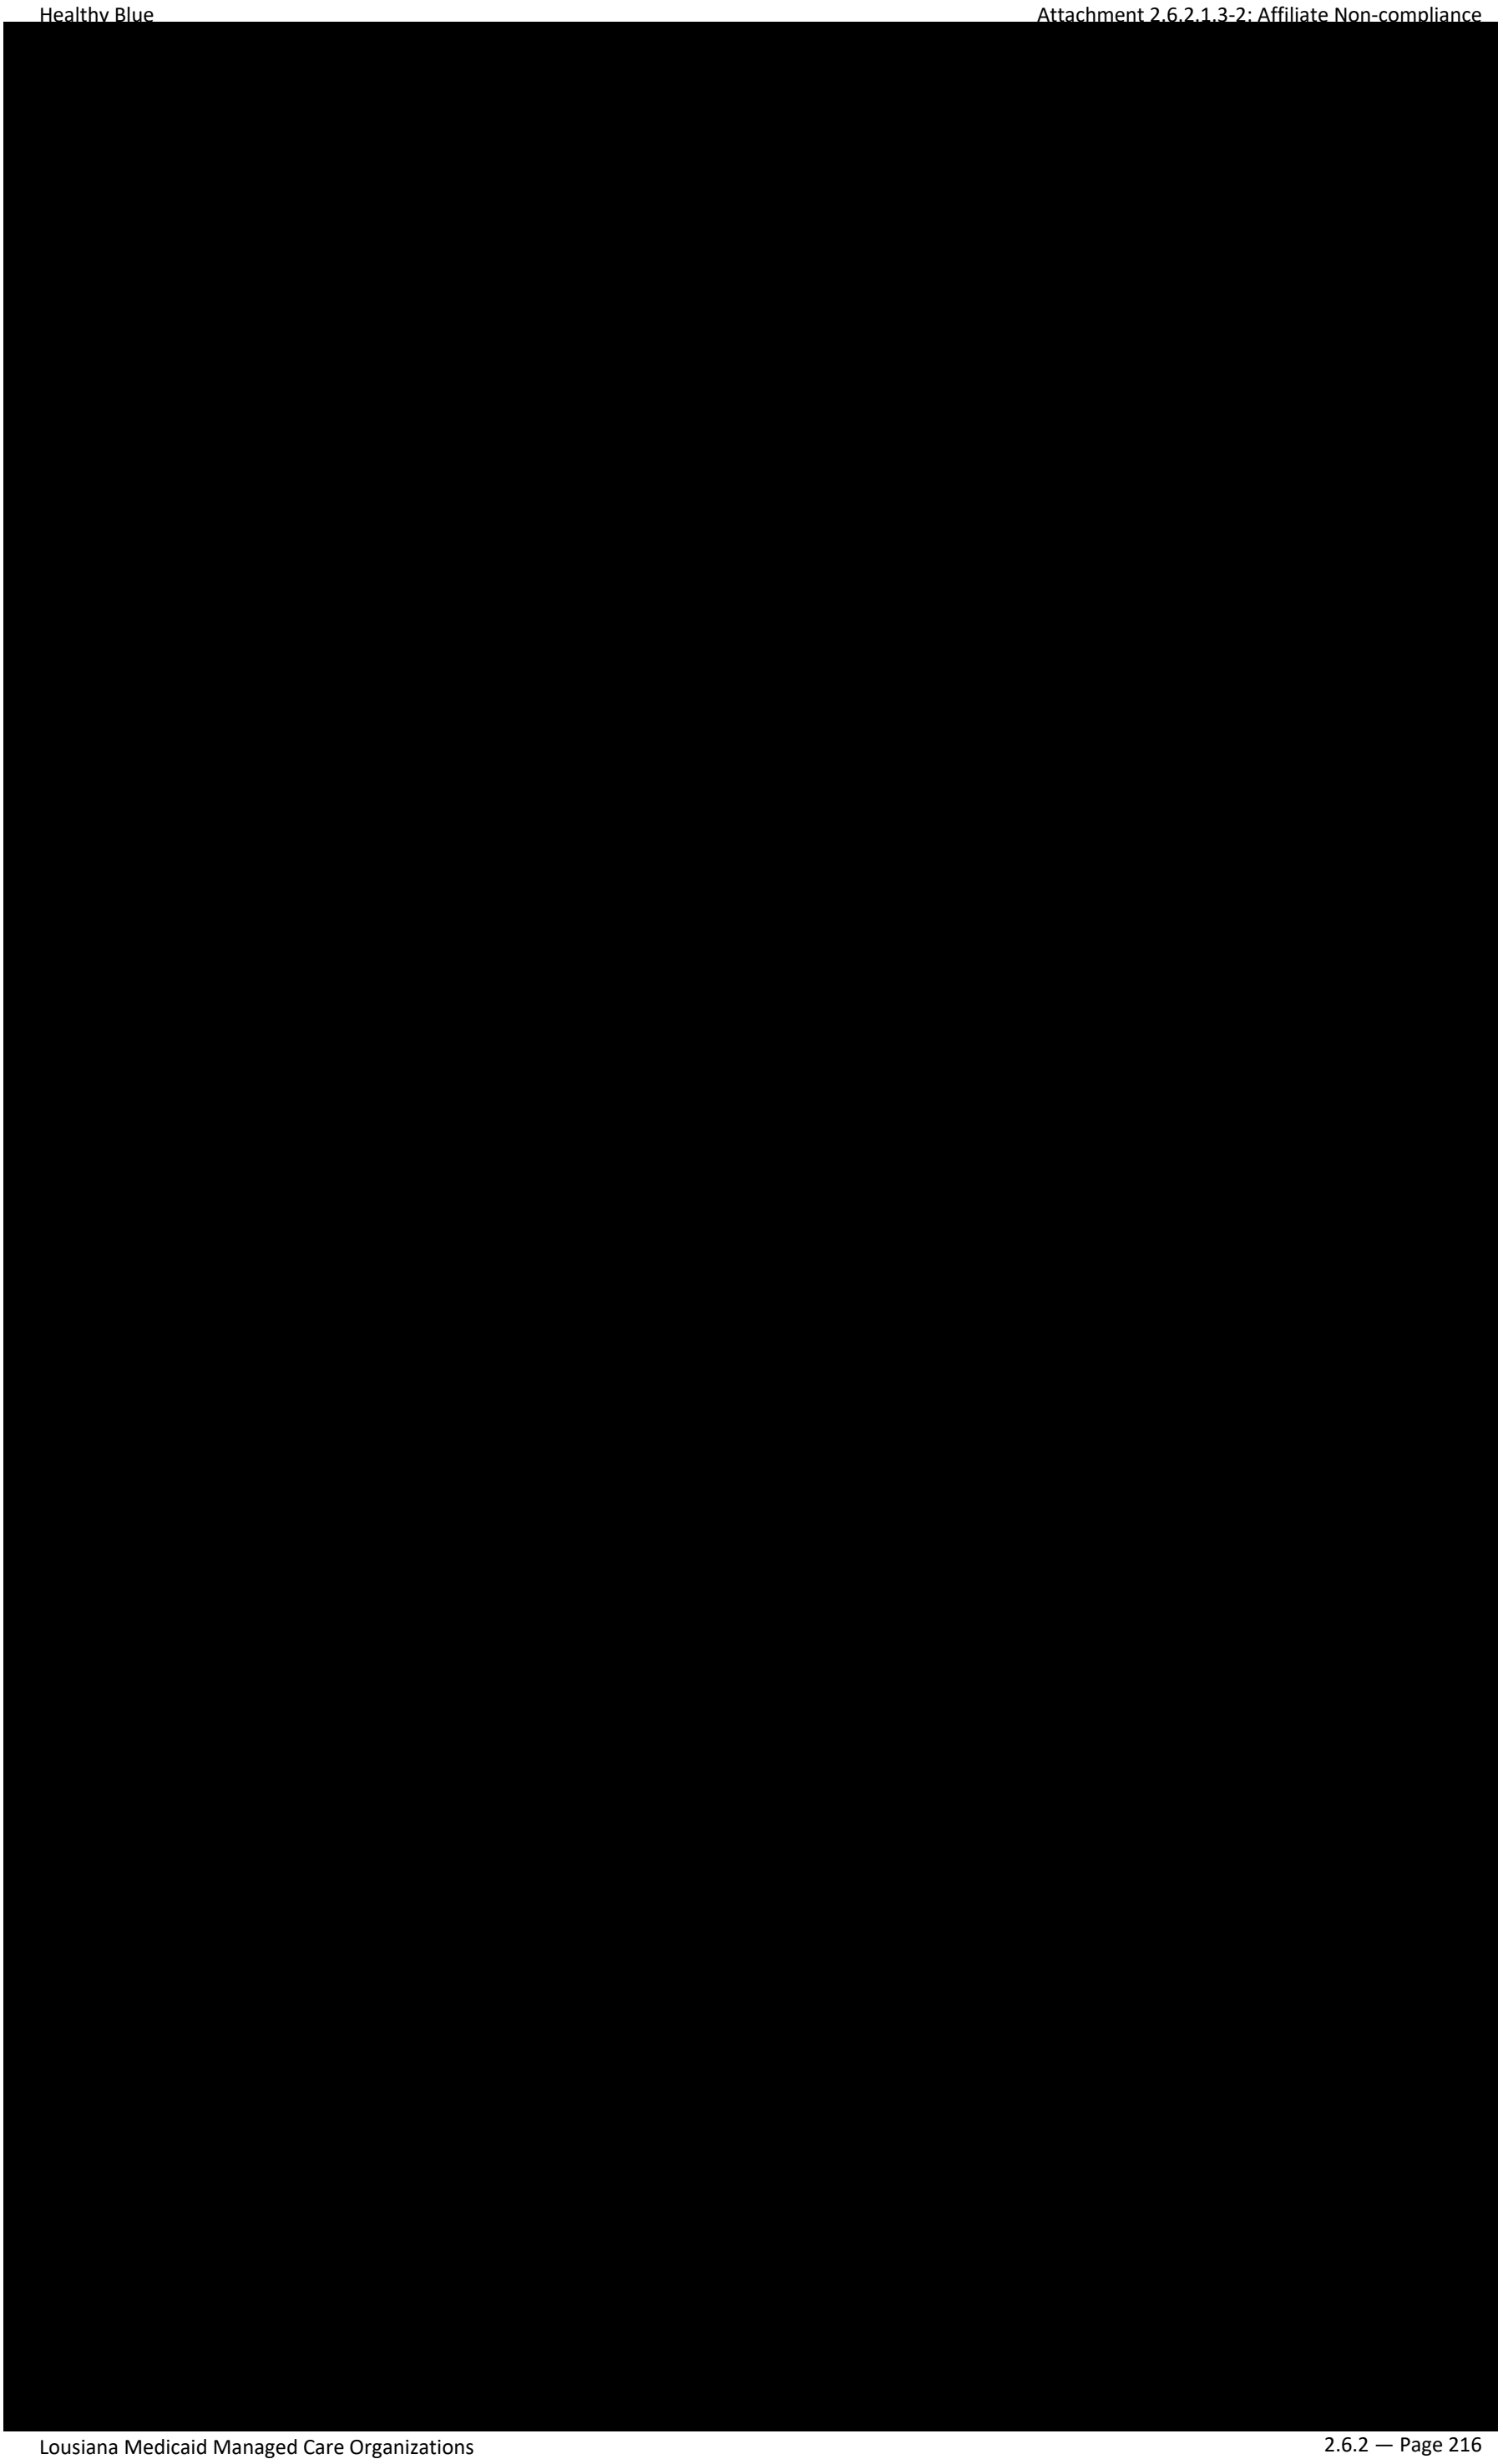


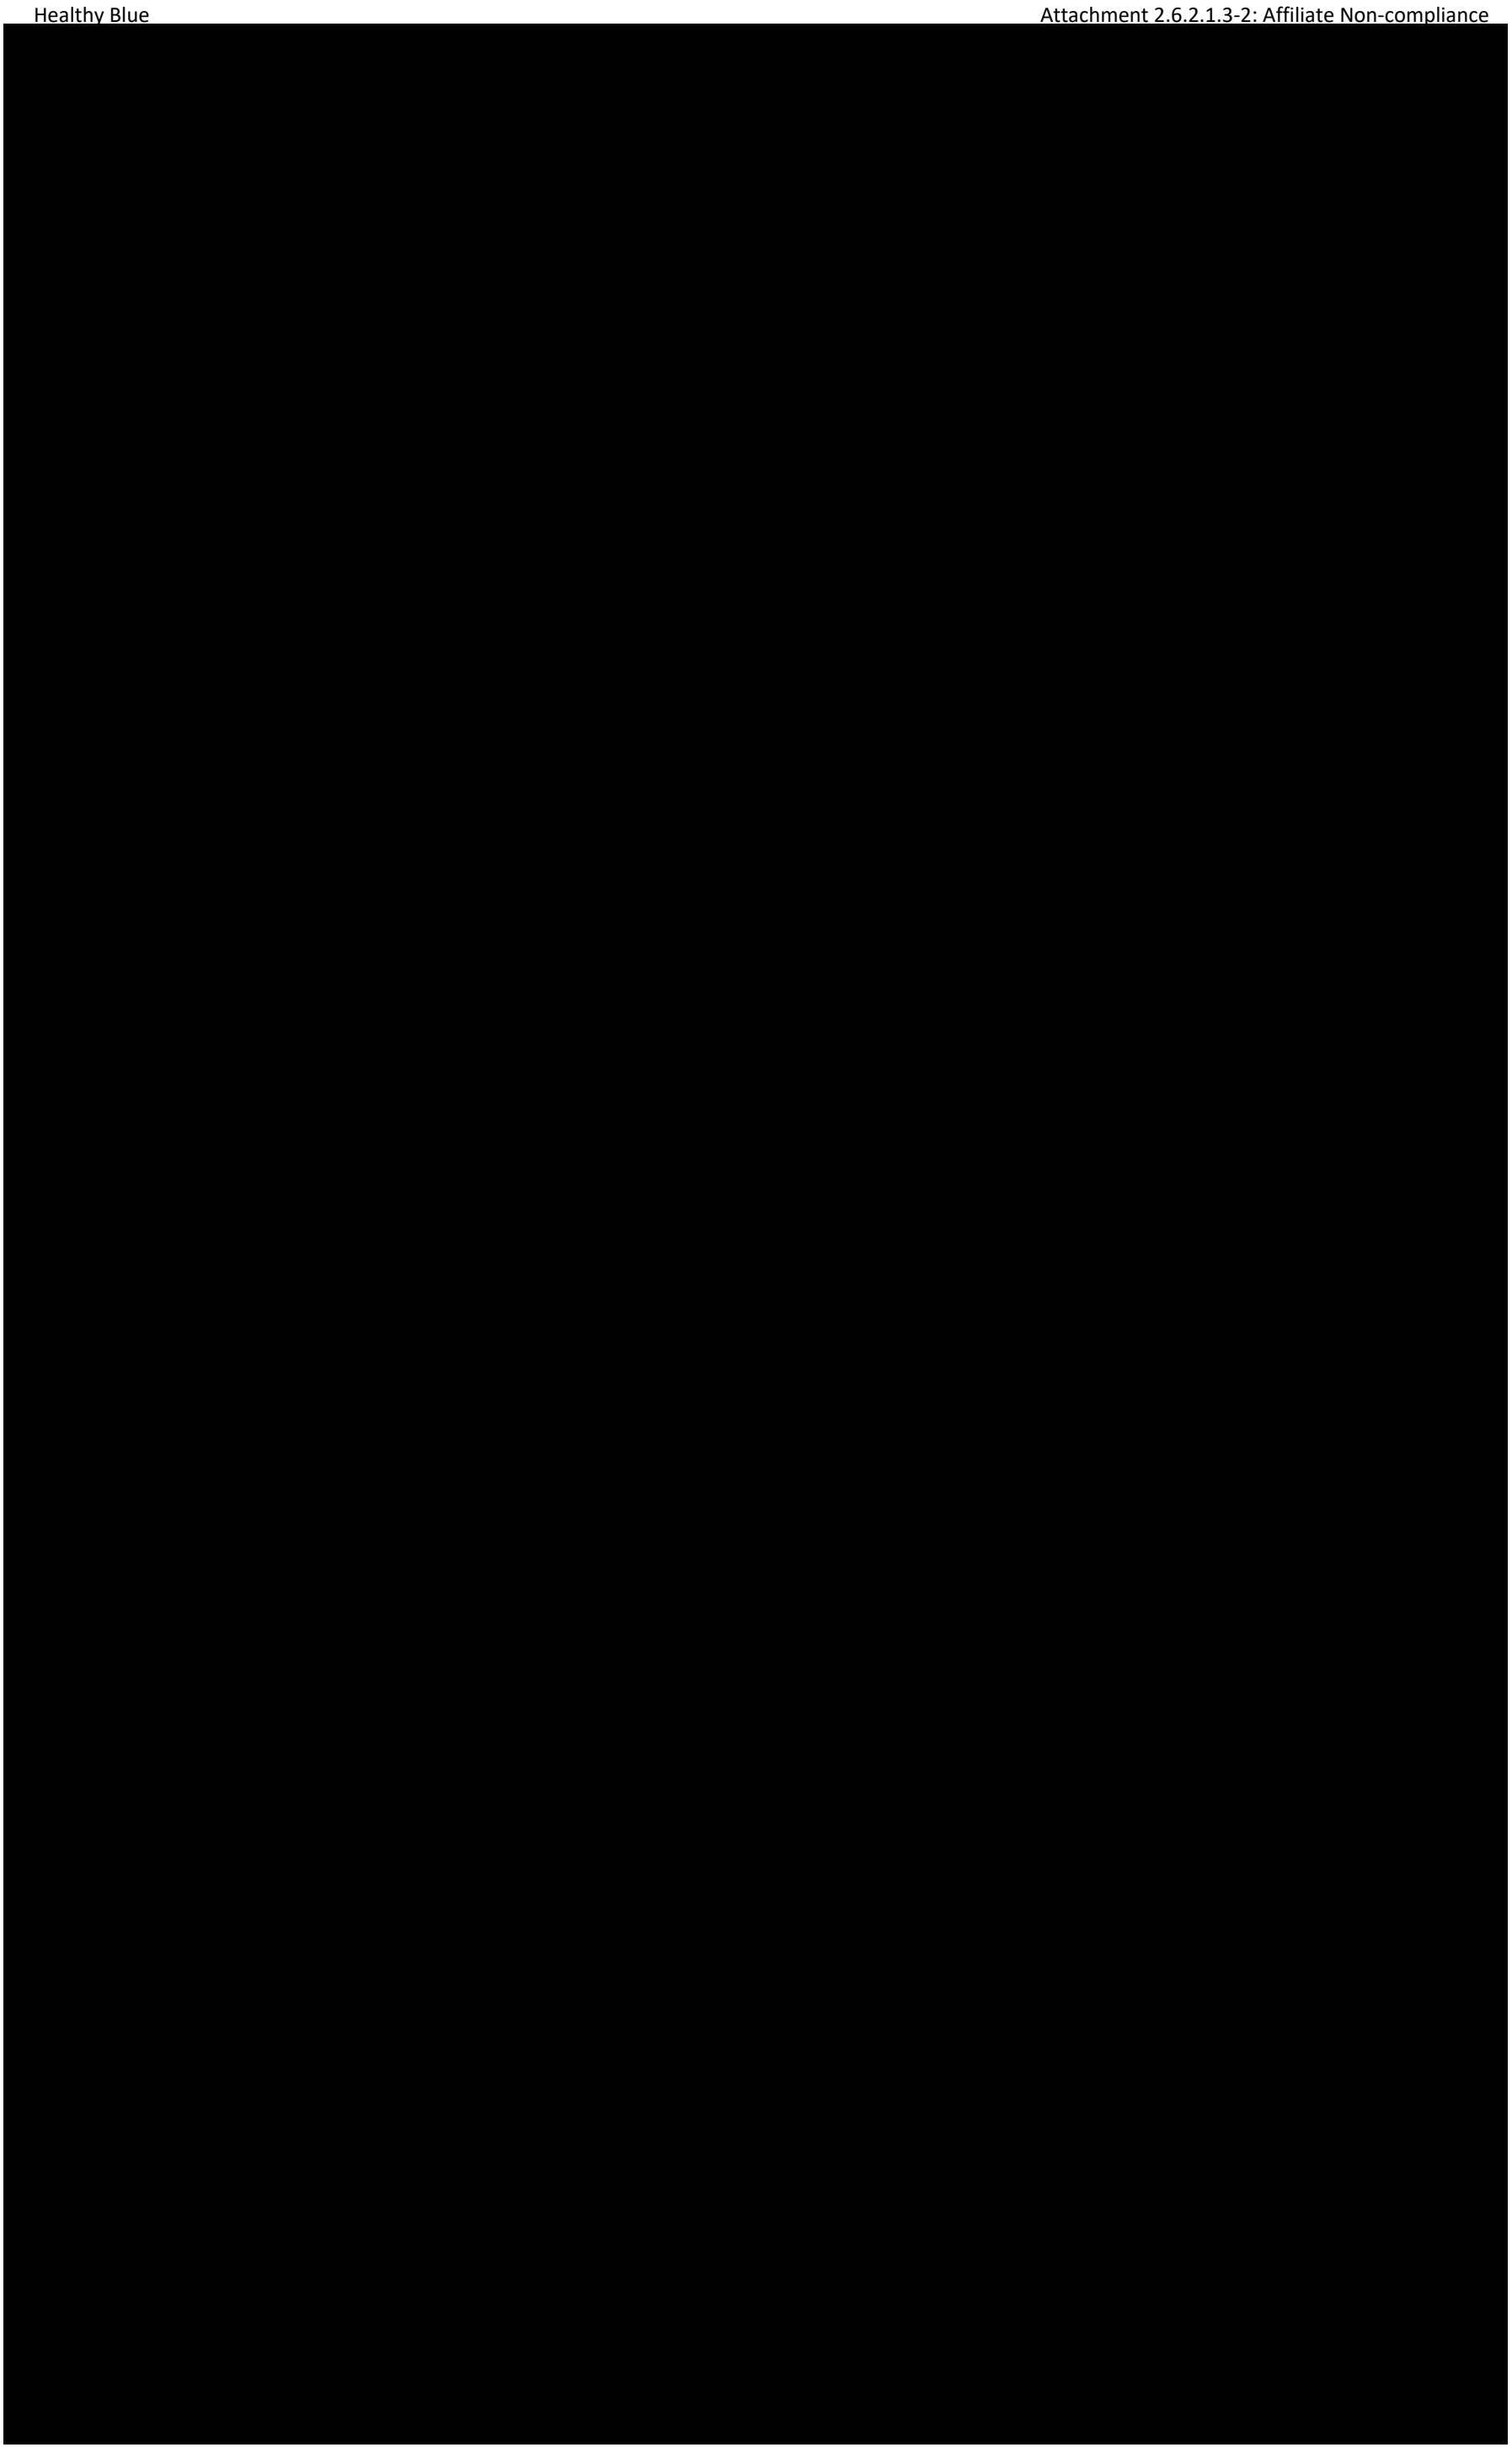


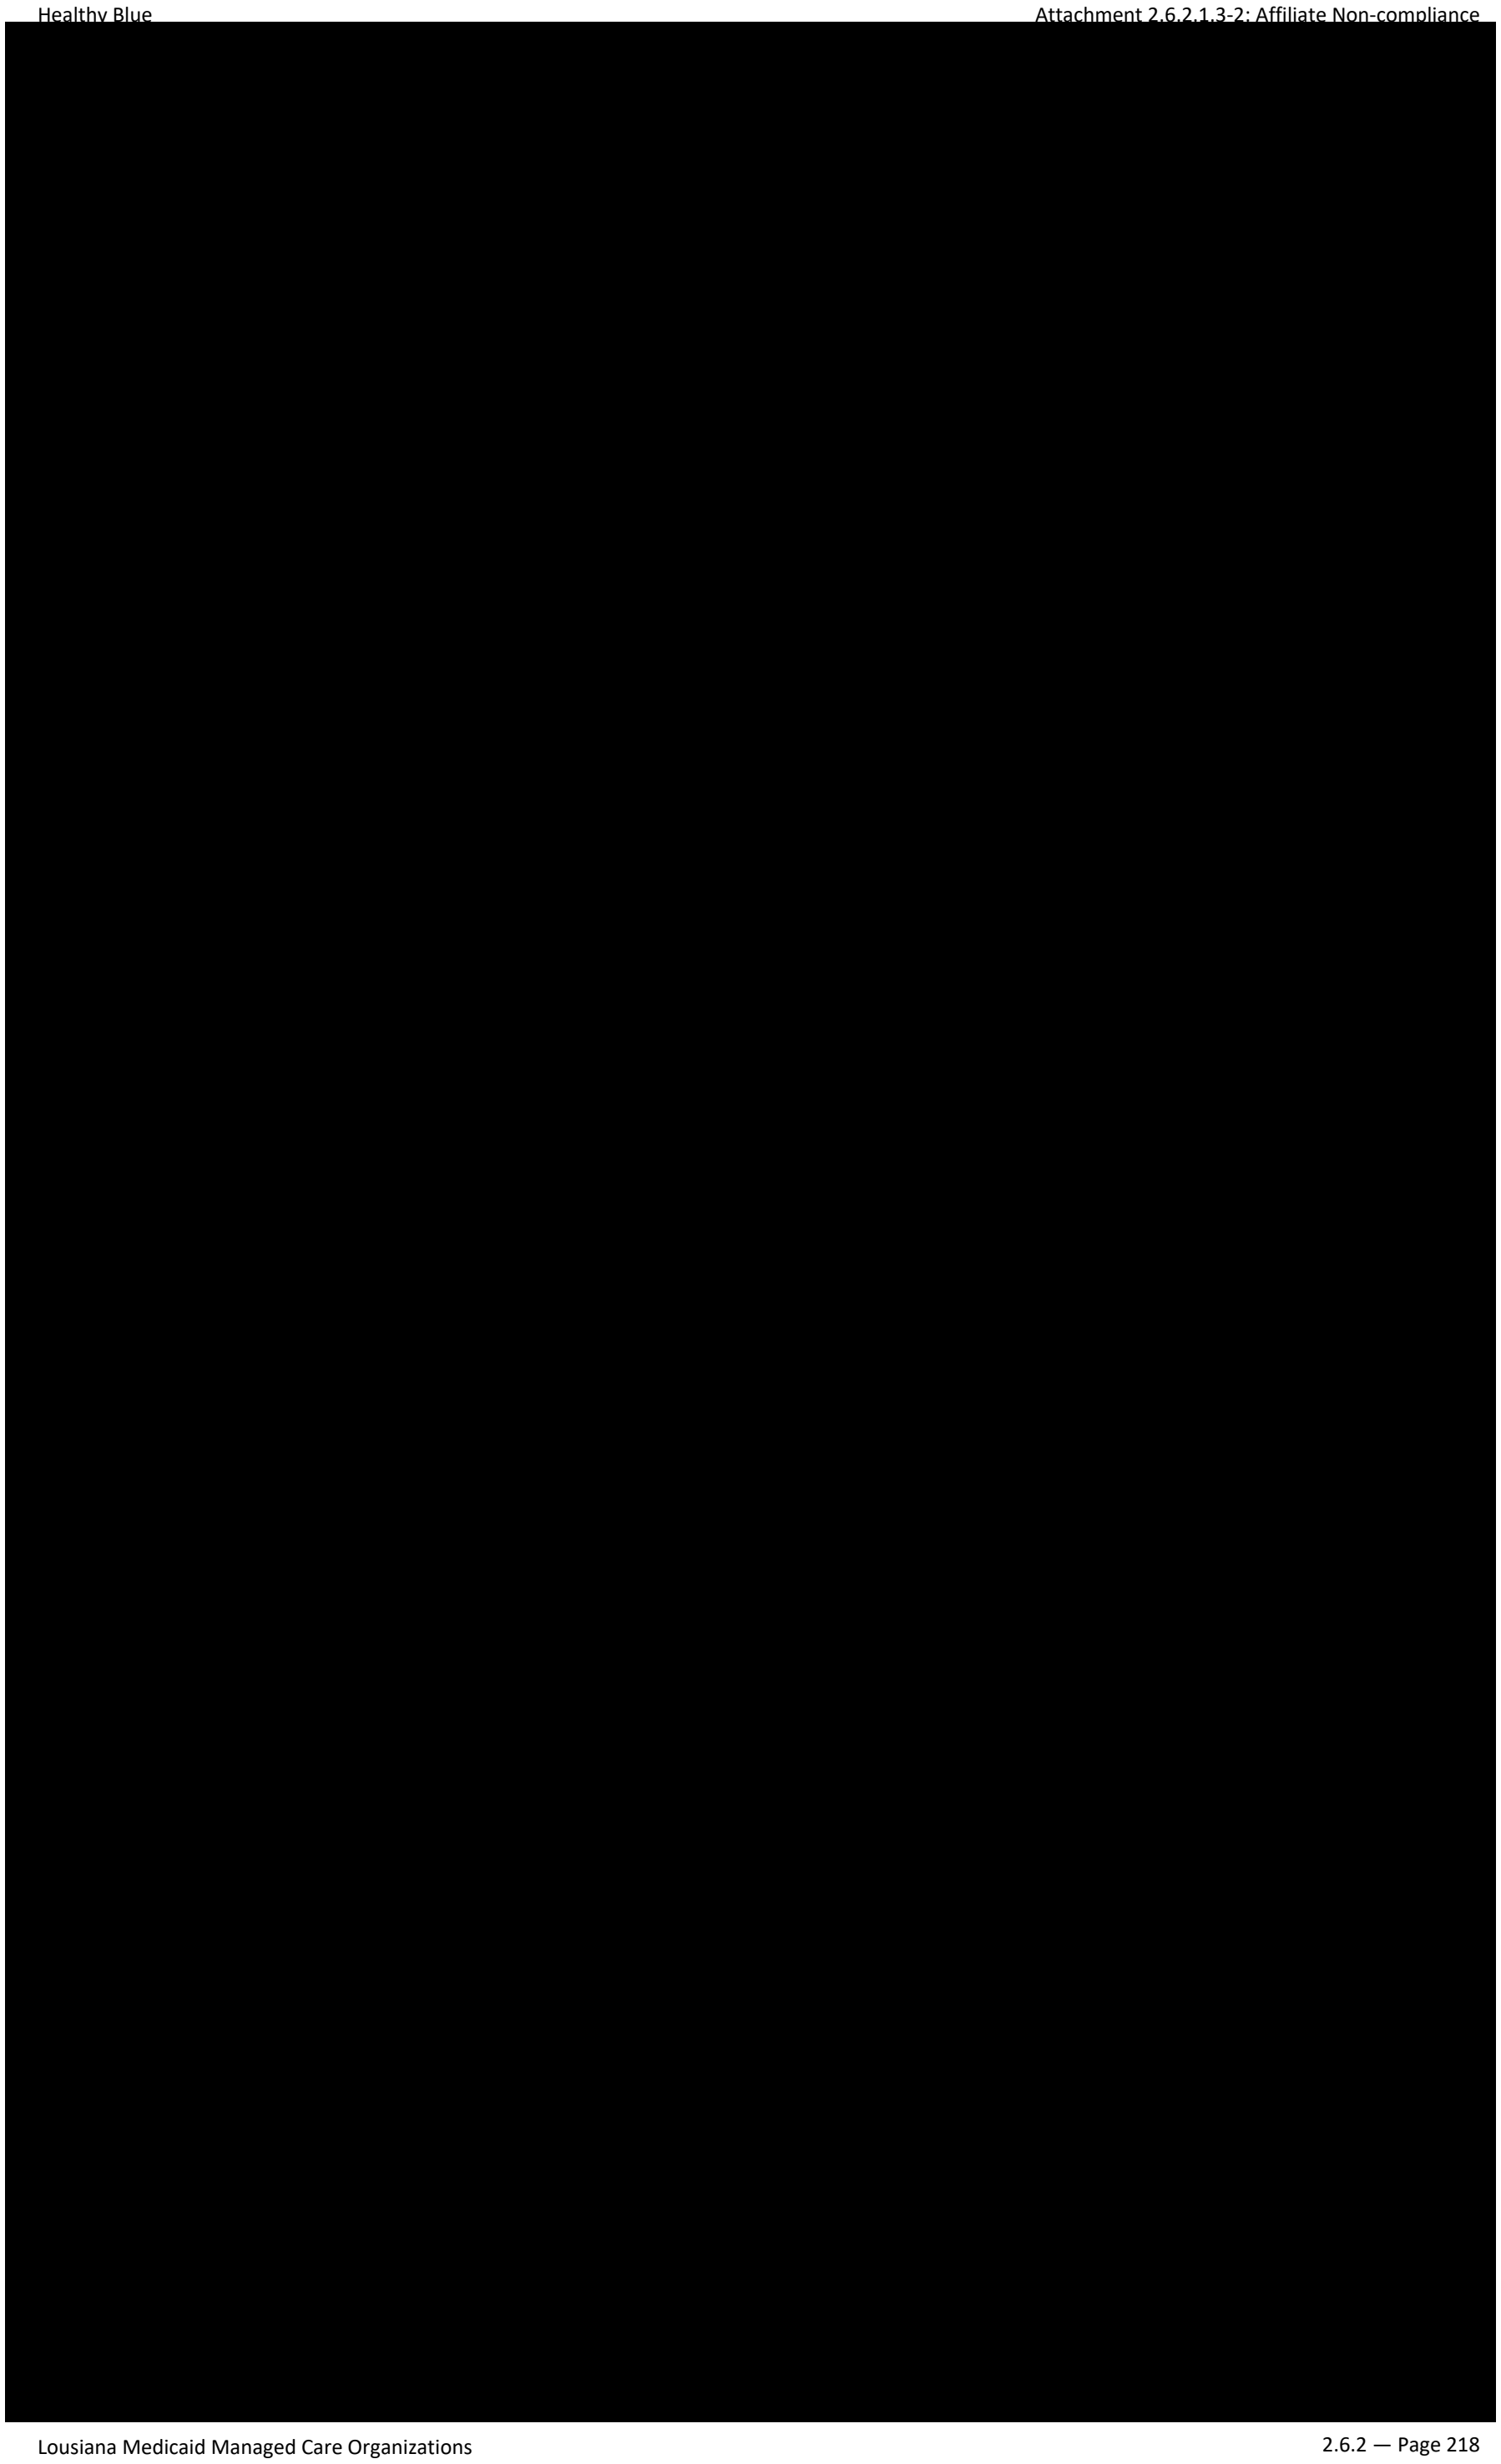


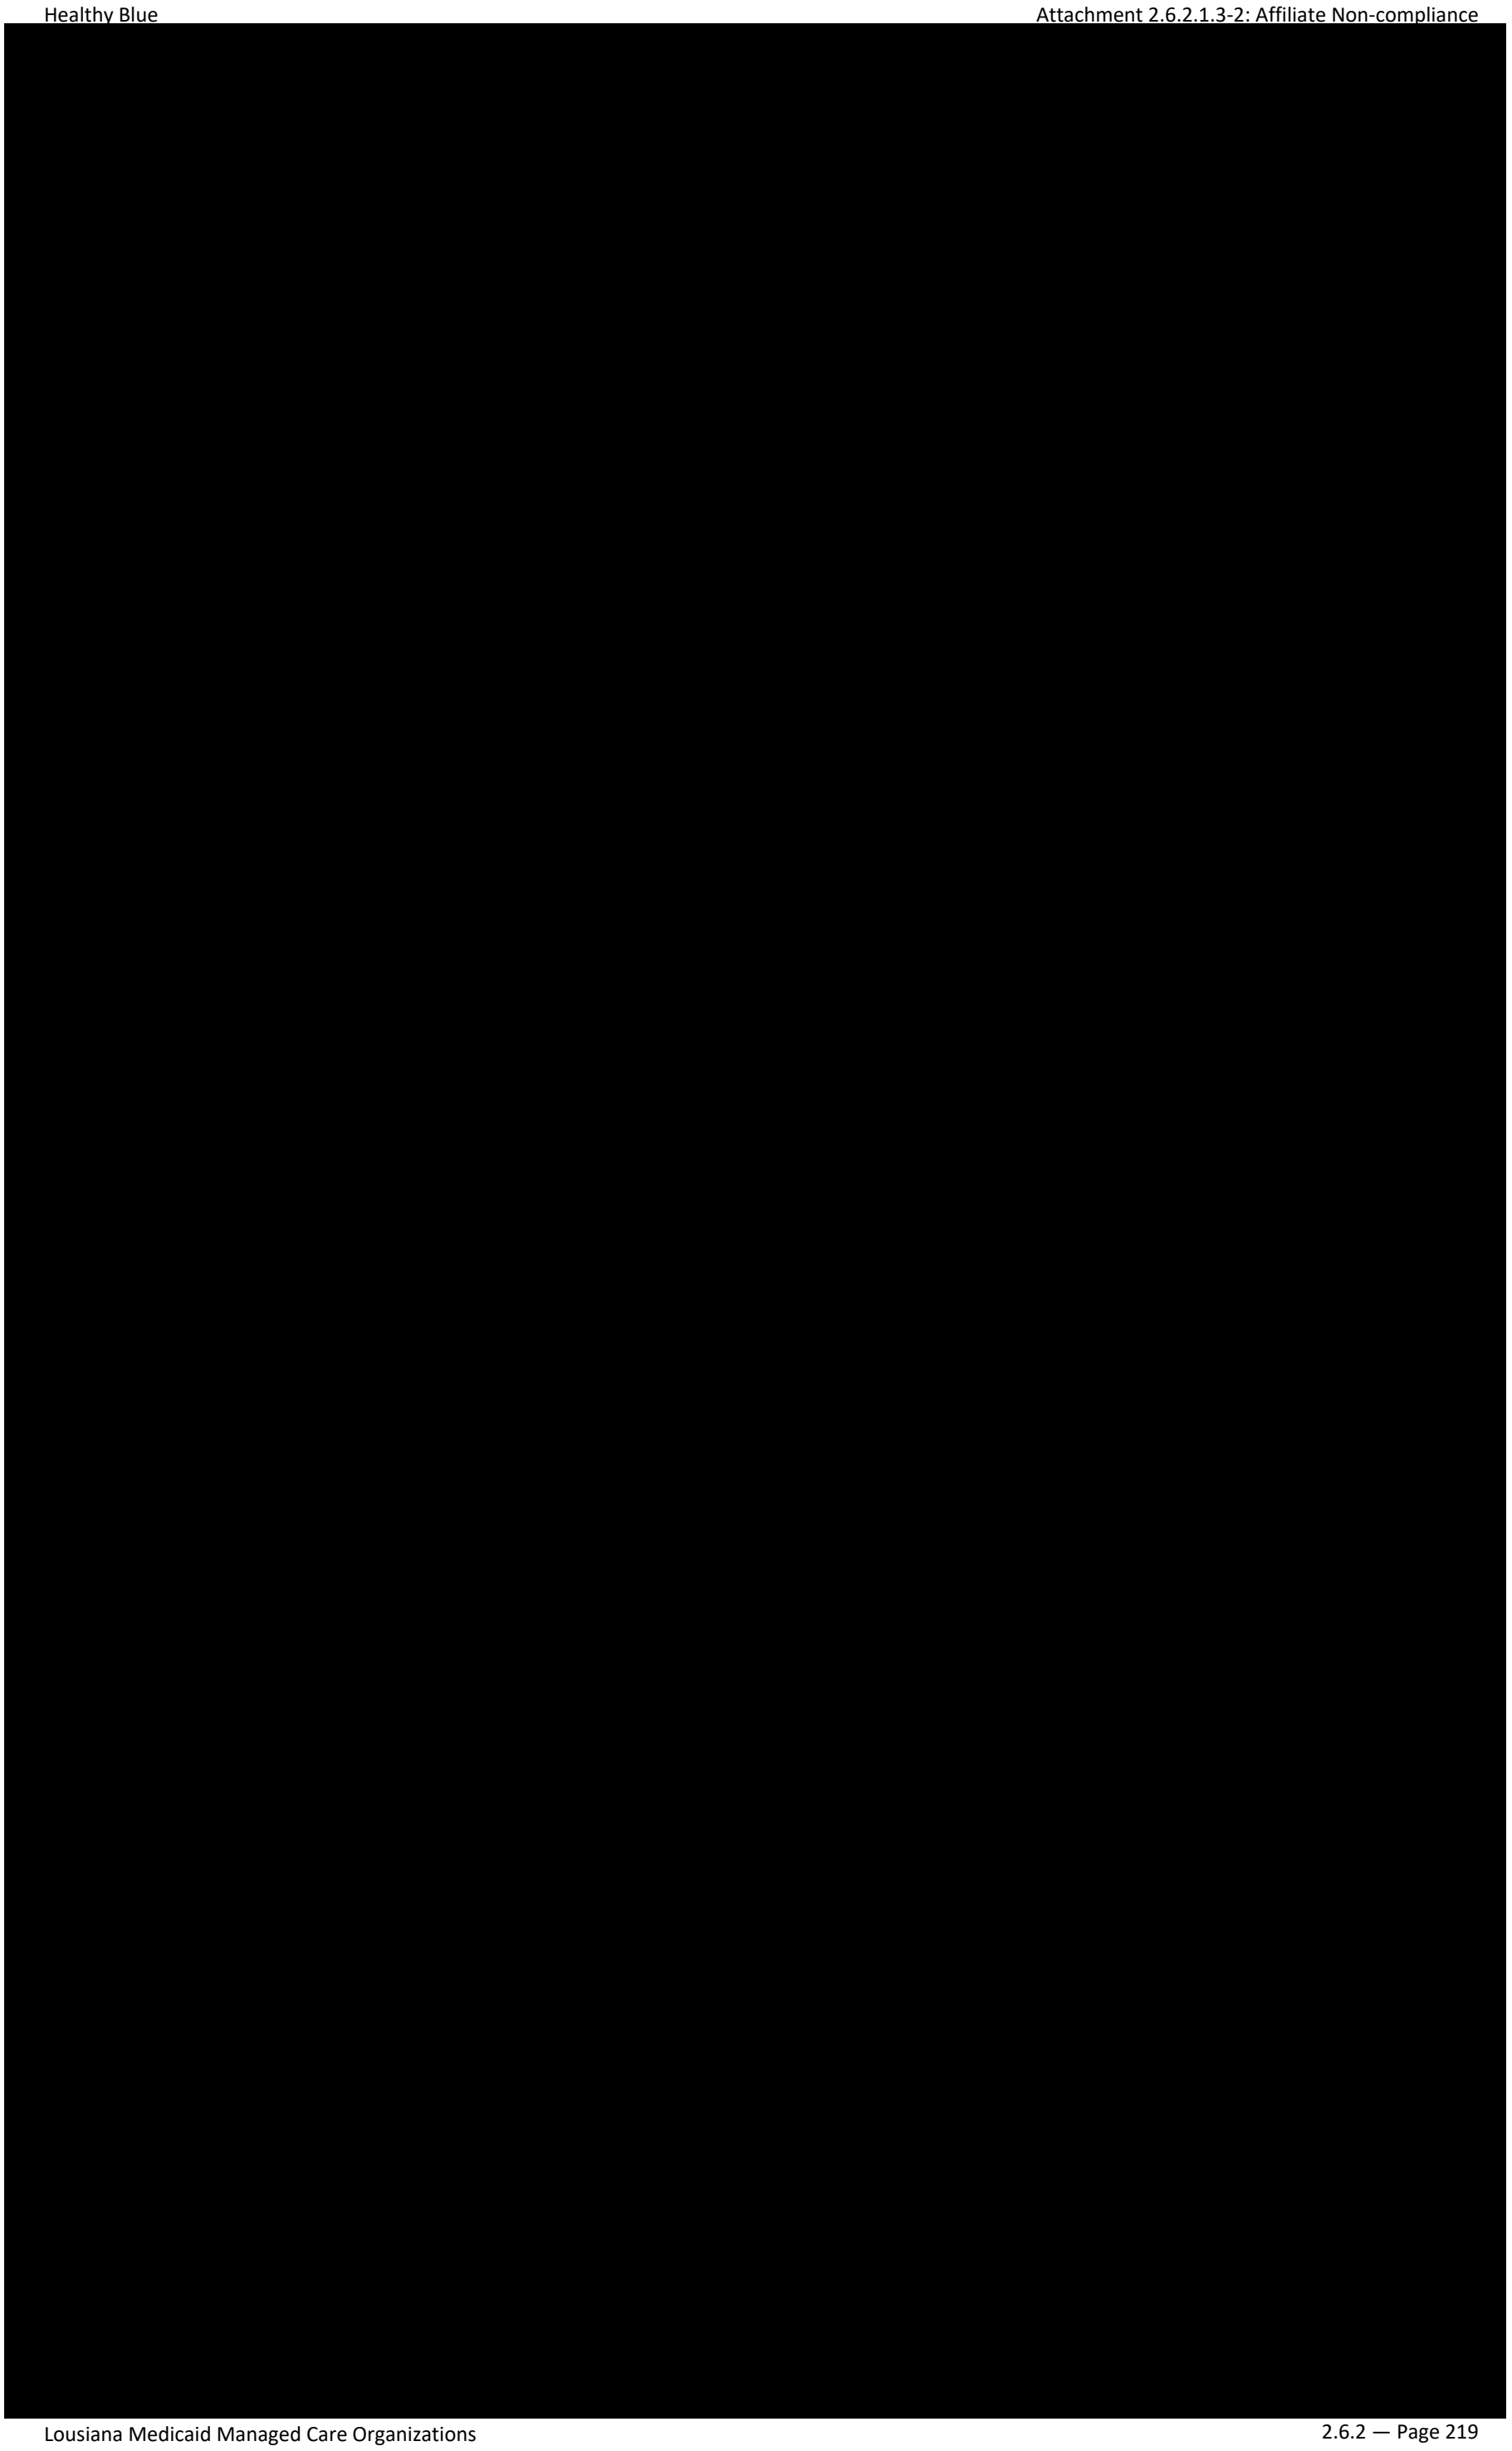


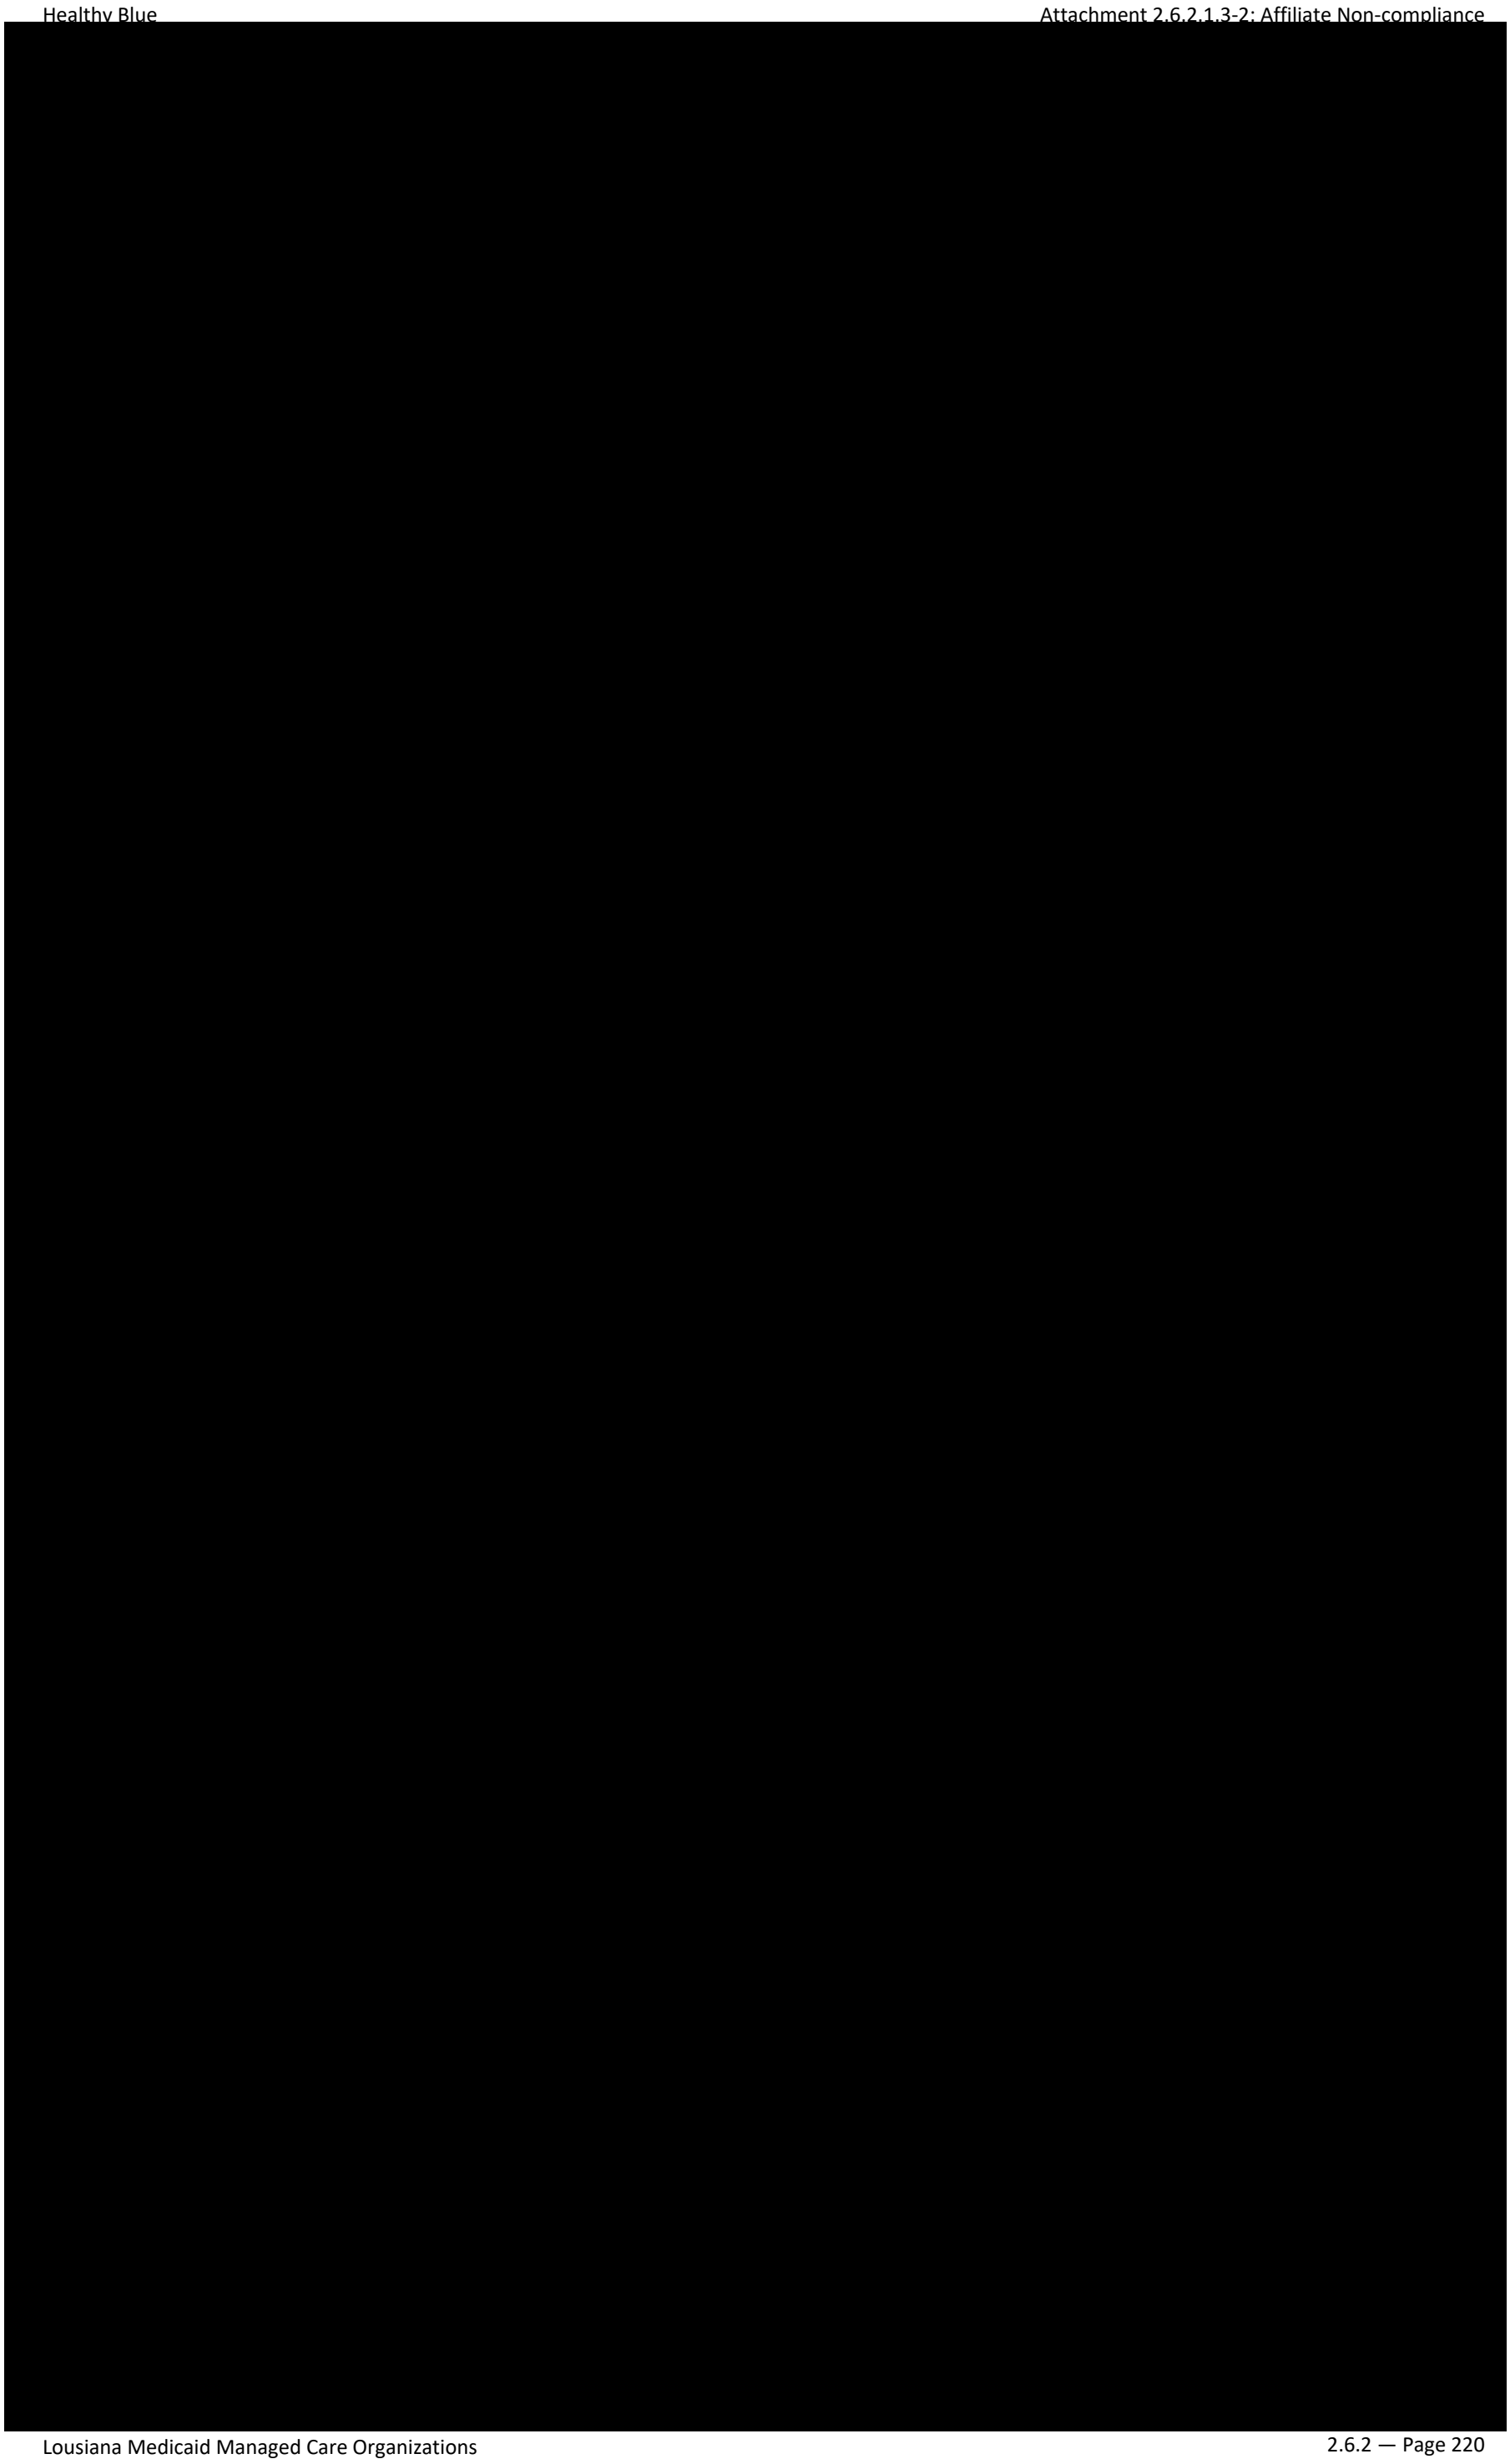


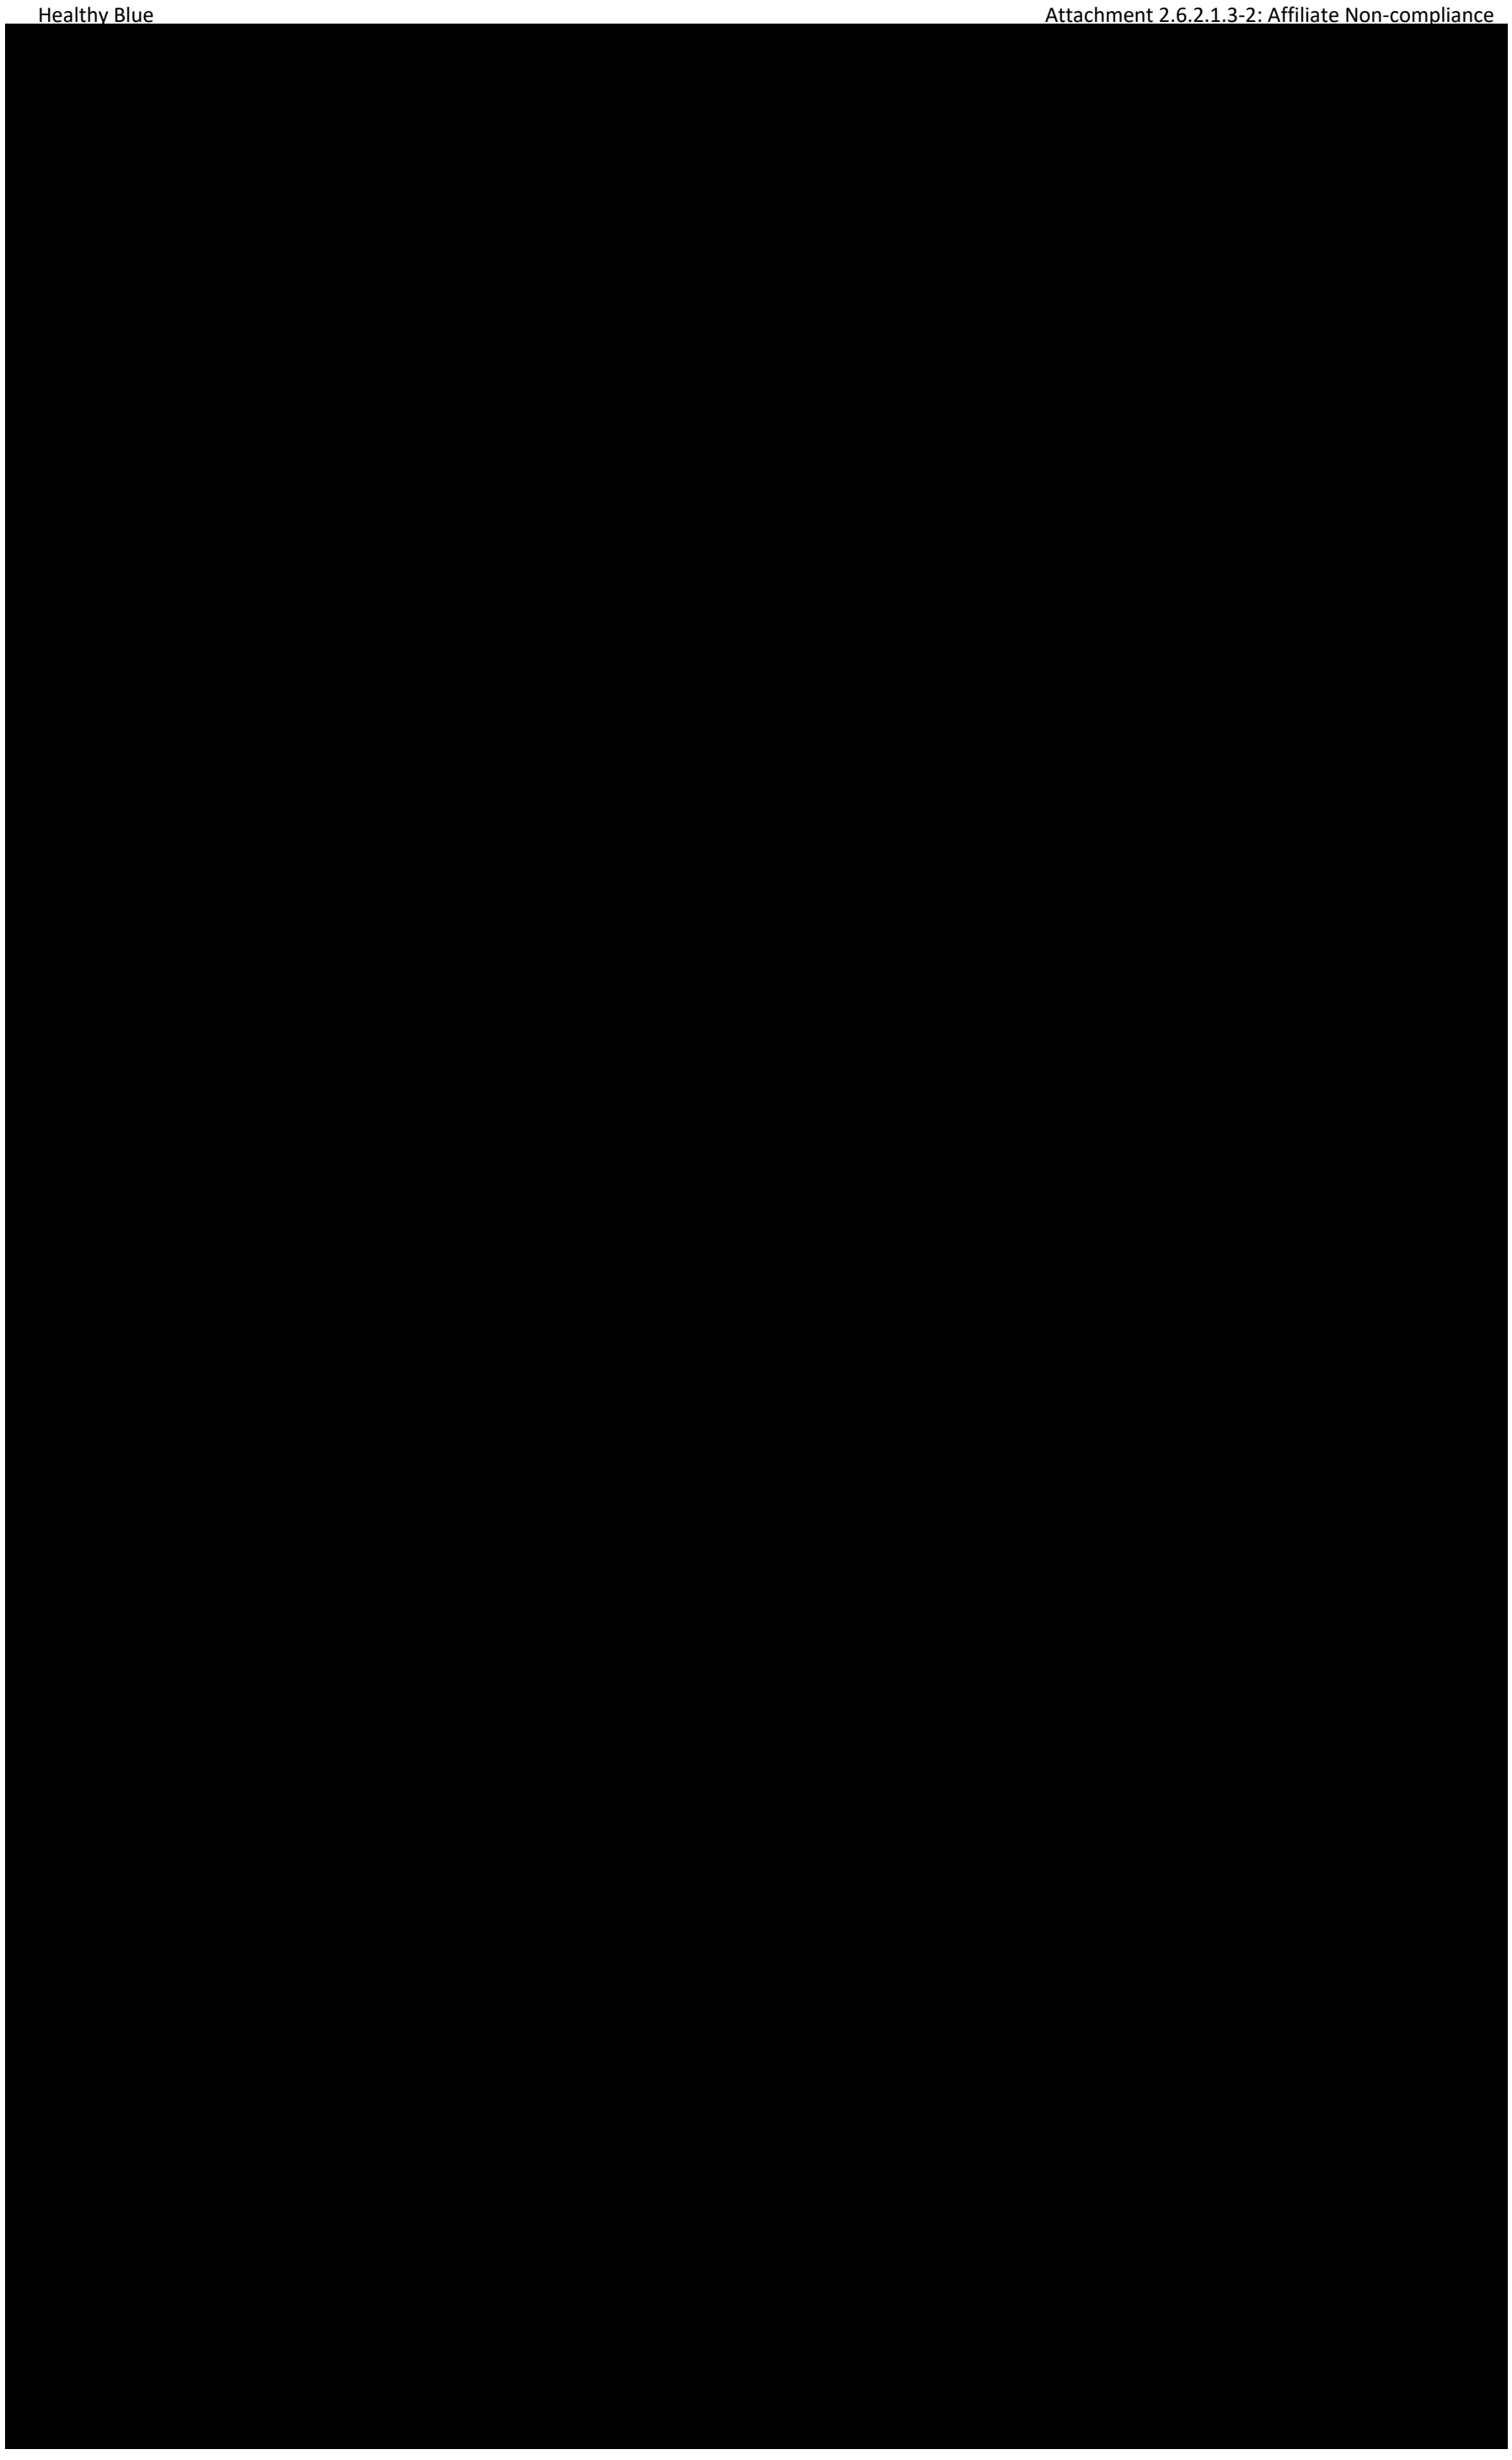


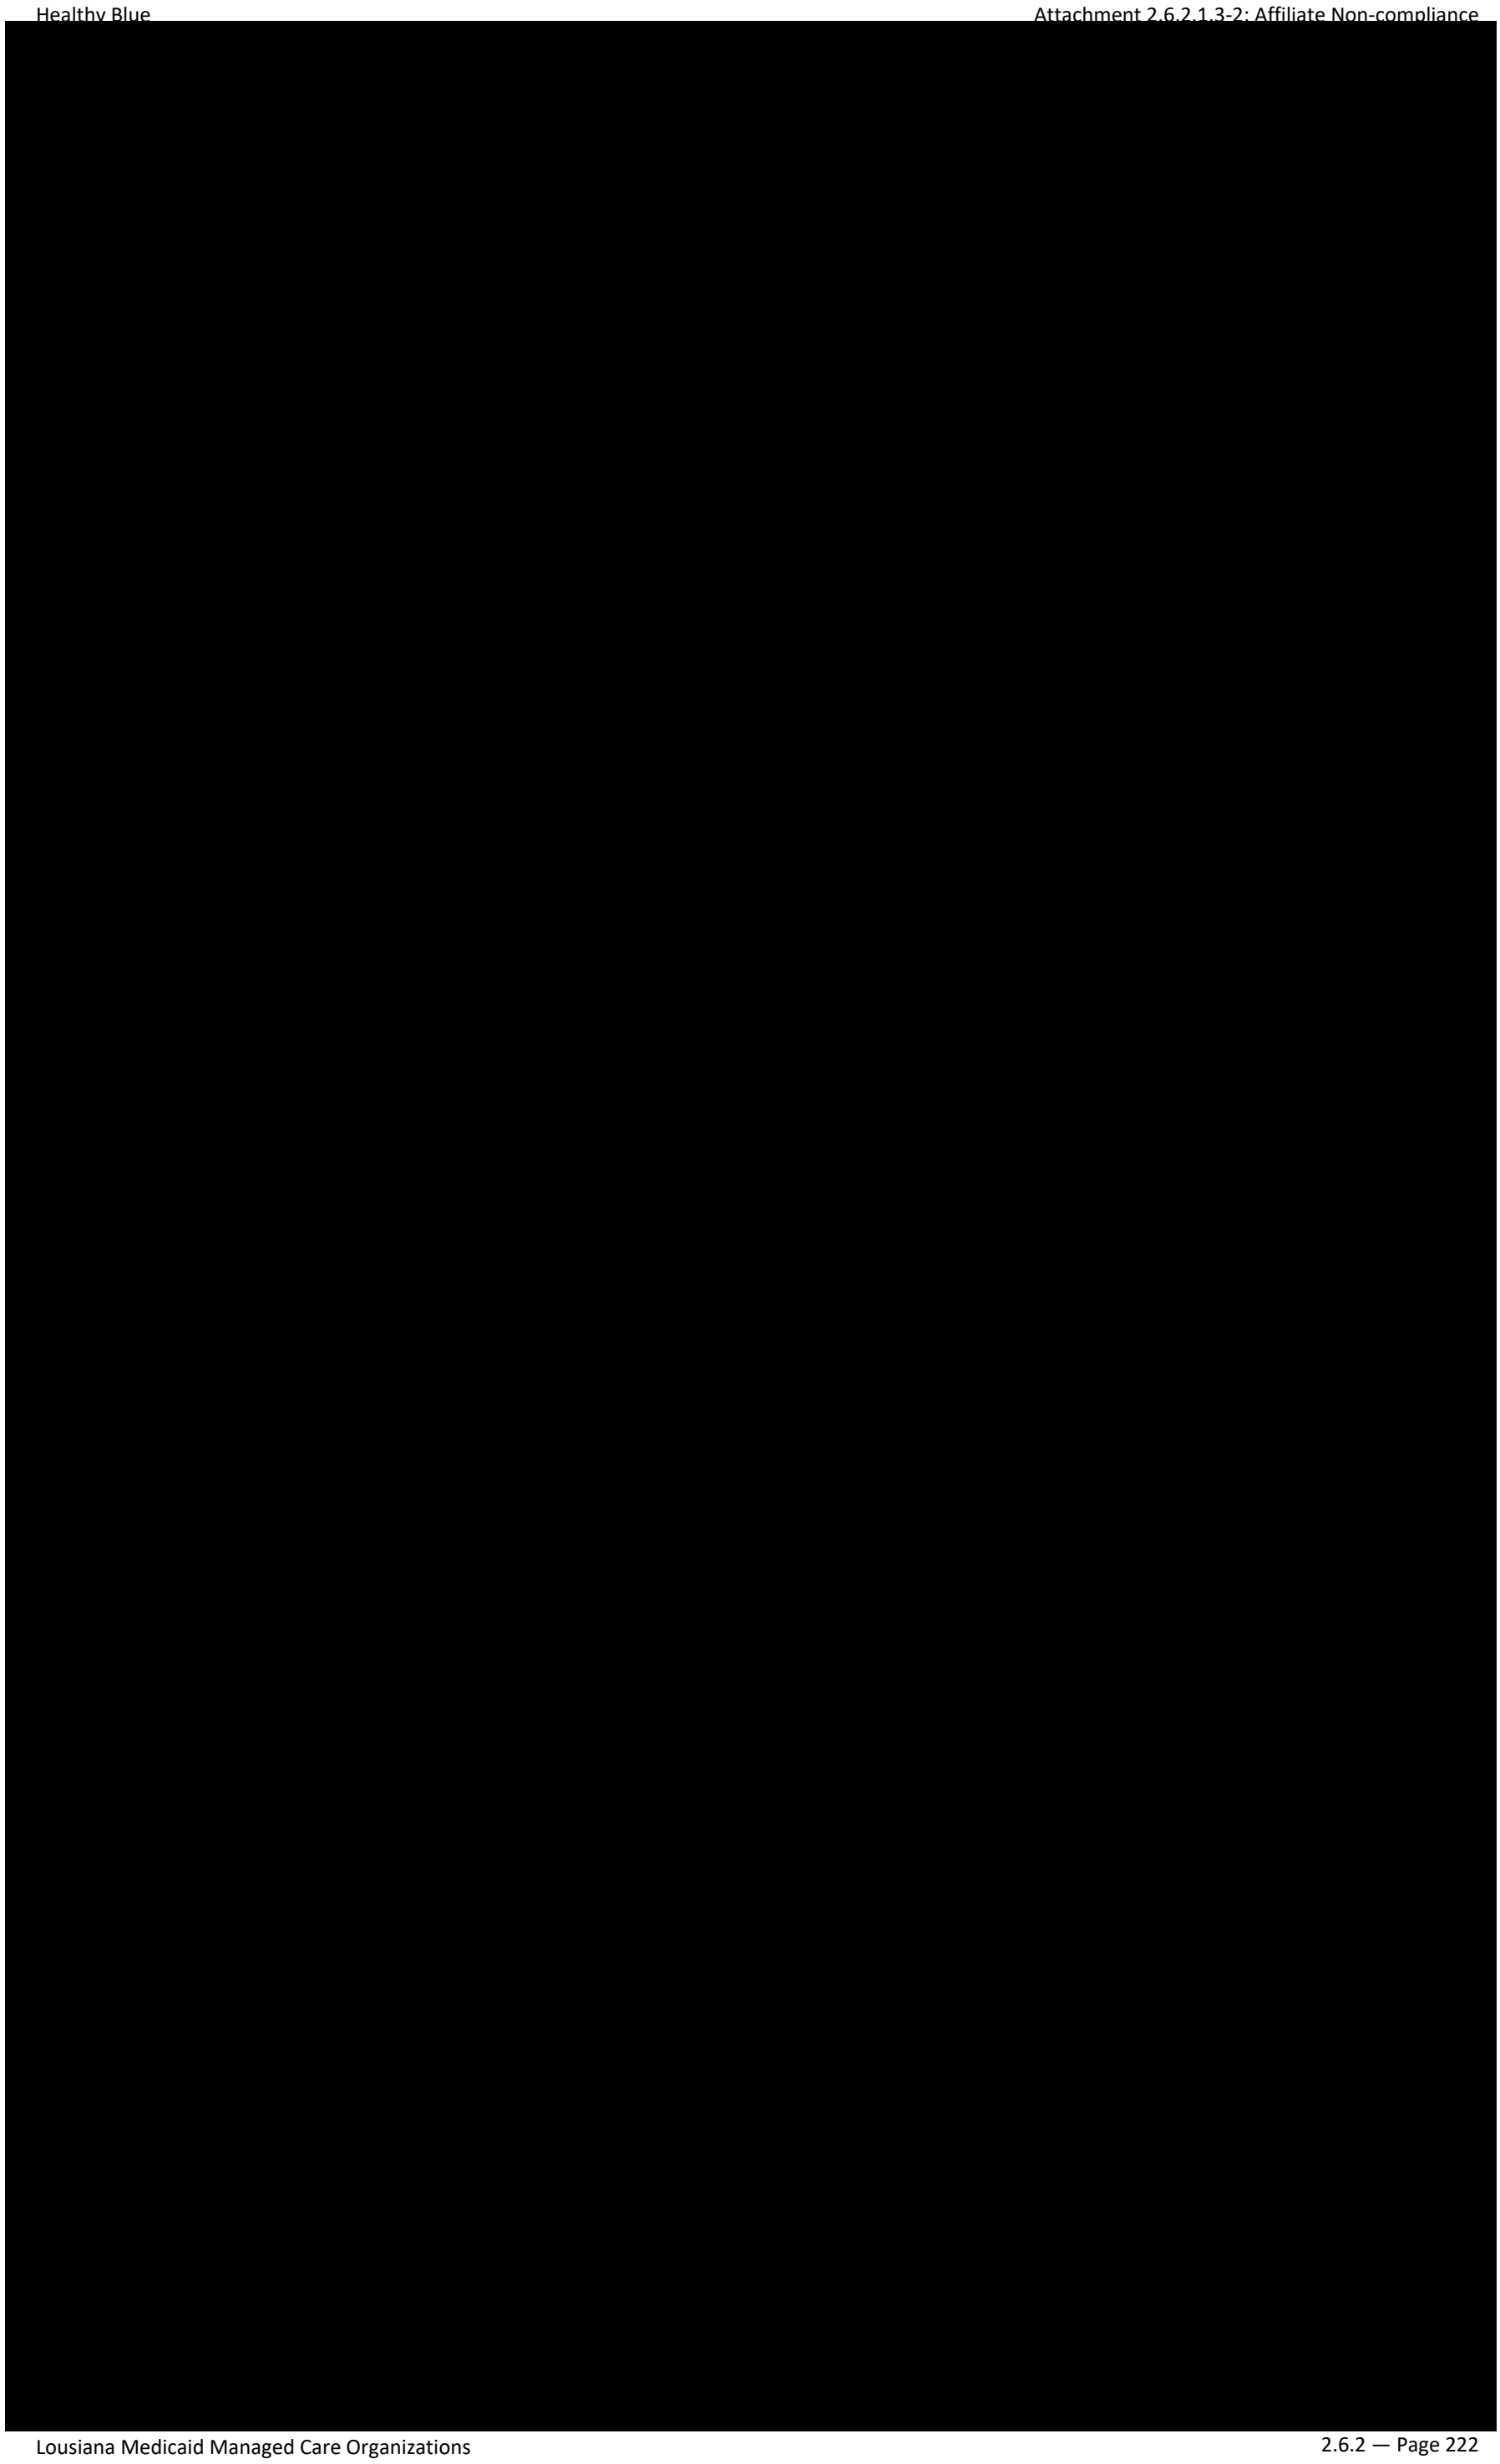


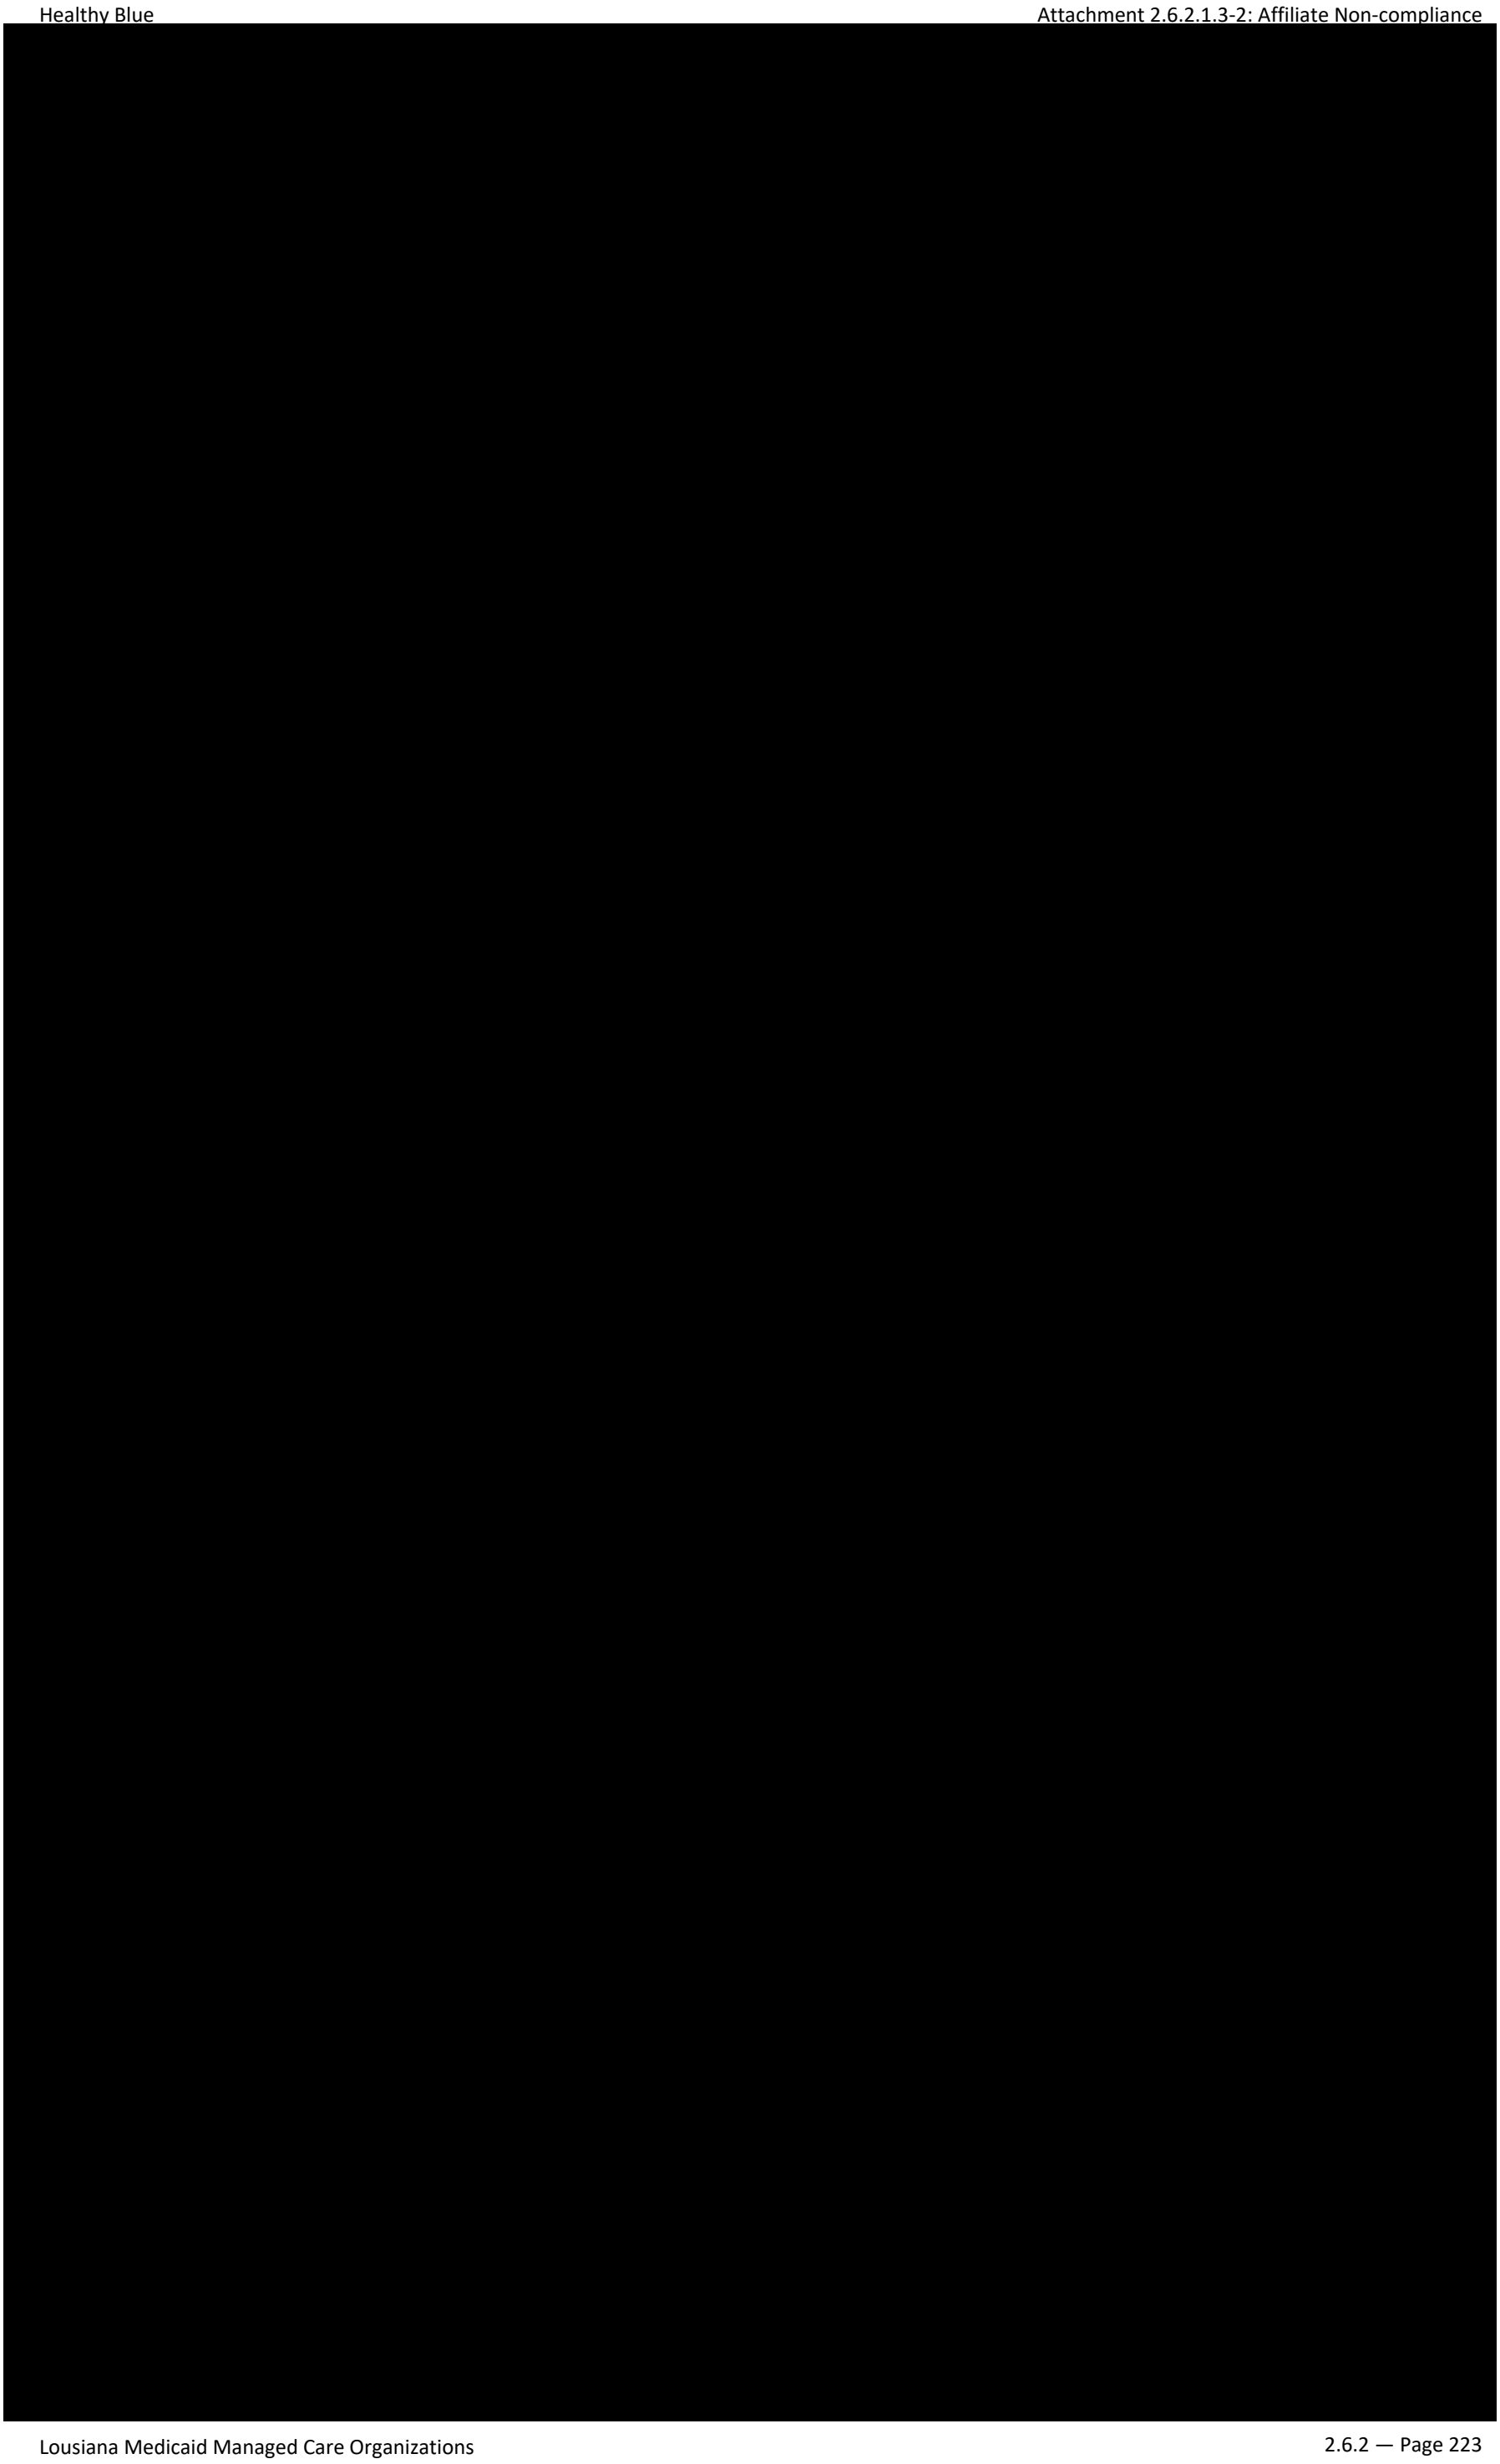


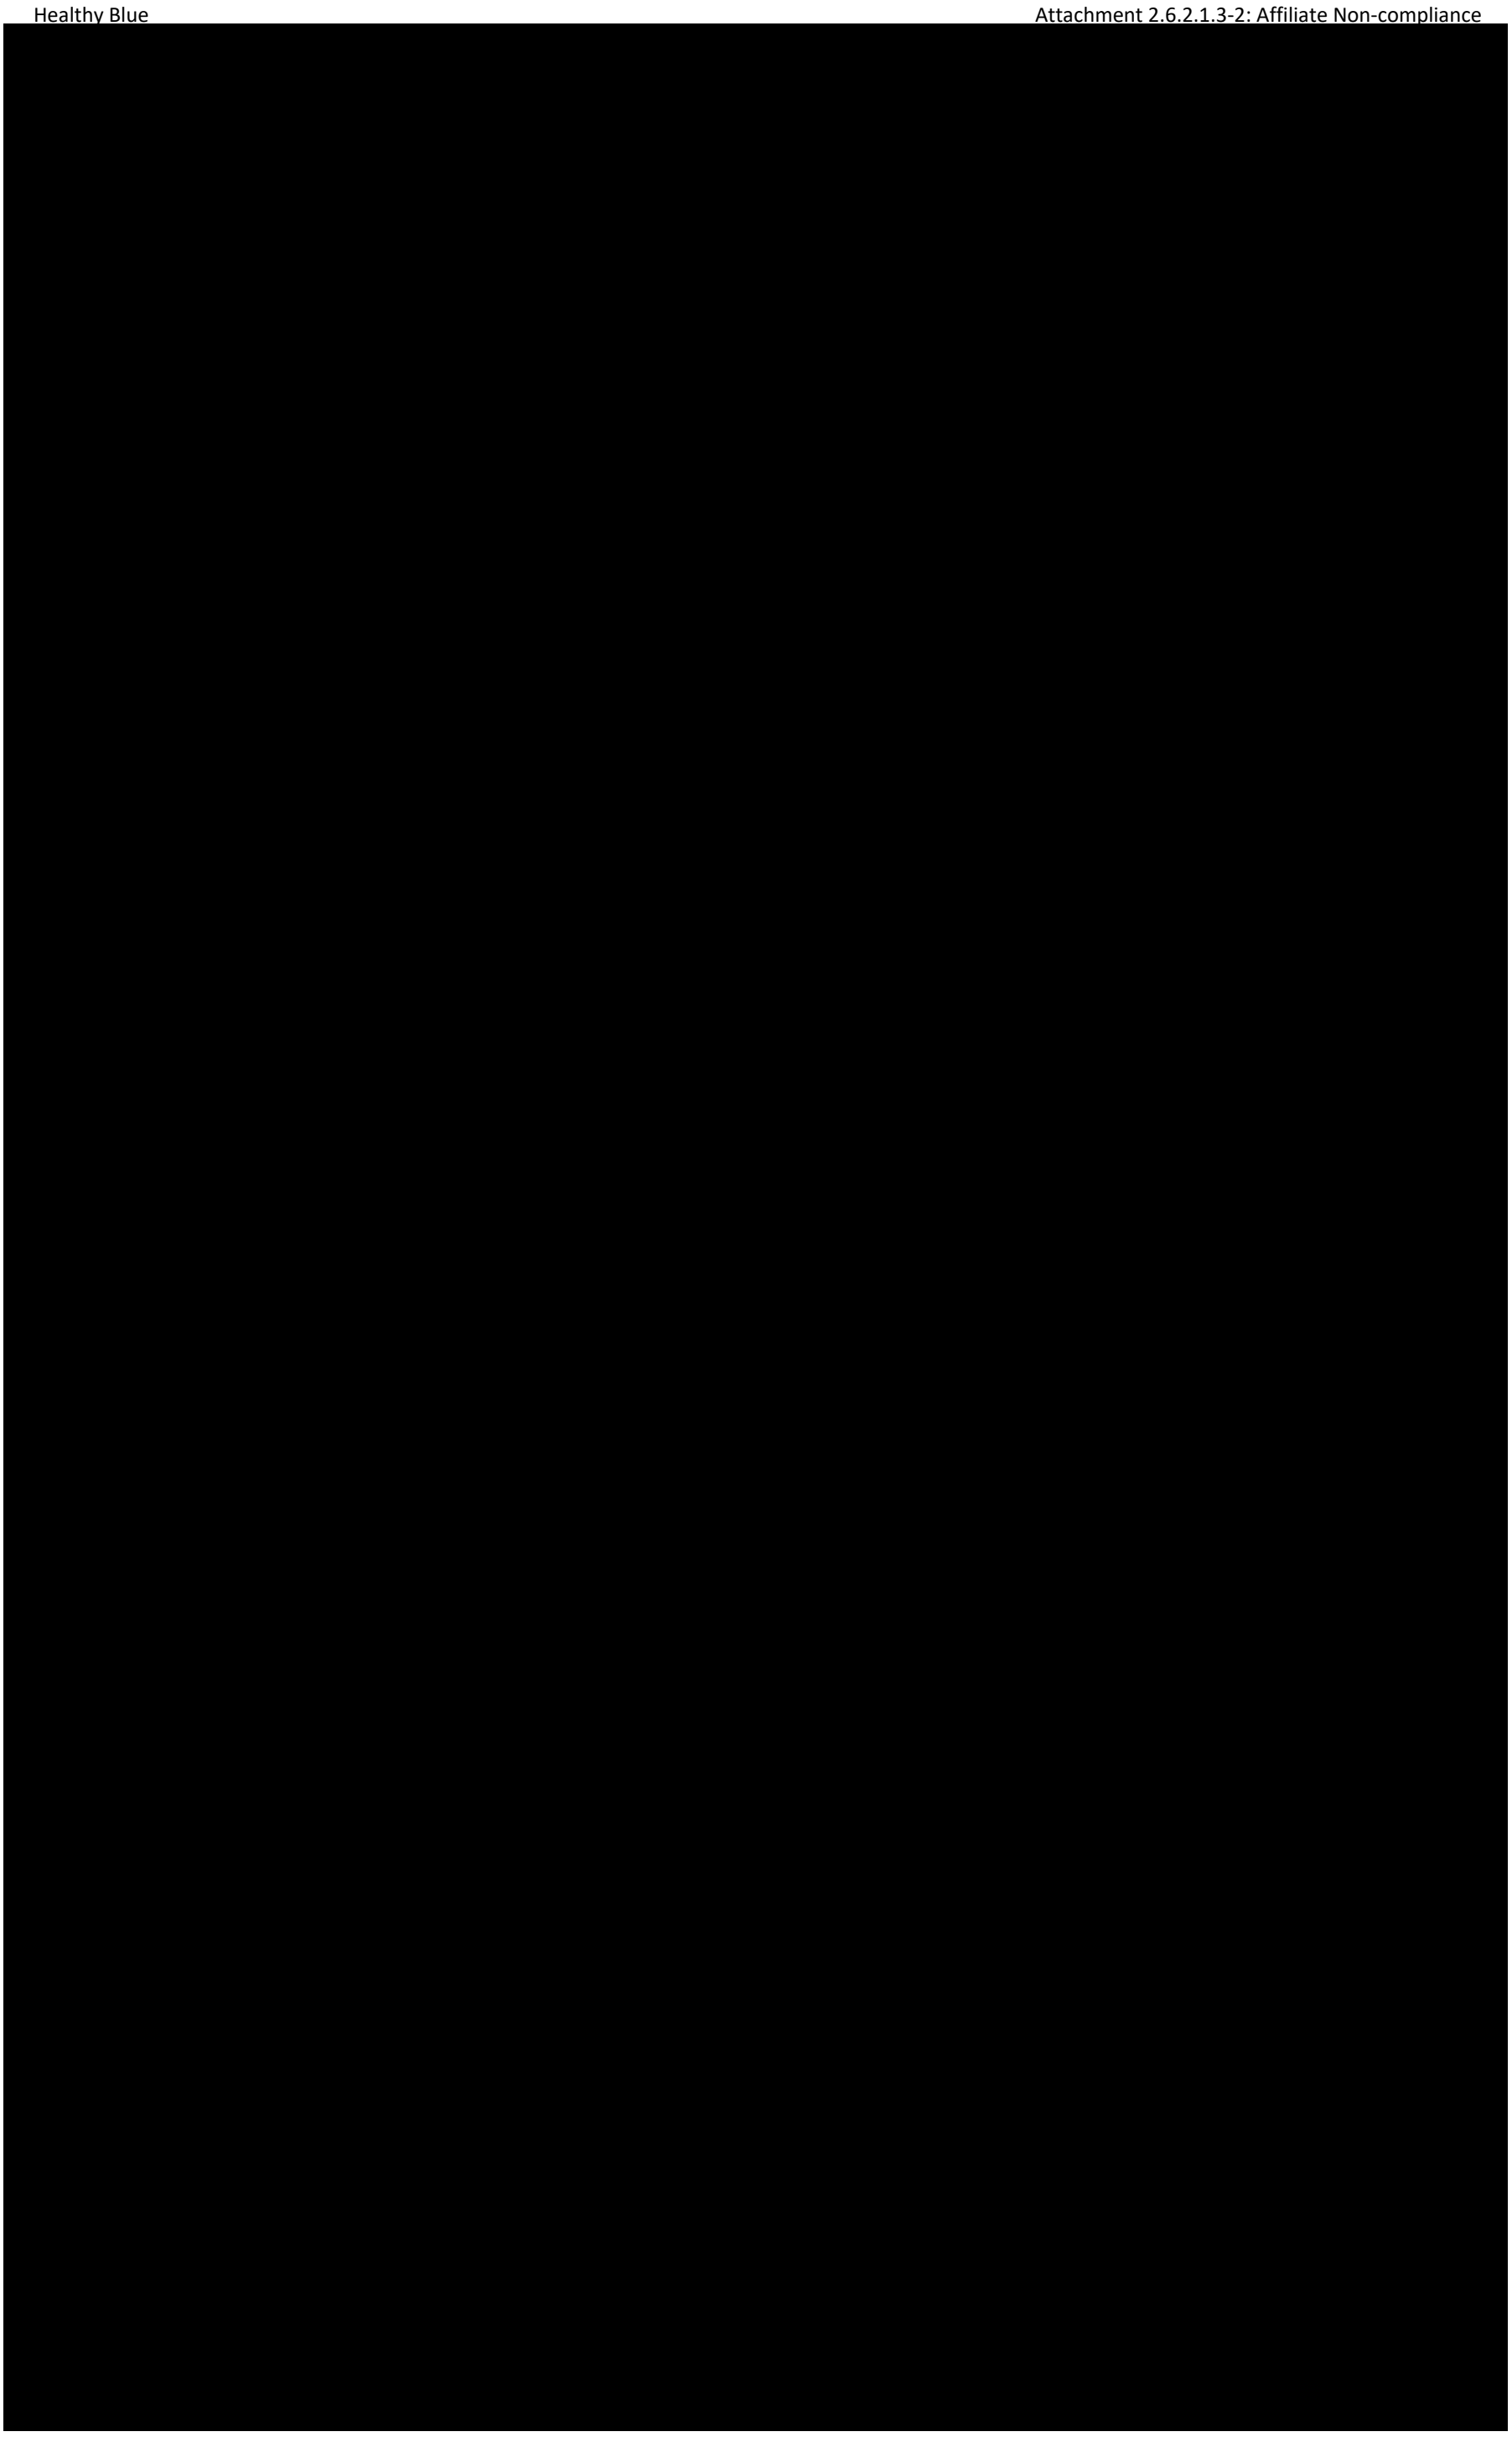


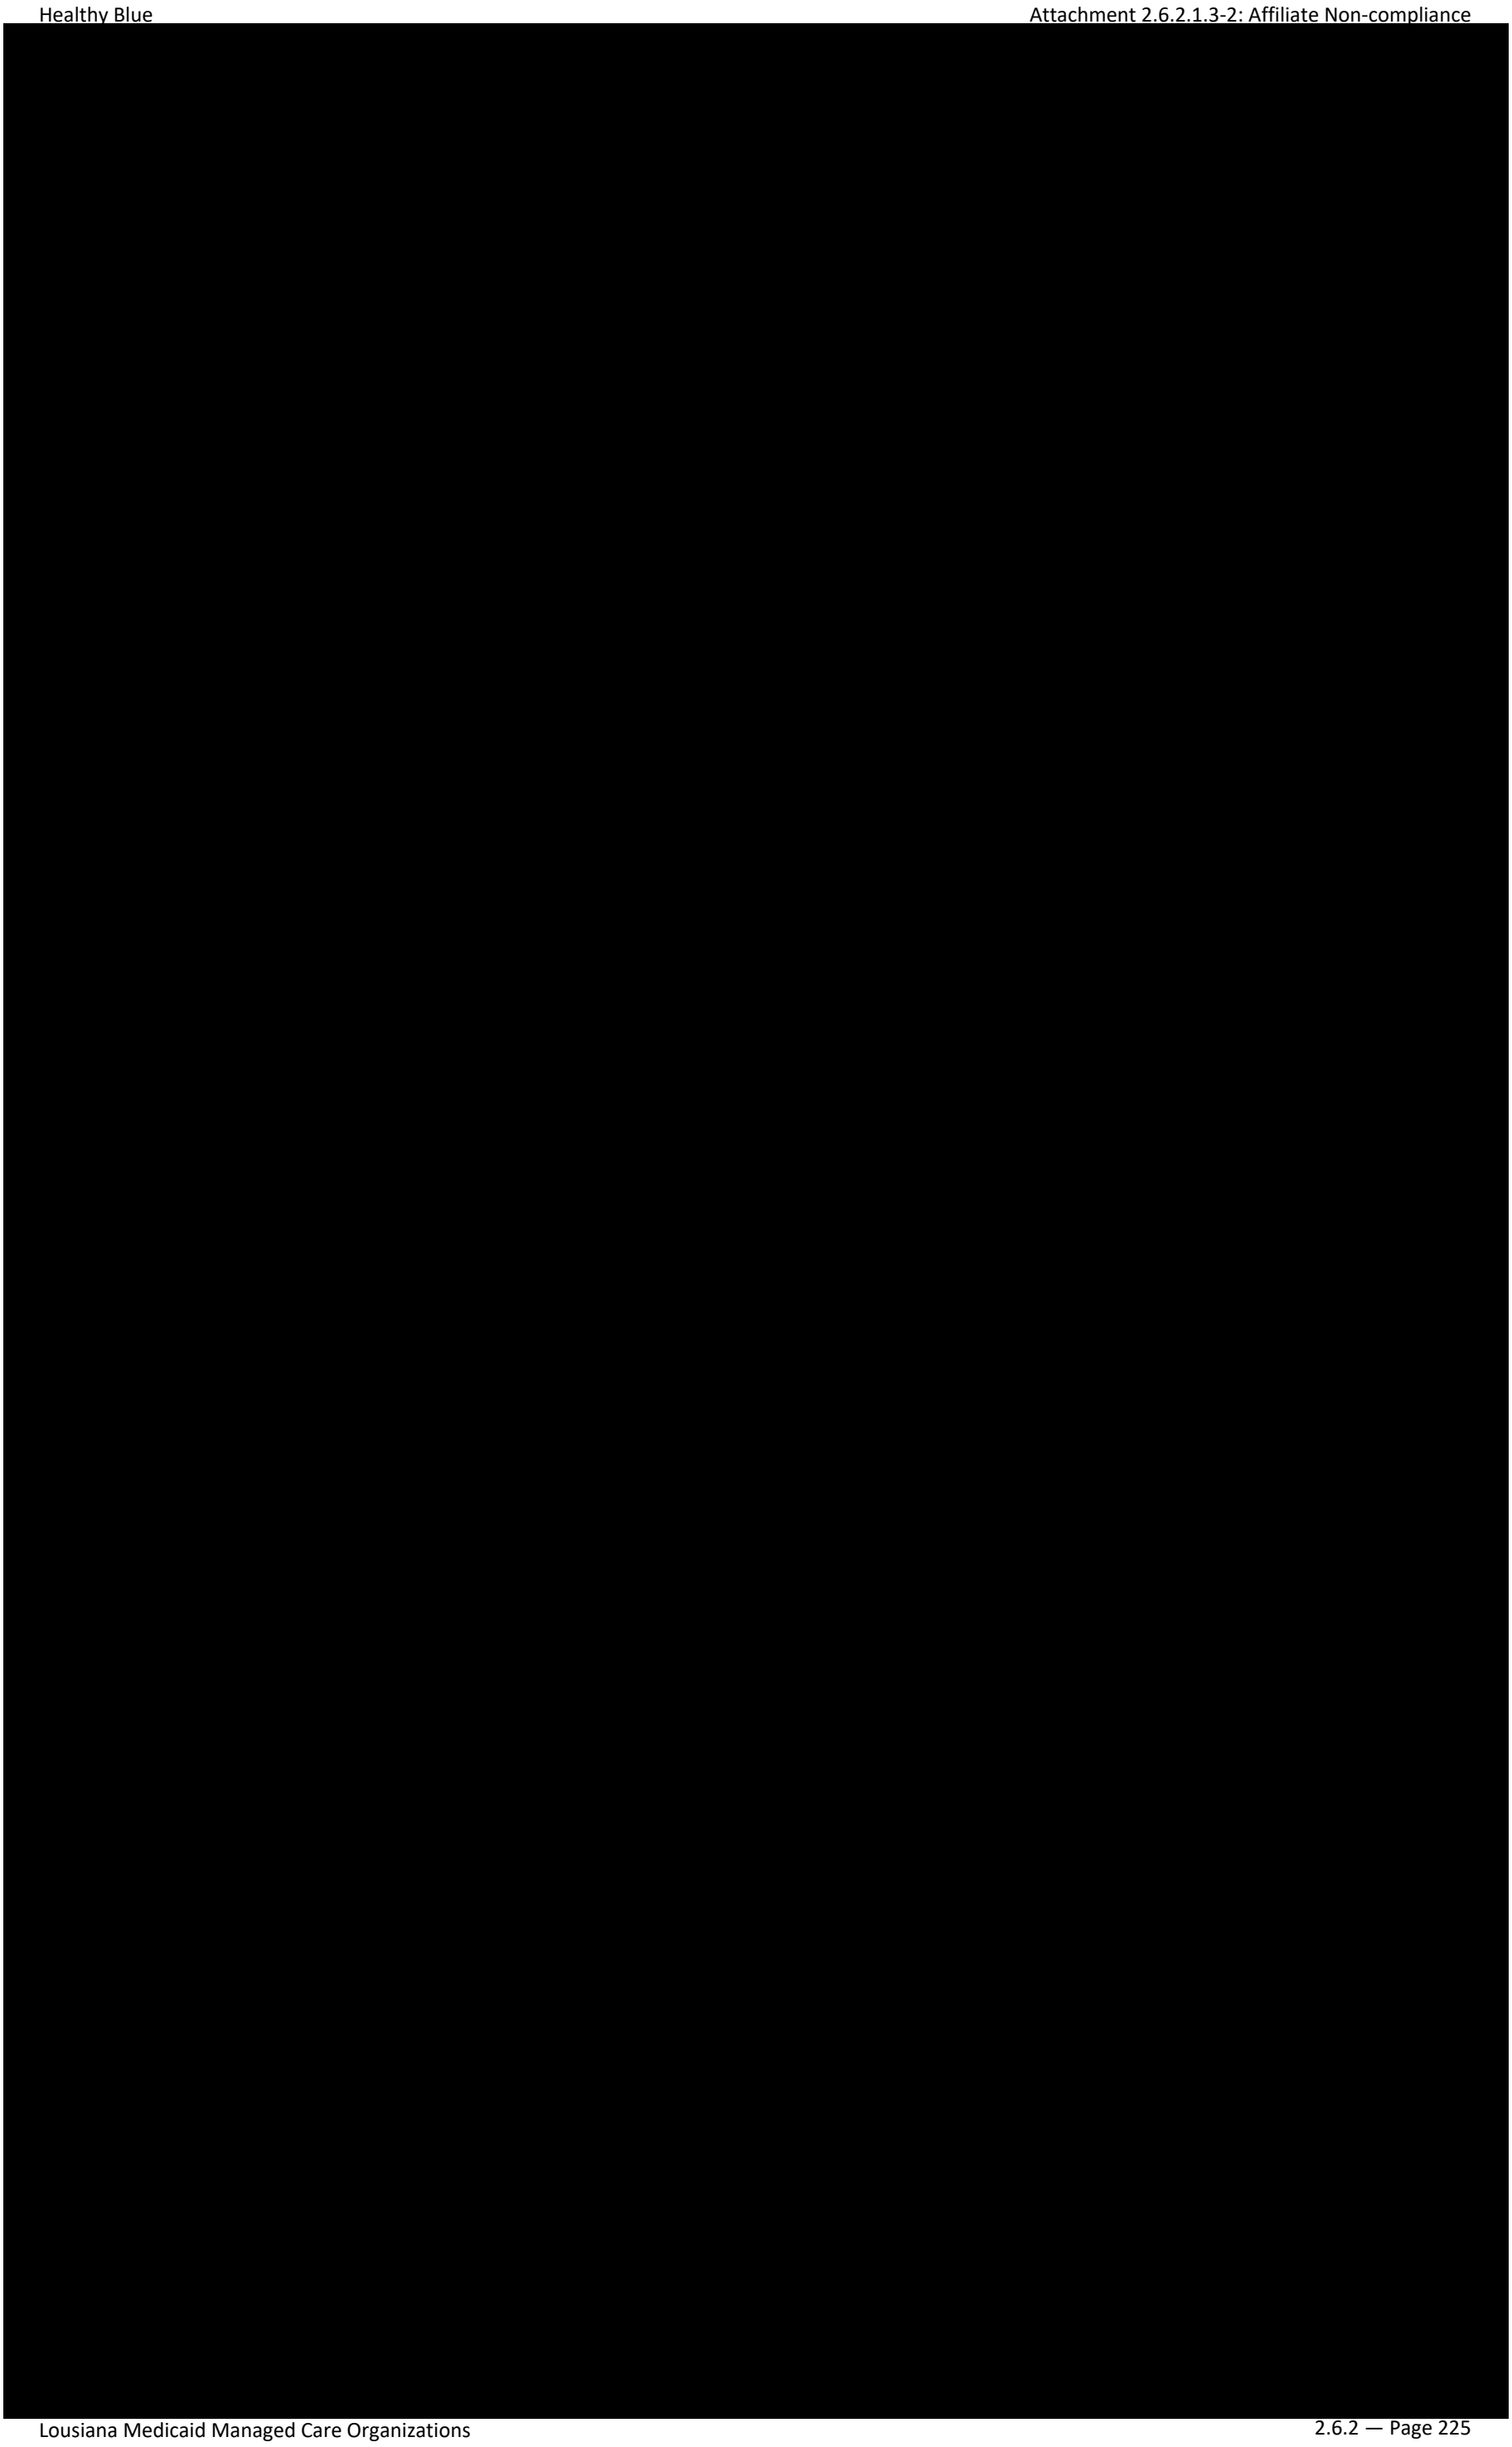


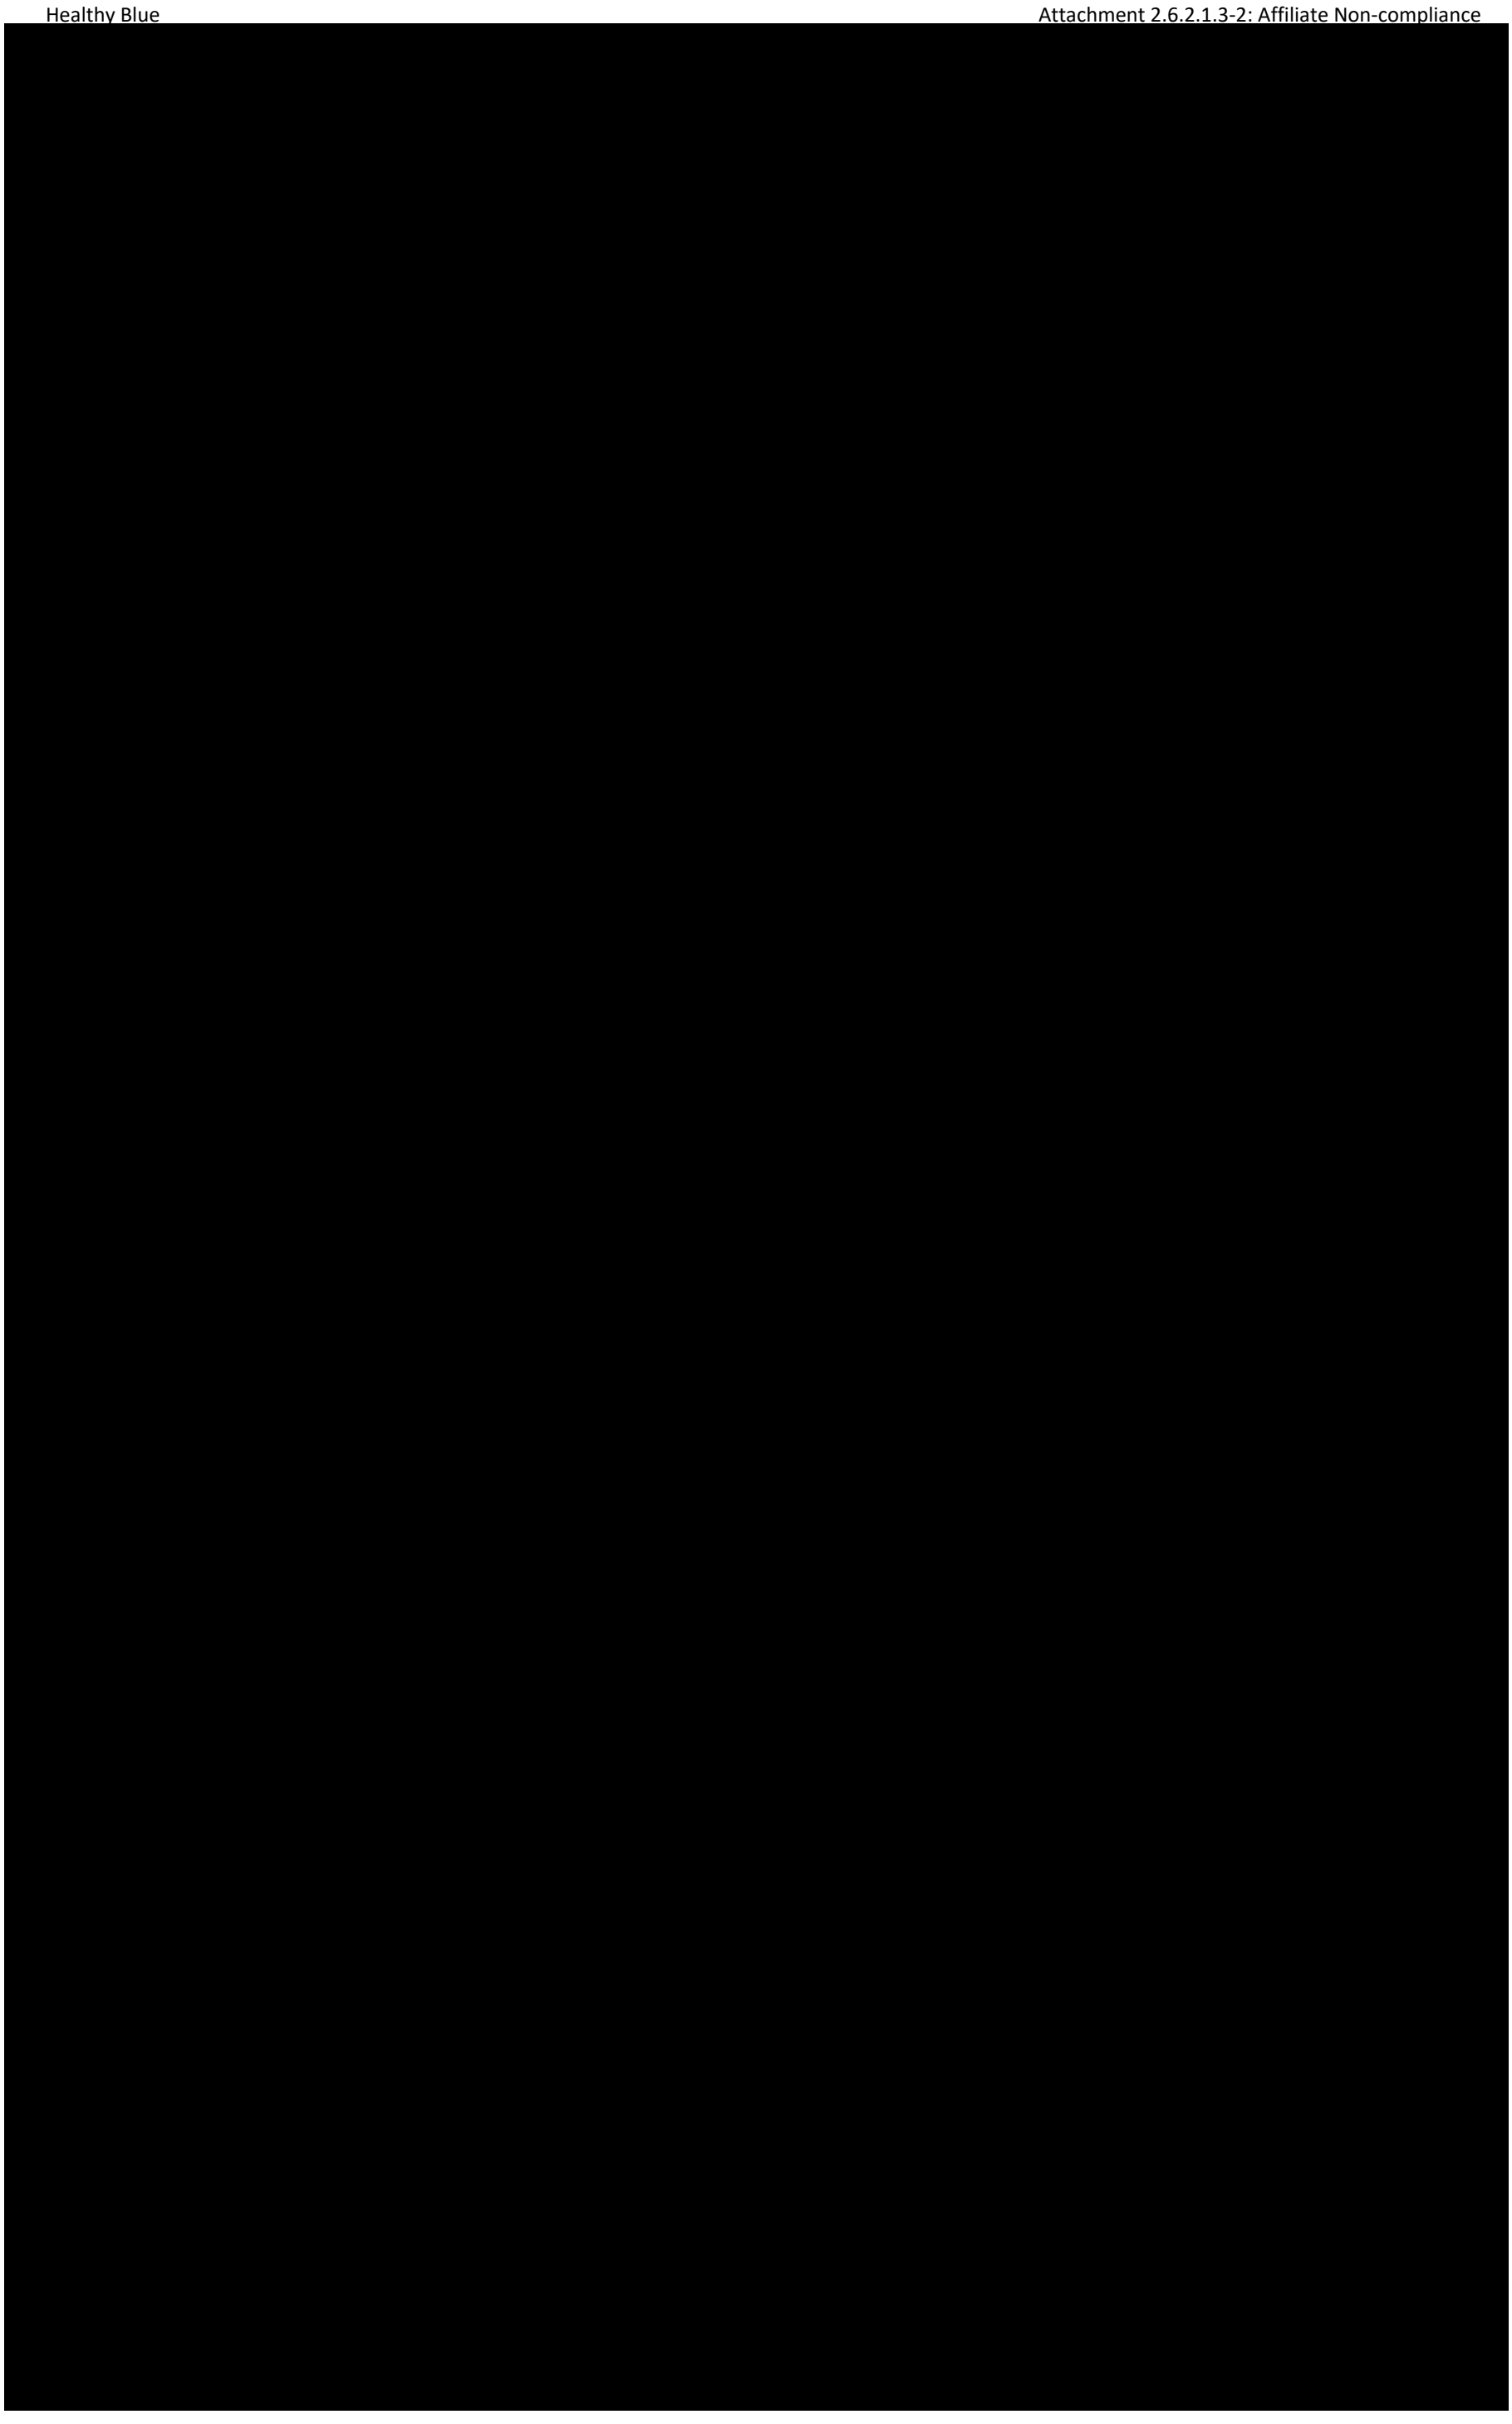


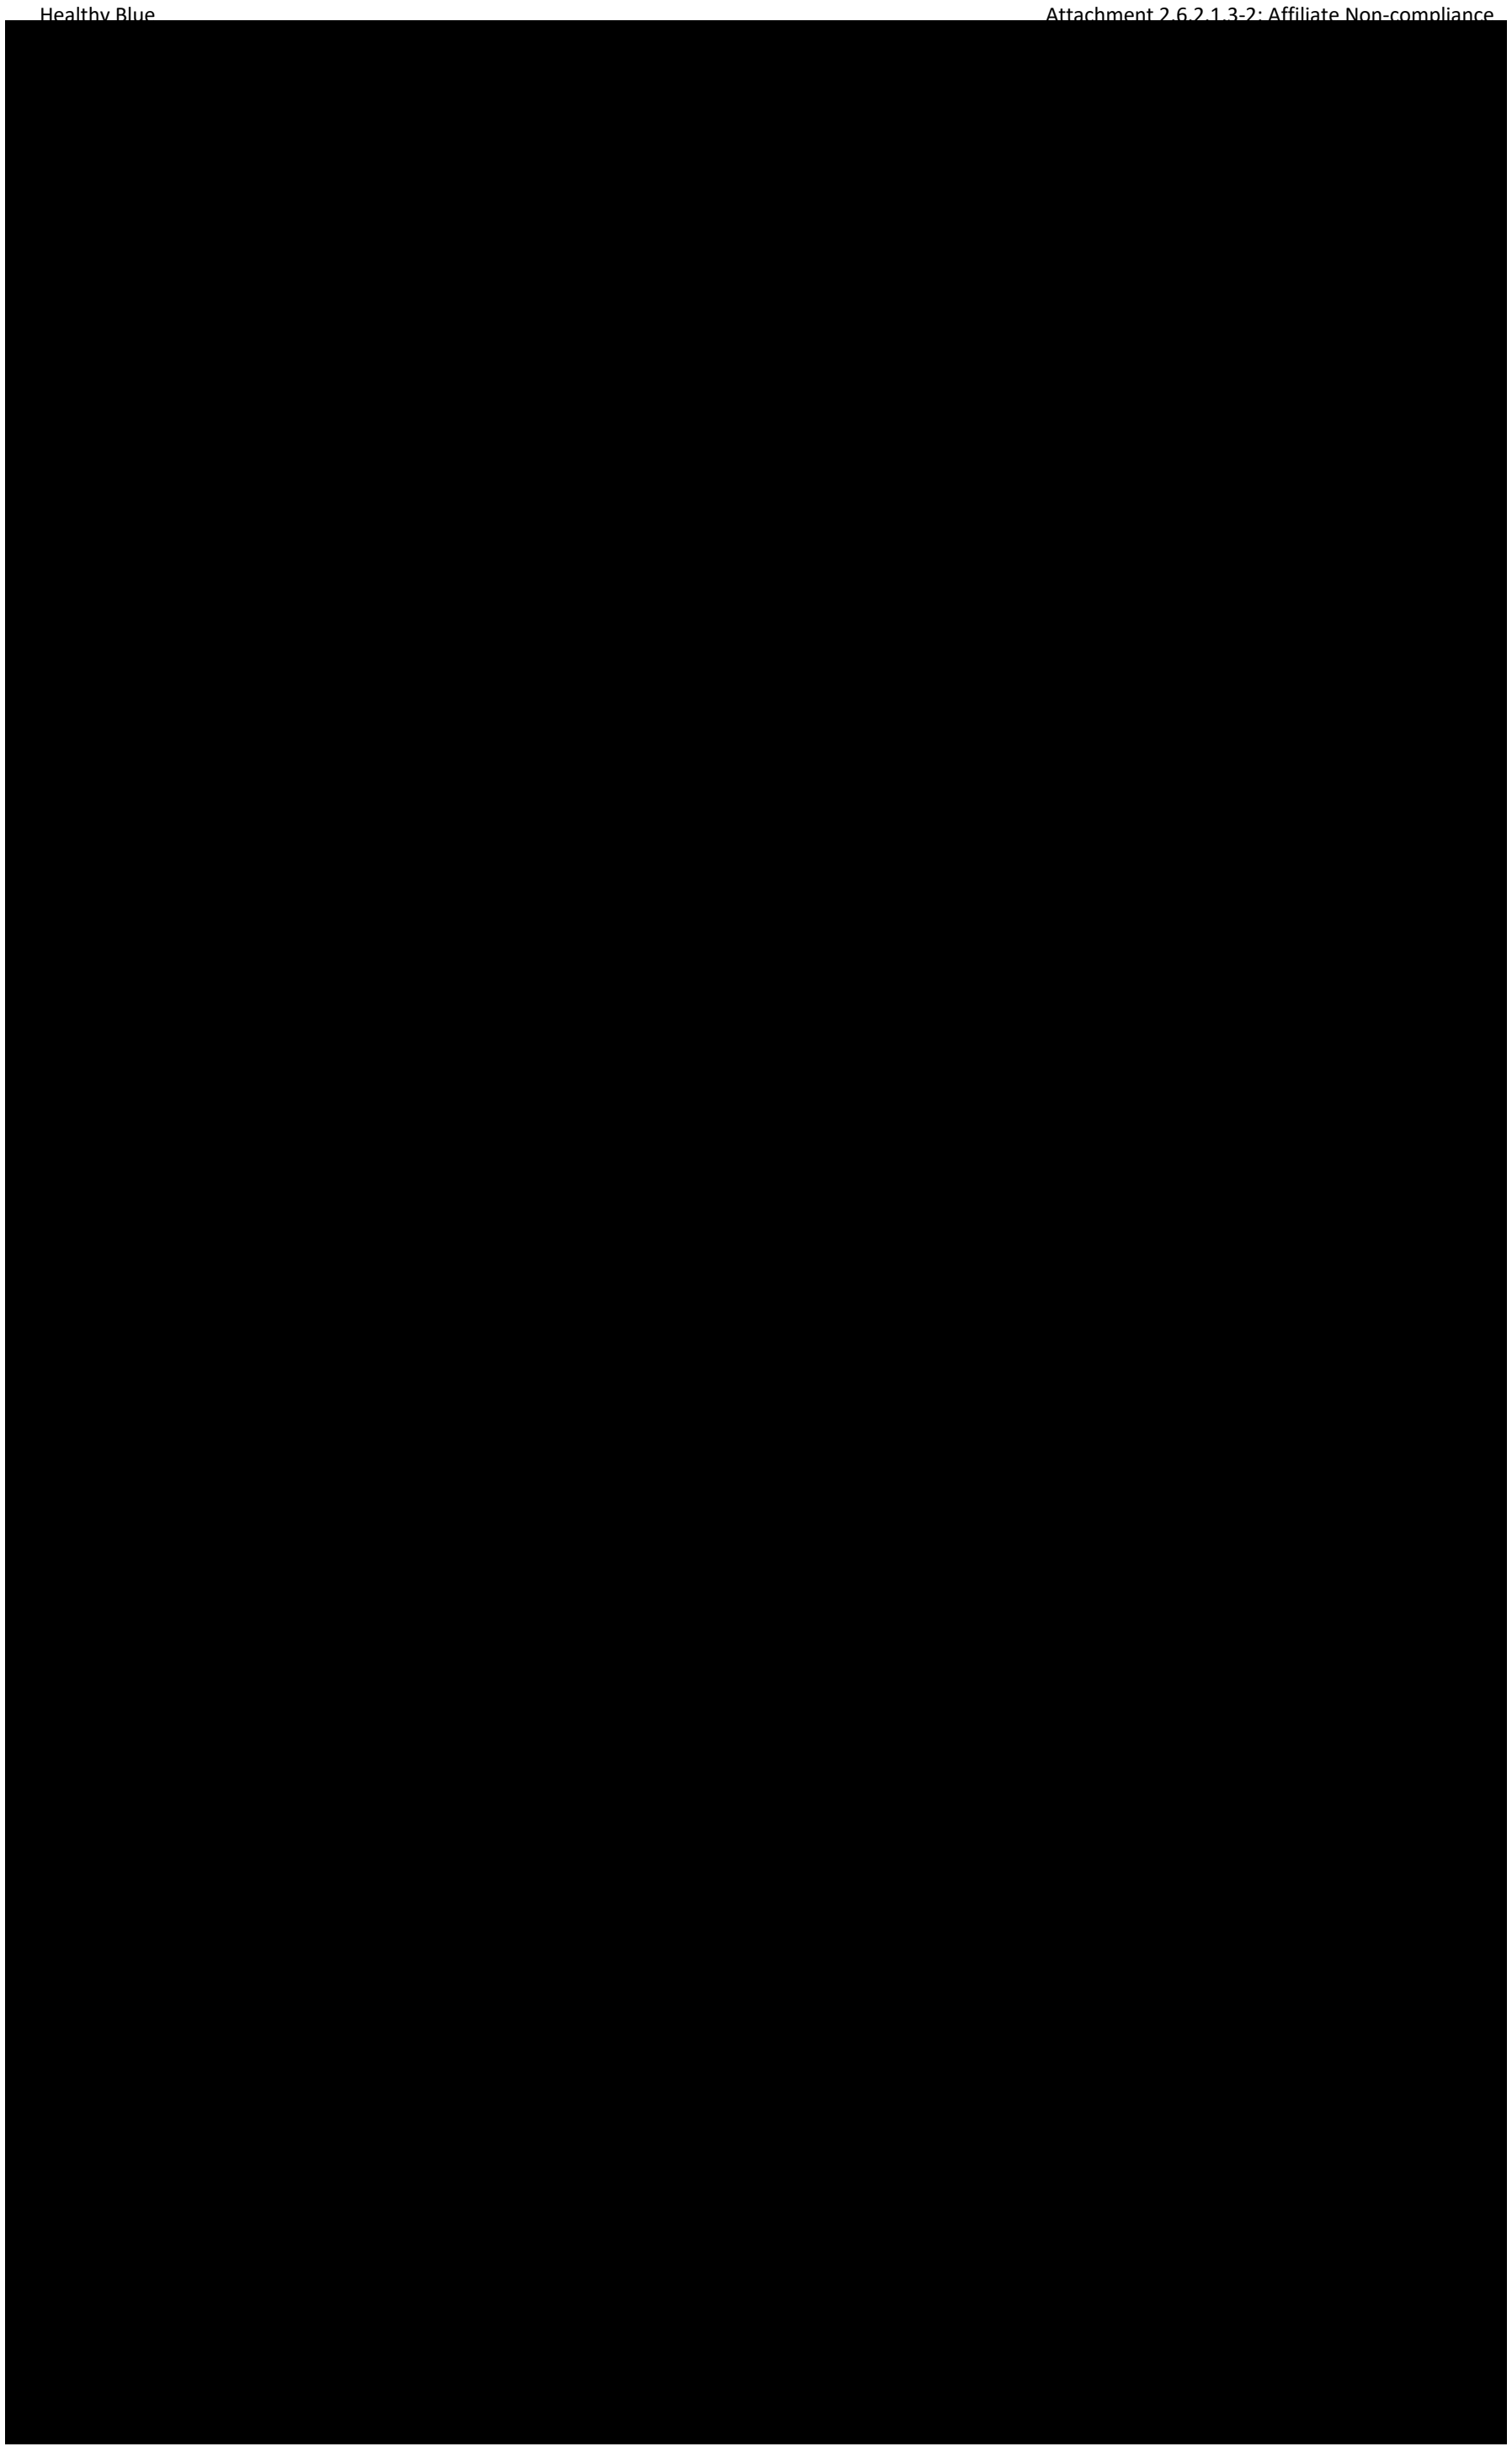


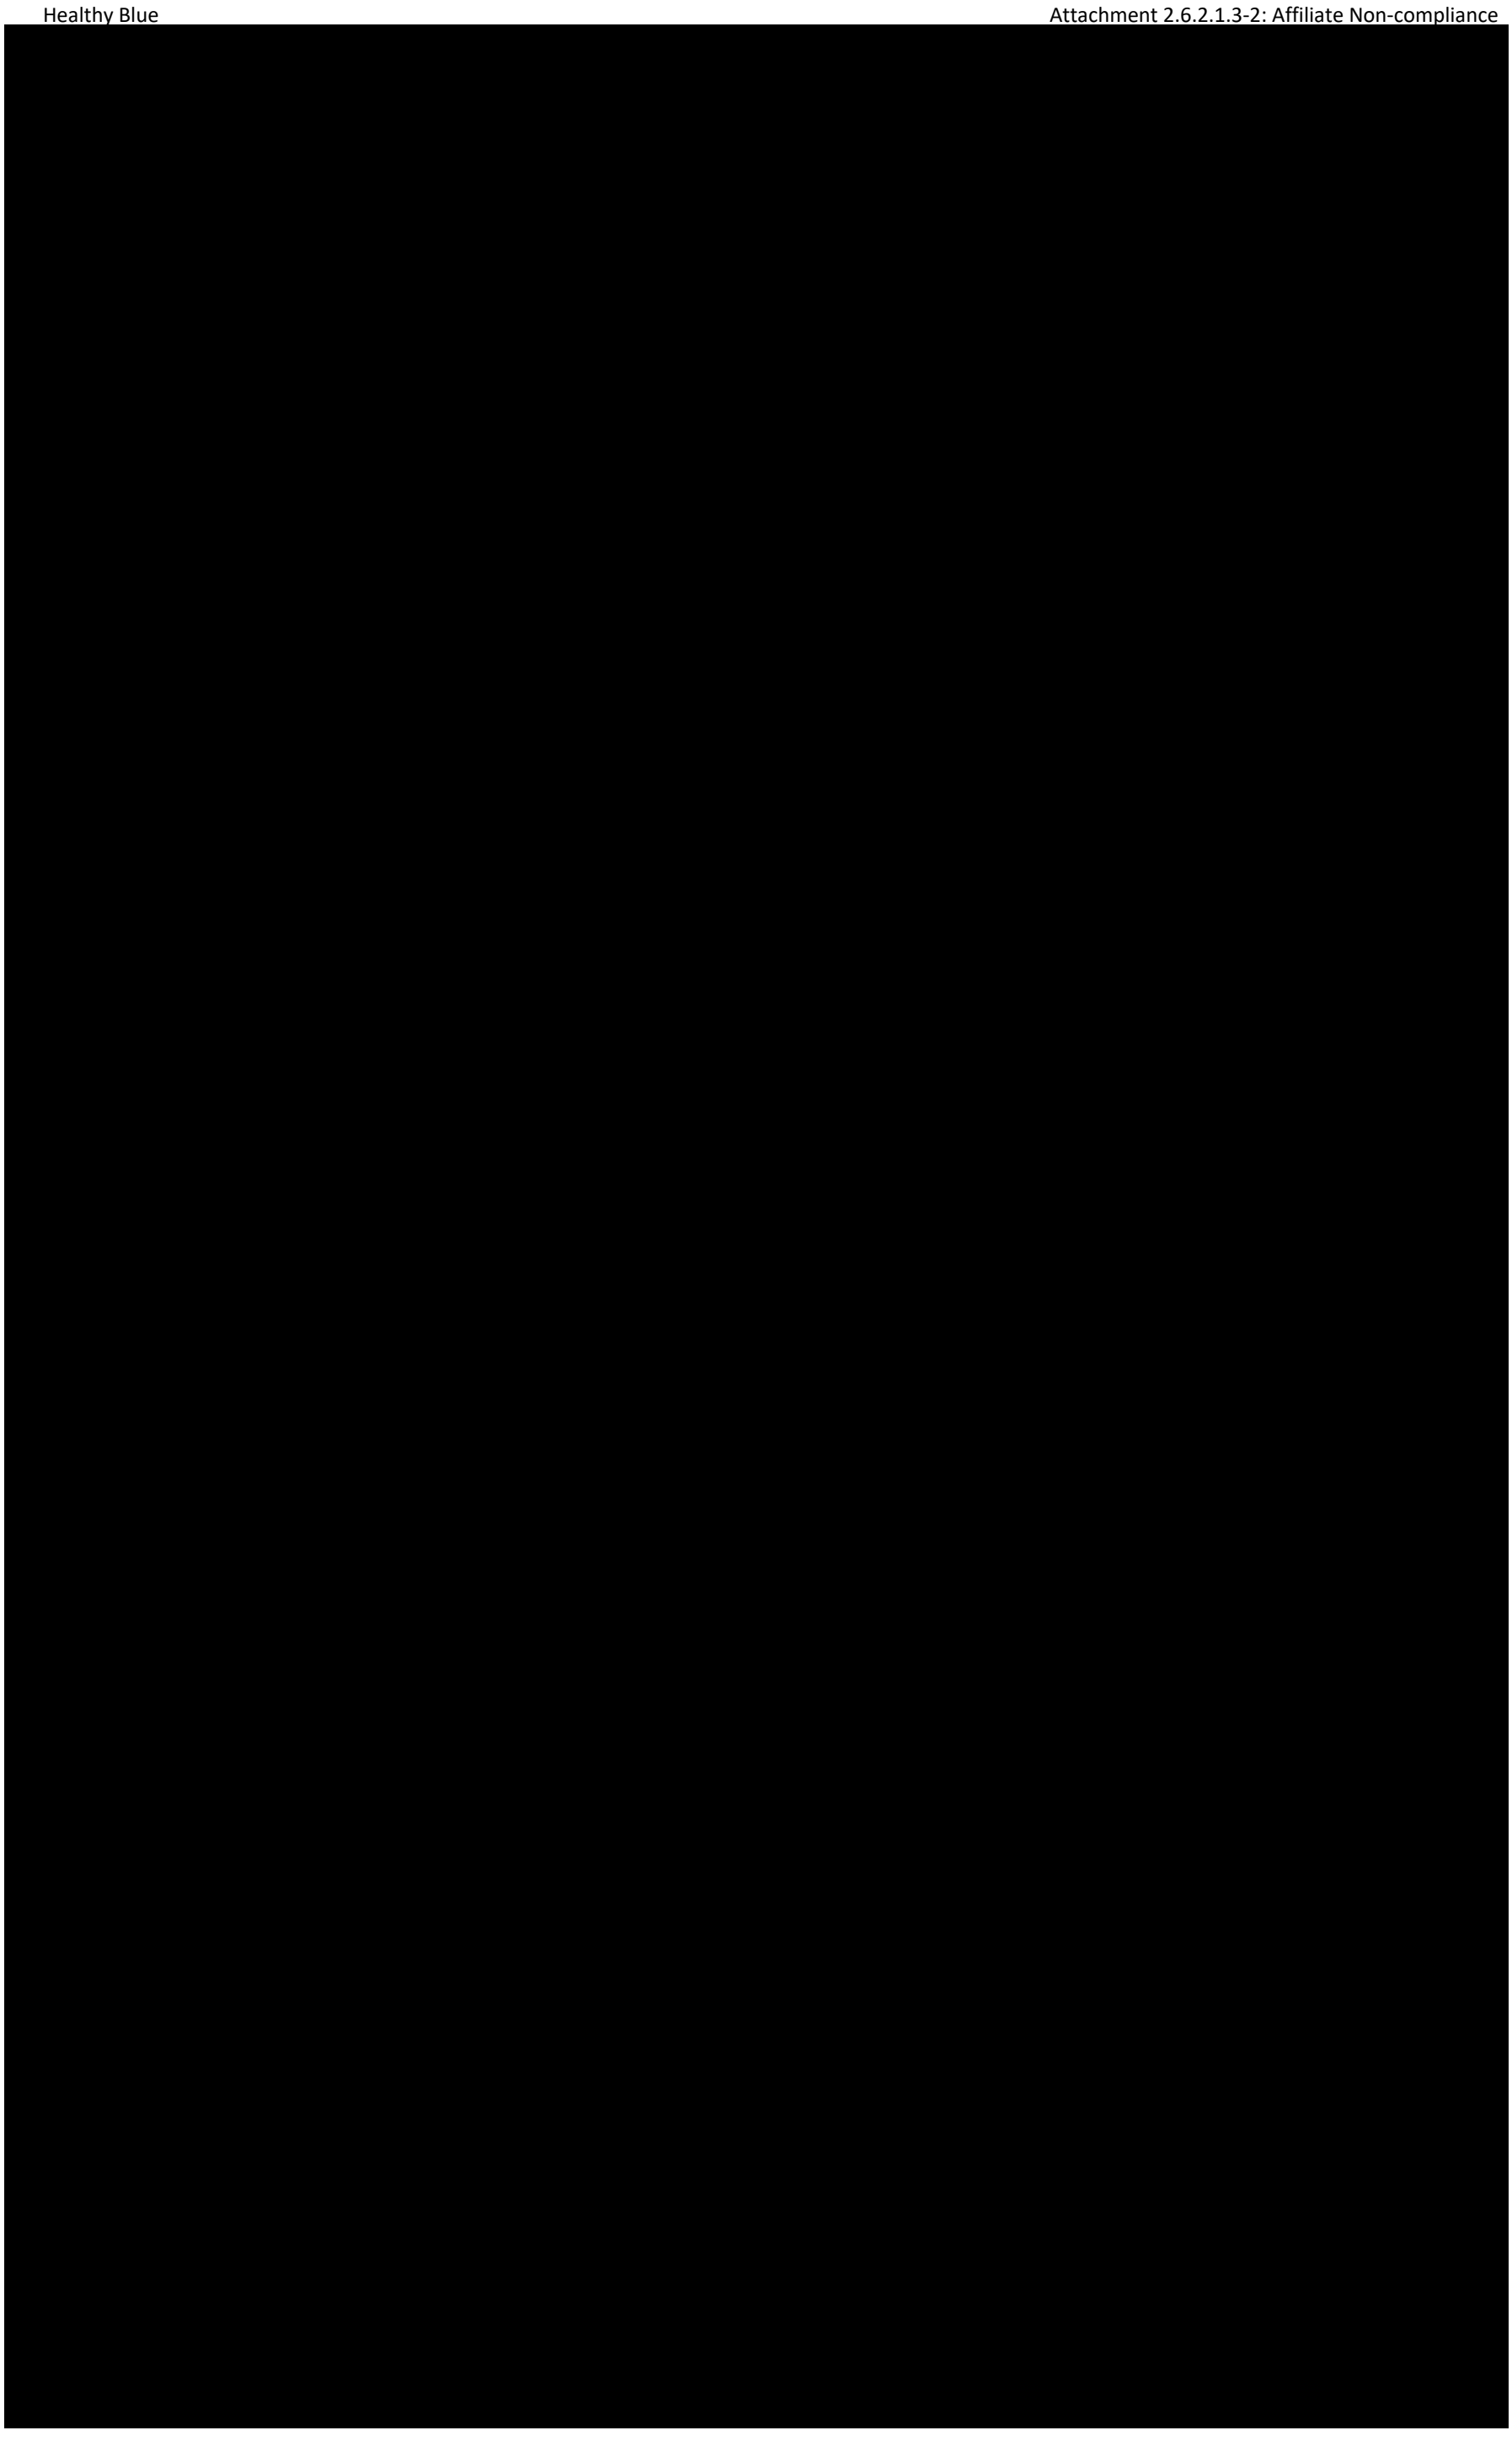


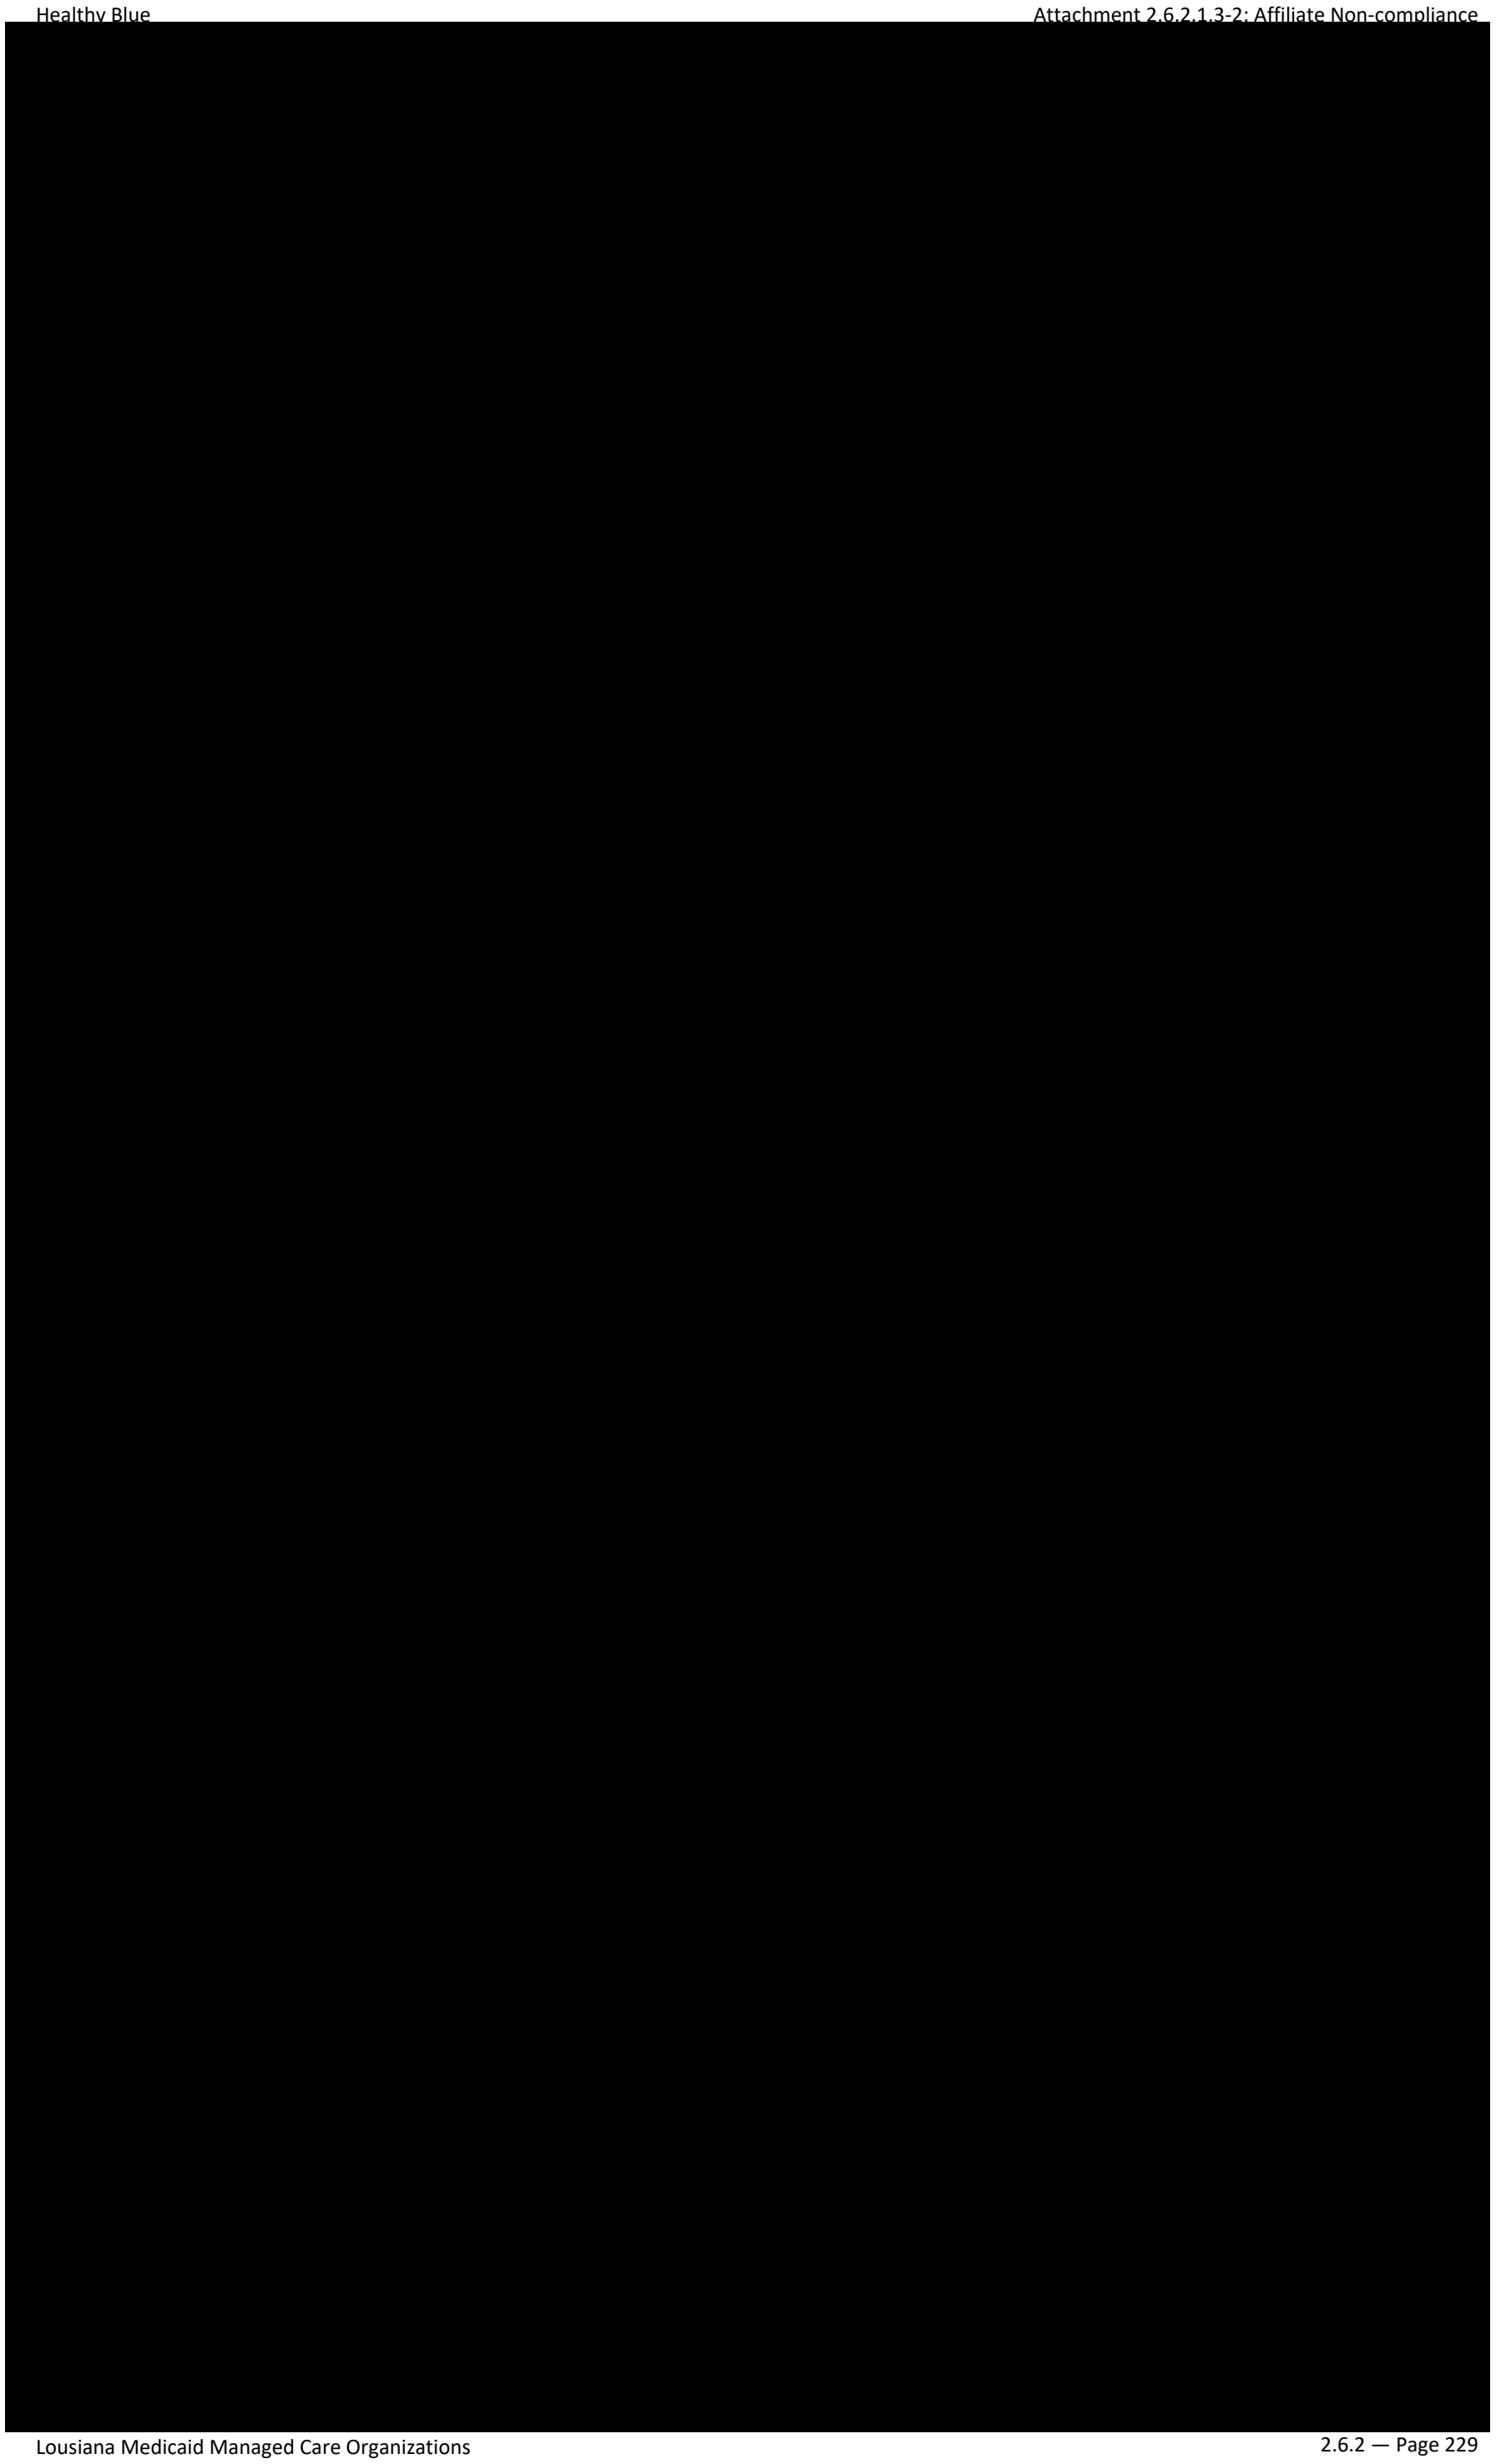


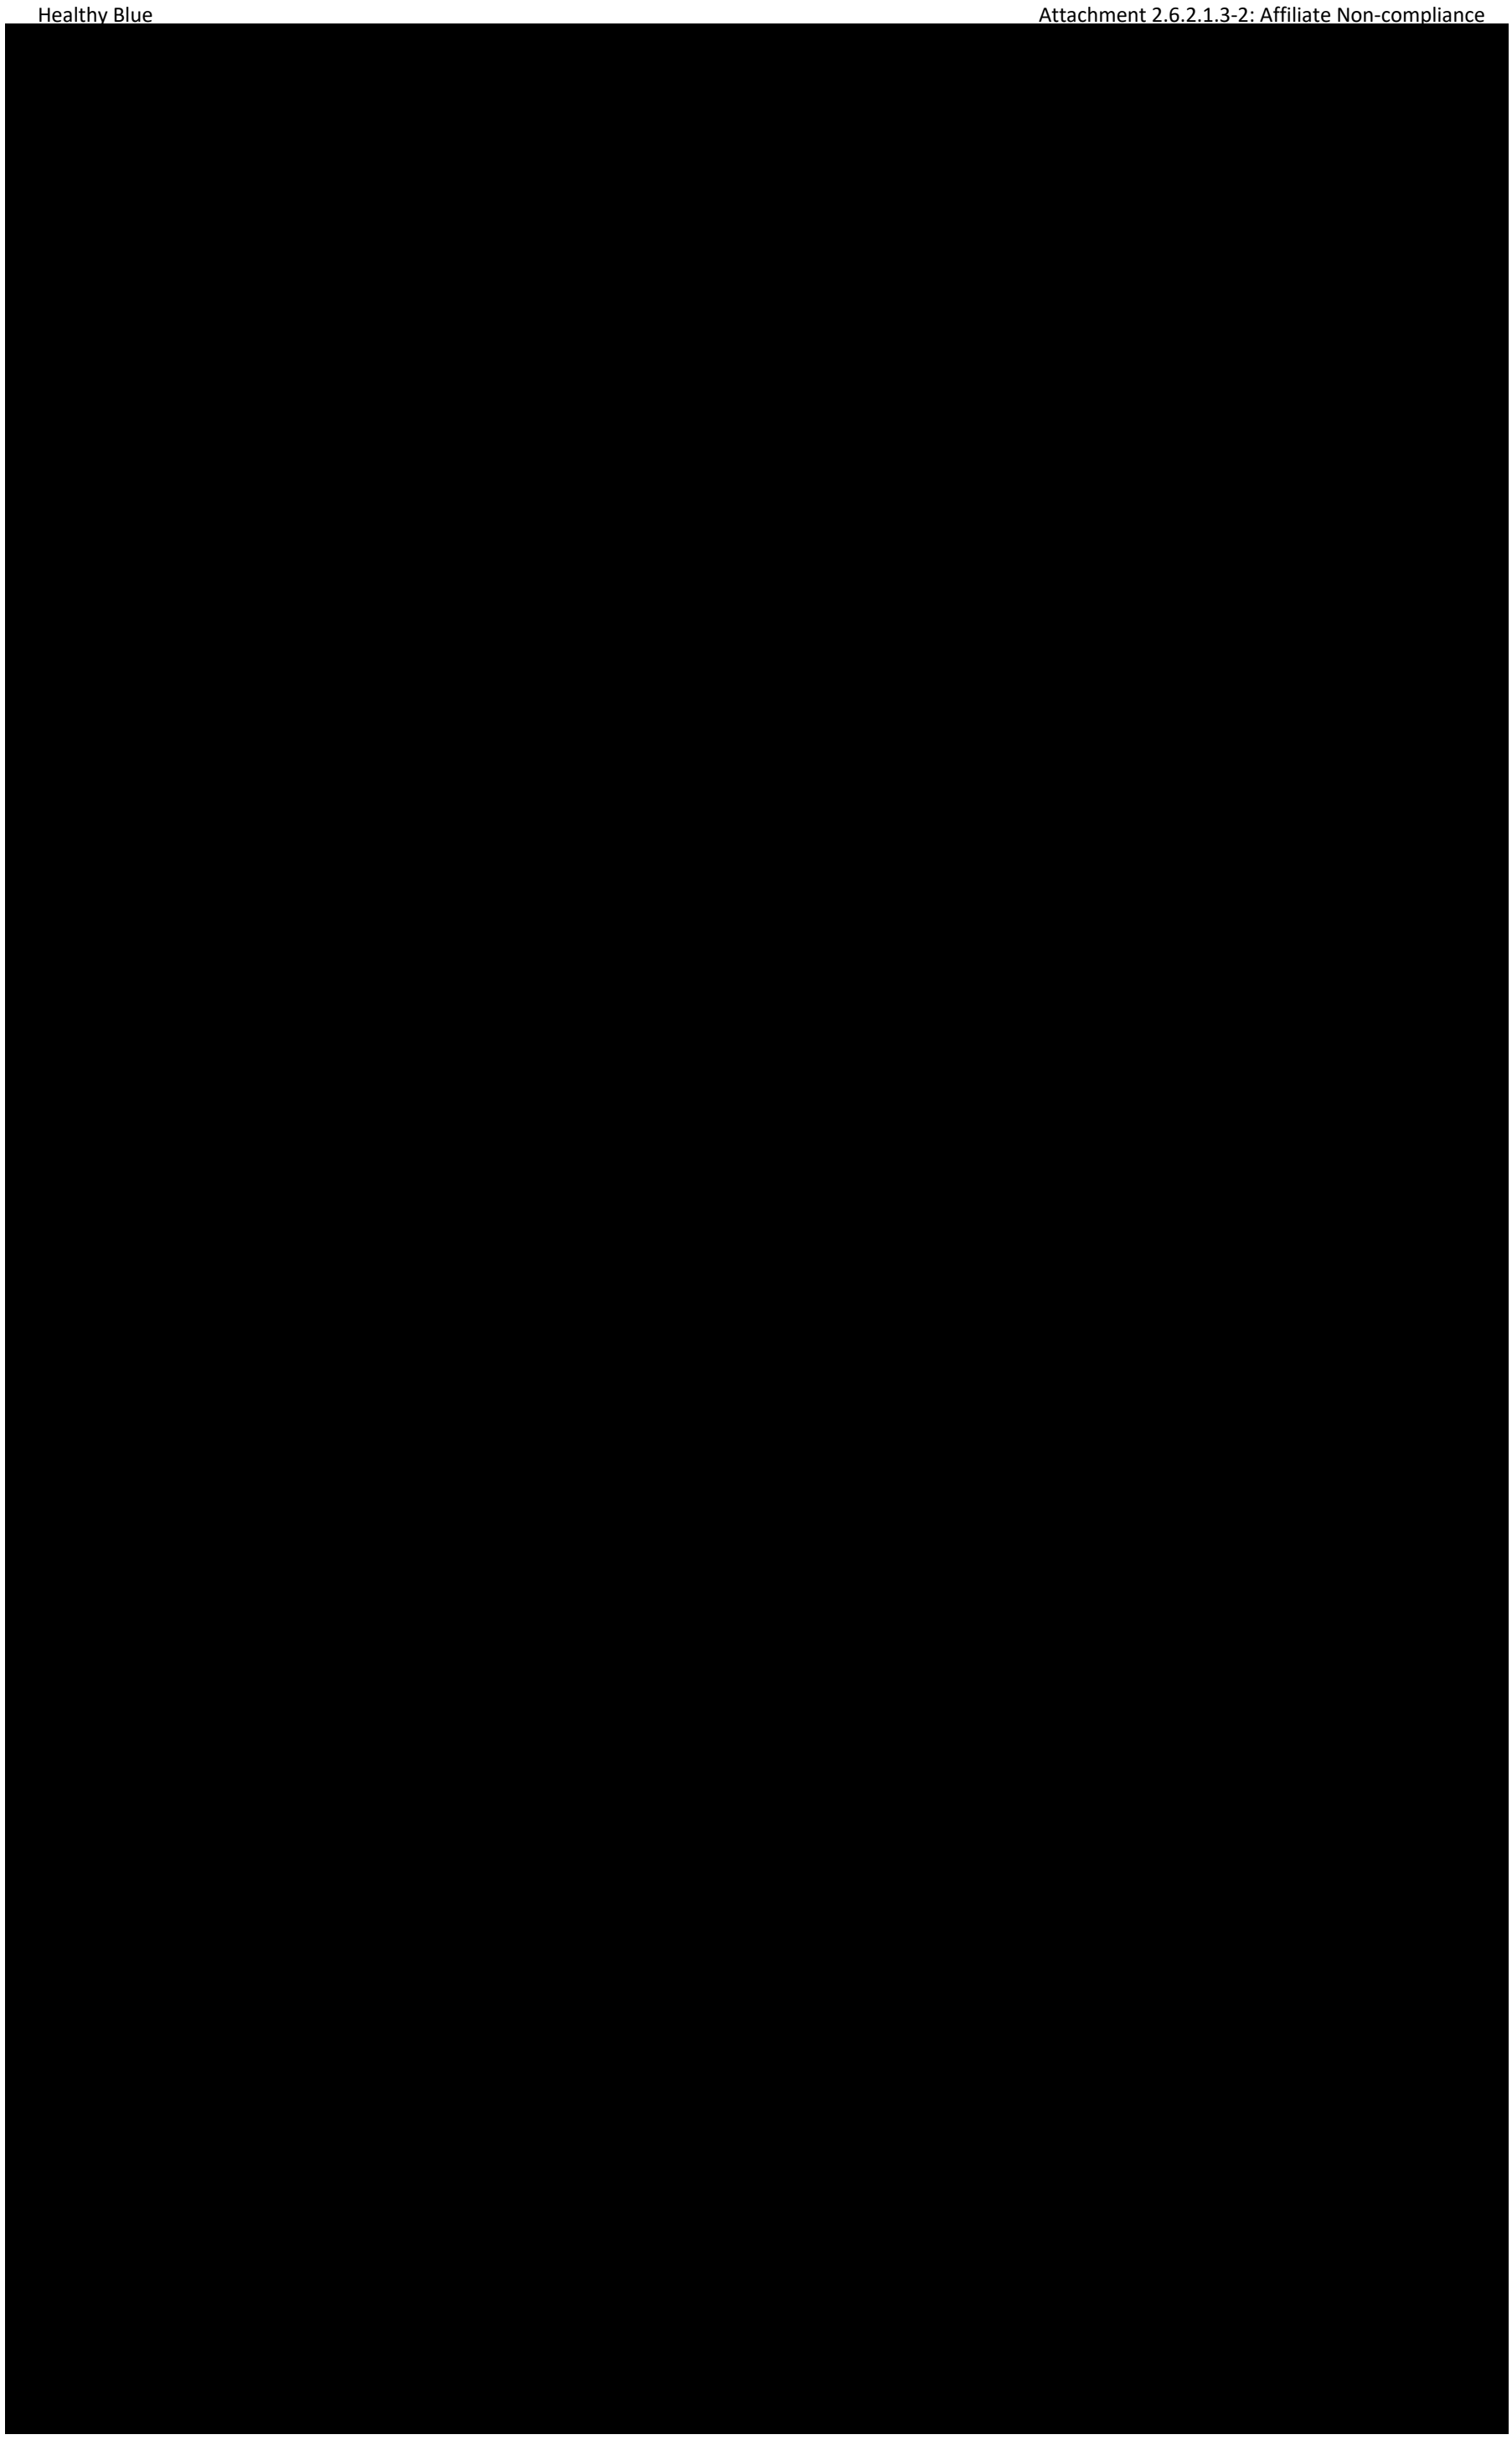


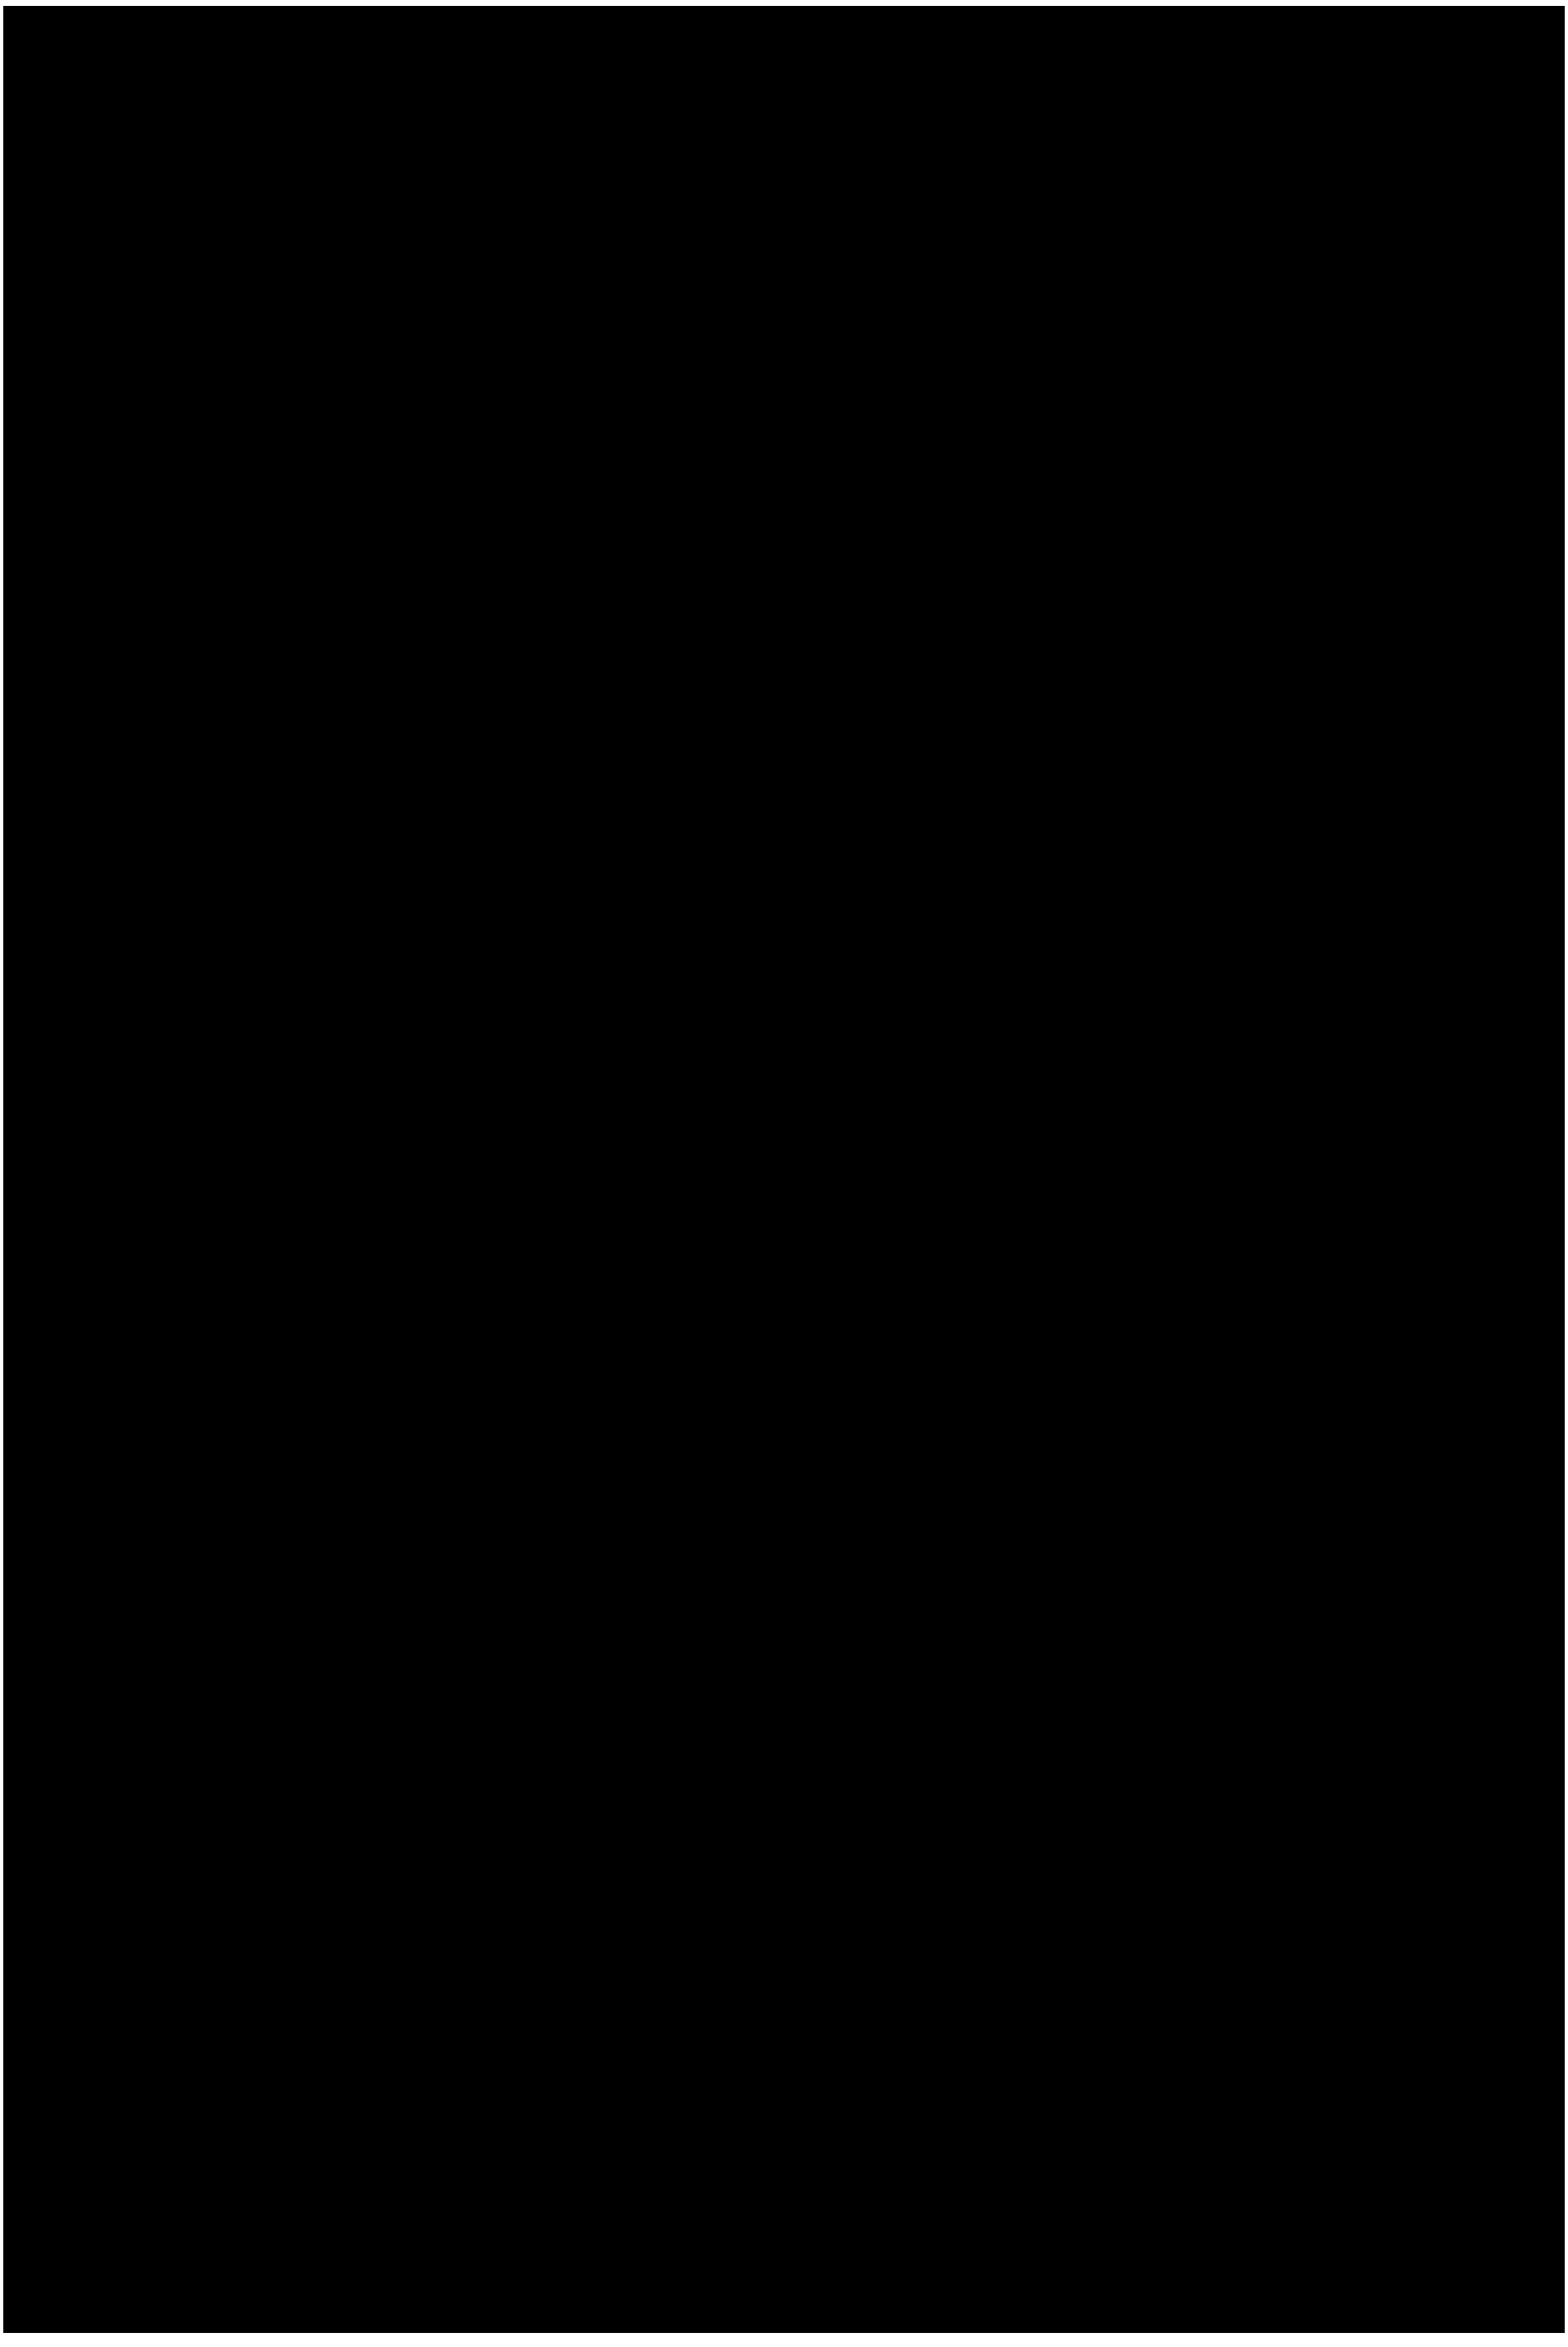












### Sponsoring Total Teen Takeover to Give Teen Voices a Platform

Healthy Blue sponsors Total Teen Takeover, a celebration for the graduates of an eight-week mentoring and workforce development program for young people. Through the program, youth can connect with mentors, explore potential careers, earn industry-recognized certifications, and reinvest in their community through service learning projects. Total Teen Takeover, now in its sixth year, provides a platform to teens to discuss topics important to them, ranging from depression and bullying to mentoring and workforce development. The teens involved are part of an advisory board to help Healthy Blue and our community partners select dynamic and engaging speakers for the event.

# Attachment 2.6.2.2.2-1

## Key Personnel Résumés

Healthy Blue

# Christy Valentine, MD, MBA — Chief Executive Officer

## Qualifications

Dr. Valentine, a native New Orleanian, is responsible for improving lives and communities through collaboration with partners across Louisiana. Dr. Valentine will continue to focus on innovative healthcare solutions and simplified processes for our members, putting them at the center. In doing so, there is a keen focus on bridging the gap in social and economic conditions, which lead to health inequities. Dr. Valentine spent nearly 13 years as a physician in private practice in the New Orleans metro area specializing in Pediatrics and Internal Medicine dedicated to providing quality care by optimizing community health.

## Resume/Professional Experience

**Healthy Blue**

**Chief Executive Officer** **2021 – Present**

- Guides overall strategic direction, growth, operations, and performance of Healthy Blue
- Builds a culture of accountability by implementing business strategies aligned with our mission and values
- Collaborates across the health plan to develop new and innovative initiatives to give members superior service and care
- Serves as primary contact for LDH regarding all issues
- Fosters and maintains relationships with key provider systems such as hospitals, large physician or group practices, and specialty providers

**Anthem**

**Regional Medical Director** **2019 – 2021**

- Subject matter expert on designing and executing cross-departmental programs that synchronize the efficient care of DSNP members
- Worked to improve outcome measures and close gaps in care for vulnerable members

