

# GET VACCINATED!

## PROTECT YOURSELF AND YOUR BABY FROM COVID-19

- COVID-19 vaccination is recommended for all people 5 years and older, including people who are pregnant, breastfeeding, trying to get pregnant, or might become pregnant in the future.
- The benefits of receiving a COVID-19 vaccine outweigh any known or potential risks of vaccination during pregnancy.
- There is currently no evidence that any vaccines, including COVID-19 vaccines, cause problems trying to get pregnant.
- COVID-19 vaccination in people who are pregnant or breastfeeding builds antibodies that might protect the baby.

**Ask your provider about the COVID-19 vaccine.**
