

Louisiana		State Action Plan Table		2026 Application/2024 Annual Report	
Priority Needs	Five-Year Objectives	Strategies	Evidence-Based or –Informed Strategy Measures	National and State Performance Measures	National and State Outcome Measures
Women/Maternal Health					
Reliable data is available to inform the design, monitoring, and evaluation of MCH policies and services.	OBJ 1.1: In FFY2030, at least 80% of maternal and infant health constituents report that they are “highly” or “very highly” satisfied with the quality of data products available to inform strategic decision-making.	Strategy 1.1.1: Improve key constituents’ (policymakers, providers, MCH populations) understanding of the drivers and underlying factors contributing to Louisiana’s maternal health outcomes by directly carrying out epidemiological surveillance / investigations, disseminating health education messages, and presenting recommendations to improve maternal health policies and services.	SPM ESM 1.1 - In FFY2026, at least 5 maternal health data products will be produced or updated and disseminated to key constituents to facilitate data-informed decision-making.	SPM 1: Percent of maternal health constituents reporting “high” or “very high” satisfaction with the quality of data products available.	<b><u>Linked NOMs:</u></b> Maternal Mortality Severe Maternal Morbidity
Communities and families have timely access to reliable and accessible information.	OBJ 1.2: In FFY2030, at least 80% of maternal health constituents will report that they “frequently” or “very frequently” share maternal health education messages with their families and other community members.	Strategy 1.2.1: Improve community leaders’ understanding of effective strategies for responding to key risk and protective factors affecting maternal health by convening community action and advisory teams.	SPM ESM 2.1 - In FFY2026, at least 300 community leaders will receive information and resources supporting the design of local maternal health education efforts.	SPM 2: Percent of maternal health constituents reporting that they “frequently” or “very frequently” share key health education messages with their families and other community members.	<b><u>Linked NOMs:</u></b> Maternal Mortality Severe Maternal Morbidity
Community / family leaders and CBOs meaningfully participate in the design, monitoring, and evaluation of MCH policies and services.	OBJ 1.3: In FFY2030, at least 80% of family, community and/or community based organization leaders report that they are “highly” or “very highly” satisfied with the training and/or coaching received to support their meaningful participation in the design, monitoring and evaluation of maternal and infant health policies and services.	Strategy 1.3.1: Training and coaching for family, community, and community based organization leaders participating in Title V supported maternal and infant health programs and activities.	SPM ESM 3.1 - In FFY2026, at least 15 family, community, and/or CBO leaders will receive training/coaching to support their meaningful participation in the design, monitoring, and evaluation of maternal and infant	SPM 3: Percent of family, community and/or community based organization leaders engaged in Title V supported maternal and infant health programs who reported “high” or “very high” satisfaction with the training / coaching received.	<b><u>Linked NOMs:</u></b> Severe Maternal Morbidity Maternal Mortality

Priority Needs	Five-Year Objectives	Strategies	Evidence-Based or –Informed Strategy Measures	National and State Performance Measures	National and State Outcome Measures
			health policies and services.		
MCH systems of care have improved capacities to ensure access to quality maternal and infant health services.	OBJ 1.4: (a) In FFY2030, at least 98% of women will attend a postpartum checkup within 12 weeks after giving birth. (b) In FFY2030, at least 85% of women who attended a postpartum checkup will report that they received the recommended care components.	<p>Strategy 1.4.1: Improve access to quality family planning services by providing funding and technical assistance to the Office of Public Health's Bureau of Regional and Clinical Operation's (BRCO) Parish Health Units and other community-based partners.</p> <p>Strategy 1.4.2: Improve access to doula services by facilitating doula registration with the Louisiana Doula Registry Board.</p> <p>Strategy 1.4.3: Improve access to safe and quality birthing services by providing technical assistance to birthing hospitals, freestanding birthing centers and other clinical and community based providers.</p> <p>Strategy 1.4.4: Improve access to caregiver depression screening &amp; referral by providing technical assistance including training and tele-consultation services to perinatal providers.</p>	<p>ESM PPV.1 - In FFY2026, at least 76% of birthing hospitals in Louisiana will achieve Louisiana Birth Ready and Louisiana Birth Ready Plus designation.</p> <p>ESM PPV.2 - In FFY2026, at least 85% of providers participating in the perinatal mental health ECHO training will have improved knowledge, attitudes, and/or behaviors.</p>	NPM - Postpartum Visit	<p><b><u>Linked NOMs:</u></b></p> <p>Maternal Mortality</p> <p>Neonatal Abstinence Syndrome</p> <p>Women's Health Status</p> <p>Postpartum Depression</p> <p>Postpartum Anxiety</p>
Quality steering / advisory mechanisms ensure effective collaboration in the design, monitoring, and evaluation of MCH policies and services.	OBJ 1.5: In FFY2030, at least 80% of participants "strongly" or "very strongly" agree that the steering / advisory mechanism is “effectively contributing to the improvement of maternal and infant policies and services”.	Strategy 1.5.1: Improve maternal health policies and services by directly convening steering / advisory mechanisms that include participation of policymakers, providers, and MCH populations.	SPM ESM 4.1 - In FFY2026, at least 80% of Title V supported steering / advisory mechanisms produce actionable recommendations to improve maternal and infant health policies and services.	SPM 4: Percent of participants who "strongly" or "very strongly" agree that the maternal and infant health steering / advisory mechanism is “effectively contributing to the improvement of Louisiana's infant health policies and services”.	<p><b><u>Linked NOMs:</u></b></p> <p>Severe Maternal Morbidity</p> <p>Maternal Mortality</p>
State policies relevant to MCH programs and services are modernized to	OBJ 1.6: By FFY2030, at least 2 maternal health policy priorities have been advanced through 2 stages of the policy process towards implementation or other resolution.	Strategy 1.6.1: Contribute to advancing maternal health policy priorities through the five stages of the policy process (Identification, Analysis, Strategy and Policy Development, Enactment, Implementation) by producing data / information briefs and providing subject-matter expertise to inform policy dialogue.	SPM ESM 5.1 - In FFY2026, at least 1 data / information brief is produced to inform the policy dialogue.	SPM 5: Number of maternal health policy priorities advanced through 2 stages of the policy process towards implementation or other	<p><b><u>Linked NOMs:</u></b></p> <p>Severe Maternal Morbidity</p> <p>Maternal Mortality</p>
