

Is Consolidation the Answer? We Can Help!

The Louisiana Department of Health has created a Public Health Water Infrastructure Consolidation Initiative to help eliminate public water systems that are not in compliance with the Safe Drinking Water Act requirements and offer no potential for resolving those issues. These systems pose a threat to public health.

This initiative will provide 100% principal forgiveness loans for consolidation projects across the state that would eliminate these systems that pose a threat.

**Funds are limited,
so act quickly.**