**Healthy Blue**

**Medical Director** **2016 – 2019**

- Successfully launched and led several ER initiatives designed to reduce inappropriate ER utilization
- Led cross-departmental team that created the Enhanced Inpatient Member Interaction (EIMI) program. This initiative has changed the level and degree Healthy Blue associates engage hospitalized members to connect them with outpatient resources and avoidable hospital readmission
- Developed an initiative that identified outlier provider coding; now being adopted in other Anthem markets

**New Orleans East Hospital**

**Governing Board Commissioner** **2008 – Present**

**Louisiana State Board of Medical Examiners**

**Governing Board Member** **2014 – Present**

**President** **2017 – 2019**

**Louisiana Office of Community Preparedness**

**Medical Consultant** **2016 – 2020**

**Louisiana Statewide Medical Director of Reproductive Health** **2015 – 2016**

**Valentine Medical Center, Inc.**

**Owner/Physician** **2005 – 2018**

## Education

- The University of Chicago Booth School of Business, Master of Business Administration, 2018 – 2020
- Tulane University Medical Center, Resident, Internal Medicine and Pediatrics, 2004
- Louisiana State University School of Medicine, Doctorate of Medicine, 2000
- Xavier University of Louisiana, Bachelor of Science in Biology/Pre-Medicine, 1996

# Dexter Trivett, MBA — Chief Operating Officer

## Qualifications

Dexter Trivett brings more than a decade of experience in managed care, and has successfully led initiatives around provider relations, network development, and operations that involved redesigning and streamlining processes and turning strategic ideas into fully operational programs. Since 2015, he has overseen day-to-day operations across Healthy Blue's departments to ensure we continue to meet LDH's requirements and to drive the best possible outcomes for members. Dexter's progressive history of leadership positions includes managing provider relations and operational initiatives across Medicaid affiliates in 20 states.

## Resume/Professional Experience

**Healthy Blue**

**Chief Operating Officer** **2015 – Present**

- Oversees the health plan's operational areas to ensure continued compliance with State, federal, and Contract requirements as well as achieve the organizational mission, vision, and goals
- Maintains responsibility for overseeing and leading our Member Services, Provider Services, Claims, and Information Technology (IT) departments
- Served as the liaison to various corporate support services and regulators, local network development, provider partnerships, relations, medical, case and quality management programs, performance management/improvement, budgets, complaints and appeals, regulatory and contractual compliance, monthly financials, and reporting
- Provides input on overall strategic direction, especially strategies affected by operations, practices, and policies

**Anthem**

**Senior Manager, Corporate National Provider Relations** **2013 – 2015**

- Served as the program manager and implementation leader for key national and local market Provider Relations initiatives across 20 Medicaid affiliates
