

LA HAP

LA HAP stands for Louisiana Health Access Program, which is the AIDS Drug Assistance Program (ADAP) for the state of Louisiana. LA HAP is a federally funded program that provides access to medications for uninsured individuals and assistance with premiums and cost shares for insured individuals for the purpose of ensuring that clients access health care and achieve viral suppression. Please visit www.lahap.org for more information regarding the program.

LA HAP publishes quarterly factsheets for the entire state and each public health region. All LA HAP factsheets for the first quarter of 2017 are compiled in this document.

Louisiana Health Access Program Statewide Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 3,730 clients were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=162) were first time enrollees.

There were 268 clients who disenrolled from the program.

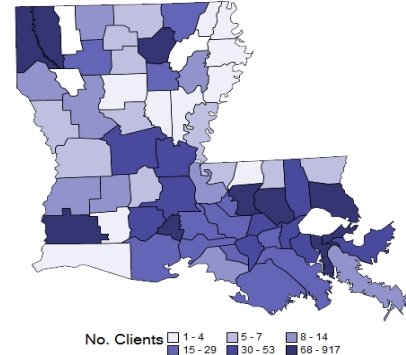

A total of 442 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 175 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The majority of clients live in the New Orleans and Baton Rouge regions, 38% (n=1,436) clients and 24% (n=895) clients respectively.

Medicaid expansion has decreased the number of enrolled clients. In the first quarter of 2016 there were 6,844 clients enrolled, a decrease of 46% when compared to the current quarter.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 43,936 claims including 33,678 (77%) drug claims, 2,650 (6%) copays, 703 (2%) deductibles and 6,905 (16%) premiums. Of these, 41,842 (95%) were for insured claims and 2,094 (5%) were for uninsured claims.

There were an average of 13.8 claims per person.

There were 2,845 clients who utilized health insurance assistance and 501 clients who utilized uninsured assistance.

Medicaid expansion has decreased the number of claims LA HAP assists with. There was a 34% decrease this quarter when compared to the same quarter in 2016.

CLINICAL OUTCOMES SUMMARY

A total of 98% (n=3,672) clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-eight percent (n=3,296) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 90% of insured clients were virally suppressed compared to only 81% of uninsured clients.

Medicaid expansion impacted the percentage of clients who are virally suppressed as clients with worse outcomes were transitioned onto Medicaid. Viral suppression for LA HAP clients increased from 80% in the first quarter of 2016 to 88% for the current quarter.

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

*Clients defined as 'In Care' had at least one CD4 or Viral Load reported between April 1, 2016 and March 31, 2017

†Clients defined as 'Virally Suppressed' had at least one Viral Load reported between April 1, 2016 and March 31, 2017

Louisiana Health Access Program New Orleans Region 1 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 1,436 clients from the New Orleans Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=53) were first time enrollees.

There were 96 clients who disenrolled from the program. The majority 72% (n=69) did not recertify, and another 17% (n=16) were eligible for Medicaid.

A total of 185 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 63 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The largest number of clients enrolled in LA HAP reside in the New Orleans Region.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 17,652 claims including 13,584 (77%) drug claims, 953 (5%) copays, 194 (1%) deductibles and 2,921 (17%) premiums. Of these, 16,829 (95%) were for insured claims and 823 (5%) were for uninsured claims.

There were an average of 14.4 claims per person.

There were 1,113 clients who utilized health insurance assistance and 197 clients who utilized uninsured assistance.

Forty percent of all LA HAP claims were for clients from the New Orleans Region.

CLINICAL OUTCOMES SUMMARY

A total of 99% (n=1,419) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Ninety-one percent (n=1,310) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The New Orleans Region has the second highest percentage of clients virally suppressed.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 93% of insured clients were virally suppressed compared to 84% of uninsured clients.

Only 69% of transgender clients achieved viral suppression compared to 91% of male clients despite having similar in care percentages.

Louisiana Health Access Program Baton Rouge Region 2 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 895 clients from the Baton Rouge Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 5% (n=45) were first time enrollees.

There were 47 clients who disenrolled from the program. The majority 74% (n=35) did not recertify, and another 21% (n=10) were eligible for Medicaid.

A total of 112 clients enrolled in the program to receive health insurance assistance who had previously been receiving uninsured assistance during the quarter.

There were 47 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

The second largest number of clients enrolled in LA HAP reside in the

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 10,141 claims including 7,799 (77%) drug claims, 491 (5%) copays, 166 (2%) deductibles and 1,685 (17%) premiums. Of these, 9,772 (96%) were for insured claims and 369 (4%) were for uninsured claims.

