\_\_\_(*e.g.* 1Q20??)

For Example: DBP01-123 Main Street (A separate OEL must be submitted to the State for each location that exceeds the OEL for TTHM and/or HAA5.)

## Stage 2 Disinfectants and Disinfection Byproduct Rule

## Operational Evaluation Level & Report

PWS Name			PWS ID #				
For calculating the	e OEL, use the curren	nt quarter results	and the 2 pr	evious quarterly results per location.			
<b>Operation Evaluation Level (OEL) Calculation</b> (PQ = Previous Quarter, CQ = Current Quarter							
Total Trihalomethanes (TTHMs) – MCL = 80 ppb $(0.080 \text{ mg/L})$							
PQ	PQ	CQ	OEL =	(PQ+PQ+2*CQ)/4	OEL exceeds 80?		
Haloacetic	Acids – Five	(HAA5) - N	ACL = 6	50 ppb (0.060 mg/L)			
PQ	PQ	CQ	OEL =	(PQ+PQ+2*CQ)/4	OEL exceeds 60?		
OEL example for Total Trihalomethanes:							
PQ	PQ	CQ		OEL = (PQ+PQ+2*CQ)/4	OEL exceeds 80?		
81	79	83		(81+79+2*83)/4 = 81.5	Yes		

If the TTHM or HAA5 OELs exceeded the MCLs, fill this form out to the best of your ability and submit it to the State no later than 90 days after the exceedance. Explanations may need additional documentation. Make sure all documentation includes your PWS ID on each page.

A. Source & Source Quality		
1. Have your source practices changed? e.g., changed well pumping depth, well rehab, changed intake depth or changed intake structure, changed pumping rates or pumping times and frequency, etc.	□Yes	🗌 No
2. Have you changed/added sources? e.g., turned on emergency sources, drilled new well, changed/added purchase connection, etc.	□Yes	🗌 No
3. Have you seen changes in source water quality? e.g., turbidity, pH, temp, alkalinity, hardness, drought conditions, heavy rain, changes in animal feed lots, agricultural practices, etc. Surface water systems should also consider algae blooms, fires in source water (protection) areas, increased filter changes or number of backwash cycles required.	□Yes	□ No
If you answered " <u>YES</u> " to any of the questions above (Section A), please explain:		
B. Treatment		
1. Have you changed the amount or type of disinfectant? e.g., chlorine to chloramines, increase/decrease disinfectant dosage, etc.	□Yes	🗌 No
2. Have you changed or added locations of disinfectant points?	□Yes	🗌 No
3. Other than disinfection, have you changed or made additions to any treatment processes?	□Yes	🗌 No
4. Have you made changes to any other chemical applications? e.g., change any chemicals (change coagulant type), changes in application points, changing dosage of any chemical, etc.	□Yes	🗌 No
If you answered " <u>YES</u> " to any of the questions above (Section B), please explain:		

C. Distribution System Operations		
1. Have you added additional service connections (industry or residential)? e.g., adding	☐ Yes	🗌 No
additional pipes or annexing additional areas of service which could change residence times		
2. Have you experienced significant increases or decreases in water demand? e.g., drought	T Yes	□ No
restrictions, industry opening/closing, population change		
3. Has additional piping created new loops or dead-ends?	☐ Yes	🗌 No
4. Does your storage tank fill and drain from the bottom (potentially causing stagnation at	☐ Yes	🗌 No
the top)?		
5. Has the residence time of your tank(s) increased or decreased? i.e., are tanks being	☐ Yes	🗌 No
filled/drained more or less often?		
6. Have you had frequent line breaks or major construction in your distribution system?	☐ Yes	🗌 No
7. Do you purchase water that has no disinfectant or a different disinfectant than what you	☐ Yes	🗌 No
currently use? e.g. you purchase water with chloramines and you add chlorine		
8. Do you have areas where disinfectant residual levels are below the State minimum	☐ Yes	🗌 No
required?		
9. Have you had significant changes in chlorine demand to maintain residuals?	☐ Yes	🗌 No
10. Have you changed your distribution flushing procedures?	☐ Yes	🗌 No
11. Have you had any changes in treatment that occur in distribution? e.g., changes in	The Yes	□ No
booster chlorination or amounts?		
12. Have you had an increase in customer complaints?	☐ Yes	□ No
If you answered " <u>YES</u> " to any of the questions above (Section C), please explain:		
D. Additional Questions		
1. Do you have tank management/operational procedures? e.g., cleaning schedule, set	□Yes	□ No
1. Do you have tank management/operational procedures? e.g., cleaning schedule, set operational levels of your tank (high and low), etc?	_	
<ol> <li>Do you have tank management/operational procedures? e.g., cleaning schedule, set operational levels of your tank (high and low), etc?</li> <li>Can you allow the tank(s) to drain lower to flush out "older" water?</li> </ol>	 □ Yes	No
<ol> <li>Do you have tank management/operational procedures? e.g., cleaning schedule, set operational levels of your tank (high and low), etc?</li> <li>Can you allow the tank(s) to drain lower to flush out "older" water?</li> <li>Can you reduce chlorine/chloramine dosage and still maintain required residuals in</li> </ol>	_

## E. Additional Information

Please explain what steps you could take to minimize future formations. e.g., changes in treatment, distribution, etc.

I certify that the information in this entire report, including any attachments, is true and accurate to the best of my knowledge. I acknowledge that any knowingly false or misleading information may be punishable under Louisiana Revised Statue 14:133 and other applicable laws.