- Directed all aspects of provider relations and contracting, including developing, building, and maintaining robust networks that deliver culturally and linguistically responsive medical, behavioral health, and ancillary services
- Orchestrated the design and implementation of a Provider Relations program to support and build lasting provider relationships and minimize their administrative burden

**Project Manager II, Corporate Provider Operations** **2011 – 2013**

- Led portfolio of projects within the Provider Lifecycle Program, redesigning processes to reduce provider contract processing times and improve data quality
- Assisted in launching multiple cross-functional programs and projects aimed toward building strong provider collaborations, cultural change, process improvement, and quality to support members
- Oversaw Patient Care Consultants on activities related to the Provider Access and Quality Care programs, as well as the Provider Quality Improvement programs

**Amerigroup Corporation**

**Associate, Leadership Development Program** **2009 – 2011**

- Partnered with senior leadership to identify, evaluate, and execute robust, high-profile process improvement initiatives. Developed leadership skills at an accelerated pace while designing and rolling out improvements at the department, statewide, and national levels.
- Researched emerging industry trends and built cultural competency initiatives database in support of new RFP requirements, contributing to winning RFP response

## Education

- Old Dominion University, Master of Business Administration, 2009
- James Madison University, Bachelor of Business Management, 2007

# Raymond Poliquit, MD, FAAP — Chief Medical Officer

## Qualifications

Dr. Raymond Poliquit is a Kenner-based, board-certified pediatrician who brings more than 25 years of experience providing direct patient care. As Healthy Blue's full-time Medical Director since 2015, Dr. Poliquit has played an integral role in clinical and quality management activities. He is licensed to practice medicine in Louisiana and is a Fellow of the American Academy of Pediatrics. Since 1994, Dr. Poliquit has cared for Louisiana residents, serving the State's most impoverished communities as former Chief of Staff at Madison Parish Hospital in Tallulah and at one of the state's largest Federally Qualified Health Centers. He is also a licensed Zumba® instructor and leads Zumba classes for Healthy Blue's "Making Fitness Fun" program, providing virtual classes to meet everyone's fitness goals safely at their homes. He is an adoptive parent of a 17-year-old former Louisiana foster child who recently started college.

## Resume/Professional Experience

**Healthy Blue**

**Chief Medical Officer** **2013 – Present**

- Oversees all aspects of clinical operations for Healthy Blue, accountable for providing leadership and direction on utilization/cost management and clinical quality management functions
- Makes timely medical decisions and provides peer-to-peer consultation to providers across the state