There were an average of 13.5 claims per person.

There were 693 clients who utilized health insurance assistance and 92 clients who utilized uninsured assistance.

Twenty-three percent of all LA HAP claims were for clients from the Baton Rouge Region.

CLINICAL OUTCOMES SUMMARY

A total of 99% (n=890) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-seven percent (n=776) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in Baton Rouge is similar to the statewide percentage of 88%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 88% of insured clients were virally suppressed compared to 77% of uninsured clients.

Louisiana Health Access Program Houma Region 3 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 190 clients from the Houma Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=8) were first time enrollees.

There were 14 clients who disenrolled from the program.

A total of 21 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 12 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Houma Region account for 5% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 2,323 claims including 1,737 (75%) drug claims, 184 (8%) copays, 47 (2%) deductibles and 355 (15%) premiums. Of these, 2,192 (94%) were for insured claims and 131 (6%) were for uninsured claims.

There were an average of 13.7 claims per person.

There were 149 clients who utilized health insurance assistance and 32 clients who utilized uninsured assistance.

Five percent of all LA HAP claims were for clients from the Houma Region.

CLINICAL OUTCOMES SUMMARY

A total of 99% (n=188) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Ninety-one percent (n=172) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Houma Region is higher than the statewide percentage of 88%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 93% of insured clients were virally suppressed compared to only 88% of uninsured clients.

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

Louisiana Health Access Program Lafayette Region 4 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 292 clients from the Lafayette Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 4% (n=13) were first time enrollees.

There were 13 clients who disenrolled from the program.

A total of 17 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 13 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lafayette Region account for 8% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 3,647 claims including 2,850 (78%) drug claims, 224 (6%) copays, 82 (2%) deductibles and 491 (14%) premiums. Of these, 3,456 (95%) were for insured claims and 191 (5%) were for uninsured claims.

There were an average of 14.3 claims per person.

There were 217 clients who utilized health insurance assistance and 46 clients who utilized uninsured assistance.

Eight percent of all LA HAP claims were for clients from the Lafayette Region.

CLINICAL OUTCOMES SUMMARY

A total of 97% (n=282) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-three percent (n=243) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Lafayette Region had the second lowest percentage of clients virally suppressed in the state.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% of insured clients were virally suppressed compared to 78% of uninsured clients.

Only 79% of black clients achieved viral suppression compared to 87% of white clients despite having similar in care percentages.

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

Louisiana Health Access Program Lake Charles Region 5 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 156 clients from the Lake Charles Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=4) were first time enrollees.

There were 15 clients who disenrolled from the program.

A total of 20 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the year.

There were 10 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Lake Charles Region account for 4% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 1,659 claims including 1,072 (65%) drug claims, 198 (12%) copays, 89 (5%) deductibles and 300 (18%) premiums. Of these, 1,630 (98%) were for insured claims and 29 (2%) were for uninsured claims.

There were an average of 12.4 claims per person.

There were 127 clients who utilized health insurance assistance and 12 clients who utilized uninsured assistance.

Four percent of all LA HAP claims were for clients from the Lake Charles Region.

CLINICAL OUTCOMES SUMMARY

A total of 97% (n=151) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-five percent (n=132) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Lake Charles Region is less than the statewide percentage of 88%.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 90% of insured clients were virally suppressed compared to only 69% of uninsured clients.

Louisiana Health Access Program Alexandria Region 6 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 102 clients from the Alexandria Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=3) were first time enrollees.

There were 13 clients who disenrolled from the program.

A total of 16 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 5 clients who enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Alexandria Region account for 3% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 1,082 claims including 877 (81%) drug claims, 46 (4%) copays, 8 (1%) deductibles and 151 (14%) premiums. Of these, 1,022 (94%) were for insured claims and 60 (6%) were for uninsured claims.

There were an average of 13.0 claims per person.

There were 74 clients who utilized health insurance assistance and 13 clients who utilized uninsured assistance.

Two percent of all LA HAP claims were for clients from the Alexandria Region.

CLINICAL OUTCOMES SUMMARY

All 102 clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-two percent (n=84) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Alexandria Region had the lowest percentage of clients virally suppressed in the state.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% of insured clients were virally suppressed compared to only 61% of uninsured clients.

Only 79% of black clients achieved viral suppression compared to 90% of white clients despite having similar in care percentages.