- Works collaboratively across health plan functional areas — provider relations, member services, claims management, and more to drive strategic short- and long-term planning that will achieve the organization's mission, vision, and goals
- Develops and enforces clinical policies, assures fully integrated care, and supports, assists, and directs medical management activities in conjunction with the Behavioral Health Medical Director and other key personnel
- Collaborates with affiliate health plan Medical Directors on national medical policies and carries out national medical policies at the health plan in collaboration with the Health Plan President

**Primary Health Care Services Center**

**Medical Director/Pediatrician** **2009 – 2013**

- Oversaw medical management and supervised physicians, nurse practitioners, nurses, quality nurses, case managers, medical records staff and clinical pharmacists for this safety-net provider, serving 12,000 patients in Ouachita Parish with 28,000 encounters a year
- Managed the Quality Assurance program of the clinic and spearheaded the center's NCQA Patient-Centered Medical Home Recognition

**Madison Parish Hospital**
**Emergency Room Physician** **1995 – 2014**

**Centene Corporation**
**Committee Member, Louisiana Healthcare Connections** **2011 – 2013**

**Outpatient Medical Center at Talullah**
**Medical Director/Pediatrician** **1994 – 2009**

**Madison Parish Hospital**
**Medical Staff/Courtesy Medical Staff** **1994 – 2014**

## Education

- State University of New York, Health Sciences Center at Brooklyn, Kings County Hospital Center, Pediatrics, 1994
- University of the Philippines, Doctor of Medicine, 1989
- University of the Philippines, Bachelor of Science, Biology, Cum Laude, 1984

# Cheryll Bowers-Stephens, MD, MBA — Behavioral Health Medical Director

## Qualifications

A 25-year health care industry veteran, Dr. Bowers-Stephens has held a variety of leadership roles, from serving as the Louisiana Department of Health and Hospital's Assistant Secretary of Mental Health (Government Appointee) to managing Medical Director to Chief Medical Officer for Healthy Blue. Dr. Bowers-Stephens' two decades of directly managing staff, fiscal budgets, and clinical operations, means that she keenly understands all aspects of clinical, quality, and utilization management as well as population health strategies. She is currently board-certified in both General and Child & Adolescent Psychiatry with an unrestricted medical license to practice in Louisiana, as well as two other states. She has also taught organizational behavior and financial management and accounting, the core curriculum for students working on a Master of Public Health at LSU School of Public Health.

## Resume/Professional Experience

**Healthy Blue**

**Behavioral Health Medical Director** **2015 – Present**

- Plays a key role in major clinical and quality management initiatives around behavioral health (BH), and develops programs and strategies to support the integration of care, including supporting and educating primary care physicians on common BH conditions, overseeing and assisting with psychopharmacology activities, and providing clinical guidance related to mental health and substance use disorder
- Leads all aspects of BH administration and utilization, including assessments, referrals, and processes that assure members receive the services they need
- Builds relationships and engages with Louisiana providers, community-based organizations, and other stakeholders to drive value-based care and awareness of BH needs in the community, and to create solutions that address those needs (includes serving on joint operating committees, conducting peer-to-peer reviews and consultations, and chairing and serving on internal committees)
- Designs and develops national-level interventions in conjunction with affiliate Medical Directors, leveraging existing tools that will drive performance and best practices in value-based care across affiliates
- Hired and oversees a BH team, participates in readiness reviews and presentations, and assists with developing Medicaid clinical models
- Collaborates with providers on parenting skills and behavior modification techniques, and develops strategies to inform members and their families on available benefits and services
- Supports the Medical Management staff, ensuring timely responses to members and providers

**PerformCare**

**Chief Medical Officer** **2013 – 2015**

- Provided administrative oversight to the Healthcare Management, Quality Management, Behavioral and Health Informatics teams to assure members receive the most appropriate services and supports, including planning, organizing, and supporting an Integration Health Strategy for Amerihealth Caritas
- Helped pioneer innovative health care programs to address the unique needs of members, and directed both clinical and non-clinical initiatives to positively influence quality and outcomes

**Oschner Medical Foundation**

**Child and Adolescent Psychiatrist** **2007 – 2013**

- Provided direct care to individuals with severe BH conditions in main campus tertiary care clinic. Specialized in treating people with both developmental disabilities and BH disorders, young adults transitioning to adulthood with ADHD, and youth with Traumatic Brain Injuries from sports-inflicted injuries

## Education

- University of New Orleans, Master of Business Administration, 1998
- Tulane University Medical Center, Fellowship, Child and Adolescent Psychiatry, 1993
- Ochsner Medical Foundation, Internship and Adult Psychiatry, 1991
- Louisiana State Medical University Medical School, Doctor of Medicine, 1988
- Spelman College, Bachelor of Arts, Psychology, 1982

# Christine Coleman, MBA — Chief Financial Officer

## Qualifications

Christine, a native New Orleanian with over 15 years healthcare finance experience, oversees all aspects of financial operations, including accounting, financial reporting, and audit activities. Christine oversees the team that is responsible for delivering all finance and actuarial services to Healthy Blue. The team provides budgeting and forecasting support, trend evaluation, rating system and product pricing support, and industry competitive analysis as well as strategic analysis to impact leadership decision-making, improve efficiency, and drive innovation.