Louisiana Health Access Program Shreveport Region 7 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 260 clients from the Shreveport Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 6% (n=16) were first time enrollees.

There were 15 clients who disenrolled from the program.

A total of 42 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 10 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Shreveport Region account for 7% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

UTILIZATION SUMMARY

LA HAP assisted with 2,538 claims including 1,812 (71%) drug claims, 264 (10%) copays, 69 (3%) deductibles and 393 (16%) premiums. Of these, 2,315 (91%) were for insured claims and 223 (9%) were for uninsured claims.

There were an average of 11.7 claims per person.

There were 188 clients who utilized health insurance assistance and 42 clients who utilized uninsured assistance.

Six percent of all LA HAP claims were for clients from the Shreveport Region.

CLINICAL OUTCOMES SUMMARY

A total of 96% (n=249) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Eighty-three percent (n=216) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Shreveport Region had the second lowest percentage of clients virally suppressed.

Clients who are insured are more likely to be virally suppressed compared to those clients who are uninsured; 85% of insured clients were virally suppressed compared to 74% of uninsured clients.

Only 78% of black clients achieved viral suppression compared to 93% of white clients despite having similar in care percentages.

CARE CONTINUUM FOR INSURED & UNINSURED CLIENTS

*Clients defined as 'In Care' had at least one CD4 or Viral Load reported between April 1, 2016 and March 31, 2017

†Clients defined as 'Virally Suppressed' had at least one Viral Load reported between April 1, 2016 and March 31, 2017 with the most recent result <200 copies/mL

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 1,768 claims including 1,433 (81%) drug claims, 78 (4%) copays, 16 (1%) deductibles and 241 (14%) premiums. Of these, 1,646 (83%) were for insured claims and 122 (7%) were for uninsured claims.

There were an average of 13.1 claims per person.

There were 111 clients who utilized health insurance assistance and 35 clients who utilized uninsured assistance.

Four percent of all LA HAP claims were for clients from the Monroe Region.

CLINICAL OUTCOMES SUMMARY

A total of 98% (n=163) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Ninety percent (n=149) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The percentage of clients virally suppressed in the Monroe Region is similar to the statewide percentage of 88%.

Only 87% of black clients achieved viral suppression compared to 94% of white clients despite having similar in care percentages.

CARE CONTINUUM FOR CLIENTS BY INSURANCE STATUS

Louisiana Health Access Program Hammond/Slidell Region 9 Quarterly Report January 1, 2017 - March 31, 2017

ENROLLMENT SUMMARY

During the quarter, 233 clients from the Hammond/Slidell Region were enrolled in the Louisiana Health Access Program (LA HAP) of which 3% (n=8) were first time enrollees.

There were 12 clients who disenrolled from the program.

A total of 14 clients enrolled in the program to receive health insurance assistance who had previously been uninsured during the quarter.

There were 5 clients enrolled in the program to receive uninsured assistance only who had previously been insured during the quarter.

Clients living in the Hammond/Slidell Region account for 6% of LA HAP enrollees.

ENROLLED CLIENTS BY PARISH

CLAIM TYPES

UTILIZATION SUMMARY

LA HAP assisted with 3,126 claims including 2,514 (80%) drug claims, 212 (7%) copays, 32 (1%) deductibles and 368 (12%) premiums. Of these, 2,980 (95%) were for insured claims and 146 (5%) were for uninsured claims.

There were an average of 15.8 claims per person.

There were 173 clients who utilized health insurance assistance and 32 clients who utilized uninsured assistance.

Seven percent of all LA HAP claims were for clients from the Hammond/Slidell Region.

CLINICAL OUTCOMES SUMMARY

A total of 98% (n=228) of clients were defined as in care. These clients had at least one CD4 or viral load test reported in the past year.

Ninety-two percent (n=214) of clients were virally suppressed. These clients had a viral load test reported in the past year with the most recent result <200 copies/mL. The Hammond/Slidell Region has the largest percentage of clients virally suppressed in the state.

Only 86% of black clients achieved viral suppression compared to 94% of white clients despite having similar in care percentages.

CARE CONTINUUM FOR INSURED & UNINSURED CLIENTS

*Clients defined as 'In Care' had at least one CD4 or Viral Load reported between April 1, 2016 and March 31, 2017

†Clients defined as 'Virally Suppressed' had at least one Viral Load reported between April 1, 2016 and March 31, 2017 with the most recent result <200 copies/mL