## Resume/Professional Experience

**Healthy Blue**

**Chief Financial Officer** **2019 – Present**

- Oversees the financial reporting for a health plan with $1B in revenue
- Strategically analyzes the plan's reporting, profitability, financials and key functional areas and processes to meet performance targets, goals, and objectives

**University Medical Center**

**Senior Decision Support Analyst** **2018 – 2019**

- Created financial pro formas for new services
- Created and maintained budget template
- Managed hospital-wide expense reduction initiatives
- Created customized reports for senior management and conducted ad hoc analyses as needed
- Prepared monthly volume, revenue, expense and FTE forecast
- Prepared and analyzed service line financials

**Oschner Health System**

**Service Line Financial Manager** **2016 – 2018**

- Provided direct care to individuals with severe BH conditions in main campus tertiary care clinic. Specialized in treating people with both developmental disabilities and BH disorders, young adults transitioning to adulthood with ADHD, and youth with Traumatic Brain Injuries from sports-inflicted injuries

**Senior Financial Analyst** **2015 – 2016**

- Budgeted for 100+ medical specialties cost centers/departments
- Created pro formas for new physician and/or equipment requisitions
- Created monthly dashboards for senior management
- Provided financial data for physician credentialing, grants, and hospital ranking surveys

**Senior Financial Analyst, Treasury Department** **2007 – 2015**

- Prepared the System's quarterly cash forecast
- Responsible for capital financing analysis/accounting
- Handled banking administrator duties
- Acted as liaison for IRS bond examinations
- Drafted post-bond compliance policy
- Attended the Board of Directors Investment Committee quarterly meetings
- Member of the Finance Recognition Committee, which decided Employee and Manager of the Month

**Financial Analyst, Treasury Department** **2006 – 2007**

- Managed the System's and its pension plan $1B investment portfolios
- Performed monthly and annual financial close
- Participated in annual budgeting/forecasting process

## Education

- University of Dallas, Master of Business Administration, 2004
- Dillard University, Bachelor of Arts in Accounting, 2000

# Mykayla Jones, PharmD —Pharmacy Director

## Qualifications

Mykayla, a native Louisianian, is a licensed Louisiana Pharmacist. She coordinates, manages and oversees Healthy Blue's responsibilities related to pharmacy. She participates in LDH required pharmacy meetings to discuss issues for the efficient and economical delivery of pharmacy services to Medicaid members and to promote relevant clinical pharmacy programs for medication utilization. She collaborates with our internal team to conduct monitoring and management of members as it relates to utilization of prescription drugs through data coordination with the Single PBM.

## Resume/Professional Experience

**Healthy Blue**

**Pharmacy Director** **2019 – Present**

- Supervises, schedules, and evaluates all clinical and supportive pharmacy personnel
- Develops, maintains, and operationalizes formularies related to coverage, utilization management, and clinical edits
- Develops and implements pharmaceutical management initiatives/programs and operation procedures to achieve quality, efficiency, and cost of care goals
- Serves as the subject matter expert for pharmaceutical program implementations with use of six sigma techniques to identify and improve existing solutions
- Ensures the Pharmacy Services team is delivering exceptional customer care to doctors and members along with managing end-to-end doctor services including prior authorizations, customer transfers, complex insurance issues, and medication reviews
- Oversees day to day operations to ensure the department is meeting prior authorization turn-around time and service level agreement metrics
- Manages relationships with and provides oversight of key vendors, including PBM partners

**Louisiana Healthcare Connections**

**Clinical Pharmacist, Medicare** **2018 – 2019**

- Provided operational support for the delivery of Medicare clinical information to various business units
- Developed, implemented, and enforced Medicare Part D operations
- Developed workflow processes to ensure monitoring of patient outcomes as it relates to Star Measures
- Developed pharmacy training manual for Medicare Part D
- Developed DUR process according to CMS rules and guidelines
- Assisted in implementing programs and process improvement to enhance the level of customer service provided to members from Pharmacy and Medical Management team members

**Southeast Community Health Systems**

**Director of Pharmacy, 340B Specialist** **2015 – 2017**

- Developed and Implemented 340B pharmacy program for clinical and pharmacy department
- Developed and monitored 340B compliance program which include performing gap analysis to align improvement activities to maintain required accreditation and company standards
- Designed and maintained audits to ensure regulatory compliance and revenue maximization

**Gulf Coast Pharmaceutical Specialty Co**

**Pharmacy Manager, Long-term Care** **2014 – 2015**

- Assisted and directed support staff in the production and dispensing of medication order to facilities and residents
- Ensured staff and facilities operated according to Federal and State Regulations as it pertains to LTC pharmacy

## Education

- Bellevue University, Master of Business Administration with concentration in Health Care Administration, 2019
- Xavier University of Louisiana, Doctor of Pharmacy, 2007

# Kimberly Chope — Contract Compliance Officer

## Qualifications

Kim has 25 years of managed care experience focused on regulatory compliance, program development and growth of state Medicaid programs and leads the development and implementation of policies, procedures, and standards to make sure all aspects of the organization fully comply with federal, State, and Contract requirements.

## Resume/Professional Experience

**Healthy Blue**

**Contract Compliance Officer** **2014 – Present**

- Leads the development and implementation of policies, procedures, and standards to make sure all aspects of the organization fully comply with all federal, State, and Contract requirements
- Develops and manages the implementation of State Medicaid contractual requirements to ensure all are executed per the specifications of the State Contract across the health plan and shared service partners: these partners include health plan operations, quality management, health care management, claims, marketing, and encounters
- Maintains oversight and management of all health plan regulatory reports and their timely submission to State agencies through requirements gathering and development
- Serves as primary point of contact for State entities, developing strong working relationships to address issues that arise well before they become cost drivers
- Continuously aligns Regulatory Services, health plan, and shared service resources to effectively meet needs and by honing consistent and positive messaging in all communications
- Coordinates and drives accountability of key stakeholders including affiliates and shared service partners to meet program changes dictated through State Contract amendments and policy directives, as well as advising senior management relative to impact and risks

**Manager, Regulatory Services** **2012 – 2014**

- Initiated and conducted activities to support and promote corporate and health plan compliance with regulatory and contractual obligations of multiple state and federal regulatory bodies
- Initiated and designed an innovative compliance monitoring system that included the monitoring of contractual and regulatory compliance level via report review and assessment, resulting in reduced overhead expenses
- Conducted business owner education of new legislation or contractual requirements

**Amerigroup Florida**

**Consultant, Provider Contracting** **2010 – 2012**

- Successfully contracted long-term supports and services networks in 17 Florida counties where managed care was not prevalent
- Demonstrated ability to contract primary care and specialist providers in a challenging rural Florida area
- Significantly grew market share of dual-eligible programs by contracting, educating, and servicing Assisted Living Facilities on new public-private programs

**National Flight Academy**

**Consultant, Special Projects and Development** **2009 – 2011**

- Led the coordination of all special events and fund-raising events for the National Flight Academy (NFA) from pre-construction to operations, resulting in positive image and overwhelming community support

## Education

- University of Georgia, Bachelor of Business Administration, Risk Management and Insurance, 1989

# Karen Kosinski, MPH, MSW — Health Equity Administrator

## Qualifications

Karen has over 15 years of experience with the strategic design, project management, implementation, and evaluation of health equity efforts in the context of the population health initiatives. She informs decision-making around best practices related to disparity reductions and to address overall opportunities to improve health (i.e. social determinants of health), including the provision of health equity and social determinant of health resources and research to leadership and programmatic areas. In 2021, Karen led the First Annual Racial and Health Equity Symposium, along with the Louisiana Public Health Institute. This event highlighted local Louisiana partners involved in equity work in education, incarceration, employment, healthcare and housing. More than 500 individuals throughout the state and country participated.

## Resume/Professional Experience

**Healthy Blue**

**Health Equity Administrator** **2021 – Present**

- Guides the health equity strategy within Healthy Blue and our provider network to support the effectiveness and efforts of the Health Equity Plan
- Oversees strategic design, implementation, and evaluation of health equity efforts in population health initiatives
- Informs decision-making around best payer practices related to disparity reductions, including the provision of health equity and social determinant of health resources and research to leadership and programmatic areas

**Behavioral Health Liaison, Permanent Supportive Housing** **2015 – 2021**

- Responsible for day-to-day functioning of MCO operations for state Permanent Supportive Housing program
- Working with regional Clinical Solutions Team on incorporating social determinants of health into new Population Health model
- Relationship Owner for health equity collaboration efforts with Louisiana Public Health Institute (LPHI), including Project Lead role in planning and execution of First Annual Racial and Health Equity Symposium, Racial Equity Learning Labs and Mental Health First Aid trainings
- Project Lead on implementation of standard SDOH assessments via Aunt Bertha for all Case Management teams in the TN market
- Team Member of Population Health Task Force to conduct a gap analysis exercise across 20+ Anthem Medicaid markets for future implementation of enterprise Population Health model
- Pioneered Permanent Supportive Housing program for Healthy Blue Louisiana, including training all staff, particularly Case Managers and Utilization Management, in referrals and processes; nurturing relationships with service providers, community partners and state program staff
- Developed innovative statewide and regional housing strategies for new proposal in conjunction with corporate Business Change Director; initiatives based on state-wide “listening tour” with diverse housing partners for community-driven solutions

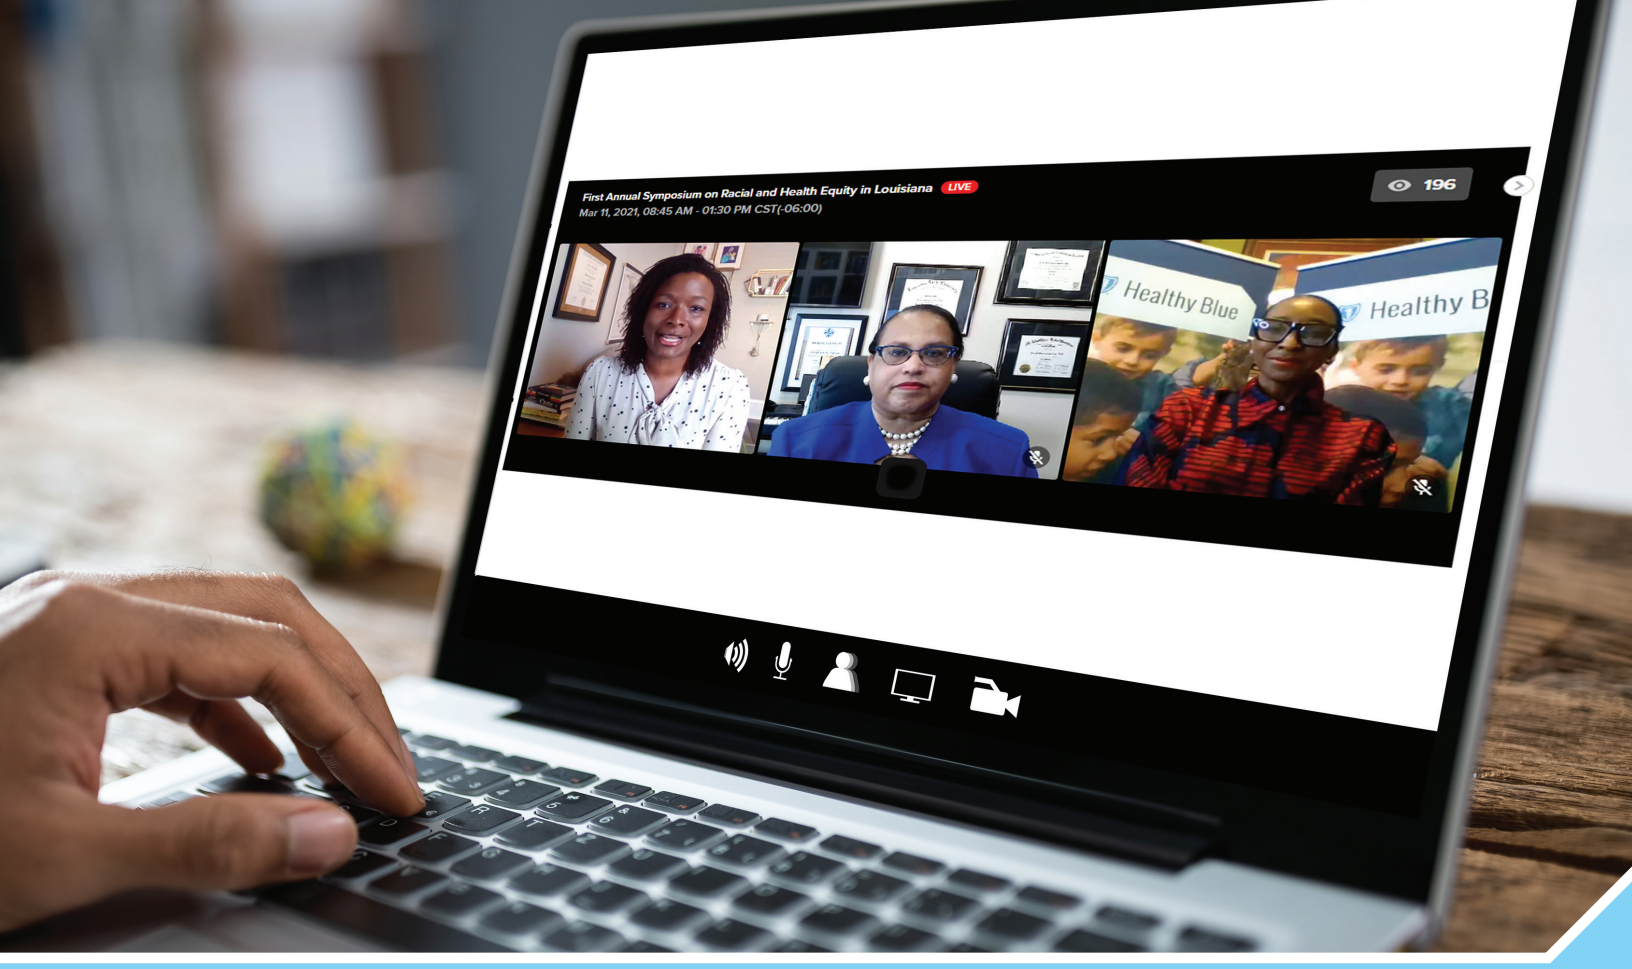
**Marie Stopes International**

**Director of Grants and External Relations/USAID Project Manager** **2013 – 2014**

- Managed over $3 million in annual project budgets, including all budgetary decision-making responsibility and fulfilling reporting requirements
- Served as signatory and decision-maker for USAID-funded “Improving Family Services” nation- wide reproductive health project with a budget of $8.9 million over five-year span

## Education

- Tulane University, Master of Public Health International Health Development
- Tulane University, Master of Social Work, Certificate in International Social Work
- University of Notre Dame, Bachelor of Arts in Anthropology, minor in Theology



### Promoting Health and Racial Equity in Louisiana

Healthy Blue teamed up with the Louisiana Public Health Institute (LPHI) to launch the inaugural Symposium on Racial and Health Equity in March 2021 with the theme of "Partnerships in Action: Collectively Achieving Racial Equity to Improve the Health of Our Community." At the conclusion of the Symposium, LPHI and Healthy Blue offered participants the opportunity to join a coalition dedicated to ending institutional racism in Louisiana. Healthy Blue will continue this commitment by sponsoring the first Racial Equity Learning Lab later this year.

### Building Community and Rebuilding Homes

Healthy Blue sponsored Rebuilding Together's Second Annual Build and Boil event. This event is a fundraiser, a community party, and a volunteer opportunity, bringing people from all over New Orleans together. The Build and Boil event supports Rebuilding Together's mission to improve the quality of life for low-income homeowners in New Orleans, especially homeowners who are elderly, disabled, veterans, or single heads of households with minor children. With Healthy Blue's help, this event raised over $28,000, boiled almost 1,000 pounds of crawfish for the community, and aided five local homeowners.

JAMA | US Preventive Services Task Force | RECOMMENDATION STATEMENT

# Screening and Behavioral Counseling Interventions to Reduce Unhealthy Alcohol Use in Adolescents and Adults

## US Preventive Services Task Force Recommendation Statement

US Preventive Services Task Force

**IMPORTANCE** Excessive alcohol use is one of the most common causes of premature mortality in the United States. From 2006 to 2010, an estimated 88 000 alcohol-attributable deaths occurred annually in the United States, caused by both acute conditions (eg, injuries from motor vehicle collisions) and chronic conditions (eg, alcoholic liver disease). Alcohol use during pregnancy is also one of the major preventable causes of birth defects and developmental disabilities.

**OBJECTIVE** To update the US Preventive Services Task Force (USPSTF) 2013 recommendation on screening for unhealthy alcohol use in primary care settings.

**EVIDENCE REVIEW** The USPSTF commissioned a review of the evidence on the effectiveness of screening to reduce unhealthy alcohol use (defined as a spectrum of behaviors, from risky drinking to alcohol use disorder, that result in increased risk for health consequences) morbidity, mortality, or risky behaviors and to improve health, social, or legal outcomes; the accuracy of various screening approaches; the effectiveness of counseling interventions to reduce unhealthy alcohol use, morbidity, mortality, or risky behaviors and to improve health, social, or legal outcomes; and the harms of screening and behavioral counseling interventions.

**FINDINGS** The net benefit of screening and brief behavioral counseling interventions for unhealthy alcohol use in adults, including pregnant women, is moderate. The evidence is insufficient to assess the balance of benefits and harms of screening and brief behavioral counseling interventions for unhealthy alcohol use in adolescents.

**CONCLUSIONS AND RECOMMENDATION** The USPSTF recommends screening for unhealthy alcohol use in primary care settings in adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use. (B recommendation) The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of screening and brief behavioral counseling interventions for alcohol use in primary care settings in adolescents aged 12 to 17 years. (I statement)

*JAMA*. 2018;320(18):1899-1909. doi:10.1001/jama.2018.16789

The US Preventive Services Task Force (USPSTF) makes recommendations about the effectiveness of specific clinical preventive services for patients without obvious related signs or symptoms.

It bases its recommendations on the evidence of both the benefits and harms of the service and an assessment of the balance. The USPSTF does not consider the costs of providing a service in this assessment.

The USPSTF recognizes that clinical decisions involve more considerations than evidence alone. Clinicians should understand the evidence but individualize decision making to the specific patient or situation. Similarly, the USPSTF notes that policy and coverage decisions involve considerations in addition to the evidence of clinical benefits and harms.

## Summary of Recommendations and Evidence

The USPSTF recommends screening for unhealthy alcohol use in primary care settings in adults 18 years or older, including pregnant women, and providing persons engaged in risky or hazardous drinking with brief behavioral counseling interventions to reduce unhealthy alcohol use (B recommendation) (**Figure 1**).

The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of screening and brief behavioral counseling interventions for alcohol use in primary care settings in adolescents aged 12 to 17 years. (I statement)

See the Clinical Considerations section for suggestions for practice regarding the I statement.

## Rationale

### Importance

The USPSTF uses the term "unhealthy alcohol use" to define a spectrum of behaviors, from risky drinking to alcohol use disorder (AUD) (eg, harmful alcohol use, abuse, or dependence) (**Table**)[1]. "Risky" or" hazardous" alcohol use means drinking more than the recommended daily, weekly, or per-occasion amounts, resulting in increased risk for health consequences but not meeting criteria for AUD.[2] The National Institute on Alcohol Abuse and Alcoholism (NIAAA) defines "risky use" as exceeding the recommended limits of 4 drinks per day (56 g/d based on the US standard of 14 g/drink) or 14 drinks per week (196 g/d) for healthy adult men aged 21 to 64 years or 3 drinks per day or 7 drinks per week (42 g/d or 98 g/week) for all adult women of any age and men 65 years or older.[2]

A standard drink is defined as 12.0 oz of beer (5% alcohol), 5.0 oz of wine (12% alcohol), or 1.5 oz of liquor (40% alcohol).[2] The American Society of Addiction Medicine (ASAM) defines "hazardous use" as alcohol use that increases the risk of future negative health consequences.[3] The *Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition* (*DSM-5*) defines the severity of AUD (mild, moderate, or severe) based on the number of criteria met.[4] Previous versions of the *DSM-5* had separate diagnoses for alcohol abuse and alcohol dependence, but it no longer separates these diagnoses.[1] Currently, there is no firm consensus worldwide regarding the definition of risky drinking. In addition, the definition of a standard drink differs by country.[1] Any alcohol use is considered unhealthy in pregnant women and adolescents.[1] In adolescents, the definition of moderate- or high-risk alcohol use varies by age, based on days of use per year.[5]

Excessive alcohol use is one of the most common causes of premature mortality in the United States. From 2006 to 2010, an estimated 88 000 alcohol-attributable deaths occurred annually in the United States, caused by both acute conditions (eg, injuries from motor vehicle collisions) and chronic conditions (eg, alcoholic liver disease).[1,6] Alcohol use during pregnancy is also one of the major preventable causes of birth defects and developmental disabilities.[7]

### Detection

The USPSTF found adequate evidence that numerous brief screening instruments can detect unhealthy alcohol use with acceptable sensitivity and specificity in primary care settings.

### Benefits of Early Detection and Behavioral Counseling Interventions

The USPSTF found no studies that directly evaluated whether screening for unhealthy alcohol use in primary care settings in adolescents and adults, including pregnant women, leads to reduced unhealthy alcohol use; improved risky behaviors; or improved health, social, or legal outcomes.

The USPSTF found adequate evidence that brief behavioral counseling interventions in adults who screen positive are associated with reduced unhealthy alcohol use. There were reductions in both the odds of exceeding recommended drinking limits and heavy use episodes at 6- to 12-month follow-up. In pregnant women, brief counseling interventions increased the likelihood that women remained abstinent from alcohol use during pregnancy. The magnitude of these benefits is moderate. Epidemiologic literature links reductions in alcohol use with reductions in risk for morbidity and mortality and provides indirect support that reduced alcohol consumption may help improve some health outcomes.[1,8]

The USPSTF found inadequate evidence that brief behavioral counseling interventions in adolescents were associated with reduced alcohol use.

### Harms of Screening and Behavioral Counseling Interventions

The USPSTF bounds the harms of screening and brief behavioral counseling interventions for unhealthy alcohol use in adults, including pregnant women, as small to none, based on the likely minimal harms of the screening instruments, the noninvasive nature of the interventions, and the absence of reported harms in the evidence on behavioral interventions. When direct evidence is limited, absent, or restricted to select populations or clinical scenarios, the USPSTF may place conceptual upper or lower bounds on the magnitude of benefit or harms.

The USPSTF found inadequate evidence on the harms of screening and brief behavioral counseling interventions for alcohol use in adolescents.

### USPSTF Assessment

The USPSTF concludes with moderate certainty that screening and brief behavioral counseling interventions for unhealthy alcohol use in the primary care setting in adults 18 years or older, including pregnant women, is of moderate net benefit.

Figure 1. USPSTF Grades and Levels of Evidence

What the USPSTF Grades Mean and Suggestions for Practice

| Grade | Definition | Suggestions for Practice |
|---|---|---|
| A | The USPSTF recommends the service. There is high certainty that the net benefit is substantial. | Offer or provide this service. |
| B | The USPSTF recommends the service. There is high certainty that the net benefit is moderate, or there is moderate certainty that the net benefit is moderate to substantial. | Offer or provide this service. |
| C | The USPSTF recommends selectively offering or providing this service to individual patients based on professional judgment and patient preferences. There is at least moderate certainty that the net benefit is small. | Offer or provide this service for selected patients depending on individual circumstances. |
| D | The USPSTF recommends against the service. There is moderate or high certainty that the service has no net benefit or that the harms outweigh the benefits. | Discourage the use of this service. |
| I statement | The USPSTF concludes that the current evidence is insufficient to assess the balance of benefits and harms of the service. Evidence is lacking, of poor quality, or conflicting, and the balance of benefits and harms cannot be determined. | Read the Clinical Considerations section of the USPSTF Recommendation Statement. If the service is offered, patients should understand the uncertainty about the balance of benefits and harms. |

USPSTF Levels of Certainty Regarding Net Benefit

| Level of Certainty | Description |
|---|---|
| High | The available evidence usually includes consistent results from well-designed, well-conducted studies in representative primary care populations. These studies assess the effects of the preventive service on health outcomes. This conclusion is therefore unlikely to be strongly affected by the results of future studies. |
| Moderate | The available evidence is sufficient to determine the effects of the preventive service on health outcomes, but confidence in the estimate is constrained by such factors as<br>the number, size, or quality of individual studies.<br>inconsistency of findings across individual studies.<br>limited generalizability of findings to routine primary care practice.<br>lack of coherence in the chain of evidence.<br>As more information becomes available, the magnitude or direction of the observed effect could change, and this change may be large enough to alter the conclusion. |
| Low | The available evidence is insufficient to assess effects on health outcomes. Evidence is insufficient because of<br>the limited number or size of studies.<br>important flaws in study design or methods.<br>inconsistency of findings across individual studies.<br>gaps in the chain of evidence.<br>findings not generalizable to routine primary care practice.<br>lack of information on important health outcomes.<br>More information may allow estimation of effects on health outcomes. |
| The USPSTF defines certainty as "likelihood that the USPSTF assessment of the net benefit of a preventive service is correct." The net benefit is defined as benefit minus harm of the preventive service as implemented in a general, primary care population. The USPSTF assigns a certainty level based on the nature of the overall evidence available to assess the net benefit of a preventive service. | |

USPSTF indicates US Preventive Services Task Force.

The USPSTF concludes that the evidence is insufficient to determine the benefits and harms of screening for unhealthy alcohol use in the primary care setting in adolescents aged 12 to 17 years.

## Clinical Considerations

### Patient Population Under Consideration

The "B" recommendation applies to adults 18 years or older, including pregnant women. The "I" statement applies to adolescents aged 12 to 17 years (**Figure 2**). These recommendations do not apply to persons who have a current diagnosis of or who are seeking evaluation or treatment for alcohol abuse or dependence.

### Screening Tests

Of the available screening tools, the USPSTF determined that 1-item to 3-item screening instruments have the best accuracy for assessing unhealthy alcohol use in adults 18 years or older.[1] These instruments include the abbreviated Alcohol Use Disorders Identification Test–Consumption (AUDIT-C) and the NIAAA-recommended Single Alcohol Screening Question (SASQ).

Table. Terms and Definitions of Unhealthy Alcohol Use

| Term | Source | Definition |
|---|---|---|
| Low-risk use/lower-risk use | ASAM | Consumption of alcohol below the amount identified as hazardous and in situations not defined as hazardous |
| Risky/at-risk use | NIAAA | Consumption of alcohol above the recommended daily, weekly, or per-occasion amounts but not meeting criteria for alcohol use disorder<br><br>For all women and men 65 y or older: No more than 3 drinks/d and no more than 7 drinks/wk<br><br>For men (21-64 y): No more than 4 drinks/d and no more than 14 drinks/wk<br><br>Should avoid alcohol completely: Adolescents, women who are pregnant or trying to get pregnant, and adults who plan to drive a vehicle or operate machinery, are taking medication that interacts with alcohol, or have a medical condition that can be aggravated by alcohol<br><br>For adolescents: NIAAA defines moderate- and high-risk use based on days of alcohol use in the past year, by age group:<br>Moderate risk:<br>Ages 12-15 y: 1 d/y<br>Ages 16-17 y: 6 d/y<br>Age 18 y: 12 d/y<br>Highest risk:<br>Age 11 y: 1 d<br>Ages 12-15 y: 6 d<br>Age 16 y: 12 d<br>Age 17 y: 24 d<br>Age 18 y: 52 d |
| Unhealthy use | ASAM | Any alcohol use that increases the risk or likelihood of health consequences (hazardous use [see below]) or has already led to health consequences (harmful use [see below]) |
| Hazardous use | WHO | A pattern of substance use that increases the risk of harmful consequences; in contrast to harmful use, hazardous use refers to patterns of use that are of public health significance, despite the absence of a current alcohol use disorder in the individual user |
| | ASAM | Alcohol use that increases the risk or likelihood of health consequences; does not include alcohol use that has already led to health consequences |
| Harmful use | WHO | A pattern of drinking that is already causing damage to health; the damage may be either physical (eg, liver damage from chronic drinking) or mental (eg, depressive episodes secondary to drinking)<br><br>The description for *ICD-10* code F10.1, also labeled "Alcohol Abuse" in the 2018 *ICD-10-CM* codebook |
| | ASAM | Consumption of alcohol that results in health consequences in the absence of addiction |
| Alcohol use disorder | *DSM-5* | A maladaptive pattern of alcohol use leading to clinically significant impairment or distress, as manifested by 2 (or more) of the following, occurring within a 12-mo period:<br>1. Having times when the patient drank more, or longer, than intended<br>2. More than once wanted to cut down or stop, tried it, but could not<br>3. Spending a lot of time drinking or being sick/getting over the aftereffects of drinking<br>4. Wanting to drink so badly that they could not think of anything else<br>5. Found that drinking (or being sick from drinking) often interfered with taking care of home or family responsibilities, caused problems at work, or caused problems at school<br>6. Continuing to drink even though it was causing trouble with family and friends<br>7. Given up or cut back on activities that were important or interesting in order to drink<br>8. More than once gotten into situations while or after drinking that increased the chances of getting hurt (eg, driving, swimming, unsafe sexual behavior)<br>9. Continued to drink even though it was causing depression or anxiety, other health problems, or causing memory blackouts<br>10. Having to drink much more than previously in order to get the desired effect, or finding that the usual number of drinks had much less effect than previously<br>11. Experiencing the symptoms of withdrawal after the effects of alcohol were wearing off, such as trouble sleeping, shakiness, restlessness, nausea, sweating, racing heart, or seizure<br>Severity is determined based on the number of symptoms present:<br>Mild: 2-3 symptoms<br>Moderate: 4-5 symptoms<br>Severe: ≥6 symptoms |
| Binge drinking/ heavy drinking episodes[a] | NIAAA | A pattern of drinking that brings blood alcohol concentration levels to 0.08 g/dL, which typically occurs after 4 drinks for women and 5 drinks for men—in about 2 h |
| | SAMHSA | Drinking ≥5 alcoholic drinks on the same occasion on at least 1 d in the past 30 d |
| Heavy drinking | SAMHSA | Drinking ≥5 drinks on the same occasion on each of ≥5 d in the past 30 d |

(continued)

The abbreviated AUDIT-C has good sensitivity and specificity for detecting the full spectrum of unhealthy alcohol use across multiple populations.[1,9] The AUDIT-C has 3 questions about frequency of alcohol use, typical amount of alcohol use, and occasions of heavy use, and takes 1 to 2 minutes to administer. The USAUDIT and USAUDIT-C are based on US standards. Preliminary evidence (1 study) suggests that the USAUDIT (specifically the USAUDIT-C) may be more valuable in identifying at-risk college drinkers.[10] The SASQ also has adequate sensitivity and specificity across the unhealthy alcohol use spectrum and requires less than 1 minute to administer, asking "How many times in the past year have you had 5 [for men] or 4 [for women and all adults older than 65 years]

Table. Terms and Definitions of Unhealthy Alcohol Use (continued)

| Term | Source | Definition |
|---|---|---|
| Alcohol dependence | *WHO/ICD-10-CM* | ≥3 of the following at some time during the previous year:<br>1. A strong desire or sense of compulsion to take the substance<br>2. Difficulties in controlling substance-taking behavior in terms of its onset, termination, or levels of use<br>3. A physiological withdrawal state when substance use has ceased or been reduced, as evidenced by: the characteristic withdrawal syndrome for the substance; or use of the same (or a closely related) substance with the intention of relieving or avoiding withdrawal symptoms<br>4. Evidence of tolerance, such that increased doses of the psychoactive substance are required in order to achieve effects originally produced by lower doses (clear examples of this are found in alcohol- and opiate-dependent individuals who may take daily doses sufficient to incapacitate or kill nontolerant users)<br>5. Progressive neglect of alternative pleasures or interests because of psychoactive substance use, increased amount of time necessary to obtain or take the substance, or to recover from its effects<br>6. Persisting with substance use despite clear evidence of overtly harmful consequences, such as harm to the liver through excessive drinking, depressive mood states consequent to periods of heavy substance use, or drug-related impairment of cognitive functioning; efforts should be made to determine that the user was actually, or could be expected to be, aware of the nature and extent of the harm |

Abbreviations: ASAM, American Society of Addiction Medicine; *DSM-5*, *Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition*; *ICD-10-CM*, *International Classification of Diseases, Tenth Revision, Clinical Modification*; NIAAA, National Institute on Alcohol Abuse and Alcoholism; SAMHSA, Substance Abuse and Mental Health Services Administration; WHO, World Health Organization.

[a] According to the American Society of Addiction Medicine, the preferred term is "heavy drinking episode."

Figure 2. Clinical Summary: Screening and Behavioral Counseling Interventions in Primary Care to Reduce Unhealthy Alcohol Use in Adolescents and Adults

| Population | Adults, including pregnant women | Adolescents |
|---|---|---|
| Recommendation | Screen for unhealthy alcohol use and provide persons engaged in risky or hazardous drinking with brief behavioral counseling interventions.<br>Grade: B | No recommendation.<br>Grade: I (insufficient evidence) |

| | |
|---|---|
| Screening Tests | Numerous brief screening instruments can detect unhealthy alcohol use with acceptable sensitivity and specificity in primary care settings. One- to 3-item screening instruments have the best accuracy for assessing unhealthy alcohol use in adults 18 years or older. These instruments include the AUDIT-C and the SASQ. |
| Treatments and Interventions | Brief behavioral counseling interventions were found to reduce unhealthy alcohol use in adults 18 years or older, including pregnant women. Effective behavioral counseling interventions vary in their specific components, administration, length, and number of interactions. The USPSTF was unable to identify specific intervention characteristics or components that were clearly associated with improved outcomes. |
| Relevant USPSTF Recommendations | The USPSTF has made recommendations on screening for and interventions to reduce the unhealthy use of other substances, including illicit drugs and tobacco. |

For a summary of the evidence systematically reviewed in making this recommendation, the full recommendation statement, and supporting documents, please go to https://www.uspreventiveservicestaskforce.org.

U.S. Preventive Services TASK FORCE

JAMA

AUDIT-C, Alcohol Use Disorders Identification Test–Consumption; SASQ, Single Alcohol Screening Question; USPSTF, US Preventive Services Task Force.

or more drinks in a day?"[1,2]. The Cut down, Annoyed, Guilty, Eye-opener (CAGE) tool is well known but only detects alcohol dependence rather than the full spectrum of unhealthy alcohol use.[1,11]

When patients screen positive on a brief screening instrument (eg, SASQ or AUDIT-C), clinicians should ensure follow-up with a more in-depth risk assessment to confirm unhealthy alcohol use and determine the next steps of care. Evidence supports the use of brief instruments with higher sensitivity and lower specificity as initial screening, followed by a longer instrument with greater specificity (eg, AUDIT). The AUDIT has 10 questions: 3 questions covering frequency of alcohol use, typical amount of alcohol use, and occasions of heavy use, and 7 questions on the signs of alcohol dependence and common problems associated with alcohol use (eg, being unable to stop once you start drinking). It requires approximately 2 to 5 minutes to administer.[1,12] If AUDIT is used as an initial screening test, clinicians may use a lower cutoff (such as 3, 4, or 5) to balance sensitivity and specificity in screening for the full spectrum of unhealthy alcohol use.

Screening instruments have also been specifically developed for various populations. Screening tools for pregnant women

include Tolerance, Worried, Eye-opener, Amnesia, Kut down (TWEAK)[13]; Tolerance, Annoyed, Cut down, Eye-opener (T-ACE)[14]; Parents, Partner, Past, Present Pregnancy (4P's Plus)[15]; and Normal drinker, Eye-opener, Tolerance (NET).[16] The NIAAA and American Academy of Pediatrics recommend the Car, Relax, Alone, Forget, Family, Friends, Trouble (CRAFFT) screening instrument for identifying risky substance use in adolescents.[17] The NIAAA also recommends asking patients about their own alcohol use as well as their friends' alcohol use.[5] The Comorbidity Alcohol Risk Evaluation Tool (CARET) is used in older adults.[18] The Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST), developed by the World Health Organization (WHO), screens for substance and alcohol use in adults.[1,19]

## Behavioral Counseling Interventions

Behavioral counseling interventions for unhealthy alcohol use vary in their specific components, administration, length, and number of interactions. Thirty percent of the interventions reviewed by the USPSTF were web-based. Nearly all of the interventions consisted of 4 or fewer sessions; the median number of sessions was 1 (range, 0-21). The median length of time of contact was 30 minutes (range, 1-600 minutes). Most of the interventions had a total contact time of 2 hours or less.[1] Primary care settings often used the Screening, Brief Intervention, and Referral to Treatment (SBIRT) approach. Interventions targeting adults other than college students (including pregnant and postpartum women) were more likely to take place in primary care settings, have multiple sessions, and involve a primary care team.[1] Most interventions involved giving general feedback to participants (eg, how their drinking fits with recommended limits, or how to reduce alcohol use). The most commonly reported intervention component was use of personalized normative feedback sessions, in which participants were shown how their alcohol use compares with that of others; more than half of the included trials and almost all trials in young adults used this technique.[1] Most trials in young adults involved 1 or 2 in-person or web-based personalized normative feedback sessions in university settings. Personalized normative feedback was often combined with motivational interviewing or more extensive cognitive behavioral counseling. Other cognitive behavioral strategies, such as drinking diaries, action plans, alcohol use "prescriptions," stress management, or problem solving were also frequently used. About one-third of the intervention trials in general and older adult populations involved a primary care team.[1] The USPSTF was unable to identify specific intervention characteristics or components that were clearly associated with improved outcomes.[1]

The USPSTF found no evidence to suggest that patients of different race/ethnicity or lower socioeconomic status have a lower likelihood of benefit from interventions. Effects of interventions were also similar in men and in women.[1]

## Screening Intervals

The USPSTF did not find adequate evidence to recommend an optimal screening interval for unhealthy alcohol use in adults.

## Suggestions for Practice Regarding the I Statement

### Potential Preventable Burden

In 2016, the National Survey on Drug Use and Health reported that an estimated 9.2% of adolescents aged 12 to 17 years drink alcohol and 4.9% had an episode of binge drinking in the last 30 days.[20] Each year, excessive drinking in underage youth leads to more than 4300 deaths.[21] Driving while under the influence of alcohol is particularly hazardous among adolescents. The 2015 Youth Risk Behavior Survey found that about 8% of high school students who drove a car in the last 30 days reported driving after drinking alcohol, and 20% reported riding with a driver who had been drinking.[22] In 2010, 1 in 5 teen drivers involved in a fatal motor vehicle collision had some alcohol in their system, and most had blood alcohol levels higher than the legal limit for adults.[23] An estimated 97 000 students aged 18 to 24 years have reported an alcohol-related sexual assault or date rape; 696 000 students aged 18 to 24 years have been assaulted by another student who was under the influence of alcohol[24,25] An estimated 1 in 4 college students report academic consequences from drinking such as missing class, doing poorly on examinations or papers, falling behind in class, and receiving lower grades.[1,24,26]

### Potential Harms

Possible harms of screening for unhealthy alcohol use include stigma, anxiety, labeling, discrimination, privacy concerns, and interference with the patient-clinician relationship. The USPSTF did not find any evidence that specifically examined the harms of screening for alcohol use in adolescents.

### Current Practice

Research suggests that although a majority of pediatricians and family practice clinicians report providing some alcohol prevention services to adolescent patients, they do not consistently screen and counsel for alcohol misuse.[27] Survey results indicate that screening was more likely if adolescents were older (aged 15 to 17 years).[27] However, the quality of screening practices, tools used, and interventions provided varied widely. Current data on rates of screening are lacking. Reported barriers to screening include time constraints, lack of knowledge about best practices, and lack of services for adolescent patients who screen positive.[1,28]

## Useful Resources

The AUDIT and AUDIT-C, which screen for unhealthy alcohol use in adults 18 years or older, including pregnant women, are available from the Substance Abuse and Mental Health Service Administration (SAMHSA), as well as other resources.[29,30] More information about SASQ and counseling for unhealthy alcohol use is available from the NIAAA.[31] Clinician guides are available from the WHO[32] and the American Academy of Family Physicians.[33] An implementation guide for primary care practices is available from the Centers for Disease Control and Prevention.[34]

The Community Preventive Services Task Force recommends electronic screening and brief interventions to reduce excessive alcohol consumption in adults. It found limited information on the effectiveness of electronic screening and brief interventions in adolescents.[35] The Community Preventive Services Task Force has also evaluated public health interventions (ie, interventions occurring outside of the clinical practice setting) to prevent excessive alcohol consumption.[36]

The USPSTF has made recommendations on screening for and interventions to reduce the unhealthy use of other substances, including illicit drugs[37] and tobacco.[38]

## Other Considerations

### Research Needs and Gaps

The USPSTF has identified several research gaps. Although difficult, conducting a trial with an unscreened comparison group to understand the population-level effects of screening in primary care settings would be valuable. More direct evidence is needed on the harms associated with screening and behavioral interventions. The USPSTF found a preliminary study that evaluated the USAUDIT and USAUDIT-C, recent US adaptations of the AUDIT and AUDIT-C. Further test performance studies are needed to confirm their accuracy in identifying unhealthy alcohol use in various populations. More evidence on important clinical outcomes is needed, such as longer-term morbidity, mortality, health care utilization, and social and legal outcomes. Trials designed a priori to report subgroup effects in diverse populations (eg, by age, sex, race/ethnicity, or baseline severity) would be useful. Limited evidence is available to assess the effects of screening and behavioral counseling in adolescents, and high-quality studies specifically addressing this population are needed. In addition, studies in adolescents are often conducted in school settings, which may not translate to primary care settings. More studies of adolescents in primary care settings are needed.

## Discussion

### Burden of Disease

High-risk drinking increased by almost 30% between 2001-2002 and 2012-2013.[26] In 2016, an estimated 26.2% of adults 18 years or older reported heavy-use (binge drinking) episodes and 6.6% reported heavy drinking within the previous month[20]; an estimated 7.8% of men and 4.2% of women met the criteria for AUD.[20] Unhealthy alcohol use is the third-leading preventable cause of death in the United States.[6,39,40] One of 10 deaths among adults aged 20 to 64 years can be attributed to excessive alcohol use.[6,39,40] In the United States, from 2006 to 2010, an estimated 88 000 deaths each year were attributed to alcohol use, with an estimated 2.5 million years of potential life lost.[6] Of these 88 000 deaths, 44% were from chronic conditions (eg, alcoholic liver disease) and 56% were from acute conditions (eg, injuries from motor vehicle collisions).[6] Excessive alcohol use also contributed to 3.2% to 3.7% of cancer deaths, including breast, gastrointestinal, oral cavity, and neck cancer.[41] Among adolescents aged 12 to 17 years, 9.2% reported being current alcohol users and 4.9% reported heavy use episodes in the previous month. Approximately 488 000 adolescents have AUD (2.4% and 1.5% of female and male adolescents, respectively).[20] In 2005, unhealthy alcohol use in college students aged 18 to 24 years contributed to an estimated death of 1825 students through unintentional injuries (eg, motor vehicle collisions),[25,42] and about 1 in 4 students report that alcohol use contributes to missing or falling behind in classes, low grades, and poor performance on examinations and papers.[25,42] In 2010, excessive alcohol use cost the United States an estimated $249 billion in loss in workplace productivity, health care expenses, criminal justice expenses, and motor vehicle collisions.[43] Alcohol use during pregnancy can result in preterm birth and low birth weight. It is a major preventable cause of birth defects and developmental disabilities, including fetal alcohol spectrum disorders, and affects development of the fetal brain, endocrine system, gastrointestinal tract, heart, kidney, and liver.[7] The 2011-2013 Behavioral Risk Factor Surveillance System survey shows that 1 in 10 pregnant women aged 18 to 44 years reported consuming alcohol in the previous month, and 3.1% participated in binge drinking.[44]

### Scope of Review

The USPSTF commissioned a systematic evidence review to update its 2013 recommendation on screening for unhealthy alcohol use in primary care. In the previous recommendation, the USPSTF used the term "alcohol misuse" to define a wide range of drinking behaviors (eg, risky or hazardous alcohol use, harmful alcohol use, and alcohol abuse or dependence).[45] In accordance with the ASAM, the current recommendation uses the term "unhealthy use" rather than "misuse." The ASAM defines "unhealthy use" as any use of alcohol that increases the risk of health consequences or that has already led to health consequences, including an AUD diagnosis.[1,4] The evidence review examined the effectiveness of screening to reduce unhealthy alcohol use, morbidity, mortality, or risky behaviors and to improve health, social, or legal outcomes; the accuracy of various screening approaches; the effectiveness of counseling interventions to reduce unhealthy alcohol use, morbidity, mortality, or risky behaviors and to improve health, social, or legal outcomes; and the harms of screening and behavioral counseling interventions. The review did not include treatment with medications because medications are used to treat severe AUD and are not routinely used in screen-detected persons. Interventions to prevent alcohol use in adolescents was determined to be out of scope for this review.[1]

### Accuracy of Screening Tests

Forty-five studies (n = 277 881) addressed the accuracy of screening tools; 10 studies in adolescents, 5 in young adults, 27 in general adult populations, 1 in older adults, and 2 in pregnant or postpartum women. Twenty-eight studies were fair quality and 17 were good quality. Most studies took place in the United States (62%), and 51% of the studies recruited patients from primary care settings.[1]

Studies evaluated AUDIT, AUDIT-C, ASSIST, and a variety of 1- or 2-item screening tests for detecting the full spectrum of unhealthy alcohol use. Screening instruments addressed a variety of elements, such as quantity of drinks, drinking frequency, or typical total number of drinks over a specific period (quantity × frequency), and a variety of response categories and cutoffs.[1]

Reference standards were structured diagnostic interviews (eg, Composite International Diagnostic Interview, Alcohol Use Disorder and Associated Disabilities Interview Schedule, or Mini International Neuropsychiatric Interview Plus). Some studies used a diagnostic interview in combination with other instruments (eg, in combination with the ASSIST, to identify the full spectrum of unhealthy alcohol use) or a timeline follow-back interview.[1]

For adults, the AUDIT, AUDIT-C, and 1- or 2-item screening tests had acceptable sensitivity and specificity to detect the full spectrum of unhealthy alcohol use. Studies of the SASQ reported sensitivity of 0.73 to 0.88 (95% CI range, 0.65-0.89) and specificity of 0.74 to 1.00 (95% CI range, 0.69-1.00) for detecting unhealthy alcohol use (4 studies [n = 44 461]). Other 1- or 2-item screening tests generally showed sensitivity of 0.70 or greater. The standard of 6 or more drinks per occasion tended to have decreased sensitivity compared with the standard of 5 (men)/4 (women) or more drinks,

often with nonoverlapping confidence intervals. Other adult populations (young adults, older adults, and pregnant women) had similar results.[1]

Seven studies (n = 8852) evaluating the AUDIT for the detection of unhealthy alcohol use in general adult populations, using the recommended cutoff of higher than 8, reported a wide range of sensitivity (0.38-0.73 [95% CI, 0.33-0.84]) but high specificity (0.89-0.97 [95% CI, 0.84-0.98]). In many studies, sensitivity improved at lower cutoffs. Three studies (n = 2782) conducted in US primary care settings showed better accuracy (sensitivity, 0.64-0.86 [95% CI, 0.57-0.91] and specificity, 0.74-0.94 [95% CI, 0.68-0.95] at cutoffs of 3, 4, or 5).[1]

Sensitivity of the AUDIT-C for detecting unhealthy alcohol use in adults was similar to that of 1- or 2-item screening instruments. In most studies, the range of sensitivity was 0.73 to 0.97 for females (95% CI, 0.62-0.99; 5 studies [n = 2714]) and 0.82 to 1.00 for males (95% CI, 0.75-1.00; 4 studies [n = 1038]) at the standard cutoffs of 3 or higher (female) and 4 or higher (male), but the range of specificity was much wider (0.28-0.91 [95% CI, 0.21-0.93] and 0.34-0.89 [95% CI, 0.25-0.92] for females and males, respectively). Evidence on the use of the AUDIT-C in younger adults, older adults, and pregnant women was lacking.[1]

#### Pregnant Women

No studies among pregnant women reported on the test accuracy of any screening test for alcohol use or the full spectrum of unhealthy alcohol use (eg, AUDIT-C, AUDIT, ASSIST, TWEAK, or T-ACE).[1]

A study in American Indian women reported the test accuracy of 1- or 2-item screening instruments (quantity × frequency) to screen for any alcohol use during pregnancy. At the optimal cutoff, sensitivity was 0.77 (95% CI, 0.68-0.83) and specificity was 0.93 (95% CI, 0.86-0.96).[46]

#### Adolescents

Although multiple studies among adolescents demonstrated good accuracy of 1- or 2-item screening instruments and the AUDIT for detecting AUD, none reported on test accuracy for screening for the full spectrum of unhealthy alcohol use.[1] Only 1 study evaluated the accuracy of detecting unhealthy alcohol use in adolescents. One study (n = 225) in a German high school reported on the test accuracy of the AUDIT-C for detecting the full spectrum of unhealthy alcohol use (males and females combined), with a sensitivity of 0.73 (95% CI, 0.60-0.83) and a specificity of 0.81 (95% CI, 0.74-0.86) at the optimal cutoff of 5 or higher.[47] Evidence to determine whether brief (1- to 3-item) screening instruments or the AUDIT can detect alcohol use in adolescents was lacking.[1]

### Effectiveness of Screening and Behavioral Counseling Interventions

No trials examined the direct effects of screening for unhealthy alcohol use on alcohol use or health, social, or legal outcomes.

#### Alcohol Use and Other Risky Behaviors

Ten good-quality trials and 58 fair-quality trials (n = 36 528) reported on alcohol use and other risky behaviors. The majority of trials (60%) were conducted in the United States. Intervention settings were predominantly in primary care clinics (62%).[1] Two trials were in adolescents, 22 in college-aged or young adults, 29 in general adult populations, 4 in older adults, and 11 in pregnant or postpartum women.[1] Trials were generally limited to study participants who reported a prespecified level of alcohol use on a screening instrument such as the AUDIT. Outcomes were generally reported at 6- to 12-month follow-up or during the late pregnancy/early postpartum period for abstinence during pregnancy. Trials demonstrated high heterogeneity; effect size was not clearly associated with any intervention characteristics. Data on effectiveness in important subpopulations were very limited.[1] The most commonly reported subpopulation analysis (by sex) did not show differences in the effectiveness of the interventions.[1] The most commonly reported alcohol use outcome was number of drinks per week. Among 37 adult trials (n = 15 974), adults in intervention groups reduced the number of drinks per week more than adults in control groups (weighted mean difference between groups in change from baseline, −1.59 [95% CI, −2.15 to −1.03; $I^2$ = 63%). The proportion exceeding recommended drinking limits was reduced (odds ratio [OR], 0.60 [95% CI, 0.53 to 0.67]), as well as the proportion reporting a heavy-use episode (OR, 0.67 [95% CI, 0.58 to 0.77]). Analyses limited to trials conducted in US primary care settings suggest that effects in the most applicable trials were comparable or larger than the overall effect (weighted mean difference, −2.82 [95% CI, −3.87 to −1.76]).[1]

Interventions among adults resulted in an absolute increase of 14% more participants drinking within recommended limits, meaning 7 adults would need to be treated to achieve 1 adult drinking within recommended limits (number needed to treat, 7.2 [95% CI, 6.2 to 11.5]).[1]

Interventions increased the proportion of pregnant women reporting abstinence (OR, 2.26 [95% CI, 1.43 to 3.56]). Based on these results, interventions doubled the odds that women remained abstinent from alcohol during pregnancy (number needed to treat, 6.0 [95% CI, 4.3 to 12.5]).[1] Evidence on the effects of interventions to reduce unhealthy alcohol use in adolescents was limited to 2 trials; both found mixed results for reduced alcohol use.[1]

Benefits continued 24 months or beyond in 4 of 7 trials with longer-term outcomes. Very limited data suggest that benefits from alcohol use interventions can be maintained over 2 to 4 years, including the number of drinks per week and some health outcomes.[1] However, several trials in younger adults found that beneficial effects appeared at 6 months but were no longer statistically significant at 12 months, suggesting that beneficial effects may deteriorate more quickly in younger adults.[1]

Few changes in other behavioral outcomes (eg, drug use, sex after alcohol use, and seeking help for unhealthy alcohol use) were either observed or were rarely reported.[1]

#### Health, Social, and Legal Outcomes

Forty-one good- and fair-quality trials (n = 20 324) reported health, social, and legal outcomes; however, no particular outcomes were commonly reported. In addition, reported outcomes were generally not statistically significant and inconsistently favored the intervention group.[1] In adults, 8 trials reported a statistically nonsignificant reduction in all-cause mortality (OR, 0.64 [95% CI, 0.34 to 1.19]).[1] One good-quality study showed reductions in emergency department visits and controlled substance or liquor violations at 4-year follow-up.[48] Trials in young adults demonstrated a small reduction in alcohol-related consequences (standardized mean difference, −0.06 [95% CI, −0.11 to −0.01]).[1]

### Potential Harms of Screening and Behavioral Counseling Interventions

Potential harms of screening include stigma, labeling, discrimination, privacy concerns, and interference with the patient-clinician relationship.[1] In addition, there may be legal concerns for pregnant women in some states.[49] No studies evaluated the harms of screening for unhealthy alcohol use.

One possible harm of behavioral counseling interventions could be an unexpected paradoxical increase in alcohol consumption. One good-quality and 5 fair-quality trials (n = 3650) reported on harms. There was very limited evidence on intervention harms.[1] Interventions reviewed and discussed above generally reported benefits, including reductions in alcohol consumption. Therefore, paradoxical and theoretical increases in alcohol use with interventions are unlikely.[1]

### Estimate of Magnitude of Net Benefit

Adequate evidence supports a moderate beneficial effect of screening for unhealthy alcohol use followed by brief behavioral counseling interventions in adults. Screening and behavioral counseling interventions in the primary care setting can reduce unhealthy drinking behaviors in adults, including heavy episodic drinking, high daily or weekly levels of alcohol consumption, and exceeding recommended drinking limits. Although the USPSTF found limited specific evidence for pregnant women, it determined that available studies of behavioral counseling interventions for unhealthy alcohol use in pregnant women supported increased likelihood of alcohol abstinence during pregnancy with intervention.

Available studies have not focused on the effects of screening and behavioral counseling interventions on longer-term health outcomes, such as alcohol-related disease or death. However, adequate epidemiologic evidence links reduced levels of alcohol consumption with a reduced risk for morbidity and mortality, providing indirect support that behavioral counseling interventions that reduce acute and sustained alcohol intake levels can help improve some health outcomes of unhealthy alcohol use.[8] A large body of observational evidence also links alcohol use in pregnant women with an increased risk for subsequent birth defects, such as fetal alcohol spectrum disorders.[50,51]

Given the noninvasive nature of screening and behavioral counseling interventions for unhealthy alcohol use, the USPSTF determined the magnitude of harms to be small to none in adults and pregnant women. Therefore, the USPSTF concludes with moderate certainty that the net benefit of screening and brief behavioral counseling interventions for unhealthy alcohol use in adults, including pregnant women, is moderate.

Evidence in adolescents is limited. As such, the USPSTF concludes that the evidence is insufficient to assess the balance of benefits and harms of screening and brief behavioral counseling interventions for unhealthy alcohol use in adolescents.

### Response to Public Comment

A draft version of this recommendation statement was posted for public comment on the USPSTF website from June 5, 2018, to July 2, 2018. Some comments expressed concerns about the lack of discussion of specific populations. In response, the USPSTF added language about the harms of alcohol consumption in adolescents to the Clinical Considerations section and the harms of alcohol use during pregnancy to the Discussion section. The USPSTF also added more useful resources to the Clinical Considerations section. Some comments requested clarification on which screening tools were being discussed; the USPSTF clarified this by adding references.

## Update of Previous Recommendation

This recommendation replaces the 2013 USPSTF recommendation statement on screening and behavioral counseling interventions for alcohol misuse. The term "alcohol misuse," used in the 2013 recommendation, has been replaced by the term "unhealthy alcohol use."

## Recommendations of Others

The US Surgeon General,[52] NIAAA,[2] Centers for Disease Control and Prevention,[34] and ASAM[53] recommend routinely screening adult patients for unhealthy alcohol use and providing them with appropriate interventions, if needed. The US Department of Veterans Affairs recommends annual screening with the AUDIT-C and SASQ.[54] The American Academy of Pediatrics recommends screening all adolescent patients for alcohol use with a formal, validated screening tool (such as the CRAFFT) at every health supervision visit and appropriate acute care visits, and responding to screening results with the appropriate brief intervention and referral if indicated. Pediatricians should become familiar with adolescent SBIRT approaches and their potential for incorporation into universal screening and comprehensive care of adolescents in the medical home.[55] The American College of Obstetricians and Gynecologists[56] and WHO[57] recommend screening all women for unhealthy alcohol use before pregnancy and in their first trimester with a validated tool, and offering a brief intervention to all pregnant women who use alcohol.

### Protecting Our Community from COVID-19

Along with local organizations like 100 Black Women, Healthy Blue collaborated with Walgreens to make vaccines accessible to every eligible patient in our community. Healthy Blue hosted a mobile health equity clinic at the Capital Area Transit System terminal, giving transit riders twelve and older the opportunity to receive the vaccine. As an added incentive to vaccinate, Healthy Blue arranged for the first 100 families to the event to receive fresh produce and protein boxes from Top Box Louisiana.

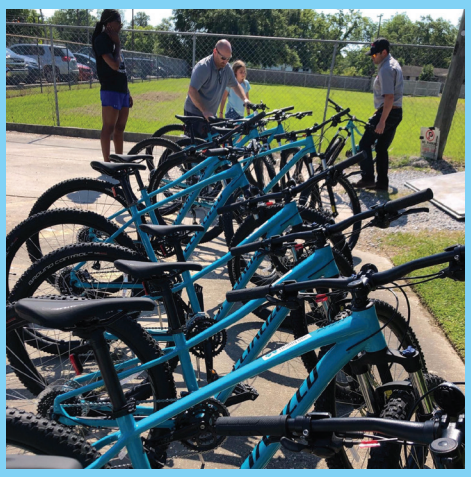
*Anthem, Inc. acquired Medicaid health plans in Missouri and Nebraska from WellCare in January 2020. NCQA most recently assigned health plan ratings in September 2019, based on quality measurement data from the 2018 measurement year. We respectfully request LDH omit the ratings for MO and NE from evaluation in this procurement because they predate our company's involvement and do not reflect our corporate experience. Please note these health plans were formerly operating as Missouri Care, Incorporated and WellCare of Nebraska, Inc.



### Encouraging Healthy Lifestyles Through the Bike Library Program

The SWLA Center for Health Services (SWLA Center) rolled out a new bike fleet funded by Healthy Blue. The bike library launched in July of 2019 and consists of 20 bikes and safety helmets. It is a great opportunity for families to spend a few hours outside to make the first steps toward a healthier lifestyle. Community members visit the Fitness Center at the SWLA Center in Lake Charles to check out a bike and then hit the road. Bikes are free of charge to the community, and they are intended for short-term recreational rides. On June 29, 2021, a local high school track team took advantage of the guided bike ride. Healthy Blue and SWLA Center remain committed to the communities they serve.

**Working with DeWanna's Closet to Address Food Insecurity Among Youth**

DeWanna's Closet (DC) understands that food insecurity can wreak havoc on a community, especially our youth. DC wanted to start a weekend food program for school-aged kids, and Healthy Blue's grant has given them the jumpstart to pursue the endeavor. Educators within Calcasieu Parish Schools identify students whom they feel may lack consistent nutrition over the weekend. The educators make a confidential referral to DC, who will prepare and supply a nutritional food package that the students can easily transfer from school to home.

## 4.4 Veteran-Owned and Service-Connected Disabled Veteran-Owned Small Entrepreneurships (Veteran Initiative) and Louisiana Initiative for Small Entrepreneurships (Hudson Initiative)

### 4.4.1 Healthy Blue Supports the Veteran Initiative and the Hudson Initiative

Healthy Blue is not a certified Veteran Initiative or Hudson Initiative small entrepreneurship. Healthy Blue does, however, actively support Louisiana-based small business under the Veteran and Hudson Small Entrepreneurship Initiatives (Certified Businesses). [redacted] We have included names of Certified Business subcontractors, including a description of work and the dollar value of each subcontract as Attachment 4.4-1. We will continuously review our list of subcontractors, identifying opportunities to add Hudson/Veteran businesses, and increasing our spend. Our team provides outreach to Certified Businesses to renew their certifications, and we work with other small businesses to inform them about the value of becoming a Certified Business.

[redacted]

### 4.4.2 Acknowledgement of Points Evaluation Process

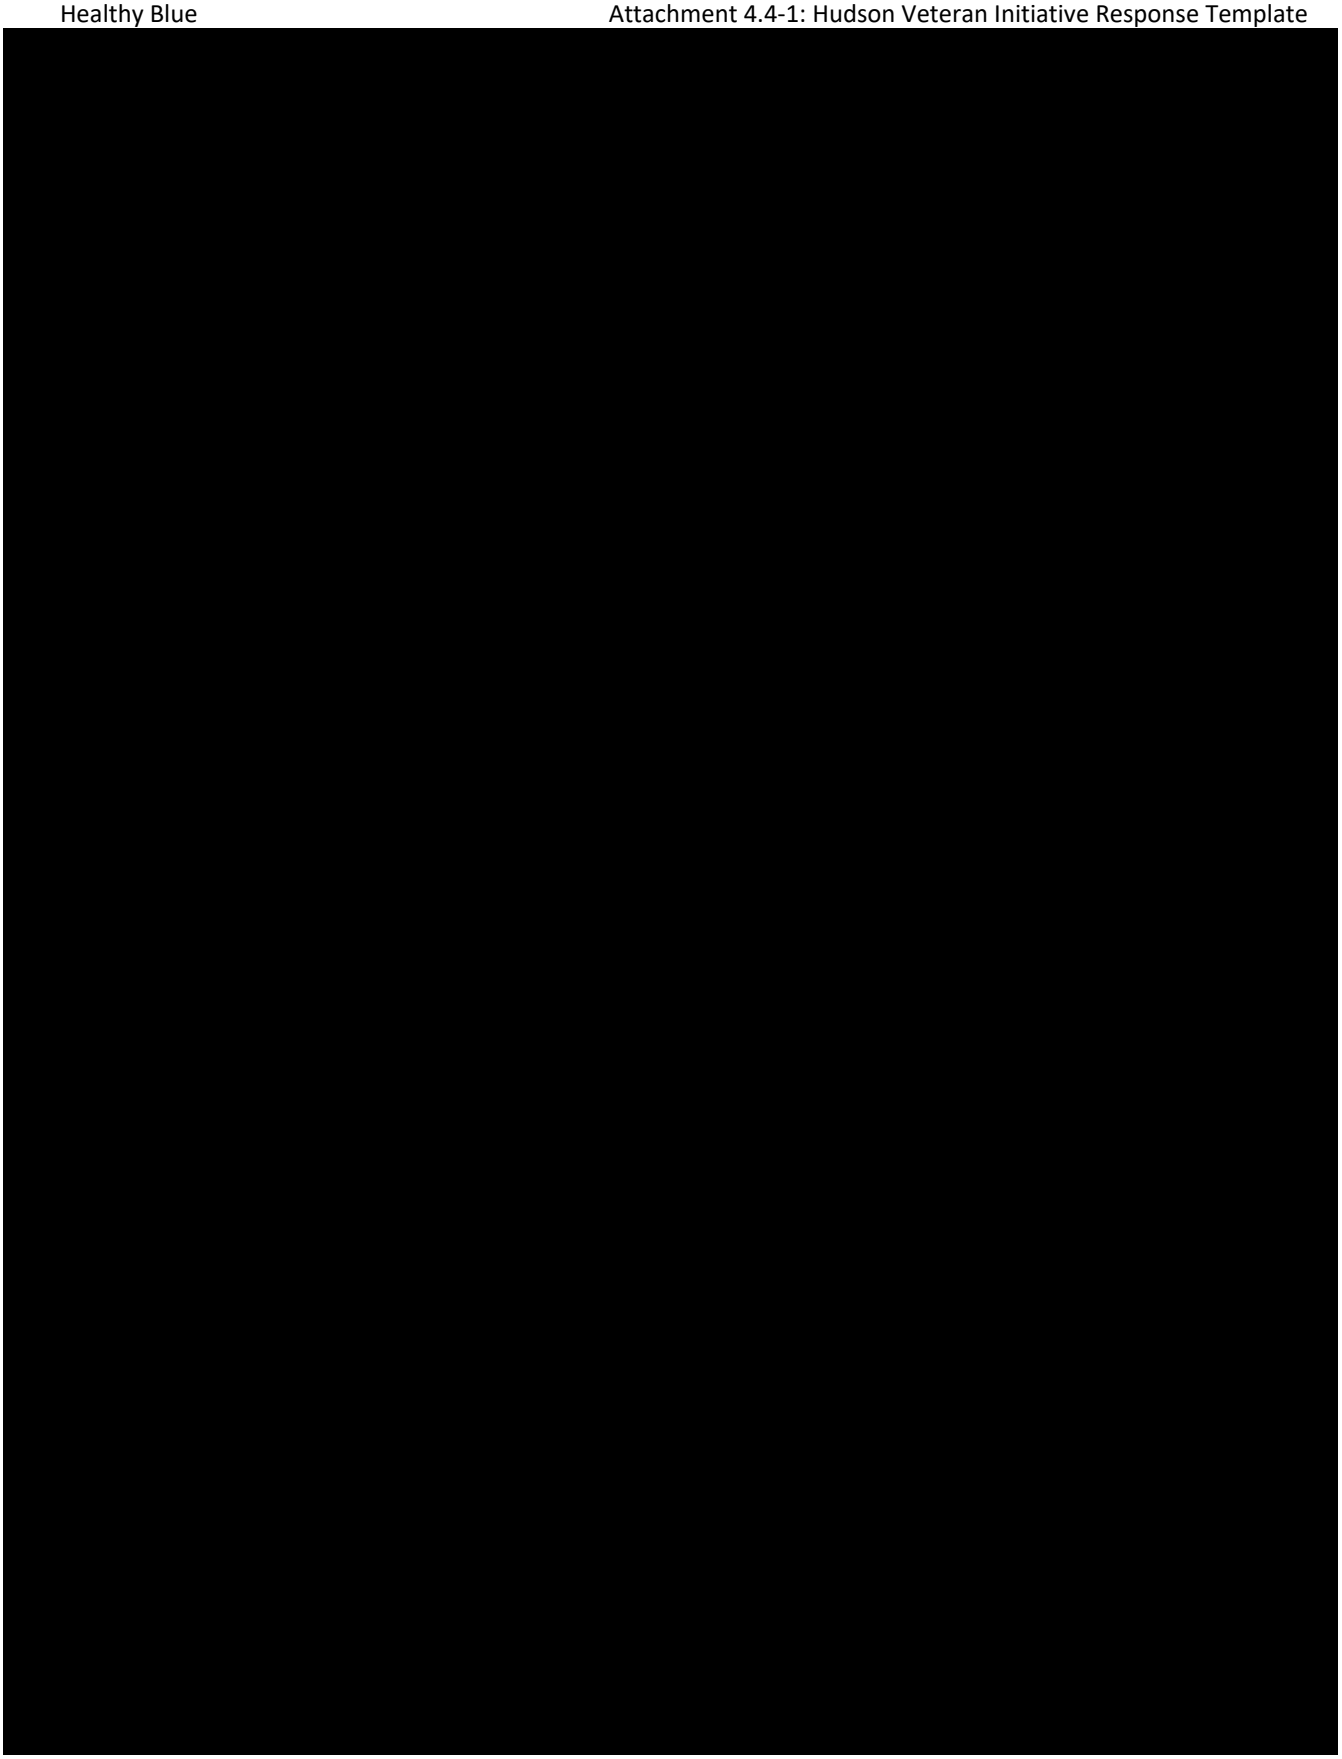
Healthy Blue acknowledges and understands the point evaluation process outlined in requirement 4.4.2 of this RFP. Healthy Blue is not a certified small entrepreneurship; however, we do engage several Veterans Initiative or Hudson Initiative certified small entrepreneurships, which we have outlined in Attachment 4.4-1, as requested.

### 4.4.3 Excel File Hudson Veteran Initiative Response Template Submitted

We have submitted an electronic Excel file, in the template format obtained from LDH's procurement site as Attachment 4.4-1. The completed template includes our Veteran Initiative/Hudson Initiative Certified Business subcontractors' information as requested.

### 4.4.4 Completed Information for All Listed Veterans Initiative or Hudson Initiative Subcontractors

Attachment 4.4-1 includes descriptions of each certified Veteran Initiative or Hudson Initiative small entrepreneurship subcontractor with Healthy Blue, including their name, certified designation, and anticipated dollar value.



[redacted]
